Page Limits: Applicants are strongly encouraged to limit the application narrative to no more than 30 double-spaced pages. The following standards are preferred: (1) A "page" is 8.5" x 11" (one side only) with one-inch margins (top, bottom, and sides). (2) All text in the application narrative must be double spaced. The page limit does not apply to the cover sheet, the one-page abstract, budget section, appendices, and forms and assurances. However, all of the application narrative must be included in the narrative section.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 80, 81, 82, 85, 86, 97, 98, and 99.

SUPPLEMENTARY INFORMATION: While many schools and districts have moved

swiftly in recent years to reform and enhance traditional core academic programs, most have not made similar efforts to integrate arts effectively into the regular curriculum, either as vehicle by which to strengthen other core academic subjects or as an academic discipline in its own right. High-quality programs effectively integrating and improving arts instruction are increasingly important as students face the demands of the information age in the 21st century. Creating, performing, and responding to works of art build creativity, self-confidence, and critical thinking skills "qualities central to success in school, work, and life.

For several reasons, high-quality arts and art education programs have implications for students' other academic development. First, most educators agree that arts-rich education programs keep students engaged and interested in school. For example, James Catterall's work suggests that students who participate in arts programs, especially students identified as at-risk of educational failure, are less likely to drop out of school (See Catterall, *et al.* in *Champions of Change* at: <http://artsedge.kennedy-center.org/champions>). Additionally, research studies suggest that involvement in arts-rich schooling affects students' success in other academic areas (See also Burton, *et al.* in *Champions*). In a study reanalyzing the cross-sectional National Educational Longitudinal Survey (NELS) data, for example, Catterall found that students in learning environments with diverse, high-quality arts education offerings had higher achievement than students in arts-poor communities, even when controlling for students' socioeconomic background. Sustained involvement in particular arts disciplines, like music and theater, seemed to be highly correlated with success in traditional academic subjects like math and reading. These studies have also found that improving the quality of arts education has a particularly positive impact on students from low-income backgrounds. Unfortunately, students from low socioeconomic backgrounds are almost twice as likely to attend arts-poor schools, while students from socioeconomically advantaged backgrounds are twice as likely to attend arts-rich schools (Catterall, *et al.*)

To ensure that high expectations are held for all of America's students, it is critical to assess and develop high-quality, research-based models for effectively integrating arts into the regular school curricula, both as a core academic content area and as a means for strengthening other core academic

areas. The Arts in Education Model Development and Dissemination Grant Program seeks to redress the lack of information in this area by encouraging partnerships of arts and education specialists to develop and document effective models for improving arts education and student achievement “ particularly for students from poor and disadvantaged backgrounds. The Department of Education intends to disseminate the results of this program to other educational entities.

Program Description: The Arts in Education Model Development and Dissemination Grant Program is authorized under section 10401, Part D, Subpart 1 of Title X of the Elementary and Secondary Education Act. The Arts in Education Model Development and Dissemination Grant Program will further the development of innovative, cohesive models that have demonstrated effectiveness in integrating arts into the school curriculum. In this case, “integrating” should be understood both as strengthening the use of high-quality arts in the course of other academic instruction and strengthening the place of arts as a core academic subject in the regular school curricula.

These grants are designed to enable LEAs and organizations with art expertise to further develop and create materials for the replication or adaptation of current comprehensive approaches for integrating a range of arts disciplines—such as music, dance, theater, and visual arts, including folk arts in these fields—into the elementary and middle school curricula. Such development work should yield more systematic information about effective models that provide quality arts instruction and use the arts to enhance instruction in other core academic subjects. The goal of the Arts in Education Model Development and Dissemination Grant Program is to bring to the field additional models with a solid research base for effectively integrating the arts, in the same way that solid research bases have been developed for instruction in other fields, such as reading.

