| Montgomery | rehab | new painting in house, new windows, GFI's, new kitchen sink by don't get knocked down by wind any more general home repairs to save on energy costs, food and clothing for children, repairs made to leak in basement | Jeffery I. Willburn | 26 | 0 to 30 days | \$24,365 |
| Montgomery | Project club 3444 | Professional installation of 2400 square feet of insulation for home and 8 highly energy efficient windows Other avenues of support have been exhausted. Ohio House Bill would prevent insurance companies from denying coverage for autism, but in the meantime, families are either going unmet, proven treatment or going into bankruptcy to provide that loved one who has autism needed medical care and therapy. According to the CDC, 1 in 150 individuals are affected by autism and 1 in 68 boys. As many as 1.5 million Americans are affected. Autism is more common than childhood cancer, cerebral palsy, Down Syndrome, juvenile diabetes, or multiple sclerosis, yet receives less than 5% of research funding. Families receive little to no insurance coverage, many do not qualify for government assistance, and families are drowning in debt. Our family is one of them. Our program hopes to help the families who are in need by providing financial assistance for necessary medical treatment and therapy to individuals to make a difference in their lives and save the system in the long run from providing lifelong assistance. Thank you for your consideration. | Project club 3444 | 2 | 0 to 30 days | \$6,000 |
| Montgomery | Family Grant Program | | Autism Society of America-Dayton Chapter | 0 | 0 to 30 days | \$500,000 |
| Montgomery | Italian Ice Cart | Purchase and operate an Italian Ice Vending Company | WCOIR | 4 | 31 to 90 days | \$10,000 |
| Montgomery | instulate my attic and house | To cut down on my vesion bill. | homeowner | 0 | 31 to 90 days | \$25,000 |
| Montgomery | Debt Relief & Repairs | To pay off debt, & take care of home repairs that I can't afford. | Debt Relief & Repairs | 4 | 0 to 30 days | \$20,000 |
| Montgomery | New or Used SUV | I will be using this money to get a SUV to provide more room for my children and also have a means of getting back and forth to work. My husband works in the auto sector and he is unable to get to work. I want to get a SUV so I won't have to worry about a car ride just in case my husband or I lose our job. Please consider that this will help our family in a very big way. I appreciate you taking the time to read this proposal. | Arena Dodge | 0 | 0 to 30 days | \$15,000 |
| Montgomery | help me out please | I am needing help staying afloat. I had gastric bypass 4 yrs ago & had an extremely awfully rare complication I have no feeling below the waist. Due to this I can no longer work. I am an permanent disability I was fine with my bills before but now I am drowning. I can't pay all my bills a month & my parents are having to. They are coming up on retiring & I am becoming a burden. They won't let me declare bankruptcy but yet they would like to help me out now. I need help with bills me not such a burden to them. I have always provided for my being self sufficient & it is a burden for me to be like this. I promise you this money will not be squandered but will be used to pay off all my bills & give me a little cushion. This now administration says they are for the people so I again beg you for help. Thank you for your consideration. | self | 1 | 0 to 30 days | \$50,000 |
| Montgomery | Titlution | I am requesting this stimulus money for continuing education for my children. I am a single parent with (2) children who want to continue their education. This money will be used to pay for their college education and payroll loans. For whatever reason FASA has denied me the opportunity to receive Federal Direct Money. Therefore I am requesting from the State Of Ohio Stimulus money to further my children education. My daughter wants to pursue a career as a Veterinary Tech and my son wants to pursue a career as a Researcher. Due to the cost of Education and being a single parent I am not able to achieve their dreams without State and Federal help. With their dream being accomplished they will become productive citizens for Ohio. | Individual | 0 | 91 to 180 days | \$150,000 |
| Montgomery | Project Remodel | Apply insulation for energy efficiency and update kitchen and 2 bathrooms to bring home into 21st century. Property has been devalued by county and I need to be brought up to date. | Project Remodel | 4 | 31 to 90 days | \$52,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|-----------------------------------|----------------|--------------------|---------------------------|
| Montgomery | Residential Upgrades / Energy Conservation | new high efficiency air conditioner and 20% efficient energy saving gas valves at furnace (existing to 20% pay) new roof to reduce summer 'gains' and winter 'losses' (existing is 15+ yrs old) new driveway asphalt pavement (existing is breaking down due to age / base has detached to earth - original with 1983 construction) new energy saving, high efficient, tankless water heater (existing is 20 yr old gas up-right) | Powell Residence | 20 | 0 to 30 days | \$35,000 |
| Montgomery | solar power | Installation of solar power equipment to feed electricity to home, reducing the need for fossil fuels. | provid citizen | 1 | 91 to 180 days | \$20,000 |
| Montgomery | Re-Engineering Teachers for the 21st Century | Many teachers have not had training to integrate STEM (science, technology, engineering, and mathematics) skills into their K-12 curriculum. Development and in-district implementation of monthly staff development to train and support teachers in curriculum for 21st Century. A Train-the-Trainer model will be utilized with 10 staff members in total, one from each building, being trained that will then in-turn teach in their buildings on 2 classes per month. These staff members will also provide building support for as they implement new skills. Teachers will receive training, support and equipment to include STEM focus in any K-12 curriculum. Besides focusing on how any curriculum can support STEM skills for students, a 1:1 computing environment will be attained for in each of 10 buildings. Equipment includes 1 laptop cart at each grade level of various laptops, 1 laptop cart at each grade level of Apple iTouches, and supporting equipment such as headphones, science probes, robotic equipment, measurement tools, and others that would support hands-on interaction for students. | Huber Heights City Schools | 15 | 31 to 90 days | \$1,240,000 |
| Montgomery | BW Plaza | I've been trying to obtain bank financing for this project for the last 12 months, but with the current banking crisis I have had no luck in finding a bank interested in fully funding this endeavor. The project is food retail, specifically, pizza. There is a local family that owns 7 pizza stores that have been in business for almost 50 years. My plan is to buy these existing 7 stores and expand this pizza brand throughout Ohio and ultimately into surrounding states. My 3 year plan consists of expanding 28 stores into Columbus, Toledo, Springfield and the areas existing between these areas and Dayton, Ohio. Each store will employ 3 fulltime shift managers, 4 fulltime counter workers, and 12 parttime counter workers for a total of 17 employees per location. Additionally, I have 4 fulltime regional managers and 4 fulltime operational assistants in my headquarters. Each store is projected to generate about \$2,000,000 in annual sales while occupying rental space of about 8,000 sqft per location. With 28 stores in 3 years I will generate over 500 jobs and occupy over 200,000 sqft of rental space in Ohio. Within 5 years my plan has over 40 stores. | Self Employed | 502 | 91 to 180 days | \$30,000,000 |
| Montgomery | solar powered home | Renovate/realign greenhouse for our home. Install green energy jobs in Dayton area. | kurt-sally | 5 | 0 to 30 days | \$48,000 |
| Montgomery | Duct coil line | Renovate our current 11,000 sq. ft. factory home. Install automated coil line. We already have and paid for a computerized duct fitting line. This new coil line will be the other half of a complete fabrication shop. We will purchase this coil line from the Ohio company, providing even more jobs. With this coil line we will bring work into the state that is currently being done in VA, Virginia and elsewhere. The standard fabrications of our addition will be jobs from contractors that we will hire to renovate the building and install the equipment. We still only hire Ohio contractors in addition to our jobs from contractors. We will bring work into the state that is currently being done in VA, Virginia and elsewhere. We are located in a residential neighborhood that is in an area decline. We are a company that has been in the area for 20 years. We are a neighborhood, without this investment, the jobs will be lost and another 11,000 sq. ft. factory will be lost. We are becoming an additional bright to the city of Dayton and the east side neighborhood. With the new equipment we estimate we will have employees. The total jobs saved or new is 14, plus installation. | Meier Metal Fab | 14 | 0 to 30 days | \$350,000 |
| Montgomery | LEARN NEW CAREER | CONTINUED EDUCATION: TO BEGIN NEW CAREER IN HEALTH-CARE | home | 1 | 0 to 30 days | \$100,000 |
| Montgomery | Company Sustainability Relief | I was "downsized" in July 2008. I hold a BS and MS in Environmental Engineering. Rather than be beholden to the state, and recognizing my personal legal and moral obligations (other support, mortgage, surviving), I started MAKsolve, LLC. I have been able to stay afloat BUT, the economy is impacting my clients ability to pay me for my services. The banks will not give me a "line of credit." My home value tanked due to the greed of bankers, brokers, and all others associated with inflating home values. I needed a home after my divorce that was close to my children. | MAKSolve, LLC | 1 | 0 to 30 days | \$30,000 |
| Montgomery | Infant and Pre School Home Schooling Day Care Run | I take personal responsibility for all I do. I don't want to be beholden to the government as their credibility is currently suspect, their management and response to the current market place is unconscionable, and I personally feel that local, state and federal government is beholden to me and my particular situation. Having said that, the state of Ohio will receive significant stimulus dollars, I need consideration of this request so that I do not fall into arrears, default on child support, default on my mortgage and other financial obligations. You want my tax dollars, then provide me in-kind to provide intensive home schooling to my home. A project that I wish going to fund myself, but lost my savings for a 15,000 dollars in the recent stock market crash, so now this service will be lost. | Individual | 3 | 0 to 30 days | \$2,500 |
| Montgomery | Prototyping Future Engineers | Training to be done in school districts to teach and support K-12 staff on STEM skill integration into curriculum. Teachers will be trained to focus on needed skill sets for health and engineering. Focus will be on math and knowledge building at primary level, prototyping and procedures at elementary school, prototyping and inventors in any of all careers at middle school, authentic internships at the high school level. Videos, CDs, DVDs, and other materials will be supplied to staff members. On-going support through math and science clubs in the classroom will be provided to ensure success of training. Focus is to change knowledge base of teachers K-12 and to transform how they teach. | Integrated Schoolhouse | 20 | 91 to 180 days | \$500,000 |
| Montgomery | Henderson Home Energy | My home was built in 1973. We have not been able to upgrade to energy efficient windows, doors, insulation. I think this would help us and provide work for a few people. | Home Energy Upgrade | 50 | 31 to 90 days | \$25,000 |
| Montgomery | Drainage project to stop foundation erosion | Our yard is flooded several times a year by our neighbors yards. Each of us have small drainage systems which do not adequately move the water out of our yards or redirect the water properly. Unfortunately this is causing a shift in our foundation causing cracks in the outer bearing walls (2nd floor) and flooding in the basement. This back yard and patio has sunk in 8 inches (near the house). We would like to fix in all neighbors existing systems, add additional drainage lines and rework the yard by adding gravel and dirt so that no additional shifting takes place. We lost many trees in the September 2008 storm. Any help in getting this done will help us appreciate. | Fawn Willow property drainage | 0 | 31 to 90 days | \$10,000 |
| Montgomery | weatherize house eco friendly | Need to make my home energy efficient and eco friendly for my self and my room that is 79 years old. This will create jobs for all because I will need to talk to different companies for all the work from heating to insulation. That the money will be spent wisely and will go back into the city and help to create jobs. This is how the money should be used. | self | 10 | 91 to 180 days | \$50,000 |
| Montgomery | A good man in Need | I am a disabled vet, who is attempting to get on my feet. I live with my sister. My sister had to relocate to Ohio to help take care of the physically. She has since been let go from her job. She has no income coming in. I am trying to purchase a mobile home for my self and my 2 little boys, please help me. | Holden Foundation | 3 | 0 to 30 days | \$18,000 |
| Montgomery | Group Home Project | I am a single parent of 3 kids and I want to take a home that I have that had site of home improvement and work on, and make it into an adult group. The whole inside needs to be done and some of the outside. I would like to have the project up and running in six months time. I believe I can run a successful Adult Group Home if I have the funds to fix it up and to run it! This group home will help the mentally challenge have a place to stay. | Steve H. | 15 | 91 to 180 days | \$250,000 |
| Montgomery | Water and Sewer installation | Install sewer and water line into neighborhood currently not served. Residents (14 households), many of which are on fixed/limited income, have city wells which are poor yielding. Some residents have resorted to trucking in water to keep basic facilities working. Quality of water is unacceptable. Bringing in water/sewer would increase health of residents and correct existing facilities to improve water management. County is currently proposing a fee assessment project which will significantly strain many of the residents as some have lost their jobs (DM) or are facing other financial challenges. Project has been quoted (\$50,000) and is ready for project initiation assuming funding is available. Project is estimated to take <45 days once construction begins. If water/sewer was installed, residents the county will benefit as revenue will be continually generated through tap fees and wastewater fees. Partial funding is also an attractive option as it could be used to offset costs of the project. | Bigger Lane Community | 10 | 0 to 30 days | \$150,000 |
| Montgomery | Watkins Carpet Care | Start up of a new carpet cleaning company. This will initially create one job but will eventually grow to more. I have carpet cleaning experience and would like to start my own business. The money will be used for the start of the business (i.e. van, cleaning machine, supplies, etc.) | Watkins Carpet Care | 1 | 31 to 90 days | \$25,000 |
| Montgomery | Business | I am unemployed and would like to start a lawn care business. I would need all equipment and start up costs. Also repairs to my vehicle so I could get equipment. | Business | 4 | 91 to 180 days | \$100,000 |
| Montgomery | Jefferson Township Local Schools | We are willing to accept any available amount. Suggested Uses: \$10,000 to be used in each of the next five years to begin a Positive Publicity Program for the district. \$70,000 to be used to upgrade the technology in school buildings. \$150,000 to be used for salary of aides to help teachers with small group instruction. \$25,000 to Transportation department to repair buses. \$15,000 to each janitorial staff for supplies (\$30,000 total) \$15,000 to Elementary for new playground equipment that can be utilized in the Physical Education curriculum. \$40,000 in salary for the addition of a music teacher at the elementary. \$40,000 in salary for the addition of a ghed teacher at the elementary. \$20,000 to special education (\$10,000 in elementary and \$10,000 in Middle/High School) for updated materials. Remaining \$100,000 to be distributed on an as needed basis as teacher compensation, either per hour or on a salaried rate for an after-school tutoring program. This program will use Compass Learning to specifically target student weaknesses in an attempt to raise student achievement. | Jefferson Township Local Schools | 60 | 31 to 90 days | \$500,000 |
| Montgomery | Lawn Care for The Elderly | The project would provide lawn care services and property clean up services to the elderly and seniors on a fixed income who are physically unable to perform the work, at rates they can afford. This would allow many to remain in their homes and improve property values by maintaining yards and keeping them in compliance with local codes and ordinances. This would also reduce the burden on local municipalities by eliminating the need for them to assign crews to do the work, and their adding to the individual's tax bill. Money would be spent on equipment (trucks, mowers, trimmers, fuel, etc.) required to perform the above mentioned services which in turn would help to stimulate the economy. Startup would involve four new workers and could expand to as many as eight within 30-60 days. | Lawn Care Service for The Elderly | 4 | 0 to 30 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|----------------------------------|----------------|--------------------|---------------------------|
| Montgomery | Replacing windows with high energy efficient windo | To provide homeowners and commercial property owners with affordable high energy efficient windows and doors to reduce their monthly energy cost that would save them money. We provide some of the lowest cost windows installed in Ohio with energy efficient glass. The funding would allow more advertising to get the word out to property owners, which in turn would allow me to hire another 3 to 5 crews and another warehouse person. | BGT Holding Group LLC | 12 | 31 to 90 days | \$30,000 |
| Montgomery | Home Improvements | I feel that I should be eligible for home improvements and need to replace my roof to not sell my home at an under value amount. I have been very responsible and have paid all of my credit cards. I feel that I should have just so much an opportunity then those that have abused the system. I need to sell my house and make a profit during these tough times. | personal | 3 | 31 to 90 days | \$15,000 |
| Montgomery | Energy Conservation Project | Purchase and installation of a high efficiency (90%) natural gas furnace and air conditioner to replace a 45-year old legacy system now functioning at an approximate 50% efficiency level. The system will be purchased and installed from a local dealer in the Dayton area. Combined expected natural gas and electric cost savings on a yearly basis will be approximately \$791.00. | Frank H Convey Jr | 3 | 31 to 90 days | \$7,500 |
| Montgomery | Floor Restore & More Expansion | This request is being made to hire 2 new full time employees, each with a \$35,000.00 yr. salary and benefits. \$15,000.00 of the funding would be used to purchase a new piece of machinery for the company in the banking industry. The additional 15,000.00 would be used for operating capital. This proposal is being asked for the Dayton Ohio area which has been hit very hard with layoffs. | Floor Restore & More LLC | 2 | 0 to 30 days | \$100,000 |
| Montgomery | The Art Barn and Education Center | Thank you for your consideration To start an education facility to teach our community about the arts. This project would provide an art education for home-school children as well as children who lack art education in their school system. It would be open to who would most art in their life and community. It would be committed to teaching the community that art is a part of every aspect of our lives and can enrich and unify our community. It would be committed to interdisciplinary ideas. The idea that art can be a means to help in all areas of study. To begin this project we would need an operational piece of land, minimum 10 acres. We would need to build facilities for classes and administration to house not only at least 3000 square feet of interior space. The intention would be for the facility to be a LEED design http://www.usgbc.org/DisplayPage.aspx?CMSPageID=2223 building with natural ventilation, solar and wind power etc. This would further the enrichment of all who come to this place to study and learn. We would need teachers for classes and proper art equipment for the desired classes. The expected outcome would be a closer community held together by art. | Blue Planet Creations | 12 | 181 days or more | \$750,000 |
| Montgomery | Asset inventory protection project | We would like to increase inventory and hire additional employees in our firm. Our business has seen an increase of 60% since 2008. We plan on hiring another 4 to 6 employees across the State of Ohio and to advertise with local television and newspaper media outlets. | Phillip M. Herres company, LLC | 5 | 0 to 30 days | \$1,500,000 |
| Montgomery | My Home | I am in need of fixing my basement in my home! My husband lost his job at Dm and can not draw unemployment @ 10/17/09. We all exhausted all of our savings in caring for our 3 children and paying our bills! My basement has mold, leaks and cracks. The wind blows and the cold comes in as well as the rain. Everything we had just all gone. | My Home | 0 | 181 days or more | \$30,000 |
| Montgomery | start new lawn care business | We are in need of fixing it. We are borrow money from in-laws to be taken ends meet. We are at the end our road. Thank you to buy equipment and a business location for a start-up lawn care business to employ one or two people; eventually generating total income of \$100,000 to \$150,000. | Cutting Time Lawn Care Service | 2 | 31 to 90 days | \$35,000 |
| Montgomery | Freelance Researching/Writing for Environmental an | My business was created in 2008 with a long-term contract to research and write for the Conservation Department of Five Rivers MetroParks Dayton, OH. The building in which my business occurs requires improvements to attract and maintain additional clients. Approving the \$75,000 stimulus request will provide employment for a designer, employment for a general contracting firm and full-time employees for 1 year. I can permanently provide computer technical support for the manufacture and installation of computer and general office equipment. My expertise as an assistant and means for me to court additional contracts. My purpose is to create opportunities for businesses and organizations looking to improve the environment through habitat restoration, land acquisition, environmental education, or the development of green buildings. | Sole Proprietorship | 25 | 91 to 180 days | \$75,000 |
| Montgomery | Roof for Hille | Tear off existing roof singles (two layers) and install shingles (2,000sq ft est) | Homeowner | 4 | 91 to 180 days | \$8,000 |
| Montgomery | Female owned Manufacturing business in Dayton, OH | We have scow machines and CNC Lathes and Mills. We manufacture parts for various companies within our area. We have been in business for over 20 years. We have shored down significantly because of the economy. We are trying to keep our 46 full time people employed and sell some back. Without some help, I am worried we will have to close. Our employees are going to a four day work week next week March 2. I am concerned that without some assistance, I am not sure how we will continue to pay bills, etc. Last year our sales were triple than they were the past month. We were so positive that things were going to pick up significantly that last Summer we purchased CNC Lathes to remain competitive. | Rely-On Manufacturing, Inc | 8 | 0 to 30 days | \$100,000 |
| Montgomery | inspiration projects. | If we all work together we can bring Dayton back. The money will be used to maintain the shops, upgrade the machines and keep the employees working. We had to lay off three people so far. We would like to call them back. I do not want to lay any more people off and create any more hardships for them. We are trying to keep them out of the unemployment lines and keep jobs in Dayton, OH. I am sure we can rebuild. | Byesdgifts | 10 | 91 to 180 days | \$30,000 |
| Montgomery | Energy Audits for Home and Small Business | Conduct energy audits for home and small business in and around Montgomery County to help them save on energy costs and to reduce impact on the environment through by lessening energy production requirements. Eligible home owners will not pay for the energy audit, and small business will share the cost 50/50. Home owners and business that implement measure recommended by the audit become eligible for a rebate. | RIGA Group | 5 | 91 to 180 days | \$2,000,000 |
| Montgomery | home repair | Energy audits typically result in at least a 10-15% reduction in energy usage. Homeowners and business save money and use less energy year after year. They can put the money saved to work to help give the economy. A 10-15% reduction in energy production needs will have a positive impact on the environment. My home needs updated to make it safer for my four children. It is in need of some renovation some of the interior walls need replacement, water lines need replacement and also needs electric updated. | none | 0 | 31 to 90 days | \$25,000 |
| Montgomery | Club Critter Pet Resort | To expand our current business and provide all medical per care. It would be a 24/7 facility with appropriate staffing, therefore operating approximately 8-10 full and part-time positions. | Critters Plus | 10 | 0 to 30 days | \$150,000 |
| Montgomery | Huber Heights Environmental Economic Stimulus Proj | Replace current heating and air conditioning with a more energy efficient system. Also more attic and wall insulation to improve energy efficiency. The project would also replace the current asphalt driveway with a concrete driveway to reflect heat instead of absorbing heat to help make the environment cooler. All projects would help in the effort of slowing global warming and keep Ohioans working. | Schwartz Job Loss Prevention | 15 | 31 to 90 days | \$20,000 |
| Montgomery | Home Repair | replace existing siding with a more energy efficient system, and replace or repair old bricks | Self | 10 | 31 to 90 days | \$50,000 |
| Montgomery | Fiber Laser development for high tech, fuel cell & | Development and manufacture of state of the art fiber laser cutting & etching machine to manufacture parts in the high tech, fuel cell and medical industries. These machines are currently in the development stages and the grant would actually build a machine and market the services to keep work and jobs in Ohio. This work is currently being done by other methods. It will help lower medical costs by building less costly medical supplies. It will also help the fuel cell development by allowing manufacturing parts while making better quality products. This would also involve a laser welding machine to further manufacture these parts. Construction services would also be needed to build a clean room environment for this equipment along with remodeling of a building to accommodate this clean manufacturing area in a purchased building specifically for these state of the art projects. | Staub Laser Cutting | 40 | 31 to 90 days | \$800,000 |
| Montgomery | Engery Efficient Home Improvements | Home weatherization (complete home insulation: walls and attic) Energy Efficient Home Heating and Cooling system New Energy Efficient Doors Replaces of leaks in Basement Replace thermally inefficient flooring in rental property. | Personal | 10 | 31 to 90 days | \$25,000 |
| Montgomery | Rental and Home Upgrades | Replace outdated A/C unit in private home with new energy efficient model. | Homer Owner | 1 | 0 to 30 days | \$15,000 |
| Montgomery | home rentals | Purchase of apartment building for section 8 housing. | r & a rentals | 2 | 31 to 90 days | \$50,000 |
| Montgomery | Swimming Pool Construction and Repair | Advantage Pool Service, LTD has been building and repairing swimming pools since 1998 for waterparks, hotels, swim clubs, schools, and private residences within Ohio and nearby states. Several customers have not been paying for services and a planned budget collapsed because of the economic downturn. This has put the company at the brink of bankruptcy and caused the layoff of 10 employees. Stimulus funds would allow the company to payoff equipment purchases, rehire Ohio employees, and renew operation in Ohio and neighboring states. Swimming pools are a part of the state infrastructure that supports athletic competition, tourism, and entertainment activities. The stimulus funds will aid in the process of repairing and rehire employees to get full time, instead of part time to finish my bachelor's degree in Electrical Engineering in two years, be hired, and be in position to help build the future's alternative energy sources when President Obama's stimulus money kicks in for the alternative energy industry. | Advantage Pool Service, LTD | 10 | 0 to 30 days | \$64,000 |
| Montgomery | EET Degree | | | 1 | 0 to 30 days | \$40,000 |
| Montgomery | My home needs fixing up. Twenty thousand dollars s | I want to fix up with the interior and exterior. I hope you will consider this. | Personal | 5 | 0 to 30 days | \$20,000 |
| Montgomery | Barn Repair Or Replace | Have a Barn, used for implement storage, that was partially knocked down during the wind storm on September 14, 2008. Insurance would not cover it to repair or replace. Would like funds for demolition, clean up, and replace with new pole barn. | 4Ts Farms | 5 | 181 days or more | \$25,000 |
| Montgomery | wet feet | is flooding yard. 150 ft. drainage pipe rip out and repair basement walls | allen family | 4 | 31 to 90 days | \$5,000 |
| Montgomery | House Upgrade & Replacement | Tear off & replace roof. Upgrade electrical system in the house. | none | 6 | 0 to 30 days | \$6,000 |
| Montgomery | Heat Pump Request | I would like to request an upgrade for my very inefficient gas furnace. Our average cost to heat our home per month is 300+ and we keep our furnace on all 45 degrees all the time. It is very cold. We would like to put in a high efficient heat pump with a high efficient gas furnace as backup. We would also install our attic with these funds as well. | David Hendricks | 0 | 91 to 180 days | \$6,000 |
| Montgomery | saving my house | At my job I took a 45 percent pay cut and about to lose everything. with this money I can get caught up and be able to maintain and keep my house. Thank you for your time. | private | 1 | 0 to 30 days | \$25,000 |
| Montgomery | Building upgrades | Harry Hower use funds to upgrade furnaces, air units, water heaters, electrical, doors, windows and increase insulation. Remodel and reconfigure units for additional uses. | Gross Sales & Marketing Co. Inc. | 2 | 0 to 30 days | \$390,000 |
| Montgomery | Education Funding | I would a private fund of \$300,000.00 be made available for students with private education loans to refinance their loans to a fixed rate. These individuals are the life blood of the economy (they are the ones still spending and relaying money into local businesses). They are highly educated workers, typically employed in some technical position and are relatively well compensated. However, with a variable rate loan, the cost of their education could incur significant hardship. Currently, those who have financed their education with private, alternative loans are subjected to a variable rate which may go up significantly if economies projections are correct and the stimulus ends up shrinking the economy further. At this point, these individuals will incur additional hardship and may not be able to continue to provide help to the economy by spending. These individuals should be afforded a fixed rate refinancing option so that they can continue to help keep the economy afloat in these troubled times. | N/A | 0 | 0 to 30 days | \$300,000,000 |
| Montgomery | | I appreciate your consideration in this matter and hope that you will start to help those who are keeping our economy alive in these troubled times! | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Montgomery | Environmental & energy conservation | Replacement of home air conditioning system approximately 15-18 years of age to a more environmentally & energy efficient unit. As a citizen of the United States for the past 48 years of my life, I have happily and honestly paid taxes, lived within my financial means, given to social related organizations and have given 25% of my income to make the great country function. Through my taxes I have provided homes, food, clothing, education and medical care for people who for whatever reason can not or will not work or intend to provide for themselves. I have asked for help with student aid to help my 3 children through college, and have been denied. I have received no financial, medical, educational help from the government who has the ability to take my 25% of taxes each pay period. I come to ask you today to provide me part of the stimulus funds so I can replace the air conditioning unit in my home to a more energy efficient unit. Please consider my request which will provide stimulus back to the economy by employing contractors to install the unit, as well as to the company which has designed and manufactured the unit. Thank you, Lisa Barnes | Home management | 2 | 31 to 90 days | \$5,000 |
| Montgomery | fixing up my house | The project I am requesting money for is fixing up my house. I am an 87 year old lady with little means to help fix my house up I need books or siding to help keep it warm and I need a new drive way. The city engineer told me a white back to start to fix it up out the Presidents help how an tailor clothes going to be able to afford it. I hope you will grant me this assist so I can fix my house up. Thank you very much, Betty Howar | for my house | couple | 0 to 30 days | \$35,000 |
| Montgomery | EDUCATION EXPENSES | I WOULD LIKE TO ATTEND A GOOD COLLEGE IN REGARD TO GETTING A DEGREE. I WORK FULL TIME, AND FOR SOME REASON THEY BEEN TO THINK I HAVE ENOUGH MONEY TO PAY FOR MY SCHOOLING. HOWEVER, I MAKE \$400 A MONTH AND I HAVE NO OTHER WAY TO MAINTAIN MY JOB. I HAVE A SON TO PROVIDE FOR, AND I WOULD LIKE AN OPPORTUNITY TO BE ABLE TO PAY FOR SCHOOL. I NEED ONCE A MONTH, AND DUE TO FAMILY HEALTH REASONS, I HAD TO DROP OUT. I WOULD LIKE TO GO TO COLLEGE AND WOULD LIKE TO TAKE PART OF THE MONEY TO PAY OFF THAT LOAN, TO GET BACK ON TRACK, AND BE ABLE TO HANDLE THINGS. ALSO, I WOULD LIKE TO TAKE A PART OF THE MONEY FOR TRAVEL EXPENSES, SO THAT I CAN TRAVEL, AND BE ABLE TO MAKE IT TO WORK, AND SCHOOL. I DON'T KNOW EVERYONES CIRCUMSTANCES, BUT I DO KNOW THAT IT HAS BECOME A BIG STRUGGLE FOR ME. WHEN I HAVE GOT TALK PROBLEMS, AND DON'T HAVE ENOUGH MONEY TO GET THEM SOLVED, MY ONLY WAY OUT IS TO ASK FOR HELP THAT ARE ABLE TO HELP. BOTH MY PARENTS ARE ON DISABILITY STATUS, AND ARE TRYING TO MAKE IT THEMSELVES, THEREFORE I CANNOT GO TO THEM FOR HELP. ALL I AM ASKING FOR IS A CHANCE TO GET MY LIFE RIGHT, AND WITH THIS MONEY, I COULD HAVE THE TOOLS IN ORDER TO BUILD A FUTURE FOR ME, AS WELL AS MY SON. THANK YOU. | NEO CELLULAR CRICKET COMMUNICATIONS | 100 | 0 to 30 days | \$9,500 |
| Montgomery | Art pottery shop | Open a shop to sell art pottery and antiques. Already have my inventory in someone's shop would like to lease or own my own business. I am at the point of losing my business, a wig shop for cancer (chemotherapy patients and alopecia patients). My husband & I started this, our 2nd wig shop in 2007 not knowing things would get worse. I have almost exhausted our personal savings to keep the business going. People have told us they need us. We sell our wigs for below larger businesses and see that everyone gets what they want. I take a loss and sometimes have given a wig to people. I feel this is important. Other businesses have other ways of making income. Beauty shops, great prosthetics and one in my area owns 2 businesses in Georgia also. All I have are wigs I have a small web site with pictures of some of my customers and notes from them. I want so badly to hold on to my business. I don't care if I make a profit, just pay my lease, phone, computer, etc. and buy inventory. I have appointments 7 days a week and go wherever I am called. I make people happy and feel good about myself. I got the economy will pick up and I can make enough to just hold on but I don't know if I will be able. I need help or I will be another closed business in Dayton Ohio. I cannot afford to live any more so I Thank You | none | 5 | 31 to 90 days | \$42,000 |
| Montgomery | Business Survival | I would like to repair my basement, the foundation may need to be repaired. I also need to waterproof the basement so I can be finished. I have 15,000 dollars should have cost for the entire project. I would donate of myself, my wife and another person I would appreciate help with the finish. I would also have and outside company come in and waterproof. | Discreetly Yours Wigs | 3 | 31 to 90 days | \$10,000 |
| Montgomery | Basement repair | whole house tankless water heater, rewire house | ATK | 2 | 91 to 180 days | \$15,000 |
| Montgomery | lower my bills | 15 replacement windows, insulation | allen family | 3 | 0 to 30 days | \$7,500 |
| Montgomery | warm kids | Helpo, I'm currently an LPN and trying to work towards an Associate Degree in Nursing(RN). I really need help to be able to obtain the degree. The program is through Excelsior College based in New York, unfortunately, the program is not covered by my student loans and I need help paying for the tutoring classes. I need the outcome of this project to become a successful RN. | allen family | 3 | 0 to 30 days | \$7,500 |
| Montgomery | Getting Ahead In Life | I need help paying off student loans. I am a single mother, recent college graduate and employed full time. I am also an assistant at a local hospital. The struggling economy has made it difficult for me to find a position in my field of study and to family help. I have no way to leave the area. It's getting harder and harder to make ends meet when 60% of my income goes straight to student loans, child care and doctor bills. I was diagnosed with cancer in 2007 and no insurance. I would like to move out of my dad's house and make a real home for my child but trying to save enough money is very difficult. I am trying to do the right thing by working and going to school and getting this money to help pay my student loans would be beneficial. This money would help help my head above water and give me the chance to save enough money to move out of my dad's house. I'm not looking for a handout just a helping hand to get me started to believe in myself again. | Nursing | 5 | 0 to 30 days | \$6,000 |
| Montgomery | Helping Hand | Help me to believe that this stimulus is to truly help those who want to help themselves but are finding it difficult in these tough economic times. Funds would be used to hire additional personnel to expand wholesale business. Would also provide funds for buying products to support and expand product lines to improve product diversification to current markets as well as expand into new markets. Funds would also be used to expand warehouse space. | Some much needed help | 0 | 0 to 30 days | \$35,000 |
| Montgomery | Expand Wholesale Business | Idea presented for government feasibility task force. | Gross Sales & Marketing Co. Inc. | 15 | 31 to 90 days | \$5,000,000 |
| Montgomery | Gem City Casino (feasibility study) | 1) Check legal issues for a local/state government casino start-up. 2) Check Dayton's Acticle for refurbishing costs (tax sale coming soon I believe) 3) Review awareness program pro-casino. JOBS TAX INCOME etc. 4) Dayton is a perfect location for a casino - between Indianapolis, Cincinnati, Columbus and on I-75 5) Jobs created, hundreds (thousands) with construction workers, Pit crews, cooks, waitresses, bartenders, custodians, security, managers, parking attendants, plus other restaurants and others would boom in the area the casino creating even more jobs, demands for downtown housing, demands for grocery/other stores and other entertainment venues, etc. etc. etc. creating more citizens and tax base... and on and on. I know that Ohio is losing millions in tax revenue potential to neighboring states. Remember that the entertainment business including clubs and restaurants is a super industry and Dayton can be a Gem for our State! Thank you, Ric Mantia | concerned citizen | 1000 | 181 days or more | \$25,000 |
| Montgomery | Get Back On Me Feet | I've been out of work since 10-14-08. I've put in more applications these past couple months than I have since I was able to work. I signed up with countless temp services and I still find myself today with a job. My last job was making an estimated \$2,500 a month. My unemployment checks are \$377.00 and it's paid bi-weekly. I have 3 kids so I need to pay child support. My rent is \$550 a month. I got a Visa card that's nearly a \$1,000 DPL bill is \$250. Water is \$250. I'm asking for \$4,500.00 to get back on feet until more jobs become available in my area. I swear I won't do it until I need it! I promise to re-pay myself if one of those people who get a stimulus check can't use it on useless material things. I just want to get on a debt and be able to not worry when my power is going to get out or when my water's going to be out at. Please help me. Thank you | Get Back On Me Feet | 1 | 31 to 90 days | \$4,500 |
| Montgomery | Chronic Pediatric Dialysis Unit of Dayton | To establish a chronic Dialysis unit to serve the children and adolescent population of Montgomery, Clark, Green, Miami, Shelby, Mercer, Auglaize, Darke, Champaign, Logan counties, and northern areas of Butler, Warren and Clinton counties. Many of these patients, now need to attend facilities in Cincinnati or Columbus, with loss of time for families, transportation expenses now covered by the state, etc. | Dayton Children's | 6 | 91 to 180 days | \$500,000 |
| Montgomery | Geothermal Heating and Cooling | Will help establish a chronic Pediatric dialysis unit with acquisition of a cyclor for instruction and repudant management. | Citizens for Efficient Heating and Cooling | 3 | 0 to 30 days | \$25,000 |
| Montgomery | Caring For Loved Ones | The Dayton Children's Nephrology Department has now 2 physicians and a CNP, and use 3 ICU nurses trained on Dialysis, to provide acute services. This funds will expand the department, quality use funds, and provide services needed by our community. | The College Network | 3 | 0 to 30 days | \$5,000 |
| Montgomery | Reeducation | Converting home to geothermal heating and cooling for model home to inspire other home owners to convert as well. In requesting the stimulus package to help with higher education expenses, I work part-time as an LPN and bring my very hard-earned pay for some of my college expenses. My expected outcome come for this project, is to become a Registered Nurse, and hopefully have some of our of my college expenses paid. | Funds for attending Sinclair Community College | 1 | 181 days or more | \$40,300 |
| Montgomery | Condo energy efficient upgrades | This is a request for funds to continue my education. I'm a retired public safety officer (police/fire/ems department) who was forced to take a disability retirement due to an on or off duty injury. While working with Ohio Rehabilitation Services for reeducation, I was given a verbal consent to continue my education at Sinclair Community College in Aviation Technology (pilot option) and this offer was later taken back. I am applying for just the loan funds to complete the training which will be the year and a half program train to become a pilot to ensure the responsibilities of a pilot for the airlines, business aviation, or aviation education. | Marco Lane Condo Association | 2 | 31 to 90 days | \$7,500,000 |
| Montgomery | Greenhouse Gas- Air Emissions Testing from Industr | Also, would resurface parking lot. | Hilly Industrial Monitoring | 4 | 0 to 30 days | \$250,000 |
| Montgomery | PASSPORT Waiver - Assist our Seniors, Putting Peop | My Industrial Monitoring Services (a registered Ohio business entity) is a small/disadvantaged business engaged primarily in industrial air emissions monitoring to determine compliance with state and federal requirements for pollution limits. As part of expanded services related to anticipated "green" regulations, we aim to focus client services more on energy efficiency and greenhouse gas emissions regulations. | Alternatesolutions Home Care | 3000 | 31 to 90 days | \$20,000,000 |
| Montgomery | Housing Recovery | Increase reimbursement rates for the PASSPORT waiver (and/or other OH waivers) for better wages for home health aides, and funding for on-going training (This would be a requirement to providers for the increase - increase home health aide wages AND training.) In conjunction, charge the OAC the PASSPORT home health aide certification, in order that we can employ displaced workers who do not have home care background, but good work ethic and need to work. | N/A | 10 | 91 to 180 days | \$500,000 |
| Montgomery | home energy efficiency project | I would like to perform energy efficient renovations on our single dwelling home including basic home improvements. We would install energy efficient appliances, water saving bathroom fixtures, additional home insulation, solar panels for home energy use and an energy efficient heating and cooling system. | none | 0 | 0 to 30 days | \$60,000 |
| Montgomery | Helping Sara | I would like to request some type of assistance in purchasing my first home. I currently live in an apartment and would love to buy my first home in the city of Dayton in the Belmont area. I am working full time and help to take care of my sister and her family since her and her husband are both out of jobs. I have all of the qualifications except for my down payment. I made just enough for my month's rent but without any extras, the leaves me very little to save. I have always been a demolical and know that this money was designed to help that average american trying to make a better life, not that me and that I'm in the category I fall into. I would like to purchase a home that would be less expensive than living in an apartment. Any help at all would be so much appreciated!! | Helping Sara | 1 | 0 to 30 days | \$2,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Montgomery | medical intervention | Our daughter is in the process of being diagnosed with cerebral palsy. My husband and I both work, but are unable to afford the medical intervention and therapies required to allow our daughter to live a productive life. | none | 0 | 0 to 30 days | \$20,000 |
| Montgomery | the Hall Home Energy Savings Improvements | New windows, insulation, and possibly a new door for the Hall Home, 3 BR brick ranch. The bathroom is in need of updating also including a new water heater (replaced), but that can wait until windows are priority. | the Hall Home | 2 | 0 to 30 days | \$5,000 |
| Montgomery | Expand Business | Provide for education and support to bring 6 new employees into healthcare company. Would also expand business to allow for larger and new markets in health care. | Gross Sales & Marketing Co. Inc | 6 | 0 to 30 days | \$3,000,000 |
| Montgomery | Documentary Film | Independent documentary film of a historical theme. Intended to draw interest in the Dayton Ohio region. | Patterson Park Films | 5 | 31 to 90 days | \$30,000 |
| Montgomery | Relief Center | We would like to start a center for disaster relief. | Sulphur Grove United Methodist Church | 5 | 0 to 30 days | \$15,000 |
| Montgomery | debt recovery | We would like to set up a site to house persons during times of natural disaster and establish an ongoing center to help anyone in need during times of economic stress. | none | 0 | 0 to 30 days | \$50,000 |
| Montgomery | Keep my small business afloat | This money is intended to pay off debt. If we were able to eliminate our debt, we would be able to use additional income for home improvement projects therefore adding more to the economy. | MDM Trucking | 2 | 0 to 30 days | \$100,000 |
| Montgomery | save house | I am a small business owner in the transportation industry. With 2 trucks I had an automotive dedicated account. Due to that situation, the major plant that ran out of its financing and moving to Michigan. I will now have to run general freight that has lost a broad base. The volume of loads available is down and the rates to haul those loads are at an all time low. I am asking for stimulus money to pay off my equipment so I can at least complete and survive in these troubled times. Paying off the equipment will let me at least keep up with other obligations including my mortgage and keep two people working. | Whitnall local 82 | 1 | 0 to 30 days | \$5,000 |
| Montgomery | VA Disability Pension | save my house and make it safe for my kids. In October and November 2009, my VA disability pension of \$865.00 was withheld because of what the VA claimed was an overpayment. After much correspondence with the VA and sending letters, and verification of my hardship because of this, they denied my request for a waiver due to extreme hardship. All I would ask for is that the money be reinstated so I can live. I was evicted from my home of 18 yrs and have applied for public assistance, never having had to do that before. I now probably face bankruptcy because of this. I have also written to Sen Turner and Congressman Brown asking for help, but have gotten any. Also to (then) President Bush. I have also written to Mr. Obama and haven't gotten a reply. Can you help me? | N/A | 0 | 0 to 30 days | \$1,344 |
| Montgomery | save my home | I deny normal have been in my home for almost 32 years my father bought the house before I was born and I am trying to work with a foreclosure company but the bank has not said if I will keep my home. I have been working on and for the past two years please help me save our home so I can leave it to my son like my dad did me. My unironall says we might get an air force base project should be hiring soon to get me back to work but they have been saying the same thing. | foreclosure | 9 | 0 to 30 days | \$50,000 |
| Montgomery | CRNA assistance | Provide education and support to CRNAs to become CRNAs to work in Ohio after they receive their license. | Gross Sales & Marketing Co. Inc. | 5 | 91 to 180 days | \$1,500,000 |
| Montgomery | student bailout | Yes, I have a loan for a car college college that was not good for me I have a learning disability and they cancel my loan but took the money anyway, want to go to in a school I need job but want to work with kids one day need help and would like my portion of the stimulus. | myself | 0 | 0 to 30 days | \$4,000 |
| Montgomery | Need Help | I lost my home after my husband died. I am almost 60 years old, work over 50 hours week at jobs that don't pay much. Have no savings. My 17 year old during HSE and I have no money. I have too many bills to mention and my credit is in the toilet. Things are bad. I ask you have money for groceries and haven't bought a new piece of clothing in over 5 years. I just need help. \$2,000 would help greatly. more money would be appreciated. | Self | 1 | 0 to 30 days | \$2,000 |
| Montgomery | improvement | I worked for over 40 years in Ohio and feel I deserve something. | non-profit | 0 | 0 to 30 days | \$50,000 |
| Montgomery | single mother trying to make it | I can't keep my job but year is behind in my mortgage payment. I have been working for over twenty some years and need to have a home. Now I might be out on the street. I am single and unemployed. I need help please. | mother | 1 | 31 to 90 days | \$20,000 |
| Montgomery | Solar Roofing for House | I am a single mother who is a full time student and a full time worker struggling to make it. I am about to start my masters degree. I need to pursue my masters degree and I am asking for help with my two children, so I am asking for help in the form of a solar panel for my home for my family to live. | Self | 4 | 31 to 90 days | \$50,000 |
| Montgomery | Community Opportunity | Repair existing roof on house and add solar shingles. Insulate attic and add energy efficient windows. This project will allow us to capture the power of the sun to power our home. Insulation, doors and windows, along with solar shingles will make our home energy efficient. All this will reduce the amount of electricity that is delivered the traditional way and will be better for the environment and for now and many years to come. | Gross Sales & Marketing Co. Inc. | 4 | 91 to 180 days | \$1,900,000 |
| Montgomery | helpin hand | To expand existing business in order to provide special pricing for products to low income housing projects in Ohio focusing on certain areas that have been substantially hurt from the economic downturn such as Wilmington, Dayton and other communities. | SELF | 6 | 91 to 180 days | \$30,000 |
| Montgomery | new job | I'm total insolation in etc., to pay back real estate taxes and to be reminded to help take care of elderly mother in home so she doesn't have to go to nursing home. | dayton SELF recovery | 1 | 0 to 30 days | \$10,000 |
| Montgomery | Kleinfelders project | To remodel a house to live in. It need all flooring and some electrical work. Me and my family could live in it for the rest of my life. | kleinfelders lawn care & snow removal | 10 | 31 to 90 days | \$50,000 |
| Montgomery | Home Energy Improvements | Woman owned LLC lawn care and snow removal business, as business grows more employees will be needed. 3rd year in business, keeps growing every year. Not much overhead so rates are low. I expect my company to keep growing as I have over the past 3 years. I expect the stimulus will be very good, everybody needs lawn care and snow removal services. You don't have to have a college education to work in my business, just the will to work. Year round work, the number of employees can grow day by day. My business can offer male and female jobs. One of my goals is to offer my employees a day care service for their children free or very little money, so they have a piece of mind that their children are safe, fed and well cared for, while they are working. It is proven that if you have a plan in place for this, there is not much sick time used for employees with children. It's a win win for my business and my future employees. | Head of Johnson Household | 10 | 0 to 30 days | \$37,000 |
| Montgomery | My own salvation | Apply and improve portions of a 80-year old farm house for better use and conservation of energy. The project includes a) approximately \$20,000 for purchase and installation of new, energy-efficient windows and doors (three exterior doors and one 29 windows); b) approximately \$2,500 for awnings for all south- and west-facing windows (13 each); c) approximately \$12,000 for removal of old aluminum siding and purchase and installation of new vinyl siding, fascia, soffits and eave-trim; d) approximately \$1,500 for resatiation of additional wall insulation; and e) \$1,000 for repair of exterior chimney that serves as the furnace flue. This house serves as the home for my wife and me, our son (who is working and attending college) and his four-year-old son, and our daughter, who is also working and attending outlying arts school. | Mary S Hopkins | 1 | 0 to 30 days | \$25,000 |
| Montgomery | PROJECT.... PROMISES | I am a 55 year old widow just notified of foreclosure on my home. In 2002, my husband, age 40, passed away after an 8 week illness. Since he was not disabled and our son is grown, I am not eligible for IRS benefits until I am age 60. My widow's was also eliminated in 2004. Since that time, I have had 3 different jobs, all temporary employment. I am currently working part time and looking for work. I do not qualify for any benefits with the exception of some federal unemployment. I have been working with my mortgage company since November of 2008 and they sent me a 2 paragraph letter telling me that they will not modify my loan. I am clearly not a foreclosure or small business. I am a citizen and tax payer of this state and country and feel I deserve my fair share of the stimulus package. I could ask for a great deal more, but I am sure some people in situations harder than mine. Please give me a chance to keep my home. LIFE IS A SAFER, CLEANER LIFE AND HELP THEM RELAX AND CONCENTRATE ON SCHOOL. I HAVE A MODEST 3 BEDROOM BRICK HOUSE THAT NEEDS SEVERAL UPDATES. WATER PIPES WILL NEGLIGENT MONEY WOULD ALSO BE USED TO TURN THE GARAGE INTO LIVING SPACE WE HAVE NO ROOM.... ROOF NEEDS REPLACED THE MONEY WILL HELP ME FIX SEVERAL SMALL TO LARGE PROBLEMS...HOUSE NEEDS NEW UPPER CORNER BINDING AND SOFFETS MOST OF OUR INTERIOR DOORS DO NOT LOCK AND SOME WILL NOT SHUT WE ARE ALSO MISSING CLOSET DOORS ETC ETC PLEASE NOTE THAT WE WILL PROVIDE RECEIPTS FOR EACH AND EVERY IMPROVEMENT DONE AND THE FUNDS WILL ONLY BE USED TO FIX OR REPLACE NEEDS THINGS AND ANY MONEY LEFT OVER WOULD BE RETURNED TO THE STATE OF OHIO I AM THE ONLY ONE WORKING AND I AM IN CHAPTER 13 I USED THAT TO HELP KEEP MY HOUSE AND AFTER MY CHAPTER PAYMENT IS DEDUCTED FROM MY WEEKLY PAY I HAVE AROUND \$15 DOLLARS TO PAY ALL OTHER BILLS AND BUY FOOD I CANNOT GET THINGS FIXED AND PROVIDE THE BASICS TOO... PLEASE HELP THANKS FOR YOUR TIME GOOD BLESS SINCERELY | UPS | 0 | 31 to 90 days | \$8,000 |
| Montgomery | Spanish Trace Update Program | We need to update our community to ensure safety for the homeowners as the area has declined in the last few years. We need to create a gated community with enough iron fences around the property as well as wrought iron scrollable gates at both ends. This will increase the value as they have slipped due to poor economic times. We would also like to update common plumbing lines as well as common electrical lines. Also garages for cars that are now parked in carpools to stop break ins and auto theft. | Spanish Trace Homeowners Association | 20 | 31 to 90 days | \$310,000 |
| Montgomery | Section 8 Rehab's | Buy and rehab bare owned properties in the east Dayton area. Use the properties strictly for section 8 housing. There are currently several properties that I have looked at in the \$10,000 - \$15,000 price range that would make beautiful 3 or 4 bedroom homes for low income families. I would do most of the work myself, hiring carpet layers, plumbers, roofers etc if needed. I have rehabbed a dozen or so homes in the last few years and I am aware of the market, pitfalls etc. I could easily do 3 or maybe 4 homes with the money requested. | Section 8 Rehab's | 2 | 31 to 90 days | \$100,000 |
| Montgomery | Saving A-1 Fastener | A-1 Fastener, Inc is a North America fair two automotive supplier, providing own (original equipment mfg) products to all of the major automotive companies, foreign and domestic. The company was started here in Ohio several years ago and maintains all of its employees in Montgomery County. The funds requested are for continued operations and job retention. Thanks for listening Eric Ring, CEO | Industrial Holdings Group, Inc. | 10 | 0 to 30 days | \$350,000 |
| Montgomery | Just For You Laundromat, Inc. | To create jobs, by expanding our current operation in Dayton and surrounding areas. The coin laundry business is a fast growing industry, we provide a state of the art laundromat with integrated high technology. The Laundromat industry is a highly regulated industry with strict safety measures plus provide Dayton residents with a much needed service. | -JFY | 10 | 91 to 180 days | \$180,000 |
| Montgomery | Kilgore's Recycling | Recycling wasteful goods such as auto air conditioning, copper and steel etc. Basically when structures are being demolished or torn down as need | Kilgore's Recycling | 3 | 181 days or more | \$250,000 |
| Montgomery | Dayton Skywarn | Current system provides poor coverage for southern Montgomery County for severe weather reports from trained ham radio weather spotters. Safety issue. Equipment needed for severe weather season. | Dayton Skywarn | 1 | 31 to 90 days | \$30,000 |
| Montgomery | senior home improvement | Roofing/bath floor for senior who has a hard time getting in and out of tub. Three removal, side walk repair/patio about to fall in, up grade house so prior and one set person can get in and out of tub safely. | Grant for senior citizen and ssi recipient | 10 | 31 to 90 days | \$30,000 |
| Montgomery | Furnace | My house was built in 1944. I am still using the original furnace. It runs constantly and uses way too much gas. A more energy efficient furnace would save me money and help energy use overall. Apart from the fact I am a victim of predatory lending, I just don't make enough to replace the furnace and help myself or the environment. | None | 3 or more | 31 to 90 days | \$7,500 |
| Montgomery | Green Home Upgrades | Willing to make the following upgrades to primary residence: Remove old windows and replace with energy efficient. Have three in insulation (finished) three on exterior attic. Purchase rooftop solar panels to power home and sell excess if any, back to local power co. Replace 80% 10 SEER HVAC standing pilot system with 90% Plus 18 SEER HVAC Direct Ignition system. | HVAC Solutions | 11 | 31 to 90 days | \$40,000 |
| Montgomery | Community reinvestment through housing | Stock Remodeling would like to invest in the community through housing development. A portion of the units purchased will be converted to rent and the rest for resale. We would purchase foreclosed homes and condemned building in the Miamisburg, West Carrollton, Moraine, Kettering, Centerville, and Dayton areas in Montgomery county and reaching into Greene County. As properties are purchased we will expand our employee base, and be building a new office/warehouse for the management of these properties and a Remodeling showroom to maintain steady work for the new employee base. | Houck Remodeling | 50 | 31 to 90 days | \$2,500,000 |
| Montgomery | Community reinvestment through housing | Stock Remodeling would like to invest in the community through housing development. A portion of the units purchased will be converted to rent and the rest for resale. We would purchase foreclosed homes and condemned building in the Miamisburg, West Carrollton, Moraine, Kettering, Centerville, and Dayton areas in Montgomery county and reaching into Greene County. As properties are purchased we will expand our employee base, and be building a new office/warehouse for the management of these properties and a Remodeling showroom to maintain steady work for the new employee base. | Houck Remodeling | 50 | 31 to 90 days | \$2,500,000 |
| Montgomery | Joshua Zehnder education funding | Get a degree so I can obtain a better job and be more marketable in the work force. I don't make enough to pay for college and make to much to get a grant. I would use the money to pay for my first two years of Sinclair Community College and my final two years at another state funded college. | Myself | 1 | 91 to 180 days | \$20,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---------------------------------------|----------------|--------------------|---------------------------|
| Montgomery | The Load Reduction System (LRS) | The funds requested will allow the introduction of a new technology (LRS) for application to first the class-8 group of vehicles and eventually to all automotive applications. As the same replaces the technology reduces the loading effect of a vehicle thus reducing the energy required to operate that vehicle chassis and load configuration. The level of reduction is planned to be a minimum of 80%, but this allowing my company to offer the transportation industry as a load saving system at a level of 60% savings in the use of diesel fuel. The reduced energy configuration will increase fuel economy of present Class-8 tractor by a minimum of 60% improvement above present average of 5.5-6.0 mpg and will provide a minimum of 10.4 mpg average for a loaded vehicle. The 80% reduction reference is not an error and once you begin to understand the LRS technology you will begin to realize that 80% is well within the capability of the system to reduce energy requirements and improve fuel economy. History will record the introduction of this technology as the 'Greenest Technology' that has ever been developed. | Power Products, LTD | 500 | 0 to 30 days | \$5,000,000 |
| Montgomery | Jackson Township Road Paving | Rebuild and repave 3 miles of Township Roads | Kramer & Associates | 20 | 0 to 30 days | \$500,000 |
| Montgomery | Backflow Prevention and Water Meter Installation | This project consists of installing backflow preventers and water meters at approximately 50 services that are currently charge a flat rate. These locations were unmet when the water system was purchased by the City of Huber Heights. Backflow prevention is required to protect the water distribution system from siphoning or cross-contamination. Missing will allow the City to eliminate production losses and leakage in the water distribution system. Loss and leakage directly impact customer costs. | City of Huber Heights | 20 | 31 to 90 days | \$500,000 |
| Montgomery | Family Help | The accountants had demanded I have done my student hours of employment. My fiancée has lost all her time and also many regular hours from work. I'm turn have not been able to pay all of my debts due to small wages. I had no problem working or paying my debts before hand. This money would help to get my credit back on track, and also allow for my fiancée to go back to school. I am currently in nursing school but do not know if I will be able to finish due to lack of funds. Due to my credit I no longer qualify for alternative loans. This money would allow me to apply to better my job prospects which in turn would allow me to no longer need county assistance with healthcare and daycare expenses. I had my own home which I now have to rent out because I cannot afford the payments. My fiancée can not go back to school to better herself and get a job that pays more than 10.80 an hour. I myself am stuck because my federal student aid will run out in 30 more credit hours and I am unsure if I will be able to finish. I need to work to support my two daughter who are 3 and 2 years old and I also want to be a good role model and get them out of poverty. This is a goal of mine. | Individual | 1 | 0 to 30 days | \$50,000 |
| Montgomery | Home Improvement | My request is personal and not related to any business. Although I know that I will never benefit from this program I thought that I would at least try. I would like to be able to buy windows for my home and a new furnace which would probably cost around \$10,000. Although I appreciate the \$11,000 a week we will be getting in April, it really doesn't amount to much. Maybe I can spend that on gas. I plan if everyone received a set amount of funds and I mean a considerable amount to get out from under so that people can be ahead of their bills instead of a month or two behind, we would save a substantial amount. Right now I am a month behind on my house payment and car payment. I am trying the best I can but with health insurance going up we are now having to pay for it. Everything is going up except my pay. Like I said I know this is a futile attempt to try to get out of debt and I know I am the only one in this county but I thought I would try. Thank you. | Standard Die Supply | 0 | 0 to 30 days | \$10,000 |
| Montgomery | Replace roof and parking lot. | Approx 20,000 sq feet of roof and approx 7,000 sq feet of parking lot. The plan is going to be closed due to high cost of building repair. If these projects are completed with stimulus money the chance of using a highly skilled machine trade jobs will be greatly reduced as well as employing roofing and paving labor. | none | 7 | 31 to 90 days | \$100,000 |
| Montgomery | job creation | Build facilities and put unemployed auto workers back to building cars right here in the good old USA. Name the business USA Auto. Many unemployed due to GM, Delphi, etc, making record breaking profits for 2 years in a row, then filing bankruptcy after sending the workers to another country. This would put a lot of people back to work. Our county will never turn around until we get jobs and keep them here. | none | 2500 | 31 to 90 days | \$0 |
| Montgomery | Home Improvements | New Roof to replace highly damaged old roof. Replace entry doors with more energy friendly doors. Replace damaged insulation for more energy efficiency. Pay Off Debt other than home and vehicle loans. Both sources out of work, use to establish financial responsibilities until employment is gained. | Bruns | 6 | 31 to 90 days | \$40,000 |
| Montgomery | Multi-tenant family strengthening center | In the past 5 years, Goodwill Easter Seals has added 36%, or 207 jobs, to our workforce. In that same time, we have hired and trained 2,843 people, many of whom have severe disabilities, to get jobs. In order to continue our growth, we need a new facility. We have purchased and renovated a building in an area where it will contribute to neighborhood revitalization. The building will contain 10,000 sq. ft. LEEDS EA Energy Star for Buildings program, LEED certification. This facility will enable us to expand job placement and other services to our program families in the area, and to continue growing our services for people who have disabilities and/or are low income. We already house 1 other nonprofit of very low cost to them. In a new facility we will house at least 5 other nonprofits. Jobs created: 40. Free services provided: \$200K/year. Savings to other nonprofits: \$150K/year. | Goodwill Easter Seals Miami Valley | 40 | 91 to 180 days | \$5,000,000 |
| Montgomery | Delphi Automotive GM building redevelopment | Redevelop former GM / Delphi facility located on Needmore Road in Dayton. Building is 1,201,630 sq. ft. We would divide the building into several size buildings ranging from 20,000 sq ft to 100,000 sq ft. The 125 acres industrial park would have 50+ acres of park like green space. This would initially create jobs as construction would start again. | Staub Laser Cutting | 250 | 0 to 30 days | \$40,000,000 |
| Montgomery | Put people to Work | Open a new business in an area of decline. Area has declined in recent years, many closed businesses. Open a car dealership and provide new jobs and clean up the area. Adding a new business to the area should encourage others to invest in the area. | Becker Family Properties | 4 | 31 to 90 days | \$200,000 |
| Montgomery | Electrical Power Generation System | The funding requested is to develop a new 'Electrical Power Generation System' using a new technology (FEG) called the FreeRad Generator (FRG). Design objectives of the FreeRad Generator is to provide electrical energy at a significantly lower energy levels and cost of development. To accomplish the design intent requires applying a process that reduces the input driving force, required to operate the generator device. Operation of the FRG does not reduce the energy required by the generator to operate but it does change the way energy is applied to the generator to produce an output. The FRG provides the means of reducing the energy required to power the rotating elements used for generating electrical power resulting in significantly lower cost to operate electrical generating systems. A patented generator is mounted to secure the generator to a location and mount a motor device that applies force to create rotary motion at the shaft of the generator. One of the primary advantages to the construction of the FRG is in how the generator is physically mounted to allow limited motion of the housing. We will be able to meet community needs and revitalization of 12 homes in the Montgomery county area. The homes will be available for rent and/or sale to low to middle income families. This creates contractor's jobs and improves the neighborhoods by stabilization of some values. Provides opportunity for home to build and provides quality housing for families in a community where there is a high need for housing. Our company partnership is female and veteran owned, was established in 2006. | Power Products, LTD | 250 | 0 to 30 days | \$1,500,000 |
| Montgomery | Neighborhood Revitalization | Goodwill is already a green industry through our donated goods program which recycles/reuses millions of lbs of clothing & other household items that would otherwise go to landfills. However, many donated items cannot be sold in our stores, so we currently send 18 million lbs of trash to landfills each year. This volume of trash will continue to grow as our retail program grows. We will construct a facility to join our existing clearance center, textile recycling, and transportation center, add space & buy equipment to give us the ability to recycle/reuse materials from our trash. The facility will meet US EPA's Energy Star for Buildings standards and will reduce items going to local landfills, generate revenue to be used for our mission, & create new green jobs. Jobs created: 10. Pounds of trash diverted from landfill: 9 million lbs. 1st year, more in succeeding years. | Dogwood Property Investments, LLC | 14 | 0 to 30 days | \$491,250 |

| Montgomery | help my family | I was working two part time jobs to provide for my family of four until December 2008 when I was let go from one of them. Paying for mortgage and other bills have been a source of great stress which I try to replace the job loss. I have been applying several places and always get told that they aren't hiring at the moment. I am looking for some help since I'm overqualified for employment, food stamps and other programs that are meant to help me out. I need to get my debt to income paid down so if this ever happens to me again, I can survive easier. | don't have one | 1 | 0 to 30 days | \$10,000 |
| Montgomery | Energy home improvement's going green | Frienda gilson an disabled and recently got laid off work said they are not going to call me back. I ask my bank to work with me and they said no because I do not have a job. I am currently looking for a job but no one is hiring and my home is a really bad shape I would get people to work on repainting, heating and air conditioning. I am not in foreclosure yet but I do not need to be. My home can be job filled. I am requesting at least 10,000 to contract out to different companies to come in and put a new roof and siding on my house therefore keeping a hard working business running and those individuals that do the work a job. The stimulus request is to get back into the economy and the job market. Since that is what the whole purpose of this money is! | Energy Efficiency Housing | 6 | 31 to 90 days | \$60,000 |
| Montgomery | Housing Project | I have been the proper citizen of the U.S. Not having off other peoples sweat and hard work and my reward for that is I GET TO BAL OUT THE CURRENT GOVERNMENT OFFICIALS AND DEAD BEATS WHO DONT WANT TO SUPPORT THEMSELVES. Every year you raise my tax and you say we are going to get relief and the past 5 years my house payment have gone up hundreds of dollars a month AND IT IS A FIXED INTEREST RATE. So who is causing this. You the government. Well its time to pay something back. Since your making it impossible for me to put a new roof and siding on my home by raising my property tax 15% this year to pay for the stimulus. Or we can give it to corporate taxers who can waste it on a private jet or to your office to request billions so they can afford the gas to fly home and pay their bonus. We all see how that worked. We can give it to corporate taxers who can waste it on a private jet or to your office to request billions so they can afford the gas to fly home and pay their bonus. We all see how that worked. We can give it to corporate taxers who can waste it on a private jet or to your office to request billions so they can afford the gas to fly home and pay their bonus. We all see how that worked. | American for Amerians | 6 | 0 to 30 days | \$10,000 |
| Montgomery | Mediation | Instead of years it can take for a case to filter through the courts, mediation generally takes only a few meetings to complete. Once mediation is requested, a list of potential participants and their addresses suggested steps the participants should take to prepare for mediation. Ground rules are set and the conference is productive. Once an agreement is reached, the mediator makes sure that it is in writing, signed, and made available to all participants. | Harmony Mediation and Consulting, LLC | 5 | 0 to 30 days | \$150,000 |
| Montgomery | Continuing Education | If an agreement is not reached, the case is closed, all parties are advised of the outcome, and all remain free to pursue other legal actions. Mediation does not favor one side or the other, but helps both consider their situation. The main idea is to provide a low-cost alternative to expensive, lengthy litigation or bankruptcy. | Profitable Glass Solutions Ltd. | 3 | 0 to 30 days | \$150,000 |
| Montgomery | first time home | My company services artists entering the automotive glass replacement industry including automotive dealerships and repair facilities. Automotive glass is a survival alone industry and is suffering erosion due to changes in consumer behavior. I am assisting companies providing complementary automotive services into entering the glass replacement and repair industry. I plan to leverage my 20 years of automotive glass experience by developing artists, both print and online, for my clients to utilize. In addition, I plan to provide my services to provide to the business plan. Further benefit includes providing an additional revenue stream for automotive dealerships allowing them to provide for their employees. | The Berry Co. | 10 | 0 to 30 days | \$64,000 |
| Montgomery | Homestead | I am requesting a part of the government stimulus, as a first time home buyer. There are plenty of homes that range from 64,000 - 104,000 that are ready to be bought. They are employ numerous businesses and contractors for their services. I am requesting aid from the stimulus grant because I have in an apartment with other tenants that aren't really people persons, the complex is infested with bugs. I have a 4 month old son and was born 3 months early, had been home for 10 months before he had to go back to the hospital. I really would like to come home to a clean home rather than an apartment that may contribute to him getting sick again since he does have a weak tv. I am currently am trying to get financed for a home, but would love to be an outright owner, so that some the past issues with mortgages will be bypassed. stimulus this opportunity. | Crisler | 1 | 0 to 30 days | \$50,000 |

| Montgomery | Home Healthy Improvements | Health abatement and treatment of mold and sewage backflow in basement, and required drainage upgrades to include yard, gutters, sewer and sump lines. Major repairs completed through City Loan Program, which disqualifies us to get any further home improvement loans to make home a healthy habitable environment. Everyone in household suffers from asthma as result of this living condition. Estimated house value \$90,000.00 Estimated loan \$75,000.00 Thank you. | none | 20 | 0 to 30 days | \$15,000 |
| Montgomery | Job creation/retention and expansion funding. | HP&S is requesting working capital to retain 7 existing jobs and create 2-3 new jobs in the Dayton, Ohio area. Because of the changes in credit markets, access to credit has dried-up for our company. We have Medicaid provider agreements in 6 states (CO, IL, IN, MI, OH, WA), and rely on Medicaid reimbursement to generate revenue. Sometimes I can take states (Illinois specifically) month by month. Because of the credit markets, a small company like Home Products cannot carry those costs without working capital. HP&S does not want a handout, but simply help keeping a viable business growing, generating, employment and wage revenue. Home Products' revenue increased 120% from Feb 2006 through YE 2007. However, we haven't been able to grow at this rate because of a lack of access to working capital. | Home Products for Seniors, Inc. | 9 | 0 to 30 days | \$200,000 |
| Montgomery | The Jackie Wilson Project | We have the formula, we just need a partner to help implement it. effort payment for rent and utilities for one year while I take classes for medical billing and transcription and I will maintain a cad of members enabling me to obtain a job in the growing field of medicine which I can also get a certificate in. Resources hence the intervention of Jacqueline Wilson | The Jackie Wilson Project | 1 | 91 to 180 days | \$12,175 |
| Montgomery | Store Expansion in Multiple Counties | Full additional employment opportunities in multiple counties in Ohio will also add additional jobs. Resources hence the intervention of Jacqueline Wilson | Airone Wireless Inc | 16 | 31 to 90 days | \$50,000 |
| Montgomery | State Licensure for Nursing | I am a student at an accredited, respected, Christian college in my community. I am working toward licensure as a registered nurse. I have already exhausted all other avenues in regards to funding and have been denied. I was approved for assistance through the WVA program in Franklin Co., Ohio at which time I completed the CTN program and then immediately became employed as an OTWA. Now, I have received the stafford loans available at the undergraduate level, and now the WVA (workforce investment act) program has denied to give me any further assistance. I am a good student. I know I have been called to serve as a Nurse. With the change of nursing professionals in this country I feel justified in asking for the remaining funds to obtain this goal. Nurses save our citizens in a very private, and personal manner. This is a manner in which I know I can serve, and will serve until I retire. Thank you for your time and consideration. | Kettering College of Medical Arts | 1 | 91 to 180 days | \$15,000 |
| Montgomery | K&G Bike Center new locations | Open a new location and purchase an existing location that is thinking of closing because of health reasons. We would expand the existing location and open a new location for new and used bike sales service, rentals and accessories sales. We have 3 locations with 18 employees and 35 years experience. We feel that we could employ up to 12 unemployed people within a very short time period of 30 days or less. | K&G Bike Center | 10 | 0 to 30 days | \$450,000 |
| Montgomery | new laundry | open two new laundry stores in ohio create jobs for equipment manufacturing, construction, hvac and repair and have 30 employees. | timesaver laundry ll,c | 6 | 31 to 90 days | \$600,000 |
| Montgomery | Major Repair Project (MRP) | Pool repairs to be compliant with Federal Statute, curb & sidewalk repairs, overhang and siding replacement that is badly damaged, replacement of caprots that are damaged, retaining walls replaced, parking lots repaired, security system, removal of dead trees and shrubery. | SVTCA | 7 | 31 to 90 days | \$351,000 |
| Montgomery | myers | I'm a home owner and I have lost the value of my home. Because of predatory lending, my home is not worth what the bank loaned me on my loan. The county has now revalued the home in a way that is worth less than what I owe. The value is around \$880,000 and I owe \$970,000 on my first mortgage and \$980,000 on the second mortgage. I need help to save my home, and so keep. From losing my home, I have had medical bills and just had to bail out my home. I have work to do but my home is my children's school. I have never ask for a hand out in my life. I have always just put up my boots and work harder. But now I can't, so I'm asking for help, to keep my house and keep one more house off the list of people losing their homes. I want it 0% to the bankruptcy. But I just couldn't do it. I would take on a second job this time but my health is not what it was and No one is helping a 57 yr's man. I am retired, live alone and my gas furnace is 30+ years old. I would like a new energy efficient gas furnace. Being on Social Security, I cannot afford to put one in on my own, but want to do so to get help on taxes. | myers house hold | 0 | 91 to 180 days | \$18,900 |
| Montgomery | New furnace for Pauline Hall | I am retired, live alone and my gas furnace is 30+ years old. I would like a new energy efficient gas furnace. Being on Social Security, I cannot afford to put one in on my own, but want to do so to get help on taxes. | Retired Pauline Hall | 2 | 0 to 30 days | \$3,000 |
| Montgomery | Security Stabilization | Reinforcement of retirement funds for retirees in their 70s and college educational funds for identified likely prospective students. | Family Stability Organization | 4 | 0 to 30 days | \$150,000 |
| Montgomery | house fixing | repair/replace roof, replace 450 sq ft driveway, repair cracked foundation, relavel grounds, paint/retake exterior house | home owner | 1 | 0 to 30 days | \$14,000 |
| Montgomery | More Education | Need to return to school as to obtain a degree. My husband is currently laid off and we need to support our family. To do that I need to return to school. | Personel | 1 | 31 to 90 days | \$25,000 |
| Montgomery | Van for new job | Just lost my job. I have a new one, but I must furnish my own work van. It needs to be in good shape, like a newer one would be. I just need a thing to get back on my feet. This would help me tremendously. There are lots of opportunities, but I need a van. I'm a small business owner and I have lost the value of my home. Because of predatory lending, my home is not worth what the bank loaned me on my loan. The county has now revalued the home in a way that is worth less than what I owe. The value is around \$880,000 and I owe \$970,000 on my first mortgage and \$980,000 on the second mortgage. I need help to save my home, and so keep. From losing my home, I have had medical bills and just had to bail out my home. I have work to do but my home is my children's school. I have never ask for a hand out in my life. | Montgomery | FARMHOUSE QUILTING AND CREATIONS | I hope to one day soon have the need for a part-time person to assist with the work. Eventually I hope the work will be so great that others will be needed to assist. The money I am requesting will assist in starting the business. The \$25,000 will fund the cost of the long arm machine and attachments needed for the business. Since the business is home based the structure is in place to house the equipment. I have 10 years of quilting experience and know that there is a market for this service in my area. Opening this business will provide a job for me and fill a need for services in our area. | FARMHOUSE QUILTING AND CREATIONS | 2 | 31 to 90 days | \$25,000 |
| Montgomery | project stay in business | I am a small business owner and our work truck blew its engine and it's not paid off yet. We need funds to buy a reliable work truck so we may stay in business. The economy has us on bankruptcy door but year with all the wild games we have enough work for several years from the storms alone, however our work trucks engine blew which of course is hindering us from getting to the job sites. The CEM Project's mission is to provide a holistic, comprehensive approach to the physical, spiritual, mental, emotional, social, and economic needs of children, youth and their families emphasizing traditional values, excellence, non-violence, drug freedom, and productive citizenship. The CEM Project will provide opportunities for creativity, academic completion, job training, employment, and higher education for 50 at-risk middle-high school students of Trotwood-Madison Schools in an after-school classroom setting located on the Trotwood school campus for 42 weeks. We project 40 students will be placed in the work experience component ending in August 2010. Of those graduating from high school, it is expected that 80% will either gain employment or enroll in a post-secondary educational institution after 1 month of actively completing the program. The CEM Project is a unique collaboration of the city of Trotwood, Trotwood-Madison Schools, United Theological Seminary, Wright Sr. Div., YMCA, Cabela/Waltons, United Health Services, Miami Valley Youth Career Services, Hope, Inc., Friendship Village Retirement Community, and Residence in Praise Fine Arts Center. I am asking the report can be in the format that would be compliant with Florida rules, Florida rules, FPA standards and have multiple intended users by the appraisal report user and/or may change. The report would be available for all valid users. In many cases, during these times, appraisal report expense and requirements are exhaustive and expensive with the use of a user's appraisal management company, and in many cases multiple reports are generated for the same property for different users. In many cases, the expense slows down or stops the process of making decisions. This provides an independent source to obtaining a report and results in potential cost savings. This may not any one party is in control of the report or it's exclusive right to use the report. Many people would not order the report because of the expense and put off critical decisions. Above estimates assumes a one year period and 12,000 reports. | Capital C Roofing Inc | 7 | 0 to 30 days | \$25,000 |

The CEM Project will provide opportunities for creativity, academic completion, job training, employment, and higher education for 50 at-risk middle-high school students of Trotwood-Madison Schools in an after-school classroom setting located on the Trotwood school campus for 42 weeks. We project 40 students will be placed in the work experience component ending in August 2010. Of those graduating from high school, it is expected that 80% will either gain employment or enroll in a post-secondary educational institution after 1 month of actively completing the program. The CEM Project is a unique collaboration of the city of Trotwood, Trotwood-Madison Schools, United Theological Seminary, Wright Sr. Div., YMCA, Cabela/Waltons, United Health Services, Miami Valley Youth Career Services, Hope, Inc., Friendship Village Retirement Community, and Residence in Praise Fine Arts Center. I am asking the report can be in the format that would be compliant with Florida rules, Florida rules, FPA standards and have multiple intended users by the appraisal report user and/or may change. The report would be available for all valid users. In many cases, during these times, appraisal report expense and requirements are exhaustive and expensive with the use of a user's appraisal management company, and in many cases multiple reports are generated for the same property for different users. In many cases, the expense slows down or stops the process of making decisions. This provides an independent source to obtaining a report and results in potential cost savings. This may not any one party is in control of the report or it's exclusive right to use the report. Many people would not order the report because of the expense and put off critical decisions. Above estimates assumes a one year period and 12,000 reports. | Appraisal Network | 100 | 0 to 30 days | \$4,200,000 |
| Montgomery | Teacher Licensing | I have been licensed by the State of Ohio to teach Pre-K through 3rd grades. At that time, I was given 10 years to complete a masters degree or I would not be allowed to renew my license. Being a teacher, I am paid slightly below the average worker in the United States. Attending higher education classes has been very difficult for me due to my financial aid. Therefore, all costs would be out of pocket. I feel I am eligible for grant money to allow me to attend college while balancing my work and family life. By obtaining my masters degree, I would be able to more effectively manage my classes and provide innovative ideas to my school. This will enhance the quality of my teachings and provide a better education for the youth of our country. Transition my home to accommodate daughter who is diagnosed with multiple sclerosis. The house needs to be modified to accommodate her physical disabilities. | St. Peter Church | 1 | 31 to 90 days | \$25,000 |
| Montgomery | Live Independently Safely | Transition my home to accommodate daughter who is diagnosed with multiple sclerosis. The house needs to be modified to accommodate her physical disabilities. | Enable The Physically Disabled - Independent Livin | 100 | 181 days or more | \$50,000 |

| Montgomery | Energy Efficient Renovations | As the housing market has slightly deteriorated, I am looking to improve my residence for two reasons. First, to provide energy efficiency and cost savings for me. Second to entice potential buyers to purchase my home when the time comes for my family to sell and move to a larger home. The list of improvements include, but are not limited to: replacement windows, added insulation in the outside wall (currently non-insulated), energy efficient tankless water heater or solar water heater, and energy efficient furnace and air conditioner. These items will help me to reduce the amount of electricity and gas I utilize to heat and cool my house built in the 1950s. This will help to keep jobs producing more funds for these fields in a time where some people are struggling to simply pay their mortgage. Regents Associates provides career services and is interested in expanding into Ohio to assist and train disabled workers, with Resume creation, Job Search techniques, Computer skills for job seekers, Salary Negotiations, and Networking skills | Homeowner | 5 | 0 to 30 days | \$25,000 |

| Montgomery | Community Family Counseling through the Arts | A group counseling project that addresses the need for under develop families in the area of social skills, as well as career development. Provide instruction for the family to become productive in society. Develop individual employment plans, goal setting strategies, as well as networking skills. This project will also provide counseling for families where their children are facing truancy, teenage pregnancies, drugs, violent crimes, as well as provide prevention strategies in these areas. We want to see these areas decrease in participation as our youth become more productive citizens. With the enhancing of career opportunities for wage earners in the family, and the educational upgrade for the formative youth in the family as well as a different outlook for our community. These methods will provide a way for the family and the individual to learn to achieve their goals. enhance moral ethical fibers in our society, and raise the success levels needed for the today generation. Such a project may not succeed without the holistic support of government along with our community. These efforts together support the need for both family, and community. | Residence-In- Praise-Fine Arts Center | 15 | 0 to 30 days | \$1,200,000 |
| Montgomery | Retention of Jobs | Retain 4 and create 1 job position by restructuring business programs to either retain or attract new clients. This is a children care center with a diverse population that has been affected by loss of children mainly due to economic lays in the area, especially General Motors. Also, create a lifetime caregiver position who will be assigned to one child, a seriously handicapped child, mentally and physically who needs one-to-one care at all times for him to function. The money will be used to retain these jobs at their same salaries and benefits until the programs are fiscally stable enough to support these positions. Without help these positions will be eliminated by the end of May 2009 and section of the center closed. Also, the child in question will have to leave the center since we can no longer provide for his needs out of our own treasuries as we have done for the past 17 years. Thank you. | Gradle to Crayons. LLC | 5 | 31 to 90 days | \$150,000 |
| Montgomery | CHILD SUPPORT RECOVERY | HAVE HAD TO REFINANCE MY HOME IN ORDER TO TAKE IN MY DAUGHTER AND HER TWO CHILDREN. THE STATE AND COUNTY (MONTGOMERY) HAS FAILED IN THEIR RESPONSIBILITIES ENFORCING CHILD SUPPORT. HER EX HUSBAND HAS FOR YEARS BEAT THE SYSTEM AND REFUSED TO PAY CHILD SUPPORT. HE IS IN THE REARS FOR THOUSANDS OF DOLLARS. ALL OF WHICH I HAVE TO PICK UP AND MORE. THEREFORE, IN LIEU OF PUTTING THEM ON THE STREET, I TOOK THEM IN. I PROVIDE THEM FOOD, SHELTER AND HELP WITH THE CHILDREN'S MEDICAL BILLS AS WELL. THE MEDICAL BILLS CONTINUE TO CLIMB AND I CAN NO LONGER PROVIDE MY DAUGHTER HELP IN MATTER. I WOULD BE AT RISK OF LOSING MY HOME IF I TOOK ON ANOTHER MORTGAGE. THE ONLY WAY I COULD QUALIFY FOR ONE THEREFORE, IN LIEU OF GIVING CEBS BILLIONS FOR THEIR FAILED LEADERSHIP, IN WHICH THE BILLS WILL END UP IN THEIR PRIVATE BANK ACCOUNTS-- I REQUEST YOU SUPPORT ME AND MY EFFORT TO SURVIVE. ANYONE WHO RECEIVED WOULD GO DIRECTLY BACK INTO THE ECONOMY AND NOT IN MY PRIVATE BANK ACCOUNT. THANK YOU I am in need for being experienced and well trained in the field of child support recovery. I have a Bachelor's degree in Business Administration and Multitask certifications through Sinclair Community College. I have my Mother who has medical disabilities living with me and I am in need of care for her as well. I am having a hard time finding viable work to help with these needed situations as the stress has caused me to be unable to maintain a job on heart medication such as Xarelto and Lisinopril. | RETIREED VETERAN | 0 | 0 to 30 days | \$100,000 |

| Montgomery | Energy Improvement of Fuel Cells with Thermoelctr | During operation both PEM and SOFC fuel cells generate excess heat or energy that is wasted into the environment. This project will significantly lower the overall energy efficiency of the fuel cell system. This project will employ thermoelectric materials/devices that will convert the waste heat given off by the fuel cells and convert it to electricity. Thermoelectrics have no moving parts, no need for converting fuel cells waste heat directly into electricity. By combining or "cascading" fuel cells with thermoelectrics, it will be possible to significantly increase the overall fuel efficiency of the advanced energy system (fuel cell + thermoelectrics) while also reducing the overall system cost. This project will position Ohio as a leader in advanced energy conversion systems/fuel cells, and assist an Ohio based fuel cell company in expanding their product line with the most fuel efficient fuel cell product in the marketplace. | University of Dayton Research Institute | 10 | 0 to 30 days | \$500,000 |
| Montgomery | Deconstruction Dayton | Deconstruction of existing high-rise structures within Dayton, Ohio. Request for heavy equipment to facilitate the deconstruction process. Expectations are to employ two crews of five each for selectively deconstructing structures instead of demolishing structures and piling them into landfills, our goal is to reuse or resell the lumber, architectural salvage and other items of interest. | Architectural Reclamation Company | 10 | 31 to 90 days | \$74,535 |
| Montgomery | Wilmington Pike Resurfacing - East David Road to S | Resurfacing of Wilmington Pike between East David Road and the south corporation line at Brown Road. Improvements include a 3" mill of the existing pavement, repairs to the underlying concrete road base, and a new 3" asphalt overlay with a non-woven fiberglass/polyester interlayer mat placed between the two asphalt courses to help prevent reflective cracking. | City of Kettering | 47 | 181 days or more | \$990,000 |
| Montgomery | Disability | Please reserve money and appoint someone to review my claim for disability that was filed in 2003. As of 3/20/2008, no decision has been made, responded to each "question" requested so that the claim could go through. I feel that I have been waiting for a long time. My daughter has been helping with my daily living. With job losses, the economy, this has put a strain on my family as well as my daughter's family. Please contact me immediately. Thank you. | Disable | 0 | 0 to 30 days | \$2,000 |

| Montgomery | East Stroop Road Resurfacing - Far Hills to Shroye | This project will resurface East Stroop Road from Far Hills Avenue to Shroyer Road. Improvements include a 3" mill of the existing pavement, repairs to the underlying concrete road base, curb, and concrete medians, and a new 3" asphalt overlay with a non-woven fiberglass/polyester interlayer mat placed between the two asphalt courses to help prevent reflective cracking. | City of Kettering | 5 | 91 to 180 days | \$100,000 |
| Montgomery | Duct Cleaning | Allergens and other matter collect in air ducts. Over time the amount of allergens accumulates and releases further contamination from moisture and other environmental factors. When air is circulated through the ducts, the contaminants are distributed throughout the local environment causing health issues. It is important to clean these ducts periodically to: (1) aid those recovering from Bronchitis, (2) Reduce Bacteria, (3) reduce medical expenses, (4) reduce workdays and education absenteeism. As the vacant households left from the banking failure are occupied it will be imperative for each of these households to have the ducts cleaned to remove dust, mold, and other large materials (road nails, etc.) that can cause health issues. The funds requested are to be used in advertising and health awareness so that individuals become educated about this valuable service. | IncMe, Inc. dba GrimeBusters | 2 | 0 to 30 days | \$22,000 |
| Montgomery | Solar Panels | Would like to put solar panels on my house to take it off the grid. Would save energy and money in the long run. would also like to insulate house and replace windows to reduce energy usage. We just purchased the house through a foreclosure and now have 2 house payments. We are unable to sell the old house. By making these changes we would happily cut our energy cost in half. | Peter Citro Housing Fund | 5 | 0 to 30 days | \$15,000 |
| Montgomery | High Performance Metal Alloy Technology for Wear | The University of Dayton and its collaborating partners are pleased to submit this Federal Stimulus Initiative project proposal, which focuses on commercializing a high performance patented Autotemping metal Alloy (ATA) technology developed by Ohio Alloy Products. This unique metal alloy possesses properties comparable to 304 and 316 stainless steel, but requires a much lower percentage of nickel and eliminates the need for heat treating resulting in an 80% reduction in energy usage. The economic benefits provided by this ATA alloy technology includes energy savings, environmental cost reductions, shorter tool procurement cycle times, and improvement in overall production efficiency for tool and mold users. This new technology creates a means for producing high quality production tooling via the rapid prototyping approach, which translates into lower costs, shorter procurement cycle, and enhanced customer responsiveness and competitiveness in the global market place. This new alloy technology will improve the competitive position of Ohio's hard prototyping tooling companies, casting and mold making companies, and injection molders who choose to employ this new technology. | University of Dayton Research Institute | 1050 | 181 days or more | \$1,640,252 |
| Montgomery | Tipp City - Lightner Road Waterline Project | This project will install 2,832' of 24" ductile iron pipe (DIP) waterline on Lightner Road which is the boundary between Miami and Montgomery Counties. This is a joint project between the cities of Tipp City and Vanilla. The businesses and industries on the south side are in Montgomery County and would be customers and industries on the north side are in Miami County and would be customers of Tipp City. The existing businesses and industries currently have private water wells, which would be replaced by potable public water with this project. | City of Tipp City | 10 | 31 to 90 days | \$200,000 |
| Montgomery | Airway/Woodman Reconfiguration | Project involves the reconfiguration of 2,000 linear feet on both Woodman Ave. and Airway Rd. Project will reposition a traffic signal and add curb, gutter, sidewalk, and tree lawn. Project creates walkability and safety improvements. | City of Riverside | 0 | 31 to 90 days | \$1,000,000 |
| Montgomery | Supplimental Musician's Performance Income | The five members of the Lonesome Rovers Band are beginning to see potential layoffs from their non-performance jobs. In order to maintain financial security for their families, financial assistance to change careers to full time performing is requested. This funding request would secure the remaining public address system equipment needed to perform for compensation and supply short-term subsistence income for the band members. Funding will also support a marketing campaign to promote performance offers, especially with the upcoming spring and summer festivals. | Lonesome Rovers Band | 5 | 0 to 30 days | \$5,000 |
| Montgomery | Reconstruction of Center of Flight Blvd | The performance area will include the entire western Ohio/northern Kentucky eastern Indiana regional area. | City of Riverside | 500 | 31 to 90 days | \$650,000 |
| Montgomery | Danis Property Entrance | The alignment of existing street to coincide with possible passenger train-rail and new entrance to National Museum of the United States Air Force. Consider an extension to the off-ramp from Hartman Rd to Old Hartman Rd. Project would provide for development of a 43 acre brownfield site located in regional well field area. | City of Riverside | 150 | 31 to 90 days | \$350,000 |
| Montgomery | Water Education Facility/Museum | Conduct an advance learning and training center relating to water education, conservation, and advance study. Project would provide education opportunity for K-12, general public, private corporate leaders. Project joint venture with Capital Construction Management. Requires 1700 feet of gas pipeline to permit development and full utilization of a 43 acre parcel of land for an industrial/commercial park. | City of Riverside | 25 | 91 to 180 days | \$1,000,000 |
| Montgomery | Austin Pike Gas Pipeline Relocation | Relocation of pipeline will permit a more efficient layout of both building pads and natural roads. Relocation will also create the potential to sit a larger user than would otherwise be possible due to the fractured nature of the site. The property's prime location near a new interchange under construction at Mansburg Springboro Pike and Interstate 75 makes the relocation of the pipeline a top priority for accommodating future growth in the area. | Miami Township | 50 | 91 to 180 days | \$850,000 |
| Montgomery | File Tree Archival Medical Records Scanning Servc | I hope this communication finds its way to you. The File Tree Services, LLC is delivering archival scanning and document distribution services to the medical industry in Ohio. Our mission is to go Digital with our services and comply with Critical Document Services and Mountain both multibillion dollar global companies). I am looking for investment capital to grow my business to complete head-to-head with these much larger entities. We provide technology based secure software platforms for medical practice groups to access their own records (all HIPPA's compliant) (Web Based) (Web access to digital medical records - Cloud DR). With the new Federal Government requirements that ALL medical records be electronically by 2014 there is a huge opportunity to expand my already developing company. The only roadblock for growth in this sector is capitalization. I have been a bank and credit union, however I have been given the run around due to my size and requested level of funding (\$450K). Please let me know if you can help. Regards, Bob File Tree Services, LLC 988-302-4521 ext. 3 bob@ftservices.com www.ftservices.com | File Tree Services, LLC | 14 | 0 to 30 days | \$350,000 |
| Montgomery | New City Hall | Construction of 50,000 square foot facility to house all functions of local government. New facility will allow for relocation from existing site which is needed by Ohio Department of Transportation to construct new access ramps to CH RT 4 to improve safety. | City of Riverside | 25 | 181 days or more | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Montgomery | Harshman/Valley Improvements | Reconstruct intersection of Harshman & Valley to accommodate local logistic operations. Riverside is home to 4 of the world's 5 largest freight railroads due to proximity to CH 274, US 30, and 75. All logistic companies in City are located within 500 feet of the Harshman & Valley intersection. | City of Riverside | 250 | 31 to 90 days | \$2,000,000 |
| Montgomery | Restart Cannew Business | This money will be used to pay off business loans and debts. Plus, the rest of the money will be used to restart the business, buy new office equipment and travel costs for international marketing and sales. | Cannew International LLC | 2 | 0 to 30 days | \$200,000 |
| Montgomery | The State Route 48 Centerville renewal project | Purchase 3 functionally obsolete buildings on State Road 48 in Centerville, demolish the buildings and build a 15,000sq ft retail and office complex that will enhance the area and bring new jobs businesses and tax revenue to the area. My company has already renovated 5 buildings in the area, successfully bringing jobs and income to the area. The buildings located on the site are to be built together on the site and will enhance the visibility. Some new construction has been done in the area, but this project will benefit the City and State by further enhancing the projects I have already done and strengthen the areas retail, office and service presence. | Mulay Holdings, LLC | 30 | 31 to 90 days | \$3,000,000 |
| Montgomery | Railroad Safety Project, Montgomery and Warren Co. | 4 railroad crossings on the proposed 3C Corridor (passenger rail from Cleveland to Cincinnati through Columbus) will receive lights and gates and necessary circuit upgrades (constant warning time) to allow for high-speed passenger rail service. These crossings are: Salem Rd., AAR DOT # 624641F Alex Rd., AAR DOT # 624641F Elin St., AAR DOT # 624641H Haines Rd., AAR DOT # 624641M Lower Carleah Rd., AAR DOT # 624647H | Ohio Rail Development Commission | 10 | 31 to 90 days | \$1,035,000 |
| Montgomery | Consulting Services | North Southern Corp. has committed to share in 25% of the cost of the improvements, which are essential for passenger rail service to begin. Project will involve the hiring of 5 new employees for expansion of existing consultative practice in logistics & supply chain. 75% of funds will support the payroll costs of the new employee's. 25% of funds will be allocated toward marketing expenditures & Q&A costs tied to the expansion of the companies practice. | Probity Enterprises | 5 | 0 to 30 days | \$400,000 |
| Montgomery | Airway/Woodman Reconfiguration | It is forecasted in the next 30 days, that the Company will close on a new consulting engagement which will generate \$20,000 in monthly revenue over the next 90 days. The primary objective of the program is to hire logistic/transportation professionals which may have been displaced from transportation concerns in the area such as OH, in Wilmington, OH in other companies within the transportation industry. It is expected that each job will provide a minimum compensation amount of \$80,000 annually to three (3) consulting professionals and \$35,000 annually for their (3) administrative personnel. Thank you for the consideration of our proposal. | City of Riverside | 100 | 31 to 90 days | \$1,000,000 |
| Montgomery | peace and happiness, inc. | Project involves the reconfiguration of 2000 linear feet on both Woodman Ave and Airway Rd. Project will reposition an existing traffic light to increase the number of outlets for development. Project includes curb, gutter, sidewalks, and treatment to increase walkability and safety. My husband had me assessed and left homeless for 1 1/2 weeks and caused me to be fired and not allowed to see my children. I have much mental areas as a result of this. I am requesting \$5,000 for a good used car, \$5,000 for a bedroom apt for myself and my 10 year old son, \$5,000 to pay off credit cards and clear my credit, and \$1,500 for a divorce lawyer. I have a 10 year old son and a 10 year old daughter. I want to give my kids a decent life but I cannot go back to my marriage. I am unemployed and looking for work. I am currently staying with my mom and I just want PEACE AND HAPPINESS. | peace and happiness, inc. | 1 | 0 to 30 days | \$16,000 |

| Montgomery | A National Model for Airport Security | This program leveraged \$50+ million Third Frontier investment in ICAEST by creating an operational model for the security of the Dayton International Airport. This program primarily enhances the security infrastructure while creating a greater level of security for the nation's senior companies can have the technology evaluated in an operational environment. This program will attract companies to Ohio, provide small companies the best cost of entry in the nation to access this market, establish an "Incubators Lab" to provide the continual improvement of security solutions protecting the nation's critical infrastructure, and create a security model that can be shared to universities, corporate headquarters, government facilities, malls, etc. | University of Dayton Research Inst./ Dayton Intl A | 200 | 0 to 30 days | \$6,000,000 |
| Montgomery | E. Rahyn Rd Drainage Project | This program will create 55 jobs in the near term, more than twice what the Stimulus Bill is expected to create (1 job per \$200,000). Over a five year period this program will create up to 200 jobs through growth of Ohio companies selling security related products, validating the compatibility and performance of security products, integrating security products into an integrated architecture, and attracting companies to Ohio. 150' of storm drainage to correct storm drainage problem created by County installing a larger drain and sanitary sewer line blocking drainage on several homesites. In addition, home maintenance repairs desperately needed that in the past have been unable to pay for because we were paying our mortgage. | E. Rahm Road Homeowner's Drainage Project | 4 | 31 to 90 days | \$3,500 |
| Montgomery | Iron Horse Trail - Phase 2 | Complete paving of 0.4 miles of bike paths along former railroad, drainage improvements and construction of fencing for safety of trail users. Phase 2 of the paving project completes the section of trail from Iron Horse Park to 475 S. Centerville. This trail is included on the RWPC Comprehensive Local-Regional Bikeways Plan. Phase 1 of the project was completed in 2008 and included paving approximately 1.5 miles of trail from Iron Horse Park to Centerville to Hempstead Station Road in Kettering. The trail as it develops will connect Centerville and Washington Township residents with schools, churches, parks, and businesses as well as connecting to the existing trail systems throughout Montgomery and Greene Counties. The trail project was a collaborative project of the cities of Centerville and Kettering and the Park District. The city of Centerville acts in partnership with the Park District on Phase 2, and did not have the financial resources in 2009. | Centerville-Washington Park District | 8 | 31 to 90 days | \$70,515 |
| Montgomery | Growth Initiative | MarketMatch is a firm that works with financial institutions to improve their operation and their community. With the funding, we would launch a financial literacy and education program for the poor and increase the financial resources of the consumer. It would also create a positive impact on the community banks and credit unions in Ohio through a positive message, joint program efforts, and keep the focus of lending and support to our local communities. | MarketMatch, Inc. | 12 | 0 to 30 days | \$300,000 |
| Montgomery | Finish education | I am going to be a mother soon for the first time and I am also trying to earn my degree in Psychology. His father is going to school for Welding but, will unfortunately have to quit school without help from the State or the Government. I am a full time student and will not be able to go to school and take care of my son once he is born. Our son's due date is July 14, 2009. His father is in our lives but, we don't make enough to take him and both of us from school in any way my mother. Thank you, Anita Heuer | Self | 2 | 0 to 30 days | \$15,000 |
| Montgomery | Mound Energy Center | This project would be a collaborative effort between the state, business community, public utility providers, educational institutions, technical research institutions, economic development organizations, and federal agencies. The effort involves integrating and leveraging state, federal and regional resources to create an "Energy Center". The center would be a resource to develop, integrate, and demonstrate alternative, green and renewable fuels, while facilitating the creation of new business opportunities and energy related jobs. The funds would be used to launch the center. The funds would be used to develop business, operating, marketing and financial plans, formalize business relationships and to launch the first alternative energy demonstration project. It is anticipated that the center will demonstrate its value and become self supporting. | Miamisburg Mound Community Improvement Corporation | 500 | 31 to 90 days | \$1,000,000 |
| Montgomery | Project Reward Responsible Citizens | Over my lifetime I have been a responsible citizen and have paid my bills, worked hard, etc. I figure since many benefitting from this bill have not, and will be being off by tax dollars, I should get a "honorarium" to pay additional taxes you will create via your larger school year, poor budgeting and forecasting, etc. to cover the additional cost of living you will create in this state, etc. I hope that you truly are responsible with this money. I have very little confidence in the government to get anything right. This is like putting your finger in the dike. How about identifying true projects and putting them on the ballot? Who are you to risk and choose? The talented decision makers and business savvy minds aren't in government, but outside. Seek their knowledge, not their \$\$\$ to run for office! | Real Americans | 0 | 0 to 30 days | \$30,000 |
| Montgomery | Computer Programming Service | This is almost comical in nature. How can you make these decisions so quickly? To upgrade & expand my personal home business (www.dynastyware.com) to make a profitable (buying rework computers from "Wishlaht" in Windows Vista computers). Also will use some funds to go to the local community college to learn more about computer programming & web design. Also will use some funds to boost my inventory on my eBay store. I plan to return any unused funds & will provide full accountability of these funds once going. | Dynasty Software | 2 | 0 to 30 days | \$7,500 |
| Montgomery | Buckner Group | I loan and bought this business from my Father. At the time he managed the business and worked as an intensive care nurse. In 2000 my husband left his family and the business. My eldest son was in college at the time and wanted to work in the family business. I had a choice to make, so I quit the only thing I had ever known and began to teach myself the insurance business. Since then I have learned a lot. Within the last 8 years I have rehired my old friend, started a website, replaced 8 new insurance carriers and licensed all my employees. When Hurricane Ike came in Sept 2008 we were out of power for 14 days. This along with the slowing economy has caused a great hardship. I have been unable to meet all the payroll requirements and for the first time I am wondering how I will survive. This is my plan: 1. Keep all 7 current employees 2. Pay off debt created by Ike 3. Increase business sold on internet 4. Buy additional book of business | Buckner And Associates | 10 | 0 to 30 days | \$3,674,000 |
| Montgomery | Southside Renovation Project | Parking Lot, Roof and Interior Renovations. Hiring of additional employees. Pay down current business debt. | Southside Veterinary Clinic | 2 | 0 to 30 days | \$150,000 |
| Montgomery | windmill electric. | Install 3 wind powered turbine generators | pyramid farms | 6 | 181 days or more | \$350,000 |
| Montgomery | Aid with starting a business | Worked for dealer for 15 years. Took buyout, went to school for heating and air. Would like to start my own business to help with local roads and need equipment and products added/costs. Want to help in the community and am willing to help. Equipment to install heating and air products and tools are outrageous. Its so hard to be the small business person these days. I need help. | All Cozy | 20 | 31 to 90 days | \$35,000 |
| Montgomery | Vanguard Blvd. | This roadway project is designed to supplement anticipated funding from other sources. The project would construct approximately one mile of roadway through the Mount Advanced Technology Center connecting to Dayton/Cincinnati Pike to Mount Road. The roadway would provide access to existing business clients, and create a new roadway building site. The scope of work includes pavement, re-aligning roadway, repair/replace storm drainage systems, grading, repair/restore water line. | Miamisburg Mound Community Improvement Corporation | 100 | 91 to 180 days | \$4,600,000 |
| Montgomery | Kettering Fairmont High School Library | Renovation of the current library at Fairmont High School to include (1) physical improvements such as lighting, flooring, desks, chairs, counters with (2) technology upgrades with rest and open collection of books. The project will create a new media literacy space for learning which will be available both during and outside normal school hours. The library would be available to students and to the public during off hours. Architect plans are underway and project could begin very quickly. This will create work for construction firms to renovate the space and I will create a state of the art learning environment benefiting Fairmont students and the Kettering community. www.ketteringohio.com In the areas of GED classes and as an off-site location for Sinclair Community College. The building is badly in need of renovation. The renovation work that would be completed would include plumbing, electrical, HVAC, roofing, luck painting, replacing doors, windows, flooring and an elevator. ADA accessibility issues would also be addressed. Most of the plumbing and electrical systems are original to the building. Renovation of DL Barnes would create work for all construction trades in the area and would result in protecting a valuable community asset in the process. The money spent would not be to create a brand facility but to restore the building to an acceptable condition in line with community standards. The district has not spent funds to renovate the building in the past because funding has been directed toward buildings that house our K-12 students. | Kettering City School District | 15 | 31 to 90 days | \$550,000 |

