| Cuyahoga | Grantwood/W. Ridgewood Area Sanitary Sewer Project | Sanitary sewer construction to meet EPA mandate for septic tank abandonment. Project is fully designed, OEPA approved, and ready to advertise upon notification of funding | City of Parma | 25 | 0 to 30 days | \$605,000 |
| Cuyahoga | Dentzler Area Sanitary Sewer Project | EPA mandated sanitary sewer construction for septic tank abandonment. Fully designed, OEPA approved, ready to advertise upon notification of funding | City of Parma | 25 | 0 to 30 days | \$605,000 |
| Cuyahoga | Parkhaven/Broadview Improvement Project | Sanitary and storm sewer construction to meet EPA septic tank abandonment mandate. Fully designed, OEPA approved, ready to advertise upon notification of funding | City of Parma | 35 | 0 to 30 days | \$687,500 |
| Cuyahoga | Manhattan Ave. Improvement Project | Sanitary, storm, and water main construction, including sidewalks, creating residential development opportunities. | City of Parma | 25 | 31 to 90 days | \$685,207 |
| Cuyahoga | Eco-Bottle | The EcoBottle is a uniquely engineered bottle that is filled with a liquid concentrate powder that automatically expands to twice its size when water is added by the customer or health care provider. It takes up half the shelf space and reduces transportation costs in excess of 50%. It doubles the amount of product able to be shipped in a truck, saving fuel. You maximize shipping weight by eliminating water from the product. It reduces factory water consumption by over 80%. It lowers factory energy consumption and allows for faster fill-times on the lines. We have developed a first generation prototype that we need to take to a production level. For example, the first generation EcoBottle is a one gallon size container that will allow for orange juice concentrate, in nursing homes and schools, to be easily mixed and served, while saving space, fuel and energy along the way. | Nottingham-Spirk Design Associates | 10 | 0 to 30 days | \$1,750,000 |
| Cuyahoga | New Production Facility | Thank you for your interest in constructing a new, state-of-the-art ice cream manufacturing facility adjacent to our company headquarters and distribution center at 6200 Euclid Ave. in Cleveland, Ohio. There are several aspects of our project that deal with the environment. 1. Process waste reduction 2. The land that we will build on has unsuitable fill for the foundation of the building. We will correct that. 3. General utility efficiency: gas, water, sewer, electric. | Pierre's Ice Cream Company | 75 | 91 to 180 days | \$700,000 |
| Cuyahoga | Orange Village Infrastructure and Service Department | 1) Various roadway reconstruction, resurfacing and improvement projects... Outcome: safer, improved and well-maintained roadways, improved storm water management 2) Extension of water mains to areas of community not located near any water lines or hydrants... Outcome: Increased fire safety for residents, clean drinking water 3) Complete replacement of an outdated, inefficient and non-functional service department facility... Outcome: Operational efficiencies and safe working conditions for the service department employees in order to maintain services for the residents of Orange Village | Orange Village | 420 | 31 to 90 days | \$7,032,297 |
| Cuyahoga | Environmental cleaning system | This technology is an environmental cleaning process that produces no mixed waste. Example: One can clean a 10,000hp motor and the only waste will be the waste that was on the motor. No chemicals or other cleaning materials are used. The technology uses particles of dry ice in the form of rice. The rice is accelerated out from a nozzle using compressed air, upon impacting the surface it cleans and the dry ice converts to a gases and goes into the atmosphere leaving only the contaminated material to deal with. The process is used to clean, electric motors, nuclear decontamination, printing presses, tire molds, fire and mold restoration. This technology can help companies of all size to meet EPA requirements. Carbon Dioxide is not a manufactured product, it is a by-product of industry as in the manufacturing of natural gas, and fertilizer. The grant would be to use to produce and make available this technology to the many small industrial companies through the country | Cryogenesis | 6 | 31 to 90 days | \$250,000 |
| Cuyahoga | Broadview Heights Safety Center | Existing Police and Fire Safety Services are located in various facilities on the Broadview Heights City campus. The buildings are remnants of an old State Hospital site and are aged. The proposed new facility will integrate all safety services into one facility which will incorporate new technology and be energy efficient. The new facility will provide increased capacity and better response time for safety homeland security, and regional emergency issues. | City of Broadview Heights | 100 | 181 days or more | \$3,750,000 |
| Cuyahoga | Tuxedo Water Main Phase I | The population of Broadview Heights and the surrounding communities has expanded greatly over the last fifteen years and this Safety Center will aid in our regional partnerships for increased regional safety services. replacement of water main on Tuxedo Ave. between W.54th and State Rd. to resolve ongoing breakages, brown water, and low pressure issues in area. Phase II is additional footage along Tuxedo that has a projected project cost of \$1,250,000. | City of Parma | 40 | 31 to 90 days | \$574,789 |
| Cuyahoga | Sanitary and Storm Sewer Replacement Improvements | Remove/Replace approx. 912' linear feet of 12" & 24" Storm Sewer on Coit Avenue, Remove/Replace approx. 1000 linear feet of 12" & 15" Storm Sewer on Savannah Avenue, and Remove/ Replace approx. 1300 linear feet of 12" Sanitary and Storm Sewer on Bryn Mawr Avenue all located in the City of East Cleveland | City of East Cleveland | 35 | 31 to 90 days | \$861,240 |
| Cuyahoga | Wind Turbine component manufacturing | Vertical Machining Center to machine components for OEM's for the Wind Turbine Industry. Tooling required for above equipment | Oakes Equipment Company | 25 | 31 to 90 days | \$400,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Stanwood Road Reconstruction & Resurfacing | Reconstructing Lower Stanwood Road from asphalt street into a full depth concrete street and resurfacing several other streets including E 133rd (Woodworth to Shaw), E 134th (Woodworth to Mann), E 135th (Woodworth to Mann) and Upper Stanwood Road (Terrace Road to Hazel Road). This project will improve and widen SR 176 and alleviate safety and congestion problems with the installation of two left turn movements and improved signalization. This will also provide a bicycle lane in conjunction with the City Master Health and Wellness Initiative, enhancing health and wellness in our communities. State Route 176 carries an excess of 14,000 cars per day and has not had any major improvements in over thirty years. | City of East Cleveland | 50 | 31 to 90 days | \$936,180 |
| Cuyahoga | Broadview Road Improvements - North | | City of Broadview Heights | 50 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Liquid MICR Toner | We are performing research and development work to commercialize a patent we have licensed for the production of liquid MICR (magnetic image character recognition) toner. Stabilization of the suspension of the metallic particles in the liquid base is required for commercialization. We currently produce dry (powder) MICR toner and are attempting to solidify and grow our workforce through introduction of this next-generation technology. The project entails R&D work as well as the purchase of capital equipment for production and packaging of the final product. | 3rd Imaging LLC | 10 | 0 to 30 days | \$500,000 |
| Cuyahoga | Rockside Road/Crossview Road Improvements Project | to projected ADT 30,960) in the anticipation of construction of the \$400 million Sora Hill Development which is a 75-acre complex featuring 400,000 SF office space, 250 residential units, 1-million SF high-end retail space, 125 room hotel & other commercial uses. In aggregate, the project consists of 4,375 LF of roadway (widening & adding lanes to accommodate the projected ADT), 26,960 SF sidewalk, 1,700 FT waterline replacement, 1,700 FT stormwater upgrades, 4,200 FT curb, & ADA improvements. The project includes reducing the high number of traffic accidents, congestion & unsafe conditions such as reconfiguration of an existing 62-deg skew (dangerous intersection) at Rockside and Crossview to a safer 80-deg & abandoning existing open-ditch drainage with collapsing structure. The Developer and City have reached an agreement; a majority of the development property has been purchased, & all necessary development government permits have been obtained. This project will stimulate Cuyahoga Co. by providing jobs and is the "foundation" needed to build an ID. This has been a barrier for thousands of low income and homeless people in Cuyahoga County. The IDCC is requesting that the State BMV pay for state photo IDs for indigent people. This will eliminate the barriers to jobs, housing, and many other services for low income people. | City of Seven Hills | 1500 | 181 days or more | \$3,917,188 |
| Cuyahoga | Identification Crisis Collaborative | The IDCC is a Collaborative of 10 homeless shelters, drop in centers, churches and social service agencies who must assist people in getting their required state photo IDs before they can refer their clients to job training, housing, employment (even day jobs), and other needed services. The West Side Catholic Center, a drop in center for homeless, is the fiscal agent and one of the ten agencies in the Collaborative. The IDCC was able to pay for state IDs and birth certificates (which are required in order to get a state photo ID) for over 4,000 indigent people in the past two years. Foundation grants, county grant and donations were used. These are 4,000 people who can now apply for employment and housing. | Identification Crisis Collaborative (IDCC) | 2,000 | 0 to 30 days | \$50,000 |
| Cuyahoga | Stride Capital | Capital additions to keep competitive in global markets and keep manufacturing jobs in Ohio versus off shore sourcing. | Stride Tool | 150 | 31 to 90 days | \$450,000 |
| Cuyahoga | SR 82 and Broadview Road Master Retention Facility | development in one of the most desirable areas of our City. The retention basin will also relieve current flooding problems to adjacent residential areas. The Master Retention Facility will provide stormwater management to properties zoned for development of office and commercial businesses. The Master Retention Basin will promote better management of stormwater and improve water quality while at the same time provide our residents with recreational parkland. The City has experienced significant flooding on adjacent properties in this area. Management of stormwater will curtail flooding issues and damages to area residences. This project has the potential to solve multiple stormwater problems while boosting economic development. | City of Broadview Heights | 995 | 181 days or more | \$650,000 |
| Cuyahoga | The Cleveland Institute of Art's new campus initia | The Institute is carrying out a multi-faceted campaign to build a new campus that will solidify its position as one of the nation's premier colleges of art and design. The new campus will strengthen the Institute's competitive standing, enabling the college to attract more talented students, the majority of whom remain in Ohio following graduation. Through its strategic location in the heart of Cleveland's University Circle, the Institute will serve as a catalyst for the development of an even more vibrant urban educational and cultural district. Funds raised during the campaign will enable the Institute to make significant new investments to: | The Cleveland Institute of Art | 600 | 31 to 90 days | \$3,000,000 |
| Cuyahoga | Recruiting Placement for Students and Graduates | Since 1992, my company has been assisting college students and graduates in locating job resources and directly assisting the placement of individuals in technical, sales, and managerial positions throughout the United States of America. So many individuals are despondent and think there is little hope in the US economy, let alone in the state of Ohio. I say that is not the case if we form an alliance to succeed! We have the building blocks right here within our borders and we need encouragement, vision and fortitude to go out and create and take those opportunities and continue to build the foundational fabric of our country. I want to continue to provide that energy and confidence to all job seekers that tenacity, will and positive mental energy will aid in the success of finding a good job. Working directly with businesses to help develop new positions that will enhance their growth, we, together, will spawn new opportunities for many individuals. This is our country and we will make it thrive! | Student Search System, Inc. | 1,000 | 0 to 30 days | \$99,000 |
| Cuyahoga | bacterial tereatment of shaker lakes | bacterial treatment of the shaker lakes in shaker heights, ohio in order to prevent algae growth and remove bottom sludge so as to make the lakes more usable for the citizens in the area. | general environmental science corp. | 4 | 31 to 90 days | \$75,000 |

|----------------|--|--|------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Rocky River City Schools Budget Stabilization | Funds are being requested to stabilize the current and subsequent fiscal year's operating budget to continue to provide excellent educational programming to the students of the Rocky River City School District. These funds are needed to replace revenue currently not being collected on account of delinquent property taxes due to the District as well as a severe cut in investment income due to the lowering of interest rates by the Federal Reserve over the last several months. These two issues alone account for approximately \$750,000. An additional \$181,000 is being requested to compensate for additional insurance premiums paid on behalf of District employees in excess of what was budgeted for such purposes. The total of \$931,000 would equate to approximately 15 jobs within the District (includes salaries and benefits). These funds should alleviate the needs for additional cuts in programming over those that have already been made. | Rocky River City School District | 15 | 31 to 90 days | \$931,000 |
| Cuyahoga | Valley Parkway Multipurpose Path | Road in North Royalton to Route 21 in Brecksville. The Cities of Broadview Heights, North Royalton and Brecksville, along with the Cleveland Metroparks are joining together to support and complete this project. The remaining section of the trail which needs to be completed lies 1.8 miles in North Royalton, 1.8 miles in Broadview Heights, and 2 miles in Brecksville. The existing Metropark "Emerald Necklace" stretches from Rocky River on the Northwest south through Strongsville, North Royalton, Broadview Heights and Brecksville, and east to the South Chagrin Reservation. The multipurpose trail connects from Rocky River south to North Royalton. The trail, which follows Valley Parkway, then ends for approximately six miles and begins again in Brecksville. Once completed, the multipurpose trail will enhance the economic viability of existing communities within the region, enhance the region's quality of life, Enhance a community's identity, and promote a healthier community through planning and environmental linkages from an integrated transportation system. Development of a commercial greenhouse using advanced energy to produce local produce for profit and employ local residents in an employee owned business model | City of Broadview Heights | 60 | 91 to 180 days | \$1,755,000 |
| Cuyahoga | Sustainable Urban Greenhouse | | Green City Growers | 30 | 181 days or more | \$600,000 |
| Cuyahoga | Flats East Bank Development | The first phase of this \$500 million development will include the 500,000 sq ft office tower and surrounding public plaza, hotel, related retail, supportive structured parking, and waterfront Park. However, due to the crisis in the nation's credit markets the necessary private financing for this phase has not yet been obtained along with the ability to sell the Port Square to the public improvements. A substantial infusion of public resources can provide the key to unlocking both parts of this deadlock, not only funding a "shovel ready" public improvement but unleashing other private and public sources to create both near term and permanent jobs in downtown Cleveland. The stimulus investment would be used for construction of the structured public parking and public plaza. | Strnisha Development Advisors | 2,000 | 31 to 90 days | \$30,000,000 |
| Cuyahoga | I-77 & State Route 82 Interchange Modification | This project will eliminate safety and congestion issues on the east ramp of I-77 and State Route 82. This will enhance current and potential development that is proposed on adjacent land. I-77 is currently being improved to handle increased traffic flow on the mainline which will add to the current safety and congestion at this interchange. Proposed development at the intersection will also overburden the interchange. Immediate improvements will promote economic development. These improvements will also realize significant cost effectiveness if completed at the same time as the mainline improvements. | City of Broadview Heights | 400 | 181 days or more | \$4,500,000 |
| Cuyahoga | Expand RSP Tooling Capabilities | RSP Tooling is a process that makes dies and molds with 50% less energy usage. The process now has a size capability of 8" by 8" and that need to be increased to ten feet. This machine will use 80% less energy , improve delivery by 75%, and make American tool making competitive again. Initial job creation will be 20 people to design and build machine. One machine will take 50 people to run on a three shift basis. Additional machines will increase the number employed significantly. The process was developed by the DOE to reduce energy consumption. RSP is commercializing the process. The large machine would make tooling for aerospace, military, and transportation industries reducing there cost and allowing them to bring products to market quickly | RSP Tooling | 50 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Re-entry/Family Development Program | Using our 24 month self sufficiency model, ex-offenders and family members will be prepared to enter the workforce, after the initial intake process and the organization will consult with the clients for a period of 24 months until the client becomes self-sufficient. | Just Like Us Enrichment Center | 26 | 0 to 30 days | \$650,000 |
| Cuyahoga | Child/Family Development | In 2008 Just Like Us was able to find employment for over 150 ex-offenders, year to date we have found employment for over 20 ex-offenders. We are seeking funding to provide services and support for ex-offenders and family members to become self-sufficient | Just Like Us Enrichment Center | 150 | 0 to 30 days | \$3,500,000 |
| Cuyahoga | Northfield Road South | Just Like Us Enrichment Center has a collaboration of 20 Early Childhood Education Centers located in 8 Counties within the State of Ohio. We believe that children grow up to become Just Like Us, What you put into a child is what you will get; but you can not affect the child if you don't affect the parents. The dollars granted will be used to create family development programs within each of the Childcare Centers, hire staff to track the progress of the parents and allow for the tracking of the children up and until they enter the fourth grade. This is needed to create outcomes for the children that are currently in our programs. We want 100% parent participation and we believe if we begin with the child in the childcare setting, we can eventually encourage the parents to participate in the child's educational process throughout their educational years | City of Bedford Heights | 75 | 31 to 90 days | \$800,000 |
| Cuyahoga | OpenSpan Modular Structure | Reconstructing the pavement would significantly reduce the number of vehicles that are damaged driving through the area. Potholes are causing damage to tires, vehicles swerve to avoid bad pavement areas and standing water. The health, safety and welfare of the traveling public would be greatly improved. The OpenSpan Modular Structure is a portable / semi-permanent structure that can be quickly moved to a site with a small vehicle. Two people can set up and take down in less than 30 minutes. The structure would be constructed of a lightweight aluminum base or floor that opens to a large platform. The side walls and roof are constructed from a double-wall, inflatable material. The size can be determined by the use but in the closed, transportable mode, it would always be small enough for normal highway use. This air-supported structure can be outfitted for many uses, such as, transportable schools, temporary housing, mobile clinics, etc. We have preliminary designs available for review as to construction and typical uses. If funding were received we would construct a working prototype to demonstrate the ease of transportation and set up. Because of the construction methods we planned, it would provide additional jobs to companies like trailer makers and the RV industry. Thank you. | Nottingham-Spirk Design Associates | 10 | 0 to 30 days | \$1,750,000 |
| Cuyahoga | Richmond Road & South Woodland Road Widening and R | 1.) 3,340 linear feet of roadway widening on Richmond Road 2.) 240 linear feet of widening on South Woodland 3.) Richmond Road / South Woodland intersection replacement 4.) Resurfacing of 2,340 linear feet of South Woodland | City of Beachwood | 50 | 31 to 90 days | \$1,450,000 |
| Cuyahoga | Bender Avenue Combined Sewer Replacement | Remove approx. 1400 linear feet of existing 10" and 15" combined sewer and replace with approx. 1400 linear feet of 12" and 15" combined sewer. Reconstruct a new concrete street to replace the existing asphalt-brick pavement. Replace all sanitary and storm sewer lateral connections and provide new test tees to all residences, reconstruct catch basins, construct new manholes | City of East Cleveland | 20 | 31 to 90 days | \$968,238 |

| Cuyahoga | MR Image Guided Radiation Therapy | ViewRay is seeking funding in the amount of \$2,600,000 to help support the manufacturing and assembly of the initial four (4) Renaissance units. Two (2) engineering models will be built to prove functionality and identification of any required changes to the design or manufacturing. The next two (2) prototypes will be used to prove the manufacturing process and to provide data for submission to the FDA for certification. Each of these units is expected to cost about 2X the settled down unit manufacturing cost for a total cost of about \$9.5M. | ViewRay Inc. | 100 | 0 to 30 days | \$2,600,000 |
| Cuyahoga | Give Back the Taft Tax | I would like to see the state start a campaign to ask citizens to voluntarily return their taft tax cut. When I saw how much I would be getting back on my approximately \$30,000 income, I could not believe that we are bankrupting the state and killing jobs for that piddly amount. I am going to try to calculate my tax "cut" and write Gov. Strickland a check for that amount. I think we should start a movement to get others to do the same. | self | 5,000 | 0 to 30 days | \$1,000 |
| Cuyahoga | Eastern Cuyahoga County Suburb Forclosed Homes Sav | purchase of approximately 1000 foreclosed homes in eastern suburbs of Cuyahoga County. Homes to be renovated and rented to responsible tenants with good history. Homes may be sold at some future date when housing market stabilizes and markets recover. Meanwhile, strong rental demand to keep operation profitable while maintaining the homes. These homes may also be rented to section 8 tenants with good rental histories. | House Savers LLC | 120 | 0 to 30 days | \$130,000,000 |
| Cuyahoga | A Proposal For Manufacturing Small Wind Turbines i | wind turbines. There are many small scale wind turbines on the market in the European Union. Small scale wind turbine manufacturers provide data of their product's electrical generation, but it isn't in a format that allows comparison between various manufacturers products. There is no "real world" electrical generation analysis of these small scale domestic wind turbine designs that could be used to determine the best product to use in an American grid tied setting. By purchasing some of these small wind turbines, installing them in the same setting and connecting them individually to the electrical grid, we could monitor their individual electrical generation. We would then identify the design that work the best and then have a fair metric against which to judge the individual manufacturers data. We would then approach the manufacturer of the best design, of enter into a test distribution relationship, and if the market for small wind turbines would justify the licensing of the design so we could set up a manufacturing facility here in Northeast Ohio, creating jobs | Cleveland Solar & Wind | 3 | 91 to 180 days | \$200,000 |
| Cuyahoga | New building Project | We are in the process of preparing to move into an existing warehouse building in Olmsted Falls that has 20,000 square ft, or twice the space of our current facility. All of the work done to date has been financed through cash flow. We are now waiting for loan approval from our bank to begin office construction as well as purchase and install cranes and other equipment. This loan approval may not be granted. Our current lease expires at the end of March. We had intended on being out of our current location by now, but city approvals and loan approvals have hindered our efforts. We are a manufacturer of steel for support of solar powered panels and structures, as well as a general steel fabricator for general construction and infrastructure projects. We require more space to improve productivity, preserve 15 jobs and possibly create an additional 10-20 jobs in the next 12- 18 months. | Affiliated Metal Inds | 15 | 0 to 30 days | \$300,000 |

|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Shaker Heights road repairs | <p>The 2009 Road Improvement Project consists of repair and replacement of asphalt, curbs, drains and catch basins, ADA improvements and related items at Shaker Heights' most deteriorated roads. This list includes Van Aken Boulevard and five additional streets all of which are rated Very Poor/Critical condition.</p> <p>Van Aken Boulevard is an urban arterial collector, 4-lane boulevard, with an average daily traffic volume of 21,000 vehicles per day. This road provides access to the City's two business districts which are home to 4,000 daily employees. It also serves as a gateway to the City at both its east and west end and is a major commuting route between eastern suburbs and the City of Cleveland.</p> <p>The five other streets are also considered connector roadways, although on a smaller scale than Van Aken Boulevard.</p> <p>Improving these roadways as described above will benefit existing businesses, attract new jobs, preserve historic neighborhoods, keep our link to public transportation viable and create jobs in the process.</p> | City of Shaker Heights | 150 | 31 to 90 days | \$8,000,000 |
| Cuyahoga | Shaker Heights sanitary sewers | <p>Lumond sanitary sewer replacement: Originally recommended by NEORS in 1982 and reconfirmed by studies in 1992 and 2005. Project will remove and replace 2400' of undersized 12" and 15" sewer with new 18" sewers. 62 house laterals and test tees will also be replaced.</p> <p>Onaway sewer replacement: Install 900' of new 10" sanitary sewer and transform existing combined sewer into storm-only. Connect new sanitary sewer to new deep tunnel relief sewer. 20 house laterals and test tees will also be replaced.</p> <p>Van Aken sewer replacement: To address capacity problems identified in 2002 NEORS study. Remove and replace 1600' of structurally deficient 30" sanitary sewers and connect to new deep tunnel relief sewer.</p> <p>Holdana/Ludgate sewer replacement: Remove and replace 2100' of 8" sewer on Holdana and 1200' of 8" sewer on Ludgate with 10" sanitary at both. Current sewers are undersized and structurally deficient and the cause of chronic basement flooding. 131 house laterals and test tees will also be replaced.</p> | City of Shaker Heights | 50 | 31 to 90 days | \$2,020,000 |
| Cuyahoga | Shaker Heights dam rehabilitation | <p>Repair and upgrade two (2) dams within the City. The Green Lake Dam (Shaker Heights C.C. No 2 Dam) and the Horseshoe Lake Dam (Upper Shaker Lake Dam) are both located along tributaries to Doan Brook, which drains directly into Lake Erie.</p> <p>Horseshoe Lake Dam was constructed in 1852 and is classified by ODNr as a Class I dam. There is no known record of when Green Lake Dam was constructed; it is classified by ODNr as a Class II dam.</p> <p>The proposed dam repairs are required by ODNr per 2001 inspections in order to prevent dam failures which may endanger life and property downstream. Major downstream properties include: Case Western Reserve University, Cleveland Museum of Art and other University Circle institutions. Failure of these dams would not only result in significant property damage but also could adversely affect thousands of downstream jobs.</p> <p>The Opinion of Probable Construction Costs for the ODNr-ordered repairs to the Horseshoe Lake Dam is \$2,600,000. The Opinion of Probable Construction Costs for the ODNr-ordered repairs to the Green Lake Dam is \$1,800,000.</p> | City of Shaker Heights | 75 | 31 to 90 days | \$4,400,000 |
| Cuyahoga | Employment/Technology Program | <p>With approximately 25,000 Deaf, Deaf-Blind and Hard of Hearing individuals in Cuyahoga county, we at ASL Advocates see the need for employment opportunities for those who cannot find work due to society not accepting their disability. With this project we can provide jobs, training and technological assistant for those mentioned above needing to come into the 21st century. This project will allow for equal communication under the ADA. We would like to provide and equalize the communication methods used by these individuals and provide devices such as TTY's, pagers, video phones, computers etc. Also, these monies would help provide interpreting services and support service providers. The technological skills from training workshops and hands on would create an independence for these newly working employees.</p> | ASL Advocates | 10 | 0 to 30 days | \$200,000 |
| Cuyahoga | Shaker Heights ADA Improvements | <p>The proposed improvements are required to satisfy a settlement agreement in the Kramer, et al v. City of Shaker Heights lawsuit and to bring our historic public facilities into compliance with the Americans with Disabilities Act. These improvements will remove structural barriers for persons with disabilities at city-owned buildings and facilities. The buildings include the landmark City Hall, Thornton Park recreation facility, the Police Department, Public Works building, Shaker Family Center and two Firehouses. Outdoor facilities including parks and other exterior spaces will also be upgraded.</p> <p>This work will address the specific settlement agreement in the lawsuit, as well as other ADA improvements. The settlement agreement in the case of Kramer, et al v. City of Shaker Heights requires the city to perform certain work to increase the accessibility and usability of its facilities, programs and services for persons with disabilities.</p> | City of Shaker Heights | 25 | 31 to 90 days | \$1,800,000 |
| Cuyahoga | Upper Room UV-C Germ Eradication | <p>UV-C light eradicates numerous bacteria, viruses and spores. These design concepts are in need of funding to bring them to commercially viable products that are sold into both hospitals and long-term care facilities. The benefits derived from the products are both increases in the quality of care in these institutions, a reduction in the transmission of airborne aerosolized disease and a decrease in employee lost time and workers compensation costs within the institutions where the devices are utilized.</p> | Luxair, LLC | 8 | 0 to 30 days | \$300,000 |
| Cuyahoga | Reclaiming the Lost Valley: Henninger Greenway Con | <p>Reclaiming the Lost Valley: Henninger Homestead Greenway Connector \$750,000 Status: Ready to Go! The Lost Valley-Henninger Homestead Greenway Connector will complete a vital connection of a historic homestead, located on the Ohio & Erie Canal Scenic Byway and National Heritage Corridor, to Brooklyn Heights Park, providing intermodal access for thousands of residents and workers, which will also allow connection to the 110 mile Towpath Trail and Ohio & Erie Canal, bringing this 21 mile proposed greenway loop in southern Cleveland one major step closer to fruition. Land necessary for connection and preliminary planning has already been completed.</p> | West Creek Preservation Committee | 120 | 0 to 30 days | \$750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Reclaiming the Confluence: West Creek & the Cuyaho | To restore over 1200 linear feet of West Creek, create eight acres of wetlands, and regain access to floodplain. The site will be restored to a natural confluence area with abundant floodplain wetlands, vernal pools, a re-meandered West Creek, and a healthy riparian zone. The project will serve to improve West Creek aquatic and riparian-zone habitat, it will better West Creek and Cuyahoga River water quality through a significant reduction in nonpoint source pollution, it will serve to reduce downstream flooding potential through better floodplain connection and stormwater storage, and it will create a new and dynamic natural attraction near where the West Creek Trail system (in development) will join with the Ohio & Erie Canal Towpath Trail. The Confluence Project will build upon improvements in West Creek water quality and ecology commenced through 10 years of stewardship by WCPC and a previous (2006) WRKSP award for West Creek stream restoration. | West Creek Preservation Committee | 150 | 31 to 90 days | \$2,500,000 |
| Cuyahoga | Federal Pacific Panels & Breakers Safety Study & T | may be aware of the huge controversy surrounding FPE stablock breakers and load centers. We are trying to determine the legitimacy of the alarm. Many municipalities and inspectors are banning the products from use. We are trying to determine if this banning is legitimate, based on a formal study, or just hearsay slander against the product of a company that cannot mount a defense because it was bought out and disbanded? It seems to me that much of the "badmouthing" against the product is coming from electricians and sellers of loadcenters and circuitbreakers that are interested in increasing their business by "changing out" old panels for new. The slander has now become popular to the extent that inspectors, homeowners and others are insisting that the Federal Pacific equipment be replaced. Knowing that FPE always had a UL listing, we are trying to determine if this concern is legitimate? Hundreds of millions of these components were installed nationwide during the decades 1950-1990. It was the most used brand of residential loadcenters and circuitbreakers. Emission and energy efficient tugboats and barges for short sea shipping, off-shore wind energy logistics and support vessels for assembly of wind turbines and the manufacture of high-tech carbon fiber based marine vessels for the defense industry all utilizing unemployed, underemployed and graduates of inner-city Cleveland vocational high schools in career skilled jobs offering high paying jobs with comprehensive benefits and training. We estimate that this project will create and retain 125 new career and sustainable jobs. The economic multiplier effect of this project to the local economy is estimated as generating an incremental \$ 49 per dollar spent. Including any consideration of the additional economic ripple effect of employee payroll and benefits. Additionally, the facility construction costs will immediately employ 125 building trades employees which further benefits the Northeast Ohio economy. These facilities will be built on a former Superfund site, now being remediated to industrial use and not being included in this project. | Peace of Mind LLC | 50 | 0 to 30 days | \$50,000,000 |
| Cuyahoga | Phase II Shipyard Expansion and Wind Energy Logist | We are a startup alternative fuel vehicle manufacturer. Our first proof of concept prototype, the XR3 Personal Transit Vehicle (PTV) is finished and on the road. It is a two passenger 200mpge Plug-in Hybrid Electric Vehicle. We are now developing 6-10 pre-production prototypes for testing and refinement with several university and industry partnerships. These programs will lead to mass production in Cleveland, Ohio by mid 2010. A conservative estimate gives 150 jobs, \$15,000,000 annual payroll and gross annual sales of \$277,000,000 in the fifth year. Models include extended range battery electric, dual-fuel (CNG/ E85) and a Plug-in Hybrid fuel cell-electric version. Identify 250 potential drill sites for gas wells, obtain leases on relevant properties in 20 acre parcels. Drill and develop each well. Put each well on line with major utility company | The Great Lakes Towing Company | 125 | 0 to 30 days | \$20,612,981 |
| Cuyahoga | XR3 Motors | TMI has been collaborating at the OARDC campus of The Ohio State University on an innovative demonstration showing how biogas from an anaerobic digester using farm or food processing waste as a feedstock can be converted into electricity and heat for increased energy efficiency. The practical size of this project makes it unique in the world and offers an opportunity for Ohio to provide global leadership. The project has been funded by numerous sources amounting to several million dollars and is seeking additional funds for completion. Stimulus dollars would match about \$5MM already invested in the project demonstration | XR3 Technologies, LLC | 150 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Cuyahoga County Urban Gas Well Development | major regional mass- transit improvement in Shaker Heights. These \$49,000,000 project will entail a 1/4-mile extension of the GCRTA Blue Line light rail from its current terminus through the Warrensville-Chagrin Blvd intersection to a new intermodal facility with eight bus bays which will serve the entire SE portion of Cuyahoga County. When completed in 2014, the planned facility will greatly improve both in-commuting and out-commuting options for residents of Cleveland, Shaker Hts, Warrensville Hts, Highland Hills, Beachwood and other nearby communities. The project has been adopted and incorporated into the master plans of both the City or Shaker Heights and GCRTA. It has broad regional support and a diverse group of collaborative partners including the Cuyahoga County Engineer and multiple private entities. Federal construction funding is being sought via 2010 appropriations and the upcoming omnibus transportation bill. \$1,500,000 of Stimulus Bill funding is required to permit engineering and environmental analyses for the project to move forward during 2010. | Devegas LLC | 22 | 31 to 90 days | \$130,000,000 |
| Cuyahoga | Distributed BioEnergy Generation | The Hispanic UMADAOP Youth Center operates an after-school program during the hours of 3 p.m. to 8 p.m. Currently we serve 190 members between the ages of 12 to 18 years actively participating in the programs offered at the center. Our programs abide by the following principles: Cleveland Clinic recently unveiled plans to construct a free-standing 120,000 square foot clinical Reference Lab. This project represents an immediate business opportunity for Northeast Ohio and leverages existing expertise in a growth industry. The Reference Lab will cost roughly \$25 million to construct. Upon completion, the Lab will immediately employ between 300-500 new employees in skilled, high-paying jobs. A possible second phase would add an additional 100,000 square feet and employ a total of 2,000 employees. | TMI Fuel Cell Systems | 50 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Warrensville-vanAken TOD | Clinic believes its intellectual capital in lab medicine, combined with its culture of innovation and entrepreneurial spirit, provides the basis to pursue this important opportunity. Cleveland Clinic plans to partner with other Northeast Ohio organizations, both public and private, to create educational and workforce development opportunities connected with the Reference Lab. Cleveland Clinic has a modest local reference lab business. Cleveland Clinic committed funding for the Lab's construction and is prepared to break ground in a matter of weeks. Economic stimulus funding would expedite the project timeline and ensure the project's success. | City of Shaker Heights | 500 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | Hispanic UMADAOP Youth Center | Demolish/rebuild and/or renovate two or three elementary school buildings of approximately 65,000 75,000 square feet each, and demolish/rebuild the east end of the community's lone high school (approximately 247,000 square feet). The project is anticipated to last approximately 24-months progress and anticipated to be completed in June 2009. Green Road Pediatrics is an independent group practice of 6 pediatricians serving children in the eastern suburbs of Cleveland. As an independent group, not owned by the Cleveland Clinic or University Hospitals of Cleveland, we are able to make management decisions that are best for our practice and for our patients. We have a collegial relationship with both tertiary centers and can offer our patients access to the best specialists in Cleveland. However, we cannot benefit from financial support from either system which has been a disadvantage in financing large investments such as EHR and malpractice insurance, which have put a strain on independent medical groups. We have chosen Noteworthy Medical Systems, of Beachwood, Ohio as our vendor for practice management and electronic medical record software. Support for this project will advance our practice of medicine, provide patients with access to their medical information and support a local vendor of medical technology | Hispanic UMADAOP, Inc. | 5 | 0 to 30 days | \$75,000 |
| Cuyahoga | Cleveland Clinic Reference Lab | Abandonment of existing treatment plant, which outlets to Chagrin River, and replacement with new sanitary lift station(s) and forcemains(s) | Cleveland Clinic | 2000 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Phase III Building Project-Designing Our Next 50 Y | | Lakewood City Schools | 300 | 181 days or more | \$30,000,000 |
| Cuyahoga | Green Road Pediatrics Electronic Medical Record | | Green Road Pediatrics, Inc. | 12 | 0 to 30 days | \$100,000 |
| Cuyahoga | Downtown Pump Station and Treatment Plant Replacem | | Village of Gates Mills | 15 | 181 days or more | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Tiedeman Road Pavement Repair & Resurfacing | Tiedeman Road from Memphis Avenue to Brookpark Road is approximately 1.7 miles in length and an average of 50' wide. The proposed project will remove the existing asphalt surface course, repair base pavement and curbs, upgrade any non-ADA compliant pedestrian facilities (curb ramps) and install a new asphalt wearing course. Major components of this project include the following: 35,700 sq yd of asphalt paving, 9" concrete pavement repair, partial depth joint repair, joint cleaning & crack filling, curb repair/installation, asphalt resurfacing, and storm sewer rehabilitation. Anticipated construction year is 2013/2014. This is the main roadway path north/south to the I-480/Tiedeman Road interchange, a federal highway. | City of Brooklyn | 25 | 181 days or more | \$2,300,000 |
| Cuyahoga | Suffolk Estates Sanitary Forcemain Replacement | Replacement of antiquated forcemain that services a newly installed sanitary lift station | Village of Gates Mills | 3 | 181 days or more | \$300,000 |
| Cuyahoga | Health Information Technology Improvement | Bellevue and Applewood agencies approximate letters together provide wellness services, advocacy and behavioral healthcare to approximately 20,000 children, youth, and their families annually. Working collaboratively, Bellevue and Applewood would utilize funding in the Healthcare category to institute Information Technology upgrades to enhance information exchange between the agencies and administrative oversight, data collection and maintenance of client records and billing. | Bellevue JCB | 50 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Memphis Avenue Pavement Repair & Resurfacing | Memphis Avenue from Ridge Road to the Brooklyn/Linndale Corporation line is approximately 1.64 miles in length and an average of 44' wide. Part 1 of the proposed project will remove the existing asphalt surface course, repair base pavement and curbs, upgrade any non-ADA compliant pedestrian facilities (curb ramps) and install a new asphalt wearing course. Major components of this project include the following: 3,000ft partial depth joint repairs, 40,000ft joint cleaning & crack filling, 1,380ft of curb repair/installation, 6,570 tons of asphalt resurfacing, 4 curb inlets, and 300 ft of 12" RCP storm conduit. Anticipated construction year is 2012 or 2013. This is a main connector between Linnale and Cleveland - main thoroughfare for the City of Brooklyn, east/west | City of Brooklyn | 35 | 181 days or more | \$1,500,000 |
| Cuyahoga | St. Christophers Sanitary Pump Station | Replacement of a sanitary lift station immediately adjacent to the Chagrin River | Village of Gates Mills | 2 | 181 days or more | \$225,000 |
| Cuyahoga | Tiedeman Road/Memphis Avenue Interim Maintenance | Memphis Avenue & Tiedeman Road continue to deteriorate and routine maintenance efforts are not sufficient to maintain the integrity of the roadways in a safe and passable course for the motoring public while awaiting funding for the major repair and resurfacing projects currently programmed. As a result, this project institutes a more aggressive repair program to keep the roadways safe and drivable until the major projects can be undertaken | City of Brooklyn | 35 | 31 to 90 days | \$600,000 |
| Cuyahoga | Northcliff Avenue Pavement Repair & Resurfacing | Northcliff Avenue west of Ridge Road serves a major retail and commercial development (employment retained: 350) as well as being the primary entrance to the residential neighborhood. Northcliff was last widened, repaired and resurfaced in the late 1980's and is nearing the end of its useful life. The proposed project will remove the existing asphalt wearing course, repair base pavement and install a new asphalt wearing course. There is also 16 acres of prime underdeveloped real estate at the west end. There is potential for 150,000 square foot facility for commercial use. This alone would create over 100 jobs | City of Brooklyn | 25 | 181 days or more | \$400,000 |
| Cuyahoga | Downtown Grease Trap | Gravity sanitary sewers and commercial grease trap installation in downtown area to reduce grease load to downtown pump station. | Village of Gates Mills | 2 | 181 days or more | \$150,000 |
| Cuyahoga | Sherman Road Slope and Roadway Repair | Hillside reconstruction and roadway repair. | Village of Gates Mills | 4 | 91 to 180 days | \$400,000 |
| Cuyahoga | Bainbridge Road | Reconstruction of 2.5 miles of Bainbridge Road from SOM Center Road to Solon East Corporation Line, including a 5' wide bike lane and new sidewalks. The existing ditches will be enclosed with new storm storm sewers. | Cuyahoga County Engineer's Office | 308 | 31 to 90 days | \$14,000,000 |
| Cuyahoga | Brooklyn Recreation Center Parking Lot Reconstruct | This project will replace deteriorated concrete pavement along the south side of Brooklyn's recreation center along with the repair of concrete curbs and install ADA compliant curb ramps. In addition, the asphalt parking lot on the west side of the recreation center will be repaired, recycled in place, and resurfaced. 30-50,000 people use the facility annually. This figure does not include special events | City of Brooklyn | 10 | 31 to 90 days | \$360,000 |
| Cuyahoga | Various Culvert Replacements | Removal and replacement of various failing roadway culverts throughout the Village. | Village of Gates Mills | 5 | 181 days or more | \$500,000 |
| Cuyahoga | Traymore/Brookwood Pavement Reconstruction | Traymore Avenue and Brookwood Drive are local residential concrete streets, each approximately 1,200 feet in length. When last evaluated, it was determined that spot pavement repairs would constitute over 50% of the total pavement area. As such it is more cost effective to remove and replace the entire pavement. This project will remove and replace the existing concrete pavement, drive aprons, and sidewalks. In addition, storm sewer, sanitary sewer, and water main conditions will be evaluated and repaired or replaced as necessary. | City of Brooklyn | 25 | 181 days or more | \$1,105,000 |
| Cuyahoga | Old Mill Bridge at Chagrin River Road | New bridge deck. | Village of Gates Mills | 10 | 181 days or more | \$1,000,000 |
| Cuyahoga | West Bridge Street | Rehabilitation of West Bridge Street (C.R. 241) Bridge No. 256 is over the East Branch of the Rocky River in the City of Berea. This project is necessary due to the critical condition of the box beams supporting the roadway deck and sidewalks, which has resulted in partial closure and a reduced load limit for the bridge. The bridge inspection report dated 05/01/2008, documents that the bridge has a General Appraisal of 2 and an Operational Status B. In order to bring this structure up to standard, we will be replacing the bridge superstructure, including beams, deck, sidewalks and railings, while reconstructing the top portions of the existing abutments and repairing the portions of the abutments that are to remain. We will replace the reinforced concrete approach slabs, along with adjacent approach roadway pavement and sidewalks. | Cuyahoga County Engineer's Office | 48 | 31 to 90 days | \$2,200,000 |
| Cuyahoga | Chagrin River Road Reconstruction/Resurfacing | Repair and Resurfacing. | Village of Gates Mills | 8 | 181 days or more | \$750,000 |
| Cuyahoga | Tiedeman Road Interchange Modification | The proposed reconstruction of a widening interchange at the I-480/Tiedeman Road interchange. The benefits of this design being cost effective, keeps the integrity of the bridge, expeditious design for traffic flow, statistically reducing crashes and congestion, and the FIRST in Ohio. The design calls for widening of the current ramps, bridge island design for traffic flow, signage, utility relocations, and right of way acquisition. Currently there are ten businesses that reside at the interchange, north/south, with another 50 acres of available developable acres. We project, without including the labor associated with the project, another 1,000 commercial/business jobs to locate on the interchange. | City of Brooklyn | 1,000 | 181 days or more | \$5,000,000 |
| Cuyahoga | Tiedeman Road Interchange Modification | The proposed reconstruction of a widening interchange at the I-480/Tiedeman Road interchange. The benefits of this design being cost effective, keeps the integrity of the bridge, expeditious design for traffic flow, statistically reducing crashes and congestion, and the FIRST in Ohio. The design calls for widening of the current ramps, bridge island design for traffic flow, signage, utility relocations, and right of way acquisition. Currently there are ten businesses that reside at the interchange, north/south, with another 50 acres of available developable acres. We project, without including the labor associated with the project, another 1,000 commercial/business jobs to locate on the interchange. | City of Brooklyn | 1,000 | 181 days or more | \$5,000,000 |
| Cuyahoga | Old Mill Hillside and Roadway Repair - East of Cha | Hillside reconstruction and roadway repair. | Village of Gates Mills | 4 | 91 to 180 days | \$400,000 |
| Cuyahoga | Independent Living and Homeless Youth | Bellevue's Independent Living Program teaches independent living skills and provides the individualized counseling and services necessary for clients to successfully transition from dependent adolescent to self-supporting young adult. The program serves males and females, ages 17 to 23, who come from residential or community-based programs including foster care. Additionally, through its Homeless Youth Program, Bellevue provides temporary shelter, basic needs, and support to children and youth who find themselves on the street. Bellevue would utilize funds from the appropriate category to support these programs. | Bellevue JCB | 50 | 0 to 30 days | \$500,000 |
| Cuyahoga | Old Mill Hillside and Road Repair at County Line R | Bin Wall - Gabion slope retention and roadway repairs. | Village of Gates Mills | 2 | 91 to 180 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|-----------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Summer Youth Employment Program | Beneficial to participants during program months. Participants living skills and provides one individualized counseling and services necessary for clients to successfully transition from dependent adolescent to self-supporting young adult. The program serves males and females, ages 17 to 23, who come from residential or community-based programs including foster care. Bellefaire would utilize funds from the Poverty, Work, and Opportunities Category to formulate and implement a Summer Youth Employment Program to further enable these clients to ready themselves for the challenges which lay ahead. | Bellefaire JCB | 100 | 0 to 30 days | \$500,000 |
| Cuyahoga | Main Street Bridge No.36 | Replacement of Main Street (CR 231) Bridge No. 36 is over Baldwin Creek on the border of Middleburg Heights and Strongsville. This project is necessary due to its general appraisal rating of 4, a sufficiency rating of 46 and classified as structurally deficient and functionally obsolete as documented in our 2007 bridge inspection reports. The new structure will have a span of approximately 40' and be comprised of prestressed concrete box beams on full-height abutments | Cuyahoga County Engineer's Office | 22 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Chagrin River Road Bridge at Brigham Road | New bridge deck and bridge rehabilitation. | Village of Gates Mills | 10 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Bellefaire and Monarch School Renovation Projects | Two schools operate on Bellefaire JCB's campus; Bellefaire School serves the children and youth in Bellefaire's residential and therapeutic residential programs and operates within the Cleveland Heights/University Heights School System. The Monarch School is Ohio's first chartered non-public school for children with autism. Bellefaire School is a structure which dates back to 1928 and is in dire need of structural updates and renovation. Additionally, since opening in 2000, the student body of Monarch School has increased by 50% and therefore expansion to accommodate the growing population of children and youth with Autism Spectrum Disorder is vitally needed. Bellefaire would utilize funding in the Education category to undertake these capital projects to serve these populations and their education needs | Bellefaire JCB | 150 | 31 to 90 days | \$4,000,000 |
| Cuyahoga | Mayfield Road Resurfacing | Repair and resurfacing. | Village of Gates Mills | 10 | 181 days or more | \$1,000,000 |
| Cuyahoga | Downtown Area Gravity Sanitary Sewer Improvements | Gravity Sewers to connect downtown area to new sanitary lift station. | Village of Gates Mills | 12 | 181 days or more | \$1,200,000 |
| Cuyahoga | Social Advocates For Youth--SAY | to high school students in eight east suburban school districts in Cuyahoga County, Ohio. SAY aims to reduce risk factors and enhance protective factors in the prevention of substance abuse and violence and to promote healthy behaviors in youth. This is achieved through the implementation of multiple strategies and intense, focused collaboration with these districts and their municipalities. Counselors are placed in each district's middle or high schools for 20-24 hours per week. Easily accessible, they are provided at no cost to the schools and deliver direct services targeting at-risk students including assessment, short-term counseling, and referrals for individual and/or family treatment. Each counselor is licensed with the State of Ohio and possesses at least a Master's level degree in social work with a declared scope of practice in alcohol and drug prevention and professional experience working with adolescents and their families. Bellefaire/SAY would utilize funds to support direct implementation of this program | Bellefaire JCB | 50 | 0 to 30 days | \$1,200,000 |
| Cuyahoga | Phase 2 Storm Water Infrastructure Mapping | Infrastructure Mapping required by new Phase 2 stormwater permit requirements | Village of Gates Mills | 1 | 0 to 30 days | \$100,000 |
| Cuyahoga | Mayfield Road Culvert Replacement at Chagrin River | Replacement of existing culvert that was previously slip lined with a much smaller pipe (by others) and is now prone to frequent blocking | Village of Gates Mills | 4 | 181 days or more | \$400,000 |
| Cuyahoga | Dist 12, PID 85585, GCRTA paratransit vehicles | GCRTA Replacement of Paratransit Vehicles | Ohio Department of Transportation | 77 | 31 to 90 days | \$4,640,000 |
| Cuyahoga | Reitman Bridge Replacement | Replacement of a privately owned bridge that has a center pier and is prone to causing debris/blockage issues on the Chagrin River. | Village of Gates Mills | 4 | 181 days or more | \$350,000 |
| Cuyahoga | Preschool Scholarship Program | Bellefaire JCB operates two early childhood/preschool programs which serve families in the surrounding communities. Through the utilization of funding from the Education category, Bellefaire would provide scholarships to eligible families who seek the services of the early childhood/preschool programs. | Bellefaire JCB | 25 | 0 to 30 days | \$125,000 |
| Cuyahoga | Dist 12, PID 85612, GCRTA Airport Rail Station Tun | GCRTA Airport Rail Station Tunnel | Ohio Department of Transportation | 160 | 91 to 180 days | \$8,000,000 |
| Cuyahoga | Pedestrian Bridge Rehabilitation over Chagrin River | Renovation of existing pedestrian bridge over the Chagrin River. | Village of Gates Mills | 1 | 31 to 90 days | \$100,000 |
| Cuyahoga | Esther/Roy/Renee Capital Improvement | Rehabilitation of asphalt roadway, removal and replacement of existing deteriorated portions of the storm sewer system including manholes, catch basins and service connections, replacement of 8" water main, valves and service connections. | City of Highland Heights | 25 | 91 to 180 days | \$686,520 |
| Cuyahoga | Dist 12, PID 85614, GCRTA Waterfront Line Track Rep | GCRTA Waterfront Line Chute Track Repairs | Ohio Department of Transportation | 12 | 31 to 90 days | \$600,000 |
| Cuyahoga | Village Wide Resignalization | Replacement and connection of three signals located in the Village | Village of Gates Mills | 2 | 31 to 90 days | \$250,000 |
| Cuyahoga | North Quilliams Area Water Main Replacement | Approximately 12,000 linear feet of water main replacement. Eliminate problem of high break ratio; provide more reliable water service to neighborhood. Prevent ongoing damage to streets from water main breaks. Stabilize neighborhood appearance and value | City of Cleveland Heights | 0 | 91 to 180 days | \$3,000,000 |
| Cuyahoga | Dist 12, PID 85616, GCRTA Rockefeller Br Demolition | GCRTA Rockefeller Bridge Demolition | Ohio Department of Transportation | 36 | 31 to 90 days | \$1,800,000 |
| Cuyahoga | Dist 12, PID 85615, GCRTA Light Rail Trunk Signals | GCRTA Light Rail Trunk Line Signals | Ohio Department of Transportation | 170 | 181 days or more | \$8,500,000 |
| Cuyahoga | Suffolk Estates Sanitary Forcemain Replacement | Replacement of antiquated forcemain that services a newly installed sanitary lift station | Village of Gates Mills | 3 | 181 days or more | \$300,000 |
| Cuyahoga | Miner Road Capital Improvement | County Road 22. A safety improvement project will included widening the current pavement width from 18' to 22', rehabilitation of existing pavement using in place recycling, new asphalt overlay, the enclosure of deep roadside channels, removal of guard rail, rehabilitation of and installation of new storm sewer drainage, and replacement of the traffic signal system with a state of the art modern energy efficient signal system which will include a preemption system for safety forces | City of Highland Heights | 25 | 91 to 180 days | \$1,171,832 |
| Cuyahoga | Monmouth Road Sanitary Sewer Improvement | Replacement of approximately 2,200 linear feet of undersized sanitary sewer. Increased capacity will prevent basement flooding & environmental overflow. Stabilize neighborhood property values | City of Cleveland Heights | 0 | 91 to 180 days | \$850,000 |
| Cuyahoga | Dist 12, PID 85617, GCRTA Lee/Van Aken Rail Rehab | GCRTA Lee/Van Aken Rail Station ADA Rehab | Ohio Department of Transportation | 80 | 181 days or more | \$4,000,000 |
| Cuyahoga | Dist 12, PID 85618, GCRTA Rail Grade Crossing Upgr | GCRTA Rail Grade Crossing Upgrades | Ohio Department of Transportation | 56 | 91 to 180 days | \$2,800,000 |
| Cuyahoga | Dist 12, PID 85619, GCRTA Warrensville/Van Aken Ex | GCRTA Warrensville/Van Aken Extension of the Blue Line | Ohio Department of Transportation | 10 | 91 to 180 days | \$500,000 |
| Cuyahoga | Dist 12, PID 85604, GCRTA East Side Transit Center | GCRTA Stephanie Tubbs Jones East Side Transit Center | Ohio Department of Transportation | 208 | 91 to 180 days | \$10,400,000 |
| Cuyahoga | Dist 12, PID 85607, GCRTA Clifton Avenue BRT Proje | GCRTA Clifton Avenue BRT Project | Ohio Department of Transportation | 300 | 31 to 90 days | \$15,000,000 |
| Cuyahoga | Fairmount Boulevard Widening / Reconstruction | Widening and Reconstruction / Safety Upgrade from SR 91 East to County Line Road | Village of Hunting Valley | 25 | 181 days or more | \$2,500,000 |
| Cuyahoga | Dist 12, PID 85580, GCRTA Puritas rail station ADA | GCRTA Puritas Rail Station ADA Rehabilitation | Ohio Department of Transportation | 170 | 31 to 90 days | \$8,500,000 |
| Cuyahoga | Dist 12, PID 85581, GCRTA Woodhill Rail Station AD | GCRTA Woodhill Rail Station ADA Rehabilitation | Ohio Department of Transportation | 60 | 91 to 180 days | \$3,000,000 |
| Cuyahoga | South Woodland 16" Express Water Main | Express loop between existing main on South Woodland running east to County Line Road - Priority Project as Determined by Cleveland Water Department | Village of Hunting Valley | 100 | 91 to 180 days | \$2,600,000 |
| Cuyahoga | Dist 12, PID 85583, GCRTA light rail trunk line tu | GCRTA Light Rail Trunk Line Turn Outs | Ohio Department of Transportation | 40 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | Shaker Boulevard Repair and Resurfacing | Repair and Resurfacing from SR 91 East to Chagrin River Road (County Road). | Village of Hunting Valley | 6 | 181 days or more | \$600,000 |
| Cuyahoga | Dist 12, PID 85584, GCRTA Red Line Track Replaceme | GCRTA Red Line S-Curve Track Replacement | Ohio Department of Transportation | 12 | 31 to 90 days | \$600,000 |
| Cuyahoga | County Line Reconstruction - SR 87 to Whisperwood | Slope Repair, Retaining Walls and Pavement Reconstruction in area prone to hillside failures (County Road) | Village of Hunting Valley | 5 | 181 days or more | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Western Lorain Road Streetscape | Installation of streetscape on Lorain Rd. between W. 223 and the North Olmsted line to include trees, benches, brick pavers, bumpouts, pedestrian lighting, and a bike trail to enhance the existing business district to create destination point and increase patronage to existing businesses and encourage new entrepreneurship in the area | City of Fairview Park | 100 | 91 to 180 days | \$1,500,000 |
| Cuyahoga | Dist 12, PID 85606, GCRTA E 55th St Rail Station A | GCRTA East 55th Street Rail Station ADA Rehab | Ohio Department of Transportation | 240 | 91 to 180 days | \$12,000,000 |
| Cuyahoga | Chagrin River Road Slide/Riverbank Repair @ Cedar | Repair of failed River Bank and slope that is on the verge of encroaching into the Chagrin River Road pavement. (County Road) | Village of Hunting Valley | 5 | 181 days or more | \$500,000 |
| Cuyahoga | Dist 12, PID 85609, GCRTA Brookpark Station ADA Up | GCRTA Brookpark Rapid Transit Station ADA Upgrade | Ohio Department of Transportation | 300 | 31 to 90 days | \$15,000,000 |
| Cuyahoga | Chagrin River Road Repair and Resurfacing | Repair and Resurfacing of chagrin river Road, a heavily used bike and motorcycle route (County Road) | Village of Hunting Valley | 8 | 181 days or more | \$800,000 |
| Cuyahoga | Cedar Road Repair and Resurfacing SR 91 to Chagrin | Repair and Resurfacing of Cedar Road from SR 91 to Chagrin River Road (partner with Village of Gates Mills) (County Road). | Village of Hunting Valley | 5 | 181 days or more | \$500,000 |
| Cuyahoga | County Line Road Repair and Resurfacing - Fairmoun | Repair and Resurfacing of County Line Road - Fairmount south to Whisperwood (County Road) | Village of Hunting Valley | 4 | 181 days or more | \$400,000 |
| Cuyahoga | Woodstock Sewer Rehabilitation Project | Sanitary and Storm Sewer repair and replacement on Woodstock Ave as part of the City's continuing efforts to reduce basement flooding, eliminate sanitary sewer infiltration and improve the flow of storm water. Project effects several hundred residences | City of Fairview Park | 50 | 91 to 180 days | \$1,200,000 |
| Cuyahoga | Wischmeyer Creek Sanitary Sewer Rehabilitation | This portion of the City's sanitary sewer is 2820 feet long and varies in size from 10 to 15 inches in diameter. The proposed rehabilitation includes inserting cured-in-place pipe liner and restoring the infiltration integrity of manholes by epoxy lining and installing chimney seals. Final detailed plans and specifications for this project are prepared and are being submitted to the City this month. | City of Bay Village | 12 | 31 to 90 days | \$403,000 |
| Cuyahoga | MRI Coils for Obesity Patients | FDA-registered and Japan's MHLW-registered firm. It focuses on developing and manufacturing with RF coils here in Ohio for Toshiba Medical Systems, Japan, and Siemens Healthcare. QED, under the partnership agreement, QED OEM-supplies its RF coil products to these OEMs, and then distributes QED's coils worldwide as a critical part of their MRI systems. The industry sees ever-increasing needs to treat obesity patients, especially in the USA, demanding the wider bore MRI scanner. The next-generation "Titan" MRI scanner requires the development of a completely new line of bigger RF coil products to accommodate those patients accordingly. Since QED's inception in 2006, the company grew from 1 to now 43 employees as of February in 2009. Doubling the employment in roughly every 18 months or so. As the outcome of this proposed obesity project, QED expects to hire additional 40 employees by the year end with the estimated revenue of more than \$10M. This must be in line with the State's vision for the high-tech job creation and bio-healthcare industry leadership | Quality Electrodynamics, LLC (QED) | 100 | 0 to 30 days | \$4,300,000 |
| Cuyahoga | Saving Safety Forces Jobs | Requesting funding for the immediate hiring of 2 new police officers and 1 firefighter to fill positions left open due to budgetary constraints. This would bring both divisions up to statutory levels | City of Bay Village | 3 | 31 to 90 days | \$201,371 |
| Cuyahoga | Lake Road Pump Station | The project will eliminate an existing sanitary sewer overflow that discharges directly into Wischmeyer Creek at about 200 feet from Lake Erie. The overflow has been studied and found to be frequently active during significant rainfall events. Installation of the pump station would serve all residences that discharge into the Lake Road sewer on the north side of the road | City of Bay Village | 8 | 31 to 90 days | \$77,000 |
| Cuyahoga | Dist 12, PID 85613, GCRTA Fairhill Substation Reha | GCRTA Fairhill Substation Reha | Ohio Department of Transportation | 60 | 91 to 180 days | \$3,000,000 |
| Cuyahoga | SOM Center Road (SR 91) Repair and Resurfacing Ced | Repair, Resurfacing and Drainage Improvements on SOM Center Road (State Route | Village of Hunting Valley | 5 | 181 days or more | \$450,000 |
| Cuyahoga | Culvert Replacements and Channel Cleaning - Mutipl | Replacement and Channel Cleaning in multiple location throughout the Village that are prone to flooding. | Village of Hunting Valley | 4 | 181 days or more | \$400,000 |
| Cuyahoga | Infrastructure Mapping | Conversion of Village Maps to GIS and establishment of GIS mapping program for all Village Infrastructure. | Village of Hunting Valley | 1 | 0 to 30 days | \$100,000 |
| Cuyahoga | Operation Rebuild Cleveland | In order to rebuild America, we must rebuild and rehabilitate our cities. In Cleveland, I recently bought a foreclosed house for \$5500. With "Operation Rebuild Cleveland", we would buy similar homes (75-100 of them), all which need thousands in rehabilitation costs. Paying workers to rehabilitate these homes not only puts people to work right away, but improves the city of Cleveland. It eliminates many "eyesores", improves the quality and availability of affordable housing in Cleveland. It also removes a portion of underpriced foreclosed homes off the market. Removing foreclosures from the market will help to stabilize the housing market again. This project will definitely create jobs, contribute to stabilizing the falling housing market in Cleveland, and rebuild one of America's cities. | Dunamis Realty Inc | 450 | 0 to 30 days | \$2,900,000 |
| Cuyahoga | Historical Center Creation and Rehabilitation | This project will restore our Historical Campus District. The building, our Historical Center, will house the Historical Society, small non-profit companies, and an innovation zone for startup companies. The building and grounds will enhance our region by integrating history and education with technology allowing and encouraging our community to explore our history and develop our sense of identity. When completed, this project will provide our region a beacon showcasing the marriage of history, education, technology, and economic development. | City of Broadview Heights | 55 | 0 to 30 days | \$145,000 |
| Cuyahoga | Business Development | Scribes Unlimited is a 15 year old Ohio LLC company that currently employs 2 people. We are dedicated to research writing, investment consulting and other aspects of writing, editing and proposals. We have had 5 books published and written over 100 business plans, grant applications and technical reports in our company history. We currently wish to expand our services and hire additional employees. Scribes Total Events Management will need a director and a creative executive. Scribes Unlimited will need a marketing director and writer while our consulting arm, Tango-Cat International will require 2-3 consultants specializing in different commodities, services and RFP's. We hope to address the poverty, work and opportunity issue by focusing on writing grants for agencies, and other development issues. Our services are also used in the energy arena, where we have already written grants and proposals for bio-diesel facilities and written and obtained grants for school systems as well as engineering societies. | Scribes Unlimited, LLC | 8 | 31 to 90 days | \$750,000 |
| Cuyahoga | Urban Health Center (Huron Hospital) | The Urban Health Center is designed to aggregate essential resources to provide patients with a full spectrum of medical care and disease management services, ranging from prevention to treatment of end stage renal disease, diabetes, hypertension, and heart failure. This 15,545 sf structure is designed as two separate units: 1) chronic disease management; 2) kidney care. Huron's current outpatient community health center and other community resources providing chronic disease management and kidney care related services are being overwhelmed. Patients suffering with chronic diseases visit health facilities in a revolving door fashion regularly seeking treatment for symptoms, while the core medical issues are still never addressed. The vision for this project is to interrupt this cycle. Huron Hospital seeks to prevent, treat, and halt the progression of kidney disease through innovative medical care, early identification, disease management, and community outreach. Cleveland is ranked in the top ten of metropolitan areas in terms of renal disease incidence rates, and East Cleveland is considered an epicenter of need for kidney care related services in Northeast Ohio. | Cleveland Clinic | 25 | 31 to 90 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Heaventrain | Lighthouse has a rich history of service to the Central Cleveland neighborhood. The Lighthouse service area is defined as the "Central" area of the city that stretches from East 22nd St. to East 79th St. and from Euclid Avenue to Woodland Avenue. This area, home to 12,107 residents, is reported by the Cleveland Mayor's office as "the poorest neighborhood in Cleveland." Statistically, the Central neighborhood appears to face many challenges. In the poorest of neighborhoods, many children do not have anything to eat on the weekends, except what Heaventrain provides. Heaventrain is a brightly painted bus that was designed with kids in mind. It is equipped to reach out to children in 10 of Cleveland's poorest neighborhoods. Because we are mobile we are not bound by the size and location of any building. Our services can go wherever there are hurting people. And there are hurting people everywhere. Lighthouse, Inc. is expecting to expand its Heaventrain program to be available throughout the year for at least 1,200 children and youth each week. | Lighthouse, Inc. | 10 | 0 to 30 days | \$85,000 |
| Cuyahoga | Fire Station | Construct a new fire station to provide coverage to the south half of the city | Bradnew Heights Fire Department | 9 | 181 days or more | \$5,000,000 |
| Cuyahoga | Deep Surface Penetration of Dropped Ordinance | Method of dropping explosive ordinance by military to achieve earth and rock penetration of hundreds or perhaps thousands of feet in depth. Use would be made of existing technology, however method of usage would be novel. Most of cost could be attributed to use of existing military equipment for experimentation toward successful outcome. NASA or other government funded science personnel would be needed for this project. Increase in Ohio jobs would come from this pool of personnel. | Ordimax LLC | 500 | 0 to 30 days | \$1,000,000,000 |
| Cuyahoga | Protecting the Citizens of Warrensville Heights | Our project is to increase police officers within our jurisdiction. This in turn will assist fifteen other communities that we have a council of governments with. We are part of the Valley Enforcement Group also known as Valley Enforcement Regional Council of Governments. This increase in personnel will allow us to assist more in our SWAT unit and AIU units along with sharing resources within the investigative units that are already established. This will also help us reestablish our VICE unit which has been eliminated due to budgetary constraints. | Warrensville Heights Police Department | 5 | 31 to 90 days | \$260,000 |
| Cuyahoga | Project Re-Hire | Due to the economy and declined in various revenues for the they will be laying off full time police officers. We are a small department (22 FT and 1 PT)and this is representing 42% of department personnel and 24% of uniform division personnel. This takes the department back to 1993 staffing levels while our calls for service and potential for violent crime have almost doubled. This will reduced of shifts to only 2 officers on duty at times during an eight hour shift, creating both an office safety issue as well as a safety security issue for residents and businesses within the community, which include a hospital, a shopping mall and the Cuyahoga County Airport. | Richmond Heights Police Department | 4 | 31 to 90 days | \$300,000 |
| Cuyahoga | Build Ohio's Healthcare Software Industry and Redu | Healthcare staff scheduling software, owned and developed by an Ohio company, Acme Express, Inc. will be implemented in Ohio hospitals. Benefits will be: 40 new IT jobs; upgraded skills for 2,000 healthcare schedulers; 80% reduction of scheduling cost; elimination of paper and mistakes; cost-saving, efficient deployment of healthcare professionals; and a foundation for healthcare emergency response. The project leverages two SBIR grants awarded Acme from NIH. Three related SBIR proposals will be submitted in fall of 2009. Acme has also submitted an Ohio Research Commercialization Grant Program proposal with Microsoft, Cleveland Clinic, and Ohio Hospital Association as partners. The proposal's strategy: "Use Ohio, Buy Ohio, Build Ohio." Use Ohio by using its hospitals as evaluators of healthcare IT products and an on-going source of innovative ideas. | Acme Express, Inc. | 40 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Ackley Road Reconstruction | Buy Ohio by finding resources (like the stimulus and future federal healthcare cost reduction Reconstruction of 2 lane road, 28 feet wide with a total length of 2,500 feet. Existing concrete pavement, curbs and underdrains will be replaced with an asphalt surface course over an asphalt intermediate course, asphalt and aggregate base with concrete curb, 6" underdrain, new partial drive aprons and new ADA compliant curb ramps. The existing road is 83 years old and in failing condition. The contractor will use up to a maximum of twenty percent of recycled asphalt concrete pavement in the surface course and a maximum of thirty-five percent of recycled asphalt concrete pavement in the intermediate course as specified in Item 401.04 of the Ohio Department of Transportation Construction and Material Specifications. The existing concrete pavement and curb will be removed and designated for re-use as crushed aggregate for sewer trench backfill on other public works projects. | City of Parma Heights | 20 | 31 to 90 days | \$585,000 |
| Cuyahoga | Lorain Road Redevelopment Project | 11.88 acre redevelopment project which will eliminate blight, enhance the area, and increase the tax base significantly through the establishment of mixed use retail, office and residential facilities | City of Fairview Park | 150 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Weston House restoration project | This project would transform an empty and deteriorating historic landmark into a productive public facility owned and operated by the City of Westlake. This landmark 1845 stone house would receive innovative weatherization treatment and abatement and secured such that it can be safe and usable as a public meeting and educational facility. | Streven McQuillin & Associates | 10 | 0 to 30 days | \$350,000 |
| Cuyahoga | Workforce Development in Geospatial Technology; Oh | technology development. Geospatial technology (remote sensing, geographic information systems GIS and global positioning systems GPS) has been heralded by the United States Department of Labor (2005) as one of the top three emerging job fields in the US, third only to biotechnology and nanotechnology, and it continues to grow even in this difficult economic climate. OhioView is a grassroots organization that was started in 1997 whose membership consists of researchers and educators from 12 research universities in Ohio. OhioView has developed successful training programs for several key groups including graduate students, undergraduate students, K-12 teachers and K-12 students. The goal of this proposal is to enhance the pipeline from K-12 schools to industry using geospatial technologies leading to economic growth in Ohio. OhioView will engage K-12 teachers through effective professional develop, K-12 students through hands-on field observations and inquiry-based learning, community college, four-year college faculty, undergraduate and graduate | OhioView through Ohio Aerospace Institute | 30 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | North Church/Kingsdale Drive Reconstruction | Reconstruction of 2 lane road, 28 feet wide with a total length of 6,650 feet. The existing asphalt pavement will be planed off. The existing base will undergo both full depth and partial depth repair. An asphalt surface course will then be placed over an asphalt intermediate course. This project will also include new partial drive aprons and new ADA compliant curb ramps. The road is in a failing condition due to settlement issues stemming from the construction of a relief sewer in the early 90's. The contractor will use up to a maximum of twenty percent of recycled asphalt concrete pavement in the surface course and a maximum of thirty-five percent of recycled asphalt concrete pavement in the intermediate course as specified in Item 401.04 of the Ohio Department of Transportation Construction and Material Specifications. | City of Parma Heights | 25 | 31 to 90 days | \$585,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|----------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Maplewood Road Reconstruction | pavement will undergo full depth concrete base repair and partial depth base repair to fix the failed joints. Once the concrete pavement has been repaired an asphalt surface course will be placed over an asphalt intermediate course and existing concrete pavement. The existing roadway is 53 years old and in failed condition. The contractor will use up to a maximum of twenty percent of recycled asphalt concrete pavement in the surface course and a maximum of thirty-five percent of recycled asphalt concrete pavement in the intermediate course as specified in Item 401.04 of the Ohio Department of Transportation Construction and Material Specifications. | City of Parma Heights | 15 | 0 to 30 days | \$153,000 |
| Cuyahoga | Pavement Maintenance and Resurfacing Project | Maintenance and resurfacing of 2.3 miles (12,035 linear feet) of residential roadways including construction management and inspection. | City of Bay Village | 50 | 91 to 180 days | \$531,400 |
| Cuyahoga | N. Taylor Road Rehabilitation | Improvements to pedestrian crossings including shortening crossing distances and upgrading to current ADA standards. ADT is 12,650. Road is one of two main roads that access Severance Town Center, our major mixed use development containing commercial, residential, and business uses. Condition and functionality of road is critical to spur additional development, attract tenants to vacancies and retain existing tenants. | City of Cleveland Heights | 600 | 91 to 180 days | \$7,256,000 |
| Cuyahoga | Hospice House, Western Campus | Facility in Westlake. The project will create 105 new healthcare jobs and in addition support the economy by providing work for construction and trade employees. Hospice of the Western Reserve is in a "quiet" phase of a capital campaign and has more than \$13.7 million in commitments of support. The project has received \$100,000 through the 2008 Ohio Capital Budget and it was appropriated \$400,000 in the FY2009 Labor, Health & Human Services, Education federal budget, but the funding has not yet been approved. Hospice of the Western Reserve serves over 1,100 patients daily and our staff has identified an urgent need for a residential hospice facility to serve the needs of Western Cuyahoga and Lorain Counties. Also, according to the U.S. Census Bureau, over 100,000 residents in Cuyahoga and Lorain Counties are 65 or older. This growing population of 65+ will soon include the "baby boomer" generation, resulting in an even greater need for residential hospice services. Lastly, this project will lessen the strain on Medicare and Medicaid, as independent studies have shown. | Hospice of the Western Reserve | 105 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Eco Corner | The Eco Corner is a project that involves the rehab of three historically significant buildings. They are to be brought up to LEED standards, and will serve as retail and office space in an underutilized neighborhood in Cleveland, Ohio. In addition, there will be an Eco Park. The Eco Park will be an indoor/outdoor eco education area that will educate both the public and the building community on sustainable ideas and practices. We will feature outdoor educational displays on rain water retention, native plant species, and promoting native wildlife. The indoor portion will feature interactive exhibits that will showcase new ideas and technologies that save energy, water and money. We plan to serve as a business model for green rehabs by blogging the progress of the project, and educating the public on how it can be done in other locations | Great Lakes Design Collaborative | 5 | 0 to 30 days | \$150,000 |
| Cuyahoga | United West 25th Bank Building | The United West 35th Bank Building was purchased by MRN Ltd. in 2008. There are nine floors covering approximately 104,000 square feet of retail and office space. MRN Ltd. is planning on consolidating the current office tenants, who lease approximately 50% of the building, onto floors 2 through 5. Floors 7 through 9 will be converted to market rate apartments while the old bank lobby and vault area will be converted for a retail component. The building is currently heated by an antiquated radiator heating system and cools each office with window AC units. The current HVAC set up is completely inefficient and needs to be improved to create a more comfortable tenant and an energy efficient building. With the assistance of the Federal Stimulus Initiative, MRN Ltd. would like to update the HVAC system with the state of the art green HVAC system developed by Sanyo. The Sanyo system will be installed throughout the nine story building regardless of the spaces use, commercial or residential. | MRN Ltd. | 55 | 0 to 30 days | \$200,000 |
| Cuyahoga | Tudor Arms Building | developing the building into a mixed use project entailing a 157 room hotel, banquet rooms, and office space and associated parking that will cater to members of University Circle's residential and commercial area and the Heights suburbs. The property is located on the southwest corner of Carnegie and East 107th St. The former Tudor Arms Hotel was built and designed in 1930 by the architectural firm Meade & Hamilton. It was originally built as a private club to accommodate businessmen and professionals who had begun to move into the eastern suburbs of Cleveland. In 1939, floors six through eleven were converted to the Tudor Arms Hotel. Case-Western University purchased the property in 1963 and converted it into dorms. With the help of the Federal Stimulus Program, MRN Ltd will be able to remediate the asbestos within the building. The Program will also help fund the removal of 11 underground gas tanks remained when gas station that was adjacent to the building was turned into a parking lot. public spaces (benches, signage, landscaping, etc.). This is a high scoring Transportation for Livable Communities Initiative project with the NOACA MPO. | MRN Ltd. | 60 | 31 to 90 days | \$150,000 |
| Cuyahoga | Cedar-Lee TLCI Streetscape | Improvements and enhancements will attract additional businesses and residents to district and bolster existing uses, most of which are already successful and long-lived. There are developable parcels of land owned by the City that will attract the right type of development once these improvements are implemented. The City has made considerable investment in the district, recently completing a \$6 million parking structure to help ensure the vitality and viability of the district. These improvements will compliment and strengthen our efforts to sustain and improve the area | City of Cleveland Heights | 250 | 91 to 180 days | \$1,774,360 |
| Cuyahoga | University Tower Apartments | Complete rehabilitation of historic apartment building. Structure is 9 stories tall and will contain either 113 or 158 units when completed (depending on funding availability). Rehabilitation includes complete gutting, new MEP systems, new apartment finishes, new windows, roofing, masonry restoration and more. Construction will provide over 100 jobs. Structure was built in 1922 and is confirmed to contain asbestos in plaster. Funding is needed to pay for costs of asbestos abatement, which is estimated to total over \$750,000. Other project funding will be Low Income Housing and Historic Tax Credits and City of Cleveland loans. Funding will be secured by August, 2009 with construction expected to start in early, 2010. | Famicos Foundation | 10 | 181 days or more | \$200,000 |
| Cuyahoga | Doan Classroom Apartments | Project includes complete rehabilitation of vacant and foreclosed apartment building into 45 senior low-income apartments. Building is currently vacant and in foreclosure. If funding is secured, building will be completely rehabilitated including complete gutting of interior, installation of new MEPs, new windows, roofing, masonry restoration and more. Original structure was built as a public school in 1904. It was converted to apartments in the 1980s. Plaster is expected to contain asbestos and site is expected to have ground contamination due to neighboring leaking underground storage tank. Other expected project funding includes Low Income Housing and Historic Tax Credits, City of Cleveland loans, and Neighborhood Stabilization Program funds. Construction is expected to provide over 100 jobs. Funding is expected to be secured by August, 2009 and construction is expected to begin in early 2010. | Famicos Foundation | 10 | 181 days or more | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Cleveland Whiskey Renewables | Using a proprietary, alternative/renewable energy based process (Cleveland Process™) for the efficient maturation and finishing of distilled spirits, the newly formed Cleveland Whiskey Company (CWC) sharply reduces the time-to-market associated with premium and ultra-premium whiskey. Our technologies accelerate maturation through increased frequency thermal changes and high surface area permeable membranes within an efficiently managed and cost effective stainless tanking system. The process provides a significant competitive advantage by dramatically speeding time to market, minimizing long-term storage expenditures and eliminating evaporative losses. The stimulus request, if funded, would supplement and expand capital outlays for anticipated expenses associated with both thermal solar installations and an industrial ground source heat pump system for heat and refrigeration. Note that given the availability of structurally sound yet vacant and economically depressed commercial properties within the Cleveland metropolitan area, these monies in conjunction with equity financing will be utilized for renewable energy buildout and energy efficient space re-hab. | Cleveland Whiskey | 19 | 91 to 180 days | \$185,000 |
| Cuyahoga | Service Facilities Improvement | The population of Broadview Heights has increased by over 30% in the past fifteen years. Our service infrastructure has been taxed and while it has sustained an acceptable level of service, the facilities need to be upgraded. The service buildings are located on our City campus at 9543 Broadview Road. This project would increase both the safety and capacity of our current facilities. Additional storage and service amenities will increase the level of service and the efficiency of service that we are able to offer our residents. Greater efficiencies will produce cost savings and enhance our regional partnerships with surrounding communities. | City of Broadview Heights | 44 | 31 to 90 days | \$312,600 |
| Cuyahoga | DelCorpo Industrial Parkway | This industrial Parkway will be environmentally and energy friendly encompassing solar, geothermal, and possibly wind energy technology. The infrastructure will be built to increase the energy efficiency and environmental friendliness of the businesses located within the Park for careers in science, research, business, medical school and technology. The expansion and renovation of the Thomas Family Center for Science and Innovation includes the complete renovation to three buildings to provide laboratories, classrooms, space for independent research and faculty/student interaction in chemistry, physics, biology, neuroscience and geology and new facilities for the Center for Innovation and Growth. Included in the project are "wet laboratories" and other state of the art technology for teaching and research as well as the installation of energy-efficient geothermal heating and cooling. These facilities are designed to take students beyond theory and fact and immerse them in interdisciplinary learning and the excitement of scientific inquiry, discovery and application. The mission of the Center for Innovation and Growth is to assist economic redevelopment in Northeast Ohio as well as innovation and collaboration between science and business. The project also will let 8-W expand on its successful research partnerships with such c | City of Broadview Heights | 500 | 181 days or more | \$2,000,000 |
| Cuyahoga | Thomas Family Center for Science and Innovation | To fit a Emergency Response Vehicle for SWAT usage and Command Post boarder with Cleveland, Univ Hgts, Cleve Hights, and other communities. South Euclid is 4.7 square miles and densely populated with 22,537 residents. The project proposal is to obtain an AFIS Fingerprint Identification System that would electronically submit fingerprints of arrested criminals to State and Federal Law Enforcement Agencies. The submission is useful in the identification of unknown individuals, and the submission of latent prints obtained at the scene of a crime. Collaborative uses of the equipment would be: 1. other police agencies that we work closely with, and have contracts to house their prisoners in our jail. Those agencies being, (The US Marshalls, Notre Dame College PD, Linnale PD, and the Metroparks PD). 2.The use of civilian fingerprinting for background checks, and job applications. 3.Finally, school teachers within our jurisdiction would be able to be printed here. This equipment would decrease the time element in the manual submission that is done now, and increase the productivity of our jail booking time, and a more efficient use of it. The purpose of the Chagrin Boulevard Traffic Signal System project is to replace aged equipment and upgrade the corridor's closed-loop signal system to a central based control system. Much of the existing system hardware is past its expected life and requires replacement. At aged intersections, the signals will be completely rebuilt; at more recently constructed intersections, the signals will be upgraded as needed. The City's roadways currently experience a high traffic volume (one of the highest in northeast Ohio) due to commuter and retail traffic. | Baldwin-Wallace College | 75 | 91 to 180 days | \$9,000,000 |

| Cuyahoga | Amasa Stone Apartments | This project will connect schools, universities, and local area businesses and NGO's to Visiting International guests invited to our country by the State Department in order to foster relationships between our city and the countries guests represent. Past connections of this type have a proven track record of new businesses opening up in our city and new education programs that help regional and inner city schools. The CCWA will make sure that Cleveland is chosen as a city stop for the guests during their US Stay and will coordinate a full regional conference for the guests, State Department Representatives, Program Officers, and local community officials to put Cleveland on the map for future visits and to establish greater collaboration among the business, government, education and NGO sectors. | Famicos Foundation | 4 | 181 days or more | \$150,000 |
| Cuyahoga | The Cleveland Council on World Affairs | Clean up of contamination from dry cleaning chemicals. Expected outcome is a clean site free of contaminants. Executive Overview of the UAW Local 1005 Health & Wellness Facility Mission Statement In the spirit of providing and maintaining the best interest of our union brothers and sisters, our Local is looking to launch a Pilot Program to open a Health and Wellness Clinic. We will provide quality, caring and cost effective front line medical care for the GM employees (Union and Non-Union). This includes families and retirees of the Local, as well as any GM employee visiting. The facility staff will consist of highly qualified, medically certified, union personnel. Our standards shall meet or exceed the levels currently available in the area. Operation The facility will be operated in conjunction with either the local community hospital (in this case Parma General Hospital), or a nationally operated managed health organization. We are currently developing the specifications needed to retrofit, build out and equip such a facility. Further, we are working with several medical staffing and related operating entities to write up approved policies and procedures in the operation and maintenance of such a facility. | The Cleveland Council on World Affairs | 9 | 0 to 30 days | \$25,000 |

| Cuyahoga | Public Safety Mesh Network | The installation of public safety mesh network will allow fire trucks to command posts and the stations. A mesh network will enable other safety forces to relay off the network as well as increase the amount of video that can be sent. This video is an outstanding officer safety feature. Firefighters can monitor the status of a working fire of an accident scene from the command post. The more nodes in the network the more vehicles can come on. The basic system is already in place and working. This funding will enable others to join an improve the quality of the video. We are already collaborating with the fire service and will add more agencies if approved. | City of Beachwood Police Department | 2 | 91 to 180 days | \$400,000 |
| Cuyahoga | Lot 45 Intermodal Facility | that are underway or about to begin construction. In order to support over 1,200 new jobs, residents and students that these developments will bring, the neighborhood needs new proximate structured parking for nearly 1,000 vehicles. The "Lot 45" development area along Mayfield Road, adjacent to the new GCRTA rail station and within ¼ mile of the aforementioned developments, is currently a surface parking lot owned by UCI. It is our intent to serve the growing transportation needs of this area by constructing a 1,000-car intermodal facility that includes a direct connection to the new rail station, bus and circulator stops, and a bike station, along with vibrant retail and office space along Mayfield. University Hospitals and CIA have indicated that this facility is essential to the success of their development and growth. By linking to the RTA rail and bus routes, and creating a bicycle commuter station, Lot 45 will support job growth at the core of our region and will allow greater accessibility between lower income populations, jobs and medical services | University Circle Incorporated | 350 | 91 to 180 days | \$5,000,000 |
| Cuyahoga | Magnolia Clubhouse Community of Growth Capital Pro | Magnolia Clubhouse is a community based peer driven center on psychosocial rehabilitation, following an evidenced based model. Magnolia Clubhouse fills a void in the mental health system. An emerging best practice, participants in Clubhouses have higher rates of employment, lower rates of hospitalization and incarceration, and a higher quality of life. Magnolia Clubhouse supports employment and education. Over the last year we served 354 people, 62 people were employed and on average 83 people attended daily. | Magnolia Clubhouse | 150 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Old Oak Blvd. Relocation | The project is to join the two ends of the century homes that are the facilities of the organization. The joined structure provides program expansion, with an additional 6,763 sq. ft. of program space and includes an elevator for accessibility. A master plan is complete. The process of the capital project are underway, and the capital was raised, to purchase the properties and expand the kitchen. | City of Middleburg Heights Ohio | 190 | 181 days or more | \$800,000 |
| Cuyahoga | Magnolia Clubhouse- Psychosocial Rehabilitation- E | A long range result of the capital project will be program expansion. The program will be able to double current enrollment. A proportionate increase in program funding allowing more participants to become employed and allowing the increase of staff. The requested funds will allow the program to increase by 50% with a proportionate increase in participants and outcomes, as well as staff. The increase would be equivalent to 5 additional staff, at least 125 additional participants over the year and the number of people employed by the organization and supported in employment by the organization would increase from 73 to at least 100, based on current information and outcomes. | Magnolia Clubhouse | 100 | 0 to 30 days | \$500,000 |
| Cuyahoga | Englewood Commercial Park Expansion | Expansion of industrial park adjacent to major interstate and international airport to accommodate new and expanding manufacturing companies. | City of Middleburg Heights Ohio | 220 | 181 days or more | \$600,000 |
| Cuyahoga | Beat Patrol Officers Initiative | The beat patrol officer initiative project would provide 10 new officers over a two year period who would be assigned to the commercial districts in our community. As an inner ring suburb, our community has many commercial districts that are walkable from the surrounding neighborhoods as well as some that are a regional draw. The presence of these officers would create a sense of safety and security for customers and residents and also keep our local businesses thriving. During these economic times local shopping areas need to be supported and the relationship between safety and successful retail is an important one. Our expected outcome is that this initiative would not only create ten new jobs but that these officers would bolster the confidence of our merchants and our residents. This initiative would be a highly visible indication of the impact of the stimulus funds on our local community. | City of Cleveland Heights | 10 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Southland Public Park | Creation of a new public park on a brownfield site. Park will feature education areas regarding wetlands preservation and renewable energy. Park will also utilize solar energy for lighting. | City of Middleburg Heights Ohio | 30 | 31 to 90 days | \$200,000 |
| Cuyahoga | Bagley Road Reconstruction | Reconstruction of a major main roadway with exchanges for major interstate. Project will create or retain over 120 full-time jobs and 60 construction jobs. | City of Middleburg Heights Ohio | 180 | 91 to 180 days | \$800,000 |
| Cuyahoga | Bagley Road Widening | Widening of major main roadway with regional cooperation of two adjoining cities. Includes sanitary and stormwater improvements. | City of Middleburg Heights Ohio | 80 | 181 days or more | \$1,000,000 |
| Cuyahoga | Sprague Road Widening | Widening of major main roadway with regional cooperation of four adjoining cities. Project includes sanitary and stormwater improvements. | City of Middleburg Heights Ohio | 70 | 181 days or more | \$600,000 |
| Cuyahoga | Emergency Response Radios | New emergency response radio system for police, fire and rescue that will accommodate regional coordination and satisfy federal requirements. | City of Middleburg Heights Ohio | 10 | 31 to 90 days | \$600,000 |
| Cuyahoga | Webster Road Sewer and Waterline | New sanitary sewer and waterline for high-density low-moderate income residential area. | City of Middleburg Heights Ohio | 10 | 91 to 180 days | \$800,000 |
| Cuyahoga | Engle Lake Storm Sewer | Storm sewer improvement to eliminate flooding in an industrial area. Project will accommodate retention of 70 full-time industrial jobs and 15 new construction jobs | City of Middleburg Heights Ohio | 85 | 31 to 90 days | \$80,000 |
| Cuyahoga | Infrastructure Improvements required to support gr | In order to support growth and jobs in University Circle area of Cleveland, Ohio, infrastructure improvements are necessary. The Medical Center Company is a Cooperative Organization that provides heat, humidification, chilled water and distributes electricity to nine of Cleveland's largest and most important economic engines (University Hospitals, Case Western Reserve University, Cleveland Botanical Gardens, Cleveland Museum of Art, Severance Hall, Cleveland Institute of Art, Cleveland Hearing and Speech, Church of the Covenant, and the Cleveland Medical Library) In order to support the mission of these vital institutions, 3 infrastructure improvement projects have been identified as crucial to supporting growth and additional jobs: 1. Substation expansion in order to provide electricity to support short term (next 5 years) growth. Cost = \$6M, 30 project related jobs 2. 100,000 PPH Natural Gas Boiler Addition. Cost=\$8M, 100 project related jobs 3. 80 year old tunnel improvements/repairs/replacements. Cost=\$20M, 50 project related jobs | The Medical Center Company | 880 | 31 to 90 days | \$34,000,000 |
| Cuyahoga | Ward 5 Sewer, Culvert, and Creek Rehabilitation Pr | Complete cleaning of Coe Creek and rehab of creek culverts and storm sewer outfalls into creel | City of Fairview Park | 50 | 91 to 180 days | \$1,800,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | New Infrastructure needed to support growth in Uni | In order to support growth and jobs in University Circle area of Cleveland, Ohio, infrastructure improvements are necessary. The Medical Center Company is a Cooperative Organization that provides heat, humidification, chilled water and distributes electricity to nine of Cleveland's largest and most important economic engines (University Hospitals, Case Western Reserve University, Cleveland Botanical Gardens, Cleveland Museum of Art, Severance Hall, Cleveland Institute of Art, Cleveland Hearing and Speech, Church of the Covenant, and the Cleveland Medical Library) In order to support the mission of these vital Institutions, the following project has been identified as crucial to supporting growth and additional jobs: 1. New 10,000 ton chilled water facility. Cost-\$22M, 150 project related jobs Once this project has been completed, it will support over 500 new and permanent jobs as well. | The Medical Center Company | 880 | 31 to 90 days | \$22,000,000 |
| Cuyahoga | Service Center Building | Construction of a new salt enclosure building in order to attain compliance with EPA regulations | City of Middleburg Heights Ohio | 5 | 91 to 180 days | \$125,000 |
| Cuyahoga | Aerospace Temperature Sensors | Manufacture the most accurate and durable aerospace temperature sensors available in the United States. | Summit Aerospace Products Corporation | 12 | 0 to 30 days | \$650,000 |
| Cuyahoga | Cedar-Fairmount TLCI Improvements | Project will refine traffic patterns and movement in Commercial District to improve pedestrian and bicycle mobility by reducing road width, improving signal intercommunication and timing, shortening crossing distances, etc. This is the outcome of a Transportation for Livable Communities Initiative study. Project will build on success of existing business and residential uses in the area. Most importantly it will attract development to a significant area of City-owned land know as "the Top of the Hill" that serves as an important gateway into the community from the west. Many developments have been proposed for this land, but none has met the expectations of the City | City of Cleveland Heights | 600 | 181 days or more | \$5,000,000 |
| Cuyahoga | Electronic Monitoring for prison depopulation | Alternative sentencing for non-violent offenders in Ohio prisons to free up space for serious offenders to complete sentencing. Alternative sentencing using ORC approved electronic monitoring technology by a third party (company) and reporting compliance and violations to local court officials. Additional monitoring for repeat OVI offenders post sentencing to keep the offender sober and the community/families safe. | Ohio AMS | 22 | 31 to 90 days | \$1,450,000 |
| Cuyahoga | NIA-A Program for Young Women in Transition | Program focuses on assisting Nurturing, Independence, Aspirations (NIA) is a comprehensive new program that returns the YWCA to its historical roots providing safe and secure housing for young women seeking to improve their opportunities for the future. It offers vital educational and supportive living resources for girls readying for and aging out of foster care. According to the Child Welfare League of America, an estimated 30,000 adolescents age out of foster care annually, with many experiencing unemployment, homelessness, early parenting, incarceration, and substance abuse. NIA will serve young women through a continuum of educational resources. NIA targets young women, ages 16 through 22, who are in the foster care system and/or have recently aged out of foster care, including girls who are of high school age but are not attending school. Staff will network with relevant peer organizations to ensure smooth transitions for participants to ensure individualized program of support. The housing project is a residential development of up to 22 units that will provide the permanent supportive housing desperately needed by women aging out of foster care or those who become homeless. | YWCA of Greater Cleveland | 5 | 0 to 30 days | \$675,000 |
| Cuyahoga | John Hartness Brown Building | Asbestos abatement in vacant 325,000 square foot office building on Euclid Avenue in downtown Cleveland. Initial phase of \$35 million rehabilitation for mixed-use residential and retail. | Sandwick Architects, Inc. | 20 | 31 to 90 days | \$200,000 |
| Cuyahoga | Training of four dancer interns | Verb Ballets, Cleveland's National Repertory Dance Company is planning to hire four new dancers to add to the company. These apprentice dancers will require extensive training starting on July 1, 2009 and running to June 30, 2010. Training for each apprentice dancer is \$250.00 per week. Times 4 dancers is \$1,000.00 per week total. The expected outcome of this training will be that these dancers will be hired on a permanent basis, thus creating 4 new jobs for Ohio. | Verb Ballets | 4 | 91 to 180 days | \$25,000 |
| Cuyahoga | PARIS FULTON BUILDING | REMOVE AND CLEAR UP THE CURRENT OLD BOILER HEAT SYSTEM AND OLD SPRINKLER SYSTEM (OVER 55 YEAR OLD) , INSTALL NEW SEWER SYSTEM | GREEN APPLE USA LLC | 8 | 181 days or more | \$100,000 |
| Cuyahoga | Communicators for Mental Health | pervasive and multifaceted barrier. Communicators for Mental Health addresses these issues. This Ohio pilot project 1) educates communications professionals about mental illness and stigma, 2) recruits them as MH advocates in their own organizations and other circles of influence and 3) provides targeted opportunities with mental health organizations in their communities to make significant contributions as communications volunteers. The project includes follow-up and coaching for both the communicators and MH organizations. The Public Relations Society of America has expressed an interest in partnering with Passion for Change on this project and several other partners, including major Ohio MH orgs, are being invited. Expected outcomes: The equivalent value of 50+ MH communicators serving Ohio MH organizations, and through their professional contributions and advocacy, thousands of Ohio citizens educated in supporting mental health efforts and in seeking treatment for their loved ones or themselves when needed. | Passion for Change | 50 | 0 to 30 days | \$50,000 |

| Cuyahoga | Cleveland Public Theatre Renovations | The project consists of renovating and expanding the operations for Cleveland Public Theatre(CPT) including environmental remediation and upgrades to mechanical, electrical, plumbing and fire protection services to provide safe, efficient systems. Additionally, administration offices and performance program areas will be renovated to ensure safe and efficient operations. The renovation and expansion of CPT's facilities will have a dramatic impact on the organization. The work of every staff member, artist, and technician are significantly shaped by the building. Audiences' experience of CPT, which is a central focus of CPT's service, will be determined in part by the building. The vision of the arts will be limited and possibilities will be opened by choices made in this process. Because of the direct interplay in the future business between physical plant, operations, and service impact, this renovation is one of the most important initiatives of CPT's life and will shape the future of the organization. | Marous Brothers Construction | 20 | 0 to 30 days | \$200,000 |
| Cuyahoga | Resurface Runway and Apron | Resurface Runway, and Apron | Burke Lakefront Airport | 60 | 91 to 180 days | \$3,700,000 |
| Cuyahoga | Euclid Recreation Center | The construction of an approximately 50,000 square foot recreation and youth center for the City of Euclid including: an indoor gymnasium; exercise room; swimming pool; a wellness center; and community outreach and education facilities. Implementing a renewable energy system in the context of a historic renovation project involving a 110+ year old structure that was previously vacant for 6+ years. The historic rehabilitation is currently underway and we would like to incorporate a renewable energy system into the project. We have already included many green initiatives into the historic rehabilitation and we would like to show how new renewable energy systems can be incorporated into the rehabilitation of a historic building. | City of Euclid | 108 | 91 to 180 days | \$9,000,000 |
| Cuyahoga | Historic Edwin Hotel Renewable Energy Project | In Oct. 2008, Ballard Power (BC Canada) entered into an agreement with the ACME Group of India to supply 5kW fuel cell systems for telecom backup. The agreement provides a commitment for the purchase of ~1K units in 2009 and 9K units in 2010, with options for 20K additional units in 2011-12. With 75 bipolar plates (BPP) per unit, 3.75 M BPP over the period 2010-12 are required, representing one of the largest fuel cell projects ever undertaken, resulting in ~ \$49M in export revenues and the creation of 52 jobs. GrafTech Ohio-made GRAFCELL™ BPP materials are used today in Ballard's stacks for materials handling, automotive and bus applications. The same GRAFCELL materials are preferred for the ACME backup power application. GrafTech is seeking funding for a project to achieve the required increase in manufacturing capacity to win this opportunity. The project scope includes design, engineering, construction and acquisition of capital equipment to transform an idled building at GrafTech's Lakewood, OH plant into the world's largest BPP manufacturing facility. Failure to secure this opportunity will result in a loss of the BPP business. | Hoffman Properties II L.P. | 15 | 31 to 90 days | \$50,000 |
| Cuyahoga | High Volume Bipolar Plate Manufacturing for Back-u | 120 lf of new 8" sanitary sewer bored under roadway 3 new sanitary manholes 1 - 12"x15" tapping sleeve and valve 1 - 12" line valve 530 lf 12" ductile iron pipe water main 1 - 2" flushing assembly Site restoration other miscellaneous items | GrafTech International Holdings, Inc. | 52 | 31 to 90 days | \$6,100,000 |
| Cuyahoga | South Commons Blvd. Sanitary, Storm and Water Main | to projected ADT 30,960) in the anticipation of construction of the \$400 million Sora Hill Development which is a 75-acre complex featuring 400,000 SF office space, 250 residential units, 3-million SF high-end retail space, 125 room hotel & other commercial uses. In aggregate, the project consists of 4,375 LF of roadway (widening & adding lanes to accommodate the projected ADT), 26,960 SF sidewalk, 1,700 Ft waterline replacement, 1,700 FT stormwater upgrades, 4,200 FT curb, & ADA improvements. The project includes reducing the high number of traffic accidents, congestion & unsafe conditions such as reconfiguration of an existing 62-deg skew (dangerous intersection) at Rockside and Crossview to a safer 80-deg & abandoning existing open-ditch drainage with collapsing structure. The Developer and City have reached an agreement; a majority of the development property has been purchased; & all necessary development government permits have been obtained. This project will stimulate Cuyahoga Co. by providing jobs and is the "foundation" needed to jump start Establish new warehousing facility in Greater Cleveland area for logistics, storage and distribution, contingent on acquiring a specific contract. | Stephen Hovancek and Associates, Inc. | 3000 | 31 to 90 days | \$250,000 |
| Cuyahoga | Rockside Road/Crossview Road Improvements Project | Various school building infrastructure projects. Additional details can be provided upon request | City of Seven Hills | 1500 | 181 days or more | \$3,917,188 |
| Cuyahoga | Candor Logistics | Rehabilitate Runway 06/24, and Rehabilitate Apron | Candor Transportation | 25 | 31 to 90 days | \$750,000 |
| Cuyahoga | Fiscal year 09 Permanent Improvement Projects | This Walker & Weeks building was constructed in 1919 by Cowell and Hubbard, the esteemed jewelry store of Euclid Avenue. Situated at a prime corner in the Euclid Avenue Historic District, the two story building is 45,000 square feet. The rehabilitation project includes retaining the Cowell & Hubbard retail showroom as a single retail or restaurant space. The second floor will be the new home of Kent State University's Cleveland Urban Design Collaborative. The high-ceilinged basement will contain additional high-tech classrooms for use by multiple tenants. This project is the cornerstone of the new Playhouse Square District of Design. Asbestos abatement is required on the many steam pipes throughout the building, as well as ceiling plaster, mastics, and vinyl asbestos floor tile. | Cleveland Hts.-University Hts. City School District | 30 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | Rehab R/W and Apron | Widening and Reconstruction of existing 2-lane Roadway. | Cuyahoga County Airport | 30 | 31 to 90 days | \$1,800,000 |
| Cuyahoga | 1305 Euclid Avenue | Reconstruction of major 2-lane roadway that connects Richmond Heights to Euclid Widening and Reconstruction of the portion of Richmond Road just north of Highland, which is a perpetual traffic bottleneck. Includes large Culvert. | Sandvick Architects | 10 | 0 to 30 days | \$110,000 |
| Cuyahoga | Chardon Road Widening - SR 84 to Richmond Road | Relocation and Reconstruction of Richmond Road North of Highland in support of Cuyahoga County Airport Expansion. | City of Richmond Heights | 25 | 181 days or more | \$5,000,000 |
| Cuyahoga | Chardon Road Reconstruction - Richmond Rd to Euclid | Relocation and Reconstruction of Richmond Road North of Highland in support of Cuyahoga County Airport Expansion. | City of Richmond Heights | 35 | 181 days or more | \$8,500,000 |

|----------------|--|--|---------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Weizer Building | Weizer building was built in 1927, it is 18,300 sqft in total. BADC performed a comprehensive historic restoration of the building and is listed in National registry since 2003. The building now requires significant roof repair, few doors and window replacement. Though the building is currently occupied by offices, it is expected to vacate in 2010. These infrastructure repairs would allow the agency to create additional jobs and sustain in the neighborhood. BADC is actively working on several green projects within the neighborhood. Our goal is to move our Buckeye community towards sustainability. As part of the larger efforts currently underway within the neighborhood, BADC plans on installing 1.5KW solar array on the roof of the Weizer building. Some of the other initiatives within the neighborhood are: 1. A 40 single family and new construction that is one of the LEED ND national pilot programs. 20 units have been completed. 2. A LEED platinum RTA station that is ready to begin construction. 3. Cooperative learning centers with green features that would have the Cleveland Public Library and K-8 Cleveland Public School is currently under construction. | Buckeye Area Development Corporation | 25 | 31 to 90 days | \$200,000 |
| Cuyahoga | Fire and Service Buildings | Complete Fire Station project abandoned when economy collapsed. Fire Station is approximately 30% Complete. Has been abandoned for 3 years and existing portion is deteriorating. We are looking at laying off Police and Fire Personnel to have funds to complete project. This project will not only create jobs for construction workers in this area, but will also help retain police and fire jobs. | Wentworth Township Board of Trustees | 34 | 31 to 90 days | \$2,100,000 |
| Cuyahoga | Forest Hill Park Pedestrian Foot Bridge | Bridge repairs and expansion of corosion, and reinforcing new steel beams to prevent ongoing deterioration of the bridge. This is a historical bridge that is located over Forest Hill Blvd in East Cleveland, Ohio that was once home of John D. Rockefeller World's First Billionaire | City of East Cleveland | 20 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | Bridge Replacement - City Park | Removal and Replacement of existing bridge along entrance road to City Park | City of Richmond Heights | 3 | 181 days or more | \$250,000 |
| Cuyahoga | Water Line Replacement - Various Locations | Replacement of various waterlines that exhibit higher than desired break rates and represent perpetual maintenance problems. | City of Richmond Heights | 15 | 181 days or more | \$1,000,000 |
| Cuyahoga | Energy Conservation Project for City Facilities | ENERGY efficiency projects and improvements to city campus buildings and water distribution system. Primary components are lighting, HVAC and other mechanical system upgrades, building envelope improvements and equipping the City's water distribution system with automatic leak detection. Conservation measure are expected to pay for themselves in energy and operational savings within ten years. Besides measurably reducing buildings' energy usage, water system leak detection system will detect and alert on "non-surfacing" leaks, minimizing "lost water" on which considerable energy has been expended to make drinkable. Such leaks are estimated to lose 40,000MGF of water each year. | City of Cleveland Heights | 10 | 0 to 30 days | \$1,383,070 |
| Cuyahoga | MetroHealth community health centers | The City seeks only the first year installment payment toward the overall cost of the improvements. | The MetroHealth System | 125 | 91 to 180 days | \$20,000,000 |
| Cuyahoga | Water Line Replacements - Richmond Road Sidestreet | Construction and renovation of up to five new MetroHealth Community Health Centers replacement of various waterlines that exhibit higher than desired break rates and represent perpetual maintenance problems. Pavement Reconstruction. | City of Richmond Heights | 30 | 181 days or more | \$2,500,000 |
| Cuyahoga | Phase 2 Storm Water Infrastructure Mapping | GIS mapping and field work necessary to generate infrastructure maps required under new Phase 2 storm water permits | City of Richmond Heights | 4 | 0 to 30 days | \$200,000 |
| Cuyahoga | Autogenous welding of temperature sensors | Autogenous welding of temperature sensors used mainly by the Aerospace industry. This produces the most dependable and accurate sensors available and is done by no other manufacturer in the US. This is an improvement on technology first developed in Europe and can save millions of dollars for Aerospace engine manufacturers while improving the safety and longevity of engines worldwide | Summit Aerospace Products Corporation | 12 | 0 to 30 days | \$850,000 |
| Cuyahoga | Wellness Initiative | We are a group of physicians, nurses and other healthcare professionals who are passionate about disease prevention and lowering healthcare costs. We run Be Well Solutions, a 2 year old, comprehensive wellness company servicing a wide range of clients including manufacturing companies, auto dealerships, municipalities, library systems, law firms, service organizations and more. We provide biometric screenings, health risk assessments, medical tracking, smoking cessation programs, weight loss interventions, seminars and web based videos on diet, nutrition, exercise and disease prevention. We focus a lot of our resources on incentivized programming. We need to expand our services and employee base. Our goal is to build a wellness center, employing experts in disease prevention. Employees and family members of our client companies can come on-site for screenings, interventions, and programs. We will expand our technology systems, show ROI to our clients including reduced health insurance costs, lower worker compensation claims, lower disability claims, increased productivity and reduced absenteeism. Our current client base is via satellite facility (Brecksville) into their main campus. In addition to a U.S. Government sponsored new hospital bed tower, a 100 bed domiciliary (homeless shelter), a 150,000 sq ft captive office building (for IT, etc.), and a 2080 space parking facility will be constructed on 4.89 acres. The domiciliary, office building, and parking garage will be constructed privately (fixed rate revenue bond through Cleveland-Cuyahoga Country Port Authority) and leased to the VA. We are proposing that the Recovery organization purchase the bonds so that construction can commence immediately. Current market conditions have restricted the risk-appetite of traditional private lenders and, as such, have held up the development of this vital and critical project at a time when returning Ohio war veterans are leaving the military hospital system and entering the VA hospital system which is in danger of being overwhelmed. To that end, we can provide Recovery with extensive documentation on this project as well as current financial projections. | Be Well Solutions | 40 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Louis Stokes Cleveland VA Medical Center Additions | satellite facility (Brecksville) into their main campus. In addition to a U.S. Government sponsored new hospital bed tower, a 100 bed domiciliary (homeless shelter), a 150,000 sq ft captive office building (for IT, etc.), and a 2080 space parking facility will be constructed on 4.89 acres. The domiciliary, office building, and parking garage will be constructed privately (fixed rate revenue bond through Cleveland-Cuyahoga Country Port Authority) and leased to the VA. We are proposing that the Recovery organization purchase the bonds so that construction can commence immediately. Current market conditions have restricted the risk-appetite of traditional private lenders and, as such, have held up the development of this vital and critical project at a time when returning Ohio war veterans are leaving the military hospital system and entering the VA hospital system which is in danger of being overwhelmed. To that end, we can provide Recovery with extensive documentation on this project as well as current financial projections. | B.C. Ziegler & Company | 1600 | 31 to 90 days | \$107,000,000 |
| Cuyahoga | Cuyahoga River Ship Channel High Performance Shore | strengthening the economic value of navigable bodies such as the 6 miles of the Cuyahoga River Navigation Channel. Currently, large sections of shoreline along the Channel are in danger of collapse, thus stopping shipping to industries such as ArcelorMittal. 2000 jobs are at stake. 30 jobs will be created by this. Funded through the Corps of Engineers, a prototype bulkhead and habitat basket has been designed by a collaboration led by Cuyahoga County and the Cuyahoga River RAP. 400 habitats are currently installed. They will provide a stable and secure division between dry land uses and the ship channel, promote recovery of a vegetated shoreline, and provide habitat and dissolved oxygen for migrating fish. Phase 1 (\$15M) will build 4,000 ft. of conventional steel bulkhead (\$3,500/ft.) with habitat baskets. This will be part of an emergency measure to stabilize the most problematic areas. Phase 2 (\$35M) will build 17,500 ft of shoreline with habitat using a new design developed in the already-completed prototype phase. | Cuyahoga County Planning Commission | 2000 | 31 to 90 days | \$50,000,000 |
| Cuyahoga | Chardon Road Sidestreets Storm Sewer Improvements | Installation of storm sewer to alleviate ongoing roadway flooding issues. | City of Richmond Heights | 5 | 181 days or more | \$300,000 |
| Cuyahoga | City Wide Road Program - Multiple Years | Annual Road Maintenance/Reconstruction Program needed to maintain existing roadway infrastructure. | City of Richmond Heights | 10 | 0 to 30 days | \$3,000,000 |
| Cuyahoga | Bellaston Drive Improvements | Improvements to existing "paper road" right of way to connect to adjacent new development | City of Richmond Heights | 8 | 181 days or more | \$500,000 |
| Cuyahoga | Maple Grove Infrastructure Improvement Project | Maple Grove Road in the City of South Euclid. Work includes the separation of the storm and sanitary sewers into separate trenches, replacement of a water main with low fire flow, and the replacement of service connections. | City of South Euclid | 38 | 31 to 90 days | \$525,000 |
| Cuyahoga | Looping of Existing Dead End Water Mains - Various | Completion of watermain loops in areas of dead end mains. Benefit will be improved flow/quality | City of Richmond Heights | 7 | 181 days or more | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | South Euclid 2009 Road Resurfacing | Resurface four streets with critical pavement failure | City of South Euclid | 17 | 0 to 30 days | \$600,000 |
| Cuyahoga | Queensboro Drive Improvements | Completion of internal street in Rushwood development - safety and access benefits | City of Richmond Heights | 7 | 181 days or more | \$500,000 |
| Cuyahoga | Rainbow Creek Sewer Repairs | Repair of Sanitary Sewer Overflow in Euclid Creek. Replace/install new manholes, repair replace sections of failing sanitary sewer. | City of South Euclid | 9 | 0 to 30 days | \$338,100 |
| Cuyahoga | Hilltop Road Improvements | Extension of Roadway, Water and Sewer to isolated lots at end of Hilltop Road | City of Richmond Heights | 5 | 181 days or more | \$350,000 |
| Cuyahoga | Cedar Center Infrastructure Project | Replacement of storm & sanitary sewers, water mains to facilitate the redevelopment of commercial property owned by the City of South Euclid. Already qualified for FY 2009 OPWC loan. | City of South Euclid | 18 | 31 to 90 days | \$368,700 |
| Cuyahoga | Security Federal Building | The four story, 40,000 square foot Security Federal Building stands along the Euclid Avenue Historic District in Cleveland, Ohio. The project involves asbestos abatement in the following possible categories: steam pipe insulation, boiler insulation, plaster, vinyl asbestos floor tile, window caulk, mastic, and roofing materials. This initial phase of the planned \$6 million restoration and rehabilitation project is a critical scope toward achieving the successful reuse of this underutilized building as multi-use including office, retail, and parking. The project will achieve the restoration of the building's historic exterior, and interior restoration and rehabilitation providing 8,000 square feet of street level retail use, 24,000 square feet of offices, and enough indoor parking to support the upper story uses. This catalytic project is key toward efforts at reviving Cleveland's Euclid Avenue Corridor. | CRM | 50 | 0 to 30 days | \$200,000 |
| Cuyahoga | South Green Road Traffic Signal Upgrade Project | The project will upgrade and replace the obsolete traffic signal equipment at ten existing signalized intersections on South Green Road, provide a properly coordinated traffic signal system that will greatly improve vehicular traffic efficiency, thereby reducing congestion, reducing air pollution, and improving air quality. Includes provision of Americans with Disabilities Act (ADA) compliant crosswalks at all intersections. | City of South Euclid | 57 | 91 to 180 days | \$2,065,475 |
| Cuyahoga | South Green Resurfacing Project | Replace the failing pavement on South Green Road, north of Monticello Boulevard with provision of ADA crosswalks. South Green Road is a vital north-south axis in the City providing links between the community, cultural, and commercial districts located on the road, including the South Euclid Municipal complex, several religious institutions, schools, the University Suburban Medical Center, and Notre Dame College. The South Green Road north of Monticello Boulevard has an Average Daily Traffic (ADT) count of over 9,600 cars per day. The residents of South Euclid and the surrounding communities of Cleveland Heights and Cleveland will be the primary beneficiaries of this project. This is a "Shovel Ready" Project that can be bid within 90 days. | City of South Euclid | 30 | 31 to 90 days | \$1,067,550 |
| Cuyahoga | Truman Building | The six story, 70,000 square foot Truman Building stands along the Euclid Avenue Historic District in Cleveland, Ohio. The project involves asbestos abatement in the following possible categories: steam pipe insulation, boiler insulation, plaster, vinyl asbestos floor tile, window caulk, mastic, and roofing materials. This initial phase of the planned \$16 million restoration and rehabilitation project is a critical scope toward achieving the successful reuse of this underutilized building as a multi-use complex including office, retail, housing and parking. Market activity for potential users is strong; making time of the essence in order to secure them. Some potential tenants would relocate from the nearby Schofield Building within the next 6-12 months. The project will achieve the restoration of the building's historic exterior, and interior restoration and rehabilitation providing 9,000 square feet of street level retail / restaurant use, 34,000 square feet of upper story apartments, 10,000 square feet of offices, and enough indoor parking to support the upper story uses. This catalytic project is key to Widening and Reconstruction of existing one way narrow residential street | CRM | 20 | 0 to 30 days | \$200,000 |
| Cuyahoga | Edgemont Widening | Widening and Reconstruction of existing one way narrow residential street | City of Richmond Heights | 7 | 181 days or more | \$500,000 |
| Cuyahoga | E 14th Street Redevelopment - Cleveland | This project renovates 700 linear feet of a E14th Street in Downtown Cleveland. The project has been reviewed and is embraced by the City of Cleveland, Cuyahoga County, The Ohio Department of Transportation and the Regional Transit Authority. The project design has been approved and the preliminary engineering has been completed. The remaining engineering will take approximately 60 days to complete which will allow for construction to be carried out during the spring and summer. The project designer is Sasaki and the engineering is by URS Consultants. The completion of the project will lead to about 30 full time jobs beyond the construction jobs and will add to the occupancy of surrounding office, retail and housing. The project will enhance the vitality of the street in Cleveland's PlayhouseSquare by neighborhood serving as a vital gateway. PlayhouseSquare hosts over 1,000,000 guest annually and has a growing business and residential population. | PlayhouseSquare | 30+ | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Schofield Building | The Schofield Building is a fourteen story, 156,000 square foot historic building located at the prominent intersection of Euclid Avenue and East Ninth Street and is located in the National Register Euclid Avenue Historic District, originally constructed in 1901. The project involves the removal of unsympathetic, asbestos containing exterior facing panel curtain wall system installed in the late 1960's, and abatement of interior asbestos containing material including but not limited to boilers, pipe insulation, floor tile, roofing, mastic and other asbestos containing material and equipment. This initial phase of the planned \$40 million restoration and rehabilitation project is a critical scope toward achieving the successful reuse of this underutilized building as a high end boutique hotel. The project will result in the restoration of the building's historic exterior, and interior restoration and rehabilitation to achieve 140 hotel rooms, new retail and restaurant spaces. This catalytic project is key toward efforts at reviving Cleveland's Euclid Avenue Corridor. | CRM | 150 | 0 to 30 days | \$200,000 |
| Cuyahoga | Argonne Road Phase 2 Infrastructure Improvement | Replacement of storm & sanitary sewers, water mains, pavement, to prevent basement flooding on Argonne Road in the City of South Euclid. Work includes the separation of the storm and sanitary sewers into separate trenches, replacement of a water main with low fire flow, and the replacement of service connections. | City of South Euclid | 32 | 31 to 90 days | \$650,000 |
| Cuyahoga | Higbee Building | THE PROJECT INVOLVES RESTORATION OF 815,000 SQUARE FEET OF EXISTING HISTORIC INTERIOR AREAS WITHIN A REGISTERED HISTORIC 815,000 SF FORMER DEPARTMENT STORE. The existing finishes and mechanical areas may contain asbestos material which makes construction in the space difficult and expensive. A current project is underway to rehabilitate portions of this building by converting vacant space into modern office space. If stimulus funds are available we may be able to expand the scope of our project to the remaining space in the building, thereby expanding the current construction activity and jobs and create competitive office space available for lease to prospective users. | Forest City Commercial Management | 15 | 0 to 30 days | \$500,000 |
| Cuyahoga | 2009 South Euclid Water Main Clean and Reline Proj | Clean and reline 6,000 lf water mains having very low fire flow. | City of South Euclid | 15 | 31 to 90 days | \$553,700 |
| Cuyahoga | Highland Road Sidewalks - East of Richmond Road | Completion of missing sidewalk sections along heavy pedestrian routes. | City of Richmond Heights | 4 | 181 days or more | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | 2209 South Euclid Water Main Replacement Program | Replace 3,500 lf of failing water mains on three streets. | City of South Euclid | 16 | 31 to 90 days | \$576,420 |
| Cuyahoga | Repair/Replacement of Catch Basins | Replace 10 failing catch basins. | City of South Euclid | 4 | 0 to 30 days | \$45,400 |
| Cuyahoga | Sidewalks - Other Streets | Completion of missing sidewalks along heavy pedestrian routes. | City of Richmond Heights | 5 | 181 days or more | \$500,000 |
| Cuyahoga | Whitehall 54" Storm Sewer outlet Safety Upgrade | Install safety grate at a sewer outfall to prevent the ingress of children | City of South Euclid | 4 | 0 to 30 days | \$11,050 |
| Cuyahoga | Cogswell Hall Abatement | Cogswell Hall is a historic building constructed in 1913 that provides affordable housing with supportive services to residents with very low incomes and special needs. The owner provides meals and housekeeping, affordable rental units, and a variety of supportive services including budgeting and mental health counseling. The building is a historic gem in the Detroit Shoreway neighborhood on the west side of Cleveland. The facility is being renovated and expanded to add individual bathrooms to units, upgrade all systems, double the overall size of the building, and add 10 additional units for a total of 41 units. Construction on the project started in July of 2008 with the addition to the building and is expected to be complete in December of 2009. The project is funded by LHTC, and HTC's at both the state and federal level, along with grants from many different sources. As part of the project, there is a significant amount of abatement of asbestos and lead paint which needs to be done. We are requesting funds to cover these costs | Cogswell Hall, Inc. | 61 | 0 to 30 days | \$115,250 |
| Cuyahoga | Gordon Square Arts District Parking Garage | The Gordon Square Arts District (GSAD) Parking Garage will add 274 critically-needed parking spaces to the burgeoning Detroit Shoreway neighborhood on Cleveland's west side. The garage will be adjacent to the renovated Capitol Theatre - the economic engine of GSAD. The \$30 million capital campaign being conducted by GSAD has already help attract 25 new businesses to area. With the infusion of tourists and local visitors to the neighborhood's Capitol Theatre, Cleveland Public Theatre and a newly-constructed Near West Theatre, additional parking is needed to sustain the economic development already underway. This inter-modal parking facility which will provide bicycle racks and parking space for car sharing and low emissions vehicles, is located near two bus lines and on a bike path, just one-quarter mile from an RTA rapid station. RTA endorses this project. | Gordon Square Arts District | 2462.5 | 91 to 180 days | \$5,000,000 |
| Cuyahoga | Monticello Rear Property Line Storm Sewers | Storm Sewer installation to alleviate flooding | City of Richmond Heights | 4 | 181 days or more | \$200,000 |
| Cuyahoga | 2009 South Euclid Manhole Replacement Project | Replacement of 30 combined sewer manholes with separate storm and sanitary sewer manholes. Existing combined manholes contribute to basement flooding and contamination of tributary streams from sewage overflows. | City of South Euclid | 34 | 31 to 90 days | \$1,222,700 |
| Cuyahoga | Bexley Park Sinkhole Repair | Repair failing storm sewer retention system in city park. | City of South Euclid | 4 | 31 to 90 days | \$63,060 |
| Cuyahoga | Cogswell Hall Abatement | Cogswell Hall is a historic building constructed in 1913 that provides affordable housing with supportive services to residents with very low incomes and special needs. | Cuyahoga | Liberty Road Bridge Enhancement | Replace bridge railings, install flower boxes | City of South Euclid | 4 | 31 to 90 days | \$64,000 |
| Cuyahoga | Center for the Creative and Healing Arts and Scien | A new classroom building is planned to serve as the central facility for Ursuline College's nursing program. Ursuline College currently provides a world class nursing education to enhance the quality of healthcare in Northeast Ohio. This building provides for additional growth and expansion of the nursing program to meet the increasing demand for nurses. The state of the art teaching and learning space will strengthen Ohio's position in healthcare and provide a center of excellence in nursing. | Ursuline College | 60 | 181 days or more | \$5,000,000 |
| Cuyahoga | Developmental Center Road Renovation | Repave MRDD Developmental Center roads and make necessary roadbed renovations | Ohio Department of MRDD | 0 | 91 to 180 days | \$2,010,000 |
| Cuyahoga | Cary Jay Lake Rehabilitation | Rehabilitation of existing lake to improve area storm water quality | City of Richmond Heights | 4 | 181 days or more | \$250,000 |
| Cuyahoga | Storm Sewer Repairs at 932 South Green Road | Repair failing storm sewer system that is undermining the foundations of an apartment building | City of South Euclid | 8 | 91 to 180 days | \$162,340 |
| Cuyahoga | Renovation of O'Brien Athletic Center | classrooms and offices. The building is utilized by the surrounding community as well as the College. The City of Pepper Pike, in partnership with the College, has designated the building as a relocation site for the City's emergency planning as well as an evacuation site for the City's institutional residents. Emergency drills have been held in partnership with the City and the local public school district, utilizing the facility for evacuation of the local public schools in the event of an emergency on their campus. This project provides for the renovation of three classrooms in the Mullen Athletic Center. Renovations will include new windows, ceiling, lighting, and upgrades to the ventilation and air conditioning systems. The learning environment will be dramatically improved with new energy efficient lighting and windows. The windows will improve energy efficiency with low E70 glass compared to the existing single pane wood windows. The improvements to the ventilating and air conditioning system will provide energy saving and improved operations to the classrooms as well as other administrative areas including Admissions. Planning for this project has been completed and can be implemented as funding is available. | Ursuline College | 20 | 31 to 90 days | \$1,235,000 |
| Cuyahoga | Renovation of Mullen Center Classrooms | This project provides for the renovation of three classrooms in the Mullen Athletic Center. Renovations will include new windows, ceiling, lighting, and upgrades to the ventilation and air conditioning systems. The learning environment will be dramatically improved with new energy efficient lighting and windows. The windows will improve energy efficiency with low E70 glass compared to the existing single pane wood windows. The improvements to the ventilating and air conditioning system will provide energy saving and improved operations to the classrooms as well as other administrative areas including Admissions. Planning for this project has been completed and can be implemented as funding is available. | Ursuline College | 12 | 31 to 90 days | \$500,000 |
| Cuyahoga | Campus Telecommunications Upgrade | This project provides an upgrade to the campus telephonic system which will improve operations and provide savings in service fees and maintenance. The upgrade will support emergency operating and communications by integrating communications and improving reliability. A new PBX with the ability to provide capabilities for voice over internet protocol and future expansion is planned. The system also provides enhanced reporting for management of telecommunications and emergency operations. Planning for this project has been completed and can be implemented as funding is available. | Ursuline College | 5 | 31 to 90 days | \$80,000 |
| Cuyahoga | Infiltration and Inflow (I&I) Elimination | Identification and Elimination of Storm Water that is entering Sanitary Sewer System and resulting in basement flooding and pump station issues | City of Richmond Heights | 17 | 181 days or more | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Range Project | ventilation, bullet trap, and target control systems. A study of the existing ventilation system, conducted in 2008, has concluded that it is incapable of providing a safe environment for the users and that only one of two exhaust systems releasing air to the outside environment is filtered. Lead exposure is a health concern and can accumulate in the body over time and contributes to many health related problems. The modifications made would bring the range up to compliance with current OSHA and EPA requirements. By replacing the existing venetian blind style trap with a granddual media trap it will reduce the amount of lead dust caused by fragmentation. An updated target control system will allow for reduced down time due to repairs and greater training opportunities. Currently the range is used by the South Euclid Police Department, Linnale, Pepper Pike, Richmond Heights, Mayfield Heights, Mayfield Village, University Heights, Notre Dame College PD, South Euclid Municipal Court Bailiffs, and the South Euclid Citizen's Police Academy. | South Euclid Police Department | 4 | 31 to 90 days | \$135,000 |
| Cuyahoga | Service Center | Construct new service center to maintain infrastructure. House maintenance equipment. The facility would house office for senior management and public areas for visitors interacting with staff | City of North Royalton | 650 | 91 to 180 days | \$13,000,000 |
| Cuyahoga | Brooklyn Centre | Street scape improvements surrounding the West 25th Street/Denison Avenue intersection (including the Denison Avenue frontage for the length of the corner properties) and extending south along West 25th to Bradwell Avenue. This would include new sidewalks, street trees, parking lot screening (fencing and landscaping) and pedestrian amenities at bus stops and burying utilities. This does not include any roadway reconfiguration or reconstruction. \$2,000,000. This project has gone through the preliminary design and study phase. The project is on it's way to the City of Cleveland Planning Commission for adoption into the City of Cleveland's 2020 master plan. The funding for this project would be for the next phase, preliminary engineering and constructions design | Brooklyn Community Development Coporation | 5 | 0 to 30 days | \$240,000 |
| Cuyahoga | Project Connectivity | connectivity to all city buildings and ending with improved communication tools and file sharing. Once the connectivity is complete, the city can improve services to residents through additional security coverage across the city, improve processing of resident requests (i.e. building department service), and benefit from lower monthly operating costs for all city departments. This project will result in the City improving data backup and disaster recovery services, sharing and storing paper documents electronically, improving communications across departments (i.e. police, fire departments), and lowering monthly internet and phone service monthly costs. The current return on investment for this project is estimated at 5 years or 60 months. This project is estimated to save the city approximately \$12,500 per month. The savings do not account for the improved services city employees can now provide to residents with the new technology over time. This project will also protect the city from possible litigation as cameras will be added to police vehicles enhance freezer in Medical Products distribution center to support specified climate and temperature control for medical products requiring special handling/refrigeration that otherwise could potentially spoil. | City of Maple Heights | 25 | 31 to 90 days | \$500,000 |
| Cuyahoga | CAH Freezer Upgrade | | Cardinal Health | 2 | 91 to 180 days | \$115,000 |
| Cuyahoga | Municipal Green Retrofit | The city would install in all public buildings energy efficient systems. Upgrades include the lighting, and HVAC systems. Would consider upgrading all city parking lots green storm water management practices. Goal would be to at least reach Silver status in LEED system rating | City of North Royalton | 250 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | ODMRDD Developmental Center Roof Replacement | Replace failing roofs at four ODMRDD Developmental Centers | Ohio Department of MRDD | 30 | 91 to 180 days | \$1,720,000 |
| Cuyahoga | Cleveland Athletic Club | This proposed project includes asbestos abatement and other environmental remediation in the historic Cleveland Athletic Club, a prominent building on downtown Cleveland's Euclid Corridor. This is the first phase of a planned, \$25 million rehabilitation of the over 225,000 square foot building to accommodate market-rate rental housing and retail uses while retaining some of the athletic club facilities. | Sandvick Architects, Inc. | 20 | 31 to 90 days | \$200,000 |
| Cuyahoga | Regional Renewable Energy Facility | The city is currently operating a compost facility at a financial loss that converts biosolid waste into a landscape compost. The funds would be used to transform the current city compost facility into a new regional renewable energy facility. A regional renewable energy facility would convert waste from municipal, commercial and industrial facilities into reusable resources (electricity) for the benefit of the environment and community. | City of North Royalton | 675 | 91 to 180 days | \$13,500,000 |
| Cuyahoga | Berea Water Plant | Updates to water plant | City of Berea | 8 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Valley Parkway All Purpose Trail Expansion | The current widely used valley parkway all purpose trail has a gap within the Brecksville Reservation. The funds would be used to construct an all purpose trail to link the two established sections together starting within North Royalton, thru Broadview Heights, and ending in Brecksville all within the Cleveland Metro Parks system. The trail also reaches the Cuyahoga Valley National Park and stretches from the mouth of the Rocky River to Summit County. The link is in the Metro Parks master plan remains unbuilt due to funds. | City of North Royalton | 162 | 31 to 90 days | \$3,200,000 |
| Cuyahoga | Berea Revitalization | Build a new bridge; bridge would provide access to an underdeveloped section of the city | City of Berea | 500 | 0 to 30 days | \$3,000,000 |
| Cuyahoga | HAR Radio System/Tornado Warning System | The funds would be used to establish 2 HAR radio stations posted throughout the city to provide a clear signal that the City can use to communicate to the public in the event of an emergency, and during non emergency can be used for public service announcements. The tornado systems requires the installation of 5 stations to be used to warn residents | City of North Royalton | 15 | 0 to 30 days | \$350,000 |
| Cuyahoga | Police Garage | Funds to be used to construct a new garage for all police vehicles. The garage would reduce maintenance and longevity. Prohibit identification of vehicles used by undercover agents | City of North Royalton | 50 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Community Oriented Police | The current economic crisis and a lack of federal funding has forced the cutbacks on school resource officers and DARE officers. The funds will allow the city to hire five new police officers for these purposes. | City of North Royalton | 5 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | ODMRDD Developmental Center Drainage System Replac | Replace the Drainage System at one ODMRDD Developmental Center | Ohio Department of MRDD | 10 | 91 to 180 days | \$250,000 |
| Cuyahoga | Police Communication Upgrade | In an effort to bring the North Royalton Police Department in compliance with the Federal mandate known as the P-25 Project, the City needs to upgrade our communication equipment. The mandate requires interoperability of all communication equipment necessitating the upgrade of the department's radios in vehicles, handheld portables, as well as dispatch center upgrades. | City of North Royalton | 60 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | Euclid Citywide WiFi Project | Citywide WiFi for an approximate 10.4 square miles. The project is intended as: 1) an economic development tool to recruit high-tech oriented businesses and to increase worker productivity, 2) a public amenity in order to promote residential growth and 3) a "digital divide" initiative in order to increase broadband penetration to low-income and other groups who have historically had relatively limited access to technology. | City of Euclid | 22 | 91 to 180 days | \$1,800,000 |
| Cuyahoga | Terminal Tower | Replacement of building water distribution system, connecting once-through water sourced heat pumps to a central cooling tower and installation of building automation system to control steam, electricity and cooling systems in a registered historic office building. | Forest City Commercial Management | 10 | 91 to 180 days | \$600,000 |
| Cuyahoga | Weatherization and Energy Efficiency Initiative | This funding would provide complete weatherization and energy efficiency for the Beck Center facility. Beck Center stimulates the local economy by providing performing arts and education. In order to sustain the operation, it is necessary to implement this energy efficiency initiative to reduce utilities and maintenance costs which are approx. 15% of the annual budget. | Beck Center for the Arts | 100 | 91 to 180 days | \$2,590,000 |
| Cuyahoga | TLCI Town Center Pedestrian Program | This program is the result of federal grant through NOACA called the Transportation For a Living Community. It promotes a healthy lifestyle through walking, biking and running. The plan that was developed calls for the installation of sidewalks linking major city assets and the Metro Parks all purpose trail. | City of North Royalton | 8,000,000 | 91 to 180 days | \$400 |
| Cuyahoga | Euclid Memorial Park Master Plan Capital Improve | Park-wide capital improvements at the City of Euclid's largest and most used park. Improvements include a multi-purpose/fitness trail, renovation of locker rooms, construction of dome enclosures for year-round use of the pool and soccer fields | City of Euclid | 30 | 91 to 180 days | \$3,000,000 |
| Cuyahoga | Euclid Memorial Park Waterline | Replacement of main waterline serving Memorial Park and all related facilities including: swimming pool, irrigation of ball fields, ice arena, locker rooms, and all other facilities serving the public. | City of Euclid | 15 | 31 to 90 days | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Project Impact | East End neighborhood House is proposing the use of Federal Stimulus Initiative dollars to stabilize a low income blighted area in southeast Cleveland, Ohio. East End Neighborhood House (eenh) is a 102 year old youth and family services organization. The number one problem of EENH consumers is housing. East End neighborhood House has been acquiring abandoned and foreclosed properties in the area. Properties have been acquired within a one block area. Additional dollars are needed through Federal Stimulus dollars to acquire all foreclosed properties on Rosehill Avenue. Rosehill is part of the block area that needs to be stabilized. Foreclosed properties will be acquired and either demolished or renovated and used as transitional housing for families being serviced by EENH. The expected outcomes of the project will be employment for those demolishing and renovating the properties; housing for clients of eenh who are receiving social and budget management services; stabilizing the area relative to decreasing blight and crime due to abandoned housing; expanding organizational services for area families in need which will increase the need for additional staff. The rehabilitation of the City of Euclid's Shore Cultural Centre, listed on the National Register of Historic Places. The facility is home to several social service organizations as well as several arts and culture and educational organizations. The rehabilitation is intended to create a vibrant civic center in the heart of Euclid's downtown. | East End Neighborhood House | 250 | 181 days or more | \$1,000,000 |
| Cuyahoga | Euclid Shore Cultural Centre Rehabilitation - Capi | INFRACSTRUCTURE, FOR 900 CARS TO FREE UP 15 ACRES OF LAND FOR REDEVELOPMENT INTO 800 BEDS OF UNIVERSITY-ORIENTED MARKET RATE PRIVATE HOUSING. THE TOTAL PRIVATE INVESTMENT THAT WILL RESULT WILL BE AT LEAST \$66,000,000. THE USE OF STIMULUS DOLLARS FOR THE PARKING AND INFRASTRUCTURE WILL PERMIT THE PROJECT TO GO FORWARD WITHOUT ANY SUBSTANTIAL TAX INCREMENT FINANCING WHICH WILL RESULT IN SEVERAL HUNDRED THOUSAND ADDITIONAL PROPERTY TAX DOLLARS TO THE CLEVELAND MUNICIPAL SCHOOL DISTRICT. THIS PROJECT ALSO WILL ASSIST CLEVELAND STATE UNIVERSITY IN MEETING GOAL #6 OF THE NORTHEAST OHIO COLLABORATIVE AND INNOVATION STUDY COMMISSION: "PROVIDE TARGETED, ONGOING FUNDING FOR ECONOMIC REDEVELOPMENT PARTNERSHIPS IN URBAN AREAS ADJACENT TO CAMPUSES" | City of Euclid | 108 | 91 to 180 days | \$9,000,000 |
| Cuyahoga | NORTH CAMPUS NEIGHBORHOOD DEVELOPMENT | UPGRADE UNIVERSITY BUILDINGS TO ADD ELECTRICAL ACCESS CONTROLS TO ALL BUILDINGS ON CAMPUS, TO ADD FOUR HIGH DEFINITION CAMERAS TO THE TOP OF ROBERTS TOWER THAT WOULD BE AVAILABLE TO ALL LOCAL LAW ENFORCEMENT ENTITIES FOR SURVEILLANCE PURPOSES TO REDUCE CRIMINAL AND TERRORIST ACTIVITY; AND TO UPGRADE THE RADIO SYSTEM TO ALLOW CSU'S FIRST RESPONDERS TO COMMUNICATE SEAMLESSLY WITH OTHER FIRST RESPONDERS. | CLEVELAND STATE UNIVERSITY | 100 | 91 to 180 days | \$22,000,000 |
| Cuyahoga | CAMPUS SECURITY UPGRADE | STUDENT HEALTH AND WELLNESS CENTER ALLOW UNIVERSITY TO RELOCATE THE STUDENT HEALTH CENTER, AND WELLNESS PROGRAMS TO A NEW BUILDING NEAR THE CENTER OF CAMPUS. THE LAND HAS BEEN ACQUIRED AND THE NEW BUILDING DESIGNED AND APPROVED BY ALL CITY BODIES, BUT CANNOT GO FORWARD BECAUSE OF THE LACK OF A MUNICIPAL BOND INSURANCE ENTITY REQUIRED TO MARKET BONDS | CLEVELAND STATE UNIVERSITY | 10 | 91 to 180 days | \$405,000 |
| Cuyahoga | STUDENT HEALTH & WELLNESS CENTER | ALLOW UNIVERSITY TO RENOVATE MATHER MANSION (ON THE REGISTER OF HISTORICAL PLACES) INTO A MODERN BED AND BREAKFAST THAT WILL GENERATE \$1,000,000 PER YEAR IN PAYROLL AND PERMIT UNIVERSITY TO RETAIN ONE OF THE LAST OF THE GREAT EUCLID AVENUE MANSIONS. PROJECT WILL ALSO UTILIZE HISTORICAL AND NEW MARKET CREDITS IN ORDER TO ALLOW THE PROJECT TO OPERATE AT A POSITIVE PRO FORMA | CLEVELAND STATE UNIVERSITY | 50 | 91 to 180 days | \$4,500,000 |
| Cuyahoga | MATHER MANSION RENOVATION AND CONVERSION | A 100,000 SQ. FT. BIOSCIENCE -HEALTH BUILDING, WHICH IS ENERGY EFFICIENT AND GREEN, IS REQUESTED. A NEW FACILITY IS NEEDED TO CARRY OUT CSU'S STRATEGIC MISSION FOR EXCELLENCE IN BIOSCIENCE AND HEALTH, ADDRESSING SPACE AND QUALITY NEEDS FOR GROWING PROGRAMS. THE NEW FACILITY WILL INTEGRATE MULTIPLE DISCIPLINES, INCLUDING; MOLECULAR BIOLOGY, GENE REGULATION, BIO-ANALYTICAL CHEMISTRY, CLINICAL CHEMISTRY, PHARMACOLOGY, MEDICAL PHYSICS, BIOSTATISTICS AND HEALTH SCIENCES, CREATING A SYNERGY OF COLLABORATION IN RESEARCH AND EDUCATION. IT WILL FEATURE AN INSTRUMENTATION CORE WITH CUTTING-EDGE TECHNOLOGIES. FACULTY LABORATORIES SUPPORTING THREE DOCTORAL PROGRAMS IN BIOSCIENCE AND HEALTH, AS WELL AS NEW UNDERGRADUATE AND GRADUATE PROGRAMS (PRE-MEDICINE, PRE- PHARMACY, PHARMACEUTICAL SCIENCES, PHYSICIAN ASSISTANT, PUBLIC HEALTH, FORENSICS, BIOSTATISTICS, AND SCIENCE ENTREPRENEURSHIP), WILL BE CENTRAL. A CORE GROUP OF YOUNG AND SUCCESSFUL FACULTY WILL BENEFIT FROM THE STATE-OF-THE-ART BUILDING AND THE SUBSTANTIVE COLLABORATIVE INTERACTION AMONG MULTIPLE DISCIPLINES. STUDENTS WILL | CLEVELAND STATE UNIVERSITY | 100 | 181 days or more | \$50,000,000 |
| Cuyahoga | NEW SCIENCE BUILDING | Improvements to Hopkins' CLE Runway Safety Areas (RSA) are required to bring Runway 10/28 into compliance with criteria contained in FAS Order 5200.8, Runway Safety Area Program. The project involves relocating, extending and installation of an Engineered Material Arresting System (EMAS) Tower (and associated facilities) and this will necessitate modifications to the CLE airfield, including the construction of a taxiway connector, aircraft parking/hold pad, and associated improvements necessary to support the operation of the new tower | City of Cleveland | 300 | 181 days or more | \$38,300,000 |
| Cuyahoga | Runway Safety Area Improvements | Green Energy Technologies (GET) is the manufacturer of the WindCube, a wind turbine designed specifically for urban use. GET is targeting the commercial and industrial distributed generation marketplace. The following videos provide a description of the WindCube's robust capabilities: *http://www.youtube.com/watch?v=Pgr0xt42Bz0 *http://www.youtube.com/watch?v=UcGd9g0PFZQA *http://www.youtube.com/watch?v=psKxatJawcY | City of Cleveland, Office of the Mayor | 200 | 181 days or more | \$23,700,000 |
| Cuyahoga | New Air Traffic Control Tower Improvements | CHIO JOBS: The development of the GWI WindCube will position Ohio as the leader in urban wind energy systems. GET, along with numerous Ohio-based strategic partners - will manufacture this product: * Green Energy Technologies (Akron) * Parker Harroff (Cleveland) * Roth Brothers (Youngstown) * Automatic Field (Nepesin) * Harlan Industries (Euclid) * MRD Solutions (Eastlake) | Green Energy Technologies | 12 | 31 to 90 days | \$250,000 |
| Cuyahoga | Lausche State Office Building Rooftop Wind Turbine | PROJECT SCOPE: GET currently has wind monitoring equipment installed on the Lausche State Building in Cleveland, OH. The project budget will cover all WindCube product and installation costs and highlight the technology - and the State Building will benefit of floodplain enforcement by industry, residential development, and mining has resulted in extreme bank erosion, loss of prime developmental land, and substantial loss of aquatic and riparian habitat along the 11.6 miles of the Cuyahoga River within the City of Cleveland. Critical funding is needed to repair these riverbanks and hillsides to prevent landslides and obstruction of the Navigational Channel. | City of Cleveland, Office of the Mayor | 1,000 | 181 days or more | \$50,000,000 |
| Cuyahoga | Cuyahoga Riverbank Improvements | This work will include full removal and replacement of approximately 111,500 SF of the existing concrete pavement. The current condition of the asphalt pavement on Taxiway A is aging, with a current condition of 47 pavement condition index (pci). (On the pci index a score of 71-85 is considered satisfactory condition.) This condition will require improvement of the pavement to ensure the safety of the airport operation and the enhancement of the pavement condition for an extended life of the taxiway. | City of Cleveland, Office of the Mayor | 1,000 | 181 days or more | \$2,700,000 |
| Cuyahoga | Rehabilitation of Taxiway A | | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Rehabilitation of Taxiway N | This project allows for the rehabilitation of the asphalt section of Taxiway "N" at Cleveland Hopkins International Airport. This replacement will consist of full rehabilitation and replacement of all existing asphalt, for approximately 90,000 SF of pavement. The current condition of the asphalt pavement on Taxiway N is aging, with a current condition of 56 pavement condition index (pci). (On the pci index a score of 71-85 is considered satisfactory condition.) This condition will require improvement of the pavement to ensure the safety of the airport operations and the enhancement of the pavement condition for an extended life of the taxiway. | City of Cleveland, Office of the Mayor | 500 | 181 days or more | \$4,400,000 |
| Cuyahoga | Taxiway Apron Overlay-Burke Lakefront Airport | This project would rehabilitate Burke Lakefront Airport's terminal apron area located North of the terminal. The area is used to accommodate the enplaning and deplaning of airport passengers. The City ramp is also used to park aircraft. Currently the ramp has major cracks and requires constant maintenance expenses. The City ramp has not been overlaid in over 15 years. | City of Cleveland, Office of the Mayor | 500 | 91 to 180 days | \$1,200,000 |
| Cuyahoga | Relocate E. 34th Transit Station | This project will allow for improved access to Redline Rapid by Residents of the Central Neighborhood. | City of Cleveland, Office of the Mayor | 75 | 181 days or more | \$7,500,000 |
| Cuyahoga | Downtown Viability Program | These sewers are old brick sewers and were built about 100 years ago. They are in need of rehabilitation. It is a major advantage to plan work on these sewers before they can become an emergency. Any sewer break could be very costly due to the presence of a lot of utility lines and could create a hazardous and unsafe condition. Water Pollution Control plans to rehabilitate St. Clair, and Ontario Avenues as well as the Public Square area in the next five years. We would like to include as many sewers as possible. This plan covers the area bounded by West 9th Street, East 17th Street, Lakeside and Carnegie Avenues. | City of Cleveland, Office of the Mayor | 300 | 91 to 180 days | \$30,000,000 |
| Cuyahoga | Suburban Water Main Replacement and Renewal | The Suburban Water Main Replacement and Renewal Program provides improvements to deteriorating infrastructure (water distribution mains) to alleviate loss of service due to main breaks and customer problems associated with discolored water. | City of Cleveland, Office of the Mayor | 100 | 31 to 90 days | \$10,000,000 |
| Cuyahoga | Collinwood Recreation Center | The new center will be 43,880 s.f. containing community rooms; fitness/aerobics spaces; lock rooms; restrooms; gymnasium; natatorium; site work such as demolition, utility service, parking, sidewalks, pedestrian lighting; building equipment; furniture and fixtures. The center will serve approximately 40,000 residents in the Collinwood neighborhoods within a 1.5-mile radius area. There is a large senior population that will have specific program spaces and activities. This center will further Mayor Jackson's 2009 Urban Agenda for investing and rebuilding Cleveland's neighborhoods and making energy efficiency improvements at a City priority. Development of this new recreation center was specifically listed as a representative project. The natatorium portion of this project will be wholly funded by City dollars (cost estimate is \$2.7 million) and none of the Federal Stimulus funds would be used. | City of Cleveland, Office of the Mayor | 44 | 31 to 90 days | \$7,200,000 |
| Cuyahoga | Environmental Restoration Project | This project can help control flooding and provide major environmental benefits. The work is necessary for a healthier and more sustainable environment. They include the restoration of Doan Brook and Euclid Creek. | City of Cleveland, Office of the Mayor | 100 | 91 to 180 days | \$20,000,000 |
| Cuyahoga | Lee Road Area Sewer Work | This area experiences flooding during heavy rainstorms. The problem is caused by stormwater connected and/or infiltrating into the sanitary system. The solution to the problem will be a combination of sewer replacement, rehabilitation and reconnecting of connections. | City of Cleveland, Office of the Mayor | 100 | 91 to 180 days | \$13,000,000 |
| Cuyahoga | Keller II Project | The Keller II tower is an additional one-million gallon elevated storage tank that will provide redundancy for customers in the southwestern suburbs to meet present and future needs in the Third High West portion of the Cleveland Water Department's Distribution system. Currently only one tower provides storage for this area and cannot meet high demand or estimated future demand, nor can it be taken out of service for maintenance. | City of Cleveland, Office of the Mayor | 100 | 91 to 180 days | \$5,500,000 |
| Cuyahoga | Hood's Heating and Cooling | Will distribute a hybrid system composed of geo-thermal and solar panels for consumers and businesses. This auxiliary heating system will be combined with existing heating systems and heat pumps. This installation of fluid transfer into an air handling unit combined with a geo-thermal system will supply warm air through a supply air duct and provide renewable energy for residents and commercial businesses. This investment in hybrid systems will result in efficient energy and save consumers 10% - 40% on monthly bills. This substantial savings will help the consumer and achieve a higher quality of energy. The outcomes will be a reduction in utility bills and eventually eliminate the use of fossil fuels. | Hood's Heating and Cooling | 10 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Green Leaf Cabinetry | Set up a "GREEN" manufacturing facility to assemble, finish, and deliver, "Environmentally Friendly" cabinetry for kitchens, bathrooms, and other rooms in the house and office. There are several kitchen & bath showrooms and other multi-family projects already under negotiation throughout the United States. Approximately 40-60 cabinets per week to start. Average price per cabinet is \$200.00. In attempts to get greater traction in the market we have had several articles published in several Green books/magazines including (Natural Home Magazine, Relevant Times, Good Green Interiors (book), Classical Choice Magazine, Better Homes and Gardens (Feb 2009), The Best of Fine Home Building - Great Kitchens Edition, July 2008) and Custom Woodworking Business). Thank you for all you are doing to help our economy, and the great State of Ohio. Thank you for considering Green Leaf Cabinetry to help create and retain jobs in the Greater Cleveland area. Sincerely, David E. Rupp President Green Leaf Cabinetry TOLL FREE 877-4CABINETS | Green Leaf Cabinetry | 8 | 0 to 30 days | \$250,000 |
| Cuyahoga | Building Management Training Program | procedures with the aim that each will either initiate their own enterprises or continue with the sponsoring business and participate in the ongoing training of others. This project is replicable over several years and we anticipate it will support itself after initial seed money expires. Trained workers will be given the opportunity to join together to start a joint venture. The in-depth training will take 9 months and include selection of building materials, rehab methods, rental procedures, tenant/landlord ethics, lease negotiation, price estimates, financial literacy training, scouting potential investment properties, and bringing projects to completion under or at budget. It is estimated that at the end of the training workers will be positioned to double their annual income. Eligible workers will be residents of Northeast Ohio (or willing to relocate), with current income at or below the poverty line. The sponsoring business has never and will never discriminate on the basis of race, creed, ethnicity, gender or physical disability. | Chariot House Investments | 5 | 0 to 30 days | \$100,000 |
| Cuyahoga | Frequency Program | Develop a non profit research health treatment service facility that will investigate the correlation between science and spirituality; Research universal laws that govern creation to explore a unified theory that connects spirituality to science. Establish a local and national educational multimedia program that develops service programs for alternative health treatments in conjunction with traditional health care. Provide a support for individuals and families who are personal distraught, physically disabled or mentally challenged, with healing services. | Science of Creation Foundation | 15 | 181 days or more | \$4,000,000 |
| Cuyahoga | Morgan Chemical Plant | The purpose of the Morgan Chemical Improvements Project is to convert from gaseous chlorine to liquid sodium hypochlorite, upgrade existing chemical feed and storage systems in a manner similar to the recent upgrades at the other water treatment facilities, and to centralize the location of plant chemical feed and storage facilities. | City of Cleveland, Office of the Mayor | 300 | 181 days or more | \$13,520,000 |
| Cuyahoga | Crown Chemical Plant | The primary purpose of the Crown Chemical and Miscellaneous Improvements Project is to convert from gaseous chlorine to liquid sodium hypochlorite and rehabilitate existing chemical storage and feed equipment in a manner similar to the recent upgrades at the other water treatment facilities | City of Cleveland, Office of the Mayor | 300 | 181 days or more | \$7,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Water Transmission Main Renewal Project | The Water Transmission Main Renewal Program provides improvements to infrastructure (large water transmission mains) that has reached a critical level of deterioration. This program will significantly reduce the massive water outages the public experiences when a transmission main fails and also reduces the associated cost of catastrophic failures. | City of Cleveland, Office of the Mayor | 300 | 181 days or more | \$10,000,000 |
| Cuyahoga | Lake-to-Lakes Trail | Funding would result in the construction of an off-road bike trail connecting Lake Erie to the Shaker Lakes. | City of Cleveland, Office of the Mayor | 66 | 91 to 180 days | \$3,000,000 |
| Cuyahoga | Train Avenue Bike Trail | Funding would result in the construction of a bike trail linking city neighborhoods to the Towpath Trail. | City of Cleveland, Office of the Mayor | 53 | 91 to 180 days | \$2,400,000 |
| Cuyahoga | Ralph Perk Park | Funding would result in the rehabilitation of a significant Downtown Cleveland green space in order to leverage large-scale mixed-used development. | City of Cleveland, Office of the Mayor | 66 | 91 to 180 days | \$3,000,000 |
| Cuyahoga | Towpath Trail | Completion of the Towpath Trail from Old Harvard Road to Canal Basin Park in Downtown Cleveland as well as completion of neighborhood connector trails | City of Cleveland, Office of the Mayor | 1,012 | 181 days or more | \$40,000,000 |
| Cuyahoga | Collegetown Streetscaping | Funding would result in the construction of streetscape enhancements to support mixed-use development on and near the campus of Cleveland State University | City of Cleveland, Office of the Mayor | 26 | 181 days or more | \$1,200,000 |
| Cuyahoga | Mayfield Road Streetscape Improvements | Funding would result in roadway and streetscape improvements that would connect the Little Italy neighborhood to University Circle to enhance the area and leverage private development | City of Cleveland, Office of the Mayor | 209 | 181 days or more | \$9,500,000 |
| Cuyahoga | Lot 45 Multi-Modal Facility | Funding would result in the construction of a mixed-use multi-modal structure to leverage large-scale mixed-use development and serve institutional expansion of the Cleveland Institution of Art and University Hospital. | City of Cleveland, Office of the Mayor | 242 | 181 days or more | \$11,000,000 |
| Cuyahoga | Ohio and Erie ICA & CA Chapter Headquarters | derelict commercial building at the gateway to the Ohio City Historic District in Cleveland. Construction jobs will be created immediately and 4-10 other jobs will be retained and created as a result of the completion of the project depending upon the overall economic conditions in the near future. Tenants committed to the project are the D.H.Ellison Co. architectural office and the regional chapter of The Institute of Classical Architecture and Classical America, a not-for-profit agency dedicated to the preservation and promotion of classical architecture and the allied building arts. The Ohio and Erie Chapter of the ICA & CA will employ one full-time staff person to coordinate regional educational and promotional activities pertaining to the niche market of classical and traditional design and building arts. The chapter will undertake job training and mentoring activities. The successful completion of this project should retain and create at least 4-10 to 10 permanent jobs. | Ohio and Erie Chapter of the Institute of Classical Architecture and Classical America | 4 | 0 to 30 days | \$250,000 |
| Cuyahoga | Reshaping Today's Workforce | Moore Counseling would assess individuals seeking employment to identify barriers to employment. The assessment would identify areas that may prevent the individual from becoming employed, such as substance abuse, childcare, mental health, medical complications, and domestic violence to name a few. Individuals would receive a career screening to address areas that may need additional training and compatibility with areas of employment. Each individual would receive case management and an individualized plan that is made with the case manager and the client to address any barriers and to begin the process of working toward gainful employment. Each case manager would use motivational techniques to assist the clients with working toward stated goals and overcoming barriers. The expected outcome is to have at least 750 individuals obtain gainful employment within the next year. | Moore Counseling & Mediation Services, Inc. | 750 | 0 to 30 days | \$280,000 |
| Cuyahoga | Madison Avenue Bridge over GCRTA & NS Railroad | This project will remove and replace the existing Madison Avenue Bridge over Norfolk Southern Railroad and The Greater Cleveland Regional Transit Authority Railroad tracks with a pedestrian bridge. The bridge, built in 1921, is in critical condition and is closed to roadway traffic. Eliminating this vehicular bridge directs eastbound traffic onto West 65th Street, a major collector street. Madison Avenue terminates at West 58th Street, 1000-ft east of West 65th Street. The new pedestrian bridge would maintain neighborhood access to the new RTA Rapid Station at W 65th and St. Colman's Church and School both located at the southwest corner of the bridge. Removal of the bridge has been well received by the City safety departments, neighborhood planning group and City Council. W 61st Street Pedestrian bridge with a General Appraisal Rating of 4a will be removed as part of the project. Cleveland will propose to ODOT to sell CUY W 74th Bridge over GCRTA and Norfolk and Southern Reconstruction with this project in order to save on costs for Railroad force account and construction management. The bridges are within 1,900-feet of each other. | City of Cleveland, Office of the Mayor | 125 | 181 days or more | \$4,500,000 |
| Cuyahoga | East 105th/Wade Park Avenue Improvements | Funding would result in reconfiguration of the East 105th/East Boulevard intersection and traffic flow improvements along East 105th Street from Wade Park Avenue to East Boulevard to address traffic issues related to the expansion of an adjacent Veterans Administration Hospital facility | City of Cleveland, Office of the Mayor | 22 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Dike 14 Greenspace | Funding would result in the construction of a multi-purpose trail overlooking Lake Erie on an 88-acre nature preserve. | City of Cleveland, Office of the Mayor | 5 | 91 to 180 days | \$210,000 |
| Cuyahoga | Cleveland Jail Facility Construction | The Cleveland Division of Police currently operates five (5) neighborhood district buildings and one training center that are outdated and dilapidated. The buildings were constructed almost as fortresses with the 1960's race riots in mind and are not adaptive to new technology and the division's changing mission. Maintenance costs are increasing exponentially with the advanced age of the buildings as is the need for major capital improvements. They do not meet our current and future needs. The two police stations in the worst shape and a training center must be replaced to allow us to improve our operations and create anchors in the community. The new buildings will be more accessible to the community with a more open design and features such as community rooms, and will incorporate green technology. This will also reduce our costs associated with building maintenance. Expected outcomes: Two new police district and a training center buildings will be constructed. | City of Cleveland, Office of the Mayor | 50 | 91 to 180 days | \$26,812,760 |
| Cuyahoga | W. 74th Street Bridge over GCRTA & N&S Railroad | This project will remove and replace the existing West 74th Street Bridge over Norfolk Southern Corporation and The Greater Cleveland Regional Transit Authority Railroad tracks. The bridge, built in 1921, has reached its useful design life. The annual safety inspection indicates the deck, superstructure and substructure are in serious condition. A copy of the bridge inspection form BR-86 will be submitted upon request. Preliminary engineering plans have been developed and approved by ODOT in February 2004. The project will be packaged with CUY Madison Avenue over GCRTA and Norfolk and Southern railroad in order to save on Railroad force account charges and construction management if approvals are obtained in a timely manner. This project is necessary to maintain this street access without limitations. The bridge links the residential neighborhood to public transportation and retail areas on Franklin Blvd and Detroit Avenue to the north and Madison Avenue to the south. The superstructure beams are heavily corroded, utility chambers are spalled through on the deck floor and sections of the sidewalk are und | City of Cleveland, Office of the Mayor | 125 | 181 days or more | \$4,400,000 |
| Cuyahoga | Downtown Bike Station Multi-Modal Facility | Funding would result in the construction of a Commuter Cycling Facility in downtown Cleveland, thus serving as an alternative method of transportation for City Clevelanders. | City of Cleveland, Office of the Mayor | 7 | 91 to 180 days | \$300,000 |
| Cuyahoga | Kerruish Park Trail | Funding would result in the construction of a multi-purpose trail within an existing park | City of Cleveland, Office of the Mayor | 33 | 91 to 180 days | \$1,500,000 |
| Cuyahoga | generate employment for people that are in need fo | we will be able to help people from the community , find jobs and help with rent assistance , help with transportation to get to there job assignments and help them be able to pay there rent and bills , specially with children , help them step up to be able to stop taking public assistance etc.... | new york syles nails inc | 500 | 0 to 30 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Innerbelt | The project consists of widening the west-bound lanes of I-90 across the Cuyahoga River Valley. This current 5-lane, 5,100 foot-long bridge between downtown Cleveland and the west side would clear the federal navigable channel of the Cuyahoga River by 100 feet to continue allowing Great Lakes ships to access 25 public and private docks along the river allowing intermodal transfer of material between ships and trucks of ships and rail. This project has been on-going and while funding was committed, we are working with ODOT to fund the gaps to have a successful bridge. | City of Cleveland, Office of the Mayor | 7,700 | 181 days or more | \$200,000,000 |
| Cuyahoga | Opportunity Corridor | Improved mobility from the Interstate system (I-490 at East 55th Street) to University Circle (Carnegie Avenue at East 105th Street) will support on-going economic development that can occur with the addition of 3.3 miles of urban arterial roadway. The project will also improve access from the Interstate system (I-490 at East 55th Street) to the "Forgotten Triangle" (between Kinsman, Woodhill, and Woodland) to encourage economic redevelopment at the neighborhood level. The development of this corridor could yield up to 210 acres of adjacent development potential. The University Circle area is the second largest employment area in the City of Cleveland, with Downtown Cleveland being the largest. This area is home to University Hospitals, Case Western Reserve University, Cleveland Institute of Art, Cleveland Museum of Art, Cleveland Botanical Gardens, and many other cultural, medical, and educational institutions. With over \$1 billion in planned improvements and limited land available for development in the University Circle area, there | City of Cleveland, Office of the Mayor | 5,500 | 181 days or more | \$300,000,000 |
| Cuyahoga | West Shoreway | Transformation of 2.5 miles of limited access highway into an urban boulevard with six full or partial interchanges providing improved lakefront access to the Clifton/Edgewater, Detroit Shoreway, and Ohio City neighborhoods, including the \$100 million Battery Park development where 328 condominium units are rising on 13 acres of former manufacturing plant | City of Cleveland, Office of the Mayor | 660 | 181 days or more | \$30,000,000 |
| Cuyahoga | The Night That Everything Changed | Removal from the home and placement into foster care is challenging to explain to children. Few resources are available to aid with this process. We have created a therapeutic tool to assist with the education and emotional needs of children ages five through thirteen who are entering foster care. "The Night that Everything Changed: Timmy's Journey Into Foster Care" is an interactive children's book that explains the process in a manner that children can easily understand and relate to. The full color book contains a glossary of related definitions and a forward for foster parents and social workers. In addition, a therapeutic workbook will accompany each book allowing children to tell their own story of how they came into foster care. We propose to supply the county child welfare agencies within the State of Ohio with 2500 copies of the book and workbook set and instructions on how to utilize this unique tool. The assigned case managers could distribute the book as deemed necessary to new foster children. The author would be | Paradigm Counseling Ltd. | 2 | 31 to 90 days | \$50,000 |
| Cuyahoga | Buckeye Road Streetscaping | Funding would result in the construction of streetscape improvements along model block streets and along the Buckeye Road retail corridor. | City of Cleveland, Office of the Mayor | 44 | 181 days or more | \$2,000,000 |
| Cuyahoga | Clifton Boulevard Streetscaping | Funding would result in the construction of streetscape enhancements and transit improvements to support an important commercial and retail district. | City of Cleveland, Office of the Mayor | 99 | 181 days or more | \$4,500,000 |
| Cuyahoga | Broadway Streetscape | Funding would result in the construction of streetscape enhancements in the Slavic Village commercial district. | City of Cleveland, Office of the Mayor | 90 | 181 days or more | \$4,100,000 |
| Cuyahoga | EMS Base 2 Facility Upgrade (Located in the First | Project to upgrade 6 existing EMS facility located throughout the City of Cleveland. Personnel are currently located in facilities that are unsuitable for their current operations. Preliminary review indicates that land for a 3,000 square feet office space along with appropriate parking exists on each of these locations. These new facilities, will house an ambulance, office, and parking for employees stationed at this location and would allow for easy access. Expected Outcomes: These facilities will help reduce response time, while improving base security and overall working conditions for employees. We will also see a reduction in fuel costs because the ambulance would be enclosed in a secure heated area. | City of Cleveland, Office of the Mayor | 40 | 181 days or more | \$2,100,000 |
| Cuyahoga | Fire Fighter Staffing | Acquire funding through the SAFER Grant program to hire and maintain 25 additional firefighters for a period of five years (5). Hiring of firefighters from projected civil service list to be established in late 2009. This examination will be the first given since 1998 due to layoffs and downsizing in 2003 that continues with brownouts and un-staffed companies to this day. Previous SAFER grants required City match and higher staffing levels. The current Stimulus Act has waived City match. Additionally the current level of firefighters has been reduced through attrition and with a much higher rate of attrition projected for the second half of 2010 and beyond, the staffing will be critical to maintain already reduced service levels. | City of Cleveland, Office of the Mayor | 25 | 181 days or more | \$10,250,000 |
| Cuyahoga | Cleveland Team Approach to Domestic Violence | The Cleveland Division of Police currently operates a successful Team Approach to Domestic Violence program that utilizes Police Detectives, Prosecutors, and Victim Advocates to conduct criminal investigations, charge offenders, provide support services to victims and prosecute offenders of Domestic Violence and Stalking crimes. This project is a collaboration between the Cleveland Division of Police, Cleveland City Prosecutors Office, and the Cuyahoga County Witness/Victim Service Center. This program is currently active in three (3) of Cleveland's five (5) police districts. We are requesting funding to put five (5) additional police detectives into the program which will allow us to expand this important service into the entire City of Cleveland. Expected outcomes: Police detectives assigned to the DV Unit increased by 6 in 2009. Number of DV/stalking cases investigated by DV Unit increased by 20% by the end of the grant period. | City of Cleveland, Office of the Mayor | 5 | 31 to 90 days | \$446,665 |
| Cuyahoga | Cleveland Aviation Unit | The Cleveland Division of Police Aviation Unit serves an invaluable role in basic police operations and homeland security for Cleveland, and often aids surrounding jurisdictions. They will be forced to relocate in 2009 because the hanger they are currently utilizing will no longer be available to them. Additionally, one of the unit helicopters needs to have its engine rebuilt as soon as possible. We are requesting funding to build a new helicopter hanger and rebuild a helicopter engine. Expected outcomes: One new hanger will be built and one helicopter engine will be rebuilt. | City of Cleveland, Office of the Mayor | 4 | 91 to 180 days | \$400,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Cleveland Police COPS Hiring | <p>The current economic crisis affected the City of Cleveland early, and resulted in the need to layoff 339 police personnel in 2004, including 250 police officers. Recent COPS grants have aided us in recovering some of these positions but we are still far from our 2003 levels. With the highest rate of foreclosures in the United States, Cleveland is being hit especially hard by this recession. Because poverty levels directly correlate to crime rates the Cleveland Division of Police must be prepared to deal with new challenges in these times. Specialized units need to be increased as do basic patrols.</p> <p>We are requesting funding for 100 additional police officers to be used to respond to the most urgent needs of those who live in, work in and visit Cleveland.</p> <p>Expected outcomes: The Cleveland Division of Police will hire 100 additional police officers.</p> | City of Cleveland, Office of the Mayor | 100 | 181 days or more | \$26,798,922 |
| Cuyahoga | Cleveland Public Safety System Automation Project | <p>The Clevelandian public safety system automation project (PSAW) will create the infrastructure needed to solve some of the most urgent technology needs in public safety. It includes replacing the current Computer Aided Dispatch (CAD) system and Records Management System (RMS), Automated Vehicle Locator (AVL), video surveillance and monitoring software, interoperable radio communications equipment, crime analysis software, and the purchase of camera equipment for the police jail and in neighborhoods.</p> <p>The current radio system is obsolete and has crashed three times in the last six weeks. The current RMS is outdated and is no longer within current industry standards. The Cleveland metropolitan area is ranked as one of the worst in the country in terms of radio interoperability. Although we are making headway in this area, there is still a great deal of work to be done.</p> <p>Expected outcomes: A streamlined information sharing environment amongst all levels of Law Enforcement (City, County, State and Federal) enhance our situation awareness, and provide more efficient emergency response capability throughout the City by the installation of PSAW.</p> | City of Cleveland, Office of the Mayor | 5 | 0 to 30 days | \$8,000,000 |
| Cuyahoga | Capital Facility Upgrade Projects (Fire Stations) | <p>Funding to construct needed Citywide facility upgrades at various fire stations. Projects have been identified and are not scheduled until appropriate funding can be allocated. Projects include:</p> <ul style="list-style-type: none"> ? General Trade Improvements including Mechanical, Electrical and HVAC Tasks. In addition general improvements to include interior renovations, upgrades, painting and other finish work. All work to improve energy efficiency and health environment within the facilities. ? Concrete and other exterior grade improvements to replace deteriorated and dangerous conditions. ? Roof replacement and other upgrades to increase energy efficiency and maintain health environment within facilities. <p>Expected Outcomes: All improvements to replace antiquated, inefficient systems in current states of disrepair with new, energy efficient, environmentally friendly materials, products and systems.</p> | City of Cleveland, Office of the Mayor | 50 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | Cleveland Police Officer Wellnes Program | <p>The City of Cleveland wants to establish a wellness program for police officers. The physical and mental effects of the stressful situations police officers face are well documented. Police officers have a higher rate of heart disease and cancer and in increased risk of alcoholism, divorce and suicide. Although physical and mental fitness are emphasized in police recruits there is no process in place to assess and aid in the continued well being of officers throughout their careers. The Cleveland Division of Police is requesting funding to establish an officer wellness program including the purchase of fitness equipment, contracting for the services of personal trainers and nutritionists, and expenses related to tracking the fitness levels of officers while they are participating in the program. This program will initially be voluntary with the possibility of making it mandatory in the future.</p> <p>Expected outcomes: 100 police officers will participate in a wellness program by the end of the grant period.</p> | City of Cleveland, Office of the Mayor | 150 | 31 to 90 days | \$69,000 |
| Cuyahoga | Cleveland Police Academy Training Equipment | <p>The City of Cleveland is in need of training equipment for the Cleveland Police Academy. The academy is currently unable to seriously simulate pursuit driving and driving tactics without the risk of recruit and instructor safety. We are requesting funding to purchase a vehicle simulator with a modular classroom. This equipment would be instrumental in preparing new officers for the streets and retraining current officers. It will be a critical tool in skills development and will allow police recruits to master driving skills in a controlled, safe environment. The Philadelphia Police Department saw a 23% reduction in police vehicle accidents after utilizing this equipment. Providing this advanced training to police officers will result in fewer police accidents and will be a proactive tool for officer safety.</p> <p>Expected outcomes: 50 police recruits trained on pursuit driving in 2009. Police vehicle accidents reduced by 15% in 2010.</p> | City of Cleveland, Office of the Mayor | 150 | 31 to 90 days | \$205,035 |
| Cuyahoga | Mayor's Scholarship Program for graduating CMSD St | <p>The City of Cleveland, Cleveland Metropolitan School District & United Negro College Fund worked in collaboration to establish the Mayor Frank G. Jackson Scholarship Program. The scholarship makes an investment in an educated workforce who can compete globally and contribute to the growth of the region. The scholarship represents a belief that an educated population improves quality of life and stabilizes neighborhoods. The Mayor Frank G. Jackson Scholarships are offered to Cleveland Metropolitan School District students, City of Cleveland employees, and City of Cleveland employees' children, to support enrollment in a post-secondary institution. This initiative could conceivably produce approximately seventy-three new jobs.</p> | City of Cleveland, Office of the Mayor | 50 | 31 to 90 days | \$1,095,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Emergency Medical Technician Basic Training Progra | The City of Cleveland Emergency Medical Department, the Cleveland Metropolitan School District (CMSD), and the East Cleveland School System collaborated to provide Emergency Medical Technician Basic (EMT-B) training. The proposed training program for Martin Luther King Jr. High School vocational students and East Cleveland high school students provides Emergency Medical Service Technician-related classes, lectures, labs, clinical and/or field internships with Cleveland EMS ambulances, Rescue Squads, or hospital affiliates. The objective will be for the students to ultimately pass the National Registry Examination test and be certified as state of Ohio EMT-B. This program will provide technical training and job skills for employment opportunities after graduation from high school. The City of Cleveland will have a potential pool of candidates from which to recruit for possible Division of EMS employees in the future. | City of Cleveland, Office of the Mayor | 25 | 31 to 90 days | \$135,720 |
| Cuyahoga | Cleveland Public Power Apprenticeship Program | The Cleveland Public Power (CPP) Apprenticeship Program was designed with the intent to provide alternative and viable career options for our young adults. CPP in conjunction with the Cleveland Metropolitan School District (CMSD), developed this program for CMSD high school students to become linemen and meter readers. Ten students began their apprenticeship program earning their Commercial Driver's License, endured physical conditioning, and financial literacy training. They earn approximately \$45,000 annually when their apprenticeship program begins. | City of Cleveland, Office of the Mayor | 40 | 31 to 90 days | \$959,274 |
| Cuyahoga | Health Career and Technology Building | This project is to construct a new 255,300 gross square foot building at the eastern campus of Cuyahoga Community College. The building will house new laboratories (approx. 20,000 SF), classrooms (approx. 20,100 SF, faculty offices (approx. 2,000 SF), student services (approx. 800 SF) and other miscellaneous areas (approx. 11,000 SF), which will support four new health career programs as well as existing health career programs. | Cuyahoga Community College | 123 | 31 to 90 days | \$4,700,000 |
| Cuyahoga | College Wide - Deferred Maintenance | This project will involve completing deferred maintenance college wide. On the East Campus the work will be sidewalk and site drainage repairs, exterior building repairs, and roof replacement. On the Metropolitan Campus the work will consist of repairs to the locker rooms, toilet rooms and exterior of the buildings. The electrical emergency generator will be replaced and the Uninterrupted Power Supply (UPS) controls will be upgraded. On the West Campus the improvements will consist of courtyard repair, fire suppression piping and emergency generator replacement. | Cuyahoga Community College | 9 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | Olmsted JEDD Business Park Entrance Road | Installation of new 1.0 mile Olmsted JEDD Business Park road from Cook Road to Stearns Road. Includes sanitary and storm sewers, water and electric service. This road will be the main access to the Olmsted Business Park and is essential for park development. The road will be 28 feet wide with curb and gutters. Also will include sidewalks, street lighting and entrance amenities. | Olmsted Joint Economic Development District | 3000 | 91 to 180 days | \$6,049,700 |
| Cuyahoga | Coit Road Brownfield Clean-up Grant | This funding will help remediate a 25 acre site to Industrial Commercial Standard. | City of Cleveland, Office of the Mayor | 300 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | Green Industrial Park (Brownfield-EDI Grant) | The City owns 65% of this site and the funds will be used to acquire, clear and remediate the balance of the 26 acre site to create a green industrial park. | City of Cleveland, Office of the Mayor | 200 | 0 to 30 days | \$2,100,000 |
| Cuyahoga | Olmsted JEDD Business Park Sewer Extension | Extend existing sanitary sewer line approximately 1000 linear feet to the border of the Olmsted JEDD Business Park entrance road | Olmsted Joint Economic Development District | 3000 | 91 to 180 days | \$1,012,000 |
| Cuyahoga | High Efficiency Quantum Dot PV Manufacturing | energy capture, specifically solar power. Powdermet proposes to manufacture these low cost, high efficiency photovoltaics using advanced nanomaterials and roll to roll polymer processing methods to create thin-film, flexible photovoltaic cells. The nanomaterials involved consist of quantum dots (for energy absorption) and nano fibers (for improved electrical transfer) in the flexible polymer matrix. Quantum dots have the potential to both increase the efficiency, from a theoretical efficiency of 31% to 45% and to reduce the cost of today's typical silicon photovoltaic cells because they can be processed using simple chemical reactions. Additionally, carbon nano-fibers can be used to significantly increase the electrical conductivity of the polymer matrix and will enable using a flexible substrate compared to the current rigid photovoltaic materials. The final product will be a durable and flexible photovoltaic (solar cell) capable of absorbing electromagnetic radiation with much higher (5-10%) efficiency and at a much lower cost than the current technology. | EMTEC | 28 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Mansard Roof Repair | This project is to design and replace the metal mansard siding at the Metropolitan Campus Theater (MTS) Building. Portions of the existing siding and supports have deteriorated throughout the life of the MTS building and need to be replaced. Rehabilitation of incidental items such as structural supports, insulation, gutters, and spray-on fireproofing is expected to be performed. This project will involve design for abatement of suspected asbestos-containing and other hazardous materials in the vicinity of the mansard siding, to occur while these inaccessible areas are available. | Cuyahoga Community College | 10 | 0 to 30 days | \$1,600,000 |
| Cuyahoga | Engineering Lab Renovations | Partial renovation of the Engineering Laboratories in the Health Careers & Science Building at the Metropolitan Camus to prepare the program for the arrival of grant funded equipment | Cuyahoga Community College | 3 | 31 to 90 days | \$100,000 |
| Cuyahoga | school improvement | student achievement in the classroom | warrensville heights city schools | 0 | 91 to 180 days | \$50,000 |
| Cuyahoga | Mentor Family Entertainment Center Total Renovatio | This is currently an old bowling alley that is in desperate need to massive repairs. Without it the longevity of the site will remain in question. The City and State regulations have placed many requirements on the project that has ballooned it up to \$2,500,000 from \$1,500,000. \$1.4 Million in financing is secured and ready to be funded through Huntington Bank. We will create about 30 jobs while we are working on the project for 6 months, and an additional 30 jobs when it is complete(Bringing total long term jobs to 60). Our main problems lie in parking lot requirements of lighting and islands, sprinklering the building where the state says we do not have to but the city does, new heating and cooling, and total roof restoration. The project is nearly shovel ready with all drawings about 95% complete. We had planned on a June start date, but not sure we can embark on the project without any assistance. | Freeway Lanes Bowling Group | 60 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | After School Science"Green"Infant,Toddler/Preschoo | would like to hire someone at a decent wage just for transportation. I would also like to implement a school-age program for the summer that will focus on a "green" curriculum. We will plant, focus on science with field trips, experiences through experiments. We will give the foods that we harvest to our local community shelter or any one that is need. The children will document their data in a journal.I would like for the children to use bikes, skates and other means of transportation. I would also like for a science teacher to come in once a week to excite the children about science and the world around us. I would like to end the summer with a trip that focuses on the science summer theme. In order for children to feel good and confident about themselves they need to experiment, explore and have fun. I am sure we will build our future scientists, electrician, and positive American. I would like to enhance my infant to preschool program with new equipment and more college for myself and my teachers. I need 3 classes and student teaching to have my Associate Degree in Early Childhood Education. I would like to create a pilot wind farm off-shore in Lake Erie. This would be the first of its kind in the world freshwater off-shore wind energy project. | Cradle 2 Crayons | 3 | 0 to 30 days | \$45,000 |
| Cuyahoga | Cuyahoga Wind Energy Project | Nearly \$2 million in local funds have been expended for feasibility studies and setting up a research center with Case Western Reserve University. It is hoped that this will attract a wind turbine manufacturer to the county to set up North American operations, create a supply chain that could generate additional ancillary jobs. | Cuyahoga County | 3,000 | 91 to 180 days | \$28,000,000 |
| Cuyahoga | refurbishing homes in cleveland | Repair and replace roofs/flooring/windows/landscaping etc. for blighted properties in the Cleveland area | smg properties | 8 | 91 to 180 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | County Energy Efficient Buildings | Capital costs to improve the energy efficiency of county buildings has been slow and hard to come by. This has cost the county millions in energy costs over the years. This would include a smart metering pilot/demonstration project, phase two of systems upgrades for energy code compliance and a \$1 million window replacement program. | Cuyahoga County | 100 | 31 to 90 days | \$8,000,000 |
| Cuyahoga | College-Wide Structural Renovations | This project is to rehabilitate deteriorated concrete structures at the Metropolitan Campus North Stair and Plaza as well as the Eastern Campus Student Services Building (ESS) West Entrance | Cuyahoga Community College | 10 | 31 to 90 days | \$1,700,000 |
| Cuyahoga | Clean Technology Manufacturing Conversion | Using an existing successful local model with collaborative partners, help companies convert manufacturing to clean technology uses - like wind turbine and solar panel manufacturing. Cuyahoga County has invested over \$20 million in New Product Initiative Grants, Innovation Zones and other ED loans. This would accelerate those efforts and focus them on green industry conversion. | Cuyahoga County | 1,000 | 91 to 180 days | \$5,000,000 |
| Cuyahoga | fun with family's | Open block party for family's&friends to come together an encourage our city to overcome our lackness in society. We'll have many interested speakers/role-models an also united states marines their also to share thier experience an also many oppurtunity's for our upcoming children.Hopefully have the mayor also other important people to support our family's that need the support they cant get.Im also trying to open an construction business for teens willing to learn an get off the streets.We need more successful people in cleveland now as we speak.Our city really need to grow faster an more great people to look up to an some one really need to speak out. | Our family's | 1 | 31 to 90 days | \$6,000 |
| Cuyahoga | Student Service Renovations (One-Stop) Western Cam | This project is to construct a new two-story, 23000 square foot building addition onto the existing Student Services Building (WSS) at the Western Campus. Renovation of approximately 25,000 square feet of the existing Student Service Building will also be included to create a dedicated Campus Center with a redesigned cafeteria and event space capable of accommodating 500 seats. This project will provide for continued use of the sewer | Cuyahoga Community College | 46 | 91 to 180 days | \$7,700,000 |
| Cuyahoga | NEORS - Mill Creek Interceptor Rehabilitation (MC) | This project will provide for continued use of the sewer | Northeast Ohio Regional Sewer District | 212 | 91 to 180 days | \$5,300,000 |
| Cuyahoga | NEORS - Huntington Garage Sewer Rehabilitation | This project will provide for continued use of the sewer | Northeast Ohio Regional Sewer District | 40 | 91 to 180 days | \$1,020,000 |
| Cuyahoga | NEORS - Train Avenue Relief Sewer (TARS) | This project will reduce overflows by enhancing system capacity. | Northeast Ohio Regional Sewer District | 116 | 0 to 30 days | \$2,900,000 |
| Cuyahoga | NEORS - Mill Creek Interceptor Main Branch (MCI-M) | This project will redirect flow to an adjoining facility, allowing abandonment of a pump station. | Northeast Ohio Regional Sewer District | 348 | 181 days or more | \$8,670,000 |
| Cuyahoga | NEORS - Southerly/Westerly Ints. Rehab. (SWDISAC) | This project will provide for continued use of the sewers | Northeast Ohio Regional Sewer District | 152 | 91 to 180 days | \$3,800,000 |
| Cuyahoga | NEORS - Easterly Int. Service Agreement Contract | This project will provide for continued use of the sewers | Northeast Ohio Regional Sewer District | 128 | 91 to 180 days | \$3,200,000 |
| Cuyahoga | NEORS - Dugway East Interceptor Relief Sewer (DEI) | This project will reduce overflows by enhancing system capacity. | Northeast Ohio Regional Sewer District | 1040 | 0 to 30 days | \$26,000,000 |
| Cuyahoga | Cuyahoga County Fairgrounds | There may be an initial local investment of approximately \$250,000 pending. This project will power the fairgrounds, providing energy costs savings of nearly \$100,000 annually. It will also serve as an educational demonstration project and county has teamed up with Polaris Career Center, a local career technical school, to introduce high school students to the alternative energy industry and provide real world job experiences and internships. This project will reduce overflows by enhancing system capacity. | Cuyahoga County | 50 | 31 to 90 days | \$1,300,000 |
| Cuyahoga | NEORS - Lee Road Relief Sewer (LRRS) | This project will collect and store combined sewage to reduce overflows | Northeast Ohio Regional Sewer District | 1120 | 181 days or more | \$28,000,000 |
| Cuyahoga | NEORS - Mill Creek Tunnel Completion Contract (MC) | This project will collect and store combined sewage to reduce overflows | Northeast Ohio Regional Sewer District | 516 | 181 days or more | \$12,900,000 |
| Cuyahoga | NEORS - Easterly Dist. CSO-Tunnel Dewatering PS D | This project will collect and store combined sewage to reduce overflows | Northeast Ohio Regional Sewer District | 30 | 181 days or more | \$14,000,000 |
| Cuyahoga | WRRSP - West Creek Stream Restoration Project Site | This urban stream restoration project will enhance habitat in West Creek | Northeast Ohio Regional Sewer District | 27 | 91 to 180 days | \$675,000 |
| Cuyahoga | WRRSP - West Creek Stream Restoration Project Site | This urban stream restoration project will enhance habitat in West Creek | Northeast Ohio Regional Sewer District | 20 | 91 to 180 days | \$501,450 |
| Cuyahoga | WRRSP - West Creek Stream Restoration Project Site | This urban stream restoration project will enhance habitat in West Creek | Northeast Ohio Regional Sewer District | 56 | 91 to 180 days | \$1,413,650 |
| Cuyahoga | WRRSP - West Creek Stream Restoration Proj. - Conf | This urban stream restoration project will enhance habitat in West Creek | Northeast Ohio Regional Sewer District | 104 | 181 days or more | \$2,585,000 |
| Cuyahoga | Student Service Renovation - Phase II Eastern Camp | The project consists of the renovation of the existing admissions, business office and financial aid areas on the first floor of the Student Service building on the Eastern Campus (ESS). This renovation will complete the student services consolidation work that was started in Phase I and is also the completion of the first step in re-organizing the student success corridor on the campus. This leverages the medical imaging cluster in Ohio and cements our lead in a growth industry while enabling the swift creation of commercially viable companies with high paying jobs. This also creates a much more attractive basis for other firms to invest in Ohio and for existing firms to move to Ohio. ICCF will invest only in Ohio based enterprises and will operate as a for profit/return of capital venture fund. | Cuyahoga Community College | 31 | 91 to 180 days | \$5,200,000 |
| Cuyahoga | Imaging Cluster Commercialization - "ICCF" | Ohio is investing in medical imaging at the university level and thru various not-for-profit activities in the biomedical space. ICCF leverages those investments creating commercially viable companies. The fund will invest or parallel with other firms (venture funds, corporate partners, banks, etc.) at a ratio of at least 1:1 thus multiplying the impact of those monies. Direct job creation is anticipated to be ~1500 with an additional ~2700 indirect/induced jobs. The investment team will consist of private investors/development workers create an educational and specialized program on training displaced manufacturing workers into clean technology jobs, similar to on-going displaced worker training programs. | Crystal Venture Funds | 1500 | 31 to 90 days | \$150,000,000 |
| Cuyahoga | Skilled Clean Technology Workforce Training | This program would complement other county initiatives to encourage clean technology development in the area. | Cuyahoga County | 1,000 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | College Wide - Parking Lot and Roadway Improvement | The project consists of the renovation of parking lots and landscape improvements at the Eastern Campus; renovation of parking lots, roadways and walkways at the Western Campus; and renovation of the parking lot, access drives and East 30th street entrance courtyard at the Metropolitan Campus | Cuyahoga Community College | 7 | 31 to 90 days | \$1,200,000 |
| Cuyahoga | New control tower, runway safety area improvements | New control tower, runway safety area improvements | City of Cleveland | 1000 | 31 to 90 days | \$62,000,000 |
| Cuyahoga | Vehicle Fleet Modernization | Replace 40 vehicles in the county fleet with hybrid and other alternative fueled vehicles | Cuyahoga County | 1 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Municipal Solid Waste to Energy Project | energy (MSWE) facility. Cleveland's MSWE approach is based on a sustainability model that utilizes substantially all of the municipal solid waste collected, encourages recycling and converts the residual municipal solid waste, using advanced energy technologies, to produce electricity and renewable energy fuel pellets that may be used separately or combined with coal to produce electricity. Cleveland's MSWE gasification process is based on thermal conversion of organic solids and liquids and converts them into a synthetic gas in a controlled heat and decreased oxygen environment. The synthetic gas produced in this process may be used as a fuel in place of natural gas for steam production and electric generation. In addition to electric power generation, the City's project will sort and shred "clean MSW" such as yard waste, food, paper residuals and other non-hazardous and non-recyclable materials to produce environmentally friendly, high value, renewable fuel pellets that are considered 90% cleaner fuel than coal. This sustainability modeled facility will be | City of Cleveland, Office of the Mayor | 120 | 91 to 180 days | \$90,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Skilled Health Care Workforce Training | Workforce Development would create an initiative, similar to existing displaced worker training program, to re-train displaced workers into skilled medical technology fields to help support the growing medical technology field in Cuyahoga County. This will also help provide skilled workforce for medical supply chains and innovators supporting the Medical Mart, a local \$400,000,000 investment to promote medical device and technology. | Cuyahoga County | 1,000 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | West Creek Watershed Stewardship Center - Revision | In partnership with the City of Parma (Ohio's seventh largest city), Northeast Ohio Regional Sewer District, (providing \$3.0 million in construction funds) and the citizen based West Creek Preservation Committee, Cleveland Metroparks will construct a 17,000 square foot regional center of excellence for ecological restoration of urban watersheds. Professionally staffed with 20 new permanent positions, the Center will be a resource for school and youth groups, citizens, public officials, professionals and the scientific community to expand understanding, best practice and management to watersheds of Northeast Ohio. The Center will provide education, training, access to science, opportunities for hands-on activities, demonstrations, decision-making support and recreational opportunities. In planning since 2006, the Center has the endorsed support of all local governments, social/environmental/conservation groups and all elected officials. The Cleveland Department of Public Health (CDPH) has established the goal to increase HIV testing in the Cleveland area. This goal is in response to the CDC's recommendation that HIV testing be offered routinely. The CDPH needs an HIV capacity builder to facilitate medical institutions inclusion of routinely offered HIV testing. The CDPH has shown that, with support, major medical providers can develop the capacity to provide HIV testing without increasing their staff costs. The CDPH worked with the Ohio Department of Health to pilot this approach with MetroHealth Center's Broadway CareAccess, which has been able to begin routinely offering rapid HIV tests in an area of Cleveland that otherwise does not have an HIV testing provider. The staff that provided this support are detailed to respond to a syphilis outbreak and be available in 2009. The outcome of this project will be that: 1. 10 area medical providers will expand their clinical practice to include HIV testing; 2. the new providers will implement HIV testing without additional costs and 3. the new area HIV testing providers will complete an additional 2 pilot programs in their first year of operation. | Cleveland Metroparks | 62 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | The HIV Capacity Building Initiative | Building on existing programs and initiatives that Cuyahoga County has created and funded with nearly \$20 million over the past four years. Produce new innovations and investments in medical technology, using existing local models, to support a new medical device and technology chain for new Medical Mart, a local county investment of \$400,000,000. In conjunction with the Cuyahoga County Wind Energy Project, should a manufacturer be identified to move to the county for North American operations, it may require the use of warehouse and dock space at the Cleveland-Cuyahoga Port Authority. Funds would assist the Port in recovering dockage and warehouse space should it be required to turn over existing facilities for wind energy production. The use of warehouse dockage is being evaluated as a means to increase wind energy production. | City of Cleveland, Office of the Mayor | 1 | 91 to 180 days | \$75,000 |
| Cuyahoga | Medical Innovation and Manufacturing | Redevelopment Program. Previous investment of \$23 million by County Commissioners yielded nearly 4,000 jobs, returned nearly 100 acres of land to productive use and an economic impact of nearly \$580 million. Fund just recapitalized by County. | Cuyahoga County | 1,000 | 31 to 90 days | \$40,000,000 |
| Cuyahoga | Wind Energy Project Port Authority Vacation of War | Federal stimulus funds would accelerate the amount of work done and get more land ready for productive use and development. County Commissioners provide \$1.1 million in annual funding to the overall \$7.8 million in donations of cash and food. This provide over 6.5 million meals annually. An additional \$2 million in funding would provide an additional 2-4 million meals countywide. | Cuyahoga County | 3,000 | 91 to 180 days | \$17,000,000 |
| Cuyahoga | Brownfield Redevelopment Fund | Have Active Bodies And Minds! All my staff are degreed teachers, Dr. Arthur Lavin, renowned pediatrician, serves as an advisor, and for the last 5 years we have provided programs with the Cleveland Orchestra and Cleveland Music School Settlement. My unique facility is located in Woodmere, Ohio. We were recently recognized by Nickelodeon and area parents as "Best In Cleveland" in 3 categories. Via the Stimulus Package I want to provide our educational and child care services to additional parents and children who have not had the ability to benefit from the level of care and education we offer. With the additional funding we would be able to offer transportation services, meals, childcare and early childhood education for 50-100 kids who normally could not take advantage of our creative arts based curriculum. Additional upside, with an expanded program I would hire an estimated 10 additional educators. I would appreciate any help I can get to make that this opportunity available to the community. | Cuyahoga County | 3,000 | 0 to 30 days | \$20,000,000 |
| Cuyahoga | Cuyahoga County Hunger Initiative | A restored performing arts education facility with new ADA access that provides arts education programs, arts access and employment for economically challenged and undeserved members of a vibrant (Fairfax) Cleveland community. Many of our participants are on public assistance and would not otherwise have access to the arts. We continue to serve and uplift our community by providing access to the life enhancing performing arts but we need your support if we are to continue to effectively meet the growing demand for our services. Our facilities are aging and we must address deferred maintenance on items such as roofing, electrical and plumbing systems. Likewise our studios and theaters still have the original 1940's flooring, seating and lighting and we need to improve ADA access for our disabled patrons. Stimulus funds would enable Karamu to carry on its mission of service, provide educational and employment opportunities | Cuyahoga County | 10 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | CHABAM (Children Have Active Bodies And Minds) | This is the estimated cost for complete coverage of Cuyahoga County for stabilization needs. This is in addition to the existing \$14 million program and in conjunction with new landmark programs in the City of Cleveland and Cuyahoga County. This would provide additional resources for an already strained system of homeless care systems that runs several shelters, housing programs for 8,000-9,000 clients (confirmed unduplicated). Additional resources will help additional population (est. 15,000-18,000) and new growing populations outside of central core due to economic circumstances. | CHABAM, The Educational Playcenter | 20 | 0 to 30 days | \$700,000 |
| Cuyahoga | Karamu House restore a jewel project | Contained Energy's project objective is to deliver for demonstration an improved energy conversion method to reduce the energy burden of Army forward operating bases. The resulting product will have a theoretical energy conversion efficiency of approximately 60% (DCFC technology - 40%, SOFC - 50%, with waste heat used for pyrolysis). The initial application will have a target power range of 1-3kW. For comparison, the best alternative is roughly 25% efficient. DoD Benefits: <ul style="list-style-type: none"> Decrease the number of fuel convoys into forward operating bases (save lives). Reduce reliance on fossil fuels. Increase energy security. Reduce energy consumption on military installations in dollar terms. Note: The last 3 benefits apply locally, nationally and globally as well Ohio Benefits: <ul style="list-style-type: none"> Improve the market for Ohio's high sulfur coal. Create approximately 100 (25-30 high paying) new jobs plus an additional 150 (50 high paying) jobs created among our collaborators and Ohio vendors to support CEL activities. | The Karamu House Inc. (Performing Arts Center) | 40 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | Cuyahoga County Neighborhood Stabilization Initiati | | Cuyahoga County | 100 | 31 to 90 days | \$60,000,000 |
| Cuyahoga | Cuyahoga-Cleveland Office of Homeless Services | | Cuyahoga County | 10 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Army Applications of Direct Carbon Fuel Cells | | Contained Energy | 280 | 31 to 90 days | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Wastewater Plant Upgrade | The funds would be used to rehabilitate one of our two wastewater facilities. The upgraded plant will increase capacity and efficiency and avoid untreated bypasses directly into the environment. | City of North Royalton | 500 | 91 to 180 days | \$8,000,000 |
| Cuyahoga | Storm Water Management Improvements | The City of North Royalton is at the headwaters of three major watersheds. The funds would be used to upgrade all stormwater conveyance methods, including the addition of strategically located detention facilities. Further upgrades and capital investments in stream corridors, expanded floodplains, wetland area restoration. The investments would relieve flooding and safety hazards throughout North Royalton and the region. One such upgrade is result of runoff from the Turnpike causing flood damage in the Metroparks and private homes surrounding the area. The project would restore wetlands, create detention facility and turn over private flood plain areas in the Cleveland Metro Parks into wild life habitat. | City of North Royalton | 1750 | 91 to 180 days | \$35,000,000 |
| Cuyahoga | Telemedicine Network | Development of Telehealth network to provide mental health service in rural area and inner city areas. | Community Health Center of Ohio | 40 | 31 to 90 days | \$250,000 |
| Cuyahoga | Electronic Medical Record | Implement Electronic Medical Record to reduce cost of medical care and increase quality of care | Community Health Center of Ohio | 32 | 31 to 90 days | \$420,000 |
| Cuyahoga | Electronic Medical Record | Electronic Medical Record - infrastructure, development and implementation | Community Health Centers of Ohio | 40 | 0 to 30 days | \$450,000 |

