

served by the ability of private sector entities to provide diverse services to meet the varied needs of specific individuals, organizations and economic entities. At the same time, NOAA has a responsibility to help protect lives and property and enhance the national economy.

The present standard of NOAA conduct is contained in Section 4 of the policy which states that NOAA will give "due consideration" to the abilities of the private sector and academic communities to provide diverse services and act in the public interest when making decisions regarding NOAA information services. NOAA proposes clarifying Section 4 to state that NOAA will "take advantage of existing capabilities and services of commercial and academic sectors to avoid duplication and competition in areas not related to the NOAA mission."

The proposed clarification is intended to emphasize the statement in the present policy that NOAA will not haphazardly institute significant changes in existing information dissemination activities without first carefully considering the views and capabilities of the private sector. In that regard, it emphasizes that NOAA will endeavor to take advantage of capabilities and services that already exist in the commercial sector.

NOAA is committed to open consultation with all who are affected by NOAA's services, including the private sector. The American Meteorological Society has established a new Commission to foster constructive discussion within the enterprise as a whole. NOAA will use this and other appropriate mechanisms to consult openly on these matters as we move forward.

In sum, NOAA will interpret and apply the policy to recognize the unique capabilities of the private sector in order to accomplish our shared goal of fostering a robust and successful environmental information enterprise.

Accordingly, NOAA seeks comment on the proposed change to Section 4, which would read as follows:

4. The nation benefits from government information disseminated both by Federal agencies and by diverse nonfederal parties, including commercial and not-for-profit entities. NOAA recognizes the government best serves the public interest by cooperating with private sector and academic and research entities to meet the varied needs of specific individuals, organizations, and economic entities. NOAA will take advantage of existing capabilities and services of commercial and academic sectors to avoid

duplication and competition in areas not related to the NOAA mission. NOAA will give due consideration to these abilities and consider the effects of its decisions on the activities of these entities, in accordance with its responsibilities as an agency of the U.S. Government, to serve the public interest and advance the nation's environmental information enterprise as a whole.

For ease of comparison, the present Section 4 reads as follows:

4. NOAA recognizes the public interest is served by the ability of private sector entities and the academic and research community to provide diverse services to meet the varied needs of specific individuals, organizations, and economic entities. The nation benefits from government information disseminated both by Federal agencies and by diverse nonfederal parties, including commercial and not-for-profit entities. NOAA will give due consideration to these abilities, and consider the effects of its decisions on the activities of these entities, in accordance with its responsibilities as an agency of the U.S. Government, to serve the public interest and advance the nation's environmental information enterprise as a whole.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: Under section 616(i)(2) of IDEA, awards may be made to provide technical assistance to improve the capacity of States to meet data collection requirements.

Priorities: We are establishing these priorities for the FY 2005 grant competition only, in accordance with Section 437(d)(1) of the General Education Provisions Act (GEPA).

Absolute Priorities: For FY 2005 these priorities are absolute priorities. Under 34 CFR 75.105(c)(3), we consider only applications that meet these priorities.

These priorities are:

Priority A: Outcome Measures.

Focus Area One: Developing or enhancing Part B State outcome indicators and methods to collect and analyze Part B outcome indicator data.

Focus Area Two: Developing or enhancing Part C State outcome indicators and methods to collect and analyze Part C outcome indicator data.

Priority B: Assessment Data: Planning grants for the Development, Enhancement, or Redesign of a Comprehensive System of State Assessments (including State alternate assessments), Standards, and Instructional Supports.

Background: Section 616 of the IDEA requires the Department, and States, to establish and implement systems for monitoring implementation of and enforcing obligations under Parts B and C of the IDEA. Under section 616 of the IDEA, the Secretary must establish indicators in certain monitoring priority areas. States must develop State Performance Plans (SPPs), including targets for those indicators, and use those targets and indicators in annually reporting to the Secretary on the performance of the State. States must also use those targets and indicators to report annually to the public on the performance of each LEA in the State.

Background of Priority A: The cornerstone of any accountability system is the development of outcome indicators, against which progress can be measured. State performance reports, self-assessments, and other extant data show that most States and State LAs as defined under Part C of the IDEA [Section 635(a)(10)], as well as their LEAs and Early Intervention Service programs, have not developed outcome indicators for children with disabilities served under Part B and Part C of IDEA or methods to collect and analyze Part B and Part C outcome indicator data, especially for infants and toddlers and their families and preschool children. Therefore, most States lack the capacity to collect sufficient data to determine the impact of early intervention and special education services.

Background of Priority B: One of the indicators being established by the Secretary under section 616 of the IDEA (on the priority area concerning the provision of a free appropriate public

education in the least restrictive environment) is the participation and performance of children with disabilities on the State assessments required under the No Child Left Behind Act (NCLB). States are expected to report under the SPP and Annual Performance Reports (APR) on student performance on assessments using the same assessment data required under NCLB.

NCLB requires accountability for the academic achievement of all students. Under the law, every student and every group of students is expected to be working to meet State standards. For that very limited group of students with the most significant cognitive disabilities whose intellectual functioning is well below that of their peers, the Department's regulations allow States to develop alternate achievement standards that are aligned with the State's academic content standards and reflect professional judgment of the highest learning standards possible for those students. The Department's regulations permit the proficient and advanced scores of students assessed based on alternate achievement standards to be included in adequate yearly progress (AYP) calculations in the same manner as scores based on grade level achievement, subject to a cap of one percent of all students in the grades assessed, at the district and state level. See <http://www.ed.gov/legislation/FedRegister/finrule/2003-4/120903a.pdf> for more information.