| Montgomery | Rebab 4 unit apartment buildings for lower income | We would like to purchase 4 apartment buildings. These are one bedroom one bath 4 unit apartment buildings. We currently own one building and wish to purchase additional units in Kettering Ohio. The rent on the 4 unit we currently own is \$425 per month and we have low income trying to get back on their feet. This is a very nice area of town that has fallen down due to the housing market. Many of these units are currently in foreclosure or are bank owned and in dire need of repair. They are for the most part structurally sound but need new heating/cooling units, paint, carpet and flooring, appliances and lots of elbow grease to get them back into livable apartments. The unit we currently own is 558 Talbot Avenue in Kettering Ohio. Thank you for your time and consideration. | S&K Properties of Ohio LLC | 7 | 0 to 30 days | \$500,000 |
| Montgomery | Introduction of the Delayed Power Engine | The need for better engine efficiency is evident throughout the private and commercial transportation industry and the introduction of the Delayed Power Engine will satisfy that need by providing an engine with an 80 to 90 percent engine efficiency rating. Present technology of internal combustion (gasoline) engines operates at the area of 25 to 30 percent efficiency while diesel engines can achieve 40 percent efficiency. The DPE does not use the traditional compression stroke and in the absence of the compression stroke eliminates the backpressure on the operation of the engine. The DPE does not need additional electric start and does not have to be held in the work. It is held in the work by the conventional compression stroke on the other hand operate with a backpressure because of the "conventional" compression stroke. The "motor" or output function of the DPE only has a power stroke and an exhaust stroke. This engine can stop and restart each time the vehicle comes to a full stop that is also pollution friendly. | Power Products, LTD | 150 | 0 to 30 days | \$1,275,000 |
| Montgomery | Get out of Credit Card Debt! | All I'm asking for is 3,000 to pay off my Bank of America credit card bill. I would like to keep the card for future purchases like if my car broke down or otherwise. My wife's car just broke down and I need to get it fixed. I have no available credit to apply to the car repair so we really have to wait it out and get help from other people. I would just like to get that card paid off and then I can pay off the other cards more easily since that one would be gone. | Andrew Needles | 0 | 0 to 30 days | \$3,000 |
| Montgomery | wilson-2010 | Was granted legl custody of my 6 yr old niece and 9 yr old nephew. I was laid off from my job as a nurse reciever. I am attending Sinclair Community for a degree in mental health technology. The house I live in has mold damage and a roof space that is flooded. Everything is falling apart. We need more so that my kids don't get sick anymore. Please help us... | My self | 1 | 181 days or more | \$20,000 |
| Montgomery | Energy Efficiency | 400 sq. Ft. Vinyl siding with 4-board. Reduce energy usage of dwelling. | The Alfano Home | 9 | 0 to 30 days | \$5,700 |
| Montgomery | Family Life Center/ Rec Center | Project Description: Family Life Center/Rec Center with Kitchen facilities; 150 feet of water line; EPA approved sewage treatment center; Parking lot; Expected outcomes: 6 jobs provided; For low income community. Youth crime intervention programs, tutoring/mentoring programs; personal development programs, kitchen facilities for a "break on wheels" program for community elderly; recreational facilities for youth and after school programs; 1 double pane vinyl window, rebates, increase energy savings. Will also request up to date on weatherization. 1750 square feet of Fiberglass insulation. Replacing 30 year old insulation in attic. New insulation will have R value of 30, cutting energy usage in the house greatly. | First Daytree Free Will Baptist Church | 6 | 91 to 180 days | \$1,600,000 |
| Montgomery | Energy Efficiency | 2 Star Pella Fiberglass Windows for homeoffice | The Alfano Home | 5 | 0 to 30 days | \$2,400 |
| Montgomery | Energy Efficiency | 2 all weather energy sealing doors. Replacing old worn out 20 year old all weather doors. Cut down on drafts in home. No energy usage plan needed. | The Alfano Home | 5 | 0 to 30 days | \$750 |

| Montgomery | Home energy savings. | 2 all weather energy sealing doors. Replacing old worn out 20 year old all weather doors. Cut down on drafts in home. No energy usage plan needed. | The Alfano Home | 3 | 0 to 30 days | \$1,000 |
| Montgomery | Continuing education for advancement. | Finish A.S. degree in travel and tourism. In order to get a higher paying job as a travel agent. | The Alfano Home | 1 | 0 to 30 days | \$4,000 |
| Montgomery | Continuing education | Continuing on a Step 2 program at Sinclair Community College to get a 2 yr. degree in CNC machining. Currently employed as a former auto worker at Moraine Assembly. | The Alfano Home | 1 | 91 to 180 days | \$2,400 |
| Montgomery | USA Marketing | I, along with a partner, would use the funding to start a new business that distributes "Products of the South". Including Heisk Williams Jr. Family Tradition BBQ Sauce, (Trini) McCreas Cologna, George Jones BBQ Sauce, all Steak, Bacon, and the jewelry collection by Sara Evans. The business would operate under the name "USA Marketing" (hence the project name) and be operated by me and my partner at first, and as it grows we would expand to create many new jobs (100 minimum) depending on anticipated demand and rate of company growth. We have drawn interest from several large local food chains, and the funds would allow us to go to the business selling and create new jobs as the business grew. | USA Marketing | 100 | 31 to 90 days | \$200,000 |
| Montgomery | Home Repair & Purchase | Being a Medically Retired Individual with suffering 2 Heart Attacks, and 3 Spinal Cord Surgeries, I am unable to keep a fulltime employment I cannot do hard work, and have no Life Insurance to keep my family going in the event of my passing. I receive Social Security Income, and my wife works Parttime at a local newspaper to help out. I own a home with my brother, but by my father and his brother in the State of Riverside Ohio. The home is in need of Major repairs, and upgrades on many things to keep it in living order, which is not fixed in due to needed repairs. I am looking to other help to get the home in living order, and am using what I can of my Social Security to do work. I figure if we take a good 15 to 20,000.00 to get done on the home we don't want to lose. The rest of the 100,000.00 am asking for is to purchase a home to have for my wife and son and daughter to have for after I am gone, and am also asking for a seat in a wheelchair while I was born, and continue Coaching KIDS Wrestling as I do now for the Shabbits Wrestling Organization for as long as I physically can. If you can Help Me, I will be Thankful. | Doug Bowen Family | 1 | 0 to 30 days | \$100,000 |
| Montgomery | White tail study | Study the habits of white tail deer | Ryan Fausch | 1 | 91 to 180 days | \$15,000 |
| Montgomery | my home | Need for new furnace, broken pipes, going to get in funds to pay for house and stock market crashed and have lost 200,000 dollars. can't retire now. need 65,000 for house. | home | 65,000. | 31 to 90 days | \$65,000 |
| Montgomery | Main Dish Kitchen Family Time | I families to spend Main Dish Kitchen in Dayton Ohio January 2008. The intention of Main Dish Kitchen is to help provide quality meals as families can spend more time together at the dinner table. Our families include active Grand Parents, very active parents (the owners) and five even more active kids ranging in ages from two to ten. We believe families eating at the table together provides vital communication. Two big reason people choose fast meals is as opposed to quality meals is the prep work before a meal and the clean up after. At Main Dish, we do all the planning, shopping, chopping, and prepping. All families have to do is to load our quality meals in the oven for a short cooking time then it's quality meal served. And the clean up is much much easier. We have one great location with many great employees south of Dayton. This project would allow us to retain all of our employees and employ at least 15 to 20 more. We would like to open two satellite locations were we can provide our great quality, very affordable meals to more people around the Dayton area. | Families 1st dba Main Dish Kitchen | 16 | 31 to 90 days | \$350,000 |
| Montgomery | Home and Commercial Energy Auditing | Will perform household and commercial energy audits. By using state-of-the-art thermographic infrared video cameras and highly specialized measuring equipment, I locate problem spots where heat escapes from a building, and cold air enters. After locating those trouble areas, I'll prepare a formal report for the building's owner. The owner can then use the report to assist a professional contractor in fixing the areas. | Sustainable Resource Technologies, LLC | 2 | 0 to 30 days | \$238,000 |
| Montgomery | funds for helping in the new business | I would like help pay off bills that I cost to start my business and to buy some new trucks for the business | M-D expeditingllc | 100 | 31 to 90 days | \$150,000 |
| Montgomery | Affordable Childcare Initiative | Replacement of concrete aprons to daycare and day care, removal of activity room, purchase and upgrade of games and activities, repair of siding on building, bring in additional staff to increase capacity, overall upgrade of facilities. | Jennifer's Day Care Services | 3 | 91 to 180 days | \$51,000 |
| Montgomery | Competition Band Revitalization Project | Replacement of aging musical equipment, construction of director's tower and storage facilities, replacement of sails and trailer, painting and graphics of sail trailer, revitalization and restocking of practice facility, marketing to increase participation in the band and the Arts, purchase of available software to assist with logistics. | Northmont Band Boosters | 8 | 31 to 90 days | \$335,000 |
| Montgomery | The Dayton Arcade | do not have the specifics of everything that needs to be done to this structure. I am just a citizen of Montgomery County who is tired of all our historic structures being torn down for large, ugly monstrosities (ie. The Rite Building for the Shuster Center). The Arcades is "Crown Jewel" of the Gem City and per our Mayor would rather grow trees on top of downtown buildings than do anything to preserve this beautiful, historic and majestic structure. This structure really needs some major financial help to keep it standing. Made if we have our "user" bank we can then start focusing on saving/rejuvenating the rest of the downtown area. It is a crime what our city "leaders" are allowing to happen to our Arcades. | Friend's of Dayton's Arcade | 200 | 0 to 30 days | \$250,000,000 |
| Montgomery | Dayton Urban Garden Initiative | To purchase an acre and vacant lots in low income areas throughout Dayton and work with the community members to plant, tend and help grow fresh fruits and vegetables for the community to eat. This would be a program that would be facilitated by employees of the "Dayton Urban Garden" but the community members would be the "owners" and "gardeners" to build pride and togetherness in the community. All vegetables in bulk grown would be given back to the low income communities to promote healthy eating habits. There would also be community run "Farmers Markets" that would help to bring money back into the communities. All the while, we are helping to bring about community leaders and teaching young business skills in order to enrich and grow the feeling of community in Dayton, Ohio. Thank you for your time! | Dayton Urban Garden Initiative | 20 | 91 to 180 days | \$5,000,000 |
| Montgomery | I-675, Hidden Hills Noise Barrier | Construct a 2.600 linear foot noise wall off of I-675, adjacent to Hidden Hills and Village South Neighborhoods. | City of Centerville | 116 | 181 days or more | \$1,162,000 |
| Montgomery | Municipal Pool Renovation | This project is a renovation and major update to existing municipal swimming pool. The 40 plus year old pool serves the 38,000 residents of Huber Heights, with a heavy concentration of swimmers from the lower income southern neighborhoods. Despite proactive repairs and maintenance, the facility is showing it's age. Some of the problem conditions include: filter heads, leaky doors, the walls, deteriorating during winter months and falling into the pool, undrained ether, cracking in the pools and concrete sidewalks surrounding the pools. In addition, because the pool is off a single tier, per Health Department regulations, any major changes that are made to the pool will require the installation of a separate filter for each pool. The pool poses about 6" of water per day, which amounts to about 22,000 gallons per session. This project would construct a new facility that is fully compliant with all new codes and regulations pertaining to municipal swimming pools. Without the funding the pool may have to be closed, resulting in job loss and the City would lose a vital recreation option. | City of Huber Heights | 40 | 31 to 90 days | \$2,000,000 |
| Montgomery | Individual help | I am requesting the money to help pay bills. My husband has been let go the day after Christmas in 2007. He has been working for a couple weeks here and there and I need to get my bills paid. I have a 1 year old and we have no other son and this money helps with us. I had been to make each month meet over since my husband has been let I have had to borrow my 401 and bills are piling to get behind again. This money would help get us out of trouble and back on our feet. We would be able to stay in our home without going to bed and wondering if we will have our house put up in foreclosure. This money would help get me out from the rest of my college income a freighter and paramedic. | help | 4 | 181 days or more | \$50,000 |
| Montgomery | Multi-Use Trail Resurfacing, Social Row Road | This project resurfaces the Social Row Road Multi-Use Trail in the City of Centerville. This trail is 3,200 feet in length with an asphalt surface. | City of Centerville | 10 | 31 to 90 days | \$24,500 |
| Montgomery | "Save a small minority owned trucking company" | We are a privately held, minority owned trucking company located in Trowwood, OH. The closing of automotive plants nationwide, uncollected revenue from bankrupt vendors, rising diesel prices over the past 24 months, coupled with accelerated operating costs, have caused us to approach bankruptcy. In order to stay in business and affordably equipment and well trained drivers, we need financial assistance or we will have to close our doors and put our drivers and subcontractors out-of-work. The state of Ohio cannot afford to lose anymore small businesses, we need some help to survive and provide jobs for the future. A financial stimulus would mean additional truck driving jobs, purchase of tractors and trailers, to provide truckload transportation throughout the state of Ohio and beyond. I have been a proud Ohio small-business owner/operator for 30 years and want to continue to support jobs and services in the Buckeye state. | D. A. Logistics | 30 | 0 to 30 days | \$500,000 |
| Montgomery | Police Department Digital Upgrade | Anticipated request transfer from analog to digital communication technology for PEPAC, Motels, Portable and Repeater locations. | City of Centerville | 37 | 0 to 30 days | \$372,000 |
| Montgomery | individual help | I am requesting money for a new house. The money would help assist my fiancee and I in getting a new house to start our lives together. The money would help with any repairs and money to help pay down and pay off some of our bills to help us get a jump start for saving money so we would be able to stay in our home and we progress further in our life. | None | 4 | 181 days or more | \$100,000 |
| Montgomery | Police Building Energy Program | Energy Facility Audit was conducted for the Centerville Police Department building. Recommendations were made by the TriValley Energy Systems Company that would reduce energy usage and cost. | City of Centerville | 12 | 0 to 30 days | \$121,900 |
| Montgomery | Wetherfer St sanitary sewer parallel replacement | 250 LF of sanitary sewer will be constructed to alleviate overflow conditions upstream. | City of Vandalia | 6 | 91 to 180 days | \$40,000 |
| Montgomery | Cops Hiring Recovery Program | The Northwestern University manpower analysis model has shown the police department understaffed by more than 5 officers for the last five years. This program will be used to hire five additional uniformed patrol officers. | City of Centerville Police | 26 | 0 to 30 days | \$257,648 |
| Montgomery | Recycling Carts | This project will provide for the purchase of 64 or 96 gallon containers to be distributed to residential customers for the city's ongoing recycling program. The containers will be picked up with semi-automated fully automated trucks. | City of Centerville | 38 | 0 to 30 days | \$375,000 |
| Montgomery | City Annex Building Improvements | renovation of the Centerville Annex Building to bring this building into compliance with the Americans with Disabilities Act of 1990. The scope of the work involves reconstruction of the public entrances of this building to provide handicap accessibility. The building is currently leased by the State of Ohio Bureau of Motor Vehicles. | City of Centerville | 2 | 31 to 90 days | \$22,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|------------------------------------|----------------|--------------------|---------------------------|
| Montgomery | General Munger Historic House Restoration | This program requests procurement of funds necessary for the restoration of the General Edmund Munger House located at 9985 Yankee Street to a safe structural and weatherproof condition as outlined in a March, 2007 report entitled "General Munger House, Analysis and Recommendations" prepared by Studio 43 architects. The house draws its primary historic significance as the residence of Edmund Munger, a Brigadier General of the 5th Brigade of the 1st Division of the Ohio Militia during the War of 1812. General Munger was also a man of state and local prominence being elected Ohio's 7th General Assembly and a founder of the first library in Centerville. Work to include both rough and finish carpentry, plaster, masonry, interior and exterior painting, roofing, weatherproofing, electrical, plumbing, furnace and ductwork. A permit application has been submitted to the Ohio State Preservation Office. | City of Centerville | 25 | 31 to 90 days | \$250,000 |
| Montgomery | Roof Replacement for PW Garage | Repair and replacement with new roof. Remove all gutters and downspouts and replace with new. | City of Huber Heights | 10 | 0 to 30 days | \$20,000 |
| Montgomery | Public Works Building Construction | The City of Centerville will be constructing a new 40,000 sq foot Public Works Building on its existing lot adjacent to the current Public Works Building. This new building allows for proper storage and maintenance of millions of dollars of city equipment, an adequate fire suppression unit and energy saving features. | City of Centerville | 50 | 31 to 90 days | \$6,000,000 |
| Montgomery | Wright Company Factory Restoration | The Wright Company Factory site is one of several buildings located within the Delphi Corporation's Home Aerial manufacturing complex. Automobile part production has ceased at this location and the City of Dayton is negotiating with Delphi for the transfer of the entire complex to the City for reuse. With the Wright Company Factory building as an anchor, the City is preparing to utilize the complex for advanced manufacturing and technology entities. The long term impact will help spawn economic revitalization to a part of the Dayton Region severely impacted by the collapse of the US auto industry. It is anticipated that the restoration of the Wright Company Factory sites will lead to \$15-\$20 million dollars of additional investment in this location. The Aviation Heritage Foundation is working with the City of Dayton, Dayton History, and the National Park Service on this project to help preserve the history of aviation and the Wright brothers and to promote the Dayton Region as a center for innovation and technologies of the future. | Aviation Heritage Foundation, Inc. | 150 | 0 to 30 days | \$9,800,000 |
| Montgomery | Citywide Emerald Ash Borer Tree Replacement/Treatm | This request seeks additional funding for the continued citywide treatment or replacement of ash trees as a result of the emerald ash borer infestation and installation of appropriate trees throughout the city's urban forest. | City of Centerville | 10 | 0 to 30 days | \$50,000 |
| Montgomery | Cox Arboretum MetroPark – A Nationally Distinctive | Cox Arboretum MetroPark and it's Foundation has developed a mission to be a completely sustainable education facility in order to serve as a model for other such facilities nationally, and to serve as a focus center for educating the regional population about renewable energy and environmental sustainability. Its project will involve the following: •Design and installation of 50 KW solar pv array; •Design and installation of 50 KW low speed wind turbines); •Design and installation of a complete sustainable greenhouse which can provide all hot water and heating needs for all facilities on site; •Design and installation of aquifer hydro energy storage and hydropower facility (50KW); and •Renovation of existing facilities to reduce heating/cooling/electricity requirements through passive solar, improved building envelopes and improved appliances by at least 75%. | Cox Arboretum - Dayton Metroparks | 30 | 91 to 180 days | \$3,000,000 |
| Montgomery | National Aviation Heritage Area | This project will impact Montgomery, Greene, Clark, Warren, Miami, Champaign, Shelby, and Auglaize counties. The project will include construction/improvement of a number of aviation related sites. It will also create a world-class experiential education program at a number of locations within the eight county area. The project will include the region to the aviation and aerospace industry. The project will include a number of exhibits and air shows. It is expected that this will lead to an increase of 100 jobs in the aviation industry as well as an increase in the number of jobs in the heritage industry located within the eight county region. NAVA is working with the National Park Service, the Dayton Development Coalition on this project to promote the Dayton Region as a center for innovation in the field of aviation/aerospace. The project will include the region to the aviation and aerospace industry. The project will include a number of exhibits and air shows. It is expected that this will lead to an increase of 100 jobs in the aviation industry as well as an increase in the number of jobs in the heritage industry located within the eight county region. NAVA is working with the National Park Service, the Dayton Development Coalition on this project to promote the Dayton Region as a center for innovation in the field of aviation/aerospace. | Aviation Heritage Foundation, Inc. | 100 | 0 to 30 days | \$750,000 |
| Montgomery | City of Clayton Community Center | As a relatively new city, Clayton continues to expand services for residents. The City is requesting assistance to build a 52,000 sq ft community recreation facility. The new facility will be located in a LEED-certified neighborhood development and provide services for our 13,000 residents. The land for this development is being donated to the City. The new, LEED-certified facility will offer space for indoor activities such as basketball, volleyball, gymnastics, walking track, climbing wall and weight training. Community meeting spaces will also be provided. The proposed facility is close to Northview High School who will be given access to the training facilities and courts for their student development activities. The goal is to create a facility that will be utilized throughout the year by residents and students throughout the community. In addition to the improved quality of life for residents, this development will also create 10 permanent, full-time equivalent positions to operate the facility. The facility will also help generate new home construction in the Village of North Clayton development. | City of Clayton | 10 | 181 days or more | \$9,880,000 |
| Montgomery | State Route 48 (South Main Street) Irrigation | This project establishes an irrigation system along State Route 48 (South Main Street) from Eisenhart Drive to Logwood Drive to improve the micro-climate and enhance the pedestrian experience in this area. State Route 48 (South Main Street) has been identified by the City as a major pedestrian corridor. Additionally, this corridor is along a major bus line of the Miami Valley RTA where the City and MVRTA has jointly established bus stops along this route. This area is immediately south of Historic Downtown Centerville, a vital shopping, restaurant, office and residential neighborhood in the City. This area is adjacent to two large residential neighborhoods that include low and moderate income housing. This project will irrigate 1,200 linear feet of street, bus stop and median. | City of Centerville | 10 | 31 to 90 days | \$36,000 |
| Montgomery | State Route 48 (Far Hills Avenue) Irrigation | This project establishes an irrigation system in the public right-of-way at the Gateway Entrance to the City along State Route 48 (Far Hills Avenue) at the Village of Farmerville. This project will improve the micro-climate and enhance the pedestrian experience in this area. State Route 48 (Far Hills Avenue) has been identified by the City as a major pedestrian corridor. Additionally, this corridor is along a major bus line of the Miami Valley RTA where the City and MVRTA has jointly established bus stops along this route. This area is adjacent to Bahari Village, a major retirement community in the City, Woodbourne Library and several large neighborhoods, shops and offices. This project will irrigate 1,000 linear feet of street, bus stop and median. | City of Centerville | 10 | 31 to 90 days | \$34,000 |
| Montgomery | Yankee Street Pedestrian Culvert/Underpass | Install a pedestrian and drainage underpass underneath Yankee Street, north of the Golf Club at Yankee Trace main entrance drive. | City of Centerville | 28 | 31 to 90 days | \$275,000 |
| Montgomery | Hawthorn Hill Rehabilitation | The urgently-needed stabilization of Hawthorn Hill will immediately employ trades people injecting nearly \$800,000 into the economy of the Dayton region. The original nature of the project will then allow the investment of \$2.8 million over the next several years, employing additional trades people in Dayton and historic preservation and museum conservation and design professionals from across the US. The Dayton region and the city of Oxford recognize Hawthorn Hill as an internationally significant community asset and have vested interests in promoting it as one of the area's most important heritage tourism resources. The Wright Family Foundation and the Aviation Heritage Foundation are consulting with established historic preservation organizations to ensure that the project is indefinitely sustainable through the site's eventual incorporation into the national park and meets the highest standards for historic preservation and interpretation. | Aviation Heritage Foundation, Inc. | 60 | 0 to 30 days | \$1,500,000 |
| Montgomery | Stubbs Park Veterans Memorial Phase II | Construct Phase 1B & Phase 2 of Veterans Memorial at Leonard Stubbs Park. This project includes completion of the Memorial structure by placing bronze medallions on each end and maintenance including sealing of the granite structure and re-sanding of the brick plaza. Phase 2 constructs a 5-foot wide brick walkway around the perimeter of the adjoining lake for future expansion of the Memorial site. | City of Centerville | 15 | 31 to 90 days | \$150,000 |
| Montgomery | Stubbs Park Playground Equipment | Construct a new playground & fitness trail in city owned public park. | City of Centerville | 10 | 31 to 90 days | \$25,000 |
| Montgomery | Wastewater Treatment Plant Rehab. | Electrical upgrade, move all electric breaker boxes and power sources into new power supply building/enclosure floor. Resurface driveway and parking lot as plan. Purchase 2 new generators for lift stations use during power outages. Replace 3 sludge pumps. Pump sludge for tank for loading outbound trucks with liquid sludge. | Village of Farmerville | 32 | 31 to 90 days | \$235,000 |
| Montgomery | Stubbs Park Shelter | Construct a new picnic shelter at Leonard Stubbs Memorial Park. | City of Centerville | 10 | 91 to 180 days | \$45,000 |
| Montgomery | Stubbs Park Maintenance Building | Construct a new maintenance facility at Leonard Stubbs Memorial Park. | City of Centerville | 35 | 91 to 180 days | \$350,000 |
| Montgomery | Downtown Street Project | Installation of new lighting for the downtown Center 50 area. This is the business district. All underground pvc. | Village of Farmerville | 26 | 0 to 30 days | \$100,000 |
| Montgomery | Stubbs Park Pond Improvements | To armor and stabilize pond banks to protect against erosion. | City of Centerville | 10 | 31 to 90 days | \$20,000 |
| Montgomery | Stubbs Park Entry Improvement | Reconfiguration of the entryway to Leonard Stubbs Park in the City of Centerville. This project requires shifting the main entrance on Sping Valley Road to improve inspection distance, vehicle tracking and safety as well as improve access to the Veterans Memorial. | City of Centerville | 12 | 91 to 180 days | \$120,000 |
| Montgomery | education | Have been unemployed for over a year. Need funds for education for employment. | self | 1 | 0 to 30 days | \$5,000 |
| Montgomery | Salt Barn and Equipment Storage Facility | The City of Clayton needs to replace its 40-year old salt storage facility which is in a residential neighborhood. The new 3500 sq ft facility will be located in the Commons Park. The project will include a 40'x60' salt barn and an attached storage facility for snow plows and road maintenance equipment. The facility will house brine and beet juice mixing tanks for snow events, as well as a truck wash (with water reclamation system) to maintain the equipment. A 200 linear foot road and water/sewer lines will need to be extended to access the facility. The centralized service facility will make it easier for crews to service roads in snow events. Road crews need to maintain 212 miles of streets across 18.4 square miles. The City already covers this property. | City of Clayton | 10 | 91 to 180 days | \$611,675 |
| Montgomery | Rose Estates Ditch Repair/Regrading | The additional road and sewer infrastructure will also enhance development potential for the remainder of the 143-acre Commons Park site. Repair and reconstruction of 1,522 linear feet of concrete ditch lining along the Rose Estates Tributary from Sheehan Road to its terminus 167 feet north of Marlene Avenue Way. | City of Centerville | 10 | 31 to 90 days | \$80,000 |
| Montgomery | Village Wide Sidewalk Rehab. | This sidewalk would benefit the entire Farmerville area, it would improve an already established sidewalk program. Help the safety of all residents whom use our walks. | Village of Farmerville | 18 | 0 to 30 days | \$120,000 |
| Montgomery | Millbank Ditch Repair/Reconstruction | Repair and reconstruction of 3,107 linear feet of concrete ditch lining along the Centerville Tributary from Marshall Road to its terminus north of Norinda Drive. | City of Centerville | 17 | 31 to 90 days | \$170,000 |
| Montgomery | education | Need funds for education for better employment | self | 0 to 30 days | \$0 | |
| Montgomery | Forest Brook Ditch Repair/Reconstruction | Repair and reconstruction of 1,575 linear feet of concrete ditch lining of the Centerville Tributary along the center median of Forest Brook Boulevard. This project also includes regrading of ground covers, ditches and easement between the median. The installation of a backup generator for water treatment plant will provide power to plant in case of power outage. This is needed per EPA standards. Plus we only have enough water storage for approx 22 hours. | City of Centerville | 10 | 31 to 90 days | \$85,000 |
| Montgomery | Backup Generator for Water Treatment Plant | The Village supplies water to approx. 465 residents and businesses plus Valley View Schools. | Village of Farmerville | 8 | 0 to 30 days | \$45,000 |
| Montgomery | Concept East Ditch Repair/Reconstruction | Repair and reconstruction of 2,065 linear feet of concrete ditch lining along the Sugar Creek Tributary from its beginning 227 feet north of Bellingham Drive to its terminus 209 feet east of Charente Lane. | City of Centerville | 10 | 31 to 90 days | \$80,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Montgomery | Project Rebuild Dayton | Project Rebuild Dayton is aimed at revitalizing Dayton neighborhoods by the removal and rebuilding of abandoned houses at the same time retaining and creating new jobs within the Dayton Communities. Project Rebuild Dayton has 4 major goals: 1. Give new life and vigor to Dayton neighborhoods by the removal of abandoned houses and the building of new houses on these sites. 2. Create affordable, excellent condition housing for low income families in the Dayton area. Approximately 20% of all housing would be available for purchase by these families and the other 80% would be rental units with the purpose of providing Project Rebuild Dayton income for investment. 3. Retain numerous jobs in the Dayton Community as well as immediately create approximately 5-10 new jobs. Project Dayton is aimed helping families by keeping jobs in the Dayton Communities that would otherwise be lost as well as create new permanent positions within Tharaker LLC. 4. Build a viable community project that will be self sustaining by the end of the 4 year project. Ultimately this project will be confined throughout the community from revenues generated by sales and rentals of the properties. | Tnarterk LLC | 30 | 31 to 90 days | \$4,161,000 |
| Montgomery | Providing medical billing services | Reimbursement for Medical Services would invest in high tech equipment for the processing of Medical Claims for physicians, hospitals, and medical facilities. This project would also enable these medical centers to utilize Electronic Medical Records to meet federal and local government requirements for patient medical records. Our company would be able to increase our employee base and provide education and training to the employees to enhance their skills which would allow them to be employable in other administrative areas of the medical field. By being able to incorporate Electronic Medical Records along with continued Physician education we will be able to help in the overall reduction of healthcare costs. | Reimbursement for Medical Services | 50 | 31 to 90 days | \$500,000 |
| Montgomery | Bucher Expansion | Would pay off existing debt and purchase new equipment to make company more competitive in getting new business. New equipment would be comparable to plate processors & digital press. Both allow for much faster production on printed projects. This is what is required in today's fast paced environment. Current debt prevents buying this new equipment. | Booker Enterprises Inc. dba Bucher Printing | 10 | 0 to 30 days | \$500,000 |
| Montgomery | Renovation Completion and Line Expansion | Lipo Technologies Inc. purchased and began renovation of a dilapidated building behind its current location to expand operations and started renovations of current location. While currently weathering the recession 12 jobs had to be cut and the renovations halted due to dried up cash flow. Current business opportunities exist but can't be brought in because of the halt in renovation. By finishing the renovation and adding required capital equipment, LTI will save the 24 current jobs and be able to add 20 additional jobs upon completion of the renovation as a result of the new business. This will increase cash flow, stabilize the operation, satisfy job security and provide for 20 currently nonexistent positions. Full accountability for fund management can be provided and quantifiable metrics would be put into place to show the impact the funds had improving the business and adding the jobs. | Lipo Technologies Inc. | 44 | 91 to 180 days | \$2,000,000 |
| Montgomery | New Business Development | New business development benefiting local residents including retirement communities. The business centers around education, training and therapy through arts & crafts. Projects provide fine motor skill therapy for active seniors and general life enrichment for all participants. Potential to create 100s of full and part time jobs depending on future expansion. | Your Scrapping Cafe | 60 | 0 to 30 days | \$300,000 |
| Montgomery | Green environment friendly electric carpet cleanin | A Patented Professional carpet cleaning machine that uses only 15 amps of electricity (uses no gasoline or diesel like all the other similar equipment machines on the planet) and also uses clean burning 12 for a heat source, all mounted in a van, for residential and commercial use, upholstery, and tile and grout cleaning. | Savage-1 Truckmounts | 20 | 0 to 30 days | \$250,000 |
| Montgomery | Multi Service Business | Patent # 6,625,844 granted in 2003 www.savage-1.com It is the intention of the company to provide the client, services that directly affect personal, property, and potential liability of individuals, families, and small businesses. Home and Building Inspection: providing the client a written itemization and detailed summation of the findings of a professional home inspection with regard to a subject property. Property Maintenance/Handyman: to provide services that involve home or property improvement of a residential or commercial structure and exterior of client's property which may include, repair, modification, project implementation and design. Person Concierge: provides services for clients and their everyday needs in the areas of personal shopping or assistance. The city of Oakwood has been authorized to upgrade the safety and maintenance of the transportation along the entire length of Far Hills Avenue (2.2 miles) and along the entire length of Patterson Road (0.6 miles) within our corporate boundaries. A map of the project area is attached. Both of these roadways are classified as arterials on the M/RPC functional classification map. The entire project to take place within the existing right-of-way. | At Your Service by Steve | 10 | 0 to 30 days | \$100,000 |
| Montgomery | Far Hills Avenue and Patterson Road Intersection I | There are two basic components to the project: 1) replacement of current ramps with ADA compliant ramps and the associated work; and 2) signal equipment replacement and upgrade. This project is not currently funded in the city of Oakwood's capital improvement program. Far Hills Avenue is programmed for government planning and overlay in 2011 as MD-48-8.67 and the requested funds will complete the upgrades to facilities required so that it may proceed. | City of Oakwood | 20 | 181 days or more | \$375,431 |
| Montgomery | home repairs | roof needs replaced, soffits, rafters, ceilings needs replaced, damage to home in general and needs numerous repairs. | courtade | 1 | 31 to 90 days | \$20,000 |
| Montgomery | Truck Rental Service | The funding requested is to establish a truck rental operation that will feature a new technology vehicle that will demonstrate the unique advantage offered by a fully electric over the road class B tractor trailer application. Operation of the planned 10 vehicles will first be placed into existing fleets to show the direct savings that can be achieved as well as the reliability the system will have prior to fleet acceptance. With the completion of fleet testing the vehicles will be placed in our company as rental products for small business owners and some of the current operators who have lost their vehicles during the fuel surge less than a year ago. The vehicles that we can provide will allow even the worst managers to finally start to see daylight operating a vehicle that actually will save them in the cost to do business. | Power Products, LTD | 35 | 0 to 30 days | \$900,000 |
| Montgomery | Expansion of business | My business has been established since 1990 and at one time was quite profitable. Since the loss of my husband and the loss of my business partner we are not able to grow and are on the verge of closing the doors. I am an EDCOE and minority vendor and I don't have the working capital to continue to grow. I am in desperate need money to operate my business which is on the verge of closing. I would be able to continue to stay open and grow, which would lead to hiring more personnel. There are many people who have lost jobs and my small business would be able to take advantage and put some of these people to work. | Laser Products, Inc. | 3 | 0 to 30 days | \$50,000 |
| Montgomery | Pick Tools | Start a stamping and plastic injection company to manufacture tools. Employ several full time, several part time and maintenance. To be located in Kettering and employ people from the Dayton area. Potential sales from \$500,000 to \$2,000,000 per year in 5 years. | Non-Structured Partnership | 6 | 0 to 30 days | \$250,000 |
| Montgomery | Information Technology Startup Expansion | We are a software development and design studio in Dayton, Ohio. As a new technology startup company we are excited in the Microsoft BizSpark network. We build custom software solutions and developed based technology systems. We target small to medium sized businesses and serve as their outsourced development and information technology department. We will hire new development staff, support staff and sales staff. We will also expand our current technology infrastructure to support our existing customers and attract new business as well as expand our research and development efforts. | noEarth LLC | 10 | 0 to 30 days | \$1,000,000 |
| Montgomery | Small Business Growth = Opportunity | I'm submitting a proposal to grow my small business in order to help boost the local economy. The business was established in 07 and currently is surviving on minimal equipment. An economic stimulus would allow me to purchase another truck, dump trailer, landscaping tools, etc. I am the only one able to run this business. My proposal is honest and submitted with the utmost integrity. Thank you for your attention. | Other Side Lawn & Landscape | 10 | 31 to 90 days | \$40,000 |
| Montgomery | Healthcare Expansion | Midwest Therapy Associates is a 10 year old healthcare rehabilitation company (small business) which provides Physical therapy, Speech therapy and Occupational therapy all ages. Midwest is owned by a practicing Speech Therapist and was profitable for 13 years but has shown a loss for the last 2 years. In the spirit of small business as well as a commitment to continue to provide needed services (many of which are on Medicaid assistance) the owner has invested \$400,000 of his own money, amassed \$300,000 in bank loans and \$200,000 in credit card loans to build and operate the clinic where these services are provided. In addition, there were 2 quarters in 2008 in which Midwest was delinquent on federal taxes. The owner himself did not take a salary for 4 of the last 5 years, even though he was (and is) working 12 hours a day providing therapy. The infrastructure has been rebuilt, debts are being current and financial obligations are renewed being met. A stimulus package grant would allow pay down of debt, retention and addition of therapy staff and further expansion of the much needed services we provide. We see many autistic children and retired military. Please consider. | Midwest Therapy Associates, Inc. | 50 | 0 to 30 days | \$800,000 |
| Montgomery | Solar and Wind Power Program | The solar and wind project, that Sustained Resource Technologies, LLC is proposing is one of most important for safety and energy independence. The amount estimated will sustain their fifty jobs and create twenty new jobs in just the first year. By installing an ultra-reliable renewable (sunlight, and small wind turbines) in combination with (biogas, and battery reservation), to provide emergency power for long periods of time, and alternative power source in regards to lower utility bills and provide off grid areas with self sustainable source of energy. The predicted outcomes is to create more jobs than expected, and to provide a secure source of power for residential homes, and commercial buildings in Montgomery County, The City, and surrounding county where zoning permits. A reduction in utility bills will be the main benefit and a year round benefit, depending on the power required, and the combination of natural resource is realized in allowed. The output of the power produced can vary from the ability to power a whole house of moderate size, or just a portion which can be a whole level or just a room or two rooms. For more details feel free to contact me. | Sustained Resoure Technologies, LLC | 70 | 31 to 90 days | \$1,840,581 |
| Montgomery | homeless housing project | A housing center that will take in homeless people and give them shelter, clothing and training to get them back to the work environment and also will help housing to the low income families. | corvette's housing inc | 200 | 91 to 180 days | \$40,000 |
| Montgomery | Community Family Restaurant | This is an existing community restaurant that currently employs 30 poverty level employees. We used to employ 55. We have been in business 15 years. We do about \$40,000 back to the community every year in some form or another. We generate more than 1,000,000.00 in annual sales which along goes as the sales tax, we generate an addition \$300,000.00 in salaries and buy \$450,000.00 in goods and services from all local sources. We will hire another 25 under poverty employees. \$150,000 in public assistance will be eliminated by the hiring the additional poverty level employees. We will also retain employees with down syndrome. The facility will generate 4000 customer per week to the abandon retail center which will attract more retailers and more poor folks. Please consider helping us renovate and rejuvenate this neighborhood. | Beef O'Brady's Family Restaurants | 50 | 0 to 30 days | \$475,000 |
| Montgomery | Career College offering LPN, RN, MA, MT STNA progr | The School is being purchased out of bankruptcy at this time. As the credit market has worsened, the school could not pay the bills of credit to meet payroll for 120 days against revenues from federally funded programs such as Workforce Enhancement, BVA, TAA, etc. If we had not stepped in at the end of November 2008, the school would have closed its doors leaving students to being placed in new programs. While while awaiting tax dollars that had been invested in their education, time on programs to fund living expenses until graduation and employment, teachers laid off from high paying teaching careers, commercial building left to decay, etc. We have a desperate need in this nation for RNs, LPNs, MA's, etc. We need these students to finish their education, being placed on a job, start living a critical security in our healthcare system, and start paying payroll taxes so that more students can be educated. | Scarlett Cross College Healthcare Career Education | 250 | 0 to 30 days | \$250,000 |
| Montgomery | Small Business Benefits | We are not able to get a loan as all credit markets have been closed to credit worthy collateralized loans, that we were seeking. We sought advice from area agencies that we have been vendors for and they sent us to the website to apply for stimulus money so we can move on. Government is acquiring new Claims and Fraud Detection and Training for new employees, training on new equipment to avail new employees to jobs that are in demand and require heavy duty equipment. Purchase benefits for all new employees. | Small Janitorial Service | 22 | 0 | \$35,000 |
| Montgomery | Small Business growth for Ohio | We are a sub-contractor for Lowe's Home Improvements stores. We sub-contract as an installer for 5 area stores in Montgomery County. We have worked for Lowe's since 2007. We have an opportunity to grow our business and hire workers through Lowe's. We need to invest in a warehouse space to lease and have a business address to ship materials to our customers, warehouse as our work and store and retail the materials. We are limited to the jobs we can get because we do not have a warehouse. By getting a warehouse we would need to hire a full time secretary, and additional employees for installation projects. | Barker Home Improvements | 3 | 0 to 30 days | \$25,000 |
| Montgomery | addition to house for foster/adopted children | We have currently 9 people living in a 1800 square foot house. We have two adults (me and I Husband), three biological children, and four foster adopt children. Our adoption is to be complete in April or May 2009 on a sibling group of four. Since taking in the four kids we need additional bedrooms and need a addition to our house to make our house more liveable for ourselves and children. | Foster Parent to adopt | 0 | 0 to 30 days | \$25,000 |

|----------------|--|---|---------------------------------------|----------------|--------------------|---------------------------|
| Montgomery | open arms for the elderly | A home for the unfortunate elderly who has no where to go and no proper care. I want to give of myself to help them as they have for every one of us in our generation. My plan goal is to house them and feed and have activities and fun things for them to do. To be able to enjoy what quality of life they have left. So many of our elderly our best with no love to care or show them the love they need. I have been in the health care for 35 years and this has been my dream. I want to help them so bad but do not have the funds. please make this dream of mine come true! I know I have the heart to make it work with jobs that would be created for others. thank you very much. sincerely, Michale Bobak | housing for the unfortunate elderly | 40 | 91 to 180 days | \$1,500,000 |
| Montgomery | Whittakers | New roofing for 2 ranch homes (1 for blind mother). Also needed to assist blind mother like special glasses (she can see a little for about a minute), new toilet for blind mother and me. Sheet metal for new porch roof to replace dangerous one. I will be able to assist my mother who had strokes last year with medical calls and transportation as needed. I know this is a lot to ask but she could use the help and so could I as my back porch roof keeps hurting people. Especially my husband. Thank you. | Whittakers | 50 | 91 to 180 days | \$50,000 |
| Montgomery | Metaphor Press | Have a complete business plan of a magazine I wish to launch. I've been researching this over for a year now, and I think I have the majority of that needed in order. I haven't launched yet as I'm waiting to secure enough funds for a decent launch. | Contiga Broadcasting Corporation | 15 | 91 to 180 days | \$12,000 |
| Montgomery | Driftwood Clothing | We're looking to expand our current indie clothing line, which includes pushing it out to retail shopping stores and shops in the malls, to bring in more revenue. We also want to hire on designers, artists, marketing agents, lawyers, and an overall staff. | Driftwood Clothing | 4 | 0 to 30 days | \$2,000 |
| Montgomery | Habitable Housing for my family | I am a property owner with 6 dependants. I make my mortgage payments on time but I don't have the funds to make necessary improvements or repairs to my property. The water lines need replaced. The windows are in need of repair or replacement. The roof was badly damaged in the wind storms in September and the insurance won't pay for the replacement. My heating system is old and inefficient and needs to be replaced. If I receive the funding I could have all needed work done for \$20,000 I can pay about \$2000 if you can help with the balance I would appreciate the assistance. | Armstrong Family | 6 | 0 to 30 days | \$18,000 |
| Montgomery | CONTINUE TO KEEP EMPLOYEES WORKING | THIS IS HELP TO KEEP MY SMALL BUSINESS OPERATING AND KEEP EMPLOYEES WORKING | KING'S CONTRACTORS | 5 | 0 to 30 days | \$30,000 |
| Montgomery | Cobra payments after 9 months | The fund should help people who is using cobra insurance more than 9 months but still paying very expensive cobra insurance until 18 months. We have been using Cobra for more than 9 months, but will need help to pay for the rest of month. | Ani Tyler | 3 | 0 to 30 days | \$4,000 |
| Montgomery | WEATHERIZE LOWINCOME RENTALS | 1 Replace old windows and doors with energy efficient models for the heating and cooling costs of my low income renters in four of my properties in Dayton, Ohio. 2 Airic insulation to lower heating and cooling costs of my low income renters in four of my properties in Dayton, Ohio. 3 Wall insulation to lower heating and cooling costs of my low income renters in four of my properties in Dayton, Ohio. 4 Furnace upgrades to lower heating and cooling costs of my low income renters in four of my properties in Dayton, Ohio. | Grant Investments | 5 | 0 to 30 days | \$25,850 |
| Montgomery | fatou'sNursing home | I am register nurse I have a lot of experience in the healthcare business. I don't like to work to anybody I want to start my own business. | fatou'sNursing home | 25 | 91 to 180 days | \$20,000,000 |
| Montgomery | Small Business Expansion Project | I am requesting the \$7500 to expand my business and will use 80% of the money to have local unemployed persons to complete the needed normal setting assignments. This funding money will go back into the hands of those who need it most. I have a business plan and will pay for business related expenses. All of these will be on a work-from-home basis, saving energy and providing opportunities to people who are displaced workers who otherwise would not participate in the workforce. Once the project is underway, it could provide 133 additional full-time positions in addition to the contract positions. | Willedorf Studios | 3 | 0 to 30 days | \$7,500 |
| Montgomery | Phoenix Project | The Phoenix Project is a start up for profit health care business that will be part prevention, part health maintenance, part active seniors and those affected with stroke and Alzheimer disease. We will build a new Senior Day Care and Activity Center in the Dayton area. The project will be the state of the art building, 28,000 sq. ft., will be using Ohio based companies and materials, that will provide 200-250 jobs. These services will range from health activity programs designed to keep seniors healthy and assist those in need of therapy, to health care services care through a holistic program of health care. Food services, transportation, energy, medical care, and personal care services. The project will be a model for all to include much more. Skilled and unskilled jobs are required for this type of business and its estimated 60 to 75 people will be required to full staff this operation. Vehicles, furniture, health equipment, food equipment, and many more things will need purchased to properly make this project viable and provide a high standard of service which will increase into success. | Phoenix HealthCare Systems | 60 | 0 to 30 days | \$6,000,000 |

| Montgomery | Expansion Project | Bluff Project description: An Egon Printer would be purchased, enabling my company to offer an and photographic prints to our existing and future customers. We would also hire 2 employees to assist in our day-to-day operations and purchase a hybrid SUV made by one of the Big 3 automakers so that we could offer delivery of our products and make sales calls to potential customers within 100 miles of our location. Expected Outcomes: My husband and I (co-own Centerville Framing & Gifts. I lost my 9th job in 2004 and he lost his job in the lithium and both industry soon after. I have an associates degree in real estate and my husband has a GED. We are also experts in the field of picture framing with a combined 50 years experience and would both need to be retrained if we lost our business, along with losing our modest home that we own. We are already highly respected within our community and are hoping to take our business to the next level with the help of stimulus funds. | King 7 Enterprises LLC | 4 | 0 to 30 days | \$50,000 |
| Montgomery | Home Improvement | We really need install new floors to help retain heat/install new gutters | none | 10 | 31 to 90 days | \$25,000 |
| Montgomery | Medical billing start up | I am just starting a billing company and need funds for a job of business and new computer material to support a possible large client. If the business is allowed to grow, my business could generate anywhere from 8 employees minimum to double this amount. This company would not pay create jobs immediately but would be maintained as long as the business is successful. I have already present company that I currently own and operate for 9 years that I can create jobs and assure longevity for employees. The company is ready to start but just needs some help to get going. For the State of Ohio to Loan me \$35,000.00 plus interest and to be paid back at \$500.00 per month for 38 months, so that my husband and myself can pay 3 months back mortgage payments, pay off the 2nd mortgage and pay of charges. We are both 60yrs of age and I work 2 jobs, my husband works 2 jobs, need a loan to get a good job, working for \$1200 a year, we just keep getting deeper in debt. We can't get a modified loan, as they say we don't have enough money coming in each month, and I have tried every where to get a loan, for over a year. to pay things off to no avail. We promise to pay back every thing and will pay interest so that we can keep our home of 22 years and retire when we reach 67. Thank you Linda Loeck | Innovative Healthcare Services | 10 | 0 to 30 days | \$140,000 |
| Montgomery | loan assistance to be paid back to State of Ohio | Investing in the energy efficiency of Dayton Area nonprofit agencies will benefit a struggling region by redirecting critical dollars to human services while making the community more "green". Increased energy efficiency will allow nonprofits to reduce dollars spent on energy and thus free up additional dollars for much needed health and human services programs. A December 2008 survey of the effects of the current recession on local nonprofit agencies showed seven out of ten agencies (89%) are experiencing a decline in revenue this year. With average losses at 17% and anticipated further reductions in donations, it is imperative that strategies be realized to administrative overhead (staff, basic leases). Resources for this project would support hiring 5 local college Engineering students to complete energy audits at agency facilities and would provide funds to install the recommended improvements and purchase needed energy efficiency materials such as replacement windows, updated appliances, caulking windows, and/or environmentally friendly materials such as energy efficient light bulbs or recycling bins. New Exclusive Architectural Millwork Products & the supporting e-commerce website to sell on-line for American Made Products Production in Dayton, Ohio from an existing company of 65 Years if able to develop a go to market it could not only add 20+ jobs (some recovered from our company's 70% layoff) but also be recession proof! Please help our Company help the Dayton workforce and most importantly our laid-off employees some that have been with our company over 35 Years! | Low Residence | 2 | 0 to 30 days | \$35,000 |

| Montgomery | New Product Development & e-commerce Website | The Dayton area is undergoing a severe economic transition. Thousands of hardworking families are struggling to meet their basic needs. Calls to HelpLink for basic needs increased 121% from 2007 to 2008 for a total of 47,274 calls. Calls for legal services, especially mortgage and rent assistance were up 117%, and calls related to income security increased 100%. HelpLink 2-1-1 provides streamlined linkages to over 2000 health and human service agencies in the local area. Linkages include but are not limited to personal and financial counseling (food/benefits/recreation and child management), employment training, emergency food and shelter, healthcare, legal assistance and more. Grant dollars would support increasing the HelpLink 2-1-1 coordination services by providing support for 5 part-time HelpLink staff and providing \$10,000 in emergency financial assistance to the working poor for basic needs assistance with items like mortgage foreclosures, eviction notices, and prescription assistance. | Manufacturing Company | 20 | 31 to 90 days | \$10,000 |
| Montgomery | HelpLink 2-1-1 Information and Referral | To restore and/or retain nonprofit jobs to ensure adequate capacity to meet the increased demand for health and human services in the Dayton area. The focused reduction of nonprofit staff occurring due to the recession will negatively impact the number of local residents who can access basic need job/retraining services when the demand for life-and-income-sustaining services is sky-rocketing. A December 08 survey on the impact of the recession on the Dayton agency network shows that the capacity to meet the demand is at risk. 59% of local agencies are being reneved this year with an average decline of 17%. As a result 41% are laying-off staff and 38% are reducing staff hours. One of our five has already had to eliminate programs and/or reduce services. The US United Way campaign that supports the network is down \$ 6 million or 95% from 07 which will force additional cuts at the agencies. The unemployment rate in the Dayton metro area has increased more than 50% since 2007 with a projection of reaching 11% in 2010. A grant for increased professional assistance is essential to meet the basic needs and re-training requirements of Dayton's huge unemployed workforce. The project consists of the redeployment of approximately 1100 lower level of assisting asphalt street. This request is for the construction of approximately 1100 linear feet of sanitary sewer. | United Way of the Greater Dayton Area | 5 | 31 to 90 days | \$60,000 |
| Montgomery | Greater Dayton Nonprofit Network Stabilization | To restore and/or retain nonprofit jobs to ensure adequate capacity to meet the increased demand for health and human services in the Dayton area. | Montgomery | Phillipsburg W. Main St. Reconstruction | FormShare Academy brings schools into the 21st century by providing them with business process automation. This technology dramatically reduces administrative and material costs. By using Academy, school district personnel are freed up to focus on value-added activities. By developing additional modules for our existing paperless workflow system for schools districts, administrative and material costs will be further reduced. Currently Academy integrates with state databases that house school district data. Integration with other state and vendor system will drive further efficiencies for school districts. Simultaneously this application assists school administrators to more efficiently and accurately report on their data. By gathering the data closer to the source of the data and by creating audit trails on all the information, data integrity is dramatically increased. Continued development of Academy will result immediately in Ohio jobs, reduced costs for schools, and more efficiency for schools. Additionally by further developing this platform and building additional modules, the application will gain sales outside of Ohio with the rest of more high pay | Mote & Associates, Inc. | 20 | 31 to 90 days | \$115,000 |

|----------------|--|---|---|----------------|--------------------|---------------------------|
| Montgomery | HelpLink 2-1-1 dislocated worker assistance | In the Dayton Metro Area 40,000 jobs have been lost due to manufacturing plant closings, industrial downsizing, and their ripple effects since 2000. Individuals and families throughout the region are experiencing extreme financial crises, creating an urgent and unusual demand for financial stability services from the local health and human services network. Demand for financial stability resources through HelpLink 2-1-1 doubled from 2007 to 2008 and is expected to continue rising throughout 2009. Resources are needed to enhance the community's capacity to provide coordinated services to individuals and families who are experiencing financial hardship due to economic instability. These resources will increase the capacity of HelpLink 2-1-1 to provide streamlined linkages to over 2000 agencies, ensure at least 200 residents have access to services, secure the continued employment of two Community Resource Consultants to work specifically with Dislocated Workers, and make available \$10,000 of direct financial assistance for those facing foreclosure, eviction, or utility shut off. | United Way of the Greater Dayton Area | 2 | 31 to 90 days | \$110,000 |
| Montgomery | Westhaver St sanitary sewer parallel replacement | 250 LF of sanitary sewer will be constructed to alleviate overflow conditions upstream | City of Vandalia | 6 | 91 to 180 days | \$40,000 |
| Montgomery | Phillipsburg W. Main Street Reconstruction | The project includes the reconstruction of approximately 1100 linear feet of existing asphalt street. The stimulus request involves the replacement of approximately 1100 linear feet of old waterline with larger waterline. Montgomery Counties. The MVC has some of the oldest camps in the country, namely, Cider Hooker which open in 1922, and Woodland Trails which opened in 1950, and an in a day need for repair/restoration. We have broken the work into many projects, ranging from building a Service Center (12,000 sf), Over 1 mile of Road Improvements/Paving five have camp sites that only if volunteers can get too. Many Road Replacements (There are actual holes in some roads), Phase 2 completion of a Water System (both near clean drinking water, Clear Power Lines (safety issues), Renovate the swimming pool (which current leaks, no female showers, etc), repairing various camp area, repair the boat house, repair the kitchen floor that is starting to fall in, etc. All money funds will be used on capital improvements Besides helping to keep construction jobs here, the scouts also collects hundreds of tons of can goods for local food banks, this year goal is 100 tons, and 100,000+ hours of community service project, this year will probably be over 30,000 hours. The yea | Village of Phillipsburg- Mote & Associates, Inc. | 20 | 31 to 90 days | \$112,000 |
| Montgomery | MVCSA Camp renovations | We have broken the work into many projects, ranging from building a Service Center (12,000 sf), Over 1 mile of Road Improvements/Paving five have camp sites that only if volunteers can get too. | Montgomery | Improved Service to Youth in the Public Library | Renovation of a portion of a public library building constructed in 1938. Expected outcome is increased capacity to meet needs of community's children and youth. Library has a strong commitment to cooperation with local school district for support of formal education and is very involved in preparing preschoolers to learn and also in providing constructive activities for teens. Library programs incorporate educational elements and have as a goal the development of lifelong learning abilities and habits. Expected outcome is increased use of library facility with 10% increase in circulation and 10% increase in program participation after project completion. Experience and training in photography can be utilized to earn a living wage on a work schedule that my health allows. I seek the financial purchase the additional equipment that I need to be able to work as an assistant to work on a schedule that my health allows. I seek the financial gain. This would put two people back in the workforce, paying income taxes and generating sales tax and new business to support local in Ohio. To some this may sound frivolous, to me this would be a rebirth and new start on life and living, an opportunity to report on my productive manner. Outcome expected: two new jobs, new income taxes paid, new sales taxes generated, equipment and supply purchased. My wife and I in Ohio, travel to work in Ohio, travel to sell new products, expand my business. Most rewarding outcome, offering pride in working again and being a productive part of CHD. Thank you for reviewing my application and considering my request. Hank Dzwakal | Wright Memorial Public Library | 20 | 31 to 90 days | \$100,000 |
| Montgomery | Start-up Photography by Hank | Outcome expected: two new jobs, new income taxes paid, new sales taxes generated, equipment and supply purchased. | Montgomery | Phillipsburg Wastewater System Improvements | Project will include approximately 17,000 linear feet of sanitary collection sewer in the Village of Phillipsburg and approximately 16,000 linear feet of trunk sanitary sewer to connect to a neighboring central sewer system. | Mote & Associates, Inc. | 20 | 91 to 180 days | \$6,500,000 |
| Montgomery | Cleveland Park Sanitary Sewer Improvements | Program WPCFL - The scope of this project is to install approximately 1,000 LF of 18" sanitary sewer through Cleveland Park. Requires hand-digging both to collect 12" sanitary sewer and an aging 12" sanitary sewer. | City of Dayton, Department of Water | 6 | 0 to 30 days | \$500,000 |
| Montgomery | Airport Land Use and Development Option Plan | The Airport Land Use and Development Option Plan (LUDOP) will create a project development site that will attract new businesses to the airport and surrounding communities, stimulate the job market, increase non-airline revenues, and improve the aesthetics around the Dayton International Airport. The project calls for infrastructure development including utilities, permanent traffic control, and approximately 12,800 linear feet of new roadway. Ultimately this project will divert airport operational costs away from the airlines, lower operating costs help to attract and stimulate capacity. The plan should attract a combination of retail support, office support, warehouse/distribution, supply chain related businesses. The above listed site will be able to accommodate need over 2million feet of usable space. | City of Dayton Dayton International Airport | 652 | 91 to 180 days | \$10,500,000 |
| Montgomery | Industrial Wood Packaging and Recycling | New band saw equipment. New wood recycling bandmill machine. 1 Truck. 3-4 trailers. Six month salary for manager. Above assets would increase current business from \$300M to \$750 equipment. | National Pallet and Mulch | 6 | 31 to 90 days | \$150,000 |
| Montgomery | Haverfield Road Sanitary Sewer Improvements | Program WPCFL - The scope of this project is to update approximately 1,100 LF. of sanitary sewer along Haverfield Road. Requires hand-digging/ trenching 1,000 LF. of undersized 10" sanitary sewer and upgrading to 12" sanitary sewer. This project also requires abandoning an existing siphon that will be replaced with a new siphon. | City of Dayton, Department of Water | 6 | 0 to 30 days | \$200,000 |
| Montgomery | Home project | I am retired and I did not to my house, I do want to stay in my home, if I can get my home and credit cards payed off, it will help greatly. The way banks are raising interest or cutting credit has hurt me. This will stimulate the economy by taking toxic assets off the books | n/a | 31 to 90 days | \$190,000 | |
| Montgomery | Wyoming Street Sanitary Sewer Improvements | Program WPCFL - The scope of this project is to update approximately 800 LF. of 8" sanitary sewer along Wyoming Street. Requires the installation of 12" sanitary sewer to accommodate the improvements in sanitary sewer that are attributed to the Miami Valley Hospital's new construction. | City of Dayton, Department of Water | 6 | 0 to 30 days | \$600,000 |
| Montgomery | Building funds/Capital Investment | Our fellowship is looking to invest in an existing building or land to be developed to provide a meeting place for Alcoholics Anonymous. I am a single mother with 3 children living in my home. I am currently unemployed & fighting for my unemployment. I receive child support but it is close to what the children need. My utility bills are outrageous in my home because we have original aluminum windows & doors. I am seeking employment but haven't been able to find a job as of yet. I have been living off my income tax & receiving some help from the state. I do not have enough money to have improvements done to my home to lower utility bills let alone give my children lunch money or even buy their clothes & pay school fees. This money would enable me to make the improvements to our home lowering bills making it more affordable so I can help to be able to take care of my children until I can find partial employment. I have been a productive member of society for 20 years & I am now currently struggling to get gain in the car to get to work for employment. I have considered going back to school as well but again I do not have the money to consider that either. The downward spiral of our economy is affecting ALL people in our country & the children are suffering - our children are the future. Rubber-Tech, Inc. has been in business in Dayton since 1963. We are a small business, with three generations working together. We have ridden the NAFTA boat, which seems to be getting harder and harder to compete with China's minimum wage running between \$.25 and \$.60 per hour. As a manufacturing business we faced challenges after 9/11. We would like to consolidate all of our existing debt, lay out plans for a 10,000 square foot addition implementing a GREEN facility. This would allow us bring back currently laid off employees and add to thirty new jobs. | Alcoholics Anonymous | 10 | 181 days or more | \$100,000 |

| Montgomery | GREEN Facility | Disabled Veteran currently needing to pay down debt and Purchase our first House. If granted this would be our Prayer, and a Beautiful New Year! Thank you, God Bless you, and God Bless the United States of America! | Rubber-Tech, Inc | 50 | 31 to 90 days | \$1,250,000 |
| Montgomery | Stimulus Help | Disabled Veteran currently needing to pay down debt and Purchase our first House. If granted this would be our Prayer, and a Beautiful New Year! Thank you, God Bless you, and God Bless the United States of America! | N/A | 2 | 31 to 90 days | \$50,000 |
| Montgomery | Lynn's Carryout Engraving & Awards, LLC | I own a small carryout/engraving business. The carryout has been here since the early '50's and is grandfathered into the city. It is a dry clean that isn't trying to keep going through the rough economy. However the building is old and in need of repair and updates. I would like to see this business in its former grandeur. This neighborhood is an awesome bunch of people that my husband and I have come to care for, but it is a struggle with the economy. I would like to be able to have people as it is just my husband and I. I have equipment that is just sitting here because I don't have the time or money to invest in material and wages. I have the intellect and drive to help others with this hard time I read is a little help. I would love to be able to have people and family that have no jobs and no place to turn to here are not many engineers still around. I do not work for the city schools and city itself. With the money it will help me expand into new services that I can provide and make jobs. To keep a 63 year old home improvement company from closing it's door for good as a result of the slow economy. | Lynn's Carryout Engraving & Awards, LLC. | 5 | 31 to 90 days | \$25,000 |
| Montgomery | Zephyr Rescue Program | Play off debt Keep current employees and re-hire laid-off employees, to expand company | Zephyr Home Improvement | 30 | 0 to 30 days | \$300,000 |
| Montgomery | Transitioning Ohio's Manufacturing to the Medical | Funds for materials, labor, rent, utilities Automotive sales have negatively impacted our state. Medical device & supply chain is a recession-proof industry and can add jobs to the economy now. Domestically the medical device/product market is growing at 10% per year and offers prime opportunity for large numbers of Ohio manufacturers. A Dayton regional manufacturer & medical device end user consortium seeks \$4 million to enable automotive supply chain manufacturers to transition to the medical device supply chain via creation of new products. Specifically, this initiative will: provide education events to communicate opportunities, 2) create & deploy training curricula specific to medical device/product requirements, developing new workforce skill sets, 3) provide funding to small & medium sized companies for creation of new products/skills specific to medical device markets, 4) develop series of manufacturing activities to medical device end users, and 5) utilize a regional healthcare delivery system as a test bed for new device/products. Algae oil-based production as an energy source is rapidly becoming a viable opportunity enabling a move away from foreign oil dependency. Thruwood, Ohio progressively views building capabilities & physical infrastructure in algae oil production as an important job creation, job training, new business attraction/formation, & community revitalization initiative. This proposal provides a steady revenue site to show scalable Ohio-based algae production yielding sufficient of thereby creating a viable low energy source for the state. | Edison Materials Technology Center (EMTEC) | 160 | 0 to 30 days | \$4,000,000 |
| Montgomery | Algae Pond Fueling Trotwood Job Creation and Revit | Specifically the Thruwood and EMTEC team propose a \$10M initiative to: 1) develop Thruwood as a statewide model in algae oil generation, 2) utilize a 60 acre thruwood ready site for a community algae bio-reactor production installation, 3) create educational/training initiative to support city's underemployed workforce to maintain the installation operations, and 4) provide ongoing traning/opportunities to ensure sustainability for jobs beyond initial stimulus period. This will yield 100 - 150 new direct jobs in five 18 months and additional 100 jobs within 3 years and these jobs are sustained by the ongoing operational needs of the installation. Advanced Energy (AE) is technology that decarbonize Ohio's energy sources enabling a move away from foreign oil dependency. Thruwood Ohio progressively views building capabilities & physical infrastructure in AE as an important job creation, job training, new business attraction/formation, & community revitalization initiative. Thruwood sees AE as a critical factor in developing opportunities to an under-served population to productivity education, energy train, & energy job workforce in high growth markets. | Edison Materials Technology Center (EMTEC) | 200 | 0 to 30 days | \$10,000,000 |
| Montgomery | Advanced Energy Infrastructure Creating Jobs for T | Specifically the team propose a \$40M initiative to: 1) develop Thruwood as statewide model in ethylene transition to AE generation, 2) utilize 70 acre thruwood ready site for up to 4 megawatt (MW) AE installations, 3) create educational/training initiatives with Societal CC & Thruwood Inc. Tech to support city's underemployed workforce to maintain the AE installation operations, and 4) provide ongoing training/services to ensure job sustainability beyond initial stimulus period. This will yield 200 - 300 new direct jobs in five 18 months & additional 200 jobs within 3 years; these jobs are sustained by the ongoing installation's operational needs. | Edison Materials Technology Center (EMTEC) | 800 | 0 to 30 days | \$40,000,000 |

| Montgomery | Photovoltaic Advanced Energy 2 MW Infrastructure C | Photovoltaics (PV) is a technology that can diversify & decentralize Ohio's energy sources enabling a move away from foreign oil dependency. Thruwood Ohio progressively views building capabilities & physical infrastructure in PV as an important job creation, job training, new business attraction/formation, & community revitalization initiative. This is a critical factor in developing a strategic roadmap to productively educate, engage, train, & employ its workforce in high growth energy markets. | Edison Materials Technology Center (EMTEC) | 360 | 0 to 30 days | \$12,000,000 |
| Montgomery | Photovoltaic Advanced Energy 6 MW Infrastructure C | Photovoltaics (PV) is a technology that can diversify & decentralize Ohio's energy sources enabling a move away from foreign oil dependency. Thruwood Ohio progressively views building capabilities & physical infrastructure in PV as an important job creation, job training, new business attraction/formation, & community revitalization initiative. This is a critical factor in developing a strategic roadmap to productively educate, engage, train, & employ its workforce in high growth markets. | Edison Materials Technology Center (EMTEC) | 600 | 0 to 30 days | \$30,000,000 |
| Montgomery | Senior Technology | I am a teacher of high school students. I believe that my students should have the latest technologies needed for a world filled with technology. Because my school is a median income district, there are no federal or state funds to purchase a SmartBoard and computer to run the SmartBoard for my classroom. I have gone to local business and civic organizations as well as the school board, but no one can find the money to allow me to purchase the SmartBoard for my classroom. My students would daily use this technology and would greatly benefit, not just today, but in their future. This project would enable my students to be better college students and hopefully, better workers for Ohio. Thank you for funding my senior project. God Bless! | Valley View Local Schools | 1000 + | 0 to 30 days | \$6,000 |
| Montgomery | rehab homes | Rehab them and help low income families move into energy efficient homes. | Howerton Plumbing Inc | 4 | 0 to 30 days | \$500,000 |
| Montgomery | Grease collection | Would like to become an approved grease trap cleaner servicing restaurants to help keep grease out of the sanitary systems. This project would include purchase of truck Training advertising and hiring personnel. With the stimulus monney we could even offer outdated restaurants discounts to upgrade their greasetraps. | Howerton Plumbing Inc | 3 | 31 to 90 days | \$300,000 |
| Montgomery | Condo energy efficient upgrades - REVISION | THIS IS A REVISION - Previously submitted on 3/1/09 Revised project to include: Association has 19 units that will use the funds to upgrade old furnaces, water heaters and A/C Units. Also, will replace windows and doors to meet more efficient units. Add additional parking to individual units. Will also resurface parking lot. | Marco Lane Condo Association | 2 | 31 to 90 days | \$600,000 |
| Montgomery | decrease credit card debt | My husband got laid off and I was sick and not working in 2003. We had to pay for food and health insurance. We had to pay it all on our credit card. We have 30,000 dollars we are trying to pay off on several cards. We both got a job in 2004 and we were able to pay our monthly bills but unable to pay back the credit card debt. This would be a huge help to us. We also have a 1994 car we need to get out of. We can't go to college. Thank you for your consideration. | Gracey family | 0 | 0 to 30 days | \$15,000 |
| Montgomery | housing rehab | to purchase bank repossessed homes and rehab them to make marketable for resale at reasonable prices. | rhoads home improvements | 10 | 31 to 90 days | \$250,000 |
| Montgomery | Airport Alternative Energy Project | The Alternative Energy Project will consist of the evaluation, selection and implementation of proposed alternative energy sources that will reduce the Airport's reliance on traditional sources of energy. Preliminary research indicates that geothermal and/or solar energy could reduce electricity usage by 75% annually. 2007 gas and electrical usage at the Dayton International Airport soared to over 750,000,000. Over 2,000 jobs that are currently at the Airport will be secured as savings are realized by lower energy costs. 3 objectives 1. eliminate monthly payments on some expansion projects to free up cash flow. This will retain 2 people. 2. Hire 2 people that have good people skills but little or no computer training. Train them on computer skills to use them as front level support and general tasks around the data center. 3. Hire young college graduate (or near graduate) with programming skills to begin their career in programming. | City of Dayton Dayton International Airport | 2125 | 31 to 90 days | \$5,000,000 |
| Montgomery | mPango Stabilized | The two jobs wouldn't pay much initially, but would start the individuals on a career path that could be very rewarding. This would be an alternative to college where an individual would get above average starting wages to learn on the job. The skills they would be learning would transfer to any small, medium or large sized company because they would be on the technologies that are used extensively in businesses (Windows, Linux, servers, networks). | mPango Development Studios, LLC | 5 | 0 to 30 days | \$250,000 |
| Montgomery | Downtown Englewood Renewal | I would like to start my own business in downtown Englewood. There are many empty store fronts that make the downtown area look bleak. My business would be a sports memorabilia store. There are no other businesses like this in the area. Sports memorabilia is a multi-billion dollar business and I know there are many potential customers in the Englewood/Dayton area. I am very knowledgeable in the business and have many ideas to draw and retain customers. I see this business creating 1 to 2 jobs from the start. I have plans for it to expand through internet sales and creating many more jobs in the future and want to be in control of my future and not have to rely on the decisions of others. I would also give back to the community in any way I could. I would have to start off small, maybe by sponsoring a soccer and/or baseball team. I would also have give-aways to get kids interested in sports and collecting. Once the business turns a profit, I would like to pay back the funds given to start it. I will treat this money as a loan, not a gift. | Rebuild Englewood | 2 | 31 to 90 days | \$25,000 |
| Montgomery | ANDRE POGUE HOUSING INVESTMENTS | This project would allow me to rehab homes to sell to people who are below poverty line. This will help with the homelessness in Montgomery county. This could give people the opportunity to own a home with a small mortgage payment. This could help out people with disabilities to be able to own their own home. I could take over mortgages that are too burdensome to help the people keep their homes. This would be a great opportunity for our county when so many people are homeless or behind in mortgages. Redesign and remodel (new floor plan) 6800 SDFP martial arts facility. Upgrade HVAC system, electric and exterior of building. New parking lot and landscaping along with a reformer/booster garden. | ANDRE POGUE HOUSING INVESTMENTS | 4 | 0 to 30 days | \$200,000 |
| Montgomery | School upgrade/ Completion | All this work to be done for a better facility to help not only our local community and their young adults, but also to reach out to underprivileged children as well. Teach them discipline, physical education and most importantly, keep them off the street. We are a financially struggling organization at this time, because of the upkeep needed on the facility. | SukhSandhuMartialArts | 20 | 91 to 180 days | \$400,000 |
| Montgomery | Water Meter Replacement/Upgrade Program | At present 87% of the water meters in the Huber Heights water system are at least 20 years of age and in need of replacement to improve revenue stream and accuracy of readings. The upgrade to automated meter reading would allow monthly meter reading versus quarterly. This upgrade would eliminate the need for estimated water bills 7 to 9 months of the year (weather dependent). | City of Huber Heights | 100 | 31 to 90 days | \$3,000,000 |
| Montgomery | No project | I don't understand. Obama wants this stimulus to jump start the economy. But put no money in the peoples pocket. How is \$17.00 a week going to jump start it. At least Bush gave me \$600.00. I have a job. But need a new truck. I'm not going to buy one with \$17.00 extra a week. It seems like a lot of people are getting this. I don't feel good about the next four years. Thank you. Pats | myself | 1000 | 181 days or more | \$1,000,000,000 |
| Montgomery | JUNGLEDG KENNEL AND RESCUE | I am trying to start a new dog kennel and dog rescue in Montgomery county. I would use the money to provide shelter, food, and vet needs for the animals I take in. I would also build a pet spa where the animals could have activities for exercising and to socialize with other animals. I would also be in any way or untrained animals. I would like to employ 5 people to help with the care of the animals. This would be a great for Montgomery county because there are several animals that are either mismanaged or not wanted. I can get them off the streets so people could feel safe. | JUNGLEDG KENNEL AND RESCUE | 5 | 0 to 30 days | \$750,000 |
| Montgomery | On line Business | I have been researching on line businesses, and am ready to go back to school to complete my bachelors degree in Business Administration while starting my small business. Like many family's we have been affected by the economy and I am ready to take the next step to be self supporting and create new jobs in my area. The cost to complete my degree at Wright State University will be approximately \$18,570.00 the remaining amount of \$17,830.00 will be used to create my on line store and to purchase inventory. I have researched and taken as many free classes that are available (on library, seminars, etc.) to create my business plan and am ready to proceed. But without the funding I am not able to implement my plan. | Self Employment | 3 | 31 to 90 days | \$34,500 |
| Montgomery | revitalize Main street business-design furniture/c | Our company is The "Joinery" in business 20+ years. Joinery is the craft of assembling fine woodwork, doors, paneling, casings, etc. - trim, cabinets, stairs. This differentiates our work from rough carpentry which is what we began. Fine woodworking approaches artwork and commands a good living wage. We employ APPRENTICES and teach them to be SKILLED CABINETMAKERS-JOINERS. As joiners we understand design and are mathematically precise. We have a great working environment. We have a state of the art wood working building in our small town that needs energy improvements. We need new power tools. We would like to train new apprentices who have applied and more for our employees continue to do well. Our issues: We are a solid business that could continue to grow with stimulus help. Our business supports other businesses and subcontractors, electricians, plumbers etc. as we contract with them to complete our projects. | d. b. a. The Joinery / www.timothystatton.com | 6 | 31 to 90 days | \$65,000 |
| Montgomery | national road streetscape, phase 3 | The National Road Streetscape, phase 3 project will have project limits from Maple St to a point just west of Olive Dr over a length of about 950 feet. The major components of the project include removing existing trees and replacing them with new trees, providing decorative lights, removing and repairing existing sidewalk and paving, replacing drive aprons, and upgrading bus stops with new features. 100's of inner city youth off the streets and musically inclined. 100's of urbanites (classical) raised and educated with the arts. Local artists who can't afford studio cost and want to expand their options. | City of Vandalia | 15 | 181 days or more | \$626,050 |
| Montgomery | The Art, The Music, The Child | L. Yeah Productions | 5 | 0 to 30 days | \$10,000 | |
| Montgomery | New Direction | BDS would like to add the ability to add shrink wrap capability's & direct mailing to meet the needs of a current customer located in Cincinnati. Once in place we would go after new business as well. This would require the purchase of equipment from an Ohio based Co. This would allow us to stay in Ohio. It would require an addition of 4 full time employees plus temps as projects moved forward. BDS is in the position to build motor cranes for Honda as well as Navistar, both Ohio Co. This would allow us to hire 10 - 13 more full time employees. We are in position to begin, but can't get the funds to get the equipment needed or order the hardware from a Co. in Dayton up front. We did ask what capital we had remaining to do 150 prototypes that were approved. Our desire is to stay in the better part of Ohio. We have been offered to move to China to a company out of NY. We had 14 employees laid off most of Jan. and all of Feb 09. We currently have all of our own employees plus 12 temp's working. The outlook is good for BDS to get to point B if we had some help. Our goal is to remain here, stay a family business in Ohio as well as long as a single, low income, mother, I have tried in my business I need to get out of. My roof, furnace, and windows are old and need to be replaced. I can't afford to have these repairs done. | BDS, Packaging, Inc | 27 | 0 to 30 days | \$200,000 |
| Montgomery | Home repairs | The outlook is good for BDS to get to point B if we had some help. Our goal is to remain here, stay a family business in Ohio as well as long as a single, low income, mother, I have tried in my business I need to get out of. My roof, furnace, and windows are old and need to be replaced. I can't afford to have these repairs done. | Home repairs | 10 | 31 to 90 days | \$25,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Montgomery | Braces for Twins & Multiples | The proposed program would assist parents of twins and multiples who are facing thousands of dollars to put braces on their children. This program would provide parents with a discount or percentage off of the cost of braces from their orthodontist. As a parent of twin boys who currently need braces, this would be a wonderful way to assist so many families in Ohio. Thank you very much for your consideration. | Twin Smiles | 5 | 31 to 90 days | \$100,000 |
| Montgomery | South Dayton Community Fitness Park | This proposal is for feasibility study and design of a fitness park on the corners of Centerville, Kettering, and Sugarbuck. The idea is similar to Arden park in Columbus that brings a number of fitness groups, organizations, and the community to a common location yet provides access to many neighboring areas and trails. It is in the Dayton area. The park would have a variety of activities for adults out of the park and into a safe playground that promotes a healthy lifestyle in our community. The plan would honor 2 proposed designs, the associated cost (for land, equipment, and infrastructure for the fitness park), and cost marketing to get community support for future work. This would bring the South Dayton community to a central location for fitness and a place to provide access to other local bike paths in Beavercreek, Springtown, and Xenia. The plan would respect two alternative designs for review and modification to review the community's concerns and interests in one final plan. | JF PIT Consulting | 100 | 0 to 30 days | \$245,000 |
| Montgomery | Aerospace Research and Technology Incubator | An aerospace research and technology incubator is proposed as a catalytic converter of an urban renewal plan being developed by the City of Dayton, Montgomery County and Dayton Development Coalition. The US Department of Commerce, Economic Development Administration (EDA) reports that incubator construction projects yield the highest number of jobs created per federal dollar invested of any EDA program, many high tech, high paying areas of work. The proposed incubator will complement the Dayton Entrepreneur Center and built on the region's strengths in advanced materials, sensors and manufacturing. The University of Dayton is committed to collocating related research and ancillary research support activities in the incubator and sharing construction costs. | University of Dayton Research Institute | 3,000 | 31 to 90 days | \$30,000,000 |
| Montgomery | Home Office addition / Home upgrade | Needed office added to homelodge area, and supply room for samples & office supplies. Need to weatherize my home in which my office is now located in. Which would include - upgrade a 30 year old furnace & A/C unit to help with energy costs. Insulate, as the house is not insulated very well. Built in 1960. | Home Office | 1 | 181 days or more | \$60,000 |
| Montgomery | Huffman Road Water Main Replacement | The scope of this project is to upgrade an existing water main that was constructed in 1907. The upgrade will improve flow capabilities from the Hade Pump Station to the high service area. | City of Dayton, Department of Water | 8 | 91 to 180 days | \$750,000 |
| Montgomery | Nicholas Road Water Main Replacement | The scope of this project is to replace approximately 3770' of water main that has a high frequency of water main breaks, resulting in loss water and excessive pumping. The upgrade will improve flow capabilities to the high service area and result in less water loss. | City of Dayton, Department of Water | 8 | 0 to 30 days | \$300,000 |
| Montgomery | 84" Raw Water Main Upgrade | The 84-inch raw water main, running approximately 2 miles from Mled River Wet Field to the Ottawa WTP, was installed in the mid-1920's. The pipeline is constructed of concrete and is in excellent condition except for the joints. These joints have failed routinely on many occasions with significant losses of raw water. Interior joint-repairs stainless steel boxes with gaskets will be installed at all joints. The joint repairs will result in reduced water loss, pumping requirements, energy use and operating costs. | City of Dayton, Department of Water | 6 | 31 to 90 days | \$1,000,000 |
| Montgomery | Raw Water Interconnect | The scope of work includes installing a new 48" raw water main and pump station to interconnect the two well fields owned and operated by the City. This will greatly enhance the systems ability to respond to emergency situations, such as a loss of power to one water treatment plant, providing alternate sources of raw water to either of the City's two water treatment plants. | City of Dayton, Department of Water | 10 | 91 to 180 days | \$8,000,000 |
| Montgomery | Water Tank Painting Project | The scope of work includes recasting interior and exterior surfaces of Water Distribution System elevated water tanks, including exterior painting and coatings. The Department of Water owns and maintains the following elevated water tanks: Kinlege, Mount Auburn, Corbin, Hedges, and Hubbard. The water tanks typically require repainting every 12 to 15 years. The most recent cycle of painting was completed in 2015. Tank maintenance is essential in avoiding water-borne illnesses in the water distribution system. Structural components will be updated to current OSHA standards. Water quality will be effectively and efficiently improved with the addition of permanent, in-tank covered mixing equipment to each tank. | City of Dayton, Department of Water | 6 | 91 to 180 days | \$3,000,000 |
| Montgomery | Ottawa Water Treatment Plant Filter Rehabilitation | To improve operation of the rapid sand filters at the Ottawa Water Treatment Plant by removing the existing, worn filters and replacing with new. Filter under drain tiles and surface wash equipment will be repaired and/or replaced as needed for the new filters. The Ottawa WTP filters in total were last rehabilitated in 1989-90, and they will ensure ongoing compliance with the SWTR requirements. The project will improve the sanitary reliability of the filters, a specific concern of the SWTR enforcement. | City of Dayton, Department of Water | 8 | 0 to 30 days | \$2,000,000 |
| Montgomery | Ottawa Water Treatment Plant Flocculation and Sedi | The existing flocculation system at the Ottawa Water Treatment Plant is functionally obsolete and needs to be replaced, in order for the plant to continue to meet the requirements of the EPA Surface Water Treatment Rule. Extensive structural repairs will be required to improve the sanitary reliability of the sedimentation basin sludge removal system. The project also includes needed building repairs, including window lintel replacements and brick back-painting to prevent further structural deterioration. | City of Dayton, Department of Water | 8 | 181 days or more | \$1,400,000 |
| Montgomery | Miami Water Treatment Plant Back Wash Lagoon and P | The existing back wash lagoon and pump station are in poor condition, with extensive concrete deterioration. This project is needed to allow for reconstruction of the plant that backwash system while maintaining compliance with the new EPA backwash rule regarding recycling of solids to the head works of the plant. Design is 60% complete at this time, and will be reflected in the funding request for Design. | City of Dayton, Department of Water | 6 | 31 to 90 days | \$1,000,000 |
| Montgomery | Automatic Meter Reading Program | To implement Automatic Meter Reading (AMR) Technology to improve meter accuracy, improve customer service, and provide accurate and timely meter reads. AMR will be completed on both radio and fixed system technology, depending on area. Each automation monitor will be deployed on water mains within the fixed system to alert of water main failure, subsequently reducing unaccounted for water loss. Fixed system will be a design-build system. Energy savings will be realized by reduced flow and pumping cost. | City of Dayton, Department of Water | 8 | 0 to 30 days | \$2,500,000 |
| Montgomery | Saving Business and paying off bills | To bring businesses up to par with their competing businesses in area. To pay off outstanding bills. To purchase equipment that can help to improve work. To keep 7 employees working. To have been in this business for 10 years and this is the first time that I am asking any government help. | John T. Reese & Son Contractor | 7 | 31 to 90 days | \$90,000 |
| Montgomery | Kettering Center Asbestos Removal | The Kettering Center is a 4 story of year old building that has the structure covered with asbestos. Current mechanical systems are outdated and cannot be replaced because of the environmental hazard. This project will remove all environmental hazards and replace the infrastructure to include energy efficient systems. | Wright State University | 20 | 31 to 90 days | \$5,000,000 |
| Montgomery | Digital Media Storage and Enhancement System | The Huber Heights Police Division uses digital media on most investigations inclusive of digital still photographs, digital in-car video, and digital interviewers. In addition, external sources of digital video are used for numerous investigations. There are two primary needs to create a standardized and secure system to process and store digital media used for security and investigations. The first is most critical and is a secure storage system. All areas desire digital evidence as it is easily transported, delivered and reproduced. Every element of that jeopardizes the integrity of the digital evidence and the potential for removable discs to become faulty in storage exists. Huber Heights Police Department needs to acquire a system to securely store digital evidence to avoid any future loss of degraded discs. The need need to archive video and photo evidence provided from external sources such as CCTV recording at stores, banks, etc. There is currently no agency in the region with such a system and Huber Heights would develop a regional partnership with area agencies to better process and enhance the evidence needed to protect the communities. | City of Huber Heights | 5 | 0 to 30 days | \$75,000 |
| Montgomery | Crimes Against Women and Children Investigator/Adv | The Huber Heights Police Division has an active case load including domestic violence and crimes against children. Currently, there is not a specific unit or officer to investigate these crimes. This project would enable the agency to develop an additional investigative (detective) position to serve as an advocate and site contact to these sensitive crimes. The position would serve a liaison to various services related to the project including Adams (barred women's shelter), Case House (children's hospital victim/witness center) and the County Victim Witness Center. The project would not only create an additional police officer position, but would enhance the services provided to the community in these sensitive investigations. The project would allow better solutions to crimes against women and children. Funds requested at \$100,000 per year times 1 position times 3 years. | City of Huber Heights | 1 | 0 to 30 days | \$300,000 |
| Montgomery | Re-Filling Police Officer Vacancies | The City of Huber Heights has recently seen a significant reduction in revenue causing the Police Division to reduce officers. There are currently unfilled police officer positions that could be filled with the granting of this project. In addition to creating the jobs, the project would allow the Police Division to meet additional community service objectives that have been set aside due to staffing shortages. The same community needs exist, and the project would greatly enhance the delivery of services to the community as well as increase safety and security and provide more jobs. The funding requested can be broken down at \$100,000.00 per year times 3 officer positions times 3 years. | City of Huber Heights | 3 | 0 to 30 days | \$900,000 |
| Montgomery | Manhole Infiltration Elimination Project | The scope of this project consists of a "City-wide" Inflow and Infiltration (I/I) Reduction Program that will concentrate on eliminating I/I from aging manholes within the Wastewater Collection System. Areas have been identified as part of a large scale master planning effort. High rain-dependent infiltration and inflow (RDI) will be the target of this program with R-Factors greater than 4%. Elimination of I/I will result in energy savings at the WWTP. | City of Dayton, Department of Water | 4 | 31 to 90 days | \$250,000 |
| Montgomery | Solar Panels | Solar Panel installed for energy savings & less usage, will retrofit an existing house. Will create a local job needed in this area. | none | 1 | 91 to 180 days | \$20,000 |
| Montgomery | Main Line Infiltration Elimination Project | The scope of this project consists of a "City-wide" Inflow and Infiltration (I/I) Reduction Program that will concentrate on eliminating I/I from aging sewers through lining within the Wastewater Collection System. Areas have been identified as part of a large scale master planning effort. High rain-dependent infiltration and inflow (RDI) will be the target of this program with R-Factors greater than 4%. Elimination of I/I will result in energy savings at the WWTP. | City of Dayton, Department of Water | 4 | 31 to 90 days | \$250,000 |
| Montgomery | Police Facility Cooling Tower Replacement | The current heating/cooling system uses water as the medium is circulated through a cooling tower. The tower is frequently in need of repair and is currently being nursed to sustain operation, as many parts and the tower itself is no longer produced. A replacement tower would provide a more stable cooling system as well as offer substantial energy savings and increase the energy efficiency of the system. It is estimated the new system would significantly reduce environmental impact by replacing the two-story tower with a low profile cross flow fluid cooler. In addition, the new system should provide approximately \$7,000 in energy savings per year. The project would also provide the ability to service provide. Local Large scale machine shop to update matching ability for area. Acquire a large capacity Horizontal Boring MR thru Stimulus Funding Manufacturing had bid in Dayton wanting to bring job back that was known for. Not creating jobs in the construction area. We need manufacturing jobs. | City of Huber Heights | 10 | 0 to 30 days | \$100,000 |
| Montgomery | Horizontal Boring Mill | To assemble a team of Engineers and Constructors to work with Rural Communities to Design and Build Wastewater Treatment plants at a rapid pace. To use prior approved EPA funded project as guide lines of design which will significantly reduce the normal start to finish time for these projects. The monies will also be used to provide for the stimulus projects. | Gedico Int. | 2 | 91 to 180 days | \$100,000 |
| Montgomery | Design Build Wastewater Treatment Plants | To assemble a team of Engineers and Constructors to work with Rural Communities to Design and Build Wastewater Treatment plants at a rapid pace. To use prior approved EPA funded project as guide lines of design which will significantly reduce the normal start to finish time for these projects. The monies will also be used to provide for the stimulus projects. | PAE & Associates, Inc. | 60 | 0 to 30 days | \$1,000,000 |
| Montgomery | CCTV Traffic Safety Cameras | The City of Huber Heights has taken on a significant increase in vehicle traffic over the last decade. Recently, all traffic signals within the City have been re-timed via a fiber optic connection. This connection terminates in the Communications Center and provides an excellent opportunity to be in CCTV cameras at vital intersections. This project would place pan-tilt-zoom cameras at key locations to allow for monitoring the playback recordings of traffic movement and other activities in major traffic and pedestrian flow. In addition, the two low-level cameras at WPAFB and the Dayton International Airport run through Huber Heights. Additional homeland security concerns include a hub for major fiber-optic communications, water supply towers, and the highest intersection of Interstate 75. These cameras would be used for traffic enforcement, only for traffic monitoring and investigative purposes. This project would provide work for area contractors as well as provide enhanced safety and security for this community with significant cost issues. | City of Huber Heights | 2 | 0 to 30 days | \$50,000 |
| Montgomery | CCTV Building Security Camera System | The Huber Heights Police facility installed a fiber CCTV system upon construction in 1992. Since then, several cameras have become non-functional including those outdoors. There is a strong need for video monitoring of the facility and adjacent buildings. The adjacent buildings include City Hall and a county district court. The cameras are monitored by the Communications Center. This project would allow better monitoring with a new back recording. In addition, this project would include outdoor replacement cameras with web-cam to monitor the heavy pedestrian and vehicle traffic around the police facility as the public goes to City Hall, the Courts or a public park. All traffic going to those locations pass directly through and within 10 feet of the police facility creating a security issue. The project would employ area contractors and increase safety and security of the public functions. | City of Huber Heights | 2 | 0 to 30 days | \$50,000 |
| Montgomery | Sanitary Sewer Main Line Rehabilitation/Replacem | The scope of this project consists of a "city-wide" repair and replacement project that will concentrate on repairing and/or replacing sanitary sewers. Areas have been identified as part of a large scale master planning effort. High rain-dependent infiltration and inflow (RDI) will be the target of this program with R-Factors greater than 4%. Elimination of I/I will result in energy savings at the WWTP. | City of Dayton, Department of Water | 4 | 31 to 90 days | \$500,000 |
| Montgomery | Sanitary Sewer Asset Inspection Program | The scope of this project will consist of a "city-wide" program that will formulate an Asset Inspection Program. Sanitary Sewer Assets within the Wastewater Collection System will be identified and condition assessment performed to identify defects. | City of Dayton, Department of Water | 2 | 31 to 90 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Montgomery | Pump Station Electrical Upgrade/SCADA Configuratio | The scope of this project will be to augment the existing communication networks and to establish new communication networks for pump stations owned and operated by the Division of Sewer Maintenance. Currently, the Division of Sewer Maintenance operates a combination of pump and stations as part of the wastewater collection system and the Sewer System SCADA system. 11 stations are monitored by manual means and may not have electrical capabilities to support SCADA monitoring. This project will install existing stations, recommend electrical upgrades and communications to support all stations being part of Sewer Maintenance SCADA monitoring system. | City of Dayton, Department of Water | 6 | 91 to 180 days | \$750,000 |
| Montgomery | Municipal Separate Storm Sewer System (MS4) Cleani | The scope of this project will consist of a "city-wide" program that will concentrate on clearing the MS4 owned and operated by the City of Dayton. Catch Basins, Public Storm Sewer Lateral and public man lines will be cleaned and sediment removed. A dedicated storm sewer system will result in a higher quality of water entering into the river system. | City of Dayton, Department of Water | 4 | 0 to 30 days | \$500,000 |
| Montgomery | WWTP Biofilter Odor Control Project | This project is to install biofilters at the wastewater treatment plant to reduce odors. The biofilters will be installed in the aeration tanks and will be used to treat the wastewater before it is discharged into the river. | City of Dayton, Department of Water | 8 | 31 to 90 days | \$7,000,000 |
| Montgomery | WWTP Heating Water Piping Replacement | The scope of this project is to replace aged and leaking buried hot water heating pipe system at the Wastewater Treatment Plant. | City of Dayton, Department of Water | 6 | 0 to 30 days | \$1,200,000 |
| Montgomery | WWTP Digester Automation | Program WPCFL - The scope of this project is to automate the feed and transfer of sludge to and from the digesters at the Wastewater Treatment Plant. This requires replacement of numerous valves and installation of actuators and PLC controllers. All of this is integrated with the WWTP SCADA system. | City of Dayton, Department of Water | 2 | 181 days or more | \$750,000 |
| Montgomery | WWTP Security Improvements | Program WPCFL - The scope of this project is to install perimeter fencing and new entrance at the Wastewater Treatment Plant to improve security and reduce vulnerability. | City of Dayton, Department of Water | 4 | 91 to 180 days | \$2,000,000 |
| Montgomery | WWTP Skylight Replacement Project | The scope of this project is to replace deteriorated and leaking skylights (13) and clean exterior stained brick on (21) buildings. | City of Dayton, Department of Water | 4 | 0 to 30 days | \$700,000 |
| Montgomery | Police Facility Renovation | The Huber Heights Police facility was originally constructed with an attached jail. That space was specifically constructed for that use and is virtually unusable for other purposes without renovation. This project would provide additional work for several various contractors in the area as it involves some special tasks and materials. In addition, the renovation would include modifying a large portion of the existing jail into usable workspace. The added workspace would create the needed area to facilitate enhanced community outreach programs, and additional investigative efforts including crimes against women and children. The renovation would also include replacement of carpet in other areas of the building which is past its useful service life and is damaged in areas. | City of Huber Heights | 20 | 0 to 30 days | \$450,000 |
| Montgomery | WWTP Effluent Filter Improvements | Program WPCFL - The scope of this project is to replace influent and effluent valves at the Wastewater Treatment Plant that have deteriorated and are failing. | City of Dayton, Department of Water | 4 | 91 to 180 days | \$1,000,000 |
| Montgomery | WWTP Gas Scrubbing Facility | The scope of this project is to construct a scrubbing facility for influent and carbon dioxide gases to make pipeline quality. | City of Dayton, Department of Water | 6 | 181 days or more | \$2,000,000 |
| Montgomery | Police Facility Air-Intake Security | The Huber Heights Police facility has a constant heat-air intake that provides heat an throughout the building. This is primarily to meet the requirements of a holding facility to provide fresh air to detainees/prisoners). The specific details of this project are available upon official request due to the security nature of this issue. This project would provide safety and security to the building against potential attack. The building contains the primary PSAP for the area and evacuation would cause a severe impact on public safety in the community. The project not only provides work to area contractors, it also increases the community's homeland security and strengthens the physical structure of the police facility. | City of Huber Heights | 10 | 0 to 30 days | \$45,000 |
| Montgomery | Police Facility Security Gates | The Huber Heights Police facility is adjacent to the area court and public park. There is no setback to either of these areas which results in pedestrian and vehicle traffic to pass through the back secure area of the police facility. This situation causes exposure to the high speed officers and patrol vehicles in an area that should be secure. A fence has recently been erected to divert traffic; however, the fence provides no security and is still not secure. This project would prevent vehicles and pedestrian from having access to an area designated as secure. The project would build a new LEED certified service center (12,000 sq ft), 2 Large Cabers also LEED certified (1,600 sq ft each), enhanced security fence/barriers, adding parking, rest-rooms, etc. | City of Huber Heights | 3 | 0 to 30 days | \$30,000 |
| Montgomery | New Service Center at Cricket Holler | The currently building has many problems. The MVC serves 11,000+ young people, who will collect 100 Tons of food this year, and provide 5000+ service project hours | Miami Valley Council, Boy Scouts of America | 35 | 0 to 30 days | \$4,000,000 |
| Montgomery | Printed Electronics Press | Thank you for your consideration PRINTED ELECTRONICS PRESS & EQUIPMENT MARKET BACKGROUND: An emerging market is forming and Daetwyler R&D (www.daetwyler.com) in Dayton has an opportunity to be a significant participant. Traditional printing places layer after layer of different color inks to form a composite image. Similarly, Printed Electronics (PE) places conductors, semi-conductors and insulators on top of each other to "print" electronic circuits. HIGHER ACCURACY NEED: Traditional printing presses only need to register colors to an accuracy of 75 microns. Conversely, Printed Electronics applications need the registration to be 5 microns or less. PROBLEM & OPPORTUNITY: This niche market is waiting to be harvested, but it requires significant capital investment. Daetwyler R&D has attempted to get the end commercial users to pay for this investment, but they don't agree to such high prices. DAYTON JOBS: Funding the investment in this equipment will add good paying jobs to the Dayton area in both the short and long term. EUROPEAN UNION COMPETITIVE ADVANTAGE: Note that our potential competitors in Europe are having their initial development funded through the home. In turn, they will see more success in the classroom. | Daetwyler R&D Corporation | 50 | 0 to 30 days | \$1,250,000 |
| Montgomery | EDUCATING PARENTS TO BE EDUCATORS IN THE 21ST CENT | This project is intended to provide educational/training services to PARENTS so that children in grades K-6th grade will be prepared beginning at their foundation: the home. In turn, they will see more success in the classroom. | TRAINING ON PREVENTION SERVICES (TOPS, INC.) | 100 | 31 to 90 days | \$500,000 |
| Montgomery | Revenue Needed To Expand Financial Business | The Advisory Group is looking to expand, and desires to add on 10 new registered representatives. The Advisory Group is looking to provide service to those individuals who need financial advice the most. Specifically, men and women who have lost their jobs through a reduction in workforce. It is our goal to assist these individuals in getting back on track financially. Having the ability to hire 10 new personal financial planners will allow our company to expand our sphere of influence, and will assist many families find the most efficient way to achieve their overall economic times. Unemployed individuals need assistance, and we wish provide that help. Our mission is to help those who need to get back on track, and eventually assist them in both finding new employment, as well as rebuilding their financial stability. With our region losing both depth and DNE, there is a tremendous need at this time. The Advisory Group can help fill this need, but needs additional resources to hire up to 10 new employees to staff the needs of those individuals we will be working with in the future. Do to hard times, my family an I are in need of help. I have two daughters I would love to put both of them at Dayton Christian school. Do to the high tuition. We can not afford it. I feel my children deserve the best. My husband is currently employed at Appligan papers. The company has 4 hours back. I'm in a stay at home mom looking for part time work. I have always dreamed of becoming a nurse. But never had the money or school and to pay for daycare. This money will put me through school and become a wonderful nurse. My children will also have an education they can count on. This money would also help us get through these hard times. To help pay for things we need. So that they can have help. Thank you. Anything will help. What ever money we have will be going to a down payment for a farm house. To live the American dream. We are currently renting a house for 900.00. We would love to put that money into a house payment. Melissa Maccarty | The Advisory Group | 10 | 0 to 30 days | \$200,000 |
| Montgomery | Children education | Stay at home mom | Stay at home mom | 100 | 31 to 90 days | \$25,000 |
| Montgomery | Farmersville Watermain Improvements | Install 15,000' 12" waterline to replace existing undersized waterline along Farmersville/Germantown Rd. from Village of Farmersville to Valley View High School facility. Improvements will include connecting residents to the new waterline as well as installing fire hydrants to provide for better fire protection. This waterline will in have extend further to provide water to residents with very little water supply. | Village of Farmersville | 65 | 31 to 90 days | \$1,025,400 |
| Montgomery | Lorella Pond Cleanup & Outfall Rehabilitation | Removal of trash, debris, and pollutants from the pond and surrounding watershed area. Conduct outfall repair to stop erosion/demolition/erosion of structure, by rehabilitating existing pipe and outfall. (This might need to be replaced. Also, specific spoils will need to go in the bottom to provide an additional level of filtration.) This will facilitate the City's compliance with NPDES) permit by the repairing a deteriorated outfall which is causing erosion and removing the discarded debris. This repair will improve the water quality of the stream/tributary pond. This particular site is located in the Dayton Wet Field Protection Area | City of Riverside | 2 | 91 to 180 days | \$199,000 |
| Montgomery | Starting a minority owned business to help compani | The company I would create would help other companies that can't afford to fund a sales leader (VP, Sales) full time with help to grow sales, hire & retain top talent and performance based metrics for success that would save jobs! This is the area that most small to mid-size companies are struggling with. | Sales Performance Management | 100 | 0 to 30 days | \$50,000 |
| Montgomery | Renovation of existing bldg, or construction of ne | To expand our existing location with the addition of high efficiency HVAC systems allowing us to grow and add 8 more positions. If afforded the luxury of building new, we will expand into an adjoining county with the potential for many more new jobs. | Southtown Heating & Cooling, Inc. | 8 | 31 to 90 days | \$2,150,000 |
| Montgomery | 1791 Harshman Road (Service Depart Building) Septi | The Service Dept. Building currently is on a septic system, Home Sewage Treatment System (HSTS), and does not have appropriate oil separator for the garage area. The septic and oil separator are to be connected into the sanitary sewer system. The into sanitary main would require running approximately 175 linear foot of 6" plastic line and installing catch drains in garage connecting them into oil separator tank. This will facilitate the City's compliance with NPDES) permit by eliminating their oil septic system and any potential flood discharge. This city owned and operated building currently has a French drains system in the floor. The floor drains need to be replaced with oil separator & connected to sanitary sewer system. | City of Riverside | 1 | 31 to 90 days | \$50,000 |
| Montgomery | 1531 Wake Ave. Floor Drains | The replacement of the drains with the installation of oil separators tied into the sanitary sewer connection will facilitate the City's compliance with National Pollution Discharge Elimination System Permit (NPDES) by eliminating this floor discharge. This particular site is located in the Dayton Wet Field Protection Area. | City of Riverside | .5 | 31 to 90 days | \$35,000 |
| Montgomery | DAMAC Revitalization Project | been overcome by DSH. We are attempting to complete this goal 1 area at a time. DSH will rehabilitate an existing property through the use of long term unemployed individuals. This process has multiple positive outcomes: 1) Employment of long term unemployed individuals 2) Training 10 individuals in various construction trades 3) Revitalization of 8-10 properties in blight stricken neighborhoods. 4) Properties are rehabilitated using state-of-the-art "Green Technology" for energy efficiency. 5) Immediate cash infusion into the local economy. 6) Provides affordable housing for low-income families. 7) Elimination of vacant Properties in the neighborhood. 8) Increases the property value of other residences in the surrounding area. 9) Other an alternative to demolition of existing structures within targeted areas. 10) Increase the standard of living within the targeted area. | DSI Construction, Inc. | 10 | 0 to 30 days | \$180,000 |
| Montgomery | Salt Storage Roof | Currently the City covers its stored salt with tarps. During high wind/rain events these tarps are blown off and subsequent rain erodes/washes the salt into the surrounding surrounding public road. By getting a permanent proper cover over the salt storage area will facilitate the City's compliance with the NPDES by eliminating this flood discharge. Proposal is to install a 65' x 65' roof over the current/improved concrete block salt storage area. | City of Riverside | 1 | 31 to 90 days | \$45,670 |