Under this program, applicants should propose projects that may include but are not limited to the following components:

Field testing and evaluating promising new educational strategies;

Field testing and evaluating model in-service and pre-service professional development programs;

Ensuring comprehensive coverage of the arts disciplines—such as visual arts, dance, music, theater, and the folk arts in these areas;

Developing partnerships among schools, arts organizations, and others with expertise in the arts to enhance the quality and sustainability of effective programming;

Creating materials documenting the implementation and achievement of the model program for other educators and agencies; and

Obtaining the services of outside experts to assist with program implementation, curriculum development, data collection, evaluation design or other appropriate activities.

This program seeks to increase the research base and provide communities with additional information regarding innovative, research-based models for effectively integrating and strengthening arts instruction and improving students’ skills in creating, performing, and responding to works of arts, as well as achievement in other core academic subjects. In addition to any dissemination work in which the applicants choose to engage, the Department intends to take the products and information resulting from these demonstration grants and share them widely with other communities. Upon completion of the project, the Department requires that any materials or products developed as a part of model development activities be provided to the Department for further dissemination. Such activities will be carried out in full compliance with copyright requirements.

Application Content: To apply for Arts in Education Model Development and Dissemination funds, applicants must be prepared to: further the development of programs designed to improve or expand the integration of arts education in elementary or middle school curricula; develop materials designed to help replicate or adapt the program; document the program’s results and benefits; and develop products and services that can be used to replicate the program in other settings. Thus, grant applications must describe an existing set of strategies for integrating the arts into the regular elementary and middle school curriculum which could successfully be implemented, expanded, documented, evaluated, and disseminated. Taken together, a research-based, comprehensive Arts in Education Model will:

Be based, to the extent possible, on the most rigorous theory, research, and evaluation available and effective in improving student achievement and performance and other program objectives.

Be linked to state and national standards enabling all students to meet challenging expectations, and improving student and school performance.

Have the potential to improve students’ achievement both in creating, performing, and responding to works of art, and in other core academic subjects.

Highlight the development of model professional development for arts educators and other instructional staff.

Include multiple partners and effectively combine resources to create quality, sustainable programs.

Demonstrate the feasibility of further replication and dissemination.

Be applicable to a broad range of high poverty and disadvantaged, rural and urban schools, including those that are chronically low-performing.

Make effective use of technology to further the model’s goals.

Describe methods by which the applicant will assess the model’s outcomes.

Additionally, grant applicants should describe activities which, to the extent possible, coordinate model development with relevant activities of public and private cultural agencies, institutions, and organizations, including museums, arts education associations, libraries, and theaters. (20 U.S.C. 8091(e)(1))

Waiver of Proposed Rulemaking: In accordance with the Administrative Procedure Act (5 U.S.C. 553), it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed rules. Section 437(d)(1) of the General Education Provisions Act (GEPA), however, allows the Secretary to exempt from rulemaking requirements governing the first grant competition under a new or substantially revised program authority (20 U.S.C. 1232(d)(1)). Funding was provided for this new initiative in the fiscal year 2001 Department of Education Appropriations Act, enacted in December 2000. As this competition is the first under this program, it therefore qualifies for the exemption. The Secretary, in accordance with section 437(d)(1) of GEPA, has decided to forego public comment in order to ensure timely grant awards.

Absolute Priority: The Secretary will only fund applications from LEAs or non-profit organizations which propose to work with at least one elementary and/or middle school with no less than 35% of its students from low-income families consistent with section 1113(b)(1)(A) of Title I of the Elementary and Secondary Education Act.

Competitive Priority: The Secretary will award five (5) points, in addition to

any points the applicant earns under the selection criteria, to projects proposing models that involve schools in rural or inner-city communities.

Invitational Priority: The Secretary strongly encourages applicants to bring together a partnership of educational and arts-based entities as well as other community resources to carry out activities designed under this program. Partnerships among these entities are important to ensure the quality of programming as well as the sustainability of the activities.