On April 7, 2005, the Secretary announced the intent to provide additional flexibility that will allow States to develop modified achievement standards and use alternate assessments based on those modified achievement standards for some students with disabilities served under the IDEA. Following that, the Secretary announced on May 10, 2005, that eligible States could implement, for the 2004–05 year, adjustments to AYP calculations to reflect the need for alternate assessments based on modified achievement standards. Information about these interim options is available at <http://www.ed.gov/policy/elsec/guid/raising/disab-options.html> and <http://www.ed.gov/policy/elsec/guid/raising/disab-acctplan.html>.

All alternate assessments must be designed to generate valid data that can be used for AYP purposes under NCLB. These data also will be included in the SPPs and APRs relative to performance and participation of children with disabilities on State assessments under the IDEA.

Many States need support in developing, enhancing or redesigning their assessment systems to ensure that they meet the requirements of NCLB with regard to the assessment of children with disabilities.

Statement of Priority A—Outcome Measures.

This priority supports projects that address the needs of States for technical assistance to improve their capacity to meet Federal data collection requirements in one or both of two focus areas.

Focus Area One—Developing or enhancing Part B State outcome indicators and methods to collect and analyze Part B outcome indicator data.

This Focus Area supports the development or enhancement of Part B State outcome indicators and methods to collect and analyze Part B State outcome indicator data. Projects funded under this Focus Area must focus on improving the capacity of the State to provide information that could be used to determine one or both of the following:

(a) The impact of Part B preschool services (ages 3 through 5) on children with disabilities at the State and LEA level.

(b) Secondary, transition, and post-secondary education and employment outcomes at the State and LEA level. The indicators must provide data on child outcomes that could be used to assess the impact of the services.

Focus Area Two—Developing or enhancing Part C State outcome indicators and methods to collect and analyze Part C outcome indicator data.

This Focus Area supports the development or enhancement of Part C outcome indicators and methods to collect and analyze Part C State outcome indicator data. Projects funded under this Focus Area must focus on improving the capacity of the State to provide information that could be used to determine the following:

(a) The outcomes associated with infants and toddlers with disabilities and their families participating in State Part C programs.

(b) If the State has standards for early intervention outcomes, whether infants and toddlers with disabilities are meeting those standards.

(c) Trend data on outcomes associated with infants and toddlers with disabilities and their families and the extent to which infants and toddlers with disabilities are meeting State standards.

Statement of Priority B—Assessment Data: Planning grants for the Development, Enhancement, or Redesign of a Comprehensive System of

State Assessments (including State alternate assessments), Standards, and Instructional Supports.

This priority supports planning grants for the development, enhancement, or redesign of a comprehensive system of State assessments (including State alternate assessments), standards, and instructional supports that address the needs of all children with disabilities and which may include specific activities to ensure coherence among components, such as: (1) Alternate assessments aligned with State content standards; (2) effective and appropriate accommodations that are consistent with daily instruction; (3) guidance to support IEP team decisions regarding student assessment; (4) professional development activities for both special education and regular education teachers; and (5) information for parents. Projects must help States ensure that they are designing strong systems of assessment and instruction to address the needs of children with disabilities, and that the assessments produce valid, reliable, and accurate measures of student performance and result in high quality data for use in evaluating the performance of schools, districts, and States.

Grantees must produce a final plan that includes clear and detailed descriptions of goals and objectives, information about participants, and plans for the design of data analysis or research; these components are integral to the success of implementing a coherent system of instruction and assessment for children with disabilities. The plan must also include a realistic timeline and resources needed to reach full implementation of the system design.

As part of this planning activity, States must work with experts in large-scale assessment and special education. The experts selected should represent the range of skills needed to develop assessments for children with

disabilities that will meet the peer review guidelines for assessments published by the Department in the spring of 2004, which are available at <http://www.ed.gov/policy/elsec/guid/saaprguidance.pdf>. Skill sets for experts should include experience with one or more of the following: (1) Large scale assessment; (2) standards setting techniques; (3) assessment and measurement of children with disabilities; (4) design of professional development, accommodations and supports to teach grade level content to children with disabilities; (5) State collaborative activities to develop standards-based alternate assessments; (6) development of criterion referenced tests and instruments; (7) psychometric evaluation; (8) conducting studies of the technical adequacy of assessment instruments and/or test accommodations; (9) research in the area of alternate assessment and psychometrics; and (10) implementation of educational policy consistent with IDEA and NCLB.

States or FAS are encouraged to submit applications as a consortium (See 34 CFR 75.127–75.129). A consortium is comprised of more than one State or FAS and could include States or FAS from the same geographic region, States or FAS with similar demographic characteristics, States or FAS with similar populations, States or FAS with similar geographic characteristics or other characteristics as determined by the States or FAS. The Secretary views the formation of consortia as an effective and efficient strategy to addressing the requirements of this priority.

Additional Requirements for Priority A and Priority B:

All projects funded under Priority A or Priority B must—

(a) Budget for a two-day Project Directors' meeting in Washington, DC.

(b) If a project maintains a Web site, include relevant information and documents in a format that meets a

government or industry-recognized standard for accessibility.

(c) Demonstrate in the application that the project meets, if applicable, the eligibility requirements in section III, 1.

Eligible Applicants

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act (APA) (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on a proposed priority. Section 437(d)(1) of the General Education Provisions Act (20 U.S.C. 1232(d)(1)), however, allows the Secretary to exempt from rulemaking requirements, regulations governing the first grant competition under a new or substantially revised program authority. This is the first grant competition for this program under sections 611 and 616 of the IDEA and therefore qualifies for this exemption. In order to ensure timely grant awards, the Secretary has decided to forego public comment on the absolute priorities under section 437(d)(1). These absolute priorities will apply to the FY 2005 grant competition only.

Program Authority: 20 U.S.C. 1411 and 1416.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 84, 85, 86, 97, 98, and 99.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian tribes.