| Montgomery | heartsmart MD | Our goal and passion is to improve the cardiovascular health of people ages 35-70 in Ohio. We do this by implementing a multidimensional, cardiovascular wellness and education program. We will utilize the internet and existing 10 pharmacy locations. (We. Prescription) to use our Heart Smart prevention clinics. Heart Smart MD will, lower healthcare costs and increase access to health for patients. Our focus is on the fact that heart disease is 90% preventable. If you have the right information and support. We will work with individuals and local businesses to improve health care. Founders are a pharmaceutical business owner and a nationally recognized cardiologist who focuses on heart disease prevention. We will employ entry nurses, physician assistants, medical assistants, pharmacists and dietitians. Founders also successful businessmen and have worked with start-ups and venture capital in past. Thank you for your consideration. This is a project you will be proud to support. Best regards, Dr. Matthew DeVine | heartsmartMD | 20 | 31 to 90 days | \$750,000 |
| Montgomery | Direct Metal Laser Sintering Technology | Direct Metal Laser Sintering is an additive technology used to produce production quality metal pieces using a wide range of metal alloys including titanium and aluminum. This use of rapid low volume manufacturing would compete with tooling services. Industries in the United States would use this technology instead of stamping/turning processes. In other words, it would keep jobs in USA. It is also the only additive form of high technology to Dayton, Ohio. In return, this would bring the redevelopment of manufacturing not only in Dayton, Ohio but in surrounding areas. There is a wide range of applications that is used by many industries especially aerospace and automotive. This is only one would promote job security for the employees currently employed but would create additional jobs. | Bastech, Inc. | 25 | 31 to 90 days | \$1,200,000 |
| Montgomery | WWTP Gas Scrubbing Facility | Program WWPCFL - The scope of this project is to construct a scrubbing facility for siloxane and carbon dioxide gases to make pipeline quality. Program WWPCFL - The scope of this project is to replace deteriorated and leaking skylights (13) and clean exterior stained brick on (21) buildings at the Wastewater Treatment Plant. | City of Dayton, Department of Water | 6 | 181 days or more | \$2,000,000 |
| Montgomery | WWTP Skylight Replacement Project | Program WWPCFL - The scope of this project is to replace deteriorated and leaking skylights (13) and clean exterior stained brick on (21) buildings at the Wastewater Treatment Plant. | City of Dayton, Department of Water | 4 | 0 to 30 days | \$700,000 |
| Montgomery | Eco and Energy Efficient Improvement | Improve home energy efficiency through structure and appliance improvements. Old appliances are not eco friendly or energy efficient. Brick, ductwork and insulation to provide for more heat and cooling efficiency (Rumaco is 18 years old). Expand ventor for better air circulation which would add to efficiencies | Homeowner Who Works and Pays Taxes | 5 | 31 to 90 days | \$25,000 |
| Montgomery | WWTP Heating Water Piping Replacement | Program WWPCFL - The scope of this project is to replace aging and leaking buried hot water heating pipe system at the Wastewater Treatment Plant. | City of Dayton, Department of Water | 6 | 0 to 30 days | \$1,200,000 |
| Montgomery | Municipal Separate Storm Sewer System (MS4) Clean | Program WWPCFL - The scope of this project will consist of a "city-wide" program that will concentrate on obtaining the MS4 owned and operated by the City of Dayton. Catch Basins, Public Storm Sewer Lateral and public main lines will be cleaned and sediment removed. A cleaned storm sewer system will result in a higher quality of water entering into the river system. | City of Dayton, Department of Water | 4 | 31 to 90 days | \$500,000 |
| Montgomery | Sanitary Sewer Main Line Rehabilitation/Replacement | Program WWPCFL - The scope of this project consists of a "city-wide" repair and replacement project that will concentrate on repairing and/or replacing sanitary sewers. Areas have been identified as part of a large scale master planning effort. High rain-dependent infiltration and inflow (RDI) will be the target of this program with R-Factors greater than 4%. Elimination of it will result in energy savings at the WWTP. | City of Dayton, Department of Water | 4 | 31 to 90 days | \$500,000 |
| Montgomery | Main Line Infiltration Elimination Project | Program WWPCFL - The scope of this project consists of a "city-wide" Inflow and Infiltration (I/I) Reduction Program that will concentrate on eliminating I/I from aging sewers through lining with a wastewater Collection System. Areas have been identified as part of a large scale master planning effort. High rain-dependent infiltration and inflow (RDI) will be the target of this program with R-Factors greater than 4%. Elimination of it will result in energy savings at the WWTP. | City of Dayton, Department of Water | 4 | 31 to 90 days | \$250,000 |
| Montgomery | Manhole Infiltration Elimination Project | Program WWPCFL - The scope of this project consists of a "city-wide" Inflow and Infiltration (I/I) Reduction Program that will concentrate on eliminating I/I from aging manholes. Areas have been identified as part of a large scale master planning effort. High rain-dependent infiltration and inflow (RDI) will be the target of this program with R-Factors greater than 4%. Elimination of it will result in energy savings at the WWTP. | City of Dayton, Department of Water | 4 | 31 to 90 days | \$250,000 |
| Montgomery | Nicholas Road Water Main Replacement | The scope of this project is to replace approximately 3770' of water main that has a high frequency of water main breaks (leaks) in loss water and excessive parking. The upgrade will improve flow capabilities to the high service area and result in less water leakage. | City of Dayton, Department of Water | 8 | 0 to 30 days | \$300,000 |
| Montgomery | Automatic Meter Reading Program | To implement Automatic Meter Reading (AMR) Technology to improve meter accuracy, improve customer service, reduce meter theft, accurate and timely meter reads. AMR will be computerized and fixed system technology depending on the size of the meter. All meter components will be replaced on water mains with the fixed system to alert of water main failure. | City of Dayton, Department of Water | 8 | 0 to 30 days | \$2,500,000 |
| Montgomery | Assistive Technology Outreach Program | Project: These custom designed and manufactured devices are not modified common commercially available devices. These devices are developed for specific needs to improve the quality of life through increased independence. This basis of this program has been researched over the past two years but not implemented due to high costs. This is an on-going year program with the goal of becoming self sufficient within two years through donations. Stimulus associated to this program consists of employing engineers of all types, mechanical, electrical and software, and providing much need education projects to the blind and machine shops in the southern Ohio, Dayton area. Engineering Outsourcing, Inc. will provide program management and a portion of the technical functions as no cost to the program. The stimulus funds will be directed to payroll, recruiting agents, facilities and travel expenses. I look forward to discussing the details of this project. | Engineering Outsourcing, Inc. | 15 | 31 to 90 days | \$650,000 |
| Montgomery | Samb supermarket | Thank you I will like to open a supermarket in the old Kroger store in gettysburg, by doing that I can create job in a very poor community. I also can help senior citizen who don't have to go across town they are doing now to go to basic need. The building cost \$800,000. I will need the amount of the money to start the business. I have tried to save the money to install a new efficient HVAC system, install my poorly insulated home, and install a tankless water heater. I am requesting consideration for the above mentioned items in the southern Ohio, Dayton area. I would like to install an advanced heating system, add insulation to my home, and install a Rinnai tankless water heater to save energy and money. Please consider me for funding that would assist in this project. Thank you! Robert Pearson | Samb's Cooperation | 30 | 31 to 90 days | \$2,000,000 |
| Montgomery | Energy Efficient Renovations | add insulation to my home, and install a Rinnai tankless water heater to save energy and money. Please consider me for funding that would assist in this project. Thank you! Robert Pearson | homeowner | 0 | 31 to 90 days | \$40,000 |
| Montgomery | Part-paid on call responders pagers | Our home responders use pagers/inform to alert them to a request for emergency service. The current pagers cannot be repaired due to their age and changes in technology. By purchasing and supplying these devices we can continue to utilize this important equipment. | Washington Township Fire Department | 60 | 31 to 90 days | \$36,000 |
| Montgomery | Horticulture & Inspection | Jobs lost to other states and countries that are recoverable with local mining & mfg enterprise available. | TKO Mfg services, Inc. | 22 | 0 to 30 days | \$650,000 |
| Montgomery | House Energy Efficient upgrades | Purchased my home in 2007. The appliances were the low line of Roper, outside air was flowing through the doors and windows. Electrical & gas bills were extreme just to keep the house at 68 degrees this winter. There were cost drafts throughout house. I had to cover some areas with plastic to keep the heat inside out. These bills cost me of the worst problems, but not my job in 2008 and am attempting to make the house payments with no extra to pay for needed energy efficient retrofits to the house. I request enough to have insulation blown into my attic, having the roof repaired from the wind storms, and energy efficient appliances and furnace. | Homeowner | 9 | 0 to 30 days | \$22,000 |
| Montgomery | DSTAR Repeater Project | DSTAR system provides a new capability and functionality to the ARES radio world and increases the efficiency of emergency communications. * Digital Voice (Improved range and fidelity) * Digital Data - Low speed - commonly used for voice communications (used for sending short messages and OPS data) * Digital Voice - High speed - dedicated 128 kb TCP/IP network * Two mobile radios (2 in / 70 cm and 23 cm) with one repeater will have the capabilities of voice, APRS, SSTV, Instant Messaging and high speed file transfers. * Will operate simplex or through repeaters for additional range and features. * Contacts made through repeaters are routed to the station regardless of frequency or band. * Less infrastructure and equipment to support and maintain than analog systems with similar capabilities. * Easier to deploy than analog. | Montgomery County Amateur Radio Emergency Services | Up to 100 Volunteer Jobs | 31 to 90 days | \$250,000 |
| Montgomery | PALS Prevention Program | PALS is an Alcohol, Tobacco and Other Drug (ATOD) prevention program for teachers who work with students with alternative learning styles and/or disabilities. Many of these students receive prevention education in an inclusion classroom model. Our research shows that these students do not always retain prevention materials when presented in a traditional format, but are successful when taught in the multi-modality approach used in PALS. PALS trains teachers to use multi-sensory teaching approaches to present prevention information, and provides follow-up support to teachers as they teach their students with the learning styles of their students. We currently have one remote school, we are providing web-based training and remote support to these teachers as they implement the PALS curriculum. Funding for the PALS program ends July 2009. Additional funding will allow this program to continue to utilize distance learning techniques to train and support teachers throughout Ohio; help ensure that ALL students retain prevention information; and reduce student retention to use ATOD. | SARDI Program at Wright State University, Boonshof | 3 | 0 to 30 days | \$150,000 |
| Montgomery | My Home, My Choice | Aging in Place, LLC, Dba My Home (The "Company") was formed to provide a unique home modification service to the senior community. The Company provides estimates with an associated home modification solution including professional, affordable packages to more efficiently and cost-effectively help seniors modify their existing homes and age in place. The packages include Safety/Fall Prevention, Hearing Impairment, Vision Impairment, Life Safety/Emergency Notification, and Accessibility. The Company provides an aging home modification solution to its customers consisting of the following: 1. Opportunity for seniors to stay in their existing homes longer by adapting their environment to accommodate changes of natural aging process and rehabilitation from an accident or joint replacement surgery. 2. Opportunity for insurance carriers/providers to reduce costs associated with payment of accident claims, extended home health care, rehabilitation facilities and hospice stays. 3. Opportunity for healthcare providers to provide a comprehensive solution for their patients that aids rehabilitation, creates a safe home environment, preventing a recurrence of patient's condition. Building of new homes and buildings utilizing renewable energy sources along with energy efficient containment techniques. We are currently an Energy Star Partner and would like to expand into the solar power/geothermal environment. We have built 20 plus Steel Framed Homes, 2 Insulated Concrete Homes and numerous wood framed homes all with energy efficiency as a top priority. We have over 40 years construction experience. RESPECT/Reaching Each Student with Principles, Education, Character, Individualized Trainings) is to improve the lives of disadvantaged youth through prevention service and mentoring relationship to 100 "High Risk" youth in grades 4th to 12th who are at risk of educational failure, teen pregnancy, drug and juvenile delinquency. The program within this two year plan are designed to encourage youth to dream beyond the often oppressive conditions of rural life. The projects: Our children are our future and it takes a village to raise a child, are frequently quoted. A result of that frequent use is that the truth of the messages they convey is lost, and full impact of what they contain is frequently undervalued. This proposal seeks to optimize the essence of these saying by offering a series of resources within the village, to make it a frequently heard word, so as to yield a bountiful return. Need: We are seeking to work with 80% of the area youth who are from single female headed household where few parents has the necessary skills to provide a stimulating home environment, these are escalating problems of youth violence, gang activities, drugs, alcohol abuse, school dropouts. Our authors and artists are interested in providing educational writing, art, and global awareness programs to public and private schools and educational organizations in Ohio. | Aging in Place, LLC Dba My Home | 12 | 31 to 90 days | \$719,483 |

| Montgomery | Rehab of rental homes | My 13 Dayton, Ohio inner city rental homes need new furnaces, weatherization in the walls and attics, new windows and doors, vinyl siding, foundation repairs, new water and gas lines, electrical wiring upgrades, plumbing fixtures, etc. General Motors recently closed the Moraine, Ohio Truck Assembly Plant in December 2008, where I worked for 27 years and do not have a job at the present time. While working at GM, I was using any extra money I earned to try to fix up these homes, and now that is gone. The low rents I have to charge for these properties in the inner city, is not enough to continue upgrading them to meet standards. I bought some of these homes from Sheriff Saxe and they needed rehabbed when I bought them. Any advice or monetary help you can suggest would be greatly appreciated. I want to hold on to these properties and keep working on them, because right now this is the only job I have. I have been looking for work with another employer, but the jobs are not there. General Motors is history I think, so there is no chance of working there again. Thank You very much, Mark A. O'Connor | OConnor Investments | 2 | 0 to 30 days | \$300,000 |
| Montgomery | Adult Daycare | An adult day care for working families that have dependent adults living with them and need a place for them to go during the day while they work should also have a satellite center for those who need day services. With future renovations of existing nursing homes or some sort of assisted living community. | Brett Funk | 100 | 91 to 180 days | \$1,500,000 |
| Montgomery | Rehab & Beautify Neighborhood, & Sponsor Community | As the Church's Secretary/Treasurer, I am requesting funds to support some of our upcoming projects. The first is to rehab the Transformation House, a home for men transitioning from jail or homelessness into becoming productive members of society. The funds would also pay salaries to the staff, a kitchen to be installed starting. The second project is to provide parking for some of our other programs (Food Bank, housing meetings, Soup Kitchen, Youth Activities, etc.). We have found that we have insufficient parking. However, directly adjacent to our existing parking lot are several boarded-up former "drug houses." We would like to purchase these lots, demo the homes & extend our existing parking. This would enable us to host even more community events & would provide jobs for the construction & for future events. It would also beautify a very down-trodden inner-city neighborhood. The third project would be to rehab our gymnasium for hosting more Youth Events & housing the children who will be coming for our summer Feeding Programs. The fourth project would be to create a much-needed daycare, which would not only assist families-in-need, but also create new jobs. | United Community Brethren Church | 25 | 0 to 30 days | \$1,500,000 |
| Montgomery | Graphic Arts Building Historic Preservation Redeve | This project is a historic renovation of a five story 22,000 sq. ft., downtown Dayton building built in 1926, which has already been nominated for the Federal Registry of Historic Places. The building is planned to be renovated according to Interior Department standards, utilizing green, state and new market tax credits. The end use of the renovated building will be for affordable loft apartments, designed utilizing 'green' and 'smart' energy technology in all proposed building systems. We plan to employ geothermal, solar and wind powered energy technologies to minimize resident's utility bills, and to put substantial savings of energy back into the local power grid. This will be the first project in Dayton to utilize new green technologies within a historic preservation project. | Urban Metroplex Redevelopment Group, L.L.C. | 10 | 181 days or more | \$1,000,000 |
| Montgomery | Capital to continue with start up and expansion | My business was created to assist with employment opportunities for job seekers and the stimulus money would allow me to upgrade my website, add marketing funds for brochures, mailings and advertising. These funds would allow for greater promotion to gain greater public interest in their job seeking exploration. I would potentially be able to promote a niche in the employment industry that many job seekers maybe looking for. There are thousands of virtual job openings across the U.S. and I would like to be able to allow job seekers the opportunity to apply for these jobs. Overall, it could assist in getting many job seekers employment. In addition I would like to use part of the funds to diversify my business into another side business. I would like to open a discounted beauty business that would benefit many women that would like to get married, but don't have the funds for a lavish wedding gown. The funds would assist in making an economic impact as women would be making purchases from that shop as a discounted sale. These allowing for money to be stimulated through employment through my business. I would like to use part of the stimulus money to help me with my business. I am currently in the process of opening a new design and printing shop. Thank you for your consideration. | Intelinche LLC | 4 | 31 to 90 days | \$75,000 |
| Montgomery | Black Oak Construction | I employ additional staff, make design expenses by utilizing newer technologies, & improve environmental impact through more effective pool design. Local pool construction, general construction, electrical, & plumbing companies would be employed in the design, development & implementation of this project. | Black Oak Swim Club | 65 | 181 days or more | \$500,000 |
| Montgomery | Painting Contracts | We provide many employees with their first job, building a foundation for them to develop job skills & gain experience & providing financial opportunities within their neighborhood to earn money for college and save for the future. A. Home Improvements was started in 1977. By 1999 we employed 67 people. By 2001 we had 100 employees and we were slowly starting to lose work which we believe was due to 9/11. On 9/12 we had 12 large contracts that cancelled. We were still able to pick ourself up and move forward. However by 2005 I learned that work was getting harder & harder to find even though our work covers the whole state of Ohio. With the economy getting worse & worse no money to advertise. By 2007 we are now down to 2 employees. We have already our 3rd yr of bankruptcy by then. With no way to borrow. We had to sell off most of our equipment, trucks and trailers. And we even had to close down our office. We are a 1st generation company and would like to get any help possible to be able to continue to provide our services. Your dollars would give our business the revenue to grow & expand. It would give us revenue to get office space, advertise greatly, purchase needed equipment, help get our staff built back up & help with weekly payroll. We services Residential Homes, Commercial and Industrial. We believe that with your funds & our hard work we can get back to having a large work force. | G.A. Home Improvements | 30 | 0 to 30 days | \$170,000 |
| Montgomery | Daybreak Youth Shelter | Daybreak operates the only emergency shelter for youth, ages 10-18 in the Miami Valley and receives only a minimal amount of funding from OHDFP to serve 18 year olds. The facility economy is placing unprecedented stress on Miami Valley families and we are seeing more teens being forced to leave home than ever before. We are also seeing youth with more personal anger, behavioral problems, and severe mental health issues. Not surprisingly, United Way funding and private donations are down. Daybreak is seeking funds to maintain its current staff and to add 2 more full time case managers to help meet the higher demand in services. Expected Number of Youth: 700-800 over 2 years Expected Number of Bed Nights: 9,000 over 2 years Expected Number of Beds: 50-60 over 2 years Expected Number of Youth to return home and secure safe alternative housing: 600-650 over 2 years | Daybreak | 2 | 0 to 30 days | \$500,000 |
| Montgomery | Business Development | Business development funds for existing business - funding to hire additional production, sales and marketing staff and business product line expansion. Being we are an Ohio based business - funding would be implemented immediately to hire new staff and expand our business, business offerings nationwide. | carlton signs | 10 | 0 to 30 days | \$25,000 |
| Montgomery | Business Growth and Employment Enhancement | The stimulus package funds will go directly towards additional bulk advertisement and the hiring of two additional personnel, capable of performing painting and power washing of residential homes and large commercial businesses. This new cash infusion will also stimulate business with local paint retailers and local payroll processing companies. | Oster's Painting & Power Washing | 2 | 0 to 30 days | \$10,000 |
| Montgomery | Pita Pit Dayton Franchise | Opening of a brand new franchise in downtown Dayton, Ohio. Franchise name is Pita Pit, no other restaurant like this is available in the area and this chain offers very fresh healthy food in a modern style and environment. This would be an awesome addition to live in downtown Dayton and it also a great way to start building the health care issues in our community by promoting healthier choices! The building would be approximately 1,000-1,500 square feet and the business would employ around 20 individuals in the community. I have noticed these chains around college campuses which is another great reason to promote opening one in Dayton since the University of Dayton and Sinclair Community College is located there. My wife and I are very strong supporters of fundraisers for programs to help feed and support those less fortunate in our community and would say any influence we would have as business owners to promote programs like this. This will be a great step to bring Dayton back to life! Thank you for your time and consideration. | Home Address | 20 | 0 to 30 days | \$220,000 |
| Montgomery | Money Smart | R J Financial Group, LLC is a financial literacy company that has been successful with providing a Money Smart program that teaches youth ages 7-21 money management and investment classes within the Dayton region. The company was started 5 years ago in Dayton and has now spread to Butler, Hamilton, Darke, and Preble County. The company has also contracted with Floriole Outreach, in Orlando, FL, to provide the Money Smart program that reached 65 youth in 2008. Funds will be utilized to take youth through classes over a 10 week period. They will learn budgeting, credit, banking, investments and other financial lessons that will help them become better citizens in the consumer marketplace. Incorporated in the Money Smart program is the Federal Deposit Insurance Corporation Smart Money curriculum as well that helps to teach the youth. These of the advantages to youth being in the program is that they will get their own share of stock, that own savings account with money to start and finally they will have their credit pulled from the credit bureaus while they learn about and how to use credit wisely. Financial Advisors from local companies will be paid to teach the students. | R J Financial Group, LLC | 20 | 0 to 30 days | \$600,000 |
| Montgomery | RCMI West Dayton Project | Revival Center Ministries, one of the largest non-denominational churches in West Dayton has 3 Sunday services and more than 1200 people in attendance each Sunday. We own 32 acres of vacant land at James H McGee and Gettysburg Ave in Dayton. We propose to build a Dayton, senior care facility and facility to address the needs of transition to society for people coming out of low to medium incarceration facilities. These facilities would create sustainable jobs in the West Dayton community and help to not only establish a new business but also create youth and adults in the area. We would use minorities and women in the congregation and within Dayton with the right skill sets also, to work with developers who could be employed to do the work needed. So, not only would jobs be created, but with the work being done, a segment of people unemployed, would get work to complete the projects. | Revival Center Ministries International | 20 | 181 days or more | \$500,000 |
| Montgomery | Technology Staffing/Consulting | We are a consulting firm that will need to staff senior professionals for these short and long term projects for Health Information Technology, Broadband expansion, and Educational Technology. All these Stimulus projects will be short term to long term projects and a lot of companies will either need direct hire employees or contractors to staff the projects. | Montgomery | rebuilding my neighborhood | I would like to repair and create 12 new jobs through rebuilding our neighborhoods that have been destroyed and damaged through the mortgage crisis. many of my neighborhoods could use repairing/ would use my expertise in the construction and landscaping business to submit proposals to banks and mortgage companies for these business to repair and up keep these properties. | constructioncompany | 12 | 0 to 30 days | \$75,000 |
| Montgomery | Laser Processing of Thin Film Power Devices | This thin batteries, micro fuel cells, solar cells (thin-film photovoltaics) promise to further evolve during over the next few years because of their high energy density, design flexibility, and wide application spectrum. Wright State University and Mount Laser & Photonics Center, Inc. will continue their capabilities to develop and produce micro-power devices. This money will allow us to hire, area and employees to do the staff and help other companies in the particular stimulus projects. We will need recruiters as well as employees directly working on the stimulus projects/contractors. This money requested will be used to staff our firm, existing jobs. | Mound Laser & Photonics Center, Inc. | 10 | 0 to 30 days | \$250,000 |
| Montgomery | Fire Station Revitalization | Revitalize an existing vacant Fire Station to provide public safety education regarding the hazards of fire in their homes, businesses, and other public places. Existing Fire Station is available currently once funds are available. Funds will be used for remodeling construction and hiring of staff. All new jobs created in this new venture, first choice in applicants will be qualified persons in neighborhood currently unemployed. Pay program from \$10,000 to \$50,000 in increments of 15 employees hired when first project is completed. Hiring of qualified contractors during initial phase for the remodeling and construction as required. Contractors are encouraged to properly take due to the lack of knowledge of the general public regarding fire hazards in the home, businesses, and public places. Savings of over 1 million dollars in potential losses within the first year. Reduction in the cost to public services based on reduced service calls. Reduction in loss of human life. | CAD Consultants | 15 | 0 to 30 days | \$365,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Montgomery | Physician-Healthcare Information Technology Initia | Developing a unique type of delivery method where both financially challenged small physician practices and community health centers can utilize health information technology (electronic medical records) at an affordable cost to improve the quality of patient care. | Oncore Associates, LLC | 10 | 0 to 30 days | \$100,000 |
| Montgomery | home repairs, bills | Due to losing my job, I am unable to do the much needed home repairs for example, electrical, plumbing, roof, general in home repairs and updating that is needed. I also am in need with financial struggles do to the loss of income. | home | 2 | 0 to 30 days | \$30,000 |
| Montgomery | Garner's Reopening | This is a restart of a previously existing business that was closed down in 2008. We purchased the property and reopened the business under the same name in order to capture the 88 customer base. We have been fairly successful in doing so but we need the funding to update equipment and to supplement cashflow for the increase in business. We can easily justify the increased number of employees to accommodate the business even in this turbulent economic environment. There are a number of new government funded projects starting here in the Dayton area and we service and repair all sorts of equipment related to the construction arena. All companies are keeping their equipment longer and the need to replace it grows more every day therefore positioning our company for a great deal of growth. | Garner's | 6 | 0 to 30 days | \$250,000 |
| Montgomery | Expand Business Growth | Purchase 10 trucks to five drivers to haul loads. Purchase 10 drivers to haul loads. The New Glass Experience, hands on hot glass encounter coupled with exploring the history and significance of glass in society 9th - adult Each class tailored to the curriculum of participants Goal: 100 field trips per year reaching 4000+ students Apprenticeship: apprentice with a master glassblower 20 hrs per week Goal: 4 apprentices per year Support: each class is given a hand blow vessel to raise funds for art supplies and fieldtrips, donations to NFPs Goal: \$700,000.00 for the school art programs and NFPs | JGC Trucking Inc | 10 | 91 to 180 days | \$500,000 |
| Montgomery | ACE | The future: develop outreach programs, interdisciplinary curriculum guides, work with magnet and STEM schools exploring the significance of glass in industry, chemistry, medicine, architecture, and art. Develop multiple revenue streams to make the organization self-supporting and sustainable. | Montgomery | Concession/Restroom Building | Construction of new concession/restroom facility at Harmon Field in West Carrollton. Provides public facilities and concession stand for West Prarie Football Organization. Currently using outdated concession stand and porta-potties. This is in a public area. We require new plumbing/septic, foundation, electric and building construction, as well as fixtures for the interior. | WCRA (West Carrollton Recreation Association) | 40 | 31 to 90 days | \$75,000 |
| Montgomery | Build state of the art high tech laser processing | Build new state of the art high tech laser processing facility and purchase new high tech equipment for laser processing. Develop and produce parts for the aerospace, medical, high tech, fuel cell, automotive, military, locomotive, heavy truck and agricultural markets. | Staub Laser Cutting | 50 | 0 to 30 days | \$3,000,000 |
| Montgomery | gummer-1502 | up grade to energy efficient furnace, water heater, windows and air conditioner as well as insulation in attic and walls. | r & r ohio property management | 4 | 31 to 90 days | \$45,000 |
| Montgomery | City of Dayton, Clean Fuels Ohio Partner | Three fast fill station with high-capacity compressor, small backup, dispenser, card reader, and storage Phase 1: 200 police cruisers plus 20 main trucks. Phase 2: utility and other vehicles applicable. This also includes emergency vehicle assistance and Compressed Natural Gas mechanic facility. | Clean Fuels Ohio | 12 | 0 to 30 days | \$1,500,000 |
| Montgomery | Mazer Diecut Purchase | Buy previous customer's business that has closed and resurrect it with key people and our own excellent workforce contacts. Retain jobs that have left the state. | Precio, Inc. | 30 | 91 to 180 days | \$750,000 |
| Montgomery | Montgomery County Community and Economic Developme | Training in infrastructure development including concrete pouring and finishing. Water, sewer and other mechanical instruction including the installation and development on new homes in the Jefferson Township area. Additionally, training in the development of new housing including mobile and tract homes for suburban and rural residents. Housing development is extremely important and this training will assist with the creation of new entrepreneurs and create additional jobs as the businesses develop. Economic development will also improve as new retail and service businesses will be created. New groceries and other retail business will flow into the area and other jobs will also follow. | c3 Development Assistance | 25 | 31 to 90 days | \$750,000 |
| Montgomery | laser cutting machine to manufacture components fo | New laser cutting machine, proper facility and clean room for the high tech manufacturing of components for the advanced batteries and hydrogen fuel cell industries. | Staub Laser Cutting | 45 | 0 to 30 days | \$850,000 |
| Montgomery | State Energy Program | Retrofit tight building air sealing and signs using neon or incandescent illumination. To low voltage LED illumination. These retrofits will decrease energy consumption in these applications by as much as 80% annually. This concept has already made an impact nationally through the private sector and energy conservation is just the beginning of the exciting benefits of LED technology. Ohio education on the features and benefits the use of light emitting diodes will expand for beyond litged sign applications. Our company has undertaken many of these retrofits and completed to the pleasure of our clients, local environmentalists, and the green movement in general. Thank You. | Visualconcepts | 5 | 0 to 30 days | \$5,000,000 |
| Montgomery | Rent-to-own Housing | Provide 100 Homes to families who have lost or are losing their homes to foreclosure. Each family will receive ongoing credit counseling and guidance. Each family will be provided home maintenance training. Housing will be fully updated and refurbished homes in existing mature neighborhoods. This project will help prevent the decay of existing housing stock and neighborhoods. The maintenance training will help the families keep the houses in good condition. Each family will be able to enjoy a home they can purchase at below market prices once they have reestablished good credit. The ongoing classes will help the families establish and maintain budgets, and develop the needed an ontime payment history. | Homes and More, LLC | 45 | 31 to 90 days | \$1,800,000 |
| Montgomery | Preschool/HeadStart/Early HeadStart education | I tick child day care and learning center. This project will provide parents of children with medical needs/communicable or non-communicable a place to have their children cared for so that they don't have to take off work. This will open up jobs as we will hire medical personnel to care for the children, I am a registered nurse and will be overseeing the program. It will be a benefit to the community because parents won't have to take days off of work to care for their children. This will increase attendance and productivity for the businesses they work for which in turn benefits their children and government agencies. We are currently partnered with Head Start and would like to branch into Early Head Start as well so we can provide early intervention in the needs of these children. There is no program like this in our area and we feel it is strongly needed. The projected outcomes will allow easy access to qualified early childhood education for their children and support the need for sick children to attend preschool. This also will enhance the attendance in the workforce, which will give productivity for employers. With this new project we are trying to get young people involved in the automotive industry. We will train young people on how to become a automotive expert. A lot of young people don't understand that automotive workers make very good money. This program would open the doors to a new life for some people, and will teach them skills that will last them a lifetime. This will teach the youth of america how to paint and repair in the auto/body industry. | Home Away From Home Learning Center | 20 | 91 to 180 days | \$50,000 |
| Montgomery | aUTOBODY TRAINING GROUP | Encourage consumers to replace windshields to increase energy efficiency of homes/businesses. | BILL HICKS BODY SHOP | 5 | 0 to 30 days | \$250,000 |
| Montgomery | Zephyr Energy Conservation Program | Funding for additional salesperson, advertising, materials, sales samples | Zephyr Products | 25 | 0 to 30 days | \$100,000 |
| Montgomery | Child Therapy for Children Who Witness Domestic Vi | Funds are requested to increase the size of our child therapy department and increase the number of children who have witnessed domestic violence that we can serve. With the addition of two staff members (and costs) we could also provide outreach to local schools and parent groups, as well as conduct a community violence-free relationship campaign for youth. | Artemis Center for Alternatives to Domestic Violence | 2 | 31 to 90 days | \$140,000 |
| Montgomery | Family Violence Collaborative | Application for continuation funding of a joint project between Artemis Center and the YWCA of Dayton, for the Family Violence Collaborative. The Collaborative is a systems change effort to improve the community response to adult and child victims of domestic violence. This exemplary program will be discontinued unless funding can be found. Encourage consumers to replace windshields to reduce door/drawers to increase energy efficiency. | Artemis Center for Alternatives to Domestic Violence | 1 | 0 to 30 days | \$70,000 |
| Montgomery | Bethlyview Energy Conservation Program | Funds used for additional salesperson, sales samples, materials, advertising | Bethlyview Products | 25 | 0 to 30 days | \$100,000 |
| Montgomery | JRWA Improvement Project 1 | Signaling water system to meet current and future needs. This would include a generator for power outages/pads road meters for accuracy and efficiency. New well and filter gallery for increased production, a new off-maintenance building for maintenance and customer service. | Jefferson Regional Water Authority | 6 | 91 to 180 days | \$650,000 |
| Montgomery | Lithium Ion Anode Nanotechnology | In 2009, only one Ohio TRAP proposal in the Energy Storage category was a finalist - ours. That proposal sought an expansion of our current TRAP project on manufacturing a breakthrough lithium-ion battery material, a silicon coated version of our carbon nanotube paper product. We have allied with the battery manufacturer EaglePicher to pursue this material which stores over 4 TIMES the energy of today's lithium ion anodes, and is proven in extensive independent tests. Manufacturing consists of making the paper and then coating it with silicon. Customized papermaking equipment has been built for us by Southbeat Norowaves for the first step. Now we seek to build a unit that will allow fast the paper in a continuous, rolling process. This will complete the proof of manufacturing viability and launch an important green industry in Ohio, generating hundreds of jobs. Lithium ion batteries use a growing multi-billion dollar business. An analysis done by GM shows that this product can double the range of an electric vehicle. It will also provide high energy storage capacity for energy derived from wind or solar sources, which is vital to make wind/solar practical. | Inorganic Specialists | 15 | 0 to 30 days | \$750,000 |
| Montgomery | Electronic Appliance Company, Clean Fuels Ohio Par | 24 electric service trucks. | Clean Fuels Ohio | 5 | 31 to 90 days | \$1,000,000 |
| Montgomery | Local Energy-Efficient Web Hosting Facility | Project includes upgrade of existing web server hosting facility with newer energy-efficient web servers and network systems, as well as high-bandwidth internet link to facility. Project also includes evaluating the development and implementation of renewable energy sources to power server facility, either solar or wind, with provision to return excess energy resources to the public power grid. Expect reduction in energy consumption of facility and ability to serve local businesses with cost-effective and energy-efficient web hosting options, as opposed to corporate server farm options available today. Estimated project costs includes replacement servers (~2000), new renewable energy system on premises (~15000), and any required design/constructor/implementation/configuration manpower from within PC Backup (~15000). Requirements for PC Backup to hire additional employees has not been defined at this time and depends on final project implementation. Any required additional manpower resources for project will be sourced locally as much as possible. | PC Backup | 1 | 31 to 90 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Montgomery | Cyber Cafe | Mc One Stop Center (MOTC) is a faith-based community center designed to reduce substance abuse, HIV, and Hepatitis. MOTC offers free and HIV testing, Hepatitis screening, health education, employment assistance, food/banking, job loans, and referrals for additional services. In October 2008 MOTC opened a cyber cafe designed to provide more intensive employment assistance, including resume writing, job search placement, and computer training. This request for funding would support staff to manage the cyber cafe and the services it offers, allowing the cafe to serve more persons and expand existing programs. Expected outcomes for one year of service are as follows: 1) provide resume-writing workshops to 500 persons; 2) provide computer training to 500 persons; 3) provide individualized job search/placement services to 100 persons; and, 4) find jobs for 25% of persons receiving individualized job search/placement services within six months. | SARDI Program at Wright State University, Boonshof | 27 | 0 to 30 days | \$200,000 |
| Montgomery | Supported Employment for Individuals with Substanc | Program Goal: Supported Employment for individuals with substance abuse disorders and mental health and/or other disability issues. The IPS Model has been utilized for the past three years. An employment specialist provides support and assistance to consumers by serving as job developer, consumer advocate and liaison with prospective employers, as job coach, and as provider of consistent monitoring follow along services. Provided integrated rehabilitation services with other practitioners (clinical director, mental health/counselor or Drug (AUD) counselor and case manager). Performance Measures: number of participants who successfully obtain employment; who maintain employment for six months; who decrease AUD use; who successfully complete recommendations for their individualized AUD treatment program; fidelity to IPS outcome. | CAM Program at Wright State University, Boonshof | 25 | 0 to 30 days | \$150,000 |
| Montgomery | Supported Employment for Prison Re-Entry Populatio | Program Goal: To decrease recidivism rate of the more than 15,000 individuals released from Ohio prisons and jails, to successfully and safely gain neighborhoods and families. Program will address issues such as unemployment, homelessness, as well as mental health/counselor or Drug (AUD) issues by utilizing evidenced based practices in supported employment, psycho-educational classes, AUD and mental health counseling, community supported case management and technology screening. These services will be offered at a faith-based outreach venue in a community setting. Performance Measures: reduction in recidivism rate, number of participants who obtain competitive employment (25, annually), number who remain drug free (pass drug testing while in the program), percent of participants completing the program who remain arrested during supervised release. | CAM Program at Wright State University, Boonshof | 5 | 91 to 180 days | \$400,000 |
| Montgomery | Supported Employment Model | Over the past 4 years the Individual Placement and Support (IPS) program, a supported employment intervention, was successfully implemented at the Consumer Advocacy Model (CAM) program in Dayton and the TRS Network in Columbus. Both facilities serve persons with dual diagnosis of a disability and substance use disorder (SUD). The IPS program was successful in assisting many persons with severe mental illness to secure and retain gainful employment; these are persons who typically not able to work. Funding for the IPS program ends December 2009. To continue the success of increasing employment outcomes for people with mental health (MH) diagnoses and SUD in Ohio, more funding is needed. With your help, the IPS program will provide jobs for approximately 7 employees (therapists, counselors, job coaches and others who carry out the model) as well as approximately 45 individuals with the proposed 2-year supported employment program. | SARDI Program at Wright State University, Boonshof | 72 | 0 to 30 days | \$170,000 |
| Montgomery | Engineering 21st Century Educators | Our STEM-based professionals would educate traditional staff on 21st Century careers. Teachers would collaborate to experience STEM inquiry-based learning. Teachers would review a journal or other item. They would investigate the history of the item while reading and watching a video. Technology would provide the tools that assist them in their tasks. Teams would be encouraged to create and present knowledge using a variety of multimedia tools. Teachers would develop a prototype of the item to provide a solution to a problem. Lastly, educators would have the chance to develop similar lessons to implement with their students. | Huber Heights City Schools | 25 | 91 to 180 days | \$250,000 |
| Montgomery | Fast Forward Center | The Montgomery County Out-of-School Youth Initiative/Sinclair Community College Fast Forward Center is a drop-out recovery initiative serving students 16-21 years old who are at risk of dropping out of high school. The Fast Forward Center has helped 100 dropouts in Montgomery County from 25.6% in 2001 to 11.6% in 2008 and is now the lowest of Ohio's large urban counties. The partners, Mould Street Academics, are three local-based public charter high schools provide programming, including career counseling, vocational training, work study or service learning, and after school enrichment. These services help disadvantage students graduate from high school. This project will create/prepare 11 jobs. Additional benefits include taking former drop outs and helping them earn high school diplomas and job ready skills. To date over 1,800 former high school drop outs have earned their high school diploma. The program also reduces the financial burden on county government for juvenile justice and family services. Students that complete the project will improve their life-long earnings and increase their ability to earn family-sustaining wages. | Sinclair Community College | 11 | 0 to 30 days | \$1,500,000 |
| Montgomery | Sinclair Health Sciences Center | This project will construct a 100,000 square foot Sinclair Health Sciences Center to co-locate its allied health and nursing programs. The Center will have multi-purpose classrooms, patient care laboratories, technical laboratories (nursing, dental hygiene, radiologic technology, etc.), human patient simulator laboratory, networked computer laboratories, and faculty and staff offices. This Center will permit expansion of program capacity and more efficient administration of programs producing high demand clinical personnel. The Division of Life and Health Sciences will have classrooms, laboratories, and offices for all certificate/degree programs in their entirety. The move will free about 2,000 square feet of classrooms, laboratories, and offices for the expansion of other critical high technology programs now on site in the Dayton economy. Approximately 145 jobs will result from the construction and the installation of equipment and new job faculty and technicians will be created to operate the center. The project involves investments in the downtown core of Dayton. The community benefits from the new facilities to educate students for the healthcare industry. | Sinclair Community College | 148 | 91 to 180 days | \$27,500,000 |
| Montgomery | Center for Displaced Workers | The Sinclair Center for Employment and Career Development of Displaced Workers aligns workers' skills with high demand, high growth jobs. It provides resources at Sinclair, makes referrals and assessments, the Montgomery County Job Center and area Workforce Development Bureau. The Center would help displaced workers, unemployed workers, and those at risk of unemployment. An individualized coaching program would be used to provide: 1. Placement and job tracking training in identified career pathways in high demand, high growth jobs. 2. Specialized skill, career, and aptitude assessments and referrals to training. 3. Opportunities for job shadowing. 4. Counseling and referrals for adjusting to living on a reduced income, dealing with creditors, and effectively managing change. 5. Referrals for small business start-ups and entrepreneurial activities. 6. Peer-to-peer networking and support activities. Approximately 27 jobs will be created through this project five from relocation and installation of equipment. 22 to operate the Center. Other benefits are investments in downtown Dayton and a growing workforce whose skills align with high growth, high demand employer areas. | Sinclair Community College | 27 | 31 to 90 days | \$1,997,000 |
| Montgomery | Sinclair Center for Biomedical Technology and Manu | The Sinclair Center for Biomedical Technology and Manufacturing will support three components of the rapidly expanding local economy. The first component focuses on biomedical technology facilities and equipment to train technicians for local pharmaceutical and medical device manufacturers. The second component addresses the growing need for biotechnicians in hospitals and medical research and development. This second component funds the expansion of biotechnology laboratories. The third component creates a biomedical technician training laboratory that addresses the need to train technicians to install, repair, maintain, and calibrate high-tech biomedical devices such as EKGs, defibrillators, dialysis equipment, and job titles will be created through this project. Funding will result from construction, and the installation of equipment. Three new jobs (faculty and technicians) will be created at Sinclair to operate the center. The project involves investments in the downtown core of Dayton. Additionally, the community benefits from the expanded facilities to educate students for high-demand technical jobs. | Sinclair Community College | 17 | 31 to 90 days | \$2,750,000 |
| Montgomery | RFID Center | The Greater Dayton Region is rapidly becoming a national hub of RFID (radio frequency identification) technologies. In collaboration with private companies, Sinclair will develop an RFID Training Center that consists of two major installations: (1) RFID manufacturing laboratory that simulates a shop floor including a manufacturing work cell, conveyor belts, RFID tag readers, active and passive tag printers, tag readers, as well as software for data analysis, applications laboratory that simulates a real-world manufacturing operation with applications from several industries: medical, retail inventory control, etc. Equipment includes conveyors, RFID tag readers, active and passive tag printers, tag readers, as well as software for data analysis, inventory control, etc. Approximately six jobs will be created, four will result from construction and installation of equipment. Two new jobs (faculty and technicians) will be created to operate the center. The project involves investments in the downtown core of Dayton. Additionally, the community benefits from the expanded facilities to educate students for high-demand technical jobs. | Sinclair Community College | 6 | 31 to 90 days | \$1,000,000 |
| Montgomery | Hybrid & Fuel Cell Automotive Technology Center | Sinclair's Automotive Technology department maintains a national leadership role, twice named the Best in the Nation, receiving the National ASE Automotive Award of Excellence in 1998 and 2004. The department is one of only 15 in the nation to achieve National Automotive Technicians Education Foundation "master certification" status for four separate programs. The Automotive Technology department will expand upon its current National Science Foundation grants to establish the Sinclair Automotive Hybrid & Fuel Cell Technology Center to provide technical training and faculty development. The Center will expand its laboratory and create a hydrogen fueling station, purchase electric and hybrid automobiles, install outdoor electrical charging stations, purchase automotive parts, maintenance and repair tools, and provide faculty training. Approximately 18 jobs will be created through this project. 15 from construction and installation of equipment. Three new jobs (faculty and technicians) will be created to operate the center. The project involves investments in the downtown Dayton. The community benefits from the expanded facilities to educate students for high-demand jobs. | Sinclair Community College | 18 | 31 to 90 days | \$3,250,000 |
| Montgomery | Bethelview Energy Conservation Program | Encourage consumers/homeowners to replace doors/windows to increase energy efficiency. | Bethelview Products | 25 | 0 to 30 days | \$100,000 |
| Montgomery | Zephyr Energy Conservation Program | Funds used for additional salesperson, sales samples, materials, advertising Encourage consumers/homeowners to replace doors/windows to increase energy efficiency. | Zephyr Home Improvement | 25 | 0 to 30 days | \$100,000 |
| Montgomery | EXPANDING DEVELOPMENTS | Funds used for additional salesperson, sales samples, materials, advertising | MICHAEL WELLS ELECTRIC | 2 | 91 to 180 days | \$50,000 |
| Montgomery | Business expansion | LOOKING TO EXPAND IN UNDERGROUND WIRING PROJECTS NEED TO PURCHASE UNDERGROUND WIRING LOCATORS AND TRENCHING EQUIPMENT. TRYING TO EXPAND BUSINESS DUE TO LOSS OF 35 PERCENT IN WORK LAST YEAR. Money for purchase of building to run business out of or down payment for lease running out of rental. Better equipment/truck, service truck to be able to service more of the community in emergencies. | Ohio Fleet Services, LLC | 5 | 0 to 30 days | \$250,000 |
| Montgomery | Interoperability Communications plan | The Montgomery County Sheriff's Office and County Commissioners have spearheaded establishing an Emergency Operating Center (EOC) for the county to open January 2009. The plan will provide jobs for 60-80 dispatchers for the county. These new units will be placed in positions of all of our emergency vehicles. The 40 funded radios will meet the FCC's APCO-25 interoperability standards, analog/digital 512 channels, highly effective, efficient, and ultra ultra agency-to-agency communications now and in the future. The new substation will help our department meet or exceed NFPA standards 1710, 1291 and 1561. The primary goal of this project is to replace non-compliant, outdated radio equipment with complete radio equipment and to integrate computers that will assist to ensure that firefighters have access to adequate radio equipment to maximize firefighter safety, public safety and operational efficiency. The department is looking to purchase radio computers into the department's emergency vehicles. These devices would be used as Mobile Data Terminals and create a communications link with the dispatch office during both emergency and non-emergency situations. the future of the neighborhood. (document can be found at www.historicsofspark.org) | Trotwood Fire & Rescue | 15 | 31 to 90 days | \$390,400 |
| Montgomery | AIA150 Blueprint for Historic South Park: Wayne A | One result is an effort to promote the revitalization of our primary commercial zone (Wayne Ave.). The project includes: * Theobald Dr. enhancements for traffic control & increased parking for adjacent businesses * Added lighting for safety/security of crime * Added/improved sidewalks & crosswalks for pedestrian usability * Closure of a segment of Adams St. for traffic control & pedestrian safety * Traffic Calming Islands on Wayne Ave. for pedestrian safety & business viability * Pedestrian Crossing Points on Wayne Ave. for potential commercial development of both sides of the street * Marking of the Wayne Ave. business district to potential investors & business owners | Historic South Park, Inc. | 100 | 0 to 30 days | \$4,850,000 |
| Montgomery | waterline systems upgrade | Collaborators in this effort have included: * Historic South Park, Inc. * 1504 South Park neighbors | Catalpa Grove MHP | 2 | 91 to 180 days | \$50,000 |
| Montgomery | From Poor to Middle Class to Wealthy | Upgrades all plumbing including meters plus, well house, water lines in service area. Clean water and better water pressure. Helping people, especially those who lack of it, to start their own recession proof business. Growth will be exponential and any funds borrowed from the stimulus funds will be paid back within a 5 year time frame. | The Futures Here | 24 | 0 to 30 days | \$15,720 |

|----------------|--|---|--|----------------|--------------------|---------------------------|
| Montgomery | Conversion to Wind Turbine Nacelle Factory | <p>We are seeking to reconfigure our facility or subcontract the work to a subcontractor. We are seeking a partnership with an existing wind OEM or Tier 1 supplier which would fully utilize our expertise in engineering, supply chain management, fabricating, machining, and assembly.</p> <p>The joint venture partner would have the benefit of AIDA's trained workforce, enterprise software system, and all other support mechanisms via our 12 years of experience as an OEM supplier in our core market (mechanical stamping press manufacturing).</p> <p>The investments required for a factory conversion or re-tooling include:</p> <ul style="list-style-type: none"> - Coordinate Measurement Machine (CMM) - Automated welding equipment and fixtures - Non-destructive test (NDT) equipment - Training of operators and certification of welders - Reconfigure approx. 60,000 sq. ft. of existing assembly space to accommodate a cellular assembly workflow - Addition (expansion) of 50,000 sq. ft. assembly bay, complete with necessary cranes and other features | AIDA-America Corporation | 500 | 31 to 90 days | \$7,147,500 |
| Montgomery | Video conference training for ADD providers in Ohio | Alcohol and Drug treatment services for the Deaf people in Ohio are severely limited due to the unique communication needs of persons who are deaf. There are few staffed AOD providers in American Sign Language. Wright State University has established a telemedicine telehealth program "Deaf Off Drugs and Alcohol". This program is able to provide direct treatment services throughout Ohio using high quality web-based video conferencing technology. DDA's ability to provide services is limited by the lack of up to date technology currently in use at most treatment centers in Ohio. This project will engage the infrastructure of the 20 largest AOD providers in Ohio by engaging telemedicine treatment stations at each location that is computer-based. The computer-based communication equipment at treatment sites will be used by clinicians and deaf clients. This project will have one full time staff member travel to each location, establish the videoconference room and train on-site personnel in the operation and maintenance of the equipment. This will allow on site personnel to be more effective when a Deaf person enters their facility and will allow better treatment for clients. | SARDI Program at Wright State University, Boonshof | 3 | 91 to 180 days | \$300,000 |
| Montgomery | DEVELOPMENT AND COMMERCIALIZATION OF LITHIUM-AIR BATTERY | The Electrochemical Power Group of UTRI has completed an exploratory development of solid state, rechargeable lithium-oxygen cells funded by an Air Force sponsored program. These cells have been subjected to many discharge-charge cycles at discharge current densities ranging from 0.05 to 15 mA/cm ² . The cells exhibited excellent thermal stability and rechargability in the 30 to 105°C temperature range with Coulombic efficiencies ranging from 98 to 100%. ETEC proposes using its product development expertise to create a team to track this technology at WSU working for niche aerospace applications. UTRI, Facebook, Precision Energy Technology and ETEC will define requirements, establish form factor constraints, and manufacturing processes needed to establish a competitive commercial production capability in Dayton, Ohio. In parallel UTRI team will develop cells with an energy density greater than 1000 Wh/kg. ETEC will coordinate both parts of this collaborative project including adding additional partners and institutions within Ohio that specialize in interfacial chemistry to assist with materials selection and measurement of performance and other means to help keep small businesses functioning through economic down-turn, and recession. | EMTEC | 134 | 0 to 30 days | \$4,000,000 |
| Montgomery | Small Business Relief and Recovery Project | Expansion of small business consulting activities with a focus on hiring and retaining displaced financial services personnel. Client focus is on cost cutting, re-negotiation of contracts, and other means to help keep small businesses functioning through economic down-turn, and recession. | Peak Consulting and Commercial Credit, LLC | 50 | 0 to 30 days | \$133,000 |
| Montgomery | Purchasing Warehouse | The 14,000 of purchasing warehouse holds court equipment and furniture until they are reused as part of a renovation or disposal process. The space requires environmental and energy control improvements to maintain court property at the proper temperature and humidity. | Montgomery County Public Works | 50 | 91 to 180 days | \$500,000 |
| Montgomery | Coroner Crime Lab Expand Autopsy Suite | The Coroner Crime Lab is a regional facility serving a large portion of Ohio. The existing autopsy suite air-locks, environmental and energy controls allows for migration of odors and the space does not match operational needs. An expanded LEED Gold autopsy suite facility is necessary to meet ongoing and long term needs. The remaining laboratory and office space can be repurposed in a more appropriate, less confined, space with energy controls in place to match the need. | Montgomery County Public Works | 8 | 91 to 180 days | \$4,000,000 |
| Montgomery | County Administration Building Replace Eight Escal | Eight existing escalators have high operating costs (both energy and maintenance) and are an ongoing safety concern for users. By removing the escalators and replacing them with elevators extended to the mezzanine and lower level, this project will provide safer and better access for the Board of Elections, Coroner Crime Lab, Mailroom, Loading Dock and other users on these levels, in addition to lowering energy and maintenance costs. | Montgomery County Public Works | 25 | 181 days or more | \$900,000 |
| Montgomery | driveway and drain pipes | Need 40 feet of drain pipe at front of property, out down tree and put blacktop on 90s 20 foot (now gravel and dirt) driveway. we are senior citizens (one disabled) on a fixed income and cannot save any money to do this project. with all the meds we never have anything ahead. driveway would make it safer for us to walk to house. I have tested my urine several times. | personal recovery | 20,000 | 91 to 180 days | \$20,000 |
| Montgomery | Bed Bug Elimination Program | Education on the early detection and proper protocol for the treatment of bedbugs. Program would target three counties, and provide educational material and responses to families with economic hardship. Hot line would be established to answer questions regarding bed bug infestations. Assistance would be provided for treatment for families with economic hardships. Program will help families in the recognition of the early stages of a bed bug infestation, and provide the families with useful information on how to properly mitigate a bed bug infestation without placing other risk of being affected by the infestation. Program will cover the "do's and don'ts" for the prevention, mitigation, and the spread of bed bug infestations. Local television and radio stations will be encouraged to participate in the program by broadcasting public service announcements that would help direct families to the program. | The A-OK Exterminating Co., LLC | 4 | 0 to 30 days | \$350,000 |
| Montgomery | Marketing Ramp-Up | Hire two full-time employees to generate additional sales of approximately \$ 150,000. | ShirtDaddy, Inc. | 2 | 0 to 30 days | \$50,000 |
| Montgomery | Project: Develop Our Youth through Positive Means | <p>A focus group of young men and women will assist in the development of a student into a whole person, encourage and teach discipline, and respond to families with economic hardship. Hot line would be established to answer questions regarding bed bug infestations. Assistance would be provided for treatment for families with economic hardships. Program will help families in the recognition of the early stages of a bed bug infestation, and provide the families with useful information on how to properly mitigate a bed bug infestation without placing other risk of being affected by the infestation. Program will cover the "do's and don'ts" for the prevention, mitigation, and the spread of bed bug infestations. Local television and radio stations will be encouraged to participate in the program by broadcasting public service announcements that would help direct families to the program.</p> <p>More specifically, the program will focus on such topics as: the need for respect and pride, shame, sexism, homophobia and a host of other important and relevant topics that young men face with their daily living and within their inner being on a regular basis. Addressing violent tendencies when they occur in different settings and situations and how best to deal with this negative, impulsive behavior. Cutting violence in the future of the neighborhood. (document can be found at www.historicouthpark.org)</p> | Prime Performance: Mentoring through Sports and E | 3 | 31 to 90 days | \$450,000 |
| Montgomery | AIA150 Blueprint for Historic South Park: Boundari | <p>One result is an effort to update signage and physical elements that help to define the neighborhood's geographic area. In addition, this effort will help to define an identity, as well as provide for a safe, walkable environment. The project includes:</p> <ul style="list-style-type: none"> * Construction of "gateways" from the primary border streets that will both define entrance point into the neighborhood and slow down entering traffic. * The use of artistic murals, re-designed street signs and colorful banners to help identify Historic South Park * Repair sidewalks on Park Drive Blvd. for safety of pedestrians * New, historic styled lighting for increased safety & crime control on the walking paths of the boulevard <p>Collaborators in this effort have included/will include:</p> <ul style="list-style-type: none"> * Historic South Park, Inc. * 150+ South Park neighbors | Historic South Park, Inc. (HSPi) | 25 | 0 to 30 days | \$506,335 |
| Montgomery | AIA150 Blueprint for Historic South Park: Neighb | <p>One result is a plan to renovate existing Greenspace areas to promote a healthy & social lifestyle amongst our neighbors. The project includes:</p> <ul style="list-style-type: none"> * Implement "town-square" meeting place in Biomet Park for conversation & social activities * Addition of benches and shaded seating areas * Addition of picnic tables & grills * Enhance play space in * Addition of a "splash park" for neighborhood children * Reurbished landscaping, tree plantings herb garden <p>In addition, educational programs will be implemented for neighbors to learn about gardening skills, appropriate tree maintenance/replacement, landscaping, etc. for an improved neighborhood appearance (adding to property values).</p> <p>Collaborators in this effort have included/will include:</p> <ul style="list-style-type: none"> * Historic South Park, Inc. * 150+ South Park neighbors * AIA Dayton (American Institute of Architects), representing 12 design firms | Historic South Park, Inc. (HSPi) | 7 | 0 to 30 days | \$203,200 |
| Montgomery | Sara's med school loans | I will begin residency in July of 2009 and I am in need of funds to pay my medical school loans in order that I may work in the inner city clinics without the stress of paying on my student loans. I currently have alternative loans at 6 and 10% variable interest. Currently, with the economy, I am unable to consolidate these loans and my monthly payments are around 700 dollars. I know that with the time spent at a job, I could be volunteering my time at the clinic where they are very short staffed. I was hoping for help but I can't better assist the community and improve healthcare through educating and treating patients. I hope to one day open my own clinic and believe this would allow me to get the experience and connections I need to make that possible. Thank you for your consideration. | medical school loans | 1 | 31 to 90 days | \$125,000 |
| Montgomery | Used Auto Dealership Location Move | <p>Maseno Used Auto Dealership has been located at 801 Bridge St. The city of Dayton closed down the metal bridge that was bringing traffic to our location about two years ago. This was after inspection revealed conditions unsafe for motor traffic. The bridge remains closed.</p> <p>We need \$285,000.00 to set up our dealership in a new location. We have identified and negotiated a price of property on Salsbery Ave. It has good traffic exposure and hence would be ideal for our dealership.</p> <p>The number of jobs to be created by this project is six.</p> | Maseno Development Inc. | 6 | 0 to 30 days | \$285,000 |
| Montgomery | CNG and Propane Vehicle advanced automotive compos | <p>Make advanced composite automotive fuel tanks in Ohio instead of having Ohio Fleets purchase these tanks from the Great Plains for foreign manufacturers. This will be done with existing technology but existing manufacturer methods will be improved to allow the project to be sustainable long after the stimulus program has expired.</p> <p>This will be done for up to 5 tank models for varying vehicles.</p> <p>Plus the Ohio CNG Consortium and the Ohio Propane Collaborative will be consulted to discover fleet challenges that may also be addressed with this technology. If applications are discovered that are more important, then one or more of the above five tank models maybe substituted with same approval to solve the industry challenge. The end result will be a healthier CNG and Propane transportation industry as well as the establishment of additional Ohio based advanced automotive parts manufacturing.</p> | LiteFlex LLC | 35 | 0 to 30 days | \$5,500,000 |

|----------------|--|---|---|----------------|--------------------|---------------------------|
| Montgomery | Electric Drive Vehicle advanced automotive comosit | Make advanced composite automotive components other than composite springs for electric drive advanced vehicle manufacturers with technology to allow more battery capacity, thus improving vehicle performance. This will be done for up to 5 vehicle models for varying vehicle classes. This technology will potentially be leveraged to other advanced automotive manufacturers as a secondary benefit. This could benefit the CNG and Propane automotive industries as well. Additionally, the creation of these new advanced composite automotive parts will create additional demand for Ohio products as the benefits of this technology is realized and experienced by the automotive industry. We expect a number of unique applications of this existing Ohio technology to emerge with great benefit to the Ohio's economy as well as the advanced automotive manufacturers industry! | LiteFlex LLC | 55 | 0 to 30 days | \$7,500,000 |
| Montgomery | Electric Drive Vehicle composite springs | Make advanced composite automotive parts for electric drive advanced vehicle manufacturers with technology to allow more battery capacity, thus improving vehicle performance. This will be done for up to 5 vehicle models for varying vehicle classes. Evaluations will also be done to assess what other parts could be made using this technology and potentially leveraged to other advanced automotive manufacturers as a secondary benefit. This could benefit the CNG and Propane automotive industries as well. Additionally, the creation of these new advanced composite automotive parts will create additional demand for Ohio products as the benefits of this technology is realized and experienced by the automotive industry. We expect a number of unique applications of this existing Ohio technology to emerge with great benefit to the Ohio's economy as well as the advanced automotive manufacturers industry! | LiteFlex LLC | 55 | 0 to 30 days | \$7,500,000 |
| Montgomery | Alternative Energy Demonstration and Educational C | NCC submitted a previous request for photovoltaics, geothermal and energy efficiency improvements of the Kettering and Dayton sites. This proposal wraps the program with the addition of small commercial industrial building wind systems as developed by Twenty First Century Energy and includes energy storage as a part of the package. The team would still include NCC and the educational center, but would be driven and managed by a professional project team assembled by BerryHill Partners LLC including Riehl Engineering a local BA engineering and architectural firm. The outcome will also be project specifications which can be used for other industrial conversions around the state. To be led by BerryHill and Riehl to industrial plants. The SCC and WSU educational aspect will bring students of all ages to see the conversion and to perform actual energy experiments and testing for efficiency characterization. In total, 200 construction jobs will be used, 210 to 500 jobs in incubating companies will be created and/or sustained and Ohio will have a legacy environment of alternative energy demonstration. | BerryHill Partners LLC | 500 | 31 to 90 days | \$27,346,000 |
| Montgomery | City Center Project | To create a city center at the southeast corner of Fair Hills Ave. and Spring Road. This center would contain a shopping center (existing would be renovated), hotel, restaurants (existing), parking garage, existing bank, residential condos, residential town and town homes. This area would contain a public square and become the official downtown of Kettering. The center would contain close to 400,000 sq. ft. of retail, office, restaurants and parking areas. In addition there will be 240 residential units. The expected outcome is several hundred construction jobs for several years. There will be a large amount of demolition work as well as several years of construction work on the project. After the project is complete there will be several hundred jobs created in the retail sector, hotel services area, restaurant workers. This project is currently in the planning stages at the City of Kettering. The city will have some matching funds available. Another expected outcome after the City Center is created is a very positive economic development engine for Kettering. It is projected to bring visitors in to Kettering from the surrounding region, including Cincinnati and Columbus. | City of Kettering | 350 | 181 days or more | \$10,000,000 |
| Montgomery | Taxi and Delivery | To Start a Taxi and delivery service with a military theme connected to Dayton History | Big Red One Taxi and Livery | 20 | 181 days or more | \$250,000 |
| Montgomery | Nuisance Abatement Demolition Program | Funds will be allocated to facilitate the demolition of blighted and nuisance structures that are beyond repairs and pose a health and/or safety hazard in neighborhoods of greatest need. The intent of the program is to eliminate blighting influence which will make the neighborhoods a desirable place to live and invest. Structures targeted for demolition will be selected in partnership with neighborhood leaders and City of Dayton staff. All structures demolished under this program will be certified as blighted by the city Code Enforcement Staff. This program will also have a workforce development component that will provide job training to unemployed and underemployed individuals. The jobs training will focus on landscaping and land recovery after the nuisance structure have been demolished. Interviews with: Mayor of Hope recipient Parley. | City of Dayton, Department of Building Services | 30 | 31 to 90 days | \$1,000,000 |
| Montgomery | Historical | World War Two Veterans, Tuskegee Army etc. | PorchLight Productions | 5 | 181 days or more | \$25,000 |
| Montgomery | Memorial Hall Mechanical & Electrical System ENerg | The HVAC (heating, ventilating, and air-conditioning) and lighting systems at Memorial Hall will be updated to provide energy savings and equipment upgrades for more efficient operation. These upgrades would be designed to LEED (Leadership in Energy & Environmental Design) and Energy Star standards. The electrical upgrades for the building will be designed to be smart-grid compatible to lower peak electrical demands and to enable electric energy savings. | Montgomery County Public Works | 5 | 181 days or more | \$250,000 |
| Montgomery | Court Services LEED and Energy Star Office Space R | Renovation of office space for Adult Probation and other County agencies in the Court Services Building. This office space would be renovated to LEED (Leadership in Energy & Environmental Design) and Energy Star standards. This request is for energy-efficient upgrades to the heating, ventilation, air conditioning and lighting systems to bring them up to standards. The electrical upgrades for the building will be designed to be smart-grid compatible to lower peak electrical demands and to enable electric energy savings. | Montgomery County Public Works | 4 | 181 days or more | \$200,000 |
| Montgomery | Common Pleas Court Electrical Switchgear Replaceme | Remove and replace the electrical switchgear in the Common Pleas Court Building. The existing switchgear is obsolete and when a repair is required, finding replacement parts is next to impossible. The new switchgear will be designed to integrate into the new smart-grid electric infrastructure to lower peak electrical demands on the grid and to enable electric energy savings at the Common Pleas Court Building. | Montgomery County Public Works | 5 | 181 days or more | \$250,000 |
| Montgomery | Support services for MR/DD population | The Resident Home Association is a small nonprofit agency based in Dayton Ohio that serves the underserved population of people with autism, mental retardation and other developmental disabilities. We primarily provide housing and related services to 88 people, providing them lifelong services. We are seeking funding for the purchase of home energy audits, as well as for funds to weatherize and upgrade our homes for energy efficiencies, both for the safety and well being of our residents and to conserve energy and resources. Our homes are licensed by the Ohio Department of Mental Retardation and Developmental Disabilities. There are no available funding sources to help us purchase vans for community transportation or for home modifications. We must rely on grants and donations to try to meet such needs. We have been providing services in our community since 1966. | The Resident Home Association | 100 | 0 to 30 days | \$150,000 |
| Montgomery | Housing and Services for MR/DD population | Choices in Community Living is a small nonprofit that serves an underserved population - people with autism, mental retardation and other developmental disabilities, providing primarily housing and other related services. We are requesting funding for the purchase of a home at \$150,000 to serve four individuals with developmental disabilities, as well as for the purchase of an accessible van. There are no state or federal funding sources available to assist with such needs. We must depend on grants and donations if we are to meet these needs. Our homes are licensed by the Ohio Department of Mental Retardation and Developmental Disabilities. We are an established nonprofit that was formed in 1985. | Choices in Community Living, Inc. | 200 | 0 to 30 days | \$200,000 |
| Montgomery | WRIP | Our project will concentrate in the production status in the arts for Radio, Television, and Stage. Our goal is to hire professionals to teach our young people the art of Radio, Television, as well as Stage in all aspects of these areas. This project will also have an on-air radio station, and an on-line television station. The project will have a component that teaches engineering in these areas of radio and television. Our mandate of having a full class engineer on site at all times will help us achieve these goals. The project will also have screen and play writers, instructors for those of drama educators classes, education classes for stage lighting, stage lighting, as well as a stage area with auditorium seating. Our project will have an educational component along with a production component that will provide a holistic approach to achieving our purpose. We feel that our project will enhance the goal of our youth becoming skilled professionals in the media arts. | Residence in Praise Fine Arts Center | 30 | 0 to 30 days | \$1,500,000 |
| Montgomery | 2010 Marketing Project for Callahan Photography | My plan is to grow my small business with a solid marketing plan to high school seniors. I have developed a solid marketing plan for children but I need creating enough revenue for my small business to survive. With \$10,000 plan to start up a comprehensive marketing plan to high school seniors though direct mail with a 2-3% response rate generating twenty dollars for every marketing dollar spent. I plan to use \$11,000 in initial start up costs such as: printing direct mail pieces, obtaining a mailing list, purchasing a quality marketing program. I will receive financial guidance from my accountant on every marketing dollar spent. | Callahan Photography/ Small Business | 2 | 31 to 90 days | \$11,000 |
| Montgomery | Electric Drive, Algal Bio-resin Composite Advanced | I will continue my marketing program seeking guidance from skilled professionals to grow my business and increase profits... as well as hire employees increase workforce. BerryHill Partners will be the advanced materials experts and managing partner. Their team will have expertise and talent with years of experience from organizations similar to Delphi and Ashland Chemical. Univerture will be the Algal Farm System Provider growing and ultimately providing the Algal oil for resin development with Miami U. / Wright State U. as the biological/scientific and educational leads for the Algal work. Up to \$20 Million for the algae farm and algal strain development, another \$2 to \$5 Million for the science and educational aspect. Strategic partnerships of automotive molders will be developed to use bio resins to produce parts. Design approx. \$7 Million for all, or mostly all composite and other light weight material vehicles that will be dedicated electric drive vehicles that is ready to go into production for another \$2.5 Million in tooling and \$5 Million in start-up capital. \$10 Million will be raised from industry partners All told this effort will cost \$49.5 Million and will create approximately 1500 high wage jobs in Ohio! | BerryHill Partners LLC | 1500 | 0 to 30 days | \$39,500,000 |
| Montgomery | Centerville City Schools, Cummins Bridgeway, Clean | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by installing 15 diesel oxidation catalysts and 15 closed recirculation ventilation systems. This deployment will make the fleet more fuel efficient as well as reduce emissions. NCC to reduce City's use of fossil fuels for electric power for well pumps and water treatment facilities, significantly reducing carbon emissions in the region. The project will set the pattern for future additions in renewable energy capacity in the City of Dayton, one of the country's largest all-or-none-municipal water systems, which provides drinking water for over 400,000 residents of southwest Ohio. All land required for this project is already owned by the City of Dayton as part of its well field holdings, and the solar facility can easily be integrated into the utility's existing electric grid. The project size (750 MW) is based on the amount of power that was required to maintain the well fields at a minimally adequate production level during the historic low windstorm of 2008, when the electric grid power was down, and all well field power was supplied by diesel generators for an extended period of time. This project will supply emergency power during a grid failure, in addition to the normal-use carbon offsets. | Clean Fuels Ohio | 3 | 0 to 30 days | \$27,000 |
| Montgomery | Solar Electric Generation Facility | This project will supply emergency power during a grid failure, in addition to the normal-use carbon offsets. | City of Dayton Department of Water | 20 | 31 to 90 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Montgomery | Algae Pond Fueling Trotwood Job Creation and Revit | Algae-based oil as an energy source is rapidly becoming a viable opportunity enabling a move away from foreign oil dependency. The Trotwood City municipal government is lead developer of mixed use public/private redevelopment on a shovel ready site focused on incorporating alternative energy applications. Trotwood invest building capabilities & physical infrastructure in algae oil production as a job creation, job training, new business attraction/formation, & community revitalization initiative to show scalable Ohio-based algae production thereby creating a viable new energy source for the state. Trotwood proposes \$10M initiative to: 1) develop Trotwood as a statewide model in algae oil generation, 2) utilize 20 acre shovel ready site for an algae feedstock producing installation, 3) create educational/job training initiatives to support city's underemployed workforce to maintain the installation, and 4) provide ongoing trainingservices to assure sustainability for jobs beyond initial stimulus period. This will yield 200 - 300 new direct jobs in first 18 months and additional 100 jobs within 3 years and these jobs are sustained by the ongoing operational needs of the installation. Trotwood progressively views AF as an important job creation, job training, new business attraction/formation, & community revitalization initiative to educate, train, & employ its underemployed workforce in green markets. Specifically the main proposal a \$4M initiative to: 1) develop Trotwood as statewide model in city's transition to AF generation, 2) utilize 10 acre shovel ready site for up to 4 megawatt (MW) AF installations, 3) create educational/job training initiatives with Sinclair CCA, Trotwood Voc Tech to support city's underemployed workforce to maintain AF installations, and 4) provide ongoing trainingservices to assure job sustainability beyond initial stimulus period. This will yield 200 - 300 new direct jobs in first 18 months & additional 100 jobs within 3 years. These jobs are sustained by the ongoing installers' operational needs. | City of Trotwood | 200 | 0 to 30 days | \$10,000,000 |
| Montgomery | Creating Alternative Energy Jobs in Trotwood, Ohio | Photovoltaic (PV) is technology to diversify/democratize Ohio's energy sources enabling a move away from foreign oil dependency. The Trotwood City municipal government is lead developer of mixed use public/private redevelopment on a shovel ready site focused on incorporating alternative energy applications. Trotwood progressively views PV as an important job creation, job training, new business attraction/formation, & community revitalization initiative to educate, engage, train, & employ its underemployed workforce in green markets. Trotwood proposes \$10M initiative to: 1) develop Trotwood as statewide model in city's transition to PV advanced energy generation, 2) utilize 20 acre shovel ready site for community 2 megawatt PV installation, 3) create educational/job training initiatives with Sinclair CCA & Trotwood Voc Tech to support city's underemployed workforce to maintain PV installation, and 4) provide ongoing trainingservices to assure sustainability for jobs beyond initial stimulus period. This will yield 100 - 200 new direct jobs in first 18 months and additional 100 jobs within 3 years and these jobs are sustained by the ongoing operational needs of the installation. | City of Trotwood | 800 | 0 to 30 days | \$40,000,000 |
| Montgomery | Creating Alternative Energy Jobs in Trotwood, Ohio | Photovoltaic (PV) is technology to diversify/democratize Ohio's energy sources enabling a move away from foreign oil dependency. Trotwood progressively views PV as an important job creation, job training, new business attraction/formation, & community revitalization initiative to educate, engage, train, & employ its underemployed workforce in green markets. Trotwood proposes \$3M initiative to: 1) develop Trotwood as statewide model in transition to PV advanced energy generation, 2) utilize 10 acre shovel ready site for community 2 megawatt (MW) each PV installations (BMV total), 3) create educational/job training initiatives with Sinclair CCA & Trotwood Voc Tech to support city's underemployed workforce to maintain PV installations, and 4) provide ongoing trainingservices to assure sustainability beyond initial stimulus period. This will yield 150 - 250 new direct jobs in first 18 months & additional 100 jobs within 3 years. These jobs are sustained by the ongoing installers' operational need. | City of Trotwood | 600 | 0 to 30 days | \$30,000,000 |
| Montgomery | Bethlyview Energy Conservation Program | Funds used for additional salesperson, sales samples, materials, advertising Encourage consumers/homeowners to replace doors/windows to increase energy efficiency. | Bethlyview Products | 25 | 0 to 30 days | \$100,000 |
| Montgomery | Zephyr Energy Conservation Program | Funds used for additional salesperson, sales samples, materials, advertising Encourage consumers/homeowners to replace doors/windows to increase energy efficiency. | Zephyr Home Improvement | 25 | 0 to 30 days | \$100,000 |
| Montgomery | DIA-Security System Upgrade | Installation of software and hardware for access into secured areas at the Dayton International Airport. | City of Dayton, Dayton International Airport | 32 | 31 to 90 days | \$5,900,000 |
| Montgomery | DIA-Electrical Lighting Upgrade Project | Lighting improvements for Taxiway R at the Dayton International Airport. | City of Dayton, Dayton International Airport | 8 | 31 to 90 days | \$1,100,000 |
| Montgomery | DAY-Terminal Lobby Security Project | Eliminate security threat posed by congestion in the ticketing lobby by relocating the x-ray machines out of the lobby. | City of Dayton, Dayton International Airport | 25 | 31 to 90 days | \$15,967,862 |
| Montgomery | Sustainable Composite Utility Poles and Wind Tower | A manufacturer in Wincor, OH has developed a composite winding system which has been demonstrated to make precast composite poles suitable for the utility industry. This technology is available to Dayton through relationships at the NCC. A small composite cement company exists in Springfield using similar yet different technology. A partnership between the two companies is being formed. This program brings them both to a new site converted from a soon to be abandoned Dignity facility, which City of Dayton will eventually own. The two production lines can set up in the first 12 months with output being sustainable products in two distinct markets. From that revenue generating operations, a viable RCP for Ohio TR will be submitted to extend the capability into producing heavy wall composite towers for large scale wind generators. The construction requirement will need approval from the state and hiring of 10 to 15 year and engineering and management workers. When scaled to the wind tower market another 175 workers are possible depending on the size of the wind energy market. This is a heavy energy use market and the workers are well trained and experienced. This is a high capital investment market. This recruiting and targeting will allow Ohio to move to the forefront of the air ride industry in North America with a superior lasting and performing product at a significantly reduced price point. | BerryHill Partners LLC | 296 | 31 to 90 days | \$9,775,000 |
| Montgomery | Advanced Automotive Air Ride Suspension Substitute | Additionally, any cross applications will be made available to the alternative and advanced automotive industries of Electric Drive, CNG, and Propane! The expected outcome is a whole new industry for Ohio! And this will be incredibly strong because the product will be less expensive and Ohio based. This will be an air ride suspension equivalent product which will capitalize and convert the existing market from manufacturers that exist outside of Ohio. And you ask, where are these products being currently purchased? Air LR is a Michigan Company which brags that it has won more SEMA awards for air spring development than any other company. - And another rather large company Toranin Corporation is Korean. | LiteFlex LLC | 75 | 0 to 30 days | \$11,000,000 |
| Montgomery | 100 Low Income Manufactured Homes & Factory | Build manufactured housing factory to create jobs and training for 100 currently unemployed adults to initially build 100 single family homes for permanent affordable housing in 44747. Also plan to use either vacant or former abandoned structures. Factory will become interior job for manufactured home development. Project to include neighborhood center for one stop family support services, recreation, and job/career training. | Universal investment Seekers LLC | 100 | 31 to 90 days | \$9,000,000 |
| Montgomery | Work and Employment Opprtunity | To train & employ people in the field of interior & exterior Painting; to build a customer base of new and repair customers in the commercial and residential field, working with general contractors. | Skilled Trade | 20 | 0 to 30 days | \$1,000,000 |
| Montgomery | Downtown Dayton Vintage Office Reuse Program | Downtown Downtown Dayton is transitioning toward a high-density, mixed-use urban neighborhood. The City of Dayton is committed to an investment of \$5 million to this project. Combined with a federal investment this will leverage an additional \$60M in other financing for a total of \$66 million. This investment will pave the way for the transformation of Downtown Dayton by renovating 850,000 square feet of space and creating 250-300 housing units and a high-density, mixed-use urban neighborhood. Encourage consumers/homeowners to replace doors/windows to increase energy efficiency. | City of Dayton Ohio | 100 | 91 to 180 days | \$5,000,000 |
| Montgomery | Zephyr Energy Conservation Program | Funds used for additional salesperson, sales samples, materials, advertising Encourage consumers/homeowners to replace doors/windows to increase energy efficiency. | Zephyr Home Improvement | 25 | 0 to 30 days | \$100,000 |
| Montgomery | Bethlyview Energy Conservation Program | Funds used for additional salesperson, sales samples, materials, advertising Encourage consumers/homeowners to replace doors/windows to increase energy efficiency. | Bethlyview Products | 25 | 0 to 30 days | \$100,000 |
| Montgomery | Dayton Regional STEM Center | The Dayton Regional STEM Center is the hub for developing workforce STEM curriculum with emphasis on technology and the engineering process introduced in science and math. We have trained over 300 teachers and plan to reach out across Ohio hoping to train an additional 300 teachers affecting over 10,000 students. We are in close partnership with industry and the AF Force Research Labs. Ohio indicated in the National Governors Association that STEM is a priority for the state. The Dayton Regional STEM Center is expected to bring high quality professional development to teachers and high quality STEM curriculum mapped to Ohio's economic interests to our students. We have a proven track record with over 70 new Pre-K through grade 12 students mapped to Science, Math and Population, Advanced Manufacturing, Materials, Human Health and Biotech. This is a real partnership with industry scientists and engineers actually working hand in hand with teachers to design these STEM lessons. Each region would develop STEM lessons mapped to their needs. In the end it would be plant based Ohio. | Montgomery | Making my 200 year old building energy efficient | The salon I own is 200 years old. I've been a small business owner for over 20 years and I've been directly affected by the economy. As a result of the unemployment rate in Dayton (a lot of my employees people are now waiting longer to get hair cuts and hair colors with my business down. I'm struggling to keep up with the rising costs of my electric bill. With the great money I would put new windows in my building and new doors, both would be energy efficient. I would also insulate the building, to help reduce the cost of each month's bill. I also need just a gas line so that we have insulation of electric heating. Can you know is more efficient and costs less. All of this will make my businesses more efficient and is an environmentally sound decision. I've wanted the business at 44747 for 15 years. My business is down here as a result of the economy too. When I thought the building I put in new windows and doors. The front door had been broken and is no longer efficient. There is a leak and a drip in some of the pipes that needs to be repaired. I also need to repair the gas line that no longer works at this location. Thank you for your time. The Learning Tree Farm http://www.learningtreedayton.org was established in 1973 to provide hands on learning experiences in a traditional farm setting. Learning Tree presents curriculum-based school programs that offer learning beyond the classroom and its textbooks. The 501(c)(3) nonprofit organization has been serving school children in the Dayton/Berea Valley area, growing from about 200 students in 1973 to over 4,000 in 2008. At present the staff is composed of an Executive Director, two Co-Founders, plus Program, Farm and Office staff. Students come from 8 counties (Butler, Clark, Greene, Hamilton, Miami, Montgomery, Preble and Warren). The system would power the farm and educate students about alternative renewable energy systems comprised of a wind turbine and photovoltaic solar panels connected to a batteryless grid tied sine-wave inverter. This small wind turbine inverter produces approximately 2000 kWh/yr and the amorphous thin-film photovoltaic panels that fit between the seams of the standing seam metal roof would produce 2200 kWh/yr. Professional installation would be contracted to either The Sun Solar & Wind in Adams OH or Repower Solutions in Cleveland OH. | Infashion Hair Salon and Hank's Hideout | 5 | 31 to 90 days | \$37,000 |

|----------------|---|---|---|----------------|--------------------|---------------------------|
| Montgomery | Visual Lyceum | Students explore new career fields, learn careers and transfer information on new career options. Teachers assess student grade level and topic of instruction. In coming students are assessed to determine learning style and level of competency. Video walls arranged in a maze provide in-depth instruction based on state requirements. At the end of each wall, desks allow students to interact with touch screens to engage class and form information to create their own textbook like content based on their learning style and the course requirements. Then on to the next video wall and read desk. At the end of the reading, they are immediately remediated until mastery is achieved. Teachers receive outputs of the events they studied, customize, level of mastery and remediation. Teachers can use it to ensure mastery of vocabulary before they teach the topic or at the end to ensure mastery of the concept. Student data can be sent directly to teachers for classroom management. The electronic content can be sent to tablets around the state. Teachers simply schedule what topic, grade level and date they wish to have it delivered. | Next Generation Technologies | 300 | 31 to 90 days | \$455,000 |
| Montgomery | Flexible child care for families on Military Inst | Kidz Watch specializes in opening, operating and managing drop in, hourly, and flexible full time child care centers. Kidz Watch owns and operates 4 corporate centers but also franchises the concept and licenses the proprietary system across the U.S. The military has both a high need and a significant shortage of child care, as well as a complex task of availability of flexible and accessible child care that meets the non-traditional work/schedule of military families. Ultimately, every large military installation in the U.S. should benefit from Kidz Watch's unique child care service, which would only enhance and complement any existing traditional day care centers. This has been our experience in the communities where our service currently exists. The project will also create jobs for military spouses. Please visit our website www.kidzwatch.com and www.dropschedule.com to learn more. We already contract with the state of Ohio for subsidized child care. | Kidz Watch Ltd. | 20 | 91 to 180 days | \$500,000 |