| Cuyahoga | NEORS - Southerly Biosolids Purchase Piles Contra | This project will provide materials needed for the installation of the new incinerators and Green Energy Building. | Northeast Ohio Regional Sewer District | 100 | 31 to 90 days | \$2,500,000 |
| Cuyahoga | NEORS - Southerly Biosolids & Incin. Facility Con | This project will provide the upgrades to solids handling and steam for the Green Energy Building. | Northeast Ohio Regional Sewer District | 3660 | 181 days or more | \$91,500,000 |
| Cuyahoga | Southerly Contract 28 Green Energy Bldg. Portion | This project will provide electrical generation facilities to recover energy from the solids handling process. | Northeast Ohio Regional Sewer District | 600 | 181 days or more | \$15,000,000 |
| Cuyahoga | NEORS - CVI Lift Station Improvements | This project will provide upgrades to the lift station to increase its efficiency and reduce electrical requirements. | Northeast Ohio Regional Sewer District | 264 | 0 to 30 days | \$6,600,000 |
| Cuyahoga | NEORS - Southerly Substation Procurement | This project will improve the electrical grid at the plant. | Northeast Ohio Regional Sewer District | 560 | 181 days or more | \$14,000,000 |
| Cuyahoga | NEORS - Southerly Incineration Rehabilitation IR- | This project will provide for solids handling continuity until the new system comes on-line | Northeast Ohio Regional Sewer District | 160 | 91 to 180 days | \$4,080,000 |
| Cuyahoga | NEORS - Easterly Aeration Tank Rehabilitation ATR | This project will improve the efficiency of the aeration process | Northeast Ohio Regional Sewer District | 220 | 0 to 30 days | \$5,470,000 |
| Cuyahoga | NEORS - Easterly Substation Replacement | This project will improve the electrical grid at the plant. | Northeast Ohio Regional Sewer District | 64 | 91 to 180 days | \$1,632,000 |
| Cuyahoga | NEORS - Big Creek Interceptor Rehab. Contract BCI | This project will provide for continued use of the sewer | Northeast Ohio Regional Sewer District | 104 | 181 days or more | \$2,600,000 |
| Cuyahoga | NEORS - Rehabilitation of Automated Regulators (R | This project will upgrade the automated regulators to reduce combined sewer overflows | Northeast Ohio Regional Sewer District | 80 | 181 days or more | \$2,040,000 |
| Cuyahoga | property restoration | repair and replace flooring, windows, landscaping, electrical and plumbing, ect. | smg properties | 8 | 91 to 180 days | \$100,000 |
| Cuyahoga | NED/SEO Rural Broadband | in 43 counties to build over 1,500 route miles of fiber extending OneCommunity and its partners infrastructure to over 3,000 miles of fiber and greater than 120 wireless stations to maximize broadband access to many of the un-served and underserved areas of Northern and Southeastern Ohio. This project will extend broadband applications and service programs into rural and underserved markets to deliver valued services to many of Ohio's local government, health, education, non-profit institutions and through our private sector partners to local businesses and citizens for less. OneCommunity's FCC Rural Health Care Pilot Program has completed design and will begin construction of over 600 route miles of fiber within 90 days. The additional stimulus request will expand services in Northern and South Eastern Ohio's underserved communities. Efficiencies will be gained through aggregation, optimization and collaboration with local providers. OneCommunity's multi-provider/stakeholder vision and community ownership model has a proven t | OneCommunity | 4078 | 31 to 90 days | \$70,000,000 |
| Cuyahoga | Energy efficient lighting systems | Develop energy efficient lighting system for outdoor applications, including landscape lighting. System integrates LED technology and DC power supplies to reduce lighting load at least 75% when compared to current light sources. System will possibly employ "load shedding" technology | Kichler Lighting | 3 | 0 to 30 days | \$75,000 |
| Cuyahoga | Additional Officers/Public Safety | enforcement services. Allow for increase in community policing projects and activities, promote traffic and pedestrian safety. Increase department's role in multi-jurisdictional tactical response and bomb unit for security of region and our community. | Olmsted Falls Police Department | 3 | 91 to 180 days | \$410,000 |
| Cuyahoga | 800 Radios | Attain proper staffing for current size of community and staff proper level of patrol units per shift to increase community and officer safety. Establish a dedicated force of officers and cease reliance on part-time patrol officers who have limited available time to dedicate to department and community due to other commitments | South Euclid Police Department | 6 | 181 days or more | \$200,000 |
| Cuyahoga | Operation-Student Success | Purchase of 50 Marks hand held radios and two base radios for the police department and fire department to be in compliance with federal requirements for 800mhz radios, by 2013 | Warrensville Heights City Schools | 0 | 0 to 30 days | \$100,000 |
| Cuyahoga | Brecksville Police Station | on student needs and student performance. After the data has been assessed, teachers and administrators will look for gaps in student achievement. Students will participate in after school programs based on their needs. In addition, the funds will be used to create transition programs for students as they enter various grade levels. (i.e. from middle school to high school). There will also be a parental component so that parents are engaged in these programs. Furthermore, such programs will provide strategies to parents to cope with both academic and non-academic issues, through a series of workshops. | City of Brecksville | 100 | 181 days or more | \$8,000,000 |
| Cuyahoga | Hunting Valley 12" Water Supply Main | The current police station was erected in 1971 as part of Brecksville City Hall. At that time, our police department consisted of 12 officers and 4 dispatchers. We now have over 60 employees, officers, dispatchers, clerks, jailers. Due to revisions in the state statute, our jail facility cannot meet the Ohio Jail Standards, is not adequate for female prisoners nor juvenile holding. There is limited, if any, security for this facility and court offices. A site study and preliminary plans have been paid for and we have acquired two parcels of land in preparation of providing a site for this new facility. We provide police, court and dispatch services for the Cuyahoga Valley National Park, Erie Canal Heritage Area, Veterans Administration Hospital and Cleveland Metroparks, in addition to our fire and EMS services. | Village of Hunting Valley | 100 | 31 to 90 days | \$1,350,000 |
| Cuyahoga | | This project will consist of constructing approximately 16,200 lineal feet of 12" waterline along several roads in the Village of Hunting Valley. Includes new hydrants and valves. Waterline construction is considered along South Woodland Road, County Line Road, Fairmount Boulevard and Chagrin River Road. This project will be constructed in portions of Cuyahoga and Geauga Counties. | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Cleveland Ward 5 Weed & Seed Initiative | The Cleveland Central Weed and Seed Initiative is a strategy to "Weed" out crime and drug trafficking in our target area of the Cleveland Ward 5 Neighborhood, and then to "Seed" that area with programs for youth, families, and seniors. We have partnered with several Federal, State and local agencies, private organizations, businesses, and community groups to create a difference in the community that resides within our service area. We became an official Weed and Seed site on June 1, 2004, and our programming started in December of 2003. Our Steering Committee was awarded its first implementation grant from the Department of Justice in June of 2005. The current target area for the Ward 5 Weed & Seed Initiative cover approximately 28,000 residents in the ward 5 community that consist of three neighborhoods, Central, Garden Valley, and Kinsman Union. | Burten Bell Carr Development Inc. | 10 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Grade 13 | This intervention is needed for our male students who have little to no male interaction in the home or social environment. This project will refine the students in the following areas: grooming, attire, tutorial help in weak areas, art and music therapy which helps provide stability of emotions and computer enhancement in research, job search and/or entrepreneurial resources. This program will also require religious intervention for all. | EEP Creative Arts | 100 | 181 days or more | \$250,000 |
| Cuyahoga | Home Green Team | Trash and supervising drop outs to repair and merchandise the vacant and foreclosed housing stock with the county. Under the tutelage of carpenters, electricians, heating/plumbing instructors, properties will be rented to own farming a for profit company of skilled workers. Ultimately the trained workers forming a for profit company with share holders. Selling their service all over the state of Ohio. | You, Me and Thee Creative Resources | 100 | 181 days or more | \$500,000 |
| Cuyahoga | Home Green Team | Teaching single women or one parent families to green their home environment, which will include installing residential windmill/solar mobile unit to subsidize their heating and cooling expense throughout the state of Ohio. | You, Me and Thee Creative Resources | 100 | 181 days or more | \$500,000 |
| Cuyahoga | CNG Filling Station | Participants of this training will develop a for profit company and sell their services. A fast fill Compressed Natural Gas filling station to be built in Lyndhurst with good proximity for access to the City of South Euclid, to be used by city vehicles and our school systems in South Euclid-Lyndhurst City Schools. This facility depending on capacity will have the possibility of public access through the use of a carded system. | City of Lyndhurst | 25 | 181 days or more | \$350,000 |
| Cuyahoga | Curbs and Walkways, Affordable Housing for Seniors | road located on Mount Alverna Village property. new sections of road will be completed with existing pavement around the perimeter of the Mount Alverna campus. When complete, the road will also surround two new buildings that will offer 90 affordable senior housing apartments on State Road in Parma, Ohio. The project is part of a new capital initiative to benefit 50 low to moderate income seniors during its first year of operation, and 90-100 seniors annually when Phase II is complete. Residents will have access to health care, transportation, housekeeping, meals and personal care as tenants of Mount Alverna Village, a leader in providing skilled nursing care in southwestern Cuyahoga County since 1953. More than 10 permanent new jobs for service providers will be created in addition to the immediate benefits of providing work for the contractors, skilled laborers and others needed to build two two-story apartment buildings. Construction of the first building will start in spring, 2010. Work on curbs and walkways will begin within 90 days after funds become available. | Mount Alverna Village | 10 | 31 to 90 days | \$450,000 |
| Cuyahoga | Wireless Community | connections. It is about bringing a major college, a community college and a downtown hospital together with people of the neighborhood that includes 4,000 public housing units. It would give parents a way to communicate with teachers about school. It would give seniors a way to find out about services and community events. It would connect workers with training and jobs. It would connect citizens with City Hall. It would connect residents with housing and services. It would connect neighbors for safer streets. The project would create 12 immediate jobs installing the neighborhood network with the potential to offer other small business development opportunity to meet the need for local service, support, and network maintenance. Supporting community and economic development means using our educational and social network to promote entrepreneurship and the belief that wealth and education are central to self-determination. A wifi network, as proposed, can make a difference in the everyday lives of people who live in this vital neighborhood. | The Quadrangle, Inc. | 12 | 0 to 30 days | \$41,000 |
| Cuyahoga | Reforestation Project | Project includes the removal of 120 ash trees that are potentially infected with emerald ash borer and replanting with 240 non-host varieties to sustain and build our urban forest. | City of Bay Village | 4 | 31 to 90 days | \$105,000 |
| Cuyahoga | Senior Center Improvements | The 30-year old Dwyer Senior Center needs updating that would include ADA accessibility for the entrance, interior electrical upgrade, a soundproof room divider, carpet replacement, and exterior door replacement. | City of Bay Village | 6 | 31 to 90 days | \$39,000 |
| Cuyahoga | Broadway Widening | the Maple Heights Corp. limit. Included in this project is widening the 1 mile roadway section from its current 4 lane section to 5 lanes, with additional turn lanes, resurfacing the road, and replacing the storm sewers. | City of Garfield Heights | 100 | 181 days or more | \$1,000,000 |
| Cuyahoga | Historic City Hall preservation and reconstruction | 3500 SY of concrete pavement 1200 CY of asphalt 4000 FT of new storm sewer 2 new signals New concrete sidewalk | City of Bay Village | 150 | 31 to 90 days | \$4,697,921 |
| Cuyahoga | Guard1 Plus -- Documenting Cell Checks / Suicide W | Preservation of the exterior of the 1914 Beaux-Arts section of City Hall that has been carefully maintained but in need of tuck pointing. Additions were added in 1962, 1972, 1976, and 1983 without the benefit of an architect or structural engineer causing increasing HVAC, roof, electrical, and storm sewer drainage problems that are impossible to correct without demolition of interior, load-bearing walls. Certain areas of City Hall suffer from persistent black mold growth and are unusable. Project would consist of preservation of the 1914 building, demolition of the 4 additions, construction of a new 18,000sq ft addition with ADA accessibility, security, and energy efficiency. | TimeKeeping Systems, Inc. | 5 | 0 to 30 days | \$500,000 |
| Cuyahoga | Berea District 7 Schoolhouse | Guard1 Enterprise is a next-generation system for use in correctional and other guarding applications. Features include: • Real-time documentation of cell checks and suicide watches in correctional facilities • Enterprise-level scalability to support state Departments of Correction • Real-time data collection with wirelessly rugged handheld readers • Documentation of offender activities • JMS (jail management system) integration | The Berea Little Red School House Foundation, Inc. | 6 | 0 to 30 days | \$45,772 |
| Cuyahoga | | TimeKeeping Systems is seeking funding to enable continuation of this ongoing development project. We are an Ohio employer since 1980, designated Ohio Historical Society landmark, and on the National Register of Historic Places is the basis for this application. This request will complete the last stage of extensive repairs to the original slate roof currently in progress. Work on this final stage of roof repairs include: 1) to install ice/moisture guard on the roof perimeter and replace broken or deteriorated original slate shingles. 2) replace existing ridge roll on ridge & hip with new galvanized ridge roll. 3) replace gable return in hand-soldered, paint grip galvanized metal. 4) replace flat roof on cupola in hand-soldered flat-lock lead coated copper. This one-room, brick schoolhouse is the only one of ten original structures left standing and occupied. The proposed project, begun 3 years ago with community funds and matching grants, will serve to preserve and rehabilitate the building and site currently used as a community art center. The schoolhouse is located on the main east/west thoroughfare of Cleveland's south suburb at the boundary line of our city limits, the gateway to our community from the east | | | | |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Guard1 Plus -- Offender/Inmate Tracking | Guard1 Enterprise is a next-generation system for use in correctional and other guarding applications. We are seeking funding to implement the additional capability of tracking offenders or inmates within adult and juvenile correctional facilities. Project objectives: • Development of RFID (radio frequency ID) tracking technology • Data acquisition and processing • Reporting and notification of offender location | TimeKeeping Systems, Inc. | 5 | 31 to 90 days | \$500,000 |
| Cuyahoga | 2009 ART | We are an Ohio employer since 1980. We have been mentally challenged. So much was cut from our budget, we had to cut classes that are desperately needed. We offer art classes by going to the centers, bring all the materials, and make the project with the students. We offer hands-on painting, card-making, dance, picture framing, and many other types of art. Our students are all ages, races, nationalities and religious affiliations. With this money, we can keep 10 instructors teaching for 1 year. This will also pay for the free art supplies we provide. Please help us to help others. This money is truly needed for the under-privileged and mentally challenged who otherwise would not have any type of art instruction. Rent is always due, and we would like any type of help with that if possible. \$12,000.00 would cover us for 1 year. Please visit the website to find out who we really are and how we have helped thousands throughout the years. I am begging for funds so we can continue being angels to others. | ART ON WHEELS | 10 | 0 to 30 days | \$22,000 |
| Cuyahoga | New Job Initiative Training and Development Progra | This program is designed specifically to work with individuals who are looking for opportunities to enter the workforce, learn updated tools and skills for interviewing, apply these skills to existing jobs and help create a network of individuals to mentor, partner and host stimulation of newly created jobs in the future. The company would help those who are looking for a career position and would like to stay in the greater Cleveland area. The goal of this program is create a pool of candidates for upcoming stimulus related job openings. This will require those needs with renewed and updated resumes for quality candidates. The need for retention of an educated and skilled workforce is essential to develop and grow the greater Cleveland area. The understanding of the individual combined with the community would create an area for mutual benefit for both parties during this time. A NEW OPPORTUNITY. | LSRCS-A human resources and recruitment services c | 1000 | 0 to 30 days | \$250,000 |
| Cuyahoga | Bizy B's for Seniors | One - a Senior Consulting Service for the elderly citizens who live in independent and assisted living facilities. In addition, a back office support system that enables new entrepreneurs the means to develop and grow their own business. Servicing the elderly while teaching, and empowering others to become grow their business by providing for them the HR services and payroll liabilities and support needed. Expected support of over 5500 seniors in Cuyahoga with the possibility of 40- 50 new entrepreneurs. | Bizy B's | 50 | 0 to 30 days | \$100,000 |
| Cuyahoga | Community Adult Mentoring Program | The Community Adult Mentoring Program is an after-school drug prevention program which provides Asian American and Pacific Islander immigrants and refugees tutoring and mentoring, activities with adults and peers in a drug-free environment, and alcohol, tobacco, and other drug prevention education. It also provides parent education and problem identification and referral services for students who have displayed "red flag" behaviors. Milestones for the program include improvement in grades; knowledge/behavior change in life skills, drug refusal skills, and bullying/violence; and parent knowledge/behavior change. The program currently serves 70-80 youth in grades K through 12, of Chinese, Bhutanese, Nepalese, Burmese, and Karen populations in Northeast Ohio. We would like to use the stimulus funds to continue to provide services throughout the summer or school year for the low-income refugee youth on the westside of Cuyahoga County. | Asian Services in Action, Inc. | 0 | 0 to 30 days | \$10,000 |
| Cuyahoga | The Lantern Project | The Lantern Project is a service learning project for Asian American and Pacific Islander students in grades 8 - 12. Through this project, students identify their community's priority concerns and create and implement service projects to address these concerns. The components of the program include creating/implementing a service project; one-to-one mentoring of the youth from college students or recent graduates; capacity-building activities (e.g., financial literacy courses, etc.); and tutoring. Expected outcomes include numbers of student-mentor pairs; completion of process evaluations for project implementation; and numbers of students participating | Asian Services in Action, Inc. | 0 | 0 to 30 days | \$10,000 |
| Cuyahoga | Count Me Smart: Teaching K-3 Arithmetic | Seventy percent of urban school population arrives with an abysmal level of arithmetic fluency. These students do not benefit from the standard math curriculum. They require a revolutionary, common sense approach: 1. during grades K-3, focus solely on arithmetic proficiency. 2. teach number sense, addition, subtraction, multiplication and division. 3. insist that problems are solved quickly and correctly. Count Me Smart is such a "curriculum." It was developed with the help of an SBIR grant, Empowerment Zone funding and Microsoft. The concept is based upon teaching methods of a successful special education teacher and on-line technology. The computer generates on-screen flashcards, paper flashcards, and worksheets designed for each individual student, tracks performance and randomly retests problem areas. Count Me Smart is the student's dedicated math tutor, accessible 24/7 on the internet. Count Me Smart was implemented at CMSD Case Elementary School. In the first year, the 2nd grade pass rate tripled for math and science proficiency. | Acme Express, Inc. | 50 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Moving the Visually Disabled to Employment | Cleveland Sight Center has launched an innovative vocational training program, Moving the Visually Disabled to Employment, which includes a state-of-the-art call center. This project will create technology driven, competitive employment opportunities, allowing visually disabled Ohioans to find and retain employment in the expanding customer service industry. The agency's business plan projects that in Year Five the call center will become fiscally self-sustaining, and create 72 new jobs in the customer service industry, the vast majority of which will be filled by the visually disabled, a population who experiences a 70% un/underemployment rate. By adding this population in becoming employed, the program will save the federal and state governments \$2,200,000 in public support over the next five year by employing a population that historically relies on entitlement programs. Therefore, savings will continue at nearly \$900,000. Through job creation, Ohio's economic output can increase by \$15,200,000 over the next five years, and \$4,800,000 thereafter. The increase in federal income as a result of FICA and income tax receipts is \$3,500,000 over the next five years and \$1,200,000 thereafter. For the State of Ohio. | Cleveland Society for the Blind, dba Cleveland Sig | 72 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Project Re-Hire | Bring back 5 police officers currently laid off, which accounts for 25% of the sworn officers on a 22 officer department. This figure represents the cost for 3 years | Richmond Heights Police Department | 5 | 91 to 180 days | \$1,950,000 |
| Cuyahoga | foreclosed and vacant houses | This funding will be used in the rehabilitation and/or demolition of purchased hud houses. We will be bringing these houses up to code with routine inspections or installing green space in their place if demolished. These houses will then be put back on the market or rented out for the necessary amount of time. We expect an outcome of properties being brought to their full potential and being sell-ready, or making the neighborhoods a little more beautiful with some well manicured green space or community gardens. We believe there will be no problems with finding the necessary people to make this vision come to life. | City of University Heights | 8 | 0 to 30 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | a job near home | <p>a Unique Online "TREEN": Tool For Regional Employment and Economic Networking that allows jobs and people and organizations to find each other in North East Ohio. It emphasizes employment, economic networking, education and sharing of information that can help anyone find gainful employment, especially those who do not have employment or the tools to find it.</p> <p>No other tool in the entire world is as complete nor unique as A Job Near Home.com as it combines a job board with social/ business networking, job search education and instructive videos all on one site.</p> <p>It is specifically for North East Ohio, a region lacking this type of tool and in need of a way to effectively grow our region's economy and employment.</p> <p>The region employs 1,700,000 people.</p> | a job near home, inc | 10,000 | 0 to 30 days | \$500,000 |
| Cuyahoga | Richmond Road (OH-175) All Purpose Trail | The one-mile stretch of Richmond Road (OH-175), south of Miles Road is a four-lane road that narrows down to a two-lane road near the Bedford Heights / Salon corporate line. This area of Richmond Road and the intersecting Fargo Road is home to approximately 90 businesses, that employ over 2,500 people. Most businesses are manufacturers or distributors. Manufacturers in the area include Sherwin Williams, Olympic Steel and Cardinal Fastener. Distributors in the area include a Home Shopping Network warehouse, Erico and Seaway Foods, which supplies all of the Giant Eagle Food Stores in northeast Ohio. Seaway Foods / Giant Eagle literally have hundreds of trucks driving to and from the facility everyday. According to a traffic study conducted in the spring of 2005, there is an average of 425 semi-trucks and cars traveling this section of Richmond Road (OH-175) per hour! | City of Bedford Heights | 2,500 | 91 to 180 days | \$400,000 |
| Cuyahoga | Fire Station | The City of Beachwood, Response district for this project includes an interstate, numerous hotels, 20 nursing homes, hundreds of commercial properties, several world headquarters, a hospital under construction (opening 2010) and is in close proximity to a community college campus. The station would include an emergency operations center/field operations center. Currently there is no EOC or field ops center located on the eastern side of Cuyahoga County. The secured facility would also provide operations to Lake, Geauga, Summit and the rest of Cuyahoga County. Location considerations include the relative height of the location as compared to the surrounding landscape, ease of access to the counties through the interstate system which include I-77, I-271, I-480, I-90, I-80, an established telecommunications system already in place, additionally the facility is in close proximity to the City of Cleveland metropolitan area. The site is also in close proximity to support services if needed. This will be available to all surrounding communities and counties, FEMA and the Ohio. | City of Beachwood Fire Department | 100 | 91 to 180 days | \$6,000,000 |
| Cuyahoga | Champion | By continuing to develop our unique staffing and collaborative services offerings, we employ over a yearly basis over 4,000 people who affect over 10,000 people in their families in a positive and gainful way. We keep people from poverty, pay local taxes and federal taxes and advance the opportunities for people who are unemployed or underemployed. We have trained OVER 100,000 people in the principles of Drug Free Workplace Environments being the State's ONLY Drug Free Staffing Service Level II Certified by the Ohio Bureau Of Workers' Compensation. Through a sister company, we also provide Drug Free Workplace training, testing, program design and facilitation services. Our service helps get people employed, stay drug free, increases the safety of work environments and can not only be of service to any company or person, we can be of exceptional service to those companies who will be re-building the infrastructure of North East Ohio, taking much of the burden of what we do away from them and the government | Champion Personnel System, Inc | 10,000 | 0 to 30 days | \$500,000 |
| Cuyahoga | Rehire laid off safety forces | increased police patrols, enhanced public safety, increased response times for 911 calls for police or fire emergencies, increased response times for EMS calls, improved service for medical 911 calls, increased number of responses to calls for service. Assuage fears of city residents who are concerned that the reduction in force of police officers and fire fighters will result in higher crime rates, lower quality of life, and reduced home values. | City of North Olmsted | 10 | 0 to 30 days | \$800,000 |
| Cuyahoga | Program for the Frail, Indigent Elderly | The Mandel JCC requests funding for programs for the indigent, frail elderly we serve. The Mandel JCC has experienced a decrease in major sources of funding for programming for the frail elderly, even while our programs and services are more in demand due to the aging of our population and the current economic crisis. | The Mandel Jewish Community Center of Cleveland | 10 | 91 to 180 days | \$100,000 |
| Cuyahoga | Remediation of Colsed Mercomp Landfill | Without funding, our socialization programs that serve our 300 unduplicated frail elderly adults each year are at risk. More than 100 seniors are transported by vans to our daily socialization programs and participate in our lunch program, often their main meal of the day. In addition, we provide health related services including blood pressure screening, consultation with pharmacists, group exercise classes and lectures on health related topics focused on helping to maintain an independent lifestyle for seniors who would otherwise gravitate toward more costly institutionalized care. | Ohio EPA, DSIWM, Contacting & Remediation Oversight | 10 | 31 to 90 days | \$450,000 |
| Cuyahoga | Soldiers and Sailors' Monument | The funding would be used to help underwrite the cost of transportation to our programs as well as the daily lunch. Without these funds our Remediation of uncontrolled dangerous off-site migration of methane gases and leachate from an orphaned closed landfill. Seek 90% stimulus funding to match 10% state environmental protection 281 funds. | Soldiers' and Sailors' Monument Support Group | 12 | 0 to 30 days | \$401,809 |
| Cuyahoga | Affirmatively Furthering Fair Housing Project | Bricks and mortar work to finish Monument rehabilitation, including color decorating the interior as it was originally, including the costs to re-dedicate the Monument on July 4,2010 as the last event in Cuyahoga County bicentennial and as the first event in the Sesqui-Centennial of the beginning of the American Civil War, the cost of obtaining National Landmark status for the Monument and the related costs of publications and events to help re-vitalize Cleveland's Public Square on that day. Given President Obama's interest in Lincoln and the Civil War and the fact that "broken shackles" will be restored in the Monument's Great Emancipation Relief and if the U.S. Senators, Congressman, Governor, Lt. Governor, Ohio's Legislative leaders from throughout the State attend, it is hoped that as many as 100,000 people might attend the event at Cleveland's Public Square with bands, parades, yacht races, etc. and to top it off, a Cleveland Orchestra Concert that evening. | Heights Community Congress | 10 | 31 to 90 days | \$250,000 |
| | | Heights Community Congress will provide its fair housing consulting and direct services to assist in ensuring that federally funded housing projects are affirmatively furthering fair housing (AFFH). The National Commission on Fair Housing and Equal Opportunity report calls for a new regulation with sanctions for failing to affirmatively further fair housing. In addition, the report recommends stronger enforcement of the AFFH obligation and new initiatives to make the obligation a reality. All programs related to housing will require an AFFH program, Section 3 compliance and overall fair housing plans. Heights Community Congress proposes to review program compliance and provide fair housing education and enforcement services, where needed. | | | | |
| | | Expected Outcomes: 30-45% increase of fair housing compliance among new construction and existing housing projects that will ultimately benefit persons with disabilities, families with children and all other protected classes. | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Clague Road Rehabilitation and Water Main Replacement | Clague Road is over 75 years old with out any major improvements. This project will reconstruct Clague Road(CR-52) from Detroit Rd(SR-254) to Center Ridge Rd(SR-20). The project includes the replacement of a 75 year old 12" water main and the installation of new storm sewers and culverts. The existing infrastructure is in poor condition and failing. The roadway culvert have load restriction on them to prevent them from collapsing. The watermain is so old it fails to provide enough water to meet the demand for fire fighting purposes. And has a break rate well above the system average. The storm sewer have collapsed several areas and fails to handle the storm water creating flooding. The Roadway has to be closed down during heavy rain events causes safety issue to the motoring public and disourting residents. These required improvements will ensure safety throughout the corridor for the entire community. | City of Westlake | 100 | 31 to 90 days | \$4,000,000 |
| Cuyahoga | Employment and Training | such as healthcare, manufacturing, construction (traditional and green) and technology. In addition, participants will receive a subsidized wage in order to help him/her gain valuable work experience. Most participants will be placed at a site that will give hiring consideration upon completion of the program. Finally, participants will be placed in a job. We anticipate 250 will be trained and 215 individuals (85%) will be placed in a job. This money will not only be used to train individuals, but to also put them back to work for atleast six months while they gain experience, if they do not have relevant work experience, and finally into permanent work. We will collaborate with local community colleges, local workforce investment board, employers and trades organizations to ensure participants are receiving appropriate training for jobs that require skilled individuals. We are currently running a similar program and managed several others in the past with good success. We can begin implementing this program immediately with existing staff. | Catholic Charities Community Services | 250 | 0 to 30 days | \$3,300,000 |
| Cuyahoga | Street Crimes OT | We will use the funding for officers in our Street Crime Unit. These officers will be able to work overtime along with supporting officers to combat the high drug trafficking areas in our city. We have an extremely high crime rate due to drug sales/ & drug use. The majority of our crime is related and directly linked to drug trafficking. In the past year with assistance from the JAG grant we have been able to make a significant turn in the crime rate due to the extra hours and manpower from the funding. We would also buy some equipment to assist with surveillance, and communications. We will be able to cover many of the hot spots in our city and monitor the businesses that are the most trouble. This extra visibility reduces the number of individuals who prey on our community. The extra funding for overtime allows officers to complete cases and investigations along with the ability to perform street sweeps and curfew sweeps on a regular basis. It will also allow us the ability to keep pressure on the areas daily which has been a problem in the past. | East Cleveland Police Department | 0 | 0 to 30 days | \$100,000 |
| Cuyahoga | Cops Extra | The officers would be responsible for creating street clubs, & community sectors leaders who would be responsible for areas in the city that they become the direct contact between the citizens and the officer assigned to the sector. Officers will also be able to engage in special units etc: Bike patrol, Motorcycle Unit and Beat patrol. These units have been very successful in our community in the past they give us a closer contact with the citizens and allow us to reach areas that we cant get to in regular patrol. The continued contact with the citizens close the gap and lack of trust that has developed over the years in the community. Community policing is so important in East Cleveland that we have continued to operate the COP officers out of our regular budget after previous grant money ran out. Our citizens, especially the seniors and the youth have benefited most with the programs and events we have organized. It would be the biggest step backward we could possibly take if we lose the officers in this unit. It would also be the best thing for us if we continue to grow | East Cleveland Police Department | 8 | 0 to 30 days | \$350,000 |
| Cuyahoga | West 84th Rehabilitation | replacement of leaking roof on apartment building, and streetscape improvements for the beautification of our corner lot in an area of new investment and construction | Runyan and Brent Development LLC | 2 | 0 to 30 days | \$47,000 |
| Cuyahoga | Watermain Replacement Program | Replace 3 miles of deteriorated water main with new ductile iron. | City of Lakewood, Department of Public Works | 40 | 31 to 90 days | \$6,000,000 |
| Cuyahoga | Street Repair Program | Resurface approximately 39.5 miles of deteriorated roadway. | City of Lakewood, Department of Public Works | 48 | 0 to 30 days | \$12,000,000 |
| Cuyahoga | Detroit Avenue Public Right-of-Way Improvement Pro | This project will implement public right-of-way improvements along Detroit Avenue between Warren and Belle Avenues in Lakewood, Ohio. Improvements include: reconstruction of roadway and curbs; road striping and signage; stamped-concrete crosswalks; reconstruction of sidewalks, driveway aprons and curb ramps; traffic signalization; and burial of utilities. | City of Lakewood, Department of Planning and Devel | 35 | 31 to 90 days | \$8,000,000 |
| Cuyahoga | Wastewater Treatment Plant Class "A" Sludge Projec | Create a more environmentally responsible sludge. | City of Lakewood, Department of Public Works | 25 | 91 to 180 days | \$1,500,000 |
| Cuyahoga | Interceptor Sewer Cleaning and Inspection | Internal video inspection and solids removal of 2.8 miles of sewer | City of Lakewood, Department of Public Works | 20 | 31 to 90 days | \$2,850,000 |
| Cuyahoga | Restoration Historic Township Hall | Repoint, repair historic 1847 brick exterior Rehabilitate 1847 sandstone steps, 3 entrances Rehabilitate 1847 sandstone foundation install water removal system away from foundation install 12 new historically approved storm windows restore, repair 12 windows install new HVAC system refurbish electric service, bring into code refurbish restrooms install new ADA access to building rehabilitate acoustics install storage units construct new water and electric stations for public food service use upgrade lighting | Chagrin Falls Township | 30 | 91 to 180 days | \$500,000 |
| Cuyahoga | Columbia Drive Reconstruction | Drive consist of approximately 65 single family homes located within walking distance of Columbus Intermediate School. The street lacks a storm sewer system for its entire length. The lack of an improved drainage system poses a health hazard with today's issues of standing water, promoting the breeding of mosquitoes and the threat of West Nile virus. The flooding problem is continuous, affects the entire area and is severe. This project includes the installation of new drainage, pavement, sidewalks and traffic control. Drainage work includes new catch basins, manholes and sewer pipe. The existing ditches will be filled. The new pavement will be curbed and include a sidewalk adjacent to roadway. Driveway aprons will be replaced. | City of Bedford Heights | 75 | 0 to 30 days | \$1,400,000 |
| Cuyahoga | Ford Motor Company (Cleveland Institute of Art) | Rehabilitation of existing school housed in historic factory building, with new addition. | Sandvick Architects, Inc. | 30 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Central Park, a large centralized park for the cit | conservation, becoming LEED certified by the US Green Building Council, and maximizing property values of all surrounding property. Monies would be utilized to buy up existing blighted properties, complete working drawings, installation, and maintenance. Legwork on the project has already been initiated, meeting with local developers in the area, other non profits, and the city. Maps with property ownership and identification of site have been completed. As an award winning Landscape Architect, I will donate my design services for this project because of my belief in its promise for Cleveland. As a board member of the Cleveland Botanical Garden, I would ask all monies be accounted for by this organization. This would ensure the soundness of all decisions and maximize the demonstration of sound environmental properties and education benefit to be displayed throughout this future beautiful gem in the City of Cleveland. I would also alot some of the funds toward the maintenance of this park to ensure its future success and perpetuity | O'Neill Landscape Design and Installation | 55 | 31 to 90 days | \$26,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Stephanie Tubbs Jones Tri-City Regional Recreation | and Workforce Development Center operated by the YMCA of Greater Cleveland to serve the 50,000 residents in the cities of South Euclid, University Heights and Richmond Heights as well as other surrounding communities and neighborhoods. The new 58,000 square foot facility will be located on the current site of the Hillcrest Family YMCA built in 1956. The new building will include a Wellness Center, Gymnasium, Child Care Center, Natatoriums, Computer Lab, Locker Rooms and Administrative Offices. Also, the YMCA will house a Work Force Development Program focused on training and retraining residents with current marketable skill. Funding for the project will be secured through a Capital Campaign raising dollars from individuals and corporations, grants and in-kind contributions. This project will be the first multi-city regional recreation and wellness center for Cuyahoga County and the state of Ohio. This project is also the first non partisan partnership between three cities (South Euclid, University Heights and Richmond Heights) and the YMCA of Greater Cleveland. | YMCA of Greater Cleveland | 100 | 181 days or more | \$3,000,000 |
| Cuyahoga | Green Restoration of African American Museum | Ohio and significant in serving the entire Northeast section of Ohio. The Museum has never been adequately funded and only survived on a shoe string budget with two or three staff members to manage it. As a consequence, this jewel of an institution fall into disrepair and eventually closed its doors to the public. It has been closed since 2007, abandoned and in need of restoration and repairs. An entire new Board of Trustees and Executive Director has been put into place to manage and bring this valuable institution back with Green Sustainability restoration to serve all of the people in the State of Ohio and to also serve as a Green Technology Innovation Educational Center. The significance of the history of the African American people in the development of these United States of America cannot be negated. It is important to continue to educate the public and children to teach them the importance of knowing, understanding, and teaching not only African American history, but also American history. This valuable institution should not be ignored and deserves assistance to be re-opened. Hire police officers to return to full authorized manpower. If additional funding is available, hire an additional police officer. Population has increased in the city over the last ten years and the police department has not kept pace with the population increase | African American Museum | 5 | 0 to 30 days | \$500,000 |
| Cuyahoga | Employment | Rehabilitation of historic vacant office building for housing and retail along the Euclid corridor. | Broadview Heights Police Department | 2 | 91 to 180 days | \$200,000 |
| Cuyahoga | John Hartness Brown Building | Reconstruction of the dam of a 5.2 acre lake and storm water retention basin. Reconstruction is necessary to comply with re-classification by Ohio Dept. of Natural Resources to Class one. Absence of the project will result in demolition of the dam and draining of the lake. Outcome of the project will be the preservation of a facility that provides 20.5 acre feet of stormwater retention. Absence of the stormwater retention will result in the endangerment of downstream properties and residents. Also, Ohio State Route 91 will be subject to inundation and erosion during major storm events. | Sandvick Architects, Inc. | 39 | 181 days or more | \$7,000,000 |
| Cuyahoga | Briar Lake Dam Reconstruction Project | New Landscaping in an area adjacent to Lakewood Park. This project consists of the preparation of GIS mapping for the City of Bedford Heights, Ohio. Geographic Information System software will be utilized to prepare an inventory of the infrastructure of the City. The inventory will include the storm sewer system, the sanitary sewer system, water supply system, traffic signal locations and type, traffic signing, gas lines, electric lines, cable television lines, telephone facilities, streams, creeks and ponds. | Briar Hill Homeowners Association | 10 | 181 days or more | \$1,500,000 |
| Cuyahoga | Landscaping | The information and mapping will be integrated into a system that will be available to all city departments. It is anticipated that the Service Director and Water Reclamation Director will use the system to track necessary repairs, upgrades and billing. The Building Department will use the information to monitor construction activity on residential and commercial property. Most importantly, the information will be used by the City Fire and Police Departments as a tool for emergency preparedness. The Fire Department will have access to all components of the water | Lakewood Development Group | 2 | 0 to 30 days | \$7,000 |
| Cuyahoga | Bedford Heights GIS/Emergency Preparedness | Alternative approach to inpatient healthcare to promote optimal healing and faster recovery times for any status post patient with any illness or disease. Hopefully reducing hospital cost and billable insurance and medical coverage cost. Conventional and non-conventional approaches to healthcare to heal the body, mind and spirit in home-like settings that offer specialized care and management of each individual patient as a person. Locations proposed for several abandoned and boarded up houses and/or small buildings in the inner city near several highly respected hospitals. Also hoping to create 25-45 jobs to include rehab and construction of abandoned sites and all types of people in the healthcare and unrelated fields, (maintenance, clerical, kitchen, housekeeping, etc./...) primary goals are to offer ways to receive the best healthcare in a more cost effective and personalized way and to create jobs in a working environment that promotes customer service and satisfaction at all times, and to find a way to occupy some of the MANY abandoned sites in the city of Cleveland. The Brecksville Road Rd. 21, Hilton & Whitewood Rds. Se | City of Bedford Heights | 10 | 0 to 30 days | \$100,000 |
| Cuyahoga | Dynamic Healthcare in a Changing society | The system will allow patients to access their medical information and grant access to doctors, insurers and government agencies. The system will save millions in overpayments and expenses, as well as streamline healthcare for its participants. This system is designed for children, families, seniors and individuals. For a detailed project description, please contact R.L. Weakley at 216-323-3733 | House Of Healing, LLC | 45 | 31 to 90 days | \$25,000 |
| Cuyahoga | MedBook/MedCard | The Brecksville Road Rd. 21, Hilton & Whitewood Rds. Se sewer project cost: the residents thousands of dollars and has created numerous hardships. The residents need assistance in paying their assessment costs. The average cost per homeowner was \$10,000 and the residents additional cost for tie-in, installation and removal of septic systems was an additional hardship. A number of homes could be in jeopardy with the assessment fees attached to their tax bill. Appreciate your consideration. | Phenomenon Media | 1,000 | 181 days or more | \$10,000,000 |
| Cuyahoga | Brecksville Rd. Rt. 21, Hilton & Whitewood Rds. Se | The project is an energy saving project. The needed areas are the windows, doors and heating systems. There will be a total of 75 windows, 2 roofs, and one heating system. The windows will be high efficiency energy conserving thermal windows. The roofs are on two buildings. There will be approximately 3000 linear feet of roofing needed for this portion of the project. The boiler system will be an up-to-date energy efficient heating system that will not defeat the purpose of the other energy conserving projects listed. | City of Brecksville Residents | 125 | 0 to 30 days | \$500,000 |
| Cuyahoga | Energy and Environment Recovery | this project will create approximately twenty-five to thirty jobs. This project consists of the installation of a pedestrian trail on the east side of Richmond Road from Miles Road to the eastern city limits, a very important business section in the City of Bedford Heights. | 4608 PLACE Home for Disabled | 20 | 0 to 30 days | \$52,000 |
| Cuyahoga | Richmond Road Pedestrian Trail | This project will serve the many commercial properties on Richmond Road, Hill Road and Fargo Avenue. Many employees of the area businesses rely on public transportation to go to and from work. Currently, there are no sidewalks or pedestrian pathways along the route, forcing the commuters to walk in the street or through various parking lots. Business owners have been very vocal about the need to have a safe way for their employees to get to work. The business owners want to provide a safe work environment. The City considers a safe commute as part of a safe work place. The asphalt path will be 6,000 feet long and ten feet wide. Crosswalks will be installed at strategic areas to allow commuters access to the path from bus routes. Drainage improvements will be made along the route to insure that pedestrians using the path can commute without the risk of | City of Bedford Heights | 75 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Patient assistance project | and can assist all patients (consumers) to fill out any and all paperwork for pharmaceutical companies access directives for obtaining free or low cost medications. The project includes putting a dedicated computer into each health district office, utilizing a present personnel from each district to log the consumers into a database, contacting each pharmaceutical company participating in a patient assisting medication program. Most pts can not do this paperwork in order to receive free medications and physicians' offices do not have the time to do it for the pts. This will insure an increase in pts who need medications and compliance with taking medications, increasing pts' health and wellbeing. The personnel needed for this would be an LPN or MA, or secretary with medical terminology experience only, at the cost of around \$25,000 a yr for each. The initial time involved would be setting up the databases for the consumers and the companies. | Cleveland Clinic | 88 | 91 to 180 days | \$2,112,000 |
| Cuyahoga | The Avenue District: Parking Deck | The Avenue District is a 300 unit planned residential and mixed use community in Downtown Cleveland. Phase 1 of the project is currently complete and including 82 new market rate residential units and 7,000 square feet of retail space. This request is for funding to construct the underground parking deck and green roof necessary to support the additional phases of residential and commercial construction, as well as to fulfill commitments to the current residents of Phase 1. Development costs associated with this garage include the relocation of public utilities to make the site development ready, site preparation to remediate a greyfield, and the disposal of unsuitable soils. The green roof provides over 1 acre of park space and semi-permeable ground cover in a dense urban neighborhood. | Zaremba | 125 | 31 to 90 days | \$6,000,000 |
| Cuyahoga | Solon Road Resurfacing | Solon Road serves as a major east/west route through the City of Bedford Heights. The roadway allows access to Oakwood and Solon to the east and Bedford to the west. It serves the population of those cities and industrial and commercial users who have businesses on and adjacent to the route. The commercial users generate much truck traffic, making the need for a strong pavement structure obvious. The pavement surface is in poor condition. The damaged pavement allows water to enter the subsurface and further destroy the pavement. The project is 4,000 feet long and consists of the repair and resurfacing of the deteriorated asphalt pavement. Drainage will be improved by replacing deteriorating curbs and piping. | City of Bedford Heights | 100 | 31 to 90 days | \$450,000 |
| Cuyahoga | Home Again Restoration Company | The Home Again Restoration Company aims to work with Greater Cleveland and assist a first generation community to perform first class renovations on homes in foreclosure and provide a path to home ownership for residents' intent on repairing their credit, working with counselors, and maintaining the home in a responsible manner. This program's goals are to acquire between 50 and 100 homes, renovate them with a builder quality approach, and work with community development organizations to provide a path to ownership through lease/purchase agreements. The program encourages responsible homeownership, removes neighborhood blight, and leverages further private investment into critical neighborhoods. | Zaremba | 25 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Sunshine Cloak Co. / M.T. Silver Building | Rehabilitation of historic vacant industrial building for office and live-work space. We are a 100 year old civil engineering firm that specializes in municipal engineering. We currently represent 5 communities in the Cleveland Ohio area as Municipal Engineer. We have 2600 square feet of Warehouse Space that contains a massive amount of Paper records related to the infrastructure in the communities that we represent. We desire to scan, catalogue and document all the of the public information so as to make it more usable by our clients and reduce the reliance on paper. | Sandvick Architects, Inc. | 151 | 181 days or more | \$750,000 |
| Cuyahoga | Scanning of Public Records / Infrastructure Plans | Empowerment Zone in the City of Cleveland, Ohio. The organization aims to be a resource for residents of the Ward 6 community and ALL residents of the City of Cleveland whose purpose is to improve the quality of life through the development, planning and implementation of social programs, ie: Male Mentoring, Academics (GED) for drop outs / illiteracy, and remediation, Ex-Offender issues and recidivism, teen preg. issues, After school programs for youths, job training, ie: Green Technology and Sustainability, Construction trades training and development of computer skills. The CBC also aims to establish community development as it pertains to affordable housing and financial literacy for educational purposes. The requested funding would support the purchase of a building within the Ward 6 community to implement services, establish program start up, hire staff, and operating expenses. A resource center for a low income impoverished community to help sustain and improve the quality of life for the residents. | The CW Courtney Company | 2 | 0 to 30 days | \$125,000 |
| Cuyahoga | Community Solutions | This funding will allow us to continue the City of Cleveland's Lead Abatement Program, while abating lead hazards in 500 additional residences located in neighborhoods at high-risk for lead poisoning | Coalition for a Better Community | 5 | 31 to 90 days | \$1,000,000,000 |
| Cuyahoga | Lead Poisoning Abatement Program | This program will allow for increased services to sexually active youth (ages13-14) to treat for known std cases, identify new undiagnosed cases and provide risk reduction counseling so that reinfection does not occur. This project will be focused at health clinics located on the West Side of Cleveland. | City of Cleveland, Office of the Mayor | 4 | 31 to 90 days | \$6,500,000 |
| Cuyahoga | Youth STD Counselor-Westside Region | Money would be used for getting all new equipment for our boxing gym which children eight years of age come all the way up to retires. We try and keep the children of the streets and out of trouble and to focus on school, we also make sure the kids finish all homework before they are aloud to participate. It would be a great thing for this project to come together thank you Money to start an online news organization headquartered in Cleveland, OH. Money needed for equipment (Cameras,Studio,Broadcast equipment,video switchers, etc.) This funding will allow LWRM to continue planning for natural, man made and bioterrorist events and strengthen our ability to respond to food and shelter needs in an emergency. Funding this project would identify mass care facilities and shelters, assess identified sites, create protocols for providing food in an emergency and recruit volunteers to staff these mass shelter sites in an emergency. | City of Cleveland, Office of the Mayor | 1 | 91 to 180 days | \$75,000 |
| Cuyahoga | New Equipment | Pay off my mortgage. I'm a 63 year old retired Vietnam Veteran. I've always paid my taxes, voted for school, library and other community levies. I would just like to have a few dollars a month more to help in my remaining years on this earth by having my mortgage paid. | Cuyahoga | Mentoring At-Risk Youth in Cuyahoga County | Mentoring programs, particularly those in socio-economically depressed times and in poverty-stricken areas are essential to the development of healthy and productive youth. In the City of Cleveland more than one-quarter of our youth are being raised in homes at or below poverty, and more than 16% of youth between the ages of 16 and 19 are neither in school or working (idle youth). One of the most salient and influential factors in their lives is missing - a role model. Big Brothers Big Sisters of Greater Cleveland has addressed this deleterious dilemma by matching at-risk youth with a caring adult in a one-to-one mentoring relationship. Each match that is made potentially detracts from criminal activity, truancy, violence, teen pregnancy and withdrawal from high school. The cost per match is \$1,000 and we are hereby requesting the support of in the amount of \$100,000 to support efforts to make 100 matches. | Big Brothers Big Sisters of Greater Cleveland | 2 | 0 to 30 days | \$100,000 |
| Cuyahoga | Ohio Law Enforcement Training via mass communicati | The Ohio Patrolman's Benevolent Association (OPBA- also has a nonprofit designation) which is the local arm of the National Police Organization (NPO), has 8000 members in Ohio alone and over 150,000 police officer members nationwide. Due to fiscal cutbacks in police training, travel etc. the OPBA will sponsor a radio show originating from northern Ohio, but streamed nationwide. The topics will include training issues such as entrapment, search and seizure, anti-terrorism, legislation etc. via guests experts and guests hosts. This training and information dispensing technique (radio) reaches a wide array of police officers, MINUS the travel and overtime costs and can be quantifiably measured via internet verification (distance learning) test. This program could also assist in the retention of police officers, identify training deficiencies, and limit litigation through knowledge. The costs include purchasing radio time, software training programs, hosts, advertising and marketing. | (Ohio Patrolman's Benevolent Association) | 150 | 0 to 30 days | \$75,000 |

| Cuyahoga | Construction of a renewably-generated-hydrogen fue | Lake Erie water - with electricity generated renewably from existing wind and solar. A template for the design will be created and held in trust for the benefit of the citizens of Ohio. A collaboration (Ohio nonprofits, universities, industry, NASA, a transit authority, and more), has formed, including large corporations (eg, Parker Hannifin) and small businesses already receiving interest from prospective station buyers, producing green manufacturing jobs and an Ohio green manufacturing supply chain, along with a university creating the design template and the economic development tools for replication. The shovel-ready project is underway, with Cleveland Foundation seed funding. Additional funding is needed to immediately ramp up to proceed toward final construction and template creation, enabling clean energy manufacturing expansion and job creation. A transit authority will run a fuel cell bus in revenue service, showing commercial viability. The hydrogen may also be used in either fuel cell or ICE vehicles and equipment, including fork lifts and maintenance mops. The project our organization is presently trying to fund is independent housing for ex-offenders transitioning back into the community. We want to assist these individuals with their daily living skills and with any program or community resource that will help them re-enter society as law abiding citizens. | Ohio Aerospace Institute | 40 | 0 to 30 days | \$2,700,000 |
| Cuyahoga | The RMR Unit | | G & D Services, Inc. | 6 | 31 to 90 days | \$130,000 |
| Cuyahoga | HealthNet | a federal grant which funds 85% of a \$13 million project that connects health facilities across 22 Northern Ohio counties to each other, and to national and urban health care and research facilities via 800 route mile of ultra broadband fiber. The Federal Communications Commission (FCC) has formally selected this group for a national rural telemedicine pilot project. The project extends OneCommunity's dedicated high-speed broadband network, "HealthNet," from the 50 urban hospitals we serve today, to also add 19 additional rural hospitals plus clinics across 22 Ohio counties. Examples include the Cleveland Clinic, University Hospitals, MetroHealth Systems, Akron General, Sisters of Charity, Mercy, St. Elizabeth, Boardman and others - across 10 counties. HealthNet also connects to leading national health broadband networks, the state's broadband networks, plus more than 1,000 schools, higher education institutions, and arts/cultural organizations are already on OneCommunity's network in partnership with public and private comm. | OneCommunity | 796 | 31 to 90 days | \$2,500,000 |
| Cuyahoga | 21st Century Classroom - Advancing Mathematics Dep | To upgrade our Mathematics Department from the TI 83/84 family of graphing calculators to the next generation of graphing calculators, keeping the school current with advances in classroom technology and allowing for more in-depth exploration of mathematical concepts: \$2,500.00 for a Classroom set (20 per set) of Texas Instruments' Nspire Calculators. To be available to students with family financial constraints. \$4,750.00 for faculty training (10 teachers @ \$475 each)for optimum use of the Nspire Calculators. | Laurel School | 0 | 0 to 30 days | \$7,250 |
| Cuyahoga | Cape Towne Adult Care Facility | Large purpose built care facility is a group home for the mentally ill and disabled. We would like to assist those with mental disabilities with their daily living skills, doctor's appointments, transportation, provide 3 meals daily, laundry services, cable television, linen and help our residents connect with community resources that will enhance their mental, educational, social and cultural development. We wish to purchase a new facility that can house more residents and to purchase a new van to help our residents with transportation and to continue to provide employment for our staff with benefits. | G & D Services, Inc. | 4 | 0 to 30 days | \$100,000 |
| Cuyahoga | Legal Advocacy | JFSA's Justice System Advocacy and Case Management Program seeks to begin work with victims of violence before they enter the legal system or enter a shelter. Because of this early intervention, further domestic violence is often avoided since victims are receiving the support and information they need before the situation hits a crisis point. Specifically, the Justice System Advocates address the difficulties faced by domestic violence victims in negotiating the legal system. The objective of this program is to have JFSA continue to provide case management and justice system advocacy for victims and support them during their struggle to gain abuse-free independence. The legal system can be intimidating to victims and having a trained advocate attend legal hearings and meetings is an invaluable resource to help women process what is required of them. JFSA would use these funds to continue and expand services to victims of domestic violence. | Jewish Family Service Association of Cleveland | 3 | 0 to 30 days | \$45,000 |

| Cuyahoga | Biomass Furnace | Three separate areas are going to receive their own, separate biomass furnaces. The biomass furnace is a renewable energy source for the production of heat. State investment will allow the applicant to move the project from prototype, to demonstration and commercialization. Through BO's expertise in the energy field and market research, the need for this technology and its feasibility for success are high. The product's best testing of intended redesign and manufacture of several demonstration models could be accomplished rapidly if funded. Private investment and financing will be used to replace the machines into the marketplace via these demonstration models with commercial viability projected shortly thereafter. Their construction will utilize local raw materials, manufacturing & fabricating capabilities within the State, providing the opportunity for significant job growth and retention within both areas. High paying employment in sales, installation and service will follow. The agricultural end-users will use | Brewer-Garrett | 1200 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Health and Wellness Bigs Littles Program | The Hebrew Academy of Cleveland's Bigs and Littles Mentoring Program has made a profound difference in the lives of children. The innovative program promotes health and wellness for children and interact with parents about child care models. Under the direction of a licensed social worker, the "Bigs" volunteer their time and look out for the health and wellness of their matches. The "Littles" are taken for weekly collaborative activities and eagerly look forward to stimulating activities and reading interaction. The program has captured the attention of schools around the county and has earned the State of Ohio's 2008 Award for Excellence. | Hebrew Academy of Cleveland | 2 | 91 to 180 days | \$20,000 |
| Cuyahoga | New Central fire Station | Build a Central Fire Station in the City of East Cleveland to replace 2 outdated fire stations that are in constant need of repair. Fire station 1 being 80+ years old. Build a 5 bay fire station with a community training room, berthing for approx. 15 firefighters, as well as Administrative offices for Fire Chief, fire investigator, and Executive Assistant. Fire Station would be located in central location in City to optimize response time. The Hebrew Academy of Cleveland is committed to the health, wellness and safety of its staff and students. In its Strategic Plan the school's leadership and stakeholders have expressed its commitment "to establish procedures to enhance the safety health and well being of students and staff". The school must be a safe place for its staff and students, located in a secluded area the school's Superior Campus is currently vulnerable. A proposed new entrance and electronic gate would enable the administration to monitor, screen and meet visitors to ensure the safety of the staff and student body. Estimates and architectural drawings have already been established and the total cost for this building is estimated at \$250,000. The campus in Cleveland Heights is an aging building which many improvements have been made in the past. These plans call for a new entrance was built to ensure visitors enter through one doorway. However the need to update our internal monitoring cameras and equip the doors and windows with alarms needs to be done. This is estimated to cost \$100,000 for 15 new cameras throughout the building and the 60 classroom doors. Various windows also need to be alarmed. | City of East Cleveland fire department | 100 | 91 to 180 days | \$5,000,000 |
| Cuyahoga | Safety Enhancements to original structures | The City of Strongsville is currently constructing a new municipal jail facility to house short term detainees. These detainees are in custody awaiting sentencing or serving short-term sentences. There is a lack of jail space at the County level (Cuyahoga County) for this purpose. The Ohio Bureau of Detention requires a minimum staffing level of three correction officers to staff this facility. Without matching jail it will be difficult for the City of Strongsville to house its jail facility. We are requesting a 50% match of labor costs associated with the operation of this jail facility. These funds would allow the creation of new jail inmate positions. We are requesting 3000 inner city homes in Cuyahoga and Summit counties. | Strongsville Police Dept. | 12 | 0 to 30 days | \$561,600 |
| Cuyahoga | Insulating inner city homes | Train new crews made up of inner city residents to work on project installation and completion | Energy Masters | 50 | 31 to 90 days | \$8,000,000 |
| Cuyahoga | City of Strongsville Victim/Witness Program | The City of Strongsville currently provides victim/witness services to crime victims and witnesses in its community. These services are primarily received by female victims of violence. One full-time victim/witness advocate is employed to provide these services. Reductors in revenue could threaten the retention of this position. The requested 50% match in funding would help retain this position. | Strongsville Police Dept. | 1 | 0 to 30 days | \$32,408 |
| Cuyahoga | Building Addition | Building addition to create new jobs. | Thompson Aluminum Casting Co. | 20 | 0 to 30 days | \$700,000 |
| Cuyahoga | Strongsville Police Community Youth Programs | The City of Strongsville employs a full-time youth program coordinator. She is responsible for coordinating our DARE program, Third Grade Best program, Safety Town and the Strongsville Juvenile Offender Diversion program (see case manager). Reductors in revenue could threaten the retention of this employee. The requested 50% match in funding would help retain this position. | Strongsville Police Dept. | 1 | 0 to 30 days | \$26,071 |
| Cuyahoga | Services for Victims of Domestic Violence | A woman who finds herself in an abusive situation must negotiate a number of different tasks through a variety of systems. She might need to find a place to live, to obtain healthcare, to pay for food, to file a police report with a court, among other issues. The PWS Case Manager assesses each situation and works to ensure that all needs are met while pursuing the ultimate goal of becoming abuse-free and self-sufficient. The Case Manager also assists each client seeking help through the complex and stressful criminal justice and civil court systems in a neutral justice systems advocate. Clients are educated and prepared for the intricacies of the courts, thus, saving the criminal justice fees and potentially leading to better legal results. These funds would provide services for 100 women and their children. | Jewish Family Service Association of Cleveland | 2 | 0 to 30 days | \$40,000 |
| Cuyahoga | Solar Panels - Municiple Buildings | Install 324 photovoltaic panels on the roofs of the Bedford Heights city hall, community center, service department and water treatment plant. In 2008, the city consumed 2,638,000 kWh of electricity. The photovoltaic panels will help reduce our dependence on cost-generated electricity. Although the estimated installation cost is \$1,748,329 appears steep. The city will save approximately \$30,000 a year on electrical energy cost. In addition to cost savings, the carbon-footprint reduction equates to the planting of 1,025 trees every year! | City of Bedford Heights | 20 | 91 to 180 days | \$174,633 |
| Cuyahoga | Strongsville Police Bullet-Proof Vest Initiative | The Strongsville Police Department must immediately replace 41 bullet-proof vests for our current sworn staff. The matching funds requested would ensure these replacements in light of diminishing municipal revenue. Availability is designed to provide positive experiences for youth, ages 14-24, from traditionally marginalized groups -- at-risk and disabled -- and empowers them by engaging them in volunteer community service activities. The program is based on the premise that helping others is an effective way to help oneself. About one-third of students are disabled, cognitively and developmentally, and working to increase their vocational skills. The other 2/3 are at risk due to emotional disturbances, school failure, court involvement and/or disadvantaged circumstances and lacking positive experiences when their work is valued. About one-third of the students in this second group has a behavioral disability and is strictly referred by alternative school programs. Each volunteer placement is individually tailored to meet the needs of the student and the participating agency. Students gain experience and enhanced self-esteem as they transform themselves from being a person who is helped by others to a person who is helping others. The YouthAbility program engages about 300 students who perform approximately 6,000 hours of service leading to the employment of about 40 youth each year. | Strongsville Police Dept. | 0 | 0 to 30 days | \$18,450 |
| Cuyahoga | YouthAbility | 1. Create up to 500 good-paying jobs for the most difficult to employ persons, with an emphasis on formerly incarcerated individuals. Employees will gain skills and on-the-job training that will prepare them for permanent jobs in (de)construction, remediation and weatherization. 2. Reclaiming large amounts of abandoned property through: a. Deconstruction of a significant number of the approximately 15,000 residential structures throughout the county (and recycling and selling building materials); and b. Remediation of brownfield sites throughout the county. 3. Creating large, packaged tracts of "clean land" that can be dedicated to: a. New neighborhood housing; b. New sites for retail, commercial and industrial development; c. Green spaces to enhance the quality of life. 4. Improving existing houses that have structural integrity through rehabilitation and weatherization (saving energy, reducing monthly utility bills and stabilizing neighborhoods). | Jewish Family Service Association of Cleveland | 45 | 0 to 30 days | \$40,000 |
| Cuyahoga | Clean Cleveland Cuyahoga County (CCCC) | The Center for Community Solutions | 500 | 31 to 90 days | \$33,000,000 | |
| Cuyahoga | Strongsville Police Tactical Team training | The Strongsville Police Tactical Team is part of a multi-jurisdictional emergency response unit. This unit provides emergency police response services for critical and unusual incidents to approximately one third of Cuyahoga County. The requested funding would allow this unit to train twice monthly as suggested by the National Tactical Officer's Association. The Strongsville Police Department employs one police officer to conduct highway and hotel interdiction efforts in our community. This officer networks with a multi-county interdiction unit dedicated to the removal of weapons, drugs and other contraband which may threaten our homeland security. The matching funds requested would help ensure the retention of this position in light of shrinking local revenue. | Strongsville Police Dept. | 0 | 0 to 30 days | \$55,104 |
| Cuyahoga | Strongsville Police Highway/Hotel Interdiction Ini | The Strongsville Police Department employs one police officer to conduct highway and hotel interdiction efforts in our community. This officer networks with a multi-county interdiction unit dedicated to the removal of weapons, drugs and other contraband which may threaten our homeland security. The matching funds requested would help ensure the retention of this position in light of shrinking local revenue. | Strongsville Police Dept. | 1 | 0 to 30 days | \$47,710 |
| Cuyahoga | Emergency Generators - City Hall / Kiwanis Lodge | Emergency backup generators at City Hall and Kiwanis Lodge, which is the City's Emergency Shelter. Kiwanis, Cleveland Public Art, Ohio City Near West Development Corporation (OCNWC), City Architects, and the City of Cleveland. This high profile park is larger adequately serves Cleveland residents, public transportation riders, or the over one million visitors who flock to the West Side Market. The West Side Market was designated in 2009 by the American Planning Association as one of America's 10 Great Public Spaces. Designs for the \$1.9 million renovation are the result of an extended public planning and design charrette process, and are now prepared to move on to the construction phase. A shared street format and new pedestrian connectors with existing heavy rail connectors adjacent to the park will fulfill the collaborator's goal of enhancing several modes of public transit and increasing walkability. An Enhanced Transit Waiting Environment, developed with the Greater Cleveland Regional Transit Authority (GCRTA), will increase the capacity and comfort of a bus stop that currently has the second largest ridership in the GCRTA area, serving over 5 million riders per year. The renovation of Market Square is scheduled for July 1, 2009. | City of Richmond Heights | 2 | 181 days or more | \$90,000 |
| Cuyahoga | Market Square Park and Transit Waiting Environment | Ohio City Near West Development Corporation | 60 | 0 to 30 days | \$1,822,716 | |
| Cuyahoga | Strongsville Police Hangun Replacement Program | The Strongsville Police Department needs to replace 88 hangars which are nearing the end of their serviceable life. The matching funds requested would allow for this purchase in light of diminishing municipal revenue. Construction of a 21,000 square foot building for a social services/nonprofit organization that works with 650 inner-city children between the ages of 3 and 18, almost all of whom are members of social minority groups from poverty level backgrounds. New building will replace a structure built in 1964 that is beyond repair. New structure is registered to be LEED Silver Certified and will include geothermal power, super insulated skin, operable low-E glass high thermal performance windows, energy-efficient lighting fixtures with occupancy sensors, recycled and regional building materials, and redevelopment of a high-machinery urban site located four blocks south of current building in the highest-traffic area of Cleveland. About 75% of project cost has been raised through charitable contributions, including \$500,000 challenge grant from Kresge Foundation of Michigan (which requires completion of project funding). Rainey needs \$500,000 to cover costs of green technology of new structure which in turn will reduce energy consumption and result in significant operating cost savings over the life of the building. Groundbreaking is scheduled for July 1, 2009. | Strongsville Police Dept. | 0 | 181 days or more | \$55,000 |
| Cuyahoga | Constructing a New Home for Rainey Institute | Construction of a 21,000 square foot building for a social services/nonprofit organization that works with 650 inner-city children between the ages of 3 and 18, almost all of whom are members of social minority groups from poverty level backgrounds. New building will replace a structure built in 1964 that is beyond repair. | Cuyahoga | Greenwood Farm Environmental Center | Rehabilitation and renovation of Greenwood Farm to Environmental / Cultural Learning Center - structure, ADA, Cottage, Barn, Patis. | City of Richmond Heights | 5 | 181 days or more | \$200,000 |
| Cuyahoga | Strongsville Police Clerk/Dispatcher Rehiring Prog | The Strongsville Police Department recently lost two dispatcher/clerks to attrition. Due to diminishing municipal revenue, these employees have not been replaced. The requesting matching funds would allow two individuals to be hired to staff these vacancies. | Strongsville Police Dept. | 2 | 0 to 30 days | \$29,120 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Market Square Multi-modal Facility | The Market Square Multi-modal Facility is an approximately 280 space parking garage that would support adjacent bus, heavy rail lines, and local retail at the corner of Lorain Avenue and West 25th Street. The construction of a new garage on the proposed site would serve the 21st Century parking needs of a neighborhood largely constructed in the 19th century. The garage would further multi-modal transit oriented development, and serve the needs of neighborhood retailers, the West Side Market, and visitors. | Ohio City Near West Development Corp. | 250 | 91 to 180 days | \$7,000,000 |
| Cuyahoga | Strongsville Police Dash-Cam Video Project | The Strongsville Police Department needs to replace 22 dash-cam video units and one computer server. These funds would make this purchase a reality. | Strongsville Police Dept. | 0 | 31 to 90 days | \$256,000 |
| Cuyahoga | Stream Rehabilitation - City Hall / Park Conservat | Environmental Rehabilitation of existing conservation easement / streams from Richmond Road east to east side of park property. | City of Richmond Heights | 5 | 181 days or more | \$275,000 |
| Cuyahoga | Strongsville Police Canine | The Strongsville Police Department needs to replace one aging police canine. These matching funds would assist in acquiring and training this dog. | Strongsville Police Dept. | 0 | 31 to 90 days | \$5,000 |
| Cuyahoga | American Legion Hall ADA Improvements / Rehabilita | ADA improvements, accessibility, kitchen and bathroom rehabilitation. | City of Richmond Heights | 4 | 181 days or more | \$125,000 |
| Cuyahoga | Strongsville Police Officer Retention Program | The Strongsville Police Department currently retains five police officers that were hired with the assistance of a COPS Unifund Hiring Program grant. Four additional officers have been hired since and one currently being retained. We are in the final close-out stage of the COPS grant, and we are beginning the one-year retention phase. | Strongsville Police Dept. | 9 | 0 to 30 days | \$417,870 |
| Cuyahoga | Implementation of City Wide Fiber Network | The requested matching funds would ensure the retention of these nine officers in the wake of diminishing municipal revenue. | City of Richmond Heights | 3 | 181 days or more | \$75,000 |
| Cuyahoga | CPR Training Facility | Lighting up existing fiber previously installed by Adelphi - City Hall / Hospital / Mill / Lyndhurst Courts | Angus MacMillan | 10 | 91 to 180 days | \$200,000 |
| Cuyahoga | Strongsville Police American-Made Cruiser Replacem | I would like to open an all-encompassing American Heart Association-Certified CPR training center that would allow training of both medical personnel and the lay public. I am an Ohio state certified Paramedic, and an AHA certified CPR instructor. I think there is a need for proper CPR training in our communities, both for the invaluable and life-saving techniques learned, and for the health and wellness go supported in the course. I fully expect to hire and maintain a staff of at least 10 AHA certified CPR instructors to assist with the classes. | Strongsville Police Dept. | 0 | 31 to 90 days | \$125,330 |
| Cuyahoga | Habilitation Worker Training | The Strongsville Police Department is in need of replacing five Ford Crown Victoria Police cars. Shifting municipal revenue may ultimately facilitate this purchase. The matching funds requested would help ensure the acquisition of these cars. | Rose-Mary, The Johanna Grasselli Rehabilitation an | 200 | 31 to 90 days | \$85,000 |
| Cuyahoga | Cary Jay / Mayfair Lake Rehabilitation | Expand our training program for Habilitation employees to residents of the surrounding counties, including Cuyahoga, Lake, Summit and Ashland. He would train 200 people every year for jobs working in direct care with individuals diagnosed with mental retardation and developmental disabilities. It is predicted by the year 2016, there will be a demand for 1 million new positions in this field. | City of Richmond Heights | 4 | 181 days or more | \$500,000 |
| Cuyahoga | RBI Inc | Rehabilitation of existing lake to improve area storm water quality. | RBI Inc | 2 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | City Wide Wireless Network | Help fund a cure for ALS and Diabetes by using funding. | City of Richmond Heights | 2 | 181 days or more | \$100,000 |
| Cuyahoga | Mentoring At-Risk Youth in Cuyahoga County | Establishment of a city wide wireless network with hubs at City Hall / Hospital / Mill - 4 square miles | Big Brothers Big Sisters of Greater Cleveland | 2 | 0 to 30 days | \$100,000 |
| Cuyahoga | Naturehood | Mentoring programs, particularly those in socio-economically depressed times and in poverty-stricken areas are essential to the development of healthy and productive youth. In the City of Cleveland, more than one-quarter of our youth are being raised in homes at or below poverty, and more than 16% of youth between the ages of 16 and 19 are neither in school or working (idle youth). One of the most salient and influential factors in their lives to missing - a role model. Big Brothers Big Sisters of Greater Cleveland has addressed this disparate dilemma by matching at-risk youth with a caring adult in a one-to-one mentoring relationship. Each match that is made positively detours from criminal activity, truancy, violence, teen pregnancy and withdrawal from high school. The cost per match is \$1,000 and we are heavily requesting \$100,000 to support 100 matches. Mentoring has been documented as the most effective route to positive youth development. Mentoring helps youth both academically and personally, and the combination of better academic performance and key attitude changes provides the opportunity for lifelong success. | Earth Day Coalition | 3 | 181 days or more | \$80,000 |
| Cuyahoga | Public Pool Rehabilitation / Renovation | This proposal is to revitalize, develop and utilize ten vacant plots of land in the city of Cleveland. The project will expand urban open space, restore natural habitat and green our city environments using native Ohio plants. It will promote social, health, educational and economic benefits of neighborhood restoration and green space. It will help residents increase knowledge of their neighborhood, plan the future of their street and learn how to properly plant, maintain and preserve urban habitats. Neutrosceasing stabilizes the soil, improves water quality, promotes biodiversity, cleans the air, and reduces the Carbon Footprint of the city. | City of Richmond Heights | 10 | 181 days or more | \$1,500,000 |
| Cuyahoga | Feasibility Study | Feasibility study to determine the best way to down-size Rose-Mary Center into several small group homes. Expected outcomes would be to provide jobs to at least 100 people in the construction industry. It would also provide jobs to the communities where the homes would be located. | Rose-Mary, The Johanna Grasselli Rehabilitation an | 100 | 31 to 90 days | \$75,000 |
| Cuyahoga | Mentoring At-Risk Youth in Cuyahoga County | Mentoring programs, particularly those in socio-economically depressed times and in poverty-stricken areas are essential to the development of healthy and productive youth. In the City of Cleveland, more than one-quarter of our youth are being raised in homes at or below poverty, and more than 16% of youth between the ages of 16 and 19 are neither in school or working (idle youth). One of the most salient and influential factors in their lives to missing - a role model. Big Brothers Big Sisters of Greater Cleveland has addressed this disparate dilemma by matching at-risk youth with a caring adult in a one-to-one mentoring relationship. Each match that is made positively detours from criminal activity, truancy, violence, teen pregnancy and withdrawal from high school. The cost per match is \$1,000 and we are heavily requesting \$100,000 to support 100 matches. Mentoring has been documented as the most effective route to positive youth development. Mentoring helps youth both academically and personally, and the combination of better academic performance and key attitude changes provides the opportunity for lifelong success. | Big Brothers Big Sisters of Greater Cleveland | 2 | 0 to 30 days | \$100,000 |
| Cuyahoga | EHR | JSA proposes to implement the creation of an Electronic Health Record to replace the inefficient use of paper based charts and record keeping. The outcome of this project will be the ability of individual practitioners provide care to more patients (efficiency) and to facilitate better outcomes due to the sharing of information among providers (quality). | JSA of Cleveland | 20 | 91 to 180 days | \$50,000 |
| Cuyahoga | Minority Business Development | With mentoring opportunities with industry supervisors through training, education, and coaching. The NCMDCD worked with the Institute for Entrepreneurial Thinking to create Successful Supplier Profiles (SSP) by Industry (Manufacturing, Financial Services, Education, and Healthcare). Surveys and focus groups with major corporations capture SSP data. With the use of an assessment tool we will identify and address the gap between current supplier capabilities and the SSP through training and development from NCMDCD, and through our many educational institutional partners. | Northern Ohio Minority Supplier Development Council | 30 | 31 to 90 days | \$1,200,000 |
| Cuyahoga | Early Intervention/Pediatric Therapies and Family | Our service area is 38 counties in Northern Ohio | Achievement Centers for Children | 8 | 0 to 30 days | \$359,000 |
| Cuyahoga | Langston Hughes Health & Wellness | The goals of our program are: 1. Support economic development and growth by assessing, educating, training, and coaching minority suppliers to successfully compete for corporate contracting opportunities. 2. Help corporations increase their preferred supplier base with minority suppliers. 3. Close the gap between the requirements for a successful supplier and the supplier's current capability. Research shows that early intervention is critical for a child with disabilities' development. Early intervention combined with the involvement of their entire family gives a child the best chance for achievement and improvement. Federal stimulus funds will provide outpatient speech, physical and occupational therapy and family support services to children with a wide range of disabilities from low to moderate income families. Our ability to provide critical therapy and family support services is compromised due to reductions in insurance coverage and challenges in raising necessary community support. Increasing co-pays and job loss/loss of health care puts real burdens on families we serve, many of whom are the working poor. Our therapy services have a proven track record - 80% of children served will improve functional areas and our client satisfaction rate will be 97%. Family support services link families to valuable community resources and provide parent education and counseling to help address the many challenges that come with raising a child with a disability. Early intervention is cost effective and is proven to have significant long term impact. | Fairfax Renaissance Development Corporation (FRDC) | 18 | 31 to 90 days | \$500,000 |
| Cuyahoga | Electrical Rehab of older and vacant properties | As the result of a partnership between a local nonprofit and several medical providers, FRDC is proposing to begin health education/wellness activities in a building that has been recently rehabilitated and is 90% complete. Wellness activities will include health education and awareness, outreach, nutrition education to underserved and underserved minority communities. Dissemination of research findings to the population will provide a unique opportunity to develop research programs that address the specific needs of the local communities while facilitating local access to findings to improve community health. | Bell Glick Electric Co., Inc. | 160 | 0 to 30 days | \$22,000,000 |
| Cuyahoga | RecipeGate.com website | A portion of the prevention/wellness activities will be focused on youth to help develop healthy lifestyle behaviors that contribute to individual wellness and have an effect on family and community expectations and practices regarding health. | Recipe Gate, LLC | 8 | 0 to 30 days | \$250,000 |
| Cuyahoga | Young Rembrandts Art Enrichment | Upgrading and modernizing electrical systems in ten residential and vacant houses. Installation of new electrical panels where old fuse panels are located - grounding of circuits, replacement of energy efficient lighting. | Young Rembrandts Cleveland West | 30 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Office of Communicable Disease Surveillance & Epid | RecipeGate.com is a startup company that has been functioning for 7 months. Our product addresses a market need in a market space that is growing. Currently there are 46 million visitors to food websites and the number is growing. Our unique offering will attract many visitors and generate up to \$4,000,000 in revenues by the end of year 4. We will realize a profit by the end of the 18th month. The funds we are seeking will be used for our initial roll out of our business and are sufficient to assure success of the enterprise. By the end of year 3 we will employ a total of 14 Directors in addition to hiring multiple Ohio companies in support roles as suppliers of goods and services. We have an executive overview and detailed business plans and financial proforma statements available for your review. We have contributed our own and personal expenses to get this project started and we require seed money to make this project successful. | City of Cleveland, Office of the Mayor | 6 | 0 to 30 days | \$460,000 |
| Cuyahoga | products for store | Funds needed to allow elementary and preschool students in the Cleveland School district to take after school art enrichment classes. We teach drawing, the fundamentals of art or visual arts to children ages 5-12 to 12. Our program complements and expands on existing art programs, preparing students for goals set forth by the National Standard of Art Education. A fun, educational and engaging experience for children. Young Rembrandts curriculum maximizes neuron development and brain patterning function. | Desires after Dark | 9 | 31 to 90 days | \$135,000 |
| Cuyahoga | I.N.I.T.A. Job Entrepreneurial Training Program | This project will support research, data surveillance, collection and analysis for chronic disease. The data derived from this evidence based research will enable public health to target programs to reduce disparities and chronic disease issues in the population. | Cleveland Eastside Ex-Offender Coalition | 6 | 91 to 180 days | \$250,000 |
| Cuyahoga | Infant Mortality (MomsFirst Program) | Opening of a clothing store in our neighborhood will be able to create jobs and also to be able to revive our neighborhood while creating a new business is opening. This will also create revenue for the city. Technology today is the fastest growing industry with the potential for long term work and better than living wage incomes. This organization intends to teach low skilled workers in the garment or apparel industry how to live wage income level. Their skills, ability and/or other technologies in the field. Participants would be taught how to create their own employment opportunities by learning to write business plans, basic accounting, bookkeeping, hiring practices, marketing, record keeping and financial management. The acronym, I.N.I.T.A. Job Entrepreneurial Training program, stands for Institute for Technology, Training, Assistance and Record Keeping. The program would target recently-released felons from Ohio prisons but any Ohioan could apply for and be accepted into the program. The organization intends to partner with the SBA's SCORE associates who have received from their own companies after running highly successful businesses and with The Cleveland Urban League. The best opportunity to work, for low-skilled, low-income persons, is to create one's own job and be one's own employer and employ others in similar situations. | City of Cleveland, Office of the Mayor | 13 | 31 to 90 days | \$626,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | RESPONSIBLE RIDE | My name is John M. O'Barney and I have created a program that will help all Cities (Cleveland Test) have 15 trained Police & Firefighters on the streets of Cleveland as First Responders (Homeland Security). Dramatically reduce number of DUI offenders during the ride, and having professionally trained officers responding to emergency situations. There will be 7 specialized vans on the road for 5 days a week 9:00am to 2:30am. We will also create around 30 new jobs and be set up as a non profit organization and be responsible to each City's Board Council and Homeland Security Representative. This will also have additional funding from sponsors and private donations. This program will make each City safer for all Citizens. | RESPONSIBLE RIDE | 30 | 31 to 90 days | \$3,000,000 |
| Cuyahoga | John Brindza | Replace four furnaces and two roofs that are at least twenty-five years old. This would save energy for several years. | Ogontz LLC | | 91 to 180 days | \$20,000 |
| Cuyahoga | Access to Care (Health Care Centers) | This funding will allow the City to expand services at McCaffery and J. Glen Smith Health Centers, including extended hours for personal, addition of dental services, and patient transportation services, and allow for critical and necessary repairs and for the purchase of medical equipment for all of the City owned Health Care Centers. This will allow the community centers to provide better, more accurate service, which will result in more patients being served and receiving sound medical advice. | City of Cleveland, Office of the Mayor | 25 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | me an my kids bills an my food | to help me pay bills and to feed my kids | i was just laid off i have 6 kids i need help payi | 1 | 31 to 90 days | \$2,000 |
| Cuyahoga | Office of Emergency Preparedness Outreach | This project would specifically address emergency preparedness education and outreach for those who are chronically ill and would be special populations in an emergency. Outreach is especially critical for the people understand how to protect themselves and take appropriate action in an emergency. This would include the 75,000 senior citizen in Cleveland, 4000 of whom are in nursing homes. | City of Cleveland, Office of the Mayor | 1 | 0 to 30 days | \$171,000 |
| Cuyahoga | Reduction of at Risk Male Special Needs Students w | More recently there has been a significant increase in the number of black male students who are in special education and are being suspended for acts of aggression in and out of school that have resulted in these young men with diagnosed disabilities of Severe Behavior Disorders to be expelled, incarcerated and absent from school. These students often are very bright, have strong leadership skills that need to be redirected. The expected outcomes would be to decrease the numbers of black male students being suspended, expelled and significant reduction in the drop-outs and incarceration rates. | Warrensville Hts. City Schools | 10 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Bizooki | <ul style="list-style-type: none"> Establish 10 co-working centers in Cleveland area using Bizooki's strategic partnership with cTechnology (www.ctechnology.org). (\$500,000.00) Complete development of Bizooki.com platform/database of transitional job opportunities. (\$50,000.00) Debut the job search platform in Northeast Ohio, target high school/college students and those recently laid off, conduct case study for workforce readiness in Cleveland. (\$50,000.00) Expand Bizooki/Technology partnership to rural communities surrounding Cleveland (\$50,000.00) Establish scholarship fund for high school students who are acquiring tech skills. (\$50,000.00) Expected Outcomes <ul style="list-style-type: none"> Build and operate 5 Co-Working Centers, which will house newly hired young people who work remotely. Create a catalyst for long-term retention of the under-25 demographic to remain in Northeast Ohio. Identify and develop a 21st century technology workforce starting in K-12 and some of the under 25 population already out of school. Platform based job placement services into the 21st century online economy, create 300+ high paying new jobs per year regularly with estimated annual impact of \$3.8m each year. | Bizooki | 380 | 31 to 90 days | \$680,000 |
| Cuyahoga | Childhood Lead Poisoning | Federal Stimulus Funds would be used to maintain and expand existing childhood lead poisoning prevention program by hiring an existing lab tech and case manager and two new risk assessors. This will allow for lead testing in approximately 5,000 additional residences. | City of Cleveland, Office of the Mayor | 4 | 31 to 90 days | \$245,000 |
| Cuyahoga | Covering the Spectrum (Alcohol & Drug Services) | This project will support a continuum of care along the spectrum of alcohol and other drug treatment issues which is currently not offered by CPHD. This program will fill in the treatment gaps to improve outcomes. | City of Cleveland, Office of the Mayor | 4 | 31 to 90 days | \$200,000 |
| Cuyahoga | Special Education Computer Math and Science Coache | Special Education students have learning styles that are extremely interactive. These students learn from immediate feedback. As a Special Education Director I want to make available interactive software for personalized math and science programs. The computer technician would have a special education certification with an emphasis in computer technology and use of soft ware. The expected outcome would be that those special needs students who normally have a difficult time learning math and science via traditional instruction would learn more, learn faster, learn easier and have fun doing it. The retention of the knowledge would be long lasting. The end result would be increased student learning an significant jump in test scores. As a result we expect decrease in disruptive student behavior and increased self-esteem. The intent would also be to attract these students with more time in a typical classroom setting. | Warrensville Hts. City School District | 4 | 31 to 90 days | \$330,000 |
| Cuyahoga | Youth STD Counselor-Eastside Region | This program will allow for increased services to sexually active youth (ages13-14) to test for known std cases, identify new undiagnosed cases and provide risk reduction counseling so that reinfection does not occur. This project will be focused at health clinics located on the East Side of Cleveland. | City of Cleveland, Office of the Mayor | 1 | 91 to 180 days | \$75,000 |
| Cuyahoga | Youth STD Counselor-Westside Region | This program will allow for increased services to sexually active youth (ages13-14) to test for known std cases, identify new undiagnosed cases and provide risk reduction counseling so that reinfection does not occur. This project will be focused at health clinics located on the West Side of Cleveland. | City of Cleveland, Office of the Mayor | 1 | 91 to 180 days | \$75,000 |
| Cuyahoga | PWA-Tenant Based Rental Assistance Program | The Cleveland Department of Public Health has conducted research which shows that the lack of Tenant Based Rental Assistance for homeless persons living with HIV/AIDS has left many people in unstable housing situations. Homeless families are of special concern and while the Cleveland region has developed several new Permanent Supportive Housing Facilities, the demand for units have greatly exceeded their availability. This project will allow CDPH to assist 15 homeless persons and their families with stabilized housing for at least 12 months. | City of Cleveland, Office of the Mayor | 1 | 91 to 180 days | \$100,000 |
| Cuyahoga | Office of Communicable Disease Epidemiology & Surv | This project will enable the CDPH with the ability to continue to planning for emergencies and strengthen our ability to respond to food and shelter needs in an emergency. Funding this project would identify mass care facilities and shelters, evaluate and assess identified sites, create plans and protocols for providing food in an emergency and recruit volunteers to staff these mass shelter sites in an emergency. The facilities would also need be supplied with appropriate equipment and supplies. | City of Cleveland | 7 | 0 to 30 days | \$633,000 |
| Cuyahoga | Money for new first home as newlyweds | My fiance and I will be getting married april 26, 2009 and we want to relocate to Arizona for him to find a better job. He is currently unemployed because his job that shewn. I also would like to go back to school to finish getting my nursing degree with the money besides buying my first home. I had stopped going to school because I couldn't afford it. Right now we are living paycheck to paycheck on my money working part time, barely making the rent and gas bills. Please help us! | n/a | | 181 days or more | \$70,000 |
| Cuyahoga | Neighborhood Sanitation - Rodent Control | This project will allow the CDPH to continue to sanitize neighborhoods through the Rodent Control Program. Improperly maintained properties can adversely affect public health and quality of life. Vacant, dilapidated, high porosity and debris all encourage the presence of rats, vectors and further encourage the deterioration of neighborhoods. The City of Cuyahoga has over 2,000 rodent complaints annually. This program could proactively reduce these complaints by 50%. | City of Cleveland, Office of the Mayor | 4 | 31 to 90 days | \$204,000 |
| Cuyahoga | Girl Scouts 100th Birthday in Washington DC 2012 | Girl Scouts ages 5 years to 99 years old will celebrate the 100th Anniversary of the Non Profit Organization. We would like the entire service unit 200 people to attend a 3 day weekend in June of 2012 in the city of Washington, DC at expenses included. This is a tradition in the city that had an estimated 20,000 attendees in 2007. Our Girl Scouts would love to be a part of the historical event in the year 2012. We would like to come to the city to tour the White House, the museums, the parks, the Capital Building and hopefully get a photo opportunity with the First Family. Girls would learn the history of government, celebrate leadership and re-commit themselves to the great organization of girl scouting. Girl Scouts are more than just cookies! | Girl Scouts of North East Ohio Service Unit 650 | 0 | 181 days or more | \$6,000 |
| Cuyahoga | Student Loan Payback | I worked extremely hard to get an education to be a productive citizen. Now I cannot find a job that will give me the opportunity to pay back my student loans. I would like to have the \$18750.00 so our country would not have to support my wife and I until I default on these loans. | Joseph C. Zawack | 1 | 0 to 30 days | \$18,750 |
| Cuyahoga | EHR | to obtain and implement electronic health record system for a 70 physician multispecialty group. | premier physicians centers | 250 | 91 to 180 days | \$700,000 |
| Cuyahoga | AVOID FORECLOSURE | To prevent foreclosure on my home. I was out of work for the entire year of 2007, due to illness. I am back to work at half the salary I was making before being off. I took out an adjustable rate loan, and with loss of income...the mortgage has doubled...and interest rate jumped 4 percentage points. I would also like to have some insulation and improvements that has gone neglected for the past ten to three years. Improvements to include storm doors for better insulation and garage doors and roofing repairs. I am also a disabled Vietnam Veteran. Services will be used to develop small businesses in the local community that will bring me revenue into the City Community both through sales and income taxes. It will also bring in roughly 22 immediate jobs and over 100 jobs in the near future. These jobs will be good-paying jobs with partial benefits and accessibility to college students and mass transit. By using stimulus money to fund small businesses like our idea the money will be recouped over time through taxes and jobs. | Homeowner | 1 | 31 to 90 days | \$10,000 |
| Cuyahoga | Southeast Cuyahoga County Job Development | For my job with my health benefits. I was able to find employment with no benefits. I cannot afford any healthcare plans, but make a few dollars more to qualify for the health care program for children. I have been getting pain in my left arm. Around like this money to go the doctor to have myself checked out. I would also like to take my 2 kids to the doctor. We have not been to the doctor in 2 years. Anything you can help me with would be appreciated. | SMW Investments | 22 | 91 to 180 days | \$400,000 |
| Cuyahoga | Healthcare | Thank You Karen McKinley | None | 0 | 0 to 30 days | \$1,000 |
| Cuyahoga | Health IT for Emergency Preparedness (CDPH) | This funding will allow the Department of Health to obtain a software platform to allow for preparedness and response to events that impact responders and the general public in the event of a natural emergency. The platform would include a health threat management application and logistic capability for procuring, stockpiling and distributing medical countermeasures. In the event of an emergency, this would allow the responder to not only provide life saving medications and supplies, but also track their use and replenish the supplies when on hand supplies run out. | City of Cleveland, Office of the Mayor | 4 | 0 to 30 days | \$500,000 |
| Cuyahoga | FROM HIGH CHAIR TO HIGHER EDUCATION | This give out annual scholarships to African American Males who are high school seniors who intends on enrolling into college. With the economic times, we would like to increase the number of black males this year as we will also mentor and work with 9th graders to receive their changes of completing high school and going on to college. | ALPHA PHI ALPHA, FRATERNITY | 0 | 31 to 90 days | \$25,000 |
| Cuyahoga | Cleveland Real-Estate Renovation Project | With the number of run down, deserted and boarded up properties in the Cleveland area, we have the opportunity to create jobs, and revive the community. My project would be to take properties that are satck, foreclosed, run-down and otherwise un-occupied and give them to local businesses, contractors, companies or individuals in order to renovate, rebuild, reoccupy or improve with the expectation of re-selling, or donating the properties to charities, local municipalities, or people. This is a rough idea and I am more the less thinking out loud, but if a property is given for improvement, and is NOT improved it will be seized and given to another. This should increase local property values, encourage young professionals to stay in Cleveland, and improve the job market. | N/A | 1000 | 0 to 30 days | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Business growth & expansion (hire staff, etc.) | I have a financial planning and advisory business. I am also a member of adjunct faculty at two local colleges. I would like to expand my small business to hire employees for administrative duties as well as for marketing and overhead expenses. I specialize in the SMALL BUSINESS market consulting on the establishment and/or expansion of small businesses. I also have a small tax preparation business and would be able to provide seasonal help if funds were available to receive funding for office expansion. I would like to work with various communities to assist small business enterprises that have received funds on business planning. I also write professional/educational newsletters and would like to publish it within the small business community. I have been unsuccessful at obtaining funding because I have been told that I am in a service industry and therefore, the lender cannot collateralize any inventory. I was told that I could easily get a \$25,000 SBA loan, but that would hardly meet my needs according to my business plan. I also think that I have difficulty receiving funding because I am a female, even though I have been in business for many years. Questions? Thank you! I'm currently a Junior at University of Phoenix, I am asking for the stimulus request to help pay for at least a year in college. I've applied at several scholarships and grants but no reply. That money will help me buy my materials, pay for college without taking out student loans, and transportation and housing. | Affinity Financial LLC | 5 | 0 to 30 days | \$400,000 |
| Cuyahoga | Educational Worries | Thank you! I hope I get looked at. I'm currently a Junior at University of Phoenix, I am asking for the stimulus request to help pay for at least a year in college. I've applied at several scholarships and grants but no reply. That money will help me buy my materials, pay for college without taking out student loans, and transportation and housing. | For My Education | 1 | 0 to 30 days | \$20,000 |
| Cuyahoga | Preventive Maintenance | Thank you! I hope I get looked at. I'm currently a Junior at University of Phoenix, I am asking for the stimulus request to help pay for at least a year in college. I've applied at several scholarships and grants but no reply. That money will help me buy my materials, pay for college without taking out student loans, and transportation and housing. | Podigate Inc. | 25 | 31 to 90 days | \$145,000 |
| Cuyahoga | Bathroom | We live in an old colonial home and the bathroom is on the second floor. We're retired. I was in a car accident and had my hip replaced. My husband has seizures. When I left the hospital I had to stay in an extended living home until I was able to walk up the steps. Our home is paid for but we don't use it any good if we are incapacitated and don't have a bathroom on the first floor. Thank you for your consideration. | Home improvemrnt | 4 | 0 to 30 days | \$20,000 |
| Cuyahoga | Doghouse Restaurant (add a second location) | To open up a second location, in downtown Cleveland we now have a location in Cleveland Heights. The Doghouse is a hobby restaurant. This program would support enhanced education services in Cleveland schools to meet the unique educational needs of lead-poisoned children. Approximately 1,200 pre-school children and 4,000 kindergartners would benefit from additional educational support. Lead poisoning is a considerable problem in Cleveland and children who are exposed at an early age can overcome the effects of lead poisoning and live more productive and promising lives. | Restaurant | 6 | 0 to 30 days | \$100,000 |
| Cuyahoga | Lead Poisoning Education (CMSD) | To open up a second location, in downtown Cleveland we now have a location in Cleveland Heights. The Doghouse is a hobby restaurant. This program would support enhanced education services in Cleveland schools to meet the unique educational needs of lead-poisoned children. Approximately 1,200 pre-school children and 4,000 kindergartners would benefit from additional educational support. Lead poisoning is a considerable problem in Cleveland and children who are exposed at an early age can overcome the effects of lead poisoning and live more productive and promising lives. | City of Cleveland, Office of the Mayor | 8 | 31 to 90 days | \$500,000 |
| Cuyahoga | self | hello sir or madam I am a 4 months behind rent due to lay off & I just cannot seem to get help anywhere i do not want to be evicted, & my car is always towed away when I'm just so worried that we are considering me | self | 0 | 0 to 30 days | \$10,000 |
| Cuyahoga | Motion Picture Soundtrack Production | Develop and implement the business model and physical and talent infrastructure to produce and record major motion picture soundtracks in NE Ohio, primarily the Cleveland area. Cleveland is home to some of the world's greatest classical music and symphony orchestras. It has at least four superior venues suitable for large-scale orchestral recording sessions. FiveFour Productions was founded in 2008 to offer key production team members of the multi-Grammy Award-winning classical and jazz record label, Tzara Records of Cleveland, Ohio. | Five/Four Productions, Ltd. | 150 | 31 to 90 days | \$500,000 |
| Cuyahoga | Clean-up Cleveland | Combine the resources of FiveFour Productions with the great musician talent pool available in the Cleveland area. A formidable film soundtrack production center can be created. Along with the assistance of the AEP of NE Ohio, a minimum of 100 recording jobs can be created and/or restored at the same time in a sustainable business model that can successfully compete with more expensive production centers elsewhere (Los Angeles, NY, etc.) in the industry. This program would support enhanced education services in Cleveland schools to meet the unique educational needs of lead-poisoned children. Approximately 1,200 pre-school children and 4,000 kindergartners would benefit from additional educational support. Lead poisoning is a considerable problem in Cleveland and children who are exposed at an early age can overcome the effects of lead poisoning and live more productive and promising lives. | first class property services | 25 | 0 to 30 days | \$150,000 |
| Cuyahoga | Rehab of Business For Student Work Study Organizat | To assist local banks with the clean-up of foreclosed homes to be resold. Cleanup vacant lots, boarded up homes and abandoned property that has been targeted by economic turmoil by offering unemployed workers for general labor in restoration. The expected outcome is to provide decent homes with a positive appearance to prepare for resale. For 7 years I had a business in Cleveland Heights (Utopia Designs) in which I had leased from the Local High School (2 quarters) to work in my store. This was through the local school Work Study Program. By being leased from the state schools, I prepared them for life and future job. Trained them in proper work ethics. Importance of being on time, working cash register, over all teaching of work related issues in an effort to prepare our youth for the productive life ahead. The youth in the future of America. Due to the economic situation in NE Ohio, I was forced to file bankruptcy and closed the doors of my business which left many youth unemployed. I know with a little well appreciated help, I can get my business back up and running. Thank You and God Bless. | Utopia Designs | 10 | 0 to 30 days | \$10,500 |
| Cuyahoga | Cycling Projects | Cycling and pedestrian infrastructure including the Downtown Cleveland Bicycle Station, Train Avenue Bikeway, Lake to Lakes Trail, Karaman Park Trail, Ohio 14 Trail and Towpath Trail. Also, as road, park and bridge projects are approved throughout Cuyahoga County, or elsewhere in NE Ohio, the projects should be reviewed to assist in providing cycling transportation across as well. | ClevelandBikes | 100 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | RUDEVAS Growth | Funds to build new retail hair salon, train and educate students young or old about hair cutting & styling so he or she could become new stylist. School would also provide continue education to current stylist and barbers. | Salon & Spa | 45 | 31 to 90 days | \$180,000 |
| Cuyahoga | New Family Betterment | Funds to replace existing gas gutting older vehicle with fuel efficient/hybrid vehicle with safety rating made for new family with new born child | None | 2 | 0 to 30 days | \$30,000 |
| Cuyahoga | Green Products for the home | To promote, advise and let people try out our energy saving products which will help to reduce their monthly energy costs | MK Air & Water Purification Systems LLC | 2 | 0 to 30 days | \$10,000 |
| Cuyahoga | AMERICAN EAGLE MOVING GROWTH PROGRAM | Allow a small business with a great reputation an opportunity to grow and help create more jobs. We are the only moving company in Northeast Ohio that quotes an EXACT PRICE for any moving service. We were listed with the BBB as an ACCREDITED BUSINESS until we were unable to renew our membership and received what a SUPER-SERVICE AWARD from ANGIES LIST for 2008 that less than 2% of all service companies on their list can receive each year. I have worked really hard the past 5-10 years building this company unable to receive any financial help from any bank and have had many tough obstacles to overcome. I have a great company but have had to let a lot of my help go and often have to only using 1 truck and am struggling to stay in business and square up my debts. I know what I can do to create more jobs and be successful however, I need financial assistance in order to have a chance. Please consider my request and I would be happy to offer any information in order to be accepted. Sincerely, Charles Duane Bore, Toledo, Cleveland, OH | American Eagle Moving Company | 6 | 0 to 30 days | \$250,000 |
| Cuyahoga | Recession Food and Toiletries Baskets | Create gift baskets for the low income residents residing at Allerton apartments. The basket will consist of food products (bread, can goods and box products. . . The baskets will also include household products (toilet paper, dish soap, cleaning products. . .) due to the recession everyone is on the pinch, especially the low income. This project would help boost the morale of our community and help for 100 residents feel that the United States government understands their plight. | Allerton Tenants group | 0 | 0 to 30 days | \$4,000 |
| Cuyahoga | Driving aid for hemianopsia | The only thing left to do with hemianopsia are sunglasses and difficult to learn how to use glasses, called bionic driving glasses. I have an idea for an invention to modernize this visual aid. The expected outcome is less focused on profit and more focused on aiding people who cannot legally drive in their state. Levels of functional vision needed to be able to legally drive varies from state to state. In the US 3.5 million people need low vision. | Sole proprietor | 3 | 0 to 30 days | \$3,000 |
| Cuyahoga | Car Repair | I need funding from an agency to get my car repaired. I am not eligible for PRC, but I am a daughter and caregiver to my 84 yr. old mother who has colon cancer and has had a stroke. There is no funding available for transportation (other than to her medical apps.) for grocery shopping, etc. or if I am able to return to work, I would have no transportation. Would like to see an agency get funding for this much needed service. Funding needs to be set aside to help people with misc. expenses. I cannot afford to repair my vehicle, as I have not been able to work in 3 years. Please help, as I am sure others are in need of these types of services or programs! | Private Citizen | 0 | 0 to 30 days | \$2,000 |
| Cuyahoga | Wastewater Treatment Plant Primary Digester Recirc | Thank you! increase capacity | City of Lakewood, Department of Public Works | 6 | 31 to 90 days | \$75,000 |
| Cuyahoga | Inclusion House/Locavarius Farm | Inclusion House/Locavarius Farm (HFLF) will be affordable co-housing units with an urban market garden/fish farm in the Backyards area of Cleveland, Ohio, and a farm in Madison, Ohio for additional crop production, an animal sanctuary, and a conference center. HFLF will be a nothp community garden, community health clinic, furniture/home furnishings bank, restora, water filtration firm, and a 24hr food coop and cafe. HFLF will house a community kitchen, community meeting spaces, auditorium, and offices for neighborhood organizations. There will be programs for youth, adults, and the disabled. HFLF will utilize green technology throughout, including solar thermal, geothermal, and vertical axis wind turbine energy generation, rainwater collection, composting toilets, and other energy efficient technologies. We expect to create housing, "living wage" jobs both in the construction phase and ongoing), tax revenue, and a shift from scarcity to abundance. At the moment quantification is difficult, but judging from anecdotal response from neighborhood residents, government officials, and others, this is a worthy and needed project. | Inclusion House/Locavarius Farm | 500 | 0 to 30 days | \$10,000,000 |
| Cuyahoga | SWINE FARM | land of about 30 acres plus farm, broiler feed to start pigs employees tractor truck trailer want to start this to help move the economy is the right way and help the needy by giving meat to food banks | B&Jswine farm | 5 | 31 to 90 days | \$250,000 |
| Cuyahoga | Electronic Medical Records | implement electronic medical records system for 7000 clients. This will be used by all MHS locations and interface with Cuyahoga HHS. | MHS, Inc. | 3 | 0 to 30 days | \$240,000 |
| Cuyahoga | Manhole Separation Project | sewer pipe replacement or add storm manhole. Many municipalities in North East Ohio and specifically North Olmsted are facing budget cuts. These cuts place the public health and safety in danger. Municipal budgets are being balanced specifically on the backs of firefighters and paramedics. Firefighters and paramedics have been hit and are more in need of public safety efforts and training in the near future, especially in North Olmsted. As a municipality that is in close proximity to and runs mutual aid to Hopkins International Airport, these layoffs reduce our ability to respond to Hopkins International Airport. North Olmsted firefighters and paramedics also serve a community with a large retail base that sees the highest population title with consumers. Many of these consumers who often forgo preventative health care until it is too late. This needed funding would partially cover firefighters and paramedics that have already been laid off or being them back to work and prevent further layoffs for up to 3 years after which debt service already on the books in North Olmsted will be reduced and the City will once again be able to fully fund the firefighters and paramedics to serve the City, Airport and surrounding areas. | City of Lakewood, Department of Public Works | 30 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | Firefighter/Paramedic and Public Safety Funding | sewer pipe replacement or add storm manhole. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Broadway Avenue Reconstruction | The project consists of the full depth reconstruction of the outside lanes of Broadway Avenue, a four lane roadway. The inside lanes will be milled and repaved as necessary, and the entire roadway will be overlaid with asphalt. Curb, underdrain and drive aprons will be replaced, along with curb ramps and drainage structures as required. The limits of the project are from the east and west co-position lines of Maple Heights and spans just over 2 miles. This is the major commercial corridor in Maple Heights with an ACD of approximately 15,000 vehicles. A large number of trucks utilize the roadway because of the proximity of the Norfolk and Southern Intermodal facility. The project will consist of the following items: - Full Depth Pavement Reconstruction - curb lanes (17,000 sq ft) - Grinding/Regravel - inside lanes (51,000 sq ft) - Curb and underdrain removal/replacement (19,000 ft) - Curb Ramps removal/replacement (55,000 sq ft) - Drive apron removal/replacement (19,000 sq ft) The pavement is in poor condition. The outside lanes are failed and require complete reconstruction, while the inside lanes require significant rehabilitation. This project will correct all deficiencies with the existing pavements. | City of Maple Heights | 120 | 181 days or more | \$1,900,000 |
| Cuyahoga | Construction of Public Safety Facilities for the D | This funding will allow for the construction of a new EMS headquarters facility that will house all of the administrative, operations, training/education activities for the Division of EMS, which supports both the Division of Police and Fire in first responder activity. The new location will provide up-dated equipment and space to meet the current and future growth needs for the Division of EMS and it will provide a secure environment to house all of our domestic preparedness response equipment. | City of Cleveland, Office of the Mayor | 70 | 31 to 90 days | \$8,000,000 |
| Cuyahoga | Fleet Apparatus Upgrade (Fireboat, etc.) | This funding will allow for the acquisition of new fleet apparatus and equipment for the Cleveland Division of Fire, which includes acquiring two Hook and Ladder apparatus; two Fire Engines; a state-of-the-art and efficient firefighting vessel and a new Fireboat through Homeland Security Grant dollars. | City of Cleveland, Office of the Mayor | 20 | 91 to 180 days | \$7,800,000 |
| Cuyahoga | Division of Fire Personal Protective Gear | This will allow to apply for the Assistance to Fire Grant for funding to purchase critical fire protection gear for Cleveland Division of Fire. | City of Cleveland, Office of the Mayor | 50 | 91 to 180 days | \$2,500,000 |
| Cuyahoga | Home rehab | We will be able to Eco friendly home rehab, emphasizing energy efficiency, for homes in neighborhoods that have been impacted by the foreclosure situation. We will be able to apply design concepts, such as adding windows and roof elements to maximize natural solar energy for heating, cooling and electrical production. We will utilize building materials such as eco friendly insulation, and low VOC materials. This program will also address well paying jobs with benefits to help boost local economy. The goal of this program would allow CDFM to partner with various city departments to follow the demolition of properties that are located in vacant and providing guidance on how the demolition can be used. For example, instead of building new structures, creating green spaces, gardens, an urban farm or a garden incubator will all provide opportunity for residents in Cleveland to have access to fresh produce and green space most adaptable to the process. | Maintenance Innovations | 10 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Cleveland Scholarships for Education & Training (C | Assistance for programs to get people outdoors, physically active and involved in regular exercise and eating healthier. Assistance with funding to implement the "Get Out and Play" program, a project addressing inactivity and obesity. This program includes individual assessments of BMI and fitness levels, implementation of a structured, outdoor activity program, and educational information on the benefits of having healthier eating habits and lifestyle. Anticipated results: 1) lower BMI measurements; 2) increased daily physical activity; 3) increased fruit and vegetable consumption; and 4) increased knowledge of nutritional and health issues. | City of Cleveland, Office of the Mayor | 5,000 | 31 to 90 days | \$16,500 |
| Cuyahoga | Community based wellness initiative | The Cuyahoga Community College/City of Cleveland collaboration sent approximately 500 Cleveland Metropolitan School District students to college free of charge who graduated in the 2007-2008 school year. Our goal, each school year is to fund the two year tuition, for approximately 500 graduates each year. This funding will help us achieve that goal and if each student graduates and gains employment, the potential to create 5,000 jobs is based on students attending college between the 2008-2009 through 2013-2014 school years. | Personal Training | 2 | 31 to 90 days | \$80,000 |
| Cuyahoga | REVISED: Cleveland Scholarships for Education & Tr | Mayor Jackson established a Project Labor Agreement to ensure that 20% of Clevelanders work on construction sites in the City. Approximately twenty students per year graduating from Max S. Hayes High School will enter the pre-apprenticeship program at the Union Construction Industry Partnership/Apprenticeship Skills Achievement Program Apprenticeship (UCIP-ASAP). This funding will allow the program to continue. | City of Cleveland, Office of the Mayor | 5,000 | 31 to 90 days | \$16,500,000 |
| Cuyahoga | UCIP-ASAP Construction Apprenticeship Work Progra | This funding will allow for the construction of a new EMS headquarters facility that will house all of the administrative, operations, training/education activities for the Division of EMS, which supports both the Division of Police and Fire in first responder activity. The new location will provide up-dated equipment and space to meet the current and future growth needs for the Division of EMS and it will provide a secure environment to house all of our domestic preparedness response equipment. | City of Cleveland, Office of the Mayor | 100 | 31 to 90 days | \$240,000 |
| Cuyahoga | Construction of Public Safety Facilities for the D | This request would double the size of our existing community education/training programs, which would increase the number of direct physician referrals and significantly increase the amount of people assisted with management of chronic diseases such as diabetes, heart and hypertension. This request would double the size of our existing community education/training programs, which would increase the number of direct physician referrals and significantly increase the amount of people assisted with management of chronic diseases such as diabetes, heart and hypertension. | City of Cleveland, Office of the Mayor | 40 | 181 days or more | \$8,000,000 |
| Cuyahoga | EMS Community Education | My goal is to be known as a trucking company that services more than just one sector. We specialize in intermodal container transport, heavy machinery relocation, railroad service, drives, and lander services. With the right team we can change the dynamics of commercial transport in which the savings will be passed on to the consumer. This will allow the City to replace 100 older vehicles that are low MPG and emit high emissions and retrofit 100 Waste collection packers and Street sweepers with emission control to reduce pollutants in the neighborhoods they service. | City of Cleveland, Office of the Mayor | 2 | 91 to 180 days | \$150,000 |
| Cuyahoga | Citywide Site Assessment Grant | This project will allow for the remediation of a brownfield site in preparation for a project for a large institution. | City of Cleveland, Office of the Mayor | 300 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | A trucking company for all your transportation nee | This project will provide for the complete reconstruction of E 141st Street between Rockside Road and South Industrial Parkway and Maple Heights Boulevard between Lee Road and Broadway. The pavement has outlived its useful life and is in a critical condition. The existing asphalt surface course and concrete base will be removed and replaced with a inch thick concrete pavement. The work will also include installation of ADA sidewalk ramps and replacement of driveway aprons as required. The investment will be protected by the installation of new underdrains along the full length of the improvement. Storm sewers will be replaced or repaired as required. The total surface area of pavement to be replaced is approximately 12,250 sq yd over approximately 3000 lineal feet of pavement. This project addresses the most severely deteriorated segments of the Maple Heights sanitary sewer system. The major goal of the project is to reduce or eliminate any clean water inflow and infiltration into the existing sanitary sewer system. The project also reduces an existing sanitary sewer pump station that services a 76 size industrial park with a design flow of 127,000 gpd. The project includes the separation of approximately 24 combined manholes with over/under installations of sanitary and storm sewers. This reduces the volume of inflow and infiltration into the sanitary sewer system and also allows access for routine cleaning, televising, and maintenance. The manholes are located on Maple Hts Boulevard from Broadway Avenue to West Boulevard and on Beachwood at the intersections of Westbury, Hawkwood, Elderton, Elderton, and Hawkwood. 4000 lineal feet of storm and sanitary sewer with over/under installations and combined manholes will be replaced on Clement and Philp and the rear yards of Milan and Harlan. This will reduce inflow and infiltration into the sanitary system and the resultant backup of sewage into the basements of residences. To make Lakewood, Ohio a "REGREEN" city in regards to residential housing by 2011. This will be done via the guidelines set up at www.regreenprogram.org and supervisory consultation from members of The American Society of Interior Designers' Foundation and the U.S. Green Building Council. The goal is to retrofit or "REGREEN" 40-60% of the 14-630 rental units currently located in the city http://profiles.nationalselection.com/Ohio/Lakewood If approved, an average dollar amount of \$5,000 would be applied to each unit to improve the efficiency of each unit, to increase the valuation of each unit and therefore increase the overall value and attraction of Lakewood. These improvements would directly increase home values, decrease energy costs and greatly improve Lakewood's draw as a place to live and work. Specific improvements would focus on improved home performance for the following areas: HVAC, plumbing, lighting/electrical, air quality and landscaping for each unit. The REGREEN Lakewood project will be a revolutionary example of Green practices bringing the downtown inner-suburb ring of Cuyahoga county onto the international stage. | Dockery Trucking | 15 | 0 to 30 days | \$7,500,000 |
| Cuyahoga | Alternative Fueled Vehicle Purchase and Diesel Emm | This project will allow for the remediation of a brownfield site in preparation for a project for a large institution. | City of Cleveland, Ohio | 20 | 91 to 180 days | \$3,000,000 |
| Cuyahoga | Mid/Town Brownfield Game | This project will provide for the complete reconstruction of E 141st Street between Rockside Road and South Industrial Parkway and Maple Heights Boulevard between Lee Road and Broadway. | Cuyahoga | Upgrade living quarters in fire station | Fire station built in 1972 for staffing of 8. Presently staffed with 8 including a female. The station is not sprinklered. No hood system in kitchen. No decontamination room, no separate room for storage of turnout clothing and gear. Living quarters not isolated from apparatus room. No security system in place | Lyndhurst Fire Department | 30 | 91 to 180 days | \$1,500,000 |
| Cuyahoga | Downspout Separation Program | Disinfectant, storm sewer cleaning and inspection, rain barrels. | City of Lakewood, Department of Public Works | 50 | 31 to 90 days | \$15,000,000 |
| Cuyahoga | Emergency Generator | Install emergency generator in the restoration hall/buffet campus. | Lyndhurst Fire Department | 2 | 31 to 90 days | \$100,000 |
| Cuyahoga | Outfall Monitoring | Continually monitor combined sewer overflow volumes. | City of Lakewood, Department of Public Works | 15 | 31 to 90 days | \$300,000 |
| Cuyahoga | Higher education | I'm requesting financial assistance for my daughter, who has always been an honor roll student. She was chosen along with several other deserving students by the people to people association to tour and study in Europe this summer. I feel that this opportunity would really help her to get into the college of not only her choice but period. And not to mention that this is an great opportunity for any young person. I feel that this trip will mature her and open her eyes to a whole new World. Please allow OhioState Philpot the opportunity that our act of savagery her age-go to experience. And being a single parent can't give it to her without assistance from you. Thank You in advance for taking the time to consider us. Diana Thomas | D'Nautica Philpot | 0 | 31 to 90 days | \$7,500 |
| Cuyahoga | Wastewater Treatment Plant Logic Controller/Data S | Enhance monitoring and control. | City of Lakewood, Department of Public Works | 4 | 31 to 90 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Education and Innovation Enrichment | Through educational enrichment provide school systems and other areas (including Healthcare centers, senior centers, etc.) education on the need and area's opportunity to move towards "cleaner" energy options at the individual and group level. By educating individuals and organizations both young and old the benefits to speed the awareness and uptake of new opportunities. A focus of this organization will also be making by county to spur innovative and entrepreneurial approaches that will create solutions for existing challenges not being met in each of our communities and increase public awareness locally. | Fast Track Education & Recovery Services | 120 | 91 to 180 days | \$5,050,000 |
| Cuyahoga | Highway Repair Division | We are a General Contracting Firm and would like Stimulus Funds to expand our business and do Highway/Roads work. We need the funds to start up a new division in this area. We expect to create at least 30 to 40 new jobs. | Ohio Legacy Construction Inc | 40 | 31 to 90 days | \$125,000 |
| Cuyahoga | Reward for Fiscally Responsible Homeowners | My wife and I are responsible homeowners who pay our bills on time and feel as if we are being left out of any stimulus rewards/benefits for not being in fiscal trouble. As such, we would like a very small portion of the portion of the stimulus funds allocated to Ohio. | N/A | 0 | 0 to 30 days | \$1,000 |
| Cuyahoga | Corporate Wellness and Physical Therapy | The expansion of an existing gym into a health and wellness center adding a physical therapy/rehabilitation clinic and a corporate wellness program catering to the local area. This will save ten rent positions and add at least ten or more positions. Including trainers, physical therapists and therapists assistants. We will be able to offer anyone who comes through the door a complete health screening, including body assessment, weight assessment, quality of life screening, blood work, diet and nutrition and a complete exercise program designed for their needs. In the day of ever increasing health costs our programs have proven results in creating a healthier workforce thereby reducing the potential increase in insurance claims thereby reducing the percentage of increase in annual insurance premiums. The money will be used to build out and equip the rehab center and without spaces in the gym to accommodate up to one thousand members in a safe and state of the art environment using using technology and science to improve an individual's health, physically, mentally, emotionally, and psychologically taking on the challenges that affect our communities. | Team Energetics | 20 | 0 to 30 days | \$475,000 |
| Cuyahoga | Bicycle Summit | Funding would support an annual conference to promote cycling for healthy sport, recreation and transportation, including speakers, events and seminars and families, including bike to work rides, history rides and other benefits for those riding their bikes. The annual conference was started in 2008, but needs stable funding. | ClevelandBikes (501C3) | 5 | 0 to 30 days | \$10,000 |
| Cuyahoga | special ed educutions | My son is hearing impaired and has ADD. He requires a special ed school. This money would be used for his education thru 12th grade. he also needs hearing aids, hearing tests and extra medical needs. this money would help with the costs mostly to continue his education. | private household | 100 | 91 to 180 days | \$50,000 |
| Cuyahoga | Start plumbing bussiness | I would like to start a plumbing company. I have over ten years experience in the fields. I have a lot of good ideas to start a successful plumbing company. With money to get the business started I could purchase the necessary equipment, tools, stock, vehicles, and advertisement. I would be able to employ at least four to five people from the start. If I was able to start this business from federal stimulus money I would be more than willing to give back to my community by helping people with their plumbing projects who could not afford to pay a regular plumber. Possibly open work from local county and by government. Furthermore helping out with community projects when needed. | Plumbing company to be named | 5 | 0 to 30 days | \$30,000 |
| Cuyahoga | Exercise for youth | We would like to expand our playground area at our childcare before and after school program so that the children can have a better opportunity to explore outside and to receive more physical activities that are structured. Please help us to help a society that has become so busy when it comes to outdoor activities | Toddler Inn Preschool | 4 | 91 to 180 days | \$10,000 |
| Cuyahoga | Project Student Loans | I have an est \$9000 in student loans and no college degree. I had to stop my education so that I could begin to work full time. I would like a small piece of the stimulus package to be able to pay off my loans, so that I can focus on building my business from scratch and earn my degree. I understand there are many, many important issues in the USA today and better ways to spend stimulus monies. However, America, I do have the freedom to ask. Thank you for your time and consideration. | self | 0 | 0 to 30 days | \$9,000 |
| Cuyahoga | Savannah Sanitary Sewer Project | Remove and replace approximately 1,000 LF of sanitary sewer with new 12" sanitary sewer thereby eliminating an SSO. The Project would include replacing four (4) existing manholes. To employ at least 25 people to refurbish a home to make livable, and salvage - and will help the bank to remain in business. I can go for my family to live in this home. | City of East Cleveland | 20 | 31 to 90 days | \$336,000 |
| Cuyahoga | save home in foreclosure-employ 25 people | Insulate home to include installing insulation where none exists. Install Storm windows and window replacement where none exist. Install insulated storm door Waterproof basement Roof Replacement Interior repairs All Fix drainage issue in backyard Electrical Upgrade - to code Make home livable | contractor | 25 | 0 to 30 days | \$150,000 |
| Cuyahoga | Roofing | My company is Western Roofing. I have been in business in Ohio for 25 years. I would like to do community projects for the state of Ohio. I am responsible and have an excellent reputation. I read work. | Western Roofing | 30 | 31 to 90 days | \$250,000 |
| Cuyahoga | Eco Butter | Form a small business owner who has created a Eco-Friendly Baby line. I have the team fired up and ready to go. I have not started funding. I am a Cleveland Native and would like to keep the business local. It's very important to our families to understand the sensitivity purity of babies skin and having the option to accommodate that. | Butter LLC. | 10 | 0 to 30 days | \$10,000 |
| Cuyahoga | seamstress for uniforms | As a seamstress and would like to be able to make the uniforms for people of any government jobs. I have been forced out of work and onto welfare in order to take custody of my 4 grandchildren ages 1, 2, 6 and 7 I have commercial sewing machines and I would like to help a family in need. Thank you for your time and consideration. Thank, Karen Frederick | Fantasia Designs | 50 | 31 to 90 days | \$250,000 |
| Cuyahoga | St. Clair Resurfacing and Hydrant Replacement Prog | The repaving of approximately 5,200 linear feet of a main east-west thoroughfare in the City of Euclid, between East 22nd Street and Babbin Road, that serves a large number of the City's business community. The project will also replace fire hydrants along the street. Most notably, the project seeks to resurfaced over 2,400 jobs from the Lincoln Electric Company which is served by St. Clair Avenue. | City of Euclid | 2459 | 31 to 90 days | \$2,012,500 |
| Cuyahoga | East 266th Street Roadway Project | 3,650 linear feet of water line replacement, pavement replacement, curb replacement, and partial sewer line replacement. | City of Euclid | 27 | 31 to 90 days | \$2,720,000 |
| Cuyahoga | Euclid Citywide Sidewalk Replacement Program | The replacement of approximately 286 miles of city sidewalk. | City of Euclid | 30 | 91 to 180 days | \$15,000,000 |
| Cuyahoga | Euclid Citywide Street Resurfacing and Curb Replac | The resurfacing of approximately 143 miles of public roadway and the associated curbs. | City of Euclid | 230 | 91 to 180 days | \$23,000,000 |
| Cuyahoga | Shoe Kiosk | Opening shoe kiosk in neighborhood mall. Shoes have proven to sell successfully at trade shows and on-line. Will start kiosk with 4 FTE (full time equivalents). Long term business plan will include adding additional office jobs to buy and expand inventory. | MTM Imports, LLC | 4 | 0 to 30 days | \$30,000 |
| Cuyahoga | Euclid I-90/OH-2 Freeway Sound Barrier Replacement | To replace an approximate 2,273 miles of freeway sound barriers that are in severely deteriorated condition with the Ohio Department of Transportation's most current state-of-the-art sound barriers. | City of Euclid | 10 | 31 to 90 days | \$4,100,000 |
| Cuyahoga | Senior Safety Walk-In Bathtub Program | To market and inform our senior citizens of the risks of fall in bathing and to aid in their safety and independence for bathing allowing them to remain in their homes longer without having to go to assisted living. We will be educating on the use of Walk-in bathtubs and how they can eliminate the need for a nursing home and bring dignity and independence to our senior citizens. | Secure Bath | 3 | 0 to 30 days | \$100,000 |
| Cuyahoga | NEO Call Center Proposal | We are currently in negotiations to build out a new facility for a large Northeastern Ohio company that will create/retain up to 300 jobs in Cuyahoga County. Their specifications call for a LEED Silver Certified build-out of existing facilities, and they have requested a tenant improvement allowance of \$1.2 million in addition to approximately \$800k worth of changes necessary to bring parking and utilities up to spec for their needs. While we are able to provide some of the capital for this project, the scope and amount necessary could potentially hinder our ability to take on additional prospects and build out suitable work environments for them. This prospective tenant would be signing a 10 year lease, with a 5 year option, and have the potential, based on their previous projects similar to this one, to expand within our park in the next 2-4 years, creating more jobs and a larger tax base. | Alpha Park Inc. | 300 | 91 to 180 days | \$1,500,000 |
| Cuyahoga | funds recovery | Due in part to the economic downturn many customers of our company have suffered severe difficulty and are unable catch up on their accounts. Many have closed or are facing closure. Because of this lack of cash flow it is becoming increasingly difficult to stay current with our creditors. By receiving these additional funds we would be able to pay our creditors, do necessary repairs to our capital equipment and continue our daily operations without layoffs or facing more severe financial issues. | Diamond K Meats, Inc. | 15 | 0 to 30 days | \$500,000 |
| Cuyahoga | Euclid Joint City/Library Alternative Energy Demon | The Library and the City jointly propose to demonstrate the benefits of alternative energy sources by developing commercially viable wind, solar and geothermal energy projects for use by the City and the Library, and by creating an energy resource center for the community at the Library. This project will also establish a basis for commercially viable solar and wind energy sources in the community's industrial areas, both supplying clean and environmentally friendly energy, as well as serving to attract businesses interested in alternative energy to the community's industrial corridor. The project will conclude with the installation of photovoltaic solar collectors and by the foundation for wind and geothermal energy projects. | City of Euclid | 10 | 31 to 90 days | \$1,075,000 |
| Cuyahoga | Stimulus Spending Card | Provide each Ohioan a "Stimulus Spending Card" in the amount of \$750.00. In order to qualify, a person has to be a resident of the state of Ohio with a valid SSN. (Use state tax returns as a starting point to identify qualified individuals (The \$7.5B was derived using 10M qualified OH citizens). Since this is a Spending Card, the recipient will be required to purchase goods. They will not be able to save or pay down debt. \$7.5B would go right back into the Ohio economy, stimulating local businesses, retailers hire more instead of laying off, state and local governments share in sales & other taxes income. Everyone benefits. Ohio banks would bid to produce the cards. Thus the cost of producing the cards, implementing & maintaining the card program would stay within the state. The Spending Card could have an expiration date to encourage citizens to spend immediately. If the cards are mailed 4/1/09, have an expiration date of 10/31/09. This is a simple program, benefits everyone, doesn't discriminate (except for non-OH residents & aliens), can be easily controlled & the money can be tracked where it was spent. As such, you get immediate results on spending. | N/A | 5000 | 0 to 30 days | \$7,500,000,000 |
| Cuyahoga | Euclid City Hall Roof Replacement | The replacement of approximately 33,000 square feet of flat roof on the Euclid Municipal Center | City of Euclid | 10 | 31 to 90 days | \$385,000 |
| Cuyahoga | Strowder Funeral Home | Rescue 60 year old business and job from pending foreclosure in economically depressed neighborhood. If foreclosure is averted, the business will be able to advertise and thus grow and develop 4 additional fulltime positions within a year. 9 total fulltime positions within 18 months. | Strowder's Funeral Chapel | 12 | 0 to 30 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Euclid Old City Hall Improvements - Exterior Impro | \$220,000 for the buck pointing of the City of Euclid's Old City Hall, for the replacement of all windows and for the retrofitting of the building to comply with the Americans with Disabilities Act by installing hand rails, ramps and other accessibility improvements. | City of Euclid | 10 | 31 to 90 days | \$220,000 |
| Cuyahoga | Euclid North Street Annex Capital Improvements | Interior and exterior improvements on a historic building, the first schoolhouse of the Village of Euclid. Improvements including windows, roofing, heat-pooling, complete interior renovation (drywall, interior framing, restrooms, etc.). | City of Euclid | 10 | 31 to 90 days | \$100,000 |
| Cuyahoga | Sulfur Tolerant Fuel Cell Manufacturing Facility | When energy markets are energetic, wind-fuelled generation. Unleashed local market demands exist where fuel cells may contain sulfur (e.g. diesel, biogas). TM is in joint venture discussions with a major supplier & fabricator of fuel cells to build & operate a 1 MW per year pilot manufacturing/fabrication facility. TM is of 10 companies in the world to demonstrate a pilot a low cost, sulfur-tolerant fuel cell system at the industrial scale with competitive advantages through proprietary low cost cell materials & production methods. The JV would receive a license to make and market TM's sulfur tolerant technology in OEM cell & stack components. TM would be a first customer. Presently worldwide SOFC systems development is severely limited by a lack of low cost, quality components. Specialty boutique engineers produce \$400 per kW of electrolyte alone with no obvious route to low cost. The facility would provide a unique, quality alternative to all SOFC developers & would serve as a Tier 1 supplier to the growing SOFC market. Construction of an SOFC Electrolyte 1 MW/yr Prototype Fabrication Facility specializing in sulfur-tolerant OEM components. | Technology Management Inc. (TMI) | 12 | 0 to 30 days | \$2,750,000 |
| Cuyahoga | Stay In My Home | \$278 is the amount of money I need to continue to pay my for the 4 months so that I can stay in my home, continue to look for full time employment in healthcare (I'm a lost of CT technologist). There would be one less home loss to foreclosure in my neighborhood, and I'd be given more time to continue to search for employment while the economy recovers. | Anita Luton | 1 | 0 to 30 days | \$2,728 |
| Cuyahoga | USDA Reviewed and Ranked Program on Waste to Bioga | This USDA Phase II program was recommended for funding by the USDA but was not because of budget constraints. The deliverable was a 1-MW scale prototype system for operation on NH3 (ammonia) contaminated biogas, a problem due to mixing of cow manure & urine. Biogas would be collected from anaerobic digesters (AD) which exist on farms throughout the US. TM collaborating with The Ohio State University Ohio Agricultural Research & Development Center (CARD), proposes to show that NH3-contaminated biogas can be converted into useful electricity & heat by employing TM's Solid Oxide Fuel Cell (SOFC) system, a 3rd Frontier investment, now being prepared for field testing in farm settings. Biogas conversion to useful energy solves an acute problem for the US agriculture industry. Reports have suggested that 14052 kW/yr per acre of electricity could be produced. Also a reduction of livestock ammonia by 10% would reduce annual particulate-related health costs by \$4-billion. National forecasts suggest system sales up to \$2.7 million by 2016 in Ohio and Northern Midwest states (up to 2.4 AM). Outcome: Pre-commercial demo of Ohio-manufactured systems operating on renewable AD biogas. | Technology Management Inc. (TMI) | 4 | 0 to 30 days | \$350,000 |
| Cuyahoga | Project IMPACT - Health Initiative | To develop Community Health Centers in socioeconomically depressed areas of Ohio where access to care is limited and needs are rampant in particular to provide care to underserved & underserved elderly, public aid recipients and others that require access to preventative care. To minimize usage of emergency rooms and provide more preventative measures to constituents. Along with preventative care, provide community health and wellness education to aid in reducing the occurrence of HIV/AIDS, Diabetes, Cardiovascular Disease and other communicable diseases. Promotion of prenatal and healthy baby care to ensure our future generation is given the appropriate means to a healthy life. | Red Phenix Consulting Group | 100 | 31 to 90 days | \$3,000,000 |
| Cuyahoga | Transition Strategy for NEO Manufacturers focused | This program is a pilot process to provide smaller manufacturers in Northeast Ohio (revenues \$5 - 25M) the tools needed to transition to the emerging fields of advanced energy markets. The program will improve companies' top line growth and accelerate manufacturing growth in the region. The program will: • Identify characteristics of manufacturers who have successfully transitioned into either the healthcare or advanced energy markets • Create a tool to analyze and rank the 2,000 small manufacturers in our region and provide a metric to determine which manufacturers would be suitable candidates to enter these markets and participate in this program • Assess suitable candidates (~ 400 manufacturers) of their current capabilities • Identify with the assessment results which manufacturer should transition into • Develop a strategy for each company to mitigate potential risks the manufacturer might experience when transitioning into the new markets. At least 100 manufacturers will be assessed to re-engineer their company to transition through the implementation of proven growth planning methodologies to enter the new market with products and services. | MAGNET | 10000 | 31 to 90 days | \$5,125,000 |
| Cuyahoga | Education Funding | Lost my job due to the automotive industry crisis. I have not been employed for 6 months. Most employers are looking for someone in my field with the FRP certification. I have found a course on-line and would like to take it so that I can get back into the job market. I don't like being unemployed and this is the first time in my numerous years that I have been unemployed. | M Kathryn McKinney | 1 | 0 to 30 days | \$3,000 |
| Cuyahoga | Euclid Citywide Bicycle Plan | The City of Euclid will develop a citywide network of safe bicycle routes connecting residential areas to work, school, shopping, and recreation destinations, and make bicycling accommodations a routine component of roadway and development projects. The City will make every effort to coordinate its planning with surrounding Cities so that regional transportation goals are achieved. 1. The Plan will endeavor to make Euclid a more bicycle-friendly city by actively encouraging public and private development and maintenance of facilities that allow easy bicycle access to all of its amenities. 2. The Plan will provide for good bicycling infrastructure and facilities around shopping areas, parks and other attractions to enhance accessibility, improve personal health, and preserve the environment. | City of Euclid | 15 | 91 to 180 days | \$750,000 |
| Cuyahoga | Euclid Railroad Rails to Trail Project | The conversion of an approximate 15,000 linear feet of a now-vacant former railroad right-of-way and adjacent parcels to recreational trails that connect Euclid Avenue to Euclid Creek MetroPark creating a 5-mile multi-purpose recreational trail loop. This project has a regional impact as it involves the City of South Euclid, the City of Euclid, the City of Cleveland and the Cleveland Metroparks. | City of Euclid | 10 | 31 to 90 days | \$600,000 |
| Cuyahoga | Transition Strategy for NEO Manufacturers focused | This program is a pilot process to provide smaller manufacturers in Northeast Ohio (revenues \$5 - 25M) the tools needed to transition to the emerging fields of health-care markets. The program will improve companies' top line growth and accelerate manufacturing growth in the region. The program will: • Identify characteristics of manufacturers who have successfully transitioned into either the healthcare or advanced energy markets • Create a tool to analyze and rank the 2,000 small manufacturers in our region and provide a metric to determine which manufacturers would be suitable candidates to enter these markets and participate in this program • Assess suitable candidates (~ 400 manufacturers) of their current capabilities • Identify with the assessment results which manufacturer should transition into • Develop a strategy for each company to mitigate potential risks the manufacturer might experience when transitioning into the new markets. At least 100 manufacturers will be assessed to re-engineer their company to transition through the implementation of proven growth planning methodologies to enter the new market with products and services. | MAGNET | 10000 | 31 to 90 days | \$5,125,000 |
| Cuyahoga | Euclid Sims Park Outdoor Amphitheatre Improvements | The construction of an approximate 200' rear outdoor amphitheatre at Sims Park the City's primary lakefront park. The project is intended as a public amenity that will help connect the City of Euclid's Downtown Business District to Lake Erie, encouraging both Downtown and lakefront private development. | City of Euclid | 10 | 91 to 180 days | \$400,000 |
| Cuyahoga | College Access: Scholarships, Advising, Resource C | Cleveland Scholarship Programs serves economically disadvantaged students (traditional and adults) in Northeast Ohio. The agency plays a role in revitalizing the region's economy by helping to fill the pipeline of college-educated workers. CSP requests \$1.5 million to support: Advisory and Retention Services: Increases the number of students who are college-ready. Assists students in planning for postsecondary education, exploring career options matched to high-demand jobs, and finding financial resources so they can graduate with minimal student loan debt. Scholarships: In 2008, CSP awarded \$2.6 million in scholarships to 2,304 high school and adult students. The agency forecasts each dollar of its own to obtain an additional \$13 in financial aid for students from other sources. Scholarships are crucial for first-generation students to enter and remain in college. Goal: fund 400 students under stimulus initiative. | Cleveland Scholarship Programs (CSP) | 400 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | Medical Product Development Funding Program | Resource Center: Provides free expert college access and financial aid advice to assist traditional and adult students, veterans and dislocated workers. Surges in unemployment have driven up the number of adults visiting the Center to retool their skills. Building upon the strength of the highly successful Cuyahoga County New Product Development Loan Fund, the proposed program will encourage the development of new medical products across the State. Grant funds will be awarded through a competitive process in amounts from \$15,000 to \$150,000 for their development. Funds will be used by entrepreneurs and small businesses of less than \$50 million in revenue to advance their product concepts toward commercialization including such things as market research, competitive analysis, patenting, engineering, design, prototyping, testing, and product launch. The Fund will be marketed statewide and will solicit proposals several times throughout the year. Proposals will be reviewed by a panel of individuals experienced in product commercialization with grants being made to the ideas with highest probability of commercial impact. Manufacturing with a significant value-add within the State will be a requirement of any award. Milestones will be established for all projects and funds for projects above \$50,000 will be dispersed in staged amounts depend upon achieving the milestones. The overall project is expected to create 100 new products. | MAGNET | 400 | 0 to 30 days | \$10,000,000 |
| Cuyahoga | Euclid Parks and Recreation Department Maintenance | The replacement of 2,025 square feet of roof; the replacement of 9 windows with high efficiency glass block; the replacement of 11 garage doors with high efficiency doors; the replacement of 2 garage doors with high efficiency glass block; and the replacement of the HVAC system. | City of Euclid | 10 | 31 to 90 days | \$108,000 |
| Cuyahoga | electronic medical records and medication error re | MDG is a supplier of electronic medical records and automation the prevents medication errors. We sell our Ametec. This money will be used two ways: 1: We will offer a reduced price to the hospitals by utilizing some of these funds to make available our technology. An example H&B Medical Center in Galesburg needs our technology to prevent errors in the operating room. They cannot afford it and have asked for federally backed warrants which have been cut from the Federal Budget. 2: We want to move manufacturing and assembly to Ohio from Israel. We need access to funds for this to happen. We have discussed this with Senator Brown and Lt. Governor Fisher. 3: Today we have 15 employees in Ohio and would add substantially more. We employ 30 US citizens around the country. We have just our employees and need back 10% in salaries. We desperately need help from the State and federal Government. | MDG Medical Incorporated | 100 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Alternate Energy Product Development Funding Progr | Building upon the strength of the highly successful Cuyahoga County New Product Development Loan Fund, the proposed program will encourage the development of new alternate energy products. Grant funds will be awarded through a competitive process in amounts from \$15,000 to \$150,000 for their development. Funds will be used by entrepreneurs and small businesses of less than \$50 million in revenue to advance their product concepts toward commercialization including such things as market research, competitive analysis, patenting, engineering, design, prototyping, testing, and product launch. The Fund will be marketed statewide and will solicit proposals several times throughout the year. Proposals will be reviewed by a panel of individuals experienced in product commercialization with grants being made to the ideas with highest probability of commercial impact. Manufacturing with a significant value-add within the State will be a requirement of any award. Milestones will be established for all projects and funds for projects above \$50,000 will be dispersed in staged amounts depend upon achieving the milestones. The overall project is expected to create 100 new products. | MAGNET | 300 | 0 to 30 days | \$7,000,000 |
| Cuyahoga | Ohio Stabilization & Revitalization Initiative | To retrain, stabilize and reconnected homes in socioeconomically depressed areas of Ohio in particular Cleveland and surrounding areas for use by homeless, unemployed/underemployed and those in transition. Provide education to participants in the form of money management, parental counseling and other services which will help them to maintain the housing upon completion of programs but also possess the necessary skills to be a contributor to society. Provide skills training to participants are viable and able to seek and secure employment with local businesses to place participants in intern and potential permanent positions. Provide counseling to small businesses and not for profit organizations that can benefit from organizational development, leader development, process improvement training to enhance their internal processes and increase their efficiency and effectiveness. | Red Phenix Consulting Group | 100 | 31 to 90 days | \$3,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | COPS Hiring Grant - Retention of 10 Police Officer | To retain 10 police officers, for a period of 3 years, under the COPS Hiring Grant that was scheduled to be terminated (7 scheduled to be laid-off and 3 vacant positions due to retirement). | City of Euclid | 10 | 0 to 30 days | \$2,850,000 |
| Cuyahoga | Euclid Public Safety Center - Homeland Security - | \$11.2M for the purposes of replacing the antiquated 1951 Euclid Police Station with a modern and efficient 40,000 square foot public safety center facility. \$100,000 for the renovation of approximately 750 square feet of dormitory for Euclid Fire Department personnel at the Station #1. The dormitory will be retrofitted to accommodate more personnel due to the consolidation of the stations and to accommodate both male and female firefighters. \$90,000 for the renovation of approximately 700 square feet of kitchen space at Euclid's Fire Station #3 and the repaving of 4,000 square feet of 8" concrete surface parking. \$1,750,000 for the purchase and installation of 10 emergency generators and battery backup for all city buildings for use in the event of disaster, evacuation or any other such emergency. | City of Euclid | 134 | 91 to 180 days | \$13,140,000 |
| Cuyahoga | Reverse Engineering of Military Parts | supplier, or to have single source supplier. The DLA has hundreds of parts that meet these categories. The MAGNET and Techvise Ohio MEP Centers can provide: 1) access to many Ohio manufacturers, 2) assist with qualifying manufacturers to become DLA suppliers, and 3) provide the necessary services to assist manufacturers more personally due to the consolidation of the stations and to accommodate both male and female firefighters. \$90,000 for the renovation of approximately 700 square feet of kitchen space at Euclid's Fire Station #3 and the repaving of 4,000 square feet of 8" concrete surface parking. \$1,750,000 for the purchase and installation of 10 emergency generators and battery backup for all city buildings for use in the event of disaster, evacuation or any other such emergency. The proposed program outlines the steps for manufacturers to become suppliers to the DLA and for identifying and qualifying suppliers. Many Ohio manufacturers who are in the auto supply chain will be targets to perform the military part manufacturing. We expect to have 60 products engineered and Ohio manufacturing sources qualified. The following are the steps to qualify a supplier where no technical data package exists: 1. Obtain part from DLA 2. Pull Mill-Specs and Evaluate 3. Confirm Business Case A. Conduct Material Analysis B. Reverse Engineer parts Our car or student. | MAGNET | 500 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Financially burdened student | I am a student that is just trying to make it in the real world. I was raised humbly and live humbly, but I still find it extremely hard to pay for school. Have bills ranging from tuition to healthcare. If you could spare any monies to help me out I would greatly appreciate it. Every day I see new articles showing billions of dollars going to people who go out and party with it, I granted I get any help from you I will be one happy guy. I still need to ask if they can get billions why can't I get a couple of thousand. That is why I am writing you today in this request. If a government is that I not feel anything I do that. I just want to be someone with my life, and not be stuck paying for the rest of my life, as it looks right now I and when I finish school I will be paying back loans till I am almost ready to retire. I am just starting to get ready to start my life and am already worried to be successful. I read everyday how you are giving people and organizations a kick and to be frank they are the reason we are in the pickle that we are in, please help me to finish school by allocating a small amount of funds. | Student | 1 | 31 to 90 days | \$30,000 |
| Cuyahoga | Euclid Dog Pound Roof Replacement | The replacement of approximately 2,400 square feet of flat roof and 5,000 square feet of pitched roof. | City of Euclid | 7 | 31 to 90 days | \$70,000 |
| Cuyahoga | Workflow Electronic Health Records | Workflow.com is developing, installing and marketing a unique, world class electronic health record. President Obama has allocated \$19.2 billion for the purchase and installation of electronic health records. Workflow.com stands poised and ready to capture the market. This is an initiative if we can muster the resources (in terms of additional employees and capital). The CEO of Workflow.com is Paaky Hyland, the founder of Hyland Software. Hyland Software controls the largest jobs in Ohio, even in these difficult economic circumstances. We feel that Workflow.com can be the same engine of economic growth for the state of Ohio. We are confident that we can create good, high tech, high wage jobs and keep the best and brightest Ohioans in Ohio. Doctors will adopt electronic health records in the next five years. Billions of dollars will be spent. The question is whether those dollars will be spent buying a product from Ohio company creating jobs in Ohio. With this additional capital, we expect to be able to close additional deals, assist those deals and make those new clients happy. We expect a few lines return on any stimulus money we receive. This project will assist Ohio's manufacturers create more sustainable (green) practices and create the green jobs of the future. This is a product thing that MAGNET has been developing for a year and will be launched in April. It is a show-rep and has an aggressive marketing launch plan. The project will be delivered in four phases: A. programing session with company management to set sustainability goals and to get buy-in. The next step will be a sustainability assessment which will look at the areas, products, manufacturing processes, facilities, corporate culture and marketing. Based on this assessment MAGNET will then propose specific projects to be delivered by MAGNET staff to address sustainability issues in any or all of the five areas. The final phase will be the delivery of the services proposed and a measurement of outcomes. (Reduction in waste water, carbon emission reductions, health of green marketing programs, sales of new green products, energy savings.) All of these results will make Ohio manufacturers able to compete in the new green economy. The expected outcomes are that 20 companies will be assessed and 100 projects implemented. | Workflow.com | 100 | 0 to 30 days | \$2,300,000 |
| Cuyahoga | Sustainable Manufacturing Assistance | Doctors will adopt electronic health records in the next five years. Billions of dollars will be spent. The question is whether those dollars will be spent buying a product from Ohio company creating jobs in Ohio. With this additional capital, we expect to be able to close additional deals, assist those deals and make those new clients happy. We expect a few lines return on any stimulus money we receive. This project will assist Ohio's manufacturers create more sustainable (green) practices and create the green jobs of the future. This is a product thing that MAGNET has been developing for a year and will be launched in April. It is a show-rep and has an aggressive marketing launch plan. The project will be delivered in four phases: A. programing session with company management to set sustainability goals and to get buy-in. The next step will be a sustainability assessment which will look at the areas, products, manufacturing processes, facilities, corporate culture and marketing. Based on this assessment MAGNET will then propose specific projects to be delivered by MAGNET staff to address sustainability issues in any or all of the five areas. (Reduction in waste water, carbon emission reductions, health of green marketing programs, sales of new green products, energy savings.) All of these results will make Ohio manufacturers able to compete in the new green economy. The expected outcomes are that 20 companies will be assessed and 100 projects implemented. | MAGNET | 500 | 0 to 30 days | \$10,000,000 |
| Cuyahoga | carbon fiber composite components | With industry leaders on the development of carbon fiber components to replace metal. In 2008, as part of the Ohio Department of Development Engineering & Physical Science Research Communication Program, we began a collaborative relationship with the University of Dayton Research Institute to use nano-particles to enhance carbon fiber composite for commercial application. As part of this development, we have designed and built components for a number of our nano manufacturers, using this new technology, and we are now capable of manufacturing certified parts. We have been asked to manufacture 500 components over the next 3 years. In order to meet this requirement, we must invest in additional equipment, clean room environment, and create approximately 50 high-pay, high-tech manufacturing jobs in the Cleveland area. Our stimulus request is to help offset the cost of the new equipment, space, and training for these additional jobs. The success of this project will help rebuild the manufacturing base needed in the State of Ohio. | North Coast Composites, Inc. | 50 | 31 to 90 days | \$1,100,000 |
| Cuyahoga | Police Officer Hiring | Hire one fulltime police officer for participation in a Community Oriented Policing Program. | Glenwillow PD | 1 | 31 to 90 days | \$65,000 |
| Cuyahoga | Fuel Savings and Emissions Reduction Initiative | I am going to be starting a Manufacturer's Rep organization to supply non-hazardous and non-toxic fuel reformulators to vehicle and marine fuel operations. The first products to be sold are capable of reducing hazardous emissions by 30% or more while improving fuel economy by between 10 and 20%. These products can be added to any fuel, including diesel, gasoline, LMG, CNG, and alcohol denatured fuel. The funds will be utilized to pay for working capital to begin this business, costs of marketing and selling these products, and EPA and SAE approved emissions testing equipment to document improvements in performance. These fuel reformulators also can further reduce operating costs by improving engine lubricity and combustion chamber cleanliness leading to extended maintenance intervals. Finally, enhancing lubricity will enable engines to operate at cooler temperatures and extend their useful life. We are a military, veteran, business and military technology company. We aim to use the stimulus to use our own resources and create jobs in one area of software and technology and give them employment in these times. | EMS LLC | 3 | 0 to 30 days | \$15,000 |
| Cuyahoga | Job Creation in Computers | We aim to develop inhouse software to address the global opportunities available in areas such as Carbon footprints, increased analytics for major industries using the latest web and analytical softwares. As the development of software is involved, the hiring and employment of professionals will be started at the earliest. We propose to build a Center of Excellence with the state of the art technology and hire locals to staff it. As the future is going to be green, there are lot of opportunities out there to tap into channelizing the effort of many companies to access the world of carbon offsets and make the USA a leading candidate in the area of bringing awareness to it. The funding will predominantly help us in setting up the technology center and also help us get the line of credits from the banking institutions. | Cross Thread Solutions LLC | 15 | 91 to 180 days | \$850,000 |
| Cuyahoga | Home-size Fuel Cell Development | Household. This fuel cell will be scalable between 2 and 10KW, user-friendly, maintenance-free and configurable via an internet connection. An advanced version will allow recovering energy for hot water and heating the house. The fuel cell technology exists and has been proven. Manufacturing technology has been demonstrated, which will keep production costs to minimum plus the project will support a sustainable, on-going business concern. Optimum conditions exist in Ohio to support a Fuel Cell program. It has an abundance of Fuel Cell expertise (commercial and academic), an established network of supply chain partners, and advanced manufacturing expertise. Plus, MAGNET, a nationally recognized manufacturing advocate, will provide engineering, marketing and supply chain support. | MAGNET | 200 | 0 to 30 days | \$7,000,000 |
| Cuyahoga | Purchase transportation buses | Initially, 20 high value engineering positions would be created, utilizing/retaining valuable automotive-related jobs in Ohio. Within 18 months, 200 manufacturing jobs would be created or retained in the supply chain to support production requirements. Purchase transportation buses specifically designed to accommodate individuals in wheel chairs. Creates and retains 20 jobs, including drivers and bus monitors. | Rose-Mary, The Johanna Grasselli Rehabilitation & | 20 | 31 to 90 days | \$50,000 |
| Cuyahoga | New Hires and Expansion | To hire current out of work CSR, sales and marketing people with the goal towards expansion, the hiring would start immediately with healthcare being provided to each new hire after a 30 day waiting period. Each new hire would be given a salary and also have the ability to earn additional income in the form of commission. The expansion would be carried out across the entire state of Ohio but would start in North East Ohio. One main focus of the expansion would be towards individual health insurance and baby boomers. The baby boomer we would focus on their positions about Medicare Supplement and Part D. | McManamon Insurance | 25 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Entrepreneurial Education Seminars | With increasing numbers of laid-off workers, an opportunity exists for some to start a new business. However, most are not familiar with the process nor do they have the business background to run their own operation. The proposed funding would allow the creation and delivery of educational seminars to familiarize displaced workers with the steps necessary to start, operate, and grow a new business. The seminars would focus on technology-oriented businesses since those have the opportunity for highest wealth creation in the State although many of the principles will be applicable to businesses of any type. MAGNET will partner with various colleges and universities in northern Ohio to execute approximately 10 one-day seminars. Covered topics will include such things as components of a business plan, sources of funding, business structures, marketing, competitive analysis, and business support resources. Once seminars are complete, follow-up support will be provided by the network of business incubators and EEP programs in northern Ohio. These training and familiarization seminars will aim to help entrepreneurs with information necessary for them to start a business. All new job growth in Ohio will come from new emerging companies. These new companies are where innovation occurs in advanced energy, new medical, and new communication technologies. They yield high paying jobs that benefit everyone. Early stage venture companies, such as Early Stage Partners, Draper Triangle, and Jumpstart have made investments in these types of companies. Look through their portfolios. Many of these investments have failed in value due to market forces outside of the company's performance. They have constrained the venture groups from making further investments. A simple, easy to execute plan that would yield immediate return would be for the state to "assume" some of this value back. With the value used for these companies, investment would start to flow again allowing companies to immediately hire new employees and become attractive investments for entities outside the state of Ohio. That would be venture groups outside of the state investing in Ohio jobs. More and economic growth would be restored. These companies would potentially return 60,000 jobs, generating a minimum of \$500M in new tax revenue for the state. | MAGNET | 250 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Reinvestment for Early Stage Technology | MAGNET will partner with various colleges and universities in northern Ohio to execute approximately 10 one-day seminars. Covered topics will include such things as components of a business plan, sources of funding, business structures, marketing, competitive analysis, and business support resources. Once seminars are complete, follow-up support will be provided by the network of business incubators and EEP programs in northern Ohio. These training and familiarization seminars will aim to help entrepreneurs with information necessary for them to start a business. All new job growth in Ohio will come from new emerging companies. These new companies are where innovation occurs in advanced energy, new medical, and new communication technologies. They yield high paying jobs that benefit everyone. Early stage venture companies, such as Early Stage Partners, Draper Triangle, and Jumpstart have made investments in these types of companies. Look through their portfolios. Many of these investments have failed in value due to market forces outside of the company's performance. They have constrained the venture groups from making further investments. A simple, easy to execute plan that would yield immediate return would be for the state to "assume" some of this value back. With the value used for these companies, investment would start to flow again allowing companies to immediately hire new employees and become attractive investments for entities outside the state of Ohio. That would be venture groups outside of the state investing in Ohio jobs. More and economic growth would be restored. These companies would potentially return 60,000 jobs, generating a minimum of \$500M in new tax revenue for the state. | Atyalogic, Inc. | 60,000 | 0 to 30 days | \$95,000,000 |
| Cuyahoga | Small Business Engineering Services | Privately owned small business in the field of providing engineering services to the manufacturing industry is seeking to grow and hire in order to stay viable. We are 3 years old, have had much success, but in recent months have been hit hard by non-paying accounts, layoffs at our customers' headquarters, and a glut of unskilled labor of our customers to spend more money than they can receive on the required funds. We could significantly grow our sales and engineering team to expand our customer base, avoid layoffs (or worse, closing the company), and continue to help companies improve their technologies and product designs in the manufacturing sector. | Boundary Systems, LTD | 18 | 0 to 30 days | \$25,000 |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Vision 21: A Fund for the Future | Northeast Ohio, providing comprehensive services to individuals of all ages with visual disabilities. Its programs empower clients to remove boundaries to success, so they can realize their goals. Its independence and work side-by-side with their sighted peers regardless of equipment level. Cleveland Sight Center's current facility was built in 1964. At the time of its construction, the building was state-of-the-art and served 1,300 clients annually. Nearly 50 years later, the building serves 9,300 clients annually -- an increase of over seven hundred (700) percent. Further, the building infrastructure no longer meets the technological needs of clients served. To better serve clients, Cleveland Sight Center has recently embarked on a comprehensive capital campaign, Vision 21: Fund for the Future. It is anticipated that the number of persons awaiting blindness or impaired vision will increase by 70% by the year 2020. Vision 21 will provide the agency with the added infrastructure and facilities to meet growing demand, and continue providing the quality vision rehabilitation and training | Cleveland Society for the Blind, dba Cleveland Sig | 262 | 181 days or more | \$1,000,000 |
| Cuyahoga | Law School | Attend Cleveland Marshall College of Law and become a JD. Then open an office and hire two paralegals to assist with criminal case load. | Baxter Family Foundation | 3 | 181 days or more | \$95,000 |
| Cuyahoga | Cleveland Arterial Street Program | City of Cleveland maintains 280 centerline miles of major roadway. The proposed improvements include rehabilitation of 350,000 square yards of pavement including but not limited to pavement removal and replacement, catch basin removal and replacement, plugging or replacing lead water service connections, removing and replacing noncompliant handcap access ramps, 4" asphalt removal and replacement, pavement reinforcing fabric, safety curb and maintenance of traffic on major roads in three zones in the City of Cleveland, Zone 1, Western, Zone 2, Northern and Zone 3. Southern will represent three construction contracts to expedite spend down and to maximize job creation. Small businesses will be able to complete bid against larger contractors with the three bid package approach. Our pavement management system is used to prioritize the rehabilitation of our major roadways. Road improvement locations will be submitted upon request. | City of Cleveland, Office of the Mayor | 200 | 91 to 180 days | \$9,000,000 |
| Cuyahoga | Business Sustainability | Cleveland's last surviving brick Roundhouse built in 1906 requires immediate construction attention to save the building. Midwest Railway Preservation Society (MRPS), a not for profit, has used the facility since 1974 to restore and operate trains throughout Cleveland's metropolitan area. The 17,000 square foot of roof area will be replaced with funds raised by MRPS. Fiberglass trusses are erected inside the building to brace the structure. Stimulus funds used to employ masons to repair and rebuild 225 lineal feet of the original roof parapet. Masons will repair 65 lineal feet of damaged concrete structural window lintels. Plumbers, carpenters and general trades employed to add a women's ADA restroom within the facility and renovate the men's room to current ADA standards. The heavy timber wood framing will be reworked within an 11,000 square foot building, adding 1,000 square feet of new wood structural framing for a new roof. The work will revive the building within Cleveland, making the site viable for use as a means to educate K-12 students, promote railroad safety and the career options available within the railroad themselves. | Nikki & Ted Inc. | 8 | 91 to 180 days | \$250,000 |
| Cuyahoga | Roundhouse rehabilitation | Midwest Railway Preservation Society | 24 | 0 to 30 days | \$225,000 | |
| Cuyahoga | D. Stewart project | Renovate distressed houses in distress neighborhoods for families in need. Corp. Line W/ 150th Street would be rehabilitated. 0.2 miles of utility undergrounding, sidewalk and lighting improvements along Lorain Ave. from the City's West Corp. In to Cleveland Ave., would renovate the Fairview Hospital area. | self | 10 | 0 to 30 days | \$100,000 |
| Cuyahoga | Kamm's Corners Streetscape, Phase III | Lorain Ave. renovations from the West Corp. Line to W. 150th St. are needed to help revitalize a declining area. Businesses have been closing, especially in the main shopping/entertainment district from Cleveland to W. 160th. Poor street pavement and signage are among the significant contributing factors to the declining business health. Fairview Hospital has recently begun renovation, including a new hospital center that will add 4,000 jobs. The City of Cleveland invested \$6.8 million in the Kamm's project to address the declining area issues. The completion of the Phase I project included new 320' power line conduit from a substation at W. 150th to Fairview Hospital. This project was held in abeyance, was not in the project due to lack of funds. | City of Cleveland, Office of the Mayor | 4,100 | 91 to 180 days | \$2,200,000 |
| Cuyahoga | Character Builders "Invest in Tomorrow's Leaders" | Character Builders invest in tomorrow's Leaders Project Providing Character Education programs to 200,000 disadvantaged school children in Greater Cleveland. Creating 8 jobs to help establish Character Builders as a Cleveland based national leader in Character Education. The products and programs include: Inspire Agenda student planners to help each student be organized, successful, and inspired by weekly stories of people who have made a difference in their own world. Imagine posters for each school inspire students to roads of success by encouraging them to work hard at their studies and character today. Voices of Character - The program enables every child to have their own character based affirmation statement published in the school's own page per day calendar. D. Trinidad Hurtt built program provided to each school building to enable schools to proactively deal with this growing problem. D. Trinidad Hurtt's IQ EQ SO curriculum provided to each school building to enable teachers to teach students about Intellectual, Emotional, and Social qualities as a way of preparing them for successful adulthood as well rounded persons. | Character Builders Education Group, Inc. | 12 | 0 to 30 days | \$1,143,700 |
| Cuyahoga | A Place to Play | We have a lot owned by the church that we would love to develop into a community basketball court to give the young men of the neighborhood a safe place to play. We need the ground to be leveled and concrete/blacktop poured. We need basketball rims as well as a gate to enclose the court. We will also need lines drawn on the court. Once Court is built we will maintain it. This neighborhood definitely needs are help. This project will create a truck route from E. 88th St. and Union Ave. to E. 93rd St. at Astra Rd. A new 1200 foot industrial road from E. 88th St. at Union Ave. to E. 91 St. at Crane Ave will be constructed. Also included are E. 91st St. and Astra Rd. corner turning improvements for trucks. Signage for the truck route will be provided. | Allen Chapel MBC | 8 | 31 to 90 days | \$20,000 |
| Cuyahoga | Bessemer Extension | The project extends a safe and efficient transportation spine for large trucks from I-90 and I-77 interstates to East 93rd St. and Astra Rd. Properties along East 91st, south of Crane Ave., and along Astra Rd. near East 91st, are generally industrial businesses. There are other industrial type businesses near the Astra at E. 93rd intersection. These industrial business areas are a significant part of the City's remaining economic health. Many of these businesses have expansion potential. Vacant parcels are available for development. The project would also reduce air and noise pollution in neighborhoods, by directing the trucks away from residential streets. The FHWA committed funding for the Bessemer Avenue Connector project, from E. 55th to E. 93rd/Astra, but capped the project dollars. There are only enough FHWA commitments to help fill the gaps that families face by empowering and strengthening adults in their role as parents, nurturers, and providers. We propose to provide a comprehensive set of services including social, educational and recreational services. Because families have many areas of need in their lives we want to include services that would assist with basic economic needs, housing and job training as well as enhancing parenting skills. Services we provide will be holistic in nature and designed to promote healthy development of all families. | City of Cleveland, Office of the Mayor | 150 | 181 days or more | \$2,500,000 |
| Cuyahoga | Family Center Services | Outcomes: Children participating in the programs will be safe as a result of program participation. Children participating in the program have opportunities to demonstrate new skills received as a result of participating in the program Youth will demonstrate improved interpersonal skills. Families will receive appropriate basic needs. | Catholic Charities Community Services | 5 | 91 to 180 days | \$50,000 |
| Cuyahoga | Broadway/Miles/Turney Intersection | Seniors will be connected to needed resources. This project will create a truck route from E. 88th St. and Union Ave. to E. 93rd St. at Astra Rd. A new 1200 foot industrial road from E. 88th St. at Union Ave. to E. 91 St. at Crane Ave will be constructed. Also included are E. 91st St. and Astra Rd. corner turning improvements for trucks. Signage for the truck route will be provided. | City of Cleveland, Office of the Mayor | 50 | 181 days or more | \$1,200,000 |
| Cuyahoga | Bridge Demolition | The project extends a safe and efficient transportation spine for large trucks from I-90 and I-77 interstates to East 93rd St. and Astra Rd. Properties along East 91st, south of Crane Ave., and along Astra Rd. near East 91st, are generally industrial businesses. There are other industrial type businesses near the Astra at E. 93rd intersection. These industrial business areas are a significant part of the City's remaining economic health. Many of these businesses have expansion potential. Vacant parcels are available for development. The project would also reduce air and noise pollution in neighborhoods, by directing the trucks away from residential streets. The FHWA committed funding for the Bessemer Avenue Connector project, from E. 55th to E. 93rd/Astra, but capped the project dollars. | City of Cleveland, Office of the Mayor | 50 | 91 to 180 days | \$800,000 |
| Cuyahoga | E. 93rd Street Bridge over GCRTA and Norfolk South | Martin-Praha Bridge over Norfolk and Southern Railroad (Structure File #1868974) has a General Appraisal rating and Operational Status of O-K indicating bridge closed and imminent failure. Martin-Praha is a 3-span, 150 feet in length, bridge with deck area of 5,700 square feet. Bridge is not needed since industrial/commercial businesses have access to main arteries since the opening of Interstate 490. This Bridge is in failure mode with sagging span over Norfolk and Southern Railroad. Pedestrians still cross the structure despite fencing and warning signs. Power lines on the bridge are actively supplying the surrounding area. The City cannot use Road and Bridge bonds to finance the demolition since it is a removal item. Housing demolition bonds follow similar bonding restrictions. Loss of life and property damage is a public safety issue that this bridge demolition will mitigate. rehabilitation. This project will complement the new Cuyahoga County \$150M County Juvenile Justice Detention Center in functionality and appearance. Without this bridge the new traffic generated by the new parking lots and truck loading facilities will become a burden on the commercial traffic of Quincy Avenue, a cross road intersecting E93rd immediately north of the bridge. The bridge is not renewed a facility to the Light Rail Transit that passes under this deficient bridge. Reconstruction will give the Light Rail Transit an opportunity to build a main station to help spur economic and housing growth adjacent to this bridge site. The RT Corp. without also passes under this bridge; its presence could lure potential industrial development of the old Pelee's Automotive Parts Company site. The new bridge will sustain a small business automotive repair facility adjacent to this bridge. This project is a prime example of a vital part of the current urban revitalization and renewal of a once vibrant and thriving neighborhood. | City of Cleveland, Office of the Mayor | 75 | 181 days or more | \$5,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | NCC3 | North Coast Composites is a certified manufacturer of aerospace carbon fiber composite components. Since 2003, we have been working with industry leaders on the development of carbon fiber composites to replace metal. In 2008, as part of the Ohio Department of Development, Engineering & Physical Science Research Communication Program, we began a collaborative relationship with the University of Dayton Research Institute to use manufacturing composites for commercial applications. As part of this development, we have designed & built components for a laser wire manufacturer, using this technology, and are now capable of manufacturing certified parts. We have been asked to manufacture 400,000 parts by 2011. In order to meet this demand, we must invest \$500,000 to create a new work cell and create approximately 150 full-time, high-pay, high-skill manufacturing jobs in the Cleveland area. Our request is to help offset the cost of the new work cell and training costs for these new positions. The success of this project will help rebuild the manufacturing base needed in the State of Ohio. | North Coast Composites, Inc. | 150 | 31 to 90 days | \$600,000 |
| Cuyahoga | Alternative Energy Project | Project will install a 40 KW solar array on the roof of the library to join with the City of Euclid in developing a "solar campus" to showcase alternative energy technology, supply energy needs to the library, provide an interactive information system to library patrons and members of the community and to educate the public on solar and wind energy. The project will be a significant benefit to the community and will provide an tremendous boost in self-esteem, and promote Euclid as a place friendly to new technology companies. The project will demonstrate clean environmentally sound approaches to a green energy future. It will also feature displays on how individuals can create energy savings strategies in their own residences. Euclid has much unused factory space which can be converted to green energy business employing hundreds of new employees. | Euclid Public Library | 5 | 0 | \$172,000 |
| Cuyahoga | Flats East Bank, Plaza & Parking | The Flats East Bank project was ongoing until October, 2008 when the credit markets froze. The developer's ability to secure private financing was unsuccessful. The private financing was essential in securing bonds to construct the development and the infrastructure improvements. The site grading and sewer construction will be completed by May 2009 with public/private financing and additional funds to complete the remaining infrastructure. The requested funds will enable the City to leverage the property for future economic development. | City of Cleveland, Office of the Mayor | 31 | 181 days or more | \$30,000,000 |
| Cuyahoga | Center Street Lift Bridge on Cuyahoga River Imrov | The Flats East Bank project is a \$522 million development to revitalize property fronting the Cuyahoga River. The infrastructure will facilitate the development of 500 residential units, 30 retail stores, and 400,000 sq.ft. of office space to contribute to the City's long-term revitalization goals. The Future 500 company has committed to lease contracts prior to the development completion. | City of Cleveland, Office of the Mayor | 100 | 91 to 180 days | \$2,500,000 |
| Cuyahoga | NEW CLEAN AIR TRANSPORTATION | Our summer camp program for children with MRCC moves to a larger facility this summer. It will allow for more children to be accepted into this week program. This will create more jobs for camp coordinators, aides, dietary and food drivers. In addition, we are upgrading our summer camp in previous years to retain their jobs. We are requesting money to train and employ 15 new staff members. Building the recreation and improvement. Acquisition of 2 or more abandoned lots adjacent to the location of Solar planting, weather proofing of existing location and energy efficient upgrades to HVAC. Improvements to automotive repair shop and purchase of hybrid vehicles. Outcomes include the creation or retention of 10 jobs in Cleveland residents in the next 15 months. Improved services to our community and removal of 2 or more eyes sores close to our business. | TOMAR TRANSPORT LLC | 2 | 0 to 30 days | \$300,000 |
| Cuyahoga | Expand Summer Camp Program | Our summer camp program for children with MRCC moves to a larger facility this summer. It will allow for more children to be accepted into this week program. This will create more jobs for camp coordinators, aides, dietary and food drivers. In addition, we are upgrading our summer camp in previous years to retain their jobs. We are requesting money to train and employ 15 new staff members. Building the recreation and improvement. Acquisition of 2 or more abandoned lots adjacent to the location of Solar planting, weather proofing of existing location and energy efficient upgrades to HVAC. Improvements to automotive repair shop and purchase of hybrid vehicles. Outcomes include the creation or retention of 10 jobs in Cleveland residents in the next 15 months. | Cuyahoga | Urban Redevelopment | The Avenue District is a \$300 million mixed-use development to revitalize E. 12th Street from Lakeside to Chester Avenue in downtown Cleveland. The infrastructure will facilitate the development of new housing and retail to contribute to the City's long-term revitalization goals. E. 12th Street is a vital connecting street to many of the City's Future 500 companies and busiest thoroughfares, including Euclid Avenue. | Watson's Funeral Home | 10 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Willow Street Lift Bridge on Cuyahoga River Imrov | The project is ongoing, with Phases I-III, from Lakeside to Superior Avenue, currently in construction and scheduled for completion in late 2009. The City has made a 7 million dollar investment in Phases I, II and III. The requested funds will be used to complete the project infrastructure from Superior Avenue to Chester Avenue, its logical terminus. | City of Cleveland, Office of the Mayor | 100 | 91 to 180 days | \$2,500,000 |
| Cuyahoga | Avenue District Phase IV | In addition to replacing deteriorated infrastructure, the project will also provide intermodal pedestrian, bicycle, and public transportation access within downtown Cleveland. | City of Cleveland, Office of Mayor | 91 | 91 to 180 days | \$700,000 |
| Cuyahoga | Reashbuths the preception of succesful role models | To reach out to the inner city and create a forum's & workshops to show what it takes to be successful. To have the American dream of owning a home. Explain what traditional family values are. Provide avenues, with help from corporations and employment agency a college, for job's and education to create new successful role models in the community. Also to bring in Entrepreneurs & Professionals. To build self esteem. Hard work is what bring happiness, wealth & success | Mortgage Broker assoc. | 30000 | 181 days or more | \$2,000,000 |
| Cuyahoga | Concrete Retaining Wall Rehabilitation and Replace | Rehabilitate and reconstruct retaining wall structures inherited from Norfolk Southern Railroad & C&D railroad. When railroads reorganized under bankruptcy court, all existing maintenance agreements between Cleveland and railroads were void. There are 154 railroad embankments and overpass bridge structures within City Cleveland Corporation limits. Madison Road Railroad and Nottingham Road Railroad overpass approach walls (1,500-feet) will be removed and replaced. Other approach walls at the 151 locations will be inspected by sounding and recommended for improvement. Rehabilitation will include full depth concrete removal or replacement, partial depth concrete and concrete surface coating. Coating will be epoxy urethane to protect from salt spray and to remove graffiti. Approach walls built in late 1800's and early 1900's for these bridges require reconstruction and rehabilitation. Health, safety and quality of life of neighborhoods will be improved. This will be a significant project partnering civil engineers, small business specialty contractors and bridge contractors. | City of Cleveland, Office of Mayor | 100 | 91 to 180 days | \$5,000,000 |
| Cuyahoga | DEMOLITION CONTRACTOR | REMOVE SANITARY DEBRIS AND FURNISH LABOR AND EQUIPMENT AND REMOVE SANITARY DEBRIS UNDER THE COOPERED DRP OF THE CITY OF CLEVELAND. THE WILL BE USE FOR HABITAT RESTORATION | WEST & BENNETT | 4 | 0 to 30 days | \$70,000 |
| Cuyahoga | Home Healthcare Skilled Services | Additional services for homebound patients requiring skilled nursing and personal care services. | Homemtech Healthcare Services, LLC | 15 | 31 to 90 days | \$35,000 |
| Cuyahoga | Operation Station Home Improvement | The city currently has two fire stations in desperate need of repairs and remodeling. Black mold has been documented at station #2 and has halted the operations of this station as well as limiting service and safety measures to our community. Both stations are in need of roof replacement and require new energy efficient windows and doors. The flooring is worn and the patens can no longer be seen. The walls are of plaster and dry wall. They have since peeled and crumbled from the walls. Living conditions are deplorable. I am requesting funding for these and additional repairs which include but not limited to the kitchen and bath areas. | Warrensville Heights Fire Department | 33 | 31 to 90 days | \$560,000 |
| Cuyahoga | High School High Tech | WIA, DOL and/or Title IV of the Vocational Rehabilitation Act. The goal of HSTH is to assist high school youth with disabilities to become independent, productive members of the technology-driven workforce. HSTH provides opportunities for students with all types of disabilities to explore careers in science, mathematics, and technology. The program incorporates four design features into their program: Preparatory Experiences-Activities for exploration of careers and post-secondary education, career assessment, opportunity awareness, and work-readiness skills in technology fields. Connecting Activities-Activities learning in program and post-program support, and that are designed to benefit each individual participant. Work-based Learning-Including work site visits, job shadowing and summer internships. Career Development-Activities which include exposing youth to leadership skills such as self-advocacy and self-determination, as well as activities that build self-esteem, interpersonal skills and team building. | Linking Employment, Abilities and Potential (LEAP) | 50 | 0 to 30 days | \$100,000 |
| Cuyahoga | The Coshocton Amphitheater | Continue building an Amphitheater for all venues, Educational, arts, musical, etc. This is to develop for tourism, economic development and infrastructure. | The Coshocton Amphitheater Board of Trustees | 6 | 31 to 90 days | \$400,000 |
| Cuyahoga | Year round school to work transition | WIA, DOL, and/or Title IV of the Vocational Rehabilitation Act. School to work program trains high school students with disabilities in the skills necessary for successful transition from school to work and adult community life. This is year-round program provides employability, supports job drop-out prevention, and life training. Community based employment training. Includes summer work experience with job coaching. Addresses individual student needs and employment goals. This comprehensive approach includes: individual assessment of strengths, interests and needs; employability; access to social and community resources; future planning; career exploration; youth development; and direct support, case coordination and referral to address barriers to academic and employment success. Upon graduation participants receive individualized job placement, job coaching and support services, follow-along and intervention for job retention. | Linking Employment, Abilities and Potential (LEAP) | 100 | 0 to 30 days | \$200,000 |
| Cuyahoga | Implementing Lean Enterprise at the GCRTA with Ass | Interim for implementing Lean Enterprise at the Greater Cleveland RTA Central Bus Maintenance facility. This project directly hits two items. It will lower maintenance costs at RTA, allowing the agency to retain its work force and deliver improved service to its riders. | Cleveland State University | 2 | 0 to 30 days | \$131,478 |
| Cuyahoga | Energy Storage Laboratory Research and Expansion | Novolyte Technologies is a world wide leader in electrolyte formulations technology and production for lithium ion batteries. We are the only producer to have research laboratories and production in the US and Asia. We propose to build a state of the art laboratory 6000 sq ft laboratory in Cleveland, Ohio that will allow us to grow and to push the US toward a global leadership position in battery production and technology. This laboratory will formulate Lithium ion electrolyte formulations, the necessary battery testing to push the US into a leadership position. These electrolytes are one of the high value core components of any high energy/power storage system. NOVOLYTE will work closely with our US based battery customers to develop new electrolyte formulations to meet existing performance standards and provide additional capacity in their manufacturing processes for Lithium battery use. Increasing customer demand for small-scale research and development testing quantities will be supported through the flexible manufacturing and pilot sampling capabilities at its U.S. research and production facilities and centers of technical excellence. | Novolyte Technologies | 10 | 31 to 90 days | \$3,000,000 |
| Cuyahoga | promotion of small business nationwide. | GreenSource LLC project consists of a simple solution to an ongoing problem that the green industry is faced with on a yearly basis HSE and asset worker programs. GreenSource LLC promotes a resource for new business starters, existing business and non profit educational programs across the country. Along with designing, building and managing environmentally friendly landscape space across the country our resources are based upon conservation and network creating through GreenSource LLC is a profit company that drives us to the green industry leader in sustainability, recycling and reusing materials, equipment and labor. We have been working with an on staff ecological engineer to maximize job-site efficiency, handle water and landfill situations, water collection, LED lighting technology, eliminate pesticides and chemical applications and last but not least promote natural materials that come from the earth. This vision is carried out by our entire staff and client base, with the help of this funding we are capable of truly getting the landscaping industry in gear for the future and creating an infinite amount of jobs across the USA. | GreenSource LLC | 50 | 31 to 90 days | \$750,000 |

