

Beach associated changes in wave patterns together with the channel shoaling analysis will be used to develop a with-project sediment budget. The with-project sediment budget will be compared to the existing sediment budget to determine sand bypassing requirements that would be needed to maintain the existing sediment budget of the adjacent islands.

3. Issues. There are several potential environmental issues that will be addressed to the FIS. Additional issues may be identified during the scoping process. Issues initially identified as potentially significant include:

a. Potential impact to marine biological resources (benthic organisms, passageway for fish and other marine life) and Essential Fish Habitat, particularly Hard Bottoms.

b. Potential impact to threatened and endangered marine mammals, birds, fish, and plants.

c. Potential impacts to water quality.

d. Potential increase in erosion rates to adjacent Onslow Beach.

e. Potential effects on military training on U.S. Marine Corps Camp Lejeune Base.

f. Potential impacts to Navigation, commercial and recreational.

g. Potential impacts to the long-term management of New River Inlet.

h. Potential impacts to private and public property.

i. Cumulative impacts of Inlet and Inlet channel relocations throughout North Carolina.

j. Cumulative impacts for using inlets as sand source in nourishment projects.

k. Potential impacts on public health and safety.

l. Potential impacts to recreational and commercial fishing.

m. The compatibility of the material for nourishment.

n. Potential economic impacts.

4. Alternatives. Several alternative borrow areas are being considered for the proposed project. These alternatives will be further formulated and developed during the scoping process and an appropriate range of alternatives, including the no federal action alternative, will be considered in the EIS.

5. Scoping Process. A public scoping meeting (*see DATES*) will be held to receive public comment and assess public concerns regarding the appropriate scope and preparation of the Draft EIS. Participation in the public meeting by federal, state, and local agencies and other interested organizations and persons is encouraged.

The COE will also be consulting with the U.S. Fish and Wildlife Service under

the Endangered Species Act and the Fish and Wildlife Coordination Act, and with the National Marine Fisheries Service under the Magnuson-Stevens Act and Endangered Species Act. Additionally, the EIS will assess the potential water quality impacts pursuant to Section 401 of the Clean Water Act, and will be coordinated with the North Carolina Division of Coastal Management (DCM) to determine the projects consistency with the Coastal Zone Management Act. The COE will closely work with DCM through the EIS to ensure the process complies with all State Environmental Policy Act (SEPA) requirements. It is the COE and DCM's intentions to consolidate both NEPA and SEPA processes to eliminate duplications.

6. Availability of the Draft EIS. The Draft EIS is expected to be published and circulated sometime in early 2006, and a public hearing will be held after the publication of the Draft EIS.

Dated: May 12, 2005.

George T. Burch,

Chief of Staff.