| Montgomery | Austin Pike Oil Pipeline Relocation | Relocation of approximately 1,750 linear feet of pipeline to permit development of the underlying acreage. Project would permit greater efficiency in the siting of buildings and usage of the site immediately impacted by the pipeline and for the location of buildings and roads on the surrounding acreage. Pipeline is a major transmission line for British Petroleum and has a significant impact on the development potential of a new industrial/commercial park that Miami Township is creating on lands owned by the township just north of the Dayton Wright Brothers Airport. The relocation project would involve moving a portion of the pipeline to the perimeter of the commercial park. | Miami Township | 25 | 91 to 180 days | \$350,000 |
| Montgomery | Algae Pond Fueling Trotwood Job Creation and Revit | Algae-based oil as an energy source is rapidly becoming a viable opportunity enabling a move away from foreign dependency. The Trotwood City municipal government is lead developer of mixed use public/private redevelopment on a shovel ready site focused on incorporating alternative energy applications. Trotwood views building capabilities & physical infrastructure in algae oil production as a job creation, job training, new business attraction/formation, & community revitalization initiative to show scalable Ohio-based algae production thereby creating a viable new energy source for the state. Trotwood proposes \$10M initiative to: 1) develop Trotwood as a statewide model in algae oil generation, 2) utilize 20 acre shovel ready site for an algae production pilot/testing facility, 3) create educational/job training initiatives with Sinclair CC, Trotwood Voc Tech, and other local educational institutions, 4) provide ongoing training services to assure sustainability for jobs beyond initial stimulus period. This will yield 50 - 100 new direct jobs in first 18 months and additional 100 jobs within 3 years and these jobs are sustained by the ongoing operational needs of the installation. Advanced Energy (AE) is technology that converts Ohio's energy sources enabling a move away from foreign dependency. The Trotwood City municipal government is lead developer of mixed use public/private redevelopment on a shovel ready site focused on incorporating alternative energy applications. Trotwood progressively views AE as an important job creation, job training, new business attraction/formation, & community revitalization initiative to educate, engage, train, and employ its underserved workforce in growth markets. Trotwood proposes \$3M initiative to: 1) develop Trotwood as a statewide model in transition to PV advanced energy generation, 2) utilize 20 acre shovel ready site for community 2 megawatt (MW) solar PV installation, 3) create educational/job training initiatives with Sinclair CC & Trotwood Voc Tech to support city's underserved workforce to maintain PV installation operations, and 4) provide ongoing training services to assure job sustainability beyond initial stimulus period. This will yield 100 - 200 new direct jobs in first 18 months and additional 300 jobs within 3 years. These jobs are sustained by the ongoing operational needs of the installation. | City of Trotwood | 200 | 0 to 30 days | \$10,000,000 |
| Montgomery | Creating Alternative Energy Jobs in Trotwood, Ohio | The photovoltaics (PV) is technology that diversifies Ohio's energy sources enabling a move away from foreign dependency. The Trotwood City municipal government is lead developer of mixed use public/private redevelopment on a shovel ready site focused on incorporating alternative energy applications. Trotwood progressively views PV as an important job creation, job training, new business attraction/formation, & community revitalization initiative to educate, engage, train, and employ its underserved workforce in growth markets. | Montgomery | Site Re-use Demolition and Remediation | The project will design and construct a geothermal utility to provide energy efficient heating and cooling for up to 250,000 square feet of LEED certified office space. The utility will be networked on an urban campus and will complement various other sustainable development practices. | City of Dayton Economic Development | 250 | 91 to 180 days | \$12,500,000 |
| Montgomery | Tech Town Campus Energy Efficiency Demonstration | The project will design and construct a geothermal utility to provide energy efficient heating and cooling for a 500,000 square foot mixed use development located in Downtown Dayton. | City of Dayton Economic Development | 1,000 | 91 to 180 days | \$5,000,000 |
| Montgomery | Balkpark District Geothermal Utility | This request will provide testing and remediation activities on a brownfield redevelopment site (Tech Town). New infrastructure and new buildings are currently under development. Although the site has been environmentally characterized, subsurface conditions are not available on a 30 acre redevelopment. These funds will allow immediate testing and remediation so as to not slow already funded construction. | City of Dayton Economic Development | 80 | 91 to 180 days | \$8,000,000 |
| Montgomery | Tech Town Environmental Remediation | The proposed project will address wind turbine structural reliability using physics-based models for material damage (manufacturing and accumulation (service usage) common in the aerospace industry. We will utilize a damage tolerance approach to determine design life and inspection intervals, nondestructive inspection to detect and characterize manufacturing and in-service defects, and structural health monitoring to detect in-service damage as well as operational history data such as wind velocity, temperature, humidity, moisture, strain, acceleration, and deflection. Recommendations will be made for improved design and usability philosophies and methods, testing, inspection, and health monitoring. The result will help improve the reliability and revenue/energy generation of wind turbines. | City of Dayton Economic Development | 4000 | 0 to 30 days | \$1,000,000 |
| Montgomery | Improvements in Wind Turbine Structural Reliability | Construction of a new 45,000 SF research and development office building on the Tech Town campus. This building is intended to provide R & D space to support BRAC relocation jobs associated with Wright-Patterson Air Force Base and the University of Dayton Research Institute. | University of Dayton Research Institute | 5 | 0 to 30 days | \$900,000 |
| Montgomery | Tech Town Research and Development Building | The project involves the construction of 6200 linear feet of new multi-use trail extending from Austin Pike to State Route 741 primarily through property owned by Miami Township. The trail will consist with paved extensions through property on the site of State Route 741 and a portion of trail being constructed as part of an ODOT interchange project on Interstate 75. The multi-use trail will eventually connect trails in Washington Township through Miami Township to the Great Miami River recreation trail. The complete trail system will pass through several park systems and connect numerous commercial developments existing and planned as part of the development surrounding the new interchange on Interstate 75 and Mainland/Springboro Pike. A portion of the trail will extend north along State Route 741 to complete a pedestrian connection to an existing off-street multi-use trail. | City of Dayton Economic Development | 220 | 91 to 180 days | \$8,000,000 |
| Montgomery | Austin Pike - River Corridor Bikeway Connector | The project involves the construction of 6200 linear feet of new multi-use trail extending from Austin Pike to State Route 741 primarily through property owned by Miami Township. | Montgomery | Employment for at-risk youth | Donate summer jobs of grass cutting and landscaping for at-risk youth. | City of Dayton | 50 | 31 to 90 days | \$250,000 |
| Montgomery | Wright Dunbar Infrastructure Improvements | Infrastructure and transportation improvements in the Inneswest Priority Board area and Wright Dunbar neighborhood. | City of Dayton | 40 | 181 days or more | \$1,500,000 |
| Montgomery | Steele Dam Removal | Removal of the Steele Dam, a low dam on the Great Miami River south of the Helena Street Bridge. | City of Dayton | 40 | 181 days or more | \$3,000,000 |
| Montgomery | Street Maintenance Facility Site Demolition and Pr | Excavation of asphalt parking lot, removal of material, and site preparation for a new Street Maintenance Facility. | City of Dayton | 5 | 0 to 30 days | \$400,000 |
| Montgomery | Gebhardt Housing Project | Energy Star expansion of kitchen area and upper living quarters to include new foundation and relocation of HVAC. Extend kitchen area to the south by approximately 10 feet to include the dining area. Additional extension to upper living area (8'8" level) to include roofing extensions as well as plumbing, electrical, and HVAC. | Gebhardt Housing Project | 2 | 91 to 180 days | \$25,000 |
| Montgomery | Learn to Earn | Use our current vocational and day service location in the Dayton area to develop more vocational development services for individuals receiving SSD and SSDI checks. Enhance the current Ticket to Work program we use implementing: | Quest for Independence | 500 | 31 to 90 days | \$450,000 |
| Montgomery | Automotive Manufacturing Family Recovery | IRA distributions to cover Graduate School \$19,750 IRA distributions to maintain expenses = \$7,600 Taxes on IRA distributions = \$2,735.00 Reduced income balance of 2009 = \$6,000.00 Estimated reduced income, 2009 = \$25,000.00 Additional debt assumed = \$55,000.00 Total = \$300,170.00 | The Donnelly Family | 2 | 0 to 30 days | \$200,000 |
| Montgomery | Primrose School on Yankee (Opening 2nd School) | This project is for my wife and I to expand our business and build a second school in Washington Township, Montgomery County, Ohio. We currently own our first school in Centerville, Montgomery County, Ohio and have plans to move forward with our second facility. We are affiliated with a franchise system called Primrose Schools based out of Acworth, GA. It is a private preschool and childcare with a fantastic educational curriculum. The school offers student childcare for children ages six weeks old to well as a private preschool and private kindergarten program. After school care is available for children up to twelve years old. As part of the educational curriculum, Primrose has a strong influence on employing technology in the classroom. We are offering an interesting and unique opportunity to build our own school and create new jobs in the educational/childcare fields. We will be building an 11,000 sq. ft. facility on a 2 acre site in Washington Township that has already been secured. The school will consist of 11 classrooms and a kitchen and will employ approximately 32 people at 75 percent of child capacity. We appreciate the time and consideration. | Primrose School of Centerville | 30 | 31 to 90 days | \$835,750 |
| Montgomery | new hire equipment program | This request is to procure new equipment and employ a greater work force, we estimate 10 new jobs to be created. | Servicemark Pressure and Soft Washing | 10 | 91 to 180 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Montgomery | Donnelly Family Recovery | To empower laymen, caregivers, patients with a set of responses to help laymen and doctors in recognizing, understanding and reducing in demand from customer base. In an attempt to leave automotive manufacturing, I accepted a position that offered an opportunity to manufacture custom enclosures for back-up power generation equipment for hospitals, schools, but the complete collapse of the economy caused a loss of business and the elimination of my position after only three months. Kauko-Textron loans = \$312,000.00 Victory Industrial Loans = \$30,000.00 IRA distributions & expenses = \$30,085.00 Reduced income balance of 2009 = \$60,000.00 Estimated reduced income 2009 = \$25,000.00 Additional debt assumed = \$55,000.00 Total = \$209,170.00 Additionally, we have maximized our home equity loan and our credit cards in order to meet monthly expenses. We had our second child in this time and my wife has had to return to work full time and both children on row in daycare. We have maintained our mortgage payments and credit | The Donnelly Family | 2 | 0 to 30 days | \$209,170 |
| Montgomery | Armor vehicles using advanced batteries and hydrog | A manufacturing company that builds armor plated vehicles using advanced batteries and hydrogen fuel cells. These vehicles could be used for personal protection, mail teams, military etc. This project would help many local manufacturing companies buy. | Vehicle Protection Systems | 50 | 31 to 90 days | \$15,000,000 |
| Montgomery | build out | Would like hire both young men and women, whom has fresh beauty college and looking to start their career. I would like to teach work ethic and how to be professional and provide great customer service. I have a New salon ready to move forward to need people that could offer a salary vs. commission, most of these ladies are single parents and need of household. I would love to give them hope and to have something to look forward to. Thank you for your consideration. | Ti cimone Full Service salon | 22 | 31 to 90 days | \$50,000 |
| Montgomery | Independent Living | The proposed project description for this project will be through Community Services for the Deaf, a program of Family Service Association. This program has identified a clinical and vocational need for the Deaf and hard of hearing community. These needs are addressed through intensive case management and counseling services provided by a licensed social worker through CSD. Clients are assessed for scope of services needed including: medication regimen, health education, social/recreational counseling, and long term case management. These services shall strengthen and increase the independence, quality of life, advocating, initiating change, teaching problem solving skills, promoting self-advocacy and modeling behaviors. As the Deaf and hard of hearing community become more self-sufficient, they become less dependent upon public assistance and more productive citizens. The expected outcomes for this proposed project are: 1. 200 individuals will work with CSD staff to identify their specific need. 2. 150 individuals will receive an assessment to target specific needs. 3. 100 individuals will collaborate with CSD and BVR to assess abilities and find ways to utilize their power, utilize home, energy efficient appliances. | Family Service Association | 150 | 0 to 30 days | \$50,000 |
| Montgomery | energy conservation | star power, insulate home, energy efficient appliances. | dayton freight | 8 | 0 to 30 days | \$30,000 |
| Montgomery | Train to Work Displaced Workers | The proposed project description for this program is a train to work philosophy with an emphasis on recently displaced workers. During these tough economic times, business owners are forced to make very difficult decisions about closing operations that concern workers who are affected by the ultimate outcome of the business owner's decision may face a pay freeze or a layoff. As a result, the need is great for workers to re-skill themselves to become able to secure the future. This program will be a community partnership with residents, employers, public assistance, local economic development organizations, public workforce leaders and other relevant community organizations. The previously mentioned will be dedicated to re-building a business workforce where the employer's needs are effectively met by the newly re-trained local employees. It is important during this difficult business climate for displaced workers to re-skill themselves to become employment ready. The Expected Outcomes are: 1. 400 workers will receive resources to begin re-skill. 2. 300 workers will begin employment through the training. 3. Collaborate with local resources for training. Benefits are even more critical due to job cuts, layoffs, lack of training and skills and financial stress. The program will emphasize skills development for residents to establish skills to connect with local employment resources to successfully obtain employment. Almost 30% of families in the targeted neighborhoods live below the poverty level, 50% are on public assistance and nearly 85% are not currently in the workforce. Residents are lacking the knowledge and capacity to begin searching for employment which will sustain their family through the economic crisis. Expected Outcomes for this project are: 1. Provide residents with critical job skills training such as computer skills, resume building, and interview techniques. 2. Provide residents with local resources in order to begin application process for available jobs and assist as necessary. 3. Build relationships between residents and community leaders to begin a networking experience for unemployed residents. | Family Service Association | 500 | 0 to 30 days | \$50,000 |
| Montgomery | Train to Work | The proposed project description are a collection of activities that will culminate in a "resident driven" set of neighborhood improvements. These activities are determined by attending meetings with organized neighborhood groups, working closely with neighborhood businesses that have a vested interest in the neighborhood with residents. This program will continue the development of a strategy that aims to prevent, control and reduce violent crime and drug abuse and to coordinate human service and development efforts in each neighborhood. The program will also have a direct impact on the reduction of violent crime and property crimes, which as a result will increase property values for neighborhood residents. The Expected Outcomes for the proposed project: 1. Improved community conditions by focusing on upkeep of properties and surrounding areas such as alleys and common areas by having community wide clean-ups four times a year. 2. Initiate demolition projects for abandoned properties currently being utilized for drug trafficking. 3. Assist neighborhood residents connect with local resources in order to improve the conditions of their property. | Family Service Association | 500 | 0 to 30 days | \$50,000 |
| Montgomery | Neighborhood Development | This project consists of retrofitting approximately 1,650 street lights with LED fixtures. | City of Dayton | 31 | 31 to 90 days | \$2,160,000 |
| Montgomery | Street Light Upgrade | Construction of a new public works facility to meet environmental requirements and improve the energy efficiency of operations. The project will involve the construction of a new storm water basin, larger salt storage area, specific station for salt application materials to reduce pollution, wash bay, equipment storage area, vehicle maintenance facility, and associated spaces. New facility will also provide enhanced security for the storage of equipment and supplies and allow existing inefficient buildings to be shut down. Project will reduce pollution, provide a safer work environment for employees and visitors, extend the life of equipment, and improve public safety by permitting more efficient operations related to road maintenance and snow clearance. | Miami Township | 25 | 181 days or more | \$2,500,000 |
| Montgomery | Miami Township Public Works Facility | To empower young African American men, between the ages of 14-18, into the healthcare fields. Promoting the various aspects of healthcare to young African-American men, by engaging them with thoughtful lessons about health professions. To increase the number of African-American men in all facets of healthcare. To broaden their knowledge base about health in general. To empower young African-American men with thought-provoking job and life skills, including mentorship, networking, self-esteem, and business etiquette. | Young Urban Health Empowerment Camp | 12 | 91 to 180 days | \$12,000 |
| Montgomery | Young Urban Health Empowerment Camp | The proposed project description begins with the goal of increasing access and availability of counseling and supportive services to victims of domestic violence and sexual abuse in Montgomery County. Individuals will attend counseling in a safe non-court mandated environment at Family Service Association in order to begin a therapeutic healing process. FSA provides individual, couple, and family therapy, specialized intervention and trauma groups for adult and child victims of abuse and assault. The services provided will be part of a coordination of services from other victim service providers identifying potential clients who can benefit from our services. Victims need to have no roadblocks to receiving assistance. Thus, FSA will turn no potential client away regardless of their ability to pay. Outcomes of this project for FSA will be a reduction in symptoms that adult and child victims of domestic violence and sexual abuse may display: aggressive behavior and other conduct problems, depression and anxiety lower levels of social competence and self-esteem, symptoms consistent with PTSD, such as emotional numbing, increased arousal, and repeated focus on the violent event. We have a tutoring program for grade school and high school, mostly in math and science. We have been providing this service for approximately three years. Services are also provided in the summer. We are in need of computers along with other supplies to enhance our program. We also teach skills in test taking. With the increase of interactive on-line programs we see the need of computers in our program and for the high school students more advanced calculation. We have related educators in our congregation volunteering their time so our expenses have been, Paper, pencils, books, copies of practice tests, worksheets, etc. The improvements in the students grades have been rewarding. | Family Service Association | 250 | 0 to 30 days | \$40,000 |
| Montgomery | STOP Violence | We have a tutoring program for grade school and high school, mostly in math and science. We have been providing this service for approximately three years. Services are also provided in the summer. We are in need of computers along with other supplies to enhance our program. We also teach skills in test taking. With the increase of interactive on-line programs we see the need of computers in our program and for the high school students more advanced calculation. We have related educators in our congregation volunteering their time so our expenses have been, Paper, pencils, books, copies of practice tests, worksheets, etc. The improvements in the students grades have been rewarding. | Apostolic House of Prayer, Inc. | 0 | 0 to 30 days | \$5,000 |
| Montgomery | Tutoring grade school and High School in preparito | Project will install approximately 11,044 linear feet of new pedestrian paths within an existing office development to provide safe connections to adjoining commercial and residential areas. Project will provide handicap accessible routes throughout our largest office park and increase ability of public transit users to access the various employment centers throughout the development. New walks will be installed within public right-of-way and provide direct connections to existing bike routes and public sidewalks within the area. Office will be served by public transportation but currently riders must walk within grassed right of way or within the street. Handicap accessibility is very minimal under current conditions. New walks will enhance the viability of public transportation services for the area and reduce vehicle use for those traveling between the office, residential and commercial areas. Improvements will be made in City owned and operated facilities to reduce air and/or sound emission and associated operational costs. This would include building lighting retrofits, envelope sealing, mechanical improvements (including replacement of chillers, rooftop AC units, fan coil units, boilers, controls, exhaust fans, reprogramming existing controls for night set-back). | Miami Township | 5 | 91 to 180 days | \$206,744 |
| Montgomery | Newmark Centre Pedestrian Improvement Project | Utilizing the national school-to-career transition model called Jobs for America's Graduates. We are the local Jobs for Ohio's Graduates (JOG) affiliate serving the greater Dayton area. The core program services that work with over 400 in-school youth with a school-to-career transition program working in local school districts in providing a staff person to work with those students identified by the school who will best benefit from the program. Our national standard is an 80% positive outcome rate (job, college, military) the year after completing their program. The JOG program not only assists those most at risk of dropping out to graduates, but also adds to our local economy as our youth attain employment. Within 14 months of graduation, a typical graduate has paid back to state and local taxes the cost of the program (500-\$107 per student). The funds listed in this proposal would retain 3 current staff positions, and allow for 100 youth to have a work-based learning experience leading to employment, with 75 of them gaining private sector employment. To provide counseling to women who have been abused will counsel to build self-esteem, and use all tactics to try and prevent violence of re-occurring. These details upon your request of interest. | JOG-Miami Valley | 78 | 91 to 180 days | \$205,450 |
| Montgomery | Jobs for Ohio's Graduates - Miami Valley | This program provides local students an opportunity to create custom-built, remote controlled robots that then race-off in competition. Through the process of robot building, student's imaginations are captured as they design, build, and compete with their own robotic creations, and through their hands-on effort, students gain practical knowledge of math, science, engineering, and manufacturing. The DTMA hosts two competitions each year: nationals and state nationals. Both teams build and race robots that have the ability to follow a line and make decisions. The DTMA also provides a chance for students to observe and often participate in the process of manufacturing their robots in a working manufacturing facility. Overall, this applied engineering approach has a significant "wow" factor for the students and serves as the "hook" that instills a passionate interest in careers in engineering, advanced manufacturing, and technology at the time in their life when they are making career decisions. Our local school partners report that this single project has had more demonstrable results in engaging enrollment than any government or non-government program known to date. | Lady C | 5 | 31 to 90 days | \$300,000 |

| Montgomery | Residential Treatment Floor Renovation Project | The Mission of the Nova House Association, Inc. is to provide quality, integrated services to substance abusers and substance abusing mentally ill. Our services provide opportunities for positive change to adopt a healthier style of life and to enhance the community's quality of life. We are requesting funds to repair and replace flooring and roofing in our residential treatment facility. We are a 500 bed treatment facility with AOD and CAMI clients. Our facilities are in much needed renovation to continue to provide quality care to the clients served. Approval of this project will allow us to employ at least 6 workers to remove the existing flooring and replace it with sturdy tile. In addition to 4 roofers to remove and replace roofing. We have been in business since 1979 serving Montgomery County, the State of Ohio and Other surrounding communities. Health and Fitness Programs. The goal of All About You Fitness is to help people develop healthy lifestyles through physical training and exercise. With this project, we want to offer, as a means of preventive healthcare, individual training programs to those in the community who may not be able to afford them. This is a grant I can do for \$ 450,000. | Nova House Association, Inc. | 8 | 0 to 30 days | \$500,000 |
| Montgomery | All About You Fitness | If this is a loan I need \$ 900,000 to wipe out my first of \$450,000. Loan Term 4 years maximum but interest only payments. Bank MMI Appraised Value "AS IS" value is \$ 1.2 million dollars. City promised to fund me when I had a grocery store with 17 employees and they did not come through for me. I have sweat bullets to make this happen and without any promised help. Come see it as I am so close to getting it finished. | All About You Fitness | 1 | 0 to 30 days | \$50,000 |
| Montgomery | McCook Center | Installation of a bio-mass gasifier to provide building and domestic water heating at Owata Yards, the City's water utility and public works operations support. Significant amounts of yard waste collected routinely would be used as the primary fuel source. | Archon | 30 | 0 to 30 days | \$450,000 |
| Montgomery | Ottawa Yards Bio-Mass Heating System | This project will replace old mechanical systems that are at the end of their useful life. All elements are now requiring excessive cost to keep operational. This will include water cooled and split package units in Dayton City hall, replace existing gas coil units at the Safety Building, replacement of 26 year old Liebert units in the Data Center and retrofit City of Dayton owned street lights from MV to PSMH. Improvement will be made to City owned and operated facilities to reduce and/or avoid energy and associated operational costs. This will include lighting lighting retrofits, envelope sealing, mechanical improvements including the replacement of chillers, rooftop AC units, fan coil units, controls, exhaust fans, reprogramming existing controls for night set-back. | City of Dayton | 10 | 91 to 180 days | \$1,200,000 |
| Montgomery | Energy Retrofits Phase II | Rehabilitate and repair 2 railroad bridges owned by the City of Dayton and make safety enhancements. | City of Dayton | 25 | 31 to 90 days | \$1,635,000 |
| Montgomery | Energy Efficient Building Retrofits | I would like to replace my furnace and water heater and central air and replace them with a units that are energy saving. And to be green with insulation and to replace window that are not dated. set 1000 save natural gas. And to save energy. The Greater Dayton Electric Vehicle Association is a non-profit organization which promotes greater public understanding of the benefits of all electric vehicle ownership. In collaboration with local institutions of higher learning and existing job-training programs, we propose to create a pilot operation for the conversion of 10 existing gas-powered vehicles into fully electric-powered vehicles of various types, including passenger vehicles, station wagons and pick-up trucks. These vehicles will be displayed at various auto shows, county fairs, and other community conservation opportunities to increase public awareness of the practicality of all-electric vehicles and the extent of ongoing research. This initiative will also serve as the basis for an expanded for-profit operation to produce converted electric vehicles for sale to the general public. In addition, we will provide training workshops, computer services, facilities, and tools for individuals who support the conversion. If funded, this project will immediately create 8 jobs, save energy resources regionally, protect the environment and will be fully self-sufficient within one year of operation. | City of Dayton | 20 | 0 to 30 days | \$3,000,000 |

| Montgomery | Gas-to-Electric Vehicle Conversion Project | The Doctor's new pattern came when prices on ERCTC. no doctors in drawer cancer research in cancer self monitoring images when a photograph is taken. The absence of a photograph showed a 80% drop in incidental findings, such as when a search for kidney stones turns up a tumor. Incidental findings are often life-saving because they discover pre-symptomatic problems, and the study show that doctors look more carefully for them when a patient gets a photo. The study used 1000 hours that including photos of patients in their files enhanced performance. E-Health records with photos will save billions of dollars by lower cost, reduced medical errors, improve care, and save lives. reduce Medicare/Medicaid fraud while simultaneously improving clinical performance. This is because particularly critical to the patient's health of facial injury or if the patient is being treated on the battlefield by army surgeons. The facial image will then be displayed for the physician's review to provide care that reduces costs and improves performance. | Greater Dayton Electric Vehicle Association | 8 | 31 to 90 days | \$265,000 |
| Montgomery | Integrate Tech E-Health Records with Faces into Me | Insurance, the cost or paper medical records was more accurate or being misinterpreted by using wrong errors, very type errors, who also in the unavailability of medical info by remote practices. We digitize records beyond routine labeling. Uniquely we expand functionality by focusing on improving clinical performance. We track quality of care and communicate with outside specialists and clinics to coordinate a patient's care with his open source platform for physicians and nurses. We enable all EPHI with other health institutions in compliance with HIPAA, privacy and security rules based on least privileges. We emphasize and reward preventive treatment and work in tandem with the CMS. We keep information customer-centric while working within the regional network for connecting EPHI. We lower care cost, cut down on medical errors, improve care, and save countless lives by availability, integrity, and confidentiality. We protect the hospital and State during Medicare/Medicaid claims processing. | HeadsUp.cc, LLC | 2500 | 0 to 30 days | \$24,000,000 |
| Montgomery | Integrate Tech E-Health Records into Med School | Visa card with a \$1M credit line. Fraud exceeds 10% of health care costs. When someone steals your name to get health care, his mid fee is part of yours and fixing it can be hard. Bad entries may lead to injury or death. Imagine arriving in the ER showing that your blood type is O and not A+. Doctors will waste valuable time to begin a fatal transfusion. HIPAA gives patients the right to read their records. But patients don't have the right to fix or stop errors from being passed to other providers. Victims spend years trying to expunge bad entries. This could expose doctors to liability. The GAO noted weaknesses in EPHI security controls in Medicare/Medicaid claims. Our facial recognition biometric system will electronically send a video facial image of the valid patient to the physician/nurse's desk-top. We match the patient's inputted data against a plethora of disparate databases and voluntarily uploaded image against our image gallery looking for a match. The and EPHI displays the patient's face. Mortgage fraud leads to recent property crimes, and fits the US Bureau Memorial Aid Program. The top fraud type in 2008, was application fraud. Mortgage fraud takes the form of identity theft against the elderly, immigrants and generally any homeowner who has earned equity in their home. Mortgage fraud is a growing problem in low/moderate income neighborhoods. For example, subjective loans are concentrated in neighborhoods with high unemployment and declining housing. This type of fraud strips the equity that homeowners have struggled to build over the years and reduces the wealth of basic communities leading to crime on vacant properties at the whim of distant investors. Lenders must use technology and information to verify the earliest stages in the application process to prevent application fraud. Our facial recognition biometric system electronically sends a video facial image of the valid borrower to the bank or key point of transaction at the application stage. We match the data against disparate databases and the uploaded photo against our image gallery. We root out the fraud at the application stage from all thieves intent on stealing data for nefarious equi. | HeadsUp.cc, LLC | 2500 | 0 to 30 days | \$24,000,000 |
| Montgomery | Prevent E-Health Record Identity Theft with Facial | Shelkinah Ranch Aquaculture Center will expand to provide over 10,000 fresh steps to private citizens, restaurants, caterers, and markets with Fresh Fish Products. The goal of the Dayton and Tri-County centers is to provide at least 10:20 thousand lbs of fresh fish each month. This project will be used as a food resource, relieving the US dependency on foreign imports. Each Aquaculture Center will provide educational programs to all school systems in the form of internships, educational field trips, tours and long term, on-site, work study programs in partnership with other educational organizations all within the urban community. Each Urban Center will integrate mentoring and leadership training through hands-on interactive skills training along with Aquaculture Science and Technology for future career training. Each Urban Center will serve as a hub for job and career training in Aquaculture, Aquaponics, Aquaponics, Solar and other modes for renewable energy and related fields. Aquaculture can become a major industry to spark new life and economic strength in and throughout Urban America. Investment in aquaculture is a high-potential, high-growth industry that will create jobs and provide a sustainable source of protein for every emergency. | HeadsUp.cc, LLC | 2500 | 0 to 30 days | \$24,000,000 |
| Montgomery | Prevent Mortgage Fraud in Ohio with Facial Biometr | First Responder Equipment and Records Tracking System provides full data analysis of all items under a user's span of control which enables data forecasting for planned & unexpected time change items. This system records complete equipment service life information for all items. Detailed work center inventories provide all users 'total asset visibility', tracking equipment and spare parts locations, thus eliminating wasted purchases, while saving time & money. This system provides managers at all levels detailed item inspection and repair histories enabling proper equipment support. Every data entry is only a finger tip away, whether at your desktop PC or with remote devices. This system is designed to meet the data reporting needs of senior decision makers as well as support unit level technicians who perform day-to-day inspection & maintenance activities. The Act requires pharmacies selling any drug containing ephedrine or pseudoephedrine to obtain specific information from the buyer and keep that information for two years. | HeadsUp.cc, LLC | 2500 | 0 to 30 days | \$24,000,000 |
| Montgomery | Shekinah Ranch Aquaculture Center | Local and state police then collect and analyze the logs. Some pharmacies maintain paper logs, others print out the information from their proprietary computer systems. The current system is completely manual for the police department. This means not only the analysis of local data but trying to crosscheck logs from neighboring police departments both within the state and across state borders. The system also relies on the pharmacist or pharmacy employee to disclose a sale. It only tracks the information. The concept is to provide a point of sale approval and tracking system. Automated or manual data input at the pharmacy would provide the data tracking while analysis of stored data measured against state or federal guidelines would provide a self or no-self decision to the pharmacy. Completion of this project will result in a web enabled program that will provide an approval decision at the point of sale. The program will track at | SHEKINAH RANCH NORTH CAMPUS | 75 | 0 to 30 days | \$3,500,000 |
| Montgomery | First Responder Equipment and Records Tracking Sys | Every year many law enforcement officers are wounded or killed by unauthorized users discharging the officers sidearm or shotguns in vehicles. A biometric synchronization between the officer and weapon would prevent unauthorized discharge of the weapon. Funds would be needed to device a system that would enable a weapon to read the biometric signature (probably fingerprint) of the officer prior to discharge of the weapon. | CDO Technologies | 15 | 0 to 30 days | \$3,500,000 |

| Montgomery | Multimedia Company | We are a Minority and Woman Owned Multimedia Company that creates Video Games and 3D Animation. We have been incorporated since March 2002 and we need the funding in order to hire Video Game Developers, Computer Technicians, Animators, and purchasing a larger facility to accommodate the new employees and fulfill our Gaming Contracts with Microsoft and Sony. In order to create games for their gaming systems. During this recession the Video Gaming Industry is still profitable. The infusion of capital will help Ohio's economy by supplying high tech careers. | JackaByte Entertainment Inc. | 150 | 0 to 30 days | \$1,750,000 |
| Montgomery | Training Funds for Existing Employees | Due to sanitary union rules in the plant, personnel moves from department to department at least twice a year. Training is required to ensure a nimble and absorbing resiliency to infuse Arts-inspired teaching models into state-mandated core disciplines. CDCD's Staff Development Initiative inspires teachers to refine their lesson plans with fine arts connections, offering an outlet to students and seamlessly integrating math, language and problem-solving concepts in a novel, right-brained presentation. CDCD's staff development presents world-class professional speakers (providing 32 slots) both performing Lecture-Demonstrations and leading teachers in recognizing neural points of entry for student engagement in their teaching objectives. Dancing to the Curriculum includes an in-school residency, capturing students' attention through living dance performance, individual instruction by dancers in the classroom and a culminating "Informance" for the entire school, raising the bar for 21st Century programs. (5,000 students in 10 schools). | Behr Dayton Thermal Products | 912 | 0 to 30 days | \$500,000 |
| Montgomery | Professional Development for 21st Century Educatio | Picture a rap student, interest piqued, leaning forward to capture every part of his eighth-grade math lesson, and another, fascinated as his English class demands his written participation. A Dayton Public Schools "Gifted and Talented" class? No-these are underserved students engaged by the Dayton Contemporary Dance Company's (DCDC) Teaching, Learning, Gaming initiative program, "Dancing to the Curriculum". DCDC world-class professional dancers leave a deep impression on the hearts and minds of both teachers and students as this residency program puts them in the classroom to integrate Arts into the core curriculum. As the dancers infuse the tools of movement and right-brained thought into the teachers' lesson plans, students are transported into a world of creativity, mastery and the universal power of music and dance, capturing their attention and supporting diverse learning styles, schools report an increase in attendance and reduction of behavioral interruptions with DCDC's presence. This vibrant program will be introduced in 10 schools in a week's residence, reaching 5,000 students, and providing employment for 32 dancers, including support and program development staff. | Dayton Contemporary Dance Company | 32 | 0 to 30 days | \$160,890 |

| Montgomery | Waste Collection Recycling Program | This project consists of the purchase of recycling containers, waste collection vehicles, and a software program to automate waste collection recycling as an effort to increase recycling participation. | City of Dayton | 50 | 91 to 180 days | \$3,950,000 |
| Montgomery | Economic Production of Carbon Nanotubes/Fibers | It is widely recognized that the industrial acceptance of carbon nanotubes and their related materials is limited by three factors: price, consistency, and purity. Currently, the only technology that holds significant promise in addressing these shortcomings is the catalytic reduce process, often mis-described as the SiC sublimation process. Riehl Engineering LTD has developed a process that will allow the economical scale up of the catalytic reduce process to economically viable scales. This advancement will allow the production of high quality - high purity, and cost effective material for the power generation/storage, sensing and composites markets. The process yields carbon nanotubes and nanotube derivatives (fibers) of reliably high chemical structure and 3D networked structure that are suitable for use in energy storage and direct electron transfer from enzyme reactive site to electrode bulk. At the completion of the project Riehl Engineering will produce and market an advanced carbon nanotube electrode material for electrochemical applications. Breaker impacts: Competitive technology is well defined. There are currently six production methods for carbon nanotubes: arc discharge, laser | Riehl Engineering | 20 | 31 to 90 days | \$750,000 |

Conversion of the Oil to Clean burning Biodiesel at our Production facility in Miamisburg. We want to expand our existing program to multiple counties recruiting for new well paid jobs and also helping in reducing diesel emissions in Ohio.</p> | Jatrodiesel, Inc | 26 | 0 to 30 days | \$1,800,000.00 |
| Montgomery | Preparing Children for the Road Ahead | <p>Since 1998, URS has helped children with disabilities and their families overcome challenges and prepare for the road that lies ahead including school readiness. This grant supports our commitment to children with disabilities by expanding our CarShare Facility, which is the only one in the area where parents and therapists are available daily. We will add staff and increase capacity as follows: 1) Infant Room will grow from 5 to 10 special needs infants 2) Toddler Room will increase from 12 to 16 children 3) Preschool going from 24 to 48 children 4) Head Start Program from two to five classrooms increasing capacity from 17 to 28 children 5) The full day summer Enrichment Program will also experience the same level of increased capacity for school-age children and teens with disabilities. The outcomes of the grant will be far reaching to Dayton area children and their families by increasing the number of children with disabilities who receive early intervention services, quality childcare, and school readiness by creating 6 new staff positions and critical support for families who struggle to keep their jobs while caring for children with disabilities who may be medically fragile.</p> | United Rehabilitation Services | 6 | 0 to 30 days | \$650,000.00 |
| Montgomery | Project Neighborhood Renewal | <p>1) Housing rehabilitation of approximately 25 homes utilizing local tradespersons and volunteers to renew the Ft. McKinley neighborhood of Harrison Township in northwest Dayton/Montgomery county. Focus will be on homes owned by persons in the lower income brackets, senior citizens and those with disabilities. Rehab work will also be performed by persons using on-the-job training by unemployed persons. 2) In addition, partnerships with Harrison township community development and parks and recreation to renew and develop small parks in the area of a community center for job training, material assistance programs and youth development. This would be a three year program that once operational, would become self-sufficient through community and local business support.</p> | The New Path, Inc | 30 | 31 to 90 days | \$375,000.00 |
| Montgomery | Micro-Business Development in Northwest Dayton | <p>1) Micro-business development in northwest Dayton - Train and engage persons that are unemployed or under-employed to begin or enhance small businesses (1-4 employees) in the Northwest Dayton and Miami county area. New Path/Opportunity Church would provide training, personal and space for classes, internet availability, expertise and mentoring from successful local business persons, opportunity for education, needed for CEO, and administrative support. Two target business types would be retail of consumable items (groceries and clothing) and services jobs (examples: lawn care, home repair, home daycare for children or senior adults, etc). Individual assessments would be made of each participant to determine needs and strengths for success. Once engaged in their business, participants would also be asked to "give back" to others, by mentoring and supporting others in this process. This would be a three year program that once operational, would become self-sufficient through community and business support.</p> | The New Path Inc | 200 | 31 to 90 days | \$896,544.00 |
| Montgomery | PEM Water Measurement and Management | <p>1) A sensor which permits in-situ monitoring of both liquid and vapor phase water distribution within the turn-ins of an operating fuel cell. This sensor technology will be accessible by a much wider range of research groups working in the field than is currently possible with neutron radiography and permits much more rapid development of fuel cell technology through continuous on-line monitoring. In addition, this sensor will permit more accurate visualization of the dynamics of evaporation/condensation cycles within a channel due to a response time less than 1 millisecond.</p> <p>2) A unique coating process to permit rapid and systematic ablation of the surface energetics of the component interfaces without introducing additional ohmic resistance which will impact overall fuel cell efficiency. Such coatings will provide a means of controlling the fundamental structure-property relationships responsible for water distribution within a fuel cell and their ultimate effect on performance.</p> | Mound Technical Solutions, Inc. | 20 | 31 to 90 days | \$1,000,000.00 |

Program duration is 48 weeks annually. Expected outcome is 12 new youth businesses start up annually.</p> | ACTION YOUTH OUTREACH | 10 | 31 to 90 days | \$118,000.00 |
| Montgomery | Writing in Wet Cement: Investing in Dayton's Workf | <p>A critical threat to the vitality of the Dayton area is the chasm between the workforce skill capacity and industry's workforce capacity needs. Addressing this skill gap involves the "retooling" local workers, a strategy that is yielding disappointing results. A key reason for these outcomes is because in the haste to implement the programs, the underlying mindsets of the workers were not ground. The concept of "mindset" refers to one's constellation of beliefs and norms that impact one's actions. The mindset of the workers transitioning from a manufacturing to a knowledge-based job is preventing them from embracing the labor. Drawing from psychological research, this project addresses the short-coming of previous retooling programs. Specifically, the project is comprised of an assessment and implementation phase. In the assessment phase, data will be collected to thoroughly understand the mindset of the workers. The implementation phase will involve developing a tailored intervention that addresses these mindsets and provides an avenue to effectively transition workers to the new environment. Appropriate metrics will be used to evaluate the effectiveness of the program.</p> | The Rucks Group, LLC | 1000 | 0 to 30 days | \$50,000.00 |

|----------------|---|--|--|----------------|--------------------|---------------------------|
| Montgomery | MV Energy Conservation | request will enable us to have energy audits performed at specific properties, and will allow us to implement a number of the recommended improvements/grades. The primary goal is to decrease operating costs for our residents and our management company. Decreased operating costs will save residents money and improve property operations by freeing up cash. Additional operating cash flow can be used to cover other capital improvement needs. For several reasons, it is difficult to predict the number of jobs that will be created/retained. This depends on the amount of funds awarded and the number of projects that can be improved. There is also no way to predict how many jobs will be retained at the subcontractor level based on work contracts awarded. The number given above is a guess at this point. Because Miller-Valentine owns and operates rental units across the state, improvements will touch residents and workers in multiple counties and zip codes. The job costs given are representative of one area we would target. | Miller-Valentine Group | 50 | 31 to 90 days | \$15,000,000.00 |
| Montgomery | National Health Information Network Integration | With the requirement from the Federal Government that all medical records will be electronic, all participants will be required to have connectivity to a national network. One of Ohio's strategies is to create a hub on innovation and opportunity. This hub will be used to distribute the Electronic Health Record (EHR) for the State of Ohio. In order for the Hospital networks to connect to the Federal network, the data for Patient records, diagnoses, procedures, insurance, Physician Demographics must be migrated to allow the state to be shared as needed while providing security against unauthorized usage. Training and consulting will need to be provided to Hospital Networks, Independent Hospitals and Physicians to provide electronic access to the gateway. | Strategic Data Systems | 30 | 31 to 90 days | \$1,000,000.00 |
| Montgomery | Home Improvement, Home Retention Project | This project request for \$500,000.00 would have an immediate impact on employment, conserve energy, and assist over 100 owners retain their homes. Tiffin Green Condominiums has 25 buildings (74 units) that range in age from 15-22 years old. There are 107 residents and owners with the average age of the residents being approximately 70-75 years old. Many are living only on Social Security benefits and their savings. An increasing number of residents are widows whose limited resources are being strained by rising property taxes and other increasing costs. The objective of the project is to replace aging roofs on all buildings. Replacing roofs has begun, but halted due to rising costs & budget constraints. Twelve trailers will be employed for 3 yrs. The project is 90% ready in that bids have been received. The board and manager will approve the project. The new roofs will conserve energy & cut heating & cooling costs by 10%. Assessments were planned years ago, but increased cost projections have increased. Some owners have been forced to sell their homes, some are the annual roof assessment of \$623.00-\$757.00 as their reason to sell. | Tiffin Green Condominiums | 12 | 181 days or more | \$500,000.00 |
| Montgomery | Offset printing and digital printing | Offset printing contribution of a 40 yr family owned company with expressed graphics and digital printing A 1 million dollar business that has fallen on hard times due to the economy. This family owned business is owned by two females. Trying to cope with economics - keep the employees working and drawing a weekly pay check. | A&B Litho inc. | 10 | 0 to 30 days | \$50,000.00 |
| Montgomery | Morton House | Provide a safe environment for all who live at the facility. It will give the homeless new start to believe in themselves again. | Montgomery | Temporary lodging facility | We are a high school drop out recovery program in a high crime area. We would like to build a multi-purpose facility on our grounds that would enable us to temporarily house students whose living conditions have become unstable until they can find suitable long term living arrangements. We would also like to utilize the facility for a fitness room for sports and a community theater/recreation center. | General Chappie James Leadership Academy | 25 | 31 to 90 days | \$1,500,000.00 |
| Montgomery | Security System and Keypad entry system | We are a high school drop out recovery program in a high crime area. We need a system that will allow us to track the movement of students and staff throughout the facility. When they enter a classroom and when they leave the grounds. Also, we need a system throughout the facility that can be monitored by our security or facility coordinator. | General Chappie James Leadership Academy | 25 | 31 to 90 days | \$500,000.00 |
| Montgomery | Window replacement | Need to replace existing windows in facility. Windows are causing tremendous amount of energy loss and increasing utility costs as well. | General Chappie James Leadership Academy | 25 | 31 to 90 days | \$900,000.00 |
| Montgomery | HVAC Replacement | Need to replace HVAC system in existing structure built in 1958 with an efficient heating venting and air conditioning system. Currently operating with a boiler system vintage 1968. We are currently a year round school using window units and generators due to the lack of efficiency of the existing unit. | General Chappie James Leadership Academy | 25 | 31 to 90 days | \$900,000.00 |
| Montgomery | Green Roof & Solar Panel project | Roof replacement on existing school building using a combination of a "green roof" to grow vegetables in dining hall and solar panels to provide power for other school. | General Chappie James Leadership Academy | 25 | 31 to 90 days | \$900,000.00 |
| Montgomery | Eaton Senior Housing | This project is for deployment of solar heating and domestic hot water for a new 40 unit multi-family low income senior housing being developed by a non-profit developer in Dayton. This project will save each resident of these units over \$600 yearly in energy costs as well as help drive the solar thermal market and deployment in the state of Ohio. The developer and general contractor are very eager to try and get this technology included in the construction of this new building. | Tippling Point Renewable Energy | 3 | 0 to 30 days | \$250,000.00 |
| Montgomery | Twin Towers Low Income Housing | This project is to provide solar heating and domestic hot water for 40 individual low income 4 bedroom homes being built by St. Mary Development corporation in East Dayton. This project will save each resident of these homes over \$600 yearly in energy costs as well as help drive the solar thermal market and deployment in the state of Ohio. The developer and general contractor are very eager to try and get this technology included in the construction of these new homes. | Tippling Point Renewable Energy | 4 | 0 to 30 days | \$250,000.00 |
| Montgomery | OKC/OHDI | Building Challenge: DI teaches more than basic knowledge and skills - it provides a unique learning center in which students can evolve into the innovators of the 21st century. Since 2001, between 600 and 1000 Ohioan teams have participated annually in DI competitions across the state. We are requesting \$44,000 to sponsor 11 student teams from at-risk, disadvantaged areas within Ohio in 2010. The funding will provide stipends for qualified adult mentors for each team; it will cover the registration fee of any DI tournaments for which the teams qualify; and it will cover all team supplies. We are also requesting \$144,000 for room and board for 30 Ohioan teams at the DI Global Finals, an annual event that unites the best international student teams in Knoxville, TN. Our aim is to help Ohioan students discover and unleash their creativity to better their futures. Over 26 years, we have generated a favorable standing among several major companies, who celebrate the DI experience for producing extraordinary problem solvers and innovators. | Ohio Kids for Creativity/Destintain Imagination | 11 | 31 to 90 days | \$188,000.00 |
| Montgomery | Digital Radio Upgrade Pilot Program | To initiate a pilot program testing digital portable radios, compared to the analog radios currently in use. The upgrade to digital radios will enhance communication capabilities and interoperability, increase the safety of police officers, improve public safety as a whole which will strengthen the community's confidence in their local law enforcement. When communities are satisfied with the services provided by their public safety departments, they will become more favorable to future proposed levels. Such community support would allow this agency to budget for additional personnel. With the requested funds, the M.C.D. would be able to build the entire radio plant (contracted by Hamilton, Jefferson, and Washington Townships) with new digital radios for use and evaluation. Feedback will also be sought from the Clay Township Police Dept., as they will be provided with the new radios as well. The Clay Township Police Department is one of the 19 police departments that Montgomery County's Regional Dispatch Center dispatches for. | Montgomery County Sheriff's Office | 1 | 31 to 90 days | 100,000 |
| Montgomery | Prosecutor's Project | Contract with a Bilingual individual to work in the victim/witness unit of the prosecutor's office. The person will be responsible for translating necessary information to victims of crime. The person will also be responsible for drafting necessary documents into Spanish. This advocate will work in the community to provide information about the criminal process. This project represents a new aspect to the existing victim/witness unit. It will provide non-english or limited english proficient victims improved and immediate language access to the prosecutor's office, courts, probation, and the criminal justice system. | City of Dayton, Ohio | 1 | 31 to 90 days | \$60,000 |
| Montgomery | Safety Equipment for the Sinclair Police Department | The Sinclair Department of Public Safety proposes the purchase of security equipment and scheduling software to protect students, employees, and visitors as well as respond to multiple incidents. Incident: To engage non-compliant suspects on campus or in jurisdictions that are signatory to the mutual aid agreement Safety Equipment: ballistic shields, TASERs and supplies provide a less lethal alternative for officers Incident: Interoperable communications with area police and fire departments to ensure appropriate response based on mutual aid agreements Safety equipment: Motorola police radios | Sinclair Community College, Department of Public S | 22 | 0 to 30 days | 20,000 |
| Montgomery | Cold Case Investigation of Violent Crimes | The goal of this project is to bring the Sinclair Police Department into compliance with the Ohio Campus Security Taskforce recommendations submitted to Governor Sinclair (August 31, 2007). By August 30, 2010, the project will accomplish the following: Increase the preparedness of 24 system police officers through participation in at least one mutual aid training session involving hostages, an active shooter, and barricading that utilizes interoperable communications, riot equipment, ballistic shields, personal protective equipment, lethal equipment, or less lethal equipment. The Montgomery County Coroner and Miami Valley Regional Crime Laboratory (MVRCL) proposes to establish a regional Cold Case Task Force to investigate violent crimes that are longer and 2-part teams investigators will be hired to investigate cold case homicides from agencies the MVRCL serves. Investigators will work with member agencies. Cases will be identified, prioritized, and investigated based on the potential for being solved through additional interviews and standard investigative techniques, in conjunction with technological advances that may not have been available at the time the original case was opened. Approximately 50-75 cases will be reviewed and it is expected that 10% can be successfully resolved. | Montgomery County Coroner's Office | 3 | 91 to 180 days | 356,229 |
| Morgan | Dist 10, PID 85775, MRG Purchase 1 expansion LTN | Purchase 1 expansion light transit vehicle with a narrow body for the Morgan County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$52,990 |
| Morgan | Dist 10, PID 85776, MRG Communication system | Communication system for the Morgan County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$10,162 |
| Morgan | Dist 10, PID 85774, MRG Facility purchase | Facility purchase for the Morgan County Commissioners | Ohio Department of Transportation | 6 | 31 to 90 days | \$325,000 |
| Morgan | Household Sewage Treatment Project 2009 | Assistance to Morgan county homeowners in need of household sewage treatment system replacement, repair or installation. Funds will allow work to proceed giving local contractors work. | Morgan County Health District | 20 | 0 to 30 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Morgan | 24/7 Sobriety Program | The project is two-fold. First, to implement a 24/7 sobriety program following the South Dakota model. The second is to incorporate the 24/7 program with day reporting and community service rather than incarceration. The cost of incarceration of misdemeanor and low level felony offenders is pushing the county towards insolvency. The 24/7 program has proven effective in reducing repeat drug and alcohol offences as well as reducing incidents of family violence. Day reporting and community service provides an alternative to incarceration that is less costly and provides benefits to the community. Two new jobs would be created to implement the program. The jobs retained may be a majority of the county work force should the county become insolvent. Capital investment would be limited to drug and alcohol monitoring equipment, some of which is manufactured in Ohio. Transportation can be provided by the existing public transit system which would benefit from increased usage. | Morgan County | 50 | 0 to 30 days | \$125,000 |
| Morgan | Summer School Intervention | Once implemented the program should be self maintaining through reduced cost of incarceration, graduation intervention programs during the school year help but most of these students need summer intervention programs to keep up and avoid losing academic gains that can be lost over the summer months. The basic needs are math and reading instruction, credit recovery, GED prep, and subject area tutoring. The program will involve 250 students and 25 teachers, last for 4 weeks, and be scheduled at the time of GED testing to prepare students for the test. In addition to staff salaries and instructional materials, the largest expense is transportation. We are a one-high-school-county-wide district covering 420 square miles of rugged rural Appalachia. The students who need this intervention are the ones who cannot afford their own transportation and must be transported by bus. There are no local, grant, or state funds available to support this program. | Morgan Local Schools | 200 | 91 to 180 days | \$75,000 |
| Morgan | Seniors to Sophomores | This program is to continue a senior to sophomore program in rural Appalachia that will support our graduates that do not attend the freshman year of college during their high school senior year. This program allows students to take college courses locally instead of traveling over 45 miles to the nearest university. Funds will be used to offset the cost of books, tuition, and transportation. Students will be selected on the basis of academic ability and the inability to afford a college education. Most will be first generational college students. There are no funds available for this program next year. | Morgan Local Schools | 100 | 91 to 180 days | \$75,000 |
| Morgan | STEM Curriculum for High School | Industrial partners meeting with math and science teachers to select "real world" engineering projects that will support an inquiry based instructional program that unifies the teaching of Science, Technology, Engineering and Math. The program will involve 700 high school students and 14 teachers. Our industrial partners tell us that our graduates do not have the math and science skills they need to be successful employees at their companies. This curriculum approach should reduce that problem. The program will also produce more successful math and science college students and encourage more students to choose an engineering career. This project will take place in Morgan County that has one of the highest unemployment rates in Ohio. We anticipate that this program will produce over 100 new jobs each year. | Morgan Local Schools | 100 | 31 to 90 days | \$200,000 |
| Morgan | Care Team | This Care Team is composed of representatives of local community social agencies and school staff who meet weekly to discuss disconnected and troubled students who need the support of social services and caring adults. The program is based on the 40 Developmental Attributes developed by Search Institute. Students are categorized into 3 tiers with Tier One students being the most needy and getting the most direct services from social agencies. All students are considered to be in Tier Three where the entire teaching staff works to develop the 40 Developmental Attributes in all students. Years of high unemployment (over 19%) in Morgan County has contributed to 40% of our students coming from a background of generational poverty. At least 20% of our student body has social and emotional barriers to their academic performance. Our Care Team at the junior high has had outstanding success in reducing these problems. Now we need to expand this program to our high school and the three elementary schools. There are no funds available to expand this program. | Morgan Local Schools | 100 | 31 to 90 days | \$30,000 |
| Morgan | Dist 10, PID 77976, MRG SR 376 0.000 | Two-Lane resurfacing project using an asphalt overlay. MRG 376 0.0-0.76. | Ohio Department of Transportation | 39.8 | 31 to 90 days | \$1,387,000 |
| Morgan | MVHC HIT Project | Muskingum Valley Health Centers is a Federally Qualified Health Center (FQHC) serving Southeast Ohio. MVHC is composed of three separate facilities, two located in Zanesville, Ohio and the other in McConnelsville, Ohio. MVHC is ready to implement an HIT system which will allow better care to patients. This project is fully planned and ready to move forward when funding is secured. This project will help to retain and improve the 600 jobs that MVHC currently has. | Muskingum Valley Health Centers | 100 | 0 to 30 days | \$350,000 |
| Morgan | Morgan County Healthcare Facility | Muskingum Valley Health Centers is a Federally Qualified Health Center (FQHC) serving Southeast Ohio. MVHC is composed of three separate facilities, two located in Zanesville, Ohio and the other in McConnelsville, Ohio. The McConnelsville location is currently operating grossly over capacity in terms of physical space and under services the community in terms of physician services. A project is currently at the shovel ready stage to construct a new Healthcare Facility to serve Morgan County Ohio to address both of these issues. This project will create and retain 15 high paying healthcare jobs and work to stimulate the economy of Morgan County. | Muskingum Valley Health Centers | 15 | 0 to 30 days | \$2,500,000 |
| Morgan | Village of Chesterhill Wastewater Improvements | The proposed project will develop sanitary sewers and wastewater treatment systems inside the village limits. Chesterhill currently has no sanitary facilities. Household sewage is treated by primary on-site septic tanks and other on-site systems. In many locations sewage spills into storm drains and ditches. The proposed project will eliminate the environmental and human health hazards associated with surfacing sewage, and allow the re-development and growth inside the Village that depends on adequate sanitary services. The proposed project will service approximately 120 homes and businesses and improve the water quality of Wolf Creek and residents downstream into the Muskingum watershed. | EMH&T | 30 | 0 to 30 days | \$350,000 |
| Morgan | Sanitarian in Training project | Provide funding to hire additional staff for local health department environmental health programs provide assistance to Morgan County residents in need of improved or new sewer systems. | Morgan County Health District | 2 | 31 to 90 days | \$40,000 |
| Morgan | Water program project 2009 | Would also provide work to local contractors | Morgan County Health District | 10 | 0 to 30 days | \$25,000 |
| Morgan | environmental Health 2009 | Provide funding to continue Environmental Health program enforcement, staff development and hiring | Morgan County Health District | 2 | 0 to 30 days | \$40,000 |
| Morgan | Early childhood intervention | Provide funds to support childhood intervention program. Hire staff to provide education to Morgan County residents in child development, care and education | Morgan County Health District | 3 | 0 to 30 days | \$50,000 |
| Morgan | Police officer & Equipment | Retain one police officer add an additional police officer and replace a nine year old police. | McConnelsville Police Department | 2 | 31 to 90 days | \$85,000 |
| Morgan | Sanitary Sewer Replacement Phase I | Replacement of 8' Sanitary Sewers | Village of Malta | 10 | 91 to 180 days | \$900,000 |
| Morgan | Citizen Safety | Hiring of Emergency Medical Technicians at both the basic and paramedic level. With county citizens going outside the county for employment, the paramedic base to supplement the paid staff should be decreased. This money would be used to prevent our long range plans to hire additional paid personnel. A countywide levy would be placed on the November ballot to further support this project. The safety of our citizens is our first priority. Our oldest hospitals are located in our North and South counties in Morgan County. As the support time is 35 minutes leaving us short staffed when patients are transported. Our full time and part time staff are currently available and no full & additional paid staff are needed. We also serve one township in another adjoining county and run mutual aid with 3 of the 5 counties that surround us. | Malta & McConnelsville Fire Department | 22 | 0 to 30 days | \$275,000 |
| Morgan | Village of McConnelsville Sanitary Sewer Separatio | Federally mandated separation of storm water from combined sanitary sewer system. Installation of 36" and 48" storm sewer, manholes and appurtenances. The EPA approved Long Term Control Plan number is 06262 and is mandated to be completed by December 31, 2011. 7.42 miles of asphalt resurfacing of MRG CR #3, including a 2' berm on each side and center line striping. | Village of McConnelsville | 10 | 0 to 30 days | \$3,500,000 |
| Morgan | Resurfacing of County Road #3 | This job will create 20 to 25 jobs for 2-weeks while the work is completed. not sure how to | Morgan county Highwat Department | 1 | 91 to 180 days | \$1,026,024 |
| Morgan | Village of McConnelsville SR 209 Green Development | New SR 209 in Morgan County is adjacent to 600 acres being purchased by the Morgan County Improvement Corporation from Ohio Power Company. Allowance to be improved with minimum structure and open land to light manufacturing, office complexes and IT communication. | Village of McConnelsville | 350 | 0 to 30 days | \$2,000,000 |
| Morgan | Village of McConnelsville SR 60 North Development | SR 60 in Morgan County is home to some of the highest paying jobs in Morgan County. Some of the existing businesses are in danger of relocating or selling expansion if water and sewer are not available to the area. Additionally, new businesses will not be able to locate in this area without adequate infrastructure. | Village of McConnelsville | 10 | 0 to 30 days | \$2,000,000 |
| Morgan | Village of McConnelsville Wastewater Treatment/Rd Wat | Replacement of lifting equipment at the existing wastewater treatment plant, pump station and water line to meet existing and future flows. Replacement of return sludge pumps at the wastewater treatment plant and grit pumps and basin replacement at the lift station would provide required treatment. Installation of generator would allow raw sewage to continue treatment during power outages and eliminate raw sewage from entering the Muskingum River. Replacement of tanks would insure adequate the protection of residents (sanitary protection is on a 4' water line.) | Village of McConnelsville | 5 | 0 to 30 days | \$350,000 |
| Morgan | Tri-County Rural Water/Lightner Ridge/Ellis Rd Wat | The county water is located in Washington County. This project serves residents of Morgan County. Extension of waterline along 13 different roads. | Tri-County Rural Water District | 7 | 0 to 30 days | \$532,400 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Morgan | bridge painting Package #1 | This job would entail the painting of the steel structure of 5 small bridges to prolong their useful life by 4-15 years. It is estimated that each bridge can be painted for less than \$20K each. Project would meet all environmental requirements | Morgan county Highway Department | 1 | 91 to 180 days | \$100,000 |
| Morgan | Muskingum Valley Health Center New Construction | New healthcare facility for a federally qualified health center. The current facility is too small to accommodate the new programs they wish to offer that are not currently offered in the county. Some of these programs include gynecology, pediatrics and mental health services. | Morgan County Development Office | 35 | 91 to 180 days | \$2,000,000 |
| Morgan | Morgan County Transit | This project is to purchase an existing facility to house the rural public transportation system which has 4 vehicles and 15 employees. Also, to purchase one additional vehicle and vehicle radios. | Morgan County Development Office | 5 | 0 to 30 days | \$385,000 |
| Morgan | Morgan County Rd. #2 Guardrail Project | This job would entail the construction of 11,000 feet of new guardrail along County Rd. #2 which runs along the Muskingum River and into surrounding County Rd. with very steep hillsides. This area has been identified as areas needing guardrail protection in state funded safety studies. | Morgan county Highway Department | 1 | 91 to 180 days | \$150,000 |
| Morgan | Morgan County Airport Authority | pending to replace poor lighting, need new fencing, taxiways to hangars need repaved, runway needs lengthened and general road improvements | Morgan County Development Office | 10 | 31 to 90 days | \$1,000,000 |
| Morgan | Law Enforcement Officer Recovery | We would be requesting funding to recover the three positions, which we have lost due to tough financial times in Morgan County, Rural, Southwestern Ohio, of Northern Appalachian Ohio. Within the past eight years the Morgan County Sheriff's Budget has been cut severely and we were forced to cut 3 positions from our staff of only 9 Deputies. This only left six officers to cover 39thls. 24 hours per day, 365 days per year. We have staff who have not received raises in the past five years but who have been assessed more percentage of costs for medical. The Sheriff's Law Enforcement block grant was also cut by 50% this year, leaving us with even less funding to make it throughout the year. We are running on fumes down here!!! | Morgan County Sheriff's Office | 3 | 31 to 90 days | \$161,753 |
| Morgan | Roof Repair of Union Hall | Theater has wonderful acoustics and character, making it an ideal place to experience live music and drama. Nearly 40 diverse live performances have been sponsored to date by a non-profit group comprising volunteers under the auspices of the Village of Chesterhill http://www.unionhalltheater.org . The first floor of Union Hall, which was renovated in 2001, houses the very active Chesterhill branch of the Kula Love Simpson Morgan County Library. The slate roof of Union Hall is approximately 100 years old. It currently has about 12 small leaks. Our roofer has informed us that replacement of the roof, soffits and gutters is the most pragmatic repair option. This request does not duplicate any other. Funding for replacement of the windows, addition of a handicap access ramp, and renovation of the interior of Union Hall Theater was appropriated in Ohio House Bill 582 for budget year 2009, but that funding is not enough to also replace the roof. | Union Hall Theater c/o Village of Chesterhill | 3 | 0 to 30 days | \$31,443 |
| Morgan | new roof for library | When our library was built, the attic insulation was installed incorrectly, which was the plywood supporting our roof shingles. We are constantly repairing the twelve year old roof. Stimulus money would allow us to permanently repair the roof, gung our library a 30 year roof, to add better insulation and roofing would lower energy costs. | Kate Love Simpson Library | 6 | 0 to 30 days | \$60,000 |
| Morgan | Bookmobile van for children and shut ins | Our children's outreach staff would like to purchase a small bookmobile from the Ohio company OES to use for on-site visits to Head Start homes, private day care centers, home daycares, and schools. They currently use their own cars and are constantly out of gas. They would like to purchase a new van with a bookmobile van for children and shut ins. Our current bookmobile is over 20 years old and requires a specially licensed driver, and is having more and more maintenance problems. | Kate Love Simpson Library | 12 | 31 to 90 days | \$120,000 |
| Morgan | expand parking area, create green space and garage | KLS Library does not have enough room for storing and processing books & other media. Our parking lot is overflowing with cars when we have computer classes, children's programs, or other special events. Our library is landlocked, but we could buy a small parcel of land adjacent to our property. The Village of McConnsville would benefit by having these three homes torn down and the resulting lots used for permanent improvements. Also would be created a dismantled home, landscape, and parking, and landscaping. We would work with Morgan County Master gardeners to integrate green spaces in a park setting as we expand our parking lot. A separate bookmobile garage, would allow us to convert our attached garage to library space. | Kate Love Simpson - Morgan County Library | 20 | 31 to 90 days | \$950,000 |
| Morgan | wood shaving business | As a small business with fifteen years experience in the 25 billion dollar timber industry in Ohio, I am currently in the process of utilizing surplus wood for a wood shaving mill providing much needed animal bedding for dairy farms, hog farms, horse farms, poultry farms, etc. also this product can be packaged for sale to any consumer at a low price very well as a substrate for environmental spills and is completely biodegradable there is a free proponent that can fuel the drying system and possibly be used to create electricity to operate the manufacturing process with a possibility of selling excess electricity, this mill would take the wood chips from area loggers and is completely self contained. The wood chips can be bulk and or dried and packaged for other uses as the business grows multiple shifts would be needed providing 15 jobs not including the building and logging jobs I will help create there is a surplus of fine grade chips available in the region and abundant after talking to the shavings equipment manufacturers I find no one in southeast Ohio shaves wood and this product can be shipped to several areas and states | dan miller logging | 15 | 0 to 30 days | \$1,300,000 |
| Morgan | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WMAN technology will be able to push a strong enough signal to provide great service. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial separation that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Morgan | DEERFIELD SOLID WASTE PROGRAM | WE ARE LOCATED IN LOW INCOME AREA WHERE THERE ARE LOTS OF TRASH, ANK AND OTHER SOLID WASTE ACCUMULATING SOME RESIDENTS OF THE TOWNSHIP ARE UNABLE TO AFFORD TO DISPOSE OF THE TRASH PROPERLY. WE ARE OFFERING SOME PLACE TO DISPOSE OF TRASH SUCH AS ROLL OFF DUMPSTERS, THE COLLECTIONS, SCRAP APPLIANCES THAT WE WILL BE ABLE TO KEEP THIS WASTE OUT OF VALLEYS, CREEKS, LAND AND STREAMS. WE PLAN TO HOLD DIFFERENT DRIVES AT DIFFERENT TIMES OF THE YEAR TO TRY TO MAXIMIZE EFFECTIVENESS. | DEERFIELD TOWNSHIP | 2 | 0 to 30 days | \$5,000 |
| Morgan | RIGHT OF WAY CLEARING | THIS PROJECT IS DESIGNED TO CLEAR THE ROAD RIGHT OF WAYS OF TREES AND BRUSH ALLOWING OUR GRAVEL ROADS TO DRY BETTER FROM THE INCREASE IN SUNLIGHT DOWN MELT FASTER. LESS TREES FALLING ON ROADS. LESSEN THE POSSIBILITY OF TREES FALLING ON CARES, SCHOOLS, BUSES, OR EMERGENCY VEHICLES. LOCAL CONTRACTORS WILL BE INVITED TO BID ON THE JOBS CREATING LOCAL WORK FOR THEM AND THEIR EMPLOYEES. | DEERFIELD TOWNSHIP | 2 | 0 to 30 days | \$25,000 |
| Morgan | Morgan County Jail New Construction | Morgan County is partnering with a neighboring county for the construction of their regional jail to send inmates. The jail bid for Morgan County continues to increase and the county is unable to afford paying another county to house their inmates. The cost for the regional jail usage exceeds \$300,000 annually. If a jail was established in Morgan County, it would create jobs, save the county money in the long term and be more economical overall. | Morgan County Development Office | 20 | 91 to 180 days | \$5,000,000 |
| Morgan | Water Distribution Streamlining | The existing distribution system in McConnsville is in need of repair and improvement. A single new outfall provides water service to the 800 residential and business customers in the Village. This new outfall will be duplicated, an existing line that is leaking and in need of major repairs will be replaced, two aged water towers with limited system usage will be removed from service a pump station will be upgraded and 2,000 linear feet of 12" water line will be installed. This will provide upgraded potable water and the service to allow for expected commercial growth in the near future. | Village of McConnsville | 5 | 31 to 90 days | \$750,000 |
| Morgan | MRG Capitalized Maintenance: PID 86104 | 2009 Capitalized Maintenance. This is a rural travel project whose funding flows through ODOT. | Ohio Department of Transportation | 1 | 0 to 30 days | \$7,000 |
| Morgan | TR 209 Road Improvements | ODOT Project FBR 8026. This traveling road needs widened to improve logistics and overall economy for Morgan County. The National Guard Hawk site and Ohio Department of Transportation facilities are located on this road which is highly traveled and creates a safety hazard since it is only a one lane highway. In addition, this road being widened will create a direct shot to SR78 which leads to I-77. This is of great importance to the manufacturing in Morgan County. | Morgan County Engineer's Office | 250 | 181 days or more | \$1,000,000 |
| Morgan | Tri-County Water District - Lightner Ridge Waterli | The proposed project will include waterline extensions into Morgan and Washington Counties. The project will include 3" 4" and 6" waterline, meter pits, valves, hydrants, and miscellaneous appurtenances. The project is located in an economically distressed area. | Tri-County Water District- ME Companies, Inc. | 20 | 31 to 90 days | \$665,500 |
| Morgan | Habitat Project | Habitat plans to create its first development of 8-10 homes on 3.5 acres of land just outside the corporation limits of McConnsville. The village of McConnsville has given permission for Habitat to utilize the village water and sewer system. Habitat will be responsible for the infrastructure out of a pump station and 1/4 mile of pipe to connect to the main Village line. An entrance road and sidewalk would be constructed and utilities would be installed for each house site. This project is only to develop the site and does not include the cost to construct each home. Habitat will sell each home to families below 80% AMI and the mortgages will be at 0% interest. Average Habitat mortgages are \$250,000/month for 20 years. | Morgan County Habitat for Humanity | 10 | 31 to 90 days | \$570,000 |
| Morgan | Miba Sinter USA | Miba Sinter USA will create 60 new full time jobs in Morgan County with an average wage of \$14.00 per hour. Miba AG, the parent company, will retain 271 existing jobs in Morgan County. Miba Sinter will manufacture powder metal parts in a newly constructed \$2,000 of facility which will be owned by the Morgan County Improvement Corporation and constructed adjacent to the existing Miba facility. Miba has signed a 16 year lease with three 15 year extension options. The Morgan County Improvement Corporation is in the new building construction. | Miba Sinter USA, LLC | 331 | 31 to 90 days | \$1,444,089 |
| Morgan | campsite project | Four primitive campsites with parking, fire rings, tent platforms, composting toilets, and solar shower hot. This will bring tourists interested in "green" camping and hiking, and will also provide much needed camping areas for hunters. Archery target range, with several targets, and elevated stands, for practice. Archery is an enjoyable outdoor sport that people of all ages can enjoy, and there are opportunities for competition. | Burr Oak Outfitters | 3 | 0 to 30 days | \$22,000 |
| Morgan | Burr Oak State Park WWTP Rehabilitation | Consolidation and improvement of wastewater handling and treatment. This project will allow for the elimination of two existing treatment works. This facility serves Burr Oak State Park Lodge, a significant destination and tourism draw for the county. This rehabilitation project will help remedy compliance issues of the existing treatment plants. The project design work is completed and will be bid in late 2009. | ODNR-Parks & Recreation | 25 | 91 to 180 days | \$2,750,000 |
| Morgan | Cops Hiring Grant | COPIs Hiring Grant funding will be used to replace 3 officers, which were taken from our six Deputy Department, because of budget cuts, in 1998. | Morgan County Sheriff's Office | 3 | 31 to 90 days | \$161,753 |
| Morgan | Supplement loss from OQJS Local Law Enforcement Bl | The OQJS was forced to cut out our Local Law Enforcement Block Grant by 50 % this year. The project runs from February through August annually. This funding is what was used for HBRS and OBRS submissions and Officer Overtime to our six road deputies, for the entire county, Multicultural and Multiracial families. | Morgan County Sheriff's Office | 1 | 0 to 30 days | \$1,111 |
| Morgan | Growing a Community in Historical Pride: Eco-Touri | The MOC collection is unique and diverse. MOC is committed to working with communities and educational institutions, their students and faculty through giving presentations to organizations, at schools, sharing information about the rich history, providing events that involve hands on activities by students and giving Underground Railroad tours. MOC purchased an Historic Underground Railroad house in Chasesthill to use as a research library, museum, meeting, disabled and meeting facility. This project would allow for final renovations in this historic site, equip the library and museum with furnishings and computers with broadband capabilities, and hire a small staff. Chasesthill offers excellent resources as a tourist designation attraction with its restored and operating Opera House, Underground Railroad site, and Quaker heritage. The addition of the MOC research center and museum in Chasesthill will greatly enhance tourism potential affecting jobs and businesses in the area. | Multicultural Genealogical Center of Southern Ohio | 20 | 0 to 30 days | \$270,000 |
| Morgan | State Route 60 Sanitary Sewer | Installation of 12,000 linear feet of sanitary sewer and force main, two lift stations and appurtenances to serve the existing and proposed businesses south of McConnsville on State Route 60. Project will result in the creation and restoration of 120 jobs. | Village of McConnsville | 120 | 91 to 180 days | \$1,000,000 |
| Morgan | Combined Sewer Overflow Rehab | Village of McConnsville has entered into an agreement with the Ohio EPA to remove the clean water from the existing sanitary sewer system. This project is mandated. Chrome is the installation of 12,000 linear feet of sanitary sewer, manholes and appurtenances. | Village of McConnsville | 75 | 91 to 180 days | \$3,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Morgan | Water Distribution Streamlining | Installation of a 1,200 linear feet of 12" water line for a new river crossing to guarantee the possible water service to the residents in McCornettsville. Additionally, a 200,000 gallon water storage tank will be installed to replace a failing concrete storage tank. Finally, approximately 2,500 linear feet of 12" water line will be installed to replace 2 failing water storage tanks and one booster station that is in need of thousands of dollars in repairs. | Village of McCornettsville | 25 | 91 to 180 days | \$750,000 |
| Morgan | Radio Read Meters | Installation of 725 radio read meters. The existing unattended water distribution system uses approximately 50% more water per household than similar metered systems. This project will have those residents who use the water pay for it and conserve this valuable natural resource. | Village of McCornettsville | 50 | 0 to 30 days | \$175,000 |
| Morgan | State Route 209 Infrastructure Improvements | INSTALLATION OF 4,000 LINEAR FEET OF 8" WATER LINE, 4,000 LINEAR FEET OF 8" SANITARY SEWER, 22 MANHOLES AND 4,000 LINEAR FEET OF ROADWAY TO CONSTRUCT AN INDUSTRIAL / COMMERCIAL PARK. THIS PROJECT WILL MAKE WAY FOR NUMEROUS BUSINESS READY BUILD SITES AND EMPLOY 150 HIGH PAYING JOBS. THE ASKAGE FOR THE SITE IS TO BE PURCHASED AT A MARKET REDUCED RATE FOR THIS BUSINESS PARK. | Village of McCornettsville | 150 | 31 to 90 days | \$1,800,000 |
| Morgan | Rural Broadband Infrastructure Development | Expand broadband infrastructure to extend high speed data services and voice applications to unserved and underserved rural areas, in such a way that this infrastructure could potentially be shared with Emergency services. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Morgan | East Windsor Township Water System Extension - Pha | The Phase I extension of water service to East Windsor Township Extension will serve 40 potential customers situated along ridge top areas where water supply wells and cisterns are often inadequate and heating of water is required. The project includes 22,000 feet of 8-inch water main and 12,000 feet of 4-inch water main. The Phase I project sets up the potential for a 2nd phase project for a connection to the Village of McCornettsville water supply thereby adding an interconnection between water systems. | Morgan Meigsville Rural- Burgess & Niple, Inc. | 12 | 91 to 180 days | \$1,035,000 |
| Morgan | Mogan Meigsville Rural Water District - State Rout | Proposed extension of water service to State Route 78 and Glenn Conroy Rd. (Morgan Township 207) to provide water service to 15 customers who rely upon cisterns and inadequate water wells. Water heating is often required. Project includes approximately 5,500 feet of 8-inch water main and 5,500 feet of 4-inch water main. | Burgess & Niple, Inc. for Morgan Meigsville Rural | 5 | 91 to 180 days | \$376,000 |
| Morgan | Erect building for Morgan County Archery in the sc | Morgan Archery in the Schools program is in its second year and has doubled the size this year and is growing. It has made the kids grades 3 through 8 and school attendance has improved. Morgan County is in need of programs for the kids and has very limited for any new or added programs. | Morgan Archery Boosters | 4 | 91 to 180 days | \$150,000 |
| Morgan | Discouraging Sexual Predators from Serving Childre | By establishing the National Fingerprint Lab in Morgan County to process fingerprints captured from volunteers and workers on child-serving staff all across America. | Safe Harbor Resources 501(c)3 | 30 | 0 to 30 days | \$365,000 |
| Morgan | Morgan County Landfill Brownfield/Phase I | This money is requested to order a Phase I environmental clean up study for the county landfill site that is now closed. The county landfill was closed in the late 1980's by the EPA. It occupies prime land that could be redeveloped and utilized for economic purposes for the county. Morgan County does not have the money for clean up. If the funding for phase environmental work could be awarded, then Morgan County could potentially partner with Clean Ohio or grant others to provide assistance in the remaining clean up work to improve the property make it ready for a business owner whom is interested in the site. | Morgan County Development Office | 150 | 0 to 30 days | \$200,000 |
| Morgan | Government Monument Recovery Program & Survey of G | Recovery of existing Government Monuments (landmarks and historical controls), for the purpose of expanding and utilizing the county GIS system (GIS) network. Additionally, project scope could include the establishment of boundaries of Municipal, Township, County, State and Federal land. | Professional Land Surveyor's of Ohio | 10 | 0 to 30 days | \$250,000 |
| Morrow | Phase III Waterline Replacement Project | Replacement of 3500 feet of waterline on S. Marion St. and Midland Ave. in the Village of Cardington. | Village of Cardington | 8 | 0 to 30 days | \$150,000 |
| Morrow | Wastewater Treatment Plant Improvements | Improvements and repairs at the Cardington Wastewater Treatment Plant including the addition of a screening facility, to separate non-biodegradable materials from the wastewater entering the plant, repair of concrete clarifiers, addition of baffling to clarifiers, and fine equalization tank to balance flow to clarifiers. | Village of Cardington | 20 | 91 to 180 days | \$1,000,000 |
| Morrow | Traffic Light Replacement | Replacement of antiquated traffic lights, controller and poles at the intersection of US 42 and SR 504 in the Village of Cardington. | Village of Cardington | 5 | 31 to 90 days | \$85,000 |
| Morrow | Cardington Street Garage | Construction of new 100 x 60 Street Department facility to house municipal vehicles and equipment. This is in final design phase and will be ready to bid within 60 days. Existing facility, which is undersized, is located in flood plain near Whetstone Creek (Ontario Watershed) where potential for groundwater pollution from construction debris and salt storage is high. New building would consolidate municipal operations in a single location and eliminate risk of damages from flooding or groundwater runoff. | Village of Cardington | 25 | 31 to 90 days | \$300,000 |
| Morrow | Morrow County Business park Water & sewer Extensio | Approximately 5 miles on water and sewer expansion thru the Morrow County Business Park. This County owned property has potential buyers and businesses waiting for the infrastructure development to be finished. There is potential for 600 jobs and can be created at this site on a 60-acre parcel. | Morrow County Board of Commissioners | 250 | 31 to 90 days | \$280,000 |
| Morrow | Fiber network with wireless connectivity | Through strategic planning located between Columbus and Cleveland and with Interstate access, Morrow County remains rural and under served regarding broadband service. This project will result in multiple benefits including enhanced economic development opportunities with resultant job creation, connectivity of local medical facilities with regional centers, cost reductions to local Village, County, and State Agencies, and enhanced educational broadband use. | Consolidated Electric | 1000 | 0 to 30 days | \$500,000 |
| Morrow | Morrow Iberia Waste Water Sewer System | An ongoing Connect Ohio study documents the need for increased broadband access in Morrow County in finding that only 41% of County residents have broadband service as compared to a State wide average of 50%. | Morrow County Board of Commissioners | 50 | 181 days or more | \$2,100,000 |
| Morrow | Storm Water Restoration | Consolidated Electric has engaged a consultant that conducted a study of the proposed project. As a result, we are prepared to commence immediately with project implementation. We have available the existing pole lines and right of ways necessary to economically complete the project. Also as an internet service provider we have the necessary in house expertise to accomplish this plan. | Village of Mount Gilead | 20 | 91 to 180 days | \$3,000,000 |
| Morrow | Morrow County Business Park Access Road Developmen | The unincorporated area of Iberia is within Washington Township, Morrow County. It has been identified by the ODE as an area of concern. This area has over 100 multi-dwelling septic systems and other small business systems. This would be over 1000 linear feet of gravity sewer, pump stations and mechanical Waste Water Treatment Plant. MODOT has indicated to assist in this area north of the highway. About \$500,000 of the problem is located on SR 95 West in front of the Hospital. The remainder is updating of the site and replacing site that is over 75 years old in the Village. The project could be phased if necessary, the complete project would take about 18 to 24 months to complete. | Morrow County Board of Commissioners | 600 | 31 to 90 days | \$350,000 |
| Morrow | SR 61 / 171 Commercial Access Road w/ Turn lane Ex | Approximately 5 miles of access road to County and Village Street standards needs to be constructed to bring economic opportunities to Morrow County and the Village of Mt. Gilead. This Business Park has the potential for 600 jobs to be created for a County which has one of the highest UNEMPLOYMENT rates in the nation at 9.2% in December of 2008. Our Morrow County has 70% of the County which has one of the highest unemployment rates in the nation at 9.2% in December of 2008. Our Morrow County has 70% of the County to work, this Business park would offer JOB READY SITES to prospective companies, as of December 2008, Morrow County had three unemployed businesses but could not leverage the funds to build the infrastructure due to the financial distress of Morrow County which is a sister Siskiyou County. | Morrow County Board of Commissioners | 200 | 31 to 90 days | \$1,400,000 |
| Morrow | Mt. Gilead TR 76 Improvements | DOTD Project PID 2363 SR 61 Bridge Repair over I 71 is a planned longterm project for 2010-2011 which will require a major traffic signalization problem in this prime development area. However, a local developer proposes a joint investment to expand the left turn area and build the northern commercial development area. Currently, the Private Business has invested \$300,000 in constructing the base for a Commercial access road and storm water retention plans but needs funds to extend the left turn lanes and pave this road. This project is projected to stimulate this commercial area while increasing the attraction of business to the JOB READY Berrington Industrial Park with an increase of 600 jobs. Morrow County unemployment rate is one of the highest in the nation at 9.2% and the County has no leverage funds due to its fiscal crisis besides ODEFS Formula funds. | Morrow County Board of Commissioners | 600 | 91 to 180 days | \$350,000 |
| Morrow | Edison High Speed Rail Depot | This 34 mile stretch of road is a secondary access road for the Morrow County Business Park which is projected to create 600 jobs. As this Business park develops, TR 76 will be more heavily traveled by trucks. Thus, the Village would require improvements to this paved road like storm water improvements, widening of this and widening of road. This Business Park has the potential for 600 new jobs to be created for a County which has one of the highest rates of unemployment in the nation at 9.2% in December 2008. Morrow County is a sister Siskiyou County. As Passenger rail is developed from Cleveland to Columbus and Cincinnati, Edison is a prime site for a passenger boarding and debarcation stop SR 95, a major state highway, runs through Edison and Mt. Gilead which would allow for easy access to this Depot. This would bring economic development opportunities to Morrow County and provide up to 40 jobs. Morrow County has one of the highest unemployment rates in the nation at 9.2% in December 2008. | Morrow County Board of Commissioners | 40 | 181 days or more | \$1,200,000 |
| Morrow | SR 95 171 Safety and Improvement Project | Improve the Safety and Development along SR 95, reduce accidents, enhance the traffic flows the commercial and industrial areas and increase efficiency and access to Interstate 71 at Exit 151; Improve safety on the horizontal and vertical curves as well as sight distance at various Intersections. For over six months, joint sessions were held between the Morrow County and Morrow County Commissioners as well as public meetings to discuss this important project and development opportunity. Along this corridor, there are 8 major employers who depend on trucks to deliver or haul their goods. Improving this corridor will be vital to attracting and retaining jobs for the future in this area. This project begins in Morrow County at Franklin Township and runs through the SR 95/171 interchange area to the Fredericktown Industrial Park (SR 13, project length is 5.88 miles). | Morrow County Board of Commissioners | 1000 | 181 days or more | \$2,450,000 |
| Morrow | Village of Mt. Gilead Water Plant Control Upgrade | Currently the water plant is analog with very little automatic control. A new PLC and control system needs to be installed to better operate the water plant within the guidelines set by the ODEPA. A new system would eliminate relay logic currently in use at the plant. The project would create 20 to 25 jobs for about 10 to 12 months. | Village of Mount Gilead | 15 | 91 to 180 days | \$600,000 |
| Morrow | Morrow SR 95 /171 Interchange Sewer Improvements | Dan Rogers Village Administrator | Morrow County Development Office | 75 | 181 days or more | \$600,000 |
| Morrow | Third St Stormwater Improvements | 16500 linear feet of new sewer lines with lift station and force main. Existing WWTP in Chestonville will treat the waste water. Includes remediation private septic systems and alternative ODFR identified problems. This will directly impact the economic development of this interchange and Morrow County. This interchange at Exit 151 on I71 is identified by Morrow County as a Prime development spot and public sewer will bring this area to 325 Ready. | Village of Cardington | 10 | 0 to 30 days | \$200,000 |
| Morrow | CR 132 Sanitary Sewer | Extension of approximately 1900' of 24" storm drain on Third St. in Village of Cardington to address significant surface flooding around area residences. | Village of Cardington | 10 | 91 to 180 days | \$275,000 |
| Morrow | Phase IV Waterline Replacement | 3500' extension of sanitary sewer mains to residences and businesses on CR 132 near the Village of Cardington. Area has numerous failing septic systems that are polluting the Whetstone Creek (Ontario Watershed) and can be readily served by extension of gravity sanitary sewer main line to CR 132. | Village of Cardington | 10 | 91 to 180 days | \$750,000 |
| Morrow | MCSO - 2009 - Deputies | Replacement of 5000 feet of 1800's era waterline on N. Marion St., Williams, and Railroad St. | Morrow County Sheriff's Office | 8 | 0 to 30 days | \$240,000 |
| Morrow | MCSO Drug enforcement | Increase manpower levels for proper protection of citizen of Morrow County. | Morrow County Sheriff's Office | 5 | 0 to 30 days | \$450,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--------------------------------------|----------------|--------------------|---------------------------|
| Morrow | MCSO - Cruisers | 10 cruisers 6 new RV's emergency equipment for all The Morrow County Sheriff's Office is in dire need of new cruisers. Almost all have over 100,000 miles and many are around 150,000. We are regularly putting in \$300-\$500 per car to keep them running. We currently have around 6 deadlined because of no money to repair them. WE are hard pressed to have enough vehicles running for our officers to use. We also have a rural agricultural community with a road need for 4 wheel drives. during the winter months our county Highway Dept rarely plows snow between 6pm & 4am, making travel on the roads next to impossible without a 4 wheel. We currently have only two working 4wd vehicles with the most reliable one being a 1996 Lincoln Navigator (a drug seizure) with over 100,000 miles. | Morrow County Sheriff's Office | 0 | 31 to 90 days | \$417,000 |
| Morrow | MCSO - MDT's | 20 accounts for MDT's We have received lap top computers, mounts, and docking stations for in car computers through Homeland Security. This is part of a regional program in the Columbus/Franklin Co metro area to increase inter-agency communications. As part of the grant we must provide internet access for the computers. Currently we do not know how we are going to be able to fund this. Katerberg Project #1.1 - South Municipal Building Renovation (City of Katerberg Government Center) Decision of Project The present South Municipal Building here at the City of Katerberg was constructed in 1969 and has undergone only minor improvements in the last forty years. This project will substantially renovate the building using LEEDS methods and technology allowing the operation to become much more energy efficient and more efficient for operations for the next forty years. Proposed Budget, Income Sources and how monies will be spent The estimated budget is \$2,000,000 and will hopefully be funded with incentive funds. All monies will be spent on building renovation with a primary goal of optimal energy efficiency. Proposed partners, sponsors, and supporters Partners and supporters are primarily the citizens of the City of Katerberg. How jobs will be created as well as other community benefits Per the Government Accounting Office estimates approximately ninety-one (91) jobs will be created for a year as a result of the construction | Morrow County Sheriff's Office | 0 | 0 to 30 days | \$12,000 |

| Morrow | Wind Energy Project | HPM is currently making components for other Wind Turbine manufacturers. HPM has the opportunity to become the first fully integrated Wind turbine manufacturer in the state of Ohio. This project is to develop and build utility grade Wind turbines in Ohio for the power industry. The project is much more than 1,200 words but I hope this is clear of what we are trying to propose. HPM has been an OEM for 132 years and has all the knowledge and capabilities to develop and manufacture a large utility grade turbine. We just need the funding and equipment. HPM use to have 800 employees now we are under 100 due to the downturn in the automotive industry. I hope you can see the benefit Ohio having their own wind turbine manufacturer in Ohio. | HPM America, LLC | 500 | 0 to 30 days | \$6,000,000 |
| Morrow | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the high speed broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WIMAX technology will be able to push a strong enough signal to provide all these services. Once we are able to establish our first several sites, we will have the ability to use local county money, along with State and Federal monies to expand. | Infinite Wireless Solutions | 20 | 0 to 30 days | \$2,000,000 |
| Morrow | Morrow HPM Site #1 Brownfield Assessment Project | The former Hydraulic Press Machinery Company (HPM) Plant #1 in Mt. Gilead, Ohio operated between 1887 and 2002, with as many as 500 employees during peak operations. Shortly after discontinuation of operations in November 2002, HPM declared bankruptcy in January 2003. As a result, environmental impacts associated with historic manufacturing operation have not been completely addressed. The abandoned structures contain petroleum products and hazardous substances including deteriorating asbestos-containing materials, lead based paint, and equipment polychlorinated biphenyl (PCB) oils; however, the nature and extent of soil and ground water impacts have not been completely evaluated. Several parties have expressed interest in redeveloping the site for productive use if environmental liabilities associated with historic manufacturing operations are addressed. This site has access to a rail spur and is a prime development site for Morrow County. Therefore, the requested stimulus funds will be used for assessment of the nature and extent of the existing environmental impacts at the site. | Morrow County Development Office | 500 | 31 to 90 days | \$250,000 |
| Morrow | Morrow HPM Site #1 Brownfield Remediation Project | The former Hydraulic Press machinery Company (HPM) Plant #1 in Mt. Gilead, Ohio, operated between 1876 and 2002, with as many as 500 employees during peak operations. Shortly after discontinuation of operations in November 2002, HPM declared bankruptcy in January 2003. As a result, environmental impacts associated with historic manufacturing operations have not been completely addressed. The abandoned structures contain petroleum products and hazardous substances including deteriorating asbestos-containing materials, lead-based paint, and equipment polychlorinated biphenyl (PCB) oils. Historic operations have resulted in known contamination of soil and groundwater at the site; however, the nature and extent of soil and groundwater impacts have not been completely evaluated. Several parties have expressed interest in redeveloping the site for productive use if environmental liabilities associated with historic manufacturing operations are addressed. This is a prime development site for Morrow County as it has access to a rail spur. Therefore, the requested stimulus funds will be used for complete remediation of the site. Other subdivisions on the Village are experiencing localized flooding. This project will allow for storm drainage to be directed away from sanitary sewers which currently carry some of the flow. | Morrow County Development Office | 500 | 91 to 180 days | \$4,000,000 |
| Morrow | Storm Sewer improvements | Several of the other sanitary sewer have severe infiltration problems caused by poor joints and lateral taps. | Village of Mt. Gilead | 10 | 91 to 180 days | \$385,000 |
| Morrow | Sanitary Sewer Improvements Phase I | Several of the other sanitary sewer have severe infiltration problems caused by poor joints and lateral taps. | Village of Mt. Gilead | 10 | 91 to 180 days | \$345,000 |
| Morrow | Troy Township Road #4 North | The Troy Township Road #4 north is a 2 lane gravel road. The Troy Township Trustees of Morrow County would like to asphalt this road by adding 4 inches of aggregate base, applying a prime coat, installing a 400 cold mix surface, sealing and installing an aggregate base. Also the houses should be reconstructed the ditches for the entire road and replace culverts and manholes and seal the banks of the road. | Troy Township-Morrow County | 4 | 91 to 180 days | \$241,684 |
| Morrow | Troy Township Road #4 North | The Troy Township Road #4 North is currently a 2 lane gravel road. The Troy Township Trustees would like to pave one mile of this road by adding 4 inches of aggregate base, applying a prime coat, installing a 400 cold mix surface, sealing and installing an aggregate base, reconstruct the ditches, replacing culverts and manholes and seeding the road banks. | Troy Township-Morrow County | 4 | 91 to 180 days | \$241,684 |
| Morrow | Dynamic Services LLC | Install windmills for power to residential homes. We will own the windmills and deduct the cost from the power it provides. Example: if a windmill provides \$100.00 of power a month 25% will pay the property owner 25% will be held for maintenance and repair 25% will be applied to the installation cost until it is paid off then the property owner will take full possession and responsibility of windmill. 15% will be reinvested back into Dynamic Services LLC to allow this program to continue. 10% will be Co-ownership and profit. PROBLEM: county is in dire financial stress, difficulty coming up with cash match and upholding money for grants PROJECT: (in place) nothing victims of crime of their rights as crime victims, notification of all hearings in three courts, court accompaniment, assist with cops, stalking, domestic violence, sports and others, liaison with victims and prosecution, court personnel, dept of job and correction, law enforcement, help with victim impact statements, restitution, prep for grand jury and assist prosecutor in prep for trials, referral to other agencies when necessary STAFF: consist of 2 advocates, one being myself, director who is on hands advocate and does all administrative work CASELOAD: PER YEAR-victims 600 to 700, witnesses 1000 and up CRIMES: dom. violence, rape, all sexually oriented crimes against children and adults, murder, vehicular homicide/assault, identity theft, stalking, burglary, kidnap, etc. SUGGESTION: to help counties in financial stress, such as ours and may others, FOR THIS 1 YEAR only, waive the cash match, upfront funds | Construction Co. | 15 | 0 to 30 days | \$475,000 |
| Morrow | Serving victims of all crimes in Morrow County | PROBLEM: county is in dire financial stress, difficulty coming up with cash match and upholding money for grants PROJECT: (in place) nothing victims of crime of their rights as crime victims, notification of all hearings in three courts, court accompaniment, assist with cops, stalking, domestic violence, sports and others, liaison with victims and prosecution, court personnel, dept of job and correction, law enforcement, help with victim impact statements, restitution, prep for grand jury and assist prosecutor in prep for trials, referral to other agencies when necessary STAFF: consist of 2 advocates, one being myself, director who is on hands advocate and does all administrative work CASELOAD: PER YEAR-victims 600 to 700, witnesses 1000 and up CRIMES: dom. violence, rape, all sexually oriented crimes against children and adults, murder, vehicular homicide/assault, identity theft, stalking, burglary, kidnap, etc. SUGGESTION: to help counties in financial stress, such as ours and may others, FOR THIS 1 YEAR only, waive the cash match, upfront funds | Morrow County Victim Witness Program | 2 | 0 to 30 days | \$110,000 |
| Morrow | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WIMAX technology will be able to push a strong enough signal to provide all these services. | Morrow | Troy Township Road #4 North | Troy Township Road #4 North is currently a 2 lane gravel road. The Troy township Trustees would like to pave one mile of this road by adding 4 inches of aggregate base, applying a prime coat, installing a 4000 gallon surface water, sealing and installing an aggregate base, reconstructing the ditches, replacing culverts and matching and sealing the road banks. | Troy Township-Morrow County | 4 | 91 to 180 days | \$241,684 |
| Morrow | Personal Security for Morrow County | Our security program fulfills the objectives of the Stimulus Act for a provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to respond suspicious activity. Criminal control, child care, senior citizens, travel, rescue operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our devices. With our GPS trackers, location data will be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can set location boundaries and trigger notifications when exceeded. For personal safety a panic button can issue an alarm with location information to multiple chosen phone numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self powered units that continuously track location. | Nuleaf Ohio Limited | 1 | 31 to 90 days | \$77,700 |
| Morrow | Morrow County RPC Mobility Assist Initiative/Plan | This project would fund a Planning staff in Morrow County to manage studies concerning the transportation and mobility barriers and opportunities within the County to include Transit systems, Rail systems and transportation corridors. Morrow County is located just north of Columbus and within the METRO region as well as part of the Economic Development Region 4 area which is the designated future rail to the Marietta area. We are the north-south connector link between Columbus and Cleveland corridor and the east-west connector for Marion and Mt. Vernon. These corridors are vital to Ohio's logistics & distribution mobility as well as rail and transit systems. Morrow County is related to a backbone community for a 70% of its work force travel out of the County to work every day. We need to plan for the growth and development which is now equipping the County from both sides. The Villages of Castleton and Edison within Morrow County in the past housed major departing rail rail yards thru out the county. As this develops, Morrow County must be prepared to capitalize on this opportunity. | Morrow Board of County Commissioners | 4 | 0 to 30 days | \$225,000 |
| Morrow | Marketing Morrow Development | This project is designed to connect the Morrow County prime development sites and initiatives with opportunities within our region and nation. We would like to share our story and strengths by reimagining with our region's development advocates thru a membership to MORPC, reimagining our development website, completing a makeover of the Morrow County marketing pamphlet and information, designing a membership to MORPC, reimagining our voice for Morrow County development opportunities and creating or retaining 4 jobs in the Development Office. As Morrow County is in a fiscal crisis, the development Office must become self funded as we are not a mandated service, but provide the leadership, planning and support for community, industrial and Economic Development Projects in the County. | Morrow County Board of Commissioners | 4 | 0 to 30 days | \$125,000 |
| Morrow | Project for the betterment, and opportunity, for t | The use of funds would update existing structures, making the current location suitable for hiring 2 more workers, and increasing production by about 2 times current production. Increased production of cabinets, shelving, and furniture, would be sold to those individuals, and to families at a discounted price of 30%-40% if they need, or are below the federal poverty level. | Tipton and Tipton Woodworking | 3 | 0 to 30 days | \$75,000 |
| Morrow | Wireless Broadband for Morrow County | Our access system fulfills the objectives of the Stimulus Act for it provides broadband to un-served and underserved areas while employing hundreds in high paying permanent jobs. These funds promote the expansion of our existing wireless fiber network in Delaware to surrounding counties for people stuck in the digital divide. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the funds available to us, the underserved areas still exist today. Now the time is here to do something different. Rural America needs access today not the failed promises of the past. Our unique process for deployment utilizes the most effective wireless model available. Each dollar spent provides the most coverage per mile of fiber which allows for the most efficient use of funds and universal program even among the low income and the disadvantaged. The current administration should fund this project to provide access, to those left out. We want the plan proven not by promises but by actual deployment evident by our extensive network of fiber, advanced and cost effective WiMax technology available. | NexGenAccess | 17 | 0 to 30 days | \$1,700,000 |
| Morrow | Drip Irrigation Leach Field System for Flying Hors | Flying Horse Farms, a camp for children with serious illnesses, will provide services to over 2000 campers and family members a year beginning in 2010 at a facility outside of Mt. Cleland, OH. Children will attend this camp with support of volunteer nurses and staff in a LEED certified and LEED certified the camp will utilize a Drip Irrigation Leach Field System on its 200 acre, 24 building facility. The water from this system is recycled and distilled through a central sewage treatment system, providing 100% recycled water. The system may weake around existing trees and shrubs, areas that could not support any other type of effluent. The camp, thereby leveraging any stimulus dollars to be immediately doubled. The camp's \$20M facility is fully designed to be shovel ready. It has just begun construction on utilities and will ultimately employ 100, after generating work for over 400 during its development in the next 18 mos. \$8.2M has already been committed to this project through private monies. | Flying Horse Farms | 500 | 0 to 30 days | \$900,000 |
| Morrow | Health Center for Flying Horse Farms Project; a Ca | Flying Horse Farms, a camp for children with serious illnesses, will provide services to over 2000 campers and family members a year beginning in 2010 at a facility outside of Mt. Cleland, OH. Children will attend this camp through an outpatient partition from nurses and doctors. Aspiring to be "Green" and LEED certified, the camp will utilize Geothermal systems on its 200 acre, 24 building facility when completed. Geothermal energy is a type of renewable energy that encourages conservation of natural resources, is environmentally friendly, highly reliable and allows for increased sustainability. According to the EPA, these systems allow for substantial savings in heating and cooling costs compared to conventional systems. The camp founders will match 11% any dollars contributed to the camp, thereby leveraging any stimulus dollars to be immediately doubled. The camp's \$20M facility is fully designed to be shovel ready. It has just begun construction on utilities and will ultimately employ 100, after generating work for over 400 during its development in the next 18 mos. \$8.2M has already been committed to this project through private monies. | Flying Horse Farms | 500 | 91 to 180 days | \$1,500,000 |
| Morrow | Geothermal Systems for Flying Horse Farms Project; | Flying Horse Farms, a camp for children with serious illnesses, will provide services to over 2000 campers and family members a year beginning in 2010 at a facility outside of Mt. Cleland, OH. Children will attend this camp through an outpatient partition from nurses and doctors. Aspiring to be "Green" and LEED certified, the camp will utilize Geothermal systems on its 200 acre, 24 building facility when completed. Geothermal energy is a type of renewable energy that encourages conservation of natural resources, is environmentally friendly, highly reliable and allows for increased sustainability. According to the EPA, these systems allow for substantial savings in heating and cooling costs compared to conventional systems. The camp founders will match 11% any dollars contributed to the camp, thereby leveraging any stimulus dollars to be immediately doubled. The camp's \$20M facility is fully designed to be shovel ready. It has just begun construction on utilities and will ultimately employ 100, after generating work for over 400 during its development in the next 18 mos. \$8.2M has already been committed to this project through private monies. | Flying Horse Farms | 500 | 31 to 90 days | \$2,400,000 |
| Morrow | Hospice electronic charting, reporting and billing | By collaborating and matching stimulus money, our test separate, rural, non-profit, homecare hospices (one each in Morrow and Seneca Counties) could save costs, leverage \$10,000 of private money and be prepared to effectively and efficiently meet forthcoming federal mandates to complete all our patient charting, reporting and billing electronically. Stimulus money would make it possible for Community Hospice Care in Athens and Hospice of Morrow County in Mount Vernon to access a very limited window of opportunity we now have to purchase all start-up and on-going costs for this electronic project. Money is needed for most of our training and start-up costs for the web-based software we will use and for hardware (especially laptops for nurses and other field staff). This jobs in two counties would consequently be maintained because the two small non-profits will meet healthcare electronic standards and our employees will not be displaced by competitively larger, more resource rich hospitals that are based outside of our counties which are both impoverished and rural. Thank you for considering our request. | Hospice of Morrow County | 30 | 31 to 90 days | \$75,000 |
| Morrow | Stormwater Ph2-(NW Quadrant) | Replace a 60 or 600 storm system that allows the Village to flood due to it's inadequacy and age. The existing system was mapped, and the entire Village was analyzed by a Professional Engineer. The project was field surveyed, laid out on plan and profile sheets, sized, estimated, and then funding bill through. Design is 30% complete. The Village of Sparta is in fiscal emergency. | Village of Sparta | 7 | 31 to 90 days | \$270,000 |
| Morrow | Stormwater Ph1-(SE Quadrant) | Replace a 60 or 600 storm system that allows the Village to flood due to it's inadequacy and age. The existing system was mapped, and the entire Village was analyzed by a Professional Engineer. The project was field surveyed, laid out on plan and profile sheets, sized, estimated, and then funding bill through. Design is 30% complete. The Village of Sparta is in fiscal emergency. | Village of Sparta | 10 | 91 to 180 days | \$480,000 |
| Morrow | WWTP Repair | Repair, replace, and upgrade to a relatively new plant to fix deficiencies, no process changes are required. All facilities have been thoroughly inspected, and detailed lists and cost estimates have been made. The Village has been placed on financial emergency from the construction of the WWTP and all tasks are too expensive for the Village to handle. | Village of Sparta | 2 | 31 to 90 days | \$50,000 |
| Morrow | Sell our home | We recently moved for career reasons to the Stark County area. Due to the fact that we are unable to sell our home in Morrow county, we have not yet been able to buy a house in Stark County. This money would pay off our current mortgage, allow us to sell our home in current market value, and buy a home in this area. Our home will not sell for what we own it, but I believe it would sell for less. Selling for less than our mortgage amount would cause us to go into foreclosure, which would stop us from buying a home here. Buying a home here would help the local economy. We are being hurt by career decisions in home values. Our home was originally bought with a first loan. Please help our family. We have tried to do everything the right way, and we now feel we are getting left out. | Haines Family | 3 | 0 to 30 days | \$101,000 |
| Morrow | Sparta 2009 Storm Sewer Improvements | This project is SHovel READY. This project will provide for stormwater improvements for a small rural community. The engineering has been completed and the plans approved. The existing stormwater is not working either. It is broken and collapsed verified dry and collapsed pipes. This project would provide jobs for around 6 persons. The funds for construction are what is lacking to complete this project. This project would benefit an entire community in Morrow County, Ohio. This community is a low income community. | Village of Sparta | 6 | 0 to 30 days | \$400,000 |
| Morrow | Drop-out Prevention & Recovery | Jobs for Ohio's Graduates of North Central Ohio proposes to serve 80 Morrow County at-risk youth, ages 14-20, who have are in jeopardy of dropping out or have left the education system prior to attaining a high school diploma. The program will provide instruction of employability skills, self development skills, internship opportunities and postsecondary education opportunities. Instruction will focus upon skills including career exploration, job attainment, retention, basic math and reading, communication skills, leadership skills, independent living, teambuilding. Additionally, program will partner with Morrow County, OH, Northern and Mt. Cleland High Schools. This program specifies will be responsible for success of participants, including job development and placement, high school graduation, postsecondary education enrollment. Expected outcomes include a graduation rate of 60% for in-school youth and 50% among drop-outs, a full time employment rate of 60% and a positive outcome rate of 60%. Jobs for Ohio's Graduates of North Central Ohio has been successful at risk youth for the past 22 years in the state of Ohio and 13 years in Morrow County. We are in the design and prototype stages of bringing a 15 T. rough terrain crane to the market. Unveiling date is expected to be mid-2009. The crane will be a product of this type that exists particularly in the petro-chemical field of the New Orleans/Houston area plus road building projects across the US. In the past, when a similar crane was built by a major construction equipment manufacturer, there were 19,000 crane built, with 70% going to the LA, TX, area. This manufacturer left Ohio several years ago, and we have the opportunity to employ many of those workers who lost their jobs, when that manufacturer moved out. | Jobs for Ohio's Graduates - North Central | 40 | 0 to 30 days | \$100,000 |
| Morrow | Crane Project | Another point to make is that the company that we have formed a joint venture with to build these cranes, was in talks with the Chinese to build the cranes offshore. Our expertise in manufacturing and first-hand knowledge of the product lead them to form a joint venture with us. The monies would be used to purchase the building we are presently in, preparing the way for expansion as needed, buying new machinery and tooling, all with the goal to build at least 25 cranes per year and more as the demand and capabilities increase. | Huber Construction Equipment, div. of Enterprise F | 20 | 31 to 90 days | \$700,000 |
| Morrow | Wind Energy Innovation | This project will allow for the purchase of the land needed/equipment to construct 3 wind turbines, engineering fees, implementation and tie in to the main national grid for the power generated from the new cable of industrial turbines. This program will also include monitoring all weather conditions around the wind turbines for the purpose of allowing for future expansion. These wind turbines will be expected to have an output of 10 (kilowatt-hours) or more and will be a lower wind speed. There is a nearby highway, which would allow the components for this as well as creating economic growth in this area. This project could allow our county, one of the poorest in the nation to create a massive amount of clean renewable energy as well as stimulate our economy. | HazeCorp | 100 | 0 to 30 days | \$6,000,000 |
| Morrow | Smart Grid Communications | The proposed project consists of the construction of a fiber optic and wireless infrastructure network to support a Smart Grid initiative in a nine-county area. A multitude of benefits will result from this project, including but not limited to: increased efficiencies of energy utilization and transport, economic development enhancements, educational facilities, and enhanced interconnectivity of regional public safety forces. Smart Grid technology will result in lower consumer power costs and help drive construction of new power generation facilities. Economic benefits include access to both public and private markets and individuals and the potential for future economic development growth. The project is backed by a 70-year-old, member-owned, not-for-profit organization committed to community development. The project will positively impact portions of Morrow, Delaware, Knox, Licking, Richland, Crawford, Franklin, Marion, Miami, and Lucas counties. The project will include villages in the project area. Consolidated Electric's subsidiary BCE is an internet service provider with the "in house" expertise to engineer and complete a project of this scope. | Consolidated Electric Cooperative | 1500 | 0 to 30 days | \$5,000,000 |
| Morrow | Consolidated Electric Energy Conservation Program | The proposed grant will enable Consolidated Electric Cooperative to hire, train and equip several Energy Conservation Technicians. By using specialized equipment including infrared cameras, voltmeters, blower door testers, and digital thermometers these technicians will perform detailed analysis on residential, commercial and industrial facilities. After determining the carbon footprint of the facility and identifying inefficiencies of energy utilization specialized software will provide cost-effective and environmentally sound energy conservation solutions to correct these deficiencies. Expected savings in energy consumption will average as high as 25% per facility and the cumulative affects will be significant resulting in significant reductions in future demand forecasts and delaying construction of additional energy delivery and generation facilities. Reduced energy consumption will result in positive economic and environmental impacts in an immediate and a profound degree. Energy conservation is far more beneficial from both an environmental and economic standpoint than construction of new generation facilities. | Consolidated Electric Cooperative | 10 | 0 to 30 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Morrow | Light the Fields with Green Energy Efficient Light | Lighting four baseball/softball fields, as well as soccer fields with the possibility of lighting parking lots, park area and walking path. We have entertained close to 10,000 children in 2008 with their families and expect to have that go up an additional 6000 children plus their families this year. Many local businesses have asked for additional income from visitors from all over Ohio and surrounding states. This will continue to bring more revenue into the community and Morrow County and hopefully more business. We are in a bidding process to current business as well. Lighting will allow us to continue games and tournaments in the evening hours sporting more income for all. Our park is all about the children and enriching their lives. We take great pride in what we have accomplished thus far and even more pride in the dreams that we hope will become a reality. | Highland Community Park | 2 | 31 to 90 days | \$750,000 |
| Morrow | Morrow Cty Court House Complex Security System | Currently under renovations, the Morrow County Court House Complex buildings are in need of a complete modernization to its security system to include new black & white/color cameras, infrared cameras and night cameras with IP capability as well as a FOB security system for exterior doors/windows as well as interior doors. Buildings to be secured would be the Administrative building at Viator Place, the County's registered Court House building and Prosecutor's building. All three buildings are within the same city block and were attacked by the Murray v. Violence split of 2007 which caused the Court to relocate for three weeks. | Morrow County Board of Commissioners | 100 | 31 to 90 days | 15000 |
| Morrow | Transitional Housing For Victims of Domestic Violence | Transitional housing for women and their children who are victims of domestic violence to provide housing, daily living skills, schooling, employment skills, counseling, and parenting skills to enable them to become independent, confident residents in the community. This would be up to six months program for each woman. The \$350,000.00 would cover a two year program. Our goal is to lease a property for the first two year program and House 4 women, with or without children, for each six months in the two years. Computer based reservation system for South East Area Transit | A Center for Children And Families | 15 | 31 to 90 days | 350,000.00 |
| Muskingum | Dist 5, PID 85820, MUS Computer reservation system | Purchase 6 modified minivans for South East Area Transit | Ohio Department of Transportation | 1 | 31 to 90 days | \$50,000 |