| Cuyahoga | Supported Employment for persons with disabilities | WIA-DOL and Title IV of the Vocational Rehabilitation Act. Supported Employment services to improve the quality of the workforce, reduce reliance on public benefits, and enhance the productivity and competitiveness of the State's economy by providing a wide variety of career development and placement services for individuals with disabilities who are underemployed and unemployed. Includes intensive, ongoing support that enables participants to gain competitive employment or to obtain the maximum wage in existing employment. The provision of supports, and who because of their disabilities need supports, to perform in a regular work setting. Services, provided in an integrated community setting, include vocational assessment, job development and placement, job training, coaching, ongoing job support, workplace accessibility and training in self-determination. We have a long history of established relationships with the One-Stop, VR and MRDC, that have resulted in growing placement rates for job seekers with disabilities. The success of the WIA/VR and MRDC systems is directly related to their partnerships with community-based agencies serving individuals with disabilities. | Linking Employment, Abilities and Potential (LEAP) | 150 | 0 to 30 days | \$200,000 |
| Cuyahoga | Bail out | This money is needed to keep me from filing bankruptcy. My daughter has graduated from Columbia College Chicago with honors in Advertising and Public Relations and cannot find a job in Chicago or Cleveland. I, however, at the moment have a job. I was recently told I should be able to keep my job through 2009. If I lose this income there is not way I can pay any loan, bill or utility. I have always paid my bills and kept up my end of anything I have committed to. I think I deserve a break. I have raised this child alone since her father died in 1986. I am my only source of income. I have never asked the State of Ohio for help other than unemployment. I am asking now. | Parents against bankruptcy | 1 | 181 days or more | \$32,000 |

| Cuyahoga | Inner-Faith Community Youth Mentoring & Theater Pr | The Inner Faith Community Mentoring and Theater is a new proposed collaborative effort between faith-based partners and theater leaders to provide a safe, lively health-promotion and educationally conducive environment for at-risk youth, including re-entry juveniles, and teenage parents. The program will use creative arts and mentoring to create strong minds and strong careers. The purpose is impact 200 inner city youth who are at risk for educational or social failure, incarceration or re-incarceration, or poor decision making. The performing arts and one-on-one mentoring will be used to involve youth in positive personal activities, to re-direct their energies from negative attitudes and behaviors, to instill, nurture, or inspire their toward the performing arts and community outreach as career possibilities, or at least as ways to be productive and self-sufficient. They will be taught acting, stage design, marketing and promotions and will help produce one major and one minor theater production in the community each year. At least 200 youth will be hired, taught healthy life skills, assigned a mentor, and will demonstrate educational, social and behavioral improvement. | Trinity Outreach Ministries Another Chance Inc. | 130 | 0 to 30 days | \$1,725,501 |
| Cuyahoga | Uptown Development Infrastructure | This project will allow for new 1,000-ft two lane roadway with water, sewer, streetcleaning and lighting to serve new office buildings and residential buildings. The reconstruction of E 116th Road and E 115th Road intersections with new traffic signals. The roadway will support new office and residential at Case Western University, Cleveland Institute of Art, Cleveland Museum of Art and University Hospitals. | City of Cleveland, Office of Mayor | 1,000 | 181 days or more | \$2,250,000 |
| Cuyahoga | Railroad/Highway crossing surface reconstruction | 7 railroad/highway crossings improved with new surface reconstruction to make for a safer surface for vehicular traffic; construction of 3,800 sq. ft. construction of neighborhood baseball park, field and national baseball museum. The seating capacity of the ballpark will be 3,800. The original steel office on site would be renovated and converted into a museum. | Cleveland Commercial Railroad Co LLC | 24 | 91 to 180 days | \$950,000 |
| Cuyahoga | League Park Restoration | We envision the field being used for neighborhood, citywide and regional sports events. In addition to the field, a new stadium during construction more than would be created to operate and manage the stadium. | The League Park Society, Inc. | 50 | 31 to 90 days | \$18,000,000 |
| Cuyahoga | Building and equipment updates | 100 new beds, remodel 80 rooms that are 15x16 and front lobby. Updating the building will help keep it safe and up to date. The building is in turn will keep us from having to cut hours or being off site all the time. | Greenbrier Senior Living Community | 10 | 91 to 180 days | \$500,000 |
| Cuyahoga | Training and Employment for persons with disability | WIA-DOL and Title IV of the Vocational Rehabilitation Act. We have been addressing the Direct Care Workforce (DCW) shortage for 19 years to increase DCW staffing and improve job options for persons with disabilities, a vastly underemployed population through 2 training programs: Home Health Aide and State Tested Nurse Aide. Both are recognized nationally as "hot professions". Skills and other hands-on training and address a variety of learning styles/needs. We incorporate soft skills such as problem solving, communication and critical thinking/management skills. Employment responses with applications, interviews, job aids, and job placement assistance. Job placement assistance provided. Supports are provided for a minimum 15 months post employment. Over 80% of graduates find/retain employment. Individuals, home health aides, group homes, assisted living centers and nursing homes. Training Center is Home-Ohio Guide to Personal Assistance Services, a manual written by LEAP staff, is used at Wright State University and throughout the State of Ohio by individuals choosing to make their own home health care. | Linking Employment, Abilities and Potential (LEAP) | 100 | 0 to 30 days | \$200,000 |
| Cuyahoga | Sun Haven Nursing and Rehabilitation, LLC | Our project will certainly provide permanent employment to over 125 citizens in the Cleveland and Aurora areas and provide medical care for hundreds of veterans who served our country and made huge personal sacrifices in keeping Americans safe. Providing housing to our veterans will certainly help them regain their independence with respect and dignity, assists with their medical recovery, and allow them to return to a normal status of living with their families. Both facilities will house male and female veterans. Additionally, we will also accommodate families who wish to spend overnight time with their loved ones. We have two properties that we are interested in acquiring which will provide housing in both Cuyahoga and Geauga counties. The property in Cuyahoga County has approximately 17,200 sq. ft. The property in Geauga has over 30,000 sq. ft. Both properties are two floor buildings. | Sun Haven Home Health Care, LLC | 125 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | Waterloo Road Streetscape | 163rd Street to East 163rd Street and E 163rd Street from Calcutta to Lockwood, total length 3,700 feet. The commercial/business district aligned with building housing on the public right of way will benefit with modern and parking improvements. Pavement will be removed and replaced and drainage and traffic signals upgraded. Visual sidewalks, roadway turners, with on street parking will serve the businesses and improve pedestrian access. Lighting and streetcleaning will be installed. A 4,100 square foot island will be constructed at the intersection of Waterloo and East 163rd Street. This public center island will serve as community space for day to day activities. The streetscape improvements project will improve or expand services for these individuals and conduct activities to improve public understanding of the problems of these individuals. Services are designed to provide services to meet their needs by increasing their ability to care for their individual needs. Cleveland Sight Center's Bright Futures program provides developmental and educational resources for young children (ages 0-5) who are blind or visually impaired. Including on-site parent/teacher training and the region's only preschool designed for the special needs of toddlers who are blind or visually impaired, the program is staffed by specialists, including three teachers of the visually impaired and a variety of specialists trained in serving children with visual disabilities. The objective of Bright Futures is to provide our clients and their families with the tools needed to progress through normal child developmental stages, setting the stage for clients to experience future academic and life success. Currently, Bright Futures serves more than 100 registered clients from 9 Ohio counties. | City of Cleveland, Office of Mayor | 150 | 181 days or more | \$3,890,000 |
| Cuyahoga | Jewish Community Federation Building Lighting Retr | The Jewish Community Federation requests \$25000 to complete an energy efficiency lighting retrofit of a building located at 17500 Ely Avenue, Cleveland, OH 44115. | Jewish Community Federation of Cleveland | 2 | 31 to 90 days | \$25,000 |
| Cuyahoga | Code Compliance | In line need of new driveway, new sidewalk and new basement windows. | working poor | 8 | 0 to 30 days | \$8,000 |
| Cuyahoga | Agnon-Siegal College Building Lighting Retrofit | The Jewish Community Federation requests \$60000 to complete an energy efficiency lighting retrofit of its building located at 26200 Shaker Blvd., Beachwood, OH 44122. The building houses the Agnon School and Siegal College of Adult Studies and is a 81,000 square foot facility. Services for persons with disabilities to live independently and become employed under Part B of Chapter 2 of Title VII of the Rehab. Act of 1973 integrating our VR services as a community rehabilitation partner (CRP) with our independent living services as an independent living center (ILC). Assistive technology (AT) improves the quality of life and helps individuals live more independently. The ATC increases the use of technology enabling people with disabilities to live, learn, work, and engage in the community of their choice. AT includes a wide array of devices, products, and services that allow people with disabilities to obtain jobs. The ATC offers education, training and services to persons with disabilities, employers, educators, family members, and rehabilitation providers about a wide range of assistive technology including low vision aids and devices, assistive listening devices, computers, telecommunication systems and adaptive devices for work, home or community use. Utilizing AT empowers individual with various disabilities, to achieve their highest level of independence as productive, integrated, responsible citizens participating in all aspects of society. | Jewish Community Federation of Cleveland | 2 | 31 to 90 days | \$60,000 |
| Cuyahoga | Assistive Technology Center (ATC) | Services for persons with disabilities to live independently and become employed under Part B of Chapter 2 of Title VII of the Rehab. Act of 1973. The low vision program assesses individual age 05 or older whose recent severe visual impairment makes competitive employment extremely difficult to obtain, but for whom independent living goals are feasible. Funds are used to provide independent services, computer training, and that will improve or expand services for these individuals and conduct activities to improve public understanding of the problems of these individuals. Services are designed to provide services to meet their needs by increasing their ability to care for their individual needs. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Restore/Revitalize Historic Buildings in low income | Total restoration and revitalization of 157-year old historic complex (originally Baehr Brewery and the Odd Fellows Hall) into a mixed use complex of commercial, residential and educational uses. Located at one of the few locations where Ohio City and the Township Trail converge, this property is ideally located to take full advantage of the coming improvements to the trail and general lead to Whiskey Island, as well as within walking distance of Public Square. Funds would be utilized to: 1) install energy-efficient windows that are historically accurate in profile; 2) provide insulation and seals to conserve energy; 3) development of a green roof; and 4) hail shaped wind turbines utilizing the wind off Lake Erie. This project is located in one of the most distressed economic census tracts in northern Ohio! | West 25th Street Lofts LLC | 110 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | Heating/Cooling Unit | The Hebrew Academy of Cleveland's Taylor Road Campus is 56 years old. It is in dire need of a new heating/cooling unit. We are currently spending about \$8,000 per month for either heating or cooling an 80,000 square foot building. The units are old/failed. Some rooms are not even on the end and the thermostat do not work properly with the disappated system that is constantly under repair. Our school holds classes through the end of June and has a camp in the summer so the cooling system is equally as important as the heating of the building in the winter! | Hebrew Academy of Cleveland | 5 | 0 to 30 days | \$150,000 |
| Cuyahoga | Update classrooms | The Hebrew Academy of Cleveland's Taylor Road Campus is 56 years old. To enhance safety 4 years ago we built a new front entrance which ensures one main door for visitors to be buzzed into. However, we had plans to renovate each classroom. The fundraising efforts for this is nonexistent now when we are fighting the battle to collect tuition and pay are day to day expenses due to the economic crisis. We have plans, please which install new lights, laminate windows and floors in each classroom. The estimated cost of this project is \$1,000,000. Our building is over 80,000 square feet with 60 classrooms besides the 5 offices, hallway, gym, auditorium and 3 cafeterias. We built a state of the art facility in 2001 to house one of our high schools. This had been a prototype to other day schools throughout Cleveland. Our elementary students receive the same services. | Hebrew Academy of Cleveland | 30 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Work/Life Balance: An Employee Assistance Program | Services for persons with disabilities to live independently and become employed under Part B of Chapter 1 of Title VII of the Rehab. Act of 1973 integrating our VR services as a CRP with our independent living services as a CIL. The Employee Assistance Program offers comprehensive services, supports and resources to address, reduce or eliminate barriers to employment, community inclusion, greater independence and self-employment for persons with disabilities. In addition to the most common barriers: architectural, environmental, attitudinal, financial, and employment, additional barriers include a lack of access to, or options in: personal care assistance, health care, transportation, housing, and communication. The voice services, focused employment preparation and retention, and work-life issues that inhibit greater success, are organized into the following categories: Employee Supports, Work-Life Balance Services, Personal Care Assistance and Management, and Disability Management. Assist individuals in accessing disability related health services in order to effectively manage their disability, and increasing their employability. | Linking Employment, Abilities and Potential (LEAP) | 500 | 0 to 30 days | \$150,000 |
| Cuyahoga | Weatherize home | Weatherize my own property with siding new windows and insulation for the outside walls. Addressed Township: | My Property | 4 | 181 days or more | \$15,000 |
| Cuyahoga | Fitch Road | Construct railroad grade separation on Fitch Road at the CSX railroad PID No. 76074 STIP ID # 2772 | NOACA | 79 | 181 days or more | \$2,850,000 |
| Cuyahoga | Innovative Independent Living | Services for persons with disabilities to live independently under Part B of Chapter 1 of Title VII of the Rehab. Act. Thousands of very poor adults with disabilities are nearly now to live more independently. Most qualify for government Medicaid assistance but through a complex waiver system. Thousands in Ohio are growing weary less for a similar number of workers and increasingly bankrupt. We can save only the emergencies. Currently available technology can play a significant and economically beneficial role in the lives of persons with disabilities to live safely in their community. When combined with the right support system (e.g. CIL) can be the key to a successful independent living. It is possible to offset the prohibitive ongoing support staff cost, thus making it affordable for many families. The program in this approach is the equipment that services will be driven solely by the individual's needs and not by the support staff. The program will plan and implement a program for low income adults with disabilities to live independently in a local community, with technology reducing the costs to be never affordable for families to contribute | Linking Employment, Abilities and Potential (LEAP) | 20 | 0 to 30 days | \$250,000 |
| Cuyahoga | Direct care Service Cooperatives | Lack of reliable direct care services (DCS) is a national issue. By 2010, over a half million Ohioans will need help with one activity of daily living such as bathing, dressing, and getting out of bed. LEAP helps increase access to DCS through the development of consumer-directed, community based cooperatives. Cooperatives are groups of individuals sharing resources in order to achieve a common goal. In our case, shared resources are caregivers. This is done by creating an informal consumer group that assumes the responsibility to work together to make the most effective and efficient use of DCS. LEAP's model, originally tested in Cuyahoga County is being piloted in 3 rural counties. We are developing/identifying additional models incorporating volunteers to augment traditional paid care as well as working with area home health agency to incorporate the use of cooperatives in their business practices. Brooklyn: | Linking Employment, Abilities and Potential (LEAP) | 100 | 0 to 30 days | \$50,000 |
| Cuyahoga | Ridge Road (RW) | Reconstruction from Rt.480 to Memphis Avenue Right-of-way Phase (RW) Only PID No. 82566 | NOACA | 3 | 181 days or more | \$200,000 |
| Cuyahoga | Sewing | I own a sewing business and the biggest complaint I here that clothes are no longer made in the USA. In addition to this, the quality is not there. I would like the money for advertising to promote this dying art and also include the next generation of men/women to learn how to sew and become more self sufficient. There is so much pride in seeing a garment fit properly and knowing that it has been made in the USA. I believe that this is such an important skill to pass on to the next generation or else it will get lost. | Sewing by Sandy | 1 | 0 to 30 days | \$5,000 |
| Cuyahoga | Photovoltaic Energy Commercialization | This project will encourage younger men/women the joys of sewing and the pride that goes with it. The design, fabrication, packaging and commercialization of low cost, integrated solar panels in accordance with the following: solar power generation in KW: 200, 400,800,2,400,12,000 in operating years 1,2,3,4,5 respectively. | Solar Energy Solutions | 35 | 31 to 90 days | \$700,000 |
| Cuyahoga | Home and Community Based Services | Toward Ohio's goal of balancing the long-term services and supports delivery system. Adults with disabilities under age 60 do not have a single entry point into the long-term support system in Ohio. Centers for Independent Living (CIL) are the key to a successful needed services for people with disabilities, because we cross systems and work to meet the needs of the individual. As a CIL, our funding is limited, we offer services beyond the four core required by federal legislation only when we are able to secure funding at the local level or through grant programs. We are a critical resource for supporting all individuals with disabilities to live independently in integrated community settings through training and institutionalization. We can help individuals with disabilities who are being discharged from acute care and persons transitioning out of institutions in identifying supports that allow them to remain in the community and providing guidance in developing systems that support community based care. We will help Ohio realize its goals of consumer directed care and choice of services designed to meet the needs of Ohioans with disabilities. | Linking Employment, Abilities and Potential (LEAP) | 10 | 0 to 30 days | \$100,000 |
| Cuyahoga | job re-training | We will use this money to become a CNC machinist. The money is to help pay for schooling at the Cleveland Industrial Training center located at 1511 Brookpark Rd. Cleveland, Ohio. Also the money will be spent on books, rent, and living expenses while I am going to school. Thank you. | unemployed | 1 | 0 to 30 days | \$10,000 |
| Cuyahoga | The Family Room | Family caregivers provide the vast majority of the assistance that enables seniors and those with disabilities to live independently in their homes and communities. In Ohio there are 1.1 million informal care givers giving 1.2 billion hours of care to family members (2009). NCSL's Greater Support for these parents, grandparents, children, siblings and other caregivers is needed. Family caregivers face substantial stresses and burdens as a consequence of caregiving obligations. Prolonged caregiving can adversely affect one's physical and psychological health, current and future employment status and earning capability. Tough choices result when trying to balance the needs of older parents and younger family members, amidst with the ability to meet personal needs. Services that sustain a caregiver's role and maintain their emotional and physical health are important. The Family Room provides access to information, resources, and assistance in a safe supportive environment. Provide educational seminars to pre and post retirees, to educate them on fiscal responsibility, financial markets, taxation and long term care issues. maintain pace with their cohorts by improving reading comprehension, word recognition, and pronunciation (of particular importance in ESL communities). The Playaway audiobook format uses the latest digital technology to deliver off-the-shelf and custom audio content (books and textbooks "on tape") in a simple, portable, self-playable format. Currently, schools have not had the necessary funds to acquire and maintain sufficient collections of audiobooks and texts on the Playaway format. Of the tens of thousands of K-12 schools nationally, only a small amount have introduced Playaway audiobooks to their classrooms and school libraries. At an average cost of \$40 each, the funds requested would allow Playaway to provide approximately 250,000 audiobooks to K-12 schools nationally at no cost. We are currently at capacity with 100 employees, shipping roughly 60,000 Playaways each month. Though our production is ready to scale, the added volume would require the addition of at least 20 production and 5 sales staff to produce and deliver. | Linking Employment, Abilities and Potential (LEAP) | 10 | 0 to 30 days | \$100,000 |
| Cuyahoga | Protecting Retirement | Provide educational seminars to pre and post retirees, to educate them on fiscal responsibility, financial markets, taxation and long term care issues. | Brookside Tax & Financial Group, LLC | 15 | 0 to 30 days | \$260,000 |
| Cuyahoga | Playaway | The Playaway audiobook format uses the latest digital technology to deliver off-the-shelf and custom audio content (books and textbooks "on tape") in a simple, portable, self-playable format. Though our production is ready to scale, the added volume would require the addition of at least 20 production and 5 sales staff to produce and deliver. | Findaway World LLC | 25 | 0 to 30 days | \$10,000,000 |
| Cuyahoga | Parma Community Education | Create a Parma Community Education Program which would use the expertise of community members and community businesses to provide classes and programming to community members to better the community as a whole. Four round programming would include: classes and workshops in categories, such as: Computer/Technology, Garden/Home Improvement, Sports/Fitness, Language/Culture, Basic Skills/GED/ESOL, Employment/College Success, Health/Wellness, Finance, Tours, And Music/Dance. Classes would be very affordable and offerings would be determined by the demographics of the City of Parma, eg type of employment, gender, educational background, nationality, etc. | Parma City Schools | 50 | 0 to 30 days | \$85,000 |
| Cuyahoga | Cycling Training for Commuters | Budget would permit coordinating and hosting bicycle education activities with employers throughout the county to support "bike to work" activities, including education activities, with free helmets and lights for participants. Employees would learn safe riding techniques, bicycle repair and other health advantages. | ClevelandBikes (501C3 organization) | 7 | 0 to 30 days | \$12,500 |
| Cuyahoga | Bicycle Light Distribution | ClevelandBikes members would distribute bicycle lights at no cost to riders operating on the road. The step would improve safety for cyclists, including those most vulnerable with few resources or transportation options. Our organization will work with companies to all ways to instruct their credit guidelines as well as teach the customers and business about responsible spending and lending. How companies can protect themselves from loss, and consumers can protect themselves from being taken advantage of. This will also assist companies to be able to restructure their current processes to streamline them so that there is less error and less on their part. Companies are currently afraid to lose money because of the risk, and there are in turn hurting themselves with the loss of sales, when they could have made the deal responsibly. This will create many jobs because employees will be less likely to lay workers off due to the decrease of sales and responsible lending on the part of the credit managers who are still working under outdated standards and terms. This will assist companies of all sizes to be able to get back into the lending and generate more jobs because of increased sales. Its about education, and being pro-active instead of re-active. Its time that we work on the education of those in the financial industry, mainly credit and collections managers. | ClevelandBikes (501C3) | 1 | 0 to 30 days | \$1,500 |
| Cuyahoga | Credit Transformation | Budget would permit coordinating and hosting bicycle education activities with employers throughout the county to support "bike to work" activities, including education activities, with free helmets and lights for participants. Employees would learn safe riding techniques, bicycle repair and other health advantages. | Credit Services Plus, Inc. | 30 | 0 to 30 days | \$230,000 |

|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | New Theatre Education Program | Ensemble Theatre has been a non-profit business in Cleveland Heights and Cleveland for 29 consecutive years. Its normal budgets of \$220,000 have sent \$150,500 into the Cleveland economy annually. By cutting our budget to \$165,500 for FY 2009-10, we still hope to expose students and visitors to high quality theatre, an absolute must in the current time, and still put \$60,000 back into this terrible economy. | Ensemble Theatre of Cleveland | 6 | 31 to 90 days | \$48,000 |
| Cuyahoga | Connections needed funds | Specifically for the depletion of funding and earned income, we have canceled the remainder of our 08-09 season. But for these requested stimulus funds, 4 people have already been laid off, and 2 more unable to start work. These funds would allow us to generate more earned income, thereby supporting 10 employees. We would also be able to raise the remaining funds needed for the full season operation. We are seeking to hire instructors to enhance instruction in our industry classes. We are also seeking to hire instructors and students to meet the needs and chemical dependency, and advocating on behalf of clients and their families. Annually, Connections provides care for more than 1000 individuals. Connections provides services for children, adults, and families at one of our five locations in Cuyahoga County. These funds will enable us to purchase current facility, upgrade our IT infrastructure, and bring some of our services back online with HIPAA compliance. The dollars we will be able to save by these improvements and purchases will then be put back into the organization over time to help us ensure continued care for the general population of northeast Ohio. These funds will also help by the overall cost savings after the improvements/additions in automation and employee productivity. We will be able to hire additional staff and support personnel, increase staff productivity allowing staff more time to be spent with our clients. | Connections Health/Wellness/Advocacy | 80 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | Funding for Foreclosure Victims | SAFE - Safety for Animals and Families in Emergencies would utilize the funds to increase the number of fostered victims served. | SAFE - Safety for Animals and Families in Emergenc | 3 | 0 to 30 days | \$50,000 |
| Cuyahoga | Technical training program | This is an already existing program, in which the salon participates with neighboring public high schools and cosmetology schools. The salon has partnerships with these schools to help give advance hands-on training with students to prepare them for the State Board of Cosmetology testing to become future cosmetologists or entrepreneurs. Then they will be able to work for the salon after successfully passing state test. The salon that will continue advance training, and the money would help for paid training and hourly salaries, until students become self sufficient and producing their own clientele. | R.U/Devas Salon & Spa | 6 | 31 to 90 days | \$10,000 |
| Cuyahoga | Pet Food Bank for Impoverished Families | There is an urgent need to provide a pet food bank for impoverished families. Families would not have to give up their beloved pet during these tough times. | PAX - Peace for Animals | 3 | 0 to 30 days | \$40,000 |
| Cuyahoga | homebase | Acquisition and rehabilitation of neglected neighborhood housing for low income and economically displaced families and local neighborhood residents. | djc enterprises & investments, llc | 10 | 31 to 90 days | \$2,500,000 |
| Cuyahoga | Three Future Librarians' Dreams | We have taken the first step by applying to Library School and we have been accepted into one of the best Library Programs in the country. Since the program is mainly online and we're part time students, the university doesn't offer financial aid. | Three Friends at Hrvtee | 3 | 0 to 30 days | \$110,000 |
| Cuyahoga | Demolishing Blighted Homes | Our goal is to demolish 48 abandoned/blighted homes in a 1 year time frame that be as eco friendly as possible. We have a pleasant green space for the community and maintain it. | Titanium Demolition Land Management | 7 | 31 to 90 days | \$150,000 |
| Cuyahoga | Fire Rescue Card | Purchase new rescue squad for the department to replace 12 year old vehicle. | Lyndhurst Fire Department | 5 | 31 to 90 days | \$135,000 |
| Cuyahoga | Wastewater Treatment Plant Force Main Repair | Replace old force main with new from 48 station to headworks (1,100 ft). | City of Lakewood, Department of Public Works | 10 | 31 to 90 days | \$75,000 |
| Cuyahoga | Cleveland Police Recruit, Hiring, Equipment Progra | This funding will allow the Cleveland Police Department to purchase equipment necessary to equip the 100 officers that we hope to hire with CPD's Great Stimulus Dots. This equipment is necessary in order for the officers to properly prepare to "protect and serve" Cleveland residents. | City of Cleveland, Office of the Mayor | 100 | 91 to 180 days | \$700,000 |
| Cuyahoga | Installation of solar thermal hot water heating | This funding will allow for the installation of solar thermal hot water heating systems at twelve (12) fire stations and one (1) office facility. Includes installation of five (5) solar thermal pool heating systems. | City of Cleveland, Office of the Mayor | 10 | 91 to 180 days | \$2,037,600 |
| Cuyahoga | urban education and development | Training and education centers for the poverty stricken community. To establish world wide education, job, careers and growth of the community into low income areas. Able to give back to the growing work force from technical, medical and industrial applications, from qualified sources that have adapted to the growing needs of the community and the world. | The Day Foundation | 1500 | 181 days or more | \$5,000,000 |
| Cuyahoga | Cleveland Division of Water Wind Consumption and C | This funding will allow for the installation of up to 10 MW wind capacity to supplement electrical energy consumption by the Cleveland Division of Water. | City of Cleveland, Office of the Mayor | 20 | 181 days or more | \$8,000,000 |
| Cuyahoga | Retrofitting/Replacement of Various Equipment at C | Results would assist the City of Cleveland in its effort to implement advanced energy portfolio standard (AEPS) within the Division of Water. These funds will allow the City to retrofit or replacement existing HVAC equipment, Infrared Heaters and Pool covers at various city owned facilities. Results include lowered energy consumption, energy costs, and carbon footprint. | City of Cleveland, Office of the Mayor | 15 | 91 to 180 days | \$4,252,500 |
| Cuyahoga | THE BRITISH ROCK PROJECT | Create new music performance, development and recording opportunities in the City of Cleveland for new independent ("indie") rock, such as original alternative, jazz, blues, and popular music. Create new jobs, while working to bring Cleveland back its title as the premier center for new rock music. Work with a local higher educational institution to promote and enter fresh, young rock bands from the UK and Northern Ohio while providing exposure to U.S. markets. Create "Cleveland First" exposure to new music; Ohio higher education institution exposure; Revenue creation at local clubs and venues. Job creation: talent search & promotion, contract negotiation, production engineering, and sales. The British Rock Project will have performance and recording contracts negotiated by Blackpool Records, with support from local Cleveland independent music performance venues, recording studios, and higher educational institutions. New music will be featured at Brit Rock Night. | BLACKPOOL RECORDS | 5 | 91 to 180 days | \$225,000 |
| Cuyahoga | 2nd Chance Program | Travel expenses, promotion, legal fees, insurance, engineering expenses and payroll would be supported by stimulus funds. Blackpool Records would negotiate and produce recordings and venue performances. The 2nd Chance Program will create bi-annually employment opportunities for 50-75 minority high school drop-outs & non-violent juvenile/young adult offenders throughout the Cuyahoga County. Participants are required to complete & obtain a GED, continuing on through a series of apprenticeship classes, using certified tradesman instructors. Skills to include: carpentry, plumbing, painting, drywall, masonry, electrical, lead abatement, roofing & HVAC. Upon completion, graduates will become union eligible, moving to full-time employment with company. Projects include the renovation & expansion of both existing/new residential & commercial locations. To include but not limited to hospitals, schools, local/federal buildings, housing developments & retail outlets. This work & team while you earn two year program incentive includes a comprehensive benefits package with commitment from individuals to redirect negative energy into positive through active community involvement. The grant will afford us the ability to redirect the focus of youth by augmenting their level of education, employ hard to place citizens, simultaneously assist in the prevention/reduction of crime with community. | Colvin Construction, Inc. | 100 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Installation of Solar Photovoltaic Systems | These funds will allow for the installation of up to five (5) 50 kW solar photovoltaic (PV) systems on city owned facilities. Installation of solar PV systems includes reduction in carbon footprint and meeting the City of Cleveland's advanced energy portfolio standard (AEPS) requirements. | City of Cleveland | 10 | 181 days or more | \$1,350,000 |
| Cuyahoga | 2nd Chance Program | The 2nd Chance Program will create bi-annually employment opportunities for 50-75 minority high school drop-outs & non-violent juvenile/young adult offenders throughout the Cuyahoga County. Participants are required to complete & obtain a GED, continuing on through a series of apprenticeship classes, using certified tradesman instructors. Skills to include: carpentry, plumbing, painting, drywall, masonry, electrical, lead abatement, roofing & HVAC. Upon completion, graduates will become union eligible, moving to full-time employment with company. Projects include the renovation & expansion of both existing/new residential & commercial locations. This work & team while you earn two year program incentive includes a comprehensive benefits package with commitment from individuals to redirect negative energy into positive through active community involvement. The grant will afford us the ability to redirect the focus of youth by augmenting their level of education, employ hard to place citizens, simultaneously assist in the prevention/reduction of crime with community. | Colvin Construction, Inc. | 100 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Installation of Building Automation System (BAS) f | This funding will allow the installation of building automation system (BAS) and web-based control and energy monitoring for twenty (20) city owned facilities, which would include City Hall, Justice Center, 205 St. Clair, Fire Headquarters, Public Safety Center, the stations, police stations, recreation centers, health centers, public utility facilities. | City of Cleveland | 5 | 91 to 180 days | \$243,000 |
| Cuyahoga | Installation of water treatment, distribution ener | This funding will allow for the installation of water treatment and distribution energy efficiency and energy optimization control and information technologies. Anticipated results include an 8%-12% reduction in energy consumption, lower energy costs and reduced carbon footprint. | City of Cleveland, Office of the Mayor | 20 | 181 days or more | \$1,750,000 |
| Cuyahoga | Expansion of CPP Energy Efficiency & Conservation | The PAYS program will establish a 0% interest revolving loan fund or a best practice on-bill financing strategy for residential and commercial energy efficiency retrofits. This Pilot program is currently under development, being facilitated by a partnership led by the City of Cleveland, county-weatherization experts, local energy utilities, non-profit organizations, local banks, and local colleges & universities. A pilot phase will aim to introduce efficiency retrofits for 1000 homes. Significant workforce development from local colleges and universities will be required for program implementation. | City of Cleveland, Office of the Mayor | 30 | 181 days or more | \$4,500,000 |
| Cuyahoga | Expansion of CPP Energy Efficiency & Conservation | This project will allow the City of Cleveland to expand Cleveland Public Power's Energy Efficiency and Conservation (EE&C) program to increase energy efficiency services to CPP residential customers. | City of Cleveland, Office of the Mayor | 30 | 181 days or more | \$9,000,000 |
| Cuyahoga | Bowling Center | Purchase of a bowling center that is in great need of up grading. Purchase will pay for energy saving HVAC, modernizations, new lanes, machinery, and creating new jobs for the area. Re-opening this bowling center will gear towards childrens bowling and school programs. I believe that bowling can create a great family environment. | None | 10 | 0 to 30 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Expansion of Community Development Weatherization | This project will allow the City of Cleveland to expand its Department of Community Development's weatherization and energy efficiency program to include multifamily households. This project will increase efficiency measures for approximately 10-15 multifamily buildings that resulting in lowered energy consumption, energy costs and carbon footprint. | City of Cleveland, Office of the Mayor | 15 | 181 days or more | \$225,000 |
| Cuyahoga | safe home for Alex | looking to purchase the rental home that my 4 children and I saw renting. one of my children has angelman syndrome (a rare neurogenetic condition) and I need to find a way to purchase a home so I can make the many necessary safety adjustments to keep him safe (ie. split doors to secure him in his bedroom overnight, audible alarms on doors and windows in case he gets out of his room at night so he can get outside and get help, etc.) as a single mom that's back at school (don't have enough income to put money aside for a downpayment, I've been job hunting for nearly 2 1/2 yrs with no luck, and I have limited availability for child care due to my son's disability, my mom watches him while I'm at school, with a downpayment from the government, my monthly rent could be better spent going towards a mortgage payment. I filled out the above info to the best of my ability with the options given, but I'm not an expert, just a mom. | none | 0 | 0 to 30 days | \$30,000 |
| Cuyahoga | Cleveland Public Power Smart Metering | This funding will allow the City of Cleveland to introduce smart metering capabilities to the Cleveland Public Power electrical infrastructure. CPPP would increase efficiency of operation through automated meter reading and improve overall customer service. | City of Cleveland, Office of the Mayor | 30 | 181 days or more | \$6,400,000 |
| Cuyahoga | Senior Home Improvements | This would be to start a new business that would generally help the older folks with home improvement projects that they would not be able to do themselves as a discounted price. I would like to start by hiring at least 10 people to start who are qualified in electrical, plumbing, and woodworkings and drywall. This would be a great opportunity to get jobs started in the Cuyahoga county area, and help the older people in our community. The money would used for new equipment and materials to get jobs started. | Senior Home Improvements | 10 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | education freeing us to a better life | As my mind's check into a giant sea where that would lead. I was able to begin my education online with federal aid and it has opened up a whole new world to me, not only am I capable I can do quite well, the problem I am having is my husband is having some health issues and also he has recently been laid off from his job. My husband is a plumber and a very good one too. | college | 2 | 0 to 30 days | \$10,000 |
| Cuyahoga | Transportation for the disabled | I am fully confident that I can succeed and succeed very well too. I need wheelchair accessible versus reliable transportation for the disabled, also proper training for new employees. I manage a IRS station-on the web-entertainment and interesting to college and young professionals-linking together all the learning institutions, entrepreneurial and business assets of the state. This is a self-sustaining non-profit internet Media Network designed to "do more with less" through collaboration with colleges, business and one organizations, that will engage and showcase all of the state universities, cities and businesses in Ohio to the college and young professional of the state and nation. Prospective collaborators already include: Tri-C, Dominican College, St. Alliance, Mount College, CBU, Uakelam, the Jewish Foundation, many more. The pilot web's program, "GoCity GAMER" will be a partnership with Tri-C, students and faculty. This pilot program is a tribute to the Cleveland Foundation Civic Innovation Lab, through promotional video and internet website will launch end of March. The Ohio Media Network will be funded through membership, sponsorship and advertising. A percentage of all generated goes to a scholarship fund. Scholarship will be awarded various ways through membership and sponsoring sponsorships for the GoCity Gamer pilot program. | Tri-county Transportation LLC | 4 | 0 to 30 days | \$50,000 |
| Cuyahoga | uncomn.tv (University Collaborative/Ohio Media Net | See description above. | GoT'City Productions | 2000 | 0 to 30 days | \$350,000 |
| Cuyahoga | Cleveland Public Schools Third Grader Literacy Sup | Seed fund a 3 year program targeted for third graders as a supplement to their reading curriculum with specific materials including materials and community participation. The project is roll out of an existing program that is working in on a community wide literacy adoption base. | NA | 2 | 91 to 180 days | \$60,000 |
| Cuyahoga | 2009 Street Resurfacing Program | Resurfacing and rehabilitation of various city streets including Bicovale Blvd 500' E, Beethoven Drive 1/2 Mile, Research and Crady Dr 1.75Mile, Glenhill Dr-1.200M, Hurtingham Rd-3.200M, Penhurst Drive 2.500M Asphalt Patching on 1/2 Mile and Richmond Road 500' Repar Program. | City of Beachwood | 10 | 31 to 90 days | \$2,265,000 |
| Cuyahoga | Stratten Road Culvert Replacement | Replace 500LF of deteriorated 8ft box culvert | City of Beachwood | 10 | 31 to 90 days | \$615,000 |
| Cuyahoga | Online Tax Software/Tax Smarty | Eliminating paper for filing Federal and State form manually. Saving the tax public postage to take advantage of the IRS and state e-filing program. A complete internet online software to comply with the IRS and state tax filing. | Markus and Rispoli Accounting PLL / TaxSmarty | 4 | 0 to 30 days | \$220,000 |
| Cuyahoga | Product Development for Chronic Pain Neurostimulat | Product development of a new neurostimulation therapy for chronic pain applications. Project will include product design, development, testing, and manufacturing of the medical device, as well as staffing of the manufacturing effort. These staffing positions range from senior level leadership to key support personnel. Support of this project and successful execution will enable product launch creating up to 30 new jobs within the next 12-36 months and also utilize manufacturing, product design, clinical research, and regulatory support resources and consultants located in Ohio. | Neurus Medical | 30 | 31 to 90 days | \$700,000 |
| Cuyahoga | Maximizing Melatonin | There are three entities, John Carroll University, Lighting Innovations LLC, Photonic Developments LLC Research Research on how to maximize melatonin production by the pineal gland by blocking blue light from entering the eyes (amber glasses or light bulbs for a few hours before bedtime. This is the means by which we can Cure some types of insomnia Prevent Seasonal Affective Disorder (SAD) Reduce the risk of cancer Prevent postpartum depression Development Develop new sources of safe lighting (lighting that does not suppress melatonin) that automatically switches from normal lighting to blue free lighting after a certain hour in the evening. Jobs Develop new jobs in Ohio by fostering the growth of the three-year-old web based business www.lightweight.com. This will be accomplished through a repeatable design. New Business Establish a tie-in with Ohio dairy farmers to develop a new industry based on "Night Milk" (milk that contains natural melatonin) as an aid to sleep in a billion dollar business in Europe, by controlling the color of lighting in barns. Project new repeat current bicycling activities to provide bike racks in public spaces, promoting more bicycle riding for healthy and safe transportation. Project would build on ClevelandBikes current bike parking activities and earlier bike rack distribution programs of the City of Cleveland. | Lighting Innovations Institute John Carroll Univer | 50 | 0 to 30 days | \$250,000 |
| Cuyahoga | Cycling Support for Healthy Transportation | See description above. | ClevelandBikes (501C3) | 3 | 0 to 30 days | \$10,000 |
| Cuyahoga | CO2 Vapor Recovery System | CO2 Vapor Recovery Manufacturing Dry Ice at the present time requires about 2.2 to 2.5 lbs of Liquid CO2 to make 1 lb of dry ice. This inefficient process allows 1.5 lbs of CO2 to be exhausted into the atmosphere. A vapor recovery allows these exhausted gases to be captured and refrigerated back to a liquid. This results in a conversion factor of 1.1 lbs Liquid CO2 to 1.1 lbs of dry ice in addition reducing our carbon foot print. In a typical week about 80,000 lbs of liquid CO2 is used to make 50 to 60,000 lbs of dry ice. Approximately 40 to 60,000 lbs of CO2 is exhausted into the atmosphere. The Vapor Recovery System greatly reduces cost of manufacturing and the cost to the 100 to 200 customers throughout northern Ohio. The CO2 Vapor Recovery System includes a 10,000 lb. building, refrigeration, and a Liquid CO2 storage vessel. | Cryogenesis | 6 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Renovation of new offices for JCF | The JCF has purchased a 60,000 sq. ft. office building to house our operations. We will be completely renovating the interior spaces, including upgrading all HVAC equipment, upgrading windows, improving lighting all fixtures. Our goal is to reduce our energy usage, improve air quality and make the work environment more worker friendly to improve worker efficiency. We will be applying for LEEDS certification. Rehabilitating approximately 500 eastern Cuyahoga County | Jewish Community Federation of Cleveland | 10 | 91 to 180 days | \$500,000 |
| Cuyahoga | Geothermal Rehabilitation of Homes | suburban fractional or vacant homes and renting them to stable families. All these homes will be refitted with Geothermal central heating systems for maximum energy efficiency. The homes will continue to be available for rent until the housing market stabilizes at which time they may be made available to home buying families. | Home Savers LLC | 100 | 0 to 30 days | \$75,000,000 |
| Cuyahoga | Geothermal Rehabilitation of Homes | Rehabilitating approximately 500 eastern Cuyahoga County suburban fractional or vacant homes and renting them to stable families. All these homes will be refitted with Geothermal central heating systems for maximum energy efficiency. The homes will continue to be available for rent until the housing market stabilizes at which time they may be made available to home buying families. | Home Savers LLC | 100 | 0 to 30 days | \$75,000,000 |

The homes will continue to be available for rent until the housing market stabilizes at which time they may be made available to home buying families. | Home Savers LLC | 100 | 0 to 30 days | \$75,000,000 |
| Cuyahoga | Federal Institution/Appraisers Recovery Funds | Real Estate Appraisers in the State of Ohio have been decimated by the current financial crisis. Many are self employed and/or small businesses with limited resources to sustain them through a prolonged financial downturn. As a result there will be a serious shortage of qualified, experienced real estate appraisers left to meet financial transaction requirements during recovery. As appraisers play a vital role in the banking system it is a necessity that a viable viable method of appraisers be supported in order to maintain their services as required by federal guidelines. While appraisers may not be thought of as "financial institutions" in the Code of Federal Regulations (54 AN/497), 12 C.F.R. § 225.226 specifically defines appraisers as such. A personal property or real estate appraiser is a financial institution because real and personal property appraisal is a financial activity based in 12 C.F.R. 225.226(c)(2)(ii) and referenced in section 40(k)(4)(F) of the Bank Holding Company Act. Financial assistance is a critical for this industry to survive this recession and provide the expertise needed for recovery of the financial system. | Gregory R. Cooper Residential Appraisal | 3500 | 0 to 30 days | \$87,500,000 |
| Cuyahoga | Fixing a bank owned home (mess) | I bought a bank owned home and did not get the 7,500.00 tax credit for new home owners, because I had help (government) to obtain the home, I still have to pay that back when I sell the home in a few years and also counting on that money (7,500.00) to fix all the mess that the city never taken care of. Garage and door, 8 windows, back door, porch steps, home weatherization and many other items. | Home Project | 3 | 31 to 90 days | \$25,000 |
| Cuyahoga | Geothermal Rehabilitation of Homes | Rehabilitating approximately 500 eastern Cuyahoga County suburban fractional or vacant homes and renting them to stable families. All these homes will be refitted with Geothermal central heating systems for maximum energy efficiency. The homes will continue to be available for rent until the housing market stabilizes at which time they may be made available to home buying families. | Home Savers LLC | 100 | 0 to 30 days | \$75,000,000 |
| Cuyahoga | Geothermal Rehabilitation of Homes | Rehabilitating approximately 500 eastern Cuyahoga County suburban fractional or vacant homes and renting them to stable families. | Cuyahoga | Cleveland Jail Facility (House of Corrections) Con | Currently, the City of Cleveland operates a main jail inside Police Headquarters, an older complex inside the City of Highland Hills, a storeroom in the City of Broadwood, a holding and a dormitory area inside the Justice Center, and anywhere from 0 to 5 jails at the Five Division District buildings. This project is for the construction of new Jail Facility. The City of Cleveland has a number of vacant properties that would be ideal sites for a unified Corrections Center. The purpose and mission of such a site would be to receive, process, care for, and transport all sentenced persons to court, and, to serve as a rehabilitation center for those sentenced by the Cleveland Municipal Court to the jail for minor offenses. Furthermore, federal, state, county, and local law enforcement agencies are in need of acquiring access to a facility, preferably one in close proximity to the various courts and to their administrative offices near downtown Cleveland. | City of Cleveland, Office of Mayor | 40 | 91 to 180 days | \$20,000,000 |
| Cuyahoga | GCRTA SFY 2010 - SFY 2011 Replacement Bus | GCRTA Bus Improvement Program GCRTA Replacement Buses Federal stimulus request and the total cost of the project represents two years of funding. | Northeast Ohio Areawide Coordinating Agency (NOACA) | 239 | 31 to 90 days | \$8,600,000 |

| Cuyahoga | Commercialization of Vista/Electronic Medical Reco | The Electronic Medical Document Management proprietary Solution is developed on the Vista platform as a web-based algorithm for integrated management of patients' health records, scheduling, testing, analysis, billing and records storage. | IDMI, LLC. | 20 | 0 to 30 days | \$400,000 |
| Cuyahoga | Restoration of the James A. Garfield Monument | The restoration project will include subcontracting exterior masonry restorations to the roof and walls, including installing sealant at the skyward facing gutters, repair of deck and metal repair, gutter and downspout repair, subpaving in the interior, window and door restoration, painting and cleaning, electrical renovation and stained glass window preservation for the James A. Garfield Monument, final resting place of the 20th president of the US. Located in Lake View Cemetery, the James A. Garfield Monument was dedicated on Memorial Day, 1900. The cemetery has been a good steward of the building, but time and exposure to the elements have caused the Monument to deteriorate. The Lake View Cemetery Foundation is a 501 c.3, established in 1984 for educational purposes and to maintain, preserve and enhance for the benefit of the general public the historically and architecturally significant buildings, monuments, the horticulture, botanical gardens and landscape at Lake View Cemetery NOACA Region Courtesy of Cuyahoga, Geauga, Lake, Lorain and Medina Air Quality Programs Activities | The Lake View Cemetery Foundation | 29 | 31 to 90 days | \$2,500,000 |
| Cuyahoga | SFY 2010 Air Quality Program | Courtesy of Cuyahoga, Geauga, Lake, Lorain and Medina Air Quality Programs Activities | Northeast Ohio Areawide Coordinating Agency (NOACA) | 7 | 31 to 90 days | \$235,000 |
| Cuyahoga | HIGH TEMPERATURE MEMS SENSORS COMMERCIALIZATION | Commercialize a suite of high temperature MEMS sensors (pressure, seismic, and inclination) for monitoring the harsh conditions in geothermal reservoirs, where temperature can be higher than 250 °C, detecting ultra low-level seismic perturbations, monitoring high pressures during deep well drilling and monitoring inclination to determine high side in order to know how far off vertical and orientation of the rock core is. The DOE effort toward developing geothermal energy as an alternative sustainable source of energy would need robust and reliable sensors (pressure, seismic, and inclination) to monitor the harsh conditions in the geothermal reservoirs where temperature can be higher than 250 °C. NOACA REGION Courtesy of Cuyahoga, Geauga, Lake, Lorain and Medina Air Quality Programs Activities | Biotronics, Inc. | 40 | 31 to 90 days | \$750,000 |
| Cuyahoga | SFY 2010 RIDESHARE PROGRAM | Courtesy of Cuyahoga, Geauga, Lake, Lorain and Medina Air Quality Programs Activities | Northeast Ohio Areawide Coordinating Agency (NOACA) | 13 | 31 to 90 days | \$455,000 |

| Cuyahoga | HIRE TWO LEED AP ARCHITECTS AND EQUIPMENT | We are a small firm with the desire to hire up to two registered LEED AP architects with experience in LEED certified projects and provide them with computer hardware, upgraded software and support equipment in order to compete for "green" projects in the state of Ohio which would benefit our overall environment for now and in the future. Other jobs would be created through our use of consultants and the construction jobs related to those projects. Our search for qualified architects would include minority and female candidates because we believe in equal employment opportunity. There are many architects out of work currently and this could give some of them hope. Thanks to your consideration. | LB ARCHITECTS LLC | 2 | 0 to 30 days | \$250,000 |
| Cuyahoga | Bagley Rd. | Repair and resurface Bagley Road from Eastland Rd. to US-42 (Pual Rd.) | Northeast Ohio Areawide Coordinating Agency (NOACA) | 129 | 31 to 90 days | \$5,800,000 |
| Cuyahoga | Start Remodeling Bussines | I would like to restart the remodeling business I had in Rochester, NY before 9/11. I did quality work for good honest rates and had hard working employees but unfortunately after 9/11 people got scared and would not spend so I had to close up. Here in Lakewood Ohio I have had to pass up on some good help and good work opportunities due to the lack of funding after the purchase of my first home. I could start a thriving business here with the proper start-up money and employ hard working Ohio carpenters. | Mackey Remodeling | 2 | 0 to 30 days | \$20,000 |
| Cuyahoga | Cleveland Educare Early Childhood Center of Excell | Develop a West Side Ecumenical Ministry in, working with the nationally acclaimed Bocus Learning Network of Educare Centers, the Buffet Early Childhood Fund, the Dorcas of Prevention Fund, the Cleveland Metropolitan School District, the Gund Foundation and a host of other public and private partners to transform WSEM's current, 42-year-old successful early childhood education program serving over 1,000 Cleveland children, each day into an Educare Early Childhood Center of Excellence. This is a request for \$4.5 million to support a \$10,000,000 new Educare model construction build the Center in Cleveland, Ohio. The school will combine the best of Head Start, Early Learning Institute, child care and preschool to help at-risk infants, toddlers and preschoolers grow up eager to learn and ready to start school. The new research-based center will become part of a national strategy for early childhood education reform that already includes a national network of schools. A Business Plan, feasibility studies, construction plans, Educare site visits, partnerships and other funding sources all support the advancement of this project in Cleveland in 2009 and 2010. WSEM is ready. Lakewood | West Side Ecumenical Ministry | 350 | 91 to 180 days | \$4,500,000 |
| Cuyahoga | Lakewood Signals Phase II | Traffic Signal Upgrade along US-6A (Dorset Avenue), from Arthur Avenue to Ridgewood Avenue. | Northeast Ohio Areawide Coordinating Agency (NOACA) | 51 | 91 to 180 days | \$2,269,575 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Adopt Cuyahoga's Kids | The Adopt Cuyahoga's Kids Initiative has been tremendously successful in finding adoptive families for youth in the permanent custody of Cuyahoga County. Since 2004 this initiative has found families for 405 children at highest risk of aging out of foster care using a multifaceted approach. It has helped reduce the number of children and youth in permanent custody of Cuyahoga County from 1,700 in 2002 to 705 today. Without this initiative, many of these children and youth would not have been adopted. Unfortunately, youth who age out of foster care without a permanent family are more likely to require additional services as young adults since they are at increased risk of homelessness, incarceration, unemployment, addiction, physical and mental health issues, and early parenthood. Costs for case management for a youth who enters foster care at 13, ages out at 18 and receives additional treatment for ages 18-22 average more than \$150,000 per youth. Each year, Adopt Cuyahoga's Kids works with 150 youth in permanent county custody of and their families for 40 of these youth. The funding requested in this proposal would help support 37 full-time positions for two years. | Adoption Network Cleveland | 37 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Rockside Road | Repair and resurface Rockside Rd. from SR-14 (Roadway Ave.) to SR-43 (Aurora Rd.) PID No. 83173 | Northeast Ohio Areawide Coordinating Agency (NOACA) | 111 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | Adoption Navigators | Adoption Navigators provide information and support to prospective adoptive parents. They have played a critical role in reducing the number of children who are in the permanent custody of Cuyahoga County from 1,700 in 2002 to 705 today. Traditional adoption methods result in one adoption from the public system for every 30 inquiries. With the work of Adoption Navigators, the success rate is 1 in 8. Without Adoption Navigators, many children in the child welfare system would not have been adopted and would have required additional services as young adults due to increased risk of homelessness, incarceration, unemployment, addiction, physical and mental health issues, and early parenthood. Costs for case management for a youth who enters foster care at 13, ages out at 18 and receives additional treatment for ages 18-22 average more than \$150,000. Each year, Adoption Navigators connects 2,000 contacts with families, provide assistance in the adoption process to all prospective adoptive families and assist with the adoptive placement of 35 children and youth. This proposal would provide funding for 4 FTE Adoption Navigators, 1 FTE supervisor and administrative costs of these positions for two years. This youth. The mentoring relationship helps teens without permanent family ties learn to establish and maintain permanent relationships in their lives. Teens from ages 13 through 19 years, in permanent county custody, work with mentors to build social skills and to discuss future goals and challenges. Research has shown that one significant adult relationship can help decrease risks associated with aging out of foster care without a permanent family, including homelessness, incarceration, unemployment, addiction, physical and mental health issues, and early parenthood. Costs for case management for a youth who enters foster care at 13, ages out at 18 and receives additional treatment between ages 18-22 for the issues listed above averages more than \$150,000. The Permanency Champions Mentoring Program currently has 38 mentor-mentee matches. In addition to sustaining these matches, the program seeks to add an additional 40 matches per year. This proposal would help provide funding for five full-time staff positions for this program. | Adoption Network Cleveland | 5 | 0 to 30 days | \$386,400 |
| Cuyahoga | Permanency Champions Mentoring Program | Research has shown that one significant adult relationship can help decrease risks associated with aging out of foster care without a permanent family, including homelessness, incarceration, unemployment, addiction, physical and mental health issues, and early parenthood. Costs for case management for a youth who enters foster care at 13, ages out at 18 and receives additional treatment between ages 18-22 for the issues listed above averages more than \$150,000. The Permanency Champions Mentoring Program currently has 38 mentor-mentee matches. In addition to sustaining these matches, the program seeks to add an additional 40 matches per year. This proposal would help provide funding for five full-time staff positions for this program. | Adoption Network Cleveland | 5 | 0 to 30 days | \$417,800 |
| Cuyahoga | Commercialization of Stereo Imaging Velocimetry (SIV) | Stereo Imaging Velocimetry (SIV) is a patented and affordable fluid physics method for obtaining quantitative, three-dimensional (3D) flow information from any transparent fluid, gas, or air seeded with tracer particles, without the use of laser. SIV provides a non-intrusive means of measuring 3D fluid velocities using charge-coupled device (CCD) video cameras and artificial neural-network-based computational algorithms. It has applications in avoiding low flow regions in artificial hearts in the field of Biomechanics. In improving the aerodynamics of aircraft, automobiles. Cleveland: Acquisition of right-of-way (ROW) to construct Cleveland Towpath Trail Stage I from Harvard Rd. to Beavlyard Commons ROW only PID No. 80997 STIP ID No. 2243 This funding would all the City of Cleveland to construct streetscape improvements along model blocks along the Lorain Avenue Corridor. | Digital Interface Systems, Inc. | 25 | 0 to 30 days | \$500,000 |
| Cuyahoga | Cleveland Towpath Trail Stage I (RW) | Acquisition of right-of-way (ROW) to construct Cleveland Towpath Trail Stage I from Harvard Rd. to Beavlyard Commons ROW only PID No. 80997 STIP ID No. 2243 This funding would all the City of Cleveland to construct streetscape improvements along model blocks along the Lorain Avenue Corridor. | Northeast Ohio Areawide Coordinating Agency (NOACA) | 6 | 91 to 180 days | \$500,000 |
| Cuyahoga | Lorain Avenue Streetscaping | This funding would all the City of Cleveland to construct streetscape improvements along model blocks along the Lorain Avenue Corridor. | City of Cleveland, Office of Mayor | 190 | 31 to 90 days | \$8,000,000 |
| Cuyahoga | SFY 2011 Air Quality Program | NOACA Region: Courtesies of Cuyahoga, Geauga, Lake, Lorain and Medina Air Quality Program Activities. PID No. 84337 | Northeast Ohio Areawide Coordinating Agency (NOACA) | 5 | 91 to 180 days | \$235,000 |
| Cuyahoga | Workforce development for older out of school youth | Youth ages 18-24 will receive tutoring, job support and classroom training and field training in carpentry, plumbing and home renovation skills. Youth will participate in renovation of four houses in the 44103 community. Youth will be mentored by 10 retired trades men. Youth will increase their skill level in reading and math as evidenced by pre and post tests. Youth will learn business etiquette and small business development approaches to encourage entrepreneurial opportunities. | CCCS/Fatima Family Center | 20 | 31 to 90 days | \$300,000 |
| Cuyahoga | Thrive Neighborhood Resurgence Collaboration | This project will reinvigorate the economy through a collaborative effort of community resources. The project will educate and counsel residents to assist them in preventing foreclosure as well as offer affordable housing. We will also offer workforce development programs to educate and engage residents to have marketable skills This will prepare them to reenter the workforce. NOACA Region: Courtesies of Cuyahoga, Geauga, Lake, Lorain and Medina Rideshare Program Activities PID No. 84335 | Thrive Economic Development Corporation | 50 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | SFY 2011 Rideshare Program | NOACA Region: Courtesies of Cuyahoga, Geauga, Lake, Lorain and Medina Rideshare Program Activities PID No. 84335 | Northeast Ohio Areawide Coordinating Agency (NOACA) | 13 | 31 to 90 days | \$435,000 |
| Cuyahoga | Something For EveryOne | Inventory, Equipment, Lease Space, & Payroll Money. NOACA Region: Courtesies of Cuyahoga, Geauga, Lake, Lorain and Medina Rideshare Program Activities PID No. 84335 | Something For Everyone | 6 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | SFY 2011 Transportation for Livable Communities In | Transportation for Livable Communities (TLC) Program. Develop and Implement TLC Program. PID No. 84335 Beachwood, Highland Hills, Orange, Woodmere | Northeast Ohio Areawide Coordinating Agency (NOACA) | 28 | 31 to 90 days | \$1,250,000 |
| Cuyahoga | US 422/SR-87-09.96/11.80 | Traffic Signal Upgrade (with ITS Technology) along US-422 (Chagrin Blvd) from Behavior Road to Orange Place. PID No. 16499 STIP ID No. 2788 All references to "highways" are "Lanes" | Northeast Ohio Areawide Coordinating Agency (NOACA) | 31 | 181 days or more | \$1,631,401 |
| Cuyahoga | Job Retraining - Engineering/Drafting Design Esse | Funding would extend and expand existing voluntary community service program donated by Fisher/Unitech in Ohio, from 2 locations to 4 (Cleveland, Dayton, Columbus and Wooster), in partnership with 3 city/state/educational organizations available on request, but not to be published in this summary. Program provides job retraining to displaced engineers/drafters in the leading 3D mechanical design technology (SolidWorks) sought by employers worldwide, with particular value in product design and manufacturing sectors. Existing program was started by Fisher/Unitech as a community service, and has generated positive employment results already (50 companies interested in providing internships and possible employment to graduates) and there is a waiting list for entry to this program. The program is free to qualified engineers/drafters who have been displaced for economic reasons within the past 12 months. Positive feedback and great interest has been shown throughout Ohio, including employers, displaced workers, job networking groups and community service organizations. | Fisher/Unitech, Inc. | 4 | 0 to 30 days | \$1,273,600 |
| Cuyahoga | Lakewood Signals Phase II | Lakewood: Traffic Signal Upgrade along US-4A (Detroit Avenue), from Metro Parkway/Stone Avenue to Lakeland Avenue PID No. 82795 STIP ID No. 2626 Cleveland: | Northeast Ohio Areawide Coordinating Agency (NOACA) | 25 | 181 days or more | \$2,987,985 |
| Cuyahoga | Cleveland Towpath Train Stage I (C) | Construct Cleveland Towpath Trail Stage I from Harvard Road to Beavlyard Commons Construction Phase PID No. 80997 STIP ID No. 2783 Cleveland: | Northeast Ohio Areawide Coordinating Agency (NOACA) | 156 | 181 days or more | \$5,600,000 |
| Cuyahoga | Cleveland Towpath Trail Stage I (C) | Construct Cleveland Towpath Trail Stage I from Harvard Road to Beavlyard Commons Construction Phase PID No. 80997 STIP ID No. 2783 Cleveland: | Northeast Ohio Areawide Coordinating Agency (NOACA) | 156 | 181 days or more | \$5,600,000 |
| Cuyahoga | Bldg Rehab | Rehab occupied commercial building. Providing Information Technology Strategy, Solutions, and Support for all struggling businesses in the Northeast Ohio area who are currently focusing on Producing Clean and Efficient Energy or in the Healthcare, Banking, or Professional Services Areas (see Law Firms, Accounting Firms, etc.). | Davis Industrial | 25 | 0 to 30 days | \$128,000 |
| Cuyahoga | Technology Sector Recovery | Rehab occupied commercial building. Providing Information Technology Strategy, Solutions, and Support for all struggling businesses in the Northeast Ohio area who are currently focusing on Producing Clean and Efficient Energy or in the Healthcare, Banking, or Professional Services Areas (see Law Firms, Accounting Firms, etc.). | AnyKey IT Solutions | 50 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Bike Rack Attack for Cuyahoga County | The scope of the project is to install 1000 bike racks throughout Cuyahoga County. The sites will be chosen based on meetings with community development groups, city officials, Parks and Recreation Department and City Planning. Public input will be solicited from a ClevelandBikes web site on proposed locations. Neighborhood meetings were also conducted to gather public input. | ClevelandBikes | 5 | 0 to 30 days | \$750,000 |
| Cuyahoga | Jobs for Ohio's Graduates (JOG) | The scope of the project is to install 1000 bike racks throughout Cuyahoga County. The sites will be chosen based on meetings with community development groups, city officials, Parks and Recreation Department and City Planning. Public input will be solicited from a ClevelandBikes web site on proposed locations. Neighborhood meetings were also conducted to gather public input. Jobs for Ohio's Graduates (JOG) serves teens most at risk of dropping out of HS. JOG addresses social barriers to HS graduation, addresses 37 core competencies required for academics and workplace success, teaches job-seeking and job-retention skills, and places youth in entry-level jobs. JOG is expected to meet outcomes required by its national affiliate, Jobs for America's Graduates (JAG), a national Best Practices) and its parent agency, Youth Opportunities Unlimited (Y.O.U.). JOG typically exceeds Y.O.U.'s national outcomes: 85% of those placed in 11 advance to next grade; 85% of seniors obtain HS diploma; 80% of grads go on to employment and/or college/other study; 70% of those placed in long-term (to complete 90+ days); 80% of those placed in short-term jobs complete the job. JOG is a daily for-credit class in small sessions. In FY2010 we expect to serve 270 youth in six high schools in areas of high poverty (4 in Cleveland; 1 in East Cleveland; 1 in other inner-ring suburbs). In addition to the school districts involved, JOG partners with some of Y.O.U.'s 300 employers. As a result of an outstanding record of outcomes, JOG is supported by United Way of Greater Cleveland. | Youth Opportunities Unlimited (Y.O.U.) | 100 | 91 to 180 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Prime Time | Prime Time is a year-round program that encourages teens in poverty and at high risk to succeed academically, develop employability and job-seeking skills, explore careers, hone study skills, and pursue college or other study needed for career and life success. A unique collaboration with Cleveland Public Library, Prime Time reaches about 125 teens and offers them a four-hour city-tour-based program in Cleveland. Strong emphasis is put on careers and college, and typically half of Prime Time grads go on to college, usually in combination with employment. Some of the 300 employees affiliated with Prime Time. Prime Time typically reaches 100-125 teens in grades 9-11 advance to the next grade, 85% in grade 12 obtain HS diploma, 80% of grads go on to employment and/or college/university, 70% of those placed in long-term job complete 90+ days, 50% of those placed in short-term job complete the assignment. | Youth Opportunities Unlimited (Y.O.U.) | 100 | 91 to 180 days | \$100,000 |
| Cuyahoga | South Building - Ground Floor Build-Out | Ground floor of South Building - Former ORCEI was recently demolished and can now be retrofitted to receive additional medical support functions, such as laboratories, clinics, and Central Sterile Supply. | The MetroHealth System | 2000 | 181 days or more | \$7,500,000 |
| Cuyahoga | Rebuilding Day 2009 | Help low income homeowners to fix up their homes and weatherize them. Green the homes with fluorescent bulbs, caulking, repairs, water heater, air conditioning, etc. We intend to build on the success of the City of Cleveland in 2009. | Rebuilding Together Cleveland | 0 | 31 to 90 days | \$50,000 |
| Cuyahoga | New Patient Bed Tower | Existing patient care tower to over 48 years old with aging service infrastructure and inadequate clinical needs replacement is required to bring patient rooms & ancillary support up to current codes. | The MetroHealth System | 5000 | 181 days or more | \$250,000,000 |
| Cuyahoga | Prison Experiences & Re-entry: Securing Employment | Research from a recent grant through the research initiative of Justice Community Research at the University of the State of Ohio, the project seeks to examine employment outcomes among a sample of parolees in Ohio. Employment among parolees is a serious concern for both public safety and neighborhood stabilization. A criminal record typically inhibits employability once released from the institution. There is limited research examining other factors that limit an offender's success finding employment in the community. The project will examine whether victimization experiences in prison exacerbate the already difficult transition parolees face as they attempt to re-enter the workforce. This has implications for helping offenders, neighborhood revitalization, assisting in retraining, education, and gaining and sustaining employment (jobs gained and jobs not lost). Prison experiences have been collected as part of the original project. The current study would provide additional funding to collect employment data through multiple community sources. | Kent State University | 3 | 31 to 90 days | \$100,000 |
| Cuyahoga | South Point Drive Widening | Would eliminate traffic congestion at both intersections & allow ambulances to get patients to emergency room faster. | The MetroHealth System | 300 | 91 to 180 days | \$600,000 |
| Cuyahoga | Continued OraFlow (Total Oral Hygiene Device) Deve | Continue the Ohio-based development of the OraFlow oral hygiene device designed to treat all bacterial, fungal, and viral infections of the mouth, along with preventing and reversing the adverse effects of gingivitis and gum recession and serving as a cheaper alternative to surgical procedures. The OraFlow has been in development for over a year by Cleveland area companies and additional funding is required to complete the project, which would create and/or retain sales, marketing and engineering positions in the Ohio economy. The OraFlow has the potential to serve approximately 50% of the US population, and penetrating such a large market will require continued and lasting job creation over the coming years beyond the current estimated constrained jobs. Funding will be used for internal development efforts and job creation, as well as consultation and prototyping from other Ohio-based product development companies. | Bioelectrics LLC | 10 | 0 to 30 days | \$250,000 |
| Cuyahoga | Transformer/Distribution Station Relocation | Infrastructure Improvement: Relocating Cleveland Public Power aging transformer distribution station would allow for more efficient distribution of energy costs to the community and would allow MetroHealth to be able to construct a new medical facility on the site. | The MetroHealth System | 250 | 181 days or more | \$2,000,000 |
| Cuyahoga | THE REBUILDING ACT | EDUCATION, CHILD CARE, SHELTERS & LEARNING INSTITUTIONS BLDG 1-16,187 SQ. FT. WILL PARTNERSHIP & DEVELOP MORE IDEAS ON EXPANDING & CREATING MORE JOB OPPORTUNITIES | GARDEN CITY COMMUNITY CENTER INC | 500 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Golgi Stimulator Treatment Device Continued Develo | Continued development and commercialization of the Golgi Stimulator medical treatment device, a treatment apparatus utilizing new medical concepts in neuromusculoskeletal deplacement combined with fluctuating magnetic fields to treat a range of musculoskeletal and nervous disorders with regenerative efficacy. Funding will be used to continue development of the device with Ohio-based product development companies, as well as initial efforts. Outcomes will include the manufacturing of an Ohio-developed and designed medical device to be sold nationally to doctors, hospitals and physical therapy offices. A consumer version of this device may also be sequentially developed, offering a lower-costing option for home treatment. Sales figures expected to exceed 500,000 units within the first four years. Expected to generate 20+ new Ohio jobs during this time frame. | Bioelectrics LLC | 8 | 31 to 90 days | \$375,000 |
| Cuyahoga | Pathology and Labor and Delivery Renovation | Pathology and L&D operating rooms are over 35 yrs old with inadequate cooling capacity and an aged infrastructure. | The MetroHealth System | 2000 | 181 days or more | \$15,000,000 |
| Cuyahoga | Specialized facilities for ventilator-dependent ch | Physical fitness, outdoor activities and recreation are important for the health and well-being of all children, including children with a wide range of disabilities. Federal Stimulus Funds will be used to build 2 specialized facilities, at ages 4-900 square feet each at our Camp Cheerful in Strongsville, that are designed for children dependent on ventilators as well as children with other significant disabilities and medical conditions. Special features of the building include a meeting room, bigger sleeping quarters that can accommodate wheelchairs, special beds and other equipment, large adapted bathroom and shower area, emergency generators and more than double the typical electrical outlet and capacity. Each facility could serve as many as 48 campers. Because of the intense health care needs of these children, space to house a full time nurse is also needed. When at Camp Cheerful, children with significant disabilities get a chance to "take a vacation" from their disability and families who are round the clock for their child with special needs are provided much needed respite, while their children are safe and experiencing a normal and healthy aspect of childhood. | Achievement Centers for Children | 16 | 181 days or more | \$1,100,000 |
| Cuyahoga | Electronic Records Implementation | Funding would be used to purchase and implement a comprehensive electronic medical record and child welfare information system. Outdated, separate and incompatible systems will be brought together into one integrated database that would encompass the data required to operate a diverse and connected continuum of community-based outcomes include efficiencies in workflows, elimination of paper processes, improved quality of clinical documentation, increased productivity, reduced costs, improved clinical care and coordination of services internally and with outside entities. | Beech Brook | 10 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | EMS Garage and South Parking Garage | Founded in 1952, Beech Brook is now a nationally recognized treatment center for emotionally disturbed children, youth and their families. With a staff of 460, Beech Brook serves over 21,000 children, youth and adults in Northeast Ohio every year. Garage is over 40 years old and in need of constant repair. Emergency Medical Service Garage is currently built in the parking structure and must be replaced at the same time. | The MetroHealth System | 2500 | 181 days or more | \$17,000,000 |
| Cuyahoga | Northeast Ohio Energy Accelerator | Northeast Ohio possesses significant assets throughout to vast industrial base, thriving entrepreneurial and vibrant community, outstanding academic research institutions and economic development organizations which are actively developing advanced and alternative energy solutions for the global market. In order to accelerate the pace and increase the capacity to bring solutions to the marketplace in order to maximize economic benefit to Northeast Ohio, additional resources are needed in the region. This proposal would fund resources and activities to drive advanced and alternative energy development, commercialization, scale production and deployment results in Northeast Ohio. The funds would be deployed to drive specific opportunities by: a) championing projects, b) building collaborations, c) developing business cases, d) conducting market assessments, e) attracting partners from outside the region, f) recruiting talent to fill gaps, g) competing for funding from private sector, state and federal sources, h) communicating the vision and telling the story, i) and other activities and services. | NorTech | 250 | 31 to 90 days | \$9,000,000 |
| Cuyahoga | North Parking Garage | Garage is over 40 years old and in need of constant repair. New garage to house additional public employee parking. | The MetroHealth System | 2000 | 181 days or more | \$15,000,000 |
| Cuyahoga | Mobile Low Vision Clinic | The remaining functional vision of those who are visually impaired through examinations and prescription of low vision aids. Different from a normal eye exam, low vision optometrists not only evaluate how well a patient sees an eye chart, but also how well they see from environmental obstacles, such as doorways, print materials and other visual cues that they may encounter during their daily routing. Vision aids are then prescribed to allow patients to use the minimal vision they do to its maximum capacity. Ultimately, the low vision clinic provides patients with the tools they need to stay independent and increase quality of life. | Cleveland Society for the Blind, dba Cleveland Sig | 3 | 91 to 180 days | \$300,000 |
| Cuyahoga | WSEM Support Services Infrastructure Upgrade Proje | Cleveland Sight Center would like to establish a mobile low vision clinic staffed with one ophthalmologist specialty trained in low vision, a clinic manager and an occupational therapist. This mobile unit will allow Cleveland Sight Center to serve the visually impaired in the surrounding areas that do not currently have convenient access to low vision exams. These core outcomes necessary to a 4-year plan includes: ramping services over 4 years, increasing each year by 20 locations through rigorous preschool education, job training and placement, access to emergency food and support services, and behavioral healthcare. The agency plans to build a new \$10 million Education Model Care Children's Education Center (see other request) and coordinate some services and administrative supports for all four programs. To accomplish this WSEM is planning a Support Services Infrastructure Improvement Project. Monies requested here will allow the agency to: * Reconfigure and upgrade WSEM's telecommunications: \$98,000, and computers system: \$235,102.00. (An in-depth study completed by a United Way approved company (Telerys) documents need and provides recommendations and quotes) * Relocate Counseling Solutions and demolish the existing building: \$50,000. * Update and reconfigure some offices and classrooms: \$250,000. * Replace the HVAC system: \$400,000. | West Side Ecumenical Ministry | 150 | 31 to 90 days | \$1,598,102 |
| Cuyahoga | School-to-Work Toolkit - Assistive Technology Lend | Adults who are blind or visually impaired. Children who are visually impaired or blind currently enrolled in school or who are employed are eligible to receive adaptive technology for use in school or on the job at no cost through the Bureau of Services for the Visually Impaired (BSVI). However, for those who are waiting to find employment, adaptive technology is not available through the state, and most clients are unable to afford the cost of technology on their own. The purpose of the School-to-Work Toolkit is to provide those currently looking for employment the technology and follow-up training they need to practice and maintain their adaptive technology skills to stay competitive until they become employed. It also provides consumers with the opportunity to test equipment prior to purchasing to help determine if the technology purchased meets their needs, and not all technology is appropriate for every individual. This ensures that schools/employers purchase the technology that best allows consumers to succeed, and BSVI does not have to purchase the technology. | Cleveland Society for the Blind, dba Cleveland Sig | 60 | 31 to 90 days | \$300,000 |
| Cuyahoga | Starting a small Garage Door business need money f | Need a truck and ladder rack to do installation of such as garage doors openers and service. need more tools/ hardware and machines to do the work. need insurance on business and vehicle. need an office to run business out of such as storing product and use as business office. need to purchase product to get started. need to advertise in phone book/ to commercials/ web site and any other ways possible to get the name out there. need by other miscellaneous stuff. | GarageDoor | 2 | 0 to 30 days | \$200,000 |
| Cuyahoga | Early screening | THIS PROJECT INCLUDES SUPPLY PREVENTATIVE SCREENING TEST SUCH AS HYL, GLUCOSE TEST, BLOOD PRESSURE SCREENING, AS WELL AS VARIOUS BLOOD TEST FOR CHOLESTROL, LIPIDS ETC. PREVENTATIVE SCREENING IS MOST FOR THOSE WHO CANT AFFORD THEM. | champions clinical | 2 | 31 to 90 days | \$75,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | Main Campus Interior Wayfinding | Interior wayfinding has not been updated in 20 years and needs to reflect our patient population. | The MetroHealth System | 150 | 181 days or more | \$1,600,000 |
| Cuyahoga | Cystic Fibrosis Lung Therapeutic | Copernicus Therapeutics is requesting funds for animal studies in support of a lung aerosol clinical trial in subjects with cystic fibrosis. The Copernicus DNA nanoparticle technology efficiently and safely introduces a normal copy of the CF gene into affected cells of the lung. We have extensive experience in this area, including preclinical clinical trial in CF subjects with encouraging results. Additional funding is needed to complete regulatory studies required for FDA approval to initiate a lung aerosol clinical trial. | Copernicus Therapeutics, Inc. | 12 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Masonry Tuckpointing at Old Brooklyn Campus | Old Brooklyn Campus has a combination of structures ranging from 1920's to 1970's and are in need of masonry repair. | The MetroHealth System | 1000 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Treatment and Prevention of Influenza | Influenza infection is a significant source of patient morbidity and mortality in the US, with approximately 45,000 deaths per year despite the availability of several anti-viral medicines. Copernicus Therapeutics has developed a DNA nanoparticle technology that safely and efficiently delivers DNA to the nucleus of lung cells. DNA nanoparticles have been designed to destroy influenza virus after lung infection and is predicted to limit patient mortality and morbidity, and to decrease the spread of infection. This DNA nanoparticle anti-influenza drug could be administered as a prophylactic to prevent infection, or to actively treat patients with influenza. Support is requested for proof-of-concept animal studies and various toxicology studies required for FDA approval of a phase I clinical trial in normal subjects and patients with influenza infection. Moreover, the design of the nanoparticle payload can be altered to treat other viral infections, including bird flu and SARS, and may have applications for rapid response to prepare therapies for various biothreat agents. | Copernicus Therapeutics, Inc. | 18 | 0 to 30 days | \$3,000,000 |
| Cuyahoga | Masonry Tuckpointing in Hamann Building on Main Ca | Hamann Bldg. Was constructed in the late 1920's and is in severe need of masonry tuckpointing. Brick is deteriorating along with stone cornices. | The MetroHealth System | 1000 | 91 to 180 days | \$3,000,000 |
| Cuyahoga | Recover, Recycle, Redistribute | The MedWish International Recover, Recycle, Redistribute program allows Ohio hospitals, healthcare facilities and medical supply companies the opportunity to recycle their usable but unwanted medical supplies, equipment and furnishings through MedWish who redistributes them as humanitarian aid to nearby 80 developing countries worldwide. Funding will permit MedWish to bring the Recover, Recycle Redistribute program to four other hospital systems outside of Northeast Ohio, including Lorain and decreasing hospital costs. Collaborating hospitals include Kaiser Permanente, Humility of Mary, Good Samaritan and Riverside Methodist Hospital. Funding will also be used to hire an additional staff person to assist with inventory management and sustainability. Currently, MedWish recovers approximately 500,000 pounds of medical supplies per year; the additional staff person will enable the organization to process and redistribute the items quicker, enabling other hospitals to participate in the Recover, Recycle, Redistribute program. MedWish International is the only nonprofit, medical supply resource organization (NPO) in Ohio. | MedWish International | 6 | 0 to 30 days | \$100,000 |
| Cuyahoga | Construction of Perimeter Safety Fence | Beech Brook is a child welfare agency that provides residential treatment to children and teens on its 70 acre campus in Pepper Pike, Ohio. Increased acuity of the clients that Beech Brook serves requires additional containment measures to assure the safety of the children. Beech Brook would utilize the funding to enhance the primary treatment and administrative areas with a combination of chain link and ornamental iron controlled access by fence of a gate. Founded in 1952, Beech Brook is now a nationally recognized treatment center for emotionally disturbed children, youth and teens in Ohio. With a staff of 460, Beech Brook serves over 21,600 children, youth and adults in Northeast Ohio every year. Campus programs include Day Treatment and Partial Hospitalization, Residential Treatment, and classroom education at the Gund School (part of Orange School District). | Beech Brook | 15 | 0 to 30 days | \$205,000 |
| Cuyahoga | Macular Degeneration Therapeutic | Copernicus Therapeutics has developed a DNA nanoparticle technology that safely and effectively delivers DNA to the retina and choroid of the eye, which are the sites of disease of adult macular degeneration. Although no single gene defect explains the majority of patients with age-related macular degeneration, various pathways are thought to be involved and accurate disease progression and response to treatment with progressive damage to various retinal tissues. DNA nanoparticle payloads may interrupt this pathway by further down-regulating complement consumption or interrupting pathways that cause cell damage. Support is requested for proof-of-concept animal studies and various toxicology studies required for FDA approval of a phase I clinical trial in subjects with macular degeneration. | Copernicus Therapeutics, Inc. | 24 | 0 to 30 days | \$4,000,000 |
| Cuyahoga | Retrofit dwelling with energy efficient upgrades | Replace original furnace with high efficiency unit. Insulate and replace roof of dwelling to further increase efficiency. Install solar solar panel system to further energy efficiency, reduce natural resource dependence and reduce carbon emissions. | n/a | 15 | 0 to 30 days | \$30,000 |
| Cuyahoga | Parkinson's Disease Therapeutic | Copernicus Therapeutics has developed a DNA nanoparticle technology that safely and effectively delivers DNA to cells of the brain, including neurons involved in the pathogenesis of Parkinson's disease. In proof-of-concept animal studies, DNA nanoparticles exposed to a hippocampal layer for dopaminergic neurons has dramatically improved motor impairment. Support is requested for additional proof-of-concept animal studies and various toxicology studies required for FDA approval of a phase I clinical trial in subjects with Parkinson's disease. | Copernicus Therapeutics, Inc. | 18 | 0 to 30 days | \$3,000,000 |
| Cuyahoga | Cancer Therapeutic | Copernicus Therapeutics has developed a DNA nanoparticle technology that safely and effectively delivers DNA to tumor cells in animals. Following in vivo administration of DNA nanoparticles, high level gene expression has been observed in a colon cancer model, although many other tumor types are currently being tested. Funds are requested to optimize gene delivery and expression in several tumor models, including various toxicology studies required for FDA approval of a phase I clinical trial in subjects with cancer. | Copernicus Therapeutics, Inc. | 12 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Beachwood Business Innovation & Research Center | The Beachwood Chamber of Commerce has developed a unique business incubator model that partners the City of Beachwood, Cleveland State University, and the Chamber as participating institutions in the Beachwood Business Development Center. Each partner institution provides funding and staff to the center to support new and growing businesses that are providing real jobs and economic opportunities for Chicanos. This business incubator has successfully launched several companies in the Beachwood area. The Chamber now seeks complimentary funding to continue the development of Beachwood Business Innovation & Research Center, a start-up facility that will offer low rent to new start-ups, both local companies and companies entering the Cleveland market with beachwood. This facility will be built on an existing facility owned by the Beachwood Business Innovation and Research Center is to be built in an existing facility owned by the City of Beachwood, and renovated for adaptive reuse to be LEEDS certified in green building technology. Federal Stimulus funds will supplement money from the Cuyahoga Innovation Zone, existing funding from the City of Beachwood, and foundation funding. | Beachwood Chamber of Commerce | 1150 | 91 to 180 days | \$2,900,000 |
| Cuyahoga | Nanosight Particle Counter for Quality Control | This equipment would allow Copernicus Therapeutics, Inc. to further characterize and quality control their unique therapeutic Nanoparticles that are being developed to treat diseases like Cystic Fibrosis and diseases that cause genetic blindness. Copernicus uses their proprietary Nanoparticles to treat the root cause and genetic diseases that result in not only alleviating symptoms, but also curing the root cause of the genetic disease. This equipment would allow Copernicus to look at their Nanoparticles in real-time to see how they interact. This would be useful in helping Copernicus develop quality control methods to design, control, and improve their therapeutic Nanoparticles. This piece of equipment will be used as Copernicus scales up its manufacturing process. | Copernicus Therapeutics, Inc. | 1 | 0 to 30 days | \$60,000 |
| Cuyahoga | Child Preparation for Adoption | Child Preparation for Adoption is a component of the Adopt Cuyahoga's Kids Initiative that helps children in permanent county custody consider adoption. Programs include "Get Real" - a support group for youth in foster care facilitated by young adults who have aged out of foster care. Since 2004 the Kids Initiative has found families for highest risk of aging out of foster care using a multidisciplinary approach. Without these preparatory activities, many of these youth would not have considered adoption. Unfortunately, youth who age out of foster care without a permanent family are more likely to require additional services as young adults since they are at increased risk of homelessness, incarceration, unemployment, addiction, physical and mental health issues, and early parenthood. Costs for case management for a youth who enters foster care at 13, ages out at 18 and receives additional treatment for ages 18-22 averages more than \$150,000 per youth. Each year, Adopt Cuyahoga's Kids works with 150 youth in permanent county custody and finds families for 45 of these youth. The funding requested in this proposal would help support 2 full-time positions for two years. | Adoption Network Cleveland | 2 | 0 to 30 days | \$77,400 |
| Cuyahoga | Child Centered Recruitment for Adoption | Without Child Centered Recruitment, many of these children and youth would not have been adopted. Unfortunately, youth who age out of foster care without a permanent family are more likely to require additional services as young adults since they are at increased risk of homelessness, incarceration, unemployment, addiction, physical and mental health issues, and early parenthood. Costs for case management for a youth who enters foster care at 13, ages out at 18 and receives additional treatment for ages 18-22 averages more than \$150,000 per youth. Each year, Adopt Cuyahoga's Kids works with 150 youth in permanent county custody and finds families for 45 of these youth. The funding requested in this proposal would help support 22 full-time positions for two years. | Adoption Network Cleveland | 22 | 0 to 30 days | \$758,000 |
| Cuyahoga | Expansion & Upgrade of Domestic Water Supply System | Beech Brook is a child welfare agency that provides residential treatment to children and teens on its 70 acre campus in Pepper Pike, Ohio. Over 40 children are housed on the campus in three separate residential units. The domestic water supply is currently provided by a single water main from the Cleveland Municipal Water System line on Chagrin Boulevard. In the event that a problem occurs with the main water line and water is shut off, there is no back-up source of water for the residents of the campus. The funds would be utilized to expand and loop the water system so that two separate sources of municipal water are available for the domestic water supply. In addition, the expansion would result in the additional water flow upgrading the fire suppression capability. Founded in 1952, Beech Brook is now a nationally recognized treatment center for emotionally disturbed children, youth and teens in Ohio. With a staff of 460, Beech Brook serves over 21,600 children, youth and adults in Northeast Ohio every year. Campus programs include Day Treatment and Partial Hospitalization, Residential Treatment, and classroom education at the Gund School (part of Orange School District). | Beech Brook | 15 | 31 to 90 days | \$185,000 |
| Cuyahoga | Construction Conversion | Ball out existing Company debt and keep Company open and operational. Education for Green Construction program at local community college. | William Cameron Construction and Remodeling LLC | 4 | 0 to 30 days | \$250,000 |
| Cuyahoga | Post-Adoption Services | Post-Adoption Services provides programs and supportive services for children and youth adopted through the public child welfare system. These programs and services provide support and resources to adoptive families so they are better equipped to deal with issues that may arise for adopted children. An Educational Liaison offers programs to educate adoptive parents about school issues that may arise and equip them with strategies for dealing with these issues. Post-Adoption Services decrease barriers to adoption through the public system, make the transition from foster care to adoption more seamless, offer support and education to prevent crisis, and assist parents in advocating for special educational needs. This program would offer post-adoption information support and referrals in 175 families each year. This proposal would help provide funding for six staff positions for two years. | Adoption Network Cleveland | 6 | 0 to 30 days | \$227,630 |
| Cuyahoga | Adoption Helpline and Services | Adoption Helpline provides information, education, support, referrals and resources to adoptive parents, birthparents, adult adoptees, foster parents and adoption professionals. The Helpline responds to approximately 2,000 on a variety of topics including general information about adoption and requests for search assistance from adult adoptees and birthparents. Each year, approximately 50 adoptees or birth family members complete searches, many of which begin with a call to the Adoption Helpline. Support for this program is vital because there is no other source for broad adoption-related support in Northeast Ohio. Providing search and information for adoptees and birthparents in a timely way promotes mental and emotional health and averts potential crisis. This proposal would help provide funding for three staff positions for two years. | Adoption Network Cleveland | 3 | 0 to 30 days | \$260,300 |
| Cuyahoga | Intelligence-led Policing, Northern Ohio Violent C | The Northern Ohio Violent Crime Consortium (NOVCC) is a Byrne-Aunded, regional, inter-agency crime reduction strategy implemented in 8 major urban areas across the Northern District of Ohio. NOVCC's Objectives include building a sustainable intelligence-led Policing initiative to address violent crime, gang violence, and the proliferation of firearms, as well as the enhancement of local and state crime prevention. To bolster the effectiveness of law enforcement strategic and tactical operations police agencies are making a transition to a new management model called intelligence-led Policing (ILP). ILP is a heavily research-based and intelligence analysis. This program is a research partner with Kent State University for the Study and Prevention of Violence, NOVCC's research partner, to hire and train 16 crime analysts and to provide technical assistance to NOVCC police agencies. Comprehensive crime analysis in combination with law enforcement strategic and tactical operations will effect a 25% reduction in violent crime, which will be fully sustainable beyond the project period. | Kent State University | 25 | 91 to 180 days | \$1,280,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Second Generation DNA Nanoparticles for Treating H | Copernicus Therapeutics has developed a DNA nanoparticle technology that safely and efficiently delivers DNA to the nucleus of liver, lung, or brain cells. This first generation delivery system can be augmented by adding targeting ligands. These second generation targeted DNA nanoparticles could be used to deliver DNA to other tissues determined by the targeting ligand used. As an initial proof of concept for the second generation DNA nanoparticles product, targeted DNA nanoparticles will be developed to target the target organ being the liver. Many diseases could be effectively treated if the liver were a target organ for our technology. This project would use an animal model of hemophilia B with the goal of delivering a targeted DNA nanoparticle expressing Factor IX to the liver resulting in the sustained expression of adequate amounts of the clotting factor IX so that the bleeding disorder is essentially "cured." Animal proof of concept data would attract additional funding from equity investors and/or corporate partnerships) to develop a clinical program not only in treating clotting disorders like hemophilia but in a wide variety of other liver related diseases. | Copernicus Therapeutics, Inc. | 2 | 0 to 30 days | \$300,000 |
| Cuyahoga | Child Centered Recruitment Business Plan | The Adopt Cuyahoga's Kids Initiative developed Child Centered Recruitment, a new method of finding permanent families for youth typically sponsored as the hardest to place. At the request of Adoption Network Cleveland, House 887 creates a task force in Ohio to define a best practice of Child Centered Recruitment in the state for youth 8 years old and who have waited for more than a year without an adoptive family being identified. This proposal seeks support for one full-time equivalent staff position to participate in this committee, which will result in Child Centered Recruitment being seen as a best practice for the State of Ohio and being utilized to find adoptive families for children at highest risk of aging out of the foster care system throughout the state. | Adoption Network Cleveland | 1 | 0 to 30 days | \$216,000 |
| Cuyahoga | Buy made in America | Bring manufacturing jobs back to Ohio. Create and build 500 factories in Ohio to produce latest innovative designed products better than imported goods and sell for competitive price in 20+ new local centers throughout Ohio, provide everywhere needs for Ohio people. And cycle money back to the people creating a long term effect to boost the economy. | Multi-Culture Food, Inc. | 300,000 | 91 to 180 days | \$400,000,000 |
| Cuyahoga | Municipal Tower | *Assist municipalities in the construction of telecommunications towers (cell phone towers) then assist in the management of the towers once constructed. *Objective is to generate revenue for municipalities by the municipality being the tower owner and not just the lessor of land to the carriers (traditional model). Once towers are built, we will market the proposed tower to cell phone carriers. No construction would begin on towers until leased with carriers as signed and proposed revenues would cover cost of tower. *Potential to generate between \$18,000 to \$100,000 per year for municipalities or other quasi-government or public landowners (schools, etc.) *Will generate corporate, marketing, construction management and other jobs statewide. *Initial target market is Northeast Ohio municipalities, then will gradually expand until statewide. * This project has excellent potential to create jobs and to assist municipalities, schools, etc. to generate revenue that they have traditionally received. | Municipal Tower, Inc. | 25 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Energy Efficient Furnaces for Low Income Neighbor | Most of the furnaces in inner city homes have efficiencies of less than 78%, leading to large waste of energy, CO2 emissions, pollution and excessive costs to the customer. The primary objective of this project is to set up a demonstration pilot project that will quantify the benefits of the Energy furnace to inner city residents and the economy. Another objective is to demonstrate the advantages of smart meters. The customers to view in real time the cost of heating. The planned duration of the project is 15 months. The furnaces will be installed in 100 homes, providing immediate benefits to the customers. If it is estimated that the furnaces can save 100 homes, the total energy savings in one year would be about 2,400 million BTU. The project will provide both national energy savings and monetary savings to customers. Monitoring natural gas consumption with smart meters will provide real time feedback on the effect of programmable thermostats, better insulation, weatherization, sealing and other home improvements. The project will promote sales of energy efficient furnaces, enabling retention of manufacturing and service jobs. | Case Western Reserve University | 100 | 0 to 30 days | \$480,000 |
| Cuyahoga | PATHS | Beech Brook would utilize funding to implement PATHS. The Promoting Alternative Thinking Strategies (PATHS) curriculum is an evidence-based comprehensive program that promotes emotional and social competencies and reduces aggression and behavior problems in elementary school-aged children, while enhancing the educational process in the classroom. The PATHS preventive intervention program is based on the ABCD Effective Behavioral-Cognitive-Emotional model of development, which places primary importance on the developmental integration of affect, behavior, and cognitive understanding as they relate to social and emotional competence. The PATHS program is an elementary school curriculum shown to significantly improve social and emotional skills, covering the following areas: self-control, emotional understanding, self-esteem, peer relations, and interpersonal problem solving skills. Goals for the project include reduction of risks associated with lack of commitment to school, risks related to early and persistent antisocial behavior, reduction of bullying and disruptive behavior in school. Past staff could also utilize credits and provide job training in the human services field. | Beech Brook | 8 | 0 to 30 days | \$356,300 |
| Cuyahoga | handicap bathroom | Resto bathroom for handicapped accessible that would be a new toilet, flooring, bathtub and sink, rails, bathtub chair, lighting fixtures to create the environment for a handicap. | foster home to adopt home | 2 | 91 to 180 days | \$10,000 |
| Cuyahoga | Westside Housing Center | Westside Housing Center (WHC) which will lessen the negative effects of the foreclosure crisis and provide financial literacy and consumer education. The address nature of the WHC: Advance city-wide economic growth and sustainable neighborhoods through foreclosure assistance and prevention, job training, and access to computers. The financial literacy component addresses poverty by providing those seeking aid the tools they need to increase savings, build personal wealth, and improve their credit. For those on the verge of homelessness, the WHC will also offer access to affordable rental options. Expected outcomes include: *Save 100 individuals from foreclosure proceedings and the loss of their home *Assist 50 homeowners in securing loans for home rehabilitation *Rehabilitate 50 vacant properties via financially capable developers *Complete 25 training sessions on topics contained in the project description *Train 500 individuals on the topics contained in the project description *Eliminate 100 individuals into personal savings accounts. | Detroit Shoreway Community Development Organizatio | 5 | 0 to 30 days | \$204,859 |
| Cuyahoga | Electron Microscope for Quality Control | This equipment would allow Copernicus Therapeutics, Inc. to further characterize and quality control their unique therapeutic Nanoparticles that are being developed to treat diseases like Cystic Fibrosis and diseases that cause genetic blindness. Copernicus uses their proprietary Nanoparticles to treat the root causes of genetic diseases that results in not only alleviating symptoms, but also curing the root causes of the genetic disease. This equipment would allow Copernicus to look at their Nanoparticles after various modifications to the manufacturing process. This would be used to create smart methods to deliver, control, and improve their therapeutic Nanoparticles. | Copernicus Therapeutics, Inc. | 1 | 0 to 30 days | \$200,000 |
| Cuyahoga | Demonstration of Trailerable Fuel Cell System oper | This project is to use a "mini" fuel cell system that will convert to early production. This is a "mini" fuel cell system that will convert to early production. This is a "mini" fuel cell system that will convert to early production. This is a "mini" fuel cell system that will convert to early production. This is a "mini" fuel cell system that will convert to early production. | Vanner Inc. | 500 | 31 to 90 days | \$3,500,000 |
| Cuyahoga | Transitional Youth ACT Team | Beech Brook has operated one of the few Assertive Community Teams (ACT) for transitional youth 16-22 with severe and persistent mental health issues. Currently our program utilizes the extensively researched and proven model of an ACT team to serve 50 individuals. Our outcomes have proven that this program is very effective in keeping these individuals in the community and out of psychiatric hospitals. Beyond that goal the program effectively seeks to provide housing, jobs and health and social care for this very vulnerable population. The 50 youth we currently serve are only a portion of those who would benefit from the expansion of the program in Cuyahoga, Lorain and Summit Counties. This request would support the current transitional youth ACT in Cuyahoga County and provide new teams in Lorain and Summit Counties. Founded in 1982, Beech Brook is not a nationally recognized treatment center for emotionally disabled children, youth and their families. With a staff of approximately 400, Beech Brook serves over 21,000 children, youth and adults in Northeast Ohio every year. | Beech Brook | 100 | 31 to 90 days | \$735,150 |
| Cuyahoga | GC and Mercury analysis equipment | Federal law requires that we update and upgrade our equipment to reflect output of the highest quality. Further, we utilize Gas Chromatography and other equipment for the monitoring of patient gasses, the essential body fluids. We also monitor for toxic exposure to heavy metal contamination in urine, hair or other products in order to prevent long-term illness that is known to arise when individuals are exposed to mercury and its salts. The equipment money will help our lab meet standards as well as put individuals to work who manufacture high-tech equipment and this technicians employed to operate it. | King James Medical Labs | 25 | 31 to 90 days | \$80,000 |
| Cuyahoga | Cleveland's Urban Nature Preserve at Dike 14 | This Blufffield site has been reclaimed by nature and is available for an urban nature preserve just moments from Cleveland's Public Square. Dike 14 is an ideal size with its strategic coastal location and a diversity of habitats. Dike 14 is also at the intersection of four migratory bird routes: Lake Erie, the shore of Lake Erie, the Cuyahoga River Valley and the Doan Brook Valley. Visit numbers of birds and butterflies use this prime location as a migratory stopover because there is not another good site for a 60-mile exposure of shoreline. | Earth Day Coalition | 10 | 181 days or more | \$992,000 |
| Cuyahoga | gamma radiation counter analysis equipment | This proposal is for: 1. 8 Benchtop (both of approximately 3/4 mile 2. Storage: At entrance, gathering area, meadow, bank (sloped), Doan Brook culvert (flooded) and Doan Brook loop; 4-6 signs oriented toward self-guided experience. (History, habitat, species, watershed, Lake Erie, etc.) | King James Medical Labs | 25 | 91 to 180 days | \$40,000 |
| Cuyahoga | Weston House restoration project | The Weston House is a city-owned historic landmark on the grounds of its recreation center. Currently deteriorated, it has the potential to become a civic facility, serving various organizations for meeting and exhibition space, plus serve as a reference facility and genealogy center for the city's Public Library. We are requesting funds for weatherization and repairs to the infrastructure of the house, to match other grants and locally raised funds for this project. This is to be the city's premier project for its 200th birthday. | Westlake Historical Society | 25 | 0 to 30 days | \$100,000 |
| Cuyahoga | Accessus for Success | Accessus is a software program which is used by teachers to assist students with the NO CHILD LEFT BEHIND requirements and use of computer in the class room. | Accessus | 25 | 31 to 90 days | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Cooking with kids | Learn teaching the children at a local school after hours the importance of cooking nutritious meals and just how easy it is. I think I mean who volunteer their time and the school about the use to collecting after hours for use. We are strictly self funded a minimal charge of \$25-\$45 for the classes needs to be charged for supplies and food purchased. The classes are 4-6 weeks we meet a space 1-2 hours close at Christmas. The children were taught how to make edible gifts for giving. The children help and do the cooking, we taught kitchen safety. After the class is over they are given a folder of all the things they learned and the recipes so that they can continue to cook at home to help out. This is 4th through 8 graders who are home after school while parents are working. They can have dinner prepared and take it home. We are in dire need of funds for a refrigerator, pots & pans office supplies and other supplies that are needed. We do not get paid and I would love to be able to pay myself and the moms. If we get funding for the tangible things needed then maybe I can start paying the moms and myself. We are a high priority county & help underprivileged children. | Cooking with kids | 5 | 0 to 30 days | \$7,000 |
| Cuyahoga | Technology | Keep the laptops charged. The laptops are used in the classroom for the children with the new Smartboards the PTO & school have raised funds to purchase. Children are taught science, technology, history and other core subjects using the Smartboards and with the laptops they will be able to interact with the Smartboard. It makes it fun and interesting for the children and they learn more and the teachers are able to provide more information to the children to keep them competitive when it comes time to go to high school. The children need to have the edge on technology in order to successfully survive in our technologically advanced world. The funds are desperately needed and may spare. & will free up funds so maybe a classroom will not have to be overcrowded and save a teacher's job. Without the funding the possibility of falling behind the different advances are inevitable, which leave the children vulnerable. You have the opportunity to help children and save a job or two and keep the school competitive with others. Thank you. The purchase equipment for the children to play with at recess time. Balls and different playground toys/activities. The school is PTO school to get gear and the items will need to be purchased age appropriate. The children will have more of a chance to run around be active and play rather than stand around in groups and talk. It is important for children to be physically active and recess is also a time to blow off steam and destress. The advantages for the children are great. The play also teaches them how to interact with the peers, learn to share, and win and lose with grace. This is the only time that some children get to run around and play in a protective area, because of their living arrangements. The items are tangible and will last until worn out, will be stored in a safe place so they do not disappear. Thank you for your time and consideration. | St Williams Schol | 2 | 0 to 30 days | \$15,000 |
| Cuyahoga | Playgrounds Pals | This project involves the development and marketing of lighted advertisements on windmills. The rotating blades will be a new medium for advertising. L.E.D. lights will be incorporated in windmill manufacturing or retrofited and will be programmable to vary text and logos. This project will significantly offset the costs of buying and erecting windmills by selling ad space on this new medium. | St. William School | 0 | 0 to 30 days | \$3,000 |
| Cuyahoga | Windmill Ads | This is for a product idea for consumer private and contract. It is a replacement for snowplow headlights. The idea can also be used on construction equipment and utility vehicles. I have a company named Davison Invention located at 11000 N. 595 Alpha Dr. Pittsburgh PA 15238-2011. The person in charge of the project is Mr. Gary Phumie 409-544-3227 ext 00265. The idea is that Davison has targeted a potential buyer of this project, which would be the product built here in NE Ohio (Bart Dittl). The idea is that Davison has targeted a potential buyer in full. If the targeted buyer chooses not to buy this product, it is very possible we could target a private company here in NE Ohio to build this product. Davison handles everything from the finished product to the packing (printed boxes, packing foam etc.) and will take out in front of the potential buyer or article to make the needed companies aware of it's needs to get this product to the market place. This product can be made right here in Ohio and shipped world wide through our shipping partner to state to state and to our customer. The cost to cover everything including travel costs and phone billing is \$100,000. Davison handles everything from the finished product to the packing (printed boxes, packing foam etc.) and will take out in front of the potential buyer or article to make the needed companies aware of it's needs to get this product to the market place. This product can be made right here in Ohio and shipped world wide through our shipping partner to state to state and to our customer. The cost to cover everything including travel costs and phone billing is \$100,000. | Paramount Advertising Co | 10 | 31 to 90 days | \$750,000 |
| Cuyahoga | Utility Plow Light. | The Ohio Third Frontier program recently funded Lockheed Martin to engineer the TM1 system for military applications. This program, beginning in March, 2005, could easily be augmented with a dual-use component for use in health environments by medical and health care workers. Requirements are already known from past discussions with first responder and first provider medical teams: US Army, CWRM Global Medicine, Wright State Medical School/WAFM, Cornell Medical and the NetHope group of organizations, which serve 10 million disaster victims annually. TM1 is a locally based business that would include the benefits for the communities in which it operates. Stimulate fast home sales by helping to educate sellers on the importance of looking at their house as a product for sale, not a "home" with sentimental value. Employ craftsmen, painters, landscapers, decorators, plus any and all skilled laborers/contractors related to home improvement. Attract primary neighborhood vendors for supplies, landscaping, and materials. Give local artists wide exposure by displaying their work in homes. In the current market it will shorten the length of time a house is on the market by making it more attractive to buyers, often helping to avoid foreclosure or short sale. As the economy recovers, it will increase both profit for the seller and help increase home values in the community. The qualifications include: writing in real estate 5 years, formal art degree, a talent for decorating, and the discipline and desire to run my own business. | N/A | 100 | 0 to 30 days | \$14,485 |
| Cuyahoga | Scalable, Multi-fuel Power for Disaster Relief and | Expansion of current location, addition of 3 new retail and service location in 3 strategic communities. Separate and distinct expansion of the business services division of EMC Computers, and creation of equity or ownership opportunities in each of the new divisions or locations. The final step would be traditional community outreach and print, direct, and online marketing to increase brand awareness. The goal is to develop computer services and retail locations in each of the distinct districts in the Western and Southern ends of Greater Cleveland. Additionally, the creation of general technical jobs, as well as ownership opportunities, and highly skilled network technician would be the direct result of this stimulus. Acquire, merge, and develop a comprehensive logistics software suite that will be converted to a software as a service business model instead of the current software license model. The money will be used for the salaries and royalties to create the logistics software, then market it to Ohio manufacturers, as well as national companies to use to more efficiently ship their products at a lower cost by having on-demand information that is real-time, accurate and provides for the best, and lowest cost solution for each shipment; needing to be transported, based upon cost, mode, time and other factors unique to each manufacturer and their customers. CT Logistics currently has more than half of this functionality developed, but we need the expertise of a Pennsylvania firm to complete the suite. This will take time and money to acquire the technology, merge the modules and then create the software as a Software as a Service model. This will allow us to retain current staff as well as hire staff to handle the marketing, sales, installation, training and continued user group support for all CT clients and users. This software will save each manufacturer millions in freight costs annually. | Technology Management, Inc. | 150 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | Scabbi Enterprises | Our company educates the public on the safety and prevention. Our office would need these funds to help keep this important service for the public, and earn more municipalities. This money would pay the 200 or more jobs per month in the state of Cleveland and surrounding areas. It will be a locally based business that would include the benefits for the communities in which it operates. Stimulate fast home sales by helping to educate sellers on the importance of looking at their house as a product for sale, not a "home" with sentimental value. Employ craftsmen, painters, landscapers, decorators, plus any and all skilled laborers/contractors related to home improvement. Attract primary neighborhood vendors for supplies, landscaping, and materials. Give local artists wide exposure by displaying their work in homes. In the current market it will shorten the length of time a house is on the market by making it more attractive to buyers, often helping to avoid foreclosure or short sale. As the economy recovers, it will increase both profit for the seller and help increase home values in the community. The qualifications include: writing in real estate 5 years, formal art degree, a talent for decorating, and the discipline and desire to run my own business. | Scabbi Enterprises | 300 | 0 to 30 days | \$15,000 |
| Cuyahoga | Staging Homes for Sale | Expansion of current location, addition of 3 new retail and service location in 3 strategic communities. Separate and distinct expansion of the business services division of EMC Computers, and creation of equity or ownership opportunities in each of the new divisions or locations. The final step would be traditional community outreach and print, direct, and online marketing to increase brand awareness. The goal is to develop computer services and retail locations in each of the distinct districts in the Western and Southern ends of Greater Cleveland. Additionally, the creation of general technical jobs, as well as ownership opportunities, and highly skilled network technician would be the direct result of this stimulus. Acquire, merge, and develop a comprehensive logistics software suite that will be converted to a software as a service business model instead of the current software license model. The money will be used for the salaries and royalties to create the logistics software, then market it to Ohio manufacturers, as well as national companies to use to more efficiently ship their products at a lower cost by having on-demand information that is real-time, accurate and provides for the best, and lowest cost solution for each shipment; needing to be transported, based upon cost, mode, time and other factors unique to each manufacturer and their customers. CT Logistics currently has more than half of this functionality developed, but we need the expertise of a Pennsylvania firm to complete the suite. This will take time and money to acquire the technology, merge the modules and then create the software as a Software as a Service model. This will allow us to retain current staff as well as hire staff to handle the marketing, sales, installation, training and continued user group support for all CT clients and users. This software will save each manufacturer millions in freight costs annually. | TTP Home Staging Services | 10 | 31 to 90 days | \$200,000 |
| Cuyahoga | EMC Growth and Expansion Campaign | Expansion of current location, addition of 3 new retail and service location in 3 strategic communities. | Cuyahoga | Minority Business Opportunity | Our plan is to franchise our playground equipment and safety surfacing company to interested minority entrepreneurs with 4 Franchisees in Ohio, bringing a total of 40-50 new jobs. This project also entails franchising our company to minority groups all across the county to bring new jobs and great opportunity. We expect to franchise nationwide bringing a total of 10,000 new jobs into the market along with 150,000 new small businesses nationwide to provide the service of maintaining the safety of our children, NATIONWIDE. I am on a fixed income and would love to see Solar panels on my house to produce more energy than I use so I can go to help someone else. I also think that Solar panels on all new construction should be required in some form or another to help reduce the amount of coal that is required for the electric company to use. I do believe the only way to to stabilize some type of alternative energy to all the Construction and Business Building that are built from now on. This is a collaborative effort to our Cuyahoga residents, including youth and re-entry residents back to work. The project will focus on hiring youth to enter and in the neighborhoods, and to prepare participants to enter, or enter, or re-enter their status of employment through offering or linking them to a number of job development education, mentoring, vocational counseling, training, and job placement opportunities. IT will offer assistance in developing resumes, provide computer training, and develop business partnerships with companies who will create companies. Train or help prepare at least 300 people to re-enter the work force. Put at least 300 youth or adults to work cleaning up the neighborhood or assisting the elderly. Help sustain employment by providing help with work ethics and job performance once assigned to their companies. Train and counselors to address barriers to success. Assist Faith-based partners to build capacity to provide resources to surrounding communities. To establish and develop effective community partnerships that will result in improved job preparation and workforce development services and opportunities to the most vulnerable populations in our county. The Trinity Theater Troupe Aiding Against AIDS is a community outreach program and effort for urban youth to reach out via theater, music and a video presentations, to raise awareness about the devastating effects of AIDS, other STD's, Teen Pregnancy. The program will produce a short film that will be used to help facilitate effective dialogue about ways to reduce high risk behaviors and attitudes that contribute to the spread of HIV/AIDS. The short film called "The Broken Balloon" that urban youth use actors and actresses, examines the need for schools, faith-based organizations and parents to be open to a variety of methods to fight the AIDS and Teen pregnancy epidemic such as abstinence, safe sex, honest communication between parents and their partners. At least 500 community residents will be exposed to theatrical health promotion and prevention and wellness presentations. At least 75% of them will make commitments to be abstinent, delay sex, or practice safer sex and for get tested. We will launch more collaborative community efforts to fight the spread of AIDS and to inspire youth to finish school / college, or get married, before being sexually active. | American Safety Surface, LLC | 50 | 0 to 30 days | \$250,000 |

| Cuyahoga | Interpretation and translation services | Home weatherization information is not readily available to limited English proficient residents of Cuyahoga County. The county has one of the largest population of people who speak another language other than English. This project will provide interpreters to outreach to communities to educate them on home weatherization programs. People will also be hired to translate valuable information into native languages. | Asian Services in Action, Inc. | 100 | 0 to 30 days | \$60,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | VESL and ESL programs for working eligible adults | The hard economic times and high unemployment has hit the low-income, limited English speaking population. Many of them are newly arriving with very limited skills to be competitive in the workforce. This population places greater burden on public assistance. The Vocational English as a Second Language and English as a Second Language program will ensure language is one less barrier for adults who are working jobs so they can secure gainful employment to support their family and to reduce their dependence on public assistance. | Asian Services In Action, Inc. | 300 | 0 to 30 days | \$120,000 |
| Cuyahoga | Access to Health for Newcomer | With a project to provide translation and interpretation for people who are limited English speaking at access healthcare services. The goal is to reduce errors by providing language and culturally relevant outreach, education and assistance at places of care. Patients who are limited English speaking are at greater risk for healthcare errors or misuse of acute and emergency care services. AHM will provide the tools to this population so they are less impact and cost to the public. | Asian Services In Action, Inc. | 100 | 31 to 90 days | \$75,000 |
| Cuyahoga | New Energy Independence Project | Investment in a manufacturing company to create On-Site hydrogen fueling pumps (such as on Sweden's Hydrogen Highway) Investments in Solar Cell and Windmill manufacturing companies to power on-site pumps with clean energy. In turn this will bring thousands of manufacturing jobs as well as thousands more for companies like GM who are poised to make hydrogen vehicles here in Ohio. Also installing and maintaining the hydrogen fueling stations. Also providing incentives for gas stations such as tax breaks for every new hydrogen pump installed across the state. Tax breaks for households and business who buy windmills and solar cells. | Student | 100,000 | 181 days or more | \$7,500,000 |
| Cuyahoga | Crime Free Zone | Ohio has a long history of revolutionizing the world with great inventors like Thomas Edison. He lived for electricity and what it can do, let's continue with his legacy and pioneer the energy independence movement. Create a CRIME FREE ZONE in the heart of the URBAN CLEVELAND AREA - Glendale and Surrounding areas. This is a complex program that will need Police and Fire participation (Funding for Police and Fire is NOT in this request) (I have a full power point presentation for this) 1- Install and monitor 20,000 Home security systems in every home in Cleveland's Glendale and surrounding community 2- Pay For Monitoring for an Entire Year and for all installation and hookup of the systems 3- Hire inner city kids to work in their own neighborhoods doing ALL installations and hookups 4- Involve the Churches and civic organization to bring the community back to life 5- Safety will bring investment back and PROVE will help them keep the value of their property increasing the TAX rates again Please call me to discuss this (I've proposed this to many people before and everyone loves it but no one could fund it before) | Sekure America | 200 | 31 to 90 days | \$20,000,000 |
| Cuyahoga | Randall Park Mall | This program is a last and it can be duplicated nationwide and I will share the results what we believe will be a huge reduction in inner city crime. Develop six acres or land with 300,000 square feet of hospital, 100,000 square feet of retail in the area of the development. Phase not included in Stimulus Funding includes 140,000 square feet of Class A Medical Office/Technology and 120,000 square feet of townhomes housing. A Master plan for the site has been created and preliminary cost estimates have been completed. The project is to be built with some demolition of existing structure and the removal of remaining retail space. The State of Ohio is currently reviewing sites for a State Medical (Mental) Institution (including the Randall Park Mall Site) and the Randall Park Mall Site is a perfect site. The project will bring a minimum of 500 new jobs to North Randall, Ohio immediately creating more than \$25 million in new payroll for North Randall. The site is also a prime location for a transportation hub which may also be considered in the application. | Cincinnati United Contractors | 500 | 91 to 180 days | \$51,500,000 |
| Cuyahoga | Safehouse 911 | We will be working in conjunction with Certified Financial Protection Group- which is the nation's leading Forensic Audit and Loan Modification processing company. Our goal is to provide financial relief to borrowers facing hardship in the current economic turmoil. We are the only truly transparent processing company with our Associates' and our clients' best interests in mind. Integrity and customer service are the focus of our operation and our Associates are expected to uphold the same standards. We operate in all 50 states and work with every lender in the mortgage industry. Our Associate's bonuses will be to save 100% of home owners save their homes and stay in them or get them sold to new buyers. | REOhio properties | 5 | 31 to 90 days | \$100,000 |
| Cuyahoga | Reconciling the discrepancies between the Federal | The purpose of this project is to prevent possible international trade conflicts as a result of the implementation of the Federal Stimulus Initiative and ensure the successful implementation of the stimulus initiative as the catalyst for the green economic transformation of the U.S. economy. Existing research shows that there are conflicts between the green stimulus incentives for green, clean energy generation and energy efficiency improvement and the WTO Subsidies Agreement. This project will investigate these discrepancies in regard to the implementation of the Federal Stimulus Initiative and potential related trade disputes with U.S. trading partners, and studying ways to resolve these discrepancies. The project will result in a report on this issue. The report will present the results of the study and include a proactive action plan with suggestions of strategies and concrete steps to mitigate possible trade conflicts with international trading partners related to the U.S. green stimulus incentives. Hiring additional staffing for in-home care and free assisted living/group home placement service. Preventative and maintenance of seniors and the mentally ill. | Case Western Reserve University | 10 | 0 to 30 days | \$100,000 |
| Cuyahoga | Greater Good | Letting people know of our free service. Loyalty Transportation will provide services for the elderly, disabled, or any medical appointment. Company will also provide transportation for medical care patients at lower cost and better quality. Loyalty will assist disabled and safety in daily activities such as: shopping and running errands also. My goal for the company is to use all fuel efficient vehicles, to employ over 20 people, and to used this as a foundation to better serve the community that I live in. Provided infrastructure for internet, audio, video and computer to disadvantaged ohio residents. The would include those with disabilities, mental and physical. Also, the elderly living in a community setting. This would provide 5 new jobs as we are currently providing these services, but with proper funding by employer enough people to be successful. This program will allow the Cleveland Department of Health to develop and implement a sustainable program to provide a network and system to measure and evaluate mental health impacts of both outdoor and indoor air pollution. | Always Best Care of Cleveland, Inc. | 14 | 0 to 30 days | \$8,300 |
| Cuyahoga | Elderly and disabled medical servicer and transport | Letting people know of our free service. Loyalty Transportation will provide services for the elderly, disabled, or any medical appointment. | Cuyahoga | Coughlin media | Provided infrastructure for internet, audio, video and computer to disadvantaged ohio residents. The would include those with disabilities, mental and physical. Also, the elderly living in a community setting. This would provide 5 new jobs as we are currently providing these services, but with proper funding by employer enough people to be successful. This program will allow the Cleveland Department of Health to develop and implement a sustainable program to provide a network and system to measure and evaluate mental health impacts of both outdoor and indoor air pollution. | Coughlin inc | 5 | 0 to 30 days | \$100,000 |
| Cuyahoga | Outdoor/Indoor Air Pollution Program | This program will allow the Cleveland Department of Health to develop and implement a sustainable program to provide a network and system to measure and evaluate mental health impacts of both outdoor and indoor air pollution. | City of Cleveland, Office of the Mayor | 3 | 91 to 180 days | \$865,000 |
| Cuyahoga | Flats East Bank Basic Infrastructure | This funding will allow for the completion of infrastructure to leverage \$500 million mixed-use waterfront development project | City of Cleveland, Office of the Mayor | 4,400 | 31 to 90 days | \$30,000,000 |
| Cuyahoga | Help Create More Jobs Program | We are currently a business providing drycleaning services. Our current production plant is running at approximately 35% capacity and employ 10 full and part time employees. Our need for growth is dependent on additional drop store locations. Our industry generally employs people that are minimum wage to \$12 per hour. Our greatest success has been to hire people within the industry that are unemployed. Usually single moms on some sort of government assistance. Our goal would be to open 4 additional drop stores within Cuyahoga and Summit County. The funds would be used for establishing the locations and additional equipment for the plant. This would allow our plant to function at full day time capacity with the opportunity of adding a second shift and providing approximately 25 additional positions and sustain a 10 year old business that has been affected negatively by the down turned economy. This project of growth and work opportunity would lay the foundational growth for more sites in the future, the stimulus is the only currently unemployed and transportation people creating skilled workers. We would train transportation throughout Ohio for a rate low per person cost. | Broadview Heights Service LLC | 35 | 91 to 180 days | \$750,000 |
| Cuyahoga | Expanding "Green Job" Education Beyond The Fields | These instructional manuals would allow the purchaser to conduct a series of short but effective "green" training classes for Ohio workers who are either displaced from the job market, or who are in the current job market, but wish to educate themselves about "green" practices, ideas, tools, equipment, and business ventures that would allow them to market themselves as "green", or at least "greener" than their competitors. Hopefully the distribution of such educational instruction manuals would allow the students to obtain useful ideas and information for the sort of personal cost that would allow them to realize a rapid return on their investment of time and money that they have spent re-educating themselves to compete in a "green", or at least "greener" economy. Jobs created - short term - 3-5 people Jobs created - longer term (through training) - unknown | Cleveland Solar & Wind | 4 | 31 to 90 days | \$200,000 |
| Cuyahoga | Formed Obsession | We are creating a beauty and fashion company. We will employ people in various areas, for example as manufacturers and in human resources, sales, public relations, marketing, etc. We expect to employ at least 50 people within the first two years. For approximately 20% of our work force it is our intent to create apprentice and mentoring programs for high school and college students. We will also create programs to help prepare people, particularly women, with the skills and knowledge for future employment opportunities. Additionally, we would like to invest in educational and mentoring programs for youth, particularly in the areas of music and the arts. | Formed Obsession | 50 | 31 to 90 days | \$375,000 |
| Cuyahoga | wind technology | Locally design, manufacture a wind power turbine. | wind technology | 50 | 0 to 30 days | \$350,000 |
| Cuyahoga | EMR Implementation | To help physician practices purchase and implement the proper EMR solution for their offices. We will work with each physician group to analyze, review, negotiate purchase and implement the EMR into the offices current workflow. We would provide an independent sounding board for the group in deciding on which EMR package would best suit their needs and budget. | McManamon Insurance | 75 | 31 to 90 days | \$10,000,000 |