Definition: In addition to definitions in the statute and EDGAR, the following definition applies:

Research-based, when used with respect to an activity or a program, means that, to the extent possible, the activity or program is based on the most rigorous theory, research, and evaluation available and effective in improving student achievement and performance and other program objectives.

Selection Criteria: The Secretary uses the following selection criteria to evaluate applications for grants under this competition. In all instances where the word "project" appears in the selection criteria, the reference to an Arts in Education Model Development and Dissemination grant program should be made.

The maximum composite score for all of these criteria is 100 points. The maximum score an applicant may receive is 105 if they meet the competitive priority.

The maximum score for each criterion is indicated in parentheses. Within each criterion, the Secretary evaluates each factor equally.

(a) Need for project. (10 points)

In determining the need for the proposed project, the Secretary considers the following factors:

(i) The extent to which the model addresses specific needs of students at risk of educational failure.

(ii) The extent to which specific gaps, weaknesses, or opportunities have been identified in effectively integrating arts into the core curricula, strengthening arts instruction and improving students' academic performance, including skills in creating, performing and responding to the arts. Also, the nature and magnitude of those gaps or weaknesses and the degree to which they will be addressed by the proposed model.

(b) Significance. (20 points)

In determining the significance of the proposed project, the Secretary considers the following factors:

(i) The potential contribution of the proposed project to increase knowledge and understanding of effective strategies

for strengthening the use of high-quality arts in the course of other academic instruction and the place of arts as a core academic subject in the regular school curricula.

(ii) The likely utility and replicability of the proposed model and the extent to which its products (including information, materials, processes, or techniques) will be effective in a variety of settings.

(c) Quality of the project design. (30 points)

In determining the quality of the design of the proposed project, the Secretary considers the following factors:

(i) The extent to which the goals, objectives, and results to be achieved over the proposed project period are clearly specified and measurable.

(ii) The extent to which the proposed model is based on reliable research, effective practice and/or coherent theory regarding means for strengthening the use of high-quality arts in the course of other academic instruction and the place of arts as a core academic subject in the regular school curricula.

(iii) The extent to which the proposed model aims to strengthen the academic performance of students in creating, performing, and responding to multiple arts disciplines and other core academic areas.

(iv) The extent to which the project will document and evaluate the success of the model and disseminate relevant information.

(d) Quality of the management plan. (10 points)

In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(i) The adequacy of the management plan to achieve the objectives of the proposed project on time and within a reasonable budget, including relevant contributions and commitments from partners, timelines, continuous improvement strategies and milestones for accomplishing project tasks.

(e) Quality of the project personnel. (5 points)

In determining the quality of the personnel plan for the proposed project, the Secretary considers the following factors:

(i) The qualifications, including relevant training and experience of key project personnel, major partners, project consultants and/or subcontractors and the extent to which personnel have clearly defined responsibilities.

(ii) The extent to which the applicant encourages applications for employment from persons who are members of

groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability.

(f) Quality of the project evaluation. (25 points)

In determining the quality of the evaluation, the Secretary considers the following factors:

(i) The extent to which the methods of evaluation are rigorous, thorough, feasible, and appropriate to the goals, objectives, and outcomes of the proposed project.

(ii) The extent to which the methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the project and will produce quantitative and qualitative data on the results of the program.

(iii) The extent to which the evaluation will provide guidance about effective strategies suitable for replication or testing in other settings.

Appendix—Instructions for the Application Narrative

The narrative is the section of the application where the selection criteria used by reviewers in evaluating the application are addressed. The narrative must encompass each function or activity for which funds are being requested. Before preparing the application narrative, an applicant should read carefully the description of the program and the selection criteria the Secretary uses to evaluate applications.

Applicants should note there is a suggested 30 page limit for the application narrative with the following standards applying: A "page" is 8.5" x 11" (one side only) with one-inch margins (top, bottom, and sides). All text in the application narrative must be double spaced. The suggested page limit does not apply to the cover sheet, the one-page abstract, budget section, appendices, and forms and assurances. However, all of the application narrative must be included in the narrative section.