| Muskingum | Dist 5, PID 85817, MUS AC service machine | Communication system upgrade for South East Area Transit | Ohio Department of Transportation | 1 | 31 to 90 days | \$5,000 |
| Muskingum | Dist 5, PID 85819, MUS Communication system upgrade | Facility lighting and waste of furnace in the the Muskingum garage for South East Area Transit | Ohio Department of Transportation | 1 | 31 to 90 days | \$29,400 |
| Muskingum | Dist 5, PID 85814, MUS Lighting & waste oil furnace | Packing paving for South East Area Transit | Ohio Department of Transportation | 1 | 31 to 90 days | \$30,000 |
| Muskingum | Dist 5, PID 85818, MUS Parking paving | Down town terminal rehabilitation/renovation for South East Area Transit | Ohio Department of Transportation | 1 | 31 to 90 days | \$45,000 |
| Muskingum | Dist 5, PID 85821, MUS Terminal rehab/renovation | Allow for the integration of billing information from private physician office to electronic clinical medical record to improve diagnostic studies in hospital and cardiology office to decrease utilization of diagnostic tests. To allow for clinical management of elderly patients and decrease cost. | Cardiology Associates of SEO | 40 | 31 to 90 days | \$150,000 |
| Muskingum | information infrastructure | Remodel of existing kitchen that was part of the old building that was built onto. The kitchen has not been renovated for approx 25 years or more. This kitchen is part of a space that can be used as an emergency shelter. The outcome is for the kitchen to be a permanent health and building codes and one energy efficient apartment. | Newton Township Division of Fire | 5 | 31 to 90 days | \$75,000 |
| Muskingum | Kitchen Renovation | The main class room in the building is used for multiple adult education courses in firefighting and fire medical services. The class room is also used for public education in fire, fire prevention, and juvenile fire prevention. The \$100,000.00 needs to have fire audio visual equipment upgraded, new furniture, new smart board technology or equivalent as well as storage cabinets built for the teaching supplies. The \$100,000.00 is to make the class room a better teaching environment so that more firefighters and fire's can be trained to serve their communities. Currently the Newton Township Fire Station is used as a disaster shelter but does not meet the criteria as there is no back up power. | Newton Township Division of Fire | 3 | 31 to 90 days | \$15,000 |
| Muskingum | Class Room Renovation | Our project is simple install a back up generator that will supply power to the 43,000 square foot fire station and community area. Renovate restrooms and showers on site. This shelter will serve southern licking county, Southwest Muskingum County and Northern Perry county. We have a very unique building which as a full size commercial kitchen, gymnasium and cafeteria. Our station was formally an elementary school. We have received a grant of 5,000.00 from a local utility but are far from the total needed. This project would not only allow the fire department to continue operations uninterrupted in the event of a power outage but also provide a safe and convient shelter to a rural community and its neighbors. | Newton Township Fire | 0 | 0 to 30 days | \$95,000 |
| Muskingum | Emergency Shelter Renovations | Applicant requests \$164,000 in financial aid for the purchase of the below listed equipment. This equipment is necessary in the primary duties of first responders to protect lives and property, and enforce the criminal statutes of the State of Ohio. Equipment will also assist in the identification and prosecution of suspects. 1) Digital in-car video cameras (12 @ \$4,000 = \$48,000). 2) Camcorder digital camera (2 @ \$100 = \$200). 3) Emergency vehicle warning light (2 @ \$2,500 = \$5,000). 4) Body armor for patrol officers, narcotics officers and investigators (90 @ \$45 = \$4,050). 5) Taser guns for correctional officer, which will assist in officer safety and lower liability issues (2 @ \$1,225 = \$2,450). Replace deck and Plant 3 bridges within Mus City | Muskingum County Sheriff's Office | 0 | 0 to 30 days | \$164,000 |
| Muskingum | First Responder Equipment | Replace deck and Plant 3 bridges within Mus City | Ohio Department of Transportation | 129.4 | 31 to 90 days | \$4,510,000 |
| Muskingum | Dist 5, PID 85536, MUS IR 70 22.00/24.56 | Recurfacing with related work on Interstate Route 70 east of Zanesville in Muskingum County. Mill 2' and fill 1-1/4' Inter and 1-1/2' surface; include work on ramps where appropriate/repair as necessary, include millfill of shoulders | Deputy Director of Production | 129.4 | 31 to 90 days | \$4,510,000 |
| Muskingum | Dist 5, PID 85536, MUS IR 70 22.00/24.56 | To install poured cement walls at seven rockfall locations to prevent falling rocks from blocking the drainage ditches or ending up on the roadway. | Ohio Department of Transportation | 78.9 | 31 to 90 days | \$2,748,029 |
| Muskingum | Dist 5, PID 83106, MUS IR 70 13.19 | The project will fund the Family and Children First office which includes service coordination for at risk children and families- respite and out of home placement costs for short term treatment. Family and Children First provides the mechanism for grant project location as well as community wide prioritization for programs serving children and families. School based Care Teams that consist of multi-disciplinary teams will be a part of this proposal. Dozens of jobs will be retained and hundreds of families will receive service. | Ohio Department of Transportation | 31.6 | 31 to 90 days | \$1,100,220 |
| Muskingum | Dist 5, PID 85407, D05 Rockfalls | Single Chip Seal with a 1-1/2" overlay on portions of SR 376 in Muskingum County and SR 313 in Muskingum and Guernsey Counties Replacement of failing 1999 cruiser. Replacement of cruiser would allow current repair costs to be funneled to other projects. This cost includes all accessories such as lights, back seat viewers, transfer of radio equipment from current cruiser to new one, police graphics including installation and a mobile data terminal including mounting hardware. We would use this funding to replace 30 office staff and detective desktop computers as well as 36 patrol division in-car laptops. This project would greatly increase officer effectiveness with our background checks and reporting, and it would also expedite detective duties related to their investigations. Replacing patrol division laptops would aid in our attempt to increase officer safety. Not only are they a hard-to-replace resource for a deputy who is being called to a crime scene, they also expedite patrol investigations, and provide GPS locating capabilities in the event that a deputy requires assistance. As our department has lost two deputies in the past 18 months, this project is close to our hearts. Within 2 miles of one another, Genesis provides health care to 250,000 citizens in six counties within southeast Ohio - Muskingum, Morgan, Perry, Coshocton, Guernsey, and Noble. | PRO-Muskingum Families and Children First | 10 | 0 to 30 days | \$950,000 |
| Muskingum | Muskingum County Family and Children First Council | PROJECT The consolidation of all Genesis' acute care services into a single expanded Medical Center: 1. Create 730,000 sqft Genesis Medical Center by constructing a new 385,000 sqft addition onto the existing 345,000 sqft Bethesda Hospital and renovating 50% of Bethesda. 2. Replace the existing Good Samaritan Hospital, built in 1954 and functionally obsolete. 3. Eliminate duplication of many clinical services: two emergency departments, two inpatient and outpatient surgical departments, two imaging departments, two full-service dietary departments, etc. 4. Reduce operating cost from duplicate facilities by \$8.6 million a year. 5. Reduce disparity of health care delivery and access for Appalachian residents by bringing state-of-the-art health care services to the region. Applicant requests \$375,000 for the purchase of 5 new dogs for our K-9 Unit. Requested amount includes purchase of dogs, training for each dog and handling officer, vehicles including dog cages for each unit, annual medical services, food and supplies. Four of the dogs will be added to our Sully patrol division, and one dog will work with our narcotics unit. The expansion of our K-9 Unit will provide enhanced safety to our officers and the community. The dogs would also be an extremely beneficial tool for first responders in the apprehension of suspects or in the event of a disaster. | Ohio Department of Transportation | 61.4 | 31 to 90 days | \$2,139,362 |
| Muskingum | Dist 5, PID 21477, MUS SR 376 00.00 | Applicant requests \$375,000 for the purchase of 5 new dogs for our K-9 Unit. Requested amount includes purchase of dogs, training for each dog and handling officer, vehicles including dog cages for each unit, annual medical services, food and supplies. Four of the dogs will be added to our Sully patrol division, and one dog will work with our narcotics unit. The expansion of our K-9 Unit will provide enhanced safety to our officers and the community. The dogs would also be an extremely beneficial tool for first responders in the apprehension of suspects or in the event of a disaster. | South Zanesville Police Department | 1 | 0 to 30 days | \$46,000 |

Requested amount includes purchase of dogs, training for each dog and handling officer, vehicles including dog cages for each unit, annual medical services, food and supplies. Four of the dogs will be added to our Sully patrol division, and one dog will work with our narcotics unit. The expansion of our K-9 Unit will provide enhanced safety to our officers and the community. The dogs would also be an extremely beneficial tool for first responders in the apprehension of suspects or in the event of a disaster. | Muskingum County Sheriff's Office | 0 | 0 to 30 days | \$102,000 |
| Muskingum | Computer Replacement Project | Applicant requests \$375,000 for the purchase of 5 new dogs for our K-9 Unit. Requested amount includes purchase of dogs, training for each dog and handling officer, vehicles including dog cages for each unit, annual medical services, food and supplies. Four of the dogs will be added to our Sully patrol division, and one dog will work with our narcotics unit. The expansion of our K-9 Unit will provide enhanced safety to our officers and the community. The dogs would also be an extremely beneficial tool for first responders in the apprehension of suspects or in the event of a disaster. | Genesis HealthCare System | 1,000 | 31 to 90 days | \$206,000.00 |
| Muskingum | Genesis HealthCare System Regional Medical Center | Purchase of two mobile data terminals/laptop computers and in-car cameras to replace outdated equipment being used. This will allow for better communications between our dispatch center at the Sheriff Office and our officers on the street. The cameras will allow for better documentation of officers apprehensions of suspects committing crimes within our jurisdiction. | Muskingum County Sheriff's Office | 0 | 0 to 30 days | \$375,000 |
| Muskingum | K-9 Unit Dogs | Purchase of two mobile data terminals/laptop computers and in-car cameras to replace outdated equipment being used. This will allow for better communications between our dispatch center at the Sheriff Office and our officers on the street. The cameras will allow for better documentation of officers apprehensions of suspects committing crimes within our jurisdiction. | South Zanesville Police Department | 1 | 0 to 30 days | \$15,000 |
| Muskingum | Equipment upgrade/replacement | | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Muskingum | Drug Unit and SRT Equipment | Applicant is requesting \$97,000.00 for the purchase of two 4x4 SUV's, one pick up truck, and one Dodge Charger. All fully equipped with a police package to be used in surveillance as well as narcotic and crime scene investigations. Miscellaneous equipment costs for these vehicles approximately \$2,000 for hidden strobe lights or visor flags. We are also requesting funds for two non-destructive testing devices. These devices are used to secretly investigate dangerous locations for explosives and narcotics at the cost of \$400 each, and a Palm FINDER Electronic Dust/Liter Kit to be used in crime scene investigations for \$750. We are requesting \$85,000 for the purchase of a SRTS System to be used in the identification of stolen property and crime scene investigations. This system would limit our dependency on other departments which provide these services for a fee. Lastly, we are requesting \$4500 for the purchase of miscellaneous uniform items and equipment for our Special Response Team. These items include boots, trauma kits, three gas masks, and ammunition to properly equip our team and other team the tools necessary to protect themselves and others without them. In addition, we are requesting funds to purchase a lift station. In-line clarifier Mechanical bar screen and grit removal system Flow equalization tank | Muskingum County Sheriff's Office | 0 | 0 to 30 days | \$188,000 |
| Muskingum | Wastewater Treatment Plant Improvements | The above items replace worn out equipment as mandated by DEPA. The plans have been submitted to DEPA and the PTI has been issued. The Village has applied for State Issue 2 funds three different times and has not been funded. | Village of Frazesburg | 50 | 31 to 90 days | \$650,000 |
| Muskingum | State Street Bridge Rehab | This request is to finish the rehab on the State Street Bridge. Construction of the project was started in 2007 with a grant of \$608,400 through the ODOT municipal bridge program and \$381,370 in local funding. During construction it was discovered that the condition of the bridge was much worse than anticipated thereby increasing the costs of the project. This resulted in ODOT contributing \$21.16 million in additional STP funding and the City borrowing \$579,486 in an attempt to complete the project. These funds were expended to get the bridge back open to traffic in 2008. However, the concrete patching, mortar work, and sealing on the vertical and underside of the bridge was not able to be completed with the available funding. This request for \$506,000 will complete the project as was originally intended. | City of Zanesville | 50 | 91 to 180 days | \$506,000 |
| Muskingum | FIRE HOUSE UPDATES | THE HARRISON TWP FIRE HOUSE WAS CONSTRUCTED IN 1954. THE BLD IS IN DIRE NEED OF MANY PLUMBING/ELECTRICAL UPDATES. OUR BLD IS NOT HANDICAPPED ACCESSIBLE. THE RESTROOMS NEED TO BE REMODELED. THE BATHROOM STALLS NEED TO BE REMODELED FOR WHEEL CHAIRS. THE SHOWERS NEED TO BE UPDATED. THE GARAGE AREA NEEDS A VENTILATION SYSTEM INSTALLED. THE ELECTRICAL SERVICE NEEDS TO BE BROUGHT UP TO CURRENT CODE. THE INTERIOR WALLS NEED PAINTED. ALSO THE FIRE DEPT NEEDS A STATIONARY CASCADE SYSTEM INSTALLED. THIS WILL BE USED TO REFILL OUR PORTABLE SOBA BOTTLES. IF ALL THESE PROJECTS WERE FUNDED WE WOULD HAVE A HANDICAPPED ACCESSIBLE FACILITY. OUR BLD'S ELECTRICAL SYSTEM WOULD BE BROUGHT TO CURRENT CODE. WE WOULD NOT HAVE TO TRAVEL TO A NEIGHBORING FIRE DEPT TO FILL OUR SOBA BOTTLES. AND OUR GARAGE WOULD BE PROPERLY VENTILATED. | HARRISON TWP VOL FIRE DEPT | 4 | 0 to 30 days | \$100,000 |
| Muskingum | CSO R-13 Sewer | This project will eliminate CSO (Combined Sewer Overflows) R-13 by separating the sanitary and storm sewers. The project has been mandated by the Ohio EPA to be a part of the City of Zanesville's Long Term Control Plan. The project consists of the separation of approximately 2 miles of 8 inch sanitary sewer and appurtenances. The project will employ up to 25 people directly and indirectly. Construction of the project will take approximately 4 months. The estimated project cost is \$385,000. | City of Zanesville | 25 | 91 to 180 days | \$385,000 |
| Muskingum | Trinway Water System | The project will fund the installation of 8,000 ft. of 12" and 17,000 ft. of 6 and 8 inch waterline to a residential area north of Dresden consisting of approximately 105 residences currently without centralized potable water. The line will also serve an area targeted for industrial development. The project could be offered for public bidding within 30 days of funding approval. | Village of Dresden | 40 | 0 to 30 days | \$1,200,000 |
| Muskingum | Tileston Avenue Drainage Project | This project will provide improved drainage and flood protection for a low to moderate income area of the City of Zanesville. The project will consist of approximately 2000 feet of 8 inch storm sewer and appurtenances. The project will employ up to 25 people directly and indirectly. Construction of the project will take approximately 5 months. The estimated project cost is \$260,000. | City of Zanesville | 25 | 91 to 180 days | \$260,000 |
| Muskingum | CSO R-17 & CSO R-19 Sewer Separation Project | This project will eliminate CSO's (Combined Sewer Overflows) R-17 and R-19 by separating the sanitary and storm sewers. The project has been mandated by the Ohio EPA to be a part of the City of Zanesville's Long Term Control Plan. The project consists of approximately 1000 feet of 8 inch sanitary sewer and appurtenances. The project will employ up to 25 people directly and indirectly. Construction of the project will take approximately 3 months. The estimated project cost is \$227,000. | City of Zanesville | 25 | 91 to 180 days | \$227,000 |
| Muskingum | Deputy New Hires | This project would hire three new deputies for our office. In 2008 and 2009 our staff lost three deputies due to retirement. Because of budget cuts, these offices were not replaced. This project would bring staffing levels back to 2008 levels. The estimated figure includes salary and benefits for three deputies over a three year period. | Muskingum County Sheriff's Office | 3 | 0 to 30 days | \$500,000 |
| Muskingum | CSO R-21 High Water Protection Project | This project will provide protection of CSO (Combined Sewer Overflow) R-21 from impacts of high water levels of the Muskingum River. The project has been mandated by the Ohio EPA to be a part of the City of Zanesville's Long Term Control Plan. The project consists of the installation of a barrier curtain R-21. The project will employ up to 25 people directly and indirectly. Construction of the project will take approximately 2 months. The estimated project cost is \$30,000. | City of Zanesville | 25 | 31 to 90 days | \$30,000 |
| Muskingum | family and community engagement partnerships | Identify and expand current partnerships between school and community organizations in Muskingum County that provide ongoing prevention, intervention, treatment services for children. Currently we serve 5 districts and provide direct intervention services in 10 schools. We need to expand to Zanesville City Schools and add 1 Care Team at the high school. Mental health and TANF funding have been cut so significantly that the community cannot sustain the initiative. The \$200,000 will support training 3 full time and 1 part time staff, \$20,000 for school based mental health services directly to children in Care Team schools. This will train 3 mental health positions out due to budget reductions. It will also support \$60,000 in after school support to provide youth with additional resources, support, and services learning and physical fitness. Each of the 6 districts would receive \$10,000 to help defray transportation and supervision costs in up to 12 after school programs. \$10,000 will support diversion and probation services provided by Muskingum Co. Juvenile Court. \$10,000 to Muskingum Co. Sheriff's office to expand School Resource Officer after school support. | Care Team Collaborative | 6 | 181 days or more | \$400,000 |
| Muskingum | Brownfield Remediation | The City requests 1.9 million for environmental analysis (phase 1 & 2) and purchase of a five acre parcel including the demolition of the existing facilities. The parcel adjoins the property of the city wastewater treatment plant which also serves large portions of Muskingum County. Any future expansion of the wastewater treatment plant is not feasible without acquiring said property. The project includes a battery factory, then converted into a waste manufacturing facility. The appraised value of the property is \$1,000,000. The clean up is anticipated to cost \$900,000 including construction of environmental assessment and demolition of the existing facilities. | City of Zanesville | 100 | 31 to 90 days | \$1,900,000 |
| Muskingum | Local Child Protection from Internet Predators | These funds will be used partially to off set the cost of hiring a trained IT Investigator. As internet crimes are on the rise in our area, it would be beneficial for our department to have the resource of an individual to work solely on these cases. We will also be using a portion of these funds for the purchase of equipment necessary to perform these duties such as basic office equipment, particularly computer hard drives. It is our hope this equipment decrease these crimes in our area with the implementation of an Investigator and the proper equipment. | Muskingum County Sheriff's Office | 1 | 0 to 30 days | \$10,000 |
| Muskingum | CSO R-14 Sewer Separation Project | This project will eliminate CSO (Combined Sewer Overflows) R-14 by separating the sanitary and storm sewers. The project has been mandated by the Ohio EPA to be a part of the City of Zanesville's Long Term Control Plan. The project consists of the separation of approximately 2 miles of combined sewer. The project will employ up to 50 people directly and indirectly. Construction of the project will take approximately 4 months. The estimated project cost is \$570,000. | City of Zanesville | 50 | 91 to 180 days | \$5,700,000 |
| Muskingum | Officer Retention Program | Due to budget cuts for our village, we had to lay off one full time officer (effective last month) drastically leaving our village without immediate police coverage and balance on the local Sheriff's Office to pick up the slack. This money would allow us to put this officer back to work, increasing the police coverage of the village for the next three years. | South Zanesville Police Department | 1 | 0 to 30 days | \$181,000 |
| Muskingum | CSO R-14 Sewer Separation Project | This project will eliminate CSO (Combined Sewer Overflows) R-14 by separating the sanitary and storm sewers. The project has been mandated by the Ohio EPA to be a part of the City of Zanesville's Long Term Control Plan. The project consists of the separation of approximately 2 miles of combined sewer. The project will employ up to 50 people directly and indirectly. Construction of the project will take approximately 9 months. The estimated project cost is \$5,700,000. | City of Zanesville | 50 | 91 to 180 days | \$5,700,000 |
| Muskingum | Secondary Power Wastewater Treatment Plant | This project would provide onsite standby power to energize the wastewater treatment plant. Currently the city is being provided two electrical services from two separate power substations. Therefore we are being billed as having two electrical services. This project would replace one of the electrical services with onsite standby power. The project will employ up to 50 people directly and indirectly. Construction of the project will take approximately 2 months. The estimated Project cost is \$750,000. | City of Zanesville | 50 | 91 to 180 days | \$750,000 |
| Muskingum | Wastewater Plant Electrical Upgrade for Digestors | The purpose of this project is to upgrade the electrical facilities for the digestors at the wastewater treatment plant. The current electrical facilities do not meet code nor are they explosion proof. | City of Zanesville | 50 | 91 to 180 days | \$160,000 |
| Muskingum | Southeast Ohio Regional Health Information Technol | Cambridge have formed the Southeast Ohio Health Alliance. This Alliance provides an organizational structure that allows these hospitals to collaborate on numerous initiatives, including a Regional Health Information Technology System. Research has validated the use of Health Information Technology in supporting the delivery of safe, high-quality, and cost effective patient care. Genesis has completed all necessary "pre-work". The System is ready for immediate implementation, pending funding. OUTCOMES 1.Avoidance of medical errors - paper records contribute in up to 98,000 deaths annually 2.Avoidance of health care waste - \$100B a year nationally 3.Acceleration of health knowledge diffusion among practitioners 4.Reduction in the disparity of health care access for Appalachia 5.Engagement of consumer involvement in health management as patients access to their own health information 6.Embracing of health data privacy and protection 7.Promotion of public health and preparedness through identification of public health trends and issues | Genesis HealthCare System | 50 | 31 to 90 days | \$48,500,000 |
| Muskingum | Facility Renovation | This project will allow the Muskingum County Board of Mental Retardation and Developmental Disabilities to enhance and expand services for individuals with developmental disabilities in our county. The project includes the renovation of two facilities to accommodate our growing senior population and more appropriate office spaces for case managers who coordinate the services for our program. The project will employ approximately 125 persons with disabilities and 40 staff who provide an array of services, both direct and indirect. Over the past four years, our program has lost almost \$1,000,000 in annual operating funds so the stimulus funding would bring major relief for services to a vulnerable population. | Muskingum County Board of Mental Retardation and D | 40 | 0 to 30 days | \$400,000 |
| Muskingum | Olde Falls Road Area Sanitary Sewer | 17,398 LF of new sewer line #61 manholes, 3 pump stations, 115 new customers will be connected to Muskingum County's sewer system. The Muskingum County Health Department has documented failed septic systems and potential health risks in this area. | Muskingum County | 25 | 31 to 90 days | \$500,000 |
| Muskingum | Pine Street Resurfacing | This project involves asphalt concrete resurfacing and associated work for Pine Street for an approximate project length of 2 miles. The city has assigned one mile of the project to be constructed using STP funds and estimated to cost \$255,000 with a local match of \$51,000. We are seeking for funding for the local match of \$51,000 as well as an additional \$255,000 to complete the remaining mile of the project. The project will employ up to 30 people directly and indirectly. Construction of the project will take approximately two months. The total estimated project cost is \$310,000. | City of Zanesville | 30 | 91 to 180 days | \$306,000 |
| Muskingum | Arterial & Collector Street Resurfacing | This project would involve the resurfacing and associated work for four major city streets. All of the city streets are classified as collector or arterial. The street names, lengths, and associated costs are as follows: Dryden Road - 5400 ft - \$360,000, Parkway Road - 6200 ft - \$390,000, Dresden Road - 5600 ft - \$270,000, Ridge Avenue - 5500 ft - \$270,000. The project will employ up to 60 people both directly and indirectly. Construction of the project is expected to take approximately 6 months. The estimated project cost is \$1,350,000. | City of Zanesville | 60 | 91 to 180 days | \$1,100,000 |
| Muskingum | New Vehicles Project | We would like to purchase 30 brand new vehicles at the cost of \$23,000 each. Due to county budget constraints, our department has not been granted any funds for the purchase of vehicles for the last four out of five years. Instead, we have been offered minimal assistance through our local court system in order to maintain our vehicles. During this time, we have been purchasing used vehicles from the Ohio State Bar Administration. These vehicles are in less than satisfactory condition with 100,000 plus miles on each. We hope to provide our patrol deputies with new vehicles not only for their own safety but also to provide them with the proper tools to better protect members of our community. | Muskingum County Sheriff's Office | 0 | 0 to 30 days | \$690,000 |
| Muskingum | Violence Against Women Grant | Applicant seeks \$25,000 to be used in a collaborative effort between the county prosecutor and county sheriff to train first responders who assist victims of crime. The first responders will learn evidence and photo documentation in needed to assist in the successful prosecution of offenders. The first responder will receive training in victim rights and the role of response in aiding the victim through the criminal justice system. This project would also assist in the implementation of a law enforcement effort to work our supervised visitation program where victims may encounter the abusive partner during child visitation. | Muskingum County Sheriff's Office | 0 | 0 to 30 days | \$25,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Muskingum | Dunzweiler Drive Sanitary Sewer Project | 7,142 LF of new sewer line, 36 manholes, 180 LF of 8" service laterals, 1 Sumpster pump station, will connect 56 customers to Muskingum County's sewer system. Many septic systems are currently failing in this area. | Muskingum County | 25 | 31 to 90 days | \$500,000 |
| Muskingum | Sonora Sanitary Sewer | 4,726 LF of new sewer line 1 1/2 station, 22 manholes, 447 LF of forceman sewer 3 individual booster pumps, 501 LF of pressurized sewer, below grade 750 LF of dewatering 56 new customers will be added to Muskingum County sewer as a result of this project. This area has documented health risks due to failing septic tanks according to the Muskingum County Health Department. The area is 90% low income. | Muskingum County | 25 | 31 to 90 days | \$500,000 |
| Muskingum | Coopermill Road Sewer Project | 8,640 LF of new sanitary sewer line 600 LF of new forceman sewer line 1 1/2 station, 7,045 LF of pavement replacement, The Ohio EPA has issued "Findings and Orders" against Muskingum County for this project area due to failing septic tanks that are causing infiltration into a nearby stream. | Muskingum County | 25 | 91 to 180 days | \$2,100,000 |
| Muskingum | MCBI Regional Incubator for Entrepreneurs Building | Muskingum County currently owns an old Junior High school building, that if renovated, would be the ideal location for MCBI's Regional Incubator. This work will include: new HVAC system, electrical work, plumbing, roof replacement and miscellaneous renovations. MCBI would house one County agency in this building and also offer lease space for new or existing small businesses who wish to work in incubation Ohio. A community kitchen will also be established at this location. The main focus will be to attract light manufacturing, technology and "green" jobs. MCBI is partnering with Small Business Development Centers of Ohio, Vianowich School at Ohio University, Tech Growth Ohio, and the East Central Ohio Tech Angel Fund. | Muskingum County Business Incubator | 100 | 91 to 180 days | \$1,400,000 |
| Muskingum | Licking Road Water Extension | 7,300 LF of new waterline 48 fire hydrants 120 LF of Railroad crossing Approximately 20 residents will be serviced by this new waterline. The road runs along the Licking River and there are many poorly producing wells. | Muskingum County | 10 | 91 to 180 days | \$200,000 |
| Muskingum | Clay Pike Waterline Extension | 12 fire hydrants 40 new customers will be served by this waterline extension. Many residents in this area treat water to their homes as a result of poorly producing wells. The overall quality of life will be greatly improved by access to public water. | Muskingum County | 20 | 91 to 180 days | \$500,000 |
| Muskingum | West End Water Project | This project will extend water service to a large portion of the west end of Muskingum County. Townships impacted will be Falls and Hopewell. Two small villages in this area, Mt. Sterling and Gratiot, currently have water systems of their own. These systems are antiquated and are not sufficient to meet the need of providing for future growth in this area. | Muskingum County | 30 | 181 days or more | \$1,500,000 |
| Muskingum | Water Treatment Plant | Much of this area runs along US Route 40 and ends at the 170 interchange at Detroit. There is definitely potential for economic development in this area if public utilities were available. The amount of jobs that could eventually be created as a result of extending this waterline would be hard to calculate. | City of Zanesville | 500 | 91 to 180 days | \$9,000,000 |
| Muskingum | Water Treatment Plant | This Project consists of the construction of a new 10 MGD manganese and iron removal water treatment plant. This plant is critical to the economic and population growth of Zanesville and surrounding areas as the existing plant is near capacity and abnormally expensive. Construction of the WTP will involve hundreds of vendors and employ up to 500 people directly and indirectly in the construction of the plant. Construction will take approximately one and one half years. The estimated project cost is \$9,000,000. | City of Zanesville | 500 | 91 to 180 days | \$9,000,000 |
| Muskingum | Wayne Avenue Waterline | This project will replace a deficient water main and provide improved protection along Wayne Avenue. The project will include the replacement of 7200 feet of 8 inch water main and appurtenances. The project will create up to 30 people directly and indirectly. Construction of the project will take approximately 3 months. The estimated project cost is \$1,000,000. | City of Zanesville | 30 | 91 to 180 days | \$1,000,000 |
| Muskingum | Water Treatment Plant Backwash Waste Line | This project is a separate component of the new water treatment plant. It is approximately 3500 feet long, from the water treatment plant to a conversion manhole. The backwash line will also be utilized as the outlet for the Eastpointe Business Park Sanitary Expansion Project. Therefore, it not only creates jobs for its construction and material suppliers but also is vital for the dual job creator projects of the Zanesville Water Treatment Plant and the Eastpointe Business Park Expansion projects submitted by the Zanesville-Muskingum County Port Authority. Construction will take approximately 3 months. The estimated project cost is \$328,000. | City of Zanesville | 30 | 31 to 90 days | \$328,000 |
| Muskingum | 2009 City Wide Street Overlays | This project consists of 18 miles of road resurfacing and 5400 feet of waterline replacement. The project would create a minimum of 30 jobs associated with construction contracts to perform the work. The city has received \$816,000 in a OPWC State loan, and would require the matching amount of \$89,000. | City of Zanesville | 30 | 91 to 180 days | \$591,000 |
| Muskingum | Street Lighting Energy Efficiency Improvements | This project will provide for the installation of Varmact Lightmaster units on all remaining City Street Lighting. The city previously installed one of the units in 2006 on a 32 light loop of street lights and realized an energy savings of 25%. The City is currently working with a \$20,000 grant from OACMA to install 7 more units serving 238 additional street lights as a pilot project. The manufacturer is considering locating a facility in Muskingum County. | City of Zanesville | 75 | 31 to 90 days | \$200,000 |
| Muskingum | MUS-CR706 | replace deficient bridge on North Dresden Rd/Main St, CR 706. | Muskingum County, Ohio | 50 | 91 to 180 days | \$2,000,000 |
| Muskingum | MUS-CR32 | Bridge painting and steel rehabilitation on 800 ft plus structure spanning the Muskingum River near Pinks, Ohio. | Muskingum County, Ohio | 50 | 91 to 180 days | \$3,500,000 |
| Muskingum | MUS-CR696 | Replace deficient bridge on Main Street, CR 696 in Roseville, OH. | Muskingum County, Ohio | 50 | 181 days or more | \$2,500,000 |
| Muskingum | MUS-CR6 | replace deficient bridge on Oak River Road, CR 6 with new structure constructed to federal standards. | Muskingum County, Ohio | 50 | 181 days or more | \$5,000,000 |
| Muskingum | MUS-CR16 | Road Resurfacing and related improvements for Radner Road, CR 616 | Muskingum County, Ohio | 50 | 0 to 30 days | \$3,500,000 |
| Muskingum | MUS-CR3 | Road Resurfacing and pavement rehabilitation on North River Rd West and Richvale Roads, CR 3. Project will upgrade minor arterial and major collector roadways. | Muskingum County, Ohio | 40 | 0 to 30 days | \$1,750,000 |
| Muskingum | MUS-CR2 | Asphalt Resurfacing and related work on Dresden Road, CR 2. Project serves a minor arterial and major collector roadway. | Muskingum County, Ohio | 40 | 0 to 30 days | \$1,200,000 |
| Muskingum | Eastpointe Sanitary Project | This project consists of the construction and installation of 2 lift stations, approximately 11,650 LF of gravity sanitary sewer and approximately 13,650 LF of sanitary storm main. The project will increase the capacity of the Eastpointe Business Park and allow for the construction and completion of the 200 acres Job Ready Site which is estimated to create over 2000 jobs. Eastpointe currently employs 1300 people and Avon, Inc is currently adding an additional 500 jobs with an estimated payroll of \$14 M. The estimated cost of this project is 2,347,369.00. | Zanesville-Muskingum County Port Authority | 1800 | 31 to 90 days | \$2,347,369 |
| Muskingum | State Route 93 Turn Lane | This project consists of the construction of a turn lane on SR 93 that will access a new entrance into the Eastpointe Business Park as part of the Master Plan for the expansion of the Job Ready Site that is estimated to create over 2,000 jobs when completed and certified with the worst construction and addition of the 500 employees of Avon, Inc. The estimated cost of this project is 1,244,967.85. | Zanesville-Muskingum County Port Authority | 2000 | 31 to 90 days | \$1,244,968 |
| Muskingum | JRS Rail Spur Extension | This project consists of the construction and installation of 11,131.51 LF of rail to service the Job Ready Site which is estimated to add over 2,000 jobs when certified and completed in December 2009. The estimated cost of the project is \$1,092,058.00 and we have secured \$800,000.00 of funding from EDA. The funding needed to complete the project would be \$1,792,058.00. | Zanesville-Muskingum County Port Authority | 2000 | 31 to 90 days | \$1,792,058 |
| Muskingum | MUS-CR723 | Asphalt Resurfacing and related safety improvements for North Pomeroy Rd, CR 723, a major collector roadway connecting Zanesville to northern Muskingum County. | Muskingum County, Ohio | 50 | 0 to 30 days | \$4,000,000 |
| Muskingum | Cargo Protection Products | New product line being introduced in trucking, rail and distribution markets. Currently, there are about 15-20 different products in various stages of development. We anticipate making these outlays over the 2009 - 2010 period. It is a "green", environmentally sound product that replaces packaging transport items of corrugate packaging, wood pallets, plywood, shrink wrap and foam. It has a very low carbon footprint. There is a cash payback to the customer of less than one year. Our plastic Payloids products can be reused continuously and never end up in a landfill like corrugate and wood. Even if the Payloids product were to be obsoleted, it could be ground up and reused in other plastic products. Benefits are to the State of Ohio, USA and The Fabri-Form Company. It ensures the retention of 170 employees and will result in the job creation of 50 employees. | The Fabri-Form Company | 220 | 0 to 30 days | \$3,200,000 |
| Muskingum | Cargo Protection Products | \$3.2 million in funding is sought for R&D/Tooling (\$1.2 million), Machinery & Equipment (\$1.6 million), Marketing Expenses (\$0.3 million) and Training (\$0.1 million). New product line being introduced in trucking, rail and distribution markets. Currently, there are about 15-20 different products in various stages of development. We anticipate making these outlays over the 2009 - 2010 period. | Muskingum | Project LTFD Improvements | Our Fire Dept. is growing and we are needing to expand the building to larger than three bays to keep our trucks in. We currently have a 1993 Pierce engine that is our first cut vehicle on structure fires. We are needing to purchase a new engine but have no money to pay for it. The money from this stimulus would build on an addition of approximately 75h x 50R. This would give us three more bays totaling 6. I don't know how many jobs this would create on the construction side but we are strictly volunteer and receiving this money would help keep taxes down in this township. Any help on this project would be greatly appreciated. Thank You. | Licking Twp. EMS & Fire Dept. Inc | 10 | 91 to 180 days | \$200,000 |
| Muskingum | A SMALL WAY TO INCREASE JOBS | Hand holding Origami decorations by Senior Citizens to sell on Ebay and Amazon to assist in small increases in income for those that can not meet their monthly expenses. With very little overhead, several of our local Senior Citizens can be taught to fold the delightful Chinese Origami and produce a lovely web site that will attract women who like the idea of decorating their homes. I will find a bookkeeper to assure all costs are covered, and money is equily divided. Hopefully more than 3 will be involved, but a little business like this will take time. | A Little Job for Senior Citizens | 3 | 91 to 180 days | \$8,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|---------------------------------|--------------------|---------------------------|
| Muskingum | wilson heating | buy new trucks and vans and pay for a new shop thank you, date | dale wilson heating | 3 | 0 to 30 days | \$250,000 |
| Muskingum | Neighborhood Rehab | To repair and improve rental property owned in muskingum county. Continue to provide quality housing to current and new tenants. Provide jobs and purchase materials in the county. | Limited Liability Company | 10 | 91 to 180 days | \$10,000 |
| Muskingum | New Fire Station | 100 X 130 building for the purpose of housing firefighting and emergency medical equipment. To include all cost of construction ie: electrical, water, sewer, concrete. Station will serve a two county area with mutual side agreements in a third. Currently we employ 1 person during the day with the hope of having 2 next year, depending on the growth of the area when Ohio SR 16 opens up to 9 depending on the tax base. The project will create several temporary jobs immediately after funding during the construction. | Frazesburg Fire Department | 50 | 91 to 180 days | \$750,000 |
| Muskingum | Muskingum Valley Hydroelectric Project | To develop the full Hydroelectric potential of the 10 dams on the Muskingum River. The resulting Hydroelectric output for the Muskingum Valley Hydroelectric Project would provide enough power at maximum capacity (40MW) to power over 40,000 residential units or 4000 units of small business. Or, at minimum output, enough power could be produced to power all of the homes in Zanesville, Mt. Carmel/Lebanon, Stockport, Beverly, Lowell, Devola and Marietta. As you know one of our Country's greatest needs is to develop Green renewable energy to free us from our dependence upon foreign energy. At present an even greater need exists to create new jobs for Ohio citizens. Development and implementation of the Muskingum Valley Hydroelectric Project would provide hundreds of jobs in the engineering, manufacturing, construction and operation sectors of Southwestern Ohio for years. This project would also harness a clean source of power that has been overlooked for at least a half a century. | Muskingum Valley Hydroelectric Project | 1000 | 181 days or more | \$225,000,000 |
| Muskingum | 44 yr old township swimming pool overhaul | Completely rebuild pool with stainless steel lining, overhaul water pump/in-line, remodel existing co, recession/transfer rooms, replace outdoor playground equipment | Harrison Township Trustee | 15 | 31 to 90 days | \$185,000 |
| Muskingum | Affiliate Client Program | The Muskingum County Business Incubator has an Affiliate Client Program that works with 25 companies. Some of these businesses are start-ups and others are 25 - 100 years old. The companies represent over 100 jobs that could be effected if the companies should fail and the opportunities for growth in jobs in the next two years should be approximately 20 - 25 new jobs. The program presents monthly workshops, monthly bonding sessions and mentoring boards. The MCBIC would like to take this program to 2 additional counties that do not have a formal business development program and can not afford an incubator setting. All nine counties are in some of the hardest hit areas of Appalachia with over 50% unemployment. This program is already developed and ready to duplicate in the suggested counties of Coshocton, Harrison, Jefferson, Noble, Courtois, Belmont, Monroe, and Morgan. At the MCBIC we work with the Small Business Development Center, the Vocational School, Taylorstown Ohio, the ESP program and the East Central Ohio Tech Angel Fund. In addition we receive program support from the Zane State College, Ohio University and Muskingum College. | Muskingum County Business Incubator | 400 | 0 to 30 days | \$150,000 |
| Muskingum | International Microbial Library | The creation of an international microbial research library using rapid microbiological identification systems standardized to test and measure ability to be used for pharma, health, university, industrial, governmental, etc. In addition, within 3 yrs of opening, expecting sales to reach \$10 million within a month, without outside funding. In addition, working with Waste Management to create a great source of 1000000 lbs of waste and solar panels. After three years, plan to expand and test and compare using other types of rapid systems (various microbiological). Will also work with grants, funding, and research laboratory to develop new drugs (etc.) as well as, train and send into the world of rapid scientific endeavors. Also, use a standardized testing and identification process to help more quickly identify (E. coli, salmon, B1, and FDI) regulators to help strengthen pharmaceutical industries. Plan to create persons (personnel) in pharma, healthcare (for work) workers, and provide paid for medical coverage for employees. Possible, plan use any excess profit to create grants, and develop. | JRML, Inc. | 150+ (within first three years) | 0 to 30 days | \$18,000,000 |
| Muskingum | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed optics, current data projects these areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV. TV services to the packages within a year. New WMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Muskingum | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed optics, current data projects these areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV. TV services to the packages within a year. New WMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Muskingum | ForeverDads Sustainment Project | ForeverDads - The Letter for Father's is a business success service to engage community resources, create opportunities for career and career management, adulthood and thereby empower fathers. These funds would provide for the continued development of the organization's fiscal stability while creating self-sustaining entrepreneurial development. Specifically these funds will provide for retraining/employment of 20 fathers who are poverty stricken, barrier ridden and/or system rejected, who will build employable skill sets and disciplines through accountability coaching and mentorship. These funds will further allow the experienced staffing and allow for additional new staffing and development that will provide services that will total a maximum of 9 existing personnel and 1 new full time staff member. Other use of these funds will be for additional program materials not covered under other funding presently or within the next fiscal year received or allocated for and will provide for some facility expenditures to deliver these services. | ForeverDads | 30 | 31 to 90 days | \$323,000 |
| Muskingum | Vocational Resturant | Professional chefs will learn the necessary non-entrepreneurial skills in order to carry out their duties. The facility will also allow non-employees to participate in the day training for a fee. The facility will then convert into a full dinner service restaurant in the evening where the non-chefs will put their skills to use. This will reinforce their training from the professional chefs as well as showcase their skills to the community. The facility will employ the non-chefs for a maximum of 1 year. After that they will have a foundation of culinary skills they can use for longer term employment at other restaurants or continue their culinary education. The Ohio Restaurant Association estimates that the food service industry will employ 13.5 million people by 2014. With the popularity of cooking shows and the proliferation of high end restaurants, my hope is that my facility will prove future chefs for a rewarding career in the culinary arts. | To be determined | 200 | 91 to 180 days | \$500,000 |
| Muskingum | Kingswood Lift Station Replacement | This lift station is over 60 years old and in need of replacement. The entire lift station would be replaced in its current location. | City of Celina | 100 | 91 to 180 days | \$425,000 |
| Muskingum | Squad House Renovations | Our squad membership is growing and we are in need of expanding our existing building. Our expansion is vital to the growing community. The money from this stimulus would build an addition of approximately 75 x 40 ft. This would allow us to expand our squad bay and permit us for more EMT vehicles, supply and educational equipment storage, and an Education Office. This would permit us to better serve the educational needs of our department and other surrounding departments. The area we serve in our community has numerous poverty and applicable areas. We are strictly a volunteer organization and receiving this money would help keep taxes down within our community. | Harrison Township EMS | 6 | 91 to 180 days | \$200,000 |
| Muskingum | Township chip seal | Chip seal of 6.3 miles of Township Roads. The Township was not able to perform any chip sealing last year due to the engine in the Township's chip sealing truck blowing up. This was an unexpected expense of close to \$20,000.00 for the Township and this probably the chip seal project. It is crucial the Township be able to perform the chip sealing in 2009 so as to not lose the conditions of the Township Roads any more. | Salem Township - Muskingum County | 1 | 31 to 90 days | \$50,000 |
| Muskingum | Tucker Rd. resurfacing | 1 mile of 17' shoulders. This is the only shoulder Rd. in the Township. It is in need of resurfacing since it has not been resurfaced for a few years. Last year a water line was run down the Rd. which has also contributed to the needed resurfacing. | Salem Township - Muskingum County | 1 | 91 to 180 days | \$120,000 |
| Muskingum | Road infrastructure | We have 15 miles of road in desperate need of a chip and seal process to preserve the infrastructure that is there. We chip and seal in the past but due to lack of past funding we are going to lose the b road bed we have if we don't get it preserved soon. | Harrison Township Trustee | 10 | 91 to 180 days | \$120,000 |
| Muskingum | Salt/Equipment building | Construct a 40x60 by 80ft. four sided equipment building and a 300x60 by 40x60 three sided building for storage of salt and orders for winter road treatment. | Harrison Township Trustee | 6 | 91 to 180 days | \$75,000 |
| Muskingum | Resident fire safety and awareness for our seniors | New some of our equipment has to set outside and our salt and orders inside to help preserve and work more efficiently. Educate our residents on our fire safety and awareness on the evacuation and safety by training each resident and also replacing all smoke alarms with battery back up where they are presently on 110 volt hard wired. | Zanesville Metropolitan Housing Authority | 19 | 91 to 180 days | \$110,000 |
| Muskingum | System Wide GIS Inventory | Rural electric system wide GIS inventory and mapping project covering over 2,800 miles of electric distribution line and about 16,700 member meter locations. Project will result in a computer map/model to pinpoint maintenance and outage activity to improve service delivery and reduce maintenance costs. Will utilize ESRI software and existing county wide GIS as a baseline where available. Percentage of our system is each affected county - Muskingum 40%, Guernsey 40%, Tuscarawas 10%, Morgan 4%, Noble 4%, parts of Harrison, Licking, Perry, Coshocton 2%. Costs will include about \$60,000 in hardware and software costs, and about \$440,000 in field inventory and integration. | Guernsey Muskingum Electric Cooperative, Inc | 5 | 0 to 30 days | \$440,000 |
| Muskingum | Main Records Computer | New Main Frame Computer for Police Department Records plus 20 new desktop computers for existing work stations. Project is needed to replace existing computers that are obsolete and make the department very inefficient. | Zanesville Police Department | 5 | 91 to 180 days | \$120,000 |
| Muskingum | NECK AND GUIDE RINGS CELLS | Equipment used for the production of glass containers. Several components comprise a set of mould equipment. The components we are able to machine are called moulds, borons, tanks and bottles. However, two significant parts of a set of mould equipment we do not produce are called neck rings and guide rings. At this time we lack the funds to purchase the necessary machinery to produce these components. We are not at the moment in the position to borrow the funds. To meet our customer's needs we are forced to send this business to a sister company in Croatia. This sub-contracting results in no profit to us, plus it presents delivery delays that would not exist if we machined the components. The result of being this business in Ohio and the US as opposed to outsourcing to Croatia is, 7 new jobs at \$19,000 or \$277,000.00 annual wages. Yearly our revenues to federal, state and local estimated at \$95,000.00. Annual taxable sales revenue of \$3,450,000.00. | EMCO USA, LLC | 7 | 31 to 90 days | \$760,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------------------|---------------------------|
| Muskingum | Village of Roseville, New Well & Water Treatment P | Project will consist of the installation of a new potable water well, new water line, access road, valve vault, and miscellaneous appurtenances. Two existing wells that are contaminated will also be plugged and abandoned. | Village of Roseville- ME Companies, Inc. | 15 | 91 to 180 days | \$300,000 |
| Muskingum | Zanesville Swing-Bridge Replacement | Upgrades to the existing water treatment plant are needed to improve operation and performance. Upgrades will include repairs to existing equipment and structures as well as installation of new equipment. | Ohio Central Railroad | 10 | 91 to 180 days | \$980,000 |
| Muskingum | Village of Frazeysburg Pool Repairs | Replacement of an antiquated and safety-risk operation of a railroad swing-bridge over a canal which enables watercraft to utilize the canal. Railroad line is vital to the movement of Ohio coal and support of local glass making and recycling industries. Use of existing structure failing to return to secure position for full traffic risks continued operation of most efficient rail route for freight loaded above and would result in circumspect of loading with more fuel consumed and emissions produced. | Village of Frazeysburg | 10 | 0 to 30 days | \$95,600 |
| Muskingum | Digital Interagency Radios | Repair of cracks in the pool, and resurfacing/painting of the pool. Replacement of handrail on diving board and replacement of fencing surrounding the pool and the kiddie pool as required by health department. The fencing and handrail replacements are being required by the health department. The Village of Frazeysburg is in no better position to complete the required repair. Also, the pool is in dire need of cracks and surface repairs in order to keep it open for the Village and surrounding area residents (majority are at or below the poverty level). The expected outcome of receiving Federal Stimulus Money would be the continued operation of the Village Pool for years to come, providing a venue for healthy lifestyles for the residents. Without the pool, there would be no other location close by for residents to enjoy aquatic recreation. Please help our Village keep the pool open for the residents! | Zanesville Police Department | 0 | 91 to 180 days | \$100,000 |
| Muskingum | Interagency Polygraph Examiner | New Digital Converse Radios and related handheld and vehicle radios to permit easy communication with other departments in the region in case of natural disaster or terrorist threat. | Zanesville Police Department | 1 | 181 days or more | \$111,000 |
| Muskingum | Police Vehicles | Due to budgetary cuts the State of Ohio has eliminated a Polygraph Examiner from this region of the state which creates extreme hardship on law enforcement agencies in the region. This program would allow the hiring of a police officer and then provide the equipment and training needed to establish a polygraph office at the Zanesville Police Department so that area LE Agencies could be provided with a low cost or free polygraph service. | Zanesville Police Department | 5 | 181 days or more | \$490,000 |
| Muskingum | Trinway to Zanesville Line Upgrade | This project, when approved, would purchase and equip 8 medium police cruisers, 2 evidence technician vehicles and 7 unmarked detective vehicles. The new vehicle radios would be digital modern technology that would permit interagency communication during times of natural disaster or terrorist threat. | Ohio Central Railroad | 15 | 91 to 180 days | \$3,500,000 |
| Muskingum | Interdisciplinary STEAM (Science, Technology, Engi | Approx. 15 miles of jointed, light weight rail with continuous welded rail, tie replacement and surfacing. Improvements will significantly increase safety, train speeds and service capacity of rail line which supports the Ohio coal and electric utility industry, steel, recycling and glass producing industry. | The John & Annie Glenn Historic Site | 50 | 31 to 90 days | \$12,000,000 |
| Muskingum | SEAT Capitalized Maintenance | Development of Educational Exploration Center dedicated to interdisciplinary approaches to the teaching and learning of science, technology, engineering, arts, humanities and mathematics. 2 Stages. 1. Develop interdisciplinary approaches to STEAM including faculty staff training, curricular development, and exploring shared governance. The interdisciplinary approach will then drive conceptual plans and tenders for innovative facilities to support this teaching and learning approach. 2. Construction of facilities estimated to include smart classrooms and flexible space configured for multiple uses such as an auditorium, construction, and other dynamic learning areas. | Ohio Department of Transportation | 6 | 0 to 30 days | \$277,324 |
| Muskingum | MUS-93-4.69 | Features a collaborative approach including P-12 schools, higher education, business, government entities, museum, education, and other partners and communities. Expected outcomes include: local and Appalachian regional programming, preparation of learners and teachers for 21st century world of learning and work, innovative and creative learners resulting from exposure to an array of content areas in the context of high quality educational approach. | Muskingum County | 1,000 | 181 days or more | \$65,200,000 |
| Muskingum | Stimulus Fund | 2009 Capitalized Maintenance The 5.15 mi project will relocate SR 93 two miles east of Zanesville, Ohio. It will connect SR 93 and US 170 to US 171 corridor east of Zanesville without requiring traffic to reconfigure existing US 225R 93 through South Zanesville and Zanesville. The City of Zanesville Historically has a very high crash rate per 1,000 population, in part because all state routes in Muskingum County are using SR 93, pass through central Zanesville. The project will improve regional mobility in the area, improve traffic safety in Zanesville, and create employment opportunities within the corridor. | United Way of Muskingum, Perry, and Morgan Counties Muskingum Valley Chapter American Red Cross | 0 15 | 0 to 30 days 91 to 180 days | \$50,000 \$500,000 |
| Muskingum | New Building Fund | This project will directly connect southern Muskingum County and northern Perry County to 170. One of ODOT's major routes interstate corridor. The project will carry significant percentage of truck traffic which presently uses Zanesville streets. The road will be a Super 2 Highway, 2 lanes both on 4-lane Right of Way and for future expansion. It includes cross road adjustments at important county roads. The project is presently funded for design (Stage 1 plans 50% complete) and this request will provide the funding for right of way acquisition and construction. | NTEK Auto Services, LLC | 3 | 31 to 90 days | \$25,000 |
| Muskingum | Investment Opportunity | These funds will be used to feed the hungry and provide shelter for the homeless. | Carl Rittberger Sr., Inc. | 27 | 0 to 30 days | \$220,000 |
| Muskingum | Smokehouse upgrade | With the construction of new building, better able to serve the residents of the counties we serve. Muskingum, Perry and Morgan. Money to be used to advance/replace operators and building infrastructure Smokehouse upgrade project funding necessary to make and repair 27 600 sq ft and around Muskingum County in the State of Ohio, for a 99 year old business which is female owned. Will allow expansion of current capabilities and additionally reduce carbon emissions from processing facility. | JRMIL, Inc. | 150 | 0 to 30 days | \$18,000,000 |
| Muskingum | International Microbial Library | Binary to be used for pharma, health university, industrial, food, government, etc. Within 3 yrs of opening, expecting sales to reach at least 1 million dollars a month revenue, without accounting for future expansion. In addition, working with Waste Management to create a green source of power from landfill waste and solar panels. After three years, plan to expand and test and compare using other types of rapid systems (viruses, geoscientists). Will work to aid universities with grants, funding, and research laboratory to develop new drugs (etc.); as well as, train new students into the world of rapid scientific endeavors. Also, use a standardized testing and identification process to help more widely bring together the ICH (Japan, EU, and USA) regulators to help strengthen pharmaceutical industries. Plan to create pensions/pension-like for employees, decrease (at work) for workers, and provide paid-in-full medical coverage for employees. If possible, plan use any excess profit to offer scientific grants, and develop NE drugs. | Advanced Satellite Installations, LLC | 75 | 31 to 90 days | \$250,000 |
| Muskingum | Techs / Call Center | Binary to be used for pharma, health university, industrial, food, government, etc. Within 3 yrs of opening, expecting sales to reach at least 1 million dollars a month revenue, without accounting for future expansion. In addition, working with Waste Management to create a green source of power from landfill waste and solar panels. After three years, plan to expand and test and compare using other types of rapid systems (viruses, geoscientists). Will work to aid universities with grants, funding, and research laboratory to develop new drugs (etc.); as well as, train new students into the world of rapid scientific endeavors. Also, use a standardized testing and identification process to help more widely bring together the ICH (Japan, EU, and USA) regulators to help strengthen pharmaceutical industries. Plan to create pensions/pension-like for employees, decrease (at work) for workers, and provide paid-in-full medical coverage for employees. If possible, plan use any excess profit to offer scientific grants, and develop NE drugs. | Real Estate Maintenance & Management | 6 | 0 to 30 days | \$375,000 |
| Muskingum | Housing Correction Program | We are a Satellite TV Installation Company that uses 1099 contractors to do installs. These technicians make on the average of \$1250 to \$1750 per week. Experienced technicians are able to make even more. We will also have to have a local centralized call center that will employ 15 to 20 employees. Our operations is based here in Ohio and covers a multiple state area. We are based in a area where the Longberger Company is located and there are many available potential employees that need a job in this area. We are not new to this business and are currently located in Cincinnati and Canton Ohio. It is a job opportunity that someone with no experience can learn but we don't have the funds to train these employees and assist them with the start up tools that are required. | City of Zanesville | 25 | 91 to 180 days | \$385,000 |
| Muskingum | CSO R-13 Sewer Separation Project | What is nice about this industry is that it is not affected by the economy. If people can't afford to do things outside the home they stay home and watch TV. This is why our business is a good field in these times. | City of Zanesville | 25 | 31 to 90 days | \$30,000 |
| Muskingum | CSO R-21 High Water Protection | Expand Home Inspection, Maintenance & Property Preservation company along with purchasing 50+ foreclosed homes, rehabbing them and giving buyers opportunities to purchase on Lease Option and Land Contracts, giving back home ownership. | City of Zanesville | 50 | 91 to 180 days | \$5,700,000 |
| Muskingum | CSO R-14 Sewer Separation Project | This will be a 5 year project This project will eliminate CSO (Combined Sewer Overflows) R-13 by separating the sanitary and storm sewers. The project has been mandated by the Ohio EPA to be a part of the City of Zanesville's Long Term Control Plan. The project consists of approximately 2600 feet of 8 inch sanitary sewer and appurtenances. The project will employ up to 25 people directly and indirectly. Construction of the project will take approximately 4 months. The estimated project cost is \$385,000. | City of Zanesville | 10 | 31 to 90 days | \$579,496 |
| Muskingum | State Street Bridge CO | This project will provide protection of CSO (Combined Sewer Overflows) R-21 from impacts of high water levels of the Muskingum River. The project has been mandated by the Ohio EPA to be a part of the City of Zanesville's Long Term Control Plan. The project consists of the installation of a backflow control device near the outlet of R-21. The project will employ up to 25 people directly and indirectly. Construction of the project will take approximately 2 months. The estimated project cost is \$30,000. | City of Zanesville | 10 | 31 to 90 days | \$579,496 |
| Muskingum | City Jail HVAC | This project will eliminate CSO (Combined Sewer Overflows) R-14 by separating the sanitary and storm sewers. The project has been mandated by the Ohio EPA to be a part of the City of Zanesville's Long Term Control Plan. The project consists of the separation of approximately 2 miles of combined sewers. The project will employ up to 50 people directly and indirectly. Construction of the project will take approximately 9 months. The estimated project cost is \$5,700,000. | City of Zanesville | 35 | 91 to 180 days | \$408,000 |
| Muskingum | Meter replacement | This request is to cover the cost of the change orders on the State Street Bridge. Construction of the project was started in 2007 with a grant of \$988,400 through the ODOT municipal bridge program and \$361,570 in local funding. During construction it was discovered that the southside of the bridge was much more than anticipated thereby increasing the costs of the project. This resulted in ODOT contributing \$221,160 in additional STIP funding and the City borrowing \$579,496 in an attempt to complete the project. These funds are expended to get the bridge back open to traffic in 2008. However, the concrete parging, motor work, and sealing on the vertical and underside of the bridge was not able to be completed with the available funding. This request for \$579,496 will cover the estimated total costs of the change orders to get the bridge back open to traffic. | Maysville Regional Water District | 12 | 181 days or more | \$1,000,000 |
| Muskingum | Foxfire Drive | The Zanesville City Jail was constructed in 1994. The facility houses 22 employees and has a maximum capacity of 66 inmates. The HVAC system is well beyond its useful life and in dire need of replacement. The system capacity is over 80 ton (860,000 BTUs), requiring replacement of 20 40-ton air handlers. This system allows new facilities R-22 refrigerant and has expended multiple loads over the last 5 years. Complete system replacement cost is estimated at \$408,000. Shipping in-mates to other facilities should the HVAC fail is not only costly but may also not be possible due to lack of space. | Maysville Regional Water District | 16 | 31 to 90 days | \$1,85,000 |
| Muskingum | Thompson Run Road with water tower | Replace existing 6" steel meters with radio read meters. Install approximately 7500 linear feet of 6 inch water main. This would service 34 rural residents of Newton Township and provide better fire protection to this area. Install approximately 1,000 linear feet of 8 and 10 inch water mains and install a 300,000 gallon water tower to service rural homes in Springfield Township. This would also allow Maysville Water to loop certain areas of the distribution to eliminate a detention system due to water line breaks and provide more pressure to higher elevations throughout the district. | Maysville Regional Water District | 16 | 91 to 180 days | \$1,408,000 |
| Muskingum | Water Meter and System Replacement | The purchase and installation of 1100 new remote water meters, a laptop computer to read the meters, a hand held scanners to read the meters, software to drive the readings from the remote readers, and training. This will allow the Village the ability to better service our customers by finding water leaks, replacing meters that no longer work, and ensuring accurate billings. recommendations from Ohio EPA and the Ohio Department of Natural Resources Division of Water. The three components to the project are: 1. Repair the raw water reservoir dam to comply with Army Corp. of Engineers requirements - Engineers estimate \$650,000 2. Replace the reservoir raw water pump station - Engineers estimate \$150,000. 3. Install backup power for the water treatment plant - Estimated cost \$60,000 | Corporation (Village) of South Zanesville | 6 | 91 to 180 days | \$200,000 |
| Muskingum | New Concord Water System Hazard Mitigation and Imp | The Ohio Department of Natural Resources Division of Water has ordered the village to make repairs to the dam at the village's 60 million gallon raw water storage reservoir. This is the main raw water storage facility for the areas only public water system. Ohio EPA has also recommended replacement of the raw water pumps. More efficient pumps would conserve energy and water. Ohio EPA has also ordered the village to install a backup power source at the Water Treatment Plant. The Project will start construction within six months of funding approval. The emergency generator would be purchased within 90 days. | Village of New Concord | 200 | 91 to 180 days | \$860,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Muskingum | Tileston Avenue Drainage Project | This project will provide improved drainage and flood protection for a low to moderate income area of the City of Zanesville. The project will consist of approximately 200 feet of 24 inch storm sewer and appurtenances. The project will employ up to 25 people directly and indirectly. Construction of the project will take approximately 5 months. The estimated project cost is \$260,000. | City of Zanesville | 25 | 91 to 180 days | \$260,000 |
| Muskingum | MS4 Compliance Funding | This project will help the City of Zanesville meet the requirements of the EPA Storm Water Phase II rules for MS4s. One of the six minimum control measures required is Illicit Discharge Detection and Elimination. This requirement involves mapping and inventory of storm sewers, drainage channels, and outfalls. The city currently has neither the personnel or money to complete the mapping. The funds will allow us to contract the mapping. This project will employ approximately 10 people and take around 3 months to complete. The estimated total project cost is \$50,000. This will pay for \$30,000 spent on the 2014-2015 fiscal year for the implementation of the MS4 program. The remaining \$20,000 will be used for the 2015-2016 fiscal year for the implementation of the MS4 program. | City of Zanesville | 10 | 91 to 180 days | \$50,000 |
| Muskingum | New Concord Fire and Emergency Services Building C | Consolidating into one modern building would greatly enhance New Concord Fire Department ability to provide services to the area. The existing structures are not adequate for required training and do not meet NFPA standards. The Village of New Concord has acquired the proposed building site with the necessary utilities, approvals, and access. If the funding is approved, construction of the building would start this year. The consolidated fire department would allow the existing structures to be converted to a police station and other public facilities. | Village of New Concord | 200 | 181 days or more | \$1,250,000 |
| Muskingum | CSO R-17 & CSO R-19 Sewer Separation Project | This project will eliminate CSO's (Combined Sewer Overflows) R-17 and R-19 by separating the sanitary and storm sewers. The project has been mandated by the Ohio EPA to be a part of the City of Zanesville's Long Term Control Plan. The project consists of approximately 1000 feet of 8 inch sanitary sewer and appurtenances. The project will employ up to 25 people directly and indirectly. Construction of the project will take approximately 3 months. The estimated project cost is \$227,000. | City of Zanesville | 25 | 91 to 180 days | \$227,000 |
| Muskingum | Water Treatment Plant Backwash Waste Line | This Project is a separate component of the new water treatment plant. It is approximately 3500 feet long, from the water treatment plant to a streambank marsh. The backwash line will also be utilized as the outfall for the Eastport Business Park Sanitary Expansion Project. Therefore, it not only creates jobs for construction and material suppliers but also is vital to the start of their job creator projects of the Zanesville Water Treatment Plant and the Eastport Business Park Expansion projects submitted by the Zanesville-Muskingum County Port Authority. Construction will take approximately 3 months. The estimated project cost is \$328,000. | City of Zanesville | 30 | 31 to 90 days | \$328,000 |
| Muskingum | Wastewater Treatment Plant Improvements | This project will upgrade the plant with a new lift station, two new clarifiers, new mechanical bar screen and a flow equalization tank. The plans are complete and the PTI has been issued. The OPWP portion of the project has been approved. The requested funds will be used to purchase introductory physics laboratory setup for year-long course. The location of the Zanesville, Lancaster, and Southern regional campuses of Ohio University. This acquisition will replace 30-year-old equipment and create 150 undergraduate jobs per year to gain experience with modern equipment. Most of the students studying in the area are from rural areas, and the funding requested here targets the rural and economically underdeveloped areas of southeast Ohio. The physics and physical science instructional labs offer students with their first introduction to technology for making measurements. This is the use of computers in controlling equipment and addressing science questions. The skills they obtain in these courses are highly relevant to the high tech jobs of the future. | Village of Frazesburg | 50 | 31 to 90 days | \$250,000 |
| Muskingum | Modernizing Physics Laboratory Instruction in Sout | Expand broadband infrastructure to extend High Speed data services and voice applications to unserved and underserved rural areas, in such a way that this infrastructure could potentially be shared with Emergency services. | Ohio University | 0 | 0 to 30 days | \$108,000 |
| Muskingum | Rural Broadband Infrastructure Development | This project would be to replace the 12" and 8" cast water mains on Maple Ave. from Adler Ave. to Military Rd. with a new 16" DI-18 C-90 plastic water main. The project length is 1040 feet. The water main on Maple Ave. are old cast water mains which have broken many times over the years and a larger water main is needed. The project is estimated to create or retain 30 job for a project duration of 3 months. The estimated project cost is \$1,600,000. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Muskingum | Maple Avenue Waterline | To install an additional 20MVA transformer at the Eastport Industrial Park substation to accommodate future industrial growth in the park. This is a general industrial site in southeastern Ohio and future growth is very likely as the economy improves. | City of Zanesville | 30 | 91 to 180 days | \$1,600,000 |
| Muskingum | Eastpointe IP Transformer | We need the funds to continue building houses for middle income Americans. We will not be able to continue under current economic conditions without funding. We use many subcontractors for all aspects of the building process. Many of the subcontractors rely on us for a major source of their income. With the funds we will be able to continue using these subcontractors. | Guernsey Muskingum Electric Cooperative, Inc | 500 | 91 to 180 days | \$900,000 |
| Muskingum | Continuing home building | This package will allow us to replace two aging vehicles with new units that are up to date. First unit would be a First Responder/Command vehicle with EMS equipment stocked on board. EMS equipment already purchased. This unit will handle calls when the EMT's are not available. Years ago becoming a single parent (out of wedlock) was not only frowned upon, but the girl was at times forced from the community. What is it like today? There are so many questions, scenarios, and options on this subject. I want to write a book to illustrate how television, society, etc. has affected the change and just what changes there are. The funds would be utilized for a new computer, office space, phone lines, expenses of travel, etc. | Tri-Village Builders, Inc. | 15 | 0 to 30 days | \$250,000 |
| Muskingum | Vehicle Replacement | This project will fund the replacement of our current station generator. Our current generator does not have the automatic transfer switch and safety isolation as required. Our current generator is supplied with natural gas which could be interrupted in the event of a line rupture, natural disaster or WMD /CBNRE event. We need to update and bring our current wiring and circuit breaker boxes to the current electrical code. The station provides fire and EMS services to the entire township and rural areas of the City of Zanesville and the other 24 Muskingum county townships if requested and has the capabilities for emergency sheltering or operations center in the event of an emergency incident. With the funding of this project it would correct the above mentioned issues. It would be replaced with a 60 KW diesel generator system that is code compliant. This will benefit the entire township residents, businesses and local industrial park to provide emergency service in the time of need. | Roseville Volunteer Fire Dept. | 4 | 31 to 90 days | \$74,000 |
| Muskingum | To research, document and illustrate societal diff | *Hands-free voice recognition wireless Voice Over IP Communicator Projects for healthcare entities in Appalachia. *Take over the inefficiencies, problematic aspects of the hospital's wireless communication. New equipment, review or expand existing deployments. Staffs Project Management, Engineering, & Training. As the project's Planning, implementation, hardware, software, database, wireless infrastructure. Training in End User & Administrative tasks. *Overall, healthcare entity will be self-sufficient to support their wireless communicator project from end-to-end. This assessor quarterly reviews for the healthcare entity's efficiency of the care giver's communication, training, & infrastructure to ensure the caregiver's experience is efficient to provide clear & effective communications for patients. *We interconnect Nurse Call systems, Patient Monitors, etc. Improve speed, accuracy, clarity of patient alerts to the caregiver. | Connie's Country Critters | 2 | 31 to 90 days | \$75,000 |
| Muskingum | Fire Station Emergency Power Generator | This project will fund the replacement of our current station generator. Our current generator does not have the automatic transfer switch and safety isolation as required. Our current generator is supplied with natural gas which could be interrupted in the event of a line rupture, natural disaster or WMD /CBNRE event. We need to update and bring our current wiring and circuit breaker boxes to the current electrical code. The station provides fire and EMS services to the entire township and rural areas of the City of Zanesville and the other 24 Muskingum county townships if requested and has the capabilities for emergency sheltering or operations center in the event of an emergency incident. With the funding of this project it would correct the above mentioned issues. It would be replaced with a 60 KW diesel generator system that is code compliant. This will benefit the entire township residents, businesses and local industrial park to provide emergency service in the time of need. | Washington Twp. Fire Dept. | 2 | 0 to 30 days | \$27,500 |
| Muskingum | Healthcare provider Voice Over IP Efficiency | This project will expand the Training to Improve Employability Skills program (TIES) By partnering with existing youth programs in Muskingum county. TIES will offer summer work opportunities and year round employability skills training to approximately 20 more youth. The focus of this project will be careers in the "Green Industry". Students will learn about recycling and efforts to help the environment in their communities by networking with business and community leaders in the "Green Industry". They will research "green" careers and prepare their own personal Career Plans. During the summer students will receive "hands on" training in the recycling field. Students will design and create recycling bins, bird houses and bar habitats to sell in the community. Students will be exposed to several fields of work during this project, including, construction, accounting, marketing, website design and education. The TIES program is a year long program and participants receive job getting and keeping skills during the school year. Subsequent and linking courses, OOD will offer work opportunities and year round employability skills training to approximately 15 more youth. The focus of this project will be careers in the "Green Industry". Students will learn about recycling and efforts to help the environment in their communities by networking with business and community leaders in the "Green Industry". They will research "green" careers and prepare their own personal Career Plans. During the summer students will receive "hands on" training in the recycling field. Students will design and create recycling bins, bird houses and bar habitats to sell in the community. Students will be exposed to several fields of work during this project, including, construction, accounting, marketing, website design and education. During the school year students will participate in the Jobs for Ohio's Graduates program at their high school where they will participate in classroom, leadership, service learning activities, follow-up and evaluation. | Wimind.com, LLC. | 13 | 0 to 30 days | \$780,000 |
| Muskingum | TIES Green project | Have existing gravel parking lot at our fire station. Synposium. These two facilities allowed to be torn down would be sorely missed by the community and would greatly affect the already existing industrial and commercial areas for the citizens of the greater Zanesville area. If allowed to be renovated these facilities would become cultural hubs for our community. | Zanesville Civic League Inc. | 20 | 31 to 90 days | \$110,000 |
| Muskingum | JOG - East Central Green Jobs Program | By funding this project of approximately \$7,400,000.00, the stimulus funds would be aiding the construction industry in both labor and building materials. Consequently there would be seventy people working on this project for an estimated eighteen months not to mention the staff that will be needed to run and maintain the facility upon completion. In addition to the jobs and purchased building materials, we would also be able to heat and cool this facility by utilizing the geo-thermal wells that heat our new adjacent high school. If renovated these facilities would complement our community efforts of supporting our new school building program which is phase two to be completed by 2015. | East Central Career Programs, Inc. (JOG - East Cen | 15 | 181 days or more | \$95,000 |
| Muskingum | Parking lot paving | Have existing gravel parking lot at our fire station. Synposium. These two facilities allowed to be torn down would be sorely missed by the community and would greatly affect the already existing industrial and commercial areas for the citizens of the greater Zanesville area. If allowed to be renovated these facilities would become cultural hubs for our community. | Washington Township Fire Department | 6 | 31 to 90 days | \$23,500 |
| Muskingum | Auditorium and Gymnasium Renovation | By funding this project of approximately \$7,400,000.00, the stimulus funds would be aiding the construction industry in both labor and building materials. Consequently there would be seventy people working on this project for an estimated eighteen months not to mention the staff that will be needed to run and maintain the facility upon completion. In addition to the jobs and purchased building materials, we would also be able to heat and cool this facility by utilizing the geo-thermal wells that heat our new adjacent high school. If renovated these facilities would complement our community efforts of supporting our new school building program which is phase two to be completed by 2015. | Zanesville City Schools | 70 | 91 to 180 days | \$6,100,000 |
| Muskingum | Company start up funds | I am a self employed contractor, wanting to start my own construction company, employing five workers to begin, with additional staff added as the business becomes profitable. I have more than 20 years construction experience, and feel that I would be able to make a company a success, given the right capital to begin. This has hindered me in past endeavors, not being able to get the start up costs necessary to complete my dream. The SE Ohio area is in desperate need of jobs, and I feel that I could provide what this area is lacking. The company would provide services in the SE Ohio area as well as Central Ohio. | Commercial Concepts | 5 | 0 to 30 days | \$25,000 |
| Muskingum | Carl Fuller, Inc. | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Muskingum | P&D Transportation | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Muskingum | Orran Hofstetter | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Muskingum | YES Program (Youth Employment Services) | The YES Program will utilize funds for WIA eligible youth whom are out of school, 16-21, needing skilled training leading to a Certificate related to career goals. During the year 30 youth will receive paid and unpaid work experience and receive skilled training for going into post secondary. Case management will be provided for all WIA eligible youth during the year, and 1 year after exit to ensure they succeed by providing them with the same services. The youth will pursue career training programs, college courses, GED instruction, and alternative education while learning job skills through workshops, leadership training, and job shadowing while working throughout the community. They will be involved in community service projects, Blood Drives, fairs and games for kids, race up for kids, Health fairs | Zanesville Metropolitan Housing Authority | 32 | 0 to 30 days | \$88,000 |
| Muskingum | Update Heating Furnace and Lines | New efficient furnace to heat entire department building and replacing duct work. | Muskingum Township Volunteer Fire Department | 0 | 31 to 90 days | \$20,000 |
| Muskingum | Mid-East CTC - OSFC Renovation Project | This federal stimulus request would be the school districts share of an Ohio School Facilities Commission (OSFC) approved renovation project. This would satisfy the school districts' need for existing and additional property taxes in the homeschool in 13 school districts. The OSFC would contribute the states share (over \$20 million) from the tobacco settlement money. A \$35 million dollar project in the metropolitan area of Ohio would benefit the area by upgrading the area's infrastructure. Upgrades include: modernizing existing buildings, equipment and technology, improve the education and training for over 1000 high school and 2500 adult students each year. These renovations would provide work for roofers, electricians, plumbers, and carpenters while furnishing the schools with better technology, safety/security, and learning environment. An old outside sewer plant would be removed. The multiplier effect of this amount of money in the communities will stimulate other businesses, and the local area will benefit in attracting other business from the improved education and training provided by Mid-East Career and Technology Centers. | Mid-East Career and Technology Centers | 200 | 91 to 180 days | \$12,000,000 |
| Muskingum | Energy Efficiency Retrofit of Village Offices Buil | Upgrading the Village Office building by replacing the existing 1950's heating system, switching all lighting over to energy efficient lighting fixtures, installing low flow toilets in the restrooms and rewatering the building. The building also houses a gymnasium and commercial kitchen which the Village rents out to local residents to help support the on-going cost of maintaining the building. The Village would like to upgrade the kitchen area as a part of this energy efficiency retrofit in order to retain efficient appliances. | Village of Frazesburg | 40 | 0 to 30 days | \$950,000 |
| Muskingum | Resident Aide | This funding will be used to help residents of Public Housing to overcome barriers that are preventing them from obtaining or maintaining employment or furthering their education. With the requested amount of \$30,000.00 we would be able to assist approximately 300 residents in a 12 month period by providing the residents with a \$100.00 voucher they would have the choice to obtain assistance in the following areas: Vehicle Maintenance, Vehicle Insurance, Gas vouchers, Daycare assistance, Uniforms, School Fees, School supplies, Bus passes, and any other barriers that are preventing them from accomplishing their goals of becoming self-sufficient. We feel that we will be able to ensure 100 of the 300 residents will obtain or maintain employment. | Zanesville Metropolitan Housing Authority | 100 | 0 to 30 days | \$30,000 |
| Muskingum | Transitions, Inc | We would like to ask for approximately \$44,595.00 to pay for personnel that was denied through the Federal WAWA grant. It will also be used to pay a part-time worker for the weekend so the shelter will be covered 24/7. | Transitions, Inc. | 3 | 0 to 30 days | \$44,595 |
| Muskingum | Backhoe Replacement | The breakdown for the cost will be approximately \$4,680.00 for the part-time weekend \$18,969.00 for the evening supervisor, 120 hours for the night supervisor. The matching funds will be provided by MLFIDD, donations from clubs, organizations & individuals. | Muskingum Township | 2 | 0 to 30 days | \$60,000 |
| Muskingum | Oakwood North Paving | This will allow our township to replace an aging backhoe with a new up to date backhoe. Less time replacing broken work equipment. | Muskingum Township | 20 | 31 to 90 days | \$120,000 |
| Muskingum | Township Garage/Meeting Room | Repairing of several streets in Oakwood North subdivision. Streets included would be Northview Drive, Coopers Lane, and Streets need resurfacing since it has not been done for a few years. | Muskingum Township | 10 | 91 to 180 days | \$175,000 |
| Muskingum | Equipment/Salt Building | To construct a new garage/shopping/meeting room 50 ft x 100 ft to house all equipment and hold monthly meetings. | Muskingum Township | 6 | 91 to 180 days | \$100,000 |
| Muskingum | Fire & Township Emergency Power Generator | Construct a 36 ft by 64 ft salt and order bin to keep winter road treatment materials and an equipment shed for storing road equipment. | Muskingum Township | 2 | 31 to 90 days | \$17,500 |
| Muskingum | Business Expansion | Our Township Fire Department provides Fire and EMS service to the entire Township as well as fire protection to several surrounding Townships and Villages. Our Township Garage provides emergency road repair, maintenance, and debris removal when emergencies occur. This generator will benefit the entire township residents and businesses when emergencies arise. | Rick Peterson's Plumbing | 4 | 31 to 90 days | \$150,000 |
| Muskingum | Solid waste to fuel | Open a small family plumbing business. I would like to expand to surrounding counties. In order to do this I would need 2-3 service vehicles and tools and supplies for each one. By expanding my business I would be able to hire an additional 3 full time employees. Green-Way Waste Systems located in Appalachia, east central Ohio is a new business which will decrease our dependence on foreign oil, reduce our need for landfill and produce fuel oil alternatives. Green Way Waste Systems will address one of our county's most urgent needs: shrinking fuel supplies and overflowing landfills, by converting refuse into fuel oil products. OUTCOMES: 1) Productive New Business 2) Employment of 45 plus people 3) Reducing the need for landfills 4) Lessening Ohio's dependence on foreign oil 5) Converting agricultural and forestry waste 6) Additional work for existing retail and construction companies 7) Plant expansion will double (5 x 7) 8) Employment opportunities will double in 5 years. 9) Non-profit foundation established to give back to the community within 3 to 5 years. | Green-Way Waste Systems, LTD | 45 | 91 to 180 days | 12,000,000.00 |
| Muskingum | Energy savings assistance for poverty level proper | Project will update windows to Federal energy efficiency guidelines, install, upgrade doors to weather tight insulated doors, and update older heating systems. This project will benefit the building occupants by SEVERE low income tenants. As an owner, because of the low amount of rent I can charge as these people struggle to make any rent payments, it is impossible for me to invest this amount of money. As the poverty level tenants pay utilities, they would directly benefit from this project. Create jobs - help poverty level people - conserve energy. I think this project hits most of the targets of the stimulus monies. | R/Smeltzerrentals | 5 | 0 to 30 days | 150000 |
| Noble | Village of Caldwell - Combined Sewer Separation Pr | This project will eliminate seven of the most active CSDs in the Village of Caldwell and reduce basement back-ups thereby improving the water quality of the West Fork Duck Creek. The project includes 1,476 linear feet of new sanitary sewer, 440 linear feet of storm sewer, 6 manholes, and 1,900 linear feet of new sanitary connections. The Village needs to proceed with this project in order to comply with the village's NPDES permit and Long Term Control Plan. Elimination of these overflows will also facilitate the extension of sanitary sewer service to unincorporated areas of Noble County and the Village of Belle Valley. A preliminary SDES has been completed and design will begin in spring with the goal to begin construction in August 2009. | W.E. Quicksall and Associates, Inc. | 0 | 91 to 180 days | \$475,300 |
| Noble | Noble County Sanitary Sewer Collection Project | Project will include the design and construction of sewer lines and lift stations to serve the 4 mile corridor between Caldwell and Belle Valley and an area south of Caldwell (South Area). Both of these areas are under findings and orders from the Ohio EPA. Approximately 440 homes and businesses will be served by the project and when constructed, the project will encourage additional opportunities for growth and jobs in the area. Environmentally, the project will eliminate the average 16 roadside ditches and easements such as Duck Creek, part of the Muskingum River Watershed. The funds would be used toward the overall construction cost of the project the estimated quantities include: 62,000 linear feet of 6" to 18" sanitary sewer pipe, 200 manholes and 5 pump stations as well as pavement replacement, seeding and mulching and other requirements. | Noble County Commissioners | 2 | 181 days or more | \$9,100,000 |
| Noble | 1-77 East Water System Extension | The county is planning to provide water service to 236 residences in the NE portion of the county east of 177 and north of Caldwell exclusive of existing water service areas. The project will bring public water to homes that currently have poor quality and/or limited quantities of water from sources such as wells, springs and cisterns. Many residences currently haul water for personal and livestock use. Funds are to be spent for engineering, administration and construction of a water distribution system to serve 236 residences in Noble Co. Costs are: Construction, \$3,673,000; Engineering, \$467,000; Legal & Administrative, \$370,000; Land & Rights-of-way, \$10,000; Permit Fees, \$15,000; Interest, \$60,000; Contingency, \$362,000. Total \$4,647,000. Jobs created does not include the temporary construction jobs created by the project. | Noble County Commissioners | 2 | 181 days or more | \$1,500,000 |
| Noble | Noble County Pool/Recreation Building | As we had to close the only public swimming pool in the entire county, we are looking to build a new, modern facility. The primary users of the facility will be the 10,000+ residents of the county, but the project will draw patrons from surrounding counties. As part of the project, we hope to include a recreational facility that will allow us to increase our offerings to the youth of the county as well as give us a facility to rent out for an additional revenue stream. The funds will be spent creating jobs for local contractors to build the pool and recreational building. The jobs listed are for the seasonal employment and do not include any temporary construction jobs created as a result of funding. | Noble County Recreation | 10 to 15 | 181 days or more | \$1,200,000 |
| Noble | Lashley Addition Sanitary Sewer System | Lashley Addition consists of 100 homes and a 25 unit campground adjacent to Seneca Lake. Ohio EPA has been monitoring nuisance conditions related to failing or nonsewered household sewage treatment/disposal systems at this location. Furthermore, Ohio EPA has ordered that the Noble County Commissioners take corrective action to protect the public health and environment. Pursuant to these orders, the County is investigating the installation of a sewage collector and treatment system to abate the pollution issues at this site. Funds are to be spent for the engineering, administration and construction of a sanitary sewer collection system and treatment facility for Lashley Addition. Costs: Construction, \$1,950,000; Engineering, \$275,000; Legal, \$30,000; Land & Rights-of-way, \$60,000; Permit Fees, \$8,000; Contingency, \$177,000. Total, \$2,500,000. Jobs created does not include temporary construction jobs. | Noble County Commissioners | 2 | 181 days or more | \$2,500,000 |
| Noble | Noble County Health Department-Rehabilitation Proj | Noble Co. citizens will benefit from the project by extending the useful life of a critical community facility in a county without a hospital. The health dept. building is owned and maintained by the Noble Co. Commissioners. Built in 1976, it is a 2 story, 7,200 sq ft building. In recent past the HVAC units have been replaced, Security and Fire Alarm system installed and updated, a whole building back up generator installed, new phone system installed, and several other building improvements. The project would increase the building's efficiency while improving energy efficiency. The project items in priority order include: 40 yr. Asphalt Shingle Roof Replacement, \$17,550; Aluminum Clutter and Downspout Replacement, \$1345; Area of exterior brick and repair, \$4,500; Interior Flooring Replacement, \$28,800; Replace 21 interior double doors of rear foyer, \$8,000; Install new hallway partition door, \$1200; Replace the 34 exterior windows, \$40,800; and install new lighted building sign, \$7,000. Total cost, \$108,000. Jobs created/estimated if does not include any construction jobs associated with the project. | Noble County Health Department | 32 | 181 days or more | \$109,000 |
| Noble | Lighting | 42% Reduction in energy costs in lighting. The costs and benefits are for 2 Magnum Magnetics locations, 1 in Caldwell, OH and 1 in Marietta, OH. | Magnum Magnetics | 2 | 0 to 30 days | \$200,000 |
| Noble | Premix Relocation | Relocate process equipment to eliminate unnecessary transportation costs. We currently have 1 tractor trailer on the road 5 days per week (excluding between plants) hauling premix. If we relocate the proposed equipment we would reduce the number of tractor trailers on the road or less per week allowing us to take 1 semi off the road saving fuel and repair costs. In addition the move will also reduce waste and improve "single piece flow" allowing us to progress faster and be more competitive in the market place. As I prepared this request, initially I was going to request monies to upgrade a 40 year old sewage plant that serves our two school buildings along with heating, Ventilation, Air Conditioning, windows and doors for our schools. The sewage plant is antiquated and if we do not fix our school system would be shut down. Cost to replace \$400,000.00. With the extended school year as recommended by Governor Ted Strickland we would need to modernize the buildings so they could be closed temporarily year round. Cost to modernize for year round use \$3,840,723.00 (2000 numbers) The requested amount of \$5,000,000.00 represents our total local share to completely renovate our facilities for 21st century learning \$24,000,000.00 through the Ohio School Facilities Commission. It seems foolish to waste stimulus dollars to fix a few items at a cost of \$4,040,723.00 when total modernization of our educational facilities is \$5,000,000.00. | Magnum Magnetics | 132 | 31 to 90 days | \$400,000 |
| Noble | Noble Local Schools Facilities Request | | Noble Local Schools | 75 | 31 to 90 days | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Noble | Acquisition & Restoration of the Ball-Caldwell Far | The Noble County Historical Society is in the process of acquiring the Historic Ball-Caldwell House/Farmstead located in Caldwell, OH. The facility, currently in private hands, is an excellent example of an early/mid 19th century farmstead that has been partially refurbished by its current owner. The historical society will restore/renew the facility and will make improvements that will make the site more user friendly. The existing barn structure shall be restored and have a commercial kitchen and restrooms to encourage public use of the property. Improvements include: Acquisition: \$250,000 (funded by Clean Ohio and local sources); Kitchen and bath: \$75,000; Barn restorer restorations: \$40,000; Barn interior includes-Reconstruct electrical wiring/lighting, \$60,000; Review/Permit Requirements, \$15,000; Exterior landscaping and access, \$15,000. | Noble County Historical Society | 2 | 91 to 180 days | \$200,000 |
| Noble | Red Hawk Rustic Expansion | Red Hawk Rustic, LLC (RHR), a rustic and reclaimed wood furniture business is seeking to expand its operation with a retail outlet and educational program space. The expansion requires renovation of an existing structure (an 18 x 24 foot barn) to serve as the retail outlet and program area, as well as construction of a parking area for 20 vehicles and outdoor seating spaces. Funds would also be used to develop and implement educational programs designed to highlight ecologically sustainable ways of living and decorating. The programming is a new market strategy for RHR, designed to bring customers nearby cities (including Columbus and through to the Noble Business Center) for day or weekend-long trips. Seven programs are planned from May through October, and would employ up to seven artists and educators from within a 100-mile radius of Noble County. In addition, a part-time program assistant and part-time builder's apprentice would be hired from within a 25-mile radius of RHR to assist with business development and program implementation. This project will enable artisans in our local areas to market their products to the world. | Red Hawk Rustic, LLC | 6 | 31 to 90 days | \$175,000 |
| Noble | Noble Hills Artisans On-Line Store | Outputs: *40 jobs/business retained in 7 counties *25 jobs/business created | Noble County Historical Society | 70 | 0 to 30 days | \$40,000 |
| Noble | Wastewater Collection System | This project will include the construction of sewer lines and lift stations to serve the Village of Belle Valley and the unincorporated area along a four mile stretch of State Route 821 between Belle Valley and the Village of Caldwell. Both of these areas have been placed under Findings & Orders to be sewered by the Ohio EPA. The sewage will be pumped to the existing wastewater treatment plant in the Village of Caldwell. Approximately 400 existing homes and businesses will directly benefit from the project and it will present opportunities for additional growth and jobs for the area, which abuts with the intersections of Interstate Routes 70 and 77. Environmentally, the project will eliminate raw sewage in residential ditches and waterways. Phase I of the project serving 23 homes was recently completed and was funded through the U.S. Army Corps of Engineers Section 504 Program with a \$500,000 grant. This project is extremely important, but is impossible to construct with loans due to the project. | Noble County Commissioners | 25 | 31 to 90 days | \$8,000,000 |
| Noble | New electric at elem school | We need to have the elementary school rewired as when you turn the fan on the fuse blows. It is as hot in these class rooms that the children fall asleep in class and get ill. We need to fix this problem and at least get windows that will open or in there are the children are our future. | Shenandoah PTO | 20 | 31 to 90 days | \$100,000 |
| Noble | Noble County Road 21 Bridge Replacement | Replacement of Noble County Road 21 Bridge | Noble County Engineering Dept. | 0 | 91 to 180 days | \$216,580 |
| Noble | Noble County Road 4 Paving Project | 7 Construction Jobs Created This project will provide 8,217 LF of paving on Noble County Road 4. | Noble County Engineering Dept. | 0 | 91 to 180 days | \$140,175 |
| Noble | Noble County Road 5A Paving Project | 7 Construction Jobs Created This project will provide for 20,770 LF of paving on Noble County Road 5A. | Noble County Engineering Dept. | 0 | 91 to 180 days | \$322,285 |
| Noble | SR 285 Water Project | 10 Construction Jobs Created This project will provide a public water supply along 8.5 miles of rural roads in Center and Buffalo Townships. There are 46 homes to be serviced by this project; however this is the first phase of a much larger project that will eventually service another 210 customers. The construction of the project will help enable the County to leverage financing for the second phase. So, this is a very important project for the citizens of northeastern Noble County. | Noble County Water Authority | 7 | 31 to 90 days | \$450,000 |
| Noble | Wargo Road | This project will provide a public water supply along 1.1 miles of Wargo Road in Noble Township. There are 11 customers to be serviced. The project will bring the water mains of The Noble County Water Authority and The Noble Water Company together which makes an emergency interconnection feasible. This also will allow the Noble Water Company to add customers to three service line with added water flow. | Noble County Water Authority | 7 | 31 to 90 days | \$50,000 |
| Noble | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV. TV services to the packages within a year. New Wimax technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial opportunities that will create countless jobs statewide. If constructed, this project will provide water to the service area and will foster a climate for continued residential growth. This service line is north east of the Village of Caldwell, mostly along CR 164 and the SR 285 corridor with a short spur along SR 28. The project also brings the water mains of the Noble County Water Authority within a short distance of the existing Pure Water Company water system which makes an emergency interconnection feasible. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Noble | NCI Electrical Emergency Distribution Upgrade | The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial opportunities that will create countless jobs statewide. If constructed, this project will provide water to the service area and will foster a climate for continued residential growth. This service line is north east of the Village of Caldwell, mostly along CR 164 and the SR 285 corridor with a short spur along SR 28. The project also brings the water mains of the Noble County Water Authority within a short distance of the existing Pure Water Company water system which makes an emergency interconnection feasible. | Ohio Department of Rehabilitation and Correction | 35 | 181 days or more | \$1,350,674 |
| Noble | Clearwater Corp - Distribution System Improvements | This project includes approximately 88,000 ft of 4-inch waterline, 10,000 ft of 3-inch waterline, 50 valves, a new booster station, and a new storage tank for a small rural water utility in Noble County. Project will provide needed looping of the system and will alleviate the unsanitary conditions for many of the residents who do not have adequate drinking water. | URS Corporation | 3 | 31 to 90 days | \$4,000,000 |
| Noble | Village of Caldwell - Booster Station Generator | The Village of Caldwell plans to install a generator and automatic transfer switch at the water booster station that serves the Noble Connectional Institution and which provides drinking water to other residents and water systems in Noble County. This generator is needed to ensure that drinking water will be provided to the community and to the prison in the event of a power outage. Completion of this project will help reliability jobs by improving the reliability of the village's water distribution system. Businesses will not have to shut down due to lack of water during a power failure. | Village of Caldwell- W.E. Quicksall and Associates, Inc. | 150 | 31 to 90 days | \$115,000 |
| Noble | Village of Caldwell - Water Meter Replacement Prog | The Village of Caldwell plans to replace approximately 1,450 water meters with new radio-read meters. The purpose of this project is to obtain more accurate readings on water usage to reduce the time required to read meters each month, and to improve customer service by providing early notice of leaks. These meters will reduce the unaccounted for water in the system by providing more accurate data and will improve water conservation by alerting customers to potential leaks in the home. With the time saved each month, Village staff will be able to complete other tasks, work orders, and system maintenance more effectively to improve quality of the drinking water system. | Village of Caldwell- W.E. Quicksall and Associates, Inc. | 5 | 31 to 90 days | \$300,000 |
| Noble | Village of Caldwell - Water Line Improvement Proje | The main finished water transmission line for the Village of Caldwell is over 75 years old and is nearing the end of its useful life. During the last five years, approximately ten significant leaks have occurred in this line disrupting service to all customers. The Village plans to replace this transmission line as soon as funds are available. Specific improvements include 5,200 linear feet of 12-inch ductile iron water line, 38 valves, new hydrants, reconnecting existing hydrants to the new line, 120 new service connections, and 28 connections to distribution lines. The Village of Caldwell provides water to almost 80% of Noble County through four satellite water systems and provides water to the Noble Connectional Institution. This project will ensure that the Village will be able to provide a continuous supply of safe drinking water to the community in normal disruptions in service and emergency situations by improving the basic infrastructure. | Village of Caldwell- W.E. Quicksall and Associates, Inc. | 150 | 91 to 180 days | \$902,900 |
| Noble | Caldwell- Water Treatment Plant Improvements | To meet projected increases in demand, the Village of Caldwell has a need to increase the capacity of the water treatment plant. Currently, the Village of Caldwell provides water to almost 95% of Noble County through four satellite water systems and to the Noble Connectional Institution. Expansion of the treatment capacity will ensure that the residents of Caldwell and Noble County will continue to have a safe supply of quality drinking water and will provide the necessary infrastructure to improve the local economy and help create jobs in the area of Noble County. Specific improvements will include one new clarifier, splitter box, two new gravity filters, chemical feed systems and building, valve for raw water control system, building expansion work, electrical systems and SCADA systems will be upgraded to improve energy and treatment efficiency. With these improvements, the Village will be able to perform the necessary preventive maintenance on new and existing equipment by having the facility to have treatment units out of service when needed and still meet system demand. | Village of Caldwell- W.E. Quicksall and Associates, Inc. | 100 | 181 days or more | \$3,339,600 |
| Noble | Jackson Township Waterline Extensions | Jackson Township Waterline Extensions - The proposed project will provide water service to Jackson Township in Noble County. The project will serve approximately 28 customers with clear potable water. Private water supplies in the area are of poor quality and limited quantity. Many residents rely upon springs and cisterns which are potential health threats for contamination. For these reasons, residents in the area have petitioned Tri County to extend water service along county road 115 in Jackson Township. The proposed waterline extensions will include 30,000' of waterline, 1,200' of 3/4" service line, service meters, valves, hydrants, and other necessary appurtenances. | Tri County Rural Water and Sewer District | 10 | 91 to 180 days | \$381,700 |
| Noble | Palmer Waterline Extensions | Palmer Waterline Extensions - The proposed project will provide water service to Palmer Township in Washington County. The project will serve approximately 100 customers with clear potable water. Private water supplies in the area are of poor quality and limited quantity. Many residents rely upon springs and cisterns which are potential health threats for contamination. For these reasons, residents in the area have petitioned Tri County to extend water service into Palmer Township. The proposed waterline extensions will include 14,000' of waterline, 1,200' of 3/4" service line, service meters, valves, hydrants, and other necessary appurtenances. | Tri County Rural Water and Sewer District | 20 | 91 to 180 days | \$1,377,300 |
| Noble | Jackson Township Waterline Extensions | Jackson Township Waterline Extensions - The proposed project will provide water service to Jackson Township in Noble County. The project will serve approximately 28 customers with clear potable water. Private water supplies in the area are of poor quality and limited quantity. Many residents rely upon springs and cisterns which are potential health threats for contamination. For these reasons, residents in the area have petitioned Tri County to extend water service along county road 115 in Jackson Township. The proposed waterline extensions will include 30,000' of waterline, 1,200' of 3/4" service line, service meters, valves, hydrants, and other necessary appurtenances. | Tri County Rural Water & Sewer District | 10 | 91 to 180 days | \$381,700 |
| Noble | Noble County Water Line Ext. & Distribution System | The project is located in the NE corner of Noble Co. The project includes 22 miles of water line to serve rural residents along SR 147, SR 566, CR 25, CR 31 and Lakeland Subdivision. The project includes a 100,000 gallon water tank to be located in Mt. Ephraim. Many residents currently have inadequate or unsafe water wells and are forced to haul water. The existing 50,000 gal. Mt. Ephraim water tank is in poor condition and should fail the community would be left without drinking water and fire protection. The project would include 112,900 ft of 3" and 4" water line, 36, 3" and 4" gate valves and various other items. Contingency is 10% (300,000). Engineering and administrative costs are \$700,400. | Clear Water Corp | 2 | 181 days or more | \$4,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Noble | New In-Door Horse Arena at the Noble County Fairg | The project is to construct a 100' X 300' In-door Horse Show Arena on the Noble County Fairgrounds. The regionality would benefit from such a project, as there is currently no in-door or covered show arenas of this size. The site for the arena on the Noble County Fairgrounds was selected because of its close proximity to Interstate Route 77 and also proximity to West Virginia, Pennsylvania and Kentucky. There is a need for such a facility in this part of the state. An in-door or covered show arena would allow for many equestrian, livestock or sporting events to be held regardless of the weather conditions. This facility would also benefit the regionality economically, as it would generate revenue from the events held there. Additionally, money would be saved by regionality residents, as they would not have to travel outside the region to participate in equestrian, livestock or sporting events. This facility could generate additional jobs in the county as more events and activities were held. | Noble County 4-H Horse Council | 50 | 91 to 180 days | \$200,000 |
| Noble | Rural Broadband Infrastructure Development | Expand broadband infrastructure to extend High Speed data services and voice applications to unreserved and underserved rural areas, in such a way that the infrastructure could potentially be shared with emergency services. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Noble | Noble Learning Center Transportation | Money will be used to purchase one van to provide transportation for an after school program serving approximately 20 children. The van was an currently using will no longer meet the state requirements and we will be forced to discontinue the program without a new vehicle. We are the only after school program in Noble County. | Noble Learning Center | 2 | 31 to 90 days | \$100,000 |
| Noble | EE Retrofit Noble Learning Center | To renovate the gym area with an energy efficient heating system and new roof in order to meet code and maintain low utility costs. We are the only child care center in the county and provide child care for 120 children. We purchased the building last century and renovated it two years ago, except for the roof and gym area. We have a large mortgage and cannot assume more debt. Plans would be to install solar panels in the roof to offset, and add a geothermal heating system that will reduce our heating costs and become energy efficient for the future. Without these improvements, we are looking at violations of building inspections. The building needs an energy efficient retrofit for us to provide services in this rural area. Our goal is a non-profit to put our funds directly back into the program for children, and being energy efficient will only help us do this better. | Noble Learning Center | 30 | 31 to 90 days | \$250,000 |
| Noble | Expansion of building/program | To renovate the remaining area of the building to prepare for expansion of Early Head Start and Head Start programs. To construct two classroom spaces inside the gym area that will increase our license capacity by 90 children and allow for collaboration with our community partner Head Start. This will also provide space for future partnerships with Public School, The school and Early Learning Initiatives/Cases. The renovation will consist of basic interior construction with some plumbing and electric. We can start project immediately. | Noble Learning Center | 6 | 31 to 90 days | \$125,000 |
| Noble | Electric Peak Demand Reduction | Install and purchase a 250K Generator to save the Washington Electric cooperative money, to have a secondary source of energy in case of power outage and to stay abreast of new State regulations. The generator would provide the necessary electric to Summit Acres and reduce the Cooperative's Peak demand and thus reduce cost and energy to other cooperative members. The estimated savings to the cooperative would be approximately \$10,000 per year. This generator would also be available for emergency electrical outages during severe storms. Summit Acres Nursing Home is one of the largest employers in Noble County. Our rates are fixed based on various power sources while the cost continue to increase in all areas. This has forced us to lay off some staff members. A grant for this generator would help us to save on our capital cost which in turn would help to save others from being laid off. A government grant would save approximately three jobs and reduce the need for energy during peak demands (in Ohio the peak demands are normally during the summer months) | Summit Acres Nursing Home | 3 | 31 to 90 days | \$58,000.00 |
| Ottawa | Dist 2, PID 85779, OTT Scheduling software package | Scheduling software package for the Ottawa County Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$30,000 |
| Ottawa | Dist 2, PID 85782, OTT Ladder and fork lift | Purchase rolling steel ladder and 3000 lb fork lift for the Ottawa County Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$12,600 |
| Ottawa | Dist 2, PID 85783, OTT 12,000 lb two post van lift | 12,000 lb two post van lift for the Ottawa County Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$4,200 |
| Ottawa | Dist 2, PID 85784, OTT Winch for service truck | Winch for service truck for the Ottawa County Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$1,300 |
| Ottawa | Dist 2, PID 85780, OTT (3) 40' D3FE buses | Purchase (3) 40' D3FE buses for the Ottawa County Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$650,000 |
| Ottawa | Dist 2, PID 85781, OTT (2) 35' Goshen buses | (2) 35' Goshen GCII buses for the Ottawa County Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$500,000 |
| Ottawa | Dist 2, PID 85777, OTT Transit facility design | Transit storage facility design for the Ottawa County Transit Board | Ohio Department of Transportation | 6 | 31 to 90 days | \$315,000 |
| Ottawa | Dist 2, PID 85778, OTT Facility construction | Transit storage facility construction for the Ottawa County Transit Board | Ohio Department of Transportation | 70 | 31 to 90 days | \$3,500,000 |
| Ottawa | Water Treatment Plant Improvements | Improvements include solid/centrifugal clarifier to replace underflows and dewatering settling basin, replacement chemical storage and feed building to comply with EPA Regulations. | Village of Marblehead | 20 | 181 days or more | \$722,345 |
| Ottawa | South Bass Island Sanitary Sewer Project | The project involves the installation of 2,518 LF of gravity sewer, 1,363 LF of force main and a pumping station to serve a proposed resort area and existing residences and businesses adjacent to the installed sewer. | Ottawa County Sanitary Engineering Department | 225 | 91 to 180 days | \$3,156,000 |
| Ottawa | The State Route #163 Sanitary Sewer Extension Proj | The project involves the construction of 6,300 LF of gravity sanitary sewers to serve a portion of State Route #163 in Danbury Township, assist and connect a wood powered generator to supplement power usage at the local fire station which serves the village and much of the surrounding township. | Ottawa County Sanitary Engineering Department | 12 | 31 to 90 days | \$921,560 |
| Ottawa | Fire Station Wind Generator Project 10kw | This project would help offset the cost of electricity used to provide lighting and partial heating to the fire station, police station, and Village offices. | Village of Rocky Ridge | 4 | 0 to 30 days | \$53,000 |
| Ottawa | Phase V, Allen/Clay Township Sanitary Sewer Projec | It would create construction jobs only, with no retained employees after completion. | Ottawa County Sanitary Engineering Department | 15 | 91 to 180 days | \$1,858,113 |
| Ottawa | Ottawa County Regional Water Control Valve Project | 5,036 LF of 10" sanitary sewer, 5,883 LF of 8" sanitary sewer, 1,219 LF of 6" force main, 3,844 LF of 6" sanitary sewer service and one pump station to serve the residents within Section #20 of Clay Township in Ottawa County, Ohio. This unreserved area has been the subject of a South Department imposed construction ban since 1981 due to the existence of the system and existing residential and high water table causing a high number of on-hol sewage treatment system failures. The property owners that exist throughout the area can not afford the high cost of the project without grant assistance and as a result, the project (which has already been designed) has not been able to move forward to construction. | Ottawa County Sanitary Engineering Department | 12 | 31 to 90 days | \$98,912 |
| Ottawa | South Bass Island Water Line Extension Project | The project involves the installation of 2,413 LF of water main to serve the southern end of South Bass Island Township including the Miller Ferry Boat operation and other existing residential and commercial businesses. | Ottawa County Sanitary Engineering Department | 10 | 31 to 90 days | \$353,000 |
| Ottawa | Phase IV, Erie Township Water & Sewer Extension Pr | The project involves the installation of 2,900 LF of 8" water main, a sanitary pump station and 2,900 LF of 4" sanitary force main to serve BFI (a solid waste disposal facility). | Ottawa County Sanitary Engineering Department | 12 | 91 to 180 days | \$860,345 |
| Ottawa | Widening of Berm of Schau Rd | The Rd is approximately 1 mile in length. Purchasing additional right-of-way and widening the road on one or both sides of the road will allow for a safer road. This road dead ends at the Portage River and is the only access to the recreational area that has developed along the river. With a better access road additional development may be possible along the river. | Bay Township | 10 | 91 to 180 days | \$35,000 |
| Ottawa | Restroom Completion Project | Installation of flooring, showers, and stall dividers in the newly constructed restrooms at the local fire station. This project covers material only for the above mentioned items as all work to be done by volunteer fire fighters, police officers, and village residents. | Village of Rocky Ridge | 0 | 0 to 30 days | \$5,600 |
| Ottawa | Village Water Supply & Distribution System | This project includes installation of a new water distribution system and fire hydrants for the Village and part of Benton Township. | Village of Rocky Ridge | 12 | 31 to 90 days | \$2,943,437 |
| Ottawa | Fire Station Sewage Project | Included is installation of approximately 6750LF of 12" Main line, 19,390LF of 8" main, 8630LF of 6" branch, and 2000LF of 2" branch water pipe. It also includes installation of 44 fire hydrants and related materials. | Village of Rocky Ridge | 2 | 0 to 30 days | \$6,500 |
| Ottawa | Conference Room Completion Project | This project would be for installation of a EPA approved septic leach field of 1200LF at the local fire station in the Village. Presently, this station has only a holding tank which must be pumped monthly to service public restrooms in the fire station. | Village of Rocky Ridge | 4 | 0 to 30 days | \$10,000 |
| Ottawa | Schau Rd. Leveling & Repaving | The Fire Station building houses the Fire Dept, Police Dept, and Village Mayor and Fiscal Officer offices. It is also used to hold monthly council meetings and occasional committee meetings. | Bay Township | 10 | 31 to 90 days | \$65,000 |
| Ottawa | Solar System Grid Project | This project would include completion of the local Fire Station conference/meeting room. This area of the station also is used to hold bi monthly meetings of the local Village Council and for training of fire fighters, EMTs, and Police Officers. | Village of Rocky Ridge | 3 | 0 to 30 days | \$52,000 |
| Ottawa | | Project includes installation of approximately 40 feet of interior walls including insulation, approximately 1600SF of dropped suspended ceiling with lighting, and 1600SF of floor covering. | | | | |
| Ottawa | | This project would include creation of construction jobs during the project but would not include any job retention after project completion. | | | | |
| Ottawa | | The Fire Dept serves the Village and a large part of the surrounding township which encompasses about 300 local residences. | | | | |
| Ottawa | | Schau Rd is approximately 1 mile long and in need of leveling and repaving. It has been patched annually but now needs more than patch work. The road dead ends at the Portage River and is the only access for the recreational area at the river and the many residences that have been built. The road is not only has a safety issue as it is, but a newly leveled and repaved road would invite additional economic stimulus for more recreational development along the Portage River. | | | | |
| Ottawa | | Installation of solar system panels and associated grid system for supplementing electrical power to the local fire station. | | | | |
| Ottawa | | This project would provide supplemental electrical power for the Village to offset electricity cost used in the Fire Dept, Police Dept, and Village offices. | | | | |
| Ottawa | | This project would provide construction jobs only, and would not provide any retained jobs. | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Ottawa | Meeting Room heating completion project | This project includes completion of heating and AC ductwork in the local fire department meeting room. This meeting room also serves as a meeting area for local firemen, parkmen, and CMFT. It is also served as a bi monthly meeting room for the local Village council and committees. Project includes installation of approximately 60 feet of main trunk line, approximately 300ft of branch trunk line, diffusers, dampers, plenum, A/C refrigeration lines and associated hangers, etc. This project includes materials only as all labor is being provided by volunteer firemen, policemen, and residents. | Village of Rocky Ridge | 0 | 0 to 30 days | \$1,800 |
| Ottawa | Schau Rd. Storm Water Project Phase III | 1,100 linear feet of storm water tile to finish a storm water tile that was divided into three phases. The original construction was in the 1940's under a WPA project. The completion of this project would eliminate the flooding of the farmland and residences. This project would also allow proper flow for urban drainage for these residences. | Bay Township | 10 | 31 to 90 days | \$90,000 |
| Ottawa | Billman Road Bridge over Cedar Creek | This project would rehabilitate and upgrade an existing 56.5 foot long steel truss bridge over Cedar Creek to meet current design standards. This bridge was erected in 1954 with maintenance work performed in the 1970's. The steel superstructure will be dismantled, cleaned, repainted as needed and gvanized throughout. The expected service life extension of this rehabilitation and upgrade is a minimum of 40 years. Using current County bidding criteria would yield the receipt of bids within 30 days of authorization to proceed and construction expected to commence within 60 days. | Ottawa County | 10 | 0 to 30 days | \$338,200 |
| Ottawa | Stange Road Bridge over Turtle Creek | This project would rehabilitate and upgrade an existing 70.5 foot long steel truss bridge over Cedar Creek to meet current design standards. This bridge was erected in 1958 with maintenance work performed in the 1970's. The steel superstructure will be dismantled, cleaned, repainted as needed and gvanized throughout. The expected service life extension of this rehabilitation and upgrade is a minimum of 40 years. Using current County bidding criteria would yield the receipt of bids within 30 days of authorization to proceed and construction expected to commence within 60 days. | Ottawa County | 10 | 0 to 30 days | \$358,575 |
| Ottawa | Portage River South Road Pavement Rehabilitation | This project consists of rehabilitating 4.49 miles of existing asphaltic pavement with a structural leveling course and a finish wearing course. Road base repairs have been completed in the last 3 years and this proposed project completes the restoration of this roadway to its maximum life cycle capabilities of 10 years or more. | Ottawa County | 15 | 0 to 30 days | \$541,400 |
| Ottawa | Salem-Carroll Road Pavement Rehabilitation | This project consists of road base repairs on approximately 3.0 miles of roadway and the placement of an asphaltic leveling course and an asphalt wearing course on the entire 6.01 miles of County roadway. This rehabilitation will restore a major East-West link in the center portion of Ottawa County to its maximum life cycle capabilities of 10 years or more. | Ottawa County | 15 | 0 to 30 days | \$992,900 |
| Ottawa | lickert harder/walbridge roads | Approx 2 miles of roads that are a safety issue to residents, impassible with road eroding into ditch, ditch and road need to be completely reconstructed, many accidents have occurred because the roads are almost impossible to have two cars pass each other. Because of the cost of these projects, the local funds are not available to accurately complete these roads. This road is a priority, heating and repaving the roads. The township is the best of our abilities see maintaining the roads with the funds that we have. Please consider this as a request for our township. If completed the safety of our residents will be greatly affected. This project put our local businesses with new jobs created and also additional people working in our Township. Thank you for your consideration in this matter Dwayne Mitinger Fiscal Officer | benton township trustees | 15 | 91 to 180 days | \$300,000 |
| Ottawa | Bay Park Community Hospital Women's Services Expan | Bay Park Community Hospital (BPC) is committed to providing services closer to the community. As part of an effort to improve community access, a midwifery practice in Ottawa County is an example of this commitment. The midwifery practice is the only obstetric/gynecologic service in Ottawa County and reaches women in Erie and Sandusky Counties. The midwifery practice is comprised of a multidisciplinary team of obstetric education, prevention, screening and diagnostic services to women of all ages and socioeconomic levels. Care through the program affords women a direct referral and evaluation to specialty physicians as needed. Building on the success of the midwifery practice in improving access to care, the addition of diagnostic (ultrasound, digital mammography) and bone density scanning) and laboratory services will further benefit the local communities. BPC will support these services which allows for better utilization of staff and resources. The expansion of the midwifery practice will provide the safe access, need the total health care needs of women, facilitate early identification of diseases that result in timely intervention and referral and improved health outcome. Reline Santy Sewer, Replace water mains, install sidewalks, and resurface streets | Promedica Health System | 3 | 0 to 30 days | \$414,000 |
| Ottawa | East End Project | City of Port Clinton. Construct new Marina and Safer Harbour for transient boaters, 161 boat slips | City of Port Clinton | 50 | 91 to 180 days | \$3,750,000 |
| Ottawa | Transient Marina | City of Port Clinton. Construct new Marina and Safer Harbour for transient boaters, 161 boat slips | City of Port Clinton | 50 | 181 days or more | \$8,560,000 |
| Ottawa | Perry St Pumps: Replace Storm Water Pumps | Replace 3 pump station pumps with submersible pumps | City of Port Clinton | 5 | 31 to 90 days | \$1,125,000 |
| Ottawa | Expansion and Job Creation in Renewable Energy Alt | Expansion and Job Creation with Renewable Energy Alternatives - with emphasis on wind power - by expanding work force, inventory, warehousing, production, and much needed equipment purchases, to accommodate requests from existing and potential clients for Wind Turbine installations ranging from utility grade; Anticipated Potential Business: 50MW installed at residential clients, 30MW installed at industrial, commercial clients, and 3-5MW installed to utility grade wind farm clients in the calendar year of 2009 and 2010. With proper expansion, the projected revenues of all projects could exceed \$12 - \$14 million dollars. Project includes all phases of wind development as listed above and as follows: continuation of wind studies, analysis of data, acquiring of land area, and securing of financing. All individual projects will be completed in Ohio. This assistance will keep job growth local in Ottawa and Lucas Counties in Ohio and will help the State in obtaining the requirements of S.B. 271 - The Ohio RPS. | North Coast Wind & Power, LLC | 75 | 31 to 90 days | \$1,500,000 |
| Ottawa | Sixth Street: Sewer Separation and Resurfacing | Install new sanitary sewer, resurface street | City of Port Clinton | 20 | 181 days or more | \$1,040,000 |
| Ottawa | Third St. Sanitary Interceptor: Sanitary Transmissi | Install main sanitary trunk line to allow for sewer separation | City of Port Clinton | 20 | 31 to 90 days | \$18,750,000 |
| Ottawa | Village of Marblehead Rt. 163 Waterline Replacemen | Project replaces approximately 5900 LF of failing cast iron water line which was installed in 1958. Bedding has failed causing the pipe to rest on bedrock at the bottom of the trench. It appears that blasting necessary to install the county sewer may have been a factor. This section is the source of numerous (approximately 88 recorded so far) breaks resulting in frequent water service outages requiring toll orders and the loss of the protection to over 50% of the village customers. Project Goal: Reduce outages and subsequent toll orders. Provide reliable fire protection. Reduce maintenance costs. | Village of Marblehead- Floyd Browne Group | 15 | 91 to 180 days | \$635,400 |
| Ottawa | Village of Marblehead Elevated Water Storage Tank | Tank to be located at the south-western end of the distribution system. Area is currently most vulnerable to service outages. This is the one area of the village that has and will see population growth. It will be able to provide sufficient storage to accommodate a future line extension to Johnsons Island. Johnsons Island residents are vulnerable to the outage of the village and it without municipal water service. The Island residents are wind wells and cisterns for water which are vulnerable to the potential of pollution from on site septic tanks. The location also provides backup water service to approximately 50% of the village if there is a waterline break along the main trunk line which parallels Rt. 163. Project Goals: Provide backup water service in case of line breaks; improve reliability of water and fire protection service; Improve pressure of existing supply during periods of high usage. Provide supply necessary to extend service to Johnsons Island. | Village of Marblehead- Floyd Browne Group | 20 | 91 to 180 days | \$1,129,000 |
| Ottawa | Village of Marblehead Water Treatment Plant Improv | Water Treatment Plant (WTP) Improvements Project: Project consists of the replacement of an undersized (200 gpm) and obsolete solids contact basin with a new solids contact (400 gpm) and a new chemical feed and storage facility that meets OSHA and EPA requirements. The project is a result of an agreement between the Village and the Ohio EPA which allows the Village to keep its rated capacity of 400 gpm. The plant was originally rated at 400 gpm which is more than adequate to meet the Village's demand for the next 10 years. Like a number of WTPs of that era it was not designed with 1:100 independent treatment basin capable of their sustained output. The EPA on that basis "revised" the plant to 200 gpm, which made the plant incapable of meeting summer time peaks common with resort communities. The Village was faced with "doubling" the plant capacity. Design is complete and has the required permits. It has been bid and on 2-20-09 construction contracts were signed. The village has an OPWIC grant and loan and construction financing. Permanent financing to be finalized at end of construction. Installation of processing facility that separates crop material such as straw into fiber parts and biomass part | Village of Marblehead- Floyd Browne Group | 20 | 0 to 30 days | \$878,000 |
| Ottawa | BastRover processing plant | The fiber is sold as reinforcement for composite manufacturing and the biomass as the basis for cellulosic ethanol | Consolidated Fiber Corporation | 100 | 0 to 30 days | \$3,000,000 |
| Ottawa | Stone Street Replacement project | Replacement of existing street. Project advertised with bid accepted from 7L Construction. | Village of Marblehead | 6 | 91 to 180 days | \$36,621 |
| Ottawa | James Park Restroom Replacement Project | Replacement of Public Park Restroom and make ADA compliant. Currently applying for Nature Works Grant in the amount of \$17,400.00. | Village of Marblehead | 6 | 181 days or more | \$17,400 |
| Ottawa | Waterline Replacement Project | Replacement of 6,000 LF of failing cast iron waterline. | Village of Marblehead | 15 | 181 days or more | \$732,900 |
| Ottawa | 200,000 Gallon Elevated Storage Tank | Additional system storage to accommodate growth in the southern portion of the village and to minimize risks of water outages for service area east of WTP and improve fire flow. | Village of Marblehead | 15 | 181 days or more | \$1,127,000 |
| Ottawa | Johnson's Island Waterline Extension | Johnson's Island was annexed to the Village. Currently, residents rely on wells and cisterns for water. Rock subsurface not suitable for wells. Issues include well yield, etc. Project includes a 4,000 LF underwater connection to mainland and 17,000 LF loop around island. | Village of Marblehead | 25 | 181 days or more | \$2,570,616 |
| Ottawa | Radar Park Building Renovation | To renovate a current standing building used for Parks and Recreation Storage and the restoration of Village Records. | Village of Marblehead | 6 | 181 days or more | \$75,000 |
| Ottawa | Neighborhood Patrol Objective | This project will provide our Village of nearly 200 residents with 1 full time officer and retain 1 part time officer on the Village Police Department. Officers will then provide the Village with 40 hours per week of additional police protection. With present budget constraints, the Village is down to 1 part time officer who is able to only provide 30 hours per month coverage at present funding levels. This project will create 1 new full time job and retain 1 part time job. | Village of Rocky Ridge Police Dept | 2 | 0 to 30 days | \$40,000 |
| Ottawa | River Interceptor Sanitary Sewer & Rice Street Tru | Sanitary sewer improvements that would benefit entire community including central business district | Village of Elmore | 125 | 31 to 90 days | \$1,372,000 |
| Ottawa | Jackson Street Infiltration & Inflow Removal | Reducing clay/gravel ground water leak on existing WTPP and effectively makes additional treatment capacity available for new development | Village of Elmore | 15 | 31 to 90 days | \$120,000 |
| Ottawa | Elmore/Genoa Recreational Trail | Trail will develop approximately 1 mile of multi-use trail that may include a pedestrian/bike trail between Elmore and Genoa. This will be an extension of the 20 mile North Coast Inland Trail originating in Clyde | Village of Elmore | 30 | 181 days or more | \$2,500,000 |
| Ottawa | Village Hall and Police Department Emergency Gener | Will allow Village Hall and Police Department to continue operations during periods of power outage | Village of Elmore | 15 | 91 to 180 days | \$83,000 |
| Ottawa | Community Center Roof Replacement | Replacement of roof on the Community Center | Village of Elmore | 6 | 31 to 90 days | \$61,000 |
| Ottawa | Lakewinds Fiber Optic Project | To provide fiber optic communication capability to a company that needs fiber in order to create 10 new manufacturing jobs. The fiber would service four existing industrial businesses and ten vacant industrial lots. Additional jobs could also result from the fiber installation. Approximately 200 feet of fiber optic cable would be installed along with the necessary connections and pedestals. | Ottawa County | 10 | 31 to 90 days | \$50,000 |
| Ottawa | Northwest Area Storm Sewers | Construction of storm sewer improvements within the NW area of the Village, which would benefit the entire community including residents & businesses. | Village of Genoa | 20 | 91 to 180 days | \$600,000 |
| Ottawa | Waterline Improvements | Waterline replacement throughout various sectors of the Village | Village of Genoa | 40 | 91 to 180 days | \$750,000 |
| Ottawa | Water System Improvements | Upgrades to Village wide water system | Village of Genoa | 10 | 91 to 180 days | \$1,064,000 |
| Ottawa | Secondary Watermain Source (Wood County) | Construct connection with master meter to NWSD for emergency water source | Village of Genoa | 10 | 31 to 90 days | \$400,000 |
| Ottawa | Remote Utility Meter Reading | Reduce CO2 emissions, reduce fuel cost, reduce manual labor cost | Village of Genoa | 5 | 91 to 180 days | \$270,000 |
| Ottawa | Packer Creek Clean Out Storm Water Flow | Cedar Packer Creek in Village limits of barriers to storm flows | Village of Genoa | 10 | 91 to 180 days | \$350,000 |
| Ottawa | Inflow Sewer System | Eliminate remaining sources of I into Village sanitary collection system | Village of Genoa | 10 | 91 to 180 days | \$400,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Ottawa | Wind Generator Sanitary Lagoon | Provide wind generated power to WWT Lagoon to supplement/increase Edison power | Village of Genoa | 5 | 91 to 180 days | \$150,000 |
| Ottawa | Sanitary Lagoon Electric | Provide Village power to WWT lagoon aerators | Village of Genoa | 5 | 91 to 180 days | \$100,000 |
| Ottawa | Washington Street Reconstruction | Reconstruct Washington from 4th to SR 51, new part, curb & gutter, drainage, sidewalks, etc. | Village of Genoa | 15 | 91 to 180 days | \$1,200,000 |
| Ottawa | Street Paving | Annual paving programs. Streets as previously prioritized or as revised amended by Village | Village of Genoa | 20 | 91 to 180 days | \$270,000 |
| Ottawa | Replace Traffic Signals: SR 51 & Main Street | Replace older traffic lights with modern state approved units. | Village of Genoa | 10 | 91 to 180 days | \$150,000 |
| Ottawa | Sidewalk Program | Install new ADA curb ramps/replace non-compliant ADA curb ramps throughout Village | Village of Genoa | 5 | 91 to 180 days | \$96,000 |
| Ottawa | Remove 9th Street RR Grade | Remove the "hump" in 9th Street due to abandoned RR embankment | Village of Genoa | 5 | 91 to 180 days | \$186,500 |
| Ottawa | Memorial Park Improvements | Improvements would consist of base park & recreational improvements, which would benefit all persons regardless of age, disability, race, etc. | Village of Genoa | 10 | 91 to 180 days | \$3,300,000 |
| Ottawa | Senior Center Annex | Construct interior spaces to allow occupation and usage of existing building shell | Village of Genoa | 5 | 91 to 180 days | \$133,000 |
| Ottawa | Veterans Memorial Park Office Renovation | Implement energy conservation thru solar panels & wind generator in the park | Village of Genoa | 5 | 91 to 180 days | \$250,000 |
| Ottawa | Electric Substation | Update and increase capacity of transformers | Village of Genoa | 5 | 91 to 180 days | \$770,000 |
| Ottawa | Lakeview/Victory/Bayview Avenues Waterline Looping | Waterline looping to assure adequate pressure & fire protection, as well as possible water delivery to Village residents and businesses | Village of Put-In-Bay | 22 | 91 to 180 days | \$552,075 |
| Ottawa | Water Intake/Crib Improvements | Put-In-Bay is a scenic attraction and during the busy season an average of 50,000 visitors per weekend visit the island, which places an extraordinarily high demand on water supply and demand of services | Village of Put-In-Bay | 32 | 91 to 180 days | \$550,000 |
| Ottawa | WTP UV Disinfection | UV Improvements are necessary to assure adequate and quality water supply | Village of Put-In-Bay | 12 | 91 to 180 days | \$177,900 |
| Ottawa | WWTP Improvements | Without adequate wastewater improvements tourists and residents could not be accommodated | Village of Put-In-Bay | 124 | 181 days or more | \$3,850,000 |
| Ottawa | Village Hall Renovation Improvements | Improvements to Village Hall, including energy efficiency | Village of Put-In-Bay | 10 | 91 to 180 days | \$1,100,000 |
| Ottawa | Repair runway | Repair runway | Erie-Ottawa Regional Airport Authority | 3 | 91 to 180 days | \$163,000 |
| Ottawa | Relocate helipad | Relocate helicopter landing area further away from runway | Put-In-Bay Township Port Authority | 8 | 31 to 90 days | \$480,000 |
| Ottawa | Phase V, Allen/Clay Township Sanitary Sewer Project | Sanitary sewer loop/pump station to be installed on SR 51, 2.19 LF of 6" force main, 3,844 LF of 6" sanitary sewer service and one pump station to serve the residents within Section #20 of Clay Township in Ottawa County, Ohio. This unsewered area has been the subject of a health Department imposed construction ban since 1981 due to the existence of poor soil conditions and high rock outcroppings that have caused a high number of on-rod sewage treatment system failures. The property owners that exist throughout the area can not afford the high cost of the project without grant assistance and as a result, the project (which has already been designed) has not been able to move forward to construction. | Ottawa County Sanitary Engineering Department | 15 | 91 to 180 days | \$1,858,113 |
| Ottawa | New Wastewater Treatment Plant | New 2.00 MGD WWTP capable of treating peak we weather flows of 2.0 MGD, will allow Village of meet conditions of their NPDES permit effluent discharges to the Portage River | Village of Elmore | 50 | 181 days or more | \$4,095,000 |
| Ottawa | Ohio Avenue Sanitary Pump Station and Force Main R | Project will replace an existing 40+ year old pump station and leading sanitary force main | Village of Elmore | 15 | 91 to 180 days | \$234,000 |
| Ottawa | Rice Street Reconstruction | Project will reconstruct approximately 2,385 LF of 40+ year old pavements, this section of Rice Street provides access to the WWTP, street and utility garage, as well as Riverbend Park and Vell Park | Village of Elmore | 20 | 181 days or more | \$1,225,120 |
| Ottawa | Dock A&C | Project will include replacement/renovation of 2,171 LF of existing docks, 303 LF of new steel crib docks, and 2,000 LF of new floating docks for steel docks and deck improvements of 2,171 LF of existing docks. Additionally all existing and proposed docks will have new electrical, water, lighting, and fire protection improvements. Project is critical to maintain boater safety as well as the local economy and job retention. | Village of Put-In-Bay | 20 | 91 to 180 days | \$7,000,000 |
| Ottawa | East Point/Toledo/Sybilis Waterline & Sanitary Sew | Project includes approximately 4,800 LF of sanitary sewer, 4 pumping stations, 5,400 LF of sanitary sewer, and 2,700 LF of waterline, will provide sanitary sewer and potable waterline service to approximately 100 residential parcels. Project is the result of a 2004 groundwater/slitus outbreak on South Bass Island | Village of Put-In-Bay | 15 | 91 to 180 days | \$2,593,000 |
| Ottawa | Fingerprint | Upgrade electronic fingerprint capabilities to perform State (BCIM) and Federal (FB) checks at one location. This would enable local citizens to obtain Federal checks without traveling 1/2 hour away. We currently process State (BCIM) checks but the Federal (FB) system is too costly for our current budget. | Elmore Police Department | 4 | 0 to 30 days | \$6,000 |
| Ottawa | Renewable energy laundromat | Installing renewable energy sources such as solar and wind power. We intend to build a laundromat to support the needs of the local community in an environmentally friendly fashion. We believe this project will support ten part time jobs during construction and one full time, permanent position | Capodice Limited | 11 | 0 to 30 days | \$300,000 |
| Ottawa | SR 163 Transmission Main Replacement | The existing 10" transmission main on SR 163 on the east side of Oak Harbor is in critical condition. Several hundred customers, including the County Nursing Home and other County facilities rely on this waterline for drinking water and fire protection | Village of Oak Harbor | 150 | 91 to 180 days | \$3,748,750 |
| Ottawa | Water and Electric Meter Replacement | The Village of Oak Harbor is planning to replace all of the water and electric meters throughout the Village | Village of Oak Harbor | 15 | 91 to 180 days | \$785,600 |
| Ottawa | Central Business District Fire Protection and Rive | Project consists of the addition of intakes in the Portage River to provide fire protection to the adjacent business district. Bank restoration will also be done to allow access to the river for trout fishing. | Village of Oak Harbor | 15 | 91 to 180 days | \$125,000 |
| Ottawa | East Oak Harbor Waterline Extension | Project extends drinking water and fire protection to several hundred homes adjacent to the Village. The poor water quality has caused the residents to seek a new waterline for several years. | Village of Oak Harbor | 35 | 91 to 180 days | \$473,000 |
| Ottawa | Emergency Waterline Connector | Emergency waterline interconnector between Oak Harbor, Carroll Township and Ottawa County water systems. Project consists of approximately 3/4 mile of 12" watermain | Village of Oak Harbor | 40 | 91 to 180 days | \$573,700 |
| Ottawa | 12.47 KV Distribution Circuit Upgrade | Replacement/renovation of electric service to a portion of the downtown businesses. Engineering has been completed. Advertise for bids March 17, 2009. | Village of Oak Harbor | 15 | 31 to 90 days | \$168,000 |
| Ottawa | Main Street Angle Parking | Increase parking in the downtown area. Part of a CDBG-Tier II Grant. Projected early summer to go to bid. | Village of Oak Harbor | 35 | 91 to 180 days | \$2,180,000 |
| Ottawa | Maple Street Rebuild | Rebuild of access streetbus route to elementary school. Projected early summer to go to bid. | Village of Oak Harbor | 15 | 91 to 180 days | \$190,000 |
| Ottawa | Purchase and land improvement | To purchase 15+ acres of now developed lake front property. To repair existing water, sewer lines and repair or replace existing breakwaters and existing walls. Exact measurements in linear feet is not known at this time. To improve the infrastructure of the property. | Marine City Yacht Club | 10 | 91 to 180 days | \$4,500,000 |
| Ottawa | Emergency Food and Shelter | Doubling of Emergency Food and Shelter allocation to meet the needs of the community for food, rent, mortgage and utility assistance. | United Way of Greater Toledo, Ottawa County Office | 1 | 0 to 30 days | \$44,000 |
| Ottawa | Opfer Lentz Road & Others Repaving | The township needs to repave 5.5 miles of township roads as soon as funding is available. These roads are in desperate need of resurfacing and will improve the transportation infrastructure in Allen Township. The township maintains 41.5 miles of roadway and has already repaved and gas for money to resurface 1 mile a year. The estimated life of an 2" CM-150 overlay is 7 years. The estimated life of 2" hot mix asphalt is 12 years. | Allen Township, Ottawa County, Ohio | 10 | 31 to 90 days | \$440,000 |
| Ottawa | Ottawa County Business Incubator | Allen Township has applied for state grant/loan program in the past in order to assist in repaving roads within the township. The Oliver Hazard Perry CDC would like to bring a business incubator to Ottawa County in the City of Port Clinton. The location would be at the site of a long vacant manufacturing site. The objectives would be to rehabilitate the site, redeveloped the property, and build a multi-purpose business incubator using green technologies. The business incubator would provide much needed space and opportunities for entrepreneurs to develop, build, and expand into robust, job creating businesses. | Oliver Hazard Perry Community Development Corporat | 20 | 181 days or more | \$1,800,000 |
| Ottawa | ACIFD Central Station Construction | See previous submissions. The previous submissions were about reworking, using reworking, change or leave certain area the village or central, no not official submissions are in Ottawa County, Ohio. The consolidation was undertaken to combine assets for current and future operations. The district bought a house that resides in the geographic center of the fire district. The house and property have been continually modified to fit our needs. The fire district must build a new station on the site that will better serve the current/future needs of EMS and fire services. The new station will also be constructed utilizing commercial green energy construction technologies. The older station to be replaced is also a cash drain on the fire district in both maintenance and energy costs. Any assistance from stimulus funds would help us to meet the goal of replacing an older structure that no longer meets the needs and goals of the fire district. | Allen-Clay Joint Fire District | 20 | 181 days or more | \$600,000 |
| Ottawa | Print management for education audit | By auditing the printing and copying capabilities of each school district in Ottawa County we can use our skills in this field to make cost saving suggestions and implementations. Our audits generally save school systems 15-20% of their annual printing costs. Less printing equals savings for schools and less power usage on the environment. | capodice limited | 2 | 0 to 30 days | \$25,000 |
| Ottawa | Winterize Ottawa County weatherization program | Our goal is to winterize every home in Ottawa County over a period of 5 years starting immediately. We believe this project will help save people money on heating and cooling costs and also lessen environmental impact by using less fossil fuels to heat and cool each home. An average of \$700.00 will be spent on every home in Ottawa county to upgrade weatherstripping, insulation, windows and doors. Approximately 150 miles of new Water Street, Public and Village Streets. The underground drainage and catch basins have already been installed for this project and it is ready for final base preparation and paving, which this project includes. Includes preparation of stone base, installation of 3" Asphaltic Concrete Base Course and 1 1/2" Asphaltic Surface Course, compaction, rolling, and sealing as required. | capodice limited | 10 | 0 to 30 days | \$11,531,800 |
| Ottawa | Kania Drive Paving Project | This project entails installation of 4600 Sq. Ft. of Asphaltic Parking Lot at the new South Fire station. Includes final grading and preparation of base over existing newly installed drainage tile and catch basins, includes 3" of Asphaltic Base Course and 1 1/2" of Asphaltic Surface Course, compaction, rolling, and sealing as needed. | Village of Rocky Ridge | 6 | 0 to 30 days | \$34,300 |
| Ottawa | Fire Dept Parking Paving Project | The City of Port Clinton would like to restore the site where the existing building for the old Water Treatment facility is located. The restoration will involve the demolition of a building and the clean up of environmental hazards to restore the area around the building and allow the property to be redeveloped. | Village of Rocky Ridge | 6 | 0 to 30 days | \$8,770 |
| Ottawa | Water Works Park Building | The City of Port Clinton would like to restore the site where the existing building for the old Water Treatment facility is located. The restoration will involve the demolition of a building and the clean up of environmental hazards to restore the area around the building and allow the property to be redeveloped. | City of Port Clinton | 10 | 31 to 90 days | \$800,000 |
| Ottawa | Replace Traffic Signals: SR 51 & Main Street (Rev | Replace older traffic lights with modern state approved units. | Village of Genoa | 10 | 91 to 180 days | \$150,000 |
| Ottawa | Maple Street Rebuild (Revisions to previously subm | Rebuild of access streetbus route to elementary school. Projected early summer to go to bid. | Village of Oak Harbor | 15 | 91 to 180 days | \$190,000 |
| Ottawa | Battery Operated Golf Cart and Battery Vehicle Sal | Many local areas in Northwest Ohio are beginning to allow battery operated golf carts or electric vehicles on their streets as a way of reducing pollution and to reduce fossil energy consumption. This request will allow the company to open a dealership to sell these battery operated vehicles and to also open a service department which will also ensure the vehicles are working correctly and safely. The service area will allow the company to add an electric golf carts already in use to qualify them as "renewable" to meet different criteria extracted by individual communities. The company will employ several individuals to meet the criteria of the services we will offer. Also, to do our part for the environment, we will develop an educational program to be presented to communities, schools and organizations introducing the positive aspects of this important technology in the way we will use energy consumption in the future. We will work with law enforcement officers and law directors to help them develop a plan for utilizing these energy safe vehicles. Installation of a multi-County ZEDS, involving 2 counties, 2 townships and 1 village, in Ohio. Turf-type interchange (ST). 5,000 linear feet of new waterline, 5,000 linear feet of new sewer line, fiber, telecommunications, electrical and road extensions to attract economic/manufacturing/water/wastewater/energy/technology businesses. Ottawa and Sandusky Counties will pursue additional funds through the State of Ohio and US EDA to assist in funding this project. | Self | 8 | 91 to 180 days | \$300,000 |
| Ottawa | Ottawa-Sandusky County IEDD | Installation of a multi-County ZEDS, involving 2 counties, 2 townships and 1 village, in Ohio. Turf-type interchange (ST). 5,000 linear feet of new waterline, 5,000 linear feet of new sewer line, fiber, telecommunications, electrical and road extensions to attract economic/manufacturing/water/wastewater/energy/technology businesses. Ottawa and Sandusky Counties will pursue additional funds through the State of Ohio and US EDA to assist in funding this project. | Ottawa County Improvement Corporation | 450 | 91 to 180 days | \$2,900,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------------|----------------|--------------------|---------------------------|
| Ottawa | NEW SAFTY PRODUCTS | WE HAD TO STOP OUR R&D FOR NEW AND IMPROVE SAFETY PUMPS. OUR SAFTY PUMPS HAVE REDUCED FIRE INJURIES AND MAY HAVE SAVED LIVES AND PROPERTY INSURANCE CLAIMS. WE HAVE HAD A NEW INQUIRY FROM A NUCLEAR WEAPONS PLANT ON A NEW PUMP WE ARE DEVELOPING. WE HAD TO LAYOFF MANY OF EMPLOYEES THAT WERE WORKING ON NEW IDEAS. WE HAVE A PATENT ON OUR PUMPS. WE HAD TO LAYOFF MANY EMPLOYEES IN THE USA. WE HAVE LOST MANY STARTING JOBS BECAUSE OF THE ECONOMY. WE ARE TRYING TO STAY OPEN, BUT THE ECONOMY HAS HIT US HARD. OUR COMPANY IS 103 YEARS OLD AND WE ARE DOING OUR BEST TO STAY OPEN. I AM DOING THE MOST I CAN, BUT I CAN ONLY WORK A COUPLE OF HOURS IN A DAY, BECAUSE I HAVE A DISABILITY. WE ALSO MAKE BRASS CARBORUNDUM FLATS FOR MANY DIFFERENT AIR PLANES AND WE ARE THE ONLY CO MAKING THEM IN THE USA. WE ARE THE ONLY CO MAKING BRASS CARB FLATS FOR MASQUER. WE ARE THE ONLY CO MAKING COPPER TOILET FLATS. WE HAVE LAID OFF OVER 20 EMP. IF WE COULD GET HELP TO STAY OPEN MANY JOBS COULD BE SAVED AND WE COULD CONTINUE OUR R & D. | AYLING & REICHERT CO. | 5 | 0 to 30 days | \$300,000 |
| Ottawa | Water Booster Pump Station | replace booster pump/motors and meters with VFD controlled motors, replace pump control check valves, replace standby generator with natural gas powered generator | Village of Genoa | 10 | 91 to 180 days | \$250,000 |
| Ottawa | Middle Bass Island Preserve Creation Project | This project will acquire and restore approximately 8 acres of Lake Erie waterfront land on Middle Bass Island and lead to the transformation into a public park with a small parking area and trails. It will also cause for the removal of an uninhabited and dilapidated residential structure and septic system and the restoration of that property. | The Trust for Public Land | 40 | 31 to 90 days | \$1,300,000 |
| Ottawa | Middle Bass Island Preserve Creation Project | This project will acquire and restore approximately 8 acres of Lake Erie waterfront land on Middle Bass Island and lead to the transformation into a public park with a small parking area and trails. It will also cause for the removal of an uninhabited and dilapidated residential structure and septic system and the restoration of that property. | The Trust for Public Land | 40 | 31 to 90 days | \$1,300,000 |
| Ottawa | wind-powered electrical generator for low-income h | Construct 30-meter tower, install wind generator on 2.4 acre parcel in Bay Tap owned by applicant to provide electric power to existing 11 low-income housing units on same site. \$30K for tower, generator & power storage. \$30K for security fence, \$6K storm gravel access drive, \$2K levee 11 low-income housing units to adapt to wind-generated power. \$3K admin cost w/Ohio Edison. Bay Tap is not zoned, adjacent parcels have cell phone towers so no aircraft or aesthetic issues. Expect to use all power on-site, so no transmission issues, but parcel adjacent Ottawa County Water Treatment Plant, possible purchase for surplus power if any, also with no transmission issues. Project creates 5 construction jobs plus for tower excavating and ironwork, and electrical rewiring for up to 2 months. Parcel 1 mile inland of Lake Erie shore, public information indicates more than sufficient wind consistently available. Preliminary engineering estimates from 2007 of \$30K cost for tower construction & generator. Proposal 10 meter radius varies on wind generator. Room to build 2nd tower & additional funds (additional \$91 K) are available. To generate surplus power for sale to pay debt service. | Ohio Street Resort LLC | 5 | 31 to 90 days | \$115,000 |
| Ottawa | Battery Testing | JEI is a battery testing laboratory. We would like to expand our capabilities for testing of storage batteries for vehicular, solar and electric vehicle power. We currently can simulate the solar wind testing per EC specifications, but would like to install a wind generation system to go "real world". We also would like to expand our electric vehicle battery testing in the park level. We are currently performing cell and module level testing on several clients in Lead Acid and Lithium chemistries. Most of our work comes from outside Ohio, including China, Korea, Japan, Australia, Mexico, Canada, and several European countries. We have already participated in development work for companies such as A123systems, Saftgroup, Exoly Energy, GM, Johnson Controls, Crown Battery, and East Penn Manufacturing. The work in the electric hybrid vehicle area is progressing to voltage / current ranges beyond our equipment capabilities. The stimulus funds would allow new equipment to be purchased to increase our current test capacity and allow JEI to continue to expand our services. We are currently participating in a program to purchase a windmill system for the state of Ohio. This will allow us to participate in the current / future construction program. We are currently participating in a program to purchase a windmill system for the state of Ohio. This will allow us to participate in the current / future construction program. We are currently participating in a program to purchase a windmill system for the state of Ohio. This will allow us to participate in the current / future construction program. | JBI Corporation | 10 | 0 to 30 days | \$250,000 |