|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Absolute Encoder for Wind Energy | Avtron Industrial Automation currently supports the alternative-energy Wind industry by supplying incremental encoders to wind turbine OEMs for blade pitch, yaw control, slip rings, and several other wind turbine applications. In an effort to increase the amount of Ohio-manufactured content going into the wind turbines, Avtron is proposing to design a new family of products that would have broader market appeal and increased usage by OEMs and final tier system integrators worldwide. These high-tech devices would replace foreign-sourced units with American made products. Funds from government and private investments will help Avtron realize a design, development, and manufacturing program in Ohio. This program will generate and sustain over 30 high-tech engineering and skilled manufacturing positions and will further entrench Ohio in the alternative energy supply chain. Expected results are in excess of \$5,000,000 of product shipments. | Avtron Industrial Automation | 30 | 31 to 90 days | \$300,000 |
| Cuyahoga | Cleveland Heights Technology Center | The goals for the Cleveland Heights Project include: 1) The Heights Tech Center will provide a place for residents of all ages to go to support their basic life needs and interact with their local government and non-profits for the betterment of all with continuing enhancement each year. 2) The Heights Tech Center will support the arts, technology and business education needed for success in 21st-century information literacy and learning, employment, personal finance and housing. Emergency preparedness and communication will be greatly enhanced by this project. 3) Government officials and library staff will work cooperatively to assure that the Heights Tech Center will make available assistance in finding information from local, national and virtual sources. | Cleveland Heights-University Heights Public Library | 1,000 | 31 to 90 days | \$500,000 |
| Cuyahoga | Canterbury Estates Watermain and Street Rehabilitation | We will build out a 4,000 square foot space and create a high tech classroom, computer lab, and incubator space for small businesses. This project includes the replacement of approximately 9000 linear feet of water main that is over 50 years old and the rehabilitation of over 3.5 area miles of roadway. The existing storm drainage structure will also be rehabilitated. This area serves over 500 residents and an elementary school with over 1000 students. The current water main system has a break rate well above the system average causing increase public health and safety issues. The existing water main is in need of replacement in order to provide a clean and reliable water source for health and safety of the general public. The existing road condition is poor and will require full depth concrete repair and an asphalt overlay. This rehabilitated roadway will provide a safe and efficient roadway system for school buses, emergency/service vehicles and general public. The rehabilitation of the existing drainage structures will allow for a safe and efficient handling of storm waters, helping to reduce flooding in the area. | City of Westlake | 125 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Training and Placement Program | The Training and Placement Program provides vocational rehabilitation services for adults with disabilities – both mental and physical. The program assesses potential barriers to employment and works to create an order to address those barriers. Once employed, the program provides supportive services to ensure continued, successful employment. The program will train and place approximately 20 disabled adults into employment each year. | Jewish Family Service Association of Cleveland | 1 | 0 to 30 days | \$30,000 |
| Cuyahoga | Ascentia Residential Supportive Housing | JFSA operates over 30 housing units for adults with intellectual disabilities (MR/DD). Residents are low income relying on the Medicaid Personal Support Services program for their basic healthcare and residential needs. JFSA would like to assist the homes with their MR/DD residents with weathering the homes in order to conserve energy and promote alternative fuels. Moreover, lower energy bills will save the agency thousands of dollars a year while helping to provide employment for the manufacturers and installers of the equipment. | Jewish Family Service Association of Cleveland | 5 | 31 to 90 days | \$200,000 |
| Cuyahoga | Security Equipment Upgrade | HAC is an Orthodox Jewish day school with an enrollment of almost 800 students from early childhood through 12th grade. The school on 3 campuses (Taylor Rd. in Cleve. Hts. Separates Campus in Lyndhurst & Yarrow in Beachwood.) This investment in security concerns only the first 2 campuses. HES faculty & staff work at the two campuses. - The Taylor Rd. campus is located in the center of a dense concentration of Orthodox Jewish homes in the area. Homeowners are easily recognizable as Jews by dress and headcoverings in the area. - Kriener Center, Less than 1 mile from Cleve. Hts. police headquarters. Within 1 mile of major shopping center (Seymour Ctr.), and of Mayfield Rd. (I-93, 322) a major E-W thoroughfare in eastern suburb of Cleveland. - As a beneficiary agency of Jewish Community Federation of Cleveland and United Jewish Communities, HAC is indirectly a member of NVOAD charged with meeting non-medical needs in recovery phase of Incident of National Significance and of the Cuyahoga County Citizens Corp Council, through which it benefits from funding and controls to assist in recovery from disaster incidents. - As a school, HAC would play critical role in sheltering displaced students, crisis counseling and other support. | Hebrew Academy of Cleveland | 2 | 0 to 30 days | \$75,000 |
| Cuyahoga | Joint Municipal Services Center | The construction of a joint facility which will house the police, fire, service and municipal offices that are now currently being housed in separate, temporary structures with the intent of making the current locations available for sale and private use, thus generating tax revenue newly needed by the village and creating approximately 20-30 permanent private sector jobs and 5-10 permanent public sector jobs, while also generating up to 100 construction positions. The Village has already taken the first step by purchasing and clearing the site. The Village is currently in the planning phase and design phase and plans to take approximately 90 days while the construction phase approximately 1 year. Construction of such a facility would allow for joint housing of inmates with other communities, cutting costs for all, improved storage space for Fire Safety equipment as currently no facility exists in the village and the creation of modern, warehouse governmental offices for the conduct of business as the current facility, including the courts is shared with a school creating some safety risks. Renovations to High School Science Renovations to High School Auditorium Roof Replacement of High School Renovations to HVAC system, electrical system, interior lighting, plumbing, and fire safety system These jobs would consist of demolition and construction jobs for the community. The created as an in way people can pull together to rebuild their streets, neighborhoods, shopping areas, and recreation and jobs for the youth. As the establishment exists, it is not possible to house and store inventory due to growth in work and homes. Workers, and unemployed can save a greater chance to work using those skills they used at their previous jobs. With the help of others in the development of our community we can all acquire the knowledge of improvement for each business that is in need of labor, devoted employees. | Village of Newburgh Heights | 50 | 181 days or more | \$5,100,000 |
| Cuyahoga | Renovations to Olmsted Falls High School | Renovations to High School Auditorium Roof Replacement of High School Renovations to HVAC system, electrical system, interior lighting, plumbing, and fire safety system These jobs would consist of demolition and construction jobs for the community. The created as an in way people can pull together to rebuild their streets, neighborhoods, shopping areas, and recreation and jobs for the youth. As the establishment exists, it is not possible to house and store inventory due to growth in work and homes. Workers, and unemployed can save a greater chance to work using those skills they used at their previous jobs. With the help of others in the development of our community we can all acquire the knowledge of improvement for each business that is in need of labor, devoted employees. | Olmsted Falls City Schools | 75 | 91 to 180 days | \$5,700,000 |
| Cuyahoga | Christopher A. Davis | As the establishment exists, it is not possible to house and store inventory due to growth in work and homes. Workers, and unemployed can save a greater chance to work using those skills they used at their previous jobs. With the help of others in the development of our community we can all acquire the knowledge of improvement for each business that is in need of labor, devoted employees. | Davis Enterprises | 500 | 181 days or more | \$1,000,000 |
| Cuyahoga | Interceptor Sewer Rehabilitation | This project includes the rehabilitation of over 20,000 linear feet of the main sanitary interceptor sewer in the City of Westlake. This sewer line drains the entire community of over 50,000 people who live and work in the city. This main sewer is over 40 years old and has not received any maintenance work ever in its life time. The main sewer is showing signs of deterioration along its entire route. The health and safety of this community is directly related to this sewer system. Inasmuch the structural integrity of this sewer is vital to the whole community, Rehabilitation of this sewer would restore the pipe close to its original integrity. Providing a safe and reliable sewer system. The rehabilitation of the system access manhole and junction structures will also be performed to assure safe and sound working conditions of maintenance workers. | City of Westlake | 150 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Social Recreation Program for Adults with Mental I | Jewish Family Service Association of Cleveland operates a health and wellness program for adults with mental illness as part of the agency's comprehensive services. The program provides group instruction for weightlifting, aerobics, yoga, and swimming for approximately 50 adults. Research has shown that exercise is particularly important for adults with mental illness in alleviating symptoms and providing a social support network. Experience has shown the same during the two years of operating the program. The program has also reduced healthcare costs for individuals as they have reduced their hospitalizations. The program would employ a part-time program coordinator and several independent exercise instructors. | Jewish Family Service Association of Cleveland | 2 | 0 to 30 days | \$20,000 |
| Cuyahoga | Training for DSP's working in MR/DD field | Jewish Family Service Association of Cleveland is a 501(c)(3) non-profit organization that provides supported living for intellectually disabled MR/DD adults as part of the services it offers the northeast Ohio region. Stimulus funds would allow us to target an ongoing shortage of qualified healthcare workers required by our agency to serve our clients. We will bring in new employees with titles or no experience in the healthcare field and provide them with the knowledge and skills to work with our specialized population. We will monitor the number of employees that qualify to work in homes on an ongoing basis and trainees will complete survey questionnaires as part of the program evaluation process. Funds would provide for training coordinator to improve our existing training program, pay for 50 newly hired employees to undergo entry-level training, and provide for on-site, ongoing training for 300 Direct Support Professionals. | Jewish Family Service Association of Cleveland | 25 | 0 to 30 days | \$150,000 |
| Cuyahoga | Juvenile Mentoring Program (JUMP) | Positive Mentoring Program (PMP) helps the nation's at-risk youth. The program provides intensive, one-on-one mentoring to at-risk youth, helping them to overcome various challenges such as poverty, drugs, and related problems, and address their needs. JUMP helps teens develop necessary skills, with emphasis on organizational skills, improve academically, and learn job-seeking and job-retention skills. JUMP teens also do mentor elementary students. An after-school JUMP is offered at Shaw Hill, clearly to grades 5-10 (grades 11-12 is offered by Y.O.U. JOC program). An after-school JUMP is offered at all students at the alternative HS, many of them adjudicated youth. Some of the 300 employees affiliated with Y.O.U. are an active resource for JUMP, by providing work experiences. Career Talks and entry-level jobs, including substantial summer jobs. JUMP is expected to meet Y.O.U. required outcomes: 85% of youth in grades 5-11 advance to the next grade, 85% in grade 12 obtain HS diploma, 80% of grads go on to employment and/or college/other study, 70% of those placed in long-term job complete 90+ days, 90% of those placed in short-term job complete the assignment. | Youth Opportunities Unlimited (Y.O.U.) | 40 | 91 to 180 days | \$35,000 |
| Cuyahoga | CULVERT REPLACEMENTS- SOLON RD. CULVERTS C-31 & C-32 | CULVERT C-31 REPLACE 7' X 5' BOX CULVERT AND TWO HEADWALLS. CULVERT C-32: REPLACE TWO HEADWALLS. In progress in Cuyahoga County. Ohio programmatic and developmental initiatives similar to those that were born out of the "Imagine Chicago" project. Imagine Chicago, a non-profit corporation created in 1992, has worked, in its own words "toward harnessing imagination for public good, encouraging and helping people to become engaged in imagining and creating hopeful futures for their families and communities through both discourse and action. Working in collaboration with local organizations—schools, faith communities, cultural institutions, businesses, and community groups—Imagine Chicago has inspired and motivated dozens of creative partnerships in which people have worked together to understand, imagine and create the future they value. Imagine Chicago has built intergenerational and interracial partnerships across well-established divides of race, income, culture and class. People previously disengaged or disaffected have found meaningful ways to contribute their gifts to the communities in which they live. Imagine Chicago has led on young people as its core asset and as a catalyst for expanding community imagination and hope. | VILLAGE OF BENTLEYVILLE | 25 | 91 to 180 days | \$100,000 |
| Cuyahoga | IMAGINE CLEVELAND | Asphalt Resurfacing of Cannon Rd. (0.81 Miles) in the Village of Bentleyville | Al+ Consulting, LLC | 10 | 91 to 180 days | \$500,000 |
| Cuyahoga | RESURFACING OF CANNON RD. | Asphalt Resurfacing of Cannon Rd. (0.81 Miles) in the Village of Bentleyville | VILLAGE OF BENTLEYVILLE | 25 | 31 to 90 days | \$192,500 |
| Cuyahoga | RESURFACING OF HOLBROOK RD. | Asphalt Resurfacing of Holbrook Rd. (0.76 Miles) in the Village of Bentleyville | VILLAGE OF BENTLEYVILLE | 25 | 31 to 90 days | \$200,000 |
| Cuyahoga | City Green | The existing City Green is the city's historic public gathering space. However the green currently serves a number of competing municipal purposes. The city updated Master Plan calls for the relocation of a number of public facilities from the green into the new proposed Town Center or to other strategic locations. This proposal would be the first step to expand the green within the green for use at a Farmer's Market, Home Days and Harvest Festivals. The proceeds will be used to buy land, demolish non-essential building structure and reconstruct parking lot and green space. | City of North Royalton | 150 | 91 to 180 days | \$3,000,000 |
| Cuyahoga | City Hall Upgrade | The existing City Hall has sections that are hundreds years old. All main HVAC system to the facility are failing; the space is poorly configured, most of the work space is in the basement of City Hall. The public rooms are now too small for large public gatherings and have no elevator and are not ADA compliant. The basement offices of City Hall are inadequate in size, even to meet the public meetings required to operate. The funds would be used to either expand and upgrade the current facility, construct a new facility, or renovate another existing commercial structure. All of the options would include a certified energy efficiency program and incorporate green building technology. | City of North Royalton | 1000 | 91 to 180 days | \$20,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | FORECLOSED AND VACANT RECOVERY PROGRAM | THIS FUNDING WILL BE USED IN THE REHABILITATION AND/OR DEMOLITION OF PURCHASED HUD HOUSES. WE WILL BRING THESE HOUSES UP TO CODE WITH ROUTINE INSPECTIONS OR INSTALLATION OF GREEN SPACE TO FILL THE PROPERTY AFTER DEMOLITION. THESE REHABILITATED HOUSES WILL THEN BE PUT BACK ON THE MARKET FOR SALE OR TO BE RENTED OUT FOR THE NECESSARY AMOUNT OF TIME. WE EXPECT THE OUTCOME TO CONSIST OF PROPERTIES BEING BROUGHT TO THEIR FULL POTENTIAL AND BE SELLING AT A PROFIT. OUR GOALS ARE TO BRING NEIGHBORHOODS A LITTLE MORE BEAUTIFUL, WITH SOME MORE GREEN SPACE OR COMMUNITY GARDENS. WE BELIEVE THERE WILL BE NO PROBLEMS WITH FINDING THE NECESSARY PEOPLE TO MAKE THIS VISION COME TO LIFE. | CITY OF UNIVERSITY HEIGHTS | 8 | 0 to 30 days | \$500,000 |
| Cuyahoga | Eliminate VOC in Coatings | Reduce VOC emissions by developing alternative to lacquer coatings | Dorn Color Inc | 103 | 31 to 90 days | \$250,000 |
| Cuyahoga | USE OF BIODEGRADABLE PLASTICS | Project will consist of analyzing existing biodegradable thermoplastic materials by comparing their thermodynamic characteristics and analyzing their behavior in Ohio climate. A key impact of temperature variations between different seasons of the year. Project funding would allow setting up an extrusion line to test alternative materials. Expected outcome is to replace significant amounts of currently used plastics with environment friendly biodegradable alternatives. Project will create 10-12 new job opportunities. | AMROS INDUSTRIES | 32 | 31 to 90 days | \$3,600,000 |
| Cuyahoga | MISSION MINDED MOTIVATED MEMBERS | We would like to have an organization to get the Gang off the streets. We would like assistance of U.S. Military retired and veterans, local police officers, block clubs to assist in this effort. We would provide employment for street vendors, bike riders to assist the police in block watching. Reporting crimes, preventing crimes and getting Gang members off the streets either by finding them employments or having them arrested. The goal is to make the City of Cleveland a safer, cleaner and to change areas safer. An effort to rebuild the inner City of Cleveland, OHIO | MISSION MINDED MOTIVATED MEMBERS | 150 | 31 to 90 days | \$525,000 |
| Cuyahoga | Energy-Efficient Lighting Upgrades for Schools | Marketing funds for Energy-Efficient Lighting Upgrades for Ohio Manufacturers. Multiple projects have been identified, designed and proposed in various manufacturing plants in Northern Ohio. These projects can be started in about thirty days. All the lighting upgrade projects reduce energy costs for lighting by 40-60% and will payback within 3 years. The quality of lighting in working environment will be greatly improved increasing productivity and employee safety. Existing Jobs = 10 New Jobs = 10 Duration = 3 years Start = 30 Days | Smart Lighting Solutions | 20 | 31 to 90 days | \$750,000 |
| Cuyahoga | CMNH Intermodal Transportation Facilities | It is the mission of The Cleveland Museum of Natural History to inspire, through science and education, a passion for nature, the protection of natural diversity, the balancing of health, and leadership to a sustainable future. To this end CMNH will build the first Green Road Intermodal Transportation Facility in University Circle. The 100,000 sq. ft., three-level structure includes 300 parking spaces, 34 priority spaces for alternative fuel and plug-in electric vehicles, 16 bicycle spaces, and 18 accessible bicycle spaces. In addition, it is engineered to support a children's wing. All types of parking will be available by motorists and employees of all CMNH institutions. Over 2.5 million visitors come to the museum each year. CMNH will use the facility to take trails along Martin Luther King Blvd., leading to Cleveland Lakefront State Park, Gordon Park, The West Side Market, and the Cleveland Botanical Garden. The green roof will support native plant species for primary and secondary education programs. It will also minimize storm-water run-off. CMNH educates nearly 100,000 students each year, with our funding will allow for the construction of the proposed Museum and new Convention Center in downtown Cleveland. The Convention Center paired with the Medical Mart has the potential to create jobs, invigorate conversion business, capitalize on Cleveland's successful health care industry and position the City for future growth. This funding will allow for the construction of a mixed-used multi-modal structure in order to leverage large mixed-use and culture economic development projects already underway. | The Cleveland Museum of Natural History | 115 | 181 days or more | \$18,000,000 |
| Cuyahoga | Medical Mart/Convention Center | This funding will allow for the construction of a mixed-used multi-modal structure in order to leverage large mixed-use and culture economic development projects already underway. | City of Cleveland, Office of Mayor | 950 | 181 days or more | \$20,000,000 |
| Cuyahoga | Gordon Square Multi Modal Structure | This funding will allow for the construction of a mixed-used multi-modal structure in order to leverage large mixed-use and culture economic development projects already underway. | City of Cleveland, Office of Mayor | 238 | 181 days or more | \$5,000,000 |
| Cuyahoga | Infrastructure maintenance | The Village of Woodmere owns and operates 2 single axle heavy trucks, one of which is a multi-purpose truck used only by its streetcleaning and refuse collection, and one scraper, dump truck, etc. Due to age, one truck has been replaced. The Village is currently in the process of replacing the heavy demand on the single remaining truck. This unit is very versatile and allows us to maintain the Village's infrastructure. We see that infrastructure maintenance is just as important as the initial cost of infrastructure itself. However, the only truck replacement of the aged truck will ensure that our current level of service and staffing is maintained. Additionally, skilled factory labor will be necessary for the production of this unit as well as a significant amount of labor and material for installation of other market systems including the electrical, mechanical and electronics needed. | Village of Woodmere | 3 | 0 to 30 days | \$130,000 |
| Cuyahoga | salsa/food sauce producer and distributor | The Vicar Sauce Co., Ltd., a registered Ohio LLC (organized 2005), has produced gourmet salsas and other unique food sauces for distribution and sale locally and nationally for the sophisticated palate and elite market. The company principals include a trained chef, an atmospheric manager, and a small business management/retailing expert. Despite the popularity of our products, local retail outlets and events such as fairs and craft shows, and a loyal web-based e-commerce national clientele, our company recently needed to suspend operations - temporarily - because of financial pressures and the loss of our principal retail product in Ohio. We have now resumed our operations and are looking for investment in our infrastructure. We are confident that, with the needed capital, our company can ultimately be an important Ohio economic engine and employer. In the short term, once funded and equipped with a production facility, we would anticipate hiring three to five workers and transacting \$250,000 in business during the first full year. This funding will allow for the construction of roadways and parking infrastructure for a mixed-use development project in the Upper Chester district of the Hough/KCZ communities. | The Vicar Sauce Co., Ltd. | 3 | 31 to 90 days | \$250,000 |
| Cuyahoga | Upper Chester Development | This funding will allow for the construction of roadways and parking infrastructure for a mixed-use development project in the Upper Chester district of the Hough/KCZ communities. | City of Cleveland, Office of Mayor | 143 | 181 days or more | \$3,000,000 |
| Cuyahoga | UrbanArtz | UrbanArtz Inc. is a youth arts program for youth ages 10-18. With so few opportunities to engage in the arts in a new and exciting way, UrbanArtz Inc. proposes an exciting arts program for youth ages 10-18. Using hip hop as a lens, the program will consist of daily goal setting and exploration into the arts through hands on instruction in music, art, dance and drama. We will also teach the history through weekly lessons of the week, guest speakers and field trips to local cultural institutions. Through our music production class youth will learn the basics of writing and recording a song. Drama and creative writing will use improvisation, scene study and writing development to create a one act play. Dance class will explore some of the many forms of dance, including but not limited to, African, Jazz, Hip Hop and Musical Theatre. In visual youth will explore the connection between the street and art through exposure to street art, graffiti and mixed media. The summer will end with a culminating activity for the community. Outcomes include knowledge of the arts across the medium, tolerance of the various cultures, appreciation and value of art. | UrbanArtz Inc | 6 | 0 to 30 days | \$15,000 |
| Cuyahoga | Wind Energy Work Force Enhancement | Genesco, the largest wind turbine Manufacturer in Spain and one of the world's largest, has a great interest in partnering with our company to train their work force in the U.S. We would like additional personnel to add replace some of our existing personnel who currently have the skills to work on the Genesco projects and add to the Genesco work force personnel who would be specifically trained for wind turbine field service. The opportunity for growth in this area is virtually unlimited since the U.S. has become the number one wind energy producer in 2008. Additional opportunities will open up with other major manufacturers that locate in the U.S. such as Northern (opening up in Arkansas 2009), InTone (looking to locate in the U.S. 2009) and Emerson (not yet in the U.S. but looking at 2010). All of these jobs will pay in excess of \$20/hr. including benefits. All payroll would be through our Cleveland Office. The money requested would be for infrastructure such as up and training existing and new personnel. The opportunity is real and negotiations are in progress. We cannot do this without additional resources. This program will create 20 new jobs in 2009. | Phillips Electric | 20 | 0 to 30 days | \$500,000 |
| Cuyahoga | River Title Business help | Have a title insurance business, and because of this economy and mortgage crisis I can not afford employees. If I had employees, they could help me with advertising and marketing ideas. They could also help with day to day duties, especially when I am sick. Please consider helping my small business. Sincerely, Nicole Wittmer | River Title Company, LLC. | 5 | 0 to 30 days | \$25,000 |
| Cuyahoga | Harvard Road Improvement Phase II | Resurfacing and base repair on 9,000' of Cr. 43 - Harvard Road in the Village of Highland Hills (AD - 3200). | Stephen Hovansek & Associates, Inc. | 13 | 0 to 30 days | \$260,260 |
| Cuyahoga | Financial Planning Outreach | The funding request is for the start up of a non-profit organization. A Financial Office to counsel lower income and senior citizens with non-biased information about everything from paying taxes to simple financial planning. I am a IRS VITA volunteer and do tax returns for the above individuals. In addition to helping with taxes we need to give individuals information to make the right financial decisions. Too many are being gouged by bankers, tax preparers, creditors and the like. Financial seminars and information would be made available in nursing homes and shelters. This all can be done through with emphasis on education. Its time to financially empower the "have-nots". Thank You, Joe Berger | Robinhood Financial Planning | 3 | 31 to 90 days | \$250,000 |
| Cuyahoga | Tyler Village | This funding will allow for the remediation of a brownfield site for productive re-use as a mixed-used facility incorporating industrial and residential components. | City of Cleveland, Office of Mayor | 143 | 181 days or more | \$3,000,000 |
| Cuyahoga | COPS Grant | This request would be for the COPS Hiring Grant, which would allow the CMHA Police Department to hire up to twenty officers. The salary and benefits of those officers would then be factored in to future budgets to allow for retention of the officers upon the expiration of the grant in three years. The CMHA Police Department is a federally funded Police Department that receives all of its monies from the Housing and Urban Development Agency (HUD). The CMHA Police Department therefore relies on the funds received from HUD and has no additional operating costs or additional manpower needs. The assistance from the COPS grant will allow the CMHA Police Department to hire additional officers, and budget into their budgets, the additional costs necessary to retain all officers hired under the grant after its expiration. Without the assistance of the COPS Grant the CMHA Police Department would be unable to hire any additional Police Officers. This funding will allow for the remediation of a brownfield site for productive re-use as a mixed-used facility incorporating industrial and residential components. | CMHA Police Department | 20 | 31 to 90 days | \$793,334 |
| Cuyahoga | Tyler Village | This funding will allow for the remediation of a brownfield site for productive re-use as a mixed-used facility incorporating industrial and residential components. | City of Cleveland, Office of Mayor | 143 | 181 days or more | \$3,000,000 |
| Cuyahoga | Sole Renewables | Development of 200 US jobs in the expansion of food and beverage vending equipment with solar application to Africa. Partner with Vendors, Exchange Int'l world's largest refurbisher of vending equipment, NASA, JTE Technologies, City of Cleveland, Roosevelt Coats Ward 10, Tom Maves State of Ohio Energy Office. Our goal (Sustenance of Life Enterprises project) "Sole Renewables" is to develop a solar application for the equipment for export due to the unavailability of that electrical power. We conducted feasibility study in 1999 that purchase, water and beverage 24 hours a day. In 2000 a summit on Africa was held in Wash DC where the decision that Africa would be developed by 70% multi-national corporation investment, 20% NGOs and 10% private and public sectors. This project will be accomplished in the spring of inner city westside from the City of Cleveland. They will be trained in solar and vending machine technologies which will produce initially 50 international micro-entrepreneurs for the equipment and maintenance of the equipment. Successful implementation of "Sole Renewables" will create 200 new jobs in export and renewable energy technology. 53 African nations | Substance Of Life Enterprises, Inc. | 50 | 91 to 180 days | \$373,184 |
| Cuyahoga | Harvard Avenue Resurfacing Project | This project would resurface a key 1.5 mile roadway that is heavily travelled by tractor trailer traffic in a main urban manufacturing area that provides access to Aronoff Metal Bevel, Alcoa, Ohio Crankshaft and also acts as the main point of access to the Village of Newburgh Heights. | Village of Newburgh Heights | 25 | 91 to 180 days | \$1,900,000 |
| Cuyahoga | Olmsted Falls Police Indoor Range Facility | Construction of an indoor firearms training facility within an existing structure to provide firearms training for the Olmsted Falls Police Department, the regional tactical unit and regional law enforcement agencies. Other agencies will be allowed to use the facility for training in cost of upkeep, maintenance and mitigation/cleaning of contaminants. Currently, no indoor facilities available for Olmsted Falls or neighboring agencies to allow an indoor facility and outdoor facilities are closing or limited due to safety and noise concerns. | Olmsted Falls Police Department | 4 | 181 days or more | \$750,000 |
| Cuyahoga | Citizens' Academy Middle School Expansion | Citizens' Academy request a \$2,000,000 investment to purchase and renovate a facility for a new, high quality middle school on Cleveland's west side - creating over \$4,000,000 of annual economic activity at scale and more than \$37,000,000 of economic activity over 10 years. The middle school expansion leverages Citizens' Academy's proven track record of providing predominantly minority, low income students with an excellent education (top 2000 4th grade achievement results in Cleveland), in our neighborhoods, 8,600 children attend middle school in Academics Watch or Academic Emergency (75% of the middle schools). This project will provide a high quality, college preparatory middle school education to nearly 400 children annually, retain existing construction jobs, create new education jobs, and transform an unused building in a targeted neighborhood. | Citizens' Academy | 80 | 181 days or more | \$2,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Design Internships | Necessary to earn full time and long term employment in the commercial interiors and exhibition industries. The primary goal is to accelerate the development of local talent who will serve as project designers for transit showrooms at the Cleveland Medical Mart and elsewhere within the region. This is significant in that there has been a notable drift of young professional designers from NE Ohio to other regions of the country based on the availability of professional employment opportunities. Equally significant is the stated desire of former residents of the region to return if long term employment was viable. | Gallo Displays | 100 | 91 to 180 days | \$250,000 |
| Cuyahoga | East 14th Street Streetscape | With the decision to locate the Medical Mart in Cleveland and with the expressed goal of city and county administrators to use the Mart as a driving force in the further development of downtown, we are confident this program will result in the direct employment of 10 to 15 new designers, present as many as 100 graphic and structural production and administrative positions, and create a latent pool capable of growing. | City of Cleveland, Office of Mayor | 95 | 181 days or more | \$2,000,000 |
| Cuyahoga | Keep Lebron in Cleveland | This project will allow for the completion of a streetscape project that will enhance the Playhouse Square Theatre District. This area is adjacent to the newly constructed Healthline, which is a \$200 million Transit Project that connects downtown Cleveland to the UCI area. | Startup Company | 20 | 0 to 30 days | \$100,000 |
| Cuyahoga | Corporation Stabilization & Revitalization Initiat | This is a project that is aimed at keeping Lebron James in Cleveland after he becomes a free agent in 2010. This will be a project based on mass marketing to the northern Ohio area. Examples include but are not limited to T-Shirt, Posters, Flyers, a website, billboards, commercials. We are a local small business with great aspirations. The funding would be used to expand current services allowing us to compete more aggressively with large publicly traded background screening corporations. Our company plans to focus on improving our proprietary software and improve our presence in the Ohio market through staff and location. The needed funds will help maintain the current staffing, add up to 15 new employees and allow us to upgrade our facilities to be more energy compliant. | Crimcheck.com | 18 | 0 to 30 days | \$845,000 |
| Cuyahoga | Energy Efficiency upgrades | Energy Efficiency upgrades Includes the following projects: Replacing Boiler A & C controls Total cost: \$600,000 Replace PWT steam turbine with an electric motor Total cost: \$360,000 Install a steam condensate collection system Total cost: \$450,000 Add acid blowers to boilers #1 and #2 Total cost: \$200,000 Add VF motor drives to water treatment Total cost: \$80,000 Leak detection and repair of steam and gas pipelines: Cost: \$300,000 Convert cranes to digital drives: \$300,000 These jobs when taken together will save energy costs which will help preserve the 1,200 jobs at the Cleveland steel plant which is currently shut down. The efficiency upgrades will prevent approximately 10,000 tons of CO2 per year emitted into the atmosphere. | Arcelormittal steel | 1,200 | 31 to 90 days | \$1,880,000 |
| Cuyahoga | Railroad Safety Project, Bessemer Ave., Cleveland | Reconfiguration of highway/railroad intersection that has had 9 accidents in the past 5 years. Both passenger and freight Amtrak, and freight, through Norfolk Southern, use this crossing. This is the #1 of approximately 6000 most dangerous crossings in the State of Ohio. | Ohio Rail Development Commission | 40 | 91 to 180 days | \$3,000,000 |
| Cuyahoga | New Rescue Squad | The city currently owns two rescue squads. The oldest rescue squad was built in 2006. We would like to purchase this squad with a new squad. The financial grant will permit completion of grant writing of the design of a unique educational program for the Park through 12. It is particularly designed to move the disadvantaged student into a college prep program that places him on equal footing with any child raised with affluence. It is unique because it combines multiple modalities to address educational problems encountered by the economically disadvantaged student: 1) Universal Student Tutors 2) Show Me the Money, motivation for parental involvement 3) Long Distance Tutors 4) Keynotes in all college prep courses before/after 5) Parental age appropriate 6) The Book Bag 7) Universal Student Computer 7) Teacher re-charge lounge 8) Multiple intelligence development for students. IN ADDITION TO THE PROJECT AFTER 2 YEARS WILL BE FINANCIALLY SELF SUSTAINING. Income for the school will derive from the copyrighted project being sold to other school districts. In addition there is a self sustaining project available to all schools who choose to utilize the program. Some of the non profit CLOTH funds will be used for research and development and continue viability. | City of University Heights | 0 | 31 to 90 days | \$145,000 |
| Cuyahoga | CLOTH (Cleveland of the Heartland) Unique Educatio | The Station kitchen and Bathroom have not been renovated for more than 20 years. We currently have 9 men per shift and work out of a kitchen the size of a regular house. The bathroom has one toilet, three sinks, and two showers. The new Fire Station would replace or current build the station. Our station is so small and does not meet current national safety standards. The station is in poor condition. | Joan O. Rothenberg, M.D. | 30 | 91 to 180 days | \$75,000 |
| Cuyahoga | Remodeling Fire Station | Has a full time police officer 75% of wages and benefits for three years. New Pierce Fire Engine would replace our current 1991 apparatus. This new apparatus would comply with NATIONAL FIRE PROTECTION STANDARD 1901. | City of University Heights | 4 | 91 to 180 days | \$70,000 |
| Cuyahoga | New Fire Station | Purchase of a city surveillance camera system. Although the City of Bedford Heights is small geographically, 4.5 square miles, it is home to many manufacturers. It has 62 manufacturers call Bedford Heights home! Combined the 62 manufacturers employ approximately 5,000 people. Manufacturers of consumable items such as Showan Williams, New York Frozen Foods, Coca-Cola and durable goods such as ITW-Bedford Wire, Olympic Steel and Cardinal Pastiner are located here. | City of University Heights | 30 | 181 days or more | \$2,000,000 |
| Cuyahoga | Bentleyville safety program | Many of the buildings occupied by these manufacturers were constructed in the 1970s and 1980s. The buildings are not energy efficient by today's standards. Aside from labor, energy is the highest cost to most manufacturers. Increasing energy efficiency enables manufacturers to price their product more competitively. An increase in sales also increases the number of employees and the opportunity to make a profit. Our community saves 2% on employee payroll and the net profits companies make within our corporate boundaries. | Bentleyville Police Department | 1 | 91 to 180 days | \$180,000 |
| Cuyahoga | New Pierce Fire Engine | Since 2005, the city actively marketed the State of Ohio's Enviro / Energy Achiever Program. To date three corporations and the city itself benefited from this program. It is an excellent resource for a small community. Therefore, the city of Bedford Heights requests funding to maintain staffing at current levels in the fire and police department. Due to a significant shortfall in revenue, City of Lyndhurst is considering layoffs in both the police and fire department. | City of University Heights | 0 | 181 days or more | \$250,000 |
| Cuyahoga | Bentleyville security program | Need a team to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. | Bentleyville Police Department | 1 | 91 to 180 days | \$180,000 |
| Cuyahoga | energy audits for manufacturers | Need a team to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. The Hebrew Academy would like to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. | City of Bedford Heights | 5000 | 31 to 90 days | \$500,000 |
| Cuyahoga | Fire/Police Department Staffing | Need a team to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. The Hebrew Academy would like to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. | Lyndhurst Fire Department | 6 | 0 to 30 days | \$650,000 |
| Cuyahoga | Sundry Streets Road and Sidewalk Rehabilitation | Rehabilitate about 1.5 miles of roads and replace about 0.3 miles of sidewalk to improve vehicular and pedestrian safety based on priority listing. Pine Station/City Hall complex built in 1972. The money would be used to upgrade facility with smoke and heat detectors, hood system, self closing fire doors, security system and roller fire doors. Solar panel installation cost can be as low as the panels themselves, reducing the ROI by 50%. By providing training to small contractors, B2x can improve the investment model for all parts of the solar ecosystem which will encourage additional use organically. Commercial customers (industrial buildings) consume much larger quantities of power than residential customers and often have large unused flat roof spaces for significant solar install projects. | Chagrin Falls Village | 12 | 31 to 90 days | \$400,000 |
| Cuyahoga | Upgrade fire protection in fire station/City Hall | Need a team to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. The Hebrew Academy would like to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. | Lyndhurst Fire Department | 6 | 91 to 180 days | \$50,000 |
| Cuyahoga | Commercial Building Solar Install Training | Need a team to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. The Hebrew Academy would like to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. | Tri-State Realty | 50 | 31 to 90 days | \$95,000 |
| Cuyahoga | Energy Efficient Boilers | Need a team to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The Hebrew Academy would like to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. | Forestview Terrace, LLC | 3 | 0 to 30 days | \$120,000 |
| Cuyahoga | Smart Boards | Need a team to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. The Hebrew Academy would like to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. | The Hebrew Academy of Cleveland | 0 | 31 to 90 days | \$22,100 |
| Cuyahoga | Clague Road Reconstruction | "Clague Road Reconstruction" The project consist of complete removal and replacement of Clague Rd (CR-52) from Detroit Rd(R-254) to Centre Bridge Rd (BR-20) this includes the removal and replacement of 5200 linear feet of roadway, existing rear storm sewers, curbs and water main. This roadway system including its storm sewer and water main were built in the 1920's making them over 75 years old. The pavement is in poor condition and the travel lanes are narrow and fail to meet minimum standards. The storm sewer is under sized and flooding of the roadway and nearby properties happens frequently. The water main has a broken rate well above accepted standard creating head loss. These required improvements will improve the safety, health and welfare of the over 20,000 user daily. Creating water travel lanes to reduce accidents, improved storm drainage to minimize flooding and a new water main to improve fire fighting capabilities through out the corridor. Municipal Security Grant Program Investment Justification I. APPLICANT INFORMATION: Name of Organization: Hebrew Academy of Cleveland (HAC) Organization Type: Educational 501(c)(3) number: 34-0714428 DUNS Number: 08106499 FY 2009 Urban Area: Cleveland-Cuyahoga FY 2009 LUSH/NSGP Federal Funding Request: \$75,000 Previous NSGP Funding: none Previous DHS Funding: none Current DHS Contract: no II. BACKGROUND: HAC is an Orthodox Jewish day school with an enrollment of almost 800 students from early childhood through High School on 3 campuses (Taylor Rd in Cleve. Hts, Sagriston Campus in Lyndhurst & Yarnes in Beachwood.) This investment justification concerns only the first 2 campuses. 160 faculty & staff work at the two campuses. - The Taylor Rd. campus is located in the center of a dense concentration of Orthodox Jewish institutions. Pedestrians are easily recognizable as Jews by dress and headcoverings. - Kluwan CRSR is less than 1 mile from Cleve. Hts. police headquarters. Within 1 mile of major shopping center (Severance Ctr.), and of Mayfield Rd. (Rte. 322) a major E-W thoroughfare in western suburbs of Cleveland. UPK makes high quality early care and education more affordable for families. All sites meet a series of standards, proven through research to be the hallmarks of quality that result in improved school readiness. To promote affordability, supplemental scholarships are provided to families at or below 400% of the federal poverty level to reduce their parent fee by about one-third. UPK is delivered through a variety of early care and education settings, including public and private pre-kindergarten, Head Start, Early Learning Initiative programs, child care centers, and family child care homes. | City of Westlake | 150 | 31 to 90 days | \$4,000,000 |
| Cuyahoga | urban area security initiative | Need a team to purchase and install four new energy efficient boilers for a 73 unit apartment building which employs three people. The property is currently losing money because of the high cost of gas. This puts the employees at risk as the property can not continue losing money. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Cleveland Police Recruits (Additional Equipment Fu | are in the Police Academy, all equipment they are provided with (tactical vest, uniform, etc...) and the purchase of 10 police cruisers. The current economic crisis affects the City of Cleveland early, and resulted in the need to layoff 339 police personnel in 2008, including 250 police officers. Recent COPS grants have aided us in recovering some of these positions but we are still far from our 2003 levels. With the highest rate of homelessness in the United States, Cleveland is being the especially hard to this recession. Because poverty levels directly correlate to crime rates the Cleveland Division of Police must be prepared to deal with new challenges in these times. Specialized units need to be increased as do basic patrols. We are applying to the US DOJ COPS Office for funding to hire 100 Police Officers. However, COPS grants do not cover the initial costs associated with training and equipping these officers. Expected outcomes: The Cleveland Division of Police will hire and equip 100 additional police officers. Over 2 billion people in developing nations desperately need a simple, long lasting, and cost effective way to get power. Sunflower Solutions manufactures sustainable alternative energy solutions specifically for off-the-grid applications at roughly half the cost of any competitor. | City of Cleveland, Office of Mayor | 100 | 91 to 180 days | \$4,700,000 |
| Cuyahoga | Sunflower Solutions | This project will help establish Cleveland as the manufacturing hub for the Sunflower Solutions' products. Access to more effective and lower cost power in developing nations will allow for tremendous improvements in the areas of health, water and agriculture, education and local economies. | Sunflower Solutions | 10 | 0 to 30 days | \$100,000 |
| Cuyahoga | Financial Literacy/Youth Education | Entrepreneurial job creation in bankruptcy houses, banking institutions, well street trading pits, small businesses and real estate management firms. Our program will initially educate students in the proper protocol of opening and managing personal bank accounts. Second, it will teach students how to evaluate local and global market conditions, trusty, teaching them how to protect investors and traders of the stock market and thereby creating an income and sustaining their local communities by reinvesting back into it. Education Plus/First Financial (EPFF), will provide instruction for area teachers of social studies, government, economics and business classes as well as teach classes for the junior and senior students, preparing them for post secondary life experiences. EPFF will be available for providing stock market and currency market trading techniques for teachers of Cuyahoga County and adjoining communities during prescribed after-school and summer periods. | Education Plus/First Financial | 3,500 | 31 to 90 days | \$1,200,000 |
| Cuyahoga | CLE Roadway SR 237 Reconstruction | A mind is truly a terrible thing to waste. This project will allow for the separation of incoming traffic through construction of three additional ramps continuing south to SR-227 and resolving a current safety issue. | City of Cleveland, Office of Mayor | 1140 | 91 to 180 days | \$24,000,000 |
| Cuyahoga | South Collinwood Recreation Center | The North and South Collinwood Recreation Centers will create over 40,000 square feet of community rooms, fitness/recreation spaces, locker room and grass/space to service over 45,000 residents in the Collinwood community of the City of Cleveland. | City of Cleveland, Office of Mayor | 95 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | Central Client Pharmacy | Funds will be utilized to open a CFC pharmacy, closed door pharmacy that would serve Medicaid patients with severe mental illness currently receiving service at our behavioral health sites. This initiative presents an opportunity to: <ul style="list-style-type: none"> • increase the chance that clients fill their prescriptions; • increase medication compliance, taking it and taking it in correct dosage; • alleviate the stigma consumers have experienced in neighborhood pharmacies. | Center for Families and Children | 95 | 0 to 30 days | \$315,000 |
| Cuyahoga | Post-graduate College of Preventive Medicine | Funds would be used for start up expenses with the expectation that the initiative would be self-sustaining in 24 months. The shift in the future of medicine in mean lifespan and quality of resources available for healthcare are changing the medical model from a reactive model to a proactive model. Funds will be directed toward prevention of disease, especially age-related and immunologic diseases, such as Diabetes, Heart Disease, Cancer, Multiple Sclerosis and Alzheimer disease. In that regard, we have begun an initiative to reorganize the Cleveland MDs and DOs (before drug industry completes indoctrination) in healthcare prevention and wellness under the direction of the Preventive Medicine Group, a preventive and integrative medical practice in Westlake Ohio for over 35 years. This project, designed to meet the needs of Ohio residents as well as those in neighboring states. The overall goal is to prepare several fellows for the future of healthcare practice in anticipation of the needs that a changing demographic, the insurance industry and the availability of resources will require. We are asking that funds be granted to cover the cost of training and a stipend of up to a one-year period for each fellow. | American Institute for Complementary and Alternati | 35 | 91 to 180 days | \$500,000 |
| Cuyahoga | Expansion Development College of Preventive Medic | Increases in mean lifespan and quality of resources available for healthcare mean fast change are needed. The shift in the future of medicine will be directed toward prevention of disease, especially age-related and immunologic diseases, such as Diabetes, Heart Disease, Cancer, Multiple Sclerosis and Alzheimer disease. In that regard, we have begun an initiative to foster healthcare prevention and wellness and expand our current medical healthcare and testing complex in Westlake Ohio. Preventive Medicine Group is a preventive and integrative medical practice in Westlake Ohio for over 35 years that has served about 20,000 patients during this period and has about 6,000 active patients. This funding request is part of an expansion project, designed to meet the needs of Ohio residents as well as those in neighboring states. The overall goal is to improve, update and deliver top-quality healthcare outcomes and grow our organization in anticipation of the needs that a changing demographic will require in the near future. We are asking for funds to cover the cost of relocating, building, equipping, outfitting, office, treatment, education and IV therapy rooms and stations. | Preventive Medicine Group | 35 | 91 to 180 days | \$500,000 |
| Cuyahoga | Saving money/jobs and increasing security | In the past 5 years my corporation has been contracted to conduct security audits for several major school districts. I am a former Marine and retired FBI agent. My staff has conducted security audits on more than 60 schools as well as trained principals, security staff and others. Due to the lack of educational funds in Ohio, I am preparing to increase security at schools (at no additional cost) AND, actually save approximately three to four million dollars per year statewide. Major school districts can save a hundred thousand dollars alone. How (Just one example) Most school districts have determined that good security requires that lights be maintained inside the school building, either dimmed to dim levels or shut off. A major school district on the west coast has determined that school districts kept in total darkness had two advantages. One, thieves and vandals were less likely to enter these darkened buildings due to the darkness than lights or other illumination through neighborhood or police scrutiny and two, the school district saved thousands of dollars in utility bills. I can save \$ for all schools in Ohio. | Command Consulting Ltd. | 300 | 31 to 90 days | \$175,000 |
| Cuyahoga | Electronic Medical Record System | Enhance the effectiveness & productivity of providers. Providers practicing out in the community will have rapid & complete access to a patient's treatment record. Enhance the continuity of patient care between multiple providers; reduce time for a new provider to get current on a patient's current condition/ treatment. Improve the quality & timeliness of patient documentation; eliminating transcription delays and errors/misinterpretation of hand written records. Ensure that treatment funded by Medicare and Medicaid is appropriately submitted for payment, reducing the volume of claims corrections. Provide a complete audit trail of a patient's diagnosis and treatment. Provide complete & timely information during patient emergencies or when a patient is under duress. Reduce provider time required to update treatment plans & record progress notes. | Center for Families and Children | 95 | 31 to 90 days | \$450,000 |
| Cuyahoga | Carter Road Bridge | Integrated notes & plans allow for rapid adaptation of treatment plans based on patient response to treatment and ensure the best possible patient outcome. This funding will allow the replacement of grid deck, sidewalks and approach slab and for a mechanical evaluation. | City of Cleveland, Office of Mayor | 100 | 91 to 180 days | \$2,500,000 |
| Cuyahoga | Cleveland Solar Manufacturing | This MBE company is currently based in Cleveland, Ohio in the Mount Pleasant area and will open its new manufacturing facility in Mid Town Corridor. The PV manufacturing is phase one and the most viable of the renewable technologies that meet the electrical needs of Ohio now at nearly competitive prices. In the first seven years we plan to manufacture the modules and place them in solar arrays of Megawatt (million-watts) size until we reach base load (500MW) of conventional generators of electricity. The financial reward for establishing R. A. Energy is simply fantastic. With an infusion of capital of \$40,000,000 USD, R. A. Energy will generate \$4,000,000.00 a year from the sale of electricity. The company intends the company intends to employ over 100 people in the manufacturing facility and train 400 more in an installation workforce from low income and community re-entry projects. | R. A. Energy International, Inc. | 500 | 0 to 30 days | \$40,000,000 |
| Cuyahoga | Thornton Park Energy Efficiency Upgrades | Funding is required to address energy efficiency issues at Thornton Park. City-owned facility includes departmental office space, indoor ice arena and outdoor pool. Immediate improvements required include 69 new windows, 9 new exterior doors and interior ice rink doors, replacement of 5 inefficient HVAC units, a new compressor for the ice rink, a solar blanket for the outdoor swimming pool and additional insulation for the ice arena rink. These improvements will result in reduced energy use and reductions in energy bills, allowing scarce public resources to be better allocated. The project is anticipated to create/retain 40 jobs. Estimated cost is \$4 million. | City of Shaker Heights | 40 | 31 to 90 days | \$4,000,000 |
| Cuyahoga | Job Creation & Sustainability | Train laid off factory workers and ex-offenders in solar panel construction and installation. After completion of training, trainees will enter paid apprenticeship with senior installers on the job. Services to many different industries for energy and infrastructure. Our sales have dropped 7% since January 2009. We have been in business since 1977 (32 years). On Friday the 27th of February we had a staff of five (5) key employees and not the income of most of us to be much as 35%. | Buckeyes for Change | 200 | 31 to 90 days | \$1,250,000 |
| Cuyahoga | Expert Crane Inc. | We are very concerned we will not be able to stay in business long enough for the economic recovery. We are requesting these funds to keep a solid manufacturer in the Cleveland area and keep people working in a distressed market. Solid citizens need work! The request breaks down as follows: <ol style="list-style-type: none"> 1. Assist in payroll & cost of operations for the next 24 months (\$1,664,000.00). 2. Purchase a facility that will better accommodate our business, is more energy & operationally efficient and will make us competitive in the future (\$1,500,000.00). 3. Purchase paint booths to keep the environment green (\$80,000.00). These funds represent 80% of what we anticipate needing. Cleveland, Ohio needs to keep and put people to work. Help us survive this economic crisis. | Expert Crane Inc. | 35 | 31 to 90 days | \$3,264,000 |
| Cuyahoga | Shaker Heights Urban Forest Preservation | The City is entering the third year of a five-year plan to address the Emerald Ash Borer (EAB) insect that is severely attacking trees in Ohio. The plan calls for the removal of 1,055 ash trees over the next three years, and replacement with other native, insect-resistant species. The cost estimate to remove and replace these trees is \$488,000. This project is necessary to prevent the spread of the EAB insect and prevent ash trees from weakening to the point of potentially injuring people and/or property. Another component of the City's urban forest program is removal and replacement of 60 storm-damaged trees that pose a risk to people and property. The cost estimate is \$93,000. The two projects will retain 11 jobs. Additional project funding will be allocated from the City of Shaker Heights. | City of Shaker Heights | 11 | 0 to 30 days | \$500,000 |
| Cuyahoga | Semiconductor Research Advanced Electronics | STX is the design and fulfillment resource for Freescale Semiconductor's Telematics group (Intelligent vehicle interfaces). We supply research and development systems to both large automotive companies (Delphi, Marell, Continental AG, LG Korea) as well as smaller instrument and controls OEMs. STX needs funding to develop prototypes of control systems for alternative fuel vehicles and electric vehicles. The big auto companies did very little in this area and with the outbacks, they are doing even less. | Silicon Turnkey Express | 50 | 31 to 90 days | \$400,000 |
| Cuyahoga | | This is a program that would reduce pollutants and create dozens of renewable energy jobs immediately, hundreds long-term. | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | Behavioral Health in the Re-Entry Population | From one point perspective to represent one comprehensive, integrated recovery strategy. Through research, consultation about the needs of business, social service, education, workforce, government, and other community partners have the opportunity and the capacity to achieve sustained change and improve the quality of life for individuals and families experiencing incarceration and re-entry. This project will directly serve individuals leaving incarceration and returning to Cuyahoga County. We anticipate that the communities/counties served will be greater, as families from surrounding areas will also be served. Objectives include: • Other families and individuals behavioral health services in preparation for, during, and after the process of re-entry. • Decrease recidivism through mental health services, addiction treatment, and other supportive community services. • Other behavioral health services to children of incarcerated parents to address issues of loss and abandonment and impact the cycle of criminal justice involvement. | Center for Families and Children | 25 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | W.E.B. Du Bois Leadership Academy | W.E.B. Du Bois Leadership Academy The Cleveland NAACP Branche Over the past several months the National Association for the Advancement of Colored People - Cleveland Branch (NAACP), specifically the Education Committee, has examined the educational environment nationally, in Cleveland and the suburban communities that surround Cleveland. The nation's high school dropout rate remains high, despite a number of targeted efforts. As many as 7,000 students drop out of high school each year, according to one study. The national graduation rate is between 68 percent and 71 percent. The graduation rate for African American, Hispanic, and Native American students is about 60 percent, while graduation rates for whites and Asians hover around 75 percent to 77 percent, respectively. It is clear the urban districts like the Cleveland Municipal School District (CMSD) with its 66,000 students continues to have challenges, and through the work of many organizations appears to be making some improvement. The less acknowledged fact is that as people and families leave the city of Cleveland and the CMSD, they relocate to the surrounding suburban communities. Unfortunately, many of the suburban communities are not prepared to address the social and education challenges which accompany | Cleveland Branch NAACP | 7 | 0 to 30 days | \$120,000 |
| Cuyahoga | Don't Waste Money on Highways, Prisons, and Airpor | What has been the biggest inconvenience of Northeast Ohio in the last ten years? It was road construction. It seemed endless from one highway to another. Yes, it created jobs but they are not for Americans; most Americans don't want to do those kind of work. The real jobs were actually created for illegal immigrants and the real money went to a few illegal contractors. Those construction projects did not make Ohio better either. The rush hour traffic jams stay the same or became worse and non rush hour traffic was slowed down by the constant road repair. To solve Northeast Ohio's rush hour traffic problem, build rail tracks connecting Cleveland to Akron/Canton, Toledo and Youngstown and offer rail services during rush hours. During non rush hours, the track and trains may be used for freight transportation. Most service workers would be local from county and city governments. After rush hour traffic, they can return to their work. The removal and replacement of a stone masonry culvert in the City of Bedford, Ohio. The culvert was originally constructed circa 1924 and is deteriorated and in a critical condition. Located near the City of Bedford, Ohio, the project will improve stormwater management best management practices by replacing deteriorated existing infrastructure. | Ohio Resident | 0 | 0 to 30 days | \$0 |
| Cuyahoga | CUY-14 Broadway Avenue over Wood Creek | The roadway infrastructure improvements of several Bedford, Ohio residential streets that are in need of repair. It is specifically through this program the infrastructural condition of several of the City's worst residential streets will be greatly improved. This project will include base repair resurfacing, catch basin and sewer repair, providing new ADA compliant curb ramps, concrete curbs, sidewalks, and other incidentals. Benefits for Neighborhood Success is 50 (10.3, non-profit organizations) that partners with local health care providers, mental health services as a viable health care option to patients seeking treatment. We are focusing on natural ways to reduce anxiety in children as a means of decreasing the number of children with diabetes and/or high blood pressure. Our methodology is based on research and maintaining a healthy lifestyle. | CITY OF BEDFORD | 50 | 0 to 30 days | \$720,000 |
| Cuyahoga | 2009 ROAD IMPROVEMENT PROGRAM | The roadway infrastructure improvements of several Bedford, Ohio residential streets that are in need of repair. It is specifically through this program the infrastructural condition of several of the City's worst residential streets will be greatly improved. This project will include base repair resurfacing, catch basin and sewer repair, providing new ADA compliant curb ramps, concrete curbs, sidewalks, and other incidentals. Benefits for Neighborhood Success is 50 (10.3, non-profit organizations) that partners with local health care providers, mental health services as a viable health care option to patients seeking treatment. We are focusing on natural ways to reduce anxiety in children as a means of decreasing the number of children with diabetes and/or high blood pressure. Our methodology is based on research and maintaining a healthy lifestyle. | CITY OF BEDFORD | 50 | 0 to 30 days | \$1,800,000 |
| Cuyahoga | Holistic Size | Plan to develop and implement a program to nourish seniors and disabled individuals' mental health through music-music therapy, entertainment and lecture on an history and personalized planning on simple economic development. A multitude of different participating homes libraries retirement homes, civic and senior organizations, etc.) can be utilized across the county where residents (Dougherty) I would need less than a calendar year to use the stimulus money on its own terms and perhaps as "seed money" for mid and longer range programs. I myself play five musical instruments and am a performance poet and writer, and do concerts with live music and lyrics in nursing home settings and at the community college level with active seniors as well as other organizations. I am also disabled by a bad accident and Cancer. Thank you immensely for taking your valuable time to review this proposal-Michael Keith Gustafson | Network for Neighborhood Success | 50 | 181 days or more | \$100,000 |
| Cuyahoga | The Senior Educational Nurturing Program | Plan to develop and implement a program to nourish seniors and disabled individuals' mental health through music-music therapy, entertainment and lecture on an history and personalized planning on simple economic development. | Cuyahoga | Early Learning Tuition Subsidies | CFCA's early learning program promotes the healthy, progressive development of children, respects and facilitates parenting competence, and supports and strengthens family functioning. All program services provided help parents/guardians increase their financial self-sufficiency as they enroll in training programs, attend school, and/or secure employment. CFCA provides services in some of the most challenged communities of Northeast Ohio, operating five centers in the Cedar/Central Union/Woodland/Buckeye/Krosman, Glenview, and Garden Valley/Krosman areas of Cleveland and in Cleveland Heights. While many families qualify for government-subsidized childcare, an increasing number are unable to meeting increasing co-pay amounts. Further, as families are able to leave welfare, many are not yet able to pay the full cost of care. Other families are working homeless and unable to pay for care. | Center for Families and Children | 10 | 0 to 30 days | \$150,000 |
| Cuyahoga | Northeast Ohio Job Creation Acceleration Fund | Funds provided would allow children to receive subsidized care while parents/guardians move toward financial independence. As the family problems in an economic crisis that allows them to fully cover the cost of care, the subsidy will allow other families to use this support. Many businesses today that are on a growth cycle even in this economy, are not able to obtain working capital financing to fund their growth. These businesses are ready to create jobs today, however banks are hesitant, even with good credit histories to loan working capital. The Northeast Ohio Job Creation Acceleration Fund will implement a combination of business and employee training, aimed to flexible convertible loan notes, convertible to stock, or deferrable. The purpose of these loans will be to fill a higher risk working capital financing gap on business expansion projects between bank financing provided on a business expansion project, and owner equity. Qualifying businesses, must have at least a 10% growth rate, and be referred through their banker, and be certified as being unable to support their growth rate were it not for intervention of the program financing. In order to qualify for the financing key officers of the business must undergo good business practices training created or loaned to Mercy Economic Development International. | Mercy Economic Development International Corporati | 1000 | 0 to 30 days | \$2,500,000 |
| Cuyahoga | Early Learning Center Capital Project | CFCA's early learning program promotes the healthy, progressive development of children, respects and facilitates parenting competence, and supports and strengthens family functioning. All program services provided help parents/guardians increase their financial self-sufficiency as they enroll in training programs, attend school, and/or secure employment. CFCA provides services in some of the most challenged communities of Northeast Ohio, operating five centers in the Cedar/Central Union/Woodland/Buckeye/Krosman, Glenview, and Garden Valley/Krosman areas of Cleveland and in Cleveland Heights. Mother Early Learning Center traces its beginning to 1920, with the remodeling of a house on a three acre lot on Broadway Ave in Cleveland. The three-floor complex was originally designed to accommodate 25 children with a playground, sheltered outside play deck, baths, cots, store room, kitchen, and fireplace. The facility had been updated over the years, but is in need of critical updates. Funds would be utilized to replace major masonry basement walls and install new masonry pier, parking lot, configurations, windows, central air condition system, elevators, and | Center for Families and Children | 10 | 0 to 30 days | \$315,000 |
| Cuyahoga | Starting a new business | Business proposal to start a cleaning business that would require us to hire at least 50 people. The business needs a space to rent as well as cleaning equipment. I want to make employees business owners. We need working capital to start in business for the first 30 days. We project that we will have 10-25 continuous contracts for cleaning. We need working capital for consultants, sales, services, marketing, accounting and maintenance. We have 5 contracts we are currently working with. This would be a great opportunity to start a lot of people to work. The project would include constructing the middle portion of the new Port of Cleveland site at E 55 Street of approximately 80 acres within a five-year period, versus the 20-year timeframe currently estimated for the full 200 acre project. The project would be positioned, and large enough to accommodate full rail and road access to the area when completed. It could be fully operational for Port Authority maritime and logistics purposes. This phase of the project would allow all operations on the existing downtown port to be vacated within the five-year construction period. Moving operations from the current 115 acre site at the downtown waterfront will allow for the redevelopment of this property, including the waterfront with open space, and building a mixed-use site to accommodate commercial, retail and housing. The project is true economic development, creating not just infrastructure construction jobs, but long-term, permanent jobs, within the downtown redevelopment, and new maritime jobs at the new Port site. Additionally, the acceleration of the Port Rehabilitation will provide for the development of the new International Trade District within a shortened area of the City. Acquire and install an Electronic Medical Record system to support to Community Based Behavioral Health practice. An EMM system will: | Business cleaning | 50 | 31 to 90 days | \$2,500,000 |
| Cuyahoga | Port Relocation -- Phase I | Business proposal to start a cleaning business that would require us to hire at least 50 people. | Cuyahoga | Electronic Medical Record System | Enhance the effectiveness & productivity of providers. Providers practicing out in the community will have rapid & complete access to a patient's treatment record. Enhance the continuity of patient care between multiple providers; reduce time for a new provider to get current on a patient's current condition/ treatments. Improve the quality & timeliness of patient documentation; eliminating transcription delays and errors/misinterpretation of hand written records. Ensure that treatment funded by Medicare and Medicaid is appropriately submitted for payment, reducing the volume of claims corrections. Provide a complete audit trail of a patient's diagnosis and treatment. Provide complete & timely information during patient emergencies or when a patient is under duress. Reduce provider time required to update treatment plans & record progress notes. Integrated notes & plans allow for rapid adaptation of treatment plans based on patient response to treatment and ensure the best possible patient construction of 9 new homes bank is trying to enforce absorption clause with quarterly sale down of lots on land loan. | Center for Families and Children | 95 | 31 to 90 days | \$450,000 |
| Cuyahoga | Parlviek Meadows | Integrated notes & plans allow for rapid adaptation of treatment plans based on patient response to treatment and ensure the best possible patient construction of 9 new homes bank is trying to enforce absorption clause with quarterly sale down of lots on land loan. | Ream Builders | 74 | 0 to 30 days | \$580,000 |
| Cuyahoga | Thurman Avenue and West 6th Street Pervious Paveme | The funding of these projects will allow for the stormwater retention and improved water quality in a combined sewer area of the city. | City of Cleveland, Office of Mayor | 15 | 91 to 180 days | \$516,000 |
| Cuyahoga | Fetersas & Veterans | This program is for disabled, displaced, homeless and low income female and male veterans. We will provide temporary and long term housing. Adjustment to assist counseling, therapy and other mental applications. Funding for mental applications. Funding for mental applications. Our primary goal is to assist the warfighter veterans. We will also employ the veterans. As we grow our organization we hope to offer Vet to Vet buddy programs. This project will allow for the reconstruction and Streetscape with balconies for stormwater retention for Waterloo Road (E. 15th to E. 16th) and E. 15th Street (Cedarville Avenue to Lorainwood Overlook). This will include stormwater retention and improved water quality in a repeated sewer area of the city. | Fetersans: Group Home and Services for Displaced Ve | 25 | 91 to 180 days | \$250,000 |
| Cuyahoga | Waterloo & E.156th Reconstruction and Stormwater | This program is for disabled, displaced, homeless and low income female and male veterans. We will provide temporary and long term housing. Adjustment to assist counseling, therapy and other mental applications. Funding for mental applications. Our primary goal is to assist the warfighter veterans. We will also employ the veterans. As we grow our organization we hope to offer Vet to Vet buddy programs. This project will allow for the reconstruction and Streetscape with balconies for stormwater retention for Waterloo Road (E. 15th to E. 16th) and E. 15th Street (Cedarville Avenue to Lorainwood Overlook). This will include stormwater retention and improved water quality in a repeated sewer area of the city. | City of Cleveland, Office of Mayor | 30 | 181 days or more | \$1,200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | East 30th Street and St. Vincent Streetscape | This funding will allow for streetscape improvements including bollards for stormwater retention. | City of Cleveland, Office of Mayor | 30 | 91 to 180 days | \$150,000 |
| Cuyahoga | South Collinwood Recreation Center | The North and South Collinwood Recreation Centers will create over 40,000 square feet of community rooms, fitness/aerobics spaces, locker room and granular space to service over 45,000 residents in the Collinwood community of the City of Cleveland. | City of Cleveland, Office of Mayor | 95 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | Provide a Home | Subsidize the City of Cleveland's Home Care Program. Provide a Home to low income families, those that have lost their home to Foreclosure, Buying and fixing up - displaced homes and renting them out based on need and income levels. Families with children having priority. Displaced veterans and low income families. Working with government agencies to assist in finding employment, as well as with government agencies to obtain and keep work. Offering classes in behavior, and dressing for success. | Provide a Home | 30 | 31 to 90 days | \$275,000 |
| Cuyahoga | Purvis Park Tennis Court Reconstruction | Reconstruct the seven (7) Purvis Park tennis courts in the City of University Heights, Ohio. These tennis courts have been patched for several years to accommodate the local school systems annual tennis program. Tennis courts have tennis courts that have been filled on an annual basis only to have the filler material lost due to winter freeze thaw cycles. | THE CITY OF UNIVERSITY HEIGHTS | 20 | 31 to 90 days | \$270,000 |
| Cuyahoga | 2009 ROAD IMPROVEMENT PROGRAM | The roadway infrastructure improvement of several University Heights, Ohio residential streets that need the repair. It is speculated that through this program the infrastructure condition of several of the City's worst residential streets will be greatly improved. This project will include roadway base repair, resurfacing, catch basin and sewer repair, providing new ADA compliant curb ramps, concrete curb, underdrain and other incidentals. | THE CITY OF UNIVERSITY HEIGHTS | 50 | 0 to 30 days | \$2,520,000 |
| Cuyahoga | Lean manufacturing concepts explored | Obtain certificate for lean manufacturing training from University of Kentucky. This four week (4 month total time) program runs in conjunction with the and utilizes professional Toyota employees to lead and train students. Inspired by the Magnet group of Cleveland which promotes economic growth in northeastern Ohio, I plan to complete my masters degree at Cleveland State University school of Business while also attending lean training. As a result I will be able to assist local governments and businesses become more competitive in the global market by giving them the tools to become more efficient. In my opinion, a more efficient government/business can offer improved products at a lower cost. I plan to teach, train and coach employees to explore and become more productive, to improve their current business/government operations. It has been my dream to make a positive difference in the world. Thank you. | Magnet | 100 | 0 to 30 days | \$11,000 |
| Cuyahoga | Citywide Sewer Cleaning, Televising, and Repair | The sewer system in the City of University Heights, Ohio dates back to 1912. It is speculated that through this program the sanitary and storm sewer system can be cleaned, inspected and accurately evaluated to determine the condition of the City's sewer system. This project will provide the infrastructural information needed to assess the sewer systems condition and provide needed recommendations for future sewer repair projects. Also included will be catch basin cleaning and other incidentals. | THE CITY OF UNIVERSITY HEIGHTS | 50 | 0 to 30 days | \$450,000 |
| Cuyahoga | UNIVERSITY PARKWAY RECONSTRUCTION | Removal and reconstruction of University Parkway from Bromley Road to Green Road. The roadway is in critical condition due to the numerous potholes and cracks which have undermined the road. The waterline was replaced in 2008. However, the roadway and underlying base, curb, and sidewalk are beyond repair and need total replacement. Engineering plans are complete for this project. | THE CITY OF UNIVERSITY HEIGHTS | 50 | 0 to 30 days | \$765,000 |
| Cuyahoga | Energy Efficient Lighting | Madison Electric plans to utilize existing lighting expertise to promote and sell energy efficient lighting products, specifically CFL, linear fluorescent and LED lighting products. The focus would be on retrofitting existing "non-efficient" light sources with energy efficient lighting resulting in a 80% reduction in energy consumption. The retrofits would be geared towards residential, commercial and industrial applications. Products would be sold through a deep distribution model in a consultative approach. We would assist and work with the understanding of, and availability for, local, state and federal subsidies which are currently available, including the Federal EPCAC program. Madison county works with several established sales and distribution channels in which they promote various electrical products. In addition, Madison maintains a large inventory of several key manufacturers of energy efficient lighting products who lack the knowledge and expertise to sell these products through an appropriate channel. Madison could save 4 current jobs, as well as add 8 jobs in the first 12 months, with unlimited growth thereafter. | Madison Electric Products, Inc. | 12 | 31 to 90 days | \$750,000 |
| Cuyahoga | Citywide Sewer Cleaning, Televising, and Repair | The sewer system in the City of Bedford, Ohio dates back to 1900. It is speculated that through this program the sanitary and storm sewer systems can be cleaned, inspected and accurately evaluated to determine the condition of the City's sewer system. This project will provide the infrastructural information needed to assess the sewer systems condition and provide needed recommendations for future sewer repair projects. Also included will be catch basin cleaning and other incidentals. | CITY OF BEDFORD | 50 | 0 to 30 days | \$630,000 |
| Cuyahoga | Regional Volunteer/Skill Based Volunteer Network | Keep skills fresh while contributing to their community, Curiosity Hands On Northeast Ohio, in its 2nd year, is doing general volunteer projects for Cuyahoga, Geauga, and Medina Counties but hopes to create, roll out and have a partnership with this program in Cuyahoga, Medina, Lorain, Lake, Geauga and Astabula counties. | Hands On Northeast Ohio | 100's | 0 to 30 days | |
| Cuyahoga | Northfield Road/Hemisphere Way Connector | This project will construct a 172 foot long, two (2) lane bridge over Norfolk/Southern railroad tracks and built a 1000 foot roadway to connect Northfield Road (S.R. to Hemisphere Way (Industrial Parkway). This new bridge and connector road will allow direct access to S.R. 61 and 271. This project will create 16 new jobs. The City of Bedford's major employer and distributor is applying for a permit by providing bridge to their existing facilities along Northfield Road. Trunk Commercial Park (located on Hemisphere Way) will also benefit from the bridge created by this project. It is anticipated that several hundred jobs will be created once the bridge and road are constructed. | CITY OF BEDFORD | 450 | 31 to 90 days | \$1,125,000 |
| Cuyahoga | Employment Supports Initiative | Following the large downturn of the stock market, the Jewish Community Federation (JCF) launched an information and referral phone line as the first line of outreach to individuals in the community who may have been impacted by the economic crisis. Since November 1, 2008, the JCF's Employment Support Initiative has provided support to over 200 job seekers. The majority of individuals calling indicate that "this is the hardest call I have ever had to make" or "I have never needed to call for help before". | Jewish Community Federation of Cleveland | 600 | 0 to 30 days | \$180,000 |
| Cuyahoga | Fitch Road sewer extension to Fitch Intermediate s | This project would extend a sanitary sewer line south down Fitch road from the North Olmsted city line to Fitch Intermediate school. Approximate distance is 1 mile. Fitch Intermediate school presently is not connected to a sanitary sewer line. Rather, all waste products run through onsite filtering system. | Olmsted Falls city schools | 15 | 181 days or more | \$1,000,000 |
| Cuyahoga | STIMULUS- Pure Water Job Creation and Revenue Gen | This school is located in a residential neighborhood and a connection to city sewer would be an improvement in personal safety as overall health of the neighborhood. | Pure Water Technology | 28 | 0 to 30 days | \$165,000 |
| Cuyahoga | Prevention of irreparable financial damage as a res | I submit this summary to request stimulus funds to protect 18 existing jobs and create 8 to 10 immediate jobs and continue to proven bring better results in the Northeast Ohio Drinking Water Sector. Since inception in 2005 Pure Water Technology has helped provide pure drinking water systems (boostered to near 800 connections) in the NE Ohio area. I am employed 18, and provides the #1 drinking water system in the US to business and industry in the 13 county area of NE Ohio. We are expanding \$115,000 in 5 new sales reps and 3 call center reps. This will create over \$700,000 in new revenue and \$270,000 in new wages. \$50,000 will go to hire of service such and operational resources to support growth. This will create jobs, address environmental issue of plastic bottles and dramatically improve drinking water quality to Ohio businesses. | Ohio State Board of Nursing | 50 | 0 to 30 days | \$250,000 |
| Cuyahoga | PoliticalFamilyTree.com | Ohio based companies are making changes to the way they source drinking water to their employees and they cite 4 main reasons for doing so. #10 GREEN - companies are eliminating the use of 5 gallon plastic jugs of water due to the environmental concerns. #11 HEALTHWELLNESS - better water quality (and reorganized) RED RISKS - and SAVE MONEY. | CLP Research | 8 | 31 to 90 days | \$400,000 |
| Cuyahoga | Project Relight | Description: Present the injured worker from financial ruin which places families in severe health, safety, housing, food sufficiency, utility and necessary bills (as a result of bankruptcy of Industrial Commission, lawyers representing company's workers, injured worker being retaliated against for filing Workers Compensation claim and the resulting doctor's visits to disprove what another doctor has already diagnosed and approved. | Trevayne Holdings Corporation | 45 | 91 to 180 days | \$66,000 |
| Cuyahoga | Neighborhood revitalization | The request is for funds to transform a subscription research website into a dynamic educational instrument for libraries, schools, and individuals. 80% of the funds will be allocated for personnel for marketing, research, & technology. Content will range from 1) information about leaders in all walks of American life to 2) impact of their backgrounds/ views on issues and events to 3) audio-visual presentations and videos to 4) an on-line digital journal for educators to publish articles in the field. The ultimate goal is to stimulate thinking about and ideas for improving American government, the economy, and society. Although hardware and software technology will be on the cutting edge of web site animation and graphics, physical assets required are limited. Principally these will be computers, printers etc. in an office. What is most needed are people with specialized knowledge and skills. Marketing, research and technology directors will be assigned to graduate level college students. Increasing operating revenue will create full-time employment opportunities. With the funds, we can hire the people needed to create educational resources of value to brainiacs/futurists. | Father & Son Management Group LLC | 6 | 0 to 30 days | \$75,000 |
| Cuyahoga | Pleasant Valley Road Widening (Brecksville Road to | In order to protect the the current power grid and make it smart, I would like to start in North Royalton and replace all street lamps with high efficiency LED street lamps. Preliminary R/O suggest 19-20 month turn around in the cities reduction in electric cost to light streets, parks, school parking lots, etc. | City of Independence | 20 | 181 days or more | \$2,800,000 |
| Cuyahoga | Hillside Road / Brecksville Road Traffic Signal Up | We would acquire foreclosed, blighted properties within the neighborhood and complete quality repairs to restore the home to its condition prior to being vacated and vandalized. We aim to revitalize 4-6 properties depending on funding. We would employ 6 contractors in rehabbing the homes, then another 3 to manage the properties. We would rent these units to lower income tenants who need quality housing, but cannot afford it. | City of Independence | 5 | 0 to 30 days | \$110,000 |
| Cuyahoga | Chestnut Road Improvements | Adding an additional lane (from 3 lanes to 4 lanes) on Pleasant Valley Road from Brecksville Road (S.R. 21) east approximately one mile to just beyond the existing traffic signal at "Kieker Lighted". Project would include the resurfacing of the existing pavement which is in poor condition (last resurfaced 17 years ago in 1992). Project includes improvements to existing drainage, concrete base repair, curb repair, traffic signal upgrade, and possible utility relocation. The project also includes bringing sidewalks across the Chestnut Road bridge over Interstate 77 (I-77) into compliance with ADA standards for safe sidewalk widths and accessible routes. The road was last resurfaced approximately 20 years ago. | City of Independence | 25 | 31 to 90 days | \$480,000 |
| Cuyahoga | East 248th Street and Shoreview Avenue Sewer, Wate | Replace 1,900' of sanitary sewer, 2,800' of storm sewer, 1,900' of water line, install utility to Lake Erie and 5,100 square feet of pavement | City of Euclid | 21 | 0 to 30 days | \$2,633,600 |
| Cuyahoga | Chagrin Right of Way Acquisition | Resurface 1,900' of sanitary sewer, 2,800' of storm sewer, 1,900' of water line, install utility to Lake Erie and 5,100 square feet of pavement | Village of Woodmere | 200 | 181 days or more | \$2,500,000 |
| Cuyahoga | Dille Road and E. 204th Street Sewer, Water Line, | Purchase of right of way for Chagrin Boulevard widening | City of Euclid | 9 | 0 to 30 days | \$1,900,000 |
| Cuyahoga | SSO Elimination/Bruce Ave. | Replace 2,600' of sanitary sewer, 3,200' of storm sewer, 4,900 square feet of pavement, eliminate cross connections of sewers | City of Euclid | 27 | 91 to 180 days | \$2,732,000 |
| Cuyahoga | Upgrade of Time Keeping HR System | SSO Elimination on Crystal Ave., E. 200 St., Christine Ave., Bruce Ave., - Combined sewer separation, sewer, water line, paving. | Menorah Park Center for Senior Living | 0 | 91 to 180 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Law Enforcement Officers/Retention and New Hire | This project involves the retention of three (3) patrol police officers and the hiring of three (3) new officers. In both cases, they represent full time sworn officer positions. As a result of necessary budget cuts, the Authority has developed a plan to reduce expense during calendar year 2009. This plan includes reducing the transit police positions by three (3) FTE's. This project will assist the Authority in fully safeguarding our human resources, facilities and passengers and will provide funding for salaries and benefits for 3 years. | Greater Cleveland Regional Transit Authority | 6 | 91 to 180 days | \$1,206,000 |
| Cuyahoga | SSO Elimination, Rehabilitation, Water Line and Pa | Sanitary sewer overflow elimination, storm sewer replacement, pavement replacement | City of Euclid | 11 | 31 to 90 days | \$1,172,000 |
| Cuyahoga | E. 190 thru E. 195 Streets | Water line, sewer, pavement replacement. | City of Euclid | 31 | 91 to 180 days | \$3,132,000 |
| Cuyahoga | Rapid Response Program (Preventing & Addressing OI | This proposed initiative will respond to older adults who are facing homelessness with a rapid response team of service providers. The team will be composed of a staff member from the Cleveland Department of Aging, the Office of Homeless Services, mental health and substance abuse program practitioners, medical personnel and a housing provider or advocate. The team will meet with older homeless persons: currently in the shelter system, newly seeking shelter, facing eviction or foreclosure, or referred by EMS, Police, Fire, and through outreach or agency referral. It is estimated that about 12% (approx 980) homeless people who sought shelter in 2008 were 55 years of age and older. The Senior Guest House (SGH), an emergency housing facility in Cleveland provides short term housing to 30-35 seniors each year. As the older adult population surges in these economically challenging years, we expect older adults will seek emergency shelter in unprecedented numbers. | City of Cleveland, Office of Mayor | 3 | 31 to 90 days | \$261,000 |
| Cuyahoga | Nursing Assistant Training Program | Menorah Park Center for Senior Living currently operates a Nursing Assistant Training Program every 5 weeks. The program is 3 weeks long and results in 16 new certified Nursing Assistants able to enter the workforce with a skill that allows them to earn a living very quickly. There is a continuous need for Nursing Assistants within our community. We offer our program free of charge to qualified individuals. Our request is to obtain stimulus money to pay the salaries of our Licensed Nurse Educators and for materials and workbooks for class participants. We are also requesting money to cover the cost of state testing for our participants. | Menorah Park Center for Senior Living | 170 | 0 to 30 days | \$100,000 |
| Cuyahoga | Sustainability/Energy Conservation Program | Programs and projects aimed at reducing energy consumption and increasing energy efficiency in the existing energy program. Programs: Sustainable Transportation to reduce its carbon footprint; Sustainable Energy; Sustainable Planning/Development; and Sustainable Energy. Public Transit enhances the environment and is an important transport mode. Key areas for evaluation and development of sustainable practices are within the core of planning, construction, engineering and operations. A key component of the program is to ensure that future building development contributes to the sustainable economic vitality of the region. This includes but is not limited to the building design and engineering efforts to install solar panels on the Cleveland Transit Authority's fleet. The program also includes energy audits and energy conservation measures. A previously conducted an energy study that identified many cost savings that could be quickly implemented. These funds will allow OCTA to expedite energy savings throughout the transit authority in areas identified in the study as well as ensure that new developments are designed to be energy efficient. | Greater Cleveland Regional Transit Authority | 6 | 91 to 180 days | \$300,000 |
| Cuyahoga | E. 248 Street & Shoreview | Sewer, water line, pavement replacement. | City of Euclid | 21 | 31 to 90 days | \$2,633,600 |
| Cuyahoga | E. 214th St. - Sewer, Water Line, Pavement Replace | The replacement of 2,367' of sanitary sewer, 2,400' of storm sewer, 2400' of water line, 6,800 square feet of pavement | City of Euclid | 16 | 0 to 30 days | \$2,556,000 |
| Cuyahoga | E. 264 Street | SSO elimination, rehabilitation, water line and paving improvements. | City of Euclid | 11 | 31 to 90 days | \$1,172,000 |
| Cuyahoga | Transit Security Communications Infrastructure | This investment will provide the foundation for security and emergency communications for our multi-modal transit system and key operations assets as identified through our Threat and Vulnerability Analysis. This investment will elevate security of our OCTA system-wide with emphasis on rail critical infrastructure and reduce the risk of catastrophic events and the associated economic impacts of those events. This investment is planned in coordination with Cuyahoga County Government and the City of Cleveland. The project will include the purchase of Responders and Emergency Management of both local governments as well as the Transportation Security Administration at the Cleveland Hopkins International Airport. Mutual assistance agreements will be signed between the OCTA and the City of Cleveland and Cuyahoga County. The project will add a 3rd lane to 2900 feet long Golden Oak Boulevard and a 400 feet access road to undeveloped property which will allow for the expansion of an existing office/warehouse building currently occupied by high tech facilities. and disabled adult home owners. This assistance is currently not available or demand exceeds capacity. This pilot could be a model for a national home maintenance and repair program for low income senior citizens and disabled adults which allows them to stay in community". According to NAEP statistics, 80% of seniors report that they were to continue to live where they are, at home. This project will assist approximately 600 low income seniors with home maintenance projects. Outcomes and results are as follows: • Outfit repair and gutter cleaning- 500 clients • Tree removal- 50 clients • Tarps on roofs awaiting repairs to prevent further damage- 25 clients • Home repair for houses- could include roof repair, major electrical or plumbing work, ramps and wheel chair lifts, porch repair, window installation, door installation, water or gas line replacement. 20 clients Department of Aging would identify and qualify clients for service. The Department of Community Development would engage contractors to provide these eighty clients include: | Greater Cleveland Regional Transit Authority | 30 | 91 to 180 days | \$1,524,217 |
| Cuyahoga | Golden Oak Widening | The project will add a 3rd lane to 2900 feet long Golden Oak Boulevard and a 400 feet access road to undeveloped property which will allow for the expansion of an existing office/warehouse building currently occupied by high tech facilities. and disabled adult home owners. | Cuyahoga | Supportive Housing | Zachabaus Housing Solutions helps 42 homeless households annually. Based on the best practice Transition to Place, the client chooses his own housing. A client lives in a neighborhood he determines is best for his family's needs regarding transportation, employment, social support, children's schooling, upon completion of the program, the client is home. Zachabaus incorporates Housing First, where one first helps the homeless individual find housing, and then they address additional issues or concerns that will help them maintain housing. HSSC has a Case Management Team, 2 Case Managers (CM), Life Skills Trainer, Youth CM, Intake/Leasing Specialist (ILS), Family Violence Specialist, and a CM Supervisor. After working with the ILS, the client meets with the trainer CM to develop an individualized case plan for self-sufficiency. CMs meet with residents at a minimum weekly to help identify and prioritize needs, connect clients to services, and discuss progress with the case plan. CMs will refer residents to job training programs, community college classes, GED sessions, or employment opportunities. Support groups and personal professional counseling help residents. The project consists of concrete joint and base repairs to be followed by the asphalt resurfacing for an approximately 1.5 mile section of Rockside Road from Broadway Avenue to westerns corporation line with Garfield Heights. | West Side Catholic Center | 0 | 0 to 30 days | \$150,000 |
| Cuyahoga | Rockside Road Reconstruction | The project consists of concrete joint and base repairs to be followed by the asphalt resurfacing for an approximately 1.5 mile section of Rockside Road from Broadway Avenue to westerns corporation line with Garfield Heights. The Electronic Records Project will convert paper based client records to electronic in the client records. In the last decade the Achievement Centers has had a 300% increase in clients served. Our services contracts are funding sources have become much more competitive and over 60% of our clients receive multiple services which makes paper files outdated and cumbersome. This project will allow us to operate more efficiently, improve our ability to collect accurate client information, and improve our ability to track trends for quality assurance and research purposes. Electronic records will provide immediate staff access to client records, enhance HIPAA compliance, be more environmentally sensitive by eliminating the printing of over 500 forms and eliminating paper file storage requirements. Funds will purchase computer hardware and software, cover staff time to implement and update computer files, and other related project needs. Ultimately, this project will result in better service and outcomes for the over 3,500 children with a wide range of disabilities and their families we help each year. TIM program will assess in retaining experienced and less experienced personnel positions which will help in generating new employment opportunities and/or retaining current jobs. This program will include training and technical assistance modules to help educate companies on new technologies and energy efficiency market strategies. | City of Maple Heights | 40 | 181 days or more | \$1,800,000 |

| Cuyahoga | Mayor's Office of Equal Opportunity | The core expected outcome of the program is that existing local businesses will be included in Stimulus opportunity and have the support services needed to understand expectations and grow overall employment in our area. Additionally, new local businesses will be provided support to start and grow their business. 500+ companies registered as local businesses will be encouraged to secure new contracts to install energy efficient furnaces, windows & doors for the weatherization program; this will ensure that they are properly registered etc and can participate in the different projects as businesses. | City of Cleveland, Office of Mayor | 250 | 0 to 30 days | \$132,000,000 |
| Cuyahoga | Feeding Cleveland's kids | In the current economy, helping improve access to healthy meals for children in need is of critical importance. The Child and Adult Care Food Program (CACFP) helps ensure that low-income children receive nutritionally balanced meals and snacks throughout and during the summer months. In Cleveland, just a small number of community organizations work to coordinate CACFP meals at a limited amount of feeding sites. A lack of awareness about the availability of CACFP meals compounds the issue of availability. "Feed Cleveland's Kids" would expand CACFP to children ages 5-11 who attend after-school and summer programs located in Cleveland, improving academic performance, reducing childhood hunger and intervening on a growing trend of childhood obesity related to poor nutrition. Technical assistance will be provided to establish sustainable programs that leverage USDA reimbursement dollars in the local economy. "Feed Cleveland's Kids" will work with the Cleveland Department of Recreation, City of Cleveland Library, and various faith-based and community organizations to increase the number of CACFP sponsors and sites and promote program. | Children's Hunger Alliance | 15 | 31 to 90 days | \$315,000 |
| Cuyahoga | Rockside Road/Crossview Road Improvements Project | This proposed infrastructure project provides the required traffic flow upgrades (current ADT 15,148 to projected ADT 30,960) in the anticipation of construction of the \$600 million Seneca Hill development which is a 75-acre complex featuring 400,000 SF office space, 200 residential units, 1 million SF high-end retail space, 125,000 SF retail & other commercial space. In aggregate, the project consists of 4,275 LF of roadway (including a 400' long access lane) to accommodate the projected ADT, 26,960 SF sidewalk, 1,700 FT wheelchair replacement, 1,700 FT stormwater upgrades, 4,200 FT curb & ADA improvements. The project includes reducing the high number of traffic accidents, congestion & operations issues through incorporation of an existing 60-dog dog draw (abandoned intersection) at Rockside and Crossview to a safer 80-dog dog abandoning existing open-pit drainage with existing structure. The Developer and City have reached an agreement a majority of the development property has been purchased, & all necessary development government permits have been obtained. This project will stimulate Cuyahoga Co. by providing jobs and is the foundation needed to jump start the Seneca Hill Development. | City of Seven Hills | 1500 | 181 days or more | \$9,917,188 |
| Cuyahoga | e.214 | replace sanitary and storm sewer, waterline and pavement | city of euclid | 14 | 0 to 30 days | \$2,556,000 |
| Cuyahoga | Small Business Working Capital Loan Program | Given the market and the fact that Banks have cut lines of credit to manufacturers who need to fill orders. This allows companies to draw additional working capital funds and the improved access to capital funds and the improved access to capital saves jobs and allows manufacturers to fill their goods. This will allow for the expansion of the existing Ex-offender/ Re-entry programs, including PROES, Operation Focus and Get-on-Track. The project includes a four-week intensive Life Management and Job Readiness program including job search assistance. Additional funds will allow for the expansion of program services (e.g. a waiting list for participation), supportive services and will provide the opportunity to offer incentives to employers who hire ex-offenders. Project cost include funds that will be utilized as On-the-job training wages. Employers will be reimbursed wages paid to newly hired ex-offenders. Outcomes include: Providing job readiness services to 800 ex-offenders Placing 300 in subsidized employment. | City of Cleveland, Office of Mayor | 250 | 0 to 30 days | \$3,000,000 |

| Cuyahoga | Hogsback Lane | Hogsback Lane is the main entrance to the Rocky River Reservation and stands in disrepair. The Cities of Cleveland and Lakewood, along with Karam's Corners Development Corporation, the Cleveland City Planning Commission, and the Cleveland Metropolitan engaged Bohne Associates to perform an access study to be completed in March 2007. The study, "Opportunities to Bold Alternatives to Transportation for Hogsback Reservation," can be located at www.karamcorners.com. The major complication for moving forward has continually been the jurisdictional issues and corresponding prioritization of resources. Again, both the City of Cleveland, the City of Lakewood, as well as the Metropolitan would proportionally benefit from the reconstruction of Hogsback Lane. | Cleveland City Council | 40 | 91 to 180 days | \$3,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Emergency Shelter | The Women and Children's Shelter provides a full range of transitional services that assist women and their children in moving from homelessness to stable housing and employment. The Crisis Intervention Program provides stable and nurturing place to live with nutritious meals for 32 women and children. The RISE Program allows each woman to work directly with a Case Manager to develop her individualized plan for Residency stability, permanent income, self-development, and education training. In the Youth Advisory Program, staff works with the children and their mothers to address each child's unique needs, collaborating with other social agencies, medical professionals, and educators to provide a multifaceted approach to help heal spirit, mind, and body. Our Aftercare Program provides an assurance of success for those who leave the Shelter through rental and utility assistance, continued counseling and participation in all Shelter programming for one year. | West Side Catholic Center | 0 | 0 to 30 days | \$10,000 |
| Cuyahoga | Army Corp of Engineers Section 205 Flood Study (In | Army Corp of Engineer sanctioned flood study of the Cuyahoga River in Independence and Valley View in order to identify and target projects to minimize future flood damage to residences and businesses. This project is multi-jurisdictional, with funding support from the ACOE, County agencies, municipalities, and political support from state representatives. | City of Independence | 20 | 181 days or more | \$1,300,000 |
| Cuyahoga | Gsh Solar Tubing Project | The project is multi-jurisdictional, with funding support from the ACOE, County agencies, municipalities, and political support from state representatives. The project will involve the installation of solar panels on the roof of the Gsh Solar Tubing Project. The project will involve the installation of solar panels on the roof of the Gsh Solar Tubing Project. The project will involve the installation of solar panels on the roof of the Gsh Solar Tubing Project. | Ed Industries | 25 | 0 to 30 days | \$450,000 |
| Cuyahoga | Identification Crisis Collaborative | For the homeless and working poor, getting official identification, Birth Certificates (BCs) and State Identification Cards (State ID), is filled with many obstacles. The Identification Crisis in Cleveland Collaborative (the ICC) has been assisting with this need for many years. All participating agencies - Care Alliance, Church of God in Christ, Community Women's Shelter, Lutheran Metropolitan Ministries, Northeast Ohio Coalition for the Homeless, Project Save, St. Columba Church, St. Malachi Center, The Heights Parent Center and the West Side Catholic Center - have volunteers who locate the appropriate government office that issues BCs or State IDs and take the client off all necessary paperwork. The ICC pays for the fees associated with these documents. A part-time employee of the ICC maintains all the financial and statistical records. The Identification Crisis Advocates research systemic changes to simplify these processes, increase awareness within the community, works with governmental agencies to provide easier access to these required documents, and identifies national trends. We respectfully request assistance to continue this program. | Identification Crisis Collaborative (IDCC) | 0 | 0 to 30 days | \$25,000 |
| Cuyahoga | High School Roof Replacement in sections | Currently Strongsville High School has multiple sections of roof area. There are two areas that are a 1987 EPDM overlay of a built-up roof. The current areas are experiencing an extraordinary number of leaks due to seam separation and pull away from splice areas and building vents. There is a total area of 271 squares of roof that need to be removed and replaced. Again trying to maintain a dry building with this situation is very difficult and there has been some experience with black mold in a couple of areas that need to be abated. In addition we have several employees that are claiming irritation to an allergic condition as well as and allergic reaction to mold spores in the air. With the replacement of these sections of roof the district will reduce the potential of unbalanced mold growth in the building. | Strongsville City Schools | 15 | 31 to 90 days | \$490,000 |
| Cuyahoga | Dalepoint Road Storm Sewer Replacement | This project includes the replacement of the existing storm sewers on Dalepoint Road that are completely deteriorated, clogged, and non-functional which causes periodic roadway and basement flooding in the neighborhood. The project would include 250 feet of 18-inch storm sewer, 95 feet of 15-inch storm sewer, 60 feet of 12-inch storm sewer, 21 catch basins and manholes replacements, and 600 feet of 24-inch storm sewer connection replacement. | City of Independence | 10 | 0 to 30 days | \$340,000 |
| Cuyahoga | Wade Oval Reconfiguration | This funding will allow for the reconfiguration of two intersections at Wade Oval Drive, Juniper Road and Ford Road to improve traffic circulation and pedestrian crossing. | City of Cleveland, Office of Mayor | 24 | 181 days or more | \$500,000 |
| Cuyahoga | Lakefront Connector Bridge | The Lakeland Connector Bridge will connect the west bank of the Flats with Wendy Park in Cleveland, Ohio. As noted in the Comprehensive Economic Development Strategy, Cleveland's tax base is declining, resulting in concentrated poverty, blighted buildings and vacant lots. The unemployment rate is above the national average, per capita income is 80 percent or less of the national average. The Bridge will revitalize this downtown area and make private land in the Flats more valuable because of the increased foot traffic and access to enjoy Wendy Park on Lake Erie. The Bridge will also complete a planned new 800,000 sq ft office building which will seek LEED-ND certification. Further, the Bridge will serve people from throughout the MSA and the surrounding areas because it will connect to the Ohio & Erie Canal Trench Trail, bringing tens of thousands of people through the Flats. | Cuyahoga County Planning Commission | 750 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | East 105th & Martin Luther King Drive Traffic Circ | Private developer, the M&D Group will build 100,000 new square feet of office space attracting an estimated 500 new jobs and 250-300 temporary construction jobs only if this bridge is built. | City of Cleveland, Office of Mayor | 190 | 91 to 180 days | \$4,000,000 |
| Cuyahoga | Lower Brookside Improvements | This funding will allow for the reconfiguration of a traffic circle for pedestrian safety and traffic improvement into and out of University Circle. | City of Independence | 30 | 91 to 180 days | \$1,680,000 |
| Cuyahoga | Fleet Avenue Streetscape | Construction of these necessary improvements would resolve numerous problems to the health, safety and welfare of Independence residents. The project would replace existing 4,000 linear feet of 18-inch water main, 1000 linear feet of 12-inch water main, and 1000 linear feet of 12-inch sewer, including the construction of a 2.5-acre detention water quality pond to help store and treat upstream urban runoff to minimize flooding and water quality degradation downstream and for the residents on Brookside Road and for the Cuyahoga Valley National Park area. | City of Cleveland, Office of Mayor | 357 | 181 days or more | \$7,600,000 |
| Cuyahoga | Substance Abuse Education - Reducing the Demand | This funding will allow the City to reconstruct Fleet Avenue in the Slavic Village Commercial District to provide multi-modal street access through the inclusion of a dedicated bicycle lane and enhanced pedestrian facilities. We will produce and give presentations, and supply speakers for school assemblies and community groups. | Drug Awareness and Prevention Inc. | 6 | 0 to 30 days | \$500,000 |
| Cuyahoga | Avenue District Phase II | Our interactive website will not only educate, but also allow for a state-wide discussion on our forum-involving citizens in the search for solutions. | City of Cleveland, Office of Mayor | 44 | 31 to 90 days | \$7,000,000 |
| Cuyahoga | Convention Center Floor | Our goal with these activities is to educate children and adults about the medicaleconomic costs of substance abuse addiction, and the effects of heroin and cocaine addiction and distribution. We expect to reach 300 community groups in the first year. We also expect to attract at least 50 unique viewers per day to our website. | I-X Center Corporation | 25 | 31 to 90 days | \$780,000 |
| Cuyahoga | Albion Roof Replacement | Evidence of our success will be seen in the reduced demand for illegal drugs. This funding will allow the City to construct streetclosing enhancements to support mixed-use new construction development in downtown Cleveland, averaging a multi-million dollar project. | Strongsville City Schools | 15 | 31 to 90 days | \$891,000 |
| Cuyahoga | South Hall Entrance | Using recycling materials, install a decorative flooring system over existing concrete on a 125,000 square foot area of publicly owned convention center, which will eliminate the annual use and disposal of petroleum based carpet products. | I-X Center Corporation | 25 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Heated Air Curtain Project | The original roofs were 1968 1973 and 1977 vintage. They were roofed over in 1987 with EPDM membrane. The current roof has had seam separation and drain and vent pull away that require continual repair and excessive water infiltration into the building. This creates a very labor intensive moisture removal process from the capnet floor covering on a very regular basis. The project would require the removal and replacement of 870 squares of roof and the repair or replacement of damaged duct to meet building code. The health and safety of a 2nd floor roof on an otherwise very sound building. Again a district with 14 buildings and all having roofs of similar age the financial means is just not available to do what need to be done. | I-X Center Corporation | 10 | 31 to 90 days | \$125,000 |
| Cuyahoga | Parking Lot Lighting | Construction of a new public entrance to the South Hall of a publicly owned convention center, which shall include a public vestibule, box office, and customer service center. | I-X Center Corporation | 20 | 31 to 90 days | \$280,000 |
| Cuyahoga | Moreland Theater | The purchase and installation of heated air curtain units to be located over three drive-in truck doors to a publicly owned convention center resulting in 30% less heat loss during the winter months. | Ubiquitous Design, Ltd | 55 | 0 to 30 days | \$8,500,000 |
| Cuyahoga | Acorn Drive Extension (New Access to I-77 Southbou | Replacement of 44 existing light poles that utilize energy inefficient 400 watt high pressure sodium bulbs with 14 new light poles that utilize 100 watt energy efficient metal halide bulbs, resulting in a 25% decrease in energy usage. | City of Independence | 1000 | 181 days or more | \$5,000,000 |
| Cuyahoga | CCBMR/DD Parking Lot Expansion/2 sites | Use a 1,206-seat move-invisible theater, including an orchestra and a 10ft. 40' proscenium, for the restoration. The theater is a hidden treasure in the neighborhood yet to be unveiled. BADC purchased the theater in 2007 and is currently working on the restoration. The theater is a catalyst to strengthen the cultural aspect of the Buckeye neighborhood. It is also a vital component of the Buckeye Arts and Cultural District along Buckeye Road. | Cuyahoga County Board of Mental Retardation/DD | 10 | 181 days or more | \$500,000 |
| Cuyahoga | Roof Top Solar Panels | In addition to housing plays, cultural events, banquets and conferences, the theater would open doors to exhibit the local talents that are displayed annually through Great Day of Buckeye festival that draws 15,000 people each year and would serve as a venue to host plays, musical arts festival, jazz & blues concert. BADC is currently working towards a complete historic restoration of the Moreland Theater. The successful restoration of the project is expected to create approximately 55 jobs in the neighborhood and have a permanent stage to display local talents and a venue to promote culture. | I-X Center Corporation | 50 | 91 to 180 days | \$4,500,000 |
| Cuyahoga | CCBMR/DD Space Renovation/DC | This project includes the extension of existing Acorn Drive/located in the northwest quadrant of the City/abutting approximately 1000 feet with a proposed two or three lane, concrete roadway, including all infrastructure improvements, along with the construction of a new access point to I-77 southbound. This project would alleviate a major current and future traffic congestion issue on Rockside Road at the I-77 interchange. This project would open up approximately 30 acres of land to development commercial office/research development and the potential of an estimated 1000 new jobs. | Cuyahoga County Board of Mental Retardation/DD | 12 | 181 days or more | \$650,000 |
| Cuyahoga | Replace Allen Elementary Building | Parking lot expansion expansion at the Parma Development Center and the Forest Hill Center. | Strongsville City Schools | 30 | 181 days or more | \$19,000,000 |
| Cuyahoga | CCBMR/DD Building Generators | Purchase and installation of 2 mega watts of roof top mounted solar panels to be mounted on publicly owned convention center. | Cuyahoga County Board of Mental Retardation/DD | 10 | 181 days or more | \$500,000 |
| Cuyahoga | CCBMR/DD Structural Lintel Repair/AAC | Space renovation - 2nd floor for 70 offices at the Parma Development Center. | Cuyahoga County Board of Mental Retardation/DD | 5 | 181 days or more | \$215,000 |
| Cuyahoga | Parking Lot Repaving | Allen Elementary was built in 1959 with an addition in 1977. The current facility is beyond economic repair and it is totally inadequate for meeting the educational needs of today's students. The exterior facade (brick) is deteriorating very rapidly, the aluminum exterior curtain walls are deteriorated to a condition that jeopardizes the security of the building and the Guard Chapel of the central entrance door is way out dated for today's educational techniques. To upgrade the shell structure and reduce the interior for today's needs for access to two levels of classroom cost that is used by the CDE. The current replacement contains energy save to allow for the building of a new 100,000 sq ft student Elementary building while occupying the current facility. Due to all the financial demands that the District has and the poor economic conditions in the world, nation, state and Northeast Ohio placing a bond before the voters is not a realistic means of carrying out this project. Funding the project through the stimulus package would create local jobs for the area. | I-X Center Corporation | 25 | 31 to 90 days | \$2,250,000 |
| Cuyahoga | CCBMR/DD Electrical Motor Control Center/DC | Building generators replaced at multiple Board sites. | Cuyahoga County Board of Mental Retardation/DD | 5 | 181 days or more | \$200,000 |
| Cuyahoga | CCBMR/DD Exterior Siding Repair/AAC | Repair structural lintel system at the Southwest Adult Activities Center. | Cuyahoga County Board of Mental Retardation/DD | 5 | 181 days or more | \$325,000 |
| Cuyahoga | CCBMR/DD Expansion Roof Replacement at AAC | Repairing of surface 700,000 square feet of parking lots at publicly owned convention center in an environmentally friendly manner by means of recycling existing asphalt. | Cuyahoga County Board of Mental Retardation/DD | 5 | 181 days or more | \$325,000 |
| Cuyahoga | "Green Energy + Ohio Conservation Clearinghouse We | Replace electrical motor control center at the Green Road Development Center. | The FitzGerald Group Inc. | 3 | 31 to 90 days | \$62,000 |
| Cuyahoga | CCBMR/DD Roof Replacement at DC's | Exterior siding repairs at the East Cleveland Adult Activities Center. | Cuyahoga County Board of Mental Retardation/DD | 20 | 181 days or more | \$1,175,000 |
| Cuyahoga | CCBMR/DD Boiler Replacement-WPDECC | Replacement of expansion roof at the Parma Adult Activities Center. | Cuyahoga County Board of Mental Retardation/DD | 2 | 181 days or more | \$75,000 |
| Cuyahoga | Rockside Place/Rockside Woods Sanitary Sewer Rehab | The expected outcome is a daily updated online clearinghouse for Ohio citizens, in and out of state consumers, businesses, media, researchers and educators that encourages wise efficient use of energy and environmental conservation by promoting the sale, purchase and use of greener alternatives to Ohio. To our knowledge, this would be the first such online resource updated professionally and daily to benefit Ohio's citizens and businesses that would also be marketed aggressively to achieve unlimited, unrealized benefits and to speed up consumer awareness especially through, and beyond to attract buyers in Ohio seeking of greener alternatives. | City of Independence | 10 | 91 to 180 days | \$500,000 |
| Cuyahoga | Air Conditioning of Main Exhibit Hall | Roof replacement at the William Patrick Day Early Childhood Center. | I-X Center Corporation | 40 | 31 to 90 days | \$2,750,000 |
| Cuyahoga | CCBMR/DD AAC Road Installation | Project would include 1000 feet of after new directionally drilled/10-inch sanitary sewer under 17 ft of the natural subsurface of the existing 1000-foot segment of 8-inch sanitary sewer with one or two additional (new) manholes installed on the run (in CDDOT 177 Right-of-Way). Project is necessitated by recent history of back-ups and sewage discharges. | Cuyahoga County Board of Mental Retardation/DD | 5 | 181 days or more | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Section 8 Housing Upgrade | Plan to buy, fully renovate, and rent 10-30 of the many residential units in Cleveland and East Cleveland that have been vacated by property owners and are now boarded up. I will rent all units to Section 8 tenants (CHRA). I currently own two properties and understand what it takes to renovate and rent to CHRA tenants. I am already willing to turn from LLC or S-Corp if it is a requirement in receiving funding. | Sole proprietor | 15 | 31 to 90 days | \$150,000 |
| Cuyahoga | CCBMR/DD Group Home Sprinkler Replacement | Replacement of sprinkler system at 5 group home locations. | Cuyahoga County Board of Mental Retardation/DD | 5 | 181 days or more | \$250,000 |
| Cuyahoga | Facility Insulation Project | Insulation of 1,000,000 square foot convention center to reduce energy consumption. | I-X Center Corporation | 10 | 31 to 90 days | \$125,000 |
| Cuyahoga | CCBMR/DD Group Home Basement Waterproofing | Waterproof the basement at 1 group home location. | Cuyahoga County Board of Mental Retardation/DD | 2 | 181 days or more | \$15,000 |
| Cuyahoga | CCBMR/DD Group Home Interior Painting | Interior painting at 5 group home locations. | Cuyahoga County Board of Mental Retardation/DD | 2 | 181 days or more | \$60,000 |
| Cuyahoga | CCBMR/DD Group Home Concrete Driveways & Parking | Replacement of concrete driveway & parking at 2 group home locations. | Cuyahoga County Board of Mental Retardation/DD | 2 | 181 days or more | \$19,000 |
| Cuyahoga | Moving of College Bookstore to Shaker Heights local | John Carroll University wants to relocate its bookstores so that more of the community can access the store. There is currently vacant space in a retail center at Fairmount Circle that is being considered as the location. The community would be able to utilize the bookstores, which would also have an inviting, relaxing atmosphere (possibly a coffee shop). The store would no longer be in the current location, which would allow the current space, which has been vacant for many months. The City of Shaker Heights is also in support of this project. | John Carroll University | 25 | 0 to 30 days | \$562,500 |
| Cuyahoga | CCBMR/DD Group Home Asphalt Driveways & Parking | Replace/surface driveways at 6 group home locations. | Cuyahoga County Board of Mental Retardation/DD | 2 | 181 days or more | \$54,000 |
| Cuyahoga | CCBMR/DD Group Home Emergency Exit/Sidewalks/Ramp | Replacement or installation of 15 emergency extradiweways or ramps at various group home locations. | Cuyahoga County Board of Mental Retardation/DD | 2 | 181 days or more | \$97,000 |
| Cuyahoga | Towne Center Loop | Broadview Road and Route 82 has long been thought of as the center of town in Broadview Heights. The southwest corner of the intersection has a big road. Towne Center Drive, which has spurred economic development. The project would extend the loop across Broadview Road and loop north to route 82 at Services Blvd. The loop, in conjunction with a master retention basin, will open up an integral part of Broadview Heights for a mix of office and retail development. Developers along the loop will be able to tie to the Master Retention Basin without having to do their own storm water retention. This will make this intersection appealing to the type of development that the residents of southern Cuyahoga County have been long requesting. The office development will provide the community needed jobs and income, and the retail development will support the residential growth that the City and area have seen over the past three years. | City of Broadview Heights | 700 | 181 days or more | \$2,220,000 |
| Cuyahoga | Advanced Workforce Development Partnership | The Partnership is an aggressive approach to combining core skill training/online content delivery with the new "hybrid" model of U.S. DOL apprenticeship training. The partnership expects to reduce the time to develop workers to an "expert" level and lower training costs. Employees will benefit from a significant increase in work quality, quantity, income, and career "ladder" and productivity. Workers will receive a Certificate of Job Mastery, Certificate of Completion for core skill development, and a portfolio detailing the attained skills. Portfolios will be submitted under registered apprenticeship programs and for higher level academic credentialing. Up to 800 workers in 14 already identified companies will be affected. The training targets new workers, dislocated workers, disadvantaged workers, and youth and adult apprentices in both union and non-union environments. The WVB will be used for coordinating program candidate pre-training, pre-apprenticeship assistance, and placement. Incumbent workers will participate in training, closing skill gaps to reach the same achievable credentials. | Polaris/Career Center | 800 | 0 to 30 days | \$1,119,000 |
| Cuyahoga | Derbyshire Drive Rehabilitation | The Derbyshire Drive Rehabilitation project consists of the following: milling of asphalt pavement, repair of concrete base, curb and gutter replacement, drainage repairs and asphalt surfacing. The roadway serves as a major north/south residential route in the Village and is in very poor condition. The existing curb and gutter requires repairs, including possible water to the pavement subsides, further repaving the pavement. The subsurface concrete curb and gutter also allows for the introduction of stormwater into the base. The storm sewer system is also in poor condition. In addition, the existing sewer service line, resulting in the intrusion of storm water into the sanitary system in large scale events. Large events include, but are not limited to, sanitary flows into fresh water carriers. This is a condition that the OHCEPA has mandated be corrected throughout the state. | Village of North Randall | 75 | 31 to 90 days | \$1,400,000 |
| Cuyahoga | Traffic Signal Improvement Project, Phase 2 - Detr | Replace signal system along Detroit Avenue in Lakewood between Arthur and Colchester to mitigate congestion and reduce pollution. | City of Lakewood, Department of Public Works | 20 | 31 to 90 days | \$2,426,775 |
| Cuyahoga | ADA Improvements on Campus | The University is in need of ADA improvements on campus, including wheelchair accessible restrooms, elevators, and ADA apartment suites in off campus but JCU owned apartments (\$5m). | John Carroll University | 75 | 31 to 90 days | \$2,400,000 |
| Cuyahoga | CCBMR/DD Group Home roof replacement | Replacement of roof on 2 CCBMR/DD Group Home locations. | Cuyahoga County Board of Mental Retardation/DD | 10 | 181 days or more | \$489,000 |
| Cuyahoga | Development of a Decision Support System to Evaluate | NOAA is developing a ECR (Ecosystem Resilience) program to provide a decision support system on environmental sustainability assessment over the project outlined in the American Recovery and Reinvestment Act. The use of this project will be a decision support system that will (1) quantify environmental benefits (including a detailed cost/benefit analysis) from changes in energy consumption through conservation efforts and potential changes in the energy portfolio such as integration of wind, solar, bio-fuels, nuclear and clean coal technologies and (2) evaluate the environmental impact of changes in transportation infrastructure, including mass transit. The research program includes the development of an air quality related IT infrastructure that will integrate disparate data resources such as modeling results, economic impacts, monitoring data, and emissions inventories to provide support for government agencies and the private and public sector as they address air quality related issues. | Ohio University | 10,000 | 0 to 30 days | \$400,000 |
| Cuyahoga | Bus Guard | Install bus and student tracking with a unique identifier. Broadcasts to parents of students riding the school buses. | N/A | 10 | 91 to 180 days | \$310,000 |
| Cuyahoga | Traffic Signal Improvement Project, Phase 1 - Cliff | Replace signal system along the length of Cliffon Boulevard within the City of Lakewood from Lake Road to W. 117th Street to mitigate congestion and reduce pollution. | City of Lakewood, Department of Public Works | 20 | 31 to 90 days | \$2,099,500 |
| Cuyahoga | Campus Security Upgrades | These funds would assist John Carroll University with general security upgrades on campus, including installation of security card access on all campus doors (\$1m), addition of campus lighting to increase energy efficiency and security on campus (\$5.5m), installing an emergency alert system (\$250K) and conducting a feasibility study for regional disaster planning (\$40K) with neighboring municipalities and colleges. These important projects are ready to go but have been held due to the need to prepare funding for other postponed-namely financial aid. Retail Program is a partnership with three's national retail chains: CVS, JC Penney, and TJ Maxx. Based on Y.O.U. work to date with these partners, we plan to expand on this and add more chains. RETAIL program grows out of successful School-to-Career initiative, focusing on career pathway in retail industry. Y.O.U. has worked closely with managers and is successfully placing youth employees get customer focused employees, learning turnover and training costs. We will recruit youth ages 16-19 pre-screen for aptitude/commitment, provide 60-hour curriculum by National Retail Federation Foundation Sales and Service Learning Program, and administrative on-site staff. Youth who pass an nationally recognized credential in customer service. About half get credential, but even those without it have an edge in hiring. Six Y.O.U. staff are certified to teach curriculum; two are certified to lead. Employment Specialist services and administrative on-site staff. Youth who pass an educational environment, 70% of those placed in long term job complete 90+ days, 90% of those placed in short term job complete it, 85% of those in grades 9-11 advance to next grade, 85% of seniors earn HS diploma. | John Carroll University | 80 | 0 to 30 days | \$2,330,000 |
| Cuyahoga | Retail Program | Retail Program is a partnership with three's national retail chains: CVS, JC Penney, and TJ Maxx. Based on Y.O.U. work to date with these partners, we plan to expand on this and add more chains. RETAIL program grows out of successful School-to-Career initiative, focusing on career pathway in retail industry. Y.O.U. has worked closely with managers and is successfully placing youth employees get customer focused employees, learning turnover and training costs. We will recruit youth ages 16-19 pre-screen for aptitude/commitment, provide 60-hour curriculum by National Retail Federation Foundation Sales and Service Learning Program, and administrative on-site staff. | Cuyahoga | Photographic Documentation | The state will need a photographer to document and capture the programs, progress and overall excitement the stimulus package will bring to Ohio. My above selection of "Infrastructure" was picked in lieu of a "general" selection. My background consists of a Major in Photography from Ohio University, so I feel I am qualified to assume the responsibilities of this assignment. Thank you very much, Frank Zhan | NA | 100 | 0 to 30 days | \$500,000 |
| Cuyahoga | Energy Saving Ceiling Fans | The purchase and installation of 15 ceiling fan units for installation in a 1,000,000 square foot convention center, which will result in a 15-20% reduction in natural gas usage. | I-X Center Corporation | 10 | 0 to 30 days | \$150,000 |
| Cuyahoga | FUNDamentals Child Care Center Expansion | A 2200 square foot expansion of our existing licensed child care center would allow for 2 additional classrooms, multi-purpose (large motor skill) room and the ability to serve 20 more families who are currently on a waiting list for care. The center allows parents to continue to work, while still child in the care of our center. The Center has applied for its 3rd star in Ohio's Step up to Quality Program. The project includes 3 new teaching rooms, one additional housekeeping staff member and will employ data preparation and construction aides. In addition to the 20 families who will be able to maintain employment once daycare is secured for their child. Menorah Park Center for Senior Living, one of the largest nonprofit senior care providers in Ohio, a campus with 4 buildings including Ohio's largest nursing home (560 beds). Problem: Insufficient parking for over 1,300 staff, hundreds of volunteers, outpatient clients, and visitors. Often, especially in winter when allowed snow piles reduce available spaces, cars circle and someone leaves. Many elderly visitors and clients must use spaces in distant lots, and have much trouble walking to the main entrance. | Menorah Park Center for Senior Living | 100 | 0 to 30 days | \$535,000 |
| Cuyahoga | Parking Deck | Traffic engineers noted that at peak times, 60 more spaces are required. An architect specializing in parking deck construction concluded it is possible to construct a concrete deck providing 110 new spaces close to our main entrance, eliminating the problem of trail visitors parking far away. The architectural firm has conceptual plans for the covered parking deck which would fix current parking problems and enhance traffic flow. Cost: \$1.5 million. Construction to be completed: 6-8 months. | Menorah Park Center for Senior Living | 50 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | Old Rockside Road / Rockside Road New Intersection | Project would include the demolition of the existing Old Rockside Road Bridge over the Cuyahoga River and the construction of a new intersection between Old Rockside Road and Rockside Road West of the Cuyahoga River. The project would resolve a number of public safety issues, one being the deteriorated critical condition of the structure which has been "C" unsafe for another being the emergency egresses the business district during frequent flood events of the Cuyahoga River that in essence isolate individuals and businesses from safety forces. The project includes a brand new signalized intersection along with emergency infrastructure upgrades on Old Rockside Road including 946 feet of roadway reconstruction, 900-feet of new 8-inch water main, and 2,500-foot of new storm sewers. This project has secured a minor amount of funding commitment from the Cuyahoga Emergency Management Agency in the amount of \$50,000. | City of Independence | 30 | 181 days or more | \$2,400,000 |
| Cuyahoga | Old Science Center Demolition and creation of gree | This project would allow for the demolition of the old science building (Babson Science Center) which is energy inefficient and not needed for classroom or office space (the building is currently vacant). The removal of the building would allow the University to create a new green space (Hester Quad) and immediately update the visual appearance of campus, thus positively impacting non-student efforts. John Carroll contributes \$115 million to the local economy and, on average, 50% of its graduates remain in Ohio upon graduation. By removing the building, John Carroll will commit to employing local businesses and contractors on the project, which is estimated to last 18 months start to finish. Finally, this project is "ready to go" but has been put on hold as the University preserves funds for other purposes, namely financial aid. | John Carroll University | 100 | 0 to 30 days | \$2,625,000 |
| Cuyahoga | East 222nd Street, Tungsten Road Improvements | This project consists of roadway rehabilitation, including widening, base repairs and pavement replacement, installation of water main and stormwater, storm drainage improvements, installation of curb and sidewalk (with ADA-compliant curb ramps where needed), replacement of the storm, maintenance of traffic, erosion control, signalization upgrade, pavement markings, related to lamp and replacement, new energy efficient street lighting, and comprehensive landscaping, seeding and mulching. Total project length is 3.750 feet, items and quantities include 1,000 square yards of pavement paving and overlay, 10,000 square feet of sidewalk, 7,500 linear feet of curb, 1,500 linear feet of storm sewer, 750 linear feet of water main, 2,500 square yards of seeding and mulching, approximately 40 new energy efficient street lights, and 200 trees, shrubs and other plant material. The Early Childhood Mental Health (ECMH) program of the Achievement Centers provides relationship-based counseling to families with children ages three years and under who are experiencing difficulties in their social/emotional development, and/or children cared for by a family member who is experiencing emotional difficulties which may impact their parenting. Identification of the very youngest children who are at risk, family stressors and disruptions, extensive medical interventions, neglect/abuse, exposure to traumatic experiences), will provide an important opportunity for early interventions during critical phases of child/infant development. The ECMH program is currently a home visiting counseling program that provides comprehensive, coordinated services including assessment, instructional guidance, play therapy, counseling and linkages to other services as needed. Incorporating the ECMH program can reduce the risk of relationship problems and support appropriate parental responses. It is a cost effective way to prevent future problems in families and young children. Stimulus dollars will allow us to more than double the number of children served in our ECMH program. | City of Euclid | 370 | 31 to 90 days | \$3,700,000 |
| Cuyahoga | Early Childhood Mental Health Program | The Early Childhood Mental Health (ECMH) program of the Achievement Centers provides relationship-based counseling to families with children ages three years and under who are experiencing difficulties in their social/emotional development, and/or children cared for by a family member who is experiencing emotional difficulties which may impact their parenting. |----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Shaker Heights Dam Rehabilitation | City. The Green Lake Dam (Shaker Heights C.C. No 2 Dam) and the Horseshoe Lake Dam (Upper Shaker Lake Dam) are both located along Shaker Heights Dam was constructed in 1952 and is classified by ODNR as a Class 1 dam. There is no known record of when Green Lake Dam was constructed. It is classified by ODNR as a Class 1 dam. The proposed lake dredging & dam repairs are required by ODNR per 2001 inspections in order to prevent dam failures which may endanger life and property downstream. Major downstream properties include: Case Western Reserve University, Cleveland Museum of Art and other major University Circle institutions. Failure of these dams would not only result in significant property damage but also could adversely affect thousands of downstream jobs. Regional environmental benefits include natural/lake habitat preservation and flood prevention. Both lakes and dams are important to the health of the Cuyahoga River watershed. | City of Shaker Heights | 75 | 31 to 90 days | \$5,900,000 |
| Cuyahoga | Water Lines | Installation of 23,000 linear feet of new water lines. Not only will the installation of these water lines provide centralized clean drinking water, they will drastically increase fire and other protection in that area. A short-term construction benefit will also be realized as new development, both commercial and residential, will be realized. Replace 2400' of undersized 12" & 10" sewer with new 18" sewers. 62 house laterals & lot laterals to be replaced. | Olmsted Township | 150 | 31 to 90 days | \$3,100,000 |
| Cuyahoga | Shaker Heights Sanitary Sewers | Chawee sewer replacement. Install 900' of new 10" sanitary sewer & formation existing combined sewer into storm-only. Connect new sanitary sewer to new deep tunnel relief sewer. 20 house laterals & lot laterals to be replaced. Van Allen sewer replacement. To address capacity problems identified in 2002 NCRSD study. Remove & replace 1600' of structurally deficient 30" sanitary sewers & connect to new deep tunnel relief sewer. Hilmana/Ludgate sewer replacement. Remove and replace 2100' of 8" sewer on Hilmana and 1200' of 8" sewer on Ludgate with 10" sanitary at both. Current sewers are undersized & structurally deficient & the cause of chronic basement flooding. 121 house laterals & lot laterals to be replaced. Sanitary sewer improvements provide regional environmental benefits of cleaner water & removal of combined sewer. Additional funding anticipated from Shaker Hills & Ohio Public Works Commission (\$675,000). | City of Shaker Heights | 50 | 31 to 90 days | \$2,020,000 |
| Cuyahoga | GMP Facility Upgrade for Affymetrix, Inc. | Roche Manufacturing Practice (GMP) is a uniform of worldwide standards for manufacturing and quality control of food, pharmaceutical products, medical devices, and diagnostic assays. Affymetrix, Inc. provides a variety of high-tech enzymes and biochemicals for the scientific community at industrial, academic, and healthcare institutions. Most of our products are validated for Research-Use-Only (RUO) because we do not have the building requirements and procedures in place to achieve GMP requirements. Unfortunately, the diagnostic market has an order of magnitude greater potential than the RUO market, and this Affymetrix is missing a key opportunity to grow our organization here in Ohio. We are now looking for a facility to upgrade our 250,000 sq ft facility in Warrensville Heights to GMP standards. This building houses our Manufacturing, Quality Control, and Research and Development Groups. These improvements will provide at least an additional 30 jobs over the 30 jobs currently being built as well as provide construction jobs in Ohio during the upgrade. These improvements will ensure that our high-tech building is competitive with those in America and abroad. | Affymetrix, Inc. | 30 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | Facility Improvement-Department of Public Works | A capital improvement project to construct a facility to house our Department of Public Works was initiated in 2008. The project is approximately 50% completed and is slated to be back to back with additional Public Works. Currently, our Department of Public Works, including the maintenance and repair of all township roads, bridges, sidewalks, etc., is temporarily housed outside our corporate limits as no other suitable space is available until additional funding sources can be realized. Completion of this building will provide the Department of Public Works with the necessary housing and office space required to meet the demands of serving the 12,000 residents of Olmsted Township. Extension of GCRTA Blue Line light rail transit from current terminus to new intermodal facility with a bus loop. | Olmsted Township | 50 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Warrensville-Van Aken TOD Engineering/Acquisition/ | Shaker's top priority project has support of multiple private & public partners. "Game changer" project with incentives for intermodal transit station with significant economic benefits anticipated for city, region and state. Planned facility will greatly improve in-commuting & out-commuting options for residents of Cleveland, Shaker Hills, Warrensville Hills, Highland Hills, Beachwood & other nearby communities. Improvements open up transit access to jobs in east side suburbs at Chagrin/271 & Chagrin Highways. Positive environmental impacts include: added capacity/efficiency of existing rapid transit; improved air quality by reducing automobile trips & increasing transit ridership; a reduced carbon footprint by decreasing traffic congestion & cutting idling time at the intersection by over 50%. Approximately 37M already committed for infrastructure construction from Shaker Hills, Cuyahoga County Engineer and ODOT. | City of Shaker Heights | 500 | 31 to 90 days | \$3,300,000 |
| Cuyahoga | Comprehensive Case Management Program | The May Dugan Center has been providing multiple social services and programs to low income individuals and families for over 40 years. This includes helping people prepare for job interviews, find housing, rental assistance, help with utilities, HIV/AIDS Counseling and much more. Due to the loss of funding, our staff has been reduced and we are in great need of more case managers. We also need two bilingual (Spanish Speaking) managers to help with the case load. During 2008 we had nearly 8,000 individuals come to our organization for help. Our food and clothing distribution program has also increased, more people need help with food and clothing. We are hoping to open an education and resource center in our building to help people get their GED's, learn basic computer skills, assist with tutoring and developing the skills and much more. We want to have an on-site health care program where people (both young and elderly) can come to have their vital signs checked. May Dugan Center is an anchor in this community and people know that this is a place to come for help. This would be a great investment with the Stimulus funds and provide a great service to the community in need. | Near West Side Multi Service Center - May Dugan | 6 | 0 to 30 days | \$500,000 |
| Cuyahoga | Comprehensive Case Management Program | The May Dugan Center has been providing multiple social services and programs to low income individuals and families for over 40 years. This includes helping people prepare for job interviews, find housing, rental assistance, help with utilities, HIV/AIDS Counseling and much more. This would be a great investment with the Stimulus funds and provide a great service to the community in need. | Near West Side Multi Service Center - May Dugan | 6 | 0 to 30 days | \$500,000 |
| Cuyahoga | Fire Station | A capital improvement project to erect a new fire station was initiated in 2006. The project is approximately 50% completed, but is stalled due to a lack of additional funding. Whereas the current facility is old and antiquated, larger quarters utilizing alternative energy sources are paramount. The purchase of a new ambulance for our Fire Department is vital to ensure the health, safety, and welfare of our residents. Our current squad is 10 years old and is simply unable to perform to the operation of our 911 system to respond to the sick and injured to local area hospitals. | Olmsted Township | 75 | 0 to 30 days | \$2,700,000 |
| Cuyahoga | Ambulance | The purchase of a new ambulance for our Fire Department is vital to ensure the health, safety, and welfare of our residents. Our current squad is 10 years old and is simply unable to perform to the operation of our 911 system to respond to the sick and injured to local area hospitals. | Olmsted Township | 9 | 0 to 30 days | \$200,000 |
| Cuyahoga | Hillside Road Site Distance Improvements | Project involves the reconstruction and re-paving of Hillside Road (C.R. 145) at three separate locations to correct unsafe stopping sight distances to the traveling public. Each of these locations is approximately 300-feet in length. Target locations on Hillside Road are immediately east of E. Great Oaks, east and west of Flip Drive, and west of Vineyard. This project would be constructed at the expense of the County Rehabilitation project. | City of Independence | 15 | 91 to 180 days | \$400,000 |
| Cuyahoga | Truman & Security Federal Buildings | Rehabilitation of 2 contiguous historic office buildings, both of which are currently vacant, for retail, housing and parking. The buildings, located on Cleveland's Euclid Avenue Corridor, would support additional economic development throughout the city. | Sandvick Architects, Inc. | 25 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | Kamm's Corner Phase II | This funding will allow for the construction of streetscape improvements along Lorain Avenue Retail Corridor and benefiting Fairview Hospital. | City of Cleveland, Office of Mayor | 29 | 0 to 30 days | \$1,300,000 |
| Cuyahoga | Solid State Lighting | The goal of the Solid State Lighting project is to develop commercially viable solid state lighting for the wide area illumination market through multi-agency, collaborative working with Cleveland State University. Lighting our nation's highways, roads, parking lots and neighborhoods consumes approximately 35% of all electric power production. Solid state lighting technologies can reduce this consumption by a factor of 50%. The equates to a savings of approximately 700,000 megawatt hours per year and a reduction of green house gases of approximately 400,000 metric tons per year. The project could generate hundreds of jobs for the region and transform the lighting industry. These jobs include wire cloth jobs such as engineering, marketing and sales as well as blue collar manufacturing jobs. | ESD Technologies, Inc. | 100 | 0 to 30 days | \$10,000,000 |
| Cuyahoga | Schofield Building | Rehabilitation of historic office building for hotel and housing. The project is located on a prominent corner in downtown Cleveland, along the Euclid Corridor, and would be highly transformative for the area's appearance and vitality. Providing an additional downtown hotel, as well as new housing, would generate and support significant economic development throughout the city. | Sandvick Architects, Inc. | 50 | 31 to 90 days | \$4,000,000 |
| Cuyahoga | Temporary Exterior Repairs to Allen Elementary Sch | Allen Elementary was built in 1959 (23,374 sq ft) with an addition in 1977(26,870 sq ft). The 1977 addition was constructed of concrete block for structural and a brick facade. The facade bricks in replacement quality and is deteriorating exponentially to the degree that large 12"x24" pieces are falling from the building. The district had a study done in 2000 to determine the cause and the suggested repair was to remove and replace the bad brick. All the bricks are spalling and to replace them all would be a bad economic decision. This project would contain the worst deteriorating brick and reduce the amount of weather spalling until such time that a new building could be designed and built. The District is working with the OSPC for an assessment and recommendation. Replacement of the current facade would be very costly and the building would still not meet the educational needs of today's students. Again this is a three to five year bandaid until the design and construction could be completed. | Strongsville City Schools | 2 | 0 to 30 days | \$150,000 |
| Cuyahoga | Ohio Knitting Mills | Rehabilitation of a vacant historic factory building for office use. Located in Cleveland's Midtown neighborhood, this project is expected to generate significant economic development throughout the city. | Sandvick Architects, Inc. | 50 | 181 days or more | \$1,000,000 |
| Cuyahoga | Hillside Road Rehabilitation | Cold-in-Place Recycling and resurfacing Hillside Road (C.R. 145) from Broadview Road to Brecksville Road in the Cities of Seven Hills and Independence. Approximate length is 3-miles. This project is being funded through three government agencies (County Engineer, City of Seven Hills, City of Independence). | City of Independence | 20 | 181 days or more | \$100,000 |
| Cuyahoga | Erie Building | Rehabilitation of a vacant historic residential building for housing. This project is under construction and much of the work has been completed, but it has stalled due to conditions in the housing market and the credit crisis. | Sandvick Architects, Inc. | 20 | 0 to 30 days | \$500,000 |
| Cuyahoga | replace boiler with forced air furnace | cost savings on energy bill | north royaltan historical society | 1 | 0 to 30 days | \$3,600 |
| Cuyahoga | Hat & Koller Buildings | Subhabilitation of vacant historic office building in downtown Cleveland, to retain and bring new workers to the city's downtown core. | Sandvick Architects, Inc. | 20 | 181 days or more | \$500,000 |
| Cuyahoga | NORTH CAMPUS NEIGHBORHOOD DEVELOPMENT | CONSTRUCT STRUCTURED PARKING, AND RELATED ROADWAYS, UTILITY RELOCATION AND INFRASTRUCTURE, FOR 900 CARS TO FREE UP 15 ACRES OF LAND FOR REDEVELOPMENT INTO HIGH DENSITY OF UNIVERSITY-ORIENTED MARKET RATE PRIVATE HOUSING. THE TOTAL PRIVATE INVESTMENT THAT WILL RESULT WILL BE AT LEAST \$60,000,000. THE USE OF STIMULUS DOLLARS FOR THE PARKING AND INFRASTRUCTURE ELEMENT THE PROJECT TO GO FORTH WITH AN ADDITIONAL TAX INCREMENTAL FINANCING WHICH WOULD RESULT IN SEVERAL HUNDRED THOUSAND ADDITIONAL PROPERTY TAX DOLLARS TO THE CLEVELAND MUNICIPAL SCHOOL DISTRICT. THIS PROJECT ALSO WILL ASSIST CLEVELAND STATE UNIVERSITY IN MEETING GOALS OF THE NORTHEAST OHIO COLLABORATIVE AND INNOVATION STUDY COMMISSION. PROJECT TARGETED: OHIO'S ECONOMIC REDEVELOPMENT PARTNERSHIPS IN URBAN AREAS ADJACENT TO CAMPUSSES. PROJECT IS IN AN ECONOMICALLY REPRESSIBLE AREA GENERALLY ELIGIBLE FOR NEW MARKET TAX CREDITS. | CLEVELAND STATE UNIVERSITY | 1,500 | 91 to 180 days | \$22,000,000 |
| Cuyahoga | East Ohio Gas Company Building | Rehabilitation of a vacant office building for use as a hotel. This project is expected to generate significant economic development through construction activity and the permanent creation of jobs in the hotel, and also support other economic development initiatives in downtown Cleveland by providing needed hotel rooms. | Sandvick Architects, Inc. | 50 | 181 days or more | \$5,000,000 |
| Cuyahoga | Johnson Court | Rehabilitation of a vacant historic warehouse building for housing and retail use. The building is one of the few large-scale warehouses in Cleveland's historic Warehouse District that has not been rehabilitated, and this project would help continue the substantial economic development that has already occurred in the neighborhood. | Sandvick Architects, Inc. | 30 | 181 days or more | \$5,000,000 |
| Cuyahoga | Pleasant Valley Road Resurfacing (Broadview Road t | Resurfacing Pleasant Valley Road from Broadview Road to Brecksville Road through the Cities of Seven Hills and Independence. Total length of project is approximately two miles. Work will include resurfacing, concrete base repair, catch basins, and drainage. | City of Independence | 50 | 181 days or more | \$195,000 |
| Cuyahoga | Cowell & Hubbard Buildings - Playhouse Square | Rehabilitation of 2 contiguous vacant historic residential buildings in Cleveland's Playhouse Square district. New retail and office tenants have already been identified for the spaces, and the project will continue the important development of the area surrounding Cleveland's historic theatre district. | Sandvick Architects, Inc. | 25 | 91 to 180 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | W. 77th Street Bridge Over GCRTA and Norfolk and S | This project will remove and replace the existing West 77th Street Bridge over Norfolk Southern Corporation and the Greater Cleveland Regional Transit Authority Railroad tracks. The bridge, built in 1952, was replaced as a result of design life. The annual safety inspection indicates the deck, superstructure and substructure are in serious condition. A copy of the bridge inspection form BR-86 will be submitted upon request. A 3-span reinforced concrete deck on steel beams with integral abutments and concrete support piers will replace the existing 4-span bridge. Final engineering plans are under review by ODOT. The project will commence construction in October 2009. ODOT funding is capped at \$2,500,000. City share is estimated at \$1,050,000. Award of the stimulus money will allow the City to finance engineering and construction on three additional bridge projects creating additional design and construction jobs for year 2010 and 2011. Without this stimulus money these bridge projects will be moved to future years and construction of City local funding becomes available. | City of Cleveland, Office of Mayor | 125 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | Aetna Road Bridge over CSX Railroad | This Bridge project is necessary to maintain street access without limitations. The bridge links the residential neighborhood to public transportation. The Aetna Road Bridge over Corral, built in 1914, is a 65-ft single span, steel girder superstructure with full height concrete wall gravity abutments. There is one lane of traffic in each direction heading east and west. The walkways are concrete with a curb on the south side. The north curb no longer exists. Utility galleries exist under the walkways. Deck is a reinforced concrete slab, 5F' out to out, and the roadway has an asphalt surface. The bridge has a general rating of 4+, poor condition. The proposed superstructure is single span reinforced concrete I-beams with reinforced concrete deck. The roadway will be 28-ft face to face of curbs with 10-ft sidewalks on each side. Approach slabs will be 15-ft, and the total project length will be 150-ft. | City of Cleveland, Office of Mayor | 125 | 31 to 90 days | \$1,052,000 |
| Cuyahoga | Sprague Road Resurfacing | Sprague Road is a heavily trafficked two lane road bordering the communities of Broadview Heights, Independence, Parma, Seven Hills and North Royalton. The road is in disrepair causing traffic and safety issues. The reconstruction and resurfacing will alleviate safety and congestion problems and make the intersection of Broadview and Sprague roads a more viable district for economic expansion and building restoration. | City of Broadview Heights | 40 | 91 to 180 days | \$1,400,000 |
| Cuyahoga | Route 82 Widening | Route 82 is the main thoroughfare traversing southern Cuyahoga County. This project will widen Rt. 82 from Interstate 77 to the border of North Royalton, and then join with North Royalton to widen Route 82 within the North Royalton borders (see separate application #2594). Route 82 continues to Broadview Heights causing safety and congestion problems. This widening project will relieve current traffic and congestion issues. There is planned development for 2009 on route 82 west of I-77 which when completed will add more traffic and congestion to Route 82. This project would alleviate the future congestion. The widening of Route 82 will have a significant economic impact on Broadview Heights and North Royalton. The intersections of Rt. 82 with both Broadview and State Roads have already been widened to spur economic development and accommodate the increased traffic flow, leaving only the roadway to be widened to complete the thoroughfare. | City of Broadview Heights | 475 | 91 to 180 days | \$7,200,000 |
| Cuyahoga | Health Horizons | Health Horizons is a year-round program that gives teens in extreme poverty a comprehensive view of health-care pathways. A partnership with Cleveland Clinic and Urban League Health Center offers at four high schools: John Adams and John Marshall (Cleveland), Shaw Egan (Cleveland), and Euclid (Euclid). 113 students are currently served, with plans to increase to 160 students in FY2010. Health Horizons includes the following: Career counseling, readiness and skills, job shadowing and externships, mentoring and other career-related activities, and tours. At the end of the school year, HS seniors are placed in internships at Cleveland Clinic, and younger students are placed in internships at other health systems or other health-related jobs. Youth are expected to meet O.U.L. required outcomes: 80% of youth in program will graduate the next grade, 80% to graduate 12th grade HS diploma, 80% of grads go on to employment or other college/university studies. The program will complete 90+ days, 90% of those placed in short-term jobs complete the assignment. | Youth Opportunities Unlimited (Y.O.U.) | 100 | 91 to 180 days | \$100,000 |
| Cuyahoga | Harvard Road Improvement Phase II | The project includes removal and replacement of 2,070 square yards of pavement, 825 feet of sanitary sewer, 1,000 feet of storm sewer, new curbs, hydrants, manholes, sidewalks, drive aprons, Storm and sanitary built in same trench, and 6 feet of water line. Project will include sanitary sewer away from water and storm sewer. Project will also upgrade stormwater treatment plant capacity. Pavement is tilting and needs replaced. | Stephen Hovancsek & Associates, Inc. | 13 | 0 to 30 days | \$260,260 |
| Cuyahoga | Randolph Parkway Reconstruction | This project will keep the sewer and not lead to my economic disaster do to unfair trade agreements. Homeowners inability to keep jobs in america. | Stephen Hovancsek & Associates, Inc. | 14 | 0 to 30 days | \$492,000 |
| Cuyahoga | save the homestead | Project: Resurfacing and Drainage Improvements on SOM Center Road (State Route) | private | 1 | 0 to 30 days | \$100,000 |
| Cuyahoga | SOM Center Road (SR 91) Repair and Resurfacing Ced | City: The Green Lake Dam (Shaker Heights C.C. No. 2 Dam) and the Horseshoe Lake Dam (Upper Shaker Lake Dam) are both located along tributaries to Dean Brook, which discharges into Lake Erie. | Village of Hunting Valley | 5 | 181 days or more | \$450,000 |
| Cuyahoga | Shaker Heights Dam Rehabilitation | Horseshoe Lake Dam was constructed in 1952 and is classified by OOR as a Class I dam. There is no known record of when Green Lake Dam was constructed. It is classified by OOR as a Class I dam. | City of Shaker Heights | 75 | 31 to 90 days | \$5,900,000 |
| Cuyahoga | Elementary Technology Up-Grade | The proposed lake dredging & dam repairs are required by OOR per 2001 inspections in order to prevent dam failures which may endanger life and property downstream. Major downstream properties include: Case Western Reserve University, Cleveland Museum of Art and other major university Civic institutions. Failure of these dams would not only result in significant property damage but also could adversely affect thousands of downstream jobs. Regional environmental benefits include natural/lake habitat preservation and flood prevention. Both lakes and dams are important to the health of the Dean Brook watershed. | Strongsville City Schools | 1 | 0 to 30 days | \$250,000 |
| Cuyahoga | I-271 Landscaping Improvements | Site of Strongsville's eight elementary buildings have technology that is a minimum age of 10 years. As a result the students in these six buildings are not receiving the same opportunities that the students of other two buildings are receiving. To address this problem, the district and the computer/software in each class room (550 total) for the start of the 2010-2011 school year. By doing so, all elementary students will enter middle school with the same skill sets needed to utilize the middle school technology. This project will create one full time job with the City, company that is building and will be supporting the equipment. | City of Mayfield Heights | 25 | 0 to 30 days | \$433,870 |
| Cuyahoga | Ridgebury Road Bridge Replacement | Beautiful the I-271/Mayfield Road interchange through the use of landscaping and including bio-swales for water quality improvement of storm water runoff. By improving the aesthetics it will make the retail/commercial area of Mayfield Road more enticing and attractive. | City of Mayfield Heights | 150 | 31 to 90 days | \$3,742,146 |
| Cuyahoga | Lander Road Bridge Replacement | Replacement of the existing Ridgebury Road bridge over I-271. Ridgebury Road is a major east-west roadway connecting and traversing through number of municipalities. It is also a vital link to a number of school buildings for students, teachers and parents. | City of Mayfield Heights | 150 | 31 to 90 days | \$4,365,837 |
| Cuyahoga | Lander Road/1-271 Slip Ramps | Existing Lander Road bridge is in poor condition. Intend to replace the 425 foot long bridge over I-271. The bridge is vital link over I-271 to access a number of office parks on both sides of Lander Road. | City of Mayfield Heights | 400 | 31 to 90 days | \$9,875,108 |
| Cuyahoga | Job Training/Resume Writing | New OR ramps off I-271 to improve access to existing office parks along Lander Road. Anticipate remaining 15 acres of vacant land to be developed with office parks. The end of the program will be to provide a quality resume and they need training for job interviewing. We will open kiosks in Ohio malls and other locations to make our service accessible. A person who may not be comfortable asking for help or who's not computer literate and able to write their own resume will benefit using our kiosks. With our staffing experience and with helping 1000's of Ohio residents find jobs, we have determined it is essential that this service be offered to people who find themselves unemployed for the 1st time or stuck wondering why they can't compete in the job market. Most people do not know how to interview, with our expanded services, knowledge of the market and what hiring managers look for, we will prepare people for the challenge. | Technical Search Consultants, Inc | 300 | 31 to 90 days | \$400,000 |
| Cuyahoga | Water Reclamation Security System | Set up security system to monitor City Pump Stations and Main Plant Facility to prevent tampering, theft, destruction of City Property and to increase the safety of our Employees during single person shifts. | City of Solon, Water Reclamation Department | 5 | 31 to 90 days | \$30,000 |
| Cuyahoga | Build New Access Road and Increase Student Parkin | Strongsville High School currently has one legal entry and exit to accommodate a 2450 student population. A temporary second entrance has been opened to allow traffic from the southeast area of the city to gain access and reduce the amount of traffic at the original entrance. The district has purchased the additional land needed for a permanent access road and additional parking but currently does not have the funds required to finish the project over the next five years. Sight has been surveyed and wetland identified and wetland mitigation (\$225,000) worked out but placed on hold until the entry project is able to move forward. The completion of the project would increase student parking spaces from 356 to 1025 and it would provide an additional entrance and exit to the high school and improve the existing entrance and exit to the high school. This will all result in reduced traffic back up at peak times and provide safer means of getting to and from school. The project is expected to take a minimum of two years to complete. | Strongsville City School District | 6 | 31 to 90 days | \$3,400,000 |
| Cuyahoga | REBUILD INNER CITY CLEVELAND | REHAB AND FIX-UP DELAPIDATED HOUSES FOR LOW INCOME, ELDERLY HOMES. WEATHER PROOF OLDER HOMES, TEAR DOWN AND REBUILD CONDEMNED HOMES AND PROVIDE THEM FOR LOW INCOME, ELDERLY, AND DISPLACED VETERANS. PROVIDE EMPLOYMENT OPPORTUNITIES ALSO INCLUDING A PROGRAM THAT WILL BE TEACHING PLUMBING, ELECTRICAL, HOME IMPROVEMENT SKILLS THOSE ON THE RECEIVING TO SOCIETY PROGRAM THIS WILL ALSO PROVIDE TAX DOLLARS TO THE CITY AND COUNTY AS THERE WILL BE NO DEFERRED TAX BENEFITS REQUIRED ON THESE HOMES. FULL TAXES WILL BE PAID AT THE TIME OF PURCHASE THESE HOMES WILL ALSO BE CONSIDERED TO THOSE WHO LOSE THEIR HOMES TO FORECLOSURE BASICALLY REBUILDING THE INNER CITY OF CLEVELAND HOUSE BY HOUSE, FOCUSING ON NEIGHBORHOODS IN THE 44122, 44108, 44105, 44110, 44112 ZIP CODES WHERE THE HOMES HOUSING AND DOWN BEATEN NEIGHBORHOODS. THIS PROGRAM WILL ALSO HELP IN INCREASING THE VALUE OF HOMES IN CLEVELAND THAT HAVE BEEN REPORTED DEPRECIATION OF MORE THAN 40%. THIS PROGRAM WILL CLEAN UP CLEVELAND, PROVIDE HOMES, JOBS AND TAX DOLLARS ALL AT THE SAME TIME. | REBUILD INNER CITY OF CLEVELAND | 150 | 31 to 90 days | \$125,000,000 |
| Cuyahoga | Rockside Road Widening (Summit Park Drive to I-77) | Widening the south side of Rockside Road (C.R. 53) approximately 550 linear feet from just east of Summit Park Drive to the entrance ramp to I-77 southbound to accommodate an exclusive dedicated right turn-only lane from which to access I-77 southbound. Currently the lane configuration is right southbound on Rockside Road/I-77 present major traffic congestion at the intersection of Rockside Road and the I-77 southbound exit and entrance ramps. | City of Independence | 20 | 91 to 180 days | \$800,000 |
| Cuyahoga | Emery Woods Culvert Improvement | An existing 24" culvert under Emery Woods Road is exhibiting box-beam depression that is immediately adjacent to the sidewalk. The situation represents a possible drowning hazard as well as an attractive nuisance. The City needs to install a drainage structure and approximately 500 feet of 48" pipe to allow the flow to gradually meet an existing storm system. The estimated construction, design and inspection cost is \$150,000. | City of Warrensville Heights | 150 | 31 to 90 days | \$120,000 |
| Cuyahoga | Brooklyn centre revitalization and recovery sustai | Purchase and rehab abandoned or foreclosed properties with the focus to be sustainability to the point of self sufficiency including but not limited to: on- generation and waste heat recovery usage for domestic hot water, snow melting, radiant floor heating, trapping and utilization of beam to solar technologies with radiant barriers, along with wind energy and solar thermal and solar PV, rainwater management and black water and grey water management to minimize the impact to the environment and reduce energy to the point of negative usage so as to create a net grid payback and develop and relate training to teach these recovery strategies to the local residents for purposes of greening the city of Cleveland as a way that no other city has ever thought of doing while at the same time combining energy strategies to create net generation efficiency to equal removing 300,000+ vehicles from the roadways and drastically reducing the pollution and carbon footprint of the city. We will also be seeking matching funds from independent sources and foundations along with partnering with the Green Jobs Academy and other educational/research institutions. Creating jobs and new sustainable | Brooklyn Center Development Corp. | 200 | 181 days or more | \$5,386,976 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Green Energy Self-Sufficiency and Sustainability N | Purchase and rehab abandoned or foreclosed properties with the focus to be sustainability to the point of self sufficiency including but not limited to: solar generation and waste heat recovery usage for domestic hot water, snow melting, radiant floor heating, trapping and utilization of beam in place technologies with radiant barriers, along with wind energy and solar thermal and solar PV, rainwater management and black water and grey water management to minimize the impact on the environment and reduce energy to the point of negative usage so as to create a net grid. Develop and develop and relate training to teach these recovery strategies to the local residents for purposes of greening the city of Cleveland in a way that no other city has ever thought of. All at the same time combining energy strategies to create net generation efficiency by equipping 300,000+ vehicles from independent sources and foundations along with partnering with the Green Jobs Academy and other educational/research institutions and Universities. | Clark Metro Development Corp | 200 | 181 days or more | \$5,597,880 |
| Cuyahoga | B.R.F. | To create a state-wide initiative that educates and trains the best and the brightest high school seniors, assisting with college costs and teaching them about business leadership, civic commitment and community service so that they can become Ohio's leaders of tomorrow. | Ohio Leadership Council | 500 | 0 to 30 days | \$15,000,000 |
| Cuyahoga | Collegoff.com Project | Collegoff is newly proposed interactive website meant to assist potential college applicants in their college search and college comparison efforts. It is a timely, user-friendly, but informative, tool to provide a virtual exposure to various aspects of colleges, and to actually engage high school and other students to attend college. This will be particularly attractive to other areas, or rural, 1st generation college students who have had little to no exposure or experiences with college lifestyles. Collegoff can be seen as the way to ask the questions you were always afraid to ask. It provides profiles of colleges and other learning or educational settings nationally, updates on student loans and scholarship information, and compares and contrast schools on several aspects to include student life, cultural diversity, academics, security, coursework, and costs. Collegoff will award multiple scholarships only through reviews generated through college accounts, advertisement and other profitable means. The goal is to establish partnership with colleges across the country, reduce barriers to college, and to impact and assist at least 1.5 million students. | Interbus Name LLC | 35 | 0 to 30 days | \$515,000 |
| Cuyahoga | Mayfield Village Municipal Wi-Fi | Mayfield Village has already invested in fiber optic connectivity. We intend to use that fiber backbone to make municipal Wi-Fi possible. These funds would be used to launch a wireless deployment that would cover the residential areas of Mayfield Village. | Mayfield Village | 10 | 31 to 90 days | \$80,000 |
| Cuyahoga | Polymer Additive Program | Our technology, which is already developed in a lab and being evaluated by a large Fortune 500 Saalari Manufacturer is an additive used in the manufacturing of sealants and adhesives. This additive replaces traditional carbon chainend additives that are currently available on the market place and comes in a variety of particle sizes and melting points designed to meet the specific needs of a manufacturer. This additive meets the requirements of "GRAS" and is a renewable resource based on biotech technology. Additionally, the project is economically viable because it costs less than competitive products and will improve production cycle time for target customers. Additionally, the raw material can be grown by Ohio farmers, which will also benefit from this venture. The money will be specifically used for the purchasing of manufacturing equipment and the initial funding for a manufacturing plant. This project will employ technical people, such as chemists quality control personnel, production supervisors, and laboratory workers. This project will provide emergency shelter for 85 homeless working with formula allocated CDBG funding. | InterMix | 22 | 31 to 90 days | \$1,400,000 |
| Cuyahoga | Cleveland Women's Shelter | The Mayfield Village Civic Center is not currently ADA compliant because it is multi-level and does not have an elevator. These funds would be used for the installation of an elevator to meet the building ADA compliant. | City of Cleveland, Office of the Mayor | 83 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Mayfield Village Civic Center Elevator | This project will provide affordable housing for 85 households working with formula allocated CDBG funding. | Mayfield Village | 5 | 31 to 90 days | \$100,000 |
| Cuyahoga | University Tower | Mayfield Village has already invested \$59,000 in a Mastepark for a greenway corridor, connecting natural habitat trail systems in the Village to those at the MetroPark Chagrin Reservation. The additional money would be for the implementation of the Mastepark. This funding will allow for the acquisition of 20,000 square feet of land for redevelopment. | City of Cleveland, Office of the Mayor | 208 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Mayfield Village Green Corridor | This project will allow for the continuation of the redevelopment of former St. Luke's Hospital into affordable housing for 180 seniors working with formula allocated CDBG funding. | Mayfield Village | 50 | 31 to 90 days | \$200,000 |
| Cuyahoga | Strategic Property Acquisition | Mayfield Village issued debt to build a police station in 2005. Because of an error in the design estimate, the debt issued was \$2M short of a realistic cost for the construction of the station. Because of this, the Mayfield Village Police Department continues to operate out of trailers. Mayfield Village has already partnered with OneCommunity to build a ring of fiber optic cable around Beta Drive. Began in February, it will deliver internet bandwidth to the area, enabling more effective economic development efforts. This funding would allow for critical emergency repairs to be made to the homes of 25 Senior Citizens. | City of Cleveland, Office of the Mayor | 2 | 91 to 180 days | \$250,000 |
| Cuyahoga | St. Lukes Senior Housing | Mayfield Village issued debt to build a police station in 2005. Because of an error in the design estimate, the debt issued was \$2M short of a realistic cost for the construction of the station. Because of this, the Mayfield Village Police Department continues to operate out of trailers. Mayfield Village has already partnered with OneCommunity to build a ring of fiber optic cable around Beta Drive. Began in February, it will deliver internet bandwidth to the area, enabling more effective economic development efforts. This funding would allow for critical emergency repairs to be made to the homes of 25 Senior Citizens. | City of Cleveland, Office of the Mayor | 548 | 181 days or more | \$3,000,000 |
| Cuyahoga | Mayfield Village Police Station | This program will respond to older adults who are facing homelessness with a rapid response team of service providers. The team will be a coordinated staffing approach between city and county departments and will attempt to provide supportive services to ensure long term needs are met and that 250 homeless seniors receive assistance overcoming barriers to obtaining housing. | Mayfield Village | 20 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Mayfield Village Fiber Optic Ring | Utilizing the Neighborhood Stabilization Program, the City could remove over 234,000 square feet of industrial and other major blighted structures. | Mayfield Village, Ohio | 25 | 0 to 30 days | \$164,000 |
| Cuyahoga | Senior Home Repair Program | This technology is based on our parent company's experience in the nuclear field for the protection of these workers from radiation contamination. Our goal is to provide a can in every police car throughout the State for the benefit of law enforcement. This is especially critical for female officers and first responders in child bearing year. The Neighborhood Stabilization Program is ideal to help the city restore 200 foreclosed properties into urban gardens and community pocket parks. This could also help with the creation of community entryways, pilot top treatments for demolished structures and assistance with yard separation programs via the City's Land Bank Program. | City of Cleveland, Office of the Mayor | 4 | 31 to 90 days | \$250,000 |
| Cuyahoga | Rapid ReHousing Preventing & Addressing Older Adult | This project will work to preserve 1,000 homes for future redevelopment. The funds would be used to temporarily board up properties, assist with mold remediation and insurance cost for at least 12 months. This would be done utilizing the Neighborhood Stabilization Program and could work in partnership with the new County Land Bank Program. | City of Cleveland, Office of the Mayor | 20 | 91 to 180 days | \$10,000,000 |
| Cuyahoga | Large Scale Demolition | This will create a revolving fund that will be used for the restoration of 100 households utilizing the Neighborhood Stabilization Program. | City of Cleveland, Office of the Mayor | 150 | 31 to 90 days | \$3,000,000 |
| Cuyahoga | Meth Lab Remediation | This project will allow for the redevelopment of 10 homes working with formula allocated CDBG funding. | Quest Chemicals Inc. | 5 | 0 to 30 days | \$2,500,000 |
| Cuyahoga | Land Reutilization | This project will allow for the redevelopment of 10 homes working with formula allocated CDBG funding. | City of Cleveland, Office of the Mayor | 40 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | Land Maintenance | This will allow for additional funding through the Neighborhood Stabilization Program to acquire, remediate and control 1,500,000 square feet of land for redevelopment. | City of Cleveland, Office of the Mayor | 20 | 31 to 90 days | \$250,000 |
| Cuyahoga | Property Preservation | It is proposed to establish an Energy Efficiency Center (EEC) at Case Western Reserve University. This center will be integrated with the Great Lakes Institute of Energy Innovation. The EEC will follow the guidelines of the US DOE Industrial Assessment Centers. It will provide eligible Ohio small- and medium-sized manufacturers with no-cost energy assessments. It will also provide assessments for commercial and residential buildings. It will work with industrial, commercial and residential customers at the local, regional, and state levels to help them achieve a 25% reduction in energy intensity in 10 years by developing and delivering industrial energy efficiency programs. The EEC will serve as a training ground for the re-education of energy savvy engineers. Case faculty, graduate and undergraduate students will conduct the assessment. The proposal is a DOE Qualified Process (QEP) report and has conducted numerous energy assessments under the DOE Save Energy Now program. Students from Cleveland State University, Kent State University and possibly other Ohio colleges will be trained to join the Energy Assessments and other Energy Efficiency programs. I was granted no doc loan. My property has now de preciated to 50,000. It is a 30,000 loss, where do I go now? | City of Cleveland, Office of the Mayor | 100 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | Housing Renovation Program | Community. The program focus is on diabetes and hypertension prevention. The project was funded in 2004 by the Ohio Commission on Minority Health. The Harvard Star Bodies project was given "valiant" recognition and was offered a demonstration grant in 2008 to continue the project as a main component of the other health programs, while also engaging the parents. The project is evaluated by and approved evaluator through the Ohio Research Evaluator Enhancement Process. | City of Cleveland | 150 | 31 to 90 days | \$4,000,000 |
| Cuyahoga | REVISED: Heritage Lane | Project expected outcomes are as follows: 1) To achieve fitness, and nutritional behavior changes in 90% of program participants, which will impact their likelihood of developing diabetes, hypertension, and obesity. 2) To facilitate self monitoring among 90% of children and parents of personal nutritional and fitness habits. 3) To engage 80% of parents in monthly health program activities. 4) Conduct 3 local health programs annually. Behavioral changes greatly impact diabetes and hypertension prevention. Funds are needed to sustain program and retain staff. | City of Cleveland, Office of the Mayor | 30 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Heritage Lane | Project expected outcomes are as follows: 1) To achieve fitness, and nutritional behavior changes in 90% of program participants, which will impact their likelihood of developing diabetes, hypertension, and obesity. 2) To facilitate self monitoring among 90% of children and parents of personal nutritional and fitness habits. 3) To engage 80% of parents in monthly health program activities. 4) Conduct 3 local health programs annually. Behavioral changes greatly impact diabetes and hypertension prevention. Funds are needed to sustain program and retain staff. | City of Cleveland, Office of the Mayor | 30 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Foreclosed Property Acquisition | Project expected outcomes are as follows: 1) To achieve fitness, and nutritional behavior changes in 90% of program participants, which will impact their likelihood of developing diabetes, hypertension, and obesity. 2) To facilitate self monitoring among 90% of children and parents of personal nutritional and fitness habits. 3) To engage 80% of parents in monthly health program activities. 4) Conduct 3 local health programs annually. Behavioral changes greatly impact diabetes and hypertension prevention. Funds are needed to sustain program and retain staff. | City of Cleveland, Office of the Mayor | 3 | 91 to 180 days | \$750,000 |
| Cuyahoga | Energy Assessment Center | Project expected outcomes are as follows: 1) To achieve fitness, and nutritional behavior changes in 90% of program participants, which will impact their likelihood of developing diabetes, hypertension, and obesity. 2) To facilitate self monitoring among 90% of children and parents of personal nutritional and fitness habits. 3) To engage 80% of parents in monthly health program activities. 4) Conduct 3 local health programs annually. Behavioral changes greatly impact diabetes and hypertension prevention. Funds are needed to sustain program and retain staff. | Case Western Reserve University | 100 | 0 to 30 days | \$400,000 |
| Cuyahoga | reevaluate property taxes | Project expected outcomes are as follows: 1) To achieve fitness, and nutritional behavior changes in 90% of program participants, which will impact their likelihood of developing diabetes, hypertension, and obesity. 2) To facilitate self monitoring among 90% of children and parents of personal nutritional and fitness habits. 3) To engage 80% of parents in monthly health program activities. 4) Conduct 3 local health programs annually. Behavioral changes greatly impact diabetes and hypertension prevention. Funds are needed to sustain program and retain staff. | none | 1 | 0 to 30 days | \$10,000 |
| Cuyahoga | Star Bodies Minority Health Project | Project expected outcomes are as follows: 1) To achieve fitness, and nutritional behavior changes in 90% of program participants, which will impact their likelihood of developing diabetes, hypertension, and obesity. 2) To facilitate self monitoring among 90% of children and parents of personal nutritional and fitness habits. 3) To engage 80% of parents in monthly health program activities. 4) Conduct 3 local health programs annually. Behavioral changes greatly impact diabetes and hypertension prevention. Funds are needed to sustain program and retain staff. | Harvard Community Services Center | 3 | 0 to 30 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Richmond Road – Widening | Widening Richmond Rd between Shaker Blvd, East and S. Woodland Blvd, 12 ft on the east side of Richmond Rd, totaling 675 linear feet, add a left turn lane, which would allow south-bound traffic a means of exiting the Beachwood campus property which includes the Maltz Museum, Jewish Community Center, Sigel College, Agnon and Fruma Mizel schools and the Terrence Triest House. Currently traffic is routed onto Shaker Blvd East to an entry drive that lacks proper signage and creates confusing and dangerous traffic issues. Providing full access onto the property would not only ease frustration of the community members who use it, improve traffic flow and better identify the campus attractions, but most importantly enhance safety. Additionally, better visibility and traffic flow will help attract more visitors to the Museum and other venues, creating more revenue, full and part-time jobs and strengthening Beachwood's economy. The project will improve & beautify the area, create jobs and protect continued jobs and commerce by supporting the City's Museum. Vehicles to transport senior to their doctor and event for senior who do not drive. | Maltz Museum of Jewish Heritage | 20 | 31 to 90 days | \$350,000 |
| Cuyahoga | Senior Vehicle | | City of Warrensville Heights | 2 | 0 to 30 days | \$45,000 |
| Cuyahoga | Widening Entryway to Maltz Museum of Jewish Herita | The Museum seeks to improve access, visibility & the visitor experience to generate more traffic & revenue. Proposed improvements require 3 major changes: 1)Re-align entry drive in tandem with proposed widening of Richmond Rd to handle increased traffic load & full movement onto the property from both directions of travel; 2) Re-align & provide an upgraded access point for the parcel to the south. 3) Assess for future development, without increasing the ft of curb cuts required onto Richmond Rd. 2) An upgraded signage system would increase awareness of the museum's location by identifying it and creating an open to the public feel. 3) Improve traffic flow and better identify the campus attractions, but most importantly enhance safety. Additionally, better visibility and traffic flow will help attract more visitors to the Museum and other venues, creating more revenue, full and part-time jobs and strengthening Beachwood's economy. The project will improve & beautify the area, create jobs and protect continued jobs and commerce by supporting the City's Museum. Vehicles to transport senior to their doctor and event for senior who do not drive. | Maltz Museum of Jewish Heritage | 15 | 91 to 180 days | \$750,000 |
| Cuyahoga | Sunlight-Induced Degradation of Pharmaceutical and | Pharmaceutical and personal care products (PPCPs) are an emerging class of aquatic organic pollutants that have been increasingly detected in field samples in USA. PPCPs have become a major issue in environmental chemistry due to their presence in water, threat or drinking water sources, and possible deleterious effects to wildlife and to humans. Many PPCPs contain structural similarities and functional groups to those found in pesticides, which are known to degrade by sunlight and have detrimental effect in aqueous environments. Because much of the PPCPs found in surface water have already eluded the rigorous biodegradation environment of wastewater treatment, sunlight degradation is expected to play a major role that biodegradation in surface water. It is our hypothesis that the information obtained from laboratory studies should help to understand the fate of PPCPs in the environment. The goal is to study the light-induced fate for persistence of selected PPCPs found in high concentrations in the Lake Erie and to investigate the potential deleterious effects of the resulting products to living organisms. | Case Western Reserve University | 2 | 0 to 30 days | \$100,000 |
| Cuyahoga | Laser welding of fuel cell components | By Polar plate assembly for fuel cell customer. Funds used for capital and building improvements to build 70,000 units per year in 2010. Estimated 20 new employees added as a result of this business. | Die-Matic Corporation | 20 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Agnon School/Sigel College Building Homeland Secu | The Jewish Community Federation requests funding to install homeland security equipment upgrades to a Federation-owned building on Shaker Blvd. in Beachwood that houses our partner educational institutions: the Agnon School (pre-school to grade 5) and the Sigel College of Judaic Studies. More than 400 students & staff are in the building daily, and the building is part of a campus that will include 7 major Jewish communal institutions with more than 1,000 collective daily visitors. Security assessments indicate that such a building is a possible target due to its concentration of people of one religious faith, current unrestricted access during business hours, target recognition (visibility) and the fact that the building is a high-profile, high-visibility site. Funding is needed to enhance security. Funding would be used to install perimeter fence on exterior windows, install new locks on classroom doors to enable locking from inside, upgrade a CCTV camera system, and install portable radios, megaphones and metal detectors. | Jewish Community Federation of Cleveland | 3 | 31 to 90 days | \$142,015 |
| Cuyahoga | Crime and Public Safety | Health and safety of community snow removal and sidewalk repair multi-purpose machine. | City of Warrensville Heights | 3 | 0 to 30 days | \$70,000 |
| Cuyahoga | Community Gardens | This funding will allow for the installation of 140 active community gardens. | City of Cleveland, Office of Mayor | 5 | 31 to 90 days | \$50,000 |
| Cuyahoga | Brownfield Remediation for Foreclosed property | This funding will allow for the remediation of major brownfield sites acquired through the foreclosure process for redevelopment. | City of Cleveland, Office of Mayor | 30 | 31 to 90 days | \$2,500,000 |
| Cuyahoga | East 190th, East 191st, East 193rd, East 194th, an | 2,800' of water line replacement, 2,700' of sanitary sewer replacement, 2,850' of storm sewer replacement, 10,000 square feet of pavement replacement | City of Euclid | 31 | 31 to 90 days | \$3,132,000 |
| Cuyahoga | Energy Efficient Senior Transportation | The need to replace the current traditional bus rentals with an in-house energy efficient bus for senior transportation that will allow for a much needed curb-to-curb service for senior wellness checks (Doctors visits) and monthly transportation needed with the seniors to help with the senior basic daily needs. | Village of Newburgh Heights | 3 | 31 to 90 days | \$123,000 |
| Cuyahoga | Green Re-Entry | Individuals in The Northeast Ohio area. The program is a collaborative effort amongst several service providers designed to assist these individuals with improving their economic situation and that of their communities. Unemployment for so-offenders for outpaces that of other groups in The Northeast Ohio communities. The program incorporates key components: employment development, business development. | Group Transcend | 1000 | 91 to 180 days | \$2,500,000 |
| Cuyahoga | SENIOR HOME IMPROVMENTS | THIS WOULD BE A NEW BUSINESS THAT WOULD GENERALLY HELP OLDER FOLKS WITH HOME IMPROVEMENT PROJECTS THAT WOULD NOT BE ABLE TO AFFORD OR TO DO THEMSELVES AT A DISCOUNTED PRICE. I WOULD LIKE TO BE ABLE TO HELP THOSE PEOPLE WHO ARE QUALIFIED IN ELECTRICAL, DRIVWAY, PLUMBING AND WOODWORKING. THIS WOULD BE A GREAT OPPORTUNITY TO GET SOME STARTED IN THE CUYAHOGA COUNTY AREA, AND TO HELP THE OLDER PEOPLE IN THE COMMUNITY. THE HOME IMPROVEMENTS WOULD BE USED TO GET NEW EQUIPMENT AND MATERIALS TO GET THE JOBS STARTED AND TO FIND A LOCATION FOR THE FUTURE. THIS IS REPEATED PERSON. THANK YOU. | SENIOR HOME IMPROVMENT | 10 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | Job creation | Exact definitions of projects are not yet finalized but we are an established-up and coming minority owned small business. With federal stimulus help, we would be able to hire at least 6 full time seasonal employees. The addition of the full time employees may not sound like much, but it would surely have a beneficial effect on our ability to grow, therefore enabling us to hire more and more employees as we expand. Most of our target hires are inner city and/or inner metro applicants. | Asphalt Maintenance Professionals | 5 | 0 to 30 days | \$140,000 |
| Cuyahoga | HCSC/CDC Jobs Creation Initiative | 10,000 services annually. The HCSC, Community Development Corporation serves as a "one-stop" resource, addressing the needs of students, businesses, and entrepreneurs. As a result of the current economic downturn the need for this initiative are faced with extensive job loss and home foreclosures. The HCSC/CDC is proactive in it's development of a revitalization plan to empower and engage community residents in job creation in the areas of construction, manufacturing, home maintenance, food, and home ownership. | Harvard Community Services Center | 50 | 0 to 30 days | \$2,100,000 |
| Cuyahoga | Brooklyn Centre-Streetscape project | Brooklyn Centre Street scape Project: West 25th Street / Pearl Road from Denison Ave. to Bradwell Ave. The following explanation would be for engineering and construction design study to follow the preliminary design & feasibility study that was completed in December 2008. Once this is complete the project would be considered "ready to go". Street scape improvement surrounding the west 25th Street/Denison Avenue intersection (including Bertin Ave) for the length of the corner project) and extending south along West 25th to Bradwell Avenue. This would include new sidewalks, street trees, parking for screening (bending) and landscaping and pedestrian amenities at bus stops and buying allies. The proposed planning charges include retaining the current number of lanes and creating the potential for a share for bicyclist along the West 25th street stretch from 71 Bridge to the Brooklyn Brighton Bridge. This will help to encourage the already flourishing walkable and stable neighborhood. This section of the West 25th street is included within the Ohio and Erie Canal way portion of the National Historic Sney and must be improved upon. | Old Brooklyn Community Development Corporation | 5 | 31 to 90 days | \$240,000 |
| Cuyahoga | restaurant restructure | Redevelopment of the Cleveland State area around restaurant. Creating a safer and more updated area creating more need to increase staff size. Cleveland Schools That Can | dmc restaurant inc. | 25 | 0 to 30 days | \$250,000 |
| Cuyahoga | Cleveland Schools That Can | The highest-performing district, charter and independent schools in Cleveland are forming an unprecedented partnership to transform education in the city. This is one of the poorest cities in America, served by the poorest performing schools. We are creating a new future for the city by providing high quality educational opportunities for the maximum number of children. | Citizens' Academy | 450 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | Hickory Lane Water Quality Improvement Project | Our plan calls for the development of 15 new high quality public charter schools by 2016. Sponsored by and under contract with the Cleveland Metropolitan School District, these schools at scale will educate over 5,000 children in Cleveland who, otherwise, will not have access to a quality education in this city. The project will create over 50 construction jobs a year to support building renovation / construction. In addition, it will create jobs for 7 high level entrepreneurial educators to put state of the art educational, technological and human capital systems in place. At scale the 15 schools will employ 450 teachers with an total annual economic impact of approximately \$50,000,000. Approximately 60 acres of newly developed land in the City of Seven Hills, Ohio drains into 20" storm sewers via an open ditch located immediately south of Hickory Lane. This project is located within the Cuyahoga watershed. During storm events, several homes in the Hickory Lane vicinity experience flooding from accumulated storm drainage that backs up from the open ditch and onto private property. Several homes have been known to experience sanitary sewage backup as well in conjunction with the storm sewer overflow. It has been the City's intention for years to construct a water quality city retention pond at the location of the open ditch. An adequately sized pond of approximately 1.5 acres of storage will minimize the probability of flooding and improve water quality downstream. Improvements to the downstream pond are also part of this project. The project includes 2,400 CF of excavation and construction of a water quality basin (City property), 2,000 ft of new sewer line, 4 headwalls, 3 manholes, 35 storm connectors, pavement and landscape restoration and other improvements. Work to be performed in City property and in the existing ROW. | City of Seven Hills | 20 | 91 to 180 days | \$668,360 |
| Cuyahoga | Secure Public sector jobs/sustain vital services | 16,000 families and children annually. It has been the catalyst for neighborhood stability providing 22 programs, and serving the community for over 47 years. As a result of the current economic downturn the residents of this community have turned to HCSC for guidance, support, and resources. Demand for vital services such as food, housing, clothing, and emergency needs have more than doubled. Due to 2009 funding cuts, and limited operational funds to meet a 1.1 mill payroll, HCSC's 55 public sector jobs required to deliver these services are at risk and need to be secured. | Harvard Community Services Center | 55 | 0 to 30 days | \$500,000 |
| Cuyahoga | Wastewater Treatment Plant and Collection System I | HCSC is an access point for residents to link to local, state, and federal economic initiatives. With the addition of the HCSC Community Development Corporation, HCSC is currently working to launch several strategic that will impact not only human services provided through the agency, but the creation of jobs, housing and assistance to those who are experiencing job loss, and impending homelessness. A one time grant will enable operations and secure staff at HCSC. | City of North Olmsted | 50 | 0 to 30 days | \$30,700,000 |
| Cuyahoga | Fire Station & City Hall Emergency Generator (FEM | The proposed \$30.7 million project involves planning, design, and construction of upgrades to the city's wastewater collection and treatment systems, including the construction of two (2) satellite equalization basins and arctic WWTP including seven major process anaerobic/aerobic units, the main processes of the City of North Olmsted's WWTP. The proposed project required wastewater rate increases to repay the WPP's loan which have been implemented by the City. | City of Bedford Heights | 15 | 0 to 30 days | \$40,000 |
| Cuyahoga | Project R.A.I.N. | Presently, the Bedford Heights municipal complex has inadequate emergency power generation capabilities. This has been clearly demonstrated by the spectacular power outage last fall as a result of Hurricane Ike's heavy winds that reached northeast Ohio with devastating affect. In the event of a natural or man made catastrophe the municipal complex must be able to sustain effective emergency command and control center along with emergency shelter for victims of a disaster. The current proposal that funds for the project are to be used to install a generator to complete this project. Both Hurricane Katrina and Ike have demonstrated the inadequate preparations that most municipal and state governments have in place to effectively protect their populace. This modest request would help complete one more element in our Emergency Preparedness Plan for northeast Ohio. FEMA has mandated that all governments prioritize emergency preparedness for natural and man-made disasters. Presently R.A.I.N. (Resilient Active Involvement) is the realization of a 4.65 - (15-gallon) rain barrels participating Residents/Communities/City Properties. The rain barrels would be installed at the downspouts(s) selected by the property owner and would include a 10-gallon 10 and mandatory backflow to a state back for the rain barrel to leak. The project would immediately improve water quality through water conservation, protecting The West Creek and Cuyahoga Watersheds, providing for natural gardening, & minimizing flooding and stream erosion. The proposed project would remove approximately 257,875 gallons of rain water from the City's sewer system and the local watershed during normal rain events. | City of Seven Hills | 10 | 31 to 90 days | \$311,200 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | High School Door Replacement Project | The door systems at our HS are outdated and do not properly secure and lock. This causes issues with safety and security and the doors have pieces which cause the loss of heat in the winter time. New doors would address all of these issues. | North Royalton City Schools | 3 | 31 to 90 days | \$24,000 |
| Cuyahoga | Valley Vista Elementary Door Replacement Project | We would like to replace all of the exterior doors at our elementary school building that was constructed in the early 1960's. The doors are original and do not properly lock and present a safety and security issue. The new doors would also be more energy efficient. | North Royalton City Schools | 3 | 31 to 90 days | \$32,000 |
| Cuyahoga | Royal View Door Replacement Project | We would like to replace the exterior doors at our elementary building so they properly lock for safety and security reasons and so that they are more energy efficient. | North Royalton City Schools | 3 | 31 to 90 days | \$34,500 |
| Cuyahoga | West Creek Watershed Phases 2 & 3 Sanitary Improve | Elimination of sixty-one (61) failing septic systems and providing a connection to a new gravity sanitary sewer main. The project includes the construction of approximately 6,827 feet of 8" diameter gravity sanitary sewer line including HDD and trench casing, 27 precast manholes, ten (10) catch basins, three (3) 60" diameter stormwater culverts, pavement replacement, topsoil and seeding, and other appurtenances. The project is necessary for the protection of the health and welfare of the public. The plans and specifications are completed and accepted by the CSDA (both PFI and MD) have been established. | City of Seven Hills | 50 | 91 to 180 days | \$800,000 |
| Cuyahoga | The Greening of Preterm | Initiative to transforming its existing healthcare clinic into an environmentally sustainable facility that will be the first LEED-EB certified health care clinic in Ohio. This three year project includes upgrading our major building systems, incorporating new green technologies for energy efficiency, water conservation, and stormwater management, creating a green organizational culture, and promoting green buildings and practices through education and outreach. We intend to become a model of green healthcare and green practices that can be replicated by other small healthcare providers and non-profit organizations and businesses. | Preterm | 10 | 0 to 30 days | \$50,000 |
| Cuyahoga | Community Center Emergency Generator (FEMA) | An aging electrical grid has plagued northeast Ohio for many years and that fact can be best demonstrated by all of the protracted power outages. These outages have caused significant hardships on residents, both of business owners and health care consumers. In some cases the power remained off for large portions of southeast Cuyahoga County for over eight days. Bedford Heights has a 50,000 square foot multi purpose community center that could provide temporary housing in the event of such power outages or in the event of a natural disaster it could be utilized as an Emergency Shelter Center. The installation of an emergency generator would be the key to provide for the health and safety of the residents in Bedford Heights and all of southeastern Cuyahoga County. This could be quickly integrated in our Emergency Preparedness Plan and help fulfil Federal Emergency Management Agency (FEMA) requirements for multiple community preparedness. Presently, there are no fully functional emergency centers of this size. | City of Bedford Heights | 10 | 31 to 90 days | \$176,000 |
| Cuyahoga | Ohio Digital Design and Semiconductor Development | Efficient Channel Coding is a fabless semiconductor company in Cuyahoga County, and the only company this type in Ohio. The funds will be used to expand from a corporate R&D facility to an essentially focused service provider to Ohio companies. Each ASIC commissioned by an Ohio company costs between \$5-\$10 million and we can keep the money in state, along with the engineering jobs it supports of the technology. | Efficient Channel Coding, Inc. | 30 | 0 to 30 days | \$3,000,000 |
| Cuyahoga | After-School Art Enrichment Education Program | Young Rembrandts, an after school art enrichment program not only provide jobs for hundreds of teachers and administrative staff across the county, we also enable working parents to keep working, knowing their children are in a safe place while they work. Most importantly, we are providing a new and very specific element of education to students that may not otherwise receive this level of education in the classroom. Specifically - our program teaches skills beyond the technical know-how for left brain methodologies of standard classroom education. We are teaching children with the ability to create, analyze, and transform information - a skill that will be vital to a future workforce that can solve and technical skills will not be enough to make it in the new conceptual and global economy. With extra money we can not only hire more teachers locally, but we can ensure more parents the opportunity to work and not be a burden to family programming. We can also grant to other city Cleveland schools to give them the same opportunity other suburban schools have. | Young Rembrandts | 20 | 31 to 90 days | \$250,000 |
| Cuyahoga | Green manufacturing improvement for manufacturing | Capital additions and education thereof to a existing metal stamping business to operate a green globally competitive stamping plant to keep 20 Cuyahoga county manufacturing jobs in place with ability to grow 20 more manufacturing jobs. | Ace Metal Stamping | 20 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Electronic Medical Records/Charting Upgrade | Menorah Park is submitting this request to upgrade and expand an electronic computerized medical record system. This is fully in line with President Barack Obama's national initiative for health care organizations to implement seamless electronic health information patient record systems. | Menorah Park Center for Senior Living | 0 | 0 to 30 days | \$171,914 |
| Cuyahoga | Randolph Parkway Reconstruction | Menorah Park's request is for funding to upgrade the existing computer technology hardware by purchasing laptops, desktops, printers, security, fingerprint access readers, and wall charging enclosure devices. | Stephen Hovancsek & Associates, Inc. | 14 | 0 to 30 days | \$492,000 |
| Cuyahoga | Cleveland Museum of Art Renovation and Expansion | The project includes removal and replacement of 2,070 square yards of pavement, 625 feet of sanitary sewer, 775 feet of water line, 360 feet of storm sewer, new curbs, hydrants, manholes, sidewalks, drive aprons, storm and sanitary sewers in same trench and within 6 feet of water line. Project will relocate sanitary sewer away from water and storm sewer. Project will also upgrade storm sewer to required capacity. Pavement is being and needs replaced. | The Cleveland Museum of Art | 700 | 0 to 30 days | \$25,000,000 |
| Cuyahoga | Northfield Road Town Center Infrastructure Project | The University Research and Innovation Center renovation and expansion project, which includes renovating existing building, creating a truly and welcoming museum for the 21st century and a world-class environment for life-long learning. The purpose of the project is to ensure that the CMA remains an essential cultural, educational, civic, and economic asset for the entire State of Ohio. Among the features of the renovation and expansion project, which began in 2006 and will extend into 2012, will be: Increased gallery space for the display of the world-renowned CMA permanent collection Increased temporary exhibition space for larger, traveling presentations Improved visitor amenities including more plentiful and accessible restrooms, more parking, and a new restaurant State-of-art educational and technology resources, including a 3,000 square foot Learning Learning Center Expansion of the parking structure and surrounding greenspace A 38,000 square foot glass-covered Atrium | City of Warrensville Heights | 150 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Housing Placement and Rental Support Program | REVISID: This project is the first phase of a new Town Center Development on Northfield Road at Chardon Road in Warrensville Heights. Phase one will include a Y.M.C.A. Public Library, and approximately 1400 linear feet of infrastructure including, an entry boulevard leading to a central roundabout with a building leading to future municipal building site with all necessary underground improvements constructed on 17 acres. The ultimate plan will include municipal building, multi-family and single-family residential units, recreational facilities, commercial, retail, and office development on approximately 62 acres. New neighborhood operates as a local safety in a manner consistent with Warrensville Heights area means with one 1.4 acre public park, and primary, in employers and 30 landlords in a collaborative strategy to address the plight of homelessness in a holistic and relational manner meeting each man where they are on the path toward independent living. | Community Service Alliance | 200 | 0 to 30 days | \$75,000 |
| Cuyahoga | Energy Conservation | CSA's Housing Placement and Rental Support program works with men coming out of homelessness in the areas of training, jobs and housing. CSA staff work collaboratively with shelters, group homes, treatment programs and other like organizations to walk alongside each individual client, as they seek meaningful work, safe & stable housing and the training necessary to acceptance back. CSA works as a catalyst between client & employer and client & landlord throughout the process by providing introductions, referrals, and various types of support - material financial, and spiritual. | Menorah Park Center for Senior Living | 100 | 0 to 30 days | \$1,202,000 |
| Cuyahoga | Creekside WWTP Pump Station conversion | An energy conservation engineering firm determined we could save \$120,000 per year in energy and operational costs by adding new HVAC equipment. Over fifteen-years, this results in more than \$1.8 million in savings at current utility rates. 1. Replace 2 main steam boilers with energy efficient models - \$180,000 2. Install a flue gas heat recovery system on each steam boiler - \$45,000 3. Install a new electronic control system to control the central plant, heating boiler, cooling chiller, and common area heating and ventilation equipment - \$180,000 4. Replace existing four air handling units - \$280,000 5. Replace the present chiller with two efficient chillers - \$180,000 6. Install automatic control system on the kitchen air system - \$20,000 7. Install variable speed drives on the two top end variable air volume units - \$55,000 8. Replace 360 flush valve toilets using 5.8 gallon per flush with 1.6 gallon per flush toilets - \$210,000 9. Install insulating pad cover to cover pool unoccupied periods - \$52,000 | City of Pepper Pike | 3 | 91 to 180 days | \$2,100,000 |
| Cuyahoga | Reopen lawn care Business and produce 20 to 30 full | This project includes the demolition of portions of the existing Creekside WWTP, conversion of existing treatment to storage for flow equalization, installation of a new pump station, installation of approximately 12,500 linear feet of sanitary force main and necessary appurtenances. This conversion will eliminate an existing WWTP that is over 40 years old and the area of the depot. It also eliminates a significant source of pollution on a tributary to the Chagrin River. | L.A.M. Lawn Care | 25 | 31 to 90 days | \$50,000 |
| Cuyahoga | Bill Grulich | Learn care and development for seniors of greater Cleveland area. Expand and develop a new relational data base system that will allow not-for-profits to compile comprehensive data about their clients and their clients needs and wishes. | 4design | 10 | 0 to 30 days | \$410,000 |
| Cuyahoga | Wastewater Treatment Plant - Restoration of deteri | clients can input information from any computer connected to the internet. This web based software will be affordable for not-for-profits and easy for the consumer to use. | City of Lakewood, Department of Public Works | 11 | 31 to 90 days | \$275,000 |
| Cuyahoga | Northeast Foremain Replacement | Replace deteriorated floors and stairways at the City's Wastewater Treatment Plant. | City of Solon | 10 | 91 to 180 days | \$5,220,000 |
| Cuyahoga | Wastewater Treatment Plant Thickener Pump Drive Un | Replacement of 5.2 mile sanitary foremain sewer. | City of Lakewood, Department of Public Works | 5 | 31 to 90 days | \$55,000 |
| Cuyahoga | Early Childhood Mental Health Initiative | increase Plant efficiency. | Applewood Centers, Inc. | 35 | 0 to 30 days | \$250,000 |
| Cuyahoga | Path Certification Training for Direct Service Pro | Applewood Centers, Inc. seeks funding to respond to the growing need to provide early childhood mental health services in Cuyahoga County to children from infancy through age 12 through a variety of avenues. Applewood cooperates to work with caregivers and their children who are vulnerable to mental health disorders using therapeutic milieu to prevent full-blown mental disorders. Interventions and services will occur in caregivers settings, in the home, and through observations at day care centers. Ongoing consulting will be undertaken and recommendations to parents, caregivers, and teachers will be made as to how to go forward to ensure that children achieve optimal wellness. | Jewish Family Service Association of Cleveland | 75 | 31 to 90 days | \$65,000 |
| Cuyahoga | Wastewater Treatment Plant Aeration Tank Isolation | Jewish Family Service Association is a 501(c)(3) non-profit organization that provides supported living for intellectually disabled MRDD adults as part of the services it offers the northeast Ohio region. Stimulus funds would target an ongoing shortage of qualified healthcare workers required by JFSA and other providers to serve clients with intellectual disabilities (MRDD). We will bring in new employees with little or no experience in the healthcare field and provide them with the knowledge and skills to work with our specialized population. We will monitor the number of employees that qualify to work in our ongoing units and trainees will complete survey questionnaires as part of the program evaluation process. After undergoing training, staff will have a recognized credential in the field. JFSA would train 75 workers with these funds. | City of Lakewood, Department of Public Works | 6 | 31 to 90 days | \$160,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Albion Elementary Door Replacement | The door systems at the building are part of the original design and do not properly lock. They are also made of aluminum and glass and are not energy efficient. New doors would allow us to lock the doors properly and would assist in reducing energy costs. | North Royalton City Schools | 3 | 31 to 90 days | \$34,000 |
| Cuyahoga | High School Lighting Project | Most of the lighting in original in parts of the 1950 and 1970 parts of the building. The lighting level is not adequate and is not energy efficient. Valley Vista serves grades 1-4 in our district and the lighting system in all of the classroom is original from when the building was built. The lights are not energy efficient and produce very low levels of light. | North Royalton City Schools | 50 | 31 to 90 days | \$1,298,120 |
| Cuyahoga | Valley Vista Lighting Replacement Project | Valley Vista serves grades 1-4 in our district and the lighting system in all of the classroom is original from when the building was built. The lights are not energy efficient and produce very low levels of light. | North Royalton City Schools | 20 | 31 to 90 days | \$213,110 |
| Cuyahoga | Wastewater Treatment Plant Heat Exchanger Recore a | Reduce fossil fuel usage, burn gas created during processes. | City of Lakewood, Department of Public Works | 12 | 31 to 90 days | \$90,000 |
| Cuyahoga | Wastewater Treatment Plant Gate Valve Actuators | Optimize reaction time. | City of Lakewood, Department of Public Works | 5 | 31 to 90 days | \$95,000 |
| Cuyahoga | Towers Curtainwall Recladding | Install cladding over the Towers curtain-wall like window system. | The MetroHealth System | 750 | 91 to 180 days | \$10,000,000 |
| Cuyahoga | Concrete Roadway Replacement | Replace cracked and extensively damaged roadways around campus, one or more of the following objectives: <ul style="list-style-type: none"> Reduce healthcare associated infections Improve delivery of prevention and wellness programs Decrease response time in emergency departments Improve nursing staff efficiency, reducing turnover and costs Prevent patient safety failures such as medication errors and patient falls | The MetroHealth System | 300 | 91 to 180 days | \$250,000 |
| Cuyahoga | Healthcare Efficiency Initiative: Lowering Health | Teams will receive training and revamp processes in their institutions. The methodology is based on a collaborative model that originated in industry and has been effectively applied to healthcare, primarily by the Pittsburgh Regional Healthcare Institute. Successful case studies are available for each of the project goals listed above. New processes will be designed to be compatible with the Electronic Health Records initiative. This program is designed to be a catalyst for continuous improvement beyond the funding period. While each project will, in itself, improve patient care, training will be designed to demonstrate and teach the improvement methodology for long-term benefit to the providers. Replacement of existing watermain due to age, condition and poor flow capacity. The project goal is to restore water system integrity by replacing a watermain with frequent breaks. The main will help improve system flow capacity due to the strategic location and reconnection with many Village streets. Needs to combine all current programs and services to one location by establishing a Culturally Diverse Multi-Service Center at 3140 Wood Street (Cleveland OH 44109-1663 Ward 14, Congressional District 11). All Spanish American Committee programs and services will be combined in one building, and allow for expansion of our Employment Program, Early Childhood Environment Center, and community learning labs. Through the process of rehab, construction and expansion of programs and services this project will stimulate more than 200 jobs in the construction labor in our area, and the addition of 25 FTE positions within the year. This project also includes 10 office leases @ \$1,000/mo. Leases may need to hire additional staff to operate these efforts. Through an initial grant from the Cleveland Foundation, all pre-development task, business plans, and performance goals are completed. A purchase agreement has been submitted for the above property, and with appropriate funding this project is possible. We are ready to move forward. The lighting systems for the building are mostly original and are not energy efficient. The new lighting will improve the amount of lighting for the students as well as reduce our energy costs. | Clear Insights, LLC | 1 | 0 to 30 days | \$87,000 |
| Cuyahoga | South Franklin Street Watermain Replacement | Replacement of existing watermain due to age, condition and poor flow capacity. The project goal is to restore water system integrity by replacing a watermain with frequent breaks. The main will help improve system flow capacity due to the strategic location and reconnection with many Village streets. Needs to combine all current programs and services to one location by establishing a Culturally Diverse Multi-Service Center at 3140 Wood Street (Cleveland OH 44109-1663 Ward 14, Congressional District 11). The new lighting will improve the amount of lighting for the students as well as reduce our energy costs. | The Spanish American Committee | 350 | 31 to 90 days | \$4,000,000 |
| Cuyahoga | Royal View Elementary Lighting Project | | North Royalton City Schools | 20 | 31 to 90 days | \$258,875 |
| Cuyahoga | Replace Southpoint Air Handling Unit | Replace Southpoint AHU which serves Southpoint Administration. | The MetroHealth System | 500 | 91 to 180 days | \$250,000 |
| Cuyahoga | Laundry Air Handling Unit Replacement | Replace laundry AHU-1. | The MetroHealth System | 500 | 91 to 180 days | \$550,000 |
| Cuyahoga | KSU - Cleveland Urban Design Collaborative | In collaboration with the City of Cleveland business community, Kent State University College Architecture and Environment Design is in process of replacing the Cleveland Urban Design Collaborative (CUDC) at Playhouse Square. The CUDC works directly with Ohio cities and their centers to help plan, construct which will maximize economic development. The funding provided under the stimulus bill will supplement funds already received from local foundations and will permit research in why Ohio cities are struggling to continue. The lights at the building are part of the original system and are not energy efficient by today's standards. We know the we could save considerable dollars with new lights. | Kent State University | 10 | 91 to 180 days | \$400,000 |
| Cuyahoga | Albion Elementary Lighting Replacement | Need to replace current windows with energy efficient windows. | North Royalton City Schools | 20 | 31 to 90 days | \$222,650 |
| Cuyahoga | Bell Greve Window Replacement | | The MetroHealth System | 250 | 91 to 180 days | \$1,500,000 |
| Cuyahoga | Scott Auditorium Air Handling Unit Replacement | Necessary to replace Scott Auditorium AHU 5-11. Many of the windows at our high school are part of the original building that was built in the 1950's and they are single pane aluminum windows. The windows are not energy efficient and they are leaking. Replace 15 air handling units variable frequency drives. | The MetroHealth System | 500 | 91 to 180 days | \$600,000 |
| Cuyahoga | North Royalton HS Window Replacement Project | | North Royalton City Schools | 15 | 31 to 90 days | \$199,850 |
| Cuyahoga | Replace 15 Variable Frequency Drives in Out Patten | | The MetroHealth System | 500 | 31 to 90 days | \$150,000 |
| Cuyahoga | Baldwin Residuals and Reservoir Project | The Baldwin Residuals and Fairmount Reservoir Project includes improvements to the raw water recycle tanks and pumps, equalization basin, rawwash clarifiers, sludge transfer pumps, sludge storage tanks, sludge recirculation and discharge pumps, and Gatehouse 8, 9, 10 and 11. Improvements are intended to increase the flexibility and operation of the residuals treatment facilities and to optimize the final residuals disposal system. State of Ohio Federal Stimulus Initiative: The Free Medical Clinic of Greater Cleveland is requesting \$300,000 in funding from the State of Ohio Federal Stimulus Initiative for its Community Outreach and Satellite Intake Project. The Community Outreach Project is a one year outreach and awareness campaign to expose Free Clinic services to a broader constituent base of the uninsured and underinsured in our region, providing over 10,000 people in Northeast Ohio with the medical and behavioral health care they need to stay healthy and employable. The Free Clinic of Greater Cleveland is growing. Approximately 42% of Free Clinic patients work, but have no health coverage. The Health Policy Institute of Ohio reports that 10.7% of 1.3 million Ohioans are uninsured, and an even greater number of Ohioans lack dental, pharmacy or mental health coverage. The Community Outreach and Satellite Intake Project will conduct healthcare intakes and provide free and affordable healthcare and other resources to underserved migrant communities. Free Clinic staff, case managers and volunteer nurses will conduct initial medical and behavioral health assessments and refer individuals to the Free Clinic for further comprehensive care. This project will foster outreach efforts and Elevator modernization for the 4 north tower elevators, the existing equipment is 30+ years of age. Parts availability is becoming evident as well as creating an impact on operational reliability. | City of Cleveland, Office of Mayor | 50 | 31 to 90 days | \$18,300,000 |
| Cuyahoga | Community Outreach and Satellite Intake Project | The Free Medical Clinic of Greater Cleveland is requesting \$300,000 in funding from the State of Ohio Federal Stimulus Initiative for its Community Outreach and Satellite Intake Project. | Cuyahoga | Refurbish 4 Old Brooklyn Campus North Tower Elevat | | The MetroHealth System | 750 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | Hope Cooking School | Take men and women in transition from homelessness and teach them the basics of restaurant cooking, preparation, and nutrition. They will be qualified to find work in food service preparation. A professional quality kitchen in a centrally located church in Cleveland, Ohio is available. It is located one block from a church that feeds the homeless and the two churches, although different denominations, regularly work together. Rehabilitation of 5,000 feet of pavement, related infrastructure and deficient streets. Pavement condition and insufficient drainage limit lane widths causing hazardous conditions on this major thoroughfare in the Village. Elevator modernization for the 4 north tower elevators, the existing equipment is 30+ years of age. Parts availability is becoming evident as well as creating an impact on operational reliability. | Marketing Makes Sense | 10 | 0 to 30 days | \$378,000 |
| Cuyahoga | Solon Road Rehabilitation | | Chagrin Falls Village | 40 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | Refurbish 3 Old Brooklyn Campus South Tower Elevat | | The MetroHealth System | 1000 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Valley Vista Window Replacement Project | Valley Vista Elementary houses grades 1-4 in our district and the windows are part of the original building that was built in the early 1960's. The windows are single pane and aluminum frames. New windows would be much more energy and would also help improve the lighting in the rooms. Another pump needs to be engineered and added as demand has exceeded capacity. | North Royalton City Schools | 20 | 31 to 90 days | \$390,564 |
| Cuyahoga | Domestic Water Booster Pump Replacement | | The MetroHealth System | 750 | 91 to 180 days | \$100,000 |
| Cuyahoga | Medical Air Pump Replacement | Replace aged medical air pump which is beyond its useful life. | The MetroHealth System | 750 | 91 to 180 days | \$100,000 |
| Cuyahoga | Core Building Roof Replacement | Replace leaking, aged roofs that are beyond useful life. | The MetroHealth System | 150 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Royal View Elementary Window Replacement | Royal View Elementary was constructed in the early 1960's and has the original single pane windows that are not energy efficient and are leaking due to the seals no longer working. New windows would improve on the energy efficiency of the district. Damage structural repairs. | North Royalton City Schools | 15 | 31 to 90 days | \$196,473 |
| Cuyahoga | North Garage Repairs | | The MetroHealth System | 250 | 91 to 180 days | \$500,000 |
| Cuyahoga | Right of way upgrade | Janab | Cleveland Commercial Railroad, LLC | 10 | 0 to 30 days | \$425,000 |
| Cuyahoga | Out Patient Plaza Fire Alarm System Upgrade | Replace 16 obsolete fire alarm panels. | The MetroHealth System | 250 | 31 to 90 days | \$50,000 |
| Cuyahoga | Albion Elementary Window Replacement | The windows in the Elementary school are original and single pane. They are not energy efficient and many of them have been replaced with singlepanes over the years. Manufacture of water and waste water projects, this includes sludge dewatering belt presses, inlet screens, flotation systems for waste treatment. Currently we have in \$1,000,000.00 in orders and need help to complete this work. | North Royalton City Schools | 15 | 31 to 90 days | \$70,598 |
| Cuyahoga | Government Project | | Or-Tec Inc | 6 | 31 to 90 days | \$200,000 |
| Cuyahoga | Kitchen HVAC Replacement | Replace mechanical equipment room and air equipment on roof. | The MetroHealth System | 500 | 91 to 180 days | \$750,000 |
| Cuyahoga | Food Service HVAC East Replacement | Replace AHU E-3 which serves kitchen serving area and east dining room. | The MetroHealth System | 500 | 91 to 180 days | \$150,000 |
| Cuyahoga | Food Service HVAC West Replacement | Replace AHU E-4 which serves west dining room. The roof section in this section of our High School is leaking and has caused us many maintenance issues. The roof needs to be replaced with a new roof and more energy efficient system. The roof section on this part of HS building is part of the original construction. It leaks and is not energy efficient. The new roof would eliminate the need to have trash cans in the hallways and classrooms to catch rain water. The energy efficient roof would also help reduce the energy costs. Program to train and hire 500 certified internet research technicians/information analysts. Program participants will be taken from the ranks of minority and low income citizens (MNC and other underclassmate job programs). In house training course will be provided by Cystorm Inc. and L&L Consulting. Graduates of the program will be educated for entry jobs provided by Cystorm Inc. Each successful class will be immediately hired to work researching medical databases on the Internet. | The MetroHealth System | 500 | 91 to 180 days | \$250,000 |
| Cuyahoga | HS Media Center /Classroom Roof | | North Royalton City Schools | 20 | 31 to 90 days | \$524,327 |
| Cuyahoga | HS Cafe/Classroom Roof Project 1964 Edition | | North Royalton City Schools | 20 | 31 to 90 days | \$137,960 |
| Cuyahoga | Minority-low income high tech Job training and emp | | Cystorm Inc. | 500 | 0 to 30 days | \$800,000 |
| Cuyahoga | Royal View Elementary Roof Project | Royal View Elementary is a school that houses grades 1-4 in our district and the roof system is old and is leaking. It is also not energy efficient. The new roof would allow us not to have to have buckets all around and would help reduce our energy costs. New Police Station comprised of a total of 22,000 square feet. This 22,000 square foot includes Administration, Vehicle Storage, Shooting Range and Temporary Holding Cell. This Project will include "Green" technology by utilizing geothermal heating system and roof solar cells to provide a portion of the electric power or sell the electricity back to the grid when not needed. Where practical other "Green" or LED related items shall be incorporated into the design. | North Royalton City Schools | 15 | 31 to 90 days | \$54,485 |
| Cuyahoga | Mayfield Village Police Station | | Mayfield Village, Ohio | 150 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Cafeteria HVAC Replacement | | The MetroHealth System | 500 | 91 to 180 days | \$150,000 |
| Cuyahoga | New South Generator Installation | Replace SAC 2 & 3 roof top AC units servicing first floor corridors. New generator installation to replace aged South and Gannon generators. | The MetroHealth System | 500 | 91 to 180 days | \$10,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | Steps 2 Science | Science and technology mentoring program for high school girls utilizing recognition mentors in science, engineering and mathematics and hands on summer experiences, with the goal of increasing the representation of women, particularly minorities, into high-earning education degrees in these fields. | Case Western Reserve University | 2 | 31 to 90 days | \$125,000 |
| Cuyahoga | P8 Generator Replacement | Replacement generators for P8 including 2 new generators for capacity lighting retrofit, New HVAC, Building Automation System, Roofing, Building Envelope, Energy consumption reduced between 25-30%. | The MetroHealth System | 750 | 91 to 180 days | \$2,500,000 |
| Cuyahoga | OHIO CAT | | Brewer-Garrett | 70 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | Business Services Elevator Upgrade | In order to end ongoing age-related service issues, upgrade the obsolete Business Services and cafeteria elevators. | The MetroHealth System | 750 | 31 to 90 days | \$500,000 |
| Cuyahoga | Albion Elementary Roof Replacement | The roof system is currently over 40 years old and is leaking and is not energy efficient. We are looking to replace the roof so that it does not leak on our students and help to contain energy use costs. | North Royalton City Schools | 20 | 31 to 90 days | \$252,552 |
| Cuyahoga | High School Roof Replacement- 100 Section | The project is to replace an old roof system on the HS roof that is leaking and is not insulated (energy efficient) | North Royalton City Schools | 40 | 31 to 90 days | \$222,823 |
| Cuyahoga | Research Building Roof Replacement | Replace aged, leaking roofs that have reached beyond useful life. | The MetroHealth System | 150 | 91 to 180 days | \$1,200,000 |
| Cuyahoga | East Feeder Upgrade | Upgrade 11.4 distribution system to Towers to add needed capacity and improve efficiency. | The MetroHealth System | 1000 | 91 to 180 days | \$6,500,000 |
| Cuyahoga | ENHANCE, RENOVATE & REPAIR FACILITY FOR THE SAFE | EVEN FLOORING FOR SAFETY OF RESIDENTS, REPAIR & PAINT, UP ELECTRICAL, WIRING, ADD WALK-IN SHOWERS, ADD HARDWARE AND BATHUBS FOR RESIDENTS, REPAIR GARAGE AND ADD MAKE-UP ACCESSIBLE FOR RESIDENTS, TOILETS IN INCLIMATE WEATHER, REPLACE WINDOWS & DOORS TO PRESERVE HEAT AND MAKE COMFORTABLE FOR RESIDENTS, VAN TO TRANSPORT RESIDENTS TO APARTMENTS, COMMUNITY BASED RECREATION, SOCIAL ACTIVITIES. | C. A. P. ADDY FAMILY HOMES, INC | 5 | 0 to 30 days | \$65,000 |
| Cuyahoga | MayFran International | Look to save 20-30% in energy cost. | Brewer-Garrett | 70 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Portable Emergency Power Generator | Portable standby generators to be used on nine pump stations in the city of Bedford Heights. The generator can also be used in conjunction with four pump stations for the Village of Oakwood, a neighboring community. Both communities have the same engineering firm and have trained staffing at pump stations with the same electrical transfer switches. | City of Bedford Heights Water Reclamation Plant | 0 | 31 to 90 days | \$45,000 |
| Cuyahoga | Drinking Water and Water Pollution Control system | Design and management of drinking water and water pollution control projects. Environmental issues related to water and wastewater treatment systems, underground tanks and piping, environmental remediation, think would be coordinated with NCT for profit minority business organization- African American Business and Contractors Association. | Clean CEMP Engineering | 15 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | Libby Road Pump Station Renovation Project | Libby Road Pump Station is one of six wet well, dry well tube pump stations in the city of Bedford Heights that is 40 years old. This pump station services residential area with a large condo and apartment complexes. Two of the six tube stations were rebuilt in 2007 and this is a continuation of the rebuilding program. The upgrade in the station includes: new high efficiency motors with soft starts, high efficiency pumps, new telemetry system, new motor controls, and electric transfer switch for emergency power. No available emergency power at this site. Sustainable power outage will affect Tinkers Creek and Cuyahoga River. All equipment purchased from Ohio companies. | City of Bedford Heights Water Reclamation Plant | 5 | 181 days or more | \$115,000 |
| Cuyahoga | Aurora Road Pump Station Renovation | Aurora Road Pump Station is one of six wet well, dry well tube stations in the city of Bedford Heights. This station is 40 years old. Two of the stations were rebuilt in 2007 and this is a continuation of the pump stations rebuilding project. The Aurora Road Pump station services residential, commercial and industrial accounts. The station upgrade includes: new high efficiency motors, with soft starts, new high efficiency pumps, new telemetry systems, motor controls, piping, and transfer switch for emergency power. No available emergency power at this time. Sustainable power outage impacts Tinkers Creek and Cuyahoga River. | City of Bedford Heights Water Reclamation Plant | 5 | 181 days or more | \$80,500 |
| Cuyahoga | Repair and dresurfacing of several heavily traveled | Approximately 1/2 mile of critically necessary street repair resulting in marked improvement of infrastructure. | City of University Heights | 20 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Geothermal Eastern Cuyahoga County Home Energy | Purchase of approximately 1000 furnished homes in eastern Cuyahoga County suburbs. Homes to be renovated and rented to responsible tenants with stable job and family histories. Homes may be sold at some future date when markets recover and the local housing market stabilizes. At present, strong rental demand exists thereby keeping operation profitable while simultaneously providing for the homes maintenance. These homes may also be rented to Section 8 tenants with good rental histories. Geothermal energy systems to be installed in each home for maximum energy efficiency, providing lowest cost heating and cooling solutions for each tenant. | House Savers LLC | 200 | 0 to 30 days | \$150,000,000 |
| Cuyahoga | Geothermal Eastern Cuyahoga County Home Energy | Purchase of approximately 1000 furnished homes in eastern Cuyahoga County suburbs. Homes to be renovated and rented to responsible tenants with stable job and family histories. Homes may be sold at some future date when markets recover and the local housing market stabilizes. At present, strong rental demand exists thereby keeping operation profitable while simultaneously providing for the homes maintenance. | Cuyahoga | SSO Elimination | The elimination of 14 sanitary sewer overflows | City of Euclid | 340 | 91 to 180 days | \$28,000,000 |
| Cuyahoga | Infrastructure/ Clean Water | The wastewater plant is being inundated with storm water that creates bypasses that enter into our environment. Our "Waste Water Treatment" plant was designed to treat wastewater but during moderate to heavy rain storms and snow melt, it must handle additional flows that exceed its capacity resulting in a bypass. | City of North Royalton | 700 | 91 to 180 days | \$14,000,000 |
| Cuyahoga | Operation Fire Truck | We believe 3,500 homes have inflow and infiltration issues through the city. The funds would be used to repair and/or replace sanitary and separate storm lines. | Warrensville Heights Fire Department | 33 | 0 to 30 days | \$375,000 |
| Cuyahoga | West Campus | As Fire Chief, I am greatly concerned with the condition of our front line pumper housed at station #2, located in the City of Warrensville Heights. The pumper is a 1989 E-One, open cab unit. Our pumper runs okay, however is not NFPA compliant. I am putting my firefighters at risk each and every time we respond with this unit. The pumper needs a great deal of body work. Due to the financial situation crisis of our community, I was told that the prospect of purchase of a replacement engine is not possible now or the near future in the budget. I sincerely need this help for the safety of the community and my firefighters. Thank you, Chief Stanley Martin, W.A.F.D. | Case Western Reserve University | 300 | 91 to 180 days | \$50,000,000 |
| Cuyahoga | Building our Community for the Future | Case Western Reserve University plans to build a 100,000 sq. ft., \$50 million, LEED certified Energy and Medicine Innovation Institute at its West Campus. The West Campus will link CWRU's world-class biomedical, health, and energy R&D and technology transfer capabilities by creating the rapidly expanding biotechnology industry and helping to make Ohio energy independent and an energy industry leader. CWRU's extensive track record of robust partnerships with other universities, business, industry, and health care institutions will enable it to attract new companies, partnerships, and institutions. The Institute will house the Great Lakes Institute for Energy, Institute for Translational Science Collaborative, Institute for Personalized Medicine, National Flight Nurse Academy, A.M. Star Skills and Simulation Center. The project is planned to create approximately 400 new, high-paying, initial jobs, have direct economic impact of \$50-\$60 million and an ongoing annual recreational impact of \$20-\$27 million, and continue economic development in an area of Cleveland critical to our City's future. | City of Bedford Heights | 20 | 31 to 90 days | \$200,000 |
| Cuyahoga | Geothermal Eastern Cuyahoga County Home Energy | There is a growing number of families living in the suburban areas that are food insecure. There is a need to provide Cities with resources to provide meals for our most vulnerable populations, seniors and children. Bedford Heights has the facilities and provides the services, but does not have the funding to provide meals. | House Savers LLC | 200 | 0 to 30 days | \$150,000,000 |
| Cuyahoga | Provide insurance to hitech integrated circuit des | Purchase of approximately 1000 furnished homes in eastern suburbs of Cuyahoga County. Homes to be renovated and rented to responsible tenants with good history. Homes may be sold at some future date when housing market stabilizes and markets recover. Meanwhile, strong rental demand to keep operation profitable while maintaining the homes. These homes may also be rented to section 8 tenants with good rental histories. Each home to have a geothermal energy system installed. | new venture | 100 | 91 to 180 days | \$5,000,000 |
| Cuyahoga | Glenwillow WW Collection System Replacement | Provide insurance for development of new hitech products specifically in semiconductor area. This will foster new product development because of confidence of insurance the company obtained. Also my company will create Ohio jobs ranging from PhDs to software professionals to sales personnel to write software to determine the viability of the project and also to sell the insurance to different companies. Currently the failure rate of semiconductor industry products is about 50% in a billion \$ market. | Courtney Properties, Inc. | 10 | 91 to 180 days | \$300,000 |
| Cuyahoga | Glenwillow Water Distribution System Replacement | In the economic downturn insurance sales is expected to surge especially companies would want insurance for new product development. This project would replace the a 60 year old waste water distribution system which serves 96 households, all of which would qualify as low income. | Courtney Properties, Inc. | 10 | 91 to 180 days | \$300,000 |
| Cuyahoga | Ameritrust Tower Redevelopment | This project will replace a 60 year old water distribution system which serves 96 households, all of which would qualify as low income. This funding will allow for the development of a major office/retail/restaurant complex with parking included in downtown Cleveland at E. 5th and Prospect. This includes adaptive reuse of a vacant historic office structure to 162 apartments and a 132 room hotel, restoration of a 143,000 sq. ft. office building and improvement of two new buildings with 1,151 spaces. This project would be a great catalyst for redevelopment in Euclid Avenue from E. 9th to Phosphate Square. | City of Cleveland, Office of Mayor | 350 | 91 to 180 days | \$5,000,000 |
| Cuyahoga | Job Skills & Computers | The public library is an institution that offers all classes for free. This grant will allow us to add one additional Technology Trainer. Cuyahoga County Public Library would like to increase the number of computer training classes offered to the displaced worker. With the current high unemployment rate many displaced workers need to first update computer skills before they pursue another career path. This grant will allow CCLP to offer additional classes. | Cuyahoga County Public Library | 1 | 0 to 30 days | \$75,000 |
| Cuyahoga | Fiber Connection to Mayfield City School District | Mayfield Village has already invested in fiber optic cables that will encircle Beta Drive, it's commercial park. We would like to extend our fiber network to the Mayfield City School District office on SOM Center Road in Mayfield Heights. | Mayfield Village | 10 | 0 to 30 days | \$50,000 |
| Cuyahoga | Career Counselor | Cuyahoga County Public Library is looking to add one additional Career Counselor to assist the growing number of unemployed and underemployed in Cuyahoga County. Our Career Center is a nationally recognized Adult Career Planning Resource Center. The Career Center is available to meet with job seekers at the High Heights Branch and a few of our other branches. In operation since 1976, its comprehensive service is on the cutting edge of meeting the needs of adults in career transition or job search in this turbulent time. We provide assistance to adults in career decision-making, conducting effective resumes, job searching strategies, interview preparation, and education and training, setting up an email account, attaching a resume to an email, the basics of Microsoft Word, the Resume Wizard in Microsoft Word, and applying for on-line job applications and job search engines. | Cuyahoga County Public Library | 1 | 0 to 30 days | \$75,000 |
| Cuyahoga | Electronic Public Classrooms | In order to the growing demand for free internet access and for community group space offering computers and internet access CCLP will offer these services at every branch. The equipment needed for this project would be 8 laptops with software to have an electronic classroom at every branch. | Cuyahoga County Public Library | 1 | 0 to 30 days | \$432,000 |
| Cuyahoga | Hybrid Vehicles | As library vehicles are taken out of service they will be replaced with a Hybrid vehicle. This will save on gasoline consumption and reduce the carbon footprint of CCLP's vehicles. | Cuyahoga County Public Library | 0 | 31 to 90 days | \$75,000 |
| Cuyahoga | Olmsted Falls Library | Olmsted Falls - New construction of 25,000 SF library. This is a replacement of original building that currently does not meet the needs of the community. This project will provide educational support, information services, high-speed internet access, and other valuable library services. This larger space will increase library material offerings from currently available to the community, provide adult programming and continuing education and public meeting space. | Cuyahoga County Public Library | 40 | 181 days or more | \$5,200,000 |
| Cuyahoga | Early Learning Center/Charter School Partnership | Plus the alignment of a high-performing social services provider of early learning, birth to 5 years old, and a high-performing, nonprofit and public school/district, charter school business kindergarten to 5th grade school. This strategic alignment will create a high-performing education system for children of poverty starting at 3 years of age and serving the child and family in a high-quality, seamless system until 5th grade. Funds will be utilized for start up expenses, including capital upgrades. | Center for Families and Children | 15 | 31 to 90 days | \$630,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | Warrensville Library | Warrensville- New construction of 25,000 SF library. This is a replacement of original building that currently does not meet the needs of the community. This project will provide educational services, high-speed internet access, and other available library services. This larger space will increase library material offerings from currently available to the community, provide adult programming and continuing education and public meeting space. | Cuyahoga County Public Library | 40 | 181 days or more | \$5,200,000 |
| Cuyahoga | Early Learning Family Center-Mather | A few of funds for basic capital updates previously requested here, those funds will be used for a large scale capital project to expand CFC's Mather Early Learning Center into a Family Support Center providing early learning services and family life education and support. Located in the Union/Woodland-Buckeye/Kirkman area of Cleveland, this site serves a challenged community where the majority of CFC families are below the poverty line. The Family Support Center will serve both the families currently receiving services, as well as families referred from other community settings such as churches, agencies, schools, and child-serving settings in surrounding neighborhoods. The site will be LEED Certified Green and reduce energy use by 25%. Program services will include parenting classes with set curricula and support, both developed for particular populations' needs. Staff will be supplemented by experts in the community. Staff will be available for face-to-face meetings with families and available to help parents with family and available to help parents with family and available to help parents who cannot meet in person. | Center for Families and Children | 75 | 0 to 30 days | \$2,160,000 |
| Cuyahoga | Early Learning Family Center-Wade | For the purpose of this request, we are requesting to expand CFC's Wade Early Learning Center into a Family Support Center providing early learning services and family life education and support. Located in the Glenville neighborhood of Cleveland, this site serves a challenged community where the majority of CFC families are below the poverty line. The Family Support Center will serve both the families currently receiving services, as well as families referred from other community settings such as churches, agencies, schools, and child-serving settings in surrounding neighborhoods. The site will be LEED Certified Green and reduce energy use by 25%. Program services will include parenting classes with set curricula and support, both developed for particular populations' needs. Staff will be supplemented by experts in the community. Staff will be available for face-to-face meetings with families and available to help parents with family and available to help parents who cannot meet in person. | Center for Families and Children | 75 | 31 to 90 days | \$2,160,000 |
| Cuyahoga | Early Learning Center Capital Project-Wade | CFC's early learning program promotes the healthy, progressive development of children, respects and facilitates parenting competence, and supports and strengthens family functioning. All program services provided help parents/guardians increase their financial self-sufficiency as they enroll in training programs, attend school, and/or secure employment. CFC provides services in some of the most challenged communities of Northeast Ohio, operating the centers in the Cedar/Central, Linwood/Woodland-Buckeye/Kirkman, Glenville, and Garden Valley/Kirkman areas of Cleveland and in Cleveland Heights. Wade Early Learning Center traces its beginning in 1957 with the establishment of a nursery and kindergarten. The Center was moved to a new facility, constructed in 1957 on Yale Avenue in the Glenville neighborhood of Cleveland. Critical updates are now needed. Funds will be utilized to install new windows, roof/gutters, solar power system and a geothermal system for heating and cooling. | Center for Families and Children | 30 | 31 to 90 days | \$783,000 |
| Cuyahoga | Richmond Library | Richmond Library Expansion - Current space is not adequate. The library will be moving to another space. New library space will be 2000 SF that needs renovation and build out. This project will provide educational support, information services, high-speed internet access, and other library services to the community. | Cuyhoga County Public Library | 5 | 0 to 30 days | \$75,000 |
| Cuyahoga | College Fitness, LLC | Development of online applications for universities and the general public to inform them of health, diet and fitness related information and give them resources to manage their healthy lifestyle. The potential outcome if funding is received will be limitless. We will be helping the college community and individuals become healthier through the use of our next generation multimedia applications related to healthy eating, drinking, exercise and every day life. The funding will help us create 5-10 positions within our company to help us achieve our goal of positively impacting the lifestyle of everyone on the planet. | College Fitness, LLC | 10 | 0 to 30 days | \$500,000 |