Applicants are strongly encouraged to use the following format in developing applications:

1. Begin with a one-page Abstract summarizing the proposed Arts in Education Model Development and Dissemination project, including a description of project objectives and activities and any partners in the application. Also include a short description of the population to be served by the project.
2. Include a table of contents and be sure to number the pages.
3. Describe how the applicant meets the absolute priority and the competitive priority if necessary.

4. Describe fully the proposed project in light of the selection criteria in the order in which the criteria are listed in the application package. Do not simply paraphrase the criteria.

5. Provide the following in response to the attached "Notice to all Applicants": (1) a reference to the portion of the application in which information appears as to how the applicant is addressing steps to promote equitable access and participation, or (2) a separate statement that contains that information.

6. When applying for funds as a consortium, individual eligible applicants must enter into an agreement signed by all members. The consortium's agreement must detail the activities each member of the consortium plans to perform, and must bind each member to every statement and assurance made in the consortium's application. The designated applicant must submit the consortium's agreement with its application.

7. Applicants may include supporting documentation as appendices to the narrative. This material should be concise and pertinent to the competition. Note that the Secretary considers only information contained in the application in ranking applications for funding consideration. Letters of support sent separately from the formal application package are not considered in the review by the technical review panels. (34 CFR 75.217)

8. Attach copies of all required assurances and forms.

PROTECTION OF HUMAN SUBJECTS IN RESEARCH (Attachment to ED 424)

I. Instructions to Applicants about the Narrative Information that Must be Provided if Research Activities Involving Human Subjects are Planned

If you marked item 12 on the application "Yes" and designated exemptions in 12a, **(all research activities are exempt)**, provide sufficient information in the application to allow a determination that the designated exemptions are appropriate. Research involving human subjects that is exempt from the regulations is discussed under II.B. "Exemptions," below. The Narrative must be succinct. **Provide this information in an "Item 12/Protection of Human Subjects Attachment" and insert this attachment immediately following the ED 424 face page.**

If you marked "Yes" to item 12 on the face page, and designated no exemptions from the regulations **(some or all of the research activities are nonexempt)**, address the following six points for each nonexempt activity. In addition, if research involving human subjects will take place at collaborating site(s) or other performance site(s), provide this information before discussing the six points. Although no specific page limitation applies to this section of the application, be succinct. Provide the six-point narrative and discussion of other performance sites in an **"Item 12/Protection of Human Subjects Attachment" and insert this attachment immediately following the ED 424 face page.**

(1) Provide a detailed description of the proposed involvement of human subjects. Describe the characteristics of the subject population, including their anticipated number, age range, and health status. Identify the criteria for inclusion or exclusion of any subpopulation. Explain the rationale for the involvement of special classes of subjects, such as children, children with disabilities, adults with disabilities, persons with mental disabilities, pregnant women, prisoners, institutionalized individuals, or others who are likely to be vulnerable.

(2) Identify the sources of research material obtained from individually identifiable living human subjects in the form of specimens, records, or data. Indicate whether the material or data will be obtained specifically for research purposes or whether use will be made of existing specimens, records, or data.

(3) Describe plans for the recruitment of subjects and the consent procedures to be followed. Include the cir-

cumstances under which consent will be sought and obtained, who will seek it, the nature of the information to be provided to prospective subjects, and the method of documenting consent. State if the Institutional Review Board (IRB) has authorized a modification or waiver of the elements of consent or the requirement for documentation of consent.

(4) Describe potential risks (physical, psychological, social, legal, or other) and assess their likelihood and seriousness. Where appropriate, describe alternative treatments and procedures that might be advantageous to the subjects.

(5) Describe the procedures for protecting against or minimizing potential risks, including risks to confidentiality, and assess their likely effectiveness. Where appropriate, discuss provisions for ensuring necessary medical or professional intervention in the event of adverse effects to the subjects. Also, where appropriate, describe the provisions for monitoring the data collected to ensure the safety of the subjects.