This will allow us to participate in the current / future construction program. | Port Clinton City Schools | 200 | 181 days or more | \$23,630,592 |
| Ottawa | Marine hydrogen-infused engine project | This project would greatly reduce diesel emissions from marine vessels by adding a hydrogen infusion system to existing marine engines utilizing the lake water as the hydrogen fuel source for the vessel. Various ferry boats operate on the Lake Erie Islands approximately 18 hours a day about 10 months out of the year. The project would proceed in conjunction with ferry boat operators to develop and retrofit their engines with hydrogen infusion to improve fuel efficiency and reduce tail emissions as the ferry boat would operate solely on hydrogen when idling, such as sitting at the dock, or other in or out of the water. The hydrogen would then combine with the main fuel source during higher demand periods. Through this project, future development would consist of including increasing the use of bio-diesel to replace or augment diesel/hydrogen infused engines, provide the technology leadership for hydrogen use on 80% of all US road and off-road vehicles, better fuel consumption for both gasoline and diesel engines, retrofit gasoline powered water craft particularly pleasure craft with over 3.3 million vessels registered in the Great Lakes alone. | Put-in-Bay Township Port Authority | 15 | 0 to 30 days | \$1,250,000 |
| Ottawa | The Clean, Green Hybrid-Mode Bus Project | Technology by operating buses on bio-diesel/hydrogen infusion and ethanol/hydrogen infusion. The year-round usage of the buses also provides education to thousands of worldwide visitors to Put-in-Bay with buses being used on a Nat. Park Service, OSU, DONR, non-profit museums route. The usage & education continues in the Toledo area as TARTA will run on their buses during the island off season. The project will demonstrate greater fuel economy and greatly reduce exhaust emission with hydrogen solely being used for idling, traveling backwards & non conflicting with main fuel source during higher demand periods. The hydrogen infusion will allow for retrofitting of existing engines from 90% of all US road and off-road vehicles, to marine engines, both commercial as well the over 3.3 million pleasure vessels registered in the Great Lakes area. The commercialization of this will expand to long term, high quality green jobs beyond the year 15, plus make great strides towards a sustainable economy. | Put-in-Bay Township Port Authority | 15 | 0 to 30 days | \$1,500,000 |
| Ottawa | Energy Efficient Upgrade for Hydroponic Greenhouses | Energy efficiency upgrades to present 30,000 sq ft greenhouses 1. Install 8500 sq ft. double wall polycarbonate on all outside surfaces of greenhouses to energy conservation by 20% 2. Install 3 each 96% efficiency gas condensing boilers to replace 20 year old 70% efficiency gas boilers. Return fuel gas into the greenhouses as CO2 to decrease CO2 emissions and augment produce production. Creates energy savings of 85-90% and decreases carbon footprint. 3. Install wind turbine generator to supply 75-100% of electrical power. 4. Install boiler boiler to burn corn to supply 3 million BTU for greenhouse primary heat. 5. Upgrade present greenhouse from seasonal bedding flowers to hydroponic lettuce, herbs, cucumbers, tomato production 6. Additional 7000 sq ft. of new energy efficient glass greenhouses for hydroponic produce production Ohio Grown, Ohio Fresh. | Thompson Landscaping, Inc. | 10 | 91 to 180 days | \$975,000 |
| Ottawa | Wireless Technology | This project would enable wireless technology to be installed in all of our aging buildings to connect this vital school district to national and global resources. Students need accessibility to 21st century resources to better prepare them for life outside of this small community. The current buildings lack the infrastructure to make this vision a reality. The vital nature of the district make contacts with diverse cultures and races extremely limited. In order to compete in a global economy for jobs after high school, students need 21st skills and knowledge. These funds would be used to purchase the materials and hire the companies to upgrade our current infrastructure. | Benton-Carroll-Salem Local Schools | 25 | 31 to 90 days | \$300,000.00 |
| Ottawa | Technology/Computer Grant | Troff upgrade of our computer system within the office and also in our computers. This will enable us to do online uniform crime reports. Now we submit them by mail. We are using 98 Windows and the old heavy toughbooks. This would replace and upgrade our server and six other in office systems and add five vehicle systems and two laptops. | Clay Township Police Department | 4 | 31 to 90 days | 16,000.00 |
| Ottawa | 1985 Truck Replacement | By upgrading these computers will enable myself and the other officers to conduct their time more effectively and to assist in monitoring crime activity in the area. This will also assist in sharing information with other agencies by increasing our technology. | Clay Township | 0 | 31 to 90 days | 80,000.00 |
| Paulding | Waterline replacement | Clay Township is in dire need of a new single side dump truck. The truck we have now is a 1985 and is falling apart for the third time. The economy has hurt us to the point we can not afford to buy a new truck. It cost between \$10,000.00 to \$15,000.00 to buy a new truck. Buying a new truck would help us get our work done without repeating breakdowns all the time. Thank you! | Maumee Valley Planning Organization | 3.33 | 31 to 90 days | \$199,687 |
| Paulding | New water plant construction | Reconstruction of waterline in residential area | Maumee Valley Planning Organization | 100 | 91 to 180 days | \$6,000,000 |
| Paulding | Waterline Projects | Construction of municipal water plant | Village of Antwerp | 20 | 91 to 180 days | \$1,710,000 |
| Paulding | Paulding County 2009 Bridge Replacements | Replacement and installation of various waterlines throughout the Village of Antwerp. Some of the waterlines are undersized, deteriorated, some to loop existing dead end lines. With the replacement and installation this will provide the Village with better service and fire protection. | Paulding County Engineer | 3 | 91 to 180 days | \$300,000 |
| Paulding | Paulding County Road 115-5.16 Bridge Replacement | This project will replace four structurally deficient bridges in Paulding County. The replacement of these bridges will improve the safety of the traveling public in these areas. The new bridges will be able to handle all legal loads and any width restrictions currently in place will be gone. | Paulding County Engineer | 3 | 31 to 90 days | \$200,000 |
| Paulding | Water Treatment Plant Replacement | This project will replace a structurally deficient bridge on County Road 115. This roadway is classified as a major collector in Paulding County. The current structure is a load reduction and with replacement, this project will eliminate the need for those issues to provide a safer roadway. | Village of Paulding | 15 | 91 to 180 days | \$8,186,886 |
| Paulding | Combined Sewer Overflow Improvements | The Village is under Findings and Orders (copy attached) from Ohio EPA for exceeding maximum contaminants levels (MCLs) for total phosphorus (TP) and turbidity levels in the Safe Drinking Water Act. The Village made improvements to their existing plant built in 1966, but and reach compliance but their efforts proved insufficient. A General Plan was completed by URS Corporation in December 2006. The plan identified the most effective alternative to meet current SDWA requirements was a microfiltration/ultrafiltration plant. Detailed design is being reviewed by Ohio EPA and plan approval construction is imminent. The project will be shovel ready in 3 months, providing the Village with an affordable financing plan. The MHI for the Village is \$35,143. | Village of Payne | 6 | 91 to 180 days | \$1,300,000 |
| Paulding | Antwerp Waterline Replacement Project | The Village of Payne is in the process of implementing its long term CSO control plan to meet NPDES requirements. The plan calls for construction of an interceptor trunk sewer to collect storm water overflows and then routing to a pump station with conveyance to a retention basin. The storm water will then be routed to the wastewater treatment plant for treatment under controlled conditions. The project will include additional flow studies at their wastewater treatment plant as part of the negotiated NPDES permit with Ohio EPA. The Village's MHI is \$36,200 with approximately 517 connections and a population of 1,146. | Village of Antwerp | 0 | 91 to 180 days | \$1,706,195 |
| Paulding | Payne CSO Interceptor Sewer and Retention Pond | Replacement of approximately 17,000 linear feet of undersized and badly deteriorated existing waterlines. Looping of existing dead end lines which will involve installation of approximately 3,100 linear feet of new waterlines. The project will provide better service and fire protection, construction of a retention basin to collect stormwater overflows as mandated by CEPA Findings and Orders. The overflows will eventually be pumped back to the WWTP for treatment once flows allow. | Village of Payne | 10 | 91 to 180 days | \$1,000,000 |
| Paulding | Antwerp Washington/Canal/Wentworth/Woodcox Pavemen | Repair of pavement failures and resurfacing of streets to provide safe pavement for vehicular traffic. | Village of Antwerp | 10 | 91 to 180 days | \$600,000 |
| Paulding | Auglaize River Sewer Project | Auglaize River Sewer Project will satisfy the findings and orders of the Ohio EPA. | Paulding County | 20 | 91 to 180 days | \$7,444,000 |
| Paulding | Oakwood Superior Street Improvements | The present pavement has pavement failures, alligator cracking and asphalt raveling. Superior Street has bus traffic for the school which has added to the rapid deterioration of the pavement. The street will be brought up to acceptable standards to help provide a better pavement for motorists. The project will involve pavement repair for approximately 800 ft of street. | Village of Oakwood | 5 | 91 to 180 days | \$122,500 |
| Paulding | Payne CSO Interceptor and Retention Pond (resubmit | Construction of a retention basin to collect stormwater overflows as mandated by CEPA Findings and Orders. The overflows will eventually be pumped back to the WWTP for treatment once flows allow. | Village of Payne | 10 | 91 to 180 days | \$1,000,000 |
| Paulding | Antwerp Waterline Replacement Project (revision to | Replacement of approximately 9525 linear feet of undersized and badly deteriorated existing waterlines. The project will provide better service and fire protection to Village residents. | Village of Antwerp | 5 | 91 to 180 days | \$864,075 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Paulding | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a wireless infrastructure to equip rural residents with the service to be able to access the Internet at broadband speeds. Establishing a wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Paulding | Washington/Canal/Wentworth/Woodcox Pavement Improv | Repair of pavement failures and resurfacing of streets to provide safe pavement of vehicular traffic. | Village of Antwerp | 10 | 91 to 180 days | \$600,000 |
| Paulding | Oakwood Superior Street Improvements (Revisions to | The present pavement has pavement failures, alligator cracking and asphalt raveling. Superior street has bus traffic for the school which has added to the rapid deterioration of the pavement. The street will be brought up to acceptable standards to help provide a better pavement for motorists. The project will involve pavement repair for approximately 800 feet of street. | Village of Oakwood | 5 | 91 to 180 days | \$122,500 |
| Paulding | Additional funds for Emergency Food and Shelter Pr | The additional Emergency Food and Shelter funds would pay for emergency assistance for rent and utilities for Paulding County Residents. The client eligibility guidelines at 200% of the Federal Poverty Guidelines. Assistance caps set at \$400 per household for emergency rent/mortgage assistance and \$200 per household for utility assistance. | United Way of Paulding County | 3 | 0 to 30 days | \$15,000 |
| Paulding | Road 224 | We're sending this again as the wrong email address was typed in the first time and now is corrected. The project will consist of One Mile of paved road on Emerald Township Road 224 which currently represents terrible driving conditions due to numerous potholes and decaying pavement in the road. This road is currently utilized by numerous Emerald Township and Paulding County residents. In addition, several low income families reside on said road. Due to the construction of the new U.S. Route 24, Township Road 224 was over utilized past its load bearing and normal traffic bearing patterns. Therefore, we would like to request stimulus package monies to help repair the infrastructure of this Township Road 224. By improving this road the quality of life will be improved for Emerald Township residents and vehicle damage will be reduced to a minimum. | Emerald Twp. | 9 | 31 to 90 days | \$72,838 |
| Paulding | Railroad Grade Crossing Improvements | Repair/re-build fourteen highway/railroad grade crossings in Paulding, DeLancey and Henry Counties. The project involves installing new roadway surfaces and re-building the underlying and supporting rail structure under these fifteen crossings. | Maumee & Western Railroad orporation | 14 | 0 to 30 days | \$520,200 |
| Paulding | Railroad Grade Crossing Improvements | Repair/re-build fourteen highway/railroad grade crossings in Paulding, DeLancey and Henry Counties. The project involves installing new roadway surfaces and re-building the underlying and supporting rail structure under these fifteen crossings. The crossing involved include five county road crossings and nine city street crossings. | Maumee & Western Railroad orporation | 14 | 0 to 30 days | \$520,200 |
| Paulding | Township Road 224 | The project will consist of One Mile of paved road on Emerald Township Road 224 which currently represents terrible driving conditions due to numerous potholes and decaying pavement in the road. This road is currently utilized by numerous Emerald Township and Paulding County residents. In addition, several low income families reside on said road. Due to the construction of the new U.S. Route 24, Township Road 224 was over utilized past its load bearing and normal traffic bearing patterns. Therefore, we would like to request stimulus package monies to help repair the infrastructure of this Township Road 224. By improving this road the quality of life will be improved for Emerald Township residents and vehicle damage will be reduced to a minimum. | Emerald Twp. | 9 | 31 to 90 days | \$72,838 |
| Paulding | Bridge on Rd.135 | We are requesting stimulus package monies for an old dilapidated bridge on Emerald Township Road 135 that crosses 6 Mile Creek. The bridge's condition is as follows: The south abutment is a pile abutment with a wood back wall. The back wall is broken and the backfill starting to wash through. The north abutment is concrete with vertical headline cracks at the east and west ends. The dirt road drops off quite suddenly on the south side of the bridge. Transition is very abrupt. The wood trestle is beginning to deteriorate (1950). The south end of the east trestle beam has a twist in it at the beam seat. There is a large hole in the south approach in the west lane. Expected outcome of the new bridge is that Cooper Farms Incorporated will utilize the road on a daily basis due to the building of a new \$500,000.00 Hog C.A.F.D. (Confine Animal Feeding Operation). This Hog facility is proposed to produce several new jobs to Emerald Township. Also fixing the bridge will better the driving conditions for Emerald Township residents. | Emerald Twp. | 10 | 91 to 180 days | \$495,000 |
| Paulding | Building | We are requesting stimulus package monies for a 30' x 60' x 12' Emerald Township maintenance, office and community building. This building would replace the current one room school house facility with no restrooms that is currently used to house Emerald Township functions which include voting, township meeting, zoning commission meetings, zoning ordinance meetings, and other Emerald Township community events. Outcome is a better facility to maintain and service township equipment, and to make voting and community functions more accessible to all township residents regardless of age, disability, or handicap and would be a vast improvement over our current early 1900 era one room school house meeting facility. | Emerald Twp. | 12 | 31 to 90 days | \$67,000 |
| Paulding | Rail Intermodal Facility and Line Upgrade | Rebuild several railroad bridges to higher 286,000 pound gross weight limits, upgrade 15 miles of track with 20,500 new ties, 25,660 track feet of heavier rail, upgrade 5 railroad bridges, and build the rail infrastructure to service a 3,000-acre intermodal industrial facility and distribution park in DeLancey, Ohio, which will be served by major express railroads - CSX and BNSF through Maumee & Western (Noble, Southman). This facility will generate in excess of 1910 new jobs and allow major employers, such as General Motor Central Facility and LaFarge Cement to continue to supply employment for more than 2252 citizens and other significant tax bases. These upgrades are also essential to fulfill this line's designation role as the high speed rail route between Chicago and Toledo/Cleveland. | Maumee & Western railroad orporation | 1180 | 31 to 90 days | \$9,108,600 |
| Paulding | Police Department Survival | We are an incorporated village of about 900 people. We have had one full time police officer for at least the last 30 years. We have six part time officers. This money would be used to replace a 15 year old police cruiser, purchase a car video camera for officer safety and replace a 20 year old police radio. The balance of the money would be used to supplement the police budget for all operating expenses. This money is currently being used to pay for the balance of the police budget. The balance of the money would be used to supplement the police budget for all operating expenses. This money is currently being used to pay for the balance of the police budget. The balance of the money would be used to supplement the police budget for all operating expenses. This money is currently being used to pay for the balance of the police budget. | Oakwood Police Department | 7 | 31 to 90 days | \$95,000 |
| Paulding | Paulding County Auglaize River Sewer Collection an | The proposed project will include the installation of a sanitary sewer collection and treatment system for residents in Paulding County along the Auglaize River. The area has been issued CEQA Findings and Orders to eliminate pollution from being septic tanks. The treatment system will be a shared lagoon system with DeLancey County. | Paulding County Board of Commissioners | 25 | 181 days or more | \$5,400,000 |
| Paulding | Auglaize River Sewer Lagoon Project | The proposed project will involve the construction of a lagoon system to treat wastewater generated by residents in Paulding County along the Auglaize River. Paulding County is under CEQA Findings and Orders to eliminate water pollution to the Auglaize River in the area. The removal of the costs of the lagoon system will be paid for by DeLancey County. | Paulding County Board of Commissioners | 25 | 181 days or more | \$1,550,000 |
| Paulding | US 24 & US127 Sewer Project | To meet the requirements of the EPA | Paulding County | 20 | 181 days or more | \$2,700,000 |
| Paulding | Update In-Car Camera's | The in-car camera systems our office currently uses are nearly ten years old. These are VHS style systems, which are beginning to dig into our budget. We have to replace body microphones at a cost of nearly \$200.00 a year, and evidence bases are very costly. In attempt to save money, we reuse our VHS tapes over and over again. The reuse on the tape from over usage, provides us with poor quality footage. With today's technology, we can purchase new digital in-car cameras at a reasonable cost. The digital SD cards hold twice the material a VHS tape holds. These cards can be downloaded to a computer and replaced back in the vehicle in a matter of minutes, and there is no additional cost. The SD cards are made to hold hours of footage, and be reused time and time again. These digital units take up less space, which is always a valuable asset in a police vehicle. The estimate given should allow us to purchase the equipment, and have it installed by a professional. This is a quality concern for our officers, as well as the citizens we deal with on a daily basis. With our decreasing budget, we will not be able to replace our cameras without this grant. | Paulding County Sheriff's Office | 0 | 0 to 30 days | \$40,590 |
| Paulding | Reopen Our County Jail | This situation is due to a county operating very tightly budgeted. After the key failures, all county budgets were cut to prevent. The sheriff was forced to permanently lay off twelve full-time officers and several part-time officers. The next layoffs will involve road patrol deputies. This will greatly affect the operations of the office, and the safety of the residents of our county. These figures show we could call back our employees at an estimated rate of \$35,000 an officer. We believe the jail could be opened with staffing less than the twelve officers that were laid off. In the event more officers are laid off, we will be forced to greatly reduce services to the public. With our current staffing, there are many times only one officer is covering road patrol duties (418 sq. mi.). This is a huge risk to the people working our streets, as the crime rate is not going down. With an increase in substance abuse activity, we need help to prevent violent crimes perpetrated. Initial figures indicate the county's financial responsibility over the grant amount, should be reasonable. | Paulding County Sheriff's Office | 9 | 0 to 30 days | \$300,000 |
| Paulding | maintain positions | Paulding County has experienced severe economic decline in revenue necessary to fund basic services. The Paulding County Prosecutor's Office was forced to cut its already tight budget by 20% for the calendar year 2009. This drastic cut forced me to eliminate an assistant prosecutor, leaving myself and a second assistant prosecutor to handle all criminal cases in this county. This request is for \$30,000.00 to fund the salary for the eliminated assistant prosecutor position is greatly needed in order to serve the fine Courts of justice in Paulding County. Your consideration is greatly appreciated. | Paulding County Prosecutor's Office | 1 | 0 to 30 days | \$30,000 |
| Paulding | Oakwood Water Supply Well | The village had poor water quality out of existing wells along with expediting some decreased capacity. This project will provide one new well to supplement the existing wells and provide a better more stable supply of water to the community. | Village of Oakwood | 5 | 181 days or more | \$150,000 |
| Paulding | High Efficient Office Facilities | Construct a high efficient energy management building to provide office space and warehouse for utility workers and equipment with integration with renewable energy sources and observation facilities for local residents to work and gain hands on experience in energy efficiency, load management, renewable resource management and grid integration. | Paulding Putnam Electric Cooperative, Inc. | 35 | 91 to 180 days | \$5,000,000 |
| Paulding | Smart Grid Technology Investment | Installation of Supervisory Control and Data Acquisition (SCADA) equipment on electric utility lines to allow for smart grid technology and control of the system. | Paulding Putnam Electric Cooperative, Inc. | 35 | 0 to 30 days | \$500,000 |
| Paulding | Advanced Metering Infrastructure (AMI) | Install approximately 13,000 "smart meters" at customer residences and businesses in a five county area in North West Ohio. Project will allow for remote billing and meter reading, remote meter diagnostics, time-of-use data, voltage data, etc. Project will include installation of required substation equipment to monitor smart meters and send meter data to main office for analysis. | Paulding Putnam Electric Cooperative, Inc. | 25 | 0 to 30 days | \$1,800,000 |
| Paulding | sewer/tile replacement program | Village sewer and drainage tile are outdated - sewer tile are exactly that, orange clay tile, 14" and 18" inch tile in both sewer and drainage are collapsing in several places through out our village, with any kind of rainfall over a couple of inches, odors are slow to rise, some not at all. We believe this is getting to be a health hazard and very unsanitary conditions all of the village water supply is either pond or well water, methane is under a tight budget along with being under fiscal emergency we can only do priority projects. The village of Melrose would like to have as many subscriptions replaced as possible, along with as much drainage tile and sewer tile as we can make the village functional and sanitary. Thank you, Thomas Stutz. | village of Melrose | 2 | 0 to 30 days | \$200,000 |
| Paulding | Amateur Radio Emergency Communications Project | Funds are requested to acquire the infrastructure (land, towers, equipment) to build an emergency communications network to supplement and in some cases, take the place of, existing networks in case of disaster. County emergency management teams currently utilize a one-band two-way (shortwave) Ohio is prone to intense storms with damaging winds. If the primary tower is destroyed, emergency communication is limited to small hand-held radios which have an extremely restricted transmission range. This project will provide a communications network that links information between emergency management and law enforcement, thereby securing the safety of citizens and protecting our assets. Amateur radio operators are professional volunteers who have been an invaluable and unreserved communication resource for the citizens of Paulding and surrounding counties since World War II. The amateur radio operators have access to unlimited frequencies and the equipment necessary to use them. In the event of a catastrophic communications failure, operators will be well-positioned to assist, on all frequencies, relay information for regional emergency management and law-enforcement entities. | Paulding County Amateur Radio Club | 20 | 0 to 30 days | \$346,500 |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Paulding | FINAL REVISED - PCCL Computer Training Labs | The Paulding County Carnegie Library (PCCL) serves a rural population of about 20,000 in NW Ohio through the historic Carnegie library in Paulding and branches in the villages of Antwerp, Oakwood and Payne. County unemployment figures as of early 2009 are exceeding fifteen percent (15%). Proficient computer skills are fundamental for employment in today's world economy. The PCCL has identified a limited knowledge of even basic computer skills exists among adults in the county. Current computer training programs offered by the library are in high demand but with limited staff and antiquated computer equipment, the library lacks the tools to best deliver this vital training. New funding will replace and/or upgrade both hardware and software for twenty (20) computers system-wide as well as connect to broadband internet services. Up to three instructors will be hired to provide training for a variety of computer applications including word processing, spreadsheets and web site development. This free workforce training will provide the computer skills that will place the unemployed in a more competitive position when job-searching in the anticipated growing employment market. | Paulding County Carnegie Library | 3 | 31 to 90 days | \$86,600 |
| Paulding | PCCL Youth Computer Labs | The Paulding County Carnegie Library (PCCL) serves a rural population of about 20,000 in NW Ohio through the historic Carnegie library in Paulding and branches in the villages of Antwerp, Oakwood and Payne. Today's youth must be competitive in a growing online global economy. With limited academic classroom time and limited - if any - computer time at home, many youth do not have an opportunity to learn new computer skills and/or hone existing skills. This new funding will provide 11 computers system-wide, loaded with current and relevant software. An instructor will be able to provide training up to two classes per week per location for youth in a small, one-on-one setting. The PCCL Youth Computer Labs will be a vital component of the library's delivery of informational services while at the same time, improve the employment potential for our youth. Today's teens and young adults are voracious technology and creative. Their potential is limited only by the limits placed upon them. Knowledge of existing and emerging computer platforms will be mandatory for youth facing the anticipated growing employment market. This training program will provide access to that knowledge. | Paulding County Carnegie Library | 1 | 31 to 90 days | \$32,400 |
| Paulding | UPDATED PROPOSAL: PCCL Computer Training Labs | The Paulding County Carnegie Library (PCCL) serves a rural population of about 20,000 in NW Ohio through the historic Carnegie library in Paulding and branches in the villages of Antwerp, Oakwood and Payne. | Paulding | Update/Replace Patrol Car Fleet | This is a very tough time financially for our county, as well as others. We see this grant as an opportunity to finally be able to upgrade our current fleet of police cruisers. We have eleven vehicles in our day-to-day fleet. Of those eleven, I am requesting the listed funds to replace ten vehicles. Our current average miles per vehicle is 104,348 miles. The maintenance on our fleet is very taxing on the budget. The month of February 2009 alone was close to one-thousand dollars for vehicle maintenance, and that was a cheaper month than normal. With the price system, we should be able to purchase the vehicle's and equip them properly. | Paulding County Sheriff's Office | 0 | 0 to 30 days | \$300,000 |
| Paulding | Schroeder Associates Inc., Clean Fuels Ohio Partn | As an aging unit for nuclear projections or smartboards or audio systems. As I went through some of the schools around us, the rules changed and technology packages included many of the same. My teachers are trying to get kids prepared to compete for fewer jobs. The classrooms they are currently in cannot adequately prepare them as other schools because our classrooms do not have the technology that the new buildings have. This will have an extraordinary positive effect on the educational process at these schools as many staff are not adept to engage students due to no technology and therefore no professional development to learn staff how to properly engage the students they teach. We expect to be able to enhance the learning outcomes of students specifically in the area of multi-media, powerpoint, program development, interactive lessons with smartboard technology, video projection to smartboard and small learners. Interactive databases and individualized technology to hold all learners accountable. Thank you for your consideration of our project. | Clean Fuels Ohio | 5 | 0 to 30 days | \$67,500 |

| Paulding | Advanced Smart Grid Communications Project | This project is for a Rural Electric Utility to prepare for "Smart Grid" installation and to coordinate with current existing products and technologies. Smart communications and control systems to 17 rural communities to provide "Smart Grid" capabilities for load shedding response, radio communications to substations, wide area network (WAN) capabilities, GIS information and wireless "topology" for crew information and updates. The completed system will allow for remote control of the utility systems, provide immediate feedback for crew diagnosis and GIS locate information to identify outage areas or emergency response. This system will allow for the download of information directly to vehicles, in the field, to shorten response time and decrease outage time experienced by businesses and rural residents. | Paulding Putnam Electric Cooperative, Inc. | 3 | 31 to 90 days | \$500,000 |
| Paulding | Swinging bridge in Paulding County, Ohio | Construction of a solid hardwood type swinging bridge over Blue Creek in southern Paulding County to connect a missing link in the longest continuous loop hiking trail in North America called the Buckeye Trail. www.buckeyetrail.org. It will be the longest bridge of its type in Ohio and on the North County National Scenic Trail which stretches from North Dakota to New York consisting of 4,600 miles. | Buckeye Trail Association | 12 | 0 to 30 days | \$200,000.00 |
| Paulding | Antwerp "All" Veterans Memorial | A Veterans Memorial that will honor "all" veterans that are deceased, living or buried in any cemetery within the Antwerp Local School district boundary. This will include all 181 veterans in 18 old Civil War monuments at the local park. In a surrounding area, we will build a 1 mile 6 inch wide black granite tablets with "all" veterans names engraved, without rank or medals of achievement to maintain "all" men are created equal motto. These funds will restore the CW monument (\$16,500) build a 50 day viewing platform, benches, entrance, flood lights, flags and related equipment. This will be handicapped accessible. (est \$50,000). The engraved tablets cost approx. \$4,000 ea, and we will put markers on the tablets are engraved on both sides with up to 480 names. Many memorials honor the fallen and desperately so, but VETS want to also honor those that fought in those same conditions, but were instrumental to the peace, the productive citizens, & raise families. Folks from all over our visit this memorial to find the names of their relatives, friends, co-workers, and neighbors. Of abt. 1500, 330+ served in the Civil War. Please help us accomplish this most unique purchase scheduling/dispatch software for the Perry County Commissioners | V.E.T.S. (Veterans Equally recognized for Time Ser | 0 | 0 to 30 days | \$100,000.00 |
| Perry | Dist 5, PID 85875, PER Scheduling/dispatch softwar | Purchase 2 modified minivans and scheduling/dispatch software for the Perry County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$60,000 |
| Perry | Dist 5, PID 85785, PER 2 modified minivans and dis | Purchase 2 standard minivans for the Perry County Commissioners | Ohio Department of Transportation | 1 | 0 to 30 days | \$126,000 |
| Perry | Dist 5, PID 85786, PER 2 standard minivans | Purchase 2 standard minivans for the Perry County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$45,000 |
| Perry | S. Buckeye St./W. Main St. Intersection Upgrade | A local company (PCC AirTrak) is expanding and investing 4.5 million in the purchase of a new building, renovations and equipment. Their current additional is approx. 240 and is expected to grow to 300 employees. Due to the recent development in this area (new factory, bank, pharmacy and Village Mall) of our small community it is vital that we "control" the higher volume of traffic for the safety of the general public. We propose to install a "turning lane", traffic poles with signals and handicap sidewalk ramps at this four way intersection. Though we are a small community, we are rather fortunate to experience the "growth" in these trying economic times. However, our narrow intersection and road is desperately upgraded to handle the higher volume of traffic we anticipate from the "birth changes", the new development and safety of our pedestrians. The Village currently has approx. \$50,000 in their Permissive Tax Fund and could possibly commit a \$25,000 match towards the project. Thank you, Tom Collins, Administrator | Village of Crooksville | 240 | 31 to 90 days | \$150,000 |
| Perry | Dist 5, PID 83004, PER SR 93 22.46 | Replace the deck and paint the structure on the SR 93 bridge | Ohio Department of Transportation | 46.1 | 31 to 90 days | \$1,605,778 |
| Perry | Dist 5, PID 81221, PER US 22 06.77 | Resurfacing with related work on a portion of US 22 in Perry County | Ohio Department of Transportation | 46.1 | 31 to 90 days | \$1,606,035 |
| Perry | Water System Improvement Project | The project will replace undersized and improperly installed water lines along with the installation of a water booster station to provide reliable water service of adequate pressure to a section of the Village currently experiencing pressure and delivery problems. Approx. 14,000 feet of 6 inch waterline will be replaced. Please note Shawnee is a low income area that is currently experiencing high water rates. Plans are almost complete and will be submitted March 2009 to OEPA. | Village of Shawnee | 10 | 91 to 180 days | \$500,000 |
| Perry | Burr Oak Regional Water Dist. Tank 2 Replacement | The Tank 2 Replacement Project includes a new 680,000-gallon ground storage tank, site work, site piping and electrical and instrumentation work. The new water storage tank will replace an existing 100,000-gallon tank that was constructed in 1959. With 50 years of service, the existing tank has exceeded its useful life. In addition, the 100,000-gallon capacity provides less than 8 hours of storage for 4,500 residents. The new water storage tank will provide over 48 hours of storage and will greatly reduce the risk of water shortage during a fire event. The Project would replace approximately 10,000 feet of 18-inch waterline in the Village. The existing waterlines were installed in the 1960s and are failing. The Village is seeing an increase in water loss as a result of the failing waterlines. The new waterlines installed would include additional valves for system isolation and hydrants for the protection. | Burr Oak Regional Water District-ME Companies | 10 | 91 to 180 days | \$565,500 |
| Perry | Village of New Straitsville Waterline Replacement | The project includes construction of 5 miles of 8-inch gravity collection line, 0.62 miles of 1.5-inch to 6-inch force main, and an extended aeration treatment system designed to treat an average flow of 200,000 gal with a peak flow of 200,000 gal. The system will also include 3 lift stations and 2 grinder pumps and will serve 280 users within the Village of Corning and 22 users in Monroe Township, Perry County. Construction on the project was initiated in 2008 but to date only two waterline conditions assessment studies are needed to fund springtime rains. Funding these rains with conventional loan funds would be an undue hardship to a community already burdened with high utility costs. The Village of Thornville is located in the Northern end of Perry County in Thorn Township. The project is located throughout the Village. The current service capacity is adequate during dry weather, but inadequate during significant wet weather events. There are overflows at the lift stations that do not have the capacity to pump the wet weather flows. This allows raw sewage to enter the nearby streams. The project will reduce the wet weather flows to a level that will prevent the overflows from occurring. Investigative and remedial work is required to bring the system into OEPA compliance. Once the contractor comes upon an underground creek channel that is composed of a sandy granular bedrock that the trench excavated by the contractor. In addition, the underground creek channel is requiring a much larger amount of ODOT acceptable backfill material than estimated. This increase coupled with the discovery of an abandoned mine shaft in the project area has increased projects costs and expended all but a small amount of the contingency fund for the project. | Village of New Straitsville- ME Companies | 8 | 91 to 180 days | \$1,506,000 |
| Perry | Village of Corning Sanitary Sewer and Treatment Sy | The project includes construction of 5 miles of 8-inch gravity collection line, 0.62 miles of 1.5-inch to 6-inch force main, and an extended aeration treatment system designed to treat an average flow of 200,000 gal with a peak flow of 200,000 gal. The system will also include 3 lift stations and 2 grinder pumps and will serve 280 users within the Village of Corning and 22 users in Monroe Township, Perry County. This increase coupled with the discovery of an abandoned mine shaft in the project area has increased projects costs and expended all but a small amount of the contingency fund for the project. | Village of Thornville | 5 | 31 to 90 days | \$250,000 |
| Perry | New Sanitary Sewer Collection System & WWTP | The Village of Corning undertook this project at the urging of Ohio EPA to eliminate failing on-lot wastewater treatment systems, which resulted in the pooling of raw and partially treated sewage in roadside ditches, yards and in Monday Creek. Completion of the project will eliminate these health hazards and improve water quality in the creek. Corning will gladly provide any additional supporting materials requested to permit funding of this project shortfall with Stimulus Package funds. Project Outcomes: | Corning, Village of | 25 | 0 to 30 days | \$750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Perry | Upstream Rock Run Restoration | Closure of approximately 20 mine subsidence, opening of 6,000 linear feet of blocked drainages and installation of 1,500 linear feet of open drainage channels to restore habitat and improve recreational opportunities. | Rural Action (Monday Creek Restoration Project) | 20 | 181 days or more | \$750,000 |
| Perry | Officer retention | We are a small village that does not have the money to pay our officers. If we have an officer off we can not afford to replace that officer with another officer so this leaves gaps in protection for the village. We would use this money to help keep our department at a 24hr a day seven day a week department. This money would also be used to help pay officers to stay over and run traffic. | Crookville Police Department | 5 | 0 to 30 days | \$50,000 |
| Perry | Officer Safety | Would like to have the officers have computers in the vehicles with LEADS access for Officer safety. Working in Perry County our radios only work half the time and a lot of the time there is 1 Crookville Officer out as well as 1 County Officer. In our computer with internet/broadband access would allow officers the information Now, not having to wait for a dispatcher who is all ready on 5 or 8 squad runs while your working traffic or on domestic. Also would upgrade the radios can be used to MARS so that officer can be reached at all times and we can be help when needed. Current radios do not work in all places in the village and county. Both of these request would benefit the public in providing safety for the floor as well as safety for the community. | Crookville Police | 1 | 31 to 90 days | \$40,000 |
| Perry | County Road 56 Paving | Paving approximately 3 miles of County Road 56 (Jamestown Road) 2" thickness with portions milled and replaced. Striping and berm is also included. This is designated as a Federal aid route. | Perry County | 12 | 0 to 30 days | \$500,000 |
| Perry | Paving County Roads 2 & 30 | Paving approximately 12.5 miles of County Roads 2 & 30 (Honey Creek & Zion Roads) 2" thickness. Striping and berm is also included. | Perry County | 12 | 0 to 30 days | \$1,500,000 |
| Perry | Wilson St. Retaining Wall Repair | This project is to repair a deteriorated retaining wall that has a Village St. completely shut off (bankside) at one end, thus creating extreme hardship on six (6) or more Village residents to get to their work place. Wilson St. at this time has one end open for these residents to get to work and it is virtually "straight up". Not only is it near impossible during the winter months, it is a daily safety hazard as well. The topography in Crookville is hilly so to say the least and the street is one of our deepest. Currently we have approx. \$50,000 in our Parametive Tax Fund and have committed \$25,000 to a previous project submitted. We are asking the State for some assistance please. | Village of Crookville | 6 | 91 to 180 days | \$75,000 |
| Perry | Paving County Road 22 | Paving approximately 7.5 miles of County Road 22 (Tanner's Road) 2" thickness. Striping and berm is also included. | Perry County | 12 | 0 to 30 days | \$850,000 |
| Perry | Thornport-Thornville Wastewater Improvements | The project consists of an interconnect between the County and the Village of Thornville for treatment of sanitary wastes, upgrade of two lift stations, and sanitary sewer extensions around Buckeye Lake. Completion of this project will allow the County to abandon their existing treatment facility and allow for future growth and development of the area. The County was under EPA mandate to install sanitary sewers in the project area. | ME Companies, Inc. | 50 | 0 to 30 days | \$619,800 |
| Perry | Phase II Waterline Extensions | The project consists of approximately 20 miles of waterline extensions complete with services, valves, hydrants, and miscellaneous appurtenances. It is estimated more than 200 homes will have access to the waterline. The Perry County Commissioners have received hundreds of water service requests and have developed the project to improve the health and safety of the County as well as promote and sustain growth and industry. Water supplies in the area are of very poor quantity and quality. This lack of water has limited the growth and development of the area. This project will help Perry County provide the infrastructure needed to promote growth and sustain the tough economic times ahead. | Perry County- ME Companies, Inc. | 30 | 91 to 180 days | \$3,200,000 |
| Perry | County Road 21 Bridge | Replace a structurally deficient bridge on County Road 21 in Monroe Township, Perry County. | Perry County | 12 | 31 to 90 days | \$300,000 |
| Perry | County Road 88 bridge replacement | Replace a structurally deficient bridge on County Road 88 in Jackson Township, Perry County. This Ohio EPA is in the process of drafting Director's Findings & Orders to the Perry County Commissioners requiring them to address sanitary conditions in this area. The limited number of valves and low household income levels will necessitate the installation of underground lines for project construction, and selection of a system with low annual operation and maintenance costs. These underground lines will be served by this project. | Perry County | 12 | 0 to 30 days | \$300,000 |
| Perry | Rehoboth Sanitary Sewer Project | We have completed a preliminary analysis of possible wastewater systems for the area and have determined that the best alternative will be a conventional gravity collection system with lift station to pump the waste to the City of New Lexington for treatment. This alternative will provide low initial construction costs and minimal operation and maintenance expenses. Rehoboth has a great need for improvements and limited financial means. A completed project can only be successful if the residents can afford the end product. | ME Companies, Inc. | 30 | 181 days or more | \$750,500 |
| Perry | County wide Pavement Marking project | County wide pavement striping project throughout the county. Better visibility on paved roadways. | Perry County | 6 | 0 to 30 days | \$40,000 |
| Perry | Perry County Load Rating of Bridges | Cost associated with new Federal requirements for load rating of all bridges in the county. Estimated cost for consultants to perform load rating analysis. | Perry County | 4 | 0 to 30 days | \$50,000 |
| Perry | Moore's Junction Sanitary Sewer Project | The Moore's Junction area has had contamination problems for several years. Sampling completed by the Ohio EPA found several areas with high levels of coliform bacteria. While the area is known problem, enforcement action by the Ohio EPA will likely occur in the near future. Unfortunately, its location does not lend itself to pumping wastes to a neighboring community for treatment. Therefore, on-site treatment will be required. A preliminary analysis was completed of all possible wastewater systems for the area and it was determined that the best alternative will be a conventional gravity collection system with an extended aeration treatment system. In addition to initial construction costs, we have also considered the possibility of future sewer systems using the Moore's Junction facilities for treatment. Other areas such as Marietta, Caldwell, Pipersville and the Alpha (Blairstown) school package plant may be able to pump wastes to a new plant. This will result in a larger customer base and possibly lower cost rates. | ME Companies, Inc. | 30 | 181 days or more | \$1,477,100 |
| Perry | Water Treatment Plant Project | The project consists of a new water treatment facility for the northern portion of the County's water distribution system. Currently the County purchases water from the Village of Thornville. However, growth in the area will soon exceed the capabilities of the existing Thornville plant. It is estimated the County will have more than 1,000 customers in this area in the near future. In order to keep up with growth in the northern portion of the County, an alternate water supply will be needed. The Perry County Commissioners have developed the project to improve the health and safety of the area as well as promote growth and industry. This project will help Perry County provide the infrastructure needed to promote growth and sustain the tough economic times ahead. | Perry County- ME Companies, Inc. | 75 | 181 days or more | \$4,500,000 |
| Perry | Junction City Waste Water Treatment Plant Improvem | This project consists of the construction of three lift stations, sludge digester improvements, clarifier upgrades, modifications to the old chlorine contact tank, and purchase of new lab equipment. Also included in the project is an inflow and infiltration study to determine the source of peak wet weather flows. | ME Companies, Inc. | 30 | 91 to 180 days | \$300,000 |
| Perry | Junction City Sanitary sewer Extensions | Sanitary Sewer Extensions. This project consists of extensions to the existing sanitary sewer system to approximately 6 homes that were not included in the original sewer project. | ME Companies, Inc. | 30 | 91 to 180 days | \$210,000 |
| Perry | Junction City Phase I Storm Sewer Replacement | Phase I Storm Sewer Replacement. This project consists of the replacement of approximately 4,000 feet of failing storm sewers complete with catch basins, curb and gutter, and paving. | ME Companies, Inc. | 30 | 91 to 180 days | \$750,000 |
| Perry | Reconstruct runway | Reconstruct runway | Perry County Airport Authority | 8 | 31 to 90 days | \$454,000 |
| Perry | Officer retention | This money would be used to afford the Village to pay the officers a wage that they can live on. Most Officers make under 10 dollars an hour with 2 of the 5 making 8.86 hour. The Officers receive no overtime for hours worked and they provide most of their own equipment. If awarded the money the village may not have a turnover in the department and will be able to keep the residents safe and happy. Traffic officers who are worth these Officers are working hard fighting crime with little technology to assist them and with almost 0 back up when needed. Perry county has 1 cop on an on site and the village is one of the poorest in the county. They are unable to handle calls for service all over the county in every village as well as township when the calls are high and the manpower low. Our crime is high and our drugs are taking over. We very seldom see a Trooper as they are out of Lancaster. Thank you for your consideration. | Crookville Police Dept. | 5 | 0 to 30 days | \$100,000 |
| Perry | WWTP Sludge Dewatering Improvements | The construction of the sludge dewatering facility would give the City three options for the disposal instead of the one option that they have at the present time. The sludge dewatering facility would save the City money when it comes to disposing the dewatered sludge. | City of New Lexington | 10 | 91 to 180 days | \$638,000 |
| Perry | Jacob Miller Tavern (built in 1807) Restoration | NAME OF SITE: Jacob Miller Log Tavern (built 1808) WORK PROPOSED: Restoration of building, including exterior and interior term log logs & seating & drinking and renovation of adjacent public rooms. COST ESTIMATE: \$320,000 PROPOSED START DATE: April 1, 2009 LOCAL OFFICIALS AWARE OF THE PROJECT: Mayor, William Schreiber. | Historical Society of Perry County | 75 | 31 to 90 days | \$325,000 |
| Perry | Laser/LIDAR | The Jacob Miller Tavern is a two story hewn log structure built in 1806 by Somerset's co-founder. It is situated within the Somerset Historic District, which was listed on the National Register in 1975, and is on US Route 22, which runs along the old Zane Trace and Stagecoach Road. It is likely the only extant two story stone building on the road that served as the main thoroughfare for settlers entering the Northwest Territory during Ohio's early statehood and the oldest log tavern in Ohio. Interestingly, our researchers have also discovered that it was the boyhood home of Civil War General Philip Sheridan, whose father purchased the tavern in 1832. | Crookville police dept. | 5 | 31 to 90 days | \$15,000 |
| Perry | City of New Lexington Resurfacing Project | This money would be used to purchase LIDAR's for the use of speed reduction in the village. Not only would the purchase of these units help maintainers working, it would reduce the number of accidents occurring on state routes that run through the village. Traffic officers who are worth improve driver awareness as well as driver safety while on our roads. Any radars/lasers purchased would be made in america by american companies and american workers. | City of New Lexington | 10 | 31 to 90 days | \$500,000 |
| Perry | new handicapped accessible City Hall/Fire Station | Project involves the resurfacing of various roadways. Project required to improve safety and health of the community. | New Lexington | 45 | 91 to 180 days | \$3,000,000 |
| Perry | Police Retention | City Hall is currently a building that was condemned over 20 years ago. There is no handicapped accessibility. We have to go to the fire department to meet with any one who cannot walk up steps. There is heating/cooling problems, space issues, and basically safety problems associated with the building that are currently occupying. The City has purchased the lot (old Car dealership) next door. We are currently going to bid out 1 phase of this project but, we do not have the funding available for the completion of the entire project. We do not have the equity for a loan. We desperately need help to build the fire, since the lot of this project (due to safety issues our Emergency services have moved out of City Hall) the building that was purchased for us to renovate to serve the community have worked on this project for over 4 years and I need help financially. We have the State approved plans ready to go if we just had the money to new to renovate please help this struggling community. Thank You. Mayor James Conrad | Village of Roseville | 1 | 0 to 30 days | \$30,000 |
| Perry | Sanitary Sewer Pump Replacement Project | The Village of Roseville has a population of 1096 (2000 Census) with a total of 3.5 pumans. Our equipment is outdated, therefore the Village doesn't have sufficient funds to maintain both the equipment and police officers. \$30,000 would help retain one police officer's position for an additional 5-6 years. Putting around \$5,000 dollars toward a salary for the next 5-6 years will help maintain/repair equipment the officers are dependent on here. Without the assistance for retain the Village is unable to keep the small amount of police officer working. | Village of Roseville | 50 | 31 to 90 days | \$845,600 |
| Perry | Phase II: Tecumseh Theater Restoration | The Village operates and maintains a Regional Sewer Plant for the Village of Roseville and Crookville. Roseville has 6 pump stations that overflow in residential basements and on the ground was the Village's current water source is during wet weather. The Project includes replacement of all pumps, upgrade controls, demolition of an existing building, install fence and perimeter lighting. The total \$850,000 of committed funds from Ohio Public Works Commission, and as a waiting to hear from ARC in the amount of \$200,000. This is a public health issue due to low average loading up lift stations. The Village has all permits needed and engineering completed. The Village has all permits needed and engineering completed. An exterior elevator tower to meet code requirements and assure accessibility. Restored interior space will include the second floor theater space and the third floor smart office space resulting in job creation (temporary construction jobs and permanent jobs at theater and smart office locations). This proposed (final) phase of building restoration follows the recent (2008) completion of the exterior restoration, to Secretary of Interior, Secretary of the Tecumseh Theater building, which resulted from the award of a Slave America's Treasures grant administered through the National Parks Service and a grant from Ohio's State Appalachian Grant program. Phase I work can begin as soon as funds are available. The recent award of a Preserve America planning grant assures that building specifications and construction documents necessary to proceed to construction will be completed by May 31, 2009. The Tecumseh Theater is the anchor building in the historic Main St. district, the gateway community to the | Sunday Creek Associates | 10 | 31 to 90 days | \$1,189,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------------------|----------------|--------------------|---------------------------|
| Perry | Historic Main St., Shawnee | Restoration of six historic buildings and partial implementation of a streetscape/green space plan in the Main St. district, named to the National Register of Historic Places in 1976, named a Preserve America community in 2008, and awarded a Preserve America Planning Grant in 2008. Rehabilitation plans are specific to each property, as conditions vary and include the following: roof/ceiling/structure, double overhead porch, stabilize structure, roof replacement, building exterior siding and trim replacement, interior finishes, utility installation/upgrade in all properties to smart office specifications, window/door replacement, hvac systems, masonry repair, interior/exterior paint. This project complements the restoration (in progress) of the Tecumseh Theater property, anchor building in the historic Main St. district, a gateway community to the Wayne National Forest and the Little Cass region. The project will consist of demolition of existing cladding structure, constructing a new pole barn, and laying new sewer and water lines. The Pole Barn will store equipment, salt, and the street department's office. This project will create approximately 20 jobs immediately. Building plans are complete. | Sunday Creek Associates | 15 | 91 to 180 days | \$2,034,000 |
| Perry | Village of Roseville Street Department Pole Barn | Replacement of approximately 8000 Lineal Feet of Water Main, replacement of 175 customer connections, replacement of 20 existing hydrants and the addition of 20 new hydrants. Project required to improve safety and health of the community. | Village of Roseville | 20 | 31 to 90 days | \$140,000 |
| Perry | City of New Lexington Water Distribution System Im | The project involves the rehabilitation/development of pump stations as described below: <ul style="list-style-type: none"> Pump Station 1: Replace pumps, upgrade controls, demolition of the existing building, install fence and generator. Pump Station 2: Replace pumps, upgrade controls, demolition of the existing building, install fence and generator. Pump Station 3: Upgrade controls and install generator. Pump Station 4: Replace pumps, upgrade controls, demolition of the existing building, install fence and generator. Pump Station 5: Replace pumps, upgrade controls, demolition of the existing building, install fence and generator. Main Pump Station: Replace pumps, upgrade controls, demolition of the existing building, install fence and generator. | City of New Lexington | 10 | 31 to 90 days | \$500,000 |
| Perry | Roseville Wastewater Pump Station Rehab Project | The proposed project will consist of new sewer lines and a conventional biologically engineered single sludge wastewater treatment plant. Seventy-three new connections will result from the project and will address local issues with home sewage treatment system failures. This project is necessary due to unsanitary conditions in the streams of the village, but is not cost effective without significant grants funds. | Roseville, Village of | 20 | 31 to 90 days | \$750,000 |
| Perry | Wastewater Collection and Treatment System | Contract agency licensed through the Department of Job and Family Services, serving adolescent females who have been removed from their homes due to drug and alcohol issues, truancy, sexual abuse, etc. This agency would primarily serve the application courses, where secondary support, drop-out rates and ADHD issues are prevalent. This group home would contract with a licensed mental health agency for counseling. It also has an on-site school which contracts with Perry County ESC for educational requirements. This would bring about 15 jobs to Perry County, which is a national achievement award winner with higher test averages. | Village of Glenford | 25 | 31 to 90 days | \$2,116,800 |
| Perry | Residential group home for adolescent females | PLANTING OF SEEDLINGS FOR RE-SALE TO A VARIOUS CUSTOMER BASE CONSISTING OF BUT NOT LIMITED TO: HOMEOWNERS, LANDSCAPERS, EXISTING PLANT SELLERS. REQUIRED FUNDS WOULD INVOLVE EQUIPMENT PURCHASES AND AN ADDITIONAL CROP. | Perry County Group Home | 10 | 31 to 90 days | \$250,000 |
| Perry | PURCHASE TREE SEEDLINGS FOR RE-PLANT AND SALE | The overall project consists of installing approximately 8 miles of 8- and 12-inch diameter waterline, constructing a 200,000-gallon raw water storage tank, and construction of a water booster station. The work also includes some minor modifications that will be made at the Crooksville Water Treatment Plant. The Project will allow the Village of Crooksville to purchase bulk drinking water from the Perry County General Water District and is doing so eliminate violations of Federal Drinking Water Laws. | T&D TREE FARMS LLC | 2 | 0 to 30 days | \$15,000 |
| Perry | Crooksville Waterline Interconnect with Burr Oak R | Hopewell Township wants to construct a modern day bus station with office space, sleeping quarters, and a kitchen on a parcel of property we purchased one year ago for a new station. The property is located in Glenford, Ohio. Please consider our request, our county is often forgotten by more populated parts of the state and will greatly appreciate any help. | Village of Crooksville- MC Companies | 15 | 0 to 30 days | \$1,800,000 |
| Perry | Hopewell Township Fire Station | Hopewell Township along with the Village of Glenford wants to construct a library/community center. The library would be outfitted with high speed internet which is not available in most areas of the township. Unemployed residents could use computers and books for job search. School children could check out books and take walking trips across the street to the library. The property is already owned by the Village of Glenford. | Hopewell Township, Perry County | 12 | 91 to 180 days | \$650,000 |
| Perry | Glenford/Hopewell Township Library | This project will provide engineering, drainage and paving for approximately 3070 square feet of parking for the Nex Lexington Head Start facility. This property currently has a gravel and has inadequate drainage. If floods and becomes hazardous when there is any type of inclement weather. It is covered with a solid sheet of ice when freezing temperatures hit or with packed snow or mud when other weather strikes. Over 138 children are served at this site with about half of them dropped off by parents who must navigate this lot/corridor. There have been numerous accidents due to hazardous nature of this parking lot. There are no other parking options in the area. | Hopewell Township, Perry County | 6 | 31 to 90 days | \$200,000 |
| Perry | HAPCAA NL Parking Improvement Project | This project would provide and help obtain local jobs for an engineer, machine operator and the local asphalt company. This project will establish GIS baseline mapping to be used by several departments within the county. This project would provide infrastructure for new residents, potential business and assistance in locating public utilities. The mapping would be used by the Engineer to issue new home addresses, update county highway maps, bridges, etc. The auditor as well as the Treasurer would use this for the location of parcel identification and issuance of tax values. Locating properties new and old for assessment and tri-annually updates, locating gas and oil wells and businesses and weights and measures. The 1-1 weights and measures would use GIS to locate emergency routes and dispatch units to an appropriate response time as well as law enforcement officers for public safety. Perry County Health Department would utilize the system for location of environmental compliance issues and total water system inspectors for public health safety issues. E&M and floodplain coordinator would also use the system to prevent construction in the flood plain and mitigate areas which are prone to flooding. Training and implementation of the system will be provided through the County Engineer's office. | Hocking Athens Perry CAA | 4 | 31 to 90 days | \$42,000 |
| Perry | GIS Mapping for 9-1-1, Auditor, Engineer other rel | This project will provide 6 weeks of preschool enrichment for 40 low income children ages three to five. Children will be transported to and from the center each day and while at the site be provided with a developmentally appropriate preschool enrichment program that focuses on literacy and math skills. Each child will also receive a breakfast and lunch while at the center as well as participate in other enrichment activities. | Perry County Commissioners Office | 30 | 31 to 90 days | \$650,000 |
| Perry | HAPCAP NL Preschool Enrichment | Our research has shown that children provided with summer enrichment activities enter the public school system with a better retention of skills than those of their peers who had no summer enrichment. Many of these same children frequently come from homes that experience severe food shortages during the summer months. Food provided by this program will lessen the financial burden on parent faced with providing meals for the child in the summer that may have been previously provided by a preschool program. | Hocking Athens Perry CAA | 12 | 0 to 30 days | \$54,000 |
| Perry | HAPCAA CR Preschool Enrichment | 4 staff that would other wise be unemployed during the summer would be hired for this program. This would include two teachers, a bus driver and a bus monitor. | Hocking Athens Perry CAA | 4 | 0 to 30 days | \$18,000 |
| Perry | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all these services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Perry | Feedlot expansion | Repair and update current feeding operation of dairy shears and buying stockers to finish. Project will include buying of land, building new and existing current facilities purchase of new feeding equipment and any needed equipment to make operation self sufficient with construction plans 10 to 15 jobs would last 6 months with up to 5 being full time after construction is finish. | Bashore Farms | 10 | 31 to 90 days | \$750,000 |
| Perry | Appalachian job and business development | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all these services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Dirty Tracks, Inc. | 40 | 0 to 30 days | \$1,500,000 |
| Perry | In car data 911 systems | We would use this funding to obtain 5 patrol in-car laptops. This project would greatly increase officer efficiency by expediting duties such as background checks and reporting, and would also expedite officer duties related to their investigations. Obtaining patrol division laptops would not only attempt to increase officer safety. A lot only one they are hands-on response for a officer who is being called to a crime scene, they also expedite patrol investigations, and provide GPS locating capabilities in the event that a officer requires assistance. | Village of Crooksville Police Dept. | 0 | 0 to 30 days | \$30,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Perry | St Rt 93/School Drive Traffic Signal | A traffic light needs installed on St Rt. 93/School Drive to eliminate traffic hazards especially during peak times of school hours and after school hours. Several accidents have occurred at this intersection, with one resulting in a fatality. ODOT did a traffic study a few years ago and deemed this a necessary project, but would not fund this. | Crooksville Exempted Village School District | 20 | 0 to 30 days | \$800,000 |
| Perry | PER Capitalized Maintenance, PID 86106 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through ODOT. | Ohio Department of Transportation | 0 | | \$38,952 |
| Perry | Village of Corning Water Infrastructure Improvemen | Replace 1500' of waterline of various sizes and approx. 300 waterline services. | Village of Corning | 10 | 91 to 180 days | \$500,000 |
| Perry | Norfolk Southern Grade Crossing Improvements on Po | This project is for improvements to grade crossings on Norfolk Southern's Pocahontas Division in southeastern Ohio. This request is made in order to improve the safety of the crossings for the public and enhance the life of the crossings. The estimate included 4 new full depth concrete grade crossing surfaces: 2 at 48 feet and 2 at 40 feet in length. I am not exactly sure about narrowing down the county or zip code as the project will be spread out. I previously submitted this but made a mistake on the estimate section. Thank you. | Norfolk Southern Corporation | 20 | 91 to 180 days | \$154,800 |
| Perry | Norfolk Southern Grade Crossing Improvements in Oh | This project is for improvements to grade crossings on Norfolk Southern's Pocahontas Division in southeastern Ohio. This request is made in order to improve the safety of the crossings for the public and enhance the life of the crossings. The estimate included 4 new full depth concrete grade crossing surfaces: 2 at 48 feet and 2 at 40 feet in length. | Norfolk Southern Corporation | 20 | 91 to 180 days | \$155,000 |
| Perry | Maintaining our staff while we update our funeral ho | This first thing that the money will be used for is to maintain my staff, my wife and I struggle every week to meet payroll, there is absolutely no staff for funeral directors. We provide services and care of people can't pay. We have very old funeral homes that need some major renovation and I can't maintain my staff and renovate both. This renovation will make our facilities better as well as more energy efficient to the fully renovated furnace updates. I had a major back surgery in 1990 and it is a struggle every day to make ends meet, I physically can't do anymore, but I am trying. New furnaces, handicapped entrances and restrooms, energy efficient windows, to mention a few, as well as help to keep and maintain my staff. | Shuffler Funeral Home | 3 | 0 to 30 days | \$500,000 |
| Perry | Village of Junction City - Water Meter Replacement | The proposed project will include the installation of 380 meter pits within the Village. Existing meters are located inside homes. The Village is experiencing high water loss that is suspected of coming from service line leaks. Installation of meters at the water main will allow the Village to isolate leaks and make the necessary repairs. The project will include meter pits, setters, meters, curb valves, and miscellaneous appurtenances. | Village of Junction City- ME Companies, Inc. | 20 | 31 to 90 days | \$450,000 |
| Perry | Elevated Water Storage Tank Repainting | Complete repainting of the existing elevated water storage tank that provide potable water storage for the community and surrounding area. It presently is rusting and corroding thus causing a health and safety concern for the Village. | Village of Thornville | 5 | 0 to 30 days | \$300,000 |
| Perry | Street Repaving | Complete repaving and repaving of existing Village streets that are in poor condition. Also include catch basin replacement and manhole modifications to collect storm water from storm sewer system and out of sanitary sewers. | Village of Thornville | 10 | 31 to 90 days | \$700,000 |
| Perry | Gas to Electric to Fertilizer | Multi: Investock digester in connection with landfill gas to share elect. interconnect plus use the heat from plant to evaporate excess water off too make row crop fuel, with zero fossil fuel. 25-10-6 ammonia plus collection credits and green credits on elect. sales and fert. sales for half the state of OH, this has never been done before, not inverting the wheel here just putting low technologies together, and sell 1 megawatt of elect. per hour plus Waste Management is also behind me Thank You | Krofft Farms | 70 | 181 days or more | \$2,000,000 |