| Cuyahoga | Randolph Road Pump Station Renovation | Randolph Road pump station is one of six dry well, wet well tube pump stations in the city of Bedford Heights. This station originally installed in 1958. Two of the other six tube stations that were 40 years old have been rebuilt in 2007. This is a continuation of the program. This pump station serves a residential area. The project includes installation of high efficiency motors, pumps, electrical control panels, variable speed drives, variable frequency systems and pump controls, transfer switches for emergency standby power generator connection. Currently we do not have the ability for emergency power. Any sustainable power outage impacts Tinkers Creek and the Cuyahoga River. Pump controls are made from an Ohio company along with the purchase of the other equipment from Ohio companies. | City of Bedford Heights Water Reclamation Plant | 5 | 31 to 90 days | \$50,000 |
| Cuyahoga | Back to basics trucking is what america needs | As a family owned and operated company based in Cleveland, OH for 23 years, we have provided as many as 65 jobs in several capacities but are limited to general transportation requirements. Funds are needed to purchase new equipment, advanced DOT training, and hire a qualified staff. Transportation is the backbone of the economy and with our economy down it's our number one need. We are looking for funding to help us get back to basics. Consideration for funds ticks down to many facets of our economy which in my opinion has a larger impact in a shorter time. | Statewide Express, Inc. | 60 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | North Street - Mill Street Reconstruction | Pedestrian and roadway improvements to the North Street, Mill Street and Cleveland Street corridor. Improvements include brick pavement replacement, asphalt resurfacing, drainage improvements, retaining wall construction and sidewalk construction. The purpose of the project is to spur falling pavement sectors and create a safe pedestrian route linking schools and retirement community with main shopping, public library, and residential and commercial sections of the Village. | Chagrin Falls Village | 50 | 181 days or more | \$2,500,000 |
| Cuyahoga | May Court Rehabilitation | Repair and replace 800 feet of roadway infrastructure to improve pedestrian and vehicular safety conditions. | Chagrin Falls Village | 15 | 31 to 90 days | \$200,000 |
| Cuyahoga | Black Owned Urban Photovoltaics Manufacturing Faci | Our goal is to revitalize the manufacturing sector in Cleveland, Ohio with cutting-edge Alternative Electrical power that will be needed by the many local and national agencies that will be needed to attain their green energy commitments. Being a Black owned firm we will be able to be the minority supplier on government contracts in the state of Ohio that require a portion of the contracts go to a qualified minority firm. We are almost ready the funds we request will allow us to ramp up to a fully operational facility within 12 months and secure the other funding from interested investors and equity partners. These funds will assist in leveling the playing field for a Black High Tech Clean Electrical Power Provider. | R.A.Energy International, Inc. | 500 | 0 to 30 days | \$36,000,000 |
| Cuyahoga | DESIGN CHILDREN'S ARTWORK | DESIGN CHILDREN'S BOOK: TO ADVANCE EDUCATION IN 9 YEAR OLD CHILDREN OR LESS. TO BE PREPARED FOR THE GLOBAL ECONOMY. | DESIGN | 2 | 0 to 30 days | \$250,000 |
| Cuyahoga | Positive Education Program Autism Center | PEP Harbor serves children ages 3-21 with autism spectrum disorder and other complex developmental disabilities, all of whom are experiencing significant impairments in communication. These students come to PEP from more than 30 school districts from Cuyahoga and contiguous counties. Through future collaboration, peer professionals who work with children with ASD will also be supported by this autism center. | Positive Education Program | 150 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | UV cured powder coating | Continued development of UV cured powder coatings and technology to replace high energy consuming thermal coating technologies and other environmentally polluting coating materials. UV cured powder coatings are fundamentally energy efficient, consume lower energy inputs in application, require smaller foot print for spray application lines, contain 0% VOCs (volatile organic compounds) HAPs (hazardous air pollutants), DVUV Holding, LLC and its subsidiary companies, Kayland Polymer Ltd, and DVUV, LLC are the worldwide leaders in the manufacturing and application of UV cured powder coating materials. This program will enable DVUV Holdings to expand the market for leading application lines for UV cured powder coatings and the production of UV powder coating materials. | DVUV Holdings, LLC | 10 | 0 to 30 days | \$2,500,000 |
| Cuyahoga | Walters Road Sanitary Sewer | The markets for UV cured powder coatings are furniture, healthcare, transportation, infrastructure. Replace 1,000 feet of sanitary sewer and abandonment of a sanitary lift station. The purpose of the project is to prevent future basement flooding, reduce inflow and infiltration and save energy and maintenance costs by eliminating lift station. | Chagrin Falls Village | 15 | 31 to 90 days | \$160,000 |
| Cuyahoga | Cleveland Metroparks West Creek Greenway Trail | In early 2004, the City of Parma and the West Creek Preservation Committee invited Cleveland Metroparks to evaluate the potential of providing stewardship and management responsibilities for the 278 acres that have been jointly preserved by the City of Parma, its residents through the support, and the West Creek Preservation Committee. During 2004-2005, Cleveland Metroparks began the evaluation and planning process that focused on maximizing public input through a variety of venues, including community meetings, a citywide survey, newsletters, and technical work group meetings. The collaboration of partners identified specific objectives to preserve and restore natural habitats, stream corridors, and forested areas in the reservation and to develop recreational opportunities, including an all purpose trail network. The West Creek All Purpose Greenway Trail will serve as a linear spine for future connections to the Towpath Trail, Cuyahoga Valley National Park, Cleveland Metroparks Emerald Necklace, Ohio & Erie Canal National Heritage Corridor, and to local features of interest including historic sites, neighborhood parks, and recreational facilities. | Cleveland Metroparks | 400 | 181 days or more | \$1,841,196 |
| Cuyahoga | Tinkers Creek Restoration | This project consists of the restoration of a portion of Tinkers Creek in Bedford Heights, Ohio. The creek serves as the main tributary for many communities and suffers from sedimentation, extensive phosphorus loading, and pollution. | City of Bedford Heights | 50 | 31 to 90 days | \$100,000 |
| Cuyahoga | Trinity detention pond | Work will include streambank stabilization, floodplain expansion, and grade control. Due to excessive flow from undraind water upstream the streambank has become unstable. The streambank will be stabilized by plantings and engineered placement of gabions. In other areas of the creek the floodplain will be expanded. The expansion of the floodplain will act as stormwater detention during storm events, reducing downstream flooding. The floodplain expansion will also reduce downstream sedimentation by forcing the sediment to settle out instead of flowing downstream. | City of Bedford Heights | 25 | 31 to 90 days | \$100,000 |
| Cuyahoga | Falls Landing Wall Repair | The pond will act as a detention and water quality facility. The area downstream from the pond has experienced flooding conditions for many years. The pond will provide storage for stormwater during large storm events. | Chagrin Falls Village | 5 | 0 to 30 days | \$40,000 |
| Cuyahoga | cleveland scrap going green | Stormwater runoff quality will be vastly improved by the construction of this project. Forebays and settling facilities will be included in the basin. This will allow for the sediment to settle in the basin prior to downstream discharge. The removal of sediment from the storm water discharge will have dramatic effects downstream. The channels that carry the open water flow will receive less sediment and will retain their flow characteristics. | Cleveland Scrap | 40 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | MDT | Repair of failing retaining wall that supports pedestrian boardwalk in center of village. Build new green facility with 25,000 sq. ft. area and over 2500 sq. ft. to heavy machinery for bio diesel. Install rain water runoff system to clean all water on the property, we want to further reduce our impact on the environment since our business in the process and recycle metals. We will be able to add 40-60 jobs over a 6 month time period once we are able to start. | Bentleyville Police | 17 | 31 to 90 days | \$27,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Shelter | Jewish Family Service Center of Cleveland is seeking funding to acquire and renovate two residential or commercial properties (possibly in foreclosure) in order to convert them into homeless shelters. One residence would serve men only while the other would focus on the handicapped and elderly. Both shelters would also have staff that can work directly with the Russian speaking population. Both shelters would have access to JFS's other services that serve the community including adults in mental illness, victims of domestic violence and services for elderly adults to age in place. The shelters would be located in the suburb of Cleveland Heights a suburb of Cleveland. Both shelters would have capacity to serve 20 adults each night. | Jewish Family Service Association of Cleveland | 3 | 31 to 90 days | \$350,000 |
| Cuyahoga | South Park Mall Family Fun Center | 20,000 to 30,000 square feet Family Fun Center and Arcade. This project will bring additional shopping traffic to the South Park Mall and create approximately 20 new direct jobs, plus anywhere from 20 to 50 indirect jobs. Planned opening date is projected for the November/December, 2009 Christmas Shopping season. The Fun Center will provide a safe center and arcade for parents to relax while their children to enjoy fun family time together. The Center will be available for birthday parties as well as drop off and walk in entertainment for the whole family. Also, as a by product, the additional traffic will present greater opportunity for current mall shops by increasing the mall. | Mid-West Supply | 20 | 91 to 180 days | \$600,000 |
| Cuyahoga | Community Small Business Centers | Cuyahoga County Public Library has seen an increase in requests for the services of a small business centers at individual branches. The requests coincide with the increase in requests for services through the Center Center. The growing number of requests are looking for a free place to work on projects and tasks usually completed in an office. To meet the needs of the community CCR will open up six Small Business Centers that will offer color copy, fax, computers, internet access, and equipment to complete publications and presentation materials. The centers will be strategically located across the county to serve the largest number of people. | Cuyahoga County Public Library | 0 | 31 to 90 days | \$120,000 |
| Cuyahoga | three.home | Keep small boutique retail establishment in business. Current and future employees and suppliers/vendors would benefit immediately. Small town locale and tourist destination in need of business stimulus. Help to continue the presence of small-business owners in American towns. | three.home | 10 | 0 to 30 days | \$100,000 |
| Cuyahoga | Expect Respect - Healthy Teen Relationships & Viol | The Expect Respect program utilizes peer-based education, where trained students inform their peers about healthy relationships and teen dating violence. This approach enables youth to have a greater comfort level with the subject matter, and because their peers are presenting, they are more attentive and more eager to participate. In addition to the performance, role plays, videos, and discussion groups are used to help the audience come to a better understanding about the topic. The goals of the program are to: • Increase awareness of the difference between healthy and unhealthy relationships and available community resources for teens in 8th - 12th grade. • Reduce the incidence of violence in teen relationships, and ultimately to reduce intimate relationships. • Enhance knowledge of school personnel, parents and other adults who have close contact with teens, so they can be better able to help them. The program is performed by a group of 20 student actors and an advisory board of 10 students. Student residences are spread throughout northeast Ohio. The program reaches approximately 1,000 students each year; similar efforts would be used to reach other areas. | Jewish Family Service Association of Cleveland | 1 | 0 to 30 days | \$50,000 |
| Cuyahoga | Educate and Support People Affected by Lupus | The Ohio Womens Health has chosen lupus as its ad campaign. We want to be ready to be on the forefront to serve those with lupus. We need to capacity build our foundation with staffing for meals, programs to assist development so that we do things that are sustainable in the economic climate. Lupus affects more than 60,000 people in Ohio. This disease affects whole families, not just the person with education, awareness, emotional support help and patients in doctors to empower them to have better quality of lives and observe options that can work and have better lives. Lupus is truly a misunderstood illness and it does not have to be. We are not sure that the economic climate may deprioritize our revenues but that is the fact the majority of funds come from individuals with income. We are not sure that the economic climate may deprioritize our revenues but that is the fact the majority of funds come from individuals with income. We are not sure that the economic climate may deprioritize our revenues but that is the fact the majority of funds come from individuals with income. We are not sure that the economic climate may deprioritize our revenues but that is the fact the majority of funds come from individuals with income. | Lupus Foundation of America, Greater Cleveland Chp | 2 | 91 to 180 days | \$60,000 |
| Cuyahoga | Why do businesses not buy locally? | Current "buy local" programs do not work or are a band aid solution. The entire with the local economy is in a state of recession. The supporting base of small companies is still there, but they are primarily local. The global economy has made it very difficult for businesses from Pittsburgh as it is to purchase one from the machine shop down the block. Local businesses suffer and jobs are lost. Current "buy local" programs do not work or are a band aid solution. The entire with the local economy is in a state of recession. The supporting base of small companies is still there, but they are primarily local. The global economy has made it very difficult for businesses from Pittsburgh as it is to purchase one from the machine shop down the block. Local businesses suffer and jobs are lost. Current "buy local" programs do not work or are a band aid solution. The entire with the local economy is in a state of recession. | Cuyahoga | N.E. Lift Station Forcmain Replacement | Replace 5.2 mile sanitary forcmain which has deteriorated in spots and has now failed 3 times in the past several years. We propose to replace it with HDPE and are hopeful to have no further issues with the future. | City of Solon | 15 | 91 to 180 days | \$5,220,000 |
| Cuyahoga | St. Mary's Stream Restoration | Improve stream conditions from residential base and construct local of property adjacent to the stream. Beech Brook will utilize funding to create a Benefits Facilitator program to assist families in accessing public benefit programs from the Dept. of Job and Family Services, the Board of Mental Retardation and Developmental Disabilities, the Dept. of Mental Health, and the Dept. of Health. Beech Brook is the frontline social services agency that serves low income people in Cleveland, one of the poorest cities in America. Because eligibility criteria vary with each program, according to the extent and type of disability, the individuals' incomes as well as other factors, it is very difficult to navigate the system. This program will provide the 10 Benefits Facilitators from the ranks of the unemployed plus one supervisor. Each will receive a salary, 40% K health and other benefits. Founded in 1982, BB is now a nationally recognized treatment center for emotionally distressed children, youth and their families with a staff of 480. Beech Brook serves over 21,000 children, youth and adults in Northeast Ohio every year. BB's priorities include helping populations with special vulnerabilities maintain economic stability, supporting families, and promoting safety, security, and health. | City of Solon | 10 | 91 to 180 days | \$163,000 |
| Cuyahoga | Benefits Facilitator Program | Improve stream conditions from residential base and construct local of property adjacent to the stream. | Cuyahoga | Grand Division Sanitary Sewer | New sanitary sewer will eliminate falling grades from residents homes Results will be multiple benefits for children in families with empowered parent networks at schools in Ohio. Newly created parent partner jobs would implement FAST Families and Schools Together with a proven effectiveness, evidence based model for kids. The main project goal is to create jobs as part of the social infrastructure and to help increase social capital, empower groups of parents, and improve child outcomes in Ohio schools. | City of Garfield Heights | 50 | 91 to 180 days | \$500,000 |
| Cuyahoga | FAST Program | New sanitary sewer will eliminate falling grades from residents homes Results will be multiple benefits for children in families with empowered parent networks at schools in Ohio. Newly created parent partner jobs would implement FAST Families and Schools Together with a proven effectiveness, evidence based model for kids. The main project goal is to create jobs as part of the social infrastructure and to help increase social capital, empower groups of parents, and improve child outcomes in Ohio schools. | Families and Schools Together, Inc. | 400 | 0 to 30 days | \$18,000,000 |
| Cuyahoga | North Huntington Detention Basin Improvements | Re-construction of North Huntington Detention Basin to provide significant additional storage in an effort to control both flooding and erosion issues which are occurring in this watershed. | City of Solon | 10 | 91 to 180 days | \$300,000 |
| Cuyahoga | Broadway Avenue Sewer Replacement | Replacing existing undersized storm sewers to alleviate basement flooding support more than 3,000 volunteers, who work at hospitals, schools, homeless shelters, and many other organizations. These caring individuals provide a collective 417,000 hours of service annually to 200 local nonprofits, which represents an economic benefit of over \$8.1 million to the Cleveland community. | City of Garfield Heights | 200 | 91 to 180 days | \$750,000 |
| Cuyahoga | Volunteerism in Greater Cleveland | RSVP's work is needed more than ever. Due to the economic crisis, nonprofits are finding that their budgets need to go further than before. At the same time, the needs they are addressing are growing. They need volunteer assistance to fill the gap between the services they must perform and the funding that they have available. An expert in the field recently wrote, "Volunteers are an untapped and vital resource to cultivate during these uncertain times as they can enable continuing service delivery." We aim to recruit and place an additional 750 volunteers during 2009, so as to ensure that our partners can carry out their respective missions. | RSVP of Greater Cleveland | 100 | 0 to 30 days | \$40,000 |
| Cuyahoga | Turney Road Sewer Extension | The sewer extension will eliminate falling residential septic systems by extending an existing sanitary sewer Build plant to process 100,000 tons of low rank (high in moisture but low in mercury, sulfur, and ash) coal for the Lakeland Power plant. Outcome is to increase electricity output and reduce emissions for this older coal fired plant. | City of Garfield Heights | 50 | 91 to 180 days | \$250,000 |
| Cuyahoga | Utility Emissions Reduction and Energy Efficiency | Project can be reproduced around Ohio, at older coal fired utility plants (processing more tons) to create more jobs and reduce Green House Gas emissions while permitting utilities to sell more electricity. Old, small coal fired plants are needed to meet electric demand but have had to convert to western US low rank coals (for emissions purposes), as such they are not as efficient as they were when burning eastern coals. Our technology removes water from these environmentally sound coals and improves the efficiency of older boilers. | FMI NewCoal | 12 | 0 to 30 days | \$10,000,000 |
| Cuyahoga | Edgepark Drive Illicit Discharge Elimination | This project will eliminate illicit discharges into Wolf Creek through CSO 245 by eliminating residential cross connections | City of Garfield Heights | 50 | 91 to 180 days | \$500,000 |
| Cuyahoga | Applewood Centers Psychiatric Services in Cuyahoga | Applewood Centers, Inc. is the largest provider of psychiatric services in Cuyahoga and Lorain Counties for children and youth living in poverty who rely on Medicaid and for those children whose families may be described as "working poor" who do not qualify for Medicaid. Moreover, there is a dearth of available childhood psychiatric services throughout Ohio and particularly in North East Ohio. As such, these services are cost prohibitive to maintain and provide, often provided at a significant loss to the agency, as child psychiatrists often charge upwards of \$250 or more for these services. Current economic conditions threaten these services and will likely result in decreasing budgets for a not full extension of this vital program. Applewood Centers, Inc. seeks funding to reinstate its crucial program and expand its offerings to those most vulnerable of our population - the children and youth of our region. BVU seeks funding to continue providing capacity building services to nonprofits throughout Northeast Ohio, including the Volunteer Consulting program, which is designed to engage highly skilled volunteers in providing substantial long-term consulting services to nonprofits in Northeast Ohio. BVU provides low cost volunteer consulting services that align with the demand for operational excellence in the nonprofit sector. BVU engages highly skilled volunteer consultants (Business professionals) and releases with specific operational/functional expertise and experience to provide up to 200 hours of consulting to a nonprofit for an affordable rate. | Applewood Centers, Inc. | 30 | 0 to 30 days | \$300,000 |
| Cuyahoga | Capacity-Building for Nonprofit Organizations | This program is based on other models across the country including Executive Service Corps, The Taproot Foundation and SCORE, and is designed to be self sustaining by 2010. When nonprofits access BVU's capacity-building services, it increases the board and staff's capacity to address specific operational and functional challenges. Longer term, nonprofits have the capacity to govern and manage their organizations more effectively, therefore strengthening their ability to leverage limited resources to achieve their missions. The Spanish American Committee (SAC), a not for profit agency with over 43 years of existence will create a culturally diverse Community Multi-Service Center at 3140 West 29th St. Cleveland, OH Cuyahoga County, Congressional district 11, Ward 14. This Community Multi-Service Center will serve as an opportunity for SAC to continue all current human services programs, as well as expand our Workforce Development Program and Early Childhood Enrichment Center. Creating a holistic approach to assist individuals, children, and families on a path towards self-sufficiency. Throughout rehab and construction, this project will immediately employ 300 construction workers. Upon completion an estimated 25-30 additional full-time positions will be available. Our lease opportunities will create an opportunity for leasees to have additional staff to maintain their satellite offices. Through an initial grant from the Cleveland Foundation all pre-development tasks have been performed, a site has been located, and a purchase agreement has been submitted. This project is packaged and ready to move forward immediately. This center will give hope to a community so devastated by this economy. | Business Volunteers Unlimited | 3 | 0 to 30 days | \$30,000 |
| Cuyahoga | Community Multi-Service Center and Early Childhood | The Spanish American Committee (SAC), a not for profit agency with over 43 years of existence will create a culturally diverse Community Multi-Service Center at 3140 West 29th St. Cleveland, OH Cuyahoga County, Congressional district 11, Ward 14. This Community Multi-Service Center will serve as an opportunity for SAC to continue all current human services programs, as well as expand our Workforce Development Program and Early Childhood Enrichment Center. Creating a holistic approach to assist individuals, children, and families on a path towards self-sufficiency. Throughout rehab and construction, this project will immediately employ 300 construction workers. Upon completion an estimated 25-30 additional full-time positions will be available. This center will give hope to a community so devastated by this economy. | Spanish American Committee | 350 | 31 to 90 days | \$4,000,000 |
| Cuyahoga | Parma Heights Police Officer Hiring Project | Hiring 4 add'l police officers to offset pending retirements. Each hire is \$58,591, including benefits, for the first year, \$65,861 in second year, and \$71,420 in third. City is ready to accept full responsibility for salary and benefits following completion of the hiring process. | City of Parma Heights | 4 | 91 to 180 days | \$779,488 |
| Cuyahoga | Expansion to 2nd location | Investment in business as a drive in restaurant w/ patio and party room facilities. We have done a lot of research to determine the need and potential return for this facility in the proposed area and find that we will fill a void that currently exists. We will also be able to provide 16-25 permanent jobs in an area that is currently being held by the existing economy. The estimated impact on surrounding business will vary by establishment, but we do believe that we would be a net plus for the area as well as the area supports a pedestrian climate during the warmer months and the cultural benefits are enormous as well. | Romido Group,LLC dba: Migitello's Italian Express | 20 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Gates Mills Emergency Shelter | Gilmour Academy is considered the emergency shelter for Gates Mills, OH. Currently the school has a small electric generator that can only power the dormitory in the case of an natural or man-made disaster. This project would build a large electric generator that would utilize the existing gas wells on campus and be able to power the entire campus in case of an emergency. This would allow the shelter for close to 5,000 residents distributed throughout the campus buildings. This project would also create extra electricity which could be returned to the grid, power the schools' electric needs on day to day basis, utilize the excess heat back into campus needs and thereby reduce green house gases. Not only is it a safety project it is also a green project. | Gilmour Academy | 10 | 91 to 180 days | \$500,000 |
| Cuyahoga | SAP Training Institute for Ohio Youth | Ohio has one of the highest unemployment rates in USA. Many young graduates from Ohio are leaving the State (Brain Drain) because of lack of job opportunities. At the same time, many jobs in Ohio in the IT sector are filled with HI-B's from other countries for lack of suitable local candidates. To correct this situation I propose to start training programs in SAP, an integrated software used by many large and medium businesses, to enhance the job prospects of Ohio youth. There are many career opportunities in SAP. The jobs are better paid compared to other IT jobs. There are no such training centers in Ohio. Universities and Colleges are also not teaching this software. My training program will benefit both Ohio youth and Ohio businesses. It will enhance the employability of Ohio youth. Desirability of HI-B's will be reduced for these jobs which will be reduced. I am well qualified to run this project. I have a Ph.D. in Finance and have 10 years of experience as SAP consultant. I also taught SAP at various training institutes and I wrote a book on SAP. I propose to offer FREE training for about 600 candidates, out of which atleast 200 may get employment. | Datavare Technologies, Inc. | 200 | 0 to 30 days | \$1,200,000 |
| Cuyahoga | Pepperwood Storm Sewer Replacement | Replace storm sewer system which is inadequate leading to significant flooding in this neighborhood. | City of Solon | 15 | 31 to 90 days | \$2,100,000 |
| Cuyahoga | TecknoWorld | A 75,000 Square ft educational facility with the focus on technology. The facility would serve a dual purpose that would house a field trip and classroom atmosphere for youth of all ages. Interactive labs that will prepare all participants for higher education and job readiness. The facility will also house a cafeteria, technology museum, and retail space. | Camp Tech Inc. | 100 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Green manufacturing improvement for manufacturing | Capital additions and education thereof to an 58 year old existing metal stamping business to operate a green globally competitive manufacturing plant to keep 20 Cuyahoga county manufacturing jobs in place with the ability to grow 20 more manufacturing jobs. | Ace Metal Stamping | 20 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Police Headquarters and Municipal Detention Center | The Bedford Heights Police station also serves a municipal detention center that can house up to one hundred and fifty detainees. As such, the facility needs to be provided with Emergency back-up generator to protect the health, safety and welfare of the residents of Northeast Ohio. In the event of a natural emergency or act of terrorism this facility would act as an addition emergency shelter for both civilians and detainees. Traditionally in the event of an emergency the Police and Fire services have to be fully authorized Incident Command Center along with Emergency shelters. Recent national disasters have clearly demonstrated the inadequate emergency prepared of many local governments. Federal Emergency Management Agency (FEMA) has mandated that the emergency facilities in Greater Cleveland area should be able to house would complete one of the last remaining deficiencies in the City of Bedford Heights emergency response capability Plan. | City of Bedford Heights Police Department | 30 | 31 to 90 days | \$133,600 |
| Cuyahoga | Miles Road Storm Sewer Replacement | Sewer replacement residential flooding had occurred on an annual basis due to inadequate sewer size and deteriorated condition. | City of Solon | 10 | 31 to 90 days | \$600,000 |
| Cuyahoga | Fighting Urban Blight | Through property preservation work contracted through mortgage lenders, real estate companies, and community development agencies, the company works to board up vacant homes, maintain lawn and exterior property, fix code violations and makes repairs to vacant homes from blight into shanties. We would also work with the office of aging to provide discounted repair services to the elderly. Age 60+ would be prioritized in assessing the neighborhoods hit hard by foreclosures, and full of vacant/vandalized properties. | Northern Ohio Asset Services LLC | 15 | 0 to 30 days | \$150,000 |
| Cuyahoga | School Bus Security Camera Installation | In order to monitor student behavior/discipline, as well as any criminal activity in relation to Homeland Security, we are requesting monies to cover expenses to purchase 15 digital security cameras, to be installed in each school bus the Westlake City School District owns. We have the sources to purchase new, blue-tinted closed school buses to replace an aging fleet. Our district has the finances to purchase up to four new school buses per year. This number may decrease, due to the economic downturn. | Westlake City School District | 0 | 31 to 90 days | \$99,000 |
| Cuyahoga | Replacement School Bus Program | The Westlake City School District maintains a fleet of 59 school buses, located in Cuyahoga County. We are located in one of the 7 counties in the State of Ohio which have high emissions. We have 7 school buses which are 1993 models or older, and are not eligible for the EPA Retrofit program to have emission-reducing controls installed by a grant. By being able to acquire monies to purchase 7 new school buses with 2010 emission technology, we can greatly reduce the amount of diesel emissions into the atmosphere in an already polluted county. This is proposed collaborative effort between Community Action Against Addiction (CAAA) and other program, organizations and faith based community settings to provide help in arming re-entry soldiers with additional coping skills through marital health or substance abuse counseling. "We Get Re-armed Family Meetings and Dates", all meant to help assess and promote transition back to civilian life. CAAA have been providing evidence-based and effective prevention and treatment services, since 1971, for residents addicted to, or at high risk for using, drugs. We will partner with the local Veterans Administration Hospital and other programs to help assess and address substance abuse or other mental health concerns that may have developed during their tour of duty, and link to other needed services. Our key strategy is to assign them re-entry case managers/counselors. The end outcome is to help facilitate and strengthen family relationships by fostering non-threatening and kind ways open to help reduce stress and to help welcome soldiers back. The goal is to expand the capacity of the community at large to meet the needs of at least 300 heroes. The Veterans Administration Clinic, two nearby Veterans are in partnership with one assisted living facilities, and the nursing home. We also serve over 500 elderly clients living in the outside community. | Westlake City School District | 0 | 91 to 180 days | \$700,000 |
| Cuyahoga | Community re-entry Counseling for Soldiers & Family | Funding will establish a center for assistive technology, which will obtain and provide state of the art technological devices for the elderly. Incorporating these devices helps seniors stay independent in their homes/apartments. The center will be the first of its kind in Ohio. Categories of Assistive device: 1. Safety: fall prevention, stove and fire safety alarms, automated motion and light/electric appliance on/off mechanisms 2. Medication Compliance: automated voice system reminding the elderly to take medications, and alert family if they are not taking them 3. Health and Wellness: automated computerized blood pressure, glucose testing, and weight measurement system for the home care nurse/physician, special telephones and adaptive equipment 4. Cognitive Exercise: computer simulation games (e.g., CogniFit, MindFit) 5. Social Communication: video teleconferencing system with internet voice and visual communication. | Community Action Against Addiction | 50 | 31 to 90 days | \$1,725,501 |
| Cuyahoga | Assistive Technology (Senior Living) | Funding will establish a center for assistive technology, which will obtain and provide state of the art technological devices for the elderly. Incorporating these devices helps seniors stay independent in their homes/apartments. The center will be the first of its kind in Ohio. Categories of Assistive device: 1. Safety: fall prevention, stove and fire safety alarms, automated motion and light/electric appliance on/off mechanisms 2. Medication Compliance: automated voice system reminding the elderly to take medications, and alert family if they are not taking them 3. Health and Wellness: automated computerized blood pressure, glucose testing, and weight measurement system for the home care nurse/physician, special telephones and adaptive equipment 4. Cognitive Exercise: computer simulation games (e.g., CogniFit, MindFit) 5. Social Communication: video teleconferencing system with internet voice and visual communication. | Menorah Park Center for Senior Living | 1 | 0 to 30 days | \$175,000 |
| Cuyahoga | ECO-EARTH ENERGY ALGAE OIL CONVERSION TO BIOFUEL | Funding in the amount of \$19,670,000 is requested to acquire land, construct a new building and related infrastructure, purchase new machinery and equipment, and construct on-site a photobioreactor, capable of processing algae grown for refining purposes. The objective of EcoEarth Energy is to cultivate, produce and process algae mass, utilizing captured quantities of CO2, to qualify for carbon credit trading opportunities, so as to receive commercial value of from algae. EcoEarth Energy, an alternative energy company will be positioned to compete in the national and global economy to create Ohio jobs and investment. The project provides for the creation and production of a new renewable fuel source and reduction of CO2 emissions. The new construction, and investment in machinery and new equipment will also create 125 new jobs, fees, and new sales as well. The plan of operation for this bioreactor system is to utilize CO2 and H2O, siphoned directly from a major electric power plant flue gas stream. This project will provide for the supply of renewable fuel sources for military use and other commercial applications for food, pharmaceutical, and nutrition industries. | EcoEarth Energy, LLC | 125 | 0 to 30 days | \$19,670,000 |
| Cuyahoga | INFORMATION TECHNOLOGY | REBUILD AN OUTDATED TECHNOLOGY INFRASTRUCTURE SYSTEM AND TO PURCHASE COMPUTERS AND SERVERS FOR THE POLICE AND OTHER CITY DEPARTMENT. THE CITY WILL RE-EMPLOY PART-TIME EMPLOYEES TO MANAGE THE SYSTEM. WE DO NOT HAVE AN INFORMATION TECHNOLOGY DEPARTMENT AT THIS TIME | CITY OF WARRENSVILLE HEIGHTS | 2 | 31 to 90 days | \$325,000 |
| Cuyahoga | Infiltration and Inflow (I&I) Elimination | Identification and Elimination of Storm Water that is entering Sanitary Sewer System and resulting in basement flooding and pump station issues | City of Richmond Heights | 17 | 181 days or more | \$1,000,000 |
| Cuyahoga | Looping of Existing Dead End Water Mains - Various | Completion of watermain loops in areas of dead end mains. Benefit will be improved flowability | City of Richmond Heights | 7 | 181 days or more | \$500,000 |
| Cuyahoga | Water Line Replacements - Richmond Road Sidestreet | Replacement of various waterlines that exhibit higher than desired break rates and represent perpetual maintenance problems. Pavement reconstruction. | City of Richmond Heights | 30 | 181 days or more | \$2,500,000 |
| Cuyahoga | Water Line Replacement - Various Locations | Replacement of various waterlines that exhibit higher than desired break rates and represent perpetual maintenance problems | City of Richmond Heights | 15 | 181 days or more | \$1,000,000 |
| Cuyahoga | Individual Development Accounts | The financial crisis and subsequent credit crunch have brought new challenges to all Americans, especially WECO's target population of low to moderate income individuals and businesses. Individual Development Accounts (IDAs) are powerful wealth building tools that address the lack of IRAs, as a root cause of poverty. IDAs are savings accounts that are opened for and managed by low to moderate income individuals who traditionally \$750, take comprehensive financial education classes, and then have the savings matched at least 2:1 for purchase of an affordable asset: 1) a first time home, 2) startup of a business or 3) higher education of job training. EcoEstate economic independence by combining two important program attributes: resources and education. Critical to the success of the IDA program is the commitment required by the participants. They must attend several hours of financial education classes, consistently save, stay on budget, and be willing to change deeply ingrained behaviors. The classes focus on budgeting, reducing debt, credit repair, saving, avoiding scams | WECO Fund, Inc. | 100 | 181 days or more | \$1,000,000 |
| Cuyahoga | Various 12" Water Mains | Water main extensions on Chagrin River Road, Fairmount Blvd, and County Line Rd. | Village of Hunting Valley | 100 | 91 to 180 days | \$1,350,000 |
| Cuyahoga | Pearl Road/Brookpark Road Commercial District | The funding for this project would be for the engineering and construction design costs associated with bringing this project to the "ready to go" phase. This line includes the preliminary design and feasibility study that was completed in the past December 2008. The Pearl Road Brookpark Road intersection will include the area from the southern end of the I-480 overpass to Brookpark Road, including improvements that wrap the corner along Brookpark for the length of the corner properties only. The improvements include demolition of existing curbs and sidewalks, new sidewalks, curbs, curb ramps, landscaping, new trees for the whole length of street trees, parking lot screening, lighting, street scape/landscaping amenities at all three bus stops and gateway signage. This intersection is severely underserved as a gateway into both the City of Cleveland and the Old Brooklyn neighborhood. A series of Public and Private Investments must be utilized in order to fully grasp all of its potential. Street scape enhancements and infrastructure must be improved upon with a solid investment upon City of Cleveland signage as well as lighting of the alley ways. | Old Brooklyn Community Development Corporation | 5 | 31 to 90 days | \$115,000 |
| Cuyahoga | Outlook Avenue Storm Sewer Outfall Study | In 2008 a storm sewer outfall on Outlook Avenue was sampled by the Cuyahoga County Board of Health and high levels of fecal coliform were detected. While source tracking has begun through the County Sanitary Engineering Division, additional engineering studies will be necessary to determine the source of the discharge and develop solutions for the elimination of the discharge. | The City of Brooklyn | 10 | 0 to 30 days | \$50,000 |
| Cuyahoga | Outlook Avenue Storm Sewer Outfall Study | In 2008 a storm sewer outfall on Outlook Avenue was sampled by the Cuyahoga County Board of Health and high levels of fecal coliform were detected. While source tracking has begun through the County Sanitary Engineering Division, additional engineering studies will be necessary to determine the source of the discharge and develop solutions for the elimination of the discharge. | The City of Brooklyn | 10 | 0 to 30 days | \$50,000 |
| Cuyahoga | NPDES Phase II MS4 Storm System Mapping | In accordance with Ohio NPDES General Permit # CHQ000002, MS4 mapping requirements have been expanded regarding the City's Storm System Map to include additional information including catch basins, pipes, manholes, ditches, and public and private storm water facilities. This project will begin research and mapping in 2009 with a goal for completion in early 2013. | The City of Brooklyn, Ohio | 10 | 0 to 30 days | \$100,000 |
| Cuyahoga | South Woodland 16" Express Water Main | Express loop between existing main on South Woodland running east to County Line Road - Priority Project as Determined by Cleveland Water Department | Village of Hunting Valley | 100 | 91 to 180 days | \$2,600,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | Pearl Roast Bridge over I-71 | This project cost would include engineering and construction design that would put the project in the "ready to go" category. The preliminary design and feasibility study was completed in December 2008. The finished project would include demolition of existing sidewalks, providing for new and expanded sidewalks and curbs on both sides (including concrete gutter road inlets). The plan would also call for new environmental fencing along both sides of the bridge as well as new barriers/fences between roadway and sidewalks. Existing conditions include a 72' driveway with a proposed change to 55'. This would include two driving lanes in either direction and a center turn lane. This would include widening the western sidewalk to 11' and the addition of a new sidewalk along the eastern side of the bridge, without altering the existing bridge structure or width. An ornamental median can also be added in the center of the span separating the left turning lanes for the north and south bound traffic. | Old Brooklyn Community Development Corporation | 5 | 31 to 90 days | \$90,000 |
| Cuyahoga | Downtown Area Gravity Sanitary Sewer Improvements | Gravity Sewers to connect downtown area to new sanitary lift station | Village of Gates Mills | 12 | 181 days or more | \$1,200,000 |
| Cuyahoga | Downtown Grease Trap | Gravity sanitary sewers and commercial grease trap installation in downtown area to reduce grease load to downtown pump station | Village of Gates Mills | 2 | 181 days or more | \$150,000 |
| Cuyahoga | St. Christophers Sanitary Pump Station | Replacement of a sanitary lift station immediately adjacent to the Chagrin River. | Village of Gates Mills | 2 | 181 days or more | \$225,000 |
| Cuyahoga | Center for Urban Watershed Science and Technology | The Center for Urban Watershed Science and Technology at Cleveland State University will provide state-of-the-art scientific support and innovative solutions for water resource protection and environmental restoration of Ohio's cities. The ecosystem services provided by watersheds, e.g. flood control, pollution abatement, climate moderation, biodiversity, and recreation, are vital to the sustainable economic growth of Ohio's cities, but are facing accelerating challenges due to inappropriate development in many places and degrading infrastructure in others. We will capitalize on existing strengths at Cleveland State University in urban ecology and water resources, urban planning, and environmental engineering to form a multi-disciplinary Center to find new and innovative solutions. Further, the Center will attract a leading figure in urban environmental science to Cleveland State through an endowed chair, as well as hire 5 additional scholars or fellows. The program will also train up to 20 undergraduates and 10 graduate students annually to provide future leaders of environmental restoration, with emphasis on minority students. | Cleveland State University | 60 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Suffolk Estates Sanitary Forcemain Replacement | Replacement of antiquated forcemain that services a newly installed sanitary lift station | Village of Gates Mills | 3 | 181 days or more | \$300,000 |
| Cuyahoga | Downtown Pump Station and Treatment Plant Replacem | Abandonment of existing treatment plant, which outflows to Chagrin River, and replacement with new sanitary lift station(s) and forcemain(s) | Village of Gates Mills | 15 | 181 days or more | \$1,500,000 |
| Cuyahoga | Downtown Old Brooklyn | The ultimate request would be for engineering and construction design. This project would follow the recently completed preliminary design and feasibility study that was completed in December. Wildlife Way to State Road Based on a complete reconstruction of the roadway that would include narrowing the street, widening sidewalks, adding bike lanes, burying utilities, landscaping and street trees, public transit enhancements, incorporating street scape amenities and public art. | Old Brooklyn Community Development Corporation | 5 | 31 to 90 days | \$600,000 |
| Cuyahoga | Oxygen Analyzer # 07063 | The downtown area of the Old Brooklyn neighborhood is also its largest commercial district and offer a great opportunity to dramatically improve roadway configuration. The recent preliminary design and feasibility study has determined that the current seven lanes can be eliminated in favor of a street within this historic walkable district, resulting in no driving lanes in either direction and a central turning lane, which would be a major benefit offering the possibility of a bike lane that will continue through the neighborhood to link to the metro parkway path trail and the Chagrin and Metro Parks Zoo. Between Wildlife Way and Broadview Road this section of Pearl Road is part of the national Scenic by-way. The project will use design alternatives that are used to reduce the amount of oxygen in the fuel gas entering into the atmosphere from the engine. Renewable biofuels and fossil fuels. To improve fuel efficiency and reduce NOx, SOx and "greenhouse gas" pollution, oxygenated fuels can be used within commercial, institutional, and industrial boiler combustion control and instrumentation systems to effectively reduce emissions. Gas complete combustion is efficiently optimized. | UniControl Inc. | 6 | 0 to 30 days | \$10,000 |
| Cuyahoga | Egbert Road Water Main | This project provides US design and manufacture of oxygen analyzers for use in combustion control and instrumentation systems for boilers, and will achieve greater energy efficiency and reduced pollutants. This project would consist of the replacement of approximately 11,700 linear feet (2.25 miles) of existing 8" water main with a new 8" ductile iron pipe water main of the same length. This work would also consist of the replacement of approximately 40 fire hydrants and the re-piping of all residential connections to that length. The work proposed would save space along the entire length of Egbert Road. This high traffic main is documented by the Village of Walton Hills. This work is necessitated due to the unusually high number of breaks to the existing water main. The high traffic main is documented by the Village of Walton Hills. Completion of this project would result in a higher quality drinking water and a consistent water pressure to the residents of this area. Additionally, each water main break requires a repair that damages and weakens the existing pavement along Egbert Road. It should also be noted that the Village intends to completely resurface Egbert Road within the next 2-3 years and it would be both beneficial and good engineering practice to replace the water main prior to any complete resurfacing work. Drive actuators are the motors that position the fuel valves and combustion air dampers in the vast majority of commercial, institutional, and industrial boilers and hot water generators. These actuators are a critical component for the combustion control systems of the majority of fossil, renewable, and advanced combustion energy systems, and must be cost effective, reliable and accurate to efficiently and safely control the combustion process within a boiler. | Village of Walton Hills | 25 | 31 to 90 days | \$704,250 |
| Cuyahoga | Servo-Drive Actuator # 07061 | Most currently available drive actuators are expensive, imported, and inaccurate, making efficiency improvements difficult, costly and less competitive. | UniControl Inc. | 12 | 0 to 30 days | \$20,000 |
| Cuyahoga | Electrical Snap-Acting Switch | This project provides the US design and production of a cost-effective, reliable, and accurate servo-drive actuator for use within boilers burning renewable and fossil fuels. Differential Pressure Switches are used to monitor air-flow and control critical processes in residential, commercial, and industrial heating, ventilating, and air conditioning systems. Currently, a vast majority of differential pressure switches utilize some form of an electrical "snap-acting" switch mechanism to provide the electrical contact movement for a control function. A large percentage of these snap switches are imported from the USA and many have various cost, quality and reliability problems. This project entails the US design and production of a new, innovative snap-switch mechanism for use in differential pressure switches, as well as other snap-switch applications. Ohio jobs will be created and retained with less dependency on imports. The proposed school building infrastructure project consists of the construction of one (1) new high school, four (4) elementary school buildings and renovation of one (1) middle school facility located on board-owned property. This project will service over 4,100 Westlake students on a per K thru 12 basis. Current educational facilities in Westlake have been evaluated by the Ohio Schools Facilities Commission (OSFC) and have been identified as being grossly below minimum standards to meet current and projected educational needs. The OSFC has provided evidence documenting that all of the school facilities to be newly constructed have exceeded the 20 rule (86.7% standard set by the Commission). The middle school facility to be renovated is also better than at 60%. Total square footage of the proposed construction and renovation of school facilities is 588,125. An independent environmental study has been completed and shows the district currently over capacity at six (6) locations with the population growing at an estimated 0.5 students per year. Outcomes come in the form of stimulating the local and regional economy by the number of jobs created due to the scope of the project. | UniControl Inc. | 12 | 0 to 30 days | \$75,000 |
| Cuyahoga | Westlake Schools 20/20 Facility Project | Development of control and instrumentation system for effective and efficient combustion of biofuels in commercial, institutional, and industrial boilers and hot water generators. Bio-fuels are available for the combustion source of boilers, as either "stand-alone" fuels, or as an "additive", complementary second fuel burned along with fossil fuels, such as coal. The addition of renewable biofuels provides reduced dependence on non-renewable sources. Specialty control and instrumentation systems are needed to effectively manage and monitor these combustion and boiler-related processes to achieve highest efficiency, reliability, and safety. | Westlake City Schools | 875 | 31 to 90 days | \$118,750,000 |
| Cuyahoga | Biofuel Combustion Controller # 05056 | Replace 14,829 inaccurate, outdated meters throughout the City of Lakewood with new meters. | UniControl Inc. | 10 | 0 to 30 days | \$10,000 |
| Cuyahoga | Water Meter Replacement Program | This project will bring equipment into regulatory compliance. | City of Lakewood, Department of Public Works | 30 | 31 to 90 days | \$5,250,000 |
| Cuyahoga | Wastewater Treatment Plant - Secondary Digester Co | This project will address the installation of approximately 1200 linear feet of 10 inch sanitary sewer to facilitate the abandonment of approximately 20 failing septic tanks located on Schreiber Road just east of the Garfield Heights corp line with Maple Heights. The sewer will be used to accept additional flow from Garfield Heights as required. The project will help eliminate illicit discharge from failing septic tanks into a tributary of the Cuyahoga River. | City of Lakewood, Department of Public Works | 22 | 91 to 180 days | \$1,250,000 |
| Cuyahoga | SCHREIBER ROAD SANITARY SEWER EXTENSION | To meet the Kyoto Treaty requirements, Novus's Stratell, in conjunction with Linvoren Labs, developed a geologic sequestration program off Hwy 18 in the North Sea. Compass Energy, recognized that their location in Cleveland possesses the identical geologic formation. The formation is ideal for CO2 sequestration since it is projected to have less than 1% migration per 100 years. We believe based off our elevation, 578 feet sea level, and the projected depth required to fill city chambers, 856 feet, a total depth of 1,434 feet will be required based on our sequestration program. At an estimated drilling cost of \$55 a foot, the total cost will be \$78,870.00. The reuse of the CO2 would be in dry cleaning. The system was developed by Coal Cleaning Technologies, Inc. named the emerging energy recipient in the technology category in the 2008 Talike Awards, cost to be determined (TBD). We are requesting a grant, cost \$78,870 (drilling, and dry cleaning equipment, TBD, under the Fossil Energy Research and Development carbon capture and innovative concepts for beneficial CO2 use. | City of Maple Heights | 16 | 91 to 180 days | \$210,000 |
| Cuyahoga | Carbon Sequestration | Replacement of 2 emergency power generators for stand-by electricity for emergency situations. 2 system generators require repair to restore water system reliability during frequent power outages. This project will address the replacement and apporation of approximately 1500 linear feet of storm and sanitary sewer with overland installations and combined manholes. | Compass Energy LLC | 8 | 0 to 30 days | \$78,870 |
| Cuyahoga | Water System Emergency Power Generators | The project will help reduce the volume of inflow and infiltration into the sanitary sewer system and the resultant back-up of sewage into the basements of residential dwellings. The targeted sewers are on Beechwood Avenue. The direct benefit is to approximately 120 dwellings with indirect benefits to all downstream residents on the Maple Heights System. | Chagrin Falls Village | 10 | 31 to 90 days | \$90,000 |
| Cuyahoga | BEECHWOOD SANITARY AND STORM SEWER REPLACEMENT | Intending to establish a service that will help low/middle-income taxpayers whom pay a high percentage of their return to large corporations, where as the majority of these funds would remain with the taxpayer. The outcome of which would increase spending, and be a factor in the recovery of the economy. | City of Maple Heights | 26 | 31 to 90 days | \$630,000 |
| Cuyahoga | tax services | In conjunction with the Cities of Pepper Pike and Moreland Hills undertaking the Creaks/Woodland Glen WWTP Abandonment and Pumpout Replacement Project, which includes decommissioning existing facilities to pumpstations and equalization stations and constructing the necessary sewers to convey the sewage from the pumpstations to the border of the City of Mayfield Heights in order to provide additional and improved sewer services to its residents and businesses located within the Cities of Pepper Pike and Moreland Hills, the NECRSD will construct a replacement of its SCM Center Retain Basin located on SCM Center Road in the City of Mayfield Heights to the border of the City of Pepper Pike (the "SCMRS-PP Project") in order for the District to serve the additional area where said retain sewer shall convey sanitary flow to the NECRSD facility Wastewater Treatment Plant. | lee enterprises | 4 | 181 days or more | \$15,000 |
| Cuyahoga | Creekside/Woodland Glen WWTP Abandonment and Pumps | The construction of two, 1 to 1.5 megawatt wind turbines at the AncelorMittal Cleveland facility will allow the company to offset a portion of our almost \$20 million/year electrical usage costs, help reduce our current workloads of approximately 1,700 with an annual payroll of \$180 million, create much needed carbon emission credits to support our steel-making operations, and allow us to remain competitive in a tight global market. This renewable energy project will reduce our carbon footprint and reduce greenhouse gas emissions by approximately 6,000 tons/year. The operators at our Cleveland Facility also support around 3700 jobs with vendors and suppliers with a \$200 million annual payroll paying approximately \$38 million in state and local taxes. | Northeast Ohio Regional Sewer District | 50 | 31 to 90 days | \$6,820,000 |
| Cuyahoga | ArcelorMittal Cleveland Wind Power Project | | ArcelorMittal Cleveland | 1767 | 91 to 180 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | GRANITE ROAD PUMP STATION REPLACEMENT | The existing pump station was built in the 1950's upgraded twice, and is in need of a major renovation. The station serves a potentially major industrial area of the City. At full development the design average daily flow is 127,000 gpd. Due to expected flow the station meets the CSES policy for a standard 10'x20' regional section lift station complete with standby engine for backup during power outages and telemetry to allow for remote monitoring. This configuration can make use of the existing station basement as the future wet well to minimize costs. There is no history of force main breaks so the existing force main can be reused, further reducing the cost. Some additional property will need to be acquired to expand the site. A minimum 25' wide access road is needed. The parcel size should also be increased to at least 100' X 130'. The exact configuration will depend on the actual field location of the existing station and wet well, but should encompass the lift station and force main. Once the connection is made the existing pumping station and its overflow will be demolished. | City Of Maple Heights | 20 | 91 to 180 days | \$500,000 |
| Cuyahoga | MILAN/HARLAN SANITARY SEWER REPLACEMENT PROJECT | This project will address the replacement of approximately 2000 linear feet of 10 inch sanitary sewer, some separate and some with overflow/interconnections and combined manholes. The subject sewer is in critical condition and the site of frequent blockages. The project will help reduce the volume of inflow and infiltration into the sanitary sewer system and the resultant backup of sewage into the basements of residential dwellings. The targeted sewer is in the east yards of Milan and Harlan properties between Bellevue and Elyria. The direct benefit is to approximately 400 dwellings and a school with indirect benefits to all downstream residents on the Liberty Road System. | City of Maple Heights | 30 | 31 to 90 days | \$840,000 |
| Cuyahoga | PHILIP AND CLEMENT SANITARY AND STORM SEWER REPLAC | This project will address the replacement and separation of approximately 2000 linear feet of storm and sanitary sewer with overflow/interconnections and combined manholes. The project will help reduce the volume of inflow and infiltration into the sanitary sewer system and the resultant backup of sewage into the basements of residential dwellings. The targeted sewers are the portions of Philip and Clement Street that drain into the Raymond Street sanitary sewer. The direct benefit is to approximately 100 dwellings with indirect benefits to all downstream residents on the Raymond Street System. | City of Maple Heights | 24 | 31 to 90 days | \$840,000 |
| Cuyahoga | Community Center Improvements | Improvement to the Brooklyn Heights Community Center parking lot. The parking lot and building also act as a safety and emergency evacuation shelter for the local school and community. The improvement will include providing more parking and proposed upgrades to the existing facility. This project will provide for the separation of approximately 24 combined manholes with overflow/interconnections of sanitary and storm sewers. The targeted manholes are located on Maple Hill Boulevard from Broadway Avenue to West Boulevard and on Beachwood at the intersections of Broadway, Hazenwood, Edgemoor, and Delaware. | Village of Brooklyn Heights | 10 | 31 to 90 days | \$165,000 |
| Cuyahoga | VARIOUS ROADS MANHOLE SEPARATION | This project will help reduce the volume of inflow and infiltration into the sanitary sewer system and also allow the sanitary sewers to be accessed for routine cleaning, servicing, and maintenance. | City of Maple Heights | 20 | 31 to 90 days | \$360,000 |
| Cuyahoga | Lake Link Trail | The Lake Link trail is a 1.2-mile greenway corridor in an abandoned rail right-of-way in the Flats neighborhood of Cleveland. A major component of the trail will be a stormwater detention corridor that will hold urban stormwater runoff thereby diverting water from the CSO that overflows into Lake Erie. The Northeast Ohio Regional Sewer District is providing in-kind engineering services to determine the amount of stormwater that will be diverted, sources of runoff, and where the water is currently going. Because the bottom railroad is about 20 feet below street level, it is already serving an accidental stormwater detention function. Preserving this is a priority of the project. ParkWorks has obtained a \$1.3 million grant from the Clean Ohio Fund to acquire a portion of the railway and has been granted an assessment worth \$2.1 million to the remainder. A Phase I environmental assessment is underway. | ParkWorks | 500 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Main Avenue Linear Park | The Main Avenue Linear Park involves restoring the Cleveland Main Avenue Bridge stormwater drains to flow into a series of bio-retention cells. These pools would lead to the Cuyahoga River while naturally removing harmful chemicals from the water. This project will reduce the amount of water that would flow into Cleveland's CSO which overflows into Lake Erie. The park will also serve as valuable recreational greenspace for surrounding residents. | ParkWorks | 500 | 0 to 30 days | \$18,374,650 |
| Cuyahoga | FAIR ST. PUMP STATION | 800' 8" IN SEWER, 110' 4" FORCE MAIN, 160 SEWER LATERALS | CITY OF BEREA WATER | 50 | 31 to 90 days | \$383,000 |
| Cuyahoga | Main Avenue Linear Park | The Main Avenue Linear Park involves restoring the Cleveland Main Avenue Bridge stormwater drains to flow into a series of bio-retention cells. These pools would lead to the Cuyahoga River while naturally removing harmful chemicals from the water. This project will reduce the amount of water that would flow into Cleveland's CSO which overflows into Lake Erie. The park will also serve as valuable recreational greenspace for surrounding residents. | ParkWorks | 500 | 0 to 30 days | \$18,374,650 |
| Cuyahoga | Main Avenue Linear Park | The Main Avenue Linear Park involves restoring the Cleveland Main Avenue Bridge stormwater drains to flow into a series of bio-retention cells. These pools would lead to the Cuyahoga River while naturally removing harmful chemicals from the water. This project will reduce the amount of water that would flow into Cleveland's CSO which overflows into Lake Erie. The park will also serve as valuable recreational greenspace for surrounding residents. | ParkWorks | 500 | 0 to 30 days | \$18,374,650 |
| Cuyahoga | Bedford Heights WWTP Aeration Tank Expansion | Install the final aeration tank for the existing waste water treatment plant. The final tank was designed as part of the original design done as part of the plant expansion in 1970. The final tank will be used primarily for capturing H ₂ during rain events holding it and then treating once the plant has returned to normal operations after a rain event. The tank would eliminate by-pass of untreated waste water. | City of Bedford Heights | 25 | 181 days or more | \$250,000 |
| Cuyahoga | CWRU Institute for Sustainability | This project would form and fund an "Institute for Sustainability" at Case Western Reserve University. The funds would be used to fund research and education in two major areas: water quality and water recycling. In the area of water, funds would be used for a variety of projects that would promote restoration and policy in northeastern Ohio in the Lake Erie watershed, and build water testing and water technology development capabilities at CWRU for a variety of projects that are linked to local health and local industrial needs. In the area of water recycling, a "model house" restoration would begin, with the goal of showcasing health-related, energy and water efficiency related restorations that are greatly needed in Cleveland's aging housing infrastructure. | Case Western Reserve University, Physics Dept. | 53 | 31 to 90 days | \$3,500,000 |
| Cuyahoga | Lake Link Trail | The Lake Link trail is a 1.2-mile greenway corridor in an abandoned rail right-of-way in the Flats neighborhood of Cleveland. A major component of the trail will be a stormwater detention corridor that will hold urban stormwater runoff thereby diverting water from the CSO that overflows into Lake Erie. The Northeast Ohio Regional Sewer District is providing in-kind engineering services to determine the amount of stormwater that will be diverted, sources of runoff, and where the water is currently going. | Cuyahoga | Ben Venue Campus Sanitary Sewer Improvements | Build new Trunk Sewer, Pump Station Improvements, and new force main to the existing Bedford wastewater treatment plant. | CITY OF BEDFORD | 200 | 91 to 180 days | \$10,200,000 |
| Cuyahoga | Bedford Equilization Basin Rehabilitation | Basin cleaning, joint and seam repairs to existing equalization basin. | CITY OF BEDFORD | 20 | 31 to 90 days | \$200,000 |
| Cuyahoga | Sprink-Jennings Phase II | Construction 710 LF of sewer to prevent basement flooding in West 10th Street and direct flow to the downstream (DWO) side of CSO regulator. | Northeast Ohio Regional Sewer District | 6 | 91 to 180 days | \$150,000 |
| Cuyahoga | WWTP Abandonment & PS Improvement | Abandoning Creekside, Wadland Glen, Jackson Valley and Quail Hollow WWTPs for transportation to Eastern WWTP; installing flow equalization and improving pump stations. | Northeast Ohio Regional Sewer District | 273 | 31 to 90 days | \$6,820,000 |
| Cuyahoga | Bedford Taylor Road Pump Station Rehabilitation | Upgrade and expand existing Taylor Road Pump Station. | CITY OF BEDFORD | 50 | 31 to 90 days | \$4,250,000 |
| Cuyahoga | West 117th Street CSO-071 Outfall Repair | Control erosion and pipe deterioration at CSO-071 | Northeast Ohio Regional Sewer District | 23 | 31 to 90 days | \$585,000 |
| Cuyahoga | Bedford Sludge Storage Facility Improvement | Construct concrete pad for new storage shed for sludge cake storage. | CITY OF BEDFORD | 20 | 31 to 90 days | \$75,000 |
| Cuyahoga | RRN-6 - WWTP Building Roof Replacement | Replacing roofs on eight buildings at three WWTPs | Northeast Ohio Regional Sewer District | 100 | 91 to 180 days | \$2,500,000 |
| Cuyahoga | City of East Cleveland Stimulus Request 2009 | To provide adult educational services: classes, training, access to higher education opportunities, learning across the life span. This includes access to technology, education, and library initiatives. | City of East Cleveland | 400 | 0 to 30 days | \$9,000,000 |
| Cuyahoga | Archer Road Pump Station Improvement | Remove and replace the existing Archer Road Pump Station force main. | CITY OF CLEVELAND | 20 | 31 to 90 days | \$350,000 |
| Cuyahoga | City of East Cleveland Stimulus Request 2009 | This area involves education, workforce development, job training for city residents. In addition, it includes, business development loans, new market tax credits, the neighborhood stabilization program, for low-income city residents. | City of East Cleveland | 0 | 0 to 30 days | \$83,500,000 |
| Cuyahoga | Consumer Water Meter Replacement | The dependability and accuracy of residential customer water meters is essential to the operation and maintenance of the Bedford water system. The current meters, both commercial and residential are beyond their useful life and require replacement. Total residential accounts of 4750 plus 50 commercial accounts. | CITY OF BEDFORD | 20 | 31 to 90 days | \$2,700,000 |
| Cuyahoga | City of East Cleveland Stimulus Request 2009 | To provide equipment, vehicles for city's police, fire and EMS departments, traffic cameras, new officers, and additional support staff in law enforcement. | City of East Cleveland | 200 | 0 to 30 days | \$17,032,087 |
| Cuyahoga | Beech Brook Training Institute | BECH BROOK TRAINING CENTER provides services over a 200-acre campus, from its main entrance to its main parking lot. The center is a high-quality, high-capacity, high-compliance, and measured results, today's workforce requires state-of-the-art training and supervision. Proposed is the development of Beech Brook as a training center not only for agency employees, but also for employees at sister agencies throughout NE Ohio and beyond. | Beech Brook | 12 | 31 to 90 days | \$500,000 |
| Cuyahoga | City of East Cleveland Stimulus Request 2009 | To provide workforce development training opportunities for low-income youth and city residents. City will utilize small business loans to outreach for new business development, New Market Tax Credits for businesses and companies. | City of East Cleveland | 200 | 0 to 30 days | \$17,032,087 |
| Cuyahoga | City of East Cleveland Stimulus Request 2009 | Equipment and material cost to repair 171 city streets, roads, bridges, city and historic properties and buildings. | City of East Cleveland | 500 | 0 to 30 days | \$429,216,366 |
| Cuyahoga | Manufacturing & Green Energy Opportunities | Generally speaking, if students are not in college preparatory courses, school can become progressively more removed from what a student believes is his or her future. An initiative that was born out of the Northeast Ohio Manufacturing Summit, convened by Wile-Net and Magnet, was the early and continuing exposure of students to what manufacturing is and most importantly, what opportunities and (flexibility) can be provided with a career in manufacturing. Manufacturing, coupled with the green energy initiatives, will give some connection to the application of the skills and knowledge they are learning. He believes that speakers, CTO's, inventors and field reps will bring students within the inspiring walls and fences of manufacturing facilities and offer a connection to the business community. Our committee is composed of William Brink, Executive Vice President of CTE, Ed Watson, Director of East Lakes (West Henrick, Cynthia Marford, Phaedra B. Siga, Barbara and Craig Christy of Campus Energy. We are requesting \$156,000 from the State Energy Program. We will coordinate with Ms. Cheryl, Cleveland Schools, STEM. | N.O. Manufacturing Summit | 3 | 31 to 90 days | \$156,000 |
| Cuyahoga | WTP IMPROVEMENTS PHASE III | LAGOON CLEANING AND IMPROVEMENTS MSC IMPROVEMENTS, SCADA, INSTRUMENTATION AT PLANT | CITY OF BEREA WATER | 40 | 91 to 180 days | \$2,890,000 |
| Cuyahoga | METER REPLACEMENT | REPLACE APPROX 650 METERS TO INCLUDE AUTOMATIC READ | CITY OF BEREA WATER | 2 | 31 to 90 days | \$120,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Finished water ground storage tank | Construction of an 800,000 gal finished water storage tank. This proposal would establish a cooperative program with the Ohio Energy Office, US DOE, Ohio-based Investor Owned Utilities to | City of Berea Water | 40 | 181 days or more | \$1,300,000 |
| Cuyahoga | Ohio Center for Industrial Energy Efficiency | * Establish the Ohio Center for Industrial Energy Efficiency to serve as a focal point for EE activities in manufacturers. * Establish an infrastructure within that Center to deliver the energy efficiency products and services developed by DOE and OCE in a cost effective manner. * Integrate DOE products and services into OCE's program for industrial energy efficiency assistance and establish the basis for a continuing effort beyond the grant period. | Energy Industries of Ohio | 40 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | City of East Cleveland Stimulus Request 2009 | This category will include: wind initiatives, weatherization, lead abatement for the City of East Cleveland. Wind initiatives include wind turbines to generate electricity. Any PV/wind systems, fire systems not on existing systems are considered, low energy windows used in schools, upgrading energy to promote the high quality work the agency has become known for in the community. This is an unacceptable situation for Recovery Resources. The disassembled roof and inadequate HVAC system must be replaced. | City of East Cleveland | 300 | 91 to 180 days | \$50,000,000 |
| Cuyahoga | Green Roof Project | The leadership of Recovery Resources has decided that it will take this opportunity to launch the organization's first ever "Green" design and construction project. Not only will this serve as immediate facility needs, but it will also be an excellent demonstration of our prior commitment to the environment and sustainability. Members of the board of directors with extensive expertise in construction and green projects will serve as leaders of this project. In addition, Recovery Resources will leverage relationships with corporations involved in green design industry to maximize impact of the investment and control costs through in-kind donation where possible. | Recovery Resources | 20 | 31 to 90 days | \$350,000 |
| Cuyahoga | Children of Alcoholics - Reaching 6 to 13 year old | In these times of economic uncertainty, why should the State of Ohio support Recovery Resources' Children of Alcoholics (COA) program? Indicators point to basic needs - food, shelter, clothing - being a necessity for many residents of Ohio. RR would emphatically urge you to consider our services to children as a basic and fundamental need, one that is not being met but is desperately needed in our community. Basic needs are vital and unmet needs often ultimately shape the supportive services provided to their families for such necessities as food, shelter, and employment services while they continue their destructive behaviors. This has profound implications on the children involved, with COAs being two to four times more likely than others to develop alcoholism and other drug problems themselves. By meeting the adult while providing education and prevention services for the children, we can end the cycle of addiction. The children of our clients will learn that addiction is not that fatal, will be provided with coping mechanisms for dealing with the addition of a loved one, and will gain the skills necessary so as not to repeat the cycle. | Recovery Resources | 2 | 31 to 90 days | \$72,000 |
| Cuyahoga | SunPace Property | SunPace Property purchased 236,000sq ft. of industrial/commercial property with two rail spurs and ready Interstate 90 access in Cleveland. Specifically to create a Green Energy Zone within the complex while achieving a LEEDS certificate. Due to the credit crunch we had to build in the property. Our green tenants have infrastructure requirements and the banks are not lending. Without the infrastructure needed for our tenants' projects are on hold. There are over 60 jobs directly affected plus the tradespeople who would do the improvements. The without green tenants are an obvious low energy, resulting of energy efficient exterior building materials which would satisfy the LEEDS requirement for that Stimulus Package build-outs. SunPace Property is requesting a loan guarantee in the amount of \$1.2M. | SunPace Property LLC | 60 | 0 to 30 days | \$1,200,000 |
| Cuyahoga | Hard times - raising children | I don't really know how to fill this out, but I am a mother of 2 children and have custody of my neighbor. The neighbor is struggling and so is my family. I tried to get medical in Lorain County for me and all 2 children so we could have dental and vision care. The employer closed and so I and I was denied. I don't make great money, but I have bills, etc to pay and what I make is less than what I need. I would like a chance to clear my mind and have dental and vision for my children, but there is no help out there for me. I just moved to Cleveland so I am going to be really because now I have more bills. My boss said something that interests me - she said "we should get the money taken out of our check for the entire year of 2009 so that there is more money coming into our pockets and we can purchase things and put back into our economy" maybe this is something that we should look into because there are a lot of people struggling and need help and are not able to get it where there are people that are not even trying and get all the help in the world. Thank you for your time! | Children | 1 | 0 to 30 days | \$15,000 |
| Cuyahoga | South Branch of Sulphur Springs Restoration Project | The restoration of the South Branch of the Sulphur Springs watershed is a project of significant environmental pertinence. The majority of this watershed is considered a high quality, class III, headwater stream, which is one of the few streams in northeast Ohio supporting a native brook trout population. With the recent loss of a 14 acre slay (dam) on the Marsh property in the northern portion of the municipality, the City of Solon intends to move forward with a project to remove two pond structures, and the clearing of low banks that have accumulated fine/silt sediments. This purchase of the Marsh Property was accomplished through the Ohio EPA's Watershed Resource Restoration Sponsorship Program, and the purpose of this application is to seek assistance for the stream preservation portion of the work. The plans, specifications and bidding documents for this project will be prepared by an outside engineering consultant (Enviro-Service, Inc.) and will be ready by August 1, 2009. | City of Solon | 6 | 31 to 90 days | \$250,000 |
| Cuyahoga | City of East Cleveland Stimulus Request 2009 | Harbor Road Hospital Expansion to provide necessary health and wellness services to city residents. | City of East Cleveland | 150 | 181 days or more | \$10,000,000 |
| Cuyahoga | City of Bedford Water Distribution System Upgrades | The City of Bedford's water system requires several improvements recommended by two (2) separate Engineering reports to correct inadequacies within critical areas. Specifically the downtown business district (Plot Book No. 1). Cuyahoga County one of the oldest developed business areas in Cuyahoga County needs reinforcement to its water main system. Approximately 5000 linear feet of 12" water main is recommended for the following streets: First Street, Cross Street, Increase Street, Henry Street, Union Street and Broadway Street. | CITY OF BEDFORD | 50 | 31 to 90 days | \$900,000 |
| Cuyahoga | City of Bedford Water Main Improvements | Removal and replacement of approximately 2,250 linear feet of existing 80 to 100 year old four (4) inch water mains with standard eight (8) inch ductile iron cement lined water mains. Also included will be the removal and replacement of approximately 13,500 linear feet of existing six (6) to 100 year old (6) inch water mains with standard eight (8) inch ductile iron cement lined water mains. | CITY OF BEDFORD | 50 | 31 to 90 days | \$3,000,000 |
| Cuyahoga | West Creek Flume Removal | West Creek, a major tributary to the Cuyahoga River and Lake Erie has been incised and entrenched throughout the past fifty years, and most egregiously with the installation of a 1.4 mile West Creek has been dramatic harmful impacts with such development. A 500 linear foot section of the stream has been entrenched in a concrete flume along the highway, which is now failing. To aid restoration efforts and slope stability efforts, it would be optimal to remove the structure to allow for natural stream channeling by using proper channel migration (as well as other species), sediment deposition, habitat functionality, and other ecological improvements. Bioengineering tactics such as rockribs, live staking, rocklog weaves, brush layering, and other slope sequences would be installed. Engineering and design is complete. Preliminary water quality and habitat assessments have also been completed. | West Creek Preservation Committee | 75 | 31 to 90 days | \$1,750,000 |
| Cuyahoga | West Creek/Cuyahoga River Confluence Restoration P | To restore over 1200 linear feet of West Creek, create eight acres of wetlands, and regain access to floodplain. The site will be restored to a natural confluence area with abundant floodplain wetlands, vernal pools, a re-meandered West Creek, and a healthy riparian zone. The project will serve to improve West Creek habitat, improve water quality, and better West Creek and Cuyahoga River water quality through a significant reduction in nonpoint source pollution. It will serve to reduce downstream flooding potential through better floodplain protection and stormwater storage, and it will create a new and dynamic natural attraction where the West Creek Trail system (in development) will join with the Ohio & Erie Canal Towpath Trail. The Confluence Project will build upon improvements in West Creek water quality and ecology commenced through 10 years of stewardship by WPCP and a previous (2006) WRRSP award for West Creek stream restoration. Build a new light industrial park, and residential development on vacant property including property acquisition, roadway and utility installation for a potential user. | West Creek Preservation Committee | 110 | 31 to 90 days | \$2,500,000 |
| Cuyahoga | North Industrial Parkway Improvements | Site best management practices to improve drainage around the existing athletic fields and proposed walking trails within the existing park. Repair the existing slippage of hillside within a residential area; the repair will be to minimize further slippage and possible damage to surrounding houses. | Village of Brooklyn Heights | 300 | 181 days or more | \$2,750,000 |
| Cuyahoga | Brooklyn Heights Park Drainage Improvement | Site best management practices to improve drainage around the existing athletic fields and proposed walking trails within the existing park. Repair the existing slippage of hillside within a residential area; the repair will be to minimize further slippage and possible damage to surrounding houses. | Village of Brooklyn Heights | 10 | 91 to 180 days | \$55,000 |
| Cuyahoga | Belmont Erosion Control Repair | Site best management practices to improve drainage around the existing athletic fields and proposed walking trails within the existing park. Repair the existing slippage of hillside within a residential area; the repair will be to minimize further slippage and possible damage to surrounding houses. | Village of Brooklyn Heights | 10 | 181 days or more | \$700,000 |
| Cuyahoga | Granger Road Storm Sewer Repairs | Improve storm sewer along BR 17 to eliminate erosion and hillside slope failure. | Village of Brooklyn Heights | 5 | 91 to 180 days | \$575,000 |
| Cuyahoga | Bay Village Lake Road Pump Station | The construction of this pump station eliminates a sanitary sewer overflow that discharges directly into Wachsenmyer Creek approximately 200 feet south of Lake Erie. | City of Bay Village | 0 | 0 to 30 days | \$77,000 |
| Cuyahoga | Brooklyn Heights Park Sanitary Sewer Pump Station | Proposed pump station for existing park to eliminate the existing holding tanks and provide ODEPA approved waste water service. | Village of Brooklyn Heights | 12 | 31 to 90 days | \$700,000 |
| Cuyahoga | Bay Village Wachsenmyer Creek Sanitary Sewer Rehabilitation | This project consists of the rehabilitation of 2,830 linear feet of existing 10-15 inch sanitary sewer and appurtenances. The project would include the removal and replacement of approximately 1,300 linear feet of 6" watermain, 16 water service connections, 4 water valves, 5 hydrants and other appurtenances related to the watermain replacement. The replacement covers as the infrastructure nears its replacement life. Harvest and collect information and solutions to substance abuse addition in a searchable database. | City of Bay Village | 0 | 0 to 30 days | \$403,000 |
| Cuyahoga | Cambridge Street Water main Replacement | Site best management practices to improve drainage around the existing athletic fields and proposed walking trails within the existing park. Repair the existing slippage of hillside within a residential area; the repair will be to minimize further slippage and possible damage to surrounding houses. | Twin Keystone Water District | 10 | 31 to 90 days | \$195,600 |
| Cuyahoga | Substance Abuse - Towards New Solutions | Our organization will produce anti-occaine and anti-heroin documentaries. We will also create public service announcements, newspaper ads, television commercials, and educational literature promoting a healthy life style that rejects substance abuse of addictive drugs like heroin and cocaine. Our goal is to start a national movement, right here in Ohio, to reject psychoactive drugs for recreation. Evidence of our success will be reduced demand for illegal drugs. President Obama has called for healthcare reform by the end of 2009. Workflow.com is a leading producer of electronic medical records, which will be a key component of any reform package. In order for Workflow.com to receive money from the Federal program, we will need CCHT 2009 certification. We are already CCHT 2006 certified, but we need to renew certification. We want to hire specialists - creating jobs in Ohio - that will do gap analysis and specific programming that bring our electronic medical record software in line with the Federal standards. With this extra money, we will be able to focus our attention on making existing clients happy while not missing the target of Federal Healthcare reform. Existing pump station is over 25 years old and is very inefficient causing excessive electrical costs based on the number of users. In addition to the pump improvement we would require the purchase of a portable emergency generator that could be used for the five pump stations around the Village. Recovery Resources is uniquely qualified to provide services to mentally ill and/or substance abusing offenders. The agency has extensive experience providing services to the re-entry population. RR was the pioneer agency in this region to provide the Mentally Disturbed Offender program, the Conditional Release Unit, and as well as the program in Cuyahoga County designed specifically to serve the specialized needs of those with severe mental illness and co-occurring drug and alcohol addictions. Since 2002, RR has successfully operated the Pretrial Assesive Community Treatment Team. By design, the PMCT Team treats only those offenders with severe and persistent mental illness being released from prison or parole (the recidivism rate for this program is 25%, far below the 65% for the population not receiving PMCT services). The program offers the most intensive level of community treatment available, beginning with a several several weeks prior to the inmate's release from prison and accelerating to intensive assistance upon the individual's release. The psychiatric and psycho-social needs of all of these populations are as acute, but the other critical services, such as housing, job training, etc. often go unattended. Due to stagnant funding rates, RR has been forced | Drug Awareness and Prevention Inc. | 3 | 31 to 90 days | \$250,000 |
| Cuyahoga | Substance Abuse Prevention - Yes, together we can | Our organization will produce anti-occaine and anti-heroin documentaries. We will also create public service announcements, newspaper ads, television commercials, and educational literature promoting a healthy life style that rejects substance abuse of addictive drugs like heroin and cocaine. Our goal is to start a national movement, right here in Ohio, to reject psychoactive drugs for recreation. Evidence of our success will be reduced demand for illegal drugs. President Obama has called for healthcare reform by the end of 2009. Workflow.com is a leading producer of electronic medical records, which will be a key component of any reform package. In order for Workflow.com to receive money from the Federal program, we will need CCHT 2009 certification. We are already CCHT 2006 certified, but we need to renew certification. | Cuyahoga | Allotment Infrastructure Improvements, Phase II B | The project limits extend on Linden Drive from Parkway Boulevard to Balaban Road and on Parkway Boulevard from Linden Drive to Glenview Avenue. The work to be completed on this project includes a complete roadway reconstruction that will include all curbs, curb ramps, sidewalks, drive aprons, main line sanitary and storm sewers, individual service laterals and test tees, water main and water service laterals, and pavement. | City of Solon | 22 | 0 to 30 days | \$952,000 |
| Cuyahoga | Bedford Height WWTP Aeration Tank Expansion | Install the final aeration tank for the existing waste water treatment plant. The final tank was designed as part of the original design done as part of the plant expansion in 1970. The final tank will be used primarily for capturing B during rain events holding it and then treating once the plant has returned to normal operations after a rain event. The tank would eliminate by-pass of untreated waste water. | City of Bedford Heights | 25 | 91 to 180 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Cuyahoga | A Clear Path - Women's Homeless Program | In a 10-month period, nearly 600 women were housed at the shelter to facilitate direct contact with the women in an on-going basis. The goal of the program is each year, 50 clients will take part in 12 months of case management and will have immediate access to culturally competent substance abuse treatment. Long term client outcome measures will include recovery from substance abuse and mental health problems, accessing primary health care, securing employment or increased income through empowerment, gaining independent living skills, and attaining permanent housing. As a result of the case management services and treatment services provided by Recovery Resources many women are living sober, independent lives. They also received trauma treatment and linkage to entitlements, housing, employment and health care. | Recovery Resources | 5 | 31 to 90 days | \$200,000 |
| Cuyahoga | Assisted Living apartment building expansion | Bring services to over 250 residents. A recent study determined that there is a need for a significant addition of assisted living apartments in this area. Menorah Park will build 48 new apartments (a net gain of 43) as an addition to our Wiggins Place assisted living facility. By adding these apartments, over 10 additional community members can be served in a safe, secure, state of the art facility. These apartments also meet the growing needs of the senior community to age in place. Residential services include meals, housekeeping, and multiple daily activities such as outings, speakers, distance learning, etc. A full time nurse is also available to the residents. Currently, the average age of our residents is 87. At this time, 70 of our tenants have 1 or more chronic health issues. The most common diagnoses are hypertension, coronary artery disease, and arthritis. | Menorah Park Center for Senior Living | 100 | 0 to 30 days | \$16,000,000 |
| Cuyahoga | Bedford Heights WWTP Mixed Liquor Pipe Repair | Replace and replace three mixed liquor aeration tanks connecting the aeration tanks with the open channel to the final clarifiers. The current piping has several low meters and valves that restrict the discharge from the aeration tanks to the final clarifiers. The restricted flow causes the mixed liquor during a rain event to bypass the final clarifiers. The sewer system in the City of Bedford, Ohio dates back to 1900. It is speculated that through this program the sanitary and storm sewer systems can be cleaned, inspected and accurately evaluated to determine the condition of the City's sewer system. This project will provide the infrastructure information required to assess the sewer system condition and provide needed recommendations for future sewer repair projects. Also included will be catch basin cleaning and other incidentals. | City of Bedford Heights | 10 | 0 to 30 days | \$18,000 |
| Cuyahoga | Citywide Sewer Cleaning, Televising, and Repair | The sewer system in the City of University Heights, Ohio dates back to 1912. It is speculated that through this program the sanitary and storm sewer system can be cleaned, inspected and accurately evaluated to determine the condition of the City's sewer system. This project will provide the infrastructure information required to assess the sewer system condition and provide needed recommendations for future sewer repair projects. Also included will be catch basin cleaning and other incidentals. | CITY OF BEDFORD | 50 | 0 to 30 days | \$630,000 |
| Cuyahoga | Citywide Sewer Cleaning, Televising, and Repair | The sewer system in the City of University Heights, Ohio dates back to 1912. It is speculated that through this program the sanitary and storm sewer system can be cleaned, inspected and accurately evaluated to determine the condition of the City's sewer system. This project will provide the infrastructure information required to assess the sewer system condition and provide needed recommendations for future sewer repair projects. Also included will be catch basin cleaning and other incidentals. | CITY OF UNIVERSITY HEIGHTS | 50 | 0 to 30 days | \$450,000 |
| Cuyahoga | North Lift Station Stand-By Power | Install generator at north end lift station to provide stand by power to run pumps in cases of power outages. The project will resolve problem of high maintenance costs due to frequent power disruptions in the area. Preference will be given to Ohio manufacturers. | Chagrin Falls Village | 10 | 31 to 90 days | \$45,000 |
| Cuyahoga | Solon Road Stormwater | Replace and rehabilitate 1 mile of storm sewer system to reduce frequent roadside flooding problems and improve water quality. | Chagrin Falls Village | 45 | 31 to 90 days | \$650,000 |
| Cuyahoga | East Washington Street Stormwater | Replace 3,500 feet of storm sewer. Project intent is to alleviate frequent flooding and provide stormwater treatment to reduce pollution associated with municipal stormwater discharge to the Chagrin River. | Chagrin Falls Village | 45 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Locust Wetlands/Retention Enhancement | Reconstruct approximately 1 acre of wetlands to improve water quality to protect downstream wetlands and help reduce peak flows to the watershed to reduce frequent downstream flooding. | Chagrin Falls Village | 5 | 31 to 90 days | \$25,000 |
| Cuyahoga | Observer Community Paper Network | To create a total of 40+ new hyper-local papers based on the success of the Lakewood Observer, and current Observer projects. It does not currently serve a niche or other served by current papers/websites. They will provide 400+ jobs for local journalists and media students. They will assist and highlight economic development, job training non-profit reach, green initiatives, health and wellness. There is no better way to secure the economic future of any community, than through a community newspaper dealing with the specific needs of that community. In 4 years the LO has created job programs for, food security, education, scholarships, businesses, and, and relaxation as an outreach of a community owned paper. This program will not just create jobs, but will help and speed up the economic recovery and all phases of the economic recovery in Ohio, and possibly America. Reported in Advertising Age in 2008. "Three papers are doing it right, the New York Times, The Lakewood Observer, and the Wall Street Journal." Noted by the #1 media analyst in America, "The Lakewood Observer appears to be 10 years ahead of the curve with their business model." | Observer, Inc. | 400 | 91 to 180 days | \$20,000,000 |
| Cuyahoga | North Royalton Middle School Security Project | The Ohio Schools Facility Commission (OSFC) recently evaluated our facility and recommended a number of security upgrades to ensure proper safety for our Middle School students and staff. The upgrades included door access device security cameras and battery back up systems for per networks. They also recommended upgrades to the buildings security system in terms of motion detectors. | North Royalton City Schools | 10 | 0 to 30 days | \$266,640 |
| Cuyahoga | North Royalton HS Security Project | The Ohio Schools Facility Commission has recently evaluated our facility and recommended a number of security upgrades that are needed to properly secure and monitor our facilities. The recommendations included additional lighting, door access card readers, security cameras, PA System and UPS backup systems. A major component that was mentioned was an emergency power back up system for the building. Our building is designed by the American Red Cross and the local city as an emergency evacuation shelter/lockdown for our community. | North Royalton City Schools | 15 | 0 to 30 days | \$450,488 |
| Cuyahoga | North Royalton HS Technology Project. | The Ohio Schools Facility Commission (OSFC) recently assessed our High School and documented a number of areas that need to be upgraded/renovated in our technology infrastructure. The documented need to have an ODSM compliant issue was a wireless audio-visual, however, we have 8 to 17 year old project years in student development and drop out prevention. We already possess the means for comprehensive, sustained education assistance in the Network Center of Cuyahoga County Public Library (CCPL). To further prevention, we've designed the Digital Club for the 2009-10 academic year for a full group of Cuyahoga County students. Student to teacher ratios are 15 to 1. In this alternative education collaboration between the CCPL and Digital Animation for Kids, The Club expands the Network Center's resources to include a digital curriculum extending student's time in a learning environment. The Club teaches content in math, science, reading, and using lessons in animation, video, gaming, 3D modeling while also engaging students, parents, and teachers in a secure website hosted by the Club. Professional development is included. Let's make prevention an interactive reality! | North Royalton City Schools | 25 | 0 to 30 days | \$1,182,670 |
| Cuyahoga | Dropout Prevention Cuyahoga County 2009 | The Ohio Schools Facility Committee has recently reviewed/assessed our building and indicates some major technology needs/upgrades for our network and overall system. The infrastructure of the network needs to be brought up to ODSM compliance as indicated in their report. We also need to upgrade the PA system address a number of technology issues a directly impact student instruction. | Cuyahoga County Public Library | 50 | 31 to 90 days | \$35,000 |
| Cuyahoga | North Royalton Middle School Technology Project | The Ohio Schools Facility Committee has recently evaluated our district and has recommended a major upgrade of our technology systems at our elementary building. Upgrades would be directly related to student instruction and building needs. The infrastructure in our ODSM compliant. A new PA system needs to be installed as well. | North Royalton City Schools | 20 | 31 to 90 days | \$1,643,472 |
| Cuyahoga | Valley Vista Elementary Technology Project | The Ohio Schools Facility Committee has recently evaluated our facilities and their assessment report indicates a great need in our technology infrastructure at our Elementary Building. We need to replace update our network and provide adequate PA systems and clock system. The major goal will be on technology directly affecting student instruction. | North Royalton City Schools | 15 | 0 to 30 days | \$444,971 |
| Cuyahoga | Royal View Elementary Technology Improvement Project | We would like to sponsor a design competition in conjunction with the Cleveland Institute of Art, by which teams of students cooperatively design and build public works of art that make use of electricity generated by photovoltaic solar panels. | North Royalton City Schools | 10 | 0 to 30 days | \$487,595 |
| Cuyahoga | An Artistic Competition For Public (Photovoltaic) | The purpose is to sponsor a design competition in conjunction with the Cleveland Institute of Art, by which teams of students cooperatively design and build public works of art that make use of electricity generated by small wind turbines. | Cleveland Solar & Wind | 3 | 91 to 180 days | \$110,000 |
| Cuyahoga | An Artistic Competition For Public Small Wind Turb | The purpose is to sponsor a design competition in conjunction with the Cleveland Institute of Art, by which teams of students cooperatively design and build public works of art that make use of electricity generated by small wind turbines. | Cleveland Solar & Wind | 3 | 91 to 180 days | \$110,000 |
| Cuyahoga | Greater Cleveland Enterprise Project | The Greater Cleveland Micro Enterprise Project (GMEP) is unique. GMEP is a partnership of the Family-to-Family Administrative Council that brings together support and resources from Burman (H4) Community Collaborators spanning Cuyahoga County. GMEP Compact Fluorescent Lamp (CFL) Installation. A switch to CFLs will save a household between \$100 and \$150 each year. Based on installation projects spearheaded at Oberlin College, it is estimated that \$20,000 from the Cleveland Carbon Fund could fund 400. | Family-to-Family Administrators' Council | 300 | 31 to 90 days | \$750,000 |
| Cuyahoga | Cleveland Carbon Fund | A switch to CFLs will save a household between \$100 and \$150 each year. Based on installation projects spearheaded at Oberlin College, it is estimated that \$20,000 from the Cleveland Carbon Fund could fund 400. | Cleveland Carbon Fund | 20 | 31 to 90 days | \$100,000 |
| Cuyahoga | Bridges of Hope | It's pretty clear many of us are leaning on the brink of financial ruin and it is real easy to look at people living on the streets and cast judgement, despite the fact that we may be a check away from despair. | Verite Productions | 4 | 91 to 180 days | \$50,000 |
| Cuyahoga | MLK Public Safety Program | Bridges of Hope will be a comprehensive 1 | Cleveland Metropolitan School District | 15 | 91 to 180 days | \$150,000 |
| Cuyahoga | HCSC Education Technology Lab | Enhance current public safety program to include upgrade of public safety lab. | Harvard Community Services Center | 3 | 31 to 90 days | \$120,000 |
| Cuyahoga | Consulting Business Development | The Harvard Community Services Center has five educational enrichment programs targeting in school youth, high-risk youth, and youth preparing for state testing. Several literacy programs are in partnership with the local schools in the community and of | Southworth & Associates, LLC | 8 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Information Technology Infrastructure Support | Southworth & Associates, LLC (S&A) is an experienced medical device regulatory affairs and compliance consultancy established in 2003. With a full offering of valuable services, we provide intelligent, practical and cost effective solutions to meet the up to create jobs to help improve and support information technology use in both K-12 public schools and public colleges in Cuyahoga county and through out northern Ohio. As schools and colleges modernize their information technology this project will assist the schools in installation, support, and training of both new hardware technologies and software applications. The goal will be to allow more time for the education professional to spend on educating the children of Ohio's schools by making the utilization of new information technology easier and more effective. | Creating IT Solutions, LLC | 10 | 31 to 90 days | \$425,000 |
| Cuyahoga | Cleveland Spray Foam business evolution. | The year old spray foam insulation business would like to expand its operation by purchasing an additional spray foam insulation trailer, and using stimulus funds to hire an additional 3 employees to operate the second unit. Believe the funds could lead up increasing sales by 120-150%. This would happen by having two crews to tackle the large jobs, and an extra crew to schedule the more numerous small jobs. Cleveland Spray foam does spray polyurethane foam insulation for residential and commercial customers. Our product is superior, insulates, and creates a vapor barrier, thereby increasing overall structure energy efficiency, and overall performance. Our business has been getting busier every year, but we are unable to take the next step of hiring another crew, or purchasing more equipment at this time. Thank you. | Cleveland Spray Foam | 3 | 31 to 90 days | \$60,000 |
| Cuyahoga | Young Chef's United | Young Chef United is a program designed to bring youth grades 9-12 who are seriously interested in continuing their education in the culinary arts. The Program will provide them with after school activities that will teach them the basic skills and advanced knowledge that will assist them in the college career. Participants who complete the program will be awarded a college identification through college tours. The program will also assist the graduates with financial assistance to assure a successful experience. The target for this program is the inner city of Cleveland Ohio where records show that a small number of youth graduate from high school and continue to college. The number of inner city youth who graduate from college is even lower. This program will target these young people and give them the knowledge and education they need to be successful in college and life. With this training and knowledge these graduates will have the skills needed to get jobs and start careers in the culinary field which could result in business owners down the road. | Young Chef's United | 10 | 181 days or more | \$250,000 |
| Cuyahoga | Community Companionship and Care Program | The Friends and Mentors Inc. Community Companions and Care Team Program will train and mobilize 20 community volunteers as well as a paid staff to provide supportive services to low to moderate, at-risk families, ex-offenders and seniors by linking them to existing benefits services and employment opportunities. We will promote health and safety as well as improve living conditions in determining needs and reducing barriers to employment and benefits opportunities. We do this by linking them to appropriate organizations while mediating and communicating with those organizations to insure that customer needs are actually being met. The program will also coordinate the collaboration of several organizations such as Mt. Pleasant Food and Feed, Our Benefits Bank, Woman Without Borders area churches and other civic organizations. Care Team members provide transportation assistance, non-medical direct care letter writing, resume writing assistance, benefit counseling, financial needs analysis, employment education and training services. We plan to provided services to 25 families and 80 individuals. | Friends and Mentors Inc | 75 | 181 days or more | \$74,215 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | Transitional Housing for Homeless Women | The need to serve an increasing number of homeless women is greater than our available resources. We need/want to expand our current program and services of providing safe housing, supportive services and follow-up. We serve 100-125 women annually. There has been significant land erosion behind the building for many years. Most recently this situation has elevated to a point that it has become dangerous. TH's Board of Directors must make plans now for relocation. The benefits of that move are many. These are: (1) a larger facility will enable TH to increase the number of women and children served; (2) relocating to a safer neighborhood will enhance TH's programs and services; and (3) it will maximize the use of TH's resources as it collaborates with other neighborhood-based agencies. | Transitional Housing, Inc. | 120 | 0 to 30 days | \$250,000 |
| Cuyahoga | Deep Reactive Ion Etching (DRIE) Facility | Funding is needed to support the acquisition of Deep Reactive Ion Etching Facility to process Silicon Carbide (SiC) materials for the fabrication of MEMS/NANO Scale devices, particularly for harsh environment applications. An extensive search of existing (SiC) facilities across the South, from Colorado to the East Coast do not support Silicon Carbide materials, a fully equipped facility. Here will fill the niche for the growing demand, more so with the increased interest in the development of energy related micro/nano scale devices. In the next 30 days, TM's Ohio's oldest fuel cell systems developer, will begin technical field testing of a prototype residential (flowback) scale system on ordinary, untreated fuels, including biofuels made by Ohio agriculture, at a special customer location. A goal of the demonstration is to dispel public perceptions that fuel cell systems are a decade away or only run on pure hydrogen or treated fuels. By validating fuel, TM also brings credibility to the tens of millions invested by Ohio's Third Frontier program to create a new fuel cell cluster. | Biionics, Inc. | 30 | 91 to 180 days | \$2,500,000 |
| Cuyahoga | Residential Scale Fuel Cell Systems | As the critical path, attract funding to fast track TM's engineering, demonstration and pilot manufacturing facilities could multiply the number of jobs created and retained by illuminating ALL fuel cell systems, not just TM's, as viable on-site supplements to grid power. Starting with the Ohio Fuel Cell Coalition, hundreds of Ohio supply chain manufacturers would see how they could supply components to fuel cell systems developers and build new global export markets. At home, thousands in the Ohio workforce would discover new value in their experience and expertise solicited by working with clean energy solutions using FCs. | Technology Management, Inc. | 15 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | nanocomposite coatings for infrastructure and ener | The use of laser coat high strength steel in infrastructure and energy projects. MesaCoat's CermaClad corrosion resistant alloy claddings replace toxic chromate and zinc primers, eliminates the use of VOC's, and provides 80-100 year maintenance free life for pipelines, rebar, bridges and architectural elements. Furthermore, the MesaCoat based anodized coating process enables these claddings to be applied at the steel or pipe mill, enhancing the competitiveness and market share of Ohio's steel mills. This project would establish a demonstration coating plant through a space act agreement with NASA Glenn research center, tailor and optimize nanocomposite corrosion resistant claddings for specific applications, develop the production and test data to qualify the coating at CASCAP, SORC, ODJ, and OJI, and provide prototype material for field demonstration trials. The project would lead to the creation of 10-12 immediate one year jobs, and 110-125 jobs over the 7 year commercialization stage of the technology. | mesocoat nc | 115 | 31 to 90 days | \$2,100,000 |
| Cuyahoga | Scanning of Medical Records for Hospitals and Doct | Help Secure Scanning of Records for hospitals such as the Cleveland Clinic, University Hospital and many other medical centers in the Cleveland and throughout OHIO. OHIO is the heart of it all when it comes to health care and automating medical records and access to such records will be a major health care delivery cost. | Charts By Wire (Medical Records Scanning) | 500 | 0 to 30 days | \$13,600,000 |
| Cuyahoga | Math Monkey | We are asking for \$30000 to help us fund a project that will require a secure facility and secure trucks and trailers to hold and acquire equipment to do special secure connection to house and special servers that will host and distribute the data. Math Monkey of Solon is an after school enrichment program specializing in development of advanced mathematics. Target audience is children aged 4 thru 12. The site has been open since fall of 2007 and currently has about 95 students. The center has a 40% profit but is now operating at close to break-even. Additional funds are being sought that if received, would enable the expansion of the program by virtue of expanding classrooms from one to two, hiring of 2 additional part time teachers, and 2 teachers aides. We believe these additional classes can be filled and hence would not only add 4 jobs mentioned, but help ensure the survival of the 7 part time positions currently in place. As the center's operator, I have yet to draw my salary whatsoever since the opening, and trust I hope that my knowledge center can not only survive but prosper in the months ahead. I sincerely believe the program is a tremendous positive asset to the community from numerous perspectives, not least of which is serving to improve and strengthen our math skills for younger children, as well as providing employment to the local community, etc. Thank you for your consideration. The purchase of inventory from www.age-toys.com will spur manufacturing jobs in the apparel industry to replace purchased stock from wholesalers. The infrastructure for these websites is already in place, just need funds to acquire the inventory. The applicant is currently living below the poverty level by writing websites for small businesses. The applicant is not employed in private industry due to age and chronic illness. | Vedic Ventures LLC DBA Math Monkey of Solon | 4 | 31 to 90 days | \$35,000 |
| Cuyahoga | New Age Entertainment Project | Supply lower cost electric power to Ohio residential customers and eliminate phase in generation rates. The savings would be \$126,000,000 per year for the next 3 years plus the interest charged over the 10 year period. The \$37,000,000 would be paid back over the 3 year period and stored in a energy fund to keep rates lower after the 3 year period. | ZubeCo | 0 | 31 to 90 days | \$25,000 |
| Cuyahoga | energy cost reduction | The purchase of inventory from www.age-toys.com will spur manufacturing jobs in the apparel industry to replace purchased stock from wholesalers. The infrastructure for these websites is already in place, just need funds to acquire the inventory. The applicant is currently living below the poverty level by writing websites for small businesses. The applicant is not employed in private industry due to age and chronic illness. | Viking Energy Resources, Inc. | 4000 | 91 to 180 days | \$37,000,000 |
| Cuyahoga | YalcioMab for Cardiac Diseases | NovMed is developing a monoclonal antibody to prevent bleeding complications of cardiac surgeries. NovMed received \$1.5 million from the National Institutes of Health (2005-2009) for preclinical development of the lead antibody for this indication. Since the recent removal of NovMed from the market, no FDA approved drugs are available for this clinical indication and it is a serious unmet need. NovMed's lead antibody therapy for this indication can be ready for human testing in late 2009 and has the potential to bring large pharma or venture funds to Ohio. Cutting edge therapeutic antibody technologies are actively sought by pharmaceutical companies and venture firms. Success of the bioinnovating antibody based drugs, Recepta (cardiac), Elixia and Remicade (oncology), Lucentis (ocular degeneration), and Filgrastim (oncology) with annual sales in the billions and minimal adverse events have made acquiring such treatments attractive ventures. NovMed is seeking funds to hire FDA/regulatory, business development, manufacturing and legal personnel to partner the program to a pharmaceutical company or venture firm and gain FDA approval for clinical trials. Hiring at least three senior persons and two junior scientists is required to take the product to the next step. The funding for neighborhood newsletter details how to hire or recruit senior business and dealers in the coldwell area so that they can find and people will be able to keep their children safe. Senior Partnership through LLC with a LEED-AP Engineer, along with a CPM Candidate, OH Real Estate License (Sales & Broker) to Implement LEED Based property management upgrades & procedures for 5rd parties. | NovelMed Therapeutics, Inc. | 6 | 0 to 30 days | \$2,176,544 |
| Cuyahoga | neighborhood newsletter | Identify manage and upgrade 3-6 clients portfolios, with size ranging from 300,000-500,000dot. | Summary of Changes | 3 | 31 to 90 days | \$60,000 |
| Cuyahoga | LEED Oriented Green Building Initiatives through P | Upgrade, renovate & revitalize, using LEED standards building mechanical systems to implement & conserve electric, natural gas, water, and improve indoor air-quality. Would also acquire and renovate an urban property to showcase Energy & Resource conservation. Approx 5,000-15,000SF | Property Management LLC to be Created | 6 | 0 to 30 days | \$315,250 |
| Cuyahoga | behavior change discipline/consulting for not-for- | Keep and expand current Bright Side Programs and employment, all of which are under financial stress due to the economic downturn. Specifically to be used to expand educational programs for Public Schools, Public/Government Agencies, Not-for-profits as follows: Bright Side employs a proprietary behavior change discipline that can be applied to a wide-array of business growth strategies, enterprise-wide initiatives, and systems quality programs and processes such as: * Technology Implementation * Ethics & Diversity * New Strategies * Globalization * Outsourcing/Restructuring * Product Life Cycle Management * Innovation, Product, Process & Management * Productivity * Lean Management System * Enterprise Resource Planning, ERP * Culture Change * Growth Initiatives Bright Side offers a full-range of complimentary academies, services, workshops and tools for individual, team and organizational competency assessment and development. These offerings can be delivered on-site from or negotiated with the Bright Side proprietary processes. | Bright Side, Inc. | 12 | 0 to 30 days | \$450,000 |
| Cuyahoga | wholesale autos to the public | I've been in this business for 35 years. We have recently lost our Wholesaler source due to closure. We need funds to pay for our inventory. We sell wholesale to the public, saving consumers thousands from new and used car dealerships. I'd be happy to explain or give you lists of satisfied customers who have saved a lot of money. For instance, we sell '07 or '08 Chevys for at least 2,000 dollars less than our local Chevy dealer. People like my business.....good reputation. Thanks for listening. Mike | C Thomas Auto Wholesale | 7 | 0 to 30 days | \$175,000 |
| Cuyahoga | ANNUAL COLLARD GREEN FESTIVAL & HEALTH FAIR | The Annual Collard Green Festival Health Fair was start as a fund raiser for scholarships for artistically talented participants, through application and selective process, to attend a 4 week intensive Art Residence Camp. The camp will be an intensive training under the direction of Master Artist/Sculptor Edward Parker. The festival holds a competitive contest in 1st, 2nd and 3rd place cocktail winners of a collard green recipe. Health screening for blood pressure, diabetes, cholesterol and other related wellness issues are addressed. Entertainment and fashion are also components of the day. Multiple Faceted Project: Infrastructure: Update, Rehab, Renovate, Upgrade Historic 5-story office/hotel building in downtown Lakewood. Energy: upgrade, retrofit to HVAC, Water Consumption, Lighting, Solar. Other: Look at use of roof, side-property for urban gardening Other: Hire a street ambassador to help downtown businesses & Lakewood Alive to enhance downtown Lakewood. | SNICKERFRITZ CULTURAL WORKSHOP FOR THE ARTS | 20 | 31 to 90 days | \$25,000 |
| Cuyahoga | Detroit Warren Building Historic Renovation & Ener | Multiple Faceted Project: Infrastructure: Update, Rehab, Renovate, Upgrade Historic 5-story office/hotel building in downtown Lakewood. Other: Look at use of roof, side-property for urban gardening Other: Hire a street ambassador to help downtown businesses & Lakewood Alive to enhance downtown Lakewood. | Lakewood/Warren/Detroit Ltd | 12 | 0 to 30 days | \$350,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Construction of renewably-generated-hydrogen power | The William G. Mather. Project includes improvements of Mather "building" systems including hydrogen fuel-cell power generation & geothermal HVAC. The Science Center will help expand the hydrogen economy and educate the public, serving more than 450,000 visitors annually. With two phases funded and nearly complete, this request is for support of Phase 3: PHASE 1: Connector: Construction of convertible 400' glass structure on Cleveland's lakefront providing a breezeway (summer weather) and conditioned hallway (winter) between the GLSC and Mather. Completion Summer 2009. PHASE 2: Ship Engineering Studies & Exhibition Design: Planning and design for a combined 25,000 square feet of new exhibits (GLSC & Mather) and engineering studies for Mather facility. Completion Fall 2009. PHASE 3: Project Implementation: Build out of Mather systems including renewable power generation, geothermal HVAC, and improvements to facility envelope to bring historic vessel from seasonal to efficient year-round operation. | Great Lakes Science Center | 265 | 91 to 180 days | \$5,356,000 |
| Cuyahoga | North Royalton Elementary Building Project | As part of the OSFC (Ohio Schools Facility Commission) assessment of our buildings, and master planning evaluation of our district, we are recommending the construction of a new Pre-K to 2nd grade building for our students. Currently our Pre-K and Kindergarten students are educated in a leased facility out of our district. The new building would allow us to educate these students all under one roof as well as address the overcrowding situation at our elementary level. The district currently has land to build on, but needs the funds to build the facility. The costs were developed by the State of Ohio (OSFC). | North Royalton City Schools | 200 | 0 to 30 days | \$10,471,533 |
| Cuyahoga | North Royalton City Schools Transportation Project | Our district's transportation dept. was originally built to accommodate 30-35 buses for both storage and maintenance. Due to the growth in our community, we currently have over 65 buses and have to store some of them at a leased facility off site. We have district property to construct a new facility, but we do not have the funds to build the facility. The new facility would not only accommodate all of the buses, but a large enough facility for mechanics to work on the buses and a training facility for our drivers where they could get professional development opportunities. | North Royalton City Schools | 100 | 0 to 30 days | \$4,000,000 |
| Cuyahoga | North Royalton City Schools Intermediate Project | As part of our facility assessment by the OSFC (Ohio Schools Facility Commission) one of the master plans calls for the construction of a new intermediate school building that could house grades 3-5 for our district. The new building would address the over crowding situation that we have experienced at our elementary level. As a result of the over crowding, we have had to lease buildings to house our current Pre-K school and kindergarten program. The new building would allow us to bring back our youngest students back into our other elementary buildings. | North Royalton City Schools | 300 | 0 to 30 days | \$25,984,906 |
| Cuyahoga | North Royalton City School Stadium Project | Our current HS Stadium was constructed in the early 1940's and has many safety and ADA issues. The goal for our district would be to totally renovate the existing stadium and replace the grandstands, new athletic track, new athletic playing field and restrooms and concession stands for our community. The present stadium does not allow for any handicap seating, the playing field is not large enough for either soccer or girls soccer and we are not able to allow the local city teams to use it due to the grass playing field. The restrooms are grossly inadequate for soccer events and the grandstands do not accommodate the number of people who come to watch games. We would like to build a new facility on the present site that could be used by the entire community. | North Royalton City Schools | 150 | 0 to 30 days | \$4,500,000 |
| Cuyahoga | Workcell Technology for Cost-Effective Pharmaceuti | Analiza, a Cleveland-based contract manufacturer, is developing innovative workcell technology in an Ohio (Ohio-based contract manufacturer) serving leading U.S. pharmaceutical companies. Analiza has highly experienced in developing key components and contract research services that they serve leading U.S. pharmaceutical companies. Recently, Analiza has demonstrated a technology combining inherent Ohio strengths in automation and engineering that can directly compete in pricing with off-shore outsourcing operations, while retaining a superior quality of being Done-as-Certified project will leverage on and further advance the technology platform to provide the first cost competitive outsourcing solution for U.S. pharmaceutical companies who presently can't find such services in the U.S. The specific first platform will focus on pharmaceutical R&D. Other key parameters which are important to early selection of chemical compounds as potential drug candidates. The project will create 15 jobs, leverage local resources in manufacturing and instrumentation, will develop a cost facility, and create jobs in Cleveland to serve as a model for a significantly expanded base of operation later on using private funds. | Analiza, Inc. | 15 | 0 to 30 days | \$850,000 |
| Cuyahoga | Great Lakes Water Project | The Project brings world class exhibitions on science, technology and ecology of the Great Lakes to the 1990's economic development district (Downtown Cleveland). The exhibits and related programs will be in the Great Lakes Science Center (GLSC), one of the country's leading science and technology centers, and in the GLSC's historic 618 freighter-museum, the WIG Mather, "the ship that built Cleveland". The Project will engage 450,000 residents, pre-K-16 students, and tourists annually in issues central to the region's economy and vital to the ecological health of the world's most important freshwater resource. The private-public partnership garnered for project execution is bringing the first significant development to Cleveland's North-Costal Harbor in more than a decade. | Great Lakes Science Center | 265 | 91 to 180 days | \$5,024,000 |
| Cuyahoga | Personal Assistance | I am requesting funds for personal assistance. I am an unemployed electrician and have been out of work since September of 2008. I have searched and searched for a job but have not found any. I have no credit cards and I have no prospects for assistance. I have even been to several pizza places offering to deliver for cash but none are hiring. I have a one year old son, and no where to go. Please help! The stress this have put on my health and my family is unbearable. The money would payfor all my credit cards and put my rent a few months ahead and hopefully I can find a position for them. | Self | 1 | 0 to 30 days | \$8,000 |
| Cuyahoga | HVAC Project | We are needing to replace 33 year old heating system that would include new boilers, wiring and electronic monitoring systems. A new system will provide a savings in energy and resources. | Polaris Career Center | 20 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Blossom Hill Expansion Project | Expansion to existing group home for adult mentally retarded and developmentally disabled adults allowing for improved access and mobility for aging residents. | Blossom Hill, Inc. | 150 | 181 days or more | \$1,700,000 |
| Cuyahoga | Renovation of St. Vincent Charity Hospital's Solon | The expansion will have an area of approximately 5,435 square feet. There will be three (3) private resident rooms with shared wheelchair accessible bathrooms. These small socialization spaces will also be provided along with a central bathing room. A new nurse station will be included with visual access to the new and existing building. Other staff and service spaces include changing area, linen storage, janitor's closet and general storage. Serving those who live & work in the Solon area, the St. Vincent Charity Solon Medical Campus offers primary, specialty & emergency care to the community. To have a first-class Emergency Department that functions 24/7, 365 days/year has the rare distinction of being Stroke-Certified by JCAHO. Caregivers provide emergency care & stabilization to patients who otherwise may have had increased mortality had the ED not been built; cases range from heart attacks, strokes to work- & sports-related injuries. More than half of the Solon Fire Department EMS cases are transported here annually. The ED provides care to over 8,500 patients/year. The facility located on a 7-acre campus was built in 1979 & is undergoing much-needed renovation, i.e., improved building energy efficiency & green landscaping. With changing demographic needs, project goals include: enhancing services to diagnose & treat cardiovascular disease, orthopedic injury, & health needs of seniors; providing emergency care equipment (e.g. MRI), & upgrading its occupational health, physical therapy, radiology, & lab departments. The project will enable the facility to retain 65 positions & provide construction & other trade jobs. | Sisters of Charity Health System | 65 | 91 to 180 days | \$1,500,000 |
| Cuyahoga | Air Conditioning for Transitional Housing Facility | Joseph's Home is one of the only facilities of its kind in the United States. Our agency provides transitional housing for homeless men with acute medical problems. Medical issues range from (but are not limited to) recent surgeries, cancer, unstable diabetes, unstable epilepsy and psychiatric issues. Our facility is a 60 room facility for the men. The building is not air conditioned and the excessive heat in the summer directly impacts the length of their recovery. We are seeking funding for air conditioning units for the first and second floors of our facility with a ventilation system for the basement level. | Joseph's Home | 12 | 91 to 180 days | \$150,000 |
| Cuyahoga | St. Vincent Charity Hospital Campus Transformation | An anchor & economic engine in the Central neighborhood since 1865, we are revitalizing this urban safety net & campus (with other positive benefits e.g. improved interconnectivity). A Disproportionate Share hospital, St. Vincent Charity is a busy, full-service teaching facility, offering primary, specialty & surgical care with 115,000 outpatient visits/year. It has one of the two psychiatric emergency departments in the state. A along with the medical ED, sees 30,000 visits/year. The downtown campus consists of various buildings constructed over the past 90 years. Project includes renovation of the existing patient towers (i.e. a new ICU), demolition of several buildings, & new construction i.e. relocation of the Sisters of Charity Health System offices, a parking structure & new Medical Office Bldg for the Patient-Centered Medical Home, physician practices, etc. This project also includes costs for health IT & IT infrastructure, asbestos & hazardous materials removal, improved campus safety lighting, new security office, energy efficiencies (e.g. new boilers & green spaces). Project will enable the hospital to retain 1,000 positions & provide construction & other trade jobs. | Sisters of Charity Health System | 1300 | 91 to 180 days | \$45,000,000 |
| Cuyahoga | Parking lot expansion | The demand for this project is quite high. If possible please, this project would increase parking by 100-spaces allowing DAL, the NASA Safety Center, and their consultants, collaborators, industry partners, and ten Ohio member universities greater opportunity to conduct important meetings and events. Thank you. Mission Statement: To build strong individuals to stabilize our neighborhoods, the economy and our future. | Ohio Aerospace Institute | 3 | 0 to 30 days | \$270,000 |
| Cuyahoga | Job Training for Single Mothers | I will provide the experience and training in building and construction trades. I have consistently been a developer over the past 38 years and presently have 4 commercial properties, as a result of my labor. My teaching skills are those of a retired professor and a present Art teacher for the mentally challenged. The program will train low to limited educational levels with varied styles of learning. We will also track each participants demonstrated progress, attendance and test scores. We will also aide them in much needed supportive services, such as child care, shelter, clothing, food and transportation. This will be a certified/decertified training program. | Parker Properties | 50 | 31 to 90 days | \$350,000 |
| Cuyahoga | Machine Shop Modernization | Modernization of existing machine shop at UniControl Inc., a manufacturer of heating, ventilating, air-conditioning, renewable and fossil combustion control systems. This project will replace antiquated machining equipment and processes with: (2) 80 hp capacity automatic lead programmable punch presses, (1) CNC turret punch press and tooling, (1) metal shear, (1) brake press, (2) multi-spindle automatic screw machines, (3) vertical machining center, (4) progressive stamping dies, VMC tooling set, and turret press tooling. Expected outcome include improved productivity, quality, and global competitiveness in manufacture of existing and future energy efficiency product lines serving global HVAC markets. | UniControl Inc. | 5 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | Stimate!MC | Purchase equipment, vehicles to enhance instrumentation in manufacturer sector as company can save money on energy - steam, oil, gas - (Entrepreneurship) Preparatory School is a three year old highly successful public charter school serving Cleveland students in grades 6, 7, and 8. Village Preparatory School is an elementary school being created by the operators of E Prep, and opening in August 2009. The schools are modeled after the most successful charter schools in other centers around the country. They are already using the practices that are outlined in Ohio Governor Strickland's education plan. The keys to E Prep's success are extended school day, extended school year, passionate & mission-driven teachers, strict code of conduct and uniform policy, frequent academic assessment of students, frequent and collaborative professional development of teachers, and a culture of high expectations of students. The Cleveland Metropolitan School District is the authorizer of E Prep and Village Prep, although it is not sharing of fiscal resources. As of October 2008, E Prep and Village Prep have 30% less public funding than the traditional public schools. Charter schools do not receive assistance for acquisition or renovation of facilities. Hence, this request would be for funds for building renovations. | Industrial Measurement & Control | 3 | 31 to 90 days | \$200,000 |
| Cuyahoga | Public Charter School Support | The cities dispatch radio console and peripheral equipment which is used to communicate with police, fire, emergency medical technicians and personnel is currently over 20 years old and subject to occasional breakdowns. Replacement parts are not available. A new communications system would improve communications between the police, fire, and emergency medical personnel as well as permit communication with the local hospital during emergencies which will not be to be understated. Replacing 10 existing police officers who are nearing scheduled for layoffs as well as hiring 2 more officers to replace 2 officers who recently retired and not budgeted for replacement. Each new hire, including benefits is \$62,066 in first year, \$68,179 in second year and \$79,066 in third year. These hires would enable us to maintain our rated staffing levels. This project consists of contracting construction services, using the most updated and environmentally "green" materials to put a new roof on the wings of the facility where the children live, complete resurfacing of the parking lot and driveway and renovation of the children's wing. Anticipated outcomes are protecting the environment by insuring that "green" materials will be used and providing jobs for unemployed construction workers. | Friends of E Prep Schools | 28 | 0 to 30 days | \$500,000 |
| Cuyahoga | Communication Center Enhancements | The cities dispatch radio console and peripheral equipment which is used to communicate with police, fire, emergency medical technicians and personnel is currently over 20 years old and subject to occasional breakdowns. Replacement parts are not available. A new communications system would improve communications between the police, fire, and emergency medical personnel as well as permit communication with the local hospital during emergencies which will not be to be understated. Replacing 10 existing police officers who are nearing scheduled for layoffs as well as hiring 2 more officers to replace 2 officers who recently retired and not budgeted for replacement. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | Enhancing Educational Opportunities | 1. Retrofit 200 classrooms with projected learning systems to include mounted projectors, smartboards, and sound systems; 2. Install one elevator in 1927 elementary school building, and install one elevator in 1938 elementary school building; improve handicap accessibility. 3. Replace two sports fields used by the school district and the City for instruction and recreation with synthetic surfaces; 4. Replace loss of tax revenue due to increased tax delinquencies amounting to \$1.5 million. | Shaker Heights City School District | 80 | 31 to 90 days | \$7,000,000 |
| Cuyahoga | Improving Energy Efficiency in the Shaker Heights | 1. Retrofit all electrical lighting fixtures in the 1931 304,000 square foot four story high school building; 2. Replace natural gas heat with solar heater panels for two indoor pools; 3. Replace single pane windows with energy efficient windows for the 1927 133,400 square foot middle school building; 4. Replace boilers, chillers and associated piping to include automatic thermostat controls in the 1931 304,000 square foot four story high school building; 5. Retrofit 30 70 passenger conventional diesel school buses with a catalyzed wire mesh filter to reduce carbon emissions; 6. Install Weather heaters in 30 70-passenger conventional diesel school buses to reduce idling, emissions, and fuel consumption; | Shaker Heights City School District | 100 | 31 to 90 days | \$6,500,000 |
| Cuyahoga | Hire two additional mobile repair technicians | Train and set up to work two (2) Automobile Interior Repair mobile technicians to go out into the Greater Cleveland Area and service car dealerships. The training period is an extensive 3 month period. Work equipment then is necessary to set technicians off to work on their own. Technicians are then trained and equipped to go out and set up routes and customers to provide a stable living. | Omniend, Inc. | 2 | 0 to 30 days | \$50,000 |
| Cuyahoga | Electric Vehicle Infrastructure | Electric Vehicles (EVs) present an opportunity to create jobs, improve our environment and increase the level of national security by decreasing our dependence on foreign oil. Establishing a recharging infrastructure is critical to the success of EVs in the consumer market. Consumers must be assured that their vehicle can get them safely to their destination without major disruption. Whether commuting 50 miles to work or 200 miles on a weekend trip, people need to be able to quickly and conveniently recharge their vehicles. Acknowledging that all major auto manufacturers are releasing plug-in hybrid electric or fully electric vehicles in the next 12 to 36 months, ERRA (Inc.) (ERRA) would like to work with the state of Ohio to determine the infrastructure required to make your state EV ready. The initial phase of the infrastructure network deployment plan will consist of installing a limited network of connected fast charge stations around key metropolitan areas. These stations will be strategically located so that once the infrastructure is installed it will be adequate to support significant fleets of state and/or owned electric vehicles. Recharge older homes to help save wasted heat through the roof. The cost saving of natural gas, oil or electricity to heat or cool their home. Suppliers as well as manufacturers such as Ohio's Chewer Coming Corporation, and Homeowner will benefit. | ERRA Incorporated | 300 | 91 to 180 days | \$10,000,000 |
| Cuyahoga | Saving Energy | Expand current in-house training program to include out of work auto workers and other unemployed sectors in the field of direct care professional. It is estimated that with in the next 15 years, there will be a need of over 1,000,000 workers throughout the U.S. in this field. We would purchase additional computers, hire additional staff to do the training, and provide for job placement. The outcome would be re-training and return to the labor force of approximately 500 on an annual basis. | City of Warrensville Heights | 1000 | 0 to 30 days | \$300,000 |
| Cuyahoga | Re-train laid-off auto workers | Construction of a Police and 911 Dispatch facility to accommodate the growth in size of the safety force which has doubled in the past decade causing overcrowding and severe inefficiencies. Additionally, the current facility lacks room for training, interrogations, and a secure storage area. The new 14,000 sq. facility will provide adequate space for the mandatory equipment required and needed for efficient law enforcement. The new facility that meets current standards. The City has created a Master Plan of which this facility is Phase I. The other two phases include renovating or adding on to the other public facilities within the same campus at an additional cost of approximately \$1-2 million. The new facility also has an indoor firing range to keep the officers proficient in the discharge of firearms. The 911 Dispatch center will be upgraded to provide sufficient space and up-to-date communications equipment to allow dispatching capabilities for surrounding jurisdictions. With the Master Plan already developed, the structure is ready to enter into the design phase and construction could begin almost immediately. | Rose-mary Center | 500 | 91 to 180 days | \$200,000 |
| Cuyahoga | Construction of Police and Dispatch Facility | Expansion of existing adult day care program to accommodate more participants. Many families are caring for their frail loved ones and must take time off work to care for them. The expansion of our existing program would allow us to accept more participants and hire more professionals to care for them. This outcome would be creating 10-15 jobs while the program is being expanded. The 50 people would continue to be employed. They would not have to take a leave of absence/quit their current job to care for their loved ones. | City of Pepper Pike | 35 | 31 to 90 days | \$6,000,000 |
| Cuyahoga | Expand St. Anthony Adult Day Care | I have been in business for 21 years. I want to relocate to a better location cause the one that im at now has been declining for many years. I am in downtown cleveland. The location i want to go at is a suburb. I will buy the location and remodel the whole inside. I have looked into it and its a great location. I will employes 12 to 14 people most full time positions. I will hire a construction company for all remodel in side and out jobs. I will have a paving company redo my lot and also will employe a landscaper all year around. My home requires renovation which i cannot afford. My wife and i self employed and just cannot make ends meet. The homes in our neighborhood are turning into rental properties and we do not want to move out of Parma. The stimulus funds would be used to renovate our entire home and spend making a positive impact on our neighborhood. Please consider this request as many tradesmen would be employed with this project. Thank you. | Rose-Mary Center | 100 | 31 to 90 days | \$85,000 |
| Cuyahoga | tideman | Initiate a program to ensure maximum levels of reliability and performance, particularly where life safety needs are involved for the health care industries backup power systems. This program will include complete testing and inspecting for compliance to applicable national standards along with documentation. Major hospitals will be included with current standards but there is a lack of standards in the smaller sector. Set-up and maintain a no-repair and maintenance shop with vans, software, hardware in stock along with a website. Developing into a local or manufacturer (OEM) type. Will need office and warehouse space. Then leading to expanding programs more warehouse personal, accountants and inventory import/export personal. | Self | 14 | 31 to 90 days | \$1,300,000 |
| Cuyahoga | Home Repair | Primarily focusing on supporting the infrastructure of local Cuyahoga based businesses and then expanding outward Change to Green LLC is a green home inspection service. This provides recommendations in categories such as energy efficiency, water reduction, materials, and occupant awareness. Change to Green also assists property owners with implementation of recommendations. We help property owners save money and the environment. If Change to Green is granted money from the stimulus bill jobs will be created, and our community will benefit. The USDO's 700-watt solar security, integrated into solar in its early 1900's was done on a low scale, implemented in remote-remote technology. CDC motor controls, high efficiency light fixtures, motion sensors and computer controlled time schedules to control excessive energy use. Today our goal is to implement current Solar Array technology to further reduce our energy dependence and assist the State in meeting its Renewable Energy Portfolio Standard. We seek for funds please to install panels capable of generating approximately 100-kilowatt of solar generated power helping the Ohio Aerospace Institute in its goal to go to space again be environmentally cutting edge and become a whole piece of energy innovation. Our project seeks to mirror the success of projects such as the Toledo Air Museum Solar Array partially supported by the Ohio Department of Development completed in March of 2008, and the Great Lakes Science Center Solar Array project partially supported by the U.S. Department of Energy. And, as Gov. Strickland said, "to make our state more progressive and to make us less dependent on outside supplies for our energy needs." Thank you. | Home Repair | 10 | 0 to 30 days | \$100,000 |
| Cuyahoga | Compliance Testing | Complete upgrade of city computers and establish own exchange server to host city e-mail to provide greater security for sensitive city business communications. To establish own backup system which will allow us to backup critical city wide IT functions in a hardened location away from main server system at City Hall. Use crisis iris project to complete that necessary emergency area vulnerability analysis also require an upgraded fire alarm system. | American Power Service Company | 5 | 31 to 90 days | \$250,000 |
| Cuyahoga | Job development | The school district does not have budgeted funds for the projects that will cost up to \$500,000. The purpose of the project is to increase the functionality and effectiveness of the alarm systems which range from 30-50 years old. The number of students and staff that would benefit from a public safety standpoint are 1250. | PrepairOhio.com | 10 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Change to Green LLC | The school district would likely be required to reduce staffing in order to fund the required projects. Funding assistance of this project would save jobs and meet the mandate of the Bay Village City Fire Department issued by Chris Lyons, Public Safety Officer. The school district has hired an architect to develop the plans for the high school project. As such, this project will be ready to commence in the next few months if funding was available. | Change to Green LLC | 10 | 31 to 90 days | \$99,000 |
| Cuyahoga | Solar Array Project | The funding would be used to create and employ 50 or more individuals in both skilled and non skilled labor. Positions would cover warehouse, stock and tool room operations and machine operations to Sales and Marketing and Engineering. This would create jobs from \$25,000.00 to \$75,000.00 per year per person in value for the various positions. We would set expansion plans into other portions of the state. The funds would be used for the procurement of machinery and inventory as well as new facilities across the state. These positions would employ these individuals for multiple years and allow over 50+ families to get back to financial security with long term employment. These created positions could service industrial, OEM, Federal and state Government Organizations contractors and production facilities across the State of Ohio. I am raising a kids on my own with one having a bad disease --- I am not working cause I cannot find a job and I am trying to get the unemployment --- I need help to pay my schooling and need help to pay my car feed --- as well as help with bills --- I could use any help that I can get --- please help. The project consist of using available funds that would be able to provide clean and reusable energy in which could be sold to power companies using low cost renewable technologies. With such energy being made within these communities, could uplift community involvement in the green movement, and help replenish the neighborhoods business districts, and bring capital back to the development corporations to improve communities. | Ohio Aerospace Institute | 6 | 0 to 30 days | \$800,000 |
| Cuyahoga | IT Network Security Upgrades and Establish Emergen | The only remaining blight on the community are two rental neighborhoods, Maple Park Drive and Claire Avenue. Both of these streets have large concentrations of rental units that are a blight on the neighboring housing stock. Crime and gang activity are rampant, placing a burden on city services. We would like to acquire and rehabilitate as many of these buildings as funds allow. It is likely that other blighted buildings in these apartment buildings will continue to depress neighboring properties. | City of Brook Park | 190 | 0 to 30 days | \$275,000 |
| Cuyahoga | Fire System Upgrade | We have been in this business since 1987 and in Maple Heights since 1993. We have an excellent relationship with City officials. We currently own and manage about 100 suites in other neighborhoods in Maple Heights. | Bay Village City Schools | 6 | 91 to 180 days | \$425,000 |
| Cuyahoga | Job Development and Economic Expansion | Close Combat Grappling Solutions offers an OPIATA certified course in defensive tactics for law enforcement that has prior approval for continuing education. Our course costs \$180 per officer. We would like a grant to be able to offer tuition assistance for 200+ officers to take our course free of charge this year. This is badly needed training. Our course is based on and is a great need to us officers that are out there. All funds received will go towards paying off our costs to take this course. CCGS will discount the cost of the class to \$ 150 for officers that take course with these funds. Information on course, instructors and OPIATA approval available. Course locations mostly in Cuyahoga, Medina, Lorain and Summit Counties. Goal is to train 200+ officers in training of the type the officers most they will not get anywhere else. This will give these skills directly stable in their work, handling the officer's safety, the departments or agencies they work for and the communities in which they work. The Development and creation of new development positions that span from Warehouse to Sales and Marketing to Engineering. Procurement of machinery and inventory and expansion into new markets across the State of Ohio. Full time employment of 50 or more individuals. | City of Brook Park | 190 | 0 to 30 days | \$275,000 |
| Cuyahoga | personal | The funding would be used to create and employ 50 or more individuals in both skilled and non skilled labor. | Cuyahoga | Northcoast GIS | to work with local government to locate and plot ALL Fire Dept & Stations coverage areas (Mutual Aid Agreements) in the Cuyahoga County Region. Plot ALL Fire Hydrant locations within Cuyahoga County and surrounding municipalities and assign a unique id to be used by street signs, water departments and Fire Dept and build geospatial data of fire rates, main size, manufacturer, etc. Outcome would be a better Emergency Response and coordination among divisions within the city of Cleveland and the communities around it. Every Fire Station and its dispatch unit would have access to the Geospatial information of Fire Department coverage area as well as fire rates and hydrants prior to a unit being dispatched on a call. Dispatchers would be trained in the use of software when necessary (Accuglobe or ESRI, ArcGIS) | Northcoast Geographic Solutions | 4 | 31 to 90 days | \$150,000 |
| Cuyahoga | high-security and conference / training space expa | Since its construction in 1992 the Ohio Aerospace Institute facility has been the "go to" place for collaborative discourse between education, industry and government leaders seeking innovative ways to improve their business, develop new ideas, train employees, and build the economy of the State of Ohio through technology transfer and partnerships. Proximity to NASA Glenn and a reputation for providing an environment steeped in creative and collaborative thought attracted the NASA Safety Center to reside in this facility as of 2007. Such high profile relationships led to a need for additional conference and office space. This project would provide for high-level secure conference space greatly desirable in such an environment. This innovative environment will continue to provide the important space necessary for industry, education and government to collaborate, develop new ideas, projects, programs, technologies and partnerships necessary to drive the economic engine that will power our nation's tomorrow. | ohio aerospace institute | 12 | 31 to 90 days | \$1,800,000 |
| Cuyahoga | Cole Solar PV Roof | Install a Solar PV array on Cole roof. | Cleveland Clinic | 0 | 0 to 30 days | \$500,000 |
| Cuyahoga | Health Space PV Solar | Install a 10KW solar PV array on the roof of the existing Health Space building. | Cleveland Clinic | 0 | 0 to 30 days | \$500,000 |
| Cuyahoga | Roots Plants Rooters Development Plan | This project is to update machinery and tools needed to create additional job openings suitable for technical and non-technical employees. It would also be used to develop this small company by traveling to other states/countries to develop a better marketing strategy. This work shows regarding small businesses and addressing the need to recruit new products. All company vehicles would be updated. Advertising separately needed to be updated. Currently this small business is struggling to stay open. The funds are needed to help fund. Please consider this request. Thank you. | Roots Plant Rooters | 10 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | JOAD TRAINING PROGRAM | Junior Olympic Archery Development currently survives on good will and a shoe string budget. This program has no program paid, trained instructors (currently volunteer) to train but an OLYMPIC ARCHERY. The funds would be used for the equipment of the "The Loft" archery range and create 12 jobs within the range. The training of the club would result in a better trained, more competitive Archery Team to represent Ohio and possibly the USA in future Olympics. Please consider this worthwhile project. It is desperately needed to compete within this sport. | Jr. Olympic Archery Development Program | 12 | 0 to 30 days | \$750,000 |
| Cuyahoga | Critical Care Pavilion ICU Build Out and Expansion | Critical Care Pavilion includes building intensive Care Units on current CCP, new helicopter landing pad and new dedicated elevator. | The MetroHealth System | 4250 | 181 days or more | \$50,000,000 |
| Cuyahoga | home improvement | will use the money to install new insulation in my house, thereby making it more energy efficient. The money will also be used to improve the property and to finish necessary repairs, thereby making it more visually pleasing. | none | 0 | 91 to 180 days | \$100,000 |
| Cuyahoga | Energy Conservation Retrofit | We are seeking funding for an energy conservation program which will reduce our utility consumption and therefore taxpayer expenditures by \$200,000 per year. We expect to reduce electric and natural gas consumption by about 40% and create about 25 jobs in the local market. We have completed an energy audit and we are 100% confident that our project will be successful. The project consists of replacing all of the original lighting in our 35 year old public school. We will also be making significant repairs to our HVAC systems and will install a state-of-the-art lighting automation system. | Cuyahoga Valley Career Center | 25 | 0 to 30 days | \$2,684,859 |
| Cuyahoga | Delta Foundation Life Development Center | The Urban Leadership Center (ULC) is a non-profit organization that provides educational services to students throughout the City of Cleveland and its surrounding areas. We were granted a tax-exempt status under Section 501(c)(3) of the IRS Code. The mission of the Greater Cleveland Delta Foundation Life Development Center is to promote the education of the citizens of Greater Cleveland and its surrounding areas through the support of charitable programs and services designed to educate and empower the members of the community. Although we've already purchased a location we still require a need of additional grant funding in order to start building out the building. Our hope is to design a innovative and state of the art technology center. This would Enable us to have a strong presence within the community while simultaneously assisting in the implementation of our already established program platforms. | Greater Cleveland Delta Foundation Life Development | 15 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | The New Trades 4 Our Youth | Dev., Gardening and more, that are not offered in any high school in Ohio. My program also teaches SAT/ACT Preparation, Fitness, Health, Nutrition, Leadership, Community Service, Equine, and Citizenship. Our program teaches students to create and design new non-profit programs, and executive products that will boost their economy. The program will be conducted after and during school. We will collaborate with the Young Men's Union, Our Task Organization and local churches to create the best program offered to our urban, and rural h.s. students. There are plenty of colleges and states to help motivate the students in their major. In today's economy our students need a diploma, trade certificate, degree, and innovative skills to compete in today's world. We can not send our scholars out in the world to fail with only a diploma, while their competition has more and country. We would like to create a similar program for the returning veterans in the near future. Thank you for listening and God bless | From The Streets 2 College | 10 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Expanding Workforce | My business falls under 3 categories job creation, environmental and clean water. We campaign every year during Earth Month to raise money for the Great Lakes. I partner with Avia who's manufacturing is 100% and power. My business is growing in 2013 compared to last year and I can receive the Stimulus 1 can create and retain approximately 60 jobs. I am a hands on employer who speaks with the consumer everyday I love people and making them feel good about themselves. Thank you for your time and have a great day! | Details Salon Couture | 60 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | GREEN TECHNOLOGY ECONOMIC MODELING | The City of Shaker Heights wishes to incorporate renewable energy/green technology in its beautiful, historic housing, both rental and single family. Older homes in danger of being demolished are being replaced with more energy efficient, and therefore more competitive. Last year the City launched a Transit Village project in a neighborhood which has been ravaged by foreclosures. By combining the best of historic design and green building technologies we hope to create a street where people will be flocking to buy homes because of its energy efficiency, proximity to transit, downtown amenities and jobs, walkability and high quality of design. To ensure that we are making the most prudent investments in green technology, the City must match renewable or green technology with the various housing types on this street. This is accomplished by "Modeling". Our desired outcomes include determining which green technologies will provide the best return on investment for particular projects, housing types, providing information critical for obtaining additional funding for green rehab projects; and attracting high quality developers and buyers because modeling will help ensure the best return on investment for projects. | CITY OF SHAKER HEIGHTS | 2 | 0 to 30 days | \$25,000 |
| Cuyahoga | Lighting | In an effort to reduce energy costs, the library is requesting funding to replace all overhead lighting fixtures to energy efficient fixtures at the Main Library and Bertoni Woods branch. Another benefit would be to improve lighting and safety for library patrons. | Shaker Heights Public Library | 100 | 91 to 180 days | \$400,000 |
| Cuyahoga | Ohio City Townhomes | The Ohio City Townhomes project will be comprised of 35 townhomes located in the City of Cleveland. These 2 and 3 bedroom townhomes will be made available to individuals and families in need of affordable housing. | The NRP Group LLC | 20 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Midtown Senior | The Midtown Senior is a 4-Story Elderly project comprised of 52 units located within the City of Cleveland. The 2 & 3 bedroom units will be made available through a rental program for individuals and families needing affordable housing. | The NRP Group LLC | 20 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | "You're Hired" Youth One Stop Employment and Train | For 6 years Catalyst Learning has been the lead agency of the largest Out-of-School WIA Youth program in Cuyahoga County. Our program The "You're Hired" Youth One Stop Employment and Training Unit is a collective effort of non-profit partners and has provided academic remediation, real-life skills, relevant preparation for work, pertinent referrals to occupational training, necessary supportive services, sustaining job placements and meaningful follow up to over 700 young adults. Our program has met or exceeded WIA legislated outcomes. Client success is the personal relationship developed between staff and clients working with informed recruitment, asset based individualized young client choice programming and relevant follow up. Programming is built on research based positive youth strategies. The vast majority of our clients live in Cleveland and East Cleveland. Several clients within the county have expressed interest in a program which addresses young adults academics, training and employment. We propose to open a satellite program in one of these communities. Occupational training opportunities will be sought through local community colleges and trainers. | Catapult Learning | 125 | 31 to 90 days | \$1,115,000 |
| Cuyahoga | Computers for Jobs | Due to the increased patron demand for computer services to find employment, perform company research and general use, the library is seeking additional funding to replace 45 computers. The library has allocated \$10,000 towards replacing the 45 computers. The new computers will improve technology and information services to enhance employment capacities for unemployed members in the community. | Shaker Heights Public Library | 150 | 0 to 30 days | \$45,000 |
| Cuyahoga | Sustainable energy models... | Proposal for an energy retrofit on a historic landmark to display for public owners interested and for property owners interested in energy efficiency in NECOs... Examples: wind, solar, geothermal, etc... | IDEAS | 200 | 0 to 30 days | \$10,000 |
| Cuyahoga | Greater Cleveland Regional Transit Authority, Clea | Upgrade to station to expand storage, turn bins under fence, install public dispenser and card reader for public access, estimated cost \$200,000. | Clean Fuels Ohio | 10 | 0 to 30 days | \$125,000 |
| Cuyahoga | Cableclerstone Media Relief | By focusing our strengths of integration, key customers and underlying values Cableclerstone Media Group (CCMG) will generate sales of more than \$135 million in three years. Our business model is a roadmap. It is a journey to the very center of big media enterprise. Information technology, photography, film and relevant content must be our core of strategic focus. CCMG is built on the assumption that the management of print, radio, broadcast and internet media can be successfully combined and leveraged to form a "total solution" entity. Street connections are always looking for innovative ways to reach their target markets. They are interested and respond to various media, requiring new ways to reach these customers. CCMG seeks to fulfill these needs and become the leader in integrated media solutions. | Cableclerstone Media Group | 100 | 0 to 30 days | \$25,000,000 |
| Cuyahoga | City of Lakewood, Clean Fuels Ohio Partner | One fast fill station with high-capacity compressor, backup, dispenser, card reader and storage, sized for 20 municipal vehicles plus assorted private vehicles to fuel. | Clean Fuels Ohio | 10 | 0 to 30 days | \$350,000 |
| Cuyahoga | Broadview Road Streetscape Enhancement | This plan will redevelop a 1/2 mile commercial section of Broadview Heights providing an enhanced streetscape on Broadview Road from Sprague Road to Avery Road. Engineering and plans have been completed for this project. The project will provide for the reconstruction of sidewalks and drive aprons and the installation of planters, brick pavers, light poles and bollards, and the resurfacing of the roadway. This project will provide residents with a pedestrian friendly commercial area that will enhance the current business environment and attract new business and jobs to the area. The redesign will also improve safety for pedestrian and vehicular movement. | City of Broadview Heights | 175 | 0 to 30 days | \$2,196,400 |
| Cuyahoga | Multiple Products | We are currently working with the City of Cleveland's Vocational Guidance Services on a number of projects. We would like to continue to utilize the 100+ employees at the center. In addition, we would utilize the seed money to invest in other products that would employ the services of the Vocational Guidance Services located at 2209 East 158th Street, Cleveland Ohio | S and I Brands | 152 | 31 to 90 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Window Replacement | The Shaker Heights Public Library is requesting funding to replace the windows and some doors on the 80 year old building. The library anticipates substantial energy savings by replacing the existing windows and some doors at the Main Library and Bertam Woods Branch. | Shaker Heights Public Library | 100 | 31 to 90 days | \$900,000 |
| Cuyahoga | Library Redesign and Renovation Project | The Shaker Heights Public Library has committed \$800,000 of funding towards renovating the second floor of the library. The project will allow the library to offer more services to the community such as early childhood learning, computer workshops, improved technology services, job employment services, and other various learning opportunities for the community. The library is seeking funding for the following second floor renovations, expanding the HVAC to the unfinished portion, finishing the interior space, renovating the basement area for additional storage, technology expansion such as computers, computer files, cables, printers, servers, self service machines. | Shaker Heights Public Library | 100 | 31 to 90 days | \$2,200,000 |
| Cuyahoga | Assessments for Indigent Youth | In 1984, The Covenant developed and launched the first chemical dependency day treatment program in Ohio specifically designed for urban, indigent adolescents and their families. Today, The Covenant remains the only source of dual diagnosis assessments for indigent youth in our community. The purpose of this request is to double our assessment capacity by adding 1 dual diagnosis therapist to our staff to support the assessment of an additional 80 indigent youth each year. This assessment will examine the extent of illegal drug use, substance abuse, or dependency as well as any mental health or behavioral issues. Clients will be referred to subsequent services. The initial need for services is more than 8,000 teens in our region. The Nat. Cr. for Juvenile Justice estimates the cost to the community of allowing one teen to drop out of school and sink to a life of drug abuse and crime is more than \$2.2 million over teen's lifetime. | The Covenant Adolescent Chemical Dependency Treatm | 2 | 0 to 30 days | \$65,000 |
| Cuyahoga | Low Intensity Treatment to Keep Indigent Teens In | In 1984, The Covenant developed and launched the first chemical dependency day treatment program in Ohio specifically designed for urban, indigent adolescents and their families. The purpose of this request is to double our intensive outpatient treatment (IOP) capacity by adding 3 chemical dependency therapists to our staff to support the treatment of 80 indigent youth by helping these teens recover from the disease of chemical dependency while continuing high school education. The initial need for services is more than 8,000 teens in our region. Nearly 90% of the teens receiving that receive these services from The Covenant are sober or have a reduction in use of illegal drugs, and 92% are working toward their GED/diploma and entering the workforce. Recovery from chemical dependency enables these teens to have the opportunity to pursue a healthy and productive lifestyle. The Nat. Cr. for Juvenile Justice estimates the cost to the community of allowing one teen to drop out of school and sink to a life of drug abuse and crime is more than \$2.2 million over teen's lifetime. | The Covenant Adolescent Chemical Dependency Treatm | 4 | 0 to 30 days | \$125,000 |
| Cuyahoga | St. Vincent Charity Hospital Campus Transformation | An anchor & economic engine in the Central neighborhood since 1865, we are revitalizing this urban safety net & its campus (with other positive benefits e.g. an improved streetcape). A Disproportionate Share Hospital, St. Vincent Charity is a busy, full-service teaching facility, offering primary, specialty & surgical care with 115,000 outpatient visits/year. It is one of the two psychiatric emergency departments in the state. A, along with the medical ED, sees 30,000 visits/year. The downtown campus consists of various buildings constructed over the past 90 years. This is a subset of a larger (submitted) request. We seek energy-efficient modernize to help with the demolition of high-energy-consuming buildings, renovation of existing buildings with new windows, etc. Project also includes abatement & hazardous materials removal, new construction with conservation design features, added green space & green landscaping. Other energy efficiencies would include new lighting, replacement of older tube lights (average 1960) with three (3) new 300 hp tube lights. The larger project will enable the hospital to create 1,000 jobs, provide construction & other trade jobs. | Sisters of Charity Health System | 1300 | 91 to 180 days | \$10,000,000 |
| Cuyahoga | IOP For Indigent, Chemically Dependent Youth | In 1984, The Covenant developed and launched the first chemical dependency day treatment program in Ohio specifically designed for urban, indigent adolescents and their families. The purpose of this request is to double our intensive outpatient treatment (IOP) capacity by adding 3 chemical dependency therapists to our staff to support the treatment of 80 indigent youth by helping these teens recover from the disease of chemical dependency and continue their education and/or join the workforce. The initial need for services is more than 8,000 teens in our region. Nearly 90% of the teens receiving that receive these services from The Covenant are sober or have a reduction in use of illegal drugs, and 92% are working toward their GED/diploma and entering the workforce. Recovery from chemical dependency enables these teens to have the opportunity to pursue a healthy and productive lifestyle. The Nat. Cr. for Juvenile Justice estimates the cost to the community of allowing one teen to drop out of school and sink to a life of drug abuse and crime is more than \$2.2 million over teen's lifetime. | The Covenant Adolescent Chemical Dependency Treatm | 6 | 0 to 30 days | \$200,000 |
| Cuyahoga | Day Treatment for Indigent Adolescents | In 1984, The Covenant developed and launched the first chemical dependency day treatment program in Ohio specifically designed for urban, indigent adolescents and their families. Today, we remain the only source of day treatment for indigent adolescents in Cuyahoga County. The purpose of this request is to double our treatment capacity by adding 12 chemical dependency therapists to our staff to support the treatment of 80 indigent youth to help those teens recover from the disease of chemical dependency and continue their education and/or join the workforce. The initial need for services is more than 8,000 teens in our region. Nearly 90% of the teens receiving that receive these services from The Covenant are sober or have a reduction in use of illegal drugs, and 92% are working toward their GED/diploma and entering the workforce. The Nat. Cr. for Juvenile Justice estimates the cost to the community of allowing one teen to drop out of school and sink to a life of drug abuse and crime is more than \$2.2 million over teen's lifetime. | The Covenant Adolescent Chemical Dependency Treatm | 12 | 0 to 30 days | \$380,000 |
| Cuyahoga | Grand Arcade Restoration | In 1984, The Covenant developed and launched the first chemical dependency day treatment program in Ohio specifically designed for urban, indigent adolescents and their families. Today, we remain the only source of day treatment for indigent adolescents in Cuyahoga County. The purpose of this request is to double our treatment capacity by adding 12 chemical dependency therapists to our staff to support the treatment of 80 indigent youth to help those teens recover from the disease of chemical dependency and continue their education and/or join the workforce. The initial need for services is more than 8,000 teens in our region. | Cuyahoga | Multi-Dimensional Family Therapy for Indigent Mult | This building is located in the heart of downtown Cleveland. It is the keystone to the city's "Warehouse District." The area generates a lot of business and local dollars for the city of Cleveland. This building is vital to the survival of the entire area. A lot of young professionals who live and work in Cleveland reside in this building. | The Covenant Adolescent Chemical Dependency Treatm | 6 | 0 to 30 days | \$200,000 |
| Cuyahoga | Supported Living | Multi Dimensional Family Therapy (MDFT) is a SAMHSA recognized best practice, and The Covenant is the only provider of MDFT in Cuyahoga County, OH. The purpose of this project is to increase the capacity of MDFT services to chemically dependent teens, ages 12-18, and their families, in particular for female and/or African American teens. This would be accomplished by hiring 2 in-home therapists and a case manager that would provide services for up to 50 teens and 200 family members each year to help these teens recover from the disease of chemical dependency and continue their education and/or join the workforce. The initial need for services is more than 8,000 teens in our region. Nearly 90% of the teens receiving that receive these services from The Covenant are sober or have a reduction in use of illegal drugs, and 92% are working toward their GED or high school diploma and entering the workforce. | Rose-Mary Center | 50 | 31 to 90 days | \$150,000 |
| Cuyahoga | Supported Living | By one professional to coordinate a supported living program, to review requests for assistance, hire direct care staff to provide assistance. Expected outcomes: 1. 50 new jobs created 2. 208 individuals with disabilities would continue to live independently | Rose-Mary Center | 50 | 31 to 90 days | \$150,000 |
| Cuyahoga | Energy Efficiency for The Covenant | In 1984, The Covenant developed and launched the first chemical dependency day treatment program in Ohio specifically designed for urban, indigent adolescents and their families. Today, we remain the only source of day treatment for indigent adolescents in Cuyahoga County. The purpose of this request is to double our treatment capacity by adding 12 chemical dependency therapists to our staff to support the treatment of 80 indigent youth to help those teens recover from the disease of chemical dependency and continue their education and/or join the workforce. The initial need for services is more than 8,000 teens in our region. The Nat. Cr. for Juvenile Justice estimates the cost to the community of allowing one teen to drop out of school and sink to a life of drug abuse and crime is more than \$2.2 million over teen's lifetime. | The Covenant Adolescent Chemical Dependency Treatm | 5 | 0 to 30 days | \$180,000 |
| Cuyahoga | Pioneering Ohio to Champion Business through Ohio' | We recently completed the restoration of the Federally registered historic McGuffey school building (additive reuse) as the first permanent home for The Covenant and the clients we serve, located in the Ohio City neighborhood of Cleveland. The total investment is \$2.4 million, of which \$2.2 million has been implemented. We are requesting \$180,000 to help complete the project with "showcase ready" energy efficiency projects (purchase and installation of (1) high efficiency steam boilers, (2) double weatherstripping, and (3) high efficiency heating and cooling systems. The projected energy savings are \$18,000/year. All energy efficiency savings will be utilized to provide treatment services for indigent adolescents from Cuyahoga County, OH. | Alumni Connection.com | 32 | 31 to 90 days | \$6,505,472 |
| Cuyahoga | Amer-I-Can Life Management Skills and Mentoring Pr | A robust, skilled, educated workforce is the driver to create the fertile landscape for Ohio to nationally lead business. Thus, Ohio shall economically lead the Nation. We will create an innovative "single point location" infrastructure for every Ohio high school student to directly network with every college/university, trade school, and/or trade apprenticeship. Thus, every Ohio student shall have limitless opportunities. This forum unlocks countless scholarships & grants, as well as, providing business outreach by unlocking infinite trade apprenticeship opportunities for Ohio students. By showing students they have opportunities, even at risk students will view the world from a different perspective. Thus, graduation rates will increase, self destructive behavior will decrease (crime, drug, pregnancy), because all see a desirable future for themselves. In addition, our program provides the conduit for community mentors to connect with students. By establishing a highly skilled, educated labor force, Ohio becomes the magnet for business. From manufacturing to high-tech, businesses realize the value of this commodity and will migrate. Thus, Ohio pioneers the future. | Amer-I-Can Cleveland | 22 | 0 to 30 days | \$2,200,000 |
| Cuyahoga | Young Rembrandts - Northeast Ohio Education Partne | The Amer I Can Life Management Skills curriculum is an accredited 15 chapter, 40-90 hour course that is 100% non-biased. It is not based upon gender, race, religion or socio-economic status. The program is designed to instill into the psyche of the trainee, self responsibility, utilizing self determination techniques. The curriculum has been taught throughout the country in all areas of need including middle and high schools, as well as, prisons and jails. Amer I Can was founded in 1988 by National Football League Hall of Fame and Motion Picture Actor, Jim Brown. The program goals are to help untalented individuals meet their potential, conform that behavior to lawful standards and improve the quality of their lives by equipping them with the critical life management skills to confidently and successfully contribute to society. The Amer I Can curriculum addresses the following (8) critical areas of life skills and human development: 1. Motivation, Habits and Attitudes 2. Goal Setting 3. Problem Solving and Decision Making 4. Emotional Control 5. Family Relationships 6. Financial Stability Young Rembrandts art program uses its partnership with community recreation centers, libraries, and non-profit youth based organizations to bring the Young Rembrandts art program into their summer programming mix and assist low-income community schools provide additional art opportunities during the school year. We have current connectivity with over 50 schools and 15 non-profit agencies whose families we can assist immediately, but only does Young Rembrandts provide sites for hundreds of teachers and administrative staff; we also enable employed parents to have working knowing that children are in a safe place while they work. Most importantly, we are providing a new and very specific element of education to students that may not otherwise receive this level of education in the classroom. Specifically, our program instills skills in the technical know-how (or left brain methodological) of standard classroom education, instead we are equipping children with the ability to create, analyze, and synthesize information - a skill that will be vital to a future workforce where basic, rote and technical skills will not be enough to make it in the new technological and global economy. 5 yr funding | Young Rembrandts, Cleveland West | 30 | 31 to 90 days | \$600,000 |
| Cuyahoga | Development of High Efficiency Process Heating Equ | This collaborative project will be led by the newly established Center for Thermal Technology at Case Western Reserve University. The development targets both electrical and gas powered industrial equipment, such as melting furnaces, heat treat furnaces, ovens, kilns, etc. Improvements in the order of 25-30% in efficiency are anticipated by integration of modern burner technologies, state of the art control systems, efficient insulation, etc. A consortia of burner and process heating equipment manufacturers as well as large industrial users will participate in the project. The educational activities will target engineering college undergraduate classes as well as continuing education workshops for practicing engineers. | Case Western Reserve University | 40 | 0 to 30 days | \$390,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Enhanced Adult Day Services for Community Seniors | Eliza Bryant Village (EBV) is one of Cuyahoga County's largest Adult Day Services (ADS) providers. This program provides an alternative to costly institutional care and rehabilitation for older adults. We are requesting support for the expansion of our Adult Day Services program. This will allow us to conduct psychosocial and therapeutic evaluations (counseling, physical and speech), implement restorative nursing principles, provide additional education and outreach programming for caregivers and family members, repair/transportation to service the wider community and also continue to provide structural activity (such as fitness and creative movement) for older adults who have physical and/or cognitive impairment. This program would correspond with Ohio's Unified Long Term Care Budget objective of maintaining people in the community setting longer. Associated costs for the program include the hiring of a community health educator, staff training, retention of trained facilitators and materials, and equipment. | Eliza Bryant Village | 4 | 31 to 90 days | \$142,600 |
| Cuyahoga | Ukrainian Museum-Archives: Phase III Renovation a | The Ukrainian Museum-Archives (UMA) has been an anchor in Cleveland's Tremont neighborhood for more than fifty years. In the process of assembling a vast collection of Ukrainian and artifacts about Ukrainian Culture and the history of immigration to America. In 1958, the UMA was incorporated as a Pilot Project for the U.S. - Ukraine Joint Commission on Cultural Preservation. Within the framework of the Pilot Project, the UMA has been teaching Ukrainian History and Culture as well as immigration to students from K-College, welcoming delegations from Ukraine, visitors from the neighborhood and from other states and countries. Having recently completed construction of a family and temperature-controlled archival facility (Phase I), the UMA is now completing renovation of our original building (Phase II) and are preparing to expand our exhibit, storage and event space (Phase III) by constructing the new archival and original buildings. Wait space on the contractor will become a safety and serve as a venue for events and programs. | Ukrainian Museum-Archives | 20 | 0 to 30 days | \$750,000 |
| Cuyahoga | Fire Station | Although in its infancy, the Village of Walton Hills is considering creating a fire department which will include the construction of a fire station. It is fully anticipated that the Village will work with surrounding municipalities in the creation and implementation of a fire department. Keep in mind that all projects are preliminary. | Village of Walton Hills | 3 | 181 days or more | \$1,500,000 |
| Cuyahoga | Re-train unemployed auto workers | The construction of a station within Walton Hills will increase our firefighter-to-person ratio as well as increase the level of protection for our residential and commercial districts. It has been estimated that by the year 2016, there will be a demand for 1 million workers in the direct care field. We would expand our existing direct care professional training program (which trains new hires only within our organization) to include laid off and unemployed auto workers (as well as unemployed construction workers). Expected outcomes: 1. Train up to 500 unemployed workers a year 2. Provide training in a field that is predicted to have a shortage of qualified workers by the year 2016 3. Place 500 people a year back into the workforce | Rose-Mary Center | 500 | 91 to 180 days | \$200,000 |
| Cuyahoga | Geothermal Conversion: TOD Apartment Building Reno | Successful conversion of 1960s era boiler system in an 18 unit apartment building for heating and cooling and projected 90% elimination of total air consumption for HVAC systems. Part of overall program including original aluminum window replacement with Low-E windows (Completed 2008), geothermal geoprof HVAC conversion (2009), green roof insulation program and low flow fixture replacement. Also includes ADA file and projects: TOD and walkable living communities. Would be coordinated with City of Shaker to promote green construction opportunities for multi-family properties. | Daleford House, LLC | 3 | 91 to 180 days | \$250,000 |
| Cuyahoga | Energy efficient tower fan upgrade | Replacement of 16 year old direct-drive cooling tower fan motor and starter with Energy Efficient VFD (variable frequency drive) and energy efficient motor. | Ohio Aerospace Institute | 0 | 0 to 30 days | \$8,000 |
| Cuyahoga | Energy efficient roof and insulation replacement | Replacement of approximately 6,500 square foot of deteriorated roof and insulation with Energy Efficient upgraded insulation and membrane roof. New product to be ENERGY STAR certified and LEED compliant. | Ohio Aerospace Institute | 3 | 0 to 30 days | \$120,000 |
| Cuyahoga | Solar Electric for Sunrooms | Develop turn-key solar powered systems, utilizing the sunroom structural insulated roof panels, for the sunroom. | Oasis Sunrooms/Joyce Mfg | 12 | 0 to 30 days | \$805,000 |
| Cuyahoga | Energy efficient lighting upgrade | Replacement of approximately 60 spot fixtures with energy efficient light fixtures and light sensors. | Ohio Aerospace Institute | 2 | 0 to 30 days | \$37,000 |
| Cuyahoga | Aerospace Collaborative Core Research Program | The Collaborative Core Research Program provides training for Ohio graduates researchers. This program is a link between Ohio universities, Ohio companies, NASA-GRC and the Air Force Research Lab. Sponsored collaborative research projects are conducted across Ohio. Through this program, company sponsors priorities and the university research needs and the university research needs are met through an RFP process managed by OAI. This program has spawned 80 projects, countless commercial successes, and new startups, but though economic trends have curtailed funding for needed research in the last few years. The Collaborative Core Research program requires \$1.5 million dollars of government money which will be matched 1:1 by private dollars from sponsoring companies. This program achieved a direct 5:1 leverage ratio between private dollars raised and government dollars invested in the past. In addition, over multiple years further indirect stimulus and jobs have been created as well as CDFI sponsored seed projects grow into multi-million dollar collaborations in the behavioral healthcare system. University of Cincinnati and University of Dayton Wright Center in Nanomaterials and Devices. We identify local needs for research and/or training within the City limits and to pursue the sustainable use of natural gas by the City, it's residents and/or the public domain as a cost effective rate. To cooperate with city and all relevant owners whose said deposits are located, to achieve the above result and to take necessary action to expedite said proposed use for the benefit of the majority of residents. | The Ohio Aerospace Institute | 150 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | Local natural gas exploration... | | City of Seven Hills, Ohio | 7 | 0 to 30 days | \$10,000 |
| Cuyahoga | Dealing With WORKPLACE VIOLENCE | A complete Workplace Violence safety program for all businesses, to include the complete format for tracking, reporting, reviewing and supporting victims and perpetrators. This program will support all businesses in reducing their liabilities, thus providing them the opportunity to reduce their operating costs. Statistical data will allow local law enforcement to keep track of violence and show that a reduction in Workplace Violence will be achieved via this format program. Local law enforcement will be able to pass the data on to federal agencies (FBI) for statistical gathering purposes on a state and country wide basis. This program will also be placed on the Internet for use by any business throughout the United States. | S.S.T.A.R. Enterprises | 12 | 181 days or more | \$1,750,000 |
| Cuyahoga | Greening Cleveland Public Library: Windows | Replace windows with insulated multi-layers at Addison Branch Library with new EE windows. | Cleveland Public Library | 3 | 91 to 180 days | \$35,000 |
| Cuyahoga | Greening Cleveland Public Library: BEMS Controls | Reduce the library system's total energy use by installing Building Energy Management System controls at 22 library facilities throughout the city of Cleveland. | Cleveland Public Library | 3 | 91 to 180 days | \$1,075,033 |
| Cuyahoga | Greening Cleveland Public Library: HVAC | Reduce library systems total energy use by replacing inefficient HVAC equipment over 25 years of age at 17 public library facilities throughout the city of Cleveland with improved EE equipment. | Cleveland Public Library | 5 | 91 to 180 days | \$2,485,494 |
| Cuyahoga | Expanding Minds Through Travel | Expanding urban kids and parents minds through traveling beyond their environment. An educational program for kids and their parents to stimulate interest in local, state, and federal government professionals, as well as explore progressive and innovative cities in America. | Network for Neighborhood Success | 10 | 31 to 90 days | \$100,000 |
| Cuyahoga | Training Clinicians to provide tobacco services | This project will provide trainings/training to adults seeking to fill positions needed to provide treatment to adults with severe mental illness (SMI) who use tobacco. People with SMI die an average 25 years before their non-tobacco counterparts. Perhaps the most significant modifiable risk for this high morbidity and mortality is tobacco use. People with SMI have very specific needs and considerations when cutting down or quitting tobacco such that specialized training is required to provide these services (e.g. tobacco inhalers with medication of the medications used to treat these illnesses). Specialized training is needed to give employees the skills to provide tobacco services to consumers in the behavioral healthcare system. This project will provide direct training to 200 adults in basic and advanced level tobacco treatment. In addition, it will create 20 clinical positions (three behavioral healthcare agencies throughout the State of Ohio). Our comprehensive Youth Service Delivery System offers support, education, job training, enrichment and creative activity for our youth and their families, enhancement of self and body through our neighborhood organizations working together in a way sign of unity for the betterment of the community. | CWRU/MSASS/Center for EBPs at CWRU | 21 | 31 to 90 days | \$692,500 |
| Cuyahoga | Women With Out Borders | Efficiency is a key determinant of employment opportunity and career mobility over time. Low literacy and poor access to appropriate education/training and needed supportive services is a major contributor to unemployment and persistent poverty. Literate and employed persons depend less on governmental assistance, take more responsible care of their children, and are more capable of supporting their children's education. Literacy programs across multiple communities operated by members of the Family Support Consortium provide a holistic, high-levage approach to breaking the intergenerational cycle of under education and poverty. Programs address literacy of both under-educated parents and their young children, a parent enrolled in GED, ESL, or career-technical programs is eligible for financial counseling home visits to promote interactive parent-child literacy learning, and case management services to help the family overcome barriers to learning. Parents are taught how to foster their children's literacy development through play and reading strategies, and are supported in reaching their own educational goals. The Consortium seeks to expand these programs. | Network for Neighborhood Success | 160 | 181 days or more | \$1,000,000 |
| Cuyahoga | Families Learning Together | All students (3,500) grades 6-12 will learn in a 21st Century wireless environment using laptops. The initiative helps to prepare our students for a future that includes college and work place readiness and overcome demographics that include high poverty and mobility. District resources have been reallocated to fund grades 6-8 stimulus funds are requested to fund grades 9-12. Structures and procedures are in place to begin immediate implementation to include: - Purchase, image, inventory, distribute 150 teacher laptops - Purchase, image, inventory, distribute 2,000 student laptops - Secure laptops with GPS technology - Provide help desk, training and technical support | Family Support Consortium of Greater Cleveland | 12 | 0 to 30 days | \$850,000 |
| Cuyahoga | Teaching and Learning with Technology | A community support system for head of house who lost their job. We provide 21 century job training and job opportunity. We also provide for the whole family community support programs that range from hot meals, health educations, emergency readiness, history lessons, and fun activity for the whole family. The Main Library is currently replacing the HVAC actuators. The library anticipates significant energy efficiency and savings by upgrading the 93 year old TRAC air duct controls. Replaces existing freezer door that originally was replaced in 1966. Original parts are no longer manufactured for this particular vintage by Jamison Door. We rely on our freezer for our food service products. We would continue to deep people in their jobs plus hiring outside sources to do the freezer door replacement. Replacement of old ammonia refrigeration compressor. This is a must do in order to keep refrigeration in our entire plant. We would continue to deep people in their jobs plus hiring outside sources to do the ammonia refrigeration compressor job. Replacement of old ammonia refrigeration compressor. This is a must do in order to keep refrigeration in our entire plant. We would continue to deep people in their jobs plus hiring outside sources to do the ammonia refrigeration compressor job. New equipment to enable the attraction of work that the processes of this equipment will provide. | Cleveland Heights-University Heights City Schools | 5 | 91 to 180 days | \$2,350,000 |
| Cuyahoga | Family Affair Day of Service Program | A community support system for head of house who lost their job. We provide 21 century job training and job opportunity. We also provide for the whole family community support programs that range from hot meals, health educations, emergency readiness, history lessons, and fun activity for the whole family. The Main Library is currently replacing the HVAC actuators. The library anticipates significant energy efficiency and savings by upgrading the 93 year old TRAC air duct controls. | Cuyahoga | Victim Assistance Program | The Victim Assistance Program services all victims of crimes that occur in the City of Euclid regardless of prosecution. Advocates offer immediate crisis intervention, act as a liaison with law enforcement and prosecution, court accompaniment, case status information, referrals, assistance with Victims of Crime Compensation and community outreach and education. We will utilize the funds to hire two staff positions, the director and assistant director, and to hire two new full time advocates. Of 2008 there were 17,187 crime/victims of which 1,765 were family and sexual violence. In our city there has been a rise of approximately 15% of family and sexual violence in 2009. The resources available will be instrumental in assisting this victim population in addition to all other victims of crimes such as attempted murders, assaults, and robbery. Currently there is also a need for advocacy in the hospitals. We are unable to meet this need so there are only two paid employees. The duties of the new advocates will include all aspects of current service delivery in addition to providing advocacy in the hospital. | Euclid Police Department Victim Assistance Program | 4 | 0 to 30 days | \$133,120 |
| Cuyahoga | Budget Stabilization | Funds are being sought to establish a budget stabilization fund as required by Ohio Administrative Code. LNOCA provides information technology services to more than fifty educational entities in the greater Cleveland area. This includes public school districts, public chartered schools, non-public schools, and educational support agencies representing approximately 112,000 students. Assuring the required amount as established by Ohio Administrative Code would result in a hardship on LNOCA's members and result in additional lost jobs. | Lakeshore Northeast Ohio Computer Association | 20 | 0 to 30 days | \$450,000 |

