Title: Voluntary National Tests in Reading and Mathematics.

Abstract: The American Institutes for Research, under contract with the Office of Educational Research and Improvement, is coordinating the development of the Voluntary National Tests in Reading and Mathematics. Each Fall from 1997 to 2001, a pilot study of developed test items will help detect procedural problems and aid item selection for field tests conducted the following Spring.

Additional Information: The Department is requesting an emergency clearance for the Pilot Test of the Voluntary National Tests in Reading and Mathematics by October 21, 1997. If normal clearance procedures were followed, it would prevent the pilot tests from occurring this Fall which, in turn, would prevent the final tests being ready in the Spring, 1999, as called for by the President.

Frequency: Annually.

Affected Public: Individuals or households; State, local or Tribal Gov't, SEAs or LEAs.

Reporting Burden and Recordkeeping:

Responses: 46,000.

Title: 1999 National Study of Postsecondary Faculty (NSOPF-99): Faculty Questionnaire.

Frequency: One Time.

Affected Public: Individuals or households.

Reporting Burden and Recordkeeping:

Responses: 25,000.

Burden Hours: 19,550.

Abstract: The third cycle of the NSOPF is being conducted in response to a continuing need for data on faculty and instructors. The study will provide information about faculty in postsecondary institutions which is key to learning about the quality of education and research in these institutions. This study will expand the information about faculty and instructional staff in two ways—allowing comparisons to be made over time and examining critical issues surrounding faculty that have developed since the first two studies. This clearance request covers field test and full scale activities for the second phase of the study—collection of information from a nationally representative sample of faculty and instructional staff at postsecondary institutions. This information, together with information collected in the first phase of the study (1850-0665) on the institutions themselves, will provide a source of descriptive, analytical, trend and policy relevant research on the way postsecondary education functions.

Title: Uniform Data System for Assistive Technology Devices and Services.

Frequency: On occasion.

Affected Public: Individuals or households; State, local or Tribal Gov't, SEAs or LEAs.

Annual Reporting and Recordkeeping Hour Burden:

Responses: 1,346.

Burden Hours: 271.

Abstract: Assistive technology (AT) devices and the services can increase opportunities for education, employment, independence, and integration for persons with disabilities.

However, many of these individuals have not gained access to AT, despite several federal initiatives to address their AT needs. This data collection will allow the Department of Education to assemble information on the types of AT currently used by this nation's disabled and the funding sources for these devices and services, as specified in the Technology-Related Assistance for Individuals with Disabilities Act, as amended. Subjects will represent two groups: AT service providers (e.g., district special education coordinators, vocational rehabilitation counselors, and state AT project personnel) and (B) consumers of AT devices and services.