| Perry | Gas to Electric to Fertilizer | Multi: Investock digester in connection with landfill gas to share elect. interconnect plus use the heat from plant to evaporate excess water off too make row crop fuel, with zero fossil fuel. 25-10-6 ammonia plus collection credits and green credits on elect. sales and fert. sales for half the state of OH, this has never been done before, not inverting the wheel here just putting low technologies together, and sell 1 megawatt of elect. per hour plus Waste Management is also behind me Thank You | Krofft Farms | 70 | 181 days or more | \$4,000,000 |
| Perry | Compressors | 1. Reduce energy impact 2. Change plant air compressor systems for a more energy efficient solution | Ludowici Roof Tile Company | 15 | 31 to 90 days | \$90,000 |
| Perry | Lights | Improve lighting systems 1. Reduce energy impact 2. Change plant light systems for a more energy efficient solution | Ludowici Roof Tile Company | 15 | 31 to 90 days | \$75,000 |
| Perry | Solar | Develop integrated solar offering 1. Develop partnership on PV panels 2. Develop sales on solar solutions a. Identify partners / develop capabilities b. Further develop city file for integrated solution c. Launch product | Ludowici Roof Tile Company | 25 | 91 to 180 days | \$650,000 |
| Perry | Small kiln | 1. Develop ability to develop color 2. Build up know-how, expertise and labor skills a. Buy small kiln b. Develop product development processes c. Train workforce | Ludowici Roof Tile Company | 15 | 91 to 180 days | \$20,000 |
| Perry | CNC | 1. Develop ability to replicate historic tiles 2. Build up know-how, expertise and labor skills a. Buy CNC equipment b. Develop product development processes c. Train workforce | Ludowici Roof Tile Company | 10 | 0 to 30 days | \$50,000 |
| Perry | Used tile | 1. Develop a green supply chain 2. Develop company activities and strength 3. Increase / sustain jobs a. Purchase used material inventory b. Develop team and infrastructure c. Launch marketing campaign nationwide while leveraging our current sales organization | Ludowici Roof Tile Company | 25 | 91 to 180 days | \$1,100,000 |
| Perry | Ludoslate | 1. Double volumes (and jobs) through improved product affordability 2. Promote a green, sustainable roof a. Invest in additional equipments (presses and kilns) b. Market the product heavily | Ludowici Roof Tile Company | 20 | 0 to 30 days | \$1,050,000 |
| Perry | Recycled tile | Develop a manufacturing process for more than 10% recycled content 1. Offer a recycled products for roof tiles. 2. Promote a unique solution for a green, sustainable roof a. Complete engineering of product b. Develop supply chain c. Invest in equipments and buildings to produce those tiles d. Launch marketing campaign nationwide while leveraging our current sales organization | Ludowici Roof Tile Company | 15 | 91 to 180 days | \$575,000 |
| Perry | Wall application | Introduce and promote the use of clay tile on building walls. Penetrate a large and new market segment for Ludowici. Complete engineering of systems. Design specific clay tile for the application. Increase / sustain jobs. Invest in equipments to produce those tiles. Promote a green, sustainable wall cladding solution. Launch marketing campaign nationwide while leveraging our current sales organization | Ludowici Roof Tile Company | 15 | 31 to 90 days | \$350,000 |
| Perry | Water Line Replacement | Replace 10,300 feet of water line | Village of New Straitsville | 12 | 91 to 180 days | \$200,000 |
| Perry | Warehousing | Develop IT capabilities within the plant for a more effective, seamless manufacturing process Train employees on IT terminals for product tracking, quality and performance indicators During winter times, and despite our efforts, Ludowici Parking lot is a safety concern. Paving the parking would further limit that risk therefore lowering the risk of injuries. | Ludowici Roof Tile | 2 | 91 to 180 days | \$50,000 |
| Perry | Parking lot | Cost is a rough estimate at this stage | Ludowici Roof Tile | 1 | 0 | \$50,000 |
| Perry | Crown Presses | Improve company industrial capabilities and know how in the development and manufacturing of historic roofing tiles. Project will include: - Design of new presses - Purchase of new presses to local manufacturer - Training of employees | Ludowici Roof Tile | 10 | 31 to 90 days | \$200,000 |
| Perry | Fitness center | Ludowici Roof Tile employees represent a cross section of the local population which would benefit from a more structured fitness/wellness program. Our health care costs related to pulmonary and orthopedic problems are significant and could be reduced by the provision of an on-site annual health screening and the assistance of a site located fitness program for those determined to be capable of participation. We also have property adjacent to our main facility which includes a lake and a baseball field which belong to Ludowici Roof Tile. A walking/jogging trail could be created with appropriate fitness stops for use by all employees. The estimated cost for the creation of such a trail with proper drainage, edging and designated fitness stops would be \$40,000. | Ludowici Roof Tile | 1 | 31 to 90 days | \$40,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Perry | Health screening | Our health care costs related to primary and orthopedic problems are significant and could be reduced by the provision of an on-site annual health screening. The provision of an annual on-site health screening program is available through our health care provider, Anthem Blue Cross/Blue Shield at a cost of approximately \$15,000. | Ludowici Roof Tile | 1 | 31 to 90 days | \$15,000 |
| Perry | Water District System Improvements and Extensions | The service area for this project is located in a financially distressed area of Perry County. It includes the installation of approximately 35,000 linear feet of 6, 3 and 2 inch waterlines and appurtenances. The outcomes of these improvements and extensions will be to serve additional customers, to circulating water throughout the system, as well as to insure water supply during natural disasters and during emergencies. | Southern Perry County Water District | 75 | 91 to 180 days | \$830,000 |
| Perry | Rock Run Booster Station Upgrade | Electric provider for main pumping station is in the process of changing incoming service to three phase power. Inside electrical components must be changed and upgraded to accept three phase power. Quick connect and generator installation will eliminate future problems due to power outages that shut down the station and create an unsafe situation for customers served by the water system. The proposed project will improve safety and health issues for customers and also increase utility cost as the result of a more efficient electrical system. | Old Straitsville Water Association | 8 | 31 to 90 days | \$75,000 |
| Perry | Roseville Water Plant Improvements | The Ohio EPA is requiring the Village to upgrade the water treatment plant for safe and reliable drinking water. The upgrades include the following: Replacement of Automatic valves and controls that have been removed due to failure and replaced with manual valves. Containment for Chemicals New Water Meter In line Ph-Row, SCU, BEA, Reactor, Filter COD delivery system with GAC/DA Control New Sludge Pumps Clean Lagoons Lime Feeder | Village of Roseville | 7 | 91 to 180 days | \$175,000 |
| Perry | Sanitary Lift Station By-Pass | Project will consist of engineering analysis, final design, construction inspection and installation of approximately 4.5K feet of gravity sanitary sewer line to eliminate two municipal sanitary sewer lift stations. Economic benefits resulting from the project are: 1) Creation of local jobs during the duration of the project (primarily employment of engineers and consultants, Employment of contractors and construction workers following design of proposed sewer). 2) Decrease in municipal electric consumption. 3) Decrease in potential sewer overflows to surrounding environment. 4) Decrease in required maintenance from municipal employees. 5) Decrease in potential failure due to terrorism and/or vandalism (increase in security). 6) Increase in reliability during power outages and other emergencies. 7) Increase in tributary area for gravity flow of sanitary sewer to the municipal wastewater treatment plant, creating a more efficient economic developmental area in surrounding community. | Village of Somerset | 20 | 31 to 90 days | \$298,255 |
| Perry | Communication Equipment | In order to effectively communicate with Fire, EMS, and State Agencies, the Somerset Police Department is in need of the following equipment. We would like to install two mobile, and three portable units. | Somerset Police Department | 9 | 0 to 30 days | \$25,000 |
| Perry | Purchase of Backhoe Equipment | The project submitted will allow the Pleasant Twp. Trustees to purchase a much needed 2 wheel drive, John Deere backhoe. We do not have a backhoe at this time. This would help maintain the tap, roads, by installing culverts, clearing ditches, tree removal, and grading gravel roads. Our area has been stricken with plant closing, layoffs and foreclosures. Asking for a tax levy would not be expected in this area, at this time. Better roads in our area is a great advantage needed to help create jobs and maintain or add more to the population that is already in our area. If you please consider our application. Thank you, Shane J. Alder | Pleasant Twp. Trustees | 1 | 31 to 90 days | \$20,000 |
| Perry | Manufactured developments | Assisted living housing Nationally and internationally, There exists an immediate need for affordable, assisted living housing to care for people who cannot stay safely at home, yet do require skilled nursing care. This need has created an immediate and high demand for a program similar to HUD section 6, #236 and #202 for senior housing. Low income, Middle class and homeless individuals simply cannot afford the current, existing assisted living facilities developed for the rich or affluent. Providing this program would greatly reduce the number of people entering nursing homes before they need full scale nursing care. This would result in substantial savings in health care costs while providing residents with a meaningful and dignified lifestyle. New jobs will be created immediately and enduring over the sixty to eighty year life of the facilities. This is a long-term investment/employment program that benefits all citizens. Thank you | Act Development | 400 | 31 to 90 days | \$22,515,000 |
| Perry | water for all | Water in Adams is Ryan this spring a water project from Crooksville is coming within a mile from my home just like every other project has but again myself and other are not going to get it. There are six towns around us and no one will give us water. Are water here is bad from all the mining from the past years and people start drink it. People are getting sick from it so I propose an extension from the new water project that is coming from Crooksville. This extension would create work for our area and make it a safer place for our family and ours. Thank you Ryan Harrison | myself | 100 | 0 to 30 days | \$100,000 |
| Perry | SHELLY FLEET | This project would restore and retain 14 jobs and would reduce PM 2.5 and TSP emissions in the non-attainment county/counties of Perry by re-powering Tier 0 and Tier 1 Caterpillar construction equipment with certified Tier 3 engines. In total, this project would remove 4.9 tons of PM 2.5 and 79.9 tons of NOx in a five year period. Over the next five years, the average cost per ton of PM 2.5 removed from our air will be \$143,667 and the average per ton of NOx removed from our air will be \$8,756. | OHIO CAT | 1.4 | 0 to 30 days | \$525,000.00 |
| Pickaway | Sheriff's Office Facility Improvement | This work will begin within one week of funding. Construction of 20 new jail pods to house 20 additional inmates. Currently we are operating at 20% over capacity. In addition, the City Jail (Circleville) may close resulting in inmates transfer to our facility. This project would create an estimated 25 new construction jobs, follow by the creation of 8 - 10 new permanent Corrections Officers jobs. If out of county inmates were to be housed, it has the potential of saving \$500,000 in new funds which could be used to renovate our 15 year old facility which has many areas in need of repair and upgrade. Purchase 4 light transit vehicles with a sensor body for the Pickaway County Community Action | Pickaway County Sheriff's Office | 8 | 181 days or more | \$3,750,000 |
| Pickaway | Dist 6, PID 85789, PIC 4 light transit vehicles | Purchase 5 modified minivans for Pickaway County Community Action | Ohio Department of Transportation | 1 | 31 to 90 days | \$180,760 |
| Pickaway | Dist 6, PID 85876, PIC 5 modified minivans | Purchase 4 standard minivans for Pickaway County Community Action | Ohio Department of Transportation | 1 | 31 to 90 days | \$160,000 |
| Pickaway | Dist 6, PID 85877, PIC 4 standard minivans | Dispatch/scheduling software for the Pickaway County Community Action | Ohio Department of Transportation | 1 | 31 to 90 days | \$90,000 |
| Pickaway | Dist 6, PID 85787, PIC Dispatch/scheduling software | Purchase 5 computers and software for Pickaway County Community Action | Ohio Department of Transportation | 2 | 31 to 90 days | \$102,000 |
| Pickaway | Dist 6, PID 85788, PIC Computers and software | Bridge rehabilitation | Ohio Department of Transportation | 1 | 31 to 90 days | \$10,800 |
| Pickaway | Dist 6, PID 25718, PIC US 23 3.21 | This project will provide expanded wastewater treatment capacity. The objective will be to double our processing capacity. This capacity is currently 600,000. This will allow us to create jobs in the industrial center of the village. The Village of Ashville is within 5 miles of the largest identified source of jobs in Central Ohio, Rickenbacker's Intermodal facility. It is reasonable with all projections that have been done that this area will be developed. It is a great place to see jobs and a place to live. Ashville's Vision Statement is "Remembering our rural heritage, the Village of Ashville will be a strong & friendly community, offering an enhanced quality of life achieved through progress & teamwork. It is a place where people will want to live, and businesses will want to locate." | Village of Ashville | 50 | 181 days or more | \$6,600,000 |
| Pickaway | Ashville Mudrun Trunk Sewer Line | A 14,000-foot by 12 to 30 inch sanitary line will provide sanitary service to 1,345 acres of Limited Industrial and 842 acres of residential that is currently unsewered. Will have access to CSX, Norfolk & Southern. The Rickenbacker Intermodal is within 5 miles of location. 50 manholes with one pump station, 2000 of force main. This project will connect with our expanded wastewater treatment capacity. The objective will be to double our processing capacity. This capacity is currently 600,000. This will allow us to create jobs in the industrial center of the village. The Village of Ashville is within 5 miles of the largest identified source of jobs in Central Ohio, Rickenbacker's Intermodal facility. It is reasonable with all projections that have been done that this area will be developed. It is a great place to see jobs and a place to live. Ashville's Vision Statement is "Remembering our rural heritage, the Village of Ashville will be a strong & friendly community, offering an enhanced quality of life achieved through progress & teamwork. It is a place where people will want to live, and businesses will want to locate." | Village of Ashville | 3000 | 181 days or more | \$8,400,000 |
| Pickaway | Ashville Manhole Access Point Improvement Project | The project will provide access to storm and sanitary system that are now inaccessible. This access would reduce the problems created I & I and/or connections that are hazardous for other storm or sanitary line. These types of problems that are not easily accessible can have significant environmental ramifications. Ashville's Vision Statement is "Remembering our rural heritage, the Village of Ashville will be a strong & friendly community, offering an enhanced quality of life achieved through progress & teamwork. It is a place where people will want to live, and businesses will want to locate." | Village of Ashville | 20 | 91 to 180 days | \$350,000 |
| Pickaway | Wacker Drive Sanitary Sewer Replacement Project | Logan Elm Village is a residential and business area adjacent to Rt. 23 in Circleville, OH. There will be approximately 8,000 ft. of 8" sanitary sewer rehabilitation as well as a thorough investigation to reduce or eliminate surface water inflow and infiltration per CEPA directive. | Earnhart Hill Water and Sewer District | 5 | 31 to 90 days | \$250,000 |
| Pickaway | Renewable Energy Sources | American Wood Fibers in Circleville takes wood waste from companies in the housing industry such as cabinet makers, flooring companies, and other manufacturers and converts that waste into wood pellets to be used for home heating. With the downturn in the economy, there is little to no waste being generated by these companies so we have to look for other wood sources. The cost of wood is currently \$100 per ton and these pellets are not what we need which is a requirement for our process. We are in need of putting in a chyer system to be able to use the waste generated by these sawmills but are currently unprofitable due to the lack of raw material. We have a backlog of orders of customers needing product that we currently cannot fill. With some assistance we could get back on track and become profitable again. | American Wood Fibers | 32 | 31 to 90 days | \$1,000,000 |
| Pickaway | Dist 6, PID 85790, PIC 6 sensor lights for securit | Purchase 6 sensor lights for vehicle for security at the Pickaway County Community Action | Ohio Department of Transportation | 1 | 31 to 90 days | \$7,500 |

| Project County | Project Name | Description |
|----------------|--|---|
| Pickaway | PIC-C508-0.83 | Replace existing four span, 30 feet wide, 256 feet length bridge superstructure on existing substructure. |
| Pickaway | PIC-Bridge load rating | Load rating analysis for approximately 163 bridges, including load rating gusset plates and determining fracture critical bridges. |
| Pickaway | PIC-various bridges-Gibson Road / Little Walnut Ro | Replace two existing bridges with galvanized steel beam bridges |
| Pickaway | PIC-C509-1.13 | Replace existing two lane bridge on a Major Collector |
| Pickaway | PIC-Various bridge deck replacements | Replace four existing bridge decks on steel beam bridges |
| Pickaway | PIC-C003-8.15 | Resurface 4.04 miles of road with ODOT Item 301 and Item 448. Road being a minor collector on the FASS as of 1/1/1991 |
| Pickaway | PIC-C007-0.10 | Resurface 12.26 miles of road with ODOT Item 448. Road is a minor collector on the FASS as of 1/1/1991 |
| Pickaway | PIC-C017-0.00 | Resurface 17.70 miles of road with ODOT Item 448. Road is a Minor Collector on the FASS as of 1/1/1991 |
| Pickaway | PIC-Resurface various roads | Resurface 6.60 miles of four major collector classified roads with ODOT Item 448 |
| Pickaway | PIC-guardrail phase I | Replacing aged, defective guardrail on various major and minor collector roads |
| Pickaway | PIC-RPM/PM | Pavement marking 225 miles, raised pavement marking 17 miles, and painting 3,000 linear feet of stop bars on various County roads. |
| Pickaway | PIC-C125-2.04 | Rehabilitate existing bridge by galvanizing existing bridge beams, new concrete deck, and new backwalls on existing substructure. |
| Pickaway | PIC-C031-2.93 | Rehabilitate existing bridge by galvanizing existing beams, new concrete deck, and new backwalls on existing bridge substructure. |
| Pickaway | PIC-C008-9.21 | Replace existing bridge superstructure, save existing substructure |
| Pickaway | PIC-C008-10.43 | Replace existing bridge superstructure on existing substructure. |
| Pickaway | PIC-C008-10.50 | Replace existing bridge superstructure on existing substructure |
| Pickaway | PIC-C017-5.50 | Replace six prestressed concrete facial beams, repairs to concrete substructure, new asphalt wearing surface and new guardrail. |
| Pickaway | PIC-T167-1.17 | Replace existing bridge with a 16' x 14' x 30' length three sided concrete box culvert. |
| Pickaway | PIC-Various bridges-Borror Rd./Ringgold Northern R | Replace two existing bridges with galvanized steel beam bridges on existing bridge substructures. |
| Pickaway | PIC-Guardrail phase II | Replace existing deteriorated non-specification guardrail on various Major and Minor collector roads on the FASS as of 1/1/1991 |
| Pickaway | Park Improvemnets | Installation of Trees in parks and along streets in small communities and cities to employ unskilled unemployed workers and beautify our communities. Ohio is a major landscape nursery state and trees are in surplus because of the economic conditions of our state. All the trees needed would be in excess in Ohio and stimulate our communities All accumulated within 90 days. |
| Pickaway | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Columbus, Ohio. ECDI's mission is to invest in people to provide technical and economic growth. These funds will support ECDI's Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise training, Individual Development Accounts (IDAs), microloans, technical assistance, and access to retail markets. As the Ohio Economic Development Administration microlender and U.S. Treasury designated Community Development Financial Institution (CDFI) in Columbus, ECDI addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI's Microenterprise Development Program fits in with the credit industry by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDI is able to serve unbankable populations, including low-income individuals, those with little or no credit, or those products that are not available through traditional banks. |
| Pickaway | New Holland Water Tower Replacement | The project involves the construction of a 150,000 gallon spherical water tower, site work, miscellaneous piping, electrical work, lanterning, painting, and demolishing the existing water tower. |
| Pickaway | Runway and taxiway extension, fencing, obstructio | Runway and taxiway extension, fencing, obstruction removal |
| Pickaway | The Octagon Restoration Project | This project is based on the complete restoration of the 1865 brick Gregg-Crites Octagon House near Circleville, Ohio. Recently saved from eminent domain to make way for a Wal-Mart Supercenter, this large and unusual example of a rare form of architecture will be the centerpiece of the "Octagon Center for the Study of Architecture" and a major new heritage tourism destination. The Octagon Center will be an incorporated center for the study of architectural history and the importance of the built environment to our quality of life. Programming will include lectures, seminars, courses and regional tours for people of all ages. Strategically located on U.S. Rt. 23, the Octagon Center will attract an estimated 30,000 new visitors and program attendees annually resulting in over \$3,000,000 in new annual heritage tourism dollars to the regional economy. This 2.5 mile road would provide a direct connection between North Southern Railroad's Intermodal Terminal and US 23. The Rickenbacker Intermodal Terminal represents the single greatest opportunity for job growth and capital investment in Pickaway County and Central Ohio for the foreseeable future, with the potential to bring 15,000-20,000 new jobs to the Rickenbacker area over the next 20 years. The East-West Connector is the "back door" to Rickenbacker, while the improvements of Alan Creek CTO are the "front door" to Rickenbacker. Both will alleviate existing traffic congestion and create a road network to handle growth for the next 20-30 years. A transportation study is currently underway for this roadway, construction could begin in the summer of 2011. The \$60 million Intermodal Terminal at Rickenbacker will provide increased freight capacity allowing Central Ohio to expand domestic and international shipping and economic opportunities. The EastWest Connector is a critical transportation improvement identified by local government and a recent MDSPC study. The \$3,000,000 being requested will be used to fund the purchase of Right of Way for the new road. |
| Pickaway | Rickenbacker Intermodal East-West Connector Road | |
| Pickaway | PickawayConnect | This broadband infrastructure project would allow for unannounced, high speed connectivity of data for Berger Health System, Pickaway County, Pickaway County Sheriff, The City of Circleville, Ohio Christian University, Circleville City Schools and the Pickaway Progress Partnership. Phase I would construct a loop of fiber in Circleville to connect to these organizations as well as purchase networking equipment. The system would allow for Telemedicine and disease learning opportunities among these organizations. It would also allow for redundancy of services to all these organizations. Phase II of the project would connect businesses in and around Circleville to PickawayConnect. Phase II would connect to the city's industrial areas, including the former Thomson facility to provide an incentive to new businesses looking to locate in Pickaway County. |
| Pickaway | Ashville/South Bloomfield Mud Run trunk sewer line | The Villages of Ashville and South Bloomfield in the northern part of Pickaway County entered into a Cooperative Development Agreement (CDA) in 2004 to plan for growth in this region. One of the crucial items of the CDA is joint infrastructure planning and construction. Construction of the Mud Run trunk sewer line and wastewater treatment plant would allow for growth in this area to optimize on the potential of the Rickenbacker Intermodal Terminal. Preliminary engineering has been completed on the project. |
| Pickaway | Derby Sanitary Sewer Project | This unincorporated village in northwestern Pickaway County is under orders and finding by the Ohio EPA for violations of unpurified effluent discharges into the Chautauque Creek (tributary of Big Darby Creek). The County has completed a study for proposals of solutions to the sanitary sewer problems. An option has been selected and an income survey will be completed in the next two months to determine to extent of the poverty level for this area. Construction could begin in early 2010. Derby is one of the poorest communities in Pickaway County, and as a result, public funds are needed to bring Derby to the rest of the county. |
| Pickaway | Pickaway Progress Park | The site of the former Thomson Consumer Electronics facility has the potential to bring 1500-2500 new jobs to the City of Circleville over the next 15-20 years. This would erase the job loss seen in Pickaway County from 1998-2004. Plans for this industrial park include an emphasis on the agribusiness sector as the site is on the Hazardous Corridor and close to the Rickenbacker Intermodal Terminal. Feasibility and preliminary engineering have been completed for the site, construction could begin in 2009. |
| Pickaway | PIC-CR40-0.44 PID:81145 | Replace existing 66' span bridge with a 60' by 32' composite prestressed box beam bridge. |
| Pickaway | People First | My idea is to buy three pickup trucks, two 6 people. And lease a building so the trucks with two men each can be dispatched to pick up household items that people no longer want. Bring the items back to the storage building and ask people in need if these things that allow them to buy stuff at cost, cost being labor and gas. Critics may think this is similar to Salvation Army, but it's not. I know most poor people can't afford to buy stuff from Goodwill and places like that. This will be for the real poor, people would have to prove they get food stamps to buy stuff from it. I would not at all expect it to work and allow poor people to buy new things for their homes for low amount. I know people in southern Ohio do this, but they sell their stuff high and the poor can't afford it. This is a great idea and I'm sure it will work. Everything in my home is stuff people no longer wanted. I want to give other poor people the chance to feel good about their homes. |
| Pickaway | School Improvement Project | Thank you 1. Renovation of Auditorium: New seating (approx. 400) to replace 45-year-old seats, lighting and flooring. Estimated cost: \$500,000.00 2. Purchase of Land: Under ODFC, no land purchase is included. The District needs acreage to build on one site. Estimated cost: \$1,500,000.00 3. After-School Programs: Our current program is federally funded for grades 4-8 only. We would like to expand it to all grades. Estimated cost: \$200,000.00 |
| Pickaway | Captain Steamer Cleaning Company, LLC Expansion | Local community business expansion to create 5+ new full-time positions. Funding will be used to purchase cleaning equipment for new employees as well as provide funds for a larger all-purpose structure to house expanded business (\$50,000 for land, \$140,000 for structure, and \$70,000 for cleaning/restoration). Expanded business will provide the following services: carpet/upholstery cleaning and deodorizing, tile and grout cleaning/sealing/polishing, water/damage restoration, and retail carpet/flooring sales. With provided funding, the business will be able to grow and provide stable jobs for Pickaway County and surrounding areas. It is estimated revenues will increase by 100%, thus increasing the amount of state and county paid sales tax, another positive point to aid in the economic recovery. Captain Steamer Cleaning Company, LLC, established over 30 years ago, is currently the leading carpet/upholstery/damage restoration business in the area, which further evidences that an investment will be successful and beneficial for the community. |
| Pickaway | West Scioto Street Improvements | This project will replace 1000 feet of badly deteriorated street. The project will include new concrete base structure and gutter sidewalk and street items. The street serves the new elementary and Middle school. The Village has applied to ODFC for the past two years and was not funded even though this is phase two of a previously ODFC funded project. |
| Pickaway | Electronic Medication Prescribing System | Berger Hospital (Circleville, OH) requests funding to implement Electronic Prescribing Software. Electronic prescribing gives Berger Hospital's physicians the capability to electronically prescribe and transmit medication prescriptions to a patient's retail outpatient pharmacy of choice. Electronic prescriptions allow physicians and pharmacists to deliver safer, higher quality care by improving accuracy and workflow efficiencies. Widespread adoption of this technology would eliminate thousands of adverse patient drug events and numerous deaths each year that result from pharmacists misreading handwritten prescriptions. The incidence of drug diversion would also be reduced since prescriptions and medications would be alerted of duplicate prescriptions for controlled substances. |
| Pickaway | Emergency Department Patient Information System | Berger Hospital (Circleville, OH) requests funding to implement an Emergency Department Patient Information System that would interface with the hospital's existing patient information system. By integrating these two patient information systems the safety and continuity of patient care will improve dramatically since vital patient information including allergies, home medications, given medications, and treatments would freely flow between the emergency department and other hospital patient care departments. Clear and concise emergency room discharge instructions would be given to the patient, including prescribed home medications and prescriptions to be discontinued. |

| Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|--|----------------|--------------------|---------------------------|
| Pickaway County Engineer | 50 | 91 to 180 days | \$1,370,000 |
| Pickaway County Engineer | 6 | 0 to 30 days | \$300,000 |
| Pickaway County Engineer | 50 | 0 to 30 days | \$425,000 |
| Pickaway County Engineer | 50 | 0 to 30 days | \$200,000 |
| Pickaway County Engineer | 50 | 0 to 30 days | \$540,000 |
| Pickaway County Engineer | 50 | 0 to 30 days | \$600,000 |
| Pickaway County Engineer | 50 | 0 to 30 days | \$1,400,000 |
| Pickaway County Engineer | 50 | 0 to 30 days | \$2,175,000 |
| Pickaway County Engineer | 50 | 0 to 30 days | \$815,000 |
| Pickaway County Engineer | 50 | 0 to 30 days | \$1,000,000 |
| Pickaway County Engineer | 50 | 0 to 30 days | \$290,000 |
| Pickaway County Engineer | 100 | 31 to 90 days | \$1,040,000 |
| Pickaway County Engineer | 100 | 31 to 90 days | \$1,040,000 |
| Pickaway County Engineer | 50 | 31 to 90 days | \$210,000 |
| Pickaway County Engineer | 50 | 31 to 90 days | \$165,000 |