| Cuyahoga | Datacenter/Training Room Virtualization Project | The Lakeshore Northeast Ohio Computer Association (LNCOCA) is seeking funds for a project to expand its existing virtualized datacenter and update one of its existing training rooms with a virtualized environment. Currently LNCOCA has implemented virtualized servers and recognized cost savings and the ability to quickly analyze and test new technologies. The goal of this project is to deploy additional virtualized servers and data storage. In addition, this project would deploy virtualized desktops in the training environment and to realize cost savings and an environmentally friendly green initiative. This is an initiative that was previously scheduled for implementation once the necessary funds had been secured. LNCOCA provides information technology services to more than fifty educational entities in the greater Cleveland area. This includes public school districts, public chartered schools, non-public schools, and educational support agencies representing approximately 112,000 students. Once implemented this would provide a model for area schools seeking to implement virtualized desktops in a classroom and computer lab environment. | Lakeshore Northeast Ohio Computer Association | 20 | 0 to 30 days | \$160,000 |
| Cuyahoga | Human Resource Information System Project | The Lakeshore Northeast Ohio Computer Association (LNCOCA) is seeking funds for a project to implement a Human Resource Information System. The demands of Federal and State laws require schools to maintain significant amounts of personnel data including licensure information, current certifications, as well as results of criminal records checks. The software systems currently in use in schools are insufficient to support these demands. The goal of this project would be to deploy a human resources information system to ease the process of being responsive to the requirements of Federal and State law. LNCOCA provides information technology services to more than fifty educational entities in the greater Cleveland area. This includes public school districts, public chartered schools, non-public schools, and educational support agencies representing approximately 112,000 students. | Lakeshore Northeast Ohio Computer Association | 20 | 31 to 90 days | \$459,000 |
| Cuyahoga | Enhanced Broadband Access Upgrade | The Lakeshore Northeast Ohio Computer Association (LNCOCA) is seeking funds for a project to enhance existing broadband access for area schools. Currently LNCOCA utilizes a third party managed fiber optic network for connecting area schools. Previously LNCOCA has received requests for services for schools that could not be connected utilizing third party. The objective of this project is to provide an alternate connection utilizing a regional cable television provider. The alternate connection would allow LNCOCA to continue to provide cost effective information technology services to schools in the greater Cleveland area. | Lakeshore Northeast Ohio Computer Association | 20 | 0 to 30 days | \$40,000 |
| Cuyahoga | School On-Line ePortfolio Project | LNCOCA provides information technology services to more than fifty educational entities in the greater Cleveland area. This includes public school districts, public chartered schools, non-public schools, and educational support agencies representing approximately 112,000 students. This Lakeshore Northeast Ohio Computer Association is seeking funds for a project to implement an on-line learning management system and a student ePortfolio system. Many institutions of higher learning require students to participate in on-line courses as a requirement for graduation. Success in an on-line course requires the student to participate in an environment requiring 21st century skills. These skills should be developed as a part of the student's K-12 learning experience so they are prepared for higher education and entering the workforce after high school graduation. This on-line learning environment would also be used for professional development opportunities made available to Cleveland area educators. Electronic portfolios are an important tool for students to demonstrate their achievement and skills throughout their K-12 education. This 21st century skills ePortfolios are a useful and necessary tool to prepare students for entering college and the workforce following high school graduation. | Lakeshore Northeast Ohio Computer Association | 23 | 31 to 90 days | \$530,000 |
| Cuyahoga | Student Registration Project | LNCOCA provides information technology services to more than fifty educational entities in the greater Cleveland area representing approximately 112,000 students. The Lakeshore Northeast Ohio Computer Association (LNCOCA) is seeking funds for a project to develop a software solution to interface with the existing student information system. Many schools in the greater Cleveland area struggle with providing a stable and consistent educational experience to transient students. The envisioned system will allow for the streamlining of the student registration process for students entering from non-LNCOCA schools. The goal of the enhanced system is to reduce the administrative burden of registering students and allow the school staff to focus on quickly meeting the educational needs of the student. While this project has been deemed worthwhile, the funding to initiate the project could not be secured. | Lakeshore Northeast Ohio Computer Association | 20 | 31 to 90 days | \$990,000 |
| Cuyahoga | Student Data Transfer Project | LNCOCA provides student information system services to eighteen public, community (charter) and non-public schools in the greater Cleveland area representing more than 50,000 students. Once implemented, this system would be made available to all schools seeking student information system services from LNCOCA. Many schools in the greater Cleveland area struggle with providing a stable and consistent educational experience to transient students. Districts in Cuyahoga County report student mobility rates in excess of 50%. The envisioned system will allow for the automated transfer of student data between LNCOCA schools as well as a computer for streamlining the student registration process for students entering from non-LNCOCA schools. The goal of the enhanced system is to reduce the administrative burden of registering students and allow the school staff to focus on quickly meeting the educational needs of the student. Previously LNCOCA has received requests for software development company to create a project envisioning/requirements document and a cost estimate. While the project was deemed worthwhile, the funding to initiate the project could not be secured. | Lakeshore Northeast Ohio Computer Association | 20 | 0 to 30 days | \$400,000 |
| Cuyahoga | Cinema Park | Pay off loan to PNC. The City of Warrensville Heights and a pool of private investors for the land and improvements for a failed subdivision on Miles Road in Warrensville Heights. Build homes on 82 improved lots to provide housing for citizens of Warrensville Heights. Construction and absorption will be 24-48 months in length and provide approximately 30 jobs in construction and management of the housing development. The project will provide affordable housing for first time home buyers and lower income families. Warrensville Heights will benefit by paying off bonds (2.6M) issued for infrastructure work and building to their real estate and taxpayer base. PNC will be added in receiving payment on a troubled loan (LAD) and construction with current little hope of collection. Warrensville Heights and their residents will benefit from the abandoned owners becoming a thriving subdivision. The city has faced many hardships in the past 10 years and this project will help them turn one area around and benefit all city residents in the process. | Franklyn Development Company | 30 | 31 to 90 days | \$8,000,000 |
| Cuyahoga | Economic Development and Empowerment Plan | THIS IS AN UPDATE: A Comprehensive Collaboration of non-profit and for profit organizations focused on workforce development, business development, wealth accumulation/Individual Development Account, and housing. Initiative targets individuals in underserved communities and who are unemployed or underemployed. Participants will receive referrals for substance abuse and psychological assistance. Participants will have ability to secure jobs, start small businesses, save money for: finance college, purchase a new home, refinance an existing home, and they will also be able to secure housing in the process. | Rehab and Rebuild Foundation | 100 | 31 to 90 days | \$550,000 |
| Cuyahoga | Cleveland STANCE- Peacemaker's Alliance | To establish a minimum 100 coordinated community-based outreach workers in the City of Cleveland and surrounding communities in Cuyahoga County to prevent and intervene in the reduction of violence specifically focused on youth violence and gang violence reduction. This project would work in conjunction with the City of Cleveland's Community Relations Board and the US Attorney's Comprehensive Anti-Gang Initiative. | Partnership For A Safer Cleveland | 52 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Alternative energy / wind turbine project | Purchase and installation of a 225 kW wind turbine to assist the Ohio Aerospace Institute in becoming less energy dependent; foster the environment of change necessary to encourage others to seek energy alternatives, and assist the State of Ohio in meeting its Renewable Energy Portfolio Standard. | Ohio Aerospace Institute | 6 | 0 to 30 days | \$1,300,000 |
| Cuyahoga | Reentry Employment & Training Program | West Side Ecumenical Ministry, a Cleveland-based nonprofit human services agency, is seeking \$500,000 in federal stimulus funds to improve employment outcomes for 240 minority, formerly incarcerated individuals in Cuyahoga County through its WISEME! Barrio Workforce Development Center of Excellence. WISEME! is currently responding to federal and county RFPs issued through the Second Chance Act Prisoner Reentry Initiative and the Cuyahoga County Department of Justice Affairs with an evidence-based approach to reentry and reintegration. Built on a combination of employment and soft skills training, career counseling, case management, and job development and retention services, the program will improve employment rates, reduce recidivism to correctional facilities and increase public safety. Program delivery partnerships have been established with the Hispanic Business Association, Project Nueva Luz and a Cleveland-based bank. \$400,000 will be used to renovate a donated bank branch to house the program and install a security system. The remaining \$100,000 will fund staff training, reentry certification costs, and business development costs to identify sympathetic employers. | West Side Ecumenical Ministry | 134 | 31 to 90 days | \$500,000 |
| Cuyahoga | Cleveland Thermal CHP | Cleveland Thermal LLC provides district heating and cooling thermal energy to commercial, institutional and governmental buildings in downtown Cleveland and is developing a combined heat and power (CHP) project, which will update its combustion technology to provide greater energy efficiency and environmental benefits while simultaneously generating 100 MW of electric power. The advanced combustion and pollution control technology to be included will result in thermal efficiency improvements of more than 20%, electric efficiency improvements in excess of 16% and a reduction in hourly emissions rate by 75%, all in the smallest carbon footprint design. The project's primary fuel source will be \$15 Million per year of Ohio coal with the added ability to include 15-20% biomass into the fuel stream. Ohio based fuel will add \$18 million per year and 160 ancillary positions. The total estimated cost for the CHP project will be in excess of \$200 Million including over \$80 Million in construction contracts and 150-200 trade positions. The new plant will require 35 new positions and add over \$2.4 million in new off-site revenue while preserving over \$8 Million in existing revenue. | Cleveland Thermal LLC | 279 | 31 to 90 days | \$7,000,000 |
| Cuyahoga | Expansion of Home Health Care Company | Signature Health Services LLC provides home care services to the residents of the greater Cleveland area. The company has a successful track record of hiring in all the communities that they serve. Our goal is to continue this growth in areas of the state where limited opportunities exist for the local workforce. These areas are Toledo, Cleveland, Parma, Lorain, Tiffin, Dayton. We would be hiring in these offices skilled and non skilled workers/Home Health Care Aides, Office personnel/Registered Nurses, Licensed Practical Nurses, Clinical managers. These funds would allow us to grow faster in 2009/2010 and add jobs to the Ohio and local economies in a faster fashion. We have proven that we can achieve these results and each the chance to help Ohio's workforce get back to work. This growth will also assist in helping Ohio's elderly Residents out of the nursing homes where care is more expensive than the Medicaid patient versus providing Home Care. For your response please send correspondence to Michael Solomon of Bushell Solomon 23240 Chagrin Beachwood Ct | Signature Health Services LLC | 100 | 31 to 90 days | \$750,000 |
| Cuyahoga | Removal of Underground Storage Tanks | Four underground storage tanks to be removed. Area to be cleaned and decontaminated. Tanks will be discarded. The institutional goal of our district is to provide opportunities for all students to achieve maximum educational growth and development. It is our responsibility to authorize the adoption of instructional materials to help meet this goal. Due to our present financial state, we are unable to purchase textbooks that are approved by the State Board of Education in an effort to create an aligned system of academic standards, model curricula and tests. | City of East Cleveland | 4 | 0 to 30 days | \$80,000 |
| Cuyahoga | Parma City Schools Instructional Materials | Our immediate needs in this area are: \$88,450 Grade 5 Social Studies \$71,000 Grades 10-12 Algebra \$27,000 Grades 10-12 Chemistry \$186,450 TOTAL | Parma City School District | 5 | 91 to 180 days | \$186,450 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | Parma City Schools Safety and Security Program | <p>Our immediate needs in this area are:</p> <p>\$374,000 Upgrading security cameras \$132,000 Upgrading access control \$33,000 Upgrading radio system \$354,000 6 School Resource Officers \$893,000 TOTAL</p> | Parma City School District | 20 | 91 to 180 days | \$893,000 |
| Cuyahoga | Parma City Schools District-Wide Electrical Upgrad | Most of the buildings in the school district were built long before the innovation of modern technology. As a result, they do not have adequate electrical service from the street nor appropriate power distribution within the buildings. To address this problem and provide our students with a quality 21st Century education, major electrical upgrades are needed throughout the district. Capacity must double to meet the current and projected future needs of technology-driven classrooms and computer labs. The district's deployment of modern educational technology has been slowed by insufficient electrical power. This leaves our students with limited opportunities to learn the skills they will need in an information-rich and technology-driven society. | Parma City School District | 100 | 91 to 180 days | \$13,000,000 |
| Cuyahoga | PROJECT CAST (Community As Successful Teachers) | All My Heart Education Center is requesting federal stimulus assistance to develop a new area of emphasis within its existing education program. The proposed four year Community As Successful Teachers (CAST) project is designed to create increased preschool and community access to education opportunities based on high expectations of children living in urban communities and evidenced by ongoing student performances of excellence. CAST will foster shared understandings of learning differences in exemplary uses of best practices across curricula that exceed state standards. CAST is a three-phased process engaging professionals and members of our community as stakeholders in the education of preschoolers: 1. Two teachers with Bachelor of Science degrees in early childhood education will be hired in the first year. One additional teacher will be hired in years two and three, consecutively. Other project funding, teachers will be maintained and added to staff as needed. 2. Workshops will be presented at sites throughout the community that focus on early childhood issues. 3. Voice workshops will be produced via radio, four times yearly. | ALL MY HEART EDUCATION CENTER, INC. | 20 | 0 to 30 days | \$450,000 |
| Cuyahoga | Scholars Program | THIS IS AN UPDATE: The Scholars Program is a collaborative between the school districts, students, parents, non-profits, for-profit, and community organizations. The program assists students in grades 10-12 with developing and improving skills in the following areas: assessing the DOTACT, personal development, human interaction, communication, health theories, financial literacy, college readiness, and writing planning, self-esteem, personal safety, career development, and conflict resolution. The 10 month program is in its second year. Cleveland State University students receive paid summer internships with area corporations that allow the students to receive hands on experience. Teachers who express interest in, as well as a job coach. The program seeks to expand to all major Ohio metropolitan areas over the next five years. | Rehab and Rebuild Foundation | 100 | 31 to 90 days | \$350,000 |
| Cuyahoga | Technology and Information Systems Infrastructure | To survive and meet current and future demands, Bridgeway must upgrade its information technology infrastructure to support both a modern system infrastructure and a document management system that will increase productivity and substantially reduce the printing of documents and the amount of carbon-based energy consumed. There are currently 180 computer users at the agency. All of the computers are seriously outdated. It is estimated that over 100 computers currently in use are using Windows 95/98. A replacement of all of the computers will require the purchase of 150 desktops, 60 laptops, 3 servers, 6 scanners, 1 software-based document management system, a bar-coding system, and Citrix for 190 users. This critical investment in our future will also require that we add a full-time computer technician to our staff to help with the extensive staff training and ongoing support and maintenance that will be necessary. | Bridgeway, Inc. | 2 | 0 to 30 days | \$408,000 |
| Cuyahoga | Renovation/Repairs 5605 Detroit | Renovations and repairs to property housing new city-wide Youth Resource Center, serving youth in crisis. Needed renovations/repairs include: replacement of all windows (which are wood frame, at least 30 years old, and rotting) with energy-efficient windows; total HVAC system replacement, including new boiler, complete roof replacement, possibly with "green roof" because building has a flat roof; lock portion of entrance structure, which will improve energy efficiency and prevent serious structural deterioration; replacement of the escape, which is rotted through; repairing of small parking lot and replacement of discolored fence for security purposes; minimal landscaping. These improvements will result in a dramatic decrease in the use of energy for heating and air conditioning, with resulting savings to the agency. Who have dropped out of high school. Since 2007 CCH has received \$800,000 in contracts for its T2 program, which is based on the highly-regarded Philadelphia Works project. T2 requires participants to actively engage in the following components over a six month period: Orientation (Job Readiness Training); Supportive Services & Case Management; Job Coach Mentoring; Paid Transitional Employment; Professional Development and Skills Training; Education & Vocational Training; Career Exploration; Job Placement; Post-Placement Retention Services. To date, CCH has trained 120 youth, of which 58 have found permanent jobs in the competitive marketplace. That number continues to grow, as recent "alumni" continue to be placed in permanent jobs. The requested funding would support the training of 60 youth in the T2 program. Our expectation is that at least 40 of these youth would find permanent job placements, as well as secure employment for 6 staff for one year. | Cleveland Christian Home | 1.5 | 0 to 30 days | \$81,000 |
| Cuyahoga | Transitional Jobs | Who have dropped out of high school. Since 2007 CCH has received \$800,000 in contracts for its T2 program, which is based on the highly-regarded Philadelphia Works project. T2 requires participants to actively engage in the following components over a six month period: Orientation (Job Readiness Training); Supportive Services & Case Management; Job Coach Mentoring; Paid Transitional Employment; Professional Development and Skills Training; Education & Vocational Training; Career Exploration; Job Placement; Post-Placement Retention Services. To date, CCH has trained 120 youth, of which 58 have found permanent jobs in the competitive marketplace. That number continues to grow, as recent "alumni" continue to be placed in permanent jobs. The requested funding would support the training of 60 youth in the T2 program. Our expectation is that at least 40 of these youth would find permanent job placements, as well as secure employment for 6 staff for one year. | Cleveland Christian Home | 46 | 0 to 30 days | \$500,000 |
| Cuyahoga | Supportive Employment | Funds are being requested to expand the Supportive Employment program at the agency. This program provides the training and support necessary to assist adults with severe mental illness in obtaining and retaining jobs. Services include job placement assistance, job coaching and follow up; all services are evidence-based and follow the best practice model of Individual Placement and Support. These jobs are not subsidized or "halfhearted workers" jobs but regular jobs in the competitive marketplace. The requested funding would facilitate the addition of three full-time staff to the existing program, resulting in the ability to place an additional 100 individuals in jobs over the period of one year. As per the program's previous placement report, approximately 1/3 of all those placed will still be employed one year later. The number of jobs created or saved over 90 is based on this low re-employment rate, plus the three additional Bridgeway staff that would be hired. | Bridgeway, Inc. | 36 | 0 to 30 days | \$140,000 |
| Cuyahoga | Renovation Scranton Road | Renovation and repairs to main administrative offices building, which also houses many program and community activities. Renovations/repairs to include HVAC upgrades and lean in first floor community room areas with larger system, yielding overall improved energy efficiency; upgrade of kitchen in community area to utilize modern energy-efficient and environmentally friendly technologies; extensive roof repair work, which will improve energy efficiency; complete window replacement of aging aluminum windows with high-insulation energy-efficient windows, resulting in significant energy savings; exterior stone preservation and cleaning and masonry work (preventative maintenance) to maintain integrity of exterior walls. | Cleveland Christian Home | 7 | 0 to 30 days | \$413,000 |
| Cuyahoga | Renovation 11401 Lorain | Renovation and repairs to three residential treatment units of main building emphasizing energy efficiency and cost savings. Renovations to include replacement of roof with all-new energy-efficient materials; setting and replacement of entire HVAC system to reduce use of energy; replacement of windows and doors with high-insulation energy-efficient replacements to reduce heat loss and energy consumption; reconnection of all plumbing to replace aging pipes and allow for adequate public restroom access for clients and reduce energy consumption; reconnection of solar panels on roof of school unit to reduce energy consumption and costs; purchase of walk-in refrigeration unit to replace multiple old, technologically outmoded refrigeration units, in order to save on energy consumption and costs. | Cleveland Christian Home | 10 | 0 to 30 days | \$650,000 |
| Cuyahoga | Renovation 8301 Detroit/Stricklin | Renovation and repairs to main building and adjacent crisis treatment unit emphasizing energy efficiency and cost savings. Renovations to include replacement of roof with all-new energy-efficient materials; setting and replacement of entire HVAC system to reduce use of energy; replacement of windows and doors with high-insulation energy-efficient replacements to reduce heat loss and energy consumption; reconnection of all plumbing to replace aging pipes and allow for adequate public restroom access for clients and reduce energy consumption; reconnection of solar panels on roof of school unit to reduce energy consumption and costs; purchase of walk-in refrigeration unit to replace multiple old, technologically outmoded refrigeration units, in order to save on energy consumption and costs. | Bridgeway, Inc. | 3 | 0 to 30 days | \$191,000 |
| Cuyahoga | Residential Psychiatric Care | Create and maintain a Medicaid funded level of care designed to assist those in nursing homes who are cognitively disabled or substance abuse. Residential Care for the psychiatrically impaired/substance abuse population in nursing homes runs approximately \$200.00 per day whereby the model to be created is a template will run at approximately \$150.00 per day as the staffing types and requirements will be different. The money will be used to purchase/rent an existing facility and provide renovation and start up money. This may piggyback into the Medicaid Assisted Living Medicaid Waiver program. | Community Continuing Care | 100 | 181 days or more | \$5,000,000 |
| Cuyahoga | LMM Facility Project | Renovate a building for Lutheran Metropolitan Ministry (LMM) programs that is energy efficient (LEED certified) and fully accessible. LMM programs are in several locations - combining them in one building would increase efficiency. LMM has identified a building that has been vacant for several years, near downtown Cleveland, and has had preliminary architectural assessment to renovate it. LMM has had a capital campaign assessment and is capable of raising other necessary funds to complete the project. The project would employ construction workers, purchase windows & construction materials from local suppliers. The project would expand LMM's capacity to serve people who were formerly incarcerated, at risk youth, people with disabilities and provide a safe harbors bond (space operations & security-oriented knowledge) for LMM program participants and other non-profits serving the homeless and poor. The rehabbed building would meet LEED certification, decrease cost of utilities for these social service programs, and will incorporate green space and perhaps a community garden being taught. | Lutheran Metropolitan Ministry | 15 | 91 to 180 days | \$1,500,000 |
| Cuyahoga | Kurswell Reading Plan | This is accomplished by converting the written text book into a computer spoken text book. This advanced in technology will assist the child who has difficulty reading and comprehending to perform equally with other children at their class level. This technology utilizes both sight and sound to enhance the learning process, the words are displayed as they are being spoken. The process to accomplish this goal is very labor intensive, as each classes text book must be converted into the computer program for the child to utilize the sight and sound function of learning. Many school systems are interested in this plan and several class text books have already been converted. The goal to provide this service to many more school systems is very challenging. 1) We must inform the Administrators of the programs capabilities and benefits. 2) The schools need to allocate funding. 3) The educators will need to be trained on the use of the program. 4) All current text books of selected classes must be provided. | JJBVentures | 10 | 0 to 30 days | \$250,000 |
| Cuyahoga | expansion project affordable housing programs | This project will enable edien to expand the number of affordable housing units available in the community for persons who are disabled. We will be hiring additional staff of 10-20 persons per year for the next 5 yrs and will be contracting for new construction of large 50-75 unit apartment buildings each year for the next five years, creating hundreds of construction jobs in the community, utilizing the LEED funding process. The project will provide the infrastructure to support the hiring and supervision of the direct staff, and to continue to administer HUD rental subsidy programs for Cuyahoga County in excess of \$10M per year. Our expansion project is in process and we can utilize the funds immediately. | emerald development and economic network, Inc. (ed | 200 | 0 to 30 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | LMM Facility Project | Rehab a building for Lutheran Metropolitan Ministry (LMM) programs that is energy efficient (LEED certified) and fully accessible. LMM programs are in several locations - combining them in one building would increase efficiency. LMM has identified a building that has been vacant for several years, near downtown Cleveland and had preliminary architectural assessment to renovate it. LMM has had a capital campaign assessment and is capable of raising other necessary funds to complete the project. The project would employ construction workers, purchase windows & construction materials from local suppliers. The project would expand LMM's capacity to serve people who were formerly incarcerated, at risk youth, people with disabilities and provide a free lumber bank (using donations & recycling household furnishings) for LMM program participants and other non-profits serving the homeless and poor. The rehabbed building would meet LEED certification, decrease cost of utilities for these social service programs, and will incorporate green space and perhaps a community garden. Renovation of our Middle School at an estimated cost of \$24.5 million (119,875 sq ft) and renovation of our William Foster Elementary at an estimated cost of \$5.5 million (45,000 sq ft) | Lutheran Metropolitan Ministry | 15 | 91 to 180 days | \$1,500,000 |
| Cuyahoga | Ohio School Facilities Building Renovations Local | Middle School original construction date was 1962 with no major renovations and William Foster's original construction date was 1966 with no major renovations. This would complete the district's obligation of its master plan with the Ohio School Facilities Commission. | Garfield Heights City Schools | 50 | 181 days or more | \$30,000,000 |
| Cuyahoga | Staffing Stabilization | The requested amount would enable the city to keep the current staffing levels and avoid possible layoffs. Acquisition of two additional "VACANT" buildings in our Neighborhood "Campus". This would bring our Campus to approximately 700,000 square feet. Renovation of these two buildings for the use of creating a Visitors Center, Classroom Administrative Offices and Student Housing. The Project would create 20 construction jobs during the redevelopment process and 30 new Full Time Jobs within Ohio Technical College for Administrative Staff, Teachers, Sales Staff and Maintenance Personnel. Ohio Technical College named its one the Wustenhoad 500 Companies in 2006 with a Student Base of more than 1,000 Students and 175 Full Time Jobs. Ohio Technical College is an Accredited College which attracts Students within a seven State territory. This attraction brings Students and their Families to Cleveland for their enrollment and housing for the Students and ancillary income to the Community. We also have a successful placement program getting the Students trained and placed into good jobs throughout the State of Ohio. We have also been enrolling nonemployed level of individual and retaining them into a new career. Ohio Technical College has been in existence for over 40 years. Rehabilitation of for-profit properties about to be foreclosed upon in order to make eligible for Section 8 eligibility. Turn underutilized properties into jobs and environmentally sound housing for those in need. | University Heights Fire Department | 3 | 0 to 30 days | \$125,000 |
| Cuyahoga | Ohio Technical College Expansion fo Success | Completion of the new 100,000 sq ft addition to the Ohio Technical College campus in 2006 with a Student Base of more than 1,000 Students and 175 Full Time Jobs. Ohio Technical College is an Accredited College which attracts Students within a seven State territory. This attraction brings Students and their Families to Cleveland for their enrollment and housing for the Students and ancillary income to the Community. We also have a successful placement program getting the Students trained and placed into good jobs throughout the State of Ohio. | Cuyahoga | Environmental Housing | There is a need for an educational display of small wind power at the Cleveland Museum of Natural History. | RG33 | 33 | 0 to 30 days | \$659,099 |
| Cuyahoga | An Educational Small Wind Power Installation and D | We would like to install a grid tied small wind turbines in a highly visible location on the grounds of the museum, and place an educational display inside the museum to show the small wind turbines actually working and provide some idea to the museum visitors that small wind power is a viable energy source here in the Cleveland area. | Cleveland Solar & Wind | 5 | 31 to 90 days | \$150,000 |
| Cuyahoga | An Educational Solar Power Installation and Displa | There is a need for an educational display of solar power at the Cleveland Museum of Natural History. | Cleveland Solar & Wind | 5 | 31 to 90 days | \$150,000 |
| Cuyahoga | Individual Development Account Project | The program seeks to enroll 200 participants (low-to-moderate income families), ex-offenders, at risk youth, and those who desire to become engaged in a series of financial literacy, health, wealth, and individual specific strategies to enhance economic stability. Participants receive a home, car, or stipend to a business or pursue post-graduate education. Within the next five year period, the program will have 200 participants per year. 40 participants will complete program requirements and obtain employment. 20 participants will be geographically concentrated asset building strategy to community stability and neighborhood revitalization. Homebased education and financial literacy can help families move out of poverty and stabilize neighborhoods. Long term mentoring relationships will virtually educate, motivate, and empower participants to eradicate generational poverty. | Mt. Pleasant Weed and Seed | 100 | 31 to 90 days | \$350,000 |
| Cuyahoga | Energy | Complete upgrade and modernization of heating and cooling systems, removal of all asbestos pipes. Energy efficient systems with significant improvements to pollution control. Project will permit separate air historic structure in downtown area of Cuyahoga County. | Conway Trust Property | 10 | 91 to 180 days | \$100,000 |
| Cuyahoga | Columbia Station Public Schools | New elementary school for Columbus Station Ohio. Our current school was built in 1925 and is a health hazard to our children. The building is that with asbestos and has poor ventilation. This causes poor air quality and is a serious danger to learning. There is bad and noxious effluents and it would cost too much to maintain the current building. State officials visited our town recently and agreed the school needs to be demolished. | Columbia Station Public Schools | 100 | 0 to 30 days | \$23,000,000 |
| Cuyahoga | Health, Wellness & Recreation Regional Partnership | The City of Bedford Heights wants to expand its capacity to help surrounding cities that can not afford to provide recreational services by forming regional health, wellness partnerships with other resources. The public-private partnership would include cities, such as Worthington Heights, Maple Heights, Highland Heights and North Randall. As well as, health organizations, such as University Hospitals and/or South Point/Cleveland Clinic's non-profit organizations. The funding will be used to develop the partnership and build capacity to provide additional services, such as fitness classes, aquatic, after school and summer camp, wellness programs for individuals of all ages. Currently, Bedford Heights has a full service fitness center, a multi-use court gym, recreational room, party room, kids lounge, a computer center, a weight and exercise center, a walking park, a sauna, whirlpool, hot pool and active pool. Bedford Heights and the surrounding communities have an increased need to provide health, wellness Cuyahoga County, and health organizations to meet the growing needs in the community to provide health, wellness and recreation services. | City of Bedford Heights | 50 | 91 to 180 days | \$250,000 |

| Cuyahoga | Energy Conservation Program Phase II | This project is a continuation of a HR 264 project that started in June of 2008. It is a portion of the project that the state denied due to not using federal money. Since that original request had not been approved the state has approved state and we are now able to proceed with the remainder of the project. The original project was for \$6,378,430.00. After denial from the CPSC, the project was split into Phase I and Phase II. Phase I for \$3,723,932.00 is nearing completion and we would like to go into Phase II but due to the economic downturn, The District is not in a position to borrow the additional funds needed to Phase II. The completion of Phase I will provide a model of the operating funds for the District for years to come. | Strongsville City Schools | 5 | 91 to 180 days | \$2,654,510 |
| Cuyahoga | Smartboard Project | Install smartboards and projectors in all classrooms. | South Euclid-Lyndhurst City Schools | 5 | 0 to 30 days | \$940,000 |
| Cuyahoga | FunTown Playground | The City of Bedford Heights will oversee the construction of a community-built playground. The playground will be built using 95% recycled material. Most of the material can be purchased from local companies, such as Lowe's Hardware and other local lumber companies. The playground will be built by approximately 850 volunteers. Construction will take place from September 14-18. For the past 30 years, childhood obesity has tripled due to lack of physical health. The city wants to do its part to reduce these statistics by creating an welcoming, fun outdoor play environment. Additionally, the ideal playground should be provide interactive opportunities that encourage children to develop friendships and build developmental skills. The playground will be built in the Bedford Heights neighborhood where 48.6 of the population has been identified as having low-moderate income eligible population. | City of Bedford Heights | 25 | 31 to 90 days | \$200,000 |
| Cuyahoga | Wireless Project | Provide wireless access to Adian Elementary, Sunview Elementary, Brush High School, Memorial Junior High and the Administration Building | South Euclid-Lyndhurst City Schools | 5 | 0 to 30 days | \$150,000 |

| Cuyahoga | Foster Care Alternative for Child Abuse Prevention | Funding for critical loss of agency resources requires for emergency intercity shelter operations at Ohio's only crisis nursery. Declining donations and loss of over \$22K from local and state government has caused a massive drain of resources, placing the nursery at serious operational risk. As a 501(c)(3) private, funded agency, depletion of our reserves when donor capacity is diminished will force us to cut shelter and services for 200+ children at risk of abuse or neglect in order to prevent foster care placement. Providence House is one of the nation's largest residential crisis nurseries and offers emergency shelter and 24/7 services to at-risk children 0-5 years old. Our program is the only voluntary alternative to the public foster care system in our state for families striving to stabilize crisis, protect their children and remain together. In 2008, 103% of our families were reunified through our services, an 89% higher rate of reunification than our local foster care system. Our service dramatically reduced child care, lowered case rates of children in custody and ultimately, resulted in saved for nearly \$10 million in costs to the government and its taxpayers. | Providence House - A Crisis Nursery | 125 | 0 to 30 days | \$652,000 |
| Cuyahoga | GOALS Project | GOALS (Goal-based Outdoor Active Learning System) is a project that involves designing and building a outdoor play ground that will enable children with disabilities and their typically developing peers to creatively engage in play-based curriculum activities that will enhance their cognitive, communication, social-emotional and motor skills. This play ground project is being sponsored by the Strongsville School District's PTA Council. The budget of the play ground will be all at Strongsville Early Learning Preschool. This facility provides educational opportunities for children, ages 3-5, that have special needs. The addition of this play ground will increase the learning opportunities for these children. To date the PTA Council has raised \$45,000.00 plus toward the project and continue to pursue additional revenues through grants and private donors. The current funds will permit Phase I of the project to be completed. Phase I will be started in late March each year depending on the weather conditions. Plans are currently being presented to local zoning officials for approval. | Strongsville City Schools | 1 | 31 to 90 days | \$80,000 |
| Cuyahoga | 21st Century Learning Environments - Breaking the | Network computers will be distributed to inner-city students grades 6-12 to address the digital divide in a first-ring urban district. Access to 21st Century learning tools and information in an environment in which many of the families are at a disadvantage will level the playing field, while raising academic and social expectations of parents, teachers, students and community members. The director of this project has served on the Governor's Task Force for Creativity and Innovation in Education since its inception, and is currently confident the goals of this project are in full alignment with those of the Governor and State Superintendent. | Euclid City Schools | 10 | 91 to 180 days | \$1,200,000 |

| Cuyahoga | Ohio Aerospace Institute funding | The proposed Ohio Executive Order is a commitment to the Aerospace Sector in Ohio. Since 1989, Ohio has leveraged \$37 billion in state support into nearly a quarter billion dollars in federal and private funding for Ohio. In addition Ohio has been the host institution playing over 3,000 student interns at NASA and Ohio companies, awarding over \$4.1 million for 600+ scholarships through the Ohio Space Grant Consortium, and had a calculated economic impact to Ohio in FY 2008 of \$44 million and 376 full time jobs. This funding has allowed OAI to 1) further scientific and engineering education, 2) sponsor, promote and disseminate aerospace research, 3) promote and further the development of aeronautical and space technology between the United States public and private sectors, and 4) to encourage the participation of underrepresented minorities in aerospace related education and research. Progress in all of these areas will be slowed and the Aerospace Sector in Ohio will be diminished without the requested \$1.8 million investment in OAI. | Ohio Aerospace Institute | 100 | 0 to 30 days | \$1,800,000 |

| Cuyahoga | A Teen Point of View | A TEEN POINT OF VIEW INTRODUCTIONS The A Teen Point of View is an organization designed to educate the youth within the community by providing the opportunity to participate in a television show with issues in mind. We believe that education is the key to success, by empowering young people through education today will be our leaders of tomorrow. A Teen Point of View is a television show designed to help improve communication skills between adolescents and adults to build a better relationship. This Program is a Talk show with interviewers involves creating news in the studio, the majority of it is on location. Adolescents will be responsible for research papers, data entry, and improving communication skills. The majority of the staff will consist of adolescents. Among the benefits to be realized by the adolescent's participants, the community's will increase social development, increase self-confidence and self-esteem in participants, and improve academic performance. | Teens View Production | 20 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Power Production Through Traffic (PT2) | Profitable Technologies, Inc. (PTI) has conceptualized a unique platform to produce electricity utilizing the mass and momentum of the traffic that passes upon it. When a moving vehicle passes over the platform, the mass and energy of the vehicle are used to create a hydraulic fluid for transfer of the energy of the vehicle to a generator for power production. Simply put, the PT2 System creates a self-contained electrical generating station by utilizing a host of small, interconnected "batteries" that are embedded directly into a roadway. Under certain circumstances, the platform can be placed directly on top of the roadway itself. The PT2 system is equally as simple as it is revolutionary by the fact that it is an energy and economic development to infrastructure improvements, all of which are saved producing the self-sustainable transportation. PTI and Battelle Memorial Institute believe there is a technical foundation incorporating unique mechanisms. Profits have been calculated that will allow the PT2 System to generate electricity continuously and reliably over an extended period of time, even in the absence of in-vehicle traffic. | Profitable Technologies, Inc. | 50 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Retrofitting of Mayfield Theater | A dilapidated Cleveland Landmark building in Little Italy, the Mayfield Theater has been vacant for years. As part of a comprehensive redevelopment of the Theater into a multi-faceted entertainment, performance and cultural venue, the building needs to be retrofitted with all new state of the art energy efficient mechanical systems including HVAC, plumbing, electrical, and insulated glass windows and doors, etc. The primary construction objective will be the maximum LEED certification. | Little Italy Redevelopment Corporation | 40 | 31 to 90 days | \$500,000 |
| Cuyahoga | Comprehensive Youth Service Delivery System | Youth services appear to be widely available yet fragmented within The Mt. Pleasant Weed and Seed target area. Obviously, due to the challenge of unopposed youth congregating in public areas throughout the community, it is apparent that target area youth are not accessing services for a variety of reasons. The program seeks to increase youth involvement through coordinated youth development activities and services through the establishment of a one stop shop for youth. Our goal is to seek out and identify collaborations with existing youth saving grass-roots organizations/programs to increase their capacity to provide community-based services for target area youth, pursue coordination of these services to establish a one stop coordinated center for youth. By bringing together multiple service providers under one roof and utilizing effective methods of youth recruitment, more youth and young adults, age 14 through 21 will access services through the coordinated approach outlined in the Mt. Pleasant Weed and Seed Strategy. | Mt. Pleasant Weed and Seed | 15 | 181 days or more | \$350,000 |
| Cuyahoga | After School Youth Fitness and Nutrition Program | After School Youth Fitness and Nutrition Program for Cleveland Metropolitan School District's elementary students. Healthy snacks, fitness and nutrition education and physical activity will be provided. Snacks will be eligible for USDA reimbursement through the National School Lunch Program. The program will take place in the gymnasium of an elementary school (eventually multiple schools) following each school day for at least two hours. To begin the day following the Labor Day holiday of each year and to end on the last weekday in May of the following year. The program will also provide a monthly health and Healthy Choice Lecture Series in which participating students, their parents/guardians, educators, and school food service staff will be invited to a premium salad bar dinner and talk from local medical/health professionals who will discuss their time to talk about healthy lifestyle choices and the diagnosis, effects, and treatment of childhood obesity. School food service staff will also be engaged to provide healthier meals and vending machine options. Program counselors, who will execute the program, will be selected from local college/university students. The necessary staff of health and physical sciences majors. All counselors will be trained by the Cleveland | M. E. For Life Fitness, Inc. | 326 | 0 to 30 days | \$285,000 |
| Cuyahoga | Renovation of neighborhoods as well as helping hom | Several cities in Ohio have experienced a record number of homes foreclosed upon, as well as abandoned. This has caused immense strain on the neighborhoods involved, as well as local government. Cleveland received \$6 billion to tear down 1000 homes, yet they had 8000 homes slated for demolition. The program that we can renovate, demolish and/or re-use these houses in all counties and cities, allowing individuals hit by hard economic times to actually acquire homes, stay in communities and improve the neighborhood. It will also help eradicate drug dealers and crime filled areas by eliminating empty houses and the problems associated with these. With our expertise we anticipate being able to do what these cities need for a fraction of the cost local government has been incurring. | Blue Herron Homes | 420 | 0 to 30 days | \$8,000,000 |
| Cuyahoga | Asian Women's Safety Center | The Asian Women's Safety Center assists immigrant and refugee women who are victims of domestic violence, sexual assault, dating violence or stalking. The program provides language and culturally appropriate case management, justice system advocacy, and emergency support. The program will employ 150 are served so their lives are stabilized and they can become self-sufficient. | Asian Services In Action, Inc. | 150 | 31 to 90 days | \$100,000 |
| Cuyahoga | Newcomer Family Support Center | The Newcomer Family Support Center provides low-income limited English speaking individuals with job skills training, vocational ESL, and medical basic skills training to individuals on first general employment. The project provides case management, computer classes, job search services, and help in removing barriers (e.g. childcare, transportation, etc.) The program will serve 500 (includes individuals and their dependents). | Asian Services In Action, Inc. | 500 | 0 to 30 days | \$125,000 |
| Cuyahoga | Homeless Prevention Project | The project assists those who confront language barrier access to information to prevent homelessness. | Cuyahoga | Psychoeducational/Psychodiagnostic Assessments | We would like to provide psychological and psychodiagnostic assessments to children who, for a variety of reasons, do not qualify for such services in their home school districts and/or through their medical insurance. In addition to other locations on the west side of Cleveland & Columbus Ohio. This will allow us to hire a additional full time employees, and another 80-100 part time employees. We have an opportunity to employ and hire newly laid off workers that will have immediate impact on the communities they live in, and foster relationships with local communities to enhance the living conditions for frail and sickly seniors who would otherwise be forced to be institutionalized. | A+ Learning and Development Centers | 2 | 0 to 30 days | \$90,000 |
| Cuyahoga | Retention & Expansion for D & P | Diamonds & Pearls Health Services provides well trained, personable and reliable caregivers to individuals needing home health care. Our services enhance the individual's quality of life and maintain the independence by allowing the client to remain in the comfort of their own home. The care of our home care focuses on assistance with daily living and skilled care. We will assist families to determine a comprehensive care plan that will meet the needs and preferences of their loved one. New Village Safety center to replace outdated and inefficient building. The new building will house Police Department, multi-community communication and dispatch facility and joint Police-Fire Emergency Operators Center and training facilities. The facility will include a community job room to help prevent elderly apartment turnover. | Diamonds & Pearls Health Services L.L.C. | 8 | 31 to 90 days | \$250,000 |
| Cuyahoga | Village Safety Center | JFSA serves meals to hundreds of elderly people in their homes. Existing funds from the Older American Act and others do not cover the actual costs of delivery. JFSA is seeking funds to ensure that each person in our care is provided a meal of sufficient size and quality to maintain their health. | Chagrin Falls Village | 25 | 91 to 180 days | \$5,000,000 |
| Cuyahoga | Home Delivered Meals | JFSA serves meals to hundreds of elderly people in their homes. Existing funds from the Older American Act and others do not cover the actual costs of delivery. JFSA is seeking funds to ensure that each person in our care is provided a meal of sufficient size and quality to maintain their health. | Jewish Family Service Association of Cleveland | 3 | 0 to 30 days | \$65,000 |
| Cuyahoga | Upgrade Maynard Building for ADA & Energy Efficient | Beech Brook is a child welfare agency that provides residential treatment to children and teens on its 70 acre campus in Pepper Pike, Ohio. The Maynard Building is used to provide for Beech Brook's clients. The building is not ADA accessible and does not have an ADA bathroom. Heating is provided by a 40 year old boiler/air handler system that is in dire need of replacement. There is no central mechanical ventilation system or air conditioning system. Operable windows are used for ventilation and window A/C units are used for summer cooling. The windows are non-insulated, single pane windows. The funds would be used to make the building ADA accessible, to provide a new central energy-efficient HVAC system and to replace the windows significantly reducing the energy consumption. Founded in 1852, Beech Brook is now a nationally recognized treatment center for emotionally distressed children, youth and their families. With a staff of 460, Beech Brook serves over 21,600 children, youth and adults in Northeast Ohio every year. | Beech Brook | 15 | 31 to 90 days | \$450,000 |
| Cuyahoga | Upgrade Wade Residential Cottage | Beech Brook is a child welfare agency that provides residential treatment to children and teens on its 70 acre campus in Pepper Pike, Ohio. The increased safety of the clients that Beech Brook serves requires that the residential living units be upgraded to provide an increased level of security and safety. The Wade Cottage requires multiple upgrades to improve the functionality and energy efficiency. Wade Cottage has an old HVAC system, little site insulation and needs a new roof. The funds would be utilized to replace the HVAC system with a new energy efficient system, add site insulation and install a new roof. Founded in 1852, Beech Brook is now a nationally recognized treatment center for emotionally distressed children, youth and their families. With a staff of 460, Beech Brook serves over 21,600 children, youth and adults in Northeast Ohio every year. | Beech Brook | 15 | 31 to 90 days | \$650,000 |
| Cuyahoga | Upgrade HVAC System - Wade Cottage | Beech Brook is a child welfare agency that provides residential treatment to children and teens on its 70 acre campus in Pepper Pike, Ohio. | Cuyahoga | Upgrade Windows - Wade Administration Building | Beach Brook is a child welfare agency that provides residential treatment to children and teens on its 70 acre campus in Pepper Pike, Ohio. The campus buildings are aging and are in dire need of upgrades to improve their energy efficiency. The windows in the Wade Administration Building are non-insulated single pane glass and are not energy efficient. The funds would be utilized to replace the windows with high efficiency windows. Beach Brook is now a nationally recognized treatment center for emotionally disturbed children, youth and their families. With a staff of 460, Beach Brook serves over 21,600 children, youth and adults in Northeast Ohio every year. | Beech Brook | 3 | 0 to 30 days | \$75,000 |
| Cuyahoga | Workforce Re-Entry | The Workforce Re-Entry program will offer adult male and female ex-offenders in Cuyahoga, Summit and surrounding areas a full array of re-entry services to assist them in successfully rejoining the community including job readiness, employment training, cognitive skills/ skills training and employment support and mentoring. The goal will be to provide 400 ex-offenders per year for case management services and linkages to Alcohol and other drug treatment and aftercare services, mental health care, housing, transportation and other supportive services to aid these ex-offenders in returning to their homes and offering needed support for them to remain out of the criminal justice system. Services may also include residential care as needed to ensure the ex-offender has a safe, secure and stable living environment until stable housing can be located in the communities. Similar programs will be established in Hamilton and Franklin counties to address the high number of ex-offenders returning to those communities from the Ohio Prison System. Prison overcrowding has been identified as a critical issue for the State of Ohio. | Oriana House | 650 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Surveillance Technology and Products | Commercialization of patent pending camera surveillance products that represent truly wireless, practical "Onip and Onquest" (OAC) video and audio systems. Whether the venue is a national convention or infrastructure, the D&O products allow businesses and public safety officials to address surveillance requirements instantly, any time. Fixed cameras alone are expensive and vulnerable. Adding OACO dramatically reduces costs per time and territory monitored. The result: greater prevention, response, and prosecution, reduced capital and manpower expenses. A large and growing number of products including pan-tilt-zoom, fixed, and mega-pixel color cameras, infrared night vision cameras, and automated license plate, face, and object recognition systems await trademark review with the D&O approach. The employees added will facilitate the final phases of commercialization of existing products and the expansion of product lines to serve growing local, national, and global markets that are ardently seeking improved security through surveillance technology and products. See: http://modtech-corp.com/?page=security000. | Modtech Corp. | 50 | 0 to 30 days | \$1,750,000 |
| Cuyahoga | Remote Patient Monitoring / Rural Health / EHR Pro | This is a project to incorporate Mobile Wireless Health Monitoring (Cellular) technology with patients that are in Rural and under-served populations' areas in order to connect them to their Healthcare provider, in order to keep them out of the hospital and ultimately reduce healthcare associated costs. The objective of the project is to show ROI to the industry and CMS (Medicare / Medicaid) and other providers that low cost monitoring solutions connected to a central EHR / PHR is an effective means to allow older individuals to remain in their homes longer, while still connected to their healthcare providers. In addition, the project will use Medigap technology that is designed to "talk" to the patient in any language that is loaded into the device, in an effort to assist the blind, and be more adoptive in the patients use. | MedApps, Inc. | 100 | 0 to 30 days | \$10,000,000 |

This deployment will make the fleet more fuel efficient as well as reduce emissions. This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by replacing a truck crane. This deployment will make the fleet more fuel efficient as well as reduce emissions. Cleveland Botanical Garden requests funding for a 2,000 sq. ft. green roof and 69,000 watt system of solar panels for its facility as means of saving energy. Both projects will also serve as demonstration vehicles to educate the 150,000 people who visit the Garden each year. With rainwater recycling, vegetation takes the place of traditional roofing surfaces. Thus, our building will help reduce the "heat island" effect in Cleveland. It also enhances water management, reducing rainwater discharge and resulting erosion. The solar panels will be 100% functional and reduce net energy output by 1,200 tonnes. Revenue includes plant material and production and installation of a "pre-vegetated" garden-roofing tray system that protects the building and makes installation easier, reducing labor time and costs. Fuel use and emissions are minimized through use of Ohio grown and roof manufacturing, storage and production. Shipping and installation of solar panels and interactive display monitors to showcase the effort. All parts associated with the panels are manufactured in the U.S. This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by replacing various equipment. This deployment will make the fleet more fuel efficient as well as reduce emissions. Expanding liquid crystal (LC) technology as a means of optimizing plant growth in environments under glass has the potential to solve energy issues and spark economic development in Ohio. Cleveland Botanical Garden and Kent State University's Liquid Crystal Institute are researching the feasibility of using LC technology to create energy-efficient greenhouses that maximize plant growth. Two greenhouses stand on the Garden's campus: a control with glass panels and an experimental one with specific LC panels. The LC panels receive a computer-controlled electric current which permits varying degrees of sunlight penetration through the liquid crystal particles. Funds are needed to continue researching this technology. Project benefits include: research grants to extend plant growing methods, increased plant productivity, agriculture in extreme climates could become more viable, food production breakthroughs could result in new jobs and development, mass production would stimulate manufacturing in NE Ohio. Finally, specialty crop production in specific markets would reduce transportation costs, energy consumption, and greenhouse gas emissions. Cleveland Botanical Garden's Green Corps (GC) is a youth job training program now in its 13th year. Funds are sought to expand to a year-round program providing grounds for 130 minority teens and 22 adult mentors. Students are paid minimum wage to work in low-income city neighborhoods, growing & selling produce in food desert neighborhoods and at local farmers' markets. With local chefs and business people, students create, produce & sell Fair From Downtown! jams. Through GC, teens break the cycle of poverty by generating income in healthy, legal ways. The program promotes job skill development & problem-solving skills, education, and personal & social competence. Several neighborhood CDCs are requesting GC services. The expansion includes a market garden located within a market neighborhood and a sustainable greenhouse during offical out-of-school time and funding will expand the program's scope & capacity so an increasing number of urban youth can work and learn, providing hope for the future. Benefits include crime prevention, grounds for youth habitat, nutrition to the community, model program for national replication. | GLOBAL MILLENNIUM INC | 65 | 0 to 30 days | \$2,000,001 |

| Cuyahoga | KMM&K Joint Venture, Cummins Bridgeway, Clean Fuel | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by replacing 2 lattice cranes. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 6 | 0 to 30 days | \$120,000 |
| Cuyahoga | Ethanol Yield Improvement | This project targets yield improvement at Greater Ohio Ethanol, Lima, Ohio, and Cochranton/Ethanol, LLC, Cochranton, Ohio. Arisdyne reactors to be designed, built and installed in a part project with the successful part re-engineering companies, to reduce production costs, and improve gross margins and yields. | Arisdyne Systems, Inc. | 80 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | Federal Marine Terminals, Cummins Bridgeway, Clean | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by replacing 12 industrial lift trucks. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 15 | 0 to 30 days | \$220,000 |
| Cuyahoga | Ethanol Reactor Commercialization | This project builds upon an existing Tri Frontier grant to further commercialize a reactor that increases the yield from ethanol feedstock. We will build two commercial scale reactors, with the ultimate goal of installing proven technology at up to 8 sites several of which are in Ohio. See specific Ohio projects, which are entered as a separate project. | Arisdyne Systems, Inc. | 4 | 31 to 90 days | \$500,000 |
| Cuyahoga | Esterification, Glycerolysis and Acidulation React | | Arisdyne Systems, Inc. | 19 | 31 to 90 days | \$900,000 |
| Cuyahoga | Brecksville Broadview Hts Schools , Cummins Bridge | This project covers the design, manufacture and testing of 3 reactor systems that will reduce the cost of biodiesel production. The project will increase efficiency and reduce emissions by retrofitting school buses. | Clean Fuels Ohio | 5 | 0 to 30 days | \$100,000 |
| Cuyahoga | Sustainable Urban Horticulture center | According to the National Gardening Association, there will be a 19% increase from 2008 in the number of U.S. households planning a food garden in 2010, bringing the total to 43 million households. As a byproduct of the economy and other factors, this is a trend that will not go away, and does not even capture interest in flower gardening. Cleveland Botanical Garden, a vital regional resource on gardening practices, is ready to build a "greener" LEED-certified gardening center on its campus in urban Cleveland. The architect is William A. Doty, Jr., an award-winning leader in the design of environmentally sustainable buildings. The center will serve as an educational facility and will include office, workshop and classroom space for public programs, a propagation green house for display gardens, and exterior demonstration gardens to showcase "lean practices" in shrubs, trees, vegetable and other garden specimens of interest to area home owners. Sustainable design features will include but not be limited to geothermal heating and cooling, a green roof, natural day lighting and use of recycled and durable natural content materials. | Cleveland Botanical Garden | 50 | 91 to 180 days | \$1,700,000 |
| Cuyahoga | City of Cleveland, Cummins Bridgeway, Clean Fuels | The project will increase efficiency and reduce emissions by retrofitting and repowering buses and fire vehicles. | Clean Fuels Ohio | 5 | 0 to 30 days | \$100,000 |
| Cuyahoga | City of Pepper Pike, Cummins Bridgeway, Clean Fuel | The project will increase efficiency and reduce emissions by retrofitting and repowering school buses | Clean Fuels Ohio | 5 | 0 to 30 days | \$100,000 |
| Cuyahoga | Alli Erection, Cummins Bridgeway, Clean Fuels Ohio | Increase efficiency and reduce emissions through a repower and use of an auxiliary power unit. | Clean Fuels Ohio | 5 | 0 to 30 days | \$100,000 |
| Cuyahoga | Collaborative Network in Storage | To accelerate breakthroughs in energy storage and to build a Collaborative Innovation Network or Ecosystem. The initiative includes in addition to the original members participants from five major utilities, U.S. government laboratories, dozens of for-profit and non-profit companies, and private entrepreneurs and inventors. The goal is to build a Global Innovation Ecosystem to create a New Model of Collaborative Innovation and Human Capital Investment. The initiative will include a major effort to build a platform for energy storage technology by all at the area of storage (venture capital and investors to researchers). To accelerate the fundamental breakthrough discoveries, inventors and companies significantly their time to market. To provide funding for education in these key sciences along with the engineering and educational skill development in innovation and entrepreneurship. To include specifically veterans from the Iraq War and Afghanistan military engagements. To design a Program, which is "show me ready," to that a "Job Multiplier Effect" or many new jobs is achieved in the next three years. | Great Lakes Institute for Energy Innovation | 200 | 0 to 30 days | \$50,000,000 |
| Cuyahoga | National Storage Center | A collective set of universities and institutes in this region is large enough to compete nationally for a major research center and small enough to retain the collegiality to ensure a systems approach to plug and play options in storage for transport and for energy. In the case Western Reserve University we have a well earned reputation for its energy related research in electrochemistry (partially due to the work of Paul Calvert) and, with the great energy regional and national partnerships, to become an international center for energy storage research. The center will include development and storage system deployment. To create a center for energy storage research that will include local and regional strengths to provide the foundation for a nationally competitive research and development platform that will translate energy concepts and discoveries to commercial products and deployable storage systems. To develop a premier education program around this storage center. | Great Lakes Institute for Energy Innovation | 200 | 0 to 30 days | \$50,000,000 |
| Cuyahoga | Onshore Wind Research Center | An onshore research facility in collaboration with local business and government for the purpose of furthering study in onshore wind design and deployment of products. This center will include a visitors center that will equip the academic museum with data and information in addition to providing significant data to other universities and industry. This center will be in major collaboration with multiple regional universities. | Great Lakes Institute for Energy Innovation | 40 | 0 to 30 days | \$10,000,000 |
| Cuyahoga | Offshore National Wind Research Center | The seed creation of an offshore wind research center for the purpose of research and education. The significant information and learnings available will be supported and funded by outside industry with the added economic benefit of landing major wind manufacturing in the Ohio region. The center will acquire national centers such as NREL in areas it does not currently do research such as in floating or fixed foundation platforms, tubular foundation preparation and boat design. The center will also complement national centers such as NREL in areas such as using transistors in water and in blades and sensors and controls. The education program will be developed from the trades level to post doc degrees. This center will be in major collaboration with NREL, and multiple regional universities. | Great Lakes Institute for Energy Innovation | 500 | 0 to 30 days | \$100,000,000 |
| Cuyahoga | Sleepers Security-Property Protection | This program is designed to eliminate vandalism for the vacant and abandoned properties through the county, due to the number of foreclosures in the county. This service will be offered until the property is sold or the owner decides what to do with the property. The program is designed to create ten (10) jobs in the beginning and as the business grows we will employ more people. The service will be offered to banks, private owners and anyone who has the need for the service in order to preserve the property and it will keep the value of the properties that we service from declining. The employees will occupy the property at night so as to show a presence at the property, the utilities will remain on so that there not be the chance of the property have pipes that have burst or no heat depending upon the time of the year. Once the property has been sold there will no longer be the need for the service. We plan to expand the business so that we can service the entire county of Cuyahoga. | ESPA | 10 | 31 to 90 days | \$225,000 |
| Cuyahoga | Tri-City Construction training program | Tri-City will advertise and train any person or persons that desire to learn the construction business and trade. We will collaborate with local contractors to place the trainees with a company that will help them to learn the trade. We will also work with local contractors to make sure that the trainees have the necessary tools and equipment to work with the contractors in this apprenticeship type program. It is our hope that those working with the contractors we will be able to send the apprentices to trade school and they can continue to learn the construction trade while receiving formal education. If the trainee and/or apprentice does not have their High School diploma or GED we will assist with that process also. There will be an office based portion to them going to the construction site. This training program will be a progression required from the contractor that they are working with. The apprentice will affiliate themselves with the proper union for their trade for job placement and apprenticeship with that particular union. After all of the above steps have been completed the trainee/apprentice should be hired through one of the unions. | Tri-City non-partisan | 10 | 31 to 90 days | \$500,000 |
| Cuyahoga | Sparkel J.C. | Sparkel J.C. will re-distribute janitorial supplies after purchasing them from the manufacturer or national distributor. We will then distribute to the schools, churches, municipalities, daycares and hospitals and other entities that may need janitorial supplies. We will use eco-friendly and green supplies as available through the local and national manufacturers. We will re-distribute the products at competitive pricing for the market at that time. We will hire a minimum of five employees to begin with and as the business grows we will commit to hiring more employees as needed. | Sparkel J.C. Janitorial Supply | 5 | 31 to 90 days | \$225,000 |
| Cuyahoga | Foreclosure prevention counseling and consulting | Foreclosure counseling will hire a minimum of ten (10) employees to work with homeowners and their lenders to place them in a modification program or to place them in a loan resolution program and also to re-negotiate their current mortgage rate. The program will also have homeowner counseling to assist the homeowner with budgeting and financing so as to not allow the homeowner to have more debt than can be afforded and also to place them in a program that will help them to save money no matter what amount. The program will also serve as a referral network for other services that the homeowner may need. | Tri-City non-partisan, LLC | 10 | 31 to 90 days | \$1,200,000 |
| Cuyahoga | Deep Energy Reductions in Existing Homes | Research could significantly reduce the greenhouse gas contribution from the existing homes sector. Deep energy reductions in the Cleveland area will help tackle the problem of foreclosed homes and will provide green jobs. EHRW will work with local community development organizations to target homes that have been foreclosed and/or are significantly deteriorated. Homes that need substantial rehabilitation are ideal candidates for deep energy reductions since they have already require replacement of heating and cooling systems. Strategies will include: - changing a new dead wall to the exterior or interior of existing walls to provide additional space for insulation - super-insulating the roof - installing triple-paneled windows - using heat recovery ventilators as the primary heat source - eliminating the cost of a conventional furnace | Environmental Health Watch | 3 | 0 to 30 days | \$260,000 |
| Cuyahoga | The Spillway Paper Mill Project | We will partner with ACI's Thousand Home Challenge, a national initiative to promote deep energy reductions. We will establish protocols for different local housing types specific to our climate. Spillway is the redevelopment in Chapin Falls, Ohio, of a 150 year old paper mill that has been inactive for over 5 years. Rehabilitating the mill will save approximately 40,000 square feet of the historical structure, turning it into an (iv), a family restaurant, boutique movie theatre and micro brewery. The disjuncted "warehouse" will be razed and replaced with 50,000 square feet of new structures housing a catering business, office space, a fitness club, a mall store and business center, retail space and condominiums. The project will also have a green design at the Broadfield site. Also part of the redevelopment is the lowering of a Class I dam per the EPA, the upgrading of old storm water and sanitary pipelines, new street lighting and utility poles. The project is registered with the US Green Building Council (USGBC) with a goal of being certified as a LEED Gold Project. This "Greener" project will also include a solar panel, wind mill and a waterwheel. We are requesting \$3 million of federal stimulus money to support the environmental and green aspects, as well as the public accessibility aspects of the project. | Spillway, LLC | 215 | 0 to 30 days | \$3,000,000 |
| Cuyahoga | Impact Aid-Capital Project- ADA Upgrades | The Americans with Disabilities Act (ADA) Title II requires that public school systems comply with the ADA in all of their programs or activities, including those that are open to parents or the public. A 2007 District Wide Facilities Evaluation identified numerous opportunities for the District to remove access barriers by changing key facilities components. Such opportunities include: ADA-compliant restrooms, changing rooms, and the signage, doors, door hardware and restrooms. Projects could be designed, awarded and construction initiated well within the 120 day time frame. Early notification will help us meet our summer construction window when school is not in session. As a school district we are well versed in meeting accountability requirements, including the preparation of reports and maintaining appropriate documentation. A copy of the District's Building Assessment Report, which more fully details specific building ADA needs and costs is available upon request. | Cleveland Heights-University Heights City School D | 100 | 0 to 30 days | \$4,074,948 |
| Cuyahoga | EAS Construction | continue to operate and expand a site development and concrete company. provide job training and provide jobs for unemployed workers. | eas construction | 50 | 0 to 30 days | \$500,000 |
| Cuyahoga | Ameritrust Tower | This project includes the rehabilitation of the historic Ameritrust Tower at the prominent corner of East 9th and Euclid Avenue in Cleveland, for use as a high end boutique hotel and luxury apartments with retail uses at ground level. It also includes the renovation of an adjacent existing 160,000 square foot office building, which will also include retail space. In addition to being a LEED-certified project and contributing to the greening of downtown Cleveland, it will also have a significant economic impact, creating approximately 660 jobs and generating \$2,600,000 in annual tax revenues. | Sandvick Architects, Inc. | 660 | 91 to 180 days | \$18,000,000 |
| Cuyahoga | Technology & Education | Integrate Technology to mentor, support, and educate teachers as well as students on learning and developing hands on experience necessary for the children's future. Provide the computers and training necessary to implement this into the K-12 school curriculum. Establish labs whereby students will be able to compile, organize, and analyze information gathered, so as to work in team environment as well as interact with others in ethical ways. Students would be able to learn the basic concepts of operations, technology tools, communication tools, research tools, problem solving, and decision making tools. These are key components that are vital to our children today and this grant would enable us to implement the job our school system. | Mosdos Ohr Hatorah | 25 | 91 to 180 days | \$500,000 |
| Cuyahoga | Update Security/Safety | Install new Intrusion Detection System with alarm contacts and complete perimeter protection in our two (2) schools (Boys and girls buildings). Replace existing CCTV system with IP based system hosted on Mosdos LAN. Install any additional alarm and sensor devices needed on the rear entrances of the buildings. Finally we will be able to bring the Schools up-to-date against terrorist threats and other challenges needed for proper protection of the students, faculty, and staff. | Mosdos Ohr Hatorah | 5 | 0 to 30 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | Finance 180* | Program designed to positively affect over 250 people in Cuyahoga County and immediate employ 5 to 10 workers, teaching and self-empowering individuals and selected organizations that cater to the recovery of lost economic power through previous losses due to the economic state of the recession. Granting official memberships towards long term stability. In association with this project we will jump start and tailor design our programs toward senior citizens and members alike. Projects like this have already been sanctioned by multiple financial institutions that I have personally taken leadership towards implementing the policies which house and create community revenues. | Financial Training Redemption | 5 | 31 to 90 days | \$225,000 |
| Cuyahoga | Vet's Community Reconnect "Position 1" | Project is designed to regain positive association with youth and leaderships from education partnership in positive effect to rebuild and reconstruct housing through tradesman and women for Vet's project. It will move over 165 Veterans into an immediate 165 residential, functional housing. In addition while living and building through the Veterans help, by structuring over 40 more new and reconstructed homes for the inner city senior citizens through "TRICARE" care which will also give the Veterans the ability to "TRICARE," mental stability. The program will be in the Greater Cleveland area and generate an immediate employment of 120 students, 75 parents and over 100 + associate staff members. This project has already been sanctioned by with Multi-corporate Sponsors which also includes MetLife. | Global Millennium Inc. | 200 | 31 to 90 days | \$600,001 |
| Cuyahoga | I Believe N U | Students, 300 parents and over 100 + associate staff members. | Cuyahoga | Demonstration of Equipment and Best Practices for | Demonstration sites for Energy Efficiency improvements. These demonstration sites will have an industry specific focus (i.e. paper industry, chemical industry, metal casting etc.). The goal of these sites is to demonstrate energy efficient equipment and best practices in a production environment. Each demonstration site will involve participation of equipment suppliers and industrial users. Demonstration sites will be set up in residential areas and office buildings to include a "200 Energy Home" and an energy efficient office building. These activities will be cost shared with suppliers. The demonstration sites will be accessible to the public and incorporate ample background information for visitors. Workforce training in industrial energy efficiency. The training will span a wide range of opportunities ranging from high school students to graduate engineering programs. Short informative one-day workshops at various sites, weekend workshops leading to certification and continuing Education Credits (CEUs) as well as year-long curriculum for advanced degrees. | Case Western Reserve University | 100 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Sustainable Center for Garden Education | According to the National Gardening Association, there will be a 10% increase from 2008 in the number of U.S. households planning a food garden in 2009, bringing the total to 43 million households. An outgrowth of the economy and other factors, this is a trend that will not go away, and does not even capture interest in flower gardening. Cleveland Botanical Garden, a vital regional resource on gardening practices, is ready to build a "green, LEED-certified gardening center on its campus in urban Cleveland. The architect is William A. Ory, Jr., an award-winning leader in the design of environmentally sustainable buildings. The center will serve as an educational facility and will include offices, workshop and classroom space for public programs, a propagation greenhouse for display gardens, and exterior demonstration gardens to showcase "best practices" in shade, rain, vegetable and other garden specifics of interest to area home owners. Sustainable design features will include but not be limited to geothermal heating and cooling, a green roof, natural day lighting and use of recycled and durable natural construction materials. | Cleveland Botanical Garden | 40 | 31 to 90 days | \$3,000,000 |
| Cuyahoga | Energy Efficiency Center | A concern among impoverished people is the ability to pay monthly energy bills. In recent years, appliance companies have re-designed that products to be more efficient. The energy Efficiency/Gird Infrastructure Pilot Program would facilitate a large-scale appliance exchange program and a full host of the impact to the grid that can later be scaled for larger impact insight. The program would replace up to 10,000 old refrigerators. This would be done in conjunction with an effort to monitor the impact of the change in appliance efficiency on grid performance. | Great Lakes Institute for Energy Innovation | 20 | 0 to 30 days | \$10,000,000 |
| Cuyahoga | Grid Research Center | To do research and design and development and deployment for the US Energy grid. This will include efficiencies, sensors with communications and new controls, including new operating algorithms. These efforts will also make the grid more robust and reliable. We would install alternative energy sources along with storage to allow any differences between supply and demand. We have put together a team of independent not-for-profit labs, universities and power companies to address our energy needs in a comprehensive way. The team has capabilities that span all the technical needs, can do research, development, prototype build and field trials to demonstrate the efficacy of the solutions. The proposed approach includes "smart ready" technologies to longer term developments. Our efforts will be focused, yet comprehensive. | Great Lakes Institute for Energy Innovation | 50 | 0 to 30 days | \$25,000,000 |
| Cuyahoga | People with HIV/AIDS Back-to-Work Initiative | The ATOC will hire and place 10 unemployed people with AIDS in local employment settings to gain on-the-job skills resulting in their future continued employment. The project will pay each employment placement person with AIDS a modest salary and cover health insurance. Job placements will be secured through the ATOC's network of connections. The project will also hire a job coach to provide employment-related skills training to participants, and to serve as a link between program participants and local employers. The project will result in FT employment for 11 individuals for a year, with high potential for continued employment thereafter (nearly 70% of ATOC clients are unemployed). Because people with HIV are living longer, putting people back to work 1) reduces individuals in an income-earning, learning status, and 2) reduces public costs of AIDS care (medical care, etc.) since individuals will be covered by job-sponsored insurance, and can cover living costs through personal income. The ATOC has 30+ unemployed clients with HIV/AIDS ready for employment placement. This initiative moves disabled people into the workforce quickly by subsidizing costs for the employer. | AIDS Taskforce of Greater Cleveland (ATGC) | 11 | 31 to 90 days | \$310,000 |
| Cuyahoga | Euclid Home Low-Income Home Weatherization Program | This project will expand the City of Euclid's current Low-Income Home Weatherization Program. The current program operates with a significant waiting list and increased funding through the ARRA will allow the city to address the community's demonstrable need for home weatherization services. The additional ARRA funding will purchase and install CFL light bulbs in 50 homes, install/upgrade replacement windows in 20 homes, purchase/install replacement storm doors in 35 homes, purchase/install replacement entry doors in 50 homes, purchase/install glass block windows in 20 homes, and install 15 homes utilizing "Bloom It" technology. | City of Euclid | 10 | 0 to 30 days | \$96,850 |
| Cuyahoga | Closing the achievement gap with 21st century oppo | We need to create accessible school buildings to meet ADA requirements which would include an elevator and various ramps. We also need to renovate the HS&B building to include technology, supplies, and capital improvements in the corner areas to improve classroom management and science labs for students being consolidated from the elementary school. The windows need replaced to include energy efficient glass. Plumbing and electrical systems requires extensive renovation and repair. | Brooklyn City School District | 20 | 31 to 90 days | \$2,100,000 |
| Cuyahoga | Independent Living Program | Beech Brook will use funds to extend its independent living programming to further provide for high risk youth with significant emotional disturbances aging out of the foster care system. Designed to encourage a comprehensive approach to independent living, services will provide additional support for housing, vocational and employment readiness/training and support, transportation, health care and secondary education. Founded in 1982, Beech Brook is now a nationally recognized treatment center for emotionally disturbed children, youth and their families. With a staff of 460, Beech Brook serves over 21,600 children, youth and adults in Northeast Ohio every year. | Beech Brook | 15 | 0 to 30 days | \$250,000 |
| Cuyahoga | Gym Upgrade | Founded in 1952, Beech Brook is now a nationally recognized treatment center for emotionally disturbed children, youth and their families. With a staff of 460, Beech Brook serves over 21,600 children, youth and adults in Northeast Ohio every year. Beech Brook will use funding to modernize the 35-year old existing gym and activity building on the main site of this large multi-service child and family mental health agency. The building upgrade would assist in the treatment of today's seriously emotionally disturbed children and youth treated on campus by enhancing safety, offering new and modernized treatment facilities and by expanding the agency's capacity to meet the needs of our population including teens and the recently referred juvenile justice population. Campus programs include Day Treatment and Partial Hospitalization, Residential treatment and classroom Education at the Grand School (part of Orange School District). | Beech Brook | 65 | 31 to 90 days | \$500,000 |
| Cuyahoga | Sleeper Protection Property Safety and Security Ser | This project is a security service that is mainly for the owners of vacant, abandoned and boarded up properties that are bank owned, HUD, VA, City and non-profit groups along with investment bankers property. The company will have ten employees to begin with and as the business grows we will employ others as the need arises. We are currently operating the program but with limited funds and working over one mile of this. It is our intent for this service through Cuyahoga County. This is intended to keep the properties from being vandalized and also to keep the owners from losing valuable mechanical items in furnaces, hot water tanks and copper. Involving the service will also keep the property values from declining. The utilities are also to be left on in the properties so as not to create a problem with water burning and also allowing the property to be shown to any prospective purchaser and also not being an eyesore to the community. This protection service will be affordable to the property owners and will also serve as a civic service to the community. | ESPS | 10 | 31 to 90 days | \$225,000 |
| Cuyahoga | Early Childhood/Teen Education & Intervention Cent | Beech Brook seeks to use funding to rehabilitate an existing campus building to serve as a new Early Childhood/Teen Learning Center. With a focus on customized educational programs tailored to each child and youth's developmental needs and specific learning style, the programs will promote school readiness and achievement by enhancing social and cognitive development through the provision of mental health services to children/youth and their caregivers. Emphasis will be given to those special education children and youth experiencing developmental delays, including autism spectrum disorder, trauma and/or post-adoption and attachment difficulties. Founded in 1952, Beech Brook is now a nationally recognized treatment center for emotionally disturbed children, youth and their families. With a staff of 460, Beech Brook serves over 21,600 children, youth and adults in Northeast Ohio every year. | Beech Brook | 65 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | Eddy Road Lighting Project | This project consists of the replacement of the existing roadway lighting on Eddy Road in Bratenah, Ohio. The existing pole mounted lights will be replaced by two future types: a low energy, low wattage future down the center median (9 poles) and energy efficient fixtures on the west median (9 poles). This is the final link of a project that began in 2005. At that time the Village replaced the existing sewers and resurfaced the roadway. The Village also worked with First Energy to install conduits underground for the future relocation of the overhead wires to underground. At the present time the underground conduits and pull boxes are in place in the median and adjacent to the west curb line. The proposed work will complete the project. The overhead lines will be buried in the conduits and low poles installed. We will provide consulting services to school districts and libraries who have limited technology budgets to assist them in obtaining high speed internet access, in fiber, to increase their bandwidth for their technology needs. Location: TED in University Circle, Cleveland Ohio. | Village of Bratenah | 25 | 31 to 90 days | \$75,000 |
| Cuyahoga | School District and Library Internet Access | | JR Funding Support Services | 2 | 31 to 90 days | \$150,000 |
| Cuyahoga | Diabetes Multicultural Education Project | The diabetes education component will target people of color, with an emphasis on African American and Caribbean American populations, and the impact of diabetes on these groups. Nutrition, fitness, cooking demonstrations, and diabetes testing will be available along with a workshop on the meaning and the utilization of the day of the multicultural food festival. The additional diabetes education will be offered at the location of the MC Chatman Center for Humanitarian Services, 11111 in the Garden Valley area where the month. Individuals of all ages will be recruited. It is expected that this activity will require a minimum of 4 months of planning, and will provide part-time employment for 5 individuals in the planning phase. The phase of employment includes social engineering, clerical, custodial, security, and marketing, and clear up once following the festival. The event is expected to attract around 1000 individuals. The American Diabetes Association has joined us in partnership for this event. Manipulates the institutional setting into a stimulating and therapeutic environment to increase socialization, decrease wandering and agitation, and provide purpose and quality of life of the dementia population. Construct an 8 bed specialized orthopedic rehab unit to enhance recuperation and recovery, with private dining area. | MC Chatman Center for Humanitarian Services | 10 | 0 to 30 days | \$50,000 |
| Cuyahoga | Central Park for Dementia Unit | | Montefiore | 3 | 31 to 90 days | \$10,000 |
| Cuyahoga | Montefiore Specialized Orthopedic Rehab | Outcome: Expansion of rehab beds/services for a younger population needing specialized orthopedic care but resistant to a nursing home setting/population. Renovation of an existing/ventilational area for 272 bed nursing home. Three discreet meeting areas, upgrade in audio-visual equipment including teleconferencing capability for staff training and education. Renovation with LEED certification of main meeting/ventilational area for 272 bed nursing home. | Montefiore | 20 | 181 days or more | \$1,000,000 |
| Cuyahoga | Chapel Auditorium Renovation | Outcome: An energy efficient, GREEN central meeting area. Healthier environment for the nursing home residents, staff and community guests, cost savings for the nursing home. | Montefiore | 20 | 31 to 90 days | \$750,000 |
| Cuyahoga | Chapel Auditorium Energy Efficiencies/ Improvement | | Montefiore | 20 | 91 to 180 days | \$100,000 |
| Cuyahoga | Accelerating Biomedical Start-ups in Northeast Ohio | In this grant application, BioEnterprise is seeking support for continuing its Entrepreneurial Assistance programs for emerging biotech companies in Northeast Ohio. BioEnterprise client companies have contributed strongly to the region's success and have generated significant new funding over the past six and half years totaling over 1,700 people. With each year of successful entrepreneurship, the number of companies and entrepreneurs and also the depth and reach of the region's bioscience resources continue to grow. There is, thus, a need for continued catalytic activity to accelerate the pace of industry growth in Northeast Ohio. The goal of this grant, BioEnterprise will support its existing and new biomedical start-ups. Based on the organization's track record, BioEnterprise expects that these clients will attract a total of \$500 million in new growth funding during the two year grant period and create approximately 100 new well paying jobs. | BioEnterprise Corporation | 2,000 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Modernization | Modernize existing Ohio corporations electrical distribution equipment to achieve energy efficiency and enhance safety by upgrading older equipment utilizing microprocessor based systems. Our service will eliminate the need for costly and time consuming millions on new equipment allowing the return to or halting related expenses. This equipment is found throughout all of Ohio's residential, commercial, and industrial and Commercial properties. This could be the entire system or portions thereof. One example would be a large Cleveland Hospital has approximately 75% of their existing electrical equipment could be made to operate more efficient through modernization. This will enable us to test the next generation of Engineers in this field. | American Power Service Company | 10 | 0 to 30 days | \$500,000 |
| Cuyahoga | Hispanic Microlending Program | The program entails microlending within the over 2,000 Hispanic owned businesses in NE Ohio coupled with weekly training to create a minimum of 300 jobs, increase income, and to promote financial literacy, responsibility and leadership development. | Hispanic Business Association/Hispanic Chamber of | 300 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | Cafeteria/Kitchen | Our Boys building does not have a lunch room for the children who attend. Our goal is to produce an environment that is health conscious as well as providing a full working kitchen and staff. Being able to prepare good hygiene and ensuring the minds and hearts of our children. Our goal is to establish and maintain the healthy food environment to meet the growing bodies and minds of the children. Currently we are housed in the gymnasium and desperately need the kitchen to implement this into our school system. | Mosdos Ohr Hatorah | 15 | 0 to 30 days | \$150,000 |
| Cuyahoga | Energy Institute Center | New energy research and development facility. Led by Case Western Reserve University the work of the Center will focus on collaborative energy research and development targeted to translational research, commercialization, and job creation. The University will partner with academia and industry, other universities, non-profit organizations and government to provide technological solutions to Ohio's energy challenges and needs. | Case Western Reserve University | 300 | 181 days or more | \$60,000,000 |
| Cuyahoga | Energy Research Infrastructure Renovation/Upgrade | Case Western Reserve University will provide leadership by enabling or accelerating energy research through equipment, systems, and laboratory upgrades that provide researchers with tools to address Ohio's energy challenges and needs that require rapid response. The project will create world-class energy research laboratory and testing facilities vital to Ohio's economic and energy future. | Case Western Reserve University | 150 | 31 to 90 days | \$30,000,000 |
| Cuyahoga | Northeast Ohio Global Imaging Alliance | Led by Case Western Reserve University the Northeast Ohio Global Imaging Alliance will catalyze development of biomedical imaging research, development and commercialization. NE Ohio is an established, internationally recognized academic research enterprise in biomedical imaging with significant presence of Philips and GE healthcare, who are producers of CT equipment, and rapidly expanding startup and existing companies in this sector. The investment will help position Ohio as a world-class leader in the bio-imaging industry, expand existing and attract new business, and create high-paying, high-tech jobs in the biomedical industry, vital to Ohio's economic development. | Case Western Reserve University | 150 | 31 to 90 days | \$50,000,000 |
| Cuyahoga | Soft Matter Solar Energy Center | Funding is sought for a Northeast Ohio fabrication and characterization facility for the next generation photovoltaic devices based on nanostructured soft matter. The facility will benefit the emerging collaborations among Case Western Reserve University, Kent State University, University of Akron and Youngstown State University aimed at implementing polymeric and liquid crystalline semiconductors for the next generation low cost solar energy. It leverages several federal and state funded centers existing among the partners. | Great Lakes Institute for Energy Innovation | 20 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Building-Integrated Photovoltaic Roof Demonstration | Photovoltaic roofs are popular because they allow building owners to capture the sun's energy to power their building. Current PV roofing systems have these drawbacks: (1) labor intensive and costly to install, (2) roof membrane leakage and electrical shorts (3) non-code compliant installations, (4) lower PV efficiency and roofing degradation due to excessive heat built-up under the panels, and (5) adhesive failure and lack of access to the primary waterproofing membrane for maintenance. These drawbacks make these systems expensive and restrict their widespread adoption. Tremco and Sunlight have teamed to improve existing solar cell technology to reduce the cost and improve the reliability and efficiency of PV roofs. This new building-integrated photovoltaic system will have two key features. First, it will be less costly, allowing more building owners to install BIPV roofs (and enjoy the benefits outlined above). Second, the new system will be more efficient, increasing the power delivery from the roof. The primary beneficiaries will be schools, healthcare, government buildings, and private buildings which will have access to a more affordable and efficient PV roofing system. | Tremco | 15 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Building-Integrated Photovoltaic Roof Demonstration | Photovoltaic roofs are popular because they allow building owners to capture the sun's energy to power their building. | Cuyahoga | Micro-Enterprise Lending for Home Businesses for P | As people with AIDS are living longer and healthier lives, they are attempting to return to work, school, and more independence. But 70% of our 2,000 clients are unemployed, and returning to work is a challenge. The ATGC will capitalize micro-entrepreneurs, revolving loan fund to help people with AIDS wishing to start or expand a small home or family-based business. Applicants may apply for loans from \$5,000-\$20,000, repayable over 5-10 years. Applicants must submit a detailed business plan with sound experiential forecasts to a panel of business experts. Selected applicants will be assigned a 2-3 member team of mentors to assist in business development and implementation, and to consult as necessary. Within six weeks of ratification, the ATGC will sufficient candidates to fill mentoring roles, and among board members, the ATGC has banking experts who will assist. The ATGC will establish a \$200,000 fund, lending for 15-20 businesses projects the first year and 2-3 projects a year thereafter as loan payments recapitalize the fund. The ATGC has a number of clients wishing to establish a home business—everything from a home cleaning service to a catering business. | AIDS Taskforce of Greater Cleveland (ATGC) | 10 | 31 to 90 days | \$275,000 |
| Cuyahoga | Update School & Classrooms | Meet the growing need of maintaining our buildings and establishing the protocols for proper maintenance of the school facilities. Upgrade all classrooms with modern technology and HVAC services. Do the necessary renovations needed for the school and enhance student learning. Provide the necessary changes to ensure student overcrowding. Upgrade the library, gym, lunch area, kitchen and much more to ensure proper egress of facility. Upgrade/replace children playground equipment. Replace portable units with permanent buildings. Repair, replace roof, plumbing, electrical, and lighting as needed. Ensure students health and safety and help keep property values high. A well kept school ensures a good marketplace for the Community. Only with these proper measures will our Schools progress as well as influence our young students to strive in their education and in their Communities. | Mosdos Ohr Hatorah | 30 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Summer STEM employment for Ohio college students | 20 summer research jobs, and 10 academic year jobs for OR undergraduates at Case Western in summers of 2009 and 2010 and the 2009/2010 academic year. Students will work in world-class scientific research groups in fields including anthropology, astronomy, biology, physics, medicine and physics. | case western reserve university | 20 | 0 to 30 days | \$150,000 |
| Cuyahoga | Ex-Felon Restructuring Program - "Second Chance" | Project designation: provide housing for ex-felons after exiting re-entry program and provide assistance in obtaining positive and successful association with society. The project will generate an immediate total of 25-30 individuals who would provide educational, technical, restructuring and reconditioning guidelines for those having difficulty rebuilding lifestyles. | Loe Key Inc. | 50 | 91 to 180 days | \$500,000 |
| Cuyahoga | "Loe Key Transportation" | This program has been designed to help individuals gain employment by obtaining truck driving instruction to become cargo and semi truck operators. In providing the necessary tools in structured presentations for machine operation, this program will provide 2 employment positions in those desiring direction and job opportunities of employment for individuals exposed to operate in the trucking industry. | Loe Key Inc. | 10 | 31 to 90 days | \$500,000 |
| Cuyahoga | "Open Minds" - Youth Assistance Program | This program has been initiated to implement constructive arts, cultural, educational and technical tools to youths and young adults. The program includes employment opportunities and job opportunities of employment for individuals exposed to operate in the trucking industry. Those seeking career or personal development in addition to family enlightenment. | Global Millennium, Inc. | 50 | 31 to 90 days | \$20,000,000 |
| Cuyahoga | Materials Performance and Reliability Institute | The economic impact and safety/reliability of Ohio's aging infrastructure are of crisis proportion in transportation, pipelines, power plants and highways/bridges. Ohio has special resources/expertise to be drawn together by this initiative. Funds will support (a) preparation of education and training modules and (b) the construction and equipping of a distance learning network. No research will be funded by this project. Huge energy savings are realizable through the reduction of consoen costs and extension of the useful lives of critical infrastructure. Ohio jobs will be created and retained through the reduction of consoen costs. Consoen costs in the U.S. Economy are \$25 Billion a year in direct costs (2002 dollars), and 25-30% are avoidable if best practices were employed. This project enhances the foundation and facilities to address these major needs through the State effective education, training and technology transfer. The overall effort represents a collaborative effort among Ohio's special resources/expertise from universities and industry. | Case Western Reserve University | 75 | 31 to 90 days | \$1,600,000 |
| Cuyahoga | Starting Business | Starting business to employ workers | D Daniel Productions Llc | 3 | 31 to 90 days | \$25,000 |
| Cuyahoga | "Back to Basics" - Domestic Violence Assistance Pr | This project is developed to provide assistance to individuals who have been engaged in domestic violence deaths. In addition the program will create employment for 50+ persons who will initiate assistance in education and career orientation in addition to providing individuals the opportunity to regain self esteem and enrich their lifestyles. | Global Millennium, Inc. | 50 | 31 to 90 days | \$200,000 |

|----------------|--|---|-------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Ohio Energy Institute for Advanced and Alternative | Ohio is uniquely positioned to tackle the transition to alternative energy by leveraging its access to Lake Erie, its many rivers, lakes and ample wind, NASA Glenn Research Center and the Air Force Research Laboratory and the existing assets available in the sophisticated manufacturing supply chain that also serves the automotive and aerospace industries. We propose the Ohio Energy Institute as a state-wide non-profit organization co-located at the Ohio Aerospace Institute to leverage their infrastructure and Shared Services Center that organizes, advances and alternate energy-related activities in core areas such as alternative/innovative fuels, wind, solar, fuel cells, energy storage, propulsion, recycling and waste energy, coal and nuclear. There are many synergistic opportunities among these five entities that will allow the Institute to quickly and efficiently ramp up needed support. OEI will act as a catalyst for research, collaboration, technology maturation and commercialization that will drive economic growth in terms of federal and private investments, and job creation throughout Ohio. Leveraging contacts and the knowledge base will mean immediate returns and jobs. | Ohio Aerospace Institute | 22 | 31 to 90 days | \$5,000,000 |
| Cuyahoga | Arco- The Economic Stimulus, Energy Recovery Progr | With assistance of the state of Ohio, Arco proposes to develop and implement a COMPREHENSIVE TRAINING PROGRAM for the mechanical construction trades. This will produce highly qualified Plumbers, Electricians, Sheet Metal Fabricators, HVAC Service and Refrigeration Technicians, all in one facility. In addition, Arco will also train HVAC new construction and retrofit installers, installers for home weatherization, and establish a satellite wholesale and training facility in the Appalachia Ohio to service and train technicians in that part of the state. This program will train displaced workers and people requiring retraining. This can include veterans, minorities, women, and anyone interested in learning a trade. | Arco Heating & Air Conditioning | 140 | 0 to 30 days | \$8,000,000 |
| Cuyahoga | Central Park | This COMPREHENSIVE TRAINING PROGRAM will put the broad winners back to work, keep families together, and create thousands of jobs across Ohio. This will reinvigorate our economy with jobs and make a vibrant Ohio. | Cleveland Botanical Garden | 200 | 31 to 90 days | \$16,000,000 |
| Cuyahoga | Kinship Village | Renovate and retrofit existing urban 9.65 acre, 190,000 sq. ft. multi-tenant, non-profit campus office, clinical and residential buildings for maximum energy operating efficiency, and positive environmental impact. | Fairhill Partners | 75 | 31 to 90 days | \$3,000,000 |
| Cuyahoga | Artistic TouchTransportation | Funds will be used to acquire/insulate a geothermal HVAC system campuswide, renovate and retrofit existing buildings to work with the system and surface improvements over land disturbed by installation to create space for campus health and wellness activities. Fairhill Partners, the 90/10 project sponsor, owns the land site free. We experience renovating the 100,000 sq. ft. main building and is already receiving offers for jobs as a large part of this forward ready project, which will be completed immediately without recovery and funds. | Artistic Touch Transportation | 20 | 31 to 90 days | \$2,000,000 |
| Cuyahoga | Retrofitting The Cleveland Institute of Art's McCu | Short term (within 90 days) 50-70 jobs will be created by the renovation and installation process. Long term outcomes include: The new campus opening cost, more affordable for 50+ organizations with 150+ employees, including a senior serving 200+ K-12 employees; By installation for 8-10 temporary homeless services, and adding 25 apartments for older adults raising children, older volunteers and other employees. | Cleveland Institute of Art | 550 | 31 to 90 days | \$5,500,000 |
| Cuyahoga | Hospice House, Western Campus | Artistic Touch Transportation service provides transportation service for medical patients to and from hospitals, to and from caregivers appointments, and from the hospital, to and from clinics. This company is also anticipating to begin serving Veterans for their appointments. The same manner. ArtisticTouchtransportation employs 12 people but is our intention to increase the number of people that we employ. This company will purchase additional vans to grow the business area to offer the services to other disabled veterans and people with disabilities. This company will also receive transportation to and from doctors appointments and any other facility that they may assistance getting to. This company will also provide transportation to and from doctor appointments and we can take patients to and from the VA facilities to and from the VA. We have a contract with the VA but we are serving veterans who request our service. Artistic Touch Transportation works with patients who have home facilities and that need transportation to and from their routine terms at their various appointments. The typical day for a driver begins picking up patients begins at 4:00 am, and they are on call 24 hours if faces. | Hospice of the Western Reserve | 105 | 91 to 180 days | \$2,000,000 |
| Cuyahoga | efficiency project | As a major focus of its urban campus modernization project, The Cleveland Institute of Art is rehabilitating its historic four-story McCullough Gallery, significantly improving its energy efficiency. The McCullough Center, originally built in 1916 as a Model T assembly plant, will undergo extensive retrofitting, including installation of new high performance glazing, a new state-of-the-art HVAC system, and an Energy Star roof. Beyond those major efforts that will cost more than \$12 million, the Institute will construct a new, highly energy efficient building just west of the McCullough Center, with the resulting new campus being Silver LEED certified. | Light of Hearts Villa | 90 | 31 to 90 days | \$456,000 |
| Cuyahoga | Biobased Plastics | City work permits have been approved and the project will employ nearly 300 people during the construction phase and be a major catalyst for broader development efforts planned in University Circle. The completed new campus will serve more than 600 students plus 250 faculty and staff members. | Carboxyl Product Technology LLC | 10 | 0 to 30 days | \$250,000 |
| Cuyahoga | Coupaid Food Stretcher | The budget for the Institute's unification project is \$55 million. More than \$30 million of that has already been committed. The Institute seeks \$5.5 million from the State of Ohio for renovation of the historic McCullough Center. | Coupaid | 100 | 31 to 90 days | \$750,000 |
| Cuyahoga | I am in process of possible franchising with a Sol | The Institute's plan is to renovate the building in a "phased" approach and has estimated a total cost of \$14.1 million in construction of support. The project has received \$100,000 through the 2008 Ohio Capital Budget and it was appropriated \$38,000 in the FY2009 Labor, Health & Human Services, Education and Higher Education budget. The Western Reserve campus of 100 patients and staff has identified urgent needs for a residential hospice facility to serve the people of Western Cuyahoga and Lorain Counties. Also, according to the U.S. Census Bureau, over 100,000 residents in Cuyahoga and Lorain Counties are 65 or older. This growing population of 65-plus will soon include the "baby boomer" generation, leading to an even greater need for residential hospice services. Lastly, this project will lessen the strain on Medicare and Medicaid as independent studies have shown. | Solar Solutions | 20 | 31 to 90 days | \$100,000 |
| Cuyahoga | Abatement to Green | Sight of Hearts Villa in Bedford is a non-profit assisted living facility. Originally an all girls school built in 1964 and converted in 1989 to a 92 bed color care facility. The energy efficiency of the building is in need of updating. The existing boilers over 40-years old and presently running at 60-95%. The replacement boilers have an efficiency rating of 92-94% at a cost of \$148,000.00. | A & I Health Solutions, LLC | 10 | 0 to 30 days | \$350,000 |
| Cuyahoga | Providence House Children's Village | The children 20years old and using a non-environmentally friendly oil that will be phased out over the next 5 yrs the new unit will run 30% more efficient and be using an eco-friendly nalgene at a cost of \$122,308.00. | Providence House - A Crisis Nursery | 424 | 0 to 30 days | \$10,000,000 |
| Cuyahoga | Waste to Energy / Useable products | The single pane windows throughout the building are hard to measure their efficiency. These replacement to 1" insulated low e glass and thermal break frames. Very windows would save natural gas & electricity, the cost of replacement is \$150,000.00 in the cost of the building. The total cost would be \$450,000.00 that would make a great impact on the environment. | EHS Global Solutions | 5000 | 31 to 90 days | \$30,000,000 |
| Cuyahoga | Bemka K. Jones & Assoc. Inc | The May of 2008 we retained Cole + Russell Architects, Inc. to perform an extensive facility evaluation. The above was the major outcome to improve efficiency. | Bemka K. Jones & Assoc. Inc | 10 | 31 to 90 days | \$1,500,000 |

|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Onsite, Energy Efficient Freezer and Upgraded Baki | Project 1 - Upgrade Onsite Freezer A significant portion of the Company's sales are of bread products that are frozen after baking and distributed to stores as frozen product. They have a need to store the frozen products until shipment. Based on their volume and the amount of frozen product that they produce, they accomplish this through a small on-site freezer and the use of outside, third-party frozen storage facilities. The use of outside storage is costly to the company as well as necessitates the use of trucks to transport the products back and forth to the facility. This transport process uses gasoline and causes exhaust into the air. The current freezer used Fresh in the freezing process uses a lot of energy. The Company is looking to acquire and build a larger freezer on-site which will be much more efficient and much larger than the current freezer. This will allow them to reduce the usage of outside storage and the related transportation that goes with it. Upgrading to the larger freezer will save energy related to the operation of the freezer and the gasoline and emissions related to the transportation process. | Orlando Baking Company, Inc. | 15 | 0 to 30 days | \$9,000,000 |
| Cuyahoga | Lighthouse Prison Ministry | Help the re-entry process of women through our referral and networking services. Provide basic skills necessary to cope with the world they meet now versus. That they may become productive citizens. Adjusting to the stresses and bewilderment of re-entry. Assessment, evaluation and testing. Job readiness, job coaching, resume writing, interviewing skills, etc. | Women of Royalty Outreach Ministries & Enrichment | 5 | 31 to 90 days | \$75,000 |
| Cuyahoga | One Sista to Another | Provide hygiene/personal health care items to women in shelters, transitional housing, treatment centers. To provide workshops, seminars in job coaching, job readiness, self-esteem, self-sufficiency, and self-worth. Provide information for health, nutrition and exercise play an important role in the complete well-being of our clients. Training in resume writing, completion of employment applications etc. Enhancement of appearance to secure employment, through our "Heads Up" program. | Women of Royalty Outreach Ministries | 25 | 0 to 30 days | \$150,000 |
| Cuyahoga | Neighborhood Revitalization | This is a neighborhood revitalization project which will establish urban food gardens for market, food banks, schools, and hospitals and engage urban youth in research, education, entrepreneurship and community development activities. The program will provide paid research internships for eligible high school students to study and undergraduate students who will work with the Ohio State University faculty and Extension educators based at the OARDC in Wooster or in Cuyahoga County. The program will collaborate with local government, schools, colleges, universities, and non-profit organizations and will create 5 full summer employment for 100 students and will provide part-time year-round employment for some. In addition to job creation, education, and youth engagement and training, the program will enhance human nutrition and environmental health (air, water, and soil quality, aesthetics and stormwater management, etc) in one of the most poverty stricken and home ownership issues in the state. The program will also serve as a model for other communities in Ohio and around the nation to demonstrate the power of edible landscaping in community revitalization. | The Ohio State University | 100 | 0 to 30 days | \$500,000 |
| Cuyahoga | Lunch is on Jesus (Lunches for the homeless) | Prepare and distribute 1,000 + lunches to the homeless on the streets of Cleveland, Canton, Mansfield, Youngstown, Akron, Columbus, Cincinnati. Behind the dumpsters, under bridges, in alley and doorways. We serve those who are homeless, traumatized, and skeptical of outside assistance. We provide health care/hygiene items. As we build a relationship of trust we then move them to a more stable environment. Help, compassion, and encouragement to re-build their lives. While referrals to our other programs of self-esteem, job coaching and training preparation for employment. | Women of Royalty Outreach Ministries & Enrichment | 10 | 0 to 30 days | \$100,000 |

| Cuyahoga | UH Center for Emergency Medicine | UH is considering Leadership in Energy and Environmental Design (LEED) Green Building Rating System certification for all new construction. LEED certification is essential to UH's Green Building Goals. UH plans to install gasless developed for the health care industry. We will work to buy more efficient power systems and replace existing air handling units with more energy efficient ones and using latest technology we save on the energy cost for UH and decrease our Carbon Footprint. Compact fluorescent lights and Motion detector light switches are used whenever possible to reduce energy consumption. These, among other efficiencies, will be added to our projects. | University Hospitals | 615 | 181 days or more | \$5,000,000 |
| Cuyahoga | UH Center for Emergency Medicine | Each year, the emergency departments at UH Case Medical Center and its Rainbow Babies & Children's Hospital treat some 73,000 adult and pediatric patients, making UH the second busiest emergency department in Northeast Ohio. The current space, however, was built to serve only 40,000 patients annually. In an effort to continue to serve patients in need of emergency treatment, UH will renovate and more than double the square footage of the emergency department at the UH Case Medical Center and its Rainbow Babies & Children's Hospital. UH is considering Leadership in Energy and Environmental Design (LEED) Green Building Rating System certification on all new construction. LEED certification is essential to UH's Green Building Goals. UH plans to install gasless developed for the health care industry. | Cuyahoga | UH Ahuja | This hospital meets community need in an area of growing demand, and complements current UH services in the area. It also will be a catalyst for economic growth by bringing into the area high-paying medical industry and generating tremendous tax revenues. It will make advanced care more accessible to residents on the eastern region of NE Ohio. Furthermore, efforts have been made towards an ambitious and carefully considered planning process to create one of the safest, high quality, technologically advanced (including electronic medical records) and best in class hospitals in the world. Specifically, UH Ahuja Medical Center, which is currently under construction, is designed to maximize natural light in patient rooms to reduce power usage and promote well-being. The grounds of our new structure will feature walkways, bikeways and retention ponds to reduce storm water runoff and its impact on the environment. These, among other efficiencies, will be added to our projects. | University Hospitals | 3690 | 31 to 90 days | \$15,000,000 |

| Cuyahoga | Urban Yard Waste Carbonization | This project will explore the financial viability of using yard waste carbonization to improve the collection efficiency of yard waste management and to produce useful byproducts that sequester carbon and increase soil productivity. This will provide a valuable alternative to current management strategies that rely on composting. This is desirable since yard waste compost is not in high demand, leads to aesthetic problems and health concerns, and ultimately releases all of the biomass carbon as atmospheric CO2. Carbonized yard waste is distributed and primarily sequesters much of the biomass carbon as a soil amendment. The results of this project could lead to a technology that could be implemented in many Ohio communities to create new business opportunities while it reduces the municipal cost of yard waste management. | Case Western Reserve University | 5 | 31 to 90 days | \$235,600 |
| Cuyahoga | Eco Friendly Building | Eco-friendly building with multi tenants | Trucking | 5 | 91 to 180 days | \$350,000 |
| Cuyahoga | From Our Father's Table | Cooley Avenue Church of God's program. From Our Father's Table, is a bi-lateral outreach that seeks to meet the food insecurity needs of those in the Western and neighboring communities by providing a weekly hot meal, as well as weekly food distributions and a monthly distribution of fresh produce. From Our Father's Table has served senior citizens as well as the unemployed and underemployed since 2004, experiencing a 200% increase in those seeking nutritional assistance since its inception. The project distributed 200,000 pounds of food in 2008. More than 300 people attend the weekly hot meals. Fresh produce is distributed to more than 125 senior adults and no less than 350 families receive a hot meal each month. | Cooley Avenue Church of God | 10 | 91 to 180 days | \$250,000 |
| Cuyahoga | Future Linear Expansion | Cooley Avenue Church of God remains committed to bridging the nutritional gap of those living in Western and the surrounding communities through the distribution of canned foods, meals and produce, as well as helping them move to the "next level" by becoming self-sustaining and self-reliant. Program funds to be used to hire, train and retain individuals to expand existing business poised to become the best of class as a state of the art Advertising Agency. Business services include: * Web/SEO/Marketing (web based marketing) * Video/RealityTV (digital video, radio and TV advertising) * Fusion Marketing (cutting edge, personal CTR's, blogging, social networking) * Print (newspaper/magazine ads, business cards, trade show displays, banners) Additional funds will allow Linear Creative LLC to train, displace, entry level and experienced individuals to help take the business to the next level. | Cuyahoga | University Circle Police Department Capital Needs | Field reports can be generated from the vehicle and transmitted directly to the dispatch center. This allows for officers to stay visible in the field. \$18,000 for 6 vehicles, annual air time cost is \$3,000 for laptop connectivity. Vehicle Video Cameras – Video camera to record activity in front of the police vehicle during traffic stops or vehicle pursuits. \$18,000 for 6 vehicles. Personal Video Cameras – Video camera attached to officers' portable radio on their person. The camera records all interaction, providing a record of how any single altercation occurred. \$25,000 for 25 officers. K-9 Unit – Canine and officer to perform building and other types of emergency searches. Canine Units also work well with crowd control and apprehension of fleeing criminal suspects. Costs associated with operating such a unit include: Acquisition and initial training of canine: \$15,000 Canine vehicle and equipment: \$30,000 | University Circle, Inc. | 0 | 0 to 30 days | \$118,100 |
| Cuyahoga | Concrete and Masonry Training Program | Three C's proposes to hire 15 apprentices/workers and train them for concrete, masonry and carpentry work with in-house instructors training 8 workers in classroom setting and 7 on-site training with a rotation in six week intervals. The workers will receive a stipend while in training and be union ready when they have completed the training program. It is the intention of Three C's to establish a relationship for the training program with an accredited university so as to give the students certificates of completion when the trainees have successfully completed the training. There will be a collaboration of this training program with other groups that will offer similar types of programs be the organization profit and/or not profit organizations. The organizations will identify utilize facilities together so as to incorporate the programs to get the most out of the training equipment and completing pilot projects. It is also our intention to recruit students from municipal school systems and to utilize their skills and knowledge and to help them to advance to another level. There will be one centralized reporting location for anyone in the program. Community Health Inc. will accept Veterans who have post traumatic stress disorders which are prevalent in today's society. The Veterans who have developed this illness from recent wars are in need of a facility such as Community Health Inc. Community Health Inc. will also focus its attention to the need of any other referral from Medicaid/Medicare. The focus is on providing quality care including lodging, recreational needs, improving social skills and transitional community involvement as needed in appropriate circumstances. Community Health Inc. will have a staff of ten employees, with twenty-four supervision. There will be transportation for the residents to attend community and social activities. The residents will have access to public transportation, convenient shopping and the opportunity to attend The Harvest Community Services Center. Community Health Inc. will collaborate with other agencies that serve similar populations. There is also the opportunity for transitional employment in the community. This would be great. | Three C's Management and Development Corp. | 15 | 31 to 90 days | \$500,000 |

Community Health Inc. will collaborate with other agencies that serve similar populations. There is also the opportunity for transitional employment in the community. This would be great. | Community Health Inc. | 10 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | ArtWork - Job training program through the Arts | ArtWorks will provide six weeks of employment for 1,000 teens (and 100 adults) including college prep, career/work skill development, adding to the economic well-being of their families and communities. ArtWorks also acts as a microcosm of the real world. Through mentoring by professional artists, in a 10 to 1 ratio, apprentices work in teams to develop a business plan, create a product, and join other teams to market their products to the community. ArtWorks enhances learning by encouraging teens to engage deeply and self-critically with their work and extend the practice to all facets of their lives. ArtWorks teaches youth the value of discipline and hard work by setting clear expectations. Teens develop work ethic and a sense of responsibility to complete assignments – improve their skills through their own and their team's efforts, and learn to think, they like, and future life endeavors. They develop professional skills such as public speaking, time management, writing a resume and expanded cultural understanding. The program structure would be in Lorain, Laker, Garaga, Summit, Mahoning, and Stark counties reaching the 9th, 10th, 11th, 14th, 16th, 17th, and 18th Districts. | Young Audiences of Northeast Ohio | 1,100 | 91 to 180 days | \$4,826,039 |
| Cuyahoga | Single Pane Window Upgrade | Removal of inefficient single pane, steel frame windows and selected inefficient double hung windows that are currently installed in three buildings replaced with energy-efficient windows. These new windows will be Low E, insulated, clear and argon filled. We anticipate 20% energy savings with the new installation. | Wire Products Company | 70 | 0 to 30 days | \$60,035 |
| Cuyahoga | Waste Energy Recovery Units (3) | Cleveland Thermal, LLC provides district heating and cooling thermal energy to commercial, institutional and governmental buildings in downtown Cleveland. CT maintains over 15 million cubic feet of steam infrastructure consisting of two system pressures. This energy recovery project will utilize the difference between the two system pressures to generate electric power. These waste energy steam turbine generators will be placed at areas of the system where primary steam reduction valves feed high pressure steam into the low pressure steam system. The radiant heat that occurs at these specific areas results in significant waste energy in the form of atmospheric heat. These three units will generate about 1 MWh of near zero carbon emissions with an electric generating efficiency of greater than 70% compared to 35% for a typical generator. The power from these units will be fed to facilities that will utilize 100% of the waste power thereby improving the facility load factor at a lower cost than market energy providers. | Cleveland Thermal LLC | 3 | 0 to 30 days | \$840,000 |
| Cuyahoga | Expanding Our Horizons - New Technology Project | Horizon Science Academy is requesting \$500,000 for a one-time investment in our technology expansion project. This project will enhance our outstanding educational program through new programs with brand new, updated technology. The projected construction and expansion costs are \$1,800,000. Financing has been secured for \$1,300,000. The money in place will cover the construction expenses of the outer shell and interior walls, ceiling, floors and service contractors for electrical and waste. Additional expansion totaling \$500,000 are necessary for furniture, equipment, computers, printers, SMART BOARDS, and other technology. We are seeking an additional \$100,000 for professional development and training for teachers and staff to implement the systems. | Horizon Science Academy Cleveland | 50 | 0 to 30 days | \$500,000 |
| Cuyahoga | Cleveland Thermal Biomass Combustion System | Cleveland Thermal, LLC provides district heating and cooling thermal energy to commercial, institutional and governmental buildings in downtown Cleveland. This project entails the installation of a biomass combustion system (boiler / heat handling / emissions control system) to be installed at an existing Canal Road Plant to replace existing fuel oil boilers with a new biomass boiler. CT has completed a biomass source study and has determined that sufficient material is available to support a new boiler of 150,000 bbl/hr of carbon free steam production. The installation of this system will reduce 20% of the existing production facilities carbon footprint and reduce over 500 tons of CO2 emissions. | Cleveland Thermal LLC | 32 | 31 to 90 days | \$45,000,000 |
| Cuyahoga | Cleveland Thermal Combined Heat and Power Plant | Cleveland Thermal, LLC provides district heating and cooling thermal energy to commercial, institutional and governmental buildings in downtown Cleveland and is developing a combined heat and power (CHP) project which will update its combustion technology to provide greater energy efficiency and environmental benefits while simultaneously generating 100 MW of electric power. The advanced combustion and pollution control technology to be included will result in thermal efficiency improvements of more than 20%, electric efficiency improvements in excess of 16% and a reduction in hourly emissions rate by 75%, all in a smaller carbon footprint design. The project's primary fuel source will be \$15 Million per year of Ohio coal with the added ability to include 15-20% biomass into the fuel stream. Ohio based fuel will add 16 million pounds and over 150 ancillary positions. The total estimated cost for the CHP project will be in excess of \$200 Million including over 500 Million in construction contracts and 150-200 trade positions. The new plant will require 35 new positions and add over \$2 Million in new utility/revenue while maintaining over \$5 Million in existing revenue. | Cleveland Thermal LLC | 186 | 31 to 90 days | \$200,000,000 |
| Cuyahoga | Beech Brook Supportive Employment | The agency operates an Assertive Community Treatment Team, an evidence-based practice, for 50 sixteen to twenty-three years olds with severe and persistent mental health conditions (i.e., Schizophrenia, Bipolar Disorder, Major Depressive Disorder - Recurrent, or Substance Use Disorder). A desired but often elusive outcome for this population is gainful employment. Beech Brook seeks funds to implement another evidence-based practice, Supportive Employment, to find jobs and support sustained employment for ACT Team consumers who are not in school and either under-employed or unemployed. Application of Supportive Employment to a transitional youth population, which is novel approach in the field, will be studied to demonstrate practice efficacy, ultimately helping others this age who are suffering from major mental illness and the deleterious impact of unemployment and poverty. Founded in 1952, Beech Brook is now a nationally recognized treatment center for emotionally distressed children, youth and their families. With a staff of 460, Beech Brook serves over 21,000 children, youth and adults in Northeast Ohio every year. | Beech Brook | 3 | 31 to 90 days | \$700,000 |
| Cuyahoga | Mental Health Project | Community Health Inc. service is a Foster Care program for mentally challenged persons, including Veterans with post-traumatic stress disorders service related with all of the wars past and present. We are also focused on medical patients who need our services also. Community Health Inc. houses these residents for a period of time that has been determined by the referring agency - VA, Medicaid, Children and Family Services. These residents receive meals, proper hygiene, proper medical, social activities and lodging. Community Health Inc. is staffed with a full staff of approximately 15 people including a full time manager and also close relationships with the physicians of the residents. Who appropriate some of the residents can hold outside employment. The facility is close to public transportation, shopping center and The Harvest Community Services Center. Community Health Inc. will Collaborate with other agencies that offer like services to the same population of people. The facility will house up to twelve residents and is looking to grow its capacity as the need arises. | Community Health Inc. | 10 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | MV Drive | Avtron Industrial Automation is seeking funding support for research, design, and manufacturing activities to develop a medium voltage AC drive platform. Avtron is a manufacturer and supplier of highly engineered AC and DC motor drive systems and energy enclosures for heavy industrial applications. We are seen as a global leader in our markets. Targeted at alternative wind energy, marine, and mining industries, this product line would enhance our current offerings and would be assembled in Cuyahoga county, creating and retaining local jobs. The project has the ability to create and sustain up to 50 high-tech engineering and skilled manufacturing positions. Expected results are in excess of \$50,000,000 of product shipments. | Avtron Industrial Automation | 50 | 0 to 30 days | \$3,000,000 |
| Cuyahoga | Energy Conservation Performance Project | The project will address energy efficiency. City facilities will become more energy efficient with lighting retrofits, building envelope improvements, and an upgrade to more energy efficient mechanical systems, especially the HVAC. Other improvements in our treatment plant will provide substantial savings to the people of Cleveland Heights by providing a more efficient City system for leak detection and more accurate water usage readings. It is currently estimated that the City loses 40,000 ft of water each year. It is anticipated that all of these improvements will drastically reduce energy use and also provide much needed energy efficiency in our City public and recreational buildings. Individuals in turning their skills and assets into micro enterprise businesses that are low in startup capital and tap into their existing networks for immediate return. Outcomes: • A plan for how to use existing skills and talents to create micro business for immediate revenue generation • Increased confidence about their prospects and their ability to generate revenue • Learn the planning process so they can understand and strategize for their new business • Learn how personal issues and mindset are getting in the way of their success • Proceed • Self assessment of their current skills and abilities with a professional life mapping coach • Learn the concepts of micro enterprise business development and business planning • Generate a 3 page business plan for micro enterprise and revenue generation • Business documentation and tax preparation for freelance or self-employed individuals | City of Cleveland Heights | 50 | 31 to 90 days | \$9,500,000 |
| Cuyahoga | MicroEnterprise Development for Survival | Individuals in turning their skills and assets into micro enterprise businesses that are low in startup capital and tap into their existing networks for immediate return. Outcomes: • A plan for how to use existing skills and talents to create micro business for immediate revenue generation • Increased confidence about their prospects and their ability to generate revenue • Learn the planning process so they can understand and strategize for their new business • Learn how personal issues and mindset are getting in the way of their success • Proceed • Self assessment of their current skills and abilities with a professional life mapping coach • Learn the concepts of micro enterprise business development and business planning • Generate a 3 page business plan for micro enterprise and revenue generation • Business documentation and tax preparation for freelance or self-employed individuals | MKM Management Consulting | 200 | 0 to 30 days | \$320,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | Street Outreach Reclamation Advocates | In support of the City of Cleveland's comprehensive gun violence reduction strategy the street advocates are responsible for daily outreach to and engagement of all participants identified by the justice system as a high risk for gun violence. The goal is to foster life changes in the identified individuals by offering supportive services, accountability and a consistent concentration on the "basic tenets" of violence message and the associated consequences for non-compliance. The program model is based upon the experiences of the Boston Gun Project/Operation Ceasefire, a problem-oriented policing initiative sponsored by the National Institute of Justice and directed by Harvard University's John F. Kennedy School of Government. Funds in 1977 with 260,000 sq. ft. St. Augustine Health Campus is the largest employer in Cleveland's Ward 17 and employs over 45 individuals. Approx. 80% of those who come from the city of Cleveland. St. Augustine spends over \$1.25,000 on utilities each year. | Community Re-Entry, Inc. | 13 | 31 to 90 days | \$475,000 |
| Cuyahoga | Energy conservation & alternative Energy Productio | With rising costs and decreased funding, St. Augustine is looking for ways to save energy, thus reducing costs. Without cost cutting measures, St. Augustine Health Campus is at risk of closing jobs, severely decreasing services, and potentially closing our doors. This would have our most vulnerable sick and elderly residents without a place to live and would be a detriment to Ward 17 and the City of Cleveland. Funds to help retrofit the building and create alternative energy production will result in an estimated 60% overall reduction in utilities costs. This project will create 20+ skilled green jobs, retain 463 jobs and protect vital services to the City's most vulnerable. | St. Augustine Health Campus | 483 | 31 to 90 days | \$500,000 |
| Cuyahoga | New Building | Avtron Industrial Automation is seeking funding support for purchase and remediation of a brownfield manufacturing site in Independence, OH, Cuyahoga County. Avtron is a manufacturer and supplier of highly engineered AC and DC motor drive systems for heavy industrial applications. We are seen as a global leader in our markets. In order to achieve and sustain growth and keep people employed locally, Avtron will require additional manufacturing capacity on the order of 100,000 square feet. Up to 75 sustained high-tech engineering and skilled manufacturing positions will be created and retained, with shipments in excess of \$50M annually from the building. | Avtron Industrial Automation | 75 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | SR Motor project | Avtron Industrial Automation is a manufacturer and supplier of highly engineered AC and DC motor drive systems for heavy industrial applications. We would like to pursue development of an alternative motor control strategy for the switched reluctance motor and drive market. These motors are particularly suited for many of the industrial sectors that we serve including steel production, heavy mining, and alternative wind energy generation. Of particular importance is the potential energy efficiency gain of 2-5% over existing technology by employing these products in the field. Since up to 50MW are targeted, funds from government will help Avtron realize a design, development, and manufacturing program in Ohio. This program is anticipated to generate and sustain over 50 high-tech engineering and skilled manufacturing positions and will further entrench Ohio in these important markets. Expected results are an increase of \$20,000,000 of product shipments. The recruiting, training and placement of Automotive Salespersons in franchised dealerships in a 21 county region of Northern Ohio. We anticipate a high need to place Automotive Salesperson from outside the industry to local dealerships over the next three years. The goal of the program is to place over 5000 employees in Northern Ohio Dealerships. The average compensation of a Automotive Salesperson is between \$50,000 and \$95,000 and can reach six figures. The program will include a refresher training for the employed individuals at a local dealer dealership. | Avtron Industrial Automation | 50 | 31 to 90 days | \$3,000,000 |
| Cuyahoga | Automotive Salesperson Career Placement Program | This program can be implemented within 30 days of the grant money being awarded. | Greater Cleveland Automobile Dealers' Association | 5000 | 0 to 30 days | \$1,991,000 |
| Cuyahoga | Check UP2GO... | Providing meals and a basic health care check up to the less fortunate of our community... a walk-in location will be available to go where we are needed. A client will receive written information about maintaining his/her health, also (if needed) the location of various health facilities... The Foundation for Inner-City Development is a non-profit organization that provides social and financial services to the urban poor. The Foundation for Inner-City Development is a non-profit organization that provides social and financial services to the urban poor. The Foundation for Inner-City Development is a non-profit organization that provides social and financial services to the urban poor. The Foundation for Inner-City Development is a non-profit organization that provides social and financial services to the urban poor. | McDade Enterprise... | 5 | 31 to 90 days | \$175,000 |
| Cuyahoga | The Ship Initiative | The Foundation is located in the LI Alina Warehouse Plaza (816 Superior Avenue) this building is a work in progress, six years and counting... if funding is received (The Ship Initiative)... will operate from this location. 8.0 Expected Accomplishments In order for the Foundation to attain its vision in the manner described in our mission statement, the following primary goals are and need to continue to be achieved: • (Follow-up) - Talking and getting to know our young people. | The Foundation for inner-city Development | 25 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Energy Efficiency Improvements in Medical Facility | Hospitals have unique energy use patterns; 24/7 operating hours of lighting and HVAC, redundant systems to ensure uninterrupted power supply for life-co-generation for emergency. The project will conduct energy efficiency assessments across a range of medical facilities to determine specific energy requirements. Demonstration sites for customized energy efficient systems and operating procedures will be established. These sites will be accessible to all, and serve as models for what savings can be accomplished in medical settings. Specific guidelines for energy and environmental compliance with federal and state regulation will be issued. Examples include turn-on air power storage devices (that roll off battery based) that kick-in to avoid demand charges during peak-demand, sensor networks that control air flow and HVAC systems, high efficiency LED based lighting and high efficiency medical devices. | Case Western Reserve University | 80 | 0 to 30 days | \$700,000 |
| Cuyahoga | Solon Schools Green Tray Program | Our Lotus Environmental Club implemented a club program to recycle at the school. This involves club members spending many hours each week sorting the trash to prepare for recycling. We are pleased to do this for the school, community and the environment. However, we find great encouragement with the thousands of Styrofoam trays that we must place in the landfill garbage. The Solon Schools are contributing 50,000 Styrofoam trays to our landfills each year. It takes over 10,000 years for the trays to degrade. We found a cost competitive supplier to change from Styrofoam to green trays that degrade in three months. The fee for switching to the new green trays is \$30,000 for the entire school program for four years. The new green trays are not ordered within one week of grant. This will be a seamless change that will require any additional labor or change of handling by the districts cafeteria. The sustainable development of a city requires a sustainable strategy for energy supply. With increasing trend of urbanization, reliance on electricity for quality life and economy will further increase. Understanding the interactions among infrastructure and social systems under urban conditions presents challenges and business opportunities. A strategy for coordinated development of infrastructure systems is needed to enhance their resilience and sustainability. This project will study technical challenges for integrating renewable energy supplies (i.e., wind or solar energy) into the existing electrical network. We view this not only as a technical hurdle, but as a driving force for developing new urban supply chains such as the ones in Cleveland. The project will be technical and policy aspects of renewable energy development. For this purpose, the project will simulate the type and nature of interdependencies among electrical power system components, and between electrical supply system and supply chain infrastructure. | Lorax Environmental Club, Solon High School | 0 | 0 to 30 days | \$30,000 |
| Cuyahoga | Study on the Policy of Renewable Energy for Revita | The project Housing Help for Mental Health will be located at His Grace Residential Housing Facility, owned by the State of Ohio. It has been difficult to offer the individuals of Mental Health housing and create a fully staffed house because these individuals only receive a fixed income that can barely pay for room, board, transportation to doctors and case managers and 24-hour staff. I believe this grant will help the individuals we serve to get their needs fulfilled while getting back on their medication regularly and to become independent at some point. | Case Western Reserve University | 10 | 0 to 30 days | \$500,000 |
| Cuyahoga | Housing Help for Mental Health | Reduce Wire Products energy usage by replacing the current lighting fixtures in all three of our buildings from the low-efficiency VHO (Very High Output) fluorescent fixtures to a high-efficiency lighting. This new system will save energy and improve the quality of the lighting in all three of our buildings. This program will save 7% of the annual electricity used at Wire Products. Reduce our natural gas usage by upgrading our facility with the following projects: 1. Remove our current forced air ceiling mounted furnaces with Air Radiation Type Heaters in all three buildings in our facility. These new type heaters will be 40% more efficient than our current system. They will also have the ability to also filter the air that they are moving, improving air quality. 3. Installation of an Automated Logic Building Automation System (BAS) that will control the Heating and Compressor operation of all three buildings in our facility. This system will optimize energy usage over the current systems of separate thermostats for each heating area, lowering the temperature at night in the entire facility, then raising it just before work hours. The system will also control our compressor usage in a similar manner. Reduce energy usage by upgrading our facility in four phases: 1. Removing the inefficient single-pane windows and selected double-hung windows that are existing. Replace these with energy-efficient windows. The new windows will be Low-E, stacked, clear and Argon filled. 2. Remove the current forced air furnaces with Air Radiation Type Heaters throughout the facility. These new type heaters will be 40% more efficient than our current system and have the ability to filter the air that they are moving, improving air quality. 3. Installation of an Automated Logic Building Automation System (BAS) that will control the Heating and Compressor operation. The BAS will optimize energy usage over the current systems of separate thermostats for each heating area and adjust the system automatically. It will also control our compressor usage. 4. Replace the current lighting fixtures in all three of our buildings from the low-efficiency VHO fixtures to a high-efficiency lighting. This new system will save energy and improve the quality of the lighting in the work spaces. These four phases will save approximately 66% of annual natural gas usage and 7% of the annual electricity usage. Young adults ages 18-29, are provided with part-time work experience with training and evaluation targeting punctuality, personal initiative, appearance, and job performance. Programming will work to foster positive attitudes toward work and supervision and prepare participants for full time unsubsidized employment. Upon successful completion of the program, individuals will be assisted, by job-development staff, to obtain full-time employment. Each individual will receive assistance with resume development, job interview preparation, and be provided with viable job leads. Each participant will receive individual job placement assistance which takes into consideration their employment interests, current skill level, and qualifications to meet job requirements. In addition to assisting individuals with current employment needs, job-development personnel will further assist participants in identifying intermediate and long term employment goals as well as identify any necessary training required to meet those goals. | His Grace Residential Housing | 10 | 31 to 90 days | \$300,000 |
| Cuyahoga | Energy Savings Program -Electricity | Reduce Wire Products energy usage by replacing the current lighting fixtures in all three of our buildings from the low-efficiency VHO (Very High Output) fluorescent fixtures to a high-efficiency lighting. This new system will save energy and improve the quality of the lighting in all three of our buildings. This program will save 7% of the annual electricity used at Wire Products. Reduce our natural gas usage by upgrading our facility with the following projects: 1. | Cuyahoga | Expanding Solar usage in Ohio | Funding for a newly started Ohio business that will seek unemployed people to fill needed positions. The business will gradually promote the usage of solar heat in Ohio. Creating increased demand for new installation of solar panels. Some of the benefits for Ohio in general will be: 1) putting unemployed Ohioans back to work, 2) educating them in solar installations, 3) Reducing Ohio use of fossil fuel, 4) upgrading old heating systems, 5) educating Ohio residents in additional forms of heating. | Absolute Repairs LLC | 6 | 31 to 90 days | \$175,000 |
| Cuyahoga | New Ohio Business / New Ohio Jobs | Funding for a newly started Ohio business that will seek unemployed people to fill needed positions. The business will gradually promote the usage of solar heat in Ohio. Creating increased demand for new installation of solar panels. Some of the benefits for Ohio in general will be: 1) putting unemployed Ohioans back to work, 2) educating them in solar installations, 3) Reducing Ohio use of fossil fuel, 4) upgrading old heating systems, 5) educating Ohio residents in additional forms of heating. | Absolute Repairs LLC | 6 | 0 to 30 days | \$150,000 |
| Cuyahoga | SAP Training Institute for Ohio Youth | Propose to start job training and retraining programs in SAP, an integrated ERP software used by many large and medium businesses, US government and many State and Local jobs. It will enhance the job prospects of Ohio youth and return lost self people looking for a career change. There are many career opportunities in SAP for persons with diverse backgrounds-accounting, manufacturing,sales, HR,production etc. The jobs are better paid compared to other IT jobs. There are no such training centers in Ohio. Universities and Colleges are also not teaching this software. My training program will benefit both Ohio youth and Ohio businesses. Dependency on HR is being used to hire people who are well qualified to run this project. I have a PhD, in Finance and have 10 years of experience as SAP consultant. I also taught SAP at various training institutes and wrote a book on SAP. I propose to offer FREE training for about 500 candidates, who will be engaged for diverse employment, across many sectors. The funds will be used for hardware, software, instructors, training materials, premises, and marketing. The teaching materials and instructors are ready to start the courses. | Dateware Technologies, Inc. | 200 | 0 to 30 days | \$1,200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Bringing Food,Clothing & a Clown to the Homeless | The Ministry needs a new P/Van type truck. We can also consider a used truck in good condition. We outfit the truck with shelving to hold the clothes, shoes, coats, hat & coat/boots, soap & shaver, snacks & believe that we distribute to the homeless in downtown Cleveland & various near outside & remote locations. We try to find the homeless where ever they are camped & bring them comfort, warmth and a smile from the presence of our clowns. We need a new or newer van because ours is old & is breaking down in undesirable locations. | HelpingHands & Clown Ministry/St.Pascal Baylon Pari | 0 | 0 to 30 days | \$47,000 |
| Cuyahoga | Why Renewable Energy | Install an anaerobic treatment system to process food waste generated from our cheese manufacturing operation into biogas which will be used to generate electricity. The electricity will be used to help run the plant with the excess being sold back to the power grid. The anaerobic treatment system will remove solid waste from the sewage discharge which will result in less discharge into the sewage system. This is proven technology that has been installed at other cheese manufacturing facilities with great success. | Miceli Dairy Products Company | 10 | 91 to 180 days | \$2,500,000 |
| Cuyahoga | Center for the Study of Vocational Reentry Program | The Center, located in a local area, will address several areas that have not been successfully implemented in a reentry program. The three year pilot study group will include carefully screened individuals who will participate in a state-of-the-art manufacturing web-based skills training program recognized by the DOE. The program is self-paced and customized by available high skill in-demand jobs in the manufacturing industry for Northeast Ohio. Graduates of the program will proceed for additional hands-on training through partnerships with local continuing vocational education programs. Upon completion of the program, the students will qualify for national credentials and be able to compete for skilled in-demand manufacturing jobs on a more level playing field. Soft skills training and job placement referrals will be made through partnerships with other non-profit agencies in Cuyahoga County who are part of a reentry education, training, and employment collaboration. Graduates will have the opportunity for careers with living wages which have been identified as a major source to help reduce recidivism in Cuyahoga County. | Cuyahoga Community College | 300 | 0 to 30 days | \$200,000 |
| Cuyahoga | Wind Energy Building Upgrade (WEBU) | The Ohio electric transmission system is in need of upgrading for the increasing energy loads, reduce voltage sags, and encourage the use of hybrid/electric vehicles. These commercially available wind turbines will also be able to provide electricity to the power grid. The location of the wind turbines in a HUD zone urban setting, right on the Euclid Corridor RTA HealthLine, will also promote public awareness of the possibilities of having individual wind turbines for other office, industrial buildings, and homes. Showcasing this type of technology on a high-traffic area between downtown Cleveland and University Circle will help to encourage an alternate energy culture. This project creates three types of new economy jobs: new energy efficient buildings, construction workers, and maintenance technicians. Once constructed, the project will not only produce power for the building, grid, and automobiles, it will also become a test bed for training new economy jobs. | Ohio MEMS Association | 25 | 0 to 30 days | \$698,759 |
| Cuyahoga | Green Cleveland | Introducing and energy efficient remodeling of 15 -20 abandoned or condemned homes in the greater Cleveland area for sale to low income Ohioans. The project will include replacing the existing heater and air conditioner servicing the Village Hall. Built in the early 70's. Included with the improvement will be the installation of new energy efficient windows, fire department garage door and other doors throughout the Village Hall and other hall acts as home to the Village Fire and Police departments. | Ohio Green Builders | 15 | 0 to 30 days | \$1,200,000 |
| Cuyahoga | Village Hall Energy Improvements | The improvements are going to save the Village thousands of dollars each month by eliminating the loss of heat and cooling. | Village of Brooklyn Heights | 10 | 31 to 90 days | \$290,000 |
| Cuyahoga | Raise Your Voice | Raise Your Voice is a project designed to strengthen the North Coast Urban Chorus by employing 15 people in the Cuyahoga County area. The project will be used for the performance arts rehearsal, storage, music composition, gallery and community center space. The strengthening of the Northeast Ohio performance arts programs that will be able to expand into schools, senior centers and other community centers. Newly developed immersion heaters provide unprecedented energy efficiencies in melting and holding materials. Efficiencies of 90% and more have been demonstrated in processes and plant operations. Implementation of this technology in existing and/or facilities is proposed. The performance and energy savings will be benchmarked by the Center of Thermal Technology at Case Western Reserve University. | Cleveland Choral Arts Society | 15 | 31 to 90 days | \$150,000 |
| Cuyahoga | Demonstration and Small Scale Implementation of Im | The Leans group home needs a residential facility. In order to meet the needs of the 8 individuals with IDD living at The Leans a new house is needed. Their needs have changed drastically. The home is no longer suitable for them or for most of the new referrals we receive. The cost to make necessary and urgent capital improvements is prohibitive. | Case Western Reserve University | 8 | 0 to 30 days | \$98,000.00 |
| Cuyahoga | Group Home Housing Project | Funds needed include: Down payment for 2 four-person homes Accessibility/modifications Moving costs Legal fees Partings to replace or supplement what we now have | Koinonia Homes, Inc. | 12 | 31 to 90 days | \$25,000.00 |
| Cuyahoga | CDS/PATHS | PATHS is a state-wide orientating program for direct support professionals. CDS (College of Direct Support) is a web-base training program to staff. This project will expand Koinonia's training capacity. We currently have a PATHS license to provide in-house training to our staff. Grant dollars will support staffing and program needs. For CDS we are looking to expand this web-base training program to staff. The goal is to make training and educational activities more accessible to our 450 staff members. Grant dollars will support staffing and infrastructure needs (i.e. this clients, staff laptop rental program). | Koinonia Homes, Inc. | 25 | 0 to 30 days | \$50,000.00 |
| Cuyahoga | IDD Vocational Expansion | The Vocational Expansion Project will provide vocational experience for adults with Intellectual and Developmental Disabilities (IDD) in a Day Center and Vocational Support environment, equipping them for jobs in the private sector through a program-run retail store, craft manufacturing unit, document shredding service, food service, landscaping service, and other opportunities. People with IDD who mainstream into the work force have difficulty finding employment and frequently are relegated to the lowest paying and lowest status jobs. Vocational adults at Koinonia will be matched with in-house-generated businesses (some to be created and some to be expanded beyond their current capacity). They will learn and develop experience for their resumes and then be outplaced to similar positions in the private sector. | Koinonia Homes, Inc. | 20 | 0 to 30 days | \$75,000.00 |
| Cuyahoga | Care Tracking Project | Implementation of CareTracker system in Adult MR/DD group homes. CareTracker is a data collection and reporting system that will improve the quality of care for group homes and supported living residents by eliminating the undesirable effects of paper documentation. Ultimately, for the resident who has a developmental disability, CareTracker implementation will result in a care plan that accurately reflects the care the resident needs. The new system will empower caregivers to document residents' goals throughout the shift using wall-mounted touch screens. Caregivers are guided through their shift in a very easy to learn format. Month-end summaries and other reports can be generated in minutes instead of hours. Koinonia Homes, Inc. partners with individuals who have developmental disabilities, and treatment has unique needs in documenting and tracking customers' health and activity patterns. CareTracker allows facilities to create their own assessment questions and reports. Staff will be retained as the system will provide efficiency allowing for more residents. | Koinonia Homes, Inc. | 3 | 0 to 30 days | \$45,000.00 |
| Cuyahoga | Training Center for Informal Educators | Dozens of local non-profit organizations and government agencies provide a wide range of youth development, academic remediation and academic enrichment programs to high school students. Typically, these programs are staffed by individuals who have not obtained certification in education. Research conducted by the Cleveland office of EDC indicates that 50% of these "informal educators" have not completed even 1 undergraduate course in education. EDC will provide workshop and ongoing technical assistance in best practices and basic principles of sound pedagogy to Greater Cleveland informal educators. EDC will train and support informal educators in topics that include: effective teaching strategies for at-risk youth, classroom management, lesson plan development, addressing different learning styles in students and leveraging community resources for instructional purposes. Instructional resources will be made available on-line. In-person training will be supplemented by on-line forums. As a result, after school and "outside" school instruction will be more relevant and engaging, leading to improved student learning. The Training Center will serve up to 50 individuals. | Education Development Center (EDC) | 4 | 31 to 90 days | \$375,000.00 |
| Cuyahoga | Army Applications of Direct Carbon Fuel Cells | energy burden of Army forward operating bases. This will be accomplished using an integrated power conversion unit consisting of three subsystems: (1) a pyrolyzer to crack diesel or JP8 into its constituent hydrogen and carbon; (2) an on-the-shelf Solid Oxide Fuel Cell (SOFC) powered by the hydrogen; and (3) a Direct Carbon Fuel Cell (DCFC) fueled by the carbon. The resulting product will have a theoretical energy conversion efficiency of approximately 60%; DCFC technology ~80%, SOFC ~50%, with units that used for pyrolysis). The initial application will have a target power range of 1-3MW. For comparison, the best alternative is roughly 20% efficient. The three key technologies required to achieve this task have different levels of technology readiness. (1) Hydrogen fuel cell technology is well known and is just now becoming commercially available. CEL will buy this off the shelf, supplier TRBD. (2) CEL licensed the patented pyrolyzer technology from the University of Central Florida. This technology will require further development by Mark and Mark. | Contained Energy, LLC | 100 | 0 to 30 days | \$5,000,000.00 |
| Cuyahoga | Mark | | Mark and Mark | 5 | 0 to 30 days | \$1.00 |
| Cuyahoga | Senior Housing Green Retrofit | Upgrade all existing HVAC and system upgrades to provide energy efficient delivery and make the building more energy efficient. Units needed for retrofit would include new, multi-stage boilers with updated piping, high efficiency hot water heaters, new 15 ton and 3 ton air conditioning units with eco-friendly refrigerant, and covers for the window air conditioning units. | City of North Royalton | 6 | 91 to 180 days | \$120,000.00 |
| Cuyahoga | Cleveland Residential Rehab | Cleveland Residential Rehabilitation Project Our goal is to purchase homes in the Cleveland area that have fallen under foreclosure in order to rehabilitate them to make them suitable for rental. While rehabilitating the properties our focus will be on performing capital improvements, particularly related to increasing energy efficiency. The requested amount of \$500,000 can be modified depending on what level of funds are available. The number of homes to be acquired and rehabilitated will depend on the funds received, as well as on the financing available from banks and other lending institutions. Ultimately, our goal is to provide affordable rental properties in the Cleveland area for families struggling during the current economic crisis. Expected Outcomes: - Bring Properties out of Foreclosure - Rehabilitate Properties (Energy Efficiency) - Provide Affordable Housing Options for Families. | Hawkins DeWees Real Estate LLP | 3 | 0 to 30 days | \$250,000.00 |
| Cuyahoga | People of The Way Re-Entry Program | People of The Way Ministry is a mission that has a relationship with the correctional institutions in Ohio, Marion and Graham. We also work with the workhouse in Warrensville Hts., Ohio and the Justice Center in downtown Cleveland. Our mission is to be the connecting force that recruits, trains and organizes faith based & community based organizations that have an interest in reintegrating their services and time to prison ministry. We will also work with the State of Ohio male, female and youth Prison Authorities by connecting these trained volunteers in facility Religious Monitoring, Counseling and other care services. It is our goal to continue to work with partners who are being released back into society and assisting them with obtaining their State ID, Birth Certificates, and Residence that they may need such as picking them up from the institution and providing them with a place to reside until they have transitioned back into society. There is a clothing store that has been established, which includes personal items that are needed and providing with services such as resume writing and dress up for the success training. We have in the past and will continue to collaborate | People of The Way Ministry | 10 | 31 to 90 days | \$200,000.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Cleveland Monument Project | The monuments are being destroyed by contractors during the construction phase of projects and they are not restored nor replaced. It is our intent to use a GPS system to establish the location of the monuments and to repair and/or reconstruct the monuments and prepare an inventory system that will preserve the monuments from now and through years to come. There is currently no crew to perform this service for the City of Cleveland and it is our intention to hire a crew to perform this service and work with the City of Cleveland to accomplish this body needed service. This inventory system will benefit the Surveying Department within the City. We will work with the Commissioner and the department to preserve the information and data to make sure that the Contractors adhere to the ordinances that have been established by the City that address this issue. Training and oversight will be done by Bemba K. Jones and Assoc. Inc. Our company will collaborate with other companies to reach the ultimate goal of repairing the monument system. | Bemba K. Jones & Assoc. Inc. | 10 | 31 to 90 days | \$150,000.00 |
| Cuyahoga | RESPECT program | This program will use the arts to create job skills and job opportunities for youth. Youth will serve a paid apprenticeship with master artists for up to six months, and will then gain the community projects, youth and recreation centers, daycare centers, senior centers and churches. These youth will have already been exposed to the arts, and will use their apprenticeship to learn responsibility, how to teach and the finer mechanics of their art of interest. They will work to learn as they go to learn and will learn to work together to meet specific goals. They will learn about the health benefits of their performance arts, obesity prevention, diabetes prevention, and will learn to communicate effectively with their students. | African Soul International | 50 | 0 to 30 days | \$500,000.00 |
| Cuyahoga | RESPECT program | This program will use the arts as a tool for youth to develop positive socialization skills, learn to work with others and build positive self expression. The program will include performing and visual arts from professional artists who have experience in working with troubled youth. The program will build self-confidence through presentation skills, literacy through drama, and help youth to avoid risky behaviors and negative peer groups. The program will also help with tutoring youth and giving them opportunities to do community service, as well as to perform for their peers family and the overall community. | African Soul International | 10 | 0 to 30 days | \$500,000.00 |
| Cuyahoga | High Volume Fuel Cell Component Manufacturing for | In Oct. 2008, Ballard Power (BC, Canada) entered into an agreement with the ACME Group of India to supply 50W fuel cell systems for telecom backup. The agreement provides a commitment for the purchase of ~1K units in 2009 and 9K units in 2010, with options for 20K additional units in 2011-12. With 75 bipolar plates (BPP) per unit, a 375M BPP over the period 2010-12 is required, representing one of the largest fuel cell projects ever undertaken, resulting in ~ \$40M in export revenues and the creation of 52 jobs. GrafTech's Ohio-made GRAFCELL™ BPP materials are used today in Ballard's stacks for residential, automotive and bus applications. The same GRAFCELL™ materials are being used for the ACME backup power application. GrafTech is seeking funding for a project to achieve the required increase in manufacturing capacity to win this opportunity. The project scope includes design, engineering, construction and acquisition of capital equipment to start-up an additional plant at GrafTech's Lakewood, OH plant into the world's largest BPP manufacturing facility. Failure to secure this opportunity will result in a loss of the BPP business and associated jobs to Nishizawa of Japan. | GrafTech International Ltd. | 52 | 31 to 90 days | \$6,100,000.00 |
| Cuyahoga | Fuel Cell Technologies for STEM Education and Work | The FFC platform is a broad learning system aimed at raising educational awareness of the substantive and technical issues underlying both the hydrogen economy and alternative energy solutions. Since its founding in 2006, the organization has proven its ability to deliver systems that are safe, easy to use and fun to learn. FFC will have direct and indirect impacts on the emerging green workforce, both by employing staff and technicians to build and maintain the platform, as well as by impacting students early in their educational journey, and partnering with technical and higher education programs to provide a minimum of technical learning. FFC has already actively partnered with community colleges (e.g., Stark State and Tri-C) to provide higher education through the Hispanic Alliance, Inc. In addition, FFC has already impacted more than 100 non-profit agencies serving Cleveland's Latino, African American, and low-income, low-literacy, low-skilled workers and adults. Three members of the Hispanic Alliance's Latino based agencies (Cleveland Career Center, training, and employment opportunities for over 300 persons during a 12 month period. Cleveland Hispanic Alliance's consortium will provide educational and vocational programs that promote summer youth work experience, and the program who disperse rates by engaging youth in corporate, career, and vocational training through attachment programs. Field, mentoring, and career counseling will include job coaching, placement, and employer/employee retention. Fiscal oversight and grant reporting responsibilities will be managed by the Hispanic Alliance. The Hispanic Alliance will foster city-wide energy-partnerships that ensure a sustainable social service network of support sound to stabilize and strengthen Cleveland's economic base. | FirstFuelCells.com | 15 | 31 to 90 days | \$250,000.00 |
| Cuyahoga | Hispanic Alliance Workforce Consortium | The senior center is located within Deaconess Perry Senior Apartments. This facility is independent living center. The center serves not only the 80 low and moderate income seniors housed at Deaconess Perry 6,300 seniors living in North Royalton. When meals are provided they can serve 120 people. In 2008 the center provided direct assistance to 8,000 individuals with issues ranging from low level of food bank to homelessness. The number of people served is expected to dramatically increase as our population ages. The center would like to provide meals that effectively by renovating and adding kitchen facilities. To handle the additional clients the parking lot needs expansion. The funds would add parking and kitchen facilities. | Hispanic Alliance, Inc. | 360 | 0 to 30 days | \$1,980,000.00 |
| Cuyahoga | Senior | Market research indicates that there is a high unmet demand for low skilled workers in the City of Cleveland's medical organizations as well as a large population of city residents working outside of the city in low skilled positions. CRCC provides a mix of equity oriented and marketable placement services. It will become the placement agency of choice for the City of Cleveland's medical community. Consumers of our services will be all medical facilities within the City of Cleveland and the residents and high school students of the city of Cleveland. Existing organizations in the field are comprised of public and private entities. These are dedicated to job training for low skilled workers and for-profit medical employment placement services. There are currently no organizations committed to providing a mix of equity oriented and marketable placement services to City of Cleveland residents and the medical community. The ultimate goal of the organization is to place at least 100 residents per year in medical field related jobs. | City of North Royalton | 8 | 91 to 180 days | \$150,000.00 |
| Cuyahoga | CRCC | Green (Weatherization for low income level home owners which includes green material to reduce energy cost. Employment of at least 25 needed for delivery of service. Apprentice youth, tradesmen, and women. For roof, windows, security doors insulation, doors hurricane, giving Minority Educating for Seniors, Women that are Single Head of Household, First Time Homebuyers, professionals on how to keep your home as an energy savant. Education on passive solar panel, hot water tanks, Government Title, Woodwork that are needed, 26 Energy efficient. | Cleveland Renaissance Career Center | 350 | 0 to 30 days | \$200,000.00 |
| Cuyahoga | Green Weatherization and Counseling Education | Funding would allow The award winning Intergenerational School (TIS) to implement its strategic plan, leverage existing partnerships while creating new ones, and develop a full-scale learning community model to connect people of all ages for lifelong learning. TIS was recognized by the US Dept of Ed as one of the country's most innovative charter schools that is closing the achievement gap, and recently was named "most innovative public school innovator" by Education Week's "Innovative Schools" award. TIS plans to expand to successful educational model which currently serves K-8 urban children and older "lifelong learners", to include state of the art preschool and adult educational opportunities, as well as increased intergenerational offerings for the aging community. The organization will build capacity by investing in infrastructure and technology for educational assessment and programmatic development for teachers, educators and school administrators), community outreach, and operations. | Christian Counseling Association, Inc. | 50 | 31 to 90 days | \$250,000.00 |
| Cuyahoga | TIS Plan Implementation | 20% of the cost to purchasing three new school buses with new diesel emission technology to replace 1995 buses. New diesel technology is raising multiple bus purchases. Older buses need to get out of the road to meet emissions. CharterTest is a successful contract research organization doing business in Ohio since September 1998. CharterTest provides specialty services to the pharmaceutical industry using assays based on over 50% of known drug targets. We have recently launched a products line that will provide new targets to industry. The products are replicating and division oriented cell lines and assays an annual market of ~\$20M. At present, our products include 16 replicating cell lines and assays, 48 replicating GPCR cell lines and 30 division oriented cell lines. Ninety-eight replicating cell lines will also be transformed into division-oriented cell lines. We estimate ~20,000 shipments/year or ~400kg. To staff products units, we will need ~20 people working as tissue culture technicians (10); shipment (8); bookkeepers (2); and supervisors (2) to staff the products operation. This staff will consist of adult and dislocated workers who will be trained and supervised by our present expert tissue culture group that maintains the services side of the business. We expect CharterTest to be the most successful ion channel, GPCR and transporter products companies in the world. | North Olmsted City Schools | 5 | 181 days or more | \$60,000.00 |
| Cuyahoga | Retaining adult and dislocated workers for a biote | CharterTest and Analiza, Cleveland-based contract research organizations, propose to develop the world's largest automated tissue culture facility for the manufacture of cell lines expressing on channels, G-protein coupled receptors and transporters. These membrane proteins represent 60% of known drug targets. CharterTest uses specialized tissue culture methods to assemble T10 cell lines including the world's largest library of cell libraries for its safety and discovery screening services and for use as reagents by the entire pharmaceutical industry. Analiza specializes in development of cell lines throughout automated systems for drug discovery. The two companies will accelerate development of a world-leading center for tissue culture automation. The center will bring together engineers and biologists in a unique scientific environment that cannot be outsourced to foreign, cheap labor markets. The facility will train ~100 adult and dislocated workers to prepare tissue culture media, maintain equipment and supplies and management inventory. The center will also function as a core facility for numerous standard tissue culture operations in industry and academic in Ohio. | ChanTest Corporation | 20 | 0 to 30 days | \$5,000,000.00 |
| Cuyahoga | Retraining adult and dislocated workers for an aut | Reinstate the police department's current information technology administrator that is scheduled to be laid off in May, 2009. Our agency also is going to replace an aged computerized fingerprinting system that is beginning to fail. When operational, the system allows our agency to submit consent biometrics directly to Ohio Bureau of Criminal Identification & Investigation. | ChanTest Corporation | 100 | 0 to 30 days | \$10,000,000.00 |
| Cuyahoga | Law Enforcement Technology Update 2009 | Expended Outcomes: (1) Maintenance of current method of submitting fingerprint & arrested person information to Ohio Bureau of Criminal Identification without reverting to hand fingerprint cards sent via U.S. Postal Service. (2) Retaining (or rehiring) of police computer network administrator and IT manager who maintains and upgrades the police computer system. | Brooklyn Police Department | 1 | 31 to 90 days | \$33,750.00 |
| Cuyahoga | Technology for Future Global Citizens | Students of today must be prepared for their place in our global society by being technologically literate. Our inner city school has made efforts to provide quality technology education as part of the core curriculum. To ensure adequate education and preparation of these future citizens we need to continually update equipment and services. As part of our ideal technology plan we would like to provide interactive smart boards for all classrooms, provide wireless internet access in all our buildings and enable our two campuses to share data through a local area network. We have currently applied to the federal government for help through E-rate 2 to wire the campuses and we are currently in the process of applying as well as funds to purchase the smart boards and additional computers. | Metro Catholic School | 45 | 0 to 30 days | \$450,000.00 |
| Cuyahoga | Environmental Education | Our school has initiated an innovative program to educate our students regarding environmental concerns right here on site. A "green committee" of intermediate grade students has been involved in the planning and renovation of our one century old classrooms from an eco-friendly approach. Non-toxic materials, ergonomically constructed desks, energy saving lights and shades as well as an air purifier have been installed in this model classroom. These same students have been involved in the discussion of whether poles should be used in the landscaping program through the grades they will become more and more the leaders in this endeavor to renovate, to provide healthier environments and to do so while protecting and conserving resources. A complete renovation of our three 100 year old buildings would be a magnificent statement of commitment to our young people who are the future of our great society. This commitment would be to both health and education perspectives. | Metro Catholic School | 50 | 0 to 30 days | \$2,800,000.00 |
| Cuyahoga | Detroit Shoreway Distributive Solar Energy Program | This project seeks to create a three party distributed solar energy system for the Clinton Square Arcade building in the Detroit Shoreway neighborhood of Cleveland Ohio. The Detroit Shoreway neighborhood is a high density, ethnically diverse, economically disadvantaged neighborhood in transition. The solar system will be net metered through the First Energy Utility Company. An LLC created by the non-profit, Detroit Shoreway Community Development Organization will own and manage the distributive system. The distributed solar system will be installed atop the 47,000 square foot roof of the renovated, historic 1921 mixed-use building. Energy produced through the solar system will serve 16 low-income federally subsidized apartment units and 27,000 square feet of commercial space. In addition, the system will provide clean energy for four non-profit office spaces, including the DSCDO offices. The 96 KW system will reduce carbon emissions by approximately 177,867 pounds a year. This project will demonstrate cutting edge practices in solar power generation and distribution while creating or retaining approximately 20 skilled jobs. | Detroit Shoreway Community Development Organization | 20 | 31 to 90 days | \$417,000.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Cuyahoga | Detroit Shoreway Distributive Solar Energy Program | This project seeks to create a third-party distributed solar energy system for the Gordon Square Arcade building in the Detroit Shoreway Neighborhood of Cleveland Ohio. The Detroit Shoreway neighborhood is a high density, ethnically diverse, economically disadvantaged neighborhood in transition. The solar system will be installed through the First Energy Utility Company. An LLC created by the non-profit, Detroit Shoreway Community Development Organization will own and manage the distributive system. The distributed solar system will be installed atop the 47,000 square foot roof of the renovated, historic1921 mixed-use building. Energy produced through the solar system will serve 84 low-income federally subsidized apartment units and 27,000 square feet of commercial lease space. In addition, the system will provide clean energy for four non-profit office spaces, including the CROCO office. The solar system will reduce carbon emissions by approximately 177,867 pounds a year. This project will demonstrate cutting edge practices in solar power generation and distribution while creating or retaining approximately 20 skilled jobs. Competent non-lead staff. These positions are traditionally low paying, physical, stressful and have high turnover. Adding to this dilemma is extensive state-mandated training before job placement, which can take up to two weeks, in a classroom, while individuals are waiting for full-time pay. Low skilled hires need immediate financial resources. | Detroit Shoreway Community Development Organization | 20 | 31 to 90 days | \$417,000.00 |
| Cuyahoga | A new way to learn: self-paced and classroom comb | This project focuses on expedient and efficient training that can place recently hired staff on the job within days, not weeks. It combines classroom and on-line training modules, allowing remote, self-directed learning. We will develop a model curriculum that includes classroom and direct training, which can be replicated. After staff is trained, further learning can lead to advancement and college credits via PATHS. Securing remote locations throughout the area that will provide computer access to new staff, which alleviates transportation issues and time constraints, will also allow for training staff of other organizations that are struggling with this challenge. | Welcome House | 20 | 0 to 30 days | \$500,000.00 |
| Cuyahoga | Parma SWAT Incident Response Improvement Project | Parma Police SWAT has a limited number of response vehicles for incidents. This request is for the purchase of a GM cargo van which will have a modified interior to allow for transportation and quick exit for SWAT members. The existing SWAT vehicle will stay in service and will be used as a separate gear transportation vehicle. Two vehicles will allow for better organization of people and gear, which equates to faster response and deployment times during incidents. Parma SWAT is a member of the regional Southwest Enforcement Bureau, which is a regional response team. | City of Parma | 0 | 0 to 30 days | \$17,002.00 |
| Cuyahoga | Parma Police Department Continuous Domestic Violence | Parma Police has not had any domestic violence training since 1996. 60% of officers have over 13 yrs, so 100% was last training. Newer officers have never received training for domestic violence over and above Ohio Peace Officer's Training Academy. This course includes training for all 64 officers, plus a final "train the trainer" session so that training can become continuous. Training provided by Ohio Domestic Violence Network and PPD will adopt its Ohio Model protocol. | City of Parma | 0 | 31 to 90 days | \$25,650.00 |
| Cuyahoga | Train Trestle Demolition & Removal | Nine concrete train trestles located in a heavily used park and built in the 1980's have deteriorated to such an extent that they present a public safety hazard. Numerous cracks and spalls can be found on all of the beams and columns. Two of the structures are located on a creek bank and have experienced severe erosion undercutting the base and potentially endangering a large local sanitary main, should they topple. Engineering has been completed and the project has gone out to bid. | City of Bay Village | 25 | 31 to 90 days | \$180,000.00 |
| Cuyahoga | Mental health Project | Purity Health, Inc. is an organization that will be committed to caring for adult Mental Health patients, that need transitional housing care. Purity Health, Inc. will accept Veterans who are suffering from post traumatic stress disorders which are a result from serving their country in the past years and this disease is affecting many of our Veterans who are discharged and need counseling and assistance. The Veterans who have developed this illness from recent wars are in need of a facility such as Purity Health, Inc. Purity Health, Inc. will be looking for long term need of any other referral from Medicare/Medicaid. The focus is on providing quality care including but not limited to lodging, recreational needs, improving their social skills and providing community involvement as needed in appropriate settings. Purity Health Inc. will collaborate with other agencies that serve the same or like populations and share in partnership with various entities and social needs for persons suffering from this disease. Purity Health, Inc. will collaborate with the Harvard Community Services Center which is a social service center in the community which provides services such as | Purity Health, Inc. | 10 | 31 to 90 days | \$1,500,000.00 |
| Cuyahoga | INDEPENDENCE FLEET | This project would restore and retain 1 job and would reduce PM 2.5 and NOx emissions in the non-attainment areas of Cuyahoga by re-powering Tier 0 and Tier 1 Caterpillar construction equipment with certified Tier 3 engines. In total, this project would remove 3.8 tons of PM 2.5 and 67.5 tons of NOx in a five year period. Over the next five years, the average cost per ton of PM 2.5 removed from our air will be \$129,994 and the average cost per ton of NOx removed from our air will be \$7,400. This work will begin within one week of funding. | OHIO CAT | 1 | 0 to 30 days | \$375,000.00 |
| Cuyahoga | Project ACT - increase support for our students | These funds would be used to expand needed services to our families and students in poverty. 20 positions would be created to have a Life Skills Coach position at each of our 20 sites - both in-school and in a shelter location. This coach would be available to work side by side with our families to make sure that they received all of the needed services for their family. They would also provide individual and small group tutoring instruction for our students so that they would be successful in school even during this difficult time in their young lives. Along with the Life Skills Coaches, the funds would provide 2 position for Psychologists to work with the Life Skills coaches and the school faculties on developing effective interventions for the students. Finally, these funds would be used to expand the Cleveland Community Voice Mail program for our homeless families while in transition or crisis. This service provides reliable telephone access so that people receive critical information from schools, employers, landlords, health professionals, friends and family. This project would be able to help the district to continue to develop a savings process for all legal documents in the school district. Examples of the kind of documents but not limited to are: EPE's, ETR's, Teachers, Principals, Support Staff evaluations, HQT forms, and supporting documentation required for state and federal grants. | Cleveland Metropolitan School District | 22 | 0 to 30 days | \$1,750,000.00 |
| Cuyahoga | Development & Scanning of legal documents for dist | Many industrial and commercial operations do not have the power analyzers in place to benchmark the gas consumption and energy efficiency of their process heating equipment. The goal of the proposed project is to test gas meters for a limited time to allow measurement of gas consumption. The program will be coordinated by the Case Center for Thermal Technology with participation of utilities and companies specializing in gas meters. It would like to develop the integration of solar powered panels into the sunroom structural roof panels used in our sunrooms. This technology would be able to be used across the entire sunroom industry. The funding would fund the system development, engineering certifications, and final results on commercial or commercial sunrooms. Supply & install energy efficient windows that qualify for the federal tax credit for State sponsored programs. Our windows are manufactured at our Joyce window factory in Boardman, OH. | Cleveland Metropolitan School District | 20 | 0 to 30 days | \$2,875,000.00 |

| Cuyahoga | Early Childhood Learning Center | The Cleveland Music School Settlement is a nationally recognized provider of the highest quality early childhood programs in Northeast Ohio. A recent recipient of the Shaver Higher Ranking, The Music Settlement is in the midst of capital campaigns that will enable us to expand our early childhood program to provide up to 5 times more children (currently 250) access to these highly sought-after programs. Funding would be used to create a newly-leased building located in the heart of Cleveland Heights that would not only serve as an early childhood center but, ultimately, will provide the neighborhood with a community arts center that encompasses many arts forms and organizations. In cooperative collaboration with the CH-CH school district, The Music Settlement will also serve as a primary music provider for the district's 6,000 children. This unique site will not only bring stellar programming to the community, but will also serve as a much needed catalyst for a city that has been harshly affected by the economy, resulting in homeowner retention, new homeownership, patronage of the city's schools, and increased city revenue. | The Cleveland Music School Settlement | 100 | 91 to 180 days | 2,000,000 |
| Cuyahoga | Helping Families Pre-K-5 with Child Development | Many of Cleveland's children face daunting challenges as they enter K-6 schools, lacking the necessary skills for reading and expressing their ideas. Summer Solution Literacy with Visual Learning Field Trips The Head Start Helping Families (HIF) program provides exceptional care and learning opportunities for children age K-11 years old. The objective is to help daycare centers maintain appropriate staff:child ratio as state required by licensing at all times. School age K-11 years 1:10, maximum 26 and school age 11-14 years old 1:25, maximum 40. Our mission is to empower the families in our community by providing programming designed to educate, enrich and support children, youth and elderly groups. We stress the importance of learning through out the lifespan and the benefits of intergenerational activity. Inspiring our children personal achievement, citizenship, and academic success, which should help contribute to bringing a society in which every individual has an opportunity to reach their highest potential and gain respect and support during their journey. Helping Families goals are: | Hopfinders Inc. Helping Families | 100 | 91 to 180 days | 3,500,000 |
| Cuyahoga | Sustainable Chilled Water project in University Circle | New Chilled Water Facility: In order to sustainably meet the growing needs of Case Western Reserve University, University Hospitals Case Medical Center, Severance Hall, The Cleveland Museum of Art, The Cleveland Botanical Gardens, The Cleveland list of Art, Church of the Covenant, Cleveland Hearing and Speech, and the Allen Memorial Library, MCCO needs to install a new chilled water facility in order to provide the campus with energy efficient air conditioning for each building through a centralized facility. The project is estimated at \$20M. The design is underway and we could order large equipment within 30 days. The overall project would take about 18 months to complete and it is estimated that it would employ 150 construction employees for this project. | The Medical Center Company | 650 | 31 to 90 days | 22,000,000 |
| Cuyahoga | Sustainable Energy projects in University Circle A | Once the project is complete, it will support the creation of over 500 permanent jobs. UH & Case Western's growing need for electricity, we need to expand the substation. The Project is estimated at \$8M. The project would take one year to complete and is estimated that 30 construction and engineering jobs would be needed to complete the project. We could bid and order equipment within 60 days in given the money. 2 New natural gas boiler: MCCO needs to install a new steam boiler that would provide centralized heat and humidification to the campus in order to support UH Vision 2010. The project is estimated at cost \$8M to install the boiler. It is estimated that 200 construction jobs would be needed to complete and would employ roughly 100 construction jobs. 3 Replacement of deteriorating tunnels: MCCO uses a network of tunnels within our system to get utilities across the campus. They have been in use for roughly 80 years and they need to be repaired / replaced. Project cost \$20M. Project would employ 50 people. | The Medical Center Company | 880 | 31 to 90 days | 34,000,000 |
| Cuyahoga | Thrive Neighborhood Resurgence Collaboration | Prevent the increase of homelessness through collaboration with local agencies to assist area residents facing foreclosure by providing information and Mortgage Default Resolutions and Mortgage Delinquency. We will offer Financial Literacy, Renters Assistance, Pre-Foreclosure Counseling, and First purchase counseling. Meet the emergency needs of residents that have lost their home through foreclosure by providing temporary emergency shelter. | Thrive Economic Development Corporation | 50 | 0 to 30 days | 750,000 |
| Cuyahoga | Respite & Mentoring Services to At-Risk Youth | BCCHFS is a leader in providing high quality mentoring and respite services to at-risk youth with drug and alcohol issues. BCCHFS has committed a respite facility and an mentoring facility to the Ohio Department of Youth Services facility. Our respite services are well known to be very effective in helping youth make a successful re-entry into the community with very low recidivism rates. This program is currently funded through the Cuyahoga County Drug and Alcohol Board. Current funding provides only 30% of the needed \$250,000. BCCHFS needs to meet the need of the community. Budget cuts have forced this reduction in funding. This is a highly valued of 1st Church, Lakeland Community College and Olive Church. We would like to have a demonstration project for the Cleveland School District by implementing an after school program based on the Board has written letters of support for this service and the need for supplemental funding. This grant request for \$250,000 will help cover 2 years of program expenses. | Berea Children's Home & Family Services | 12 | 31 to 90 days | 350,000 |
| Cuyahoga | Cleveland MidTown Campus Project | Berea Children's Home and Family Services is centralizing its Cleveland facilities into a central location on 38th and Carnegie. This 40,000 square foot campus will be home to more than 200 staff and house our literacy, work readiness and employment programs. More than 500 at-risk youth adults from the City of Cleveland receive work readiness and employment services annually from Berea Children's Home and Family Services. More than 25 other non-profits use meeting spaces at our current downtown facilities. The new campus will have the capacity to increase the training space that will enhance our literacy, work readiness and employment services as well as increase our training capacity. With the increased training space and staff more than \$500,000 is needed for equipment and furniture. To date more than \$200,000 has been raised, including a \$100,000 grant from St. Luke's Foundation. Our grant request is for classroom furniture, computer equipment and audio-visual equipment. | Berea Children's Home & Family Services | 425 | 31 to 90 days | 200,000 |
| Cuyahoga | Cradle of Caring Childcare Voucher Assistance | Berea Children's Home and Family Services annually provides child care and summer camp services to more than 1,300 children through our six child care centers. There are located in low-income neighborhoods, 50% of all served have incomes at or below the federal poverty. Based on a recent presentation by the Center for Poverty Research, the single most effective intervention in helping children and families escape poverty is the availability of high quality child care. To ensure continued services to low-income families especially in East Cleveland and Maple Heights, Ohio the Cradle of Caring Childcare Voucher Assistance program will help the children of these families enjoy in our high quality year round childcare centers. Approximate annual cost to provide needed funding is \$90,000. | Berea Children's Home & Family Services | 20 | 31 to 90 days | 90,000 |
| Cuyahoga | Freedom Schools | BCCHFS has successfully offered the past three years Freedom School Summer Literacy and Cultural Enrichment Programs developed by the Children's Defense Fund. In 2009, BCCHFS would like offer the Freedom School curriculum at 1st United Methodist Church of Cleveland, Lakeland Community College and Olive International Baptist Church with 150 inner-city youth benefiting from the program. Each site serves 50 children with a structured curriculum that improves reading, literacy, self-esteem and raises expectations and hopes for the children with regard to completing high school, attending college, employment, family and self-determination. The cost of funding each site is approximately \$55,000 to \$60,000 and BCCHFS would like to expand to a fourth site for the summer of 2010. A possible expansion site would be the Broadway neighborhood at the Broadway United Methodist Church. This would be addition to the three current sites of 1st Church, Lakeland Community College and Olive Church. We would like to have a demonstration project for the Cleveland School District by implementing an after school program based on the Freedom School model. Funding request is for two years. | Berea Children's Home & Family Services | 35 | 31 to 90 days | 440,000 |
| Cuyahoga | Mayfield Web 2.0 Integration Project | Using a team of five technology trainers at Mayfield Schools classroom teachers will convert information management and communication processes to a web-based content management system. The system would enable parent involvement, enhance student engagement, and eliminate barriers that prevent students from becoming intrinsically motivated learners. Curriculum information and materials, audio and video files, assessments, web links, internal links to other district resources, achievement data, and assessments would comprise the content of the CMS. Students parent and teachers will become partners in a learning community connected by interactive collaborative assignments, blogs and email. The majority of the funding would apply to the salaries of the trainers who would work or designate the teachers on their use. Some of the funding would be allocated to the purchase of hardware and software that would be needed to implement the project, including video recorders, photo, video camera, microphones, and editing software. This project would enable the District to take a bold step forward by aligning learning methods to students' life experience. | Mayfield City School District | 4 | 31 to 90 days | 480,000 |
| Cuyahoga | Police Station Safe Room | This application is for an important aspect of the new police station being planned by the Village. Funds will allow for building a "Safe Room" that can be easily secured by a member of the public in need of a safe refuge. The room can be accessed by police officers from the secure interior of the building and has a direct visual and communication link to the dispatch center. The Police Chief has recommended the Safe Room as a tool to control violence against women. Manufacture infrared radiant heating systems in Ohio. | Chagrin Falls Village | 12 | 91 to 180 days | 100,000 |
| Cuyahoga | Radiant Infrared Heating | Infrared radiation is electromagnetic radiation which is generated in a hot source (quartz lamp, quartz tube, or metal rod) by vibration and rotation of molecules. This resulting energy is not absorbed by air, and does not create heat until it is absorbed by an opaque object. Radiant infrared heats both people and objects first, then the air, just like the sunshine. It does not dry out the air and does not stir up dust. It is quiet and odorless, and requires no maintenance. Our systems are presently being used in the Cleveland Clinic, HUD owned/operated Senior Housing, Churches, Homes, schools and various buildings and businesses. We install our technology one room at a time, utilizing individual controlled thermostats in each room. Our technology will reduce the cost of all electric utility bills by thirty three percent (33%), resulting in thousands of dollars in savings! | Radiant Infrared Heating Technologies | 250 | 31 to 90 days | 15,000,000 |
| Cuyahoga | African Soul International Arts Center | African Soul International is acquiring a foreclosed property in the Glenville area and working to develop it into a cultural arts center for youth. This cultural arts center will be given (environmentally friendly) and will be a safe haven for our youth and families in the poverty stricken area. We want to show the children of this community that they and their community both have value and that anything can be brought back to life if you have a love and care. We currently serve the children who are catered from the American Coat system, or are homeless and just want to learn the arts. We give these youth the opportunity to study under master artists, and we select up to 15 to perform with our professional company throughout the U.S. (i.e. New York, Washington, DC, etc.) We work with children through the arts and our system, the public schools, and self-referrals. This center will serve up to 5,000 youth in the first year, through school bus, performances, and workshops on site. | African Soul International | 25 | 31 to 90 days | 250,000 |
| Cuyahoga | Group Home Housing Project | The Leans, an MR/DD group one, needs a new residential facility. In order to meet the needs of the 8 individuals with IDD living at The Leans, a new house with appropriate modifications is needed. The residents' needs have changed drastically over the years and the current home is no longer suitable for them or for most of the new releases we receive. The cost to make necessary and urgent capital improvements is prohibitive. Funds needed include: Down payment for 2, four-person homes Accessibility modifications Moving costs Legal fees Furniture to replace or supplement current | Koinonia Homes, Inc. | 12 | 31 to 90 days | 25,000 |
| Cuyahoga | Care Tracking Project | Implementation of the CareTracker system in Adult MR/DD group homes. CareTracker is a data collection and reporting system that will improve the quality of care for group homes and supporting living residents by eliminating the undesirable effects of paper documentation. For the resident who has a developmental disability, CareTracker implementation will result in a care plan that much more accurately reflects the care needed. The new system will empower caregivers to document residents' goals throughout the shift using wall-mounted touch screens. Caregivers will be guided through their shift in a very easy to learn format. Month-end summaries and other reports can be generated in minutes instead of hours. Koinonia Homes, Inc. partners with people who have developmental disabilities, and treatment has unique needs in documenting and tracking customers' health and activity patterns. PATHS is a state-wide credentialing program for direct support professional. CDS (College of Direct Support) is a web-based training program for staff. This project will expand Koinonia's training capacity and retain jobs. | Koinonia Homes, Inc. | 3 | 0 to 30 days | 45,000 |
| Cuyahoga | CDS/PATHS training hub | We currently have a PATHS license to provide in-house training to our direct service staff. Grant dollars will support staffing and expanding program needs. For CDS we are looking to expand this web-based training program to staff. The goal is to make training and education opportunities accessible to our 400 staff members. Grant dollars will support staffing and infrastructure needs (i.e. thin clients, staff laptop networking program). | Koinonia Homes, Inc. | 25 | 0 to 30 days | 50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Cuyahoga | IDD Vocational Expansion | The Vocational Expansion Project will provide vocational experience for adults with Intellectual and Developmental Disabilities (IDD) in a Day Center and Vocational Support environment, equipping them for jobs in the private sector through a program-run retail store, craft manufacturing job, document shredding services, food service, landscaping services, and other opportunities. People with IDD who mainstream into the work force have difficulty finding employment and frequently are relegated to the lowest paying and lowest status jobs. Vocational adults at Kolonia will be matched with in-house-generated businesses (some to be created and some to be expanded beyond their current capacity). They will learn and develop experience for their resumes and then be outplaced to similar positions in the private sector. | Kolonia Homes, Inc. | 20 | 0 to 30 days | 75,000.00 |
| Darke | Raw Water Main Installation | 10,560 linear feet of raw water main. Existing water main in east town and has significant iron build-up within the line causing damage to our water lines and water customers. New water main main provides better drinking water to our customers. | Village of Arcanum | 15 | 31 to 90 days | \$575,000 |
| Darke | Water Filter Installation | Replace 4 existing water filters. Water filters are too small and do not filter our raw water as necessary. New water filters will allow for automation of the water treatment process that existing equipment cannot provide for the Village. | Village of Arcanum | 10 | 0 to 30 days | \$400,000 |
| Darke | Phase 3 Sewer Separation | Final findings and orders from the EPA, the Village is required to separate storm water from sanitary sewer. This is the last of a 3 phase project. Project has been engineered and plans approved by EPA. The current job has been bid and awarded. Additional funding would save the Village interest expense over the next 30 years. | Village of Arcanum | 100 | 0 to 30 days | \$2,100,000 |
| Darke | Sewer District | Several property owners and businesses spanning a 3 mile perimeter around our Village have been found to not have complete or adequate septage systems. Thus the Village has been approached by the Darke County Health Dept. and the Ohio EPA to create and construct a Sewer district which would service approximately 400 properties. The sewer district would allow our Village to treat the sewage of a neighboring municipality as well as other rural property owners. Currently the sewage of the rural property owners and municipality are pooling a near by stream which test into the Great Miami River at the Ohio River. The neighboring municipality is under fridage and orders from the OEPA. The sewer district would allow for proper treatment of sewage. Thus eliminating the pollution of the GM/River and Ohio River. | Village of Arcanum | 60 | 181 days or more | \$4,000,000 |
| Darke | WWTP | Construct an additional storage pond (lagoon) for our WWTP. The current system was constructed in the 60s and is to small for the current population of our Village. The Village has the opportunity to contract with the county and another local municipality in the creation of a sewer district which would create more flow. This new retention pond would allow an existing plant to increase it's service capacity by 100%, plus allowing for more efficient operation for most customers. | Village of Arcanum | 15 | 31 to 90 days | \$500,000 |
| Darke | Industrial Park | The Village of Arcanum has the opportunity to purchase land adjacent to the Village which would be used for economic development. The Village situated only 20 minutes from a major airport and interstate as well as 7 miles from the coast seat (Greenfield). An industrial park created during this economic downturn would allow for property when the economy begins to grow again. The Village looks now is the time to develop and the land. This industrial park would allow for the creation 500 jobs and over 20 new businesses to support the Village. Assistance could be used for the purchase of land as well as installing infrastructure making the site appealing for business to invest in our Village. Construction of 80,000 sq. ft. public safety and courts building in Greenfield. Goal is to consolidate Sheriff's services and courts into one building. Site plans have been approved, local government approvals obtained, preliminary plans are completed, construction plans are in process. Construction is on hold due to decreased tax revenues and uncertainty of revenue. | Village of Arcanum | 200 | 181 days or more | \$3,000,000 |
| Darke | Public Safety and Court Consolidation Building | Estimate 125+ direct construction jobs, many from larger skilled labor contractors from Darke and Local laborers for sub-contracts. Employment exists for approx 12 months to complete project. Indirect employment from suppliers of materials. Project will update civil process and sex offender registration sections for local courts. All court facilities will be consolidated to one building to increase safety for participants and employees. Construction will implement "green" technology for operational efficiencies, such as building materials, florescent / natural lighting, geothermal heating / cooling. New improvements will also increase energy efficiencies for existing (adjacent) courthouse through retrofitting and sharing of heat. | Darke County Common Pleas Courts | 125 | 0 to 30 days | \$6,500,000 |
| Darke | Dist 7, PID 85903, DAR Maintenance software update | Maintenance software update for the City of Greenfield. | Ohio Department of Transportation | 1 | 31 to 90 days | \$2,000 |
| Darke | Dist 7, PID 85905, DAR Utilities tractor | Utilities tractor for the City of Greenfield. | Ohio Department of Transportation | 1 | 31 to 90 days | \$18,000 |
| Darke | Dist 7, PID 85906, DAR Vise, ladder, & drill press | Vise, rolling ladder, and drill press for the City of Greenfield. | Ohio Department of Transportation | 1 | 31 to 90 days | \$2,000 |
| Darke | Community Social Enterprise Center | This project will purchase an abandoned 47,000 sq ft building in downtown Greenfield. Completely renovate into a early childhood center, from general to kindergarten classroom and high school students on a track to dropout. be a volunteer center for training a placement of 500+ people. The total low-income served is 1,200 annually with preserving 29 jobs and creating 54 in the first year. This project will enable at least 100 parents to continue working their children are in a high quality, education-based setting. 70 struggling youth will work in a social enterprise model where they will run a business from the marketing to the sales/learning job readiness skills. Training, rotation, customer service, commitment. This center will train over 500 volunteers to support other non-profits (strategic plans, marketing, data management) to save resources. This facility will net out 10,000 sq ft in to other enterprises who will make their services such as health, nutrition and wellness available, affordability, to working families. This creates sustainable income. Renovation is \$3M of new floors, walls, lighting, playground, asphalt, technology. It is ready to go. This wireless Broadband Internet offering would target potential customers who are in unserved or underserved rural areas who do not presently have access to broadband Internet services. The funds would be used to purchase and install a base station in the Greenfield Ohio (Darke Co.) area on either an existing or a new tower depending on the best coverage area. The funds would also be used to purchase customer premise equipment to provide the link between the base radio tower and the customer's home. The service is provided in the 700 MHz wireless licensed band. NKTelco already holds the 700 MHz radio license for Darke and surrounding counties. Approximately 50 to 60 customers could be initially provided service with the initial \$85,000 stimulus funding. A total buildout, serving over 300 customers, would be possible utilizing the \$25,000 in total project cost estimate. | Council on Rural Service Programs | 83 | 31 to 90 days | \$1,800,000 |
| Darke | Wireless Broadband Service | This wireless Broadband Internet offering would target potential customers who are in unserved or underserved rural areas who do not presently have access to broadband Internet services. The funds would be used to purchase and install a base station in the Greenfield Ohio (Darke Co.) area on either an existing or a new tower depending on the best coverage area. The funds would also be used to purchase customer premise equipment to provide the link between the base radio tower and the customer's home. The service is provided in the 700 MHz wireless licensed band. NKTelco already holds the 700 MHz radio license for Darke and surrounding counties. Approximately 50 to 60 customers could be initially provided service with the initial \$85,000 stimulus funding. A total buildout, serving over 300 customers, would be possible utilizing the \$25,000 in total project cost estimate. | NKTelco Inc. | 2 | 91 to 180 days | \$85,000 |
| Darke | Dist 7, PID 84353, DAR US 36 16.58 | Adopt a Hill Cut On US 36 To Improve Intersection Sight Distance To Meet Sight Distance Requirements For A 55 Mph Roadway, Per L&D Manual. | Ohio Department of Transportation | 12 | 31 to 90 days | \$150,319 |
| Darke | Jaysville St. Johns Road Reconstruction and Widening | This project involves the reconstruction and widening of Jaysville St. Johns Road for a distance of approximately 1.2 miles. This road is located within the City of Greenfield's Industrial Park and serves as a major arterial road for the vehicular traffic to and from the industrial park. Our current infrastructure reflects a road two lane road with open ditches. Per Ohio's Access Management Manual, L&D was contracted to complete a traffic impact study of the area. As recommended by the study, the roadway will be widened from a two lane road to a four lane roadway including turn lanes, traffic signals, curbs & gutters as well as storm sewer work. Another component included in the project will be the extension of the existing water and sanitary sewer lines as to provide for future growth of the area. | City of Greeville, Ohio | 300 | 181 days or more | \$4,237,000 |
| Darke | Dist 7, PID 77496, DAR SR 571 20.67 | Resurfacing | Ohio Department of Transportation | 14.6 | 31 to 90 days | \$508,103 |
| Darke | Dist 7, PID 80879, DAR SR 503 0.00 | Resurfacing | Ohio Department of Transportation | 34 | 31 to 90 days | \$1,185,195 |
| Darke | Wastewater Treatment Plant Improvements Phase I | The project will consist of the expansion and upgrade of the existing Wastewater Treatment Plant from a design flow of 850,000 GPD to 750,000 GPD. The physical improvements include modifications to the influent pump station, construction of an oxidation ditch, construction of secondary clarifiers, clarifier flow distribution expansion and upgrade, effluent disinfection expansion and upgrade, effluent pump station expansion and upgrade, sludge handling improvements to include the construction of a new aerobic digester, upgrades and expanded storm flow equalization structure, and associated electrical work. The project, when completed, will bring the Village into compliance with NPDES permit conditions, maintain and improve water quality, provide for the retention and expansion of existing and new businesses and industry, and retain and create approximately 1,145 jobs for the Village of Versailles and State of Ohio. | Village of Versailles | 1,145 | 31 to 90 days | \$8,300,000 |
| Darke | Urgent | Maintain existing business, trying to survive after 23 years. | Bach To Rock Music | 3 | 0 to 30 days | \$100,000 |
| Darke | North Star - Sanitary Sewer Collection System | The construction of a sanitary sewer collection system for the village of North Star. The collection system consists of 22,000 LF of gravity sanitary sewer collection pipes, 13,800 LF of force main piping and one pump station. | Fanning/Howey Civil Engineering Division | 5 | 0 to 30 days | \$1,000,000 |
| Darke | Yorkshire - Sanitary Sewer Collection System | The construction of a sanitary sewer collection system for the village of Yorkshire. The collection system consists of 10,000 LF of gravity sanitary sewer collection pipes. The wastewater will be treated at the to be constructed Ogolet Wastewater Treatment Plant. How to dispose of the 300 million tons per year of U.S. livestock waste is NY Times 1/27/08). To the best of our knowledge, no other company has developed a complex, affordable and profitable animal waste conversion system that also brings 100 jobs and teaches into compliance with EPA standards. | Fanning/Howey Civil Engineering Division | 0 | 91 to 180 days | \$500,000 |
| Darke | First Livestock Waste To Solid Fuel Conversion Sy | Objective: To profitably and economically convert animal waste into a high BTU, odorless fuel, methane gas, vitamins and other valuable elements removed in the on-site process, while running the system on the fuel it produces. The Battelle Institute in Columbus, OH, will provide contracted technical assistance. Prototype: Within 30 days of funding, AET will begin the final design and construction of their fuel system prototype at the Ag-Renu facility on Chardon Rd. in Versailles, OH. Expected Outcomes: By converting millions of tons of commercial livestock waste to an odorless, high BTU fuel product, AET will develop a national, alternative source of energy with an environmentally sound system that will be financially self-sustaining. | Ag-Environ Tech, LLC (AET) | 100 | 0 to 30 days | \$1,000,000 |
| Darke | North Star - Osterloh, Connie and Winner Street Re | The project would be reconstruction of 7100 LF of Osterloh Drive, Connor Lane and Winner Street which are located in the village of North Star. The project would consist of 7200 SF of pavement reconstruction and related storm sewer work. | Fanning/Howey Civil Engineering Division | 0 | 91 to 180 days | \$200,000 |
| Darke | North Star - Star Road Reconstruction Phase I | The project would be replacement of 1200 LF of Star Road in the village of North Star. This project would consist of 4000 SF of roadway, replacement, 1200 LF of storm sewer improvements, 9000 SF of sidewalk installation, 2400 LF of curb and gutter installation, street lighting and other miscellaneous work. | Fanning/Howey Civil Engineering Division | 0 | 91 to 180 days | \$550,000 |
| Darke | North Star - Star Road Reconstruction Phase II | The project would be replacement of 1200 LF of Star Road in the village of North Star. The project would consist of 4000 SF of roadway, replacement, 1200 LF of storm sewer improvements, 9000 SF of sidewalk installation, 2400 LF of curb and gutter installation, street lighting and other miscellaneous work. | Fanning/Howey Civil Engineering Division | 0 | 91 to 180 days | \$550,000 |
| Darke | Purchase house utilizing Capital Housing Funds fro | Community Capital Housing funds to make this purchase possible. | Darke County Board of MR/DD | 0 | 31 to 90 days | \$24,301 |
| Darke | Upgrade existing lighting to improve energy effici | Upgrade existing lighting to improve energy efficiency at Darke County Board of MR/DD Administration, Anthony Wayne Early Childhood Center and Wayne Industries adult facility. 112 ballasts will be replaced with T8 ballasts to increase lighting efficiency. Replacement is a part of a utility energy efficiency audit. | Darke County Board of MR/DD | 0 | 91 to 180 days | \$8,000 |
| Darke | Replacement/repair of roofing and guttering | Replace guttering at Wayne Industries adult day program/childhood workshop facility with industrial size guttering to accommodate rain runoff and prevent infrastructure damage. Repair roofing at adult and preschool facilities to prevent future infrastructure damage. | Darke County Board of MR/DD | 2 | 91 to 180 days | \$30,000 |
| Darke | Parking lot paving and resealing | Reseal areas of parking lot at Wayne Industries adult day/childhood workshop facility and Anthony Wayne Early Childhood Center facility. Reseal areas of both parking lots. | Darke County Board of MR/DD | 4 | 91 to 180 days | \$15,000 |
| Darke | Replacement of windows | Replace windows at Wayne Industries adult day program/childhood workshop facility and Anthony Wayne Early Childhood Center with energy efficient windows. Replacement is in response to energy efficiency. | Darke County Board of MR/DD | 6 | 91 to 180 days | \$50,000 |
| Darke | Retrofit Supported Living Homes with Sprinklers | Install sprinkler systems in homes utilized by individuals with disabilities served by the Darke County Board of MR/DD. Currently, three homes would benefit from installation of sprinkler systems to protect the health and safety of the individuals residing in those homes should a fire break out. | Darke County Board of MR/DD | 2 | 91 to 180 days | \$45,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Darke | New wastewater collection and distribution system | Construction of a new wastewater collection and distribution system. Consists of over 30,000 linear feet of and 400 residential hook-ups. | Village of Wayne Lakes | 0 | 181 days or more | \$4,000,000 |
| Darke | Pittsburg Sanitary Sewer Collection and Treatment S | Construction of a new wastewater treatment and collection system as mandated by CEPA Findings and Orders. Installation of approximately 30,000 linear feet of new sewer line and necessary appurtenances to provide service to approximately 480 users. | Village of Pittsburg | 20 | 91 to 180 days | \$3,700,000 |
| Darke | Ross Street Reconstruction - Village of Rossburg | The complete reconstruction of 1100 linear feet of roadway including 2400 linear feet of curbs, 9000 square feet of sidewalks, 1100 linear feet of storm sewers, and new roadway base and asphalt. Ross Street has been patched many times over the past years to try and keep it in a drivable condition. Ross Street is the only main collector street in the village. | Fanning/Howey Associates, Inc. | 0 | 31 to 90 days | \$450,000 |
| Darke | Norton/High/Royal/Walnut Street Reconstruction - V | The complete reconstruction of 1400 linear feet of roadway including 3500 linear feet of curbs, 14,000 square feet of sidewalks, 850 linear feet of storm sewers, and new roadway base and asphalt. All four streets to be replaced average only 18 in width, which makes a very difficult to pass encountering traffic. Truck delivery down these streets is virtually impossible. | Fanning/Howey Associates, Inc. | 0 | 31 to 90 days | \$540,000 |
| Darke | Requarth Road | Widening and reconstructing 3 miles of road | Darke County | 12 | 31 to 90 days | \$900,000 |
| Darke | Bridge the Gap | Bridge the Gap was historically set up with Darke County United Way reserves to help Darke County residents at or below 250% of poverty who may be laid off or are and are trying to pay their mortgage, rent, or utilities to stay in their home until they have new employment. This year our United Way is using all reserves to help other non-profit agencies and cannot fund this very important program. Last year we helped 37 Darke County residents who were not eligible for most state aid as most is for those at or below 100% "Bridge the Gap" and stay in their home while seeking new employment or medical treatment. We hope to use the \$25,000 to help at least 50 people who fall between these guidelines who have been recently laid off bridge the gap to find new employment and stay in their homes and out of homelessness. We have very little overhead to run this program and plan to use reserves to cover overhead costs. | Darke County United Way, Inc. | 50 | 0 to 30 days | \$25,000 |
| Darke | Dolly Parton Imagination Library for Darke County | By aligning with the Dolly Parton Imagination Library, Darke County would be able to provide children with free books each month from birth until their fifth birthday. The cost of \$10,480 would be the cost to cover postage for the books to be sent to the children's homes each month. Approximately \$28/year/child. The cost of the book is free through Dolly Parton's Foundation. 7% of Darke County residents are 5 and under approximately 3,635 kids can participate in this project, which would be published through local hospitals, schools, doctors offices, and human service organizations. This can allow children without books to read at their age and developmental level with families before entering school hoping to help boost literacy rates. | Darke County United Way, Inc. | 0 | 31 to 90 days | \$103,460 |
| Darke | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDI's mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, Individual Development Accounts (IDAs), microloans, technical assistance, and access to retail markets. As the only U.S. Small Business Administration microloaner in U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI's Microenterprise Loan Fund fills a gap in the credit industry by providing training, technical assistance and loans ranging from \$50 to \$35,000 to underserved entrepreneurs. ECDI is able to serve underserved populations, including low income individuals, those with little or no credit, or those precluded from paying interest because of limited assets. | Economic and Community Development Institute | 20 | 31 to 90 days | \$150,000 |
| Darke | Harmon Field Renovation Project | A Harmon Field is the sports stadium owned by the City, and also used by the Greenville City School System for home sporting events including football and soccer games, track meets, and other school related events. | City of Greenville | 25 | 31 to 90 days | \$175,000 |
| Darke | Darke County Parks Solar and Wind Initiative | There has been increased noticeable concrete deterioration of the stadium. A visual inspection of the structure was performed by the engineer in October 2008. The structures are a concrete frame primarily built in four sections with an expansion joint between each section. The main issue is the cracking and crumbling concrete from water to penetrate through the surface concrete and cause major spalling of concrete sections and underneath the stadium. | Darke County Park District | 9 | 31 to 90 days | \$320,000 |
| Darke | Main Street Reconstruction | New Wind and Solar equipment on a new Maintenance Facility and 14 year old Nature Education Center in Darke County Park District in a separate need of a new Maintenance facility to house the current maintenance needs of this growing Park District. | Darke County Park District | 9 | 31 to 90 days | \$320,000 |
| Darke | Water Tower Replacement | Has 10 unique Parks totaling over 700 acres and has over one hundred thousand visitor occasions in all the parks each year. A new maintenance facility is needed to allow safe and positive work conditions for full and part time employees. This new facility would be no more than 4000 sq. ft. Wind and solar applications would be built into this new facility and would be available to net metering with OPAL. The solar application would also be added to the 7000 square foot Nature Education Center which receives over 150,000 visitors each year. The wind and solar applications to both of these facilities would reduce our dependency on fossil fuels (natural gas) and save up to 12,000 dollars annually, paying for itself in 15 months or less. The project would also be an innovative tool for teaching and educational programs throughout the region for youth and adult programs. | Darke County Park District | 9 | 31 to 90 days | \$320,000 |
| Darke | Water Valve and Hydrant Replacement | Reconstruction of approximately 3500 ft. of Main Street in the village of Gettysburg, including new water lines, storm sewer, curbs and sidewalks, and street. This project could be split into 3 phases (\$500,000 each) as well. Gettysburg is an LMI qualified community. | Fanning/Howey Civil Engineering Division | 2 | 91 to 180 days | \$1,400,000 |
| Darke | Waterline Replacements | Replace the existing 66 year old water tower that has a crumbling foundation and several ongoing maintenance issues with the floor and paint overgrowth. The proposed tower would be a 100,000 gallon water tower. The village of Gettysburg is a LMI qualified community. | Village of Gettysburg- Fanning/Howey Civil Engineering Division | 2 | 91 to 180 days | \$750,000 |
| Darke | Factory Street Reconstruction | Replace all existing valves and fire hydrants in the village water system that do not properly work. The village has recently had a few water main breaks and was forced to shut down the entire water system to make necessary repairs. The existing water system is over 90 years old. Gettysburg is an LMI qualified village. | Village of Gettysburg- Fanning/Howey Civil Engineering Division | 2 | 31 to 90 days | \$1,200,000 |
| Darke | Park Street Reconstruction | Replace the eight fireline watermain within the village. This would result in approximately 12,500 ft. of new watermain with 200 new household services. The village of Gettysburg is a LMI qualified community. | Fanning/Howey Associates, Inc. | 2 | 181 days or more | \$1,200,000 |
| Darke | Auld Street Street Extension | Reconstruction of Approximately 1800 ft. of Factory Street in the Village of Gettysburg, including waterline replacement, new storm sewer, curbs and sidewalks, and asphalt paving. Gettysburg is an LMI qualified community. | Fanning Howey Civil Engineering Division | 2 | 91 to 180 days | \$720,000 |
| Darke | The First Miles | Reconstruction of Approximately 1800 ft. of Park Street in the Village of Gettysburg, including waterline replacement, new storm sewer, curbs and sidewalks, and asphalt paving. Gettysburg is an LMI qualified community. | Fanning Howey Civil Engineering Division | 2 | 91 to 180 days | \$650,000 |
| Darke | Greenville Clean Energy Center | Extension of Auld Street From Darke St. to Bridge Street within the village of Gettysburg. This project would require the acquisition of 3 properties and demolition of 3 buildings in order to widen this portion of Auld Street from the existing alley width (16') to that of the remaining portion of Auld Street (36'). The street widening would consist of waterline replacements, storm sewer replacement, new curbs and sidewalks and asphalt paving. This project would require 2 main street streets being connected within the village. Gettysburg is a LMI qualified community. | Fanning Howey Civil Engineering Division | 2 | 181 days or more | \$400,000 |
| Darke | Energy Savings at Ethanol Plant | Darke County Park District has undertaken the initiative to link both sides of the county from Bradford, Ohio to Union City, Ohio with the use of existing abandoned rail corridor. A full copy of plans can be forwarded upon request to the Governor's office. This is an aggressive plan to see just 19 miles of abandoned rail corridor reconstructed into a multiple use trail in order to link two States (Indiana and Ohio) and go to nearby regions. Our portion of the trail is a critical link in the National Rails To Trails 2020 initiative. We have currently requested both Recreational Trail Project Funds and Clean Ohio Trail Funds to begin this project. The funds requested above would be for the retrofit of the largest bridge in Darke County, an abandoned rail bridge needing remediated for use as a multiple use rail bridge. This portion of the plan was NOT approved in the current round of Clean Ohio Grant requests through ODNR. The amount requested will also assist in construction and asphalt paving up to the bridge and prepare the access on both sides. Local banking institutions, local government groups, and private groups have already pledged that they will support this project. | Liberty Green Renewables, LLC | 60 | 91 to 180 days | \$2,000,000 |
| Darke | Community Grant Assistance | Liberty Green Renewables, LLC proposes to develop and build a dedicated woody biomass-to-electricity facility within the Dayton Power & Light (DPL) service territory. This 28 MW facility will produce renewable energy pursuant to the Ohio Renewable Portfolio Standards. The facility would run on wood hydrolysis primarily from the wood processing industry and the animal bedding residues produced by the large poultry operations nearby. | Liberty Green Renewables, LLC | 60 | 91 to 180 days | \$2,000,000 |
| Darke | Community Grant Assistance | LGR conduct due diligence on fuel and facility infrastructure in Darke County near the Greenville sub-station in Greenville, Ohio. Following a 12-month permitting process, construction could begin in early 2010 with commercial operation by mid-2012. This timing allows 24 months for construction. | Liberty Green Renewables, LLC | 60 | 91 to 180 days | \$2,000,000 |
| Darke | Community Grant Assistance | When completed the full-time employment onsite will be 20 to 25 with an additional 25 to 35 full-time jobs delivering the fuel. Following different possibilities for saving energy as a fully new Ethanol facility. | Liberty Green Renewables, LLC | 60 | 91 to 180 days | \$2,000,000 |
| Darke | Community Grant Assistance | Potential projects may include: - Steam Heat recovery - Improved heat exchangers - Water conservation - Searching for other opportunities | The Andersons, Inc. | 60 | 181 days or more | \$500,000 |
| Darke | Community Grant Assistance | Currently in initial stages, but expecting that public funds could move a project with a decent ROI to a higher priority, resulting in an investment which makes the Ethanol plant more profitable, and secures a brighter future. | The Andersons, Inc. | 60 | 181 days or more | \$500,000 |
| Darke | Community Grant Assistance | Community Grant Assistance is a project that special short-term programs through 501(c)(3)'s can apply for funding in order to help with emergencies, educational programs, financial assistance for medical, housing, food, utilities, and/or infrastructure. For example last year funded several Christmas outfit fairs. Estimated Christmas year estimates: 50 underprivileged teens learned leadership skills to graduate from high school who may otherwise have dropped out. Replenished food pantry to serve 200 clients in need in Darke County. Helped send 50 children to bereavement camp. Taught 50 children farm safety. Allowed for expansion of neurodevelopment classroom technologies. | Darke County United Way, Inc. | 0 | 31 to 90 days | \$15,000 |
| Darke | Community Grant Assistance | 50 field backpack/school direct program for underprivileged youth whose families would be eligible for the free and reduced lunch plan. There are 13 programs we would cover to distribute field backpacks making children prepared for learning school successfully including Greenville, Mount Vernon, and Union City. Estimated Christmas year estimates: 50 underprivileged teens learned leadership skills to graduate from high school who may otherwise have dropped out. Replenished food pantry to serve 200 clients in need in Darke County. Helped send 50 children to bereavement camp. Taught 50 children farm safety. Allowed for expansion of neurodevelopment classroom technologies. | Darke County United Way, Inc. | 0 | 31 to 90 days | \$15,000 |
| Darke | Community Grant Assistance | Color laser printer and copier for non-profit company to do in-house printing for program costs and to reduce administrative costs to better stretch dollars for projects within the county including poverty education, financial stability and health. | Darke County United Way, Inc. | 0 | 0 to 30 days | \$15,000 |
| Darke | Community Grant Assistance | New Geothermal heat for our K-12 school building. To show the students and community the need to be energy efficient and save taxpayers dollars at the same time. Thanks for your time in considering this very important proposal. | Franklin Monroe Local School District | 15 | 91 to 180 days | \$750,000 |
| Darke | Community Grant Assistance | Reconstruction of approximately 500' of Main Street, including replacement of deteriorated concrete curb, sidewalk, alley approaches and expanding curb ramps within existing right-of-way. This project is to be done in conjunction with a paving project on SR 503. | Village of Ithaca | 10 | 91 to 180 days | \$292,800 |
| Darke | Community Grant Assistance | 2 new Air Conditioning units to replace old heating room for three non-profit business office building. These units will be more efficient and save money for agencies to help towards programs that help others including youth and cancer patients. | Darke County United Way, Inc. | 0 | 31 to 90 days | \$5,000 |
| Darke | Community Grant Assistance | 28 United Way Banners for Downtown landscape. Will help increase awareness of non-profit and marketing to hopefully increase our campaign giving and will match the landscapes of our Downtown beautification efforts. | Darke County United Way, Inc. | 0 | 31 to 90 days | \$2,000 |
| Darke | Community Grant Assistance | Reconstruction major roadway artery within the Village of Arcanum. This roadway is 1/2 mile long. Due to recent sanitary law separation project, the Village was required to trench down the middle of the street. The Village had no money at the time to repair street. The project will require 1/2 mile of new water line. Sidewalks and curbs will be assessed to the Homeowner. New water connections to each house (100). The improvement of this street will allow the Village to retain commercial customers who use the street daily for the operation of their business. | Village of Arcanum | 200 | 181 days or more | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------------------|----------------|--------------------|---------------------------|
| Darke | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant money. Building a wireless infrastructure to equip rural residents with the Bandwidth to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The digital dividend from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Darke | pay off my existing mortgage | My mortgage will be paid in full with no threat of possible foreclosure | myself | 06 | 0 to 30 days | \$32,000 |
| Darke | New school building | Five of the present buildings are 45 years and older (100 years) and conditions for good education are on a decline. Need new K-8 building and upgrade on the present senior high school (or possibly a new building their also....) via new sports stadium. | Greenville City Schools | 300 | 91 to 180 days | \$74,000,000 |
| Darke | Hole Field Bleacher Replacement | Replacement of 40 year old grandstand bleachers which are currently structurally unsound, do not meet ADA guidelines and do not meet the current building code requirements for full protection, especially of students. Stimulus funding for the project will allow an existing OHFC organization to complete the infrastructure improvements instead of the local school system, which does not have the funding. It will eliminate a safety hazard, keep local construction company's employees working and will keep an underfunded Ohio school system from having to spend too many revenues on something other than books, technology and teachers. | Friends of Hole Field | 0 | 91 to 180 days | \$459,500 |
| Darke | Better Living | Water proofing wet basement. Full insulation of wells and attic. Siding of house and old garage. New carpeting and linoleum. New deck. fencing the back yard screening front porch for comfort in our retirement. New two car garage. Modernize our kitchen and bathroom to make both easier for us to navigate in our senior years. My wife and I were both forced into retirement when we were in our 60's. We were terminated and we are in financial need of assistance so do these things we are desiring to do to make life a little easier in our senior years. Thank you in advance for any and all considerations. Respectfully Submitted, Scott & Judith Siah | The Retired Couple | 2 | 0 to 30 days | \$125,000 |
| Darke | Italian Cafe | I would like to move my small restaurant into a larger building that will be renovated and have more visibility to the public. At this time I can only employ 35 people with the new building we would be able to seat about 100 people. This will increase my staff from 5 to 20 I feel this will be a way to employ more people here in Greenville and would raise our tax payments to city, county state and federal agencies and keep more people employed. With this type of project it would benefit all concerned, employment and the town of Greenville, Ohio. I have people coming to my Cafe almost everyday looking for work and at the present time I can only hire them away. There are good hard working people in Greenville that would make good employees if given a chance. Thank You for your time and consideration. Jery Dak | J.R.Delk Co. Inc. | 20 | 0 to 30 days | \$150,000 |
| Darke | wolfs clean house | Replace aging bathroom and moldy drywall in all bedrooms and throughout the house. Replace leaky gutters and windows which add to the mold issues. Expected outcome would be a safer environment for our three young kids. This money would help to employ a local contractor. | no more mold | 2 | 31 to 90 days | \$20,000 |
| Darke | Family | I would like to be able to pay up my bills and help find a job I got laid off and have two children at home. One with medical problems. | Family | 0 | 0 to 30 days | \$10,000 |
| Darke | Home Improvement/Energy Saving | I would like to make my home more energy efficient with insulating my roof, replacing my roof with a renewable resource, and insulating my whole home. I would also like to insulate my garage, and put newer more energy efficient electric heaters and paint. Also, using the money to use a central air conditioner instead of window air conditioners which would also contribute to energy efficiency. I would also like to have some trees and to help shade my house in the summer to make cooling it more efficient and just to be looking for a better job environment for my family. In conclusion I would take approximately 3 people several weeks to perform all of these tasks. www.ohioenergy.com | Home Owner | 5 | 31 to 90 days | \$50,000 |
| Darke | Just Need Someone to Seriously Consider Helping th | I have lost \$12,000 of my 401K which has been proven to be a direct result of the economic situation and the bad housing market and poor lending practices. I am stuck with a house and 2 mortgages I cannot afford, but have been sacrificing my own medicine for diabetes in order to pay for a prevent testing. I clearly cannot sell the house and pay what I owe out of. I am requesting \$18,000 to pay off the higher interest rate loan (8%) the smaller second mortgage, so I can either refinance to get a lower payment, or sell and get a smaller house and mortgage. I recently tried to trade off my vehicle to get something cheaper, but found out I had approximately \$6000 of negative equity. I am asking for \$12,000 to pay off the loan I have on my 5 year old Jeep. I feel as many Americans do, work my whole life and have nothing but gray hair and debt to show for it. I do not know from one day to the next if I will have a job when I go to work the next day. | Not Affiliated with any organization | 0 | 31 to 90 days | \$47,000 |
| Darke | West Ward Street Reconstruction Phase I Project | The Franklin Street intersection. The project will also include the one half block section of Pearl Street from Ward Street north to the alley intersection along Pearl Street, the one half block section of Columbia Street from Ward Street north to the alley intersection, and the one half block section of Greenleaf Street from Ward Street south to the alley intersection. Total project length is approximately 1,370 feet. Reconstruction plans for the street project include the removal of the old street surface, old deteriorated sidewalks, curbs, and driveway approaches, and trees. New street construction features will include the installation of sidewalks, curbs, and driveway approaches, the installation of a new gravel street base and asphalt surface, the replacement and upgrade of the water main and service lines, the replacement and upgrade of the sanitary sewer main and service lines, the installation of storm sewer main, storm water catch basins, and storm water service connections to the individual properties | Village of Versailles | 20 | 0 to 30 days | \$400,000 |
| Darke | Home roofing and repairs | The need to repair on my personal dwelling that I do not have because of lost funds that I had in my 401k due to the economic recession. Any assistance will be greatly appreciated. We have been in business 34 years. | Individual Property Owner | 2-3 | 91 to 180 days | \$8,000 |
| Darke | Up dating equipment | With the high cost of being a small business owner, it is very hard to keep up purchasing new equipment. The money would be used to to date equipment. Thank you | Scott Thompson Co., Inc. | 6 | 31 to 90 days | \$50,000 |
| Darke | Affordable Rental Housing | I would like to provide affordable housing to lower income families who have been effected by the current economic events in the State of Ohio. I currently own 3 properties and 2 tenants. I am currently on all payments and have never been behind on any bills. I would like \$50,000 to pay off the properties so that the rent can be lower to provide housing for families that have lost their jobs and can not afford the rent I need to make my payments. I feel this will help people get back on their feet by being able to pay lower rent at a very nice properties that are large enough to house a decent size family. Last year I had a \$16,000 loss on my rental properties. I am asking for a stimulus package in the amount of \$50,000 to provide affordable living for those who are less fortunate. Please consider my proposal. Even a portion of the \$50,000 will considerably help me be able to offer lower rents to people, which would then give people more money to employ to boost the economy. Thanks for your consideration. | Nick Hamilton Rental Properties | 2 | 0 to 30 days | \$500,000 |
| Darke | Unger's Rent-all | New small business start up. Inventory expansion, store front renovation. | Unger's Rent-all and Hardware | 3 | 0 to 30 days | \$50,000 |
| Darke | Building reconstruction | Search building for heating repaired consulting, and training. Install chair lift for entrance to group room on second floor, repair part roofing and outside paint. | Thorhill Office | 2 | 31 to 90 days | \$15,000 |
| Darke | Need new roof shingles & staining of home | New shingles 3400x3000 staining of home | Head Of House hold | 0 | 31 to 90 days | \$8,500 |
| Darke | South Main Reconstruction | Re-construct major roadway artery within the Village of Arcanum. This roadway is 1/2 mile long. Due to recent sanitary sewer separation project, the Village was required to trench down the middle of the street. The Village had no money at the time to repair street adequately. The project will require 1/2 mile of new water line. Sidewalks and curbs will be assessed to the Homeowner. New water connections to each house (100). The replacement of this street will allow the Village to retain commercial customers who use this street daily for the operation of their business. 250,000 funds will be from tax assessments for sidewalks and curbs while the remainder of the money will be from local sources. | Village of Arcanum | 110 | 181 days or more | \$1,000,000 |
| Darke | vfw 7262 lake and veterans park fund | stock lake, plant trees for wind break, build new bridge over culvert to help diversion of soil from neighboring property. Plan on starting a local Powder Coating business. My partner and I currently have a location, and a start up date. We would like funds to purchase better equipment and hire a couple employees. Darke Co. has suffered from many job losses due to the economic state as well as other places in the US. Powder Coating is a cleaner method of coating metals compared to painting. Powdercoating can be considered "GREEN" because it releases NO VOCs, and NO toxins to the environment. Unlike Powder Coating with painting, powdercoating can be considered "GREEN" because it releases minimal waste, the unused or over spray can be collected and re-used. There is currently no competition within 30miles of our location. We currently have meet numerous people in need of this application. We will be looking for mainly the automotive and automotive industry. Powder coating can also be applied to plastics, wood, and many other substrates. I feel that not only will we be employing about 5 people in the beginning if we receive funding) we will also be helping the environment. We will be able to show the american people that the employe working men will benefit from this huge company. Please! | greenville memorial vfw post 7262 | 4 | 91 to 180 days | \$25,000 |
| Darke | Business start up | Provide crack sealing for existing paved thoroughfares within the Village Corporation. Total asphalt surface area to be sealed is approximately 46,822 square yards. The outcome of this project is to improve the village streets by 5 years and the work will allow a local small business an opportunity to keep employees on the job. The Village of Ansonia qualifies as a low to moderate income community. | DCP Powder coating | 5 | 0 to 30 days | \$200,000 |
| Darke | Crack Sealing for Village Thoroughfares | Provide 112' of asphalt overlay for approximately 21 village thoroughfares that are in need of resurfacing. Total asphalt required is approximately 5271 tons. The outcome of this project is to improve the village streets and the project will provide several weeks employment for the selected paving company. The Village of Ansonia qualifies as a low to moderate income community. | Village of Ansonia | 4 | 31 to 90 days | \$33,600 |
| Darke | Asphalt Overlay for Village Thoroughfares | 2009 Capitalized Maintenance: This is a transit project whose funding flows through the Ohio Department of Transportation. | Village of Ansonia | 6 | 31 to 90 days | \$430,000 |
| Darke | DAR Capitalized maintenance; PID 86098 | The funding requested is to increase the size of my business operation. With the increase in vehicles there will also be a need to hire a minimum of 12 new employees to assist in the management and operation of the vehicles. Depending on the contracts that are generated they will decide on the total number of employees as some vehicles may become team operations whereas the vehicles may have extended operating time and distance to travel requiring mandatory rest periods to be maintained for safety compliance for state and federal regulations. My company as well as several others was hit very hard during the fuel hikes over the last year and this will allow me to begin recovering from the loss of several employees and the selling of several assets I had to let go. My life has been in the trucking industry for the last 30 years and I understand what it takes to manage a successful operation. | Ohio Department of Transportation | 1,000 | 0 to 30 days | \$1,000 |
| Darke | Expanding my Business | The Greenville Public Library's monthly newsletter informs and educates the public about the Library's importance for the community. It gives news about educational programs, offerings, activities, schedules, book reviews, and editorial essays. Our Library was recently renovated and a huge debt incurred despite a fundraiser. With a reduction in our funding from the state, we are seeking ways to remain functional that do not open our usual hours and to retain our full staff. Our newsletter is very important in bringing in Library users, volunteers, and donors. It costs \$550 a month for 12 months. The newsletter is a very popular and effective communication tool that reaches the people of our county who need our services more than ever in the present economy. Every age group - children, teens and adults - benefit from our Library in terms of reading materials, free internet, job research, and educational support. Installation of two 50kw wind turbine generators at publicly owned conversion center as an alternative energy project. | CPM Express, Inc. | 12 | 0 to 30 days | \$1,450,000 |