(6) Discuss why the risks to subjects are reasonable in relation to the anticipated benefits to subjects and in relation to the importance of the knowledge that may reasonably be expected to result.

II. Information on Research Activities Involving Human Subjects

A. Definitions.

A research activity involves human subjects if the activity is research, as defined in the Department's regulations, and the research activity will involve use of human subjects, as defined in the regulations.

—Is it a research activity?

The ED Regulations for the Protection of Human Subjects, Title 34, Code of Federal Regulations, Part 97, define research as "a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge." *If an activity follows a deliberate plan whose purpose is to develop or contribute to generalizable knowledge, such as an exploratory study or the collection of data to test a hypothesis, it is research.* Activities which meet this definition constitute research whether or not they are conducted or supported under a program which is considered research for other purposes. For example, some demonstration and service programs may include research activities.

—Is it a human subject?

The regulations define human subject as “a living individual about whom an investigator (whether professional or student) conducting research obtains (1) data through intervention or interaction with the individual, or (2) identifiable private information.” (1) *If an activity involves obtaining information about a living person by manipulating that person or that person’s environment, as might occur when a new instructional technique is tested, or by communicating or interacting with the individual, as occurs with surveys and interviews, the definition of human subject is met.* (2) *If an activity involves obtaining private information about a living person in such a way that the information can be linked to that individual (the identity of the subject is or may be readily determined by the investigator or associated with the information), the definition of human subject is met.* [Private information includes information about behavior that occurs in a context in which an individual can reasonably expect that no observation or recording is taking place, and information which has been provided for specific purposes by an individual and which the individual can reasonably expect will not be made public (for example, a school health record).]

B. Exemptions.

Research activities in which the only involvement of human subjects will be in one or more of the following six categories of *exemptions* are not covered by the regulations:

(1) Research conducted in established or commonly accepted educational settings, involving normal educational practices, such as (a) research on regular and special education instructional strategies, or (b) research on the effectiveness of or the comparison among instructional techniques, curricula, or classroom management methods.

(2) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior, unless: (a) information obtained is recorded in such a manner that human subjects can be identified, directly or through identifiers linked to the subjects; and (b) any disclosure of the human subjects’ responses outside the research could reasonably place the subjects at risk of criminal or civil liability or be damaging to the subjects’ financial standing, employability, or reputation. *If the subjects are children, this exemption applies only to research involving educational tests or observations of pub-*

lic behavior when the investigator(s) do not participate in the activities being observed. [Children are defined as persons who have not attained the legal age for consent to treatments or procedures involved in the research, under the applicable law or jurisdiction in which the research will be conducted.]

(3) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior that is not exempt under section (2) above, if the human subjects are elected or appointed public officials or candidates for public office; or federal statute(s) require(s) without exception that the confidentiality of the personally identifiable information will be maintained throughout the research and thereafter.

(4) Research involving the collection or study of existing data, documents, records, pathological specimens, or diagnostic specimens, if these sources are publicly available or if the information is recorded by the investigator in a manner that subjects cannot be identified, directly or through identifiers linked to the subjects.

(5) Research and demonstration projects which are conducted by or subject to the approval of department or agency heads, and which are designed to study, evaluate, or otherwise examine: (a) public benefit or service programs; (b) procedures for obtaining benefits or services under those programs; (c) possible changes in or alternatives to those programs or procedures; or (d) possible changes in methods or levels of payment for benefits or services under those programs.

(6) Taste and food quality evaluation and consumer acceptance studies, (a) if wholesome foods without additives are consumed or (b) if a food is consumed that contains a food ingredient at or below the level and for a use found to be safe, or agricultural chemical or environmental contaminant at or below the level found to be safe, by the Food and Drug Administration or approved by the Environmental Protection Agency or the Food Safety and Inspection Service of the U.S Department of Agriculture.