| Darke | Update of Classroom Computers | The Arcanum Butler Local School District would use these funds to replace the inventory of older computers that are currently used in cars that have been discovered to contain the H5N1 virus. The computers are used for various projects in all subject areas and would benefit every student in both school buildings. Current computers in the cars are outdated and need to be replaced or updated without a replacement of funds. | Arcanum Butler Local Schools | 0 | 31 to 90 days | \$27,000 |
| Darke | Darke County Federal Aid Secondary Resurfacing | Resurfacing of several Federal Aid Secondary Roads. Covering 13.5 miles with 2" of new asphalt wearing surface, new temporary and permanent pavement markings, and shoulder aggregate. Quantities will include 9300 cubic yards of asphalt, 1900 cubic yards of shoulder aggregate, 12300 gallons of tack coat, and 13.5 miles of temporary and permanent pavement markings. | Darke County Engineer | 12 | 31 to 90 days | \$1,100,000 |
| Darke | Back to work program | To get car fixed to enable myself to have suitable transportation in order to try to obtain employment and to supplement my social security! | self | 1 | 0 to 30 days | \$5,000 |
| Darke | Main Street Reconstruction | Reconstruction of approximately 3500 L.F. of Main Street in the village of Gettysburg, including new water lines, storm sewer, curbs and sidewalks, and street. This project would result in 3 phases (500,000 each) to be well. Gettysburg is an LMI qualified community. | Fanning Howey Civil Engineering Division | 2 | 91 to 180 days | \$1,400,000 |
| Darke | Auld Street Extension | Extension of Auld Street from Danman Street to Bridge Street within the city of Gettysburg. This project would require the acquisition of 3 portions and demolition of 3 buildings in order to widen this portion of Auld Street from the existing 44' width (145' lot) but the remaining portion of Auld Street (DR). The street widening would consist of curbside replacements, storm sewer replacement, new curbs and sidewalks and asphalt paving. This project would result in 2 main arterial streets being connected within the village. Gettysburg is a LMI qualified community. | Fanning Howey Civil Engineering Division | 2 | 181 days or more | \$400,000 |
| Darke | Park Street Reconstruction | Reconstruction of approximately 1800 L.F. of Park Street in the village of Gettysburg, including waterline replacement, new storm sewer, curbs and sidewalks, and asphalt paving. Gettysburg is an LMI qualified community. | Fanning Howey Civil Engineering Division | 2 | 91 to 180 days | \$650,000 |
| Darke | Factory Street Reconstruction | Reconstruction of approximately 1800 L.F. of Factory Street in the village of Gettysburg, including waterline replacement, new storm sewer, curbs and sidewalks, and asphalt paving. Gettysburg is an LMI qualified community. | Fanning Howey Civil Engineering Division | 2 | 91 to 180 days | \$720,000 |
| Darke | Upgrade of elementary reading program | The Arcanum Butler Local School District would like to upgrade the computers and books that are used for its reading program. The district would like funds to purchase a new server, upgrade to a current version of the reading program software, and buy new books that could be used in the reading program. | Arcanum Butler Local Schools | 0 | 91 to 180 days | \$5,000 |
| Darke | Transitional housing | Provide long term transitional housing for homeless persons & parolees coming home from prison. Connect them with mentors who will support them to become independent. We currently have two existing transitional housing facilities that can house up to 12 people, but need to add at least two more facilities so that we can then house, mentor and equip 20-24 people. | Good Samaritan Home | 20 | 31 to 90 days | \$50,000 |
| Darke | SelfmNeed | My dental health have faded over the last few months and may lead to further health problems. These funds will be used for personal dental work/brush, floss, caps and other required dental work to as required by my local Dentistry OH dentist. Pictures of dental needs will be forwarded if needed. | SelfmNeed | 0 | 0 to 30 days | \$3,725 |
| Darke | New Fire House | We are in need of a new fire house due to the fact that we have equipment sitting outside in the inclement weather year round. Also in need of replacing banners to help read areas in the village. Need areas for training and meeting purposes. The fire house is outdated and in need of repair and or just build a facility to meet all of the required needs to fully staff an around the clock department. For 2008 we had 264 fire calls and 796 EMS calls. We cover three (3) rural townships and the village in which we are stationed in. | Union City Ohio Fire and Rescue | 40 | 181 days or more | \$500,000 |
| Darke | Disaster Preparedness | Provide disaster preparedness training AND disaster preparedness kit to Darke Counties, targeting the most vulnerable groups in the community: children, those in transition and the unemployed and underemployed. Participants will receive Red Cross Ready disaster preparedness kit, completion of training (two hour class) will receive either a one person, two person or family disaster kit, as appropriate. Participants will receive disaster preparedness training during and after local disaster, which not only increases their ability to sustain on their own, but also provides disaster relief dependent on local resources during a disaster. Local suppliers will be used as much as possible for kits, unless they are not available. Project is budgeted to deliver disaster kits to 420 family units (single, couple or family) and provides instruction on disaster preparedness, emergency kits and program support. | Darke County Chapter of the American Red Cross | 1 | 0 to 30 days | \$70,000 |
| Darke | CPR/AED/FIRST AID TRAINING | Provide CPR/AED/BBP/First Aid training for unemployed Darke Counties. Fulfiling workplace training needs. Occupations such as, but not limited to nursing/medical jobs, factory employees, state employees, and/or building resume and job skills. Classes may be taught in a variety of manners from traditional classroom settings to self-paced computer training. Funding will primarily pay for the training, materials, and program support. Funding requested will provide training for 300 people. | Darke County Chapter of the American Red Cross | 1 | 31 to 90 days | \$45,500 |
| Darke | Church Street Reconstruction | Resurfacing the entire length of project. | Fanning/Howey Associates, Inc. | 0 | 31 to 90 days | \$621,000 |
| Darke | Board of Education Roof Replacement | The project encompasses the tear off and re-roofing of the central office roof system. The original roof was put on in 1976 and it leaks and has no insulation. The new roof system will protect the workers and keep the building more energy efficient. | North Royalton City Schools | 15 | 91 to 180 days | \$60,757 |
| Darke | Norton/High/Royal/Walnut Street | The complete reconstruction of 1800 L.F. of roadway including 5500 L.F. of curbs, 14,000 square feet of sidewalks, 800 L.F. of storm sewers, and new roadway base and asphalt. All four streets to be replaced average only 12 ft in width, which makes it very difficult to pass commercial traffic. Truck delivery down these streets is virtually impossible. | Fanning/Howey Associates, Inc. | 0 | 31 to 90 days | \$540,000 |
| Darke | Ross Street Reconstruction | The complete reconstruction of 1000 L.F. of roadway including 2000 L.F. of curbs, 8,000 square feet of sidewalks, 1050 L.F. of storm sewers, and new roadway base and asphalt. Ross Street has been patched many times over the past years to try and keep it in a drivable condition. Ross Street is the only main collector street in the village. | Fanning/Howey Associates, Inc. | 0 | 31 to 90 days | \$450,000 |
| Darke | Small business investment | Investment in small business, intentions to buy new equipment including a new truck and new power tools for concrete installation. We would like to fill the employees and give the ability to employ two new subcontractors. | Gibson Quality Concrete LLC | 2 | 0 to 30 days | \$35,000 |
| Darke | Educational Loans | Full payment of previously borrowed funds for college education. I have been unable to secure full time employment for over 1 year due to economic downturn and rising unemployment rates. | Charles Robbins | 0 | 0 to 30 days | \$75,000 |
| Darke | Toolmaking/Prototype medical equipment | Add on an addition to the shop and finishing cement throughout. Run Plumbing to building and include a bathroom. Update or purchase new equipment for the type of work we are doing. Expand customer base which will allow us to move out of work employees in our area. Update outside of building including landscaping parking lot and lawn to business. Update computer systems allowing machines to be ran with computer program. Add new furnace with control air (electric) get rid of gas heater and disconnect all lines to shop. Update lighting fixtures to more environmental friendly lighting. | Woods Machine & Tool | 4 | 31 to 90 days | \$500,000 |
| Darke | Sanitary Sewer Collection and Treatment | The Village of Gordon is not served by a public waste water collection and treatment facility. All residences and commercial establishments are served by individual septic tank systems. The Darke County Health Department has been concerned about the sewage situation within the village for sometime. A Wastewater Collection and Treatment General Plan recommends the construction of a central gravity sewer collection system along with a package wastewater treatment plant at an estimated project cost of \$2,365,427. | Village of Gordon | 32 | 181 days or more | \$2,365,427 |
| Darke | Sanitary Sewer Collection and Treatment | The Village of Itasca is not served by a public waste water collection and treatment facility. All residences and commercial establishments are served by individual septic tank systems. The Darke County Health Department has been concerned about the sewage situation within the village for sometime. A Wastewater Collection and Treatment General Plan recommends the construction of a central gravity sewer collection system along with a package wastewater treatment plant at an estimated project cost of \$1,175,836. | Village of Itasca | 32 | 181 days or more | \$1,175,836 |
| Darke | lower builds | New blown insulation in walls of a story and a half house and a half house and a half house (shingles). House was built in 1905. Insulation has all settled down to the bottom of the walls. Siding is in the need of siding. Need this done to lower my heating bills. | R & P | 4 | 0 to 30 days | \$75,000 |
| Darke | New Madison Well Field Replacement | Performance of a fracture analysis to determine potential sites for purchase and development of a new well field to replace the existing site this is 12 years old and does not meet current Ohio EPA radial control requirements. Project will include preparation of land options, drilling for aquifer evaluation along with land surveying and deed preparation for purchase of approximately 30 acres of land in the immediate area of the Village of New Madison. | Key Engineering Group, Inc. | 0 | 0 to 30 days | \$180,000 |
| Darke | New Madison Water Tower & Connecting Water Line | Construction of a 250,000 gallon elevated water storage tank to provide adequate water volume to the support fire suppression system of Florida Production Engineering (automotive accident) along with installing one day water storage for the Village residents. Installation of 2,385 L.F. of water main to connect and loop new storage tank to the distribution system at two locations which are currently dead end mains. | Key Engineering Group, Inc. | 100 | 0 to 30 days | \$1,061,350 |
| Darke | Water Treatment Plant Improvements | Addition of a 50,000 gallon clearwell to the existing water treatment plant to provide chlorine detention holding time to meet Ohio EPA standards for improved drinking water quality. Installation of an emergency generator system and automatic alarm station for notification of a plant failure and to enable stabilization of the water system during an emergency. Replacement of 3,275 L.F. of existing undersized sand asbestos concrete water mains to maintain a 500 gallon per minute fire flow until mutual aid fire department water companies can transport water to the Village. | Key Engineering Group, Inc. | 0 | 0 to 30 days | \$682,000 |
| Darke | Municipal Barn Upgrade | Raise barn to be able to get equipment in and out without tearing down. Put up ceiling so we can heat the building to store valuable equipment. Need to replace roof because old roof has numerous leaks. Building in decent shape, just needs to be upgraded. New would be a good time to correct these problems. Ansonia does qualify as a low to moderate income village. | Municipality | 8 | 31 to 90 days | \$78,000 |
| Darke | Sanitary Sewer I & P Program | The City of Greenville is proposing to address a very serious issue of infiltration and inflow of service water into its sanitary sewer collection system by girding and sealing 15,000 L.F. of existing sanitary sewer, installing of 250 Chimney seats in sanitary sewer manholes, and the rehabilitation of 60 sanitary sewer manholes. | City of Greenville | 18 | 31 to 90 days | \$905,000 |
| Darke | Sanitary Sewer Separation Testing and Report | The Village of Ansonia has several areas whereby storm water infiltrates the sanitary sewer system during rainfall events. Funding is hereby requested to test existing sections of the Village sewer system to determine the problem areas. The Village Wastewater Treatment Plant discharges into the Stillwater River which has been designated as a State Scenic Waterway. The anticipated outcome of this project is step one in remedying environmental concerns. The Village qualifies as a low to moderate income community. | Village of Ansonia | 5 | 31 to 90 days | \$50,400 |
| Darke | Village Elevated Water Storage Tank Repainting (2 | Repaint existing Village elevated water storage tank (2 towers, 100,000 gallons and 30,000 gallons) to ensure safety of drinking water treatment for the approximately 1,100 residents for the Village of Ansonia. The project is anticipated to employ two people for approximately one month. The Village of Ansonia qualifies as a low to moderate income village. The Village will keep the towers visible and beautiful for years to come. | Village of Ansonia | 2 | 31 to 90 days | \$60,000 |
| Darke | Emergency Generators | Provide backup emergency generator sets for the following: (1) Modifications to the existing Water Treatment Plant generator; (2) One portable generator to serve two sanitary sewer pumps; and (3) One diesel generator to serve the new Village Sanitary Lift Station. Provide a new automatic transfer switch. The outcome of the above improvements will: (a) lessen environmental concerns for the scenic Stillwater River by reducing effluents of sewage into the Stillwater during power outages; (b) allow the Village to provide a better quality of service to the Village Wastewater Treatment Plant; (c) Maintain portable water and fire service to approximately 1,100 Village residents during power outages and (d) The turnkey and installation of this equipment will stimulate jobs in the manufacturing and service sector. The Village of Ansonia is a qualifying low to moderate income community. | Village of Ansonia | 10 | 31 to 90 days | \$50,400 |
| Darke | family preservation and livelihood support | I am a truck driver who owns one truck I am looking for some assistance with my overhead. I currently owe: \$24,000 on truck \$185 per week trailer rent \$180 per month insurance \$130 per month personal health insurance \$600 per month maintenance on truck providing no major breakdowns happen I have approx \$18,000 in credit card debt accrued thru truck trying to stay afloat On top of all this I have a family which I support with my all the utilities car payments etc. I would be alright but not many businesses that move might have got going and there is alot of competition for the loads. It is extremely difficult right now please help? | Hott Trucking | 1 | 0 to 30 days | \$50,000 |

|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Darke | Sanitary Lateral Repairs, Sanitary Main Repairs | The Village of Ansonia requests funding to provide additional work to separate storm water infiltration into their sanitary sewer system. The Village also would like to eliminate combined sewer overflow (CSO) from the Stillwater River. The Village is required to remedy this environmental concern on or before July 1, 2010. The Stillwater River has been designated as a State Scenic River. The outcome of this project is to improve the water quality and environment. | Village of Ansonia | 10 | 91 to 180 days | \$336,000 |
| Darke | East Mobile Home Park Sewage Pump Station Improvment | Rehabilitation of existing Village owned sanitary lift station which serves the east end mobile home park. The existing lift station was placed in 1970 and in need of 2 new 2HP-230V 3-phase pumps, motors and controls. The outcome of this project is to improve sanitary and environmental concerns within the mobile home park. The Village Wastewater Treatment Plant discharge is to the Stillwater River which has been designated as a State Scenic Waterway. The Village of Ansonia has been designated as a low to moderate income community. | Village of Ansonia | 6 | 31 to 90 days | \$39,500 |
| Darke | Purchase Smoke Tester Equipment for Village | The Village of Ansonia has recently separated their combined storm/water system and sanitary sewer systems. Some infiltration of the storm water is getting into the sanitary sewer system. This smoke testing equipment will enable Village personnel to test to determine the points of storm infiltration. The Village needs to remedy this environmental concern on or before July 1, 2010. The Village Wastewater Treatment Plant discharges into the Stillwater River which has been designated as a State Scenic River. The outcome of this project will allow continuation of Village personnel employment as well as stimulate sales for the selected equipment manufacturer. In addition, the surface water quality and environment of the Stillwater River will be improved. | Village of Ansonia | 5 | 31 to 90 days | \$2,200 |
| Darke | Sewage Lagoon Transfer Structure Improvements | The Village of Ansonia requests funding for the purpose of making alterations to sewage treatment plant lagoons. Modification to the transfer structures will enable adjustment in the level of transfer effluent through the sanitary holding lagoons. The sewage treatment plant discharge is into the Stillwater River which is a State Scenic Waterway. The Village also requests funds for the purchase of a DO and PH meter for testing purposes at the wastewater treatment plant. The anticipated outcome of this project is to remedy environmental concerns with the sewage treatment system. The Village of Ansonia qualifies a low to moderate income community. | Village of Ansonia | 4 | 31 to 90 days | \$14,000 |
| Darke | Sewage Lagoon Transfer Structure Improvements | The Village of Ansonia requests funding for the purpose of making alterations to sewage treatment plant lagoons. Modification to the transfer structures will enable adjustment in the level of transfer effluent through the sanitary holding lagoons. The sewage treatment plant discharge is into the Stillwater River which is a State Scenic Waterway. The Village also requests funds for the purchase of a DO and PH meter for testing purposes at the wastewater treatment plant. The anticipated outcome of this project is to remedy environmental concerns with the sewage treatment system. The Village of Ansonia qualifies a low to moderate income community. | Village of Ansonia | 4 | 31 to 90 days | \$14,000 |
| Darke | Wastewater Treatment Plant Improvements Phase I | The project will consist of the expansion and upgrade of the existing Wastewater Treatment Plant from a design flow of 350,000 GPD to 750,000 GPD. The physical improvements include modifications to the influent pump station, construction of an oxidation ditch, construction of secondary clarifiers, clarifier flow distribution expansion and upgrades, effluent disinfection expansion and upgrades, effluent pump station expansion and upgrades, sludge handling improvements to include the construction of a new aerobic digester, upgrades and expanded storm flow equalization structures, and associated electrical work. The project, when completed, will bring the Village into compliance with NPDES permit limitations, maintain and improve water quality, provide the retention and expansion of existing and new businesses and industry, and retain and create approximately 1,145 jobs for the Village Versailles and State of Ohio. | Village of Versailles | 1,145 | 0 to 30 days | \$8,300,000 |
| Darke | Village Water Treatment Plant Filter Media Replace | Replace filter media consisting of graded gravels, anthracite, topsoil sand, silica sand and zeolite for (4) 4' x 4' filters at the Ansonia Village Water Treatment Plant Facility which serves approximately 1200 village residents. This project will maintain safe and clean low level water for the village. It is a maintenance project for the public health, safety and welfare of the community. This project will also have economic and environmental advantages for the community. | Village of Ansonia | 8 | 31 to 90 days | \$60,000 |
| Darke | Biological Nutrient Removal Model | Project will provide equipment modifications and equipment to test and provide data to determine the most efficient and cost effective manner for nutrient removal at the Greenville, Ohio Wastewater Treatment Facility. The project will provide equipment and equipment testing to model equipment configuration and application to remove nutrient removal in a manner which optimizes energy and provides configurations to optimally remove nutrients of concern at the Greenville Wastewater Treatment Facility. | City of Greenville, Ohio | 4 | 0 to 30 days | \$76,500 |
| Darke | Unconnected Sanitary Sewer Improvements | Provision of labor and materials to extend sanitary sewer pipelines to areas which are currently not in a service area. | City of Greenville | 3 | 91 to 180 days | \$351,800 |
| Darke | Wastewater Effluent Pumping | The design of the current facility does not allow for full treatment of all wastewater flows during periods of high precipitation. This design limitation requires that domestic wastewater and industrial wastewater be bypassed and discharged to the receiving stream without proper treatment during periods of high collection system flows. Stream high collection can cause inhibition of wastewater flow being discharged during periods of time when high flows occur. This project will provide effluent pumping capability which will allow for flows to be pumped from the Stillwater Treatment Facility during high flow periods or high stream level occurrences. These improvements will allow the treatment of all raw sewage under all flow conditions. | City of Greenville, Ohio | 22 | 91 to 180 days | \$730,000 |
| Darke | Wastewater Facility Instrumentation Improvements | This project will consist of upgrading and expanding the Wastewater Treatment Facility process monitoring and control system. The upgrade will provide the elimination of the current DTM communication data highway and allow replacement of this outdated communication control system with a TCP/IP based system. Additional monitoring sensors which are either upgraded or replaced with systems which can measure accurately and more quickly process information critical to the control of the advanced treatment facility equipment which is necessary to meet new and more accurate state acquisition and control. | City of Greenville | 4 | 31 to 90 days | \$148,000 |
| Darke | Lift Station Controll Upgrade | This project will provide new control panels for ten (10) of the existing City of Greenville wastewater lift stations. The new control panels will allow for automated monitoring and control of the lift stations twenty-four hours per day, seven days per week. This project will eliminate overflow of domestic sewage and allow for accurate accounting and monitoring of municipal and industrial flow being discharged to the municipal wastewater treatment facility. The control system will allow for continuous monitoring of all lift station equipment and provide immediate response to pump failures, level sensor failures and other systemic failures which could lead to discharges of raw wastewater with subsequent endangerment of public health. | City of Greenville, Ohio | 12 | 0 to 30 days | \$192,000 |
| Darke | Phosphorous Removal | This project will provide facilities to reduce the Phosphorous discharge concentrations from the Municipal Wastewater Treatment Facility to 1.0 mg/l or less. The project will include biological phosphorous removal supplemented with chemical phosphorous removal. The construction of these facilities will improve public health and safety. The project will allow the City of Greenville, Ohio to comply with NPDES permit requirements for the municipal treatment facility. | City of Greenville, Ohio | 20 | 91 to 180 days | \$540,000 |
| Darke | WWTP Biosolids Facility | This project consists of the construction of a new Biosolids production facility for the City of Greenville, Ohio. The project includes provision of energy efficient municipal sludge digestion for first biosolids disposal. Sludge digestion will include aerobic digestion facilities to collect, transport, digest and thicken biosolids. Energy consumption will be significantly improved as well as production of a bio-friendly product to include advanced technology digestion and disposal of the final product. This program will serve all Darke County residents with children between 0-5 years of age. Eligible families will be at or below 165% of poverty and with risk factors of family instability (i.e. domestic violence, mental health, substance abuse, and other crisis). The program will promote early stability, health, nutrition, child development, and self-sufficiency. Families will receive health services (i.e. immunizations brought to the home, public health nurse services, referrals to medical care), education (adult and neglect prevention, nutrition, safe/healthy homes, child development), assistance in accessing preschool or specialized services for children with delays, assistance with connecting adults to education (for themselves), and assistance to connect with appropriate community resources to promote self-sufficiency and stability. The program will maintain an emergency food and nutrition bank to assist families with basic needs. The program will provide crisis to help families and education about home safety. Employees will represent and accompany families in IDT (Interagency Diversion Team) to guide families in crisis with the help of family justice agencies. | City of Greenville | 110 | 91 to 180 days | \$4,860,000 |
| Darke | Maslow Project | This program will serve all Darke County residents with children between 0-5 years of age. Eligible families will be at or below 165% of poverty and with risk factors of family instability (i.e. domestic violence, mental health, substance abuse, and other crisis). The program will promote early stability, health, nutrition, child development, and self-sufficiency. Families will receive health services (i.e. immunizations brought to the home, public health nurse services, referrals to medical care), education (adult and neglect prevention, nutrition, safe/healthy homes, child development), assistance in accessing preschool or specialized services for children with delays, assistance with connecting adults to education (for themselves), and assistance to connect with appropriate community resources to promote self-sufficiency and stability. The program will maintain an emergency food and nutrition bank to assist families with basic needs. The program will provide crisis to help families and education about home safety. Employees will represent and accompany families in IDT (Interagency Diversion Team) to guide families in crisis with the help of family justice agencies. | Darke County Health Department | 3 | 0 to 30 days | \$70,000 |
| Darke | NORTH AND SYCAMORE STREET PROJECT | RENEWAL: SANITARY SEWER REPLACEMENT & ASPHALT MILLING AND SURFACE FOR ELIM. MAIN, SYCAMORE & NORTH STREETS. DESIGN AND ENGINEERING COMPLETE, PROJECT WAS SCRAPPED DUE TO VILLAGE UNABLE TO FUND. | VILLAGE OF UNION CITY | 10 | 31 to 90 days | \$534,550 |
| Darke | Ansonia School District, Clean Fuels Ohio Partner | One size fit station with storage for limited fast fit option, low capacity compressor, dispenser, card reader, capable of filling 6 school buses plus a few other vehicles. | Clean Fuels Ohio | 7 | 0 to 30 days | \$150,000 |
| Darke | Business Diversification | Set up a new department with 4 new sewing machines to retain 3 to 4 employees either currently laid off or working part time. Also, help pay for this year's workers comp expenses, part of employee's vacations, building repairs (roof), hairdressing bills and help promote our "Green" product line. Sales are down 30% in January alone compared to 2007 and we are not generating the income we need to help ourselves pay for the above. We are a small manufacturer who has been located in Union City, Ohio since 1959 (56 Years) and we are trying to keep the doors open. In our 50 years we have not asked the State or the Federal governments for any assistance. All of us at Ha-Sta Manufacturing thank you. | Ha-Sta Manufacturing Company Inc. | 15 | 31 to 90 days | \$125,000 |
| Darke | Municipal Building Windows | Provide a new energy efficient thermo pane replacement windows for the Village Municipal Building which was constructed in the early 1900's. | Village of Ansonia | 8 | 31 to 90 days | \$7,000 |
| Darke | Street Lighting and Tree Program for North Main St | Provide street lighting and trees for tree lawn for Phase 2 portion of the North Main Street (State Route 118) Project. North Main Street is a portion of the main North-South thoroughfare through the Village. The project is adjacent and crosses the Stillwater River which is designated as a State Scenic Waterway. The outcome of the project is to enhance the safety for pedestrians and those traveling along this corridor and to enhance the environment by installation of the trees. The project will also stimulate the economy for local small businesses. The Village of Ansonia is a low to moderate income qualifying community. | Village of Ansonia | 6 | 31 to 90 days | \$44,500 |
| Darke | New Roofing and Siding for Municipal Storage Build | Install new roof and siding on existing 22x40' storage building. The outcome is intended to provide weatherization for building constructed in the early 1900's and will afford work for a small local business contractor. The Village of Ansonia is a qualifying low to moderate income community. The building is used to store Village equipment and materials. The replacement of the roof and the siding will help keep water from coming in and heat from leaving. This will also have a positive aesthetic value that the Village would like to portray. | Village of Ansonia | 4 | 31 to 90 days | \$22,400 |
| Darke | Materials Storage Building | Construct a 24x25x16' tall wood post and beam covered storage materials building to house municipal cold paint and salt supplies within 12'x24' bins. The outcome of this project will enable this qualifying "low to moderate income" Village to house these materials in a dry environment and will allow a small local business contractor the opportunity to work. The storage facility will also allow the community to buy materials in bulk and will significantly reduce environmental concerns by storing their materials in a protected containment area. By having a storage facility the Village will be able to control costs more effectively. | Village of Ansonia | 5 | 31 to 90 days | \$22,400 |
| Darke | Village Maintenance Facility | Construction of a new 45'x60'x16' SO FT Maintenance Storage Facility for Village Street and Public Works Equipment Storage and Maintenance. The outcome of this project will allow replacement of an early 1900's wood barn in poor condition with an energy efficient facility which will serve the citizens of the Village of Ansonia qualifies as a low to moderate income community. The construction of the facility will allow smaller contractors within the surrounding area the ability to maintain their jobs for an extended six month project construction schedule. The barn being used today is in very poor condition. It is not feasible to keep heated. The size of the barn is not adequate and the floor, electrical and plumbing is in need of repair. A new barn would not only allow local people to work with the end results extending out into the community because of better service by the employees. The Village of Ansonia qualifies as a moderate to low income community and is in need of a dump truck to service the Village infrastructure needs. The outcome of this would be to provide the Village Street Department with adequate equipment to maintenance purposes. The old 1981 dump truck is getting beyond repair. To help keep the Village clean and maintained all departments make use of the truck. A new truck would help keep the Village thriving forward. | Village of Ansonia | 10 | 31 to 90 days | \$290,000 |
| Darke | Village Equipment Need - Purchase Dump Truck for S | The Village of Ansonia qualifies as a moderate to low income community and is in need of a dump truck to service the Village infrastructure needs. The outcome of this would be to provide the Village Street Department with adequate equipment to maintenance purposes. The old 1981 dump truck is getting beyond repair. To help keep the Village clean and maintained all departments make use of the truck. A new truck would help keep the Village thriving forward. | Village of Ansonia | 5 | 31 to 90 days | \$100,000 |
| Darke | Member Transportation, Darke County | Sublethreen Inc. is a Mental Health Center located in three counties of Ohio. We serve over 300 clients and our numbers continue to grow daily. Part of our programming allows us to offer free transportation to and from our site one day a week. Due to this our van has approximately 200,000 miles on it and is in need of monthly repairs costing us on average \$900 a repair, and with three vans operating that is more than our budget can handle. The vanpooz 3986 rides a year in Darke County alone and are being to get a new 12-13 passenger van. With this new van we will be able to provide more reliable transportation for our members to and from our site and to and from local events that they attend within the community. Any help that can be provided will be greatly appreciated from our members at Sublethreen and the staff. We appreciate your time and help. | SafeHaven Inc. | 4 | 0 to 30 days | \$45,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--------------------------------------|----------------|--------------------|---------------------------|
| Darke | Funding for Village Police Officers | The Village of Ansonia is currently searching for a way to keep its Police Department in service. With the help of the stimulus money the Village would have time to get the budget in order to maintain a police department in the future. The funding will enable the Village of Ansonia to employ officers for the public safety of its residents. The project will maintain jobs and have economic benefits to the health, safety, and welfare of the community. The Village of Ansonia qualifies as a low-to-moderate income community. | Village of Ansonia | 4 | 31 to 90 days | \$280,000 |
| Darke | Storm Drainage at Well Field | This project will have a positive impact on the community and will allow for the public safety by removing ponding and run-off water adjacent to the Village well field site. By removing the ponding water quickly the Village hopes to eliminate any further run off from nearby fields and stagnation of the water because of sitting so long from seeping its way down into the well field aquifer. The Village of Ansonia has been designated as a low to moderate income community. | Village of Ansonia | 4 | 31 to 90 days | \$20,000 |
| Darke | Northfork Branch Creek Bank Stabilization | This project will allow workers employment opportunities to stabilize the creek bank for the Northfork Branch of the Stillwater River, which runs through the Village of Ansonia, through the former Village landfill. Because of bank erosion, the village is concerned that it might have a problem with landslides on one side affecting the lagoons and air quality. By addressing the problem now much money can be saved along with keeping a clean environment. The Village is a low to moderate income community. | Village of Ansonia | 6 | 91 to 180 days | \$250,000 |
| Darke | Concrete Crushing at Landfill | This project will stimulate the local economy by allowing workers employment opportunities to crush and remove a large amount of abandoned pieces of concrete. The EPA and the Darke County Health Department have been asking for years to clean up this problem area. The gravel created can be recycled for future use by the Village Street and Maintenance Dept. The Village of Ansonia qualifies as a low to moderate income community. | Village of Ansonia | 4 | 31 to 90 days | \$7,500 |
| Darke | Southeast Bank Stabilization at Existing Wastewat | This project will stimulate the local economy by allowing workers to stabilize the bank of the Village wastewater lagoon. When lagoons get high and the wind blows hard it is rapidly eroding the south bank. By rebuilding with clay and rap, future eroding will be stopped, thus eliminating the possibility of contamination of the Stillwater River. The Village of Ansonia has been determined to be a low to moderate income community. | Village of Ansonia | 4 | 91 to 180 days | \$65,000 |
| Darke | Office Equipment for Village - Computer System | This project will allow the Village less than \$10,000 to update the Village Computer System to improve efficiency and safety associated with the operation of a small local government. By installing a more efficient computer system the employees of the Village will be able to keep and update records more accurately. The Village of Ansonia qualifies as a low to moderate income community. | Village of Ansonia | 2 | 31 to 90 days | \$10,000 |
| Darke | Office improvements and expansion to eliminate low | This project would allow for the reworking of our office space to employ more energy efficient technologies and eliminate the extremely low energy efficiency temporary office space that we currently utilize. | Classic Carriers Inc | 4 | 0 to 30 days | \$450,000 |
| Darke | Updated software to manage new, more energy effici | This project would allow for the purchase and installation of new software necessary to work with our newly purchased, lower emission diesel engines. | Classic Carriers Inc | 0 | 0 to 30 days | \$5,000 |
| Darke | Particulate filters for APUs | This project would allow for the purchase and installation of diesel particulate filters for our Auxiliary Power Units (APUs) which significantly reduces the emissions of these diesel power devices. These filters will be required for the operation of these devices in the state of CA within the next 2 years. | Classic Carriers Inc | 1 | 0 to 30 days | \$220,000 |
| Darke | Updating of our Tractor fleet to newer, more energ | This project would allow for the replacement of all tractors not already employing the latest technology in fuel efficiency and aerodynamics. While not directly creating any new jobs for our company, this would create/maintain untold hundreds of jobs for the tractor manufacturers. | Classic Carriers Inc | 0 | 0 to 30 days | \$7,200,000 |
| Darke | Updating of our Trailer fleet to newer, more energ | This project would allow for the replacement of all trailers not already employing the latest technology in fuel efficiency and aerodynamics. While not directly creating any new jobs for our company, this would create/maintain untold hundreds of jobs for the trailer manufacturers. | Classic Carriers Inc | 0 | 0 to 30 days | \$10,500,000 |
| Darke | Installation of Knight auxiliary battery system o | This project would allow for the installation of the Knight system auxiliary battery systems for our Tractor fleet. These units store the cold start power of the tractor in cold weather, allowing the engine to be shutdown instead of idled. In our test fleet, during winter months, this yielded a reduction in total idle engine idle time from 65% to less than 6%. | Classic Carriers Inc | 1 | 0 to 30 days | \$480,000 |
| Darke | Installation of 5-bar heaters on all Tractors | This project would allow for the installation of 5-bar auxiliary heaters for our Tractor fleet. These heaters heat the engine block and tractor in cold weather, allowing the engine to be shutdown instead of idled. In our test fleet, during winter months, this yielded a reduction in total engine idle time from 55% to less than 6%. | Classic Carriers Inc | 1 | 0 to 30 days | \$66,000 |
| Darke | Installation of Tire Inflation Systems on Tractors | This project would allow for the retrofitting of our existing fleet of trailers with tire inflation systems. These systems insure that all trailer tires remain properly inflated, yielding as much as a 5% fuel savings for the average fleet versus non-equipped fleets. | Classic Carriers Inc | 1 | 0 to 30 days | \$104,000 |
| Darke | Installation of Tire Inflation Systems on Trailers | This project would allow for the retrofitting of our existing fleet of trailers with tire inflation systems. These systems insure that all trailer tires remain properly inflated, yielding as much as a 5% fuel savings for the average fleet versus non-equipped fleets. | Classic Carriers Inc | 1 | 0 to 30 days | \$273,000 |
| Darke | Application of Solar Insulating Paint on all Refrig | This project would allow for the application of solar reflective insulation to the roofs of all of our refrigerated trailers. This insulation prevents the transmission of heat from the sun into the refrigerated trailer, reducing its workload on the refrigeration unit. This is said to increase operational efficiency by as much as 15% with a proportionate decrease in emissions. | Classic Carriers Inc | 1 | 0 to 30 days | \$210,000 |
| Darke | Installation of Trailer Side Skirts for Aero Effic | This project would allow for the installation of aerodynamic lower side skirts for our trailer fleet. Studies have shown an increase in fuel efficiency of as much as 15% across our entire fleet. These will also be a required item on all trailer entering the state of California in the next 2 years. | Classic Carriers Inc | 1 | 0 to 30 days | \$420,000 |
| Darke | Installation of Qualcomm Trailer Tracking Units fo | This project would provide for the installation of new Qualcomm T2 units in all of our trailers with real-time location tracking. This would provide fuel savings and greatly reduce diesel emissions by allowing us to better utilize our fleet, better track engine performance, allow real time access to engine diagnostic data, and allow access to change refrigeration unit parameters to improve operating efficiency. | Classic Carriers Inc | 1 | 0 to 30 days | \$190,000 |
| Darke | Installation of Qualcomm Mobile Communications Equ | This project would provide for the installation of Qualcomm Mobile Communications units in all of our tractors. This would provide fuel savings and greatly reduced diesel emissions by allowing us to better utilize our fleet, better track out of route mileages, allow real time access to MPG and engine diagnostic data, and better, real time communication to drivers to education and record them on "green" driving techniques. | Classic Carriers Inc | 1 | 0 to 30 days | \$200,000 |
| Darke | Single Wide Based Tire Retrofit for all Trailers | This project would allow us to retrofit all of our current trailer fleet to the single wide based tire package as recommended by the EPA. This would produce an estimated fuel savings of between 3 - 15% per year, saving at least 75,000 gallons of diesel fuel per year, with as much as 375,000 gallons potentially given EPA estimates. | Classic Carriers Inc | 1 | 0 to 30 days | \$460,000 |
| Darke | Single Wide Based Tire Retrofit for all Tractors | This project would allow us to retrofit all of our current tractor fleet to the single wide based tire package as recommended by the EPA. This would produce an estimated fuel savings of between 3 - 15% per year, saving at least 75,000 gallons of diesel fuel per year, with as much as 375,000 gallons potentially given EPA estimates. | Classic Carriers Inc | 1 | 0 to 30 days | \$240,000 |
| Darke | APU Installation | This project will allow us to retro fit all of our current fleet of over the road tractors with auxiliary power units (APUs). These units allow the trucks main diesel engine to be shut off when the truck is not in motion, dropping our idling figures in our test fleet from 55% of total run time at idle to less than 6%. | Classic Carriers Inc | 0 | 0 to 30 days | \$540,000 |
| Darke | AUTOMOTIVE REPAIR | I LIVE IN DARKE COUNTY AND WE HAVE LOST ALOT OF JOBS. I AM AND HAVE BEEN TRING TO FIND SOME HELP WITH CREATING AND RETAINING JOBS WITH IN THE COUNTY. I HAVE WRITTEN TO TED STRICKLAND AND MY RESPONSE WAS THERE IS NO HELP FOR STARTING A SMALL BUSINESS. IT IS SAID DUE TO ALL THE JOB LOSS. MY GOAL IS TO BUY A YEAR OLD BUSINESS IN DARKE COUNTY TO NOT ONLY RETAIN THE CURRENT 6 JOBS BUT TO EXPAND TO CREATE MORE JOBS. AS WELL AS GET TRAINING WITH THE GREENVILLE AND AVIATO TRAINING EXPENSE AND TO HELP NEW BEGINNER TECH. THE AUTOMOTIVE FIELD WILL BE AROUND FOR MANY YEARS TO COME. IF I HAD THE OPPORTUNITY TO NOT ONLY HELP KEEP AND CREATE NEW JOBS WITH IN THE COUNTY IT WILL GENERATE MORE TAXES FOR THE STATE AND FEDERAL GOV'S. I THANK YOU FOR YOUR TIME FOR READING MY PROJECT. | AUTOMOTIVE SERVICE | 6 | 0 to 30 days | \$600,000 |
| Darke | Classic Carriers Inc., a Clean Fuels Ohio partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Darke | Maintenance Equipment | Three pieces of new equipment (plate compactor, roller and tar kettle) for the purpose of maintaining streets. This will keep a minimum of four poeple working while improving streets and help make the streets last longer between overlays. The village of Ansonia is considered low to moderate income. | Municipality | 4 | 31 to 90 days | \$34,000 |
| Darke | Christmas Is | a woman from the ages of 18 to 25 years of age, 350 parents and over 100 + associate staff members. | Darke | Maintenance Equipment | Need three pieces of equipment (plate compactor, roller and tar kettle) so we can maintain streets properly so that the village can get more life out of them. This will also keep four people working when improving streets. The village of Ansonia is considered low to moderate income. | Municipality | 4 | 31 to 90 days | \$34,000 |
| Darke | Public Housing | As the result of the death of my Father, my two teenage daughters and I have recently inherited 14 rental properties that are in extreme need of repair. These houses were built in the early 1900s for employees of a local factory. All 14 carry the same address with different unit numbers. The properties have had spaces over the years but no any structural updates. I wish to help my community by providing housing that is comfortable and affordable. The houses are 1 & 2 bedrooms. They currently rent for no more than \$325 per month for a 2 bedroom. In today's economy affordable housing is much needed. It is a matter of my heart to take these properties that my Father left for our family and our town to good use to benefit my community. My request for funds is to bring these properties up to date. I have recently been working with Metropolitan Housing. I have a few tenants that are Metropolitan approved. | Public Housing | 28 | 0 to 30 days | \$150,000 |
| Darke | business improvements | I have been in business for 19 years and this economy has hit hard. I would like to upgrade my equipment and the funds left over would be funds to help support my small business. | Tropical Isle Tanning Salon | 2 | 31 to 90 days | \$30,000 |
| Darke | energy saver | This would be for installation of the energy efficient windows, attic installation, new electric wiring for house and wind turbine with smart grid technology. An unemployed and wife on disability home in need of roof and septic system needs replaced and bathrooms redone for my disabled wife and one stop for easy entry and exit. as well as going green on our heat using solar power to give back to the community as a model home to help understand going green. | klosterman family | 0 | 0 to 30 days | \$30,000 |
| Darke | sewer system roof and bath remodel | An unemployed and wife on disability home in need of roof and septic system needs replaced and bathrooms redone for my disabled wife and one stop for easy entry and exit. as well as going green on our heat using solar power to give back to the community as a model home to help understand going green. | morton family | 3 | 31 to 90 days | \$60,000 |
| Darke | Arcanum Wind Energy Program | Thank you Steven Morton The Arcanum-Butler Wind Program would use wind energy to supplement energy provided to the new PK-12 school facility. Facilitating a wind mill would provide a continued educational tool for over 1200 students and allow the district to retain high-quality teachers. In addition to the educational benefits, constructing a wind-mill would save over \$100,000 annually, thus giving a direct break to local taxpayers. Your consideration of this renewable energy initiative is appreciated. | Arcanum-Butler Local School District | 8 | 91 to 180 days | \$1,250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Darke | Workforce Development Expansion | This project is intended to expand workforce development education and training (and re-training) to both teens and adults in the Darke County area. Greenville City School District (GCSD) is already a core CTED (Cleveland Technical Planning District) and has a strong foundation and capacity for delivering career-technical education. GCSD proposes to work with business stakeholders, local institutions of higher education, and the P-16 Council to develop, design and implement workforce development programming that is sensitive to the needs of west-central Ohio. The dollars will be spent to renovate and expand facilities, purchase equipment, train teachers, and pay for the administrative costs associated with the expansion of secondary and adult workforce development programming. One expected outcome of the program would be to develop a better trained workforce to attract new jobs and industry to the area, especially STEM (Science technology engineering math) jobs to make the region and state more competitive globally. A second expected outcome would be higher rates of the population entering higher educational education. | Greenville City School District | 60 | 0 to 30 days | \$4,700,000 |
| Darke | Using renewable energy for commercial grain drying | To use wind power and other renewable energy to dry our farm grain and commercial grain. Replaces grain dryers and poultry lights with energy efficient dryers and CFL lights. Sell excess electricity to neighbor farms and/or electric company. This reduces the purchase of a wind mill and necessary equipment to produce renewable energy. | Fred Wuebker Farms | 3 | 0 to 30 days | \$410,000 |
| Darke | Youth After School Latchkey/Employment Program | After school "latchkey" services and programming for the youth. Includes: online and at risk youth, 4 pm to 8 pm at Boys and Girls Club facilities. Provide games, crafts, workshops/workshop, homework guidance, internet computers, field trips, etc.; so that parents can continue to work and also help youth find part-time jobs. All youth supervised by trained adult staff. | Boys and Girls Club of Greenville, Inc. | 20 | 0 to 30 days | \$10,000 |
| Darke | Teree and Limb Grinding | Need to purchase a horizontal file grinder in order to grind all limbs, tees and debris accumulated during the year from residents of the community. This will help maintain and beautify the town. By grinding all limbs and brush the village can, in turn, give back to the community by allowing citizens to reuse the grinding for landscaping. | Municipality | 4 | 31 to 90 days | \$180,000 |
| Darke | Arsenic Removal Water Treatment System | We have historically EPA acceptable arsenic levels in the drinking water of our K-12 public school. The project is to add a water purification system that would drastically reduce the arsenic levels through a process of attracting the arsenic to the iron and removing the iron. This project will allow non-profit Ohio Energy Project to assist Darke Co. school districts improve the energy efficiency of facilities & educate students & staff about energy & energy efficiency, including: Analysis of each building's current energy usage & costs; Identification of low-cost/no-cost energy conservation opportunities; Identification of projects for significant energy conservation savings; Assistance to district's superintendent/correlation directors & teachers on educational energy efficiency & sustainability programs for classrooms, staff & community; Implementation of district-wide sustainable energy efficiency programs, including energy education & energy efficiency programs for students, staff & community; Assist districts with potential funding avenues to implement energy efficient projects, including federal, state & utility grants & rebates, such as HB 204 and Ohio Advanced Energy program. Expected outcome: to provide districts with information necessary to operate facilities more efficiently, & more importantly, educate students, staff & community to understand how to conserve energy & make the environment a cleaner, safer place to be today & in the future. | Madisonava Valley LSD | 5 | 31 to 90 days | \$70,000 |
| Darke | Energy Efficiency Educational Programs for Darke C | This project will allow non-profit Ohio Energy Project to assist Darke Co. school districts improve the energy efficiency of facilities & educate students & staff about energy & energy efficiency, including: Analysis of each building's current energy usage & costs; Identification of low-cost/no-cost energy conservation opportunities; Identification of projects for significant energy conservation savings; Assistance to district's superintendent/correlation directors & teachers on educational energy efficiency & sustainability programs for classrooms, staff & community; Implementation of district-wide sustainable energy efficiency programs, including energy education & energy efficiency programs for students, staff & community; Assist districts with potential funding avenues to implement energy efficient projects, including federal, state & utility grants & rebates, such as HB 204 and Ohio Advanced Energy program. Expected outcome: to provide districts with information necessary to operate facilities more efficiently, & more importantly, educate students, staff & community to understand how to conserve energy & make the environment a cleaner, safer place to be today & in the future. | Ohio Energy Project | 5 | 31 to 90 days | \$175,000 |
| Darke | Energy Audits & Energy Efficiency Educational Prog | This project will allow non-profit Ohio Energy Project to assist Darke Co. school districts improve the energy efficiency of facilities & educate students & staff about energy & energy efficiency, including: Analysis of each building's current energy usage & costs; Identification of low-cost/no-cost energy conservation opportunities; Identification of projects for significant energy conservation savings; Assistance to district's superintendent/correlation directors & teachers on educational energy efficiency & sustainability programs for classrooms, staff & community; Implementation of district-wide sustainable energy efficiency programs, including energy education & energy efficiency programs for students, staff & community; Assist districts with potential funding avenues to implement energy efficient projects, including federal, state & utility grants & rebates, such as HB 204 and Ohio Advanced Energy program. Expected outcome: to provide districts with information necessary to operate facilities more efficiently, & more importantly, educate students, staff & community to understand how to conserve energy & make the environment a cleaner, safer place to be today & in the future. | Ohio Energy Project | 5 | 31 to 90 days | \$175,000 |
| Darke | SMALL BUSINESS | HOULD LIKE TO UP GRAD MY BUSINESS AND WENT 3 EMPLOYEES TO MY ESTABLISHMENT. WOULD LIKE TO HAVE MORE INTEREST IN THE SPACE. YEAR. IF I COULD PAY OFF MY BUSINESS AND UP GRADE MY ESTABLISHMENT TO INCLUDE MORE INTEREST IN THE SPACE. NEWER EQUIPMENT HEATING COOLING APPLIANCES IMPROVEMENT IN PARKING AREA AND TO ADD ON PROJECTS TO 1600 SQ FEET. BRINGING MORE BUSINESS TO THE COMMUNITY. | small business | 2 | 31 to 90 days | \$150,000.00 |
| Darke | Cancer Center | Cancer patients from Greenville and Darke County must make a 40 mile round trip to receive radiation therapy for breast and prostate cancer. The services are five or seven days a week for several months. | Wayne Hospital | 25 | 181 days or more | 7,500,000 |
| Darke | Hospital Expansion Phase III | The Cancer Center at Wayne Hospital would provide for radiation therapy services on a local basis. | Wayne Hospital | 100 | 181 days or more | 15,000,000 |
| Defiance | Historical Jail Renovation | Develop and construct two patient care floors above the four floor project under construction at Wayne Hospital, 135 Swainbar Street, Greenville, OH 45331. | Wayne Hospital | 100 | 181 days or more | 15,000,000 |
| Defiance | Road Widening | The hospital needs to replace semi-private patient rooms with all private rooms for patient care quality and safety. | Maumee Valley Planning Organization | 42.5 | 91 to 180 days | \$2,550,000 |
| Defiance | Intersection Improvement | County office building improvement | Maumee Valley Planning Organization | 3.75 | 91 to 180 days | \$225,000 |
| Defiance | Intersection Improvement | Road widening in commercial area | Maumee Valley Planning Organization | 8.75 | 91 to 90 days | \$525,000 |
| Defiance | Intersection Improvement | Intersection improvement in commercial area | Maumee Valley Planning Organization | 3.13 | 91 to 180 days | \$187,500 |
| Defiance | Airport runway extension | Runway extension to permit jet landings | Maumee Valley Planning Organization | 23.75 | 31 to 90 days | \$1,425,000 |
| Defiance | Senior center rehab | Rehab of abandoned school into senior center | Maumee Valley Planning Organization | 18.75 | 0 to 30 days | \$1,125,000 |
| Defiance | Water line/sewer extension | Waterline extended to mixed use subdivision | Maumee Valley Planning Organization | 8.75 | 31 to 90 days | \$525,000 |
| Defiance | Street resurfacing | Street widening in residential area | Maumee Valley Planning Organization | 3.93 | 31 to 90 days | \$236,055 |
| Defiance | Wastewater system | Wastewater system in LMI area | Maumee Valley Planning Organization | 34.97 | 91 to 180 days | \$1,500,000 |
| Defiance | Wastewater system | Wastewater system in LMI area | Maumee Valley Planning Organization | 23.21 | 91 to 180 days | \$1,000,000 |
| Defiance | 1.5 Million Gallon Water Tower | Replacement of existing antiquated 300,000 gallon water tower with new 1,500,000 gallon water tower. This is necessary the City's stored drinking water supply from 5 hours to 12 hour. The project will include a water cast case of the existing system to accurately locate the best location of a new tower, purchase of land, geotechnical investigation, design and construction of the new tower. This is a necessary project that has been on hold due to lack of funding. | City of Defiance | 95 | 31 to 90 days | \$1,900,000 |
| Defiance | Bridge replacement | Bridge reconstruction on county road | Maumee Valley Planning Organization | 9.34 | 31 to 90 days | \$600,000 |
| Defiance | Bridge replacement | Bridge reconstruction on county road | Maumee Valley Planning Organization | 3.13 | 31 to 90 days | \$187,500 |
| Defiance | Bridge replacement | Bridge reconstruction on county road | Maumee Valley Planning Organization | 2.94 | 31 to 90 days | \$176,250 |
| Defiance | Waterline extension | Waterline extension to industrial site | Maumee Valley Planning Organization | 26.02 | 31 to 90 days | \$660,901 |
| Defiance | NW electric loop | Electrical loop construction for ind. retention | Maumee Valley Planning Organization | 33.75 | 31 to 90 days | \$2,025,000 |
| Defiance | Project Hicksville Road | Extending the Industrial Drive thru to 3 state road ways making the park more easily accessible and desirable for companies looking to expand. Reopening Columbus Ave thru to the Industrial Drive making the Hospital more accessible by the village and other entities. Other entities: senior center/development point. Next step of the village strategic plan for job creation. The village currently anticipates no new town units are permitted until such agencies being their sheriff or police department. Current financial decreases in revenue for the local governmental entities are forcing reduction in law enforcement officers. Notification has been given by some of the participants regarding the loss of MAN Unit that removal of that officer assigned to the MAN Unit may be necessary. Currently, the general population of the MAN unit is impacted through the arrest and conviction of drug offenders. Without narcotics agents to work undercover drug operations, our communities will begin to see the immediate and long term effects of the reduced drug enforcement. The communities in general would also see an increase in crime. The outcome expected by retaining these officers would be to maintain the regionalized protection for the communities covered by the MAN unit and current levels of road officers for these sheriff and police departments. | Defiance County Economic Development, CIC | 150 | 91 to 180 days | \$1,950,000 |
| Defiance | Multi-Area Narcotics Unit | Extending the Industrial Drive thru to 3 state road ways making the park more easily accessible and desirable for companies looking to expand. Reopening Columbus Ave thru to the Industrial Drive making the Hospital more accessible by the village and other entities. Other entities: senior center/development point. Next step of the village strategic plan for job creation. The village currently anticipates no new town units are permitted until such agencies being their sheriff or police department. Current financial decreases in revenue for the local governmental entities are forcing reduction in law enforcement officers. Notification has been given by some of the participants regarding the loss of MAN Unit that removal of that officer assigned to the MAN Unit may be necessary. Currently, the general population of the MAN unit is impacted through the arrest and conviction of drug offenders. Without narcotics agents to work undercover drug operations, our communities will begin to see the immediate and long term effects of the reduced drug enforcement. The communities in general would also see an increase in crime. The outcome expected by retaining these officers would be to maintain the regionalized protection for the communities covered by the MAN unit and current levels of road officers for these sheriff and police departments. | Multi-Area Narcotics Unit | 7 | 0 to 30 days | \$275,000 |
| Defiance | Taxi Way Relocation | Currently we have bids on a taxi way relocation project. Only the ground work can be completed now. Paving will have to be done at a later date due to lack of funding. If we could receive an additional \$350,000 in FAA money, we could finish this project. | Defiance County Commissioners | 15 | 0 to 30 days | \$350,000 |
| Defiance | Runway Extension | This project is needed locally for our major businesses that use the airport periodically and would like to see it on a daily and monthly basis if we had a 2000 foot runway for safety reasons. This will provide 15 high loading slots for approximately 100 planes a year. The job can be bid out within 2-4 months. All engineering plans are complete on this project. The Defiance County Airport brings in over \$6 million of goods and services to Defiance County annually and the timber will substantially grow once this project is finished and larger planes can land safely. This project will increase the volume of aircraft activity at the airport, increase the amount of local business activity and support future economic development and growth in the surrounding area. | Defiance County Commissioners | 15 | 91 to 180 days | \$1,400,000 |
| Defiance | Auglaize Sewer System | The Auglaize River Sewer Project is a sanitary sewer project covering approximately 6 miles, 3 miles on each side of the Auglaize River. Defiance County is under Findings and Orders since 1982 from the Ohio EPA to eliminate pollution in the Auglaize River, one of the main tributaries in the river for drinking water, recreation and fishing. The Auglaize River joins the Maumee River near downtown Defiance, which flows into Lake Erie. The project will include over 20,000 linear feet of gravity sewer, 5 pump stations, and a non-rawwater lagoon to serve 440 residential customers. We have been notified by ODEPA that we don't move forward with this project, it will be turned over to the Ohio Attorney General's Office for legal action. | Defiance County Commissioners | 25 | 91 to 180 days | \$1,500,000 |
| Defiance | County Facilities | Defiance County has been trying to update the Courthouse and Administration Buildings for over eight years. In 2006, a law was passed for Courthouse renovation bid. We are preparing to renovate a Sheriff's Residence and Jail that has regional historical significance. We will be adding an addition to this building to house some offices currently in our courthouses. This will be the first phase allowing us to restore/revitalize the courthouses for judicial functions. The Courthouse was originally built from 1871-1873. In 1955 the main roof over the square clock tower and much of the original stone trim was removed, to make room for a third story. The Department of Justice has notified us that the ramp at the Courthouse does not meet ADA standards. There is no handicap accessibility in the Administration Building. Both buildings are over 40 years old. The piping is so corroded, that proper flow cannot be maintained. This causes uneven heating in the buildings. Old plumbing continues to be a problem, as we have had many leaks that have caused flooding of various offices. Courthouse security issues also need to be addressed as new law requirements have been passed. | Defiance County Commissioners | 24 | 91 to 180 days | \$1,000,000 |
| Defiance | Senior Center Building | We have recently purchased a 1942's era elementary school building to renovate for a Community Senior Center. This building is approximately three times the size of the current Senior Center, and is an one story. The current center is an older two story home, with no handicap accessibility to the second floor. This renovation will include energy efficient windows, roofing, and heating and air conditioning systems. A goal of the Senior Center is to add an adult day care wing. This wing will provide a safe environment for residents who may continue to work. The community and local government have raised \$1,400,000 in local funds, but this is not enough to finish the project. Additional money will allow us to move in while continuing to raise donations. In 2008, the Defiance County Senior Center served 91,084 congregants meals in its current facility. They had a total of 1,108 scheduled activities and transported senior 12,140 times to various appointments and trips. | Defiance County Commissioners | 28 | 91 to 180 days | \$800,000 |
| Defiance | Road Deputy Retainment | The Defiance County Sheriff's Office provides law enforcement for 40,000 residents of Defiance County. We have had 12 deputies assigned for Road patrol and investigators for years but because of budget shortfalls, we will be required to take a 20% budget cut from the county commissioners. With the infusion of \$120,000, we will be able to continue to serve the residents of Defiance County without sacrificing services. Because of the remoteness of our county, the necessity of keeping 12 road officers is of the utmost importance to insure the wellbeing of our residents. | Defiance County Sheriff's Office | 2 | 0 to 30 days | \$120,000 |
| Defiance | Water tower rehab | Paint and repair of tower | Maumee Valley Planning Organization | 2.44 | 31 to 90 days | \$146,250 |
| Defiance | Phase "B" of New Sanitary Sewer Separation System | Sanitary sewer system in unsewered area as mandated by DEPA findings & orders to remove unsanitary sewers from the meandering stream. Construction of approximately 13,000 linear feet of new gravity sewer line, 4100 linear feet of low pressure sewer line, non-aerated controlled discharge lagoons and all necessary appurtenances to provide a collection and treatment facility for the residents of the Village of Ney by safety DEPA Findings and Orders. | Ayersville Water & Sewer District | 10 | 31 to 90 days | \$2,284,000 |
| Defiance | Village of Ney Wastewater Collection and Treatment | Construction of approximately 13,000 linear feet of new gravity sewer line, 4100 linear feet of low pressure sewer line, non-aerated controlled discharge lagoons and all necessary appurtenances to provide a collection and treatment facility for the residents of the Village of Ney by safety DEPA Findings and Orders. | Village of Ney | 0 | 31 to 90 days | \$1,000,000 |
| Defiance | Municipal Court Building | The City of Defiance is currently designing a new Municipal Court facility. Our existing structure is in our former municipal building that is approximately 40 years old. It is outdated and antiquated and in need of replacement. The building itself does not allow for renovations as the land here also occupies the space available. This new building will be approximately 16,000 SF and housed on the Municipal Court, the Clerk's Office, the Probation Office, the City Law Director and assistant as well as a Magistrate's Court. | City of Defiance | 180 | 0 to 30 days | \$3,600,000 |
| Defiance | CSO Group 6 | Construction of sewer separation improvements at the Group 6 area in accordance with the City's CSO Long Term Control Plan and draft Consent Order. The project includes replacement of approximately 19,000 linear feet of sanitary sewers and manholes. The project will also eliminate three regulators and one overflow manhole. The project will keep the City in compliance with our draft Consent Order and eliminate sanitary sewage overflows to the Maumee River. | City of Defiance | 285 | 0 to 30 days | \$5,700,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---------------------------------------|---|---|----------------|--------------------|---------------------------|
| Defiance | Waste Water System/Highland Twp. | Wastewater System in LMI Area | Maumee Valley Planning Organization | 86.07 | 91 to 180 days | \$5,164,418 |
| Defiance | CSO Group 31A | Planning phase (Sanitary Sewer Evaluation Survey) for the Group 31A (liner intrusion) area in accordance with the City's CSO Long Term Control Plan and draft Consent Order. This project will provide evaluation and analysis of existing combined sewer and storm sewer connections. This information will then be used to design sanitary separation and elimination of sanitary sewer overflows to the Maumee River. | City of Defiance | 27 | 0 to 30 days | \$541,000 |
| Defiance | CSO Group 5 | Engineering design phase for the Group 5 area in accordance with the City's CSO Long Term Control Plan and draft Consent Order. This project will provide construction documents for the separation of existing combined sewers and elimination of sanitary sewer overflows to the Maumee River. The design will then be followed by construction of sewer separation improvements in the Group 5 area in accordance with the City's CSO Long Term Control Plan and draft Consent Order. The project includes replacement of approximately 13,400 linear feet of sanitary sewers and manholes. The project will also eliminate three sanitary sewer overflow manholes. The project will keep the City in compliance with our draft Consent Order and eliminate sanitary sewage overflow to the Maumee River. | City of Defiance | 219 | 0 to 30 days | \$4,379,000 |
| Defiance | Ind. Park Detention Basin | Stormwater Control at Ind. Park | Maumee Valley Planning Organization | 5 | 31 to 90 days | \$300,000 |
| Defiance | SR 66 Widening and Bridge Replacement | This project includes the widening and addition of concrete islands in the existing SR 66 corridor. Also included is the replacement of a 2-lane bridge with a 4-lane bridge. The area currently experiences a high rate of accidents due to unsafe turning movements. The existing bridge is deficient due to the current and projected traffic volumes as well as clearance restrictions to the new US 24 bypass. The improvements will provide safer and more efficient transportation for the City's residents and provide improved access to commercial developments along the City's busiest business corridor. The improvements will also spur additional development as roadway capacities are increased. This project is currently under design in conjunction with ODOT and has an expected construction beginning in 2010. | City of Defiance | 670 | 181 days or more | \$2,500,000 |
| Defiance | Waste Water System/Ney | Wastewater System in LMI Area | Maumee Valley Planning Organization | 44.11 | 0 to 30 days | \$2,000,000 |
| Defiance | 80/20 Resurfacing Program | In 2010 ODOT will resurface state routes within the City limits. The City is responsible for 20% of the total costs. Many of the state routes through the City have been damaged due to snow truck traffic used for the construction of the US 24 by-pass project from Fort Village to Toledo. This project will restore the streets to a maintainable condition and reduce damages to City vehicles as well as the traveling public. | City of Defiance | 80 | 181 days or more | \$370,000 |
| Defiance | Wastewater System/Defiance Twp. | Wastewater System in LMI Area | Maumee Valley Planning Organization | 92.53 | 91 to 180 days | \$5,551,812 |
| Defiance | Resurfacing Program | The City routinely resurfaces various streets throughout the City on a yearly basis. With the current economic situation this program may be cancelled for the current year. As these projects are throughout the City residents city wide benefit from better drivability in their neighborhoods. These improvements also tend to enhance property values. | City of Defiance | 15 | 31 to 90 days | \$300,000 |
| Defiance | DRMC Diversified Utility Program | According to the Department of Energy, hospitals are among the nation's most complex, diverse, and energy-intensive facilities. It is the goal of Defiance Regional Medical Center (DRMC) to become an Energy Smart Hospital. To reduce our carbon footprint and reduce the Pollution Prevention of energy using the example for all hospitals to become environmental friendly, DRMC would like to implement a Overhead Utility Program which would include the installation of a Wind Turbine to provide onsite, electrical generation and help offset the high cost of utilities and help to include a healthy study, wind monitoring project, and finally the purchase of the wind turbine. | Promedica Health System | 6 | 181 days or more | \$761,000 |
| Defiance | RSNWO Communications Project | Recovery Services of Northwest Ohio, Inc. currently serves residents of four rural Northwest Ohio counties. It is a total of 100,000 residents who travel between offices, and sometimes see the same client in more than one office. It is a challenge to get complete records transferred to the doctor and caregivers when clients present for treatment at different sites. A common practice medical record system that our agency would alleviate this problem, and greatly improve client care. A software upgrade is necessary to attain this goal. The goal is to improve connectivity between sites, along with staff. Costs include additional licenses, software, hardware, migration, and full IT staff to administer this program. | Recovery Services of Northwest Ohio, Inc. | 25 | 0 to 30 days | \$300,000 |
| Defiance | Physiatrist for RSNWO | Recovery Services of Northwest Ohio is requesting funds to increase our doctor's services for clients in Northwest Ohio counties. There is a shortage of physiatrists in each of these four counties, and this would expand services to the most in need. Costs would include hiring a full time doctor, upgrading current communications system to accommodate client records, and adding support staff to assist the doctor. The most recent budget cost forecast to reduce our services by almost 7%. This money would help us to restore those services, and expand our reach. | Recovery Services of Northwest Ohio, Inc. | 5 | 0 to 30 days | \$300,000 |
| Defiance | North Clinton Pump Station | Renovate and replace existing pump station, 2,260 feet of force main and 562 feet of gravity sewer. This project will relocate the pump station for future State Route 66 widening and eliminate a sanitary sewer overflow as required by the Ohio EPA. | City of Defiance | 32 | 0 to 30 days | \$334,000 |
| Defiance | Phase B Sewers Project #1011-011 | Second phase of sanitary sewer installation as required by the ODEP Findings and Orders. \$5,000 linear feet 180 manholes | Ayersville Water & Sewer District | 40 | 31 to 90 days | \$6,900,000 |
| Defiance | Broadband network to rural area | To build out approximately 80 miles of broadband infrastructure with fiber optics throughout the rural northwest Ohio area. To provide affordable broadband, broadband and internet services to approximately 20,000 rural and small village homes. To provide communication choices are fast, stable and affordable. Outcome: create more jobs throughout northwest Ohio while at the same time offering affordable broadband and internet access. | Clear View Communications | 40 | 31 to 90 days | \$2,000,000 |
| Defiance | Hicksville Stormwater Detention Basin | Construction of a centralized detention basin for the Village and Industrial Park to keep stormwater retained and eliminate downstream flooding within areas of the Village. | Village of Hicksville | 10 | 31 to 90 days | \$400,000 |
| Defiance | Clearview Water Loop | 3,000 linear feet of new 10 inch water line to complete a loop on N11 side of village. This will greatly increase water pressures for the residents, increase flow rates for hydrants, and prevent shutting off water to several hundred residents when breaks occur on the existing dead-end main. We have the P11 and are ready to go to bid. | Village of Hicksville | 6 | 31 to 90 days | \$189,000 |
| Defiance | Drena' Dream | Project monies would be used for those persons who are homeless and other resources are not available. The money would be used targeted to persons with mental illness, substance abuse, veterans, and those being released from prisoners in the four county areas in NW Ohio. It would also be nice to use some of the money to help pay for gas for transportation to various appointments. In this area of Northwest Ohio there is no public transportation. | Four County ADAMs Board | 4 | 0 to 30 days | \$20,000 |
| Defiance | Defiance County E911 | Retain Current staffing of Communications Officers | Defiance County E911 Communications Center | 1 | 0 to 30 days | \$50,000 |
| Defiance | Domestic Violence Programming | Expansion and continuation of services to domestic violence victims and their children currently not receiving services as a result of funding and staff reductions. Provide services to 200 victims through counseling, victim advocacy, home based services, emergency shelter services and family court services. | Center for Child and Family Advocacy, Inc. | 7 | 0 to 30 days | \$250,000 |
| Defiance | NOWAC | Outcomes: Increase safety for dx victims through safe shelter; increase response time by therapists and victim advocates; identify previously unreported domestic violence incidents in family court divorce filings. We are a Council of Government consisting of 6 County Boards of Mental Retardation and Devolp. Disabilities. We administer Medicaid waivers for the 6 county boards. The project would allow us to purchase a scanner, server, and software to integrate healthcare information into electronic document imaging. Additional software would be purchased in automating payments for Medicaid waiver providers to ensure timely payment of waiver providers. The project would also fund 1 full time position and a temporary position, as well as retain several current positions. The expected outcome would be to maximize administrative efficiencies and control costs in the administration of Medicaid waivers. This project would serve the needs of Medicaid recipients in the six county area and eliminate duplication of healthcare records within the participating agencies. Records include dx, orders, medication administration records, and various assessments. The document imaging software would allow county staff to access critical healthcare information with greater efficiency in order to meet the specialized needs of those individuals served with mental retardation and developmental disabilities | Northwest Ohio Waiver Administration Council(NOWAC) | 2 | 0 to 30 days | \$102,000 |
| Defiance | Northside Water Main | Because of the increased growth being experienced in Defiance north of the Maumee River, especially between Stadium Drive and Elinor Road, the City has determined that there is a need to increase water service to this area. The purpose of this project will be the installation of a new 16" or larger Water Transmission Main. The initial phase will be an evaluation using the City of Defiance water distribution system computer model to evaluate pressures and flow changes and elevated tank functions to determine the most economical route for this new main. This project will allow additional economic development on the north side of Defiance. | City of Defiance | 150 | 31 to 90 days | \$3,000,000 |
| Defiance | Hicksville Police Department | Assist budgetary funds with maintaining current staffing levels by reassigning positions of two full time police officers for a least the minimum of two years. | Hicksville Police Department | 2 | 0 to 30 days | \$200,000 |
| Defiance | Project Hicksville Rail | Expanding a rail spur an additional 900 to include a cross dock facility for loading and off loading of goods for local companies to be able to ship by rail. Project also includes a road crossing. This would give the District building access to rail, other than being rail over 1.5 miles to the building. | Defiance County Economic Development, CIC | 10 | 91 to 180 days | \$30,000 |
| Defiance | CONSTRUCTION OF HORIZON II | Construction of a 10-12 unit apartment complex for persons with mental illness. ODMH has already committed to \$215,000 for this project. This agency has provided affordable housing in an independent living environment. Live-in staff is on site offering services a sense of security. This agency has over 60 applications on the wait list for housing assistance. Operating funds have been cut making it tough to assist persons with unique housing needs thus the less this agency pays for development gives us access to operating. This housing offers stable housing along with an opportunity for the tenants to bond with the community. The units are 400 s.f. each with 1 bedrooms, living room, kitchen and bath. Entry is through a common door. There is common area offering the tenants a place to socialize. The site has already been chosen and 8 offers access to many services these tenants will require. Transportation is an issue-many services as well as shopping and a soap kitchen are within walking distance. | NEW HOME DEVELOPMENT COMPANY,INC. | 10 | 181 days or more | \$400,000 |
| Defiance | Reservoir Parking Facilities | The City of Defiance has constructed a new upland reservoir. On the adjoining land the City is planning on recreational uses. Currently there is a sliding hill and a boat ramp to the reservoir. In the Spring a tribike golf course will be constructed. Citizens use the top of the reservoir as a walking/jogging path. At this time visitors at the reservoir must park along the adjacent roadway which is hazardous. We propose creating various parking lots and access to the various activities. This will allow our residents safe access to an existing amenity that is under utilized as a population desiring recreational activities. | City of Defiance | 21 | 31 to 90 days | \$412,000 |
| Defiance | Obstruction removal-Relocate T/W | Remove Railway Obstruction by relocating to desired separation from Runway. | Defiance Memorial Airport | 10 | 31 to 90 days | \$491,310 |
| Defiance | American Ag Fuels - Biodiesel | AAF is an existing manufacturer of biodiesel. Our plant is 95% built and ready to produce. We need final funding for system upgrades, to pay skilled trades work (Union Pipefitters Local #51), installing a state-of-the-art treatment component to insure quality and funding for training the new manufacturing jobs created. Our green manufacturing jobs will be created within months of funding. Our funding request is for 1.5 million. We are also interested in loan guarantees to shore up our position with our lending institution. This project will allow us to produce biodiesel fuel at a price that we will probably not survive without it. The site also interested in the federal and state building energy efficiency programs. We would propose that our generation units run on biodiesel be installed in appropriate buildings to generate heat and electricity with our renewable fuel (not included in cost figures above). | American Ag Fuels, LLC | 24 | 0 to 30 days | \$600,000 |
| Defiance | BRUNERSBURG LINE LOOP PROJECT | DOING TWO THINGS WITH THIS OTHER. THE DISTANCE BETWEEN THE TWO WATERLINES IS 450 FEET. THIS WILL IMPROVE WATER QUALITY TO CUSTOMERS AND WILL ALSO IMPROVE OUR THM LEVELS. THIS PROJECT HAS BEEN STRONGLY RECOMMENDED BY THE EPA FOR THE PAST SEVERAL YEARS. | BRUNERSBURG WATER DISTRICT | 10 | 91 to 180 days | \$892,000 |
| Defiance | EMERGENCY HEATING AS A LAST RESORT | This project will assist in the county area. This project will make available to qualifying households a source of heat when no other options are on their. Most agencies offering assistance have rules that prevent them from helping someone. For example can't assist with emergency repairs when someone lives in a trailer and can't own the lot he sits on. This program would assist persons that fall through the cracks and get the heat that will prevent pipes from bursting or persons from freezing without a lot of red tape. This program will assist 60-80 households with other emergency repairs or when repair isn't feasible a heater similar to the Ederline that costs from \$400-\$500 and would heat a room of 800 s.f. or more. | NEW HOME DEVELOPMENT COMPANY, INC. | 1 | 0 to 30 days | \$40,000 |
| Defiance | Electrical & Lighting | The project consists of: - Replacement of 8 circuit breaker panels/boards, possibly an additional 1 required. - Replace and additional electrical receptacles to allow us to transition from desktop to laptop computers for patron use and increase number available. - Replace existing fluorescent bulb with magnetic ballast lighting with energy efficient lighting meeting ASHRAE energy codes. - Replacement of emergency lighting with units providing better lighting along the path of egress | Defiance Public Library | 10 | 31 to 90 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Defiance | Mechanical System | The Library is a Carnegie Library dedicated in 1904 with wings added in 1961 and 1968. The building is currently heated by 2 low pressure steam boilers with pneumatic controls. The building is cooled with condensing units located on the roof. The system has gone through many renovations and additions: 1981, 1988, 1987, 1987, and 2001. The combination of pneumatic controls on the steam heating system (consistently pumps control valves, steam traps etc.) results in increased maintenance and an inefficient system. The proposed new system would utilize approx 22 indoor units and a remote fan-coil-mounted, air-cooled, heat pump units to provide the building with simultaneous heating and cooling. A centralized controller with web access will have the ability to monitor system operation, daily, weekly & annual schedules, maintenance alerts and control over individual unit remote controller to limit temperature setpoints for energy efficiency. | Defiance Public Library | 10 | 31 to 90 days | \$600,000 |
| Defiance | Families and Schools Together | FAST (Families and Schools Together) is an innovative and collaborative prevention and parent involvement program in which whole families father and participate in specific, fun, evidence-based activities aimed at strengthening families and empowering parents. FAST combines and applies several concepts that have been evaluated, statistically tested, and found to be effective in promoting child resilience and preventing school failure, delinquency, and substance abuse. Schools, parents, and community agencies join together to help families of children who face challenges that place them at-risk of future social, academic or substance abuse problems to participate in eight weekly, 45-min lesson sessions. This whole family, multi-family positive approach empowers parents to become full partners with the school and the primary prevention agent for their child. A one-year, monthly parent follow-up program called FAST THROUGH follows the eight-week series. A large team of facilitators, staff, and mental health and substance abuse professionals facilitates every program. Parents and professionals work together as partners, nurturing and supporting one another building a safe and secure vehicle at a time in the day - would like to be able to add on so could hire 2 people also automotive work. | Four County Family Center | 5 | 31 to 90 days | \$100,000 |
| Defiance | automotive electronics window tint and acc. store | Expanding the summer learning program to other schools in order to help children continue learning over the summer school break at home. This program encourages parent and child involvement in a family environment. Some families that may not be able to afford the very minimal cost may receive partial or full credit towards involvement in the program. At the base location, where other educational materials are held for year-round uses, new product featuring the latest educational and technological methods and designs will replace the older stock. Accounts will be brought current to help support the employment of new people. | Wired Mobile electronics | 2 | 0 to 30 days | \$100,000 |
| Defiance | Summertime education and stock reworking | Provide mortgage default counseling, foreclosure mitigation and/or resources and referrals to an estimated 150 residents of Defiance, Fulton, Henry, Paulding and Williams county within a 12 month period. Expected outcomes: an action plan will be developed to successfully resolve mortgage default issues and to reach a resolution that will prevent foreclosures and allow the customer to remain in their home with an affordable payment in place. | Learning Etc LLC | 2 | 0 to 30 days | \$250,000 |
| Defiance | Foreclosure Prevention Counseling and Resource and | Provide supportive transitional housing or direct opportunities to 20 homeless individuals and families in rural communities in NW Ohio. This project would utilize existing properties owned by private landlords to support consistent rental income for the property owner while subsidizing the rent for the customer. Subsidized rent and supportive case management services would be offered for six to two year period with an expected outcome of participants maintaining stable housing while developing the skills and resources needed to sustain housing independently at the end of their participation. | Northwestern Ohio Community Action Commission | 1 | 0 to 30 days | \$42,500 |
| Defiance | Transitional Housing - Housing First Homelessness | Provide emergency assistance to low to a minimum of 325 low to moderate income households experiencing a housing or utility related crisis due to conditions of poverty and/or difficulty meeting their basic needs due to unemployment. Assistance would be provided in the form of direct payments to landlords or utility companies to resolve delinquent accounts and maintain housing and/or utility services in place. | Northwestern Ohio Community Action Commission | 1 | 31 to 90 days | \$220,000 |
| Defiance | Crisis Relief Emergency Assistance Funding | Provide nutritious meals to persons affected by poverty with emphasis on persons with mental health and/or developmental disabilities for skill development via volunteer opportunities and participation in committees. | Northwestern Ohio Community Action Commission | 1 | 0 to 30 days | \$125,000 |
| Defiance | Continued Operation of Soup Kitchen and Drop in Ce | A minimum of 12,500 meals will be provided within a 12 month period. | Northwestern Ohio Community Action Commission | 3 | 0 to 30 days | \$37,500 |
| Defiance | Window Replacement Emergency Shelter - SRO facilit | Hire a local contractor to replace 18 windows in a non-profit emergency shelter and single room occupancy (SRO) housing facility. The project would decrease heating costs for the agency - this better utilizing existing operating dollars cover grants and other more comfortable environment for the customers. | Northwestern Ohio Community Action Commission | 1 | 31 to 90 days | \$18,000 |
| Defiance | Early Childhood Training Project | 50 early childhood workers would be screened and trained. Using 2 trainers to teach the class experience, the placement in Head Start and SRO centers that are operated by DCEIC to provide the participant with hands on experience. "Child Development Assistant" and "Caring for Infants and Toddlers" curriculum would be used in 13 weekly sessions with on-site mentoring in classroom settings. At the end of the 13 weeks the participant would choose between pursuing a Child Development Associate credential and placement in a childcare setting or become a certified family child care provider and start their own business in their home. The project cost covers 7 weeks for process 25 participants at each 2 full 13-week classes and recruitment time. We'll also not gonna be around the bus. I am a soccer from northwest ohio with a wife, twins, and three step kids, having that kind of family with one income coming in as mine and the second we are in I would like to request some help. It would greatly be appreciated on your support and time. | Northwestern Ohio Community Action Commission | 50 | 31 to 90 days | \$83,252 |
| Defiance | low income/large family | Defiance College is a non-profit, 501(c)(3) institution of higher learning. Since 1881, Defiance College has been the primary educator of the professional workforce in rural Northwest Ohio. With a student/bachelor ratio of 12:1, just over 1,000 students learn in an environment known for personal attention. Traditionally, Defiance College students are Ohioans who remain in Ohio after graduation, with 50% settling in the northwest Ohio region, contributing to the local economy and serving the local community. To recruit students, achieve increased energy efficiency and enhance safety features for our students, the College must undertake major renovations to a residence hall. Work includes window replacement, window system installation, roof replacement and sleeping room improvements. The project would employ approximately 50 people over the course of the project. | personal | 1 | 0 to 30 days | \$2,500 |
| Defiance | Defiance College Residence Hall Renovation | Renovating a vacant "hotel" building, Defiance College (DC) will create a 75,000 square foot Wellness and Fitness Center/Fit House. To create the Center, Defiance College is partnering with the City of Defiance, Defiance County, the YMCA, the local public schools, and the Defiance County Office of Economic Development. | Defiance College | 100 | 91 to 180 days | \$500,000 |
| Defiance | Defiance College Wellness and Fitness Center | The Wellness and Fitness Center will be the largest facility of its kind in Northwest Ohio. It will include a six-lane, 200 meter indoor track, indoor tennis facilities, batting cages, expanded fitness center and golf driving/teeing practice. Currently, there are no indoor track and field or tennis facilities in Northwest Ohio. Area public schools will be permitted to use the track and field and tennis facilities for competition. The new center will address the health needs of our students and area K-12 students. Defiance County has the ninth highest rate of childhood obesity in the state, so it is important to provide both youth and adults with facilities for physical activity, especially during the winter. The Center will also serve as an internship location for our students. | Defiance College | 65 | 91 to 180 days | \$1,000,000 |
| Defiance | Defiance College Economic Innovation Center | The GM Powertrain plant in Defiance is the county's largest employer with 1,583 workers. The catastrophic decline of the auto industry has resulted in high unemployment in Northwest Ohio as many companies located in this area were developed to provide a service to the automotive industry. The creation of new jobs and businesses is critical to the Northwest Ohio economy. | Defiance College | 100 | 91 to 180 days | \$2,000,000 |
| Defiance | Wireless Broadband for Rural Application | To meet this critical need, Defiance College would like to develop a 60,000 square foot Defiance College Economic Innovation Center (DCEIC) in collaboration with the City of Defiance, Defiance County, and the Defiance County Office of Economic Development. The DCEIC will be the only facility of its kind in the rural Northwest Ohio region with a mission to enhance the economic development in Northwest Ohio by creating jobs, assisting people with informal decision-making through responsive research, business incubation services, education, entrepreneurial application, and collaborative partnerships. The DCEIC will create approximately 65 new jobs in Northwest Ohio during its construction phase. As the College staffs the DCEIC and as the incubator businesses develop, additional jobs will be created. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Defiance | Project Efficient | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant money. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV. TV services to the packages within a year. New Wimax technology will be able to push a strong enough signal to provide all those services. | Retcher Rabbits and Feed | 3 | 31 to 90 days | \$35,000 |
| Defiance | Central Local Middle School/ High School Project | Choose we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to fund. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Central Local Schools | 370 | 181 days or more | \$10,005,042 |
| Defiance | Maumee and Western RR | The project I would like to use stimulus funds for would be to install a wind turbine to supply my business with electricity. Also provide and update the warehouse for the business' options would make the warehouse more efficient. Construction but have failed due to unemployment levels in area. The district is in need of a new facility for grades 6-12 and additional rooms for grades K-5. Classrooms are needed for ample room for new ways of teaching and added technology so students can better compete in the world of education. A new classroom with new equipment is adequate to serve the students in less than two and one half hours as it does now. An conditioning would be added to allow for an extended school year. Classrooms in elementary would allow for all day care kindergarten and pre-school classes to be directed by the State of Ohio. With new construction, the school could adopt new techniques in "green" construction for heating and cooling and it's own energy production through wind power. The district has a high number of special education students for the area and an equal high number of poverty students due to recent layoffs. Through building a new facility with new concepts, I would lead the district into tomorrow. | Defiance County Economic Development Office | 1,300 | 181 days or more | \$18,000,000 |
| Defiance | Domersville Road Smoothseal | Complete rebuild of 51 miles of rail line in Ohio and Indiana. The Maumee & Western is a vital shortline link for rail service in Paulding, Defiance and Henry counties. Existing manufacturers dependent on this railroad include LaFarge, Johns Manville, Campbell's Soup and ADM. Improving this rail route will assist 1,000 jobs and over 500 jobs in manufacturing and distribution. Upon completion of this project, the M & W will connect with the NS, CSX and Indiana & Ohio railroads, thereby providing outstanding rail service in all directions. By improving this rail line, there will be thousands of acres of desirable land situated along the line. It is an corridor with potential for the Maumee & Western is the designated route for future high-speed passenger rail service between Cleveland and Chicago so improvements to the rail line now will have future benefits if the passenger rail project is funded. The Defiance County CDC is currently conducting a feasibility study for an additional rail shipment facility. This study includes research on present rail and highway freight movements in NW Ohio. This data will be available in May '09 to substantiate our app. | Defiance County | 20 | 31 to 90 days | \$475,000 |
| Defiance | Small Business Alternate Power | Five Graded Polymer Asphalt Overlay of Roadway for pavement maintenance. Project requires no new right of way or environmental impact. Road is built and built quickly upon receipt of funding approval. Roadwork is classified as a Rural Road Collector. We operate a small aquaculture business that has very high heating and water bills. We want to install windmills or solar panels to reduce the costs of our power consumption to make our business more competitive in the fish production market. We also would like to expand our operation to include some carbon ponds to use recirculated water to raise freshwater Trout (Spring for human consumption. These ponds will be heated and enclosed in green houses and all air automated controls. We will use the old tank water to help heat the floor through the geothermal concept. We have the controls completed and all out of funds. The windmills and solar panels will power the entire operation. This will help us have a huge advancement in the aquaculture field and allow us to produce food fish at a much cheaper and more affordable cost. This will also help us produce more and help limit the pressure on our natural resources. We will have a small pilot program to see what requirements will be required to power the pumps and heating. Please we need help in this industry to help us provide safe and quality fish and shrimp into the stores at a good price for consumption. I have been doing this for 14 years. | Tank Mates | 5 | 31 to 90 days | \$50,000 |
| Defiance | Protecting Citizens Rights | We are a citizens group that is currently addressing issues involving sewer projects being proposed in our area. We are looking to provide services to the citizens within a five county area to insure the proper fulfillment of their rights as U.S. Citizens. The purpose of our group is to make sure that Tarrant, County and City Government comply with the Ohio Revised Code and The Ohio Constitution along with the U.S. Constitution. We are looking for funding to help us expand this service to any citizen who has a complaint or concerns about the way any situation being handled involving local government. We are going to try to educate people about their rights to insure that they are able to be able to hold free workshops and informational meetings involving your rights in Ermaate Domain, Agriculture Districts, Amination and several other areas. We currently have 100 plus members encompassing these townships. We need to be able to protect our communities against spending our money to protect our self from being robbed of rights as citizens. We hope to be able to provide legal council to represent our group in certain situations. We need your support. | Citizen's Helping Citizens LLC. | 10 | 0 to 30 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Defiance | Village of Ney Wastewater Collection and Treatment | Construction of approximately 13,000 LF of new gravity sewer line, 4100 LF of low pressure sewer line, non-aerated comminor discharge lagoons and necessary appurtenances to provide a treatment facility for the residents of the Village of Ney to satisfy CEQA standards and orders. | Village of Ney | 25 | 31 to 90 days | \$3,000,000 |
| Defiance | Sherwood Wastewater Treatment Improvements | Install five solar windmill aerators into the three cell continuous discharge lagoons to bring the wastewater lagoon discharge into compliance with CEQA discharge limits. The Village's lagoons are located in an isolated area and traditional hardware power lines would be very expensive to bring to the site to operate traditional aerators. | Village of Sherwood | 5 | 91 to 180 days | \$260,000 |
| Defiance | Sherwood Water Treatment Plant and Water Meters | Sherwood is classified as a low to moderate income Village of 800 residents. Our goal is to build the Village's first WTP and install 360 water meters for the purpose of billing. The WTP will include a 850,000 gallon clearwell, high service pumps, disinfection system, control control, aeration, retention, filtration, backwash sand filter, treatment building including mechanical, non-component parts and engineering fees. The effort to acquire funding for this project began in 2005. The WTP itself may not employ many, but it is necessary to the business, industry, residential construction and ultimately bring new jobs to our residents. | Village of Sherwood | 20 | 31 to 90 days | \$1,300,000 |
| Defiance | Upholstery,cars,trucks, boats, office furniture | New building, sewing machines, sewing machines to current, wages for youth learning this trade. This trade instills the meaning of pride in yourself for a job well done. This trade teaches youths to problem solve. It also teaches them you'll get out of the job what you put in & the people who can't afford new furniture can have nice things. I teach them how to repair harnesses for prostheses for service people for free, they have already paid a price. | B&R Upholstery | 5 | 0 to 30 days | \$50,000 |
| Defiance | Watershed Drainage | Installation of approximately 1250 feet of new 10 inch tile through woods for the drainage of approximately 40 acres to alleviate flooding and soil erosion of neighboring properties. | Milford Development LLC | 5 | 91 to 180 days | \$40,000 |
| Defiance | Mercy Hospital of Defiance - Expansion | Mercy Hospital of Defiance serving a rural community in Defiance and contiguous counties, requires additional space to meet the growing needs of the population it serves. Since its opening, the hospital has experienced rapid year-over-year growth and as the population continues to age, the hospital must have the capabilities to meet the growing demands of the community. Additionally, our inpatient services are separated from the Diagnostic and Surgery areas of the main hospital. The consolidation will streamline the delivery of care and add the additional required capacity. This programmatic partner wishes to begin construction deployment of US EPA Greenway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Mercy Health Partners | 23 | 181 days or more | \$17,000,000 |
| Defiance | Defiance Metal Products, a Clean Fuels Ohio Partne | | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Defiance | Thomas E. Keller Trucking, a Clean Fuels Ohio part | 800 horsepower in all vehicles (100 trucks). Anti-tilting technology for 60 OTR trucks. CNG conversion of local regional fleet. Convert 30 trucks and establish CNG station, lightweight, fuel-efficient equipment conversion. Cost to convert 60 trucks/200 trailers. | Clean Fuels Ohio | 5 | 0 to 30 days | \$15,750,000 |
| Defiance | Defiance College Economic Innovation Center | The Old Foreman plant in Defiance is the county's largest employer with 1,585 workers. The catastrophic decline of the auto industry has resulted in high unemployment rates in Northwest Ohio as many companies located in this area were developed to provide a service to the automotive industry. The creation of new jobs and businesses is critical to the Northwest Ohio economy. | Defiance College | 65 | 91 to 180 days | \$2,000,000 |
| Defiance | Defiance College Digital Forensics Certificate Pro | To meet this critical need, Defiance College would like to develop a 60,000 square foot Defiance College Economic Innovation Center in collaboration with the City of Defiance, Defiance County, and the Defiance County Office of Economic Development. The DCEIC will be the hub of its kind in the rural Northwest Ohio region with a mission to enhance the economic development in Northwest Ohio by utilizing existing people with informal digital-making through responsive research, business incubation services, education, entrepreneurship training, application, and collaborative partnerships. The DCEIC will create approximately 60 new jobs in Northwest Ohio during the first phase. As the College staffs the DCEIC and as the incubator businesses develop, additional jobs will be created. Cybercrime grows annually and the ability to deal with this crisis is hampered by the lack of trained specialists in cyber forensics, cellphone forensics, and forensic accounting. Law enforcement (LE) agencies and businesses (B) desperately need a program that has full-time employees can complete in a relatively short time. Because of this need, Defiance College (DC) is expanding its current 2-year degree program in Digital Forensic Science (DFS) to include a non-degree Digital Forensics Certificate to provide those employees that require a short-term certificate. Classes will train working professionals in topics such as seizure and forensic analysis of digital equipment, data recovery, fraud detection, and non-destructive cyberforensics. Northwest Ohio LE has requested this new initiative to meet their need for personal trained in computer/telephone forensics to respond to the ever-increasing levels of cybercrime. | Defiance College | 50 | 31 to 90 days | \$1,000,000 |
| Defiance | Energy Efficient Retrofit of Defiance College's Ac | DC is the only college or university in Ohio offering a bachelor's degree in DFS, and one of a small handful nationwide. This four-year program has been very successful, but we must now also meet the needs of local LE and businesses to train their current employees. To increase energy efficiency, Defiance College is seeking funding to implement campus-wide energy efficiency upgrades and audits. This energy efficiency project has been designed by an energy management contractor and would result in annual energy savings of nearly \$70,000. Upgrades would be completed on dorms, business buildings and the library. While each building will receive upgrades specific to its age and condition, energy upgrades will include replacement of boilers, cooling systems, windows, roof, exterior doors, sanitary lines, and ceiling tile. The entire entrance will receive a lighting retrofit, exterior lighting upgrades, lighting occupancy sensors, programmable thermostats, and energy conservation upgrades. This project would employ approximately 50 people over the course of the project. | Defiance College | 50 | 31 to 90 days | \$1,500,000 |
| Defiance | Energy Efficient Retrofit of Defiance College's Mc | Defiance College is a non-profit, 501(c)(3) institution of higher learning. Since 1860, Defiance College has been the primary educator of the professional workforce in rural northwest Ohio. With a student/teacher ratio of 12:1, just over 1,000 students learn in an environment known for personal attention. Traditionally, Defiance College students are Ohioans who remain in Ohio after graduation. | Defiance College | 30 | 31 to 90 days | \$500,000 |
| Defiance | Shelter & Job Training for Homeless | To increase energy efficiency, Defiance College must undertake major renovations to a residence hall. This energy efficiency retrofit has been designed by an energy management contractor and would result in annual energy savings of nearly \$17,000. This project would employ approximately 30 people over the course of the project. | The Hope Chest of Defiance | 20 | 0 to 30 days | \$2,000,000 |
| Defiance | geo thermal install | Ongoing training in work habits, money management, providing housing assistance, food and shelter for unemployed, on site job skills training, the have jobs available to assist in job projects in the community. We have served them just released from prison, in assisting them adjust back into society. To date, we have 20 months experience in this area of work, with good success. Our ability is limited by very limited resources, as local businesses have provided limited funds for us. We welcome you to see our current progress and discuss our vision for the future. Our goal is to provide short term jobs and training to assist placement of men and women into the regular work force. Our organization is well managed, and operates a thrift store program to partially fund our program and provide jobs and training on site. We are a volunteer organization. | Milford development LLC | 2 | 91 to 180 days | \$35,000 |
| Defiance | Tile Repair | Installation of new geo thermal heating system. Proceeding handtooling for residential and pole building. Replaces other outdated forced air furnaces. | Milford Development LLC | 3 | 91 to 180 days | \$30,000 |
| Defiance | expansion | Replacement of 2,000 heating feet of 10 inch tile to alleviate flooding problems on existing property owners. The flooding occurs during periods of heavy rains and involves saturation of the center. The installation of the new tile to a better suited outlet will greatly alleviate the chances for crop damage/erosion of existing soils during periods of heavy rains. | Milford Development LLC | 5 | 181 days or more | \$45,000 |
| Defiance | MAN Unit Officer and Staff Retention | Expansion of pole building for for repairing equipment. The Man-And-Narcotics Unit (MAN) Unit addresses the problem of the sale and use of illegal drugs through a multi-jurisdictional law enforcement task force covering the counties of Defiance, Putnam and Williams. The officers currently assigned to the MAN Unit are paid through their local agencies being their sheriff or police department. Current financial decreases in revenues for the local governmental entities are forcing reduction in law enforcement officers. Notification has been given by some of the participating agencies of the MAN Unit that removal of their officers assigned to the MAN Unit is necessary. Clearly, the general population of the MAN Unit is increased through the arrest and conviction of drug offenders. Without narcotics agents to work undercover drug operations, our communities will begin to see the immediate and long term effects of the reduced drug enforcement. The communities in general would also see an increase in crime. The outcome expected by retaining these officers would be to maintain the rehabilitated protection for the communities covered by the MAN Unit and current levels of most officers for these sheriff and police departments. | Defiance County Sheriff's Office | 3 | 0 to 30 days | \$115,000 |
| Delaware | Westerville Reservoir Improvements | Provides needed infrastructure maintenance to a Class I (high hazard) water supply dam as recommended by the State regulatory agency (DNR) to address dam safety issues. The Westerville Reservoir is one of the sources of drinking water for the City of Westerville. Building demolition for the Delaware County Transit Board | City of Westerville | 4 | 31 to 90 days | \$60,000 |

| Delaware | Solid Oxide Fuel Cell Pilot Manufacturing Facility | Through ten years of asset build-out and cost (capex) work, NexTech Materials Ltd. has developed innovative technology with a unique value proposition over its competitors. Leveraging the advantages that the FlexCell and FlexStack offer to its customers, NexTech's cells and stacks are well positioned to become the industry standard for SOFCs across a wide range of markets. SOFCs offer double the efficiency of internal combustion engines and are well suited for applications ranging from auxiliary power units for trucks to assist back-up power at utility scale installations. | NexTech Materials Ltd. | 20 | 0 to 30 days | \$5,000,000 |
| Delaware | Dist 6, PID 75917, DEL CR 124 4.38 (Home Road) | The requested funding is to support a pilot-scale manufacturing facility with the capacity of 10 MW. This will allow NexTech to employ 20 or more Ohioans with high paying, high-tech manufacturing jobs and reduce the cost, and therefore the price, of ultra-efficient SOFCs; thereby, opening up new markets for this game changing technology. | Ohio Department of Transportation | 343.2 | 31 to 90 days | \$11,960,000 |
| Delaware | Dist 6, PID 75917, DEL CR 124 4.38 (Home Road) | Construction of a grade separation with the CSX railroad. Right of way and construction to be funded by the Ohio Railroad Grade Separation Program. Delaware County to provide Preliminary Engineering. Feasibility Study completed under PID 23133 DEL Court | Ohio Department of Transportation | 343.2 | 31 to 90 days | \$11,960,000 |
| Delaware | Ostander Wastewater Treatment Plant Expansion | Construction of a grade separation with the CSX railroad. |----------------|--|--|--|----------------|--------------------|---------------------------|
| Delaware | NorthGate Centre | This is a proposed 1000 acres New Retail, Recreation, and Distribution Development on the North side of Columbus located in Surbury Ohio. This site would bring approximately 7,500 new jobs both in Retail and Distribution warehouses, as well as hundreds of millions of Sales tax revenue to the State. The Ohio Statehouse Infrastructure would be used for the interchange Modification of I-77 and SR-307. Currently we are working with ODOT and Federal Highway to obtain final approval of new Interchanges which are a MUST for the development to proceed. Meghan Gordon-Lakey from ODOT is very aware of this project and has been a number of the meetings to help get this project moving. Lastly, the Highway Infrastructure improvement at this location, SR 307-307, will also help the current work which is rated as one of the most falling intersections in the state. | NorthGate Centre Development, LLC | 7,500 | 91 to 180 days | \$60,000,000 |
| Delaware | Retaining TDCI Employees | TDCI Inc. is a women-owned enterprise solution provider that specializes in helping US based manufacturers and their distributors streamline their buying process for highly customized products. TDCI's innovative BuyDesign® software is a comprehensive guided selling and configuration solution developed to help manufacturers increase sales, improve accuracy, and reduce costs. With the economic down turn TDCI is in need of working capital to help retain software developers and support staff responsible for the development, testing, support, and implementation of our software solution. Without this capital funding we were forced to immediately our 12 employees from our 78 person company. We attempted to get a LOC increase from our bank (as well as 3 other local financial institutions) and we declined because of the down turn in our business and financial conditions. Cutting these valuable employee resources puts our company further in jeopardy of being able to provide software updates and support required by our existing manufacturing customers (approximately 300), and limits our abilities to acquire new customers. Without funding we may be forced to cut more Ohio jobs. The population of Delaware County has ballooned from 53,840 in 1980 to over 160,000 today, a nearly three-fold increase. From 2000 to 2004, Delaware County was the fastest growing county in Ohio, and 11th in the nation. According to the US Census, 6.6% of families and 9.3% of the population live below the poverty line. With the downturn in the economy, People in Need, Inc. (PIN) is being more people assessed economic hardship and social services than ever before. PIN is only meeting a fraction of the current needs due to our severe space limitation and limited staffing. A successful capital campaign will allow for the purchase and renovation of a 7,200 sq. ft. office and warehouse facility. The new facility will allow PIN to move from its present storage and distribution capacity for food pantry operations. The new site will also provide confidential meeting space for clients accessing emergency rent and utility assistance in their time of need. In addition to the capital needs, the \$1.4 million goal will provide additional operating funds to enhance the existing budget allowing for an increase in staff and programming. The need is growing, the time is now. This project is aimed at developing a thermodynamic device to efficiently generate hydrogen by the use of Tesla and Faraday principles. It is intended to continue development on the Gralex Atom, a high velocity vehicle currently projected to have fuel efficiencies above 100MPG at highway speeds. The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. Its mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's egle, Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, individual Development Accounts (IDAs) to help start and sustain small businesses, and access to retail assistance. As the only U.S. Microenterprise Administration franchisor and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI Microenterprises create jobs in the retail industry by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDI is able to serve underserved populations, including low-income individuals, those with little or no credit, or those precluded from traditional financing because of religion or race. | TDCI Inc | 12 | 31 to 90 days | \$500,000 |
| Delaware | The Campaign for Possibilities - Capital Campaign | Extend and enlarge waterlines along Shawnee Trail which is about 1 mile long. Also install additional hydrants. Currently there are only two on its length of roadway. Approx. 1000 feet of piping, catch basins and extensive grading to protect the Scioto River. A main water source for Columbus Ohio and is addition will prevent flooding in the Village and help maintain the condition of Glick Road, a main thoroughfare. Village of Shawnee Hill is about one square mile in size which will require thousands of feet of storm line, especially important project which will help protect Columbus Ohio drinking water source (Scioto River) in addition to preventing flooding issues in the Village. Extend waterline and install fire hydrants. Will help with more efficient water delivery and fire protection. The Kairo Institute maintains a proprietary portfolio of technology evaluation tools, techniques, strategies, and protocols developed over 12 years of active research in the evaluation of more than 500 technologies and more than \$1.8 billion invested. There have been more than 50 new ventures created, which have raised cumulatively more than \$400 million in venture capital and generated more than 500 new jobs. The Kairo Institute processes to utilize its proprietary databases and global expert networks to rapidly monetize the existing IP for Ohio's leading universities and R&D Institutions to accelerate technology diffusion, high-wage job creation and stable technology-based economies. The goals are to: • Create a regional sustainable competitive advantage through the application of proven proprietary technology readiness and commercialization evaluation protocols. • Provide access to and deploy key managerial, technical and financial resources to justify and qualify technology based-venture deals. • Establish strategic connections to and active engagement with major global corporations in prioritized technology areas. | People In Need, Inc. | 7.5 | 91 to 180 days | \$125,000 |
| Delaware | Alternative Energy Research | Construction 250,000 GDP membrane WWTP | Gralex, Inc. | 5 | 0 to 30 days | \$500,000 |
| Delaware | Microenterprise Development Program | High penetration of Distributed Generation (DG) of alternative energy is limited because it is "non-dispatchable" by the utilities. Utility scale energy storage utilizing commercially available (Pulsar Power) zinc bromine flow battery technology in the context alternative would provide for reliable and efficient grid control of alternative energy production. We propose an EMTEC collaborative team of Emerson Power, OSU and Pulsar Power to work in concert with DOE's Solar Energy Grid Integration Systems - Energy Storage (SEGIS-ES) program. This project will develop through a Matlab simulation method an optimum architecture with robust server-side controller. The resulting controller will allow parallel DG operation integrated to a storage system for dispatchable power. A parallel effort will establish fully integrated dynamic VAR control system design requirements and component selection that concentrates on establishing an Ohio based supply chain. The resulting design will be fabricated and field tested in Delaware, Ohio. | Economic and Community Development Institute | 20 | 0 to 30 days | \$150,000 |
| Delaware | Shawnee Trail waterline and hydrant extension | Extend and enlarge waterlines along Shawnee Trail which is about 1 mile long. Also install additional hydrants. Currently there are only two on its length of roadway. | Village of Shawnee Hills | 25 | 91 to 180 days | \$300,000 |
| Delaware | Glick Road drainage | Approx. 1000 feet of piping, catch basins and extensive grading to protect the Scioto River. | Delaware | Storm Water Improvements | Construction of Storm Water Improvements throughout the Village to eliminate severe II and flooding | Village of Galena | 20 | 91 to 180 days | \$1,892,600 |
| Delaware | Walnut Street Resurfacing/Reconstruction | Reconstruction & resurfacing of main thoroughfare into Village 4500 ft long | Village of Galena | 20 | 91 to 180 days | \$3,225,000 |
| Delaware | Hydrogen Safety Sensor Manufacturing Facility | Nextech Materials proposes to establish a sensor manufacturing facility for an advanced hydrogen safety sensor and other sensor products. Hydrogen is an integral part of many strategies. Whether the product of photosynthesis or synthesized electrolytically, the end-product of bio-fuel reformulation, or the fuel for distributed stationary or automotive fuel-cells, hydrogen is the ultimate lightweight, regenerable, non-polluting energy carrier. To make hydrogen storage and delivery infrastructure a reality, a robust and affordable hydrogen safety sensor must be available. Many sensor technologies have been identified for detecting hydrogen in the ambient environment, but they are too slow to respond, too slow to recover, or too expensive for widespread adoption. Nextech's hydrogen safety sensor overcomes these limitations and is poised to take a leadership position in this emerging market. The proposed plant will be capable of meeting the market demand for hydrogen sensors, and support other sensors currently under development at Nextech. | NexTech Materials Ltd. | 40 | 31 to 90 days | \$2,000,000 |
| Delaware | Military Purpose Solid Oxide Fuel Cell Power Gen | In this project, two Ohio-based fuel cell developers, NexTech Materials and Battelle, will collaborate on the development of military power generation. This project leverages the existing SOFC stack developments of NexTech and the system integration expertise of Battelle. The project is designed to address the known major hurdles preventing adoption of fuel cell technology by the military: cost, reliability, and durability - specifically durability related to high sulfur fuels and military operational requirements. This project will focus on designing and building prototype SOFC power systems and demonstrating functionality requirements for military applications. Multiple branches of the military has been evaluating SOFC technology for mission critical applications such as battery chargers, vehicle auxiliary power for spare parts, test by combined heat and power, and primary power for unmanned air, land and sea vehicles. Successful development and deployment of SOFC power systems will enhance warfighting capabilities for all military branches. Training includes live presentations to employees and spouse, webinar access to training program, and online family planning guide and compliance follow-up program. Funded research shows healthcare costs can be reduced 20% as a result of better health outcomes when employees and their families implement training essentials. Return on employee's investment is projected to be 30% when unnecessary or redundant healthcare visits are eliminated. Better health outcomes resulting when patients use iTakeCharge tools to prepare and participate in the physician visit and share ownership of treatment plan established collaboratively between healthcare provider and patient. The iTakeCharge System provides employers with productive means of reducing healthcare costs as opposed to the draconian measures of cutting benefits, raising employee premium payments, raising co-pays and deductibles or going "bare." | NexTech Materials Ltd. | 50 | 0 to 30 days | \$7,000,000 |

| Delaware | Ohio Fallen Heroes Memorial Bike/Walking Trail | This approximately 1.100 foot bike/walking trail will link the Ohio to Erie Trail to the Ohio Fallen Heroes Memorial www.ohiofallenheroes.org in Surbury Ohio. It will be a popular trail where visitors of Galena can pay their respects to the military families who have lost their lives since Sept 11, 2001. The trail will also link the towns of Galena and Surbury as well as provide a safe path for students to bike/walk to school. | Delaware County Friends of the Trail | 20 | 91 to 180 days | \$1,120,000 |
| Delaware | Energy Transfer and Storage Through Exercise | This project is meant to design, test, and begin implementation of small electricity-generating devices which would operate similar to how hybrid automobiles charge a vehicle, these generating devices would be designed to attach or be retro-fitted to common exercise equipment, such that when someone exercises on a treadmill, elliptical, exercise bike, etc. they could generate power to be stored in fuel cells, or batteries for later consumption. The concept is similar to that of charging a home with solar cells, and storing the energy for later use, except these devices could be attached to any exercise equipment. The number of jobs indicated will occur over the five (5) year life span. Initially 100 jobs will be created as teams of people will be needed to install bike devices at workout facilities and private homes throughout Ohio and the United States. | Visual Resources Corporation | 100 | 31 to 90 days | \$1,700,000 |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Delaware | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a wireless infrastructure to equip rural residents with the Bandwidth to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial operation that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Delaware | Emerald Arena Preservation | The purchase and preservation of an 80 year old equestrian facility in Southern Delaware County. Includes a 260 x 460 indoor show arena with 40 acres state. This is one of the last riding stables in the area and has been planned for demolition by a local developer. The facility has the capacity to train 40+ children and adults weekly in multiple equestrian pursuits. It is handicap accessible and can be used to train disabled and disadvantaged children and adults in Southern Delaware. | The Emerald Riding Academy | 4 | 0 to 30 days | \$500,000 |
| Delaware | Project Management Training | Project Management Training Train those recipients of the stimulus fund to better manage their projects to place Ohio in a favorable light. | PCS Consulting Services | 2 | 0 to 30 days | \$30,000 |
| Delaware | US Route 23 & US Route 315 realignment | By training the recipients, they will be better able to bring the projects in on time, on budget and of the requisite quality levels. Delaware ARC, LLC, owner of approx. 14 acres located West of Rt. 23, and both North & South of Rt.315, as it meets Rt.23, has been a major traffic problem for years with its "T" shaped intersection (see Cols Dispatch 1/30/06) causing frequent accidents. In 2004 ODOT (Shog Chantel) commissioned Moody/Roberts Engineers on a realignment study. New roadway maps were drawn and presented to Delaware ARC, LLC for consideration. Proposed realignment was to go through center of 14 acres forming a "T" shape opposite Stratford Rd. ARC was willing to swap part of land in exchange by taking "lot 315" for "lot 315". Since 1/2004 nothing further has been proposed. At the time ODOT spent considerable time and money for plans and engineering study. ARC would like to develop its property but is prohibited due to the roadway issue. ARC will spend over 700m in infrastructure dollars upon realignment, but needs ODOT help on utilities. ARC alone will employ over 30 people to build and maintain the Chantrelle River waterway and bridge and private roadways on private land that realigns the 14 acres. The \$5,000,000 cost of the roadway is merely an estimate thought to be said by ODOT in 2004, and 1200 feet long. | Real Estate Development | 75 | 181 days or more | \$8,000,000 |

| Delaware | Sunbury/Galena Assisted Living | The project consists of renovating a vacant building to address some current safety, health, and functional issues. The outcome of a facility capable of supporting 10 - 15 elderly residents. Construction of a second building will provide support for another 15 residents. Property has already been purchased and paid for and we have about \$50,000 of our own funds going into the project. We would like help to complete the project and be able to provide affordable and family-oriented care to those in need. This project will: * Create about 20-30 temporary jobs, during the construction and renovation phase. * Create 10 - 15 permanent full-time jobs. * Create 10 - 15 permanent part-time jobs. * Renovate a vacant building which has fallen into disrepair * Improve the neighborhood appearance * Provide affordable assistance to 20 - 30 elderly residents | Sunbury/Galena Assisted Living | 50 | 0 to 30 days | \$600,000 |
| Delaware | My Peeps Cultural Learning Center | Since the various counties, including the arts, music, science, cooking and language, as well as advanced learning units to better prepare our children for kindergarten and early education. We will jump start every child, not just in the basics of learning, but in their understanding and appreciation of our diversified cultures. Success will be measured by on-site testing and kindergarten pre-exam testing results. Centers will be established in cultural and historic downtowns with easy access to a multitude of cultural activities and learning environments. Project will include the purchase, renovation and preservation of historic downtown buildings, 10,000 sq ft min. to be used as the learning center in each of the first three locations. Cost includes first year salaries for minimum 25 staff/teachers per location. Provides staff training and transport in specialized cultural vans. Two transportation vehicles will be needed as well as all start up and operating cost for each center during the first year. | KayDan Corp. | 100 | 0 to 30 days | \$8,000,000 |
| Delaware | Delaware County Emergency Response Pre-emption Pro | This request, involving eighteen (18) agencies, is to improve firefighter and citizen safety, while improving our ability to respond to emergencies in a timely manner. This will be accomplished with the installation of a Traffic Signal Preemption (TSP) system. A TSP will allow emergency vehicles get to their destination as quickly and safely as possible. The proposed project will also help us comply with nationally recommended standards to improve times found in NFPA 1710 and the American Heart Association guidelines for emergency cardiac care, and will also represent existing response policies and procedures to improve safety and better comply with NFPA 1500. All requesting jurisdictions in Delaware County place a high importance on the safety of its personnel and as well as the citizens we serve in response to all emergencies in a timely and efficient manner. Countywide we have a roster that consists of 628 men and women in full-time, part-time and volunteer positions. We provide fire protection and advanced life support EMS for over 157,000 people in a suburban and rural area near Columbus, Ohio. In 2008 we responded to 7,158 fire related incidents and 11,361 EMS incidents. | Liberty Township Fire Department | 50 | 31 to 90 days | \$1,500,000 |
| Delaware | State Route 37 Hill Widening | This project consists of the widening and reconstruction of 1100 feet of B.R. 37 (Granville Street) between Morning Street and Arbor Drive in the Village of Sunbury in Delaware County, Ohio in order to improve safety for pedestrians and motorists. New pavement, curb and gutter, sidewalks, curb ramps, and street lighting is included as well as the relocation of existing utilities. The existing two lane roadway is deficient in regards to its narrow ten foot lane width and the close proximity of the roadway to the existing sidewalks. The existing four foot wide sidewalks are crumbling and needs to be replaced with five foot wide sidewalks. Existing bridge abutments adjacent to the roadway need to be removed which were left by the defunct railroad company. These existing conditions create a hazardous situation for pedestrians using the sidewalks along this roadway. | Village of Sunbury | 50 | 91 to 180 days | \$1,400,000 |
| Delaware | Building a new indoor public facility to create mo | We would like to expand the mini golf and batting cages at the Westerville Golf Center to build a new indoor mini golf and batting cages. This would be a state of the art indoor mini golf that will be one of the only indoor places in Ohio. This will create hundreds of thousands of dollars in additional income with an indoor place, given we have to close our outdoor facility during the winter months. There is nothing like this facility anywhere, and we have had a lot of positive feedback about the possibility of having an indoor place. This project would create about 20-25 new jobs per year, as well as new jobs for the people who will be building the structure. A public service campaign promoting the purchase of vintage products since they suit the market, reuse, reduce, and recycle." More information to come. | Westerville Mini Golf and Batting Cages | 100 | 91 to 180 days | \$300,000 |
| Delaware | Shop Green. Buy Vintage. | Misc. improvements at the Village of Sunbury wastewater plant in order for the plant to meet the new NPDES permit conditions and replace equipment and facilities. The improvements will also assist the plant to increase the treatment capacity to 1.5 MGD, which is much needed to allow growth of the Village. | Antiques, Vintage & Collectibles Online Sellers As | 2 | 0 to 30 days | \$25,000 |
| Delaware | Wastewater Plant Improvements | The improvements will consist of: replacement of the sludge pump station; new anaerobic tank and chemical addition equipment to meet the phosphorous removal NPDES requirement; sludge cake storage structure to reduce disposal costs; non-potable water system to reduce potable water usage; sewage receiving station; influent pump station; grinder; new administration building for staff which has an inadequate office in a former influent pump building. | Village of Sunbury | 50 | 91 to 180 days | \$1,500,000 |
| Delaware | Sidewalks | This Village would like to install sidewalks along BR 143. The residents currently have no safe way of walking to the many shops within the Village. This will promote pedestrian traffic for the Village and surrounding communities. | Village of Shawnee Hills | 7 | 0 to 30 days | \$144,000 |
| Delaware | Wind Turbine | In order to help reduce the electric cost to the residents we would like to install wind turbines within the village | Village of Shawnee Hills | 10 | 181 days or more | \$60,000 |
| Delaware | Sunbury Mills Pump Station Replacement | Replacement of the existing pump station equipment is needed due to pump and corrosion problems. The Big Walnut School District will be constructing a new middle school which will discharge in this pump station. | Village of Sunbury | 5 | 31 to 90 days | \$90,000 |
| Delaware | Library expansion | Community Library in Sunbury, Ohio, serves the 18,000 residents of eastern Delaware County as well as residents of neighboring counties. Our vision is to be a primary information and community center for area residents by providing quality information services, stimulating and educational programs. We have been operating out of our existing facility for 15 years and with the explosion of growth in the county, demand of library and information services have increased. To that end, the library is working with DesignGroup on a master plan for a renovation of our existing facility, which would add 8,000 square feet for users, specifically focusing on children and teens. It would also create more meeting rooms for library and community activities, workshops, and seminars. In the short term, the expansion would create many construction jobs. In the long term many jobs would be secured and more would be added. Most of all, the expansion will enable the library to continue providing quality educational and informational services to meet the needs of the community and surrounding neighborhoods, thus improving the quality of life in the Central Ohio area. | Community Library | 25 | 181 days or more | \$3,400,000 |
| Delaware | DEL-CR33-6.30 Carter's Corner Bridge | Replacement of a structurally deficient bridge and roadway approach reconstruction to meet current roadway design standards. | Delaware County Engineer | 10 | 31 to 90 days | \$583,000 |
| Delaware | DEL-TR82-0.25 Giehl Road Bridge | Replacement of a structurally deficient bridge and minimal roadway approach reconstruction. | Delaware County Engineer | 10 | 91 to 180 days | \$440,000 |
| Delaware | DEL-CR24-5.02 Old C Highway Bridge | Rehabilitation of a 197 foot long structurally deficient bridge with minimal roadway approach reconstruction. Design-build project with no work done within a warranty. | Delaware County Engineer | 15 | 31 to 90 days | \$1,400,000 |
| Delaware | DEL-CR-VARIOUS Guardrail Replacement Project | Replacement of 12,000 linear feet of deficient guardrail with new guardrail meeting current design standards on various Delaware County roads. No additional right of way or environmental documentation required. | Delaware County Engineer | 8 | 31 to 90 days | \$180,000 |
| Delaware | Interfaith Hospitality Network | The Interfaith Hospitality Network (IHN) brings faith communities together to provide emergency shelter and meals for homeless families. The network also provides assistance to families to help them find housing, jobs, training and other services that will support them with educational, emotional and life skills enhancements. The IHN collaborates with local social service agencies to locate families needing shelter, and to refer families for additional assistance. The IHN can accommodate up to 14 people (4-5 families) each week. The average length of stay is about 60 days. 60% of those served are children, and more than half the families are headed by female single parents. The goal is for each family to have the network with a plan for self sufficiency. Generally, 80% of families who enter the network secure housing, 18 of adults adults enter the program and 18% of children are placed in foster care or adopted. This new firehouse would drastically reduce the response time to emergency calls. This would affect not only the citizens that we serve but also the surrounding areas since we all honor mutual agreements. We would hire new firefighters/emergency to staff this station and jobs would be created in the construction industry as well. Response times are very critical and this would increase the lives saved and decrease the amount of property loss. I am a small business owner who the economy has affected I would like stimulus money to keep the business in operation and retain my employees. Thank you | Family Promise of Delaware County | 3 | 0 to 30 days | \$10,000 |
| Delaware | New firehouse | The funds are needed to build a new fire house in a rural area that is being rapidly developed in the fastest growing county in the state of Ohio. This new firehouse would drastically reduce the response time to emergency calls. This would affect not only the citizens that we serve but also the surrounding areas since we all honor mutual agreements. We would hire new firefighters/emergency to staff this station and jobs would be created in the construction industry as well. Response times are very critical and this would increase the lives saved and decrease the amount of property loss. | Concord Township Fire & Rescue | 12 | 181 days or more | \$1,200,000 |
| Delaware | Employment Program | I am a small business owner who the economy has affected I would like stimulus money to keep the business in operation and retain my employees. Thank you | Fox's Pizza den | 10 | 0 to 30 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Delaware | Ohio Grade Crossing Reconstruction Project 2009 | CSX would like to partner with ORDC to upgrade existing Highway - Rail grade crossing surfaces across the entire state of Ohio. CSX has provided a detailed spreadsheet to ORDC showing about 40 proposed locations where we would like to work with the ORDC and local state highway authorities to install new high strength concrete surfacing in locations where the existing surfaces are in need of repair. This will provide benefits to local paving and roadway contractors, CSX employees and it would also benefit the traveling public who cross over these rough surfaces every day. Please consider this project as it will not only help create/maintain jobs in Ohio, but also has the safety of the traveling public in mind. | CSX Transportation | 200 | 31 to 90 days | \$3,655,000 |
| Delaware | Sawmill Parkway F-2 | Funding would cover the cost of final design, right of way and construction of the initial 1600 LF section of 23rd Lane Sawmill Parkway north of US 40 to a point just west of the North American Bus Inc. facility. The section of roadway provides direct business and shipping access to a new proposed intersection point along the critical US 40 commerce corridor. The road extension further opens up several hundred additional acres of vacant property for industrial development. Both sanitary sewer and water lines were extended along the proposed road alignment in 2007 and are available to provide service to new businesses once the road can be completed. | City of Delaware | 600 | 181 days or more | \$1,500,000 |
| Delaware | DEL-CR31-1.11 Red Bank Bridge | Rehabilitation of a 183-foot span structurally deficient bridge including minor roadway approach reconstruction. | Delaware County Engineer | 15 | 31 to 90 days | \$1,056,000 |
| Delaware | DEL-CR33-6.30 Carter's Corner Bridge | Replacement of a structurally deficient bridge and roadway approach reconstruction to meet current roadway design standards. | Delaware County Engineer | 10 | 31 to 90 days | \$583,000 |
| Delaware | DEL-TR82-0.25 Giehl Road Bridge | Replacement of a structurally deficient bridge and minimal roadway approach reconstruction. | Delaware County Engineer | 10 | 31 to 90 days | \$440,000 |
| Delaware | DEL-CR24-5.02 Old 3-C Highway Bridge | Rehabilitation of a 197 foot long structurally deficient bridge with minimal roadway approach reconstruction. Design-build project with no work done within a warranty. | Delaware County Engineer | 15 | 31 to 90 days | \$1,500,000 |
| Delaware | DEL-CR-VARIOUS Guardrail Replacement Project | Replacement of 12,000 linear feet of deficient guardrail with new guardrail meeting current design standards on various Delaware County roads. No additional right of way or environmental documentation required. | Delaware County Engineer | 15 | 31 to 90 days | \$180,000 |
| Delaware | DEL Capitalized maintenance; PID 86094 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through the Ohio Department of Transportation. | Ohio Department of Transportation | 1 | 0 to 30 days | \$90,200 |
| Delaware | Wind Power | The Village wants to lower the electric cost for the residents of the village along with using more earth friendly applications | Village of Shawnee Hills | 25 | 181 days or more | \$2,000,000 |
| Delaware | Village Parkland | This would be for a passive park adjacent to already owned municipal property | Village of Shawnee Hills | 8 | 0 to 30 days | \$150,000 |
| Delaware | Park Land Purchase/Improvements | The Village has a plan for a community park, this would be an active park located next to the Municipal building | Village of Shawnee Hills | 10 | 31 to 90 days | \$500,000 |
| Delaware | Sanborn Hall Renovations | The Village has a plan for a community park, this would be an active park located next to the Municipal building 2009 is the 100th Anniversary of Sanborn Hall - the home of the Department of Music at Ohio Wesleyan University. The building was named in memory of Martha A. Sanborn, Amelia Sanborn Hills and Frank B. Sanborn by Anne Sanborn Clason in 1909. The building is in dire need of extensive renovations, including a new roof, boiler, gutters, repairing foundation walls and soffits, installing new fire alarm, EMS and elevator systems, and updating power/water. The Department of Music at Ohio Wesleyan University was established in 1872 by Theodor Presser, President began MPA (Music Teaching Professional Association) on this campus during the 1920s. The Music Department has been an important element in the educational transformation of the institution since its inception. It is one of two departments on campus to offer professional degrees (Bachelor of Music in addition to the Bachelor of Music degree). The Music Department is a NAfME (National Association of Music Teachers) member school. These important renovations of Sanborn Hall - during the building's 100th anniversary year - would result in the employment of hundreds of temporary workers. Project Nominated for WSRFA Funding | Department of Music, Ohio Wesleyan University | 10 | 31 to 90 days | \$340,800 |
| Delaware | Columbus Upground Reservoir Electrical Line | To provide electrical service before construction of Upground Water Reservoir that will produce an additional 40 million gallons per day safe yield as recommended in the Water Beyond 2000 Phase 2 Report | Columbus Department of Public Utilities | 52 | 181 days or more | \$3,100,000 |
| Delaware | Columbus Upground Reservoir (Part 1) | Project Nominated for WSRFA Funding This project provides for the construction of an 850 acre upground reservoir of the Sycote River north of the Sycote Dam. By separate contracts and pre-application, this complete project includes a raw water pump station on the Sycote River and adequate transmission lines to transport raw water to and from the reservoir. The purpose is to increase the safe yield of the raw water supply for the Dublin Road Water Plant to more closely match the treatment capability. Failure to increase the raw water supply will yield would necessitate acceptance of the risk associated with operating a water treatment system beyond the safe yield. The occurrence of a long-term drought in that situation would be disastrous. Ohio Wesleyan University in Delaware looks to link intersecting portions of campus and the city through pedestrian Community/Campus Gateways. The Gateways will connect into the city of Delaware's bike paths at two locations open to the campus and central Ohio communities, and coincide with the construction of the adjacent Ohio Wesleyan University. One of the Gateways will feature a memorial to Branch Rickey, 1904 Ohio Wesleyan alumnus, who was named ESPN's most influential sports figure of the 20th century for revolutionizing the game of baseball and race relations in the U.S. by bringing Jackie Robinson onto the Dodgers roster. The prominent location of the Gateways at north/south and east/west intersections of Ohio trails and campus facilities will allow many to honor Mr. Rickey's contribution to the Gateway. The Gateway will include pedestrian walkways, benches and other enhancements to welcome walkers, runners, bicyclists and others enjoying outdoor space. Ohio Wesleyan, using private funds, will build parking spaces close to the Gateway for public and campus use. Ohio Wesleyan seeks \$200,000 toward the construction of the Gateways. | Columbus Department of Public Utilities | 784 | 181 days or more | \$141,600,000 |
| Delaware | Campus/Community Gateways | The Property originally contained 2 single family homes and several out buildings. As part of the subject funding, the developer will be demolishing the single family residences on the southern portion of the property (Liberty Road). A portion of the demolished site will allow for landscaping to be installed in an area for the project. The entire area will be redeveloped by the developer upon tenant commitments. The final structure will be demolished after the property is scheduled for development. The Property will be improved with a much needed medical building of 10,000 square feet. Additional development is a new day care center. This development will create immediate construction jobs and 75-100 permanent high paying healthcare jobs. The building a family entertainment center to serve the local community recreational needs. Strikers Entertainment Center will feature multiple recreational opportunities for all age demographics. The anchor recreational activity will be bowling. | Ohio Wesleyan University | 25 | 31 to 90 days | \$250,000 |
| Delaware | Liberty Powell Medical Offices | The Property originally contained 2 single family homes and several out buildings. As part of the subject funding, the developer will be demolishing the single family residences on the southern portion of the property (Liberty Road). A portion of the demolished site will allow for landscaping to be installed in an area for the project. The entire area will be redeveloped by the developer upon tenant commitments. The final structure will be demolished after the property is scheduled for development. The Property will be improved with a much needed medical building of 10,000 square feet. Additional development is a new day care center. This development will create immediate construction jobs and 75-100 permanent high paying healthcare jobs. The building a family entertainment center to serve the local community recreational needs. Strikers Entertainment Center will feature multiple recreational opportunities for all age demographics. | Delaware | Strikers Entertainment Center | The building a family entertainment center to serve the local community recreational needs. Strikers Entertainment Center will feature multiple recreational opportunities for all age demographics. The anchor recreational activity will be bowling. | VBR Corp. | 80 | 31 to 90 days | \$3,000,000 |
| Delaware | Cataloging historical collections | Purchase iPad/iPhone Museum software, scanner and digital camera to scan, digitize, organize and catalog over 100,000 items. These include books, manuscripts, artwork, photographs, artifacts, buildings, furniture, tools, toys, and court records. Project would take approximately 5 years and employ 12 people. The collections are not fully cataloged at the present time and are stored on 3 different databases. This software would combine everything into an integrated system and would enable the Delaware County Historical Society to make the collections available through the Internet, thus enhancing the mission of historic preservation and education and greatly expanding its outreach. | The Delaware County Historical Society | 12 | 0 to 30 days | \$115,352 |
| Delaware | New research library | In order to make the Delaware County Historical Society's genealogical research and museum materials more accessible to the handicapped, school children (K-12 and college-age), and general researchers, a new library is needed. The new building would provide library and classroom space and greatly enhance the mission of historic preservation and education. An old, existing, asbestos-riddled 112,000 sq. ft. building would be demolished and replaced with a new 3000 sq. ft. one-floor masonry block building. It would be built with current 'green' materials and construction methods to make it energy efficient and environmentally friendly. The land is already owned by the Society. | The Delaware County Historical Society | 50 | 0 to 30 days | \$993,000 |
| Delaware | ComForcare senior services expansion | WE want to expand our services to Senior Citizens in Delaware & Linking counties. Our company owns the franchise rights to these two areas and has not developed them yet. Our success in Franklin county with over 100 employees and 1.5 million dollars of sales leads us to believe we could open two new offices, employ up to 150 people and bring much needed home care services to the senior populations of these two counties. | ComForcare Senior Services of Central Ohio | 150 | 0 to 30 days | \$160,000 |
| Delaware | Cyanacrylate Fuming Chamber | WE PROVIDE SERVICES TO NOT ONLY INDIVIDUALS AT HOME BUT ALSO STAFF MANY HOSPICES, RETIREMENT VILLAGES, SOCIAL SERVICE AGENCIES, NURSING HOMES ETC. WE EMPLOY LARGE NUMBERS OF MINORITY WORKERS, MANY RECENT IMMIGRANTS AND NURSES AIDS AND HOME HEALTH AIDS. | Delaware County Sheriff's Office | 3 | 0 to 30 days | \$1,200 |
| Delaware | Property incinerator | This project is for the purchase of a cyanacrylate fuming chamber to allow for the use of chemicals to latently print where dusting is not the best practice. The goal is to allow for better evidence collection by the crime scene units for our agency and surrounding agencies that utilize our crime scene services, including the multi-jurisdictional Delaware County L.E.A.P. Drug Task Force. | Delaware County Sheriff's Office | 3 | 0 to 30 days | \$22,000 |
| Delaware | Riverview/Osage paving | This project is for the purchase of an incinerator for our property evidence division. This will allow for proper destruction of evidence, including illegal drugs, which has been released by the courts for disposal. The incinerator would be used to destroy evidence of the Delaware County Sheriff's Office along with evidence from the multi-jurisdictional Delaware County L.E.A.P. Drug Task Force. The Village has two gravel roads in the Village that are in desperate need of paving and the village does not have enough funds to accomplish this project. | Village of Shawnee Hills | 15 | 31 to 90 days | \$96,000 |
| Delaware | Personal Security for Delaware County | Our security program fulfills the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Business and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rescue operations, animal tracking, safety of police, campus security and all some of the groups that benefit from our device. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Security/tracker can set location boundaries and trigger notifications when exceeded. For personal safety a particular one can use an alarm with location information to multiple chosen phone numbers with built in microphones and speaker for communication. Asset tracking solutions are small, portable, self-powered units that continuously track an asset's location. Our access system fulfills the objectives of the Stimulus Act for it provides broadband to un-served and underserved areas while employing hundreds in high paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network in Delaware to surrounding counties for people stuck in the digital abyss. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the funds available the providers of fiber do not have the resources to do so. We are the one to try something different. Rural America needs access today not the faded promises of the past. Our unique process for deployment offers the most cost effective wireless model available. Each dollar spent produces the most coverage per mile of any existing provider which allows low access and universal participation even among the low incomes and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident by our existing network, the most advanced and cost effective Wireless technology available. | Nuleaf Ohio Limited | 4 | 31 to 90 days | \$371,700 |
| Delaware | Wireless Broadband for Delaware County | Our access system fulfills the objectives of the Stimulus Act for it provides broadband to un-served and underserved areas while employing hundreds in high paying permanent jobs. | Delaware | Home energy improvement | I would like to install new energy efficient windows in our home to help cut energy loss. Additionally, I would like to have an insulated garage door added to the home as there is a loft above it garage that cannot be maintained due to the temperature of the garage below. | Home Owner | 0 | 0 to 30 days | \$7,500 |
| Delaware | Resurfacing of Buckeye Dr | This road is falling apart due to lack of proper base. We need to do a full depth reclamation and paving of this roadway | Village of Shawnee Hills | 15 | 31 to 90 days | \$250,000 |
| Delaware | Northwest Sanitary Trunk Sewer | A sanitary trunk sewer to extend (11,000 feet) from the newly constructed Sunbury Meadows Pump Station north to the Village corporate limit. This trunk sewer would provide future sewer service to approximately 6,400 acres and would facilitate extensive commercial growth along US Route 30 (State Route 37) and area also along the former industrial Park to expand. The trunk sewer would also provide service to numerous residential developments, a new Big Walnut School District Middle School (which presently in the design phase) and allow the Village to eliminate pump stations. The Village has completed the preliminary design for the trunk sewer. | Village of Sunbury | 1000 | 91 to 180 days | \$3,800,000 |
| Delaware | Improving Energy Utilization in a Non-Profit Commu | Andrews House is a kind of community center that is home to seven small social service agencies. It provides office space to these seven nonprofits below market rates so they can operate out of their budget on go programs and services as opposed to rent. In addition, Andrews House provides two free dinners per month, a monthly free legal clinic and a weekly free medical clinic. It is an Ohio Benefit Bank site and is in the process of becoming a Summer Food Service Program site. Andrews House is a private home that was converted to Delaware's first hospital and then became home to two laboratories before it was established as a community center. Heating and cooling bills are in the \$2000/month range. High energy costs siphon off funds that could be used to serve low income families. This energy efficient project involves installation of new windows, attic insulation, fuel efficient furnaces and air conditioning. | Andrews House, Inc. | 0 | 31 to 90 days | \$54,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Delaware | US23 to Hollenback Rd. Transmission | Construction of approximately 7,700 feet of 16-inch water main. Improvements will increase reliability of water service and the protection to existing customers and provide new service to an area planned for commercial and light industrial development. | Del-Co Water Company, Inc. | 5 | 31 to 90 days | \$600,000 |
| Delaware | Big Run North Preserve | This area seeking a no interest loan through the WPCIF program for the acquisition of approximately 100 acres of land in Delaware County within the Chenango River Watershed. Once acquired, the land will be developed into a public park. The acquisition of this property will create jobs through the acquisition process and public park planning. | The Trust for Public Land | 30 | 31 to 90 days | \$4,000,000 |
| Delaware | Genoa Township Tank and Transmission Line | Construction of approx. 11,000 feet of 16-inch water line and a 1.0 million gallon elevated water tank. Improvements will increase reliability of water service to existing customers and increase the protection which will open the area to more and larger commercial development. | Del-Co Water Company, Inc. | 10 | 31 to 90 days | \$2,600,000 |
| Delaware | Recreation Unlimited & WWTP Lift Station Rehabilit | Repair, replace, and upgrade equipment and structure of two lift stations that are in need of major maintenance work. | Village of Ashley | 3 | 31 to 90 days | \$80,000 |
| Delaware | WWTP Rehabilitation | Repair, replace, and upgrade numerous facilities at the WWTP. No process changes are required. All facilities have been reviewed by a professional Engineer, and are in need of major repairs. Detailed bids and cost estimates have been made. The bid has become too expensive for the Village to handle. | Village of Ashley | 18 | 91 to 180 days | \$800,000 |
| Delaware | PH1-West Side Water Line Replacement | The downtown water main is 75 year old cast iron, and there have always been known leaks since producing water was cheaper than major repairs to the system. But, when the Ashley WTP was closed and the Village switched to Del-Co the problems of the aging system became very apparent. Since the Del-Co meter was installed, leak detection and repairs have been a top-level priority to get the system leaks down to a very acceptable level for a 75 year old system (down around 5% loss from an original 30% loss up to 300,000 gallons per day). This has come at a great expense to the Village, with repairs not replacement to the old system, still running at around \$30,000 per year, completely exhausting the Special Water Account setup for water system improvement. The water lines have already exceeded their life, and many of the valves were recently replaced as they no longer worked. It is estimated a total system replacement of the old lines to cost around \$1,000,000, and it must be completed over the next 10 to 15 years. The project submitted is a PH1 of a phase, consisting of 4,000 feet of 16" of cast iron water and appurtenances. | Village of Ashley | 21 | 181 days or more | \$1,000,000 |
| Delaware | Downtown /Steamtown Road Water Tower Rehabilitatio | The Downtown Water Tower is 75 years old, and in the process of being rehabilitated (\$150,000), including safety rail and hatch upgrades, and a full interior epoxy coating with assistance from an OPWC grant (\$111,840). We had to remove the Steamtown Road Water Tower Rehabilitation Project (\$150,000) from the scope of work due to lack of funds to meet the bid alone. Both projects are necessary in need of maintenance and both are needed to go to bid this spring when our OPWC money is available. Once rehabilitated, we expect to get 25 or more years of the same level of service that it was designed for 75 years ago, and we can focus our efforts on PH1 of the water line replacement, which is also 75 years old. | Village of Ashley | 7 | 31 to 90 days | \$170,000 |
| Delaware | Harlem Township Community Park | Township has purchased property for a park for the community last year and now needs funds to develop it for public use. They currently have an active park across the road and would like to develop this one as a passive park with walking/biking trails, picnic areas, a wetland pond, and more passive activities accessible to ADA individuals. This park would also be used as an outdoor educational center for nearby schools. | Harlem Township Board of Trustees | 4 | 0 to 30 days | \$350,000 |
| Delaware | Ohio Ag Energy Efficiency Pilot | Ohio Agricultural Energy Efficiency Pilot Project Purpose: • Implement an agricultural energy efficiency effort which will reduce energy consumption, increase awareness and adoption of new energy efficient technologies, and increase participation in existing energy incentive programs. Project Deliverables: 1. At least 10 PTE trained energy specialists, who can work one-on-one with agricultural producers with on farm energy audits. 2. Employ 1 PTE Program Manager, and one administrative position (1 PTE) to coordinate program activities, and disseminate education information. 3. Completion of 50 energy assessments in 21 Central East Ohio Counties which will provide specific information on reducing energy costs and expected rates of return on investment. 4. Conduct Fluorescent Light (FL) exchange program to 100 farms resulting in 120,000kWh saved. 5. A project evaluation of the cost-efficiency of the project, lessons learned, and feasibility for expansion. | Heart of Ohio Resource Conservation & Development | 14 | 91 to 180 days | \$76,950 |
| Delaware | Integration of Technology into Curriculum - PD Pro | Ohio has pumped billions and billions of dollars into schools by providing funds for technology. Access has been a longtime issue in Ohio and state leaders have closed that gap. One of the biggest concerns that I have is that there is not enough dollars in technology and curriculum budgets to effectively use the equipment and/or technologies. The lucky school districts in Ohio have created technology positions that allow for current integration of technology into the curriculum and/or classroom. This line with technology requires technology specialists to effectively use the dollars that Ohio has already pumped into our schools for technology; we must create technology integration specialists to work with teachers and curriculum. I am requesting funds for a full-time specialist - one for each building in our district. The funding is for one year over a 3 year period. At the end of 3 year period, the district will evaluate and fund accordingly. | Big Walnut Local School District | 5 | 31 to 90 days | \$480,000 |
| Delaware | Ballistic shields | Project would outfit selected front line cruisers with portable hand-held ballistic shields to allow deputy to safely and quickly handle changing emergency situations. They would also be used to mutual aid responses to assist other law enforcement agencies. | Delaware County Sheriff's Office | 21 | 0 to 30 days | \$14,700 |
| Delaware | Forensic work station | Project would allow for controlled environment for dusting of objects for fingerprints in house for evidence collected by our agency or any agency providing assistance, including the multi-jurisdictional LEAP task force. It would provide for the safety of processing personnel from contamination of fingerprint dust, while increasing capabilities of our crime scene unit. | Delaware County Sheriff's Office | 3 | 31 to 90 days | \$2,635 |
| Delaware | ALS Light | Project would allow for our property technicians to maintain appropriate crime scene processing items by providing the most up to date technology. Our crime scene unit would also utilize the equipment for any agency that requests our assistance as well as for our own use. | Delaware County Sheriff's Office | 3 | 0 to 30 days | \$11,975 |
| Delaware | Long guns | This project would outfit all patrol cruisers with long guns. The goal is to provide appropriate equipment indicated in various trainings to allow proper response to a wide variety of situations in the county and to allow for better service and security to the public. | Delaware County Sheriff's Office | 2 | 0 to 30 days | \$20,000 |
| Delaware | Radars | Project to replace aging Python II radars for use by our patrol deputies. This would allow for the phase out of radars that are aging and parts are becoming unavailable for repair. | Delaware County Sheriff's Office | 10 | 0 to 30 days | \$19,520 |
| Delaware | Prisoner transport cages | Project would allow for replacement of all wire cages in entire cruiser fleet of forty-six (46) vehicles. Strong officer safety from person(s) being transported to cruisers is our goal while adding additional safety to vehicle itself. | Delaware County Sheriff's Office | 12 | 31 to 90 days | \$20,700 |
| Delaware | Emergency light bars | Project would allow for the replacement of the three (3) current cruiser light bars. Our goal is to replace out-dated technology with new LED system to allow for better visibility, while assisting in maintenance of cruisers by taking wear and tear off of vehicle alternators, due to increased electronic equipment. | Delaware County Sheriff's Office | 10 | 31 to 90 days | \$79,500 |
| Delaware | Incar video/audio | This project would allow for the purchase of in-car video/audio cameras for forty-five cruisers. These cameras have been proven to be great assets for officers. They allow for real time evidence collection of incidents with greater transparency. Additionally, this evidence allows for better prosecution and documentation of criminal cases when video evidence is presented in court or other critical situations that require accurate video documentation. | Delaware County Sheriff's Office | 10 | 31 to 90 days | \$213,525 |
| Delaware | Document scanner | Delaware County has been, and continues to be, one of the fastest growing counties in the nation. This has caused an enormous increase in records including but not limited to incident reports, civil papers, warrants, and invoice files. These records are currently stored in numerous locations, including off-site rented buildings, making retrieval for public records requests, etc. time consuming. A document scanner would allow for records to be retrieved quickly and efficiently. In addition to Sheriff's Office records, we would also scan records from the multi-jurisdictional LEAP Drug Task Force. | Delaware County Sheriff's Office | 2 | 31 to 90 days | \$18,000 |
| Delaware | Bicentennial Project | Resources to photograph the years events. The interest is overwhelming - to publish a commemorative pictorial book - for generations to come - to remember these historic moments! The book would be sold at the local bookstore - with a majority of the proceeds from the sale - going BACK to approximately five community organizations (ie: Andrews House, Friends for LRL, Arts, Centrie, etc). This project will Preserve History, Provide Education, Establish Local Money for Local Community Organizations, and Support the County. I have not had a pay check in 18 months. I have dropped all of my nice, nice, and good. My personal financial situation is in dire straits. BUT, I am not asking for this money for myself. RATHER, to see this project come to fruition. I have contacted over 200 organizational/business etc. and no one is able to provide funding for this project. Please, help this project happen. I have to see all the donated hard work, be forgotten, or lost forever. I Thank you for your time and consideration. | Bicentennial Project | 2 | 0 to 30 days | \$35,000 |
| Delaware | County Comprehensive Plan | Delaware County last undertook a Comprehensive Planning process in 1993, looking at land use, infrastructure, economic opportunities, community services, and natural resources. Since that time, the county became the fastest-growing county in the state, going from 67,000 in 1990 to 164,500 today. During those years, the DCRPC has contacted with local townships to create individual plans that address land use issues, while informing local governments of related infrastructure, economic, and environmental issues. The County Engineer and RPC also embarked on a process to update the county's Thoroughfare Plan, which was completed in 2001. To prepare for future growth, the DCRPC seeks funding to undertake a process that would involve the County Engineer, the county's Economic Development office, the Soil and Water Conservation office and other local entities to revise separate touring plans in the context of the overall needs and opportunities of the county. The process will utilize the latest technology through the county's extensive GIS system. | Delaware County Regional Planning Commission | 1 | 91 to 180 days | \$25,000 |
| Delaware | Delaware State Park Marina Rehabilitation | Funding would be used to replace floating docks, the dock anchorage system, an existing shoreline retaining wall and complete other upland improvements at this state park facility. The existing docks are in very poor condition and many are no longer usable; anchorage piles are also failing and are a hazard to boats using the facility. Dredging for the free passage of work floating dock and anchorage replacement will be for construction by the end of March 2009, remaining work could be designed quickly and bid later this year. Goal would be to have the completed facility ready for the 2010 boating season. The marina is a significant revenue source for the park. | Ohio Department of Natural Resources | 30 | 91 to 180 days | \$3,500,000 |
| Delaware | Ohio Technology Training, Education and Job Placem | This program is intended to provide individuals hands on education and training as well as employment placement resources. The focus will be in the use and development of modern computer information systems and other related technology. The stimulus money would be used to expand the capabilities of an existing section named small business. Specifically it would assist in the software licensing, purchase of additional training computer hardware, lease of training center and salaries to employees/trainees. As a result of the training, participants would learn skills that are necessary for Ohio's technology based jobs. Additionally during the training period, participants would be employed by CST Solutions and receive a salary and benefits. Initially the focus would be on 25 individuals (including students, trainers and support staff) but should expand to many more jobs based on the success of the program and the current economic environment. This program would create jobs and provide needed assistance to individuals that are out of work and want to develop technology based skills that may earn use to help build Ohio's technology based jobs. One bad 18 station with medium capacity compressor, small backup, dispenser, card reader, and storage, sized for 10 refuse trucks, other service vehicles and some private vehicles. | CST Solutions Inc | 25 | 0 to 30 days | \$1,500,000 |
| Delaware | City of Westerville, Clean Fuels Ohio partner | Replace the existing leased Fire Station that is 58 years old and no longer meets minimum requirements as public building, no longer affordable, and is a hazard to buses using the facility. Design for the phase of work floating dock and anchorage replacement will be for construction by the end of March 2009, remaining work could be designed quickly and bid later this year. Goal would be to have the completed facility ready for the 2010 boating season. The marina is a significant revenue source for the park. | Clean Fuels Ohio | 10 | 0 to 30 days | \$350,000 |
| Delaware | Fire Station | Replace the existing leased Fire Station that is 58 years old and no longer meets minimum requirements as public building, no longer affordable, and is a hazard to buses using the facility. Design for the phase of work floating dock and anchorage replacement will be for construction by the end of March 2009, remaining work could be designed quickly and bid later this year. Goal would be to have the completed facility ready for the 2010 boating season. The marina is a significant revenue source for the park. | Elm Valley Joint Fire District | 50 | 31 to 90 days | \$1,200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|----------------------------------|----------------|--------------------|---------------------------|
| Delaware | SQL Servers | This project would provide for high availability, fault tolerant servers for the Sheriff's Office core SQL Servers. Our records management software and all the county's CAD and dispatch software resides on the SQL Server. Adding multiple SQL Servers would provide for more fault tolerance and failover protection for this core service that the Sheriff's Office provides. Also increased performance. It would provide superior service for all of Delaware County employees and the public that relies on our RMS and CAD systems. | Delaware County Sheriff's Office | 5 | 31 to 90 days | \$117,083 |
| Delaware | Server racks | This project would allow for the purchase of server racks with built-in power management, climate control and 19" mounting for optimal performance of our servers. It would provide for better power fault tolerance and failover and optimal climate control within each rack, providing better functioning of all devices. The benefit would be improved performance and availability of all Sheriff's Office programs and data to all employees. | Delaware County Sheriff's Office | 4 | 0 to 30 days | \$27,125 |
| Delaware | License plate readers | Project would allow for the purchase of ten license plate readers and one stationary reader. Delaware County continues to be one of the fastest growing counties in the nation. The purchase of these license plate readers would allow us to monitor for license plate readers with high camera resolution and areas of high traffic volumes. | Delaware County Sheriff's Office | 10 | 31 to 90 days | \$385,000 |
| Delaware | Ballistic vests | This project would allow for all sworn deputies to be outfitted with up-to-date body armor. Current body armor will reach its service life in 2008 and we lack funding to replace them. | Delaware County Sheriff's Office | 5 | 31 to 90 days | \$48,000 |
| Delaware | Tasers | This project would allow the Delaware County Sheriff's Office to obtain enough tasers to outfit all full-time sworn deputies. This would increase accountability and ease of equipment along with increased officer safety. | Delaware County Sheriff's Office | 43015 | 0 to 30 days | \$52,500 |
| Delaware | New Construction - Housing Dormitory | The mission of Recreation Unlimited is to provide programs in sports, recreation and education for individuals with disabilities and health concerns while building self-confidence, self-esteem and promoting positive human relations, attitudes and behaviors on a 195-acre accessible campus. The construction of a housing dormitory will enable the organization to serve more individuals with disabilities, therefore, creating more jobs with Recreation Unlimited and jobs through the usual construction process. Currently, Recreation Unlimited serves 3,000 individuals with disabilities, and health concerns through the Recreation Unlimited camps and facility lease programs. In 2008, 1,302 individuals with disabilities and health concerns were served through the five Recreation Unlimited camp programs. An increase of 1% since 2006. The new 750 bed housing dormitory will be designed with semi-private and upscale universal accommodations at a capacity of 52 individuals. The strategic goal of Recreation Unlimited is to increase the Recreation Unlimited camps and mission-oriented lease groups by 100%. This will be partly accomplished through this new construction project. | Recreation Unlimited Foundation | 100 | 181 days or more | \$1,000,000 |
| Delaware | SRO officers | Project would allow the Delaware County Sheriff's Office to hire five (5) SRO officers and includes salary and benefits for three years, at which time we would retain all positions with local funds and/or funds secured through the school districts. Our SRO positions were re-established this school year but to be efficient we must increase the number of officers. The Clermont School District has opened 12 elementary schools, four middle schools and two high schools since 1990 and continues to project growth for a need for additional schools. Big Walnut Schools are currently constructing a new middle school and elementary school. This school district, along with Buckeye Valley School District, each need an additional officer to make the program a success. | Delaware County Sheriff's Office | 5 | 91 to 180 days | \$1,088,234 |
| Delaware | Wind Turbine Electric Generating System | Recreation Unlimited is a 501(c)(3) not for profit organization with the mission of providing programs in sports, recreation and education for individuals with physical and developmental disabilities and health concerns while building self-confidence, self-esteem and promoting positive human relations, attitudes and behaviors on a 195-acre accessible campus. Recreation Unlimited has built a 20,000 sq. ft. Life Center that includes an organization's office space over 15,000 sq. ft. of indoor programming space. Our goal is to renovate this building with an energy efficient and renewable energy source. With the purchase of a Wind Turbine we will become more energy self-sufficient utilizing a renewable energy source that will save thousands of dollars in an additional benefit to not just us but the community. We will be contributing to a cleaner environment and reduce our dependence on fossil fuels. Based on the topography of our location, utilizing wind as this renewable energy source will be very effective. Without these stimulus dollars, we would not have the funds necessary to initiate this project. This will be the first program of all at Delaware County and Ohio to view. | Recreation Unlimited Foundation | 10 | 31 to 90 days | \$75,000 |
| Delaware | Property/evidence building | Project would provide for storage and consolidation of all property/evidence related items. Currently property/evidence is stored in various locations, including trailers which are not climate controlled and rural locations. Our goal is to allow for more efficient, organized, safe and secure storage of property/evidence items. The Sheriff's Office is currently responsible for the storage of evidence and property for the multi-jurisdictional Delaware County L.E.A.P. Districts. This building/property would also allow for storage of impounded and/or seized vehicles. | Delaware County Sheriff's Office | 43015 | 181 days or more | \$625,000 |
| Delaware | Live fire house | Project would allow for expansion of the current garage with a live fire class quarters firing area to provide training opportunities to our deputies and other agencies that utilize our range. Additionally, would allow for improvements to existing fire house with new pavement, covered loading docks, and the storage building. | Delaware County Sheriff's Office | 8 | 31 to 90 days | \$115,000 |
| Delaware | Stab proof vests | This project would allow for the purchase of 75 stab proof vests for the entire corrections staff. This would allow for the safety of the officers. | Delaware County Sheriff's Office | 4 | 31 to 90 days | \$30,000 |
| Delaware | Tasers - Jail | All employees of the Delaware County Jail are certified for the use of tasers. Currently only one taser is available for use by jail personnel. This project would allow for the purchase of ten additional tasers and needed cartridges. With the expansion of the second floor without the additional tasers there could be a delay in back up help in the event of an incident. | Delaware County Sheriff's Office | 3 | 0 to 30 days | \$9,060 |
| Delaware | K9 | This project would allow the Delaware County Jail to implement a K9 program inside the jail. The use of a K9 would deter fights, drugs and other dangers which would be beneficial for staff operations. | Delaware County Sheriff's Office | 2 | 31 to 90 days | \$10,500 |
| Delaware | Backup devices | This project would allow for the purchase of network attached storage and robotic tape devices. These items would provide for optimal backup and safeguarding of the Sheriff's Office data along with data stored on our servers for other agencies. In the event of a catastrophic failure of any of the Sheriff's Office systems, the data would be quickly restored, and work productivity would be quickly restored. | Delaware County Sheriff's Office | 3 | 31 to 90 days | \$20,671 |
| Delaware | Replacement servers | This project would allow for the replacement of all aging servers. The Sheriff's Office has in use servers that were retired by the Military and obtained through the DRMO project. Most of these servers are well past their operating range, and are a minimum of one year old. Though the Sheriff's Office has outdated these servers with new parts, aging servers are more prone to downtime and slow performance, as well as catastrophic failure. This would provide for better overall performance of other application servers, as well as other servers that provide critical functions for the entire Sheriff's Office as well as other agencies. | Delaware County Sheriff's Office | 3 | 0 to 30 days | \$28,916 |
| Delaware | Citrix Optimized Servers | The Delaware County Sheriff's Office provides remote access to almost all agencies. We have utilized Citrix servers since the inception of mobile computing and they are the backbone for other remote systems. Optimized Citrix Servers would provide for the Sheriff's Office to improve this service that we provide to our deputies and other supporting agencies. This can increase work production as well as increase their safety while working. It would provide for minimal downtime and increase the speed in which deputies can access information while in the field. | Delaware County Sheriff's Office | 5 | 31 to 90 days | \$52,775 |
| Delaware | Hancock-Delaware K-12 Ethernet Connectivity | Establishment of 18 additional Points-of-Presence along fiber route extending from Hancock County to Worthington, OH that have the ability to use Ethernet Services for connecting Rural School Districts to their Information Technology Centers with cost effective, high capacity Ethernet services for expanded e-learning/IT technology educational opportunities. This route construction would include the construction of a lateral crossing the Chagrin River by applying to the State of Ohio for the ability to secure conduit and cross the new bridge construction near SR750. This will allow this collaborative network between Independents Fiber Network and Rural Broadband Network Providers throughout Ohio to cost effectively connect to interconnect carrier and other transport providers operating in the Lewis Center. It has been our experience that interconnect Carrier and Emerging Carrier operating in this area have Gigabit Ethernet equipped transport system that would allow IPN and its partners to expand their collaborative efforts to serve more of Ohio's K-12 school districts. | Independents Fiber Network, LLC | 3 | 91 to 180 days | \$400,000 |
| Delaware | City of Delaware, Cummins Bridgeway, Clean Fuels O | This programmatic partner wishes to begin/continue deployment of US EPA Strataway Technologies by installing 39 diesel oxidation catalysts. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$40,000 |
| Delaware | Delaware County MRDD, Cummins Bridgeway, Clean Fu | This programmatic partner wishes to begin/continue deployment of US EPA Strataway Technologies by installing 18 diesel oxidation catalysts. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 2 | 0 to 30 days | \$20,000 |
| Delaware | Delaware City Schools, Cummins Bridgeway, Clean Fu | This programmatic partner wishes to begin/continue deployment of US EPA Strataway Technologies by installing 20 diesel particulate filters. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 15 | 0 to 30 days | \$250,000 |
| Delaware | Emerald Industries | Equipment and new technology E1 produces fresh healthy vegetables with no chemical preservatives, oils, fats or coloring or flavoring. E1 technology is 35% more efficient than existing food processing plants we recycle 90% of the water and the peeling waste and slivers go directly to cattle feed. Of the 150 new jobs created, 95% will be unskilled labor. We need their eyes and hands for inspecting and packaging and cleaning. This new technology for the state of Ohio can provide healthy vegetables for school children and reduce obesity and other related health issues associated with poor diet. This will also impact the education and learning that is so desperately needed in children today. E1 can help the farmers row. The farmers in Ohio can now grow the vegetables needed to supply this state of the art vegetable plant. Currently E1 will need 125 million pounds of vegetable per year and the Ohio farmers could supply this. E1 picked Ohio to build its plant in over five other states because of four reasons. | Emerald Industries | 150 | 0 to 30 days | \$9,300,000 |