Copies of the Department of Education’s Regulations for the Protection of Human Subjects, 34 CFR Part 97 and other pertinent materials on the protection of human subjects in research are available from the Grants Policy and Oversight Staff (GPOS) Office of the Chief Financial and Chief Information Officer, U.S. Department of Education, Washington, D.C., telephone: (202) 708-8263, and on the U.S. Department of Education’s Protection of Human Subjects in Research Web Site at <http://ocfo.ed.gov/humansub.htm>.

OMB Control No. 1801-0004 (Exp. 8/31/2001)

NOTICE TO ALL APPLICANTS

The purpose of this enclosure is to inform you about a new provision in the Department of Education's General Education Provisions Act (GEPA) that applies to applicants for new grant awards under Department programs. This provision is Section 427 of GEPA, enacted as part of the Improving America's Schools Act of 1994 (Pub. L. 103-382).

To Whom Does This Provision Apply?

Section 427 of GEPA affects applicants for new grant awards under this program. **ALL APPLICANTS FOR NEW AWARDS MUST INCLUDE INFORMATION IN THEIR APPLICATIONS TO ADDRESS THIS NEW PROVISION IN ORDER TO RECEIVE FUNDING UNDER THIS PROGRAM.**

(If this program is a State-formula grant program, a State needs to provide this description only for projects or activities that it carries out with funds reserved for State-level uses. In addition, local school districts or other eligible applicants that apply to the State for funding need to provide this description in their applications to the State for funding. The State would be responsible for ensuring that the school district or other local entity has submitted a sufficient section 427 statement as described below.)

What Does This Provision Require?

Section 427 requires each applicant for funds (other than an individual person) to include in its application a description of the steps the applicant proposes to take to ensure equitable access to, and participation in, its Federally-assisted program for students, teachers, and other program beneficiaries with special needs. This provision allows applicants discretion in developing the required description. The statute highlights six types of barriers that can impede equitable access or participation: gender, race, national origin, color, disability, or age. Based on local circumstances, you should determine whether these or other barriers may prevent your students, teachers, etc. from such access or participation in, the Federally-funded project or activity. The description in your application of steps to be taken to overcome these barriers need not be lengthy; you may provide a clear and succinct description of how you plan to address those barriers

that are applicable to your circumstances. In addition, the information may be provided in a single narrative, or, if appropriate, may be discussed in connection with related topics in the application.

Section 427 is not intended to duplicate the requirements of civil rights statutes, but rather to ensure that, in designing their projects, applicants for Federal funds address equity concerns that may affect the ability of certain potential beneficiaries to fully participate in the project and to achieve to high standards. Consistent with program requirements and its approved application, an applicant may use the Federal funds awarded to it to eliminate barriers it identifies.

What are Examples of How an Applicant Might Satisfy the Requirement of This Provision?

The following examples may help illustrate how an applicant may comply with Section 427.

- (1) An applicant that proposes to carry out an adult literacy project serving, among others, adults with limited English proficiency, might describe in its application how it intends to distribute a brochure about the proposed project to such potential participants in their native language.
- (2) An applicant that proposes to develop instructional materials for classroom use might describe how it will make the materials available on audio tape or in braille for students who are blind.
- (3) An applicant that proposes to carry out a model science program for secondary students and is concerned that girls may be less likely than boys to enroll in the course, might indicate how it intends to conduct "outreach" efforts to girls, to encourage their enrollment.

We recognize that many applicants may already be implementing effective steps to ensure equity of access and participation in their grant programs, and we appreciate your cooperation in responding to the requirements of this provision.

Estimated Burden Statement for GEPA Requirements

The time required to complete this information collection is estimated to vary from 1 to 3 hours per response, with an average of 1.5 hours, including the time to review instructions, search existing data resources, gather and maintain the data needed, and complete and review the information collection. **If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to:** U.S. Department of Education, Washington, DC 20202-4651.