| Delaware | Fuel Cell Deployment at a Kroger Distribution Cent | <p>This project proposes to deploy approximately 87 GenDrive fuel cell power units to replace lead-acid batteries in forklifts at a Kroger distribution center (DC) in Delaware, Ohio. Converting the battery room would free up valuable space to employ additional staff and eliminate the environmental hazards associated with the batteries. Installation of 87 fuel cell units should result in a GHG reduction of 175 tons of CO2 per year through the elimination of peak electricity demand for charging lead-acid batteries. In addition, every 7000 GenDrive units Plug Power builds consumes \$15 million of orders to 50 vendors in the supply chain who employ thousands of people (companies that largely support the auto industry). The DC employs approximately 400 people and funding will ensure that their operation remains competitive and able to maintain their employment base while lowering their operating costs. The total value of this project over the lifetime of the technology is well over \$5 million and would see a capital investment by the customer of approximately 1.5 dollars for every stimulus dollar.</p> <p>Using used plastic drums retrofit same at our shakedown workshop into rain barrels for residential use.</p> <p>Use of stimulus money would include a program to discount the price of the rain barrels to home owners to increase acceptance.</p> <p>Our landscaping division also employs individuals with disabilities. This division would perform delivery, installation and maintenance of the barrels.</p> <p>Money would be used for start-up operations manufacturing and community outreach to expand the use of rain barrels to aid in the reduction of storm water runoff and with water conservation.</p> <p>The program has the advantages of employment for a disadvantaged population and aiding the environment. We already have a business plan developed.</p> | Plug Power, Inc. | 400 | 0 to 30 days | \$1,601,221 |
| Delaware | Rain Barrels-Recycled-Produced & Marketed | <p>Our landscaping division also employs individuals with disabilities. | Delaware | Upgrading the computer network, email and website | <p>We are a small Local Health Department. Due to funding limitations, at present we are running an outdated network and email system, and have not been able to update our website since 2003. We are proposing to migrate our network to Microsoft 2008 Windows Server system with built in redundancy, security and backup capability; to migrate our email system to Google Apps, a hosted solution that will not require additional HW/SW; to update staff administration time and be secure and redundant; to redesign our agency website to include the latest web technology so that we can reach our target audience (our community) that includes the youth that use the web to communicate and get information.</p> <p>It will be a great help if we receive this funding as it will provide temporary jobs to 10 people to help us migrate to the new network & email system and also redesign our agency website. The agency website is essential for providing health information and our agency services calendar to our community. We have stepped out the project cost after careful research and planning. We intend to use the grant funds to make our agency infrastructure stronger and more efficient for the health of our community.</p> <p>State Auditing workshops, township citizen meetings with the County Auditor, County Commissioners, and other County and State Officials. The building will also house offices for Township Officials that presently do not have any space. Currently, Concord Township does not have a township hall. There are no Township Trustee offices. The Township Clerk works out of her home. All Township meetings, including bi-weekly Trustee meetings and all Zoning meetings, take place in the small training area of the Township Fairhouse, which is a full-time department. All emergency calls, radio broadcasts and phone calls are disruptive to any meeting being held. There are working offices for the fire department that are being maintained in the same room as the meetings are being held. This can be disruptive to both the meeting and the officers working. When a township meeting is being held that draws a lot of public interest, there is not ample room for the public attending the meeting, or ample</p> | Delaware General Health District | 10 | 0 to 30 days | \$70,000 |
| Delaware | Community Building | <p>The Delaware General Health District local health department for Delaware County, Ohio is in the process of buying this building that was built around 1915. In this 4 story building is an outdated elevator that does not meet ADA standards. Besides our office which employs approximately 50 full and part time employees in this building, there are 2 law firms which specialize in services to senior citizens and the disabled that probably employ another 15 people. We need to replace the elevator so business can continue uninterrupted. Without the elevator workers and visitors are forced to use a winding stairway that has worn steps on the steps and dangerous angles of descent.</p> | Concord Township Fire & Rescue | 8 | 31 to 90 days | \$1,200,000 |
| Delaware | Elevator Update | <p>The Delaware General Health District local health department for Delaware County, Ohio is in the process of buying this building that was built around 1915. | Delaware | Health and safety upgrade | <p>We own 43 Rental properties for very low income individuals with developmental disabilities. Each property would have installed a stove top fire suppression system (E750 each) and an air purification system (E1,000 each) for the furnace. This is a total of \$75,250. The installation of the two items will be paid or installed by our maintenance staff at a cost of \$8,800. This takes the total project cost to \$83,850. Many of our tenants are medically fragile and the air purification would be a significant health benefit and the majority of those fire nation wide are cooking related. These systems are installed directly over the stove top and essential for fire safety.</p> | Delaware Creative Housing, Inc | 8 | 0 to 30 days | \$75,250.00 |
| Erie | ERI-CR PVMT MARKING-VAR (County Wide Pavement Mark | Placement of pavement markings on approximately 141 miles of County Roads throughout Erie County. | Erie County Engineer's Office | 6 | 31 to 90 days | \$165,000 |
| Erie | ERI-CR 7-1.09 (Strub Road Resurfacing) | Resurfacing of approximately 0.48 miles of County Road 7 (Strub Road) from terminus of project ERI-CR 7-0.90 to US 250. | Erie County Engineer's Office | 10 | 91 to 180 days | \$110,000 |
| Erie | ERI-CR 7-1.09 (Strub Road Resurfacing) | Resurfacing of approximately 0.48 miles of County Road 7 (Strub Road) from terminus of project ERI-CR 7-0.90 to US 250. | Erie County Engineer's Office | 10 | 91 to 180 days | \$110,000 |
| Erie | ERI-CR 13-(0.00)(11.04)(19.29) (Mason Road Resurfacing) | Resurfacing of approximately 17.47 miles of County Road 13 (Mason Road) from SR 269 to Thomas Road, US 250 to SR 13, and Humen Road to Erie County Line. | Erie County Engineer's Office | 10 | 91 to 180 days | \$3,300,000 |
| Erie | ERI-CR 14-0.00 (Darrow Road Resurfacing) | Resurfacing of approximately 1.24 miles of County Road 14 (Darrow Road) from Berlin Road to SR 61. | Erie County Engineer's Office | 10 | 91 to 180 days | \$290,000 |
| Erie | ERI-CR 32-0.70 (Portland Road Resurfacing) | Resurfacing of approximately 2.27 miles of County Road 32 (Portland Road) from SR 269 to Norfolk Southern grade crossing. | Erie County Engineer's Office | 10 | 91 to 180 days | \$542,000 |
| Erie | ERI-CR 120-0.71 (Columbus Avenue Resurfacing) | Resurfacing of approximately 2.59 miles of County Road 120 (Columbus Avenue) from Bogart Road to Perkins Avenue. | Erie County Engineer's Office | 10 | 91 to 180 days | \$775,000 |
| Erie | "Tesla 1" 375 MW Wind facility | <p>The purpose of this project (known as Tesla 1) is the development of an advanced generation energy business that produces electricity from 150 wind turbines over the project life of 25 years. St. George's Renewable Energies L.L.C. is an Ohio based corporation that will sell electricity into the power grid from the power produced at the "Tesla 1" wind facility which will generate an estimated 235 MW. The project will span over the 6,000+ acres we have already secured under long term (40 year) leases in a prime wind resource area covering four of Ohio's counties (Sandusky, Erie, Seneca and Huron) centering near Bellevue, Ohio. Our overarching mission is economic development job creation in the State of Ohio using the development of wind facilities as the economic driver to achieve these goals. It is the intent of SRE LLC to lead the Ohio business community in environmental stewardship, and by example lead in sustainable business behaviors. We calculate this development, construction and ongoing operation of this wind facility will create 5,616 temporary Ohio jobs as well as 215 permanent Ohio jobs by Dept. of Energy over 20 years.</p> <p>Install 150 feet of 36" Reinforced Concrete Pipe Type C and 2030 feet of 48" Reinforced Concrete Pipe Type C in ditch replacing 30" driveway culvert. Township would have local match of 50% of project cost.</p> | St. George's Renewable Energies L.L.C. | 5,616 | 0 to 30 days | \$596,000,000 |
| Erie | Thompson Road Stormsewer Replacement Phase II | <p>Install 150 feet of 36" Reinforced Concrete Pipe Type C and 2030 feet of 48" Reinforced Concrete Pipe Type C in ditch replacing 30" driveway culvert. Township would have local match of 50% of project cost.</p> <p>This project consists of installing a 2.4 million gallon basin next to the existing Plum Brook Pump Station to store extraneous wastewater flows during wet periods to reduce the over flow of wastewater into the Sandusky Bay and Lake Erie.</p> | Vermilion Township | 10 | 0 | \$185,218 |
| Erie | Plum Brook Flow Equalization Basin | <p>Erie County Sewer District is under orders pursuant to the Sawmill Creek NPDES Permit to eliminate Sanitary Sewer Overflows at the Sawmill Wastewater Treatment Plant. Wastewater from the Plum Brook Pump Station is pumped to the Sawmill Plant during high flow situations causing overflow of the the plants contact tank. This new storage basin will reduce or eliminate this problem.</p> <p>Erie County has high debt and high existing sewer rates in place thus the need for financial assistance. Further Erie County has a high rate of unemployment exceeding the State of Ohio unemployment rate.</p> <p>Thank you for your consideration.</p> <p>Jack R. Meyers, P.E. Erie County Sanitary Engineer</p> | Erie County Commissioners | 35 | 91 to 180 days | \$3,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-----------------------------------|----------------|--------------------|---------------------------|
| Erie | Erie County Sheriff's Office Deputy Recovery Proje | In the past 6 years three (3) Deputy Sheriff positions have been lost to the counties austerity program. This stimulus funding would provide funds to replace these three (3) positions lost and bring the employee level to proper levels. | Erie County Sheriff's Office | 3 | 181 days or more | \$230,000 |
| Erie | Coen Road Stormsewer Replacement Phase II | Encasement and existing 48" and replace with 48" x 70" concrete Type C conduit. Install headwall and asphalt section of road. Proposed service level design will allow maximum unimpaired flow from the watershed of State Route 2 and the surrounding 270 acres. Township would have a local match of 50% of the project cost. | Vermilion Township | 10 | 91 to 180 days | \$68,921 |
| Erie | Elberta Beach Storm Sewer Improvements | Rehabilitation of Sanitary Sewer to meet EPA mandate to eliminate overflows to Lake Erie. | City of Vermilion | 10 | 91 to 180 days | \$1,189,100 |
| Erie | Water Booster Pump Station Improvements | Erie County has economic need as a result of high debt in the water district and existing high water rates. Unemployment in Erie County is higher than the state unemployment rate. Thank you! Jack R. Meyers, P.E. Erie County Sanitary Engineer | Erie County Commissioners | 12 | 31 to 90 days | \$800,000 |
| Erie | Wastewater Treatment Plant Sludge Press | Installation of sludge press to comply with EPA mandate. Install another 0.5 million gallon elevated water tower at State Route 60 near State Route 2 in Vermilion Township and demolish existing elevated water tower at State Route 60 near Triner Road in Vermilion Township which is inadequate for future use because of size and location. These new water towers are needed to provide adequate protection and a more reliable water supply to areas that have inadequate pressions. Existing residential and commercial businesses already in these areas are in need of this improvement. | City of Vermilion | 10 | 91 to 180 days | \$400,000 |
| Erie | Erie County Water Towers | Property acquisition at SR 60 for the new water tower is in place and under negotiation at teh SR 6 site. Erie County feels we can be ready to start construction within 6 months or less of receipt of a grant. Erie County is in need of financial assistance because of high existing debt in our water funds and high water rates that are in place. Unemployment in Erie County is higher than teh state unemployment rate. | Erie County Commissioners | 25 | 91 to 180 days | \$2,500,000 |
| Erie | Vermilion River Ice Retention Project | Ice retention for the Vermilion River for flood prevention, project will be done in conjunction with the Army Corp of Engineers. | City of Vermilion | 10 | 91 to 180 days | \$750,000 |
| Erie | Erie County Regional Dispatch Project | To combine the dispatch centers of the Erie County Sheriff's Office, the Sandusky Police & Fire Department and the Sandusky Police & Fire Departments into one regional communications center. | Erie County Sheriff's Office | 26 | 181 days or more | \$1,500,000 |
| Erie | Dist 3, PID 19657, ERI SR 0061 01.89 | Replace with 10 ft arch | Ohio Department of Transportation | 12.8 | 31 to 90 days | \$444,252 |
| Erie | Plum Brook Flow Equalization Basin | Construct a 2.4 million gallon basin next to the existing Plum Brook Pump Station to store extraneous flows during rainy wet weather periods to reduce or eliminate low flow of wastewater into Sandusky Bay area of Lake Erie. This project will reduce basement flooding and the environmental pollution that occurs when wastewater is by-pass pumped from teh existing Plum Brook Pump Station into Lake Erie. Erie County has economic need for assistance for this project since the Sewer District has a large debt service and high sewer rates already in place. We can't afford to proceed with this important project without financial assistance. Thank you! Jack R. Meyers, P.E. Erie County Sanitary Engineer | Erie County Commissioners | 35 | 91 to 180 days | \$3,500,000 |
| Erie | Big Island Water Works Chemical Improvement Project | This project involves the improvement of chemical feed systems for the regional water treatment plant that serves residents within Erie County and beyond. The chemicals included in the project are Permanganate, Alum, Sodium Hypochlorite, Calcium Soda, Fluoride. The project also involves the rehabilitation of the pre-aeration basins, plant security fence, and a new building that will include energy efficient/innovative initiatives. These improvements will prove for more efficient and safer operations. | City of Sandusky | 0 | 91 to 180 days | \$3,000,000 |
| Erie | Cedar Point Drive Resurfacing | Resurfacing approximately 4000 linear feet of existing asphalt pavement including new concrete sidewalk/pedestrian/bike pathway. This is the resurfacing of the primary route for visitors into one of the prime vacation destination attractions on Lake Erie, the Cedar Point Amusement Park. It also will promote economic growth along the waterfront area. | City of Sandusky | 0 | 181 days or more | \$572,500 |
| Erie | Hayes Avenue (SR 4) Rehabilitation Project | This project includes approximately 5200 linear feet of asphalt resurfacing and pavement widening, new concrete curb & gutter, new concrete sidewalks, replacement of signalized intersections (2), and new drainage structures. The rehabilitation of the Hayes Avenue Corridor will promote a revitalization of neighborhoods as the gateway to the City's largest employer, Fairlane Regional Medical Center. The pavement is in poor condition and the resurfacing of it will provide a safer driving surface for our residents and visitors to our community. | City of Sandusky | 12 | 91 to 180 days | \$2,195,000 |
| Erie | Hayes Avenue Underpass Project | This project involves the replacement of concrete sidewalks and handrails and the repair and painting (or surface treatment) of the abutment and abutment retaining walls on both sides of the road from North Depot Street to Falmora Street. The concrete stairs located on three sides will be replaced and new handrail installed. A jersey style lower wall will be constructed on both sides of the street under the bridge. The project involves relocating a sewer force main to a position under the sidewalk and the repair of the sewer pump station for the underpass. New lighting will be installed under the bridge. The bridge bascule will also be painted. | City of Sandusky | 0 | 31 to 90 days | \$2,000,000 |
| Erie | Perkins Avenue Signalization Replacement | This project will provide for the replacement of existing LED traffic signals with new video detection traffic mast arms. There are currently seven intersections on Perkins Avenue that are in need of replacements. The traffic signals are 20 plus years old and are in constant need of maintenance. Perkins Avenue is a major traffic route between the City of Sandusky and Perkins Township. State Route 4 and Perkins Avenue intersection is included in the project also. | City of Sandusky | 0 | 181 days or more | \$810,700 |
| Erie | First Street Resurfacing Project | This project involves the resurfacing of 6,800 linear feet of pavement, two lanes wide. The project will also include the repair of several curb & gutter sections and drainage structures. A waterline will also be replaced. This street is one of three routes to Cedar Point Amusement Park, and has the potential for future development along Sandusky Bay that would promote economic growth in our community. | City of Sandusky | 0 | 181 days or more | \$487,400 |
| Erie | City of Sandusky Street Resurfacing | This project involves 27 residential streets within the City of Sandusky. These streets will be resurfaced with new asphalt pavement, new ADA curb ramps where necessary, and adjustments of any curbs as needed. | City of Sandusky | 0 | 31 to 90 days | \$2,314,720 |
| Erie | Sandusky Sewer Rehabilitation Project | This project involves the lining of approximately 4,200 linear feet of sewer pipe. Work includes the clearing and rehabilitation of sanitary sewers ranging in size from 8" to 21", setting these sewers with a cured-in-place pipe (CIPP) and rehabilitating manholes. Cuts in the CIPP will be made for all taps in use. The CIPP will seal the pipe, preventing infiltration from ground water from entering the sewer mains. Sealing the manholes will also decrease infiltration of unnecessary flow into the Wastewater Collection System and help decrease Combined Sewer Overflows into Sandusky Bay. | City of Sandusky | 0 | 91 to 180 days | \$500,000 |
| Erie | Warren Street Reconstruction | The project will provide for complete reconstruction of approximately 3000 linear feet of deteriorated asphalt pavement. The street currently does not have existing drainage structures, storm sewers or concrete curb & gutter, these will be installed with this project. New concrete sidewalks will also be installed. Currently the street only has sidewalks in a few areas. Warren Street is adjacent to a city park that is going to be developed with new playground equipment, a relocated skate park, and also a community splash pad. This entire area would be considered part of a revitalization project in a lighted urban area. Warren Street also intersects with State Route 6 and would be a thoroughfare to the Sandusky Airport Area. | City of Sandusky | 12 | 181 days or more | \$2,742,300 |
| Erie | Salloway Drive Replacement | Road rehabilitation, Road is heavily used by busses and vehicles, and connects to Vermilion High and Junior High Schools. | City of Vermilion | 10 | 91 to 180 days | \$500,000 |
| Erie | Cleveland Road West Project | Resurfacing of Cleveland Road west in City of Huron, project also includes bridge replacement. | City of Huron | 15 | 91 to 180 days | \$1,600,000 |
| Erie | Riverside Drive Phase II Project | Project was designed in 2003 and postponed due to lack of local funds. The road infrastructure supports several hundred homes in a residential area, many of who commute to their employment in areas outside of the City of Huron. In addition, the road would feed traffic to a new residential development of one hundred and twenty units. | City of Huron | 15 | 91 to 180 days | \$550,000 |
| Erie | Sherod Park Erosion Control Project | Erosion control and public access to include ADA accessibility at Sherod Park in the City of Vermilion | City of Vermilion | 10 | 91 to 180 days | \$1,500,000 |
| Erie | North Main Street Update | Project includes property acquisition and new street construction to reconnect North Main Street at two points in which is currently bisected by public and private parking lots. The project will help increase flow of traffic and access to the city's downtown. | City of Huron | 15 | 91 to 180 days | \$1,900,000 |
| Erie | West River Road Rehabilitation Project | Street Rehabilitation, Build up intermediate and surface course, aggregate base and cement stabilization of subgrade. | City of Vermilion | 10 | 31 to 90 days | \$582,593 |
| Erie | New Fire Station and Administration Building | Construction of a new fire station and administration building that would replace the current Number #3 Fire Station in Perkins Township. The number #3 Station is over 50 years old and not energy efficient. The new building would employ the latest green technology to ensure an energy efficient structure. | Perkins Township | 50 | 91 to 180 days | \$3,700,000 |
| Erie | Showae Park Erosion Control Project | Erosion control and public access at Showae Park to include ADA accessibility | City of Vermilion | 10 | 91 to 180 days | \$1,500,000 |
| Erie | Campbell St. Reconstruction | Reconstruct Campbell St. from Taylor to Township Line | Oxford Township | 5 | 91 to 180 days | \$7,129 |
| Erie | Conagra Demolition | In 2007, the City of Huron and the Ohio Department of Natural Resources acquired the 20-acre Conagra, a vacant industrial waterfront property, as a potential public park site on the southern half of the property. The southern half of the property is owned by the state and is well accommodated a four-acre public boat launch. The northern half of the property was given to the city for development and contains several buildings and lots that once supported the industrial operation. The demolition of Conagra would create a desirable site for private development to create a center of activity that would generate job creation and an increase in the tax base for the City of Huron. | City of Huron | 50 | 31 to 90 days | \$1,000,000 |
| Erie | Perkins Township/Thorworks New Street Construction | New street from the intersection of Perkins Avenue and Caldwell Street to the entrance of Thorworks, which is one of Perkins Township's largest employers. This project would eliminate semi and other large truck traffic off of Campbell Street. The new road would also help develop other commercial properties on Perkins Avenue. Thorworks is also considering increasing their manufacturing capacities which is going to generate new truck traffic on Campbell Street and could possibly cause a back up of large trucks on Campbell Street causing very unsafe hazards for individuals using Campbell Street. | Perkins Township | 300 | 181 days or more | \$1,750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Erie | Old Railroad Street Reconstruction | Complete reconstruction of street from Bogart Road to Perkins Avenue. Project includes replacement of street, sewer lines, waterlines and sewer lines, improve drainage and supply back up tanks for Triple Crown truck traffic when they cannot gain entrance to their facility. This project would help eliminate the hazard of large vehicles in Erie County residents using this street on a daily basis. Triple Crown is a current economic benefit to Erie County and this project would help retain this facility. The Township currently has vacant property with Industrial Zoning and this project would help develop this property creating new jobs for Erie County. | Perkins Township | 100 | 181 days or more | \$3,000,000 |
| Erie | Perkins Township Street Resurfacing | Perkins Township Street Resurfacing Program. 13 streets in program to be resurfaced. | Perkins Township | 75 | 31 to 90 days | \$963,624 |
| Erie | Columbus Avenue Bridge Reconstruction | To construct a new bridge on Columbus Avenue over Pipe Creek to help eliminate flooding in the neighboring areas. Drainage and ditch improvements to be completed with this project as well. | Perkins Township | 100 | 181 days or more | \$3,500,000 |
| Erie | Staffing For Erie Metroparks Outdoor Education Cen | Funding for staffing to staff and run the Outdoor Education Skills Center at Erie Metroparks. | Erie Metroparks | 2 | 0 to 30 days | \$20,000 |
| Erie | State Route 4 Widening Project | The Township would like to see State Route 4 from the Ohio Turnpike north to Perkins Avenue in Sandusky widened to accommodate traffic volume increases, including high truck traffic, and future development. The Township feels this will benefit the whole county as Route 4 is a major corridor that runs from the county line to the City of Sandusky. | Perkins Township | 100 | 181 days or more | \$50,000,000 |
| Erie | Taylor Road Reconstruction | Reconstruct Taylor Rd. from Mason Rd. to Campbell St. | Oxford Township | 5 | 91 to 180 days | \$78,082 |
| Erie | Taylor Rd. Reconstruction | Reconstruction of Taylor Rd from Campbell to NABA Gate | Oxford Township | 5 | 91 to 180 days | \$38,244 |
| Erie | Campbell Street Reconstruction | Reconstruct Campbell St. from Mason Rd. to Taylor Rd. | Oxford Township | 5 | 91 to 180 days | \$43,757 |
| Erie | Green Road Project | Drainage Engineering & complete construction to begin in 2009. ** Green Rd. project is receiving \$7,530 from issue 2. | Florence Township | 40 | 31 to 90 days | \$57,530 |
| Erie | Burr Rd. & Nash Rd. Intersection | Improve safety at intersection through improving visibility by removing "bump" in road. | Florence Township | 15 | 91 to 180 days | \$88,000 |
| Erie | Administration and Maintenance Building Replacemen | Replace Administrative and Maintenance Building Facility | Erie County Metroparks | 10 | 91 to 180 days | \$1,500,000 |
| Erie | Seal Coating Various Roads | This project involves seal coating or chip sealing approximately 10 miles of Berlin Township Roads. The estimated cost of this project is \$14,000. | Berlin Township | 10 | 31 to 90 days | \$140,000 |
| Erie | Replacement of Existing Education Center | Replacement of Existing Education Center Facility | Erie Metroparks | 10 | 91 to 180 days | \$1,000,000 |
| Erie | Wedge Coating and Paving Various Roads | This project involves wedge coating and paving 2.5 miles on various Berlin Township roads. The estimated cost of this project is \$110,000. | Berlin Township | 8 | 31 to 90 days | \$110,000 |
| Erie | Hill Road Culvert Replacement | This project consists of a 36" Culvert with a 30" overflow culvert located on Hill Road (716) between State Route 61 and Berlin Road. Bad culvert is deteriorating and beginning to collapse. The overflow culvert was installed following the floods of 1969. The primary 36" culvert's date of install is unknown. Proposed replacement is an 84" culvert. This project will a joint project with the Village of Berlin Heights. This project has a project estimate of \$392,800 by the Erie County Engineer for 2009. | Berlin Township | 10 | 91 to 180 days | \$392,800 |
| Erie | Deehr Road Resurfacing | This project consists of resurfacing 101 feet of Deehr Road. Deehr Road is a substantial Road that is currently in a deteriorated state. The estimated cost of this project is \$71,000. | Berlin Township | 10 | 31 to 90 days | \$71,000 |
| Erie | S.R. 60 Sidewalks | New Sidewalks along R.R. 60. S.R. 60 has high traffic volumes and speeds. School in the vicinity along with residential and a large community. Sidewalks approximately 3000 feet in length. | Vermilion Township | 10 | 91 to 180 days | \$464,500 |
| Erie | Erie Metroparks Swimming Pool Project | Repair existing pool at Metroparks facility. | Erie County Metroparks | 5 | 91 to 180 days | \$1,200,000 |
| Erie | Homegardner Road Widening and Resurfacing | Widen pavement from 18 feet to 22 feet. 1250 feet in length, includes some storm sewer and ditch work. | Margaretta Township | 10 | 91 to 180 days | \$213,500 |
| Erie | Construction of Highway Department Building | Construction of new Highway Department Building | Berlin Township | 25 | 91 to 180 days | \$325,000 |
| Erie | Bragg Road Resurfacing | Resurfacing road from Breaker Road South to the Erie County Line. | Groton Township | 5 | 91 to 180 days | \$547,266 |
| Erie | Billings Road Resurfacing | Road resurfacing from Portland Road south to the Erie County Line. | Groton Township | 5 | 91 to 180 days | \$798,778 |
| Erie | Swan/Liberty St. Rehabilitation | Rebuild Swan and Liberty Streets in the Village of Milan. Storms include storm sewer. Drawings are complete and the project is ready to go to bid. | Village of Milan | 10 | 0 to 30 days | \$350,000 |
| Erie | Liberty Street Rehabilitation | Continuation of the Swan Street and Liberty Street Rehabilitation project in the Village of Milan. Design and drawings are complete. Project is ready to go to bid. | Village of Milan | 10 | 0 to 30 days | \$175,000 |
| Erie | East Merry Street Rehabilitation | Rebuild East Merry Street in the Village of Milan. Includes storm sewers, design and drawings complete, project is ready to go to bid. | Village of Milan | 6 | 0 to 30 days | \$100,000 |
| Erie | Main Street/Front Street Handicap Ramp | Main Street and Front Street, Village of Milan. Design and construct a handicap ramp from the northeast corner of the intersection to existing sidewalk. | Village of Milan | 6 | 31 to 90 days | \$15,000 |
| Erie | Scheid Rd. Reconstruction | Scheid Rd. Reconstruction from Taylor Rd. to Ransom Rd. | Oxford Township | 5 | 91 to 180 days | \$98,000 |
| Erie | Harris Road Project | Tar and chip Harris Road from the Township Line to Mason Road | Oxford Township | 5 | 31 to 90 days | \$18,400 |
| Erie | Bryan Rd. Project | Tar and chip Bryan Rd. from Township line to Thomas Road | Oxford Township | 5 | 31 to 90 days | \$20,233 |
| Erie | Delamatre Rd. Project | Tar and chip Delamatre Rd. from Ransom Rd. to Platen Tract Rd. | Oxford Township | 5 | 31 to 90 days | \$18,964 |
| Erie | Thomas Road Project | Tar and chip Thomas Rd. from S.R. 113 to Mason Rd. | Oxford Township | 5 | 31 to 90 days | \$44,489 |
| Erie | Harris Road Project | The roadside from Portland Rd. to Mason Rd. Resurface Runway 09-27. Emergency Nature of Project as the airport is the lifeline of the Island. Runway 9-27 is the only open legal runway on the Island and it is such danger that we have been notified by Gliffing Flying Service that it should soon become unusable by their service if it is not addressed. | Oxford Township | 5 | 31 to 90 days | \$10,000 |
| Erie | Kelleys Island Air Runway Resurfacing | | Village of Kelleys Island | 10 | 181 days or more | \$250,000 |
| Erie | NASA Runway Project | NASA Runway Project - New 8000' long runway Location-NASA Plum Brook Research Station-U.S. 250 in Erie County. Project will be design built. | Erie County Commissioners, Erie County, Ohio | 5,000 | 31 to 90 days | \$80,000,000 |
| Erie | Wind Turbine Acquisition | City of Milan endeavors to erect a 250kw wind turbine at its water filtration plant that would greatly reduce its annual utility costs approximately \$200 to \$250 per year. A wind analysis was completed in 2008 and projected and estimated cost of \$1 million. The City has collaborated with other local governments interested in the same construction and has participated in discussions with a European manufacturer that is interested in locating an assembly plant in Ohio commensurate with a commitment to local communities to purchase its product. The City requests \$7 million for the construction of seven turbines in Erie County. This project would provide a number of new jobs associated with the manufacture and installation of the wind turbine blades and towers. | City of Huron | 50 | 31 to 90 days | \$7,000,000 |
| Erie | Wind Turbine Acquisition | Township is seeking funds for the purchase and construction of a 320kw wind turbine. | Groton Township | 10 | 91 to 180 days | \$98,000 |
| Erie | Wilcoxson Street Storm Water Discharge Reconstruct | Reconstruct stormwater discharge of 2 pipes in ravine adjacent to Wilcoxson St. Project design paid and 80% complete. Project Shovel Ready by Summer 2009. | Village of Milan | 10 | 31 to 90 days | \$20,000 |
| Erie | Berlin Road Water Line | The replacement of this water line has been designed and leads local residential and commercial customers to the City's water. In addition, the line will cross a large arroyo and the Erie City distribution network and connect to an Erie County water line that provides service to additional residential and commercial customers. The city and county have collaborated together to provide this service for many years. The project has been designed and could be initiated immediately upon receipt of federal funds. | City of Huron | 10 | 0 to 30 days | \$700,000 |
| Erie | Ransom Rd. Reconstruction | Reconstruction of Ransom Road from Mason to Scheid Rd. | Oxford Township | 5 | 91 to 180 days | \$102,386 |
| Erie | Dist 3, PID 85866, SAN 2 vehicles | 2 vehicles for Sandusky Transit | Ohio Department of Transportation | 2 | 31 to 90 days | \$125,000 |
| Erie | Eliminating Black Smoke into the atmosphere.Going | Lakeway Mfg Inc. would create two new jobs and bring back three laid off workers. Lakeway has a patent for Blast Furnace emissions of carbon foot print to change to a Green state, no BLACK carbon emissions into the atmosphere. This would eliminate Black carbon smoke into the air. Green steps with need to buy carbon credits. Lakeway's next project is to do their own Blow Pipes, welding and machining radius instead of sending them to other companies. Creating Two NEW jobs within our own company. Saving about \$ 120,000.00 to be our bottom line. | Lakeway Mfg. Inc. | Five (5) | 0 to 30 days | \$250,000 |
| Erie | Lions Park Beach Project | Lions Beach Park is a park owned and maintained by the City of Sandusky, Ohio. This park which is situated on the western side of the city has an eroding shoreline from the impact of northeast storms and a decrease in the littoral transport of sediments. In an attempt to slow the erosion at the park's shoreline, the city has placed concrete blocks as a temporary shoreline protection measure. While the blocks have slowed the forces of the northeast winds, it has also created access issues for those desiring access to Lake Erie. A safety issue also arises from the placement of the structures. This project involves the rehabilitation of waterfront property that was once used as a local beach decades ago. The shoreline would be cleared, debris removed, sand brought in to build a new beach, and groins built out in the water to prevent future deterioration and shoreline erosion. This beach will provide free access to Sandusky Bay for residents and visitors. See also signs and brochures for Sandusky Transit. | City of Sandusky | 0 | 181 days or more | \$4,949,000 |
| Erie | Dist 3, PID 85865, SAN Bus stop signs and shelters | Dist 3, PID 85867, SAN Retain hailing taxis | Ohio Department of Transportation | 2 | 31 to 90 days | \$82,000 |
| Erie | Dist 3, PID 85867, SAN Rehab fueling tanks | Dist 3, PID 85867, SAN Retain hailing taxis | Ohio Department of Transportation | 5 | 91 to 180 days | \$250,000 |
| Erie | Dist 3, PID 85868, SAN Communication & computer eq | Communication and computer equipment for Sandusky Transit | Ohio Department of Transportation | 1 | 91 to 180 days | \$25,000 |
| Erie | Erie County Landfill Gas-to-Energy Project | Source of sustainable power resulting in GREEN POWER being produced at a rate of 1.6 Megawatts. This green power will be sold to AMP-Ohio to resell to their customers. Erie County needs to provide a 12" gas line from the landfill cell to the generator site. The estimated cost of installing this 12" gas line is \$200,000. Construction will create approximately 10 jobs, plus permanent jobs (2 or more) will follow for the operation and maintenance of the system. The sale of the landfill gas to the contractor and the sale of CARBON CREDITS will help keep the Erie County Landfill rates affordable. The destruction of the landfill gas by the generator will keep GREENHOUSE GASES (methane and carbon dioxide) from harming earth's atmosphere. Erie County's unemployment rate is higher than the state average rate and this funding is very desirable to the Erie County Commissioners. Jack R. Meyers, P.E. Erie County Sanitary Engineer We recently expanded and built a new office creating new jobs for several Ohioans. Our build included a variety of energy efficient details in the construction. We are 100% electrically powered through our local city municipality and have no natural gas run to the building. We have a full heat pump geo-thermal HVAC system, waterless urinals, all fluorescent lighting, and additional insulation and natural lighting to reduce additional cost. Our last step is to incorporate wind power into the mix. We are looking to install a small 30-50kw turbine on our 2 acre lot. We have involved locally with our City Manager, two university grads, and an individual from Putnam Heights to explore a project locally. It would be beneficial to also pursue this on our own. Being in education and with our business located across the street from one of the campuses we provide an environment where we bring in students for work study. We currently have two individuals working for that are part of this program. We feel being the only corporation in the area to go 100% green would provide great opportunity for others to learn from us and also provide additional employment opportunities. | Erie County Commissioners | 12 | 31 to 90 days | \$200,000 |
| Erie | Windpower Initiative | Jack R. Meyers, P.E. Erie County Sanitary Engineer We recently expanded and built a new office creating new jobs for several Ohioans. Our build included a variety of energy efficient details in the construction. We are 100% electrically powered through our local city municipality and have no natural gas run to the building. | Erie | Erie County Landfill | In cooperation with the Erie County Government, we will be capturing the toxic methane gas from the Erie County landfill and converting this gas into electricity (renewable energy). We will be selling the electricity to Erie-Ohio under a long term contract at the current wholesale market price. All documents and permits are complete. All engineering is complete. This is a shovel ready project. We will produce 1.6 MW's of electricity or renewable energy. This is enough electricity to power 1,200 homes. This is a voluntary project that is a public-private venture. We will be eliminating 23,000 tons of carbon dioxide annually from Ohio's atmosphere. Substantial rehabilitation of 60,000 square foot historic building. This historic building listed on the Federal Register of Historic buildings will need 30 new permanent jobs, 75 temporary jobs and add 70 new residents in Downtown Sandusky. This project will upgrade an existing pump station, install tank control valve, and modify system piping to allow Northern Ohio Rural Water to increase capacity to the southern portion of their Main District. This will allow Northern Ohio Rural Water to better serve existing customers and increase water availability to neighboring communities. | Bio-Gas Technologies, Ltd. | 10 | 0 to 30 days | \$2,400,000 |
| Erie | Rieger Lofts (Historic Hotel Rieger) | Substantial rehabilitation of 60,000 square foot historic building. This historic building listed on the Federal Register of Historic buildings will need 30 new permanent jobs, 75 temporary jobs and add 70 new residents in Downtown Sandusky. | 232 Jackson Street,LLC | 105 | 0 to 30 days | \$200,000 |
| Erie | Berlin Heights Pressure Zone | This project will upgrade an existing pump station, install tank control valve, and modify system piping to allow Northern Ohio Rural Water to increase capacity to the southern portion of their Main District. This will allow Northern Ohio Rural Water to better serve existing customers and increase water availability to neighboring communities. | Northern Ohio Rural Water | 8 | 31 to 90 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Erie | Strecker Road Master Meter Relocation | This project includes the upgrade of an existing master meter vault and relocation of the vault to a new water purchase point with the Erie County water system. The existing Northern Ohio Rural Water customers in this area will be served from a different water supply through the master meter. This will free up additional capacity Main Districts along Northern Ohio Rural Water to better serve all of its customers. | Northern Ohio Rural Water | 5 | 0 to 30 days | \$100,000 |
| Erie | Socialization Programs - including Out on the Town | Consumers to better communicate/socialize in a public setting. This is also an opportunity for consumers who generally don't travel away from home, due to their illness, to get out into the community and be an active participant in the community. The Public Luncheon is a program where consumers prepare a dish and meet at ESN to share their dishes at a luncheon and socialize/support one another. "Out on the Town" is an outing that offers consumers a chance to travel on the Sandusky Transit to a local business to have lunch, practice their communication skills, along with socializing with people in the community. Friday Night Social is another socialization program. There is a buffet dinner provided to consumers. Later that evening members enjoy bingo for prizes. Prizes are modest household goods that many members can not afford. These programs were very successful in the past. However, due to budget cuts that have already been passed down to our food bank, we are unable to provide these services any longer unless we secure stimulating funding. | Erie Shore Network, Inc. | 0 | 0 to 30 days | \$11,000 |
| Erie | Berlin Heights 1.5 MG New Elevated Water Storage T | This project consists of the purchase, fabrication, and erection of a 1,500,000 gallon elevated storage tank at the existing Berlin Heights site. The construction of this tank will add additional storage capacity to Northern Ohio Rural Water's Main District and will allow for better system operation and additional capacity to serve nearby communities. | Northern Ohio Rural Water | 25 | 31 to 90 days | \$2,500,000 |
| Erie | Countywide Wind Turbine Acquisition | The City of Sandusky has collaborated with other local governments including the City of Huron interested in the construction of Wind Turbines (250 KW) and has participated in discussions with a European manufacturer that is interested in locating an assembly plant in Ohio commensurate with a commitment by local communities to purchase to produce. A wind analysis was completed in 2008 and projected an estimated cost of \$1million for each wind turbine. The City requests \$7 million for the construction of seven turbines in Erie County. This project would provide a number of new jobs associated with the manufacture and fabrication of the wind turbine blades and towers. | City of Sandusky | 50 | 31 to 90 days | \$7,000,000 |
| Erie | City of Sandusky | The City of Sandusky is requesting funds for two 1,000 kw Wind Turbines to provide a majority of the electricity needs at the City's Water and Wastewater treatment plants. Each wind turbine is estimated to cost \$2.5 million. A wind study was completed in 2009 that projects a potential savings of \$7,236,000 in energy over a 30 year period. This potential energy savings will benefit the water and wastewater customers through their utility bills by keeping rates as low as possible. By keeping rates low, our City and surrounding communities have a potential to make the area more attractive to new businesses and help retain the businesses we have here. | City of Sandusky | 0 | 31 to 90 days | \$5,000,000 |
| Erie | Greater Sandusky Wind Farm | BQ Energy is currently an interested party in a shovel-ready wind farm outside Sandusky, OH. The wind farm is on a large tract of land bordered by a single entry. All of the required regulatory and environmental studies are complete. The interconnection to the electric utility grid is not under FERC jurisdiction, and bypasses the normal interconnection process. The project is ready for filing permit applications and beginning engineering. The landowner will be selecting a developer in the near future. The project could be completed in the 2nd quarter of 2010, would create 100 construction and 12 permanent jobs, would provide valuable skills to Ohio workers, and could use steel and concrete from Ohio companies. Most importantly, the project can be operational in 2010. No other wind farm in Ohio can claim this. | BQ Energy LLC | 112 | 91 to 180 days | \$10,000,000 |
| Erie | Sandusky Marina District Development | The proposed plans for the multi-phase Sandusky Marina District Development include three unique residential buildings, a hotel and expanded public parking area along the shoreline and approximately 25,000 square feet of commercial space for retail and restaurant development. Upon completion, this project will bring new life to Sandusky and capitalize on one of the city's best assets, the lake. By incorporating a range of eco-friendly practices and sustainable building materials, we are committed to providing a comfortable community that also helps conserve the resources that surround it. As a master planned community, we will also include things such as improvements to the streets, parking and public facilities that will integrate "green" living practices wherever feasible. This project will also be seeking to explore with The Leadership Center (LEED) Green Building Rating System. The federal stimulus assistance will be used for public improvements, including infrastructure, and green design elements of the project. | Strnisha Development Advisors | 850 | 181 days or more | \$12,400,000 |
| Erie | Erie County Sheriff's Office Hybrid Vehicle Project | Because of reduced funding, the Erie County Sheriff's Office will not be given funds to replace aging vehicles. The stimulus funding we would receive would allow us to purchase hybrid vehicles for police functions that would use less fuel. | Erie County Sheriff's Office | 0 | 181 days or more | \$125,000 |
| Erie | Erie County Sheriff's Office Domestic Violence/Int | The Erie County Sheriff's Office Domestic Violence/Intervention Program Deputy would be a new position. This deputy would investigate and follow-up on every report of domestic violence that occurs in Erie County to ensure the case is completely closed. As it pertains to Internet Pornography the deputy would proactively search out and reduce the number of predators lurking on the internet. | Erie County Sheriff's Office | 1 | 181 days or more | \$83,000 |
| Erie | Recycling is energy and saves natural resources | Recycling material is a savvy practice. I believe that my business does not set a new normal in the industry for all of Ohio. This concept would set future industry standards. Using my experience and skills, I am positive that a recyclable concrete, asphalt, clay, brick, porcelain, brick and block mobile crushing operation would do, very well here. These recyclables that could easily meet state specifications are available in ready, drainage, storm, bridges building materials, etc. I believe in "going green" and applying all efforts into conserving our resources. This company could hire 12 employees provided public and private sectors still moving. There are endless possibilities for this type of business. Recycling is energy-efficient, saves natural resources, reduces the need for landfills, and reduces the amount of pollution created during the manufacturing processes. This and reusable air, land, and water. The earth's resources are finite. Reduce, reuse or recycle to conserve valuable resources. Help our company...so we can help put our neighbors to work. | Contract Crushing and Recycling Co. | 12 | 31 to 90 days | \$100,000 |
| Erie | Ohio Biofuels implementation Program | *New liquid biofuels on a massive scale. *New rural jobs and tax revenues. *Reduced pollution runoff and improved water quality in watersheds. *Increased soil fertility. *Significant carbon sequestration credits that can be applied against utility carbon liabilities. *New revenue sources for farmers and landowners. *New local fuel-use and fuel-sales economies. Our program will expand and demonstrate our methods of creating stands of herbaceous biofuel feedstocks that will: a) filter runoff pollutants, b) create fertile soils, c) sequester carbon in soils, and d) yield massive amounts of cellulosic biofuel feedstocks that can yield strategic quantities of locally-produced fuels. Our Ohio Biofuels Implementation Program will integrate biofuels feedstock production, water quality improvements, soil-building processes, creation of carbon sequestration credits, and ultimately local production of heating and transportation biofuels. | Orion Biofuels | 1000 | 31 to 90 days | \$1,700,000 |
| Erie | NASA Plum Brook Runway Project | Proposed new 9000' long runway at NASA's Glenn Research Center - Plum Brook Station located at 6100 Columbus Avenue, Sandusky, OH in Erie County. Location of the Ohio Turnpike and just west of U.S. 250. Project will be design build. Large potential for job creation/retention and would impact a multi-county area and the Glenn Research Center in Cleveland. It is noted that the Plum Brook Station is affiliated with the Glenn Research Center and the project has received substantial support from the Greater Cleveland Partnership. | Erie County Commissioners; Erie County, Ohio | 5,000 | 31 to 90 days | \$80,000,000 |
| Erie | Change Deductible Income Issues | There are many of us that have been denied our State Unemployment benefits because we are receiving a pension from our previous employers. This is not fair and I am positive that many feel the same as I do, wrong. We paid our State of Ohio income taxes for so many years and now we can't collect the benefits that our law says we have. This needs to be amended and soon. | Workers For Unemployment Reform | 1000 | 0 to 30 days | \$500,000 |
| Erie | New Station | The City of Huron Fire Division is seeking to replace our 50 year old fire house with an energy efficient public safety center that will house fire, EMS, and police units along with training facilities for all three entities. The current fire house and police department are becoming outdated with inefficient electrical systems, plumbing that is leaking and costing additional money for loss water, and our capabilities have outgrown our storage size for rescue equipment. Our departments are located on an international port along the shores of Lake Erie and has a potential for winter power as an alternative means of energy. | City of Huron, Fire Division | 33 | 181 days or more | \$7,000,000 |
| Erie | Vermilion River Dockage Improvements | Replacement of existing bulkhead at two transient marina sites operated by the Vermilion Port Authority. Waterworks marina is located at the Vermilion Water Plant and in disrepair. Repair of this site and second site would make the area safe for our transient boaters and to the visitors of this site on our scenic Vermilion River. The Vermilion River port is the largest small boat harbor on Lake Erie and used by sports enthusiasts as well as recreational boaters. The improvement of these dockage facilities would bring more visitors to our community and increase the revenue of our local economy. | Vermilion Port Authority | 5 | 31 to 90 days | \$450,000 |
| Erie | Repair resurface public parking lot | This is the only parking lot in downtown Vermilion, Ohio. It has served the Vermilion Merchants since 1964. This lot serves 75 % of the merchants in town. It has been neglected and repaired many times. It now needs a major overhauling. The city offices are within one block and the public uses it to go pay water bills, etc. The storm water sewer system needs to be hooked up to the city storm water system. Vermilion is a Main Street community and is considered to be the one of the top 3 Main street communities in Ohio. This would help the city out immensely. Thank you for your time | Public parking lot only one in Vermilion | 50 | 31 to 90 days | \$50,000 |
| Erie | The Hotel Reiger (Sandusky Hotel) | Rehabilitation of historic vacant hotel for housing and retail. | Sandwick Architects, Inc. | 28 | 31 to 90 days | \$400,000 |
| Erie | Sandusky Greenhouse Solar Panels | This project involves the installation of solar panels on the roof of the City's greenhouse. The City of Sandusky operates a greenhouse which is used to grow plants for local parks. The greenhouse is in the process of being rehabilitated in a manner that will allow the facility to be used for additional purposes, not only for horticultural aspects, but for environmental and energy conservation aspects as well. The solar panels will be used to operate a large portion of the greenhouse. | City of Sandusky | 3 | 31 to 90 days | \$60,000 |
| Erie | Lake Erie Water snake habitat protection | Purchase private habitat of the Lake Erie Water Snake (Nerodia sipedon insularum) and create a legal framework to protect that habitat from developments. | Inland Seas | 2 | 0 to 30 days | \$550,000 |
| Erie | Clinical Research Expansion | This stimulus would fund the next phase of a business expansion for a medical research laboratory that has been in existence for 24 years. Current workstations of 31 employees would be expanded to over 190. Expanded services would be focused on contract research laboratory services provided to the pharmaceutical industry. | North Coast Clinical Laboratory, Inc. | 184 | 31 to 90 days | \$4,900,000 |
| Erie | Revision to previous proposal | This is a revision to previously submitted new fire station. Addition and remodeling of existing Fire Station by moving training and community room to first floor for ADA compliance. Constructing new hose drying training tower. Replacing HVAC systems for energy efficiency. Replacing windows and garage doors for energy efficiency. Replacement of existing fire roof with a green living roof or metal roof. Adding solar panels for hot and small wind turbine for power generation. Adding daylight to apparatus room for natural daylight. Adding storm water collection system and replacing apparatus room floor drains to capture water runoff. Replacing existing broken concrete parking lot and apron areas. All projects would strive for highest LEED/Green building certifications and practices. | Huron Division of Fire | 40 | 91 to 180 days | \$850,000 |
| Erie | Zone Logistics Launch 2009 | New trucking so that will be able to hire 60 plus owner operators in the expedited and truckload fleet. | Zone logistics, LLC | 60 | 31 to 90 days | \$1,500,000 |
| Erie | Feick Building | A. Install safety code related items in an historic office building as part of a historic restoration and energy efficiency upgrade project. 1. Fire suppression alarm system 2. Second fire egress stairwell 3. Upgrade elevators 4. Misc. interior code upgrades B. Restore and/or recreate the historic first floor facade of the same building. | Page Development, Inc. | 60 | 31 to 90 days | \$1,190,000 |
| Erie | Lake Erie Reinvestment Initiative | This redevelopment project will be used to fill in Lake Erie with suitable infill for future commercial, industrial and commercial development. This will eliminate harsh Lake Effect weather patterns which will promote economic growth in the winter months. This will also provide Canadian migrants with easier access to US medicine, education and jobs. Monies will be saved in at current and future environmental water projects on Lake Erie. Please support this measure for the future expanded landmass of OHIO!! | Lake Erie Redevelopment Consortium | 1,000,000,000 | 181 days or more | \$1,000,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Erie | Gym Floor Replacement | 12,000 sq. ft. of hardwood for a gym floor replacement and upgrading lockers to comply with Jannet's Law mandates. At the current time the gym floor is 20 years old and cannot be refinished anymore. Half heads are now to the surface of the floor and the wood cannot be sanded any lower. There are gouges and water damage due to these 20 years of service. At the present time, five volleyball and six basketball teams presently use the gym along with Physical Education classes and various outdoor athletic teams that use the gym during inclement weather. With today's economy, it is very difficult to go to the voters for more money for a gym floor. The lockers are also 20 years old and they look 2. There are no lockers in the boys locker room, just hooks on the wall. The lumber and fixtures need to be upgraded and reworking needs to be done. There is no Handicap Facilities in the locker areas. Build a environmentally asphalt plant that will produce thousands of tons of asphalt to local company for infrastructure projects, as well as putting people to work. | Huron City Schools | 10 | 0 to 30 days | \$200,000 |
| Erie | ASPHALT PLANT | | THE KREIMES CO. INC. | 10 | 31 to 90 days | \$250,000 |
| Erie | Sandusky City Hall | The City of Sandusky is looking to relocate its City Administration, Municipal Court and the Police Department from its current location to facilitate a proposed 30 acre, \$160 Million mixed-use redevelopment project along the eastern edge of Sandusky's downtown waterfront. Phase 1 of the development would include the redevelopment of the current City Hall property and a multi-level, city-owned water park, into a Hotel/Conference center and mixed-use residential and commercial facility respectively. The City has applied a historic preservation overlay to the locker areas business district as the new location for these city services as part of their investment in the continued revitalization of Sandusky's core downtown. | City of Sandusky | 24 | 91 to 180 days | \$12,000,000 |
| Erie | Sandusky Cabinets Demolition & Clean-up | The City of Sandusky is looking to demolish the former Sandusky Metal Products/Sandusky Cabinets facility. This Brownfield site consists of a 20,000 square foot factory section as well as a small maintenance garage adjacent to the factory. The property has already had Phase I and II Environmental Assessments performed with the help of State and Federal Grant dollars. What remains to be done is the removal of four (4) underground Storage Tanks, removal of asbestos containing materials, lead based paint abatement, and demolition of the building. This project would create an attractive site for redevelopment that would help create jobs and increase the local tax base for the City of Sandusky. | City of Sandusky | 20 | 31 to 90 days | \$750,000 |
| Erie | U.S. 250 and Park Place Drive Intersection Improve | Realign intersection and implement safety improvements at U.S. 250 and Park Place Drive in Sandusky, OH. Improvements to reflect recommendations from the already completed and approved U.S. 250 Corridor Safety and Congestion Study. Sign program average review available to support bus products in the near future. This will allow our customers to use our sign program and our alternative fuel products. The proposed unit will be DOT certified for liquid hydrogen transport, increase the size of our alternative fuel products market, and will help facilitate the development of longer range alternative fuel powered vehicles. | Wayne County Department of Regional Planning | 150 | 31 to 90 days | \$2,000,000 |
| Erie | Mobile Liquid Hydrogen Re-Fueling Unit | Sierra Lobo's patent pending design is ready for immediate fabrication and deployment. Sierra Lobo continues to lay the ground-work for manufacturing and producing this unit in-house in Northwest Ohio using internal research and development funds, which is not sufficient to create a commercially viable product. The additional stimulus funds will bridge this gap. Once the unit is completed it will open the path for a new line of high tech alternative energy products, retain 35 jobs and create twice as many high tech manufacturing jobs in the supplier base in Erie, Sandusky, Huron, Ottawa, Lima, and Cuyahoga counties. | Sierra Lobo, Inc. | 35 | 0 to 30 days | \$250,000 |
| Erie | Outdoor Shelter upgrades and additions, education | The Erie MetroParks of Erie County, Ohio would like to construct two additional 36' x 60' open shelter houses, to be used for indoor and outdoor education programs. Also, the addition of two 36'x50' enclosed shelter houses that would be used for public needs and nature education programs. These additions to the Erie MetroParks would allow better service to the public the Park District serves. These 36'x60' units would allow more indoor/outdoor nature interactive programming to be provided. These structures would be energy efficient and cost effective. Also the funding would allow us to hire 4 people staff this season to instruct children and adults. The Erie MetroParks provides over 400 programs a year. This is an extraordinary due to the fact we are a ORCA/SAS-Lazy Landlord park district that has not had any upgrades in 15 years. Our budget continues to rise and our money for programming staff is dwindling. | Erie MetroParks | 4 | 0 to 30 days | \$320,000 |
| Erie | ADA Compliance study and upgrade | The Erie MetroParks of Erie County, Ohio would like to have a study completed of the 15 parks and preserves for an up to date Accessibility Plan. From that plan the Erie MetroParks of Erie County for providing services to the physically challenged and accessible areas. The Park District would like to partner with Erie County MRDD in the planning and development to provide accessible facilities and playgrounds for the special needs population of this county. | Erie MetroParks | 1 | 0 to 30 days | \$100,000 |
| Erie | Clear Waterways of invasive species | The Erie MetroParks of Erie County, Ohio would like to have a study completed of the 15 parks and preserves for an up to date Invasive Species Plan. From that plan the Park District would like to be the leader in the county for control and eradication of the invasive species. The waterways in the Park System are being choked with invasive species of vegetation. The fish habitat is being affected. When these species grow in the streams and wetlands the fish population is impacted. The Park District would like to develop a plan and begin restoring these waterways and wetlands. | Erie MetroParks | 1 | 0 to 30 days | \$100,000 |
| Erie | Upgrade of Computer Systems | The Erie MetroParks of Erie County, Ohio would like to upgrade its computer system to be able to provide educational programs for children and adults. The Park District would provide online interactive programming. Most children are "ONLINE" in this technology age. The Park District must keep up with this culture change and first attract these children to nature and nature education with technology. In order to keep current the Park District computer systems and software need upgrades. This upgrade would allow for education programs to be designed and implemented for public use. The goal would be to introduce the public to nature and teach them how to get OUTSIDE and experience nature. | Erie MetroParks | 1 | 0 to 30 days | \$50,000 |
| Erie | Keep It Local Stimulus Plan | Purchase homes in Erie County currently not selling. Use local independent contractors, businesses and banks to bring structure up to code. Rent property to families or individuals that are experiencing financial difficulty due to the economic state. Individuals who have been downsized or job-lifted, lost their home in foreclosure, etc. With stimulus money to cover the cost of the home(s) and repairs, rent or rent to own option can be offered to families in need at affordable prices. Local businesses will be used to secure insurance, windows, landscaping, furniture, decorating, painting, roofing, heating and cooling, and other needs. | Personal | 100 | 0 to 30 days | \$300,000 |
| Erie | Athletic Field House / Community Center | Huron City Schools, as well as the city of Huron, is in dire need of a facility in which the whole community can benefit from physical activity throughout the entire year. This would be a steel, stand alone structure on school owned property next to the High School. This complex would contain multiple athletic courts for basketball and volleyball practice as well as an aerial ropes course. A walking track will encompass the courts, which will be made available for public use when the high school is not using the facility. Within the building there will also be rooms for aerobics classes, meetings, batting cages, wrestling mats and locker facilities. With our current facility (the 19 year old high school gym) we currently have kids still at the school until ten o'clock finishing up practices or intramurals. We have only gymnasium that has accommodated six basketball teams during the winter as well as preseason conditioning for baseball and track. This new facility can help us have all practices over six o'clock thus opening up the facility for community use. | Huron City Schools | 100 | 181 days or more | \$1,500,000 |
| Erie | Lake Erie Charter Sailing | Provided recreational opportunities for those who wish to sail Western Lake Erie area from the Port of Huron, OH to areas such as Kelly's Island, Middle Bass Island and North Bass Island. Tourism is a basic industry in this area and people who work the ports, restaurants, marinas, hotels, etc. will suffer without the tourist dollars that this type of project will provide. Boat Charter can be for up to 8 people per trip, with or without a Captain. Port of Huron employees if people plus vessels Captains on call from the surrounding area. The island tourist industry employees hundreds on people who, some full time some part time who will not be afforded employment if this type of project does not exist. | Ten Toes Two Charter Sailing | 30 | 31 to 90 days | \$170,000 |
| Erie | Lake Erie Charter Sailing | Provided recreational opportunities for those who wish to sail Western Lake Erie area from the Port of Huron, OH to areas such as Kelly's Island, Middle Bass Island and North Bass Island. Tourism is a basic industry in this area and people who work the ports, restaurants, marinas, hotels, etc. will suffer without the tourist dollars that this type of project will provide. | Erie | THE PRESTIGE | EXPAND EXISTING BUSINESS TO INCLUDE: 1) TONER CARTRIDGE REFILL AND RECYCLING. 2) MANAGED PRINT SERVICES. 3) DOCUMENT STORAGE AND MANAGEMENT. The project called Screen Power is to develop window screens that could return wind energy back to the electrical grid. Creating American jobs in Ohio and generate energy from the wind that could be on every home. The other project called Gutter Power is to develop apparatus that will be able to take rain water from a rain gutter and create power from the rain fall and feed back to the electrical grid this could be on every home Creating American jobs in Ohio. | BROKEN ACRES ELECTRONICS | 7 | 91 to 180 days | \$150,000 |
| Erie | Screen Power /Gutter Power | | MV Circuit Design Inc | 25 | 31 to 90 days | \$10,000,000 |
| Erie | Help Me Grow | Help Me Grow works with children 0-3 years of age and their families. It serves children with developmental disabilities and children who are identified as "at risk". Recent state cuts in our program will result in approximately 200-300 children who will not receive services this year through the program. These funds would allow us to increase our program for these children. With the identification and service coordination of the "at risk" population, we will reduce the funding needed to provide services to these children later in life, to the prevention of deep and costly devoting. | Family & Children First | 8 | 0 to 30 days | \$160,000 |
| Erie | water recovery plan | This project involves capturing runoff water from a greenhouse and nursery production site. The capture of the water will prevent runoff into streams and allow the company to recycle the water for agricultural purposes. This will reduce watershed and nutrient deposits while reducing the counties water load. The project has been installed as phase 1. Phase 2 involves installing 3-250 GPM pumps, a pump house, injector, electric, and approximately 500' linear water line. To further the environmental benefits a wind turbine will be installed to supply the needed power to the pumps and the growing facility. Excess energy will be returned to the electrical grid. A portion of this system will be used to start the production of a green roof program called "Live Roof". Green roofs are an ideal landscaping ground for mosquitoes which can carry such diseases as dengue fever, encephalitis, and the West Nile virus. These mosquitoes if left unharmed present serious problems in the form of the fire. This type of fire has many negative impacts on human, animal, and plant life. When scorpions are ignited they generate a dense black smoke which can cause air quality issues. Concrete Technology will be used to mitigate these conditions, and provide a safe and effective alternative to disposal of the scorpions. With properly sized lumber needed for mooring, the scorpions can be incorporated in concrete, and specialty concrete products, such as decorative stones, decorative stonary, precast parking blocks, air conditioning park etc. These products will provide a technological innovation to eliminate the fire. The project will be substantiated through proper concrete testing that the research team will perform and verify with various testing laboratories. | Corso's Perennials | 15 | 31 to 90 days | \$337,500 |
| Erie | Using Concrete Technology to Recycle and Lessen th | | The Huron Cement Products Co. Inc. | 10 | 31 to 90 days | \$150,000 |
| Erie | Using Computer Technology in Concrete Production | More efficient production of ready-mix concrete and the ability to hire more people. | The Huron Cement Products Co. Inc. | 15 | 31 to 90 days | \$95,000 |
| Erie | OT/ Capitalized Maintenance; PID 86105 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through ODOT. Upgrade existing underground power cables from 4" to 6" to allow for additional wind mits on Kellys Island. The Village of K's has installed a resolution to allow for wind mits installations on the island. This will provide the capacity to allow for the addition of these units. The wind mits will be provided by other resources and the village. | Ohio Department of Transportation | 4 | 0 to 30 days | \$158,059 |
| Erie | Increase submarine power cable capacity - Wind Mil | | Hancock Wood Electric Cooperative | 20 | 91 to 180 days | \$1,000,000 |
| Erie | Kelleys Island Air Runway Resurfacing Project | Resurface Runway 09-27, Emergency Nature of Project as the airport is the lifeline of the island. Runway 09-27 is the only open legal runway on the island and if in such disrepair that we have been notified by Griffing Plying Service that it could soon become unusable by legal service it is not addressed. Remodel five recently foreclosed homes in the Sandusky area and make them available for rent through the housing and urban development program. | Village of Kelleys Island | 10 | 31 to 90 days | \$200,000 |
| Erie | Sandusky Ohio Foreclosed Home Remodel | Remodel five recently foreclosed homes in the Sandusky area and make them available for rent through the housing and urban development program. All five homes will be purchased through the National Home Management Solutions website. I will preserve and protect the value of each asset and always make it readily available for rent to low income families. I have my bachelor of science degree in mechanical engineering and have been recently laid off from my job. I have the drive and resources needed to make this dream a reality. | Privately owned business | 1 | 0 to 30 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Erie | Erie Fresh | <p>Brownfield sites into city gardens. All 3 locations have undergone soil tests by the Haeg Environmental Group, and are considered suitable for growing.</p> <p>The city gardens are projected to grow food for neighborhood markets, community supported agriculture, municipal supported agriculture and farmers markets.</p> <p>In the event of received stimulus funding Erie Fresh will begin to train and educate a city farmer cooperative who's mission will be to coordinate the growth, supply and marketing of the 3 Brownfield gardens. The funding will also provide for an extended growing period by supplying each of the 3 Brownfield sites with hoop-houses.</p> <p>Erie Fresh expects the Brownfield site gardens to increase the health of the community, increase nutritional education inside leaflets explaining the benefits of fresh food, an improvement of property value, and an increase in neighborhood harmony. The Erie Fresh efforts will build a more sustainable food economy for North Central Ohio, and provide research for an intensive food growing system.</p> | The Erie Wire | 15 | 0 to 30 days | \$50,000 |
| Erie | The Erie Wire Watershed Protection Campaign | <p>The Erie Wire is partnering with the Friends of Pipe Creek Watershed to reduce the amount of phosphorous runoff in and around Erie County watersheds, with immediate action to the Pipe Creek watershed.</p> <p>With an intensive neighborhood information campaign we aim to educate the public about the hazards of phosphorous runoff from lawns, and the need to find alternatives in lawn-care practices.</p> <p>We expect an overall improvement of watershed quality within the first month of launching an information campaign (if allocation for funding is made available before April of 09). This will result in an increase of biodiversity, regeneration of wetlands, an overall security to a primary resource and noticeable difference to the water treatment plant located at the mouth of the Pipe Creek watershed.</p> | The Erie Wire | 5 | 0 to 30 days | \$100,000 |
| Erie | The Use of Biofuel as a Renewable Flex Fuel to Red | <p>One of the most daunting tasks facing our country in the 21st century is the challenge to reduce our reliance on foreign oil, and most of all, the harmful health issues emanating from diesel engines. Today the vast array of diesel engines in use continue to emit large quantities of nitrogen oxides, particulate matter and air toxics. These all contribute to global warming. The goal and objective of this project is to solve these problems by producing on a consistent basis a top quality biofuel that not only is cost-effective and clean, but also is capable of being safely used in all diesel engines.</p> <p>This fuel will be extensively analyzed in the laboratory as well as in diesel trucks in the field. The innovation of this particular method is that it doesn't require modification of the vehicle. There is no need to spend thousands of dollars equipping vehicles with special equipment. The emphasis is on modifying the fuel so that it can perform at any percentage just as well or better than petroleum based. Our fuel requires no preheating or toxins and is nontoxic and biodegradable, while, at the same time reducing fossil warming gas emissions such as CO2. We need to remove a fuel that is over 40 years old and replace with a more energy efficient one. Need to replace two doors. We need to replace the air conditioner that is so small for the size of the building.</p> | The Huron Cement Products Co. Inc. | 10 | 31 to 90 days | \$175,000 |
| Erie | Roof and air condition | <p>To erect and build a minimum of 4 wind turbines on the West side of Kelley's Island to supplement the needs for electricity service to the island and to provide the island for some sustainable source of electricity in the event that the cable to the mainland should be damaged.</p> <p>Studies show that with in the western basin of Lake Erie are the most favorable for wind generation. Kelley's Island sits in the most desirable location in all western basin to capture the prevailing south west wind.</p> <p>In addition to the jobs created on the island for maintaining and servicing the utility, the area we are in is actively attracting manufacturers of wind turbines to the region and the installation of these towers will help facilitate the establishment of these manufacturers.</p> | Restaurant | 10 | 91 to 180 days | \$45,000 |
| Erie | Wind turbines for Kelley's Island | <p>roughly 2 miles of new waterline to complete a loop around the north side of Kelley's Island and adding water service to a large number of homes presently not eligible for drinking water now.</p> <p>This is a serious public health issue as we are trying to prevent the same type of issue that took place on Put in Bay a couple of years ago when wells were contaminated by septic systems.</p> <p>Additional jobs will be retained or created as a result of the additional capacity.</p> <p>In addition to homes, two camps and the Airport will be able to be serviced with municipal water.</p> | village of Kelley's Island | 3 | 91 to 180 days | \$500,000 |
| Erie | Waterline project, North Loop | <p>EHOVE Career Center along with regional post-secondary institutions, various economic development professionals, regional business partners including NASA Plumbrook Station, and advanced manufacturing companies have been working formally for a year to determine how to prepare the local workforce for high tech employment requiring emerging skill sets. It has been determined that a facility for Research, Development and Training in the areas of advanced technology, including aerospace and alternative energy would create immediate job opportunities. Temporary space will be secured in order to begin the research and development phase as the new facility is constructed on the EHOVE campus. Displaced workers will be retained in new, advanced skill areas and high school students will be enrolled in training programs that offer high school and college credit leading to high tech, high skill, high demand job opportunities. The regional post-secondary institutions will join EHOVE Career Center along with business and industry partners to develop the advanced training programs.</p> <p>Decision to be made by the end of October 2008.</p> | EHOVE Career Center | 500 | 91 to 180 days | \$5,000,000 |
| Erie | MS Indoor Waterpark Resort | <p>The project was \$5 million over budget and had to be closed until additional funds are raised. It is 95% complete. This \$2 m combined with \$8 m of our capital would complete the construction and open the resort, creating 100 construction jobs and 300 mostly low skilled permanent hospitality jobs.</p> <p>We have approved Tax Increment Financing for \$1.5 million of road improvements to one of the most dangerous intersections in the State. It has been earmarked by ODOT has a high priority for public safety.</p> <p>The resort draws thousands of visitors from outside OH, primarily from MI, IN, PA and Canada. It generates substantial sales, real estate and local tax revenue.</p> <p>Some of these funds can be used to improve the energy efficiency of the resort. Our largest building is 40 years old and its energy efficiency can be upgraded with better insulation and energy management systems in all rooms.</p> | MauI Sands Resort Co. | 400 | 0 to 30 days | \$2,000,000 |
| Erie | Using Direct Contact Water Heaters to Save Energy | <p>In cold weather controlling heating of water, aggregates, the plant enclosure or a combination of the three is often needed to bring the concrete temperature into the desirable range 65 to 70 degrees F to assure normal setting times and strength gains. Often this can be done by simply using heated water as mixing water. Extreme caution and safety must be used when using heated water in the range of 100 degrees to 180 degrees.</p> <p>When high volumes of hot water are needed, direct contact water heaters are the first choice with their near 100% energy efficiency. Traditionally, water heating has involved transferring all the heat thru one or two metal walls. Producers faced the problems of water quality heating, heat loss, which reduced the efficiency of the heat transfer process. The result is almost stack gas temperatures many hundreds of degrees above that of the incoming water to be heated. Direct contact heaters have ended these issues and have provided unmatched levels of performance. Thermal stresses are controlled, thus eliminating the resulting cracking and distortion so common in other heaters.</p> <p>Project to be constructed along Avery-Huron Road on land currently owned by Erie County Commissioners & located within 2 miles of a federally funded NADA project at Plattsburgh.</p> <p>Provides a 40 hour training program for individuals wanting to become a CDCA or Chemical Dependency Counselor Assistant. These hours meet the requirements for certification, and would be offered either in five consecutive weekends or one week. This process would help to increase the number of people eligible for hire in the Chemical Dependency Treatment Industry, which is looking to hire many individuals due to retirement over the next decade.</p> <p>The program would be offered in eight major urban areas and six rural areas. We propose to train at least 500 individuals, and make them eligible for certification and subsequent hire.</p> <p>The 17,000 sq-ft addition has been designed to comply with LEED certification at the silver and hopefully gold level. This new area will house an expanded children's room with a dedicated room for adults and children to explore and build pre-literacy skills, expanded community meeting rooms, as well as a small great room intended to be an educational site for all ages.</p> <p>The requested funds will be used for LEED components, having contributed funds for unfunded upgrades to the project including additional self-check stations and compact shelving.</p> | The Huron Cement Products Co. Inc. | 10 | 181 days or more | \$80,000 |
| Erie | Erie County Business Technology Incubator Park | <p>Our security program fulfills the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security budgets are made available to report suspicious activity. Central control, central care, server citizens, remote, remote operations, central tracking, safety of police, campus security are just some of the groups that benefit from our devices. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can set location boundaries and trigger notifications when exceeded. For personal safety a portable can issue an alarm with location information to multiple chosen phone numbers with built in microphone and speaker for communication. Asset tracking solutions are small, portable, self powered units that continuously track assets to fulfill the objectives of the Stimulus Act for it provides broadband to an internet and under-served areas while employing hundreds in high paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network in Delaware to surrounding counties for people that in the digital divide. Unfortunately without such funds expansion would be economically unviable due to the high cost of deployment. Despite all the funds awarded to the providers of cable and dot, the under-served areas still exist today. Now this the time to try something different. Real America needs access today not the false promises of the past. Our unique process for deployment utilizes the most cost effective wireless mode available. Each dollar spent produces the most coverage per mile of any existing provider which allows low access fees and universal participation even among the low income and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident by our existing network, the most advanced and cost effective Wimax technology available.</p> <p>To replace failed 300' miles of raw water intake line with newer crossing grade pipe. Current intake pipe is cast iron, and is severely compromised due to weather and corrosion. Replacement would result in reduced maintenance costs, reduced processing costs, and reduction of turbidity of raw water intake.</p> | Erie County | 100 | 91 to 180 days | \$2,200,000 |
| Erie | Training for Our Future | <p>The program would be offered in eight major urban areas and six rural areas. We propose to train at least 500 individuals, and make them eligible for certification and subsequent hire.</p> | The Professional Integrity Company | 500 | 91 to 180 days | \$50,000 |
| Erie | Ritter Public Library Expansion | <p>The 17,000 sq-ft addition has been designed to comply with LEED certification at the silver and hopefully gold level. This new area will house an expanded children's room with a dedicated room for adults and children to explore and build pre-literacy skills, expanded community meeting rooms, as well as a small great room intended to be an educational site for all ages.</p> <p>The requested funds will be used for LEED components, having contributed funds for unfunded upgrades to the project including additional self-check stations and compact shelving.</p> | Ritter Public Library | 100 | 0 to 30 days | \$429,688 |
| Erie | Personal Security for Erie County | <p>Our security program fulfills the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Erie | special responce team throw phone | The sandusky police department strives to provide quality service to our citizens. We have a special response team (SRT) for the more dangerous and tactical situations our department gets involved in. One area that is a problem for our SRT team is communication during hostage and barricaded suspect situations. We are asking for a device known as a throw phone, where officer can deploy this device to be able to talk and negotiate with barricaded suspects etc. | sandusky police department | 0 | 0 to 30 days | \$5,500 |
| Erie | full-time evidence officer | Sandusky Police Department needs a full-time evidence officer to handle the every growing amount of criminal evidence that is generated by our citizens. The below is the officer's job description: This officer could manage our evidence in a highly professional manner for better accountability and case management. | sandusky police department | 1 | 31 to 90 days | \$67,566 |
| Erie | surveillance camera | The city of sandusky's number one crime problem is drugs. The sandusky police department has a very active narcotics unit, but equipment is lacking. We need a surveillance camera that is capable of holding on a person. We have researched various systems and have found one that fits our needs. | sandusky police department | 0 | 0 to 30 days | \$6,500 |
| Erie | cruiser video | Police departments everywhere have started to use video to protect our officers as well as our citizens. Sandusky police department believe cruiser video should be used in each patrol car. This request would equip each cruiser with a new high definition digital video camera. | sandusky police department | 0 | 0 to 30 days | \$103,613 |
| Erie | School Resource Officer | Sandusky Police Department would like to fund two (2) full-time school resource officers (SROs). This would be a great benefit to the city schools and the police department. | sandusky police department | 2 | 31 to 90 days | \$135,131 |
| Erie | court security | Sandusky Police Department currently supplies security for the sandusky municipal court. This is done on a part-time basis by a reserve police officer. We would like to have a full-time police officer assigned full-time to the court for better security. | sandusky police department | 1 | 31 to 90 days | \$67,566 |
| Erie | IT-Forensic Officer | Sandusky Police Department like most agencies in this day and age are faced with more and more technology. Currently we do not have to staff properly maintain our IT department. Computer crimes is also on the rise and we do not have the resources to tackle this growing problem. We propose hiring an officer to manage our IT department and also handle the growing number of computer crimes. | sandusky police department | 1 | 31 to 90 days | \$67,566 |
| Erie | Gang-GREAT Officer | Sandusky Police Department is currently training officer in the GREAT (Gang Resistance Education and Training) program. These officers will teach the GREAT program in our city schools. We would like to expand on this idea by creating a GREAT Gang Detective. This officer would teach GREAT, as well as working on our other gang problem by gathering data, working with neighborhood block watches, etc. | sandusky police department | 1 | 31 to 90 days | \$67,566 |
| Erie | return to full staffing levels | Sandusky Police Department is authorized 50 officers, currently frozen at 53 officers due to budget constraints. This would allow us to return to full staffing levels which would allow us to provide better service to our citizens. | sandusky police department | 3 | 31 to 90 days | \$202,697 |
| Erie | Water Treatment Plant | Expand the existing conventional Water Treatment Plant by an additional 1.5 MGD capacity using microfiltration and GAC contractors. The improvements will include low service pump station, new 200,000 gallon clearwell, SCADA and controls, stand by power generator, chemical feed equipment, storage, pumps and meters and building rehabilitation of piping, electrical, mechanical, and site work. | City of Huron | 57 | 91 to 180 days | \$7,180,000 |
| Erie | Department of Job and Family Service | When a person is denied Unemployment Compensation and starts the appeal process, it takes entirely too long to get an answer. The if the appeal is denied, you basically must start over again, adding more time with no funds coming to the displaced person. There are holidays, etc. available to go to, but they seem to be worthless! When you do have an actual person to talk to, they can't really tell you anything or even help you. There needs to be a change in the entitlement system. You should not have to wait more than 30 days for an answer or an acknowledgment of your claim. There needs to be an actual person that you can speak to, be one-on-one with, who can actually help you in the appeals process. We will be in the 2nd or 3rd in the state here! | Help With Unemployment | 20,000 | 0 to 30 days | \$500,000 |
| Erie | Sandusky Pointe Health & Rehab Center | New construction of 50 resident skilled nursing facility on 14.59 acre site. New jobs (43) created, plus construction jobs. New taxes (state and income) to society and State. Equity and loan funds provide the remainder of financing. | Firelands Development Company LLC | 43 | 31 to 90 days | \$800,000 |
| Erie | Pedestrian Lighting Project | 10 pedestrian street signs | Main Street Vermilion | 10 | 91 to 180 days | \$50,000 |
| Erie | Retrofiting Buildings and Industrial Facilities F | As a business woman, I am faced each and every day with the major decisions of reducing overhead. No shiny, new, high-tech machinery in such a consistent fashion as having energy efficient buildings and work places. In order to manufacture certain components, one needs consistent heat. With new facilities properly retrofitted a general manager can make great strides towards reducing overhead. The funding will assist a small business like me own to be able to move the next step in energy savings. | J.I.B. Investments LLC | 7 | 31 to 90 days | \$20,000 |
| Erie | USNSCC Maritime Training Project | We have partnered with the Liberty Region 4-1 and Firelands Division of the US Coast Guard Center to provide an anti-gang, anti-drug youth program for all of Ohio and Western Pennsylvania to provide a maritime training program for young people 16 to 18 yrs of age, male and female. This project complies with our not for profit public charity status and our stated mission of historic preservation and education. The program will provide maritime education, training and opportunity for the cadets and will allow them to gain experience in training that can lead to employ in the maritime industry upon graduation from high school. This training is not available anywhere else in the Great Lakes region. The requested money is to purchase a vessel for the program to replace the "On Loan" vessel we currently use, that could go back to the owner at any time. It is career oriented training for these youth in a field that has a serious shortage now and for years to come according to federal and state statistics. The program if successful completely fills the void in our area to gain that work. | Firelands Military Vehicle Group | 0 | 181 days or more | \$35,000 |
| Erie | Homogenization oven insulation pads | The pads of the homogenization oven where aluminum logs are loaded are not built out of high insulating refractory. Great amount of heat is lost through these pads and the energy consumption for this oven is high. By raising the pads with high insulating refractory, the energy efficiency of the homogenization oven will be improved. | Thakar Aluminum Corp | 49 | 31 to 90 days | \$40,000 |
| Erie | New scrap trailer design | The trailers used to carry aluminum scrap are made of steel. A new design has been developed using same fiberglass liners. The new design yielded to a weight reduction of the trailer of 15% meaning a reduction in diesel fuel consumption. The money request is to build one of the new trailer. | Thakar Aluminum Corp | 49 | 91 to 180 days | \$35,000 |
| Erie | Building roof repair | Currently, roofs are leaking above scotch storage area and melting furnace area. The aluminum scotch is getting during rainy time and needs to be maintained before being changed in the melting furnace. The melting furnace area is also leaking and needs to be repaired. The plan roof, scotch will be kept dry and no time or energy will be spent in purchasing the scotch before it is melted. | Thakar Aluminum Corp | 49 | 31 to 90 days | \$150,000 |
| Erie | SmartFire Homogenization Oven Controls | Currently the homogenization oven uses old control technology, meaning that the optimum air fuel ratio is not achieved. By installing mass flow meters at the air, natural gas and oxygen lines, the flow for each fluid is monitored by a PLC and optimum air fuel ratio is maintained all the time. This yields to natural gas consumption reduction as well as productivity improvement that will make the company more competitive. | Thakar Aluminum Corp | 49 | 91 to 180 days | \$160,000 |
| Erie | Scrap Trailer Traps | Currently all Thakar Aluminum trailers used to bring aluminum scrap to the processing facilities are not covered. By installing traps on these trailers, better gas mileage is achieved. Tests have been carried out and trucks pulling scrap trailers have achieved a reduction in diesel fuel consumption of more than 15%. This project is to equip five trailers with traps. | Thakar Aluminum Corp | 49 | 91 to 180 days | \$20,000 |
| Erie | SmartFire Furnace Controls | Currently aluminum melting furnaces use old control technology, meaning that the optimum air fuel ratio is not achieved. By installing mass flow meters in the air, natural gas and oxygen lines, the flow for each fluid is monitored by a PLC and optimum air fuel ratio is maintained all the time. This yields to natural gas consumption reduction as well as productivity improvement that will make the company more competitive. | Thakar Aluminum Corp | 49 | 31 to 90 days | \$160,000 |
| Erie | Paint Bake Oven | The project covers the two aluminum melting furnaces. | Thakar Aluminum Corp | 49 | 91 to 180 days | \$120,000 |
| Erie | Aluminum sow preheating furnace | Currently, only clean aluminum scotch can be recycled at the Canton plant. By installing a paint bake oven at the facility, painted aluminum scotch can be processed in this oven to remove the coating. Then, the preheated aluminum can be charged into the melting furnace. The oven is equipped with an after burner to ensure that no harmful emissions from the paint are released. | Thakar Aluminum Corp | 49 | 31 to 90 days | \$140,000 |
| Erie | Premix burners for aluminum melting furnace | By having a way to process painted scrap, Thakar is equipped to handle all the scrap generated by its customers and does not have to share business with competitors that can handle painted scrap. Currently primary aluminum sows are charged in a side wall furnace and the melting efficiency is less than 30%. By preheating the aluminum scotch in a closed furnace to 900F and then charging them to the melting furnace, the melting efficiency will be drastically increased. Some tests have shown a 20% reduction in the melting cycle time. | Thakar Aluminum Corp | 49 | 31 to 90 days | \$75,000 |
| Erie | intervention program | To install premix burners on an aluminum melting furnace that will yield in a 15% reduction in natural gas consumption. The technology has already been implemented in other aluminum processing facilities and the expected energy savings have been realized and even exceeded. The concept is to better mix natural gas with the oxygen in the combustion air, minimizing nitrogen compounds. | men of action ministries | 10 | 0 to 30 days | \$150,000 |
| Erie | youth development | The Fire Change Intervention Program will be a well-planned, structured, highly personalized process where family, friends, or co-workers come together to break through the denial of someone who is struggling with an addiction to drugs and/or alcohol. This will be accomplished in an environment that maintains the respect of the individual, while avoiding patterns of treatment, shame, or blame. It was once believed that an individual struggling with addiction had to sincerely want help to get help. The individual had to "hit bottom" before being motivated to change. This, of course, is not always true. This includes that when some addicts "hit bottom" they die. FIC intervention program is a way of providing a "bottom" before such a tragedy occurs. Families can contact FIC to come together to create a plan to help their loved one accept professional help by entering a treatment facility. Along with conducting the actual intervention, FIC will also provide the following services: choosing the right treatment center, matching treatment options to family finances, making travel arrangements and continuing to work with the family while the loved one is in treatment. | men of action ministries | 7 | 0 to 30 days | \$150,000 |
| Erie | Erie County Adult Probation Dept. PSI Officers | Men to Action will establish a multi-faceted program development center to help children grow into intelligent and creative individuals. It is four components: financial education, life skills, career mentoring events, and community service projects. These are based on non-traditional teaching methods. Instead of lecturing static information to students, such as academics, MCA will provide a hands-on and intuitive education that allows students to create their own knowledge instead of "receive" it. Children will participate in stocks, savings spiritual activities, volunteer activities, and more, providing them with experience as they enter adulthood and face real life challenges. This stimulus would allow students to grow into knowledgeable adults with the ability to solve problems creatively and effectively. MCA will enter an educational landscape in their need of new programs. Children currently lack effective educators that prepare them for real life through hands-on experience. Most standard academic programs only supply theory lectures, this is not substantial once a young adult faces challenges outside of school. | Erie County Adult Probation Department | 2 | 31 to 90 days | \$104,000 |
| Erie | Childcare Center | In the past ten (10) years the Erie County Adult Probation Department has seen a significant increase in the number of offenders being supervised as well as the number of Probation Investigators being conducted. In 1999 the department was supervising approximately 650 offenders, ten years later the number of offenders has increased to 953. In four (4) year span the Probation Investigators has increased from 250 to approximately 400. The number of officers has not increased to meet the workload. This stimulus would provide funds to increase the staff officers unit to perform home and employment visits as well as having representatives of the department provide to the community. | Sandusky Area YMCA | 6 | 0 to 30 days | \$700,000 |
| Erie | Melting Furnace Charge Well Cover | There is a great need in our community for full-day preschool. In the last five years, our child preschool program has grown from one room to two full-day care rooms and one room for half-day care at the YMCA facility. We have expanded the program to another community at its secondary school. Of the 73 children enrolled in YMCA childcare programs, 63% receive government assistance! Our local school system tells us we are making a difference. These kindergarten teachers have told us our preschool children's knowledge is far advanced of the non-preschool children. They also tell us that there are many children are still waiting to get into preschool but there isn't space available. Our request is to construct a four-room childcare center at a cost of \$700,000 that will allow us to double the number of full-day preschool children from 40 to 80. We will continue to be able to serve half-day children and our school age after school program. This will create six part-time positions. | Thakar Aluminum Corp | 49 | 31 to 90 days | \$40,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Erie | Energy Conservation Project | Multi-Zone modifications for (9) offices to be able to control system more efficiently. Replace gym lighting with high efficient T-5 bulbs fixtures Replacement of (2) domestic hot water tanks Install electric heat into kitchen office Boiler refractory replacement on (2) boilers Install digital controls on ceiling heaters, exhaust fans, and exterior lighting | Erie County Board of MRDO | 60 | 31 to 90 days | \$60,000 |
| Erie | Huron Police Technology Program | The project will provide the Huron Police Department with a records management system that is compliant with the Ohio Incident Based Reporting System (IBRS). We currently do not have that capability. The project will consist of 4 media data computers for our police cruisers that will allow Huron Police Officers the ability to access LEADS information and complete police reports. The City of Huron will be entering into an agreement with the Erie County Sheriff's Office for centralized dispatching services. As a result, Huron Police Officers will need to have mobile data computers in their cruisers. The expected outcomes will include the Huron Police Department becoming IBRS compliant. Another outcome will be enhanced communication, response time and the ability for enhanced public safety by officers of the Huron Police Department. | Huron Police Department | 0 | 91 to 180 days | \$106,000.00 |
| Fairfield | Dist 5, PID 85749, FAI Purchase 2 LTVs | Purchase communication equipment for the City of Lancaster | Ohio Department of Transportation | 1 | 31 to 90 days | \$100,000 |
| Fairfield | Dist 5, PID 85748, FAI Communication equipment | Purchase 1 computer, server, and hardware for the City of Lancaster | Ohio Department of Transportation | 1 | 31 to 90 days | \$6,500 |
| Fairfield | Dist 5, PID 85750, FAI Computer, server, hardware | Parking lot asphalt replacement for the City of Lancaster. Create PID for recovery project. Create funding event for recovery project | Ohio Department of Transportation | 1 | 31 to 90 days | \$2,000 |
| Fairfield | Dist 5, PID 85980, FAI Replace parking lot | Rehabilitate office and vehicle storage facilities for the City of Lancaster | Ohio Department of Transportation | 2 | 31 to 90 days | \$97,000 |
| Fairfield | Dist 5, PID 85981, FAI Rehab/renovate facilities | This project is located in the Village of Canal Winchester, Fairfield County, Ohio and consists of two components: Rutherford/Robinet Construction, and Eichorn Improve. The Rutherford/Robinet component of the project consists of the construction of two new roadways, extended from the existing Dove Frey within Canal Winchester's Canal Point Industrial Park and will open additional land for development of Park. Rutherford Dr. is a 900 foot new roadway construction that will connect Dove Frey to existing Howe Industrial Frey within the park and include water and storm sewer facilities. Robinet Way is a 1400 foot new roadway construction that will connect Dove Frey to existing Foreign Trade Zone property located within the industrial park and will include water, storm sewer and sanitary sewer facilities. The Eichorn Improve component consists of widening approximately 600 feet of the existing Eichorn Dr from a two lane section to a three lane section. Project will include the extension of an existing base culvert and the installation of extensive. Project is a major portion of the development of a regional medical campus that will include a free standing emergency room, imaging center, laboratory and medical office building to its first phase. | Village of Canal Winchester | 1 | 31 to 90 days | \$72,500 |
| Fairfield | Rutherford/Robinet Construction & Eichorn Improve | Violet Township, on behalf of Pickerington Schools District (PLSD), City of Pickerington, Fairfield County, and the Township of Pickerington Campus, is seeking funding to construction of a fiber network to address several, critical deficiencies in providing the ability to access high-quality broadband services. The 17 mile fiber network will connect all township offices, Fairfield county offices (Violet Township), All Pickerington Schools, City of Pickerington municipal offices, Ohio University-Pickerington Center building, Pickerington county under construction, and a critical, 500 AC Job-Site Ready industrial park. | Violet Township | 750 | 31 to 90 days | \$1,110,000 |
| Fairfield | Township / County-wide Broadband Plan | We are completing engineering plans for this shovel-ready project so we can begin construction when funding is arranged. Current private partners have been approached that service areas around the township but have been unwilling to connect to these crucial assets. The construction of the network will create 20-25 construction, engineering and technical jobs. Job creation associated with the management of the network itself could number as many as 20 jobs. Over 500-1,000 jobs will be created through 20-25 new technology businesses. | Ohio Department of Transportation | 19.2 | 31 to 90 days | \$668,000 |
| Fairfield | Dist 5, PID 85119, FAI US 33 01.10 | Approach Sub Overlay | Ohio Department of Transportation | 19.2 | 31 to 90 days | \$668,000 |
| Fairfield | Water Treatment Plant and Well Field Improvement P | New 1.2 MGD water treatment plant, well field, and approximately 2000 LF of 12 inch line to tie into existing 8 inch line. Project is critical since the existing water treatment plant was constructed in 1935, and is at capacity. Well field does not meet EPA required 300 foot isolation distance, but must be done simultaneously to the plant construction. The village is just completing a new wastewater treatment plant and is removing wastewater inflow and infiltration to resolve EPA findings, paving for both at the same time is unrealistic. Refurbishing of current CWSRF tank to provide a negative interest loan for a portion of the project mandated by the Ohio EPA for the construction of a 2 MG treatment plant, pump station, and force main to alleviate combined sewer overflows | Village of Baltimore, Ohio | 15 | 91 to 180 days | \$4,300,000 |
| Fairfield | Upper Hocking WPCF | Replacement of a failing culvert | City of Lancaster | 750 | 0 to 30 days | \$5,000,000 |
| Fairfield | Trace Drive Culvert | Refurbishing of existing CWSRF tank to include a negative loan for this portion of the project to provide a location for sewage haulers to deliver sewage for treatment. | City of Lancaster | 15 | 0 to 30 days | \$100,000 |
| Fairfield | Lawrence Street Septage Receiving Facility | Installation of 3000 LF of sanitary sewer to serve a proposed development | City of Lancaster | 76 | 0 to 30 days | \$1,200,000 |
| Fairfield | Ewing Run Trunk Sewer Extension | Cant In Place Lining of deteriorating sewer lines in the Miller Park Well field as required by the Ohio EPA mandated wellfield management plan. | City of Lancaster | 12 | 0 to 30 days | \$60,000 |
| Fairfield | Miller Park Wellfield Sewer Lining | Improvements to tennis courts used for youth and adult tennis programs | City of Lancaster | 32 | 31 to 90 days | \$5,000,000 |
| Fairfield | Tennis Court Reconstruction | Park improvements for accessibility | City of Lancaster | 50 | 31 to 90 days | \$128,000 |
| Fairfield | Giassco Park Rehabilitation | Shelter House building upgrades for energy efficiency and ADA compliance | City of Lancaster | 55 | 31 to 90 days | \$43,000 |
| Fairfield | Lancaster Shelter Reconstruction | The Walnut Creek Sewer District is located in Fairfield County in Walnut and Pleasant Townships and serves the villages of Pleasantville and Thurston. The project consists of (1) removal from the existing collection system through a variety of rehabilitation methods. This phase II project is located in the Village of Pleasantville, but affects the overall operation of the system. The rehabilitation will include rehabilitation of sewer pipes and manholes. The District is under Findings and Orders through the EPA and this project is working to improve the system. | Walnut Creek Sewer District | 40 | 31 to 90 days | \$23,000 |
| Fairfield | Inflow and Infiltration Remediation Phase I | Renovations to existing facilities at Park for energy conservation and ADA compliance | City of Lancaster | 10 | 0 to 30 days | \$470,000 |
| Fairfield | Rising Park Restroom Renovations | Fiber optic installation for East Side Industrial Park to connect to City system | City of Lancaster | 36 | 31 to 90 days | \$18,000 |
| Fairfield | Commerce Street Area Network | Replacement of a deteriorated storm sewer on Lynn drive with 500 LF of new storm sewer | City of Lancaster | 104 | 31 to 90 days | \$100,000 |
| Fairfield | Lynn Drive Storm Sewer Replacement | Basin improvements and storm sewer improvements to alleviate flooding of local businesses | City of Lancaster | 15 | 0 to 30 days | \$100,000 |
| Fairfield | Sells Road Drainage Improvements | Upgrade of system reliability connecting local governments and industries | City of Lancaster | 38 | 0 to 30 days | \$160,000 |
| Fairfield | Fiber Loop for System Backup | Installation of fiber optic lines to connect industrial park to City fiber optic network for economic development. | City of Lancaster | 72 | 31 to 90 days | \$75,000 |
| Fairfield | Rock Mill Corporate Park Network | Reconstruction of Nolder Drive, a low to moderate income area, to include curbs, drainage, sidewalks and street reconstruction. This project has been on the CDBG program list for the last 10 years and HUD and the City have set aside some funds for the project. | City of Lancaster | 99 | 31 to 90 days | \$125,000 |
| Fairfield | Nolder Drive Street Improvements | Rail load facility to allow local industries access to rail service for the transportation of goods located at a remediated brownfield site. | City of Lancaster | 55 | 0 to 30 days | \$500,000 |
| Fairfield | Transload Facility | Paving of Park Roadways | City of Lancaster | 377 | 0 to 30 days | \$1,050,000 |
| Fairfield | Rising Park Paving | Replacement of an undersized storm sewer with 800 feet of new sewer to alleviate flooding at hospital and local businesses | City of Lancaster | 36 | 31 to 90 days | \$63,000 |
| Fairfield | Baldwin Run Storm Sewer Replacement | Replacement of an unsafe pedestrian bridge | City of Lancaster | 112 | 0 to 30 days | \$150,000 |
| Fairfield | Huffer Durdin Park Pedestrian Bridge | Building renovators for energy efficiency | City of Lancaster | 28 | 31 to 90 days | \$68,000 |
| Fairfield | Law Enforcement Building Renovations | Construction of roadways in Rock Mill Corporate Park to provide access for economic development | City of Lancaster | 15 | 31 to 90 days | \$250,000 |
| Fairfield | Anchor Avenue Construction | Construction of roadways in Rock Mill Corporate Park to provide access for economic development | City of Lancaster | 430 | 31 to 90 days | \$996,000 |
| Fairfield | Dave John's Avenue Construction | Construction of roadways in Rock Mill Corporate Park to provide access for economic development | City of Lancaster | 430 | 31 to 90 days | \$520,000 |
| Fairfield | Mill Park Drive Extension | Cant In Place Lining of 300 LF of deteriorated storm sewer that cannot be excavated due to location to businesses. | City of Lancaster | 105 | 0 to 30 days | \$325,000 |
| Fairfield | West Sixth Avenue Storm Sewer | Installation of 100 feet of storm sewer to eliminate a drainage issue and road hazard | City of Lancaster | 25 | 91 to 180 days | \$200,000 |
| Fairfield | Cat Drive Storm Sewer | Segregation and turn lanes for intersection due to additional traffic for commercial and industrial areas | City of Lancaster | 10 | 0 to 30 days | \$50,000 |
| Fairfield | Ety Road Intersection Improvements | Replacement of failing culvert to protect street. | City of Lancaster | 75 | 31 to 90 days | \$875,000 |
| Fairfield | Trace Drive Culvert Replacement | The Village of Amanda is in need of a new elevated water storage tank. Currently the Village utilizes an under-sized standpipe that is more than 20 years old. The new water storage tank will provide additional capacity as well as increase service pressures within town. This project has been recommended to the Village by EPA Central District Office. Plans were previously approved but the project has lacked funding. | Village of Amanda- ME Companies | 15 | 0 to 30 days | \$100,000 |
| Fairfield | Village of Amanda - Water Tower Replacement | Pavement improvements on major city streets | City of Lancaster | 10 | 31 to 90 days | \$750,000 |
| Fairfield | 2009 Paving Program | Expansion of City transit program surrounding county areas including commuters to Columbus Metropolitan Area | City of Lancaster | 530 | 31 to 90 days | \$760,000 |
| Fairfield | Countywide Transit Program | Construction of 5000 feet of waterline in industrial area to provide loop for pressure and fire protection. | City of Lancaster | 50 | 31 to 90 days | \$400,000 |
| Fairfield | SR 37 Waterline Connector | Building renovators for energy efficiency and ADA compliance. | City of Lancaster | 587 | 31 to 90 days | \$1,000,000 |
| Fairfield | Distribution System Building Improvements | Water line loop connection to provide pressure and fire protection to industrial area | City of Lancaster | 65 | 31 to 90 days | \$350,000 |
| Fairfield | Campground/Collins Road Water Loop Phase 2 | Inspection and coating of east side standpipe to provide pressure and fire protection | City of Lancaster | 90 | 0 to 30 days | \$300,000 |
| Fairfield | East Side Standpipe Renovations | The project will be constructed at the existing wastewater plant located at 12400 Lancaster Street, NE in Millersport. The key focus of the project is to help manage peak hydraulic flows delivered to the WWTP particularly during wet weather periods of time. Failure to provide a means of managing peak flows will limit possible growth in the village as well as lead to eventual noncompliance with the village's wastewater discharge permit. Drawings are to be submitted to the ODEP for permit March 1, 2009. | City of Lancaster | 90 | 0 to 30 days | \$150,000 |
| Fairfield | Wastewater Treatment Plant Improvements | Remediation of existing industrial site for redevelopment | Village of Millersport | 10 | 91 to 180 days | \$500,000 |
| Fairfield | Frick Gallagher Brownfield | Upgrades to existing historic building for energy efficiencies and preservation | City of Lancaster | 80 | 181 days or more | \$2,000,000 |
| Fairfield | Renovations to City Hall | Construction of parking garage to allow for expansion of downtown businesses | City of Lancaster | 50 | 91 to 180 days | \$400,000 |
| Fairfield | Downtown Parking Garage | Renovations to Miller Park pool for energy efficiency, safety and access | City of Lancaster | 277 | 91 to 180 days | \$6,000,000 |
| Fairfield | Miller Pool Renovations | The project will replace an existing waterline that extends from Millersport to the corporation of Buckeye Lake that is of small capacity and in poor condition. Phase I of the project was completed in 2006. Phase II & III will complete the project and all work will be performed in Fairfield County's right-of-way. The capacity of the existing 12" line is only 250 gallons per minute and the new 12" waterline will be able to convey over one million gallons per day. The project will allow the Village of Buckeye Lake to have a centralized, potable water supply and also help the region not just the Village of Millersport but also the Corporation of Buckeye Lake to have a centralized, potable water supply and encourage job growth. | Village of Millersport | 66 | 91 to 180 days | \$76,000 |
| Fairfield | Buckeye Lake Phase II & III Water Supply Line | Renovations to Skate Park for energy efficiency, safety and access | City of Lancaster | 10 | 31 to 90 days | \$500,000 |
| Fairfield | Skate Park Renovations | | City of Lancaster | 30 | 91 to 180 days | \$46,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Fairfield | Campground Road Upgrade | Roadway reconstruction and expansion of existing roadway to allow for safe traffic flow to commercial areas | City of Lancaster | 175 | 91 to 180 days | \$3,870,000 |
| Fairfield | Renovations to Fire Station 3 | Renovations to existing fire for safety, access and energy efficiency | City of Lancaster | 140 | 181 days or more | \$2,000,000 |
| Fairfield | Tiki Pool Renovations | Renovations to Tiki Pool for energy efficiency, safety and access | City of Lancaster | 57 | 91 to 180 days | \$138,000 |
| Fairfield | Baldwin Run Stream Restoration | Stream restoration in Baldwin Run from Main Street to Fider Run confluence to restore habitat | City of Lancaster | 12 | 91 to 180 days | \$500,000 |
| Fairfield | Hocking River Stream Restoration | Restoration of floodplain and stream corridor on the Hocking River | City of Lancaster | 75 | 91 to 180 days | \$200,000 |
| Fairfield | Campground Road Upgrade | Roadway reconstruction and expansion of existing roadway to allow for safe truck traffic to City facilities and industrial areas | City of Lancaster | 800 | 91 to 180 days | \$2,600,000 |
| Fairfield | Ety Road Columbus to Memorial Drive | Roadway realignment and improvement for safe traffic flow to commercial areas | City of Lancaster | 30 | 91 to 180 days | \$1,000,000 |
| Fairfield | Ety Road Railroad to Campgrounds | Roadway reconstruction and bridge improvements for safe traffic flow to commercial areas | City of Lancaster | 175 | 91 to 180 days | \$3,870,000 |
| Fairfield | Rising Park Connector | Connection of existing trailpath to Fairgrounds and Parks | City of Lancaster | 12 | 91 to 180 days | \$400,000 |
| Fairfield | Replacement of Fire Station 1 | Construction of new fire station | City of Lancaster | 140 | 181 days or more | \$4,000,000 |
| Fairfield | Replacement of Fire Station 2 | Construction of new fire station | City of Lancaster | 140 | 181 days or more | \$8,000,000 |
| Fairfield | Waterworks Hill Reservoir Renovations | Renovations to existing 4.3 MG reservoir including inspection and coating for water quality, pressure and fire protection | City of Lancaster | 15 | 0 to 30 days | \$200,000 |
| Fairfield | Waste Water Treatment Plant Improvements | The Wastewater plant currently needs to replace their aeration tanks with concrete structures as the steel structures are rapidly deteriorating. Also the plant does not have a source of emergency power as mandated by the Ohio EPA. An emergency generator would be installed that could operate the plant during power outages and prevent discharges to the receiving stream. | Village of Sugar Grove | 5 | 91 to 180 days | \$500,000 |
| Fairfield | Lancaster Glass Brownfield | Change of industrial site for commercial development | City of Lancaster | 220 | 181 days or more | \$4,000,000 |
| Fairfield | Municipal Court Building | Construction of new municipal court building to centralize activities, improve security, improve energy efficiency | City of Lancaster | 75 | 181 days or more | \$7,000,000 |
| Fairfield | Union Mulberry Drainage Improvements | Stormwater Management improvements in the Union Mulberry area to eliminate flooding | City of Lancaster | 37 | 181 days or more | \$2,000,000 |
| Fairfield | Ety Road Extension to SR 188 | Extension of Ety Road to SR 188 to allow access from south end of town and highway to commercial areas | City of Lancaster | 125 | 181 days or more | \$3,000,000 |
| Fairfield | Ewing Street Connector | Extension of Ewing Street to US 33 to allow truck access to industrial areas and faster response time for medical to the hospital | City of Lancaster | 175 | 181 days or more | \$15,000,000 |
| Fairfield | Interurban Trail | Like Trail Extension from City of Lancaster to Carroll and Pickerington to provide alternative transportation routes | City of Lancaster | 50 | 181 days or more | \$1,300,000 |
| Fairfield | Alley Park Connector | Like Trail Extension from City of Lancaster Alley Park to provide alternative transportation routes | City of Lancaster | 30 | 181 days or more | \$675,000 |
| Fairfield | Wastewater Treatment Plant Improvements | The Walnut Creek Sewer District is located in Fairfield County in Walnut and Pleasant Townships and serves the villages of Walnut Creek and Thurston. The project is necessary to prevent the treatment plant from being in violation with the CDEPA limits for discharges to the quality which currently occur during wet weather conditions and consist of the construction of two circular clarifiers and other major upgrading and mechanical improvements. Please note the work is to be performed as the District is currently under ODEP CDEPA 9000000. The engineering plans have been approved by the ODEPA and will be offered for public bidding immediately after receipt of 9000000. | Walnut Creek Sewer District | 10 | 0 to 30 days | \$500,000 |
| Fairfield | Trace Drive Culvert | Replacement of a failing culvert | City of Lancaster | 15 | 0 to 30 days | \$100,000 |
| Fairfield | Columbus Street Reconstruction Project | Approximately 2700 feet full width full depth reconstruction of Columbus Street, the main street through the village. Continued development in the area and the transition of US33 to a limited access highway has resulted in the transition of Columbus Street from a village street to a major east-west corridor between Columbus/Ervinport (Rickmanbacker) and Lancaster. Project will include full depth reconstruction, storm sewers, replacement of a 60 year old water trunk line, sidewalks, street lighting and signalization. This project is extremely important to the health and safety of the citizens of Lithopolis. The roadway is in an advanced state of decay and is seeing more traffic, both vehicular and pedestrian, than ever before. The increased traffic and the failing infrastructure represent a very real danger to the community. The roadway is the primary corridor for emergency vehicles out of town and provides access to the local elementary school. In addition, a revised roundabout with new sidewalks and conversion to street parking will undoubtedly revitalize the Village's struggling business district. | Village of Lithopolis | 150 | 91 to 180 days | \$2,400,000 |
| Fairfield | Tarhe Elementary Health & Fitness Trail | The PTD of Chief Tarhe Elementary School wishes to construct a 1.4 mile health & fitness trail around the perimeter of the school property. This fitness trail will be used by the students, faculty and parents during before and after school walking programs as well as its becoming a part of the school's health education curriculum. We intend to use volunteer work for as much as we can, however we also intend to hire several local contractors for the heavy work. When complete, this health & fitness trail will be used to teach the kids to embrace a life of healthy living, acting in the prevention of childhood obesity. As it stands, childhood obesity has been identified as the single largest danger to the youth of America. Teaching the children at a young age to live healthier lifestyles, including a consistent physical fitness program will serve to help them as they get older. The contractors being considered for this work are in dire need of construction jobs as the current economic situation has hurt them badly, the way to help our kids as well as the local economy. | Chief Tarhe Elementary School Parent Teacher Organ | 10 | 91 to 180 days | \$30,000 |
| Fairfield | Olde Village Outfall | Install 2098 feet of various size storm water lines with 18 manholes and install 1076 feet of eight inch water line. This project will prevent sewerage in the old downtown area of heavy rain. The city has a grant from OPWC in the amount of \$773,278.00 and a loan from OPWC in the amount of \$397,765.00. The city has budgeted \$252,144.00 to pay for the water line portion and will need to borrow the additional amount of \$137,174.00. This stimulus money will be used to pay OPWC's one time sum and to make up the difference of \$137,174.00. If we could receive the amount this would help reduce the amount of increase to the storm water rate charged to the residents which we are going to increase this year. | City of Pickerington | 8 | 31 to 90 days | \$542,943 |
| Fairfield | Sycamore Creek East Relief Sewer Phase III | Complete the replacement of 2,245 feet of the sanitary collector from Victory Park to Hill Road. The collector will be up sized to accommodate a bottleneck in the sewer system. Also replacing this old clay tile line with PVC or HDPE pipe will reduce the amount of infiltration this line takes in, due to fraying along a creek. | City of Pickerington | 6 | 91 to 180 days | \$1,174,090 |
| Fairfield | Sycamore Creek East Relief Sewer Phase II | Replace and upsized 1700 feet of an 18inch sewer line to a 36 inch sewer line. This project is also a requirement of our NPDES permit with the effective date of January 1, 2008. This project will reduce infiltration this line runs through the city and prevent along a creek. This project will also allow more storage in the line which should prevent basements flooding upstream during heavy flows. | City of Pickerington | 6 | 181 days or more | \$800,000 |
| Fairfield | Waste Water Treatment Plant | The project will provide sludge handling facilities to help reduce operating cost and ensure affordable rates for the Village residents. | Village of Stoupsville | 5 | 91 to 180 days | \$350,000 |
| Fairfield | FAI-CR56-0.00 PID 83159 | Reconstruction of Sheridan and The Drive approved. This project has been programmed and approved by ODOT as PID 83159 using the City STP funds. We would like to substitute Stimulus funds for this project and shift the STP funds for a new project in 2010 per FHWA guidance. | City of Lancaster | 25 | 0 to 30 days | \$825,000 |
| Fairfield | Hill Road Culvert Replacement | Replace a 6 foot diameter culvert which is failing under one of our main roads through the city (State Route 256) | City of Pickerington | 4 | 91 to 180 days | \$140,000 |
| Fairfield | Long Road Detention Basin Outlet Upsizing | Upsizing an outlet pipe from a detention pond to prevent flooding of private property and streets. | City of Pickerington | 3 | 181 days or more | \$150,000 |
| Fairfield | SR 256 Interceptor Sewer from McLeod Parc to Court | Design and construct 1.945 feet of 15 inch and 1.465 feet of 18 inch sanitary line. Calculations show that this line has flows over capacity consistent with rainfall water storage level in the northwestern part of the city. This project will help maintain the flows in the business area of the city. | City of Pickerington | 5 | 181 days or more | \$330,000 |
| Fairfield | Water Storage Tower III | Change our water treatment process from ion exchange to membrane. This project needs to be done because the backwash water from the softeners is causing a high total dissolved solids problem at the wastewater treatment plant. | City of Pickerington | 15 | 181 days or more | \$2,400,000 |
| Fairfield | WTD TDS Treatment | Change our water treatment process from ion exchange to membrane. This project needs to be done because the backwash water from the softeners is causing a high total dissolved solids problem at the wastewater treatment plant. | City of Pickerington | 4 | 181 days or more | \$2,700,000 |
| Fairfield | Street Paving | Street paving the city has not been able to pave any streets for the past two years. We have several streets that are in need of repair. | City of Pickerington | 8 | 91 to 180 days | \$1,000,000 |
| Fairfield | Help for your Ailing Septic System | Provide funding for homeowners that are elderly, lost their jobs, widows, individuals with no other financial options that have failed or failing household sewage treatment systems (HSTS), to replace or repair their HSTS. Within Fairfield County we have many aging HSTS that need repaired or replaced in order to protect the environment and public health within the county! These systems are very costly for homeowners to replace and we are therefore often faced with homeowners that have failed HSTS endangering public health within the community and they unfortunately cannot find any source of funding! | Fairfield Department of Health | 10 | 31 to 90 days | \$100,000 |
| Fairfield | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDI's mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, Individual Development Accounts (IDAs), microloans, technical assistance, and access to retail markets. As the only U.S. Small Business Administration microloaner and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI's Microenterprise Loan Fund fills a gap in the credit industry by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDI is able to serve underserved populations, including low-income individuals, those with little or no credit, or those precluded from paying interest because of religion or race. | Economic and Community Development Institute | 20 | 0 to 30 days | \$150,000 |
| Fairfield | Medical Record Conversion to Electronic Form | Convert balance of existing files to scanned electronic documents to increase ability to access mental health data. Old records to be shredded per reporting. | Mid-Ohio Psychological Services | 2 | 0 to 30 days | \$50,000 |
| Fairfield | North Columbus Street Paving | Pavement replacement on 7000 feet North Columbus Street from corporation line to Whitler Avenue using STP funds allocated to City | City of Lancaster | 25 | 91 to 180 days | \$350,000 |
| Fairfield | Relocate Road | Relocate Road from Runway Safety Area | Fairfield County Airport | 20 | 31 to 90 days | \$1,200,000 |
| Fairfield | Electronic Client Records | Through funds currently available through our Medicaid unit site, we have been able to create a critical information system allowing us to incorporate most of our mental health treatment records. However, since the Medicaid unit site has not increased in 10 year and because of other funding reductions, we are no longer able to continue to develop our computerization process. This proposal is to retain our programmer for year and buy an additional server to allow us to complete this computerization of our treatment records. | Mid-Ohio Psychological Services | 1 | 0 to 30 days | \$70,000 |
| Fairfield | facility expansion project | We seek to expand our Pickerington, Ohio outpatient mental health facility. This is a rapidly growing part of Ohio - one of the fastest growing in the state. Funding would be utilized for facility costs associated with a larger office, including rent, utilities, furnishings and equipment. | New Horizons Youth and Family Center | 15 | 31 to 90 days | \$60,000 |
| Fairfield | electronic health record development | We seek to develop and implement an electronic health record for our agency within one year. We have previously considered but need funding to make the project a reality. We are a community mental health center serving over 4,000 individuals per year. State budget cuts have caused us to become as a time when service demand is increasing. | New Horizons Youth and Family Center | 10 | 0 to 30 days | \$50,000 |
| Fairfield | Rock Mill Restoration | The completed restoration of Rock Mill, Ohio's oldest and largest grist mill, will bring about a significant increase in tourism in Fairfield County and Central Ohio and thereby boost the economy of the county for beyond the jobs created just to restore and maintain the mill. With more than 70% of the population of the United States within a short drive or flight from Central Ohio, the addition of this one-of-a-kind, along with other tourism products yet to be developed (see later, Cross Mount covered bridges), will bring about growth and sustainability to the local economy. To date, restoration of the mill has been done entirely through generous donations and two small grants. The main six-story structure, perched on its ledges at the Upper Falls of the Hocking River, will be mostly complete by September of 2009. Restoration of the distribution of the great old wooden waterwheel that will be the only one of its kind in the United States. Fabrication of the wheel and drive train along with supporting structures will mostly be done by hand providing educational opportunities on a local as well as national basis. All Ohioans will benefit from the preservation of our heritage. | Fairfield County Historical Parks Commission | 8 | 0 to 30 days | \$300,000 |
| Fairfield | Fairfield County Public Safety Facility | Construct combined county/municipal jail, Sheriff's operations, emergency management operations, and possibly municipal court. Project would include existing facilities that are overcrowded, add permanent as well as temporary jobs, revitalize urban area (if approved), and build more efficient law enforcement operations for the Sheriff by combining administration, jail operations, communications and patrol and detective bureaus into one central location. | Fairfield County Commissioners | 300 | 181 days or more | \$40,000,000 |
| Fairfield | North Lancaster Treatment Facility | Replacement of two 1980's technology sewage treatment package plants with one Vertical Loop Reactor treatment facility. Project would also include the construction of 3,800 feet of sanitary sewer lines to connect the existing systems to the new system. | Fairfield County Utilities | 50 | 181 days or more | \$7,000,000 |
| Fairfield | Coonpath Road Water & Wastewater Extension | Construct lift station and force main to provide utility service to 800 acres of commercial development property adjacent to the US Route 33 corridor and connect the Glenfield Township sanitary sewer to the County's Little Water facility. | Fairfield County Utilities | 200 | 91 to 180 days | \$2,000,000 |
| Fairfield | North Sycamore Creek Interceptor - Phase 3 | Install 0.750 feet of sanitary sewer lines to develop 2000 acres of residential and commercial property as well as removing an old lift station from the county system. | Fairfield County Utilities | 50 | 91 to 180 days | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--------------------------------|----------------|--------------------|---------------------------|
| Fairfield | Little Walnut & High Service Area Systems Contract | Install water mains and Booster/PRV Station to interconnect the Tusting Road Water Treatment Plant and the Little Walnut Water Treatment Plant in case one or the other becomes inoperable. (Allen Road to Sherman to Bussey & Bussey Road from Allen to Pickerington Road). This project would also provide water services to 3500 acres of commercial and residential development property near the U.S. Route 33 corridor. | Fairfield County Utilities | 50 | 91 to 180 days | \$1,000,000 |
| Fairfield | Little Walnut Water System Contract #9 | Install 18,000 feet of Water Mains to service Olney Heights and Lockville subdivisions as well as service to nearly 800 acres of commercial and residential property along the U.S. Route 33 corridor. | Fairfield County Utilities | 50 | 91 to 180 days | \$1,000,000 |
| Fairfield | Wash Rack for Transportation Building | Water Quality improvements to wash facility to install of separator and other equipment to eliminate pollution to Baldwin Run. | City of Lancaster | 15 | 0 to 30 days | \$200,000 |
| Fairfield | Salt Storage Facility | Construction of new salt storage facility using green technology to provide energy efficiency and water quality improvements. | City of Lancaster | 15 | 31 to 90 days | \$450,000 |
| Fairfield | Sidewalks | We have sidewalks which have been repaired numerous times and need to be replaced. They are broken and no longer level. Not only are they a tripping hazard, but it is very difficult to utilize wheelchairs, which is important since we serve individuals with disabilities. Not only are they a tripping hazard, but it is very difficult to utilize wheelchairs, which is important since we serve individuals with disabilities. Not only are they a tripping hazard, but it is very difficult to utilize wheelchairs, which is important since we serve individuals with disabilities. Not only are they a tripping hazard, but it is very difficult to utilize wheelchairs, which is important since we serve individuals with disabilities. | Fairfield County Board of MRDD | 6 | 91 to 180 days | \$25,000 |
| Fairfield | Lighting | We need new lighting in our multipurpose room. Lighting needs to be more energy efficient. Our light fixture are outdated to the point that the light bulbs will no longer be able to be obtained. Also, we need to eliminate fluorescent lighting as it can cause seizures and other visual issues for the individuals with disabilities we serve. | Fairfield County Board of MRDD | 5 | 91 to 180 days | \$25,000 |
| Fairfield | Election House Road Relocation project | The project relocates a portion of Election House Road at the East end of the Fairfield County Airport Runway 28 Approach Area. Relocating the road would eliminate obstructions to the existing non-protection approach and enhance future LPV approach visibility. The project would enhance both the visibility and competitiveness of the airport, and is a collaboration between the Commissioners, Airport Board, County Engineer, and Greenfield Township. The airport is located adjacent to the US Route 33 Business Route just North of Lancaster. | Fairfield County Commissioners | 25 | 91 to 180 days | \$1,200,000 |
| Fairfield | Guardrail Study | Measure and identify the various types and locations all the guardrail on county and township roads. This is an ODOT requirement for future guardrail applications and has restricted our requests for grant money. | Fairfield County Engineer | 10 | 0 to 30 days | \$25,000 |
| Fairfield | 2009 Road Striping | Strip all County roads with new center line and edge line strips. This will help prevent accidents. | Fairfield County Engineer | 10 | 0 to 30 days | \$450,000 |
| Fairfield | 2009 Paving Project | Seal a 1.5' overlay of 15 lane miles through out the county of Fairfield. | Fairfield County Engineer | 75 | 31 to 90 days | \$1,500,000 |
| Fairfield | Elastomeric Bearing Pads | Replace Elastomeric Bearing Pads and floor for Bridge 190C-44. This is a bridge given to us from ODOT that had problems which we are now forced to repair and pay for. | Fairfield County Engineer | 10 | 0 to 30 days | \$75,000 |
| Fairfield | Load Rating all bridges in Fairfield County | Due to new balanced requirements we are forced to load rate all of our bridges in order to qualify for ODOT funding. | Fairfield County Engineer | 10 | 31 to 90 days | \$1,000,000 |
| Fairfield | Surge protection for the Fairfield County Eringerer | To protect all electronic equipment inside the Fairfield County Engineer's Office from lightning strikes. Have already had several strikes and had to replace equipment of various types. | Fairfield County Engineer | 10 | 0 to 30 days | \$30,000 |
| Fairfield | New Hires | Our company, Cayman Technologies, Inc. has enormous amount of work available through our solid clientele base. However, this work is being lost because our firm cannot need immediately to their needs. | Cayman Technologies, Inc. | 10 | 0 to 30 days | \$500,000 |
| Fairfield | Truck Sales for Engineer Building | We have a need to hire quality IT professionals, but we currently do not have the capital to do so. | Fairfield County Engineer | 5 | 0 to 30 days | \$100,000 |
| Fairfield | Purchase right of way for GRE-42 Bridge | Our firm, Cayman Technologies Inc., was incorporated in 1999 and we have a proven track record. We are a solid company looking for quality individuals long term. | Fairfield County Engineer | 10 | 31 to 90 days | \$50,000 |
| Fairfield | GRE-42 Bridge Replacement | This would show us as self product to the 13 townships and comply with the state auditor. | Fairfield County Engineer | 25 | 91 to 180 days | \$300,000 |
| Fairfield | Rehad and resurface 33A | Purchase right of way for Gre-42 so we may reconstruct the bridge for public safety. | Fairfield County Engineer | 25 | 91 to 180 days | \$1,500,000 |
| Fairfield | Urban Technology Development | Construction of the GRE-42 would provide safety to the residents of Fairfield County. | MI Technologies | 10 | 31 to 90 days | \$100,000 |
| Fairfield | Fresh Vegetables | Rehad and resurface county road 33A south of Lancaster would provide a safer road for residence. | Fresh Vegetable Technology | 150 | 0 to 30 days | \$9,300,000 |
| Fairfield | Fresh Vegetables | Our mission at MI Technologies is to provide design and networking solutions for small business and individual business customers. We are committed to building and servicing IT infrastructures to save cost, grow revenue, and develop effective networks that add value to small businesses and increase employee productivity. MI Tech believes there is no template to imitate in design, we wait our customers to create the services they need and implement them. Therefore, we will use our clients needs and design an IT solution to fit each individual customer. MI Technologies is a distributed company looking to expand and help those seeking employment with a small business IT firm. Our expected outcome is to create 10-20 jobs as well as giving our urban youth (stem jobs) to get an early start in the IT field, technology. | Fresh Vegetable Technology | 150 | 0 to 30 days | \$9,300,000 |
| Fairfield | Fresh Vegetables | FVT produces fresh healthy vegetables with no chemical (preservatives, oils, fats or coloring or flavoring). FVT technology is 36% more efficient than existing food processing plants we recycle 90% of the water and the peeling waste and silvers go directly to cattle feed. Of the 150 new jobs created, 95% will be unskilled labor. We need their eyes and hands for inspecting and packaging and cleaning. This new technology for the state of Ohio can provide healthy vegetables for school children and reduce obesity and other related health issues associated with poor diet. This will also impact the education and learning that is so desperately needed in children today. FVT can help the farmers now. The farmers in Ohio can now grow the vegetables needed to supply this state of the art vegetable plant. Currently FVT will need 125 million pounds of vegetable per year and the Ohio farmers could supply this. FVT picked Ohio to build to plant in over five other states because of four reasons. | Fresh Vegetable Technology | 150 | 0 to 30 days | \$9,300,000 |

| Fairfield | Pleasant Run Water Reclamation Facility and Collec | Two existing wastewater treatment package plants, Lakeside Estates and Pleasant Lea, are failing and the Ohio EPA is requiring construction of a regional treatment facility and collection sewer. The treatment plant is to have a capacity of 300,000 gpd per day. | URS Corporation | 10 | 181 days or more | \$7,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Fairfield | MT. ZION RD PROJECT | PROJECT INVOLVES RAISING A PORTION OF MT. ZION ROAD TO REDUCE THE INSTANCES OF FLOODING AND TO REPLACE THE CURRENT BRIDGE OVER THE HOCKING RIVER. WHEN THE ROAD AND BRIDGE IS RAISED, SAFETY VEHICLES WILL BE ABLE TO USE THE ROAD AND PROPERTY OWNERS WILL BE ABLE TO ACCESS THEIR PROPERTIES WITHOUT WORRIES. | GREENFIELD TOWNSHIP, FAIRFIELD COUNTY OHIO | 10 | 181 days or more | \$900,000 |
| Fairfield | Village of Carroll - Sanitary Sewer Grinder Pump R | Village of Carroll - Sanitary Sewer Grinder Pump Replacement - Project will replace aging sewer grinder pumps for each service connection to the Village of Carroll - Sanitary Sewer Grinder Pump Station. | M-E Companies, Inc. | 15 | 31 to 90 days | \$200,000 |
| Fairfield | Village of Carroll - Cemetery Road Sanitary Sewer | Village of Carroll - Cemetery Road Sanitary Sewer Extension Project - This project will extend the pressurized sewer system to provide service to areas currently without sewer thus opening up developable areas. | M-E Companies, Inc. | 50 | 31 to 90 days | \$40,000 |
| Fairfield | Village of Carroll - Water Distribution System Imp | Village of Carroll - Water Distribution System Improvements - This project will replace and upgrade aging waterlines, valves, and hydrants throughout the Village. Existing lines have far exceeded their useful life. As a result, the Village is constantly making costly repairs and residents are without water service. | Village of Carroll - M-E Companies, Inc. | 20 | 31 to 90 days | \$1,000,000 |
| Fairfield | Village of Carroll - Wastewater Treatment Facility | Village of Carroll - Wastewater Treatment Facility Abandonment - The Village of Carroll is regionalizing their wastewater treatment facility with Fairfield County and have contracted a grantee team to connect with the County's collection system. The Village now needs to properly abandon the lagoon type treatment facility within the Village. | M-E Companies, Inc. | 20 | 31 to 90 days | \$100,000 |
| Fairfield | Replace analog radios | To improve the safety of fire workers and the public, and to comply with FCC guidelines, replace existing analog radios with digital radios. | South Central Power Company | 3 | 91 to 180 days | \$500,000 |
| Fairfield | Village of Carroll - Water treatment Facility Aban | Village of Carroll - Water Treatment Facility Abandonment - The Village of Carroll is regionalizing with Fairfield County in that they will purchase treated water from the County. As such, the outdated water treatment facility within the Village needs to be properly abandoned so that the land can be used for another function. | Village of Carroll - M-E Companies, Inc. | 15 | 31 to 90 days | \$50,000 |
| Fairfield | Fire Station 594 Construction | Construction of an additional fire station to serve an expanding area due to commercial and residential growth. These funds will construct the facility which will be staffed with career firefighter paramedics. The possibility of co-existing or combining efforts with a neighboring Township also exists. | Violet Township Fire Department | 200 | 181 days or more | \$4,000,000 |
| Fairfield | Village of Carroll - Civic Center HVAC Upgrades | Village of Carroll - Civic Center HVAC Upgrades - This project will replace the heating and cooling system for the Village of Carroll Civic Center. Replace 600 miles of old conductor with larger wire to help reduce line losses, thus conserving energy, and reduce the number and length of power outages caused by falling wires, thereby improving the health and safety of customers. | M-E Companies, Inc. | 10 | 0 to 30 days | \$15,000 |
| Fairfield | Rehabilitating Aging Electric Infrastructure | Replace more than 100,000 existing electric meters to provide a system of real-time communication to help consumers make decisions about energy use and conservation. | South Central Power Company | 30 | 181 days or more | \$20,000,000 |
| Fairfield | Installation of Smart Metering Equipment | Village of Amanda - State Route 22 Sanitary Sewer Extension - This project will provide sewer service to 1 church/bayoune, 1 manufacturing facility, and 200 acres of future development. | South Central Power Company | 25 | 181 days or more | \$36,000,000 |
| Fairfield | Village of Amanda - State Route 22 Sanitary Sewer | Install Supervisory Control and Data Acquisition systems, and supporting cabinet communication equipment, in substations. This will provide real time power flow information as well as time-of-use information which can help consumers make decisions about energy use, conservation and efficiency. | M-E Companies, Inc. | 100 | 31 to 90 days | \$400,000 |
| Fairfield | SCADA Installation | Open second hand pawn business. | South Central Power Company | 4 | 181 days or more | \$2,000,000 |
| Fairfield | jewelry and pawn business | Open second hand pawn business. To whom I may concern: | self | 4 | 0 to 30 days | \$500,000 |
| Fairfield | Small business expansion | My project would be to expand my flooring business to include commercial cleaning and maintenance. Funds would be used to buy commercial grade equipment, training, marketing, and sales. The cleaning system is a proven process with substantial training and support from the manufacturer. This business would implement my installation company and provide consistent work for my part-time help. This business will provide full time employment for my wife within the first year. Additional hiring would occur as capabilities increase. The Columbus and Lancaster markets have copious opportunities with restaurants, malls, and businesses that need training, sealing, and maintenance of ceramic tile, concrete, and brick. If you have any questions, please contact me. I will be able to provide whatever documentation you need. Thanks, Tom Flaine | ITP Flooring | 3 | 0 to 30 days | \$75,250 |
| Fairfield | Replace Health Department Building | The main part of the current building was constructed in 1940 as the County Infirmary. Current maintenance issues include a leaking roof, lead paint, asbestos, mold, outdated HVAC and electrical, outdated telephone and IT systems, and unsafe parking lots with 50 degree slopes. The building is not ADA friendly. The first floor is contaminated with pigeon droppings. Small birds, bats, rodents, and snakes are periodically observed throughout the building. The Fairfield County Community Health Center is currently located off-site, making command and control difficult and higher safety costs for the site amount to approximately \$60,000.00 per year. Our plan would include building a state of the art clinic facility in the new health department building. This command and control would be enhanced and the off-site costs would be alleviated. The plan would also include a new three tier central clinic to provide much needed health and dental care for the uninsured and under insured populations in Fairfield County. As a Combined General Health District, the Health Department receives no funding or other support from its county commissioners. We do not have any levy funding. | Fairfield County Combined General Health District | 20 | 31 to 90 days | \$12,000,000 |
| Fairfield | Quality Low-Income Homes | Plan to eliminate mortgage on 12 current and 10 new Section 8 approved housing units which are privately owned. This housing will guarantee private owner returns, title and management rights to property thus allowing guaranteed continued quality and safe housing for 22 families from Fairfield County's low-income residents for 40 to 50 years to come. Establishment of drug free zones by ownership by company of distressed houses in one neighborhood will be an added benefit. Company will use remaining funds to establish an emergency financial fund to assist in future repairs and emergency maintenance in the event of disaster damages not covered by insurance policies. Fund will also be committed to assist tenant move-out or transfer deposits on file are not enough to cover tenant incurred damages. This plan is under development and is intended to stem a slow deterioration in some of Lancaster, Ohio's west side. Jobs created and lives threatened estimated at 100. This is a win-win with situation. | Blue Rabbit Properties | 100 | 0 to 30 days | \$1,750,000 |
| Fairfield | Fairfield County Emergency Operations Center | This project would be the construction of the Fairfield County Emergency Operations Center and Emergency Management Offices. This facility is crucial in the planning, response, and recovery of any event affecting Fairfield County or the region. | Fairfield County Emergency Management and Homeland | 100 | 31 to 90 days | \$1,250,000 |
| Fairfield | Energy Saving Products | The project has completed the design and location phase and is ready for building plans and groundbreaking. The goal of this project to develop products and services for Housing & Office retrofits. Our initial estimate projects that a average house will use 30% less energy cost savings from these products and services. | Energy | 100-200 | 31 to 90 days | \$1,000,000 |
| Fairfield | Village of Carroll - Center Street Improvements | The scope of this project also to leverage skilled employees who lost their jobs due to this economical down turn. These project will help customers, companies and gov agencies to make significant cost savings in their energy bill. Village of Carroll - Center Street Improvements Project - Center Street will be reconstructed with the following: 1,500 Linear Feet of new curbing 540 Linear Feet of storm sewer 8 Catch basins 440 Cubic Yards of asphalt 500 Square Yards of sidewalk Center Street is a heavily traveled road in the Village and is in need of a significant upgrade. | M-E Companies, Inc. | 20 | 91 to 180 days | \$400,000 |
| Fairfield | ColdPhase Coporation | We are developing a reusable shipping container for the food, medical and pharmaceutical industries. Our container will replace styrofoam polystyrene and Dry Ice which are both bad for the environment. Our container is reusable, and can be hundreds of times over for product transport. Our container can keep product chilled and refrigerated for several days without the use of power. It also eliminates the need for companies to "heat dry air" products which has a greater impact on the environment than shipping items in bulk via ground transport which is more efficient. We will use a other Ohio based companies as suppliers which will help our state economy. | ColdPhase Corporation | 15 | 0 to 30 days | \$500,000 |
| Fairfield | Early Computer Education (Programing) Grade 5 and | The goal of this project to educate Ohio status with computer languages and technologies. This program will equip students with the necessary knowledge to get jobs in the computer domain even right after the high school in a part-time basis. The objective of this program is to enable our students to be able to compete with international students in the market place. This program will also help our students to use the computer technologies in various domains that they will be exposed during their academic and professional career. | Education | 20,000 | 0 | \$20,000,000 |
| Fairfield | Replacement of Pumper Truck | The project is to replace a 1983 pumper truck with a new truck incorporating modern safety features. The City has several fire vehicles that are 20+ years old. Our plans to replace the vehicle was tabled due to lack of revenue and the need to retain the personnel. | City of Lancaster | 15 | 91 to 180 days | \$430,000 |
| Fairfield | Replacement of Medic Unit | The project is to replace a 2002 medic unit. The citizens of Lancaster enacted a income tax levy to fund additional medics to ensure public health and safety. This will replace the medic unit to maintain three units. | City of Lancaster | 15 | 91 to 180 days | \$200,000 |
| Fairfield | Fusion Technology College | This is critical to our Nation's future. Our's Future platform is the area of the future and we need to educate our people NOW. Offshore resources are lacking in this area. We will make Ohio the capital of Technology future. Many of the CIO/CDOs in town have expressed an interest and desire to invest in training facility to educate Ohio's high and technologies training Oracle Developers, Functionalists, Database Administrators, Project Managers, and Techno Functionalists in around Oracle and especially Oracle Applications ERP. Finding resources is most difficult in this county for seven Oracle and IBM. That is not CIO's show announcing costs 1.3x more than American labor, but the supply in America is missing. Goal of this project will be to develop and built a specialist school for training those that have been layed off, higher education training (age 21-40), and secondary education through those graduating collegen. In addition begin training with High School students. I am a former CIO and highly respected Apps Database Administrator (probably top50 skilled in Eastern USA). I have a business plan to get this going NOW to employ many Ohio Buckeyes. | New Business | 100 | 91 to 180 days | \$1,250,000 |
| Fairfield | Walnut Township Fire Department | Walnut Township hopes to start a new fire department, including selecting a station and purchasing fire and emergency equipment. At this time, Walnut Township contracts with one department and is half-owner of another. By combining two separate departments into one, we will be able to provide our services at no extra cost to taxpayers, hire more medics and fire fighters, and improve our coverage for the safety of our residents. Walnut Township is located in the north-eastern part of Fairfield County. According to county estimates in 2006, the township population is 8,800 with 39% being low to moderate income. However, the township borders the Buckeye Lake recreation area which is 2007 attracted 354,340 visitors, traffic flow is heavy, via six major highways intersecting the township and increases 70 just one mile north. Purchase of 8 acres of property and construction of recreational facilities for the benefit of children and youth in our community. Facilities to include indoor softball, soccer, basketball and park-ball. | Walnut Township Trustees | 60 | 0 to 30 days | \$2,200,000 |
| Fairfield | Youth Recreation Facility | Community facilities are sorely lacking and we need additional funds to expand this capital project. | Let's Play Canal | 15 | 0 to 30 days | \$1,500,000 |
| Fairfield | Walnut Township Community Library | Walnut Township would like to provide a public library for our residents. Walnut Township is located in the north-eastern part of Fairfield County. According to county estimates in 2006, the population is 8,800 with 39% being low to moderate income. The Walnut Township Community Library would be a branch of the Fairfield County District Library in Lancaster. We have a bookmobile three days a week but due to library budget cuts, now it only comes on Saturdays for limited hours. The bookmobile is half the size it used to be. The District Library has said they would provide the staff and books if we provide a building. Libraries are traditionally beneficial to the education of an area's residents, particularly as centers for learning for all ages and a resource for students. The Library fills a need by providing free access to literature and other materials to all residents, including those with low income. | Walnut Township Trustees | 8 | 31 to 90 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Fairfield | Village of Pleasantville - Village Wide Paving | The Village streets are in need of resurfacing. This project would provide a resurfacing/reconstruction of multiple streets within the Village. Many streets have potholes and cracks that are requiring continuous care because they have not been surfaced for 30 years. The Village of Pleasantville has a population of 877 people with a MHI of \$32,150. | ME Companies for Village of Pleasantville | 10 | 31 to 90 days | \$200,000 |
| Fairfield | Research on Rural Commercial Energy Usage | Develop research on energy usage of rural commercial businesses in Ohio. National and state data reflect general energy usage over business categories on a statewide or regional basis. Little is depicted on rural businesses and how to better promote and provide avenues to save energy. A research project could benefit the State, energy providers, and rural businesses. Counties (77) could include Adams, Allen, Ashland, Athens, Auglaize, Belmont, Brown, Butler, Carroll, Champaign, Clark, Clermont, Clinton, Columbiana, Coshocton, Crawford, Darke, Deane, Delaware, Erie, Fairfield, Fayette, Franklin, Fulton, Gallia, Hancock, Hamilton, Harrison, Heald, Highland, Henry, Highland, Logan, Madison, Mahoning, Marion, Jackson, Jefferson, Knox, Lawrence, Licking, Lorain, Logan, Lucas, Madison, Marion, Mercer, Medina, Meigs, Miami, Monroe, Montgomery, Morgan, Morrow, Muskingum, Noble, Paulding, Perry, Pickaway, Pike, Preble, Putnam, Richland, Ross, Sandusky, Scioto, Seneca, Shelby, Stark, Tuscarawas, Union, Van Wert, Vinton, Washington, Wayne, Williams, Wood, Wyandot. | Buckeye Power, Inc. | 0 | 31 to 90 days | \$200,000 |
| Fairfield | Blacklick Creek Greenway Trail, Phase 11 | Phase 11 is the last segment that will connect Blacklick Woods Metro Park, Pickerington Ponds Metro Park and Three Creeks Park. This 2-mile segment will be constructed through partnerships with Fairfield County, Franklin County, City of Columbus, City of Pickerington, a private railroad and private developers. | Columbus and Franklin County Metro Parks | 15 | 91 to 180 days | \$1,000,000 |
| Fairfield | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a wireless infrastructure to equip rural residents with the service to be able to access the Internet at broadband speeds. Establishing a wireless service to much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WIMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Fairfield | Continuation of Route 33 non-access Highway Project | The state program to convert Route 33 southeast of Columbus was put on hold due to availability of funds. The project was stopped because access routes to route 33 were completed in Franklin County. However, the project included designs to proceed through Pickerington County to link the non-access highway to the local road network. The high clearance bridge through Fairfield County continues and the bridge is now complete. Lack of road infrastructure has made Fairfield County less desirable for business to locate to Fairfield County. The Department North of Columbus gave priority funding that there has been substantial progress in attracting business that contribute to economic development and expand the tax base for our schools. The project has already been studied and recommended by ODOT. It is a project that would make a significant contribution to the economic recovery of both the local residents, the state of Ohio and the well-being of the Ohio government. The lives of the people in Fairfield County are just as important as the lives of the people in Franklin County. Please help us complete the museum wing of the Bremen Area Historical Society that we might be able to preserve the history of Bremen for future generations as an educational tool for the local school district. The Bremen Area Historical Society was established 100 years ago but the museum wing remains unfinished. A capital funds campaign has produced \$35,000.00 of an estimated \$85,000.00 for completion. Local contractors and material from local businesses will be used. | Private | 400 | 0 to 30 days | \$3,000,000 |
| Fairfield | Completion of Museum Wing | The project will replace approximately 27,000 square feet of old, broken sidewalk and replace handicap ramps along Main Street in the Village of Amanda. The total length of Main Street through the corporation limits is 3,400 feet. In addition, portions of concrete curbing and asphalt pavement sections will be repaired. | Bremen Area Historical Society | 8 | 31 to 90 days | \$50,000 |
| Fairfield | Village of Amanda - Main Street Improvements | The plant currently have a summer tank that was installed in 1996. It leaks, does not control pH and O ₂ & Dissolve. As a result there are violations that occur. The plant wants to install a new and improved Enhanced Air Position Device that will control the pH and effectively remove the O ₂ & Dissolve. | M-E Companies, Inc. | 20 | 31 to 90 days | \$500,000 |
| Fairfield | Waste Water Treatment | We will put in a new c&d recycling system under roof to make new markets for recycled material and keep it out of landfills. Currently in Ohio there are not many markets for recycled material such as drywall, shingles, insulation and the system would create those and all the jobs that come with them. It would also be a major stepping stone for the building industry to go green in the lead programs. | Ralston Foods | 3 | 0 to 30 days | \$200,000 |
| Fairfield | C&D Recycling | We need new flooring for our adult services building and our school. The flooring we are going to put in is slip-resistant but we have had a number of individuals with disabilities and staff slips and will also be beneficial to reduce the number of diseases for the medically fragile population we serve. | Buiness | 20 | 0 to 30 days | \$200,000,000 |
| Fairfield | Flooring | We need an activity room for the individuals with disabilities we serve who are not engaging in work. This room would provide learning activities for the individuals as well as play and hobby and habilitation activities. We would need painting, wall covering, new flooring, cabinets and equipment. We need to develop a learning center/computer lab for the individuals with disabilities we serve. When they are not working they could be engaging in learning computer skills and by working with programs on computers. We would need wall construction, painting, new floors, wiring and equipment. | Fairfield County Board of MRDD | 10 | 91 to 180 days | \$100,000 |
| Fairfield | Activity Room | We need to replace the lights in the gymnasium. The current fixtures will soon be obsolete and we will no longer be able to purchase the bulbs. We need something which will be more energy efficient and easier on the children and adults with disabilities who utilize the gym. | Fairfield County Board of MRDD | 20 | 91 to 180 days | \$100,000 |
| Fairfield | Learning Center/Computer Lab | We need to replace lighting in our canopy at our school (which has become obsolete). We would also like to install infrared heaters at the same site at both the school and the adult facility. We have many individuals with physical disabilities who are unable to keep the sidewalks free from ice and dry which would help reduce slips and falls (sometimes serious injuries). Refurbishing existing devices added to CRUI, Pickerington Rd. AAR DOT # 229845. This crossing is ranked #189, of approximately 800, on the list of most hazardous crossings in Ohio. | Fairfield County Board of MRDD | 25 | 91 to 180 days | \$75,000 |
| Fairfield | Gym lighting | The City of Lancaster Public Transit System would like to replace two vehicles within the current fleet with newer models. The request is for two light transit vehicles, 10+1. These vehicles will allow the continued operation of the rural public transit system. In addition, the vehicles will use energy technology, will be more energy efficient and provide safer transportation for the many customers who utilize the system. The vehicles will also allow the transit system to apply funds towards service goals rather than higher maintenance and energy costs of the aging fleet. | Ohio Rail Development Commission | 6 | 91 to 180 days | \$25,000 |
| Fairfield | Canopy lighting | Public Transit Garage is in dire need of rehabilitation. Project will include new building and ceiling insulation, new windows and a new roof. Project goal is to provide a more secure facility for Public Transit vehicles while also making the facility more energy efficient, resulting in lower utility costs. Savings will then be applied to providing more services to the community through Public Transit. | City of Lancaster Public Transit | 10 | 91 to 180 days | \$50,000 |
| Fairfield | Railroad Safety Project, Pickerington Rd., Canal W | 3000 Capitalized Maintenance | City of Lancaster Public Transit | 6 | 31 to 90 days | \$200,000 |
| Fairfield | City of Lancaster Public Transit Vehicle Replace | The request is being made for the construction of a new firehouse to replace the existing firehouse. The current firehouse is deteriorating and is not suitable for expansion and growth. Many updates would have to be made to the existing firehouse to prepare it in the future as a part time fire department. The fire department is currently a volunteer fire department consisting of 15 members. Township officials believe that the department's money would be best used by trying to update the current firehouse to today's standards. The ability to construct a new firehouse to the standards that are required would greatly enhance our visibility to the public and be a huge step forward to enhancing and achieving the goal of becoming a part time fire department without having the extra burden of paying for the construction placed upon the taxpayer's or our township. | City of Lancaster Public Transit | 15 | 31 to 90 days | \$110,000 |
| Fairfield | Public Transit Administration Building - Energy Ef | THE PROJECT WILL CONSIST OF IMPROVEMENTS TO STONECREEK DRIVE IN VIOLET TOWNSHIP, FAIRFIELD COUNTY. STONECREEK DRIVE IS THE ENTRANCE TO A BUSINESS AND EDUCATIONAL AREA OF VIOLET TOWNSHIP. APPROXIMATELY 1,000 LINEAL FEET OF STORM WATER CURB AND GUTTER WILL BE CONSTRUCTED. APPROXIMATELY 2,500 LINEAL FEET OF SIDEWALK WILL ALSO BE CONSTRUCTED. PROVISIONS WILL BE MADE IN THE PROJECT TO ALLOW FOR THE INSTALLATION OF BROADBAND FIBER AT A LATER DATE. | City of Lancaster Public Transit | 20 | 0 to 30 days | \$140,000 |
| Fairfield | Public Transit Vehicle Garage Rehabilitation - Ene | The water distribution system, sanitary and storm sewers date to the 1950s. The systems have been evaluated and are in critical need of replacement. This project included on the respective Five Year Capital Improvement Plan for Violet Township, Fairfield County and the City of Pickerington. Water lines have experienced leakage. Standing water on the pavement is a frequent occurrence after rainfall, the standing water creates a health hazard associated with the breeding of mosquitoes and negatively impacts safe driving, walking or bicycling. Project would include relining of approximately 2,750 linear feet of existing sanitary sewer, 6,800 linear feet of replacement wastewater and 1,750 linear feet of new storm sewer. Approximately 1500 cubic yards of splash concrete is included in the project. | City of Lancaster Public Transit | 20 | 0 to 30 days | \$75,000 |
| Fairfield | FAI Capitalized Maintenance | Public Transit Garage is in dire need of rehabilitation. Project will include new building and ceiling insulation, new windows and a new roof. Project goal is to provide a more secure facility for Public Transit vehicles while also making the facility more energy efficient, resulting in lower utility costs. Savings will then be applied to providing more services to the community through Public Transit. | Ohio Department of Transportation | 1 | 0 to 30 days | \$80,900 |
| Fairfield | Construction of a new firehouse | The request is being made for the construction of a new firehouse to replace the existing firehouse. The current firehouse is deteriorating and is not suitable for expansion and growth. Many updates would have to be made to the existing firehouse to prepare it in the future as a part time fire department. The fire department is currently a volunteer fire department consisting of 15 members. Township officials believe that the department's money would be best used by trying to update the current firehouse to today's standards. The ability to construct a new firehouse to the standards that are required would greatly enhance our visibility to the public and be a huge step forward to enhancing and achieving the goal of becoming a part time fire department without having the extra burden of paying for the construction placed upon the taxpayer's or our township. | Berne Township Fire Department | 150 | 181 days or more | \$2,000,000 |
| Fairfield | STONECREEK DRIVE IMPROVEMENTS | THE PROJECT WILL CONSIST OF IMPROVEMENTS TO STONECREEK DRIVE IN VIOLET TOWNSHIP, FAIRFIELD COUNTY. STONECREEK DRIVE IS THE ENTRANCE TO A BUSINESS AND EDUCATIONAL AREA OF VIOLET TOWNSHIP. APPROXIMATELY 1,000 LINEAL FEET OF STORM WATER CURB AND GUTTER WILL BE CONSTRUCTED. APPROXIMATELY 2,500 LINEAL FEET OF SIDEWALK WILL ALSO BE CONSTRUCTED. PROVISIONS WILL BE MADE IN THE PROJECT TO ALLOW FOR THE INSTALLATION OF BROADBAND FIBER AT A LATER DATE. | Violet Township | 80 | 31 to 90 days | \$1,100,000 |
| Fairfield | Mingo Estates Infrastructure Improvements, Phase 2 | The water distribution system, sanitary and storm sewers date to the 1950s. The systems have been evaluated and are in critical need of replacement. This project included on the respective Five Year Capital Improvement Plan for Violet Township, Fairfield County and the City of Pickerington. Water lines have experienced leakage. Standing water on the pavement is a frequent occurrence after rainfall, the standing water creates a health hazard associated with the breeding of mosquitoes and negatively impacts safe driving, walking or bicycling. Project would include relining of approximately 2,750 linear feet of existing sanitary sewer, 6,800 linear feet of replacement wastewater and 1,750 linear feet of new storm sewer. Approximately 1500 cubic yards of splash concrete is included in the project. | Violet Township | 80 | 31 to 90 days | \$2,100,000 |
| Fairfield | Interurban trail | The water distribution system, sanitary and storm sewers date to the 1950s. The systems have been evaluated and are in critical need of replacement. This project included on the respective Five Year Capital Improvement Plan for Violet Township, Fairfield County and the City of Pickerington. Water lines have experienced leakage. Standing water on the pavement is a frequent occurrence after rainfall, the standing water creates a health hazard associated with the breeding of mosquitoes and negatively impacts safe driving, walking or bicycling. Project would include relining of approximately 2,750 linear feet of existing sanitary sewer, 6,800 linear feet of replacement wastewater and 1,750 linear feet of new storm sewer. Approximately 1500 cubic yards of splash concrete is included in the project. | Moore and Son Excavating LLC | 50 | 181 days or more | \$1,300,000 |
| Fairfield | Trace Drive culvert replacement | Replace failing culvert to protect street. | Moore and Son Excavating LLC | 15 | 0 to 30 days | \$100,000 |
| Fairfield | Sidewalk's | The removal and replacement of old broken sidewalk's. | Moore and Son Excavating LLC | 15 | 91 to 180 days | \$25,000 |
| Fairfield | Expansion/Upgrade Project; West After School Cente | Partnership with Lancaster Fairfield County Community Action Head Start, the West After School Center plans to purchase three neighboring homes, remove them, and early childhood classrooms, outdoor play area, and tractor to its existing facility. We will also renovate the gas line, add a generator, and upgrade the entire facility to emergency shelter status to more effectively meet the needs of families in our area - at all times. This renovation and upgrade project will create space for Head Start programming in Lancaster, create space for adult classes, allow us to increase the FEED OHIO summer lunch program, and provide for the safety and security of students and families in time of emergency (as we have experienced this fall and winter). Individual classrooms will allow for expanded after school programming to serve approximately 150 children in one site throughout the year. The properties are contiguous to our facility and available. We have worked with HUD in the past. This expansion and upgrade (involving removal of three houses) will positively impact the surrounding neighborhood, provide additional jobs, and create additional learning opportunities. Renovation of an existing fire station to add day space, improved living areas for firefighters, fitness area for firefighters and meeting space for an equipment function and other. | West After School Center, Inc. | 12 | 181 days or more | \$750,000 |
| Fairfield | Basil Fire S1611 Renovation | Purchase of a Vector truck and "backyard" unit for clearing sanitary sewers and stormwater drains. This would help ensure clean drainage structures and prevent backups and businesses. This proposal is an effort to bring sustainable and effective oil transportation to the citizens and visitors of The State of Ohio. The proposal represents a step in Columbus, Ohio to a connection in Athens, Ohio. The proposal will create jobs through all of the communities it touches and help pressures on the environment. | Basil Joint Fire District | 30 | 31 to 90 days | \$750,000 |
| Fairfield | Vector Equipment | Install 1600 linear feet of 2 inch footcandle and a duplex lift station to serve the Kingdom Kids Preschool and Daycare. The current sewage pumping system is reaching capacity and to further expand the preschool and early childhood development program, the Kingdom Kids Preschool and Daycare will be required to tap into the Village of Amanda's sewage collection system. The Kingdom Kids Preschool and Daycare not only serve the Village of Amanda and currently communities in south Fairfield County but is the only open enrollment facility in the village of Circleville and Lancaster. | Fairfield County Utilities | 2 | 0 to 30 days | \$350,000 |
| Fairfield | Connect Ohio | Install 1600 linear feet of 2 inch footcandle and a duplex lift station to serve the Kingdom Kids Preschool and Daycare. The current sewage pumping system is reaching capacity and to further expand the preschool and early childhood development program, the Kingdom Kids Preschool and Daycare will be required to tap into the Village of Amanda's sewage collection system. The Kingdom Kids Preschool and Daycare not only serve the Village of Amanda and currently communities in south Fairfield County but is the only open enrollment facility in the village of Circleville and Lancaster. | Rail Planning Ohio | 10,000 | 181 days or more | \$20,000,000 |
| Fairfield | Kingdom Kids Sewer Line Extension | Install 1600 linear feet of 2 inch footcandle and a duplex lift station to serve the Kingdom Kids Preschool and Daycare. The current sewage pumping system is reaching capacity and to further expand the preschool and early childhood development program, the Kingdom Kids Preschool and Daycare will be required to tap into the Village of Amanda's sewage collection system. The Kingdom Kids Preschool and Daycare not only serve the Village of Amanda and currently communities in south Fairfield County but is the only open enrollment facility in the village of Circleville and Lancaster. | Kingdom Kids Preschool and Daycare | 40 | 31 to 90 days | \$150,000 |
| Fairfield | Kingdom Kids Water Line Extension | Install 1600 linear feet of 2 inch footcandle and a duplex lift station to serve the Kingdom Kids Preschool and Daycare. The current sewage pumping system is reaching capacity and to further expand the preschool and early childhood development program, the Kingdom Kids Preschool and Daycare will be required to tap into the Village of Amanda's sewage collection system. The Kingdom Kids Preschool and Daycare not only serve the Village of Amanda and currently communities in south Fairfield County but is the only open enrollment facility in the village of Circleville and Lancaster. | Kingdom Kids Preschool and Daycare | 40 | 31 to 90 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Fairfield | Kingdom Kids Water Line Extension | Install 2000 linear feet of 2 inch waterline to serve the Kingdom Kids Daycare and Preschool. The Kingdom Kids Daycare and Preschool surface water well has had past issues of violation with the Ohio EPA. In order to expand the preschool, and maintain the current daycare and preschool, the current surface water well will be insufficient and the connection of the preschool and daycare to the Village of Amanda's water supply will be required. | Kingdom Kids Preschool and Childcare Center | 40 | 31 to 90 days | \$150,000 |
| Fairfield | FDCOP Building - ADA Compliance Project | FDCOP has completed phase one of its restructuring project. The property next door was purchased and parking for 20-25 additional cars has been established. Phase Two involves replacement of the front facade of the 60+ year old building. Realigning and positioning of the front entrance ramp and flyer bringing it up to ADA compliance, making a room to accommodate a bed for changing and personal hygiene, enlarging office for the nurses and first aid staff. The participant's activities areas will be reconfigured with upgrading the computer facilities and activities areas. | Fairfield Center for disabilities & Cerebral Palsy | 30 | 0 to 30 days | \$285,000 |
| Fairfield | Lawrence Street WPCF Window Replacement | Replacement of 30+ year old windows and doors in the maintenance and boiler buildings to increase energy efficiency and reduce emissions | City of Lancaster | 5 | 31 to 90 days | \$50,000 |
| Fairfield | Miller Park Water Plant Energy Upgrade | Phase 2 energy upgrades to failing utility boiler to improve efficiency and reduce emissions | City of Lancaster | 5 | 31 to 90 days | \$75,000 |
| Fairfield | Feder Run Stream Restoration | Streambank stabilization on Feders Run to correct erosion issues that are threatening the bike trail. | City of Lancaster | 6 | 31 to 90 days | \$20,000 |
| Fairfield | EDUCATION & TRAINING | ALLOW FOR THE OHIO BALIFFS AND COURT OFFICERS ASSOCIATION TO CONTINUE ITS TWO (2) TRAINING SESSIONS/CONFERENCE PER YEAR FOR THE NEXT 5 YEARS. WE HAVE IN THE PAST HAD TWO PER YEAR 2-DAY SESSIONS FOR ALL OHIO EMPLOYEES, JUDGES, BALIFFS, CLERKS, SECURITY OFFICER, PROBATION OFFICERS FOR ALL OHIO COURT EMPLOYEES TO ATTEND. THE ECONOMY HAS CAUSED US TO BE HOLDING OUR LAST CONFERENCE IN APRIL 2009 AND WILL NOT HAVE FUNDS TO CONTINUE WITHOUT SOME ASSISTANCE. THIS WOULD MEAN NO MORE NETWORKING BETWEEN COURTS, NO MORE TRAINING, THUS LEAVING OUR COURTS LESS SECURE. COURTS HANDLE ALL THE CRIMINAL ELEMENTS INCLUDING TERROR SUSPECTS, TRAINING THESE PEOPLE FROM A STATE WIDE PERSPECTIVE AND THE NETWORKING ALLOWS US TO GET INFORMATION OUT TO ALL COURTS QUICKLY THROUGH OUR WEB SITE AND EMAIL NOTIFICATION SYSTEM. FUNDING WOULD KEEP US IN THE TRAINING BUSINESS FOR AT LEAST 5 YEARS. | OHIO BALIFFS AND COURT OFFICERS ASSOCIATION | 300 | 91 to 180 days | \$45,000 |
| Fairfield | Expansion Services Program | If we were able to hire 2 part-time Visual rehabilitation teachers we would be able to expand our services to the northern area of Fairfield County (Pickerington) more efficiently and effectively and increase our outreach by 20 percent. We are currently unable to fund full time employees due to current funding yet with additional funding we hope to serve more clients throughout our county and decrease the waiting time. | Southeast Ohio Sight Center | 2 | 91 to 180 days | \$35,000 |
| Fairfield | Liebs Island Bike Trail | Walnut Township wants to build a bike and walking trail from Milersport Road to Liebs Island to be used by township residents and tourists that visit Buckeye Lake. Liebs Island Road is located within the public right-of-way. This would be the first bike and walking trail in Walnut Township. It is an initiative to hook into other bike and walking trails in the area and other communities. | Walnut Township Trustees & Zoning | 0 | 31 to 90 days | \$225,000 |
| Fairfield | Increase our teaching materials, inventory, and st | Each of us three women suffers from either fibromyalgia, a neurological condition, or injuries. Our goal is to increase our inventory and support manufacture our products. We also need funds to buy materials for teaching fiber related classes, including those that have nearly been lost. This money would also be used to buy products that local individuals have been asking for. It is our goal to buy from as many Ohio products or supplies as possible. It is also our goal to be able to earn a living with the store, with the possibility of hiring more people to help manufacture products. We have been in business together for 6 months, before each in a business of her own. Consolidating our talents and goods has been a solid and good idea. Expected Outcome: not being jobless and unemployed, being a contributing asset to the area and the teaching community. While we are located near the line of Fairfield Perry county, our need for a store/manufacturing facility must be in Perry county. As Fairfield county is not making efforts for micro-businesses. Thank you for your careful consideration of our request. | All The Sisters | 3 | 0 to 30 days | \$25,000 |
| Fairfield | Ohio County Farms to Feed the Hungry (OCFFH) | The idea is to bring back the county farm. Using donated private land and state or county owned land, people can be hired part-time to till, plant, water, weed, and harvest the food that can feed the hungry in each of the 88 counties of Ohio. About 10 workers can handle 40 acres part-time. Therefore, 20 people, could plant 200 acres to feed the poor in 5 counties, 88 counties? We have begun this process in Fairfield county and are talking with people in Licking, Hocking, Ross, and Pickaway counties. We are already negotiating to use a 29 acre farm in the county. Thirty volunteers have signed up. I meet this week to partner with MRDO to combine their Sanctuary Trail with our gardening plans. We will hold a stakeholders meeting to see how the city, county, Farm Bureau, school districts, and food pantries, and shelters can help with this plan. We have the curriculum developed for a summer education program. I am the co-founder of Fairfield County Community Gardens and would VERY much like to lead the effort to feed the hungry in every county in Ohio. JEF equipment (3) double wheel beerless tanks including labor, material and equipment needed to stay within compliance of the state of ohio bureau of underground storage tank regulations. | Fairfield County Community Gardens (FCCG) | 50 | 0 to 30 days | \$200,000 |
| Fairfield | Underground storage tank compliance | JEF equipment (3) double wheel beerless tanks including labor, material and equipment needed to stay within compliance of the state of ohio bureau of underground storage tank regulations. | RT.22 Enterprises LLC | 9 | 0 to 30 days | \$200,000 |
| Fairfield | Enhancing Opiate Addiction Treatment | The Recovery Center is a community based not-for-profit providing outpatient drug and alcohol treatment and prevention services to the citizens of Fairfield County. In June 2007, with the support of the Fairfield County AdHoc Board, a program to implement Suboxone to opiate addicted clients was established. Since that time the program has been embraced by the community including the judicial system that encompasses, but is not limited to, Family Drug Court, Adult Drug Court and the Common Pleas Court. As a result of the proven success of the treatment program, demand for services has outstripped the current resources of The Recovery Center. Over 400 opiate addicts have been served for over 40 currently active and another 30-40 in waiting and in need of services. This program is widely recognized for its success and effectiveness and would benefit greatly from an influx of additional funds. | The Recovery Center | 1 | 31 to 90 days | \$200,000 |
| Fairfield | District Keyless Entry System | The project entails the installation of Standard 156-2001 compliant, nonproprietary, open data communication protocol building automation system (BAS) designed to conform to interoperability standards. The new automation controllers will provide camera and keyless entry features for access control and monitoring of the following: o Entrance doors o Overhead doors o Hallways and common areas. o Computerized management system to monitor and document activity to each K-12 Building. o Automated systems for use in monitoring the hallways. *New wiring will be provided. *The system will help secure the districts buildings for students and staff. It will also aid the administration in the control of district facilities. | Lancaster City Schools | 10 | 31 to 90 days | \$420,000 |
| Fairfield | District Automation Installation | The project entails the installation of Standard 156-2001 compliant, nonproprietary, open data communication protocol building automation system (BAS) designed to conform to interoperability standards. The new automation controllers will provide camera and monitoring for the following: o Boiler via start/stop action and status monitoring. o Hot water pumps via start/stop action and status monitoring. o Chilled water pumps via start/stop action and status monitoring. o Chillers via start/stop action and status monitoring. o System supply water temperature measurement and monitoring. o System return water temperature measurement and monitoring. o Global point, outside air temperature measurement and monitoring. * Provide and install controllers on the fan-coil units as well as other HVAC equipment. *New wiring will be provided. *The system will help conserve and reduce the districts energy consumption and help to increase equipment life throughout the district. | Lancaster City Schools | 14 | 31 to 90 days | \$1,050,000 |
| Fairfield | District Lighting Retrofit | The project entails the retrofit of existing T-12 lighting fixtures in classrooms, multi-purpose rooms, hallways and offices to new T-8 energy efficient technology in 12 buildings from K-12. The project would also include retrofit of existing gymnasium lighting systems to new energy efficient high bay, high output fluorescent fixtures in all gymnasiums. The project will result in a net reduction in energy of 25 - 30% of total electrical utility bill for the district. It is also important to note that most of the retrofitted lighting systems have not been retrofitted over 40 years. The result of the project will be the creation of a better learning environment, reduced energy consumption and increased asset life of the lighting systems. | Lancaster City Schools | 21 | 31 to 90 days | \$850,000 |
| Fairfield | Project 50 stars Ohio History | Museum for the original 50 star flag design by Ohio's own Bob Heft. Call for more details | Bob Heft | 10 | 31 to 90 days | \$1,500,000 |
| Fairfield | The Toy Box | The Toy Box is a specialty toy store that will capitalize on a niche that is completely left open in Fairfield County and the entire southeast Ohio area. We will offer a complete line of toys that are not offered at any other major retailer. Although our main focus will be toys we will provide educational classes, such as science and engineering and also will provide a space for a party room to create additional revenue. This venture will create 35 new jobs in Lancaster we would like to see Lancaster establish a program capitalizing on the Main Street program already in place. We feel that with the Toy Box will become a destination in a struggling downtown region and will fit in to Main Street's program to revive the downtown. We will be ready for operations within 60-90 days. Students entering our high school will receive a laptop for four years. Upon graduation, students will return lap tops to the school district for further use. | The Toy Box | 3 | 31 to 90 days | \$45,000 |
| Fairfield | Eliminating the Digital Divide | Students entering our high school will receive a laptop for four years. Upon graduation, students will return lap tops to the school district for further use. | Lancaster City Schools | 2 | 31 to 90 days | \$750,000 |
| Fairfield | Community Health Facility | As a not-for-profit community behavioral healthcare provider, The Recovery Center provides outpatient alcohol and drug treatment services to the citizens of Fairfield County. Many of our clients, mostly women, are in need of physical health services which they cannot afford and are usually obtained at the local county health facility. In as much as this health center has limited resources and less than required office hours, many women must wait many weeks before they can be seen by a doctor. Even when they are able to obtain an appointment there is a lack of quality follow-up services. The Recovery Center will utilize new funding to develop a health center in an existing facility and contract with Doctor's currently providing opiate addiction medication and monitoring services to Recovery Center clients. Although this new facility would operate on a non-for-profit basis, it will provide another outlet for clients, particularly women, who are in need of regular medical services. | The Recovery Center | 3 | 91 to 180 days | \$100,000 |
| Fairfield | The Lighthouse, Inc. | Hire additional shelter staff | The Lighthouse, Inc. | 3 | 181 days or more | \$100,000.00 |
| Fairfield | Fairfield-Hocking Major Crimes Unit | With continued budget cuts, and limited resources, participating task force agencies are limited by manpower, equipment, time, and money to independently investigate and prosecute crimes involving gangs and drug trafficking organizations, and other organized criminal groups. Once again, the short and long term consequences remain the same. Without grant support, there would be a loss of an effective multi-jurisdictional approach to solving major crimes by coordinating investigative activities and communications with the law enforcement community. And on the long term side, consequences of not continuing with the current philosophy of multi-jurisdictional task forces would cause a significant loss in the availability of legal funds and the crimes associated with drug abuse, and drug trafficking. The Fairfield-Hocking Major Crimes Unit has been a Law Enforcement Task Force funded by ODCJS since 2001. The unit serves over 161,000 residents within the 928 square miles of Fairfield and Hocking Counties. The Major Crimes Unit also continues to serve other surrounding jurisdictions when requests are made for assistance. According to the 2008 Ohio HCTA Final Assessment, Coshocton, Clark Coshocton, Henry, Madison, and Meigs have all been proactive partners. My friend and I are wanting to purchase 2 homes @ buckeye lake, clean up & repair for daily rentals. 1 house is lake side and is expensive but needs many repairs, the other is in the community surrounding the lake & also needs repairs. we plan to hire help to repair the properties prior to opening and placing on internet. we also need monyeys for utilities, furniture & website, etc. our plan is to create jobs for the community. bookkeeping, reception, utility companies, managers, yard cleaners, internet website consultants, etc. items purchased from local stores and make a little money to pass to our children, we both have the heart for it and know it will succeed with the initial capital. Thank-you, Kim Smith | Fairfield-Hocking Major Crimes Unit | 2 | 31 to 90 days | \$98,831.64 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Fairfield | Millicell North America | Build 100 new operations across the country that produce a low cost insulation material from waste glass for below grade applications. The product will lower energy demand in commercial and residential projects while also reducing construction costs and demand on our landfills. This technology has been used successfully in Europe for many years and is in high demand from the architectural and design communities that are focused on green construction and LEED certification. By funding this project we will lower energy demand, lower the carbon foot print of new construction, reduce demand on landfills, lower supply chain energy costs, and employ many direct associates AND many more indirect personnel. The business will deliver results in all 50 states, employ people in all 50 states, and will provide significant financial returns to the shareholders. Best of all, these manufacturing jobs can be exported. The product must be manufactured domestically, due to freight costs it can not be imported. The enterprises and jobs are here! | Millicell North America | 100 | 0 to 30 days | 4,500,000 |
| Fairfield | The Lighthouse, Inc. | Will hire 2 full-time employees and 1 part-time for management of domestic violence shelter | The Lighthouse, Inc. | 3 | 181 days or more | 75000.00 |

| Fayette | Central Ohio Logistics Center | Helping many People to get back to work. The Central Ohio Logistics Center(COLC) is a multi-modal facility for all transportation and logistics activity in Ohio and the greater mid-west. With immediate access to I-71, US 35 and I-47, COLC provides an ideal transportation solution to companies shipping commodities throughout the US and the world. COLC is part of a 2700 acre Ohio Jobs Ready Site at the heart of Ohio's agricultural industry. The construction of COLC at this site serves to enhance the appeal of the JRS Mega site allowing a quicker return on the already existing investment with site reclamation and improvements. Having already completed the first 1.7 million sq ft of construction, sewer and water lines, COLC is the perfect for the Stimulus Recovery program and a rapid start needed to stimulate our economy. The funds will be used for infrastructure, equipment and site development necessary for a large range of construction shipments and the employment of Ohio grains for domestic and world-wide shipment. The COLC would provide up to 1600 construction jobs and as many as 3,000 transportation related jobs to supplement a projected 12000 jobs possible through the Mega Site. | Fayette County Port Authority- Fayette Co. Commissi | 3000 | 31 to 90 days | \$65,000,000 |
| Fayette | Ohio Valley Logistics Center - SR 729 Relocation | Ready with utilities. Bordering the state's largest Jobs Ready site, an intermodal terminal is a logistics center in the Foreign Trade Zone in Jeffersonville. SR 729 must be re-routed to accommodate Project 1 and 1 of the built-out. Project 1 terminal is already completed and PC on the first phase of the project can begin within 30-90 days of funding. Ultimately, OVLCC will form a link to a 30 acre barge-to-rail facility on the Ohio River. This transportation corridor will provide OVLCC access to the Gulf Coast, Halifax and Prince Rupert ports, and the Far East, establishing Ohio as a logistics capital. Approximately 1,000 jobs can be created during construction with 75 permanent jobs projected at the facility, leveraging 3,000 transportation-related new jobs. Ultimately, the JRS should employ 12,000 Ohioans. The funding requested will aid in the necessary re-routing of SR 729. | Fayette County Commissioners | 12,075 | 31 to 90 days | \$26,000,000 |
| Fayette | 2009 Washington Court House WWP Improvements | OVLCC has received local participation including 20 acres of land for right-of-way access. The land represents a private contribution of \$783,000. Project provides for the expansion of the City of Washington Court House's WWP to eliminate by-passing during wet weather events. This project is required to comply with a Consent Order and to improve the condition of the WWP. Specifically, the project provides for expansion of the influent pump station and secondary treatment and distribution facilities to provide storage and treatment for wet weather derived flows. Increases and/or building included in this project are as follows: Influent Pump Station Expansion, Primary Treatment Building, Equalization Tank Repair, Aeration Tank modifications, Secondary Clarifier Expansion, UV Disinfection Facilities, Wet Weather Aeration Tanks (connected to main aeration), Rawer Building (master control and replace electrical power supply including emergency generator), Sludge Building (replace aged and corroding structures and equipment and thickening equipment for secondary sludge), and Sludge Dewatering & Storage Building (replace press for dewatering digested sludge). Work includes minor repairs to building superstructures, roofs and ventilations systems as necessary to comply with codes. | CH2M Hill | 40 | 91 to 180 days | \$20,000,000 |
| Fayette | Greenfield-Sabina Road Improvement | Upgrade and resurface major collector road in Fayette County | Fayette County | 10 | 0 to 30 days | \$1,020,000 |
| Fayette | Culpepper Area Waterline Improvements | Replace and expand waterlines in the existing Culpepper Area Water System | Fayette County | 10 | 31 to 90 days | \$1,000,000 |
| Fayette | Old US35 Road Improvement | Upgrade and resurface major collector road in Fayette County | Fayette County | 10 | 0 to 30 days | \$790,000 |
| Fayette | The Ohio Valley Logistics Center | The Ohio Valley Logistics Center (OVLCC) is a multi-modal hub for all transportation and logistics activity in Ohio and the greater mid-west. OVLCC is a job ready 2700 acre site in Jeffersonville, at the heart of Ohio's agricultural industry. With immediate access to I-71, US Route 35 and State Route 41, OVLCC provides an ideal transportation solution to organizations shipping commodities throughout the US. It is a designated foreign trade zone for manufacturing and distribution and can draw on area workforce for as many as 12,000 new jobs when the site is fully built. 3,000 transportation-related jobs will be created at the OVLCC. | Fayette County | 3,000 | 0 to 30 days | \$10,000,000 |
| Fayette | Jeffersonville Main Lift Station Replacement | Replacement of existing lift station pumps with 2-1,400 gpm pumps and 5,000 linear feet of 10-inch force main. Project will prevent sanitary sewer overflow for a 25-year storm and replace aging pumps installed in 1980. The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDD's mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDD's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, Individual Development Accounts (IDAs), microloans, technical assistance, and access to retail markets. As the only U.S. Small Business Administration microloaner and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDD addresses the needs of small business owners in the creation and expansion of microenterprises. ECDD's Microenterprise Loan Fund fills a gap in the credit industry by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDD is able to serve unbankable populations, including low-income individuals, those with little or no credit, or those precluded from paying interest because of religious beliefs. | ms consultants, inc. | 15 | 31 to 90 days | \$600,000 |
| Fayette | Microenterprise Development Program | Expand Apron The decline in the economy and job market in our area are threatening to cause the collapse of our nine hole golf course which has been a centerpiece of our community for 65 years. The facility accommodates two high school golf teams, one high school tennis team and numerous club organizations meet here. The loss of jobs at CHL, YUSA, TFC and the recent closing of Carter have hit our community very hard. The Washington Country Club, which is an IRS listed 501 C3 non-profit organization struggles to pay the utilities at our facility due to inadequate insulation, inefficient HVAC systems and windows and our desperately needs replacements. The jobs that would be created by this work are construction type which would impact a sector of the economy that is suffering as much as any. This would allow some small businesses to maintain their workforce or hire some additional to accomplish this on a short term frame. The work in question is easily identified and could be ready to start within a very short time period. Thank you. | Economic and Community Development Institute | 20 | 31 to 90 days | \$150,000 |

| Fayette | SR 753 Extension | Extend SR 753 from its current terminus at US22 approximately 2 miles to US 62. Project will increase safety and improve access to the Washington Industrial Park. FACILITY IMPROVEMENTS 1) Replace the existing foundation and floor framing at the side entrance to our museum. The existing foundation is severely deteriorated. 2) Create a new HC entrance. Our Museum is currently not HC accessible. 3) Install an underground downspout drainage system. We hope to address basement moisture problems. 4) Construct an ADA compliant ramp. Our new side entrance would be fully ADA compliant. 5) Moisture, health and safety problems shall be corrected in our carriage house. Animal installations, drainage issues and other concerns need to be addressed at our carriage house. 6) Installation of a basement dehumidification system in the basement of our Museum. This would help address our basement moisture concerns and help preserve our collection. | Fayette county | 1400 | 31 to 90 days | \$2,600,000 |