| Pickaway Progress Partnership | 10 | 31 to 90 days | \$1,000,000 |
| Pickaway Progress Partnership | 25 | 181 days or more | \$15,000,000 |
| Pickaway Progress Partnership | 10 | 181 days or more | \$2,600,000 |
| Pickaway Progress Partnership | 25 | 31 to 90 days | \$5,000,000 |
| Pickaway County Engineer | 100 | 91 to 180 days | \$450,000 |
| None at the time | 6 | 31 to 90 days | \$100,000 |
| Circleville City Schools | 100 | 91 to 180 days | \$2,200,000 |
| Captain Steamer Carpet Cleaning, LLC | 5 | 0 to 30 days | \$300,000 |
| Village of Commercial Point | 50 | 31 to 90 days | \$250,000 |
| Berger Health System | 2 | 31 to 90 days | \$102,500 |
| Berger Health System | 2 | 91 to 180 days | \$173,210 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------------|----------------|--------------------|---------------------------|
| Pickaway | Fixed Base AMR Meter Reading System | We are in the need of a new meter reading system as our current system is out of date and must be replaced/upgraded. A fixed base system will help us monitor water loss for the City as well and allow us to more accurately pin point customer leaks and resolve more accurately. We have approximately 5200 customers this would affect. | City of Circleville | 25 | 0 to 30 days | \$1,000,000 |
| Pickaway | AA/AE Spectrophotometer Replacement | Current Spec is 16 years old and unable to achieve the low limit detection of sludge metals required in our Ohio EPA permit. | City of Circleville | 20 | 0 to 30 days | \$50,000 |
| Pickaway | Bar Screen Rebuild | Our current sewage Bar Screen requires maintenance and is in need of an upgrade. This screen has been in place for a long time and our current service is nearing 40 years of age. | City of Circleville | 25 | 0 to 30 days | \$25,000 |
| Pickaway | Raw Sewage Pump / SCADA Upgrade | Our Raw Sewage Treatment Plant is in the need of an upgrade of our 1975 raw sewage pump. This would be upgrading to a HSI High Energy Efficient model and incorporate SCADA controls to maximize energy efficiency. | City of Circleville | 50 | 0 to 30 days | \$250,000 |
| Pickaway | Biomass Fueled Drying System | Our biomass boiler system is currently in need of a major overhaul. We have given into a biomass company who is located in and 275 employees. In 2008 we recycled nearly 1 Billion pounds of wood waste into value added products. Our plant in Circleville Pickaway County has converted nearly 1 Billion pounds of wood waste into value added products for renewable energy and wood fuel utilized in "green" products. We are conducting a feasibility study to determine if our plant in Ohio is the best site for a biomass fueled industrial drying operation. We would collaborate with forestry professionals to sustainably manage that resource to provide both raw materials and the renewable energy to power the drying system. | American Wood Fibers | 25 | 181 days or more | \$1,250,000 |
| Pickaway | Well Field Improvements | This Project will include purchasing 10 acres of land and installing two new wells. | Village of Commercial Point | 50 | 31 to 90 days | \$200,000 |
| Pickaway | CIRCLEVILLE MILL AND FILL | 2.4 MILES OF MILLING OLD ASPHALT AND REPLACING WITH NEW ADA CURB RAMPS TO BE INCLUDED WHERE APPLICABLE. CURB WITH GUTTER AND LOOP DETECTORS TO BE REPLACED WHERE NEEDED. STREET STRIPING IS INCLUDED WITH THIS PROJECT. PLANS ARE COMPLETE AND READY TO BID. ALL STREETS WILL FALL WITHIN THE US TRANSPORTATION FEDERAL HIGHWAY ECONOMICALLY DISTRESSED AREA. WE FEEL THIS IS A SAFETY ISSUE DUE TO THE QUICKLY DETERIORATING CONDITION OF THE STREETS. | CITY OF CIRCLEVILLE | 50 | 31 to 90 days | \$1,188,543 |
| Pickaway | DUMP TRUCK REPLACEMENTS | OUR AGING FLEET OF FOUR (4) DUMP TRUCKS RANGE FROM TWELVE TO NINETEEN YEARS OLD. THESE TRUCKS DO NOT MEET TODAY'S EMISSION CONTROL STANDARDS AND ARE IN SERVICE DAILY FOR MULTIPLE USES. | CITY OF CIRCLEVILLE | 5 | 31 to 90 days | \$480,000 |
| Pickaway | MONTCLAIR AVENUE STORM SEWER IMPROVEMENT | THIS PROJECT IS FOR APPROXIMATELY 315 LF OF 12" STORM SEWER TO REPLACE AN EXISTING COLLAPSED STORM SEWER LINE. THIS IS A SAFETY ISSUE FOR THE RESIDENTS, PEDESTRIANS AND VEHICLE TRAFFIC DURING HEAVY RAIN. | CITY OF CIRCLEVILLE | 10 | 0 to 30 days | \$19,128 |
| Pickaway | STELLA AND RUTH STORM SEWER | INSTALLATION OF APPROXIMATELY 510 LF OF STORM SEWER PIPE. THIS PROJECT IS TO REPLACE AN EXISTING COLLAPSED STORM SEWER LINE. THIS IS A SAFETY AND HEALTH ISSUE FOR NEIGHBORS, PEDESTRIANS AND VEHICLE TRAFFIC. THIS NEIGHBORHOOD SITS IN THE FLOOD PLAIN AREA AND IS LOCATED IN AN ECONOMICALLY DISTRESSED AREA. | CITY OF CIRCLEVILLE | 50 | 31 to 90 days | \$25,000 |
| Pickaway | Ashville Waterline Connection Upgrade Westside Inc | Construct a 2,000 feet of 8 inch waterline. This project would transfer 30 water service lines and have installed 8 hydrants. This project would also include the installation of a 2 inch line that would not meet current construction standards. A larger line would be water and improve services to our residents and would help Ashville reach its vision "Remembering our rural heritage, the Village of Ashville will be a strong & friendly community, offering an enhanced quality of life achieved through progress & teamwork. It is a place where people will want to live, and businesses will want to locate." | Village of Ashville | 30 | 91 to 180 days | \$260,000 |
| Pickaway | SPRINGHOLLOW RECONSTRUCTION | THIS ROAD ACCESSSES OUR LOCAL HOSPITAL. THE PROJECT IS IMPORTANT TO THE HEALTH AND SAFETY OF THE LOCAL RESIDENTS. THE ROADWAY CONDITIONS LACK OF CURBS AND IMPROPER STORM WATER DRAINAGE CONTRIBUTES TO UNSAFE DRIVING CONDITIONS AND LOCAL FLOODING. THE CONSTRUCTION OF SIDEWALKS WILL ELIMINATE THE DANGERS TO PEDESTRIAN TRAFFIC. THE DEGRADED CONDITION OF THE WATER AND SANITARY SEWER ARE HEALTH CONCERNS. THIS AREA IS LOCATED IN A LOW TO MODERATE INCOME REGION. | CITY OF CIRCLEVILLE | 100 | 31 to 90 days | \$1,000,000 |
| Pickaway | Ashville Waterline Loops Completed | Construct a 2,000 feet of 8 inch waterline. This project would transfer 20 water service lines, have installed 5 hydrants, and would create water loops that would eliminate deadend waterlines. This would improve services to our residents and would help Ashville reach its vision "Remembering our rural heritage, the Village of Ashville will be a strong & friendly community, offering an enhanced quality of life achieved through progress & teamwork. It is a place where people will want to live, and businesses will want to locate." | Village of Ashville | 20 | 91 to 180 days | \$250,000 |
| Pickaway | High-Quality Rural Critical Care Through Telemedicine | Partnering with a tertiary health system with eICU capacity, as a remote monitoring site, would provide a cost-effective strategy for increasing critical care capacity for our community, maximizing treated resources while producing high-quality outcomes. This type of program has demonstrated improvements in quality of care through reduced ICU mortality by as much as 50% and financially through reduced length of stay by 15%. | Berger Hospital | 18 | 31 to 90 days | \$360,000 |
| Pickaway | Ashville Water Tower | Construct a new 500,000 Gallon water tower and also connecting supply lines on the north side of the Village of Ashville to the tower. This would improve capacity and water pressure. This will help Ashville reach its vision "Remembering our rural heritage, the Village of Ashville will be a strong & friendly community, offering an enhanced quality of life achieved through progress & teamwork. It is a place where people will want to live, and businesses will want to locate." | Village of Ashville | 40 | 181 days or more | \$1,400,000 |
| Pickaway | Ashville Waterline Connection Upgrade Long Street | Construct 1,500' of 12" diameter waterline to improve pressure issues within the northern portion of the Village. This improvement would also provide connections to a future water tower. This will help Ashville reach its vision "Remembering our rural heritage, the Village of Ashville will be a strong & friendly community, offering an enhanced quality of life achieved through progress & teamwork. It is a place where people will want to live, and businesses will want to locate." | Village of Ashville | 35 | 91 to 180 days | \$300,000 |
| Pickaway | Domestic Violence and Homelessness | Propose to purchase property and build shelter for victims of domestic violence and homeless women and children to provide handicap accessibility, in-house play gym for children, laundry and cooking facilities, etc., on one floor plan to include space for group activity for victims not living within the shelter. | Haven House of Pickaway County Inc. | 45 | 91 to 180 days | \$700,000 |
| Pickaway | Water Line Extension to the east side of the City | The water line consists of the installation of 21,950 lineal feet of 12 inch water main line with all appurtenances and a 1,000,000 gallon water storage tank. This water line will run from the intersection of SR188 and Portous Road, east of Portous Road to Bolander Portous Road, south to Bolander Portous Road to US Route 32, and west on US Route 32 to the booster station on Bolander Pike. This water line project will provide water service which will improve the health and safety of existing population and future development. | City of Circleville | 100 | 91 to 180 days | \$3,825,500 |
| Pickaway | Sanitary Sewer Extension to the east side for the C | The sanitary sewer line consists of installation of 4000 feet of 42 inch sanitary sewer line along Hargus Creek from Tad Lewis Park to north of Plum Street, 1900 feet of 36 inch sanitary sewer line along Hargus Creek from north of Plum Street to Lancaster Pike, 2000 feet of 30 inch sanitary sewer line along Hargus Creek from Lancaster Pike to Koptagon Pike with necessary sanitary manholes. This sanitary sewer line project will provide sanitary service which will improve the health and safety of the existing population and future development. | City of Circleville | 43113 | 91 to 180 days | \$3,790,000 |
| Pickaway | Columbus Regional Airport Authority Regional Storm | The project includes a large regional detention basin to serve existing and future facilities at Rickenbacker International Airport. The basin was identified through a Stormwater Master Plan (SMP) for the airport prepared by CESA under guidance of the CERA. The SMP is intended to address the agencies concerns regarding potential impacts to water quality, including groundwater recharge potential, within the Walnut Creek watershed. The regional detention basin will control peak discharge to Walnut Creek, will include infiltration practices to protect baseflow (aquatic habitat) conditions within the creek and will include a wetland complex to enhance water quality. Supplemental funding is required to address the construction of the project. | Columbus Regional Airport Authority | 60 | 91 to 180 days | \$7,000,000 |
| Pickaway | Public Sanitary Sewer & Water Main Extension Proje | This project consists of the installation of 1,435 lineal feet of 8 inch sanitary sewer line with 6 sanitary manholes and 1,432 lineal feet of 12 inch water main line with all appurtenances. This project will help create a safe and healthy environment for visitors using the City of Circleville Mary Virginia Oates Harmon Bldg. P&S. | City of Circleville | 50 | 31 to 90 days | \$200,000 |
| Pickaway | Sunset Mobile Home water upgrade | A new green sand filter system and holding tanks for existing water treatment plant and new housing for the system. Existing water treatment plant has too high of water. | Sunset Mobile Home Park | 4 | 91 to 180 days | \$100,000 |
| Pickaway | Regional Stormwater/Water Quality Detention Basin | The project includes several stormwater/water quality BMPs, such as bio-swales, bio-retention basins and the retrofit of an existing detention basin to incorporate a wetland feature. To be provided in conjunction with existing facilities at Rickenbacker International Airport. The BMPs were identified through a Stormwater Master Plan (SMP) for the airport prepared by CESA under guidance of the CERA. The SMP is intended to address the agencies concerns regarding potential impacts to water quality, including groundwater recharge potential, within the Walnut Creek watershed. Specifically, the proposed BMPs include infiltration practices to protect baseflow (aquatic habitat) conditions within the creek, as well as a stormwater wetland to enhance water quality of stormwater runoff to the creek. As proposed, the project includes periodic monitoring to quantify the benefits of the BMPs. Supplemental funding is required to allow construction of the project. | Columbus Regional Airport Authority | 2 | 31 to 90 days | \$200,000 |
| Pickaway | Sunset Mobile Home park upgrade for sewer | Total upgrade of waste water system, new sand filters, in-line, trash traps, holding tank, clarifiers, decolorators and new lines, ect. This courtesy of Pickaway, ambulance service is so limited, that patients have to wait for a long time before service is given. We are planning to enhance our Special needs daycare by adding ambulance service. | Sunset Mobile Home Park | 5 | 91 to 180 days | \$200,000 |
| Pickaway | Good Hands Ambulance Service | We will be able to hire EMT's, ambulance maintenance workers, dispatchers, office workers, and care aides. This service is so desperately needed in this area and outer rural areas, that we tried to start this part of our program sooner, but were unable, because of needed funds. | Good Hands Supported Living | 20 | 0 to 30 days | \$500,000 |
| Pickaway | New Computer Software Training Center in Circlevil | We hope that the people in charge of this money realize the great need for not only the service of our ambulances, but the jobs that this will create in this area of Ohio. Software training center that will provide services and computer training to the State of Ohio agencies, local government and businesses throughout Ohio. The funds will be used for an additional 10 full time employees, office space, computer, software and office equipment. Severe economic hardships in Pickaway County are exacerbated by the market recession. In 2004, Pickaway County was recognized by the clearing of Thomson Consumer Electronics, which left 1200 people unemployed. The pay capita income a staggering \$1,474 (1999 US Census Bureau). Pickaway Progress Partnership and median household income \$42,607 (2004 US Census Bureau). Pickaway Progress Partnership is continuing to drop as more people lose their jobs. At the end of 2008, Pickaway County Job & Family Services reported a 34% increase in Ohio Works First and a 20% increase in the Food Stamp programs, over 2007. It is critical to the survival of the community to retain and expand employment opportunities within the county. | PS Computer Solutions | 10 | 0 to 30 days | \$1,435,000 |
| Pickaway | Pickaway County Courthouse Energy Efficiency Impro | Per an assessment conducted by county building services staff, the Pickaway County courthouse building is in need of several energy efficiency improvements to keep the facility, constructed in 1988, functional for the next 25 years. The historic building is a valuable structure housing the courtroom, offices and support space. Its components and systems require improvements to satisfy current safety and ADA requirements. The mechanical and electrical control and distribution systems will require complete upgrades to provide a reliable and energy efficient facility. As the county's "hive center", the courthouse's electrical system supporting its technology and information systems depends on very old service distribution, without any redundancy. Additionally, the building's steam heating system is solely dependent upon one old steam boiler, without any redundancy. The steam heating system including distribution piping and radiators will require a complete replacement. Other items that need to be addressed include the building's air conditioning system, its air distribution and ventilation system and the computer room's cooling system. | Pickaway Progress Partnership | 10 | 0 to 30 days | \$1,932,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Pickaway | Stepping Stones Supervised Visitation and Exchange | Stepping Stones provides a safe and neutral setting for families to visit as they go through the court system. Women experiencing violence have difficulty in emergency visitation and making exchanges for visitation. Women are exposed to great risk with each confrontation during the initial stages of separation. This visitation center provides an alternative to those victims experiencing these problems, allows courts and other agencies to have a reliable source for those experiencing these difficulties, and is a help to the children reducing the exposure to potentially violent confrontations. This past year there has been an increase in domestic violence cases being referred to the visitation center. At the same time that our funding is being cut \$40,000. The agency has collaborated with our local domestic violence shelter with training and procedures to keep the victim safe. Over 250 women victims are involved in the court system having children under the age of 18. The program will be able to offer maximum security for the victim and children. We have security system that monitors visual and audio in every room and outside. We have an on-duty officer on site. Provides training to law enforcement, prosecution, court and emergency personnel on the dynamics of domestic violence as well as provide intervention strategies with the courts to learn. | Stepping Stones Supervised Visitation and Exchanges | 6 | 0 to 30 days | \$28,000.00 |
| Pickaway | Domestic Violence Awareness Training | | Haven House of Pickaway County Inc. | 1 | 0 to 30 days | \$67,500.00 |
| Pickaway | Domestic Violence Victim Care | | Haven House of Pickaway County Inc. | 1 | 0 to 30 days | \$67,500.00 |
| Pickaway | Pickaway County Victims of Crime | | Pickaway County Victims of Crime | 1 | 0 to 30 days | \$52,000.00 |
| Pickaway | Brand Improvment | | Ragha ltd Dublin Business as Holiday Inn Express | 5 | 31 to 90 days | \$150,000.00 |
| Pickaway | Pickaway Title | | Motes Law Office | 5 | 31 to 90 days | 200,000.00 |
| Pickaway | DIVERSION | Diversion is program that enables youth to avoid formal court that could result in a youth having a Juvenile Court Record. Diversion will target steady, history and at risk youth that are between 10-17 years old and are "at risk" offenders and non-adjusted youth. Youth and parents who qualify for the program must admit to the charges. They understand that if they do not successfully complete the terms, the charges will be handled to formal court. Terms are set according to the assessment of the problem. Youth can be ordered to complete any programs or conditions that can be assigned on probation except detention. If youth successfully complete the terms, charges are dismissed. Intake and completion statistics will be measured on a monthly basis. Expected Outcomes of the program will be that youth will successfully complete the Diversion Program within the assigned time and thus avoid entering the formal court. | PICKAWAY COUNTY JUVENILE COURT | 1 | 31 to 90 days | 30,500 |
| Pickaway | I.M.P.S.V.Y. | IMPACT (Introducing Multiple Positive Assets to Change Teens) is a program created by Pickaway County Juvenile Court to provide a community based intensive program to correct inappropriate juvenile behavior. IMPACT will accomplish this by focusing on 8 targeted specific needs which studies show directly affect a juvenile's future success. These needs are: Family, Substance Abuse, Emotional Instability, Risk Prevention, Self Control and Anger Management) will be targeted through a curriculum based on cognitive intervention (changing thought patterns), self building, drug & alcohol education, substance education, social skills, self-esteem, and self-advocacy. IMPACT will also offer change thought processes. The ultimate purpose is to direct youth to be law-abiding productive citizens of the community. Pre and post program will be given to Probation Officers and Parents to determine if any behavioral changes are taking place. Parents will be required to complete in appropriate segments of the program. Expected outcomes will be changing antisocial attitudes and behaviors and reducing recidivism to avoid out of home placement for youth. | PICKAWAY COUNTY JUVENILE COURT | 3 | 31 to 90 days | 72,000 |
| Pike | The A-Plant/Pike Co. Manufacturing Center Cloverle | The project will improve the Cloverleaf, which is an interchange on US 23 that currently provides access only to the east side of the Portsmouth Glasson Division Plant (A-Plant) by creating access to the west side into the Pike County Manufacturing Center. The plant is a 400+ industrial site. This project will support the ongoing development of the PMCC and the planned Energy Park on the under the authority at the A-Plant by creating an adequate interchange that will provide safe, adequate access to and from all directions of traffic. The Energy Center within what we call will become the "Advanced Energy and Environmental Technology Hub of Ohio". This improvement project will include the design and construction of I-75/US, Lane Parkway, TRMC, Synco, Matthews Four Seasons, 2J Supply, etc., currently under construction. 2150 people and will support ongoing projects at the A-Plant that will add up to 1,000 new jobs for clean and green manufacturing jobs. This project will support new energy projects at the A-Plant. | Southern Ohio Diversification Initiative | 3150 | 91 to 180 days | \$2,550,000 |
| Pike | Dist 9, PID 85791, PIK Dispatch/scheduling software | Dispatch/scheduling software for the Community Action Committee of Pike County | Ohio Department of Transportation | 1 | 31 to 90 days | \$60,000 |
| Pike | Dist 9, PID 85792, PIK Purchase 2 computers | Purchase 2 computers for the Community Action Committee of Pike County | Ohio Department of Transportation | 1 | 31 to 90 days | \$2,600 |
| Pike | Dist 9, PID 85794, PIK Engineering/design | Engineering/design for the Community Action Committee of Pike County | Ohio Department of Transportation | 3 | 31 to 90 days | \$150,000 |
| Pike | Dist 9, PID 85795, PIK Transit admin/for facility | Construction of transit administration facility for the Community Action Committee of Pike County | Ohio Department of Transportation | 20 | 31 to 90 days | \$1,000,000 |
| Pike | Big Run Road Paving PIK-CR59-0.00 | County Road Paving | Pike County Engineers Office | 12 | 31 to 90 days | \$400,000 |
| Pike | Big Run Road Paving PIK-CR59-0.00 | County Road Paving | Pike County Engineers Office | 12 | 31 to 90 days | \$400,000 |
| Pike | Big Run Road Paving PIK-CR59-0.00 | County Road Paving | Pike County Engineers Office | 12 | 31 to 90 days | \$400,000 |
| Pike | Big Run Road Paving PIK-CR59-0.00 | County Road Paving | Pike County Engineers Office | 12 | 31 to 90 days | \$400,000 |
| Pike | Dutch Run Road Paving, PIK-CR68-0.00 | County Road Paving | Pike County Engineers Office | 12 | 31 to 90 days | \$800,000 |
| Pike | Bridge Load Ratings | Load Ratings for county bridges | Pike County Engineers Office | 3 | 31 to 90 days | \$300,000 |
| Pike | Owl Creek Road Bridge, PIK-CR64-04.09 Right-of-Way | Right-of-Way plan preparation for Owl Creek Road, PIK-CR64-04.09 | Pike County Engineers Office | 3 | 31 to 90 days | \$10,000 |
| Pike | Denver Road Bridge, PIK-CR47-02.31 Right-of-Way Pr | Right-of-Way plan preparation for Denver Road, PIK-CR47-02.31 | Pike County Engineers Office | 3 | 31 to 90 days | \$10,000 |
| Pike | Lays Run Road Bridge, PIK-CR28-04.30 Right-of-Way | Right-of-Way plan preparation for Lays Run Road, PIK-CR28-04.30 | Pike County Engineers Office | 3 | 31 to 90 days | \$10,000 |
| Pike | Lays Run Road Bridge, PIK-CR28-04.77 | Bridge Replacement | Pike County Engineers Office | 6 | 31 to 90 days | \$414,174 |
| Pike | Coldcrott Hill Road Bridge Replacement, PIK-CR25-0 | Bridge Replacement | Pike County Engineers Office | 6 | 31 to 90 days | \$593,750 |
| Pike | Laurel Ridge Road Bridge, PIK-CR27-05.48 | Bridge Replacement | Pike County Engineers Office | 6 | 31 to 90 days | \$400,000 |
| Pike | Beaver Pike Paving, PIK-CR57-0.00 | County Road Paving | Pike County Engineers Office | 12 | 31 to 90 days | \$1,000,000 |
| Pike | Beavers Ridge Road Bridge, PIK-CR11-11.00 Eng. Ser. | Phase II Engineering services for Beavers Ridge Road Bridge Replacement | Pike County Engineers Office | 3 | 31 to 90 days | \$50,000 |
| Pike | Owl Creek Road Bridge, PIK-CR64-03.02 Right-of-Way | Right-of-Way plan preparation for Owl Creek Road, PIK-CR64-03.02 | Pike County Engineers Office | 3 | 31 to 90 days | \$10,000 |
| Pike | PIK-CR85-0.00 Guardrail Re-build | Rebuilding guardrail along county roads | Pike County Engineers Office | 6 | 31 to 90 days | \$200,000 |
| Pike | Gleason Road Bridge, PIK-TR338-02.33 Engineering S | Phase I Engineering services for Gleason Road Bridge Replacement | Pike County Engineers Office | 3 | 31 to 90 days | \$50,000 |
| Pike | Pleasant Hill Road Bridge Replacement, Pike County | Bridge Replacements | Pike County Engineers Office | 6 | 31 to 90 days | \$439,850 |
| Pike | Dist 9, PID 85793, PIK Purchase 1 LTN | Purchase 1 light transit vehicle with a narrow body for the Community Action Committee of Pike County | Ohio Department of Transportation | 1 | 31 to 90 days | \$45,000 |
| Pike | Power generation by complete burning of plastics r | Injection into transportation in conjunction with coverage, as per local systems agreement to turn on system in plastics region, which is generated by local collection agencies, but who do not use it, together with legislation to mandate source recycling, along with transportation of recyclable from other areas using the Ohio River barge transport, with Kentucky off loading to train, truck, or barge again... the total costs can be recouped by selling the technology to other countries, such as Mexico and China... the total project would be to build a fully functional power plant that runs on plastics waste...we could clear out all waste from all landfills in time. The initial costs would be to develop the clean burning, zero emissions systems to take plastics waste and process it into fluid flow fuel, that feeds into a burning mechanism to generate the steam to turn the turbines... It would take a collaboration with high tech ceramic tiles, such as are on the Shuttles, to make it work... a defense/industry collaboration would need to be involved. | Greenscape Technologies (Paradigm International) | 200 | 0 to 30 days | \$20,000,000 |
| Pike | Solar powered plastics injection molding machines | In conjunction with Cincinnati Milacron, Akron, Ohio, the world's leader in producing plastics injection molding equipment, who has worldwide patents on DC drive technologies that are applied to molding machines, we would engineer that design to take solar powered inputs and directly apply them to producing plastic parts for industries such as automotive, appliance, electronics, medical, etc. This technology would revitalize Milacron, who is floundering, as well as produce a machine that is viable using solar power directly, instead of connecting to AC. Only Milacron has the technology to partner with, although they do not, currently use the patented technologies, using instead Japanese AC technologies on their machines. We would bring an alliance with Milacron to develop the direct use of solar energy, which would mean a new technology would emerge that could be sold on the world markets. All funds would be used to create this new technology with Milacron. We might get a large corporate sponsor like Honda to join the alliance, as they are very 'green' conscious and currently use Milacron machines. This would spread the financial burden. | Greenscape Technologies/Paradigm International | 100 | 0 to 30 days | \$2,000,000 |
| Pike | Central Dispatch | New dispatch center to be able to function with many agencies utilizing a central dispatch. This will include several law enforcement agencies along with all of our county fire and EMS. We also take care of all 911 calls which come in for our county. | Pike County Sheriff's Office | 10 | 91 to 180 days | \$400,000 |
| Pike | Water Storage Tank Replacement and Waterline Exten | The project will involve the replacement of the two existing watermain tanks that have outlived their useful lives with one 400,000 gallon water storage tank and the installation of 7,000 feet of waterline to serve the State Route 32 area of Brylville Road. | Village of Picketon | 21 | 31 to 90 days | \$1,500,000 |
| Pike | Main Street Infrastructure Rehabilitation | The project will involve the rehabilitation of 2000 feet of the Main Street area including the replacement of water, sewer, storm sewer, street lighting, sidewalks and relocation of above ground utilities to underground. | Village of Picketon | 30 | 91 to 180 days | \$5,000,000 |
| Pike | American Boulevard Street Construction | The project will involve the construction and installation of 3,000 feet of local street, including water, sewer and storm sewer to provide access to a revitalizing commercial area of the Village. | Village of Picketon | 15 | 91 to 180 days | \$2,000,000 |
| Pike | Early Hazard Warning System | The project will involve the installation of 4 early hazard warning communication devices and reverse 911 communication system to sense the entire village for notification of its residents for natural and man-made hazards. The Village is located north of the Uranium Enrichment Plant and the Uranium Enrichment Plant is a "hot spot" for "OHIO residents". Some 7000 Ohio uranium mine sites were responsible for uranium ore in the first mining district of earth in Ohio. According to a study released by the American Diabetes Association, approximately 18 in 100 health care visits are attributed to diabetes. The total estimated cost of diabetes in Ohio in 2004 was \$6.9 billion which includes direct costs (\$3.9 billion) and indirect costs (\$3 billion). Indirect costs include increased factors such as absenteeism, reduced productivity, and lost productive capacity due to early mortality. Many diabetics deal with their health and nutrition status using out-of-date knowledge and/or unreliable information. Dealing with Diabetes has the potential to reduce health care costs and improve the health status of Ohio residents with diabetes. This project would provide funding for 20 Dining with Diabetes series (four classes in each series) in heavily populated, healthy counties, focusing on low-income, underserved audiences. Impact data following classes will demonstrate behavior and health status changes as a result of class participation. | Village of Picketon | 10 | 31 to 90 days | \$500,000 |
| Pike | Diabetes Education for Ohio Residents May Reduce H | | Ohio State University Extension | 25 | 31 to 90 days | \$30,000 |
| Pike | Site preparation for hangar construction | Site preparation for hangar construction. | Pike County Airport Authority | 5 | 31 to 90 days | \$297,406 |
| Pike | Pike County Manufacturing Center Improvements Proj | The project will construct a 400' L.F. access road to connect to and existing portion of the Pike County Manufacturing Center. The project will also construct 15,000 L.F. of Battery, Sewer and 7,000 L.F. of Base mat to provide sanitary sewer to the existing and proposed Manufacturing Center. This project will provide much needed facilities for support businesses to the DOE facility located in Picketon, OH | Stantec Consulting Services, Inc. | 50 | 91 to 180 days | \$2,845,000 |
| Pike | Resurface Rapp-Montgomery Road | Resurface 2.25 miles of Rapp-Montgomery Road in Union Township, Pike Co., Ohio | Union Township Trustees | 10 | 91 to 180 days | \$400,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Pike | Village of Beaver Curbs, Gutters and Sidewalks Pro | There are 2.5 miles of roadway in Beaver. We would like the infrastructure to include the 2.5 miles. We would like to have curbs, sidewalks and gutters throughout the Village. With the exception of Main Street, which is approx 1/2 miles there are no gutters, curbs or sidewalk within the Village. Within recent years, the Village has installed a new sewer line and replaced almost all of the streets, placed in service a storm sewer system. The village has completed most work on the water and sewer facilities. This project is self to be done of curb. With the village using less money as well as grant we have been to complete the above infrastructure. TO RECEIVE AN ACCURATE COST WE WOULD OBTAIN AN ENGINEER'S COST COST, WHICH WE SHOULD DO IMMEDIATELY IF STIMULUS MONIES BECAME AVAILABLE. IN THE FINAL APPLICATION AN ACCURATE COST ESTIMATE WOULD BE PROVIDED. | Village of Beaver, Ohio | 15 | 91 to 180 days | \$500,000 |
| Pike | Sewer Line Extension and Access Road Improvement f | The project will consist of 28,300 LF of public sanitary sewer and construct 3,400 LF of public roadway to improve a 700+ acre, marketable industrial site called the "Pike County Manufacturing Center". SOCI is working in conjunction with the state of Ohio's Strategic Development Plan to create the "Advanced Energy and Environmental Technology Hub" for Ohio to include the Portsmouth Gasoline Refinery Plant (US DOE PORTS) and the adjacent properties. Placing Ohio's strategy in tandem with the goals and objectives of DOE's Office of Environmental Management, SOCI is realizing the concept of "topnotch industrial and Energy Park Development at this location. The project will develop the properties located adjacent to US DOE PORTS along the US 275 "Energy Corridor" to create the Advanced Energy and Environmental Technology Hub of Ohio. The project will create 175 jobs and could create 400 new jobs. | Southern Ohio Diversification Initiative | 175 | 91 to 180 days | \$3,042,991 |
| Pike | Advanced Technology, Operations, and Manufacturing | Funding applications for this project are being submitted to the Economic Development Administration, Appalachian Regional Commission, and Industrial Site Improvement Fund. \$300,000 in match money has already been secured. The ability to provide a skilled and well trained workforce is a key ingredient to successful economic development programs. SOCI's work in redevelopment of the LISDOE site near Piketon is largely centered on new and emerging technologies focused on advanced energy, environmental technologies, and alternative energy research and development. A national training program is being developed through a coordinated effort among Workforce Connections, the USWU union, area Joint Vocational Schools, Shawnee State University, and OSU South Campus at Piketon. As the program grows and strategic partnerships emerge with US DOE PORTS contractors, the centralized custom training will provide the necessary human capital from southern Ohio to work within the Advanced Energy and Environmental Technology Hub of Ohio, located on and around the US DOE PORTS site. With 80% of the workforce retiring in the next 4 years, approximately 1600 highly skilled jobs will become available through attrition, plus new jobs will be created with the DOE project and subsequent Energy Park Initiative. Southern Ohio must prepare its workforce to fill this need. The program and facility will create 10 full time jobs. The project will create 175 jobs and could create 400 new jobs. The match money has been secured and is a result not an attractiveness as a recreational destination. The local region including Chillicothe and Waverly have many other individual recreational offerings, but we need a broader base of recreation to enhance the area. The lands will be used to purchase, rehab and expand marina facilities to service tourism and recreation on this lake, creating opportunity for 1-2 full time and several other seasonal employees, generate profit flow to the community that will enhance local businesses, and provide a regional central facility to represent a base location in the area for recreation. While the marina will service the lake, operators will also be expanded to non-marina activities such as providing property maintenance and enhancement services that will also improve the local professional attractiveness and values. | Southern Ohio Diversification Initiative | 3150 | 91 to 180 days | \$3,000,000 |
| Pike | Pike County Ohio Private Enterprise Enhancement PI | Repair and Replacement of 4800 linear feet of 15 inch Sanitary Sewer Main Trunk line that services the entire city of Waverly, Ohio, Pike County, Ohio, OH affecting well over 8,000 citizens. A one mile 2 lanes, shoulders roadway crossing 300 acres of undeveloped property in the corporation limits of Waverly, Ohio, OH will create commercial and residential development, provide alternate access to a main K-12 public school campus and a major highway state route. | self employed | 3 | 181 days or more | \$400,000 |
| Pike | Bridge Street Sanitary Sewer Project | Repair and Replacement of 4800 linear feet of 15 inch Sanitary Sewer Main Trunk line that services the entire city of Waverly, Ohio, Pike County, Ohio, OH affecting well over 8,000 citizens. | City of Waverly, OH | 0 | 181 days or more | \$200,000 |
| Pike | Waverly South Connector Project | A one mile 2 lanes, shoulders roadway crossing 300 acres of undeveloped property in the corporation limits of Waverly, Ohio, OH will create commercial and residential development, provide alternate access to a main K-12 public school campus and a major highway state route. | City of Waverly, OH | 300 | 181 days or more | \$2,000,000 |
| Pike | Salyers Road Bridge Replacement Project, PIK-TR315 | Bridge Replacement | Pike County Engineers Office | 6 | 91 to 180 days | \$281,275 |
| Pike | PIK-CR33-0.00 Various Guardrail Project CR33, 34,3 | Repairs of new construction of guardrail on CR33,34,35, 36, & 45. | Pike County Engineers Office | 6 | 91 to 180 days | \$300,000 |
| Pike | Eastern Local Energy Retrofit | Retrofit of electric light fixtures plus installation of sensor monitoring equipment for lighting and HVAC systems at Eastern School District K-12 campus. Project will cut District energy costs approximately \$50,000 per year. Match money has been secured. In addition, project will contribute toward the general societal goals of energy conservation, energy independence, reducing greenhouse gases, etc. 45,000 linear feet of 6" water line, 14,000 linear feet of 4" water line, 14,000 linear feet of 3" water line, 1 booster station and 1 - 200,000 gallon water storage tank. This will provide a safe and clean drinking water source to approximately 80 households. The residents wells have been tested and proved positive for e-coli. Additionally, the well will serve an existing business and planned business that will retain or create 100 jobs for this economically depressed area. | Eastern Local School District | 3 | 31 to 90 days | \$400,000 |
| Pike | Mifflin Township Water Line Extension | 45,000 linear feet of 6" water line, 14,000 linear feet of 4" water line, 14,000 linear feet of 3" water line, 1 booster station and 1 - 200,000 gallon water storage tank. This project will provide a safe and clean drinking water source to approximately 80 households. The residents drinking water wells have been tested and found to contain e-coli. Additionally, the water lines will serve an existing business and planned business that will retain or create 100 jobs for this economically depressed area. | Pike County Commissioners | 100 | 31 to 90 days | \$1,000,000 |
| Pike | Mifflin Township Water Line | 45,000 linear feet of 6" water line, 14,000 linear feet of 4" water line, 14,000 linear feet of 3" water line, 1 booster station and 1 - 200,000 gallon water storage tank. This project will provide a safe and clean drinking water source to approximately 80 households. The residents drinking water wells have been tested and found to contain e-coli. Additionally, the water lines will serve an existing business and planned business that will retain or create 100 jobs for this economically depressed area. | Pike County Commissioners | 100 | 31 to 90 days | \$1,000,000 |
| Pike | Pike County - Repair of Failed Sewage Systems | This project is a proposal to repair approximately 50 failed private sewage systems at an average of \$7000 per system. Systems will be tested and projects will be chosen with respect to water quality improvement and financial need. Successful completion will improve water quality in the watershed. | Pike County General Health District | 5 | 0 to 30 days | \$350,000 |
| Pike | NUTRI-CISE SURPRISE! | NUTRI-CISE SURPRISE! is designed to encourage and improve the diet, nutrition and exercise habits of young school age children and their families. The program would be administered by Ohio State University Extension Educator Family and Consumer Sciences Pike County. Pike County Schools participated in a pilot program during 2008-2009. We would like to expand this program to provide programming for the school districts in Pike County. The NUTRI-CISE part of the educational program is designed to enhance the quantity and quality of fruits and vegetables in their diet. The exercise program will encourage physical activity as part of the child and family's overall health. The SURPRISE! is a tool that each participant receives each month for a variety of fruits and vegetables grown in Ohio. This program would be offered to all Pike County Schools and Waverly City Schools and is an innovative and motivational program designed to report young school age children and their families in our Appalachian community. | Ohio State University Extension | 8 | 31 to 90 days | \$250,000 |
| Pike | Integrated Resource Management | Agriculture is a major contributor to Ohio's economy through direct sales of commodities and value added processing. Recent budget cuts have reduced the infrastructure that provides research and educational instruction to keep our farm businesses current with advances in technology and management decisions. The creation of an Integrated Resource Management team would provide an organized collection of management expertise. This team would be capable of visiting an agricultural business and diagnose weaknesses and strengths from perspectives of production, management, and marketing and then suggest unique strategies for improving the financial position and development opportunities for success. Expertise within the Ohio State University and private industry will make up the management team. These appointments would resolve 10+ stipended positions. This example can serve as a model for similar efforts in all areas of Ohio's small businesses to provide tools for success and stimulate economic growth. | OSU Extension Pike County | 10 | 31 to 90 days | \$750,000 |
| Pike | Business and Employee Retention | Manufacture Horse & Livestock Trailers for distribution through an existing dealer network. | Paint Creek Supply, Inc | 22 | 0 to 30 days | \$1,600,000 |
| Pike | Appalachian Small Farm Start-up and Survival | Across southern Ohio, many landowners are seeking ways to create income from new and small farms. Some will consider traditional agricultural enterprises while others are interested in pursuing the production of alternative, and non-traditional land uses. Many of these landowners are looking for ways to supplement their income or provide a new business or lifestyle opportunity. These landowners need to attain a greater understanding of production practices and management requirements, economics of land use choices, assessment of personal and natural resources, marketing alternatives and the identification of sources of assistance. A core group of OSU Extension Educators have developed and teach curriculum which addresses these management needs. Participants will develop business plans, identify and allocate resources, create budgets, and acquire management skills to successfully establish new agricultural enterprises that will provide additional household income of \$5,000 to \$25,000 per farm. These new enterprises will have direct influence on the economic stability of the individual farms and contribute to the local economy and community food system. Including the 10 poorest and all 6 ARC-distressed counties in Ohio. | OSU Extension - Pike County | 125 | 0 to 30 days | \$250,000 |
| Pike | Connecting Appalachia: Telemedicine Initiative | Ohio SOCHN members have reliable, high-speed broadband connectivity, telemedicine equipment for rural hospitals, clinics and homes will improve the continuity and quality of care while reducing costs by minimizing hospital stays, travel/transport, and eliminating duplication of services. Critical and intensive care consultations from urban medical centers to rural hospitals save lives, time and money while providing continuing medical education for geographically isolated physicians. At-home telemedicine helps patients better understand and manage chronic conditions, greatly increasing medication compliance and improving care. Requested project funds will primarily be used to purchase telemedicine equipment. Increased efficiencies and expected changes to reimbursement models for telemedicine (shift to pay-for-performance) will enable Southern Ohio Health Care Network providers to take over operating costs. | Ohio Valley Regional Development Commission | 410 | 91 to 180 days | \$28,130,938 |
| Pike | Connecting Appalachia: World Class Connectivity fo | The Connecting Appalachia World Class Connectivity for Industrial Parks project will bring fiber optic broadband connectivity, supporting high-speed voice, data and video communications, to 34 industrial parks across the 34 rural counties via the Southern Ohio Health Care Network's Fiber-Optic Backbone. For redundancy, physically diverse fiber runs will minimize service disruptions from cable cuts. Project funds will also be used to extend fiber-optic cables from the local backbone company and Internet Service Providers directly to the sites. This combination of facilities will create a competitive environment, providing a rich set of services at urban-market rates that will attract business looking to relocate. Community Points-of-Presence (C-POP) will be built in each park to house fiber termination and electronic equipment. This small computer rooms provide power and security systems, environmental controls, fire suppression, and remote monitoring. The network will feature primary towers linked via fiber to the Southern Ohio Health Care Network's (SOCHN) backbone. The primary towers will deliver high-speed point-to-point connections reaching any business location and all secondary towers in the 27,000 square mile service area. 215 secondary towers will blanket over 5,000 sq. mi. of rural expanse with fixed wireless broadband. An additional 110 tertiary towers will provide service to reach areas where the signal has been outaged by terrain, providing nearly universal coverage. The large infrastructure build creates jobs immediately, stimulating the growth of Wireless Internet Service Providers. The resulting network provides faster connections than satellite service at a much lower cost than building copper and fiber-optic cables to every home & business in sparsely populated areas. Broadband infrastructure is essential to economic development, education, health care & tourism in Appalachian Ohio. | Ohio Valley Regional Development Commission | 270 | 91 to 180 days | \$23,641,900 |
| Pike | Connecting Appalachia: Wireless Coverage of the Ru | The large infrastructure build creates jobs immediately, stimulating the growth of Wireless Internet Service Providers. The resulting network provides faster connections than satellite service at a much lower cost than building copper and fiber-optic cables to every home & business in sparsely populated areas. Broadband infrastructure is essential to economic development, education, health care & tourism in Appalachian Ohio. | Ohio Valley Regional Development Commission | 725 | 91 to 180 days | \$42,374,802 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Pike | Connecting Appalachia: Southern Ohio Health Care N | FCC awarded \$18M to build fiber optic rings connecting SOHCHN members in 15 counties. We are requesting an additional \$21M for the other 15 counties from the FCC Rural Health Care Pilot Program. Stimulus funds would cover FCC-required match, network upgrades for financially distressed clinics/hospitals/FQHCs, and project management. The SOHCHN Fiber-Optic Backbone will improve health care in Appalachian Ohio AND bring metropolitan-class broadband services at urban-market rates to businesses and homes in SOHCHN communities. Rural health care providers get reliable, high-speed connectivity to the robust network and QOSNet at rates subsidized by up to 85%. Broadband reduces health care costs and improves treatment by allowing (a) real-time teleconsultative care consultations from urban medical centers to rural hospitals w/HD video and sound, (b) at-home telemedicine for chronic conditions, (c) continuing medical education via distance learning, and (d) regional collaboration, research & coordinated public health emergency response. | Ohio Valley Regional Development Commission | 1,400 | 91 to 180 days | \$9,300,000 |
| Pike | Cultural Enrichment and Education Center of Appala | Purchase approximately 20 acres to build Cultural Center and Education Center of Appalachia Ohio. Provide job opportunities and per capita income in Appalachia to reach parity with the nation. Provide an agricultural and ecological research laboratory for region's bio science programs in conjunction with research conducted by Ohio State University South Center at Pikesville. Open exhibit area for traveling exhibits, an Art Studio to serve as a creative laboratory for students, outdoor botanical garden made up of native Ohio species, a live latheryn, an interactive museum of the history of Appalachian Ohio, featuring the Call Hill, nuclear energy, wood products, agriculture. We plan to work with the Cave Lake Center for Community Leadership project also. Other partners we plan to partner with is Battelle Institute, Ohio State University, local and state government and other private industry. | Pike County Convention and Visitors Bureau | 75 | 181 days or more | \$5,000,000 |
| Pike | Water System Improvement | Seal and repair existing water tower-water line replacement for Eastern Ave and repair- install an automated backwash system and purchase a backup generator to operate water plant in case of emergency. | Village of Beaver | 20 | 31 to 90 days | \$388,000 |
| Pike | Rural Broadband Infrastructure Development | Expand broadband infrastructure to extend High Speed data services and voice applications to unserved and underserved rural areas, in such a way that the infrastructure could potentially be shared with Emergency services. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Pike | Radio Meter Reading Installation | Installation of 5,000 radio read meters to better serve the residents of Pike County. This will allow for the conservation of water. | Pike Water, Inc. | 50 | 31 to 90 days | \$750,000 |
| Pike | Pike Lake State Park Dam Rehabilitation | Further dam rehabilitation project, in order to bring existing structure into compliance with Ohio dam safety laws. Design is currently nearing completion and will be ready to bid in the next 60 days. | Ohio Department of Natural Resources | 10 | 91 to 180 days | \$100,000 |
| Pike | Rural Broadband Infrastructure Development | Expand broadband infrastructure to extend High Speed data services and voice applications to unserved and underserved rural areas, in such a way that the infrastructure could potentially be shared with Emergency services. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Pike | Pike County Cultural Enrichment and Education Cent | Updated version of a previous submitted project. Construct a Cultural Enrichment Complex Center of Appalachia Ohio. Purpose: Pike County proposes to construct and operate an interactive cultural center. The center will provide unique opportunities for | Pike County Convention and Visitors Bureau | 50 | 181 days or more | \$5,000,000 |
| Pike | Distribution System Improvements | Install 4,000 of 6" main to replace an existing main with a high break rate and provide redundant supply to local hospital | Ohio American Water Company | 11 | 91 to 180 days | \$527,000 |
| Pike | Lake White State Park Dam Rehabilitation | Funds will be used to complete the second phase of rehabilitation work on the 4,200 foot long earthen dam at Lake White, including a new lake drain structure, armoring of the downstream slope of the embankment, reconstruction of State Route 104 (which is the top of the dam) and replacement of the SR 104 bridge over the spillway outlet. Work on the first phase of construction (log pile placement) was finished last year. The project will be designed by CDDT under a cost-sharing agreement with ODNR. Lake White is a Class II (moderately hazardous) dam and work is necessary for the dam to meet current dam safety requirements. to prevent in many locations. | Ohio Department of Natural Resources | 115 | 181 days or more | \$10,000,000 |
| Pike | Alternative Energy / Windmill | I am a welding technician who has recently been laid off of work at Kenworth Truck Company in Chillicothe, Ohio. I am taking steps to further my training and certifications to ensure that I will be employed again very soon. As you may expect going from \$30 an hr. down to \$11 on an employment base means my family must make some major budgetary adjustments. We have been looking into investing in a windmill on our property for an alternative source of electricity. The rising cost of electric is one main reason. Especially now that I am laid off. Please consider my request for funding to assist me in constructing a windmill on my property. We happen to live on one of the highest points in Pike County and always have a breeze blowing, sometimes more than we would really like. We believe that we could generate enough power to not only provide for our own residence, but transfer back onto the power grid. If there are programs already in existence to help me with this project please notify me of such programs. | n/a | 1 | 0 to 30 days | \$30,000 |
| Pike | Computer Web and Data Servers Replacements | The Garnet A. Wilson Public Library of Pike County seeks funds to replace its two computer servers. One server holds backed-up data of the library and other files necessary for its successful operation. The second server hosts the library's internal staff website, its public website, and the websites of other community groups like the Humane Society and Boy Scouts of America Troop. The servers were purchased in 2001 with help from the Bill and Malinda Gates Foundation. With the downturn in the Ohio economy, the library's monthly disbursements from the state of Ohio have dropped anywhere from 14-17% over the past few months. And the economic outlook continues to be dim, so we do not anticipate an increase in state money in the next year or so. The servers are vital to the successful operation of the library and allow us to continue to meet the educational and recreational needs of our patrons. In particular, our website receives hits from all over the world. Our patrons rely on the website for accurate, up-to-date web information about the library and its services. | Garnet A. Wilson Public Library of Pike County | 2 | 0 to 30 days | \$20,000 |
| Pike | Renovations to the Picketon Library | The Picketon Library was opened in 1997 and was the first branch built by the Garnet A. Wilson Public Library of Pike County. Now almost 12 years old, the facility is in need of new carpeting, painting, and window tinting to help reduce cooling costs in the summer months. Book shelves at the facility have been moved over time, to accommodate additional materials and provide a better use of the space, and the already worn carpet is further damaged. Being a public building with heavy use, the facility also needs a new paint job. We estimate that six construction workers would be needed to complete the job, thus helping the economy and workforce as well. available to the public and are used for a variety of purposes, including library catalog searches, resume creation, letter writing, email, e-government services (unemployment filing, tax filing, vehicle registrations, etc.), personal financial services (home banking, bill paying, etc.), job searching and applying for jobs, research, and recreation/leisure. | Garnet A. Wilson Public Library of Pike County, PI | 6 | 0 to 30 days | \$15,000 |
| Pike | Public Access Computers Replacement | These computers were purchased between 2001-2003, so are at or past their customary replacement period. Because of their age, they do not have necessary programs and updates required to run new programs. Fourteen of the computers would be installed at the main library, four at Beaver, and five at Picketon. Computers at the Latham branch qualify for replacement through a separate grant through the State Library of Ohio. | Garnet A. Wilson Public Library of Pike County | 28 | 0 to 30 days | \$46,000 |
| Pike | Public Training Lab Computers | With the downturn in the economy, our services are more heavily relied upon than ever. Many people who are unemployed or underemployed have been forced to give up their home internet connections and rely on us for our wired machines and for our wireless internet connections. We are asking for \$22,000.00 to replace eleven (11) laptop computers in an existing public computer training lab at the main library facility in Beaver. Originally installed through a grant from the Bill and Malinda Gates Foundation in 2001, these eleven computers are in desperate need of upgrade. Many of the features on the old PCs are no longer compatible with new programs, making training efforts by the library difficult and sometimes impossible. We are asking that laptop computers be purchased for this upgrade, as training can then be done at our other facilities in Picketon, Beaver and Latham, utilizing existing class lines and wireless links. Pike County still has one of the highest unemployment rates in the state, and having an up-to-date training facility here is vital to job training. We have found that many people will come to the public library for training, as opposed to other facilities, due to our positive reputation and non-threatening environment. This training is offered free and is open to any resident. Plan for manufacturing of new organo-metallic nanocomposite copper material for industry. This new class of metals has solved a common problem of traditional metallic composites where the second phase of the metallic composite tends to agglomerate or ball out of solution when subjected to several heat cycles past the melting point. Our materials when subjected to repeated melting cycles still maintains its unique properties. [We have currently been able to produce a second phase that makes up 5% of the mass of the nanocomposite. With improved equipment, this percentage can be significantly improved. This is not a traditional metal-matrix composite. Our second phase remains distributed throughout the nanocomposite. | Garnet A. Wilson Public Library of Pike County | 2 | 0 to 30 days | \$22,000 |
| Pike | Organometallic nanocomposites | Examples: Organometallic Copper Thermal conductivity: 3500W/mK Tensile Strength: 420.9 MPa Tensile Modulus: 56550 MPa Elongation at break: 1.56% Corrosion resistance All Iron-Hydrogen Sulfide (wet) Excellent | Third Millennium Metals, LLC | 21 | 0 to 30 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Pike | Energy Conservation Upgrades, Main Library Facilit | The library is a masonry masonry energy efficient building. The building was constructed in 1987. Currently, the building housed a lively stable (1800's), canal stonies remain as the foundation of the existing building, a lead stone and chicken hatchery, a grocery store, and a drug store. After renovations, the library moved to the facility in 1987, and while small repairs and restorations have been done, no substantial upgrades have been made in the last 22 years with the exception of a roof project in 2002. We are requesting funds to upgrade to new environmentally friendly and energy conserving systems. The funds would be used as follows: \$164,220.00 for HVAC replacement of existing units, including new energy efficient units and solar panels; \$48,000.00 for total window replacement \$27,600.00 for painting & cosmetic repairs needed as a result of other repairs. \$42,663.00 for LEED need floor coverings \$110,000.00 for a roof-top green space, giving the library an environmentally-friendly area for outdoor activities and programs - note the main library has no green space currently. | Garnet A. Wilson Public Library of Pike County | 50 | 31 to 90 days | \$436,483 |
| Pike | Energy efficiency | Hire energy conservation specialists to evaluate heating, cooling and lighting and make changes to ensure maximum efficiency. | Western Local Schools | 0 | 91 to 180 days | \$500,000 |
| Pike | Biomass Energy | Produce 300+++ tons of biomass energy per week by chipping forest waste products to decrease fossil fuel consumption. | Conley Logging | 5 | 31 to 90 days | \$1,000,000 |
| Pike | Homeless Prevention Program | Assistance with emergency rent and/or mortgage payments, utility payments to prevent disconnection or provide reconnection to vital utilities. Pike CAC operated a homeless prevention assistance program during the 2007-2009 funding period. Pike CAC served 109 individuals and 200 households and spent the entire \$7,730 award about six months prior to the end of the program. Funds were not available to continue this program but the need is more prevalent now than it was during the program funding period. Unemployment has risen to 10% in Pike County which is causing an epidemic of homeless prevention assistance needs. Pike CAC anticipates being able to serve 350-500 households with homeless prevention assistance services. | Community Action Committee of Pike County | 2 | 0 to 30 days | \$100,000 |
| Pike | Pike County YMCA Solar Powered Thermal System | The Pike County YMCA proposes to install 85 SunMax-30 solar evacuated tube collectors on the rooftop to heat the facility and its pool, reducing the facility's energy consumption by a minimum of 25% and eliminating over 382,000 pounds of CO2 emissions in the atmosphere annually. The proposed system will also save the YMCA \$45,000 per year on its utility bills. The current facility uses a combination of gas and electric powered heating systems. This savings will contribute to retaining 7 employees and allow the YMCA to invest more in its program and other facility needs. The project can begin immediately and will take approximately 11 weeks to complete. | Pike County YMCA | 7 | 0 to 30 days | \$250,000.00 |
| Pike | Ohio Cave Lake Center for Community Leadership | In collaboration with the Ohio West Virginia YMCA and the Cultural Enrichment and Education Center of Appalachian Ohio, the Governor's Office of Appalachian Ohio, Governor's Office of Appalachian, ARC, Pike County Commission, ODNR, Ohio Capital Support, Ohio Valley Regional Development Commission, GE, AEP and others request stimulus funds to construct an 11,000 square foot Leadership Education Facility at the 700 A.C. 700 Cave Lake property in Pike County. With classroom, housing and dining space for 150 persons, at least 100 jobs will be created and annually strengthen their capacity to renew civic, cultural and economic life of their communities by participating in leadership training, entrepreneurship, environmental stewardship, science, arts, cultural heritage and community building training. The facility is owned by the Governor's Office of Appalachia and created by SCPS in Cleveland. Designs at construction to be a sustainable building that will use natural / general construction materials, alternative heating, natural ventilation, day lighting, etc. The building will have high values and other green building strategies. Construction then full and part time jobs result. | Ohio-West Virginia YMCA | 65 | 31 to 90 days | \$4,500,000.00 |
| Pike | Awareness and Prevention: Crimes Against the Elder | Training to Law Enforcement, Agency staff & Financial Institutions in order to identify, prevent, and respond to cases of elder abuse, neglect, & exploitation. Create 4 part-time positions to provide proactive services for the elderly evening, holiday & weekends (expand current services around the clock provision). Create positions for one full-time deputy to assist in criminal investigations of elderly abuse, neglect, exploitation & to ensure safety of staff during investigations. Provide for outreach in order to increase awareness of elder abuse, neglect, exploitation. Equipment & maintenance of equipment needed for 24/7 protective services. | Pike County Dept. of Job & Family Services/APS Uni | 5 | 0 to 30 days | 160,000.00 |
| Pike | Criminal Youth Intervention & Tutoring | Provide services to youth & the families of youth who are involved or at risk of becoming involved in the juvenile system due to criminal activity or involvement in the juvenile system. Youth will be referred to the program by the court or not being eligible to graduate. Services shall include: counseling, behavior modification, socialization, intervention therapy, and family counseling. Goals are to assist youth in establishing positive value systems, learning to understand and appreciate the importance of education, dedication, and attendance such that their likelihood of becoming successful students and future employees is increased. With the understanding that the success is directly tied to the commitment made by the entire family, full-family involvement will be a part of the curriculum, thereby strengthening the family unit and improving the outlook of all family members. Study habits and classroom performance shall improve through individual & small-group tutoring. The program shall be a collaboratively run effort involving Juvenile Court, Local School Districts, Job & Family Services, and at least one Licensed Intervention Specialist. | Pike County Dept. of Job & Family Services | 10 | 0 to 30 days | 275,000.00 |
| Portage | Wastewater Treatment Plant Expansion | The Village of Garrettsville plans a BMS expansion for our sewer plant. Planning for this project is well under way. The expansion would markedly improve the Village's treatment capacity to accommodate anticipated future residential and industrial growth. Project financing is dependent on the 500 current accounts we have in the village with some future help from new customers as they tap in to the treatment system. The expanded waste water treatment system and increased capacity will have an immediate effect on jobs in the construction phase. Longer term, the increased capacity would provide the village with infrastructure capacity to accommodate future residential construction and industrial jobs over the next twenty years. Not to expand the plant would severely limit this development and growth in the village. Any assistance would be welcome as it would lessen the burden on our current customers and future customers and by the infrastructure foundation for future long term development. | Garrettsville Village | 25 | 181 days or more | \$2,000,000 |
| Portage | Crain Avenue Bridge Relocation - PID 18466 | The project includes the replacement of the existing Crain Avenue Bridge, elimination of congestion along apps. 2000 feet of SR 43 in Kent and elimination of safety concerns for the highest ranked intersection (SR 43/Portage/Crain Ave intersection) in the City of Kent. This is a joint project with the City of Kent and Portage County and currently includes CMAG funds, CEAD BR Funds and State HEP funds to fund the project. The project also includes construction of a critical link in "The Portage" Hike and Bike Trail which will connect the Ohio State Canal Towpath and Western Reserve Heritage Trail. The project is an AMTIS TIF and addresses congestion of the worst intersection in the AMTIS Region. The project has obtained the Environmental Process (EC Level 4 approved), the right-of-way is acquired and the plans are complete and in ODOT control of preparing to be bid. | City of Kent | 300 | 0 to 30 days | \$3,500,000 |
| Portage | IT Technology (Hardware, Software, Bio-Metric Dev. | The \$3,500,000 requested in stimulus money is to meet the funding gap for the project. The local public agency partners (Kent and Portage County) are funding approx. \$8.5 million of the total project cost with \$3.5 million in stimulus monies. Who knew the power to save lives is right at your fingertips. Surely, With the proprietary functions and use fingerprint interface technology and software from My LifePlan Holdings, Inc. (MLPH), emergency workers, hospitals and other healthcare providers can access medical history, health care power of attorney, living wills, advance directives, and other medical information they need to make split-second decisions. And in an emergency, seconds mean everything when you or your loved one's life is at stake. Company founder and CEO, Ruth Skolick, a former nursing home social services director, experienced in dealing with families in life-threatening medical situations, likes to imagine a world with no more Jane Does or John Does. | Portage | Water Reclamation Facility - Digester Lid Replacem | Replacement of the existing lid and mixer for Digester #2 in the Water Reclamation Facility. The project is required due to failing structural conditions for the lid built in 1964 and to upgrade the sludge mixing equipment to meet current EPA Standards. | City of Kent | 15 | 0 to 30 days | \$450,000 |
| Portage | Plum Creek Stream Restoration | The project includes removal of an in-line dam from Plum Creek, replacement of the adjacent culvert crossing and restoration of approx. 2,200 feet of the Creek. Plum Creek is located in the Cuyahoga River watershed and drains approx. 11 sq. mi. upstream of the dam which is no longer used for its original purpose. The existing dam is in poor structural condition as well as the 14 - foot corrugated steel arch culvert located at the toe of the dam. Both structures show signs of seepage around the structures | City of Kent | 25 | 91 to 180 days | \$1,000,000 |
| Portage | Water Reclamation Facility - Sidestream Control Ta | This project consists of adding a holding tank for process water retained from sludge dewatering. The process water removed from the sludge dewaterer is mixed and returned to a constant rate to the head of the plant to prevent large spikes of chemicals into the plant. | City of Kent | 15 | 31 to 90 days | \$960,000 |
| Portage | Water Reclamation Facility - Spetage Receiving and | This project entails constructing a holding tank for processed water from the sludge dewatering process that would be returned to the head of the plant. The process water would be returned to the head of the plant at a constant rate to prevent spikes in chemicals requiring treatment. In addition, the project would also allow the facility to accept septage from private companies for treatment. | City of Kent | 40 | 31 to 90 days | \$2,000,000 |
| Portage | Conversion of Polymer Waste to Alternative Fuel | Over 7% of the oil and gas consumed in the United States goes into the production of polymer products. 94% of those polymers and up in landfills where they stay forever. That is a \$40 billion unappreciated renewable source of fuel. Polyflow is looking for funding for the construction of a semi works plant to convert mixed polymer waste into alternative fuels and other valuable chemicals. The process has been proven in a pilot stage. This funding will bring the technology to commercialization and allow for the building of larger production plants throughout the country. Each plant would employ approximately 70 people without taking jobs from other existing businesses. The utilization of the polyflow process would reduce the volume of material plugging our landfills by up to 50%. In addition, the polyflow process creates its own energy from less than 10% of the polymer feedstock. The capacity in the US would be in excess of 200 plants. The semi works facility would provide the production process plus would serve as the corporate office for managing and constructing plants throughout the United States. Build new public safety center to replace current obsolete site station. We plan to host town meetings and utilize the facility as a community evacuation center and command post for township dispatches. Completion of the project will enable our fire department to operate out of one building instead of three. | Polyflow LLC | 40 | 31 to 90 days | \$5,000,000 |
| Portage | Suffield Township Public Safety Center | Build new public safety center to replace current obsolete site station. We plan to host town meetings and utilize the facility as a community evacuation center and command post for township dispatches. Completion of the project will enable our fire department to operate out of one building instead of three. | Suffield Township Trustees | 60 | 31 to 90 days | \$2,500,000 |
| Portage | The Atlantic & Great Western Discovery Park | The Atlantic and Great Western Discovery Park. The Atlantic and Great Western Discovery Park is a technology commercialization/innovation facility that features a partnership with the Kent Regional Business Alliance, Kent State University and the City of Kent. This project is ranked #6 on the NEPCO CEDS projects list, and was an Ohio JRS applicant when it was ranked "extraordinary" in both categories under Site Marketing-Preparation in Feb. 400-500 technology jobs could be created in a very short time frame after breaking ground. | City of Kent | 400 | 91 to 180 days | \$2,500,000 |
| Portage | Kent Multi-Modal Facility | Kent Multi-Modal Facility: This downtown transit/transit hub project will revitalize Kent's historic downtown and complement our \$40 million downtown revitalization project that includes a hotel/visitor center, retail, restaurants and office. The project is currently under negotiations with the following firms/agencies: Fairmont Properties, Stonebrook, Pizzoli Company, Kent State University and the City of Kent. The Multi-Modal Facility has received Federal funding for planning and has been conceptually designed over the past two years with a steering committee that includes the Portage Regional Transit Authority, Kent State University and the City of Kent. This project will support hundreds of new jobs and jobs in Kent's Central Business District. | City of Kent | 200 | 181 days or more | \$3,000,000 |
| Portage | St. Rt. 43 & 261 Business Park | St. Rt. 43 & 261 Business Park (Former Mail Stop) in the early 1990s, the DeBartolo Mall Company purchased and cleared land for a Kent Center development project. The project did not move forward. The City of Kent, being a mature municipality, is in dire need of additional land for an office/professional/light manufacturing park. Should infrastructure be extended to this combined land tract, immediate results (300-400 new jobs) could be generated. | City of Kent | 400 | 31 to 90 days | \$2,000,000 |
| Portage | Lake Street Industrial Park Roadway/Infrastructure | Lake Street Industrial Park Roadway/Infrastructure. This project is ranked #11 on the NEPCO CEDS list. The proposed project will extend road and utility infrastructure into Kent's former (abandoned) rail yard as well as provide Phase 1 & 2 studies and remediation remedies for this underutilized industrial land tract in the City of Kent. The project will put the property back into viable condition for new industries and jobs. This is an historically significant site, of which performance is currently a concern. It is in great need of repositioning. The City of Kent currently has an interested party looking to locate should the project move forward. A significant number of jobs would result from the improved infrastructure. | City of Kent | 100 | 31 to 90 days | \$2,000,000 |
| Portage | Downtown Kent Revitalization Project | Downtown Kent Revitalization Project. A \$40 million downtown revitalization project that includes a hotel/visitor center, retail, restaurants and office. The project is currently under negotiations with the following firms/agencies: Fairmont Properties, Stonebrook, Pizzoli Company, Kent State University and the City of Kent. The City of Kent and Kent State University have already invested over \$2.5 million in land acquisition and planning. If the project financing gap can be covered by funding the site infrastructure (demolition of buildings, relocation, utilities, road construction) the project can break ground in 2009. This project will support dozens of new businesses and jobs in Kent's Central Business District. | City of Kent | 200 | 91 to 180 days | \$5,000,000 |
| Portage | Kent White Water Park | Kent White Water Park. The Kent White Water Park project has been submitted for ODMR grant funding in conjunction with our former Cuyahoga River restoration project. This project entails the construction of a white-water attraction in a five-acre area and would target for heritage tourism and tourism. Without question, this project will complement and enhance Kent's Downtown Revitalization project. | City of Kent | 100 | 181 days or more | \$800,000 |
| Portage | City of Kent/Portage County/Kent State University | City of Kent/Portage County/Kent State University Joint Safety Facility. This three-way partnership of public entities taking advantage of economies of scale creates a project that would enhance the revitalization efforts of our Downtown project. The site is in close proximity to our Central Business District and would become a complementary project generating increased traffic enhancing critical mass to our overall downtown effort. | City of Kent | 100 | 181 days or more | \$10,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Portage | Water & Sanitary Sewer Project on St. Rt. 43 Kent | Portage Sanitary Sewer Project on St. Rt. 43 has been approved. Phase I consists of 1.6 miles and Phase II consists of 1.6 miles. The project would require the road to be widened to four lanes and the 2-3 mile strip runs in the Kent & Birnfield Township Joint Economic Development District (JEDD). The traffic courts and proximity to I-76 and Kent State University makes the project prime for business investment should the utilities be extended. The project would require \$2 million from the EDA to move forward. Note: San & Water on S 43 Project cost contingent upon mail site component. Total cost is \$1,435,000 if the Mail site is included if mail site not included \$3.5 million. This project is shovel-ready and can begin prior to March 31. | City of Kent | 250 | 31 to 90 days | \$2,000,000 |
| Portage | R. B. & W. Industrial Site Redevelopment | R. B. & W. Industrial Site Redevelopment: In 2008, this site was subject to the departure of a 100 year plus industrial complex. The City of Kent is in desperate need of additional industrial space as well as professional, technologically equipped space that will complement the new knowledge economy. This site is adjacent to the proposed Atlantic and Great Western Technology Center and fits with the City's Master Plan to redevelop the Mogabito Road Industrial Corridor. The site could support 150 + jobs as it has in the past. Funding is needed for remediation and infrastructure. | City of Kent | 150 | 91 to 180 days | \$800,000 |
| Portage | Fairchild/Turf Trimmers Infrastructure | R. B. & W. Industrial Site Redevelopment: In 2008, this site was subject to the departure of a 100 year plus industrial complex. The City of Kent is in desperate need of additional industrial space as well as professional, technologically equipped space that will complement the new knowledge economy. This site is adjacent to the proposed Atlantic and Great Western Technology Center and fits with the City's Master Plan to redevelop the Mogabito Road Industrial Corridor. The site could support 150 + jobs as it has in the past. Funding is needed for remediation and infrastructure. | City of Kent | 65 | 31 to 90 days | \$300,000 |
| Portage | Ametek Industrial Park | Ametek Industrial Complex: The Ametek Industrial Complex is located along Lake Street in the industrial sector of Kent. The site was once a major manufacturing complex with over 2,000 employees. Today this complex houses Ametek's corporate headquarters, engineering and R & D departments with over 100 employees. The City of Kent has been looking at various programs to retain these high paying jobs and world headquarters. Remediation and adaptive reuse of the complex will allow us to negotiate a new facility and head office for this significant U.S. Ohio employer. | City of Kent | 100 | 181 days or more | \$750,000 |
| Portage | Gouglar Industrial Complex | Gouglar Industrial Complex: The Gouglar Complex is very similar to the Ametek site, located along Lake Street in the industrial section of Kent. The site was once a major manufacturing complex with hundreds of employees. Remediation and adaptive reuse of this complex will allow us to keep this important industrial land in productive use. | City of Kent | 250 | 181 days or more | \$1,000,000 |
| Portage | Downtown Hotel (Ellis) Revitalization Project | Downtown Hotel (Ellis) revitalization project - The Downtown Kent Hotel (Ellis) was built in the early 1920s. This historic landmark has suffered decay for many years and has not been able to reproduce due to a financing gap in expenses and current market forces. This site is located next to the Phoenix project, a \$6.5 million dollar project, that has completed phase one and will complete the remaining two phases by the fall of 2009. Should the gap be filled an additional 100 jobs would be created. | City of Kent | 150 | 91 to 180 days | \$1,000,000 |
| Portage | Golden Pond Development Infrastructure | Golden Pond Development Infrastructure: Existing water and sanitary sewer infrastructure to this development ready site will allow for expansion for several new businesses. The City of Kent currently has several prospects should the project move forward. | City of Kent | 100 | 0 to 30 days | \$300,000 |
| Portage | Former Tops Facility | Former Tops Facility: This shopping complex is located at the intersection of St. Rt. 43 and St. Rt. 261. The site fell victim to the collapse of the anchor tenant, Top's Grocery Store, and has suffered ongoing vacancies and job losses since that time. An investment in the site for public revitalization is needed for this site. | City of Kent | 150 | 0 | \$300,000 |
| Portage | The Atlantic & Great Western Discovery Park | The Atlantic and Great Western Discovery Park: The Atlantic and Great Western Discovery Park is a technology incubator/retail facility that facilitates a partnership with the Kent Regional Business Alliance, Kent State University and the City of Kent. This project is linked to the NPEDES project and was an Ohio 2008 project when it was ranked "retail/retail/retail". Downtown Kent Revitalization Project - A \$4 million downtown revitalization project that includes a new retail, restaurant, retail, restaurants and office. The project is currently under negotiation with the following firms: Fairmount Properties, SmartCard, Pizzal Company, Kent State University and the City of Kent. The City of Kent and Kent State University have already invested over \$2.5 million in land acquisition and planning. If the project financing gap can be covered by funding the site's infrastructure (demolition of buildings, relocation of utilities, road substitutions) the project can break ground in 2009. This project will support dozens of existing and new businesses and jobs in Kent's Central Business District. | City of Kent | 400 | 91 to 180 days | \$2,500,000 |
| Portage | Downtown Kent Revitalization Project | Downtown Kent Revitalization Project - A \$4 million downtown revitalization project that includes a new retail, restaurant, retail, restaurants and office. The project is currently under negotiation with the following firms: Fairmount Properties, SmartCard, Pizzal Company, Kent State University and the City of Kent. The City of Kent and Kent State University have already invested over \$2.5 million in land acquisition and planning. If the project financing gap can be covered by funding the site's infrastructure (demolition of buildings, relocation of utilities, road substitutions) the project can break ground in 2009. This project will support dozens of existing and new businesses and jobs in Kent's Central Business District. | City of Kent | 200 | 91 to 180 days | \$5,000,000 |
| Portage | Dist 4, PID 84872, POR SR 0261 01.19 | Rehabilitation And Repair Of Hrgs System. | Ohio Department of Transportation | 25 | 31 to 90 days | \$600,000 |
| Portage | Public Sanitary/Storm Sewer Infrastructure Water Q | Sanitary sewer main relining/repayment and storm sewer improvement program for infrastructure that is generally in excess of 60 years old. This project will replace approximately 1 mile of sanitary sewer and add approximately 1 mile of new storm sewer. The benefits of this program are primarily to provide significant environmental improvements within the Great Lakes Watershed Basin as intended in the Clean Water Act and the more recent NPDES Phase II Storm Water Regulations. This program will provide a means that otherwise would not be available. It will have significant and direct quality of life benefits both within and outside the City of Ravenna. | City of Ravenna | 400 | 31 to 90 days | \$4,750,000 |
| Portage | Watershed Preservation Public Wildlife Refuge | This project will facilitate the purchase of additional access to the abandoned Pennsylvania and Ohio Barge Canal and construction of a public use pathway for a distance of approximately eight (8) miles. The City of Ravenna currently owns the entire right-of-way along this canal, which serves as the source of water supply for the City of Ravenna and a considerable portion of Portage County. Additional access from public roads is needed to sufficiently protect and provide beneficial public recreational use of this important natural resource. This project will serve to protect and improve the important source of water supply and wildlife habitat. It will also serve to provide a significant quality of life benefit to the public in harmony with the Clean Water Act and the Safe Drinking Water Act. The ability to monitor as required under NPDES Phase II requirements will be greatly improved. This project will also facilitate a significant improvement in source water protection measures. | City of Ravenna | 100 | 91 to 180 days | \$1,000,000 |
| Portage | State Route 303 Flooding | Approx. 4,000 LT of S.R. 303 is prone to flooding during heavy rains anytime of the year and in the spring during snow melt with moderate rain. S.R. 303 is the only direct connection to communities to our west. Flooding of this road impacts our mutual aid agreements with these communities. In the event of an emergency our response time is increased by at least 10 min, which could be the difference. Part of the road was built by the state over extremely poor solid dark brown & black peat. In order to rebuild this road to eliminate the flooding would require their abandonment of existing material and replacement of a structural approach. In either case a considerable amount of the area would be required before design. We are asking that this project be considered due to the effect on the health, safety and welfare not only of our citizens but those of the communities that we have mutual aid agreements with in case of an emergency. Kent Displays, Inc. (KDI) proposes to leverage equipment and hire workers that will electronically configure Reflex LCD displays after they come off of the assembly line. These LCD products are currently being tested by SmartCard vendors. They will be used in medical and Electronic Medical Record System (EMR) products to increase the security of medical or financial transaction and to prevent fraud and identity theft. A \$1.65M investment will create 18 high skilled, high paying jobs in OH, and will leverage previous state investments for a sustainable "Techhub" focused on selling products in the rapidly emerging Flexible Electronics industry. Techhub will be the outcome of the multi-billion \$ LCD industry, which was invented in Kent, OH but originated in Asia based on forward looking investment and capital. This initiative will enable production of 40M SmartCard displays by 2013. KDI will manufacture and ship these displays from OH, rather than from Asia-based subcontractors. The end result will be the ongoing creation of high paying jobs and modernized infrastructure in the region, which will be required for success. We see the next wave of growth in manufacturing in high-tech consumer electronics moving from Asia to Ohio and into the global mobile phone and notebook computer markets. This manufacturing will take place in Ohio and will export products globally. | City of Streetsboro | 150 | 181 days or more | \$17,000,000 |
| Portage | Electronic Skins using Reflex™ LCD Display Technol | This program has the potential to create over 40 medium to high paying jobs and retain over 25 jobs immediately. Program costs include \$6.6 million for capital and \$2 million for operations for start up. The economic impact of this is immediate and is highly sustainable due to the growing mobile handset and notebook computer markets. This also leverages current ODDO programs in place and a technology development ODDO program that is pending. | Kent Displays, Inc. | 18 | 31 to 90 days | \$1,650,000 |
| Portage | Manufacturing of Electronic Skins using Reflex™ Li | As part of this program, we will build, on-site, world class manufacturing facilities as well as chemical synthetic facilities. There is a serious risk of exporting of such capability and manufacturing capacity if this investment is not made immediately. | Kent Displays, Inc. | 65 | 0 to 30 days | \$8,600,000 |
| Portage | Drinking Water Quality Improvement Project | The Federal Distribution By-Products Phase II legislation has placed a hardship on many small municipalities with surface water sources. The City of Ravenna has been adversely impacted by this legislation. Compliance with this legislation will require an initial capital investment of \$2,000,000.00 and additional, an ongoing annual operating expense. This project involves retrofitting the water treatment plant with granular activated carbon filters to treat the organic carbon (pesticides) products. The new process that this project will provide will result in a significant improvement in water quality. This process will insure the reduction and/or elimination of potential carcinogens that will benefit the health and welfare of all that live and work within the water service area of the City of Ravenna. The City of Ravenna will incur additional operating expenses that result from the need to change the granular activated carbon media when it is exhausted. The City will absorb these expenses into the annual operating budget. | City of Ravenna | 100 | 31 to 90 days | \$2,000,000 |
| Portage | Water Treatment Plant SCADA Project | This project involves bringing approximately 100 data points together to a centralized plant supervisory control and data acquisition system. This is a construction project that includes retrofitting PLC's through the plant and water distribution system for monitoring and includes some automation. It will also integrate existing security cameras and add additional cameras that are an essential security requirement for public water systems. | City of Ravenna | 50 | 31 to 90 days | \$850,000 |
| Portage | Water Treatment Plant Roof | This project involves the installation of a new roof for the water treatment plant. | City of Ravenna | 25 | 31 to 90 days | \$200,000 |
| Portage | Sewer System Power Generation Project | This project involves the installation of backup power generation equipment ranging in size from 40 Kva to 200 Kva for a total of eight (8) sewer lift stations. In addition to operational benefits, this project will also provide environmental benefits by assuring the continued operation of lift stations during a power failure. This will prevent odors from the environment. | City of Ravenna | 25 | 0 to 30 days | \$500,000 |
| Portage | Improvements Taking Hiram Village into the Future | This project will allow the Village of Hiram, Home of Hiram College to make various improvements throughout the Village such as streets, water and sewer systems, the police and fire department as well as improving general public safety and well being. The village has been in dire need of major improvements for sometime and has been previously unable to secure substantial funds for these improvements. The stimulus funding that could be provided by the government would be immensely beneficial to the village and improving the life of the young college students whose futures begin here, as well as the citizens of Hiram who have chosen to make their lives here. | Village of Hiram | 200 | 31 to 90 days | \$3,818,560 |
| Portage | Fire Department Addition | Construct 5000 square foot addition to existing fire station. Present station does not allow room for paid personnel to have room needed for training and other activities. Also this addition would house newer vehicles that do not fit inside of existing station. | Deerfield Twp. Fire Dept. | 2 | 31 to 90 days | \$250,000 |
| Portage | Frost Road Curb Repacement & Drainage Upgrade | Section to be worked to approx. 6,500 LT. w/ 25' wide roadway. Conc. curb & gutter the entire length. Curb and gutter are setting and catch basins collapsing due to lack of underdrain. Pavement deteriorating for same reason. Groundwater migrates into roadway causing failures. Project to replace all curb and gutter along with collapsed catch basins, install underdrain along entire project. Grind & top existing roadway along with numerous necessary full depth repairs. This is a major safety hazard through the City. Project would eliminate further work for 5 to 7 years. | City of Streetsboro | 30 | 31 to 90 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Portage | City wide Road Program | The City has approx. 90 miles of roadway including 3 state highways. Due to budget restraints most roads are in various stages of disrepair. This is an issue that creates a hazardous traveling environment for the public. Without work, some of these roads may need major reconstruction in the future. The City would use any available funds to do all necessary full depth repairs and to grind and top as many of our roads as possible, starting with major streets and working to the subdivisions. Numerous communities would benefit from this work. Life expectancy would be from 2 to 5 years | City of Streetsboro | 35 | 31 to 90 days | \$2,100,000 |
| Portage | David/Diane Water Line Replacement | Existing water lines through the proposed area are over 12 years old and constructed of permastrand pipe. This type of pipe is extremely thin and plastic wrapped in Berglas. It is prone to constant failure, causing residents to be without water service. Fire protection is minimal based on a number of current hydrants and the fact that the line may rupture at any time. This is a matter of health and safety. Replacing this line would benefit both the citizens and the City. The life expectancy of this project would be approx. 50 years. | City of Streetsboro | 100 | 91 to 180 days | \$2,000,000 |
| Portage | City of Ravenna - WWTP Final Clarifier Rebuild (2) | This project involves the purchase and installation of the weirs, troughs, rakes and drive shaft in two (2) wastewater treatment plant secondary clarifiers. Additionally, it will include rehabilitation of the clarifier body (tank) | City of Ravenna | 35 | 31 to 90 days | \$350,000 |
| Portage | City of Ravenna - Inflow and Infiltration Project | This project involves the installation of approximately 1200 linear feet of 72" concrete storm water pipe and approximately 7,000 linear feet of 30" sewer pipe including appurtenances such as necessary manholes. Alternative bring in some sewer lines is possible. | City of Ravenna | 100 | 31 to 90 days | \$2,750,000 |
| Portage | Replacement of 7,500 feet of 16" diameter main wat | Our main line—without 40 years old, is deeply corroded and must be replaced—our corrosion has created this condition—new line with have corrosion protection—from Corropro type device | City of Aurora | 20 | 91 to 180 days | \$1,100,000 |
| Portage | Gauga Lake Storm Water Box Culverts | Installation of five box culverts will solve severe flooding problem (engineering is complete) | City of Aurora | 30 | 31 to 90 days | \$700,000 |
| Portage | Industrial | Current LTR Station is 50 years old—leaking problems—needs replacement | City of Aurora | 32 | 31 to 90 days | \$240,000 |
| Portage | Sunny Lake Park—sanitary sewer | Environmental Risk—Sanitary Force Main is a replacement for septic system which serves the waste for the Sunny Lake Park of the City of Aurora | City of Aurora | 22 | 31 to 90 days | \$190,000 |
| Portage | Cochran Road Re-construction | Important feeder road—terrible condition—needs complete reconstruction—includes storm water work, also includes working community for those disabled. 1000+ jobs to be created in sewing center and call center. 500+apartments, day care, voc. rehab training. | City of Aurora | 40 | 31 to 90 days | \$550,000 |
| Portage | Sheltered-working community | | Blind House for the Blind and Vision Impaired | 999 | 31 to 90 days | \$50,000,000 |
| Portage | Brimfield Safety Center | Brimfield is a rapidly growing community. Our population has increased to 10,000 from 6,800 in the 2000 census. Retail and residential developers are located where farms once were. We need help. Both departments are funded fully by tax levies and with current economic conditions, we see little chance of passing a levy for a new building and frankly we do not want to ask the taxpayers for more money. The Police and Fire Departments are currently located in very old and very confined individual buildings. Our calls have increased dramatically due to the growth of the community. This request is to build a modern safety center to house both departments. Included will be a large meeting room for Trustees meetings and for meetings with our local business and the fire. All funding will be used to purchase materials and pay local workers to construct this building. MRI is the imaging of the future, with great advantages over other medical imaging technologies. Many new clinical applications are being made, advances in MRI phased array coil design including cardiac, body and neuro imaging applications. In our local area we have some of the most capable MRI facilities including the Cleveland Clinic. University Hospitals of Cleveland and CSD who have reached out to GEHC to find local solutions. Not only the work in engineering create new highly skilled jobs immediately, it would lead to continued manufacturing in the region in the future. | Brimfield Police Department | 1,000 | 31 to 90 days | \$6,500,000 |
| Portage | Next Generation MR Imaging | Recent breakthroughs in phased array design and the advent of Parallel Transmit will enable significant new clinical applications for the above mentioned patients. GE has demonstrated to them the possibility of new cardiac, body and head arrays in early clinical studies. In our local region we have technical centers of excellence at Case and CSD in MRI physics and modeling. Using our combined talent and scan experience, we can deliver value to the community through better healthcare, and create highly skilled jobs. PARTA electronic fare boxes | GE Healthcare Coils | 25 | 31 to 90 days | \$9,000,000 |
| Portage | Dist 4, PID 85596, PARTA electronic fare boxes | | Ohio Department of Transportation | 32 | 91 to 180 days | \$1,600,000 |
| Portage | Dist 4, PID 85597, PARTA hardware and software | PARTA Hardware and software for regional coordinated transportation | Ohio Department of Transportation | 35 | 31 to 90 days | \$1,765,000 |
| Portage | Crain Avenue Bridge Replacement | This is a joint project with the Portage County Engineer and the City of Kent to replace the Crain Avenue Bridge on a new alignment over the Cuyahoga River and CSX Railroad. The purpose of the project is to replace the bridge, which is owned by Portage County and reduce the traffic congestion in the City of Kent. The proposed intersection of Crain Ave., Fairchild Ave. and Marston St. is used the most congested intersection in all of Portage County by AMATS. It is said the fourth most congested intersection in the entire AMATS area including all of Summit County. The project will take 2.5 years to complete and is scheduled to start in June 2009. | Portage County Engineer | 200 | 31 to 90 days | \$6,020,000 |
| Portage | Berlin Lake Trail | 2.2 miles of multipurpose trail to serve as alternative transportation route across Berlin Lake. Potential to connect to regional trail systems in Stark and Trumbull counties. Provides access to Berlin Lake Recreation and Wildlife Areas. | Portage Park District | 5 | 31 to 90 days | \$350,000 |
| Portage | 2009 Street Resurfacing Program Increase | The project includes milling and resurfacing additional streets than currently planned within the City of Kent. The streets added are currently in very poor to poor conditions having a pavement condition index varying from 17 to 44 (scale from 1 to 100). In total, an additional 2.14 miles would be milled and resurfaced with the stimulus request. | City of Kent | 10 | 91 to 180 days | \$650,000 |
| Portage | Sidewalk replacement | The roadways to be resurfaced include: Summit Street, Fairchild Avenue, Crain Avenue and North Depuy Street. These are Federally Classified Roadways that the City does not have enough funds to include in the current 2009 street program. The existing program is budgeted at \$700,000. | City of Ravenna | 4 | 31 to 90 days | \$166,000 |
| Portage | Road paving | 13,050 linear feet of roadway paving | City of Ravenna | 10 | 31 to 90 days | \$474,000 |
| Portage | Brady Lake Road Bridge Replacement | This project replaces the bridge on Brady Lake Road, C.H. 102, over CSX Railroad and Breakneck Creek and improves 0.11 miles of roadway in Franklin Township, Portage County. The existing bridge is a two span steel truss and steel beam, 138'-0" in length and the proposed bridge is a two span, 160'-0" prestressed concrete boxbeam with reinforced concrete deck and railing. The project is located on an Urban Minor Arterial which serves 8200 vehicles a day from City of Ravenna to the City of Kent. The existing structure has a 28 year load limit and a General Appraisal of 4. The project has Federal LTR funding and is scheduled to be bid for construction in the next 60 days. | Portage County Engineer | 30 | 31 to 90 days | \$1,124,000 |
| Portage | Video Systems for Police Cruisers | By our agency to document all field detainee hearings, introduced driver arrests, all traffic stops, incidents of domestic violence, DUI checkpoints, passing stoplines, and any other incidents where audio and/or video evidence will be beneficial to for successful prosecution. Our current cameras have become old and outdated. They are breaking down, and the video quality continually degrades every day. It is important that we update this equipment for our agency. Unlike many, our community continues to grow within Portage County. Quantifying the full benefit of this project is difficult at this time. We know that quality video/audio evidence helps prosecutors successfully present cases to juries. We know that quality video can often lead to a plea before a case ever makes it into a courtroom. We know that video is helpful for agency training purposes, for processing complaints fairly and impartially, and for police officer safety in general. | Streetsboro Police Department | 0 | 0 to 30 days | \$53,413 |
| Portage | New Restrooms | New restrooms mens and womens 40 R x 60 ft. | Portage County Randolph Fair | 50 | 0 to 30 days | \$400,000 |
| Portage | HORSE RING COVER | 10 stalls and showers 2 handicap showers and 2 handicap restroom stalls. These are used during the year by the public also used during fair approx. one hundred seventy thousand people. | PORTAGE COUNTY RANDOLPH FAIR | 6 | 0 to 30 days | \$350,000 |
| Portage | ELECTRIC CAMPGROUNDS | A ROOF OVER OUR HORSE RINGS WE HAVE SHOWS ALL SUMMER FOR 4+ KIDS AND OPEN SHOWS. THIS WOULD BE USED TO UP DATE ELECTRICAL OUTLETS FOR TO 30 AMP FOR 300 CAMPING SITES THAT ARE USED FOR OUR FAIR FOR 4+ CAMPING ONLY. | PORTAGE COUNTY RANDOLPH FAIR | 10 | 0 to 30 days | \$150,000 |
| Portage | Western Reserve Heritage Trail and Greenway | The Western Reserve Heritage Trail and Greenway (WRHTG) Portage Section, is a 6.3 mile multipurpose paved trail along an out-of-service railroad corridor. The green infrastructure project is a regional alternative transportation route that will be beneficial area to parks and businesses to serve communities in Northeast Ohio, eventually reconnecting Youngstown to Cleveland. The WRHTG Portage County section will traverse the City of Aurora to link to the WRHTG Solon Section, passing by the former Gauga Lake Amusement Park. The trail will help to revitalize economic development of this area, and will not interfere with future potential commuter rail on this corridor. | Portage Park District | 20 | 91 to 180 days | \$1,350,000 |
| Portage | Expansion of Community Counseling Based Services | The intent of this project is to expand current community based counseling and add psychiatric support services throughout Portage County to meet the current and future needs of consumers (children and Families). Currently many families being served are not able to keep appointments due to issues related to child insurance and/or current employment status. (i.e. can not afford gas to get to appointment, can not afford co-paying/child fees). Many of our current clients are not able to follow through on treatment recommendations and are not being seen regularly due to the family not being able to afford service related costs. The intent of this project would be to have current office based workers go out into the community to better meet the needs of our clients and to assure that treatment is not interrupted. The expected outcomes would be: 1. To decrease the "no-show" rates to less than 10% by bringing the mental health service to the consumers community. 2. To increase the successful completion of treatment goals to 90% for clients enrolled in services; and 3. to provide going psychiatric support to clients in need of medication management due to mental illness. | Children's Advantage | 10 | 0 to 30 days | \$150,000 |
| Portage | Save Twin Lakes | A small food store in Twin Lakes Ohio that is one of the few struggling businesses left in the community. Expected outcome to maintain utilities, vendor support and employee jobs. Also would like to add on to our selling displays via 24 feet of additional refrigerated meat case. | Vaughns Market 43 LLC | 19 | 0 to 30 days | \$125,000 |
| Portage | Portage County Solid Waste District Warehouse Proj | The Portage County Solid Waste Management District has the need to construct a 22,000 square foot warehouse at the District's Recycling Center. The warehouse would allow the District to ship recyclables via rail and realize a increase in revenue. The District could then repurpose the facility to increase production to a level that would require the addition of a second shift. Additional materials could be collected from not only Portage County but from neighboring counties as well. At the current staffing level, this project will create an additional 15 green collar jobs at the Recycling Center for residents of Portage County. The reorganizing of the Recycling Center would help reduce the burden on the area's private, taxable industry with a low cost source of raw materials, and help to create economic stimulus in Portage County. The diversion rates of materials being placed in landfills will dramatically increase for all of the Solid Waste Districts that would bring material to the Recycling Center. | Portage County Solid Waste Management District | 15 | 91 to 180 days | \$700,000 |
| Portage | Coit Road Bridge Replacement | This project replaces the bridge on Coit Road over the Cuyahoga River in Shakerloo Township, Portage County. The existing bridge was closed to traffic on July 13, 2008 due to major deterioration and failure of stringers supporting the bridge deck. The 10' existing steel truss bridge was built in 1940 and rehabilitated in 1979. The bridge is supported by full height sandstone abutments capped with reinforced concrete beam seats. The proposed bridge is a three span (60'-7ft.5" - 34.5') composite prestressed concrete box beam with a reinforced concrete deck and railing on reinforced concrete abutments and wall type piers. The project will also improve 600 L.R. of Coit Road south of the bridge by decreasing the vertical grade and degree of curvature making the road safer for the traveling public. The project has a grant from OPWC and we are requesting stimulus money to pay for the local share. The price we complete, environmental requirements have been met and all at all right-of-way has been returned to replace the structure. | Portage County Engineer | 15 | 31 to 90 days | \$750,000 |
| Portage | Lakewood Road Bridge Replacement Project | Lakewood in Ravenna Township, Ohio. The project will realign 825 linear feet of roadway along with widening the travel way from 21 feet to 24 feet in center to eliminate poor sight distance and provide a safe route for the community. Lakewood Road is a Major Collector with an average daily traffic of 4000 vehicles. The project will also contain 5 foot paved shoulders that will accommodate bike lanes to and from Portage Park District property. The existing 59 foot painted steel truss has a General Appraisal of 4, classified as structurally deficient and is posted a narrow bridge. Many of the truss members and floor beams are severely corroded. Existing concrete abutments have areas of spalling with reinforcement steel showing. The proposed bridge is a single span 65 foot composite prestressed concrete I Beam with a reinforced concrete deck and railing on reinforced concrete semi-integral abutments. | Portage County Engineer | 28 | 31 to 90 days | \$530,100 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Portage | Electronic Health Record project | Our agency would like to integrate our health records in order to serve our clients more efficiently and effectively. We serve mental health, alcohol and drug addiction, and physical health clients. The cost for upgrading our health record system is prohibitive. We would need to hire a IT contract person, one new desktop support staff, and maintain 3 already existing support staff. We would need to purchase a new server and the software to run the new record system. Without this system we would be very limited in our communication not only with our agency but with other providers. This would impact our clients care and over time reduce the number of referrals made. Without keeping up with the changes in other systems it would likely result in agency staff reductions and possibly agency closure. The request is to renovate the energy system for our Halfway House to include Solar energy and reduce the cost of heating or residential program. It would possibly result in create jobs for our future. It would likely affect the company with the contract to do it might help us expand our programs which would create are new job in the Agency. The best idea would be to do this for all government supported halfway houses . In the long run we would all win. | Townhall II | 5 | 31 to 90 days | \$200,000 |
| Portage | Energy efficiency | | Townhall II | 5 | 31 to 90 days | \$75,000 |
| Portage | TALLMADGE ROAD RESURFACING | This project will repair and resurface 2.43 miles of Tallmadge Road from the Summit County Line east to S.R. 43 in Brimfield Township, Portage County. This section of road is classified as a Minor Arterial from Summit County Line to 176 and a Major Rural Collector from 176 to S.R. 43. This section of road has become the most congested section of roadway Portage County maintains since Walmart, Lowes and several other businesses have opened along this way ago. This section of road has a Pavement Condition Rating of 1.0 which is below our classified road sections. The project will mill and 12" of asphalt and make all necessary base repairs. | Portage County Engineer | 30 | 31 to 90 days | \$575,000 |
| Portage | Waterloo Road Resurfacing | This project will repair and resurface 8.1 miles of Waterloo Road from the Summit County Line east to S.R. 224 in Summit Township, Portage County. This section of road is classified as a Rural Major Collector. This section of road has an Average Daily Traffic count of 5000. This section of road has a Pavement Condition Rating of 1.0 which ranks it towards the bottom of our classified road sections. The project will mill and 12" of asphalt and make all necessary base repairs. | Portage County Engineer | 30 | 31 to 90 days | \$1,750,000 |
| Portage | Road Paving | approximately 6 miles of Township road paving We estimate that it would cost us \$50 a linear foot to pave 15 miles of roads which are in very poor shape. We have no road levy monies. There is no money left for road paving in our general fund budget. If we could receive federal stimulus dollars, we could hire 2 to 3 people each year for 2 years to pave roads. This money would also help justify any paving contractors personnel. | Brimfield Township | 3 | 0 to 30 days | \$4,000,000 |
| Portage | SALT STORAGE BUILDING | BLOCK WALLS INSTALLED \$21,387 ASPHALT PAVING \$16,434 ARCHITECT FEES \$2000 PERMIT FEES \$375 TERRADOWN OLD SHED (INNO) DUMPSTERS FOR OLD SHED DEBRIS \$1460 PAINT/REPAIR EXISTING SERVICE GARAGE \$6767 | BRIMFIELD TOWNSHIP | 50 | 31 to 90 days | \$72,000 |
| Portage | SALT STORAGE BUILDING | THIS PROJECT IS SHOVEL READY COVER-ALL COVER & INSTALL \$23,100 BLOCK WALLS INSTALLED \$21,387 ASPHALT PAVING \$16,434 ARCHITECT FEES \$2000 PERMIT FEES \$375 TERRADOWN OLD SHED (INNO) DUMPSTERS FOR OLD SHED DEBRIS \$1460 PAINT/REPAIR EXISTING SERVICE GARAGE \$6767 | BRIMFIELD TOWNSHIP | 50 | 31 to 90 days | \$72,000 |
| Portage | Obstruction removal, site preparation for terminal | THIS PROJECT IS SHOVEL READY | Portage County Regional Airport Authority | 8 | 91 to 180 days | \$495,000 |
| Portage | Community Health & Rec center | Obstruction removal, site preparation for terminal building We as a Twp had had to relocate our storage of meeting space while addressing the pressing educational needs of our township residents. This was to be achieved through a community building that was to be built, that would have included our local library, health and educational center administered by our Plan and Rec department along with the Portage County Library system. The building was over 7000 sq ft and would employ approximately 130 to 150 individuals. The site and building plans had been prepared, approved and sent out for bids, when the bids were opened it was determined that at the time it was financial impossible for the to proceed. This project is ready to go now, and would benefit many our twp and local communities. | Brimfield Twp | 8 | 31 to 90 days | \$900,000 |
| Portage | Clinical Treatment of Reactive Attachment Children | With the growing number of children in foster care and/or in adoptive homes, the number of children displaying the severe acting out behaviors associated with Reactive Attachment Disorder (RAD) continues to rise. Conventional and social workers often times do not have the specialized interventions necessary to treat these children. This program would make those tools available by providing who would their work intensively with children and families to stabilize the home, improve the child's school performance and enhance community behaviors. | The Bair Foundation | 5 | 91 to 180 days | \$300,000 |
| Portage | Purchase of an ambulance | Purchase of an ambulance. Current ambulance is having many mechanical problems and is in need of repair. Funds are currently not available for placement. Chevrolet Twp. Fire Department handled 620 call in 2008 and 695 involved emergency medical care. In addition to our 3,300 permanent population, we cover Berlin Reservoir recreational area which brings another 4,000 people in the summer months. A new or newer ambulance would greatly enhance our ability to serve the needs of the area. There is no ambulance service in the Townships of Smith and Berlin in Mahoning County and we are the closest service. | Deerfield Twp. Fire Dept. | 2 | 0 to 30 days | \$150,000 |
| Portage | Paramedic Staffing | Hiring of Paramedics to give 24 hour coverage of area. Our current ambulance has one EMT paid on duty 24 hours a day. Addition of a second person with paramedic level certification would guarantee ability to handle all medical calls. Deerfield Twp. Fire Department handled 420 call in 2008 and 85% involved emergency medical care. In addition to our 3,300 permanent population, we cover Berlin Reservoir recreational area which brings another 4,000 people in the summer months. Funding requested would allow hiring of a paramedic to cover 24 hours a day seven days a week. There is no ambulance service in the Townships of Smith and Berlin in Mahoning County and we are the closest ambulance service covering those areas. | Deerfield Twp. Fire Dept. | 1 | 0 to 30 days | \$131,400 |
| Portage | Jimmy's | Commercial septic to be installed at location that has had residential septic for 40 years. Space is limited as to the area available for new septic per EPA guidelines. | Jimmy D's Little Store | 2 | 31 to 90 days | \$25,000 |
| Portage | Digital/Biometric Universal Medical Data Storage | Who knew the patient to save lives is right at your fingertips. Literally. My LifePlan Holdings, Inc.'s MLPHx patient pending (US/Canada) allows ER workers, hospitals and other healthcare (HC) providers access to medical history/medical records, HC PDA's, living wills, advance directives, and other medical information to hospital personnel and allow digitally. Records mean everything when you or your loved ones life is at stake having medical records available is critical. FutureMed/HC BioMetric, a former nursing home social services director, experienced in dealing with families in the-frustrating medical situations like Terri Schiavo believes in a world with data at a fingertip in real time. MLPHx combines biometric technology to instead to include all areas of biometrics and other resources to allow first responders/healthcare and ER staff access to an individual's medical history/records and their emergency contact information at a glance, and quickly determine any critical medical information that can impact care and treatment. MLPHx stimulates jobs, economic growth, and money across healthcare at local, state, and federal levels, and bio-mimicking systems. | My LifePlan Holdings, Inc. (TM) | 600 | 0 to 30 days | \$55,000,000 |
| Portage | Organic Photovoltaic Science and Technology | These materials offer tremendous advantages over the Si and thin-film based solar cells currently being commercialized. The advantages come from extremely low cost, low energy consumption in production, efficient processing using roll to roll manufacturing, templating, and solution coating. The devices can be light-weight, flexible, and easily deployable. Current existing facilities used for flat panel displays can be easily adapted for these systems. The DOE's workshop on Solar Energy held in 2005 concluded that organic photovoltaic technology holds the promise of beating the cost of fossil fuel based electricity in a much shorter time than the current inorganic technologies. In the first phase, we will conduct research on materials synthesis, characterization, and better understanding of important processes. The second stage will involve prototype development followed by field deployment. In the long run, we anticipate emergence of a new industry creating thousands of jobs in Ohio. | Kent State University | 1000 | 0 to 30 days | \$15,000,000 |
| Portage | City Park Upgrades | The lot (266x180) provides parking for all of City Park, which includes 16 ball fields. Currently, the lot is stone and dirt. Drainage is very poor, leaving the fields to be unusable at times. There is no lighting, even though the park is used well after dark for functions including City softball leagues for all ages and numerous school City events. The lack of lighting has been a concern for our residents and those from other communities that use these facilities. We have had vandalism of cars, the fields, restrooms and pavilion. This project will pave the parking area and provide lights. Security cameras will be placed at the parking area, pavilion and restrooms. These cameras will allow our police station that is less than 20 minutes away. Drainage of the fields will be improved. The completion of this work will allow our Parks Dept. to add walking paths throughout the wooded areas that surround the park. Currently, these trails do not exist due to concerns for the safety of the cars & the people that would use the trails. | City of Streetsboro | 75 | 31 to 90 days | \$300,000 |
| Portage | road improvements | Resurfacing of approx. 7 miles of township roads. we are currently developing a township park, funding will also be applied to surfacing entrance three and parking for park. Project will construct a facility that will produce Class A exceptional quality biosolids that have beneficial reuse including. Currently the WWTP produces limited use Class B product at approximately 1,000 tons per year. The Class B product is currently land applied to farm fields where possible or trucked to landfills. | palmyra township | 2 | 91 to 180 days | \$50,000 |
| Portage | Streetsboro Biosolids Reduction Facility | Class A biosolids can be touched and used safely by people with no restrictions. They can even be sold in stores for use in homegardens. On average, the biosolids from this facility contain approximately 1.5% organic nitrogen, 3.4% phosphorus and 0.3% potassium (potash). Some of the Potential uses include, but are not limited to: May be used by soil blenders to produce nutrient rich top soil. Can be applied directly as a natural slow release lawn and garden fertilizer - GREAT FOR GOLF COURSES. Can be mixed with compost materials to add vital nutrients. Can be used by commercial farmers as a crop fertilizer. | Portage County Water Resources Department | 30 | 91 to 180 days | \$2,200,200 |
| Portage | PCWR O&M Facility Maintenance Garage | Project consists of a new maintenance garage to house the Department's diesel fleet of vehicles and equipment that are currently left outside; also will include spaces to perform regular maintenance, washdown, spare parts inventory for all water/wastewater facilities, and a climate controlled records retention area. | Portage County Water Resources Department | 30 | 181 days or more | \$720,000 |
| Portage | Chapman Farms Pump Station Elimination | Sanitary sewers are in close enough proximity that they can be connected to the sanitary sewer pump station to eliminate it. | Portage County Water Resources Department | 5 | 31 to 90 days | \$37,550 |
| Portage | West Branch MHP WWTP Improvements | Improvements at the plant include the replacement of the original WWTP blowers and installation of new high-rate tertiary filters that replace thick, uncompressible flocs. This will prevent partially treated WWTP effluent from entering Hixley Creek. | Portage County Water Resources Department | 15 | 31 to 90 days | \$240,000 |
| Portage | Red Fox WWTP Improvements | Improvements at the plant include the installation of a new headworks to remove debris from the WWTP that inhibits biological treatment. | Portage County Water Resources Department | 15 | 91 to 180 days | \$100,000 |
| Portage | PCWR O&M Facility Emergency Power | Installation of a backup electrical generator for the O&M facility which is the core of operation and monitoring facility for the Department, as well as the heating laboratory. | Portage County Water Resources Department | 5 | 31 to 90 days | \$60,000 |
| Portage | Franklin Hills WWTP Tertiary Filter Replacement | Improvements at the plant include the installation of new high-rate tertiary filters that replace failing, uncompressible filter basins preventing partially treated WWTP effluent to be discharged into the receiving stream. | Portage County Water Resources Department | 15 | 31 to 90 days | \$260,000 |
| Portage | Twin Lakes WWTP Effluent Discharge to the Cuyahoga | Improvements consist of the extending the existing WWTP outfall from its present location within a wetlands area to instead discharge directly into the Cuyahoga River downstream of Lake Rockwell, immediately improving the water quality of the area. | Portage County Water Resources Department | 10 | 91 to 180 days | \$240,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Portage | Asbestos Cement Pipe Replacement, Phase I | Several sections of gravity sanitary sewer were installed in the 1970's that utilized asbestos cement pipe; over time the sewers have been subjected to hydrogen sulfide exposure from a connection from their causing the pipe to deteriorate in its upper half. The project will replace the pipe with PVC. | Portage County Water Resources Department | 10 | 31 to 90 days | \$200,000 |
| Portage | Franklin Hills WWTP Sludge Air Improvements | The project would consist of replacing the original WWTP blowers nearing 55 years old with larger more efficient VFD-driven units; installing air-flow meters, automated valves and high-transfer O2 diffusers. | Portage County Water Resources Department | 5 | 91 to 180 days | \$112,000 |
| Portage | Streetsboro Trunk Sewer Improvements, Phase I | The project consists of increasing the capacity of the sanitary sewers near the intersection of SR44/SR303/SR14. The sewers are nearing capacity, and are surcharging during heavy storm events. | Portage County Water Resources Department | 15 | 31 to 90 days | \$520,000 |
| Portage | Streetsboro Trunk Sewer Improvements, Phase II | The project consists of increasing the capacity of the sanitary sewers near the Streetsboro WWTP. The sewers are nearing capacity, and are surcharging during heavy storm events. | Portage County Water Resources Department | 15 | 181 days or more | \$260,000 |
| Portage | Streetsboro WWTP RAS Return System Upgrades | The project will install needed valve controls for flow control on the RAS return system, and will include the installation of valves/gates at the mained pump silted box assembly. | Portage County Water Resources Department | 10 | 181 days or more | \$110,000 |
| Portage | Cleveland to Aurora Water Line, Phase II | The project completes the 6.0 MGD potable water interconnection between the cities of Cleveland and Aurora. Cleveland will be the main source for water to Aurora, with Portage County remaining as the backup source through its Shalersville WTP. | Portage County Water Resources Department | 15 | 91 to 180 days | \$720,000 |
| Portage | Ravenna Training and Logistics Site Water & Sewer | The proposed project consists of the installation of water and sanitary sewer facilities to serve the proposed Ohio National Guard's Tactical Training Base, located about 1 mile south of the Village of Windham (within the former Ravenna Ordinance Plumb). The TTB is expected to house 100 full time employees, and will accommodate training for up to 6,000 troops over an extended 4-6 week period of time. The water portion of the project consists of the installation of approximately 16,300 linear feet of water main. The sanitary sewer portion of the project consists of the installation of approximately 7,100 linear feet of force main, pump station, and 1,000 linear feet of gravity sewers. Will new additional well for the Brimfield WTP and install raw water lines to the WTP. The additional well will ensure enough water for the distribution system that serves primarily residential and commercial developments. Brimfield Township is currently experiencing growth in the residential sector. | Portage County Water Resources Department | 150 | 91 to 180 days | \$864,600 |
| Portage | Brimfield WTP Additional Well Capacity (Tallmadge) | Remove existing pump. Borehole existing casing. Drill existing well from 20' to 360 feet deep. Install new wire and conduit to well pit per 3000 LF. Perform a mandatory 24 hour pump test with test pump. Install 3 HP pump with 350' of wire and 340' of cast-iron pipe. Drain and flush underground 2000 gal water storage tank. Replace tank drain valve. Install new pressure switches. Replace header in underground with 2 new headers. Install a low voltage water alarm in well pit. | Portage County Water Resources Department | 100 | 91 to 180 days | \$230,400 |
| Portage | Well #1 Project | Remove existing pump. Borehole existing casing. Drill existing well from 20' to 360 feet deep. Install new wire and conduit to well pit per 3000 LF. Perform a mandatory 24 hour pump test with test pump. Install 3 HP pump with 350' of wire and 340' of cast-iron pipe. Drain and flush underground 2000 gal water storage tank. Replace tank drain valve. Install new pressure switches. Replace header in underground with 2 new headers. Install a low voltage water alarm in well pit. | Catholic School | 30 | 31 to 90 days | \$29,000 |
| Portage | JACOBS LANE STORM SEWER | STORM SEWER 200 FEET, BORE IN PLACES, INLETS | WESTERN RESERVE CONSULTANTS INC | 35 | 91 to 180 days | \$32,000 |
| Portage | Mats Road Bridge Replacement | Mats Road Bridge Replacement - The construction drawings are complete. This project will involve the construction of a new bridge from 0+00 to 2+00 on a new industrial park and will serve as a critical link to enable the Village of Mantua to market the site for prospective development in the long term jobs, not just short term construction jobs. The bridge replaces a "foot" bridge and provides immediate and ready access to the state route that sees significant truck traffic between the Ohio Turnpike and the South and R. 422 to the north. The bridge will provide better access to the Village's wastewater treatment and water treatment plants. | Village of Mantua, Ohio | 10 | 31 to 90 days | \$450,000 |
| Portage | WWTP Headworks Improvements | WWTP Headworks Improvements: This project will involve the installation of a 19 mm (approximately 3/4 inch) bar screen at the sewer auger conveyance system to effectively remove debris and grit in the wastewater stream. The system includes weather, changeable controls. Due to the climate it will need to be enclosed in a building, a 12 by 12 foot square building over the influent channel, with 1000 lbs mechanical instrumentation and appurtenances. | Village of Mantua, Ohio | 12 | 91 to 180 days | \$400,000 |
| Portage | Mill Street Roadway Improvements | Mill Street Roadway Improvements: As part of a development package with a private developer along Mill Street in the Village, make a commitment to install a cul-de-sac at the end of Mill Street. This dead end street does not currently have a cul-de-sac or other turn around for fire trucks, school buses, emergency vehicles, etc. The adjacent property owner/developer submitted preliminary site plan drawings approximately 6 years ago for a condo development. This street improvement project would facilitate the private developer's development and provide jobs on the much larger private construction project not just the Village's street improvement project. It would also aid the State, County, and Village with additional property taxes and aid the Village with needed long term resident income tax. | Village of Mantua, Ohio | 10 | 91 to 180 days | \$250,000 |
| Portage | Crestwood Area Waterline | Crestwood Area Waterline - Project will address deficiencies in the Village's water distribution system. The northeast part of the Village cannot maintain minimum pressures for safety in accordance with EPA standards. A new 12-inch waterline will convert this area to the 16 High Pressure District and will replace the old (since 1950's) undersized 4" & 6" mains on Grand Elm, Dienerwood, Ambar, & Fernway. New standard for fire flow on 8" hydrants is an 8" main. All previous 50' hydrant flow tests in this area from '62, '73, '79, '84 have failed. | Village of Mantua, Ohio | 10 | 91 to 180 days | \$50,000 |
| Portage | Franklin Street Drainage Improvements | Franklin Street Drainage Improvements - This project will establish a drainage system in a residential area where none exists. The project includes 110 feet of 18-inch, 360 feet of 15-inch, and 300 feet of 12-inch storm sewer together with associated inlet basins and appurtenances. | Village of Mantua, Ohio | 6 | 31 to 90 days | \$85,000 |
| Portage | Transportation Services for Jobs & Healthcare Serv | This request will allow Family and Community Services, a 501 c 3, to increase both our employment of FTE's and assist the organization in providing transportation services to those in need of access to employment opportunities and healthcare coverage who are not covered by MEDICAID or other forms of insurance. The program will in no way decrease the reliability of public transportation services. The program will allow access to employment to those in need of access to employment opportunities and healthcare coverage who are not covered by MEDICAID or other forms of insurance. The program will in no way decrease the reliability of public transportation services. | Family & Community Services | 30 | 0 to 30 days | \$175,000 |
| Portage | Downtown Kent | The Downtown Kent redevelopment project is a public-private partnership between private development, the City of Kent and Kent State University. The project will include the construction of 100 new, 25 SF meeting spaces; modern new office space; 300 SF, 4 new restaurants, engaging new retail (150K SF), residential uses (25 for-sale units and 115 student rental). This fundamental vision for the project is a reestablishment of connectivity between the KSU campus and the decaying CBD through a vibrant mixed-use development strategy bringing students, faculty, staff and residents together. Fairmount Properties leads the development team selected through the City's competitive RFP process. Both the City and KSU leadership are fully committed to the project and recognize its importance in localizing and retaining the best and brightest minds in Ohio. KSU will contribute to the program by taking office space, providing occupancy to the reestablishment center, and developing a welcome center. The project has infrastructure funding needs such as 800+ structured parking spaces, utility upgrades and relocation, demo and other infrastructure improvement totaling over \$5M. | Fairmount Properties, LLC | 675 | 91 to 180 days | \$26,000,000 |
| Portage | City Hall Restoration & Improvements | The city hall is located in a school building that was constructed in the mid 1950's. The flat roof and windows are original. Heat is from a boiler. Cooling is by window air conditioners. The roof leaks constantly and has been repaired to the point that the repairs are being repaired. The windows leak cold air and water and allow cool air to escape in the summer causing massive utility bills. Work would consist of replacing all the windows, and adding a new facade to the front of the building. A pitched roof would be installed, along with new heating and air conditioning units. Updates would also be done to the electrical and plumbing. With this work done the City could remain in the building another 5 to 10 years. | City of Streetsboro | 200 | 91 to 180 days | \$3,200,000 |
| Portage | Business Growth and Equipment upgrade | Buy new diesel trucks that has the newer emissions on them. Also, looking to grow our business thru an acquisition of another business. Would like to purchase the building next to my business. I want to expand to make a bigger kitchen and eating facility. Mantua has no family restaurants. If I am able to expand I could create more jobs for cooks and servers. I would also like to make my parking lot bigger and better for more parking. I would like to do live entertainment therefore I would need more bartenders. My project if able to do this would create about 20 new jobs. The state liquor board has already approved this, all I need is funding to get my project underway. | R & R Sanitation, Inc | 40 | 31 to 90 days | \$8,000,000 |
| Portage | mantua matters | We are a small business in the small town of Gambierville which employs around 20 individuals. We have already had a company to a move to Mexico and now we are experiencing the effects of the General Motors crisis in Lustonville. Our request is to pay off the mortgage of the business. The increased gasoline cost over the year has caused an overall increase in our business expenses and with the slowdown of the economy in our area, help with the mortgage will help stabilize things for us. We have a variety of employees from single mothers, college students, and senior citizens, all trying to stay on top of things in their life. Our needs may seem minor compared to others, but they are major in the lives of our employees. Thank you, Dawnie | mantua village tavern & restaurant | 8 | 31 to 90 days | \$150,000 |
| Portage | Mortgage | We are a small business in the small town of Gambierville which employs around 20 individuals. We have already had a company to a move to Mexico and now we are experiencing the effects of the General Motors crisis in Lustonville. Our request is to pay off the mortgage of the business. The increased gasoline cost over the year has caused an overall increase in our business expenses and with the slowdown of the economy in our area, help with the mortgage will help stabilize things for us. We have a variety of employees from single mothers, college students, and senior citizens, all trying to stay on top of things in their life. Our needs may seem minor compared to others, but they are major in the lives of our employees. Thank you, Dawnie | Sean's Pub & Eatery, LTD. | 20 | 0 to 30 days | \$350,000 |
| Portage | wind energy | I would like to make my parking lot bigger and better for more parking. I would like to do live entertainment therefore I would need more bartenders. My project if able to do this would create about 20 new jobs. The state liquor board has already approved this, all I need is funding to get my project underway. | Varner & Layne Rentals | 5 (app) | 0 to 30 days | \$100,000 |
| Portage | Computer training for the unemployed and poor. | Provide computer training, networking, and skills not otherwise available to the unemployed and poor. Costs will be contained utilizing existing institutions, recycled equipment, vendor donation, and certified trainers. Applicants will be referrals from non-profits, ORES, etc. Candidates would be assessed and given curricula based on interest, employer demand and ROI. | GADDCO | 400 | 31 to 90 days | \$250,000 |
| Portage | Higher Education | I would like additional money to attend Graduate school at Cleveland State majoring in Healthcare Administration. I believe with this funding I will be able to attend school and purchase health insurance while attending school. With my degree I plan on making a difference in the healthcare world. | Student | 1 | 91 to 180 days | \$10,000 |
| Portage | KSU Alternative Vehicle Fleet | Replacement of 72 fleet vehicles with alternate, HEV or PHEV vehicles. This would reduce emissions within our non-student area, reduce the carbon footprint (fuel usage reduction) of the KSU fleet. | Kent State University | 20 | 91 to 180 days | \$1,020,000 |
| Portage | Hiram Town & Gown Infrastructure Project | The Hiram Town & Gown Infrastructure Project includes the extension of 2 throughfare roads, the repaving/repairing of a Village street and service roads, and a shared roadway study. The Hiram (270) Road and Housley (560) Road well extensions, including sidewalk improvements, will correct infrastructure deficiencies on the Hiram campus and will directly promote public safety and improve Village infrastructure. The roadway extensions will improve accessibility as well as into the Village's safe remaining industrial development regions. The repair and repaving of Barcott St. and several driveways and parking areas used by the Village's Fire, EMS and Police departments will address access and safety egress issues. Working with the Portage County Parks Commission, the project includes funds for an engineering study to determine the feasibility of converting an abandoned rail line into a 2.3 mile thruway path to connect the main campus to the College Field Station. This will not only serve as a convenience for students who work, study and do research at the Field Station, but will also provide significant public access to a NED natural resource. | Village of Hiram | 80 | 0 to 30 days | \$2,042,280 |
| Portage | Business Expansion | The funding requested is for current business expansion of building, inventory, and personnel. I have been in the Plastic Industry since 1989. In order to continue, we must obtain capital funding for inventory and warehousing. This expansion will retain 43 jobs and possible job growth as the market recovers and improves. My business sales grew to 300 percent in the last 3 years. | United States Plastic Equipment LLC | 43 | 0 to 30 days | \$2,000,000 |
| Portage | Major Home Repairs | Hi, My adult son and I are both disabled and are in desperate need of major home repairs. There is a plumbing problem under the concrete slab of our house which causes water to seep through under the tile in the bathroom and under the carpet in the living room, causing mildew and mold problems. As a result, we were left with no choice but to rip up the carpet and tile. Having no means to repair the carpet or tile, we were left without any alternative but to leave the concrete slab floor exposed. The plumbing problem remains. Also our roof is leaking and needs repaired. Thank you in advance. Respectfully, Melrose Neuman | Self | 3-5 | 0 to 30 days | \$30,000 |
| Portage | Computer Learning Programs | Kid Kampus Family Daycare & Learning Center, LLC provides licensed, quality child daycare and family services for underprivileged children ages 6 weeks-13 years old. Over 99% of current families enrolled are under the poverty levels and participate through the Department of Job and Family Services. This project will fund a computer learning center for children and families. | Kid Kampus Family Daycare & Learning Center, LLC | 13 | 0 to 30 days | \$15,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Portage | Project Pride | Kid Kampus Family Daycare & Learning Center, LLC provides licensed, quality daycare and family services for underprivileged children ages 6 weeks-13 years old. Over 90% of current families enrolled are under the poverty level and participate through the Department of Job & Family Services. This project will fund working capital to assist employment of 13 and provide services for up to 75 children and families. | Kid Kampus Family Daycare & Learning Center | 13 | 0 to 30 days | \$75,000 |
| Portage | Project Healthy Play | Kid Kampus Family Daycare & Learning Center, LLC provides licensed, quality child daycare and family services for underprivileged children ages 6 weeks-13 years old. Over 90% of current families enrolled are under the poverty level and participate through the Department of Job & Family Services. This project will fund an expansion to the playground and outdoor activity centers. This will help retain 13 employees and provide services for up to 75 children and families. | Kid Kampus Family Daycare & Learning Center, LLC | 13 | 31 to 90 days | \$25,000 |
| Portage | Township Hall Lift | Design and installation of an elevator to allow handicap access to second floor public meeting room. | Franklin Township, Portage County | 5 | 91 to 180 days | \$65,000 |
| Portage | High-Tech Workforce Development Initiative | Based at Kent State's Liquid Crystal Institute, the High-Tech Workforce Training Initiative will recruit and train both recent college graduates and displaced workers, giving them the skills they need to work in emerging high-tech industries in Northeast Ohio. The program will include classes and hands-on training at Kent State University, and participation in industrial internships with local high-tech companies. Interns will be of especially high value to helping small startup firms achieve viability. This effort will create a ready supply of skilled labor, enabling rapid business expansion. Companies invited to participate will include Kent Shipper Inc., AlphaMetric, and similar companies across NE Ohio. Students will learn specialized techniques including materials characterization, clean room methods, and photolithography; and will study both basic and applied science. | Liquid Crystal Institute, Kent State University | 20 | 91 to 180 days | \$400,000 |
| Portage | 211/Information & Referral | United Way 211 Portage provides a centralized source of information and referral assistance to individuals and families locate health and human services which may be available to help meet their needs. We provide our service 24hours a day, 7 days a week at no cost. 211 Portage provides screening and referral to four (4) of the nine (9) emergency food pantries in Portage County and serves as the clearinghouse for school supplies and holiday assistance programs throughout the county. 211 Portage, in collaboration with AARP, coordinates the Tax Aide Program in Portage County, which provides free federal and state tax assistance to older adults and low-income families at various locations throughout Portage County. During the 2008 tax season, our volunteers filed 12,118 tax returns, and increase of 468, or 62% over the previous year. During 2008, we experienced a 30% in call volume (17,200), and, during the first two months of 2009 have experienced a regional 40% increase in requests for assistance locating vital health and human services. Given the current economic situation, we expect to assist over 22,500 individuals and families during 2009. Replacement of 15 specialized and high use mobile and stationary diesel equipment with equipment that meets the latest emission and fuel standards. This would decrease diesel emissions, reduce fuel consumption within Portage County which is an important environmental area. | United Way of Portage County, Inc. | 3 | 0 to 30 days | \$50,000 |
| Portage | KSU Diesel Emission Reduction | RELEASE I WILL LOOSE MY HOUSE LIKE MANY OTHERS I WORK HARD I AM ALONE AT 59 AND I WILL BE PUT OUT WITH MY DOGS I AM SCARED AT THIS POINT IN MY LIFE HEALTH HAS BEEN A ISSUE. I KNOW I SHOULDN'T ASK BUT I DONT KNOW WHAT ELSE TO DO. SCARED TO DEATH DARLENE | Kent State University | 20 | 31 to 90 days | \$940,000 |
| Portage | HELP ME KEEP MY HOUSE I AM 59 BEEN THERE 14 YRS | WE WANT TO BE ABLE TO KEEP OUR SUMMERTIME STORE. WE HAVE BEEN IN BUSINESS FOR 9 YEARS. WE SELL NEW ITEMS & USED ITEMS. WE OWN THE LAND & BUILDING (STILL MAKING PAYMENTS). OUR SMALL BUSINESS NEEDS SEPTIC, WATER, DRYWALL, WORK & OTHER IMPROVEMENTS. WE ALSO WANT TO HIRE EMPLOYEES SO WE CAN BE OPEN MORE DAYS. WE ARE WELL ESTABLISHED & WE HAVE MANY REGULAR CUSTOMERS. WE DONT HAVE THE INCOME TO BROWND OR TO BE ABLE TO HIRE HELP. WE ARE NOT MAKING A PROFIT BECAUSE WE ARE PAYING ON THE BUILDING & LAND, BUT IF WE COULD GET SOME HELP FINANCIALLY, WE COULD GROW & HELP TO EMPLOY PEOPLE IN THE AREA & ALSO BE ABLE TO SELL MORE ITEMS TO CUSTOMERS. WE SELL SUMMERTIME PRODUCTS, LIKE WATER SHOES, LIFEJACKETS, WATER RAFTS & ALSO MANY USED ITEMS LIKE FURNITURE, BOOKS, ANTIQUES, TOYS, ETC. WE COULD GET SOME MONEY WHEN WE COULD HIRE SOME EMPLOYEES. WERE SOME PEOPLE TO PUT IN SEPTIC, WATER & IMPROVEMENTS & ALSO BUY MORE PRODUCTS TO SELL. IF GIVEN THE MONEY IT WOULD HELP OUR SMALL BUSINESS EXPAND, IT WOULD EMPLOYE PEOPLE & IT WOULD HELP THE POOR BECAUSE WE GIVE ITEMS THAT ARE USED FOR A VERY CHEAP PRICE & ALSO IT HELPS THE ENVIRONMENT BECAUSE LESS IS GOING TO THE DUMPS. PLEASE CONSIDER THIS MONEY WILL BE USED TO SEND MY SON, RYAN, TO KENT STATE UNIVERSITY, KENT, OHIO. HE IS ENROLLED IN KENT FOR THE FALL QUARTER. HIS MAJOR WILL BE BUSINESS ADMINISTRATION. HE HAS A BACHELORS DEGREE IN BUSINESS. THIS IS A 4 YEAR COURSE. HE USED TO BE A CEO OF A BUSINESS IN THE FUTURE. THE YEARLY COST FOR A STUDENT IS APPROX. \$20,000.00. HE WILL BE LIVING ON CAMPUS. HE HAS APPLIED TO ABOUT 12 SCHOLARSHIPS BUT HAS HEARD NOTHING YET. THANK YOU VERY MUCH. | MYSELF | 100 | 0 to 30 days | \$50,000 |
| Portage | SALES, REUSE PRODUCTS, HELP LOWER INCOME PEOPLE | Stimulus to keep plant from going out of business. Company currently taking on more debt than profit due to slow economy and housing crisis. Stimulus would keep plant operations open, keep jobs in place, and keep local tax flow to City of Kent. Once plant survives economic downturn and can recover from debt, should be profitable and even able to expand, increasing jobs. | SMALL BUSINESS, RETAIL SALES | 10 | 0 to 30 days | \$75,000 |
| Portage | Project College Education | This area of the City is on walls. This project would cost of 4.155 linear feet of 12" line and 8.650 linear feet of 8" line along with connections at each property line. Water service could be offered to over 400 residents. Installation of this system would also provide important loops to the existing system, preventing water outages in the event of a line break. This project would be divided into 2 separate contracts, providing an opportunity to companies that do not have the ability to bond a job over two million dollars. Project will provide city water service to 2 areas that are currently on well systems. Work would consist of installation of 4,400 linear feet of 12" line and 2,200 linear feet of 8" line along with fire protection and service connections to each property. The project, when completed would provide an important loop in not only the City system, but also Portage County. | Individual | 1000 | 91 to 180 days | \$40,000 |
| Portage | ARC | This project is being requested to help a for-profit business that will perform network and system monitoring of businesses that utilize computers and networks. The monitoring application would be responsible for monitoring systems and networks in an attempt to predict failures and make corrections before they occur. The project will entail large small to medium size businesses with a need for assured up-time. This project has the potential of creating the following types of positions: <ul style="list-style-type: none">• NOC - Network Operations Call center responsible for assisting technical issues that arise which could employ on-call tech support personnel.• Software Developers• Technicians to perform on-site visits.• Network Engineers | Associated Ready Mix Concrete, Inc | 7 | 0 to 30 days | \$200,000 |
| Portage | Summyslopes Waterline Installation | This project has the potential to create many positions as the company grows and expands its market base. | City of Streetsboro | 200 | 181 days or more | \$2,400,000 |
| Portage | Shady Acres, Twin Hills water Line Installation | Realigning and paving of a high traffic use road. Adding bike lanes to either side from a neighborhood area, past a bike trail intersect, to a Middle school. Rerouting the stormwater flows over this two mile section. Repaving and rerouting the stormwater flows over another 4.3 mile area. Totaling 8.3 miles. This Franklin Township structure Project combines road renewal, safety bike lane transportation and water management at together. Ohio has been increasing its capacity of Multisystemic Therapy (MST) one of the most research validated treatment interventions for youth with serious conduct, behavior, and/or social, and disruptive disorders, and Intensive Home Based Treatment (IHB). There are currently 13 MST providers serving 16 counties across Ohio and 15 HBT sites. This proposal would provide initial start up costs to cover development, training, consultation, evaluation, and licensing fees for 10 additional sites. The statewide outcomes for MST and HBT (youth) living at home, attending school, no new court charges are excellent. The models are challenging to implement and fund, yet, once "on the ground" they develop strong support. We would add 10 more Ohio counties with high levels of youth placed in correctional facilities or residential programs and develop MST/IHBET teams to serve 40-60 additional youth and families per county, for approx. 400+ multi-system youth/families. We would continue to work with our state partners, ODJFS and ODRC, in strategically planning this expansion. The cost of MST-IHBET is \$8,000/youth compared to \$60,000/youth for state incarceration or residential placement. Whitehall is an apartment complex located at Kent St. University. This properties have over 330 units. The rehab will consist of new energy efficient roofs, New HVAC system for all three properties. New elevators in the high rise. The goal is to go "green" with as much as we can. This is a student housing adjacent to the Kent State campus. | City of Streetsboro | 150 | 91 to 180 days | \$975,000 |
| Portage | System Monitoring | Additional machinery, equipment and facility improvements needed to become more competitive. The Behavioral Health/Juvenile Justice (BHJJ) Initiative, sponsored by the Ohio Departments of Mental Health and Youth Services, diverts juvenile justice involved youth with mental health issues from detention centers to more comprehensive, cost-effective and intense community-based treatments. To date, over 400 youth have been enrolled in BHJJ and preliminary results indicate improved mental health functioning, reduced substance use, and low recidivism. Not only do youth receive superior behavioral health treatment, but the cost of placing a youth in BHJJ (\$5000) is less than the cost for the average stay in a State-run detention facility (over \$80,000). Estimated savings for the State are in the millions of dollars. This request will allow for in-depth evaluation of BHJJ with specific goals of identifying risk and protective factors and any additional variables that predict program success. This program will allow counties to divert the most appropriate youth and maximize funding dollars. The funds will also be used to provide training and technical assistance to counties in Ohio (currently there are nine BHJJ counties) that want to create similar diversion programs. | Centra Solutions | 25 | 31 to 90 days | \$1,500,000 |
| Portage | Stormwater, Roads and Bike Lane Project | Who has been increasing its capacity of Multisystemic Therapy (MST) one of the most research validated treatment interventions for youth with serious conduct, behavior, and/or social, and disruptive disorders, and Intensive Home Based Treatment (IHB). There are currently 13 MST providers serving 16 counties across Ohio and 15 HBT sites. This proposal would provide initial start up costs to cover development, training, consultation, evaluation, and licensing fees for 10 additional sites. The statewide outcomes for MST and HBT (youth) living at home, attending school, no new court charges are excellent. The models are challenging to implement and fund, yet, once "on the ground" they develop strong support. We would add 10 more Ohio counties with high levels of youth placed in correctional facilities or residential programs and develop MST/IHBET teams to serve 40-60 additional youth and families per county, for approx. 400+ multi-system youth/families. We would continue to work with our state partners, ODJFS and ODRC, in strategically planning this expansion. The cost of MST-IHBET is \$8,000/youth compared to \$60,000/youth for state incarceration or residential placement. Whitehall is an apartment complex located at Kent St. University. This properties have over 330 units. The rehab will consist of new energy efficient roofs, New HVAC system for all three properties. New elevators in the high rise. The goal is to go "green" with as much as we can. This is a student housing adjacent to the Kent State campus. | Franklin Township | 50 | 31 to 90 days | \$250,000 |
| Portage | Expansion of Effective Home Based Treatment for Yo | In this project, Catalac will perform parametric tests on recent design improvements; 2) create a sales & marketing team focused on the hydrogen market; 3) hire new employees to manufacture, install, and monitor the catalytic in the twin plant; and 4) install manufacturing equipment and infrastructure and hire employees to support the first \$10 million in revenues. | Institute for Study and Prevention of Violence at | 55 | 31 to 90 days | \$600,000 |
| Portage | Whitehall Terrace | Whitehall is an apartment complex located at Kent St. University. This properties have over 330 units. The rehab will consist of new energy efficient roofs, New HVAC system for all three properties. New elevators in the high rise. The goal is to go "green" with as much as we can. This is a student housing adjacent to the Kent State campus. | Summit Management Services Inc. | 20 | 91 to 180 days | \$6,000,000 |
| Portage | Capital Improvements | Additional machinery, equipment and facility improvements needed to become more competitive. The Behavioral Health/Juvenile Justice (BHJJ) Initiative, sponsored by the Ohio Departments of Mental Health and Youth Services, diverts juvenile justice involved youth with mental health issues from detention centers to more comprehensive, cost-effective and intense community-based treatments. To date, over 400 youth have been enrolled in BHJJ and preliminary results indicate improved mental health functioning, reduced substance use, and low recidivism. Not only do youth receive superior behavioral health treatment, but the cost of placing a youth in BHJJ (\$5000) is less than the cost for the average stay in a State-run detention facility (over \$80,000). Estimated savings for the State are in the millions of dollars. This request will allow for in-depth evaluation of BHJJ with specific goals of identifying risk and protective factors and any additional variables that predict program success. This program will allow counties to divert the most appropriate youth and maximize funding dollars. The funds will also be used to provide training and technical assistance to counties in Ohio (currently there are nine BHJJ counties) that want to create similar diversion programs. | Kent Mold & Mfg. | 15 | 91 to 180 days | \$1,100,000 |
| Portage | Evaluation of the Behavioral Health/Juvenile Just | Catalac has developed the BSR for hydrogen plants with modest support from EMTECCOE. BSR delivers either a 15% energy savings or a 20% increase in throughput with ROI in 1 year or less. BSR will significantly disrupt and penetrate the \$160 mm catalyst market for hydrogen production. Spin-off products will similarly disrupt and penetrate the much larger refinery, chemical, and other packed bed catalyst markets. | Kent State University | 5 | 31 to 90 days | \$200,000 |
| Portage | Commercialization of Stackable Structural Reactors | A small Hydro-Chem plant containing BSR was installed July 2008 in Turkey to feed hydrogen to a steel mill. It operates flawlessly. However, the plant was built with several new technologies, so performance benefits of BSR are difficult to extract. A new Hydro-Chem twin plant is scheduled in 2020. Installation of BSR in half of this twin plant will provide a clear demonstration of benefit. In this project, Catalac will perform parametric tests on recent design improvements; 2) create a sales & marketing team focused on the hydrogen market; 3) hire new employees to manufacture, install, and monitor the catalytic in the twin plant; and 4) install manufacturing equipment and infrastructure and hire employees to support the first \$10 million in revenues. | Catalac Corp. | 65 | 0 to 30 days | \$3,000,000 |

Submitted Requests - NOT Approved

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Portage | Fire Alarm System | Funds for this project will impact the health, safety and welfare of the students, faculty and staff. This will be achieved by upgrading the inadequate existing fire alarm system with a campus wide system for all one buildings. The new system will also be separate zones of alarm notification, thereby enhancing the level of safety and reducing the number of nuisance alarms to local law enforcement, fire and emergency medical personnel. | Northeastern Ohio Universities Colleges of Medicine | 10 | 31 to 90 days | \$1,200,000 |
| Portage | Boiler Plant Conversion | Funds for this project will allow the College to reduce annual natural gas consumption by an estimated 43%. This would be achieved by converting the existing steam boiler system to a decentralized hot water heating system. An energy analysis determined the existing centralized system was only 78% efficient. This could result in projected annual savings of \$250,000 or more. | Northeastern Ohio Universities Colleges of Medicine | 10 | 31 to 90 days | \$2,000,000 |
| Portage | Laboratory HVAC Re-commissioning | Funds for this project will enhance the health, safety and welfare for the students and faculty but also reduce energy usage. An external study on the heating, ventilating and air conditioning system concluded that the variable air volume (VAV) operation of the supply and return air ducts with associated HVAC controls, was not functioning properly in this building. Re-commissioning the laboratory HVAC system will improve the safety operation in these areas while at the same time, improve energy efficiencies and environmental space conditions. | Northeastern Ohio Universities Colleges of Medicine | 8 | 31 to 90 days | \$250,000 |
| Portage | Academic Classroom & Student Center Building | Funds for this project will be used to construct a new academic building to serve the expanding enrollment of medical and pharmacy students. The structure would include new classrooms with state of the art teaching technologies, a 300-person lecture hall with advanced presentation technologies, offices for new faculty and staff, individual study and group study facilities, seminar rooms, a student gathering/socializing area, and fitness facility. The new academic building will be approximately 43,000 square feet. | Northeastern Ohio Universities Colleges of Medicine | 50 | 91 to 180 days | \$11,500,000 |
| Portage | Gross Anatomy Laboratory Renovation | Funds for this project will enable the continued expansion of the medical program (students from Cleveland State) and the pharmacy program. This lab, where human anatomy is taught through dissection-based experiences, serve as the foundation for the education of physicians, pharmacists, graduate students, and physical therapy students. The renovation of the gross anatomy lab will increase the size of the lab to accommodate additional students; provide the newest technologies for student learning and also make the facilities compliant with ADA and accrediting agency requirements. | Northeastern Ohio Universities Colleges of Medicine | 5 | 31 to 90 days | \$468,500 |
| Portage | Effective Practices Knowledge Academy | This project will build on the 8 yrs of experience of the Center for Innovative Practices at the Institute for the Study and Prevention of Violence at Kent State University, in raising the knowledge and implementation levels of best practices in mental health, substance abuse, child welfare and juvenile justice systems. Funders and policy makers now insist on utilizing only the most effective (evidence and fiscal) practices that achieve demonstrated outcomes. This academy will provide a range of information, educational activities, training, course work, and hands-on technical assistance for these practices, including financing. Highly qualified staff will work directly with court/providers to assess needs and assist in developing a plan to identify and sustain the necessary effective programming to meet their needs. The academy will train the emergency CPISPP program and research staff and engage additional experts in order to meet the need. Outcomes would include measurable increases in EBP and the number of youth served and diverted from out of home placement. Sustainability for the academy would come from grant, foundation, and other grant sources. | Institute for Study and Prevention of Violence at | 10 | 31 to 90 days | \$475,000 |
| Portage | Green Project | 300 linear feet of foundation and drainage work. | Dionne Family | 4 | 0 to 30 days | \$10,000 |
| Portage | Green Project | Whole house insulation on existing 100 year old home with no insulation as of right now. | Dionne Family | 6 | 0 to 30 days | \$10,000 |
| Portage | Green Project | Solar panels to heat and cool home and produce electricity for home. | Dionne Family | 4 | 0 to 30 days | \$10,000 |
| Portage | Green Project | Redo original plumbing and original electrical wiring in 100 year old house. | Dionne Family | 6 | 0 to 30 days | \$10,000 |
| Portage | Green Project | Energy efficient furnace for 100 year old house and Glass block windows for basement. | Dionne Family | 4 | 0 to 30 days | \$10,000 |
| Portage | Renovation and Expansion of the Comparative Medici | 1976 and are in desperate need of a major upgrade and modernization. This expansion will support the significant growth in the Rootstown based research activities including the current focus on linking research to economic development, as well as the growth of new faculty and students associated with the College of Pharmacy and the addition of a fourth partner institution: Cleveland State University. Utilization and the efficiency of existing space will be improved significantly. The increase in the number and activity of biomedical scientists on the Rootstown campus as well as projected increase in overall student population for both the expanding medical and pharmacy programs has created a critical need for additional laboratory and office space. The proposed structure is a 40,000 square foot, two-story building designed to house new biomedical and pharmacy research laboratories, faculty offices to accommodate up to 40 faculty, assistants, researchers, and scientists and seminar space for large lectures and presentations. | Northeastern Ohio Universities Colleges of Medicine | 50 | 91 to 180 days | \$7,200,000 |
| Portage | Portage County Regional Airport Industrial Park La | This project will be for land acquisition for airport industrial park development. The land is 504 square acres contiguous to the existing airport, it is the extent of the Portage County Regional Airport Authority to foster an industrial park on its grounds complemented by a corporate jet facility. | Portage County Board of Commissioners | 450 | 31 to 90 days | \$1,400,000 |
| Portage | Corporate Development Area, Site Preparation | If not for participation in this stimulus program, the airport would have no capacity to realize this goal. The annual budget for the airport is not an adequate amount to embark on this economic development project without federal assistance. | Portage County | 200 | 31 to 90 days | \$1,495,000 |
| Portage | Biomedical Sciences Research Facility | Project Description and Need: Approximately 24 acres of the Airport property has been set aside for aviation-related commercial and/or light industrial development. However, extensive site preparation work is needed to make the site suitable and accessible. Plans and specifications for the work have been completed and are "on the shelf" awaiting construction funding. This project is "shovel ready." Bids could be received within 30 days and construction completed within 45 days. Development of this site could support approximately 200 jobs. The Portage County Regional Airport is located on the Ohio Turnpike, within miles of the St. Res. 44 entrance ramp. This stimulus request is aimed at making Portage County more business friendly. The airport's corporate development site will be a div of economic development for Northeast Ohio for years to come. Estimated Cost: \$1,495,000. | Portage County | 200 | 31 to 90 days | \$1,495,000 |
| Portage | Upgrading of the Storm Water System | This project is for the expansion of the research facilities on the NECC/COM campus. The existing research facilities were constructed in 1976 and are in desperate need of a major upgrade and modernization. This expansion will support the significant growth in the Rootstown based research activities including the current focus on linking research to economic development, as well as the growth of new faculty and students associated with the College of Pharmacy and the addition of a fourth partner institution: Cleveland State University. Utilization and the efficiency of existing space will be improved significantly. The increase in the number and activity of biomedical scientists on the Rootstown campus as well as projected increase in overall student population for both the expanding medical and pharmacy programs has created a critical need for additional laboratory and office space. The proposed structure is a 40,000 square foot, two-story building designed to house new biomedical and pharmacy research laboratories, faculty offices to accommodate up to 40 faculty, assistants, researchers, and scientists, and seminar space for large lectures and presentations. | Northeastern Ohio Universities Colleges of Medicine | 75 | 91 to 180 days | \$17,600,000 |
| Portage | Hiram Village Fire House | Replacing of storm sewers that are not capable to handle the amount of run off water being generated throughout the city. 2008 Village expenditures were \$1.02 million; estimated new fire house cost is \$2 million. Consulting over 100% of the budget, this project can't be addressed without assistance. The current building houses the fire department/HFD, Village Government, and Police Department. Hiram Village HFD was a volunteer fire service. Now HFD is staffed 24 hours a day by fire/paramedical calls from a building that was not built to house personnel or ambulances. Maintenance costs increase. In 2001 a new roof was built. Utility costs are high; the building is not energy efficient. HFD serves an increasing population of 4,047 in Hiram Village/Township(25 square miles). An additional 1,200 Hiram College students are a high fire risk population. HFD sits over 100 square miles of other rural communities. State routes and an underground petroleum pipeline pass through the jurisdiction. Being in the separate town, employee sleeping quarters are contaminated with the known carcinogen, diesel soot. HFD has one of room 20 years ago and it's getting worse. Equipment is now stored outside. Without funding, station staffing will be reduced/increased and the community will suffer. | Hiram Fire Department | 30 | 91 to 180 days | \$2,000,000 |
| Portage | Emergency Food & Shelter Program Board | Our request is for additional funding for our local EFSB board LRO's. These dollars would be used for Heat, Shelter, and Food assistance. We included a small amount to administer the programs. | United Way of Portage County for EFSB Board | 0 | 0 to 30 days | \$100,000 |
| Portage | 4-H Youth Development Program | 4-H Clubs develop values and coaching plans that foster positive youth development experiences that are in line with the Ohio 4-H Mission statement: "The Mission states that youth development education creates positive environments for diverse youth and adults to reach their fullest potential as capable, competent, caring and contributing citizens." 4-H believes that we can accomplish these goals by following the motto: "To make the best better" and staying true to the core values of: "Positive Youth Development is the focus of everything we do; "Partnerships with other organizations, schools, businesses are essential to successful youth development." "Volunteering is fundamental to our work." "Strength is attained from diversity across the entire range of 4-H experiences." [E: The dog group of C-n-F is in their third year of existence. This focus has been on the following projects: "You and Your Dog, Dog Obedience, Dog Showmanship, Dog Performance. After significant time commitments, members have utilized the tools to their fullest potential. The dog group of C-n-F is at a critical need of new blood. Expected outcome is to have youth meet the Mission of 4-H & move into careers. | Creatures - n - Features (C-n-F) (4-H Club) | all volunteers | 0 to 30 days | \$3,500 |
| Portage | Renovation of antiquated equipment for competitive | We wish to update some of our equipment for the purpose of being more competitive in our industry and to keep and possibly create more jobs within our company. | Select Machine Inc. | 10 | 0 to 30 days | \$300,000 |
| Portage | We are a co-operative based in Portage County and | We wish to purchase the remaining interest in our company. We would like to keep our jobs and make this company a 100 percent employee owned co-operative. We could then keep and retain all of our employees based on our low level of indebtedness and remain a strong force in our industry. All jobs will remain in Portage County and keep our tax revenues local. | Select Machine Inc. | 10 | 0 to 30 days | \$600,000 |
| Portage | Internet E-commerce & SEO educational lecture tour | The Internet domain config.com was registered in Jan 1994. The management of config.com desires to educate and train economic development directors, profits, non-profits, and educational institutions to more effectively compete globally using information from Internet search engine systems and also the benefits of social networking. | config.com, Inc. | 5 | 0 to 30 days | \$500,000 |
| Portage | New Business | We have a proven track record throughout America in a diverse range of industries. We'd welcome the opportunity to stimulate e-commerce within Ohio to help reverse the current trend of outsourcing IT support to India. It's been over a decade since the commercialization of the Internet and most web sites are still not as effective as they can be. We envision an educational lecture series where we can teach others to help themselves over the long term with the right knowledge! | Self | 2 | 0 to 30 days | \$5,000 |
| Portage | Tax Education | Thank you for your consideration! Best regards, Joe Rinehart, President config.com, Inc. | Education Services | 10 | 91 to 180 days | \$350,000 |
| Portage | John H Montgomery | To purchase a label machine and suber filler to begin my own lip balm business. | Education Services | 10 | 91 to 180 days | \$350,000 |
| Portage | "Bioengineering Approaches to Energy Balance and O | This activity would be used to educate those in the lower economic levels in the training of preparation of their income tax filings. The grant would be a pilot program to allow the participants to prepare their own tax filings at no charge. During tax or session, the equipment and facilities would be used to train those interested in basic computer skills. This activity would be used to educate those in the lower economic levels in the training of preparation of their income tax filing. The grant would be a pilot program to allow the participants to prepare their own tax filings at no charge. During tax or session, the equipment and facilities would be used to train those interested in basic computer skills. This proposal is submitted in response to our need to better understand "Bioengineering Approaches to Energy Balance and Obesity" to encourage the development of advanced tools available to scientists to facilitate their research in energy balance and health as a means to address problems such as weight control and obesity. "Assessment of human energy balance, the net difference between energy intake (by diet) and expenditure (by work and heat), is a key determinant of obesity incidence, prevention, and treatment." However, today there is no available technology that accurately measures the energy expenditure (EE) component of the energy balance equation based on the frequency of activity. The critical need is to expand metabolic assessment outside of the laboratory confines and into daily activities. Thus, the overall goal of this program is to address this critical limitation by developing and validating a tool called the Energy Balance System, which will enable academic and clinical researchers to effectively and more accurately monitor a person's energy expenditure. Kent State University in partnership with Orbital Research, Inc. (OR) bring this project to fruition. | Kent State University | 3 | 0 to 30 days | \$175,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Portage | Cooperative Learning Program | This proposal seeks funding to expand our core educational alternatives for students who have emotional and adjustment disorders. The success of our efforts to provide an education for all students that will prepare them for life and work in our 21st century will require that we become better able to meet diverse needs with an array of options and supports. This proposal will enhance the existing transition services in the region and reduce redundancies by promoting a comprehensive, tightly woven fabric of specialized educational supports for approximately 90 students. We will employ professional teaching and counseling staff to enhance the services currently available and augment that number by hiring a cadre of paraprofessional home-school liaison workers. Funding will allow us to develop the resources needed to support many students who have emotional and adjustment needs in their school districts, as opposed to sending them to costly off-site or residential placements. Our vision is to create a new community support system for students with adjustment disorders and to open schools for a greater array of youth-based activity. | Portage County Educational Service Center | 30 | 31 to 90 days | \$1,000,000 |
| Portage | All Aboard Preschool | Our community has a diverse array of preschool services ranging from private home-based day care providers to several comprehensive preschool programs for children with disabilities. This proposal seeks funding in order to enhance the quality of these services, and to establish preschool classrooms in each of our six local school districts serving approximately 60 children. Funds will be directed toward the acquisition of facilities and employment of staff. Funds will support existing emergency parentage and will increase the scope of options available to families of preschool age children. Our vision is to build into our community ready access to public preschools and to solve the logistical problems that complicate quality preschool education in rural Ohio. We intend that these new classes would blend in with existing classes, especially those dedicated to serving children with disabilities. As a result, we will achieve expanded opportunities for the child who has a disability and better utilization of existing facilities and services. Funding for this proposal will enable us to see in place a key component of educating children for the 21st century. | Portage County Educational Service Center | 20 | 31 to 90 days | \$1,000,000 |
| Portage | Portage Area Autism Services | Comprehensive, high quality educational services for students who have multiple disabilities always hinges upon the success the individual achieves when making the transition from school into the adult world of work. This proposal seeks funding in support of such transition services. Funding will enable the formation of a multistake consortium, and will employ teaching and support persons (mentors, job coaches, family and community liaisons, etc.) that have been proven to be essential when promoting the types of wrap-around services needed during the transition interval. In addition, funding will enable the consortium to purchase services from businesses, agencies and organizations in the community. For an individual making the transition this might include specific training on job skills, transportation and the acquisition materials, tools and technology resources. Funding will be used to create and staff several teaching laboratories in the community for approximately 35 individuals who do not need services from existing sheltered workshop settings. These labs will act as a bridge between the high school classroom and the future work site as independent living environments. | Portage County Educational Service Center | 20 | 31 to 90 days | \$750,000 |
| Portage | Portage Area Autism Services | This proposal will provide funding for the development of a regional collaborative focused on public school programs for thirty children who have autism. Funding will support acquisition of classroom facilities and the training and employment of professional and paraprofessional staff. The collaborative will support children with autism along a continuum of options and learning environments. This proposal will enhance the existing transition services in the region, and reduce redundancies by promoting a comprehensive, tightly woven fabric of specialized educational supports. Funded services will allow access for parents and school districts. Currently, children who have autism often travel many miles in order to participate in high quality instructional programs. Our collaborative would reduce logistical barriers to guarantee that services are available within the community. Funding will enable the community to establish an infrastructure of school district and agency supports including parent involvement, transportation, governance, transition, assessment, professional services and expertise, and technology resources. | Portage County Educational Service Center | 25 | 31 to 90 days | \$1,000,000 |
| Portage | Portage Area Family and School Support | The Portage County ESC is dedicated to advancing safe, healthy, and productive families and communities. This will be accomplished through community engagement, emphasizing research, community partnerships, cultural safety, and inclusive planning. Community efforts will include a two-way street where school, families, and the community actively work together, creating networks of shared responsibility for student success. It is a tool that promotes civic well-being and that strengthens the capacity of schools, families and communities to support their children's full development. Schools alone cannot do this, but together, schools and families actively work together, creating networks of shared responsibility to meet the diverse needs of all young people. The engagement of parents, families, and community members in the education of their children creates a positive bond between the home, school and community in order to build greater ownership in the work of the schools, improve decision making, and to connect families with the health and support services students need for successful learning. This project will be designed to impact every child under the age of 18 (2020) in Portage County. | Portage County Educational Service Center | 75 | 31 to 90 days | \$1,000,000 |
| Portage | Portage Area Family and School Support | Providing support to families and educators of students in alternative school settings is an area for great need in Portage County and beyond. This proposal project through the Portage County Educational Service Center would provide services in the areas of training and career technology, activities to support the social and emotional needs of children, Ohio-related materials and resources, guidance and career counseling services. In order to promote the achievement of these students, families must have created for them specific avenues to engage in Ohio-related content. Creating this engagement is a two-way street, where school and families actively work together, creating networks of shared responsibility for student success. It is a tool that promotes civic well-being and that strengthens the capacity of schools and families to support young people's full development. Schools alone cannot do this, but together, schools and families can develop creative solutions to meet the needs of all young people. This program will serve not only families in Portage County but also contiguous counties and has the potential to serve 600 families. | Portage County Educational Service Center | 3 | 31 to 90 days | \$400,000 |
| Portage | Imagine Portage County | This program not only prepares young people for careers but also educates adults as to the career paths that are available for young adults as they enter the work of work. Collaboration with business, governmental and other county leaders such as not-for-profit agencies is critical to ensure that the needs of business are represented in career preparation. Portage County ESC intends to be a leader supporting the Governor's Initiative by implementing a comprehensive school-to-work program to meet the needs of students and employers in Portage County. The Governor's Initiative Program seeks to enhance the support to Portage County ESC program. Business, governmental and not-for-profit agency leaders throughout the county will be identified and engaged in dialogue consistent with the needs, wants, and desires to improve upon and prepare young people to be ready for the work of work. A model will be developed that will show how schools and families can develop creative solutions to meet the needs of all young people. Students and parents will be involved by participating in forums to learn how the program can prepare their students for the work of work. | Portage County Educational Service Center | 72 | 31 to 90 days | \$1,699,840 |
| Portage | Improving brain function during extreme exertion | Military personnel, firefighters, and first responders are asked to make split-second decisions. Their lives and the lives of others depend on accurate evaluation of the situation, rapid information processing, and selecting the correct course of action. However, these decisions are often made during times of extreme physical exertion and physical fatigue dramatically impairs our judgment and decision-making abilities. Improved methods for detecting physical and mental fatigue would help identify when an individual is at risk for making judgment and decision errors, and their consequences. A group of researchers with combined expertise in biomedical technology, exercise physiology, and neuropsychology propose to conduct a research project to better understand human physical exertion impacts on cognitive function. This research will provide a better understanding of how to improve performance under stress. The project will include: 1) developing the technology to generate new insights into these processes, which will: 1) leverage funding from federal and foundation sources; and, 2) develop the technology to quantify when persons are at risk of making poor decisions and look to market this technology. | Kent State University | 3 | 0 to 30 days | \$100,000 |
| Portage | NPS - Fittings | Start up manufacturing of standard size and specialty fittings for EHV and projects and fuel transfer. | NPS, Systems | 12 | 0 to 30 days | \$2,000,000 |
| Portage | NPS - Fittings | Start up manufacturing of standard size and specialty fittings for EHV and projects and fuel transfer. | NPS, Systems | 12 | 0 to 30 days | \$2,000,000 |
| Portage | Franklin Storm Sewers | 1. Taking the storm sewer not just up the hill to Franklin, but also west along Franklin to the end. Take storm sewer east past Oak. 2. Putting inlets on the north side to pick up sheet flow before it crosses Franklin. 3. Putting curb along south side of Franklin to help pick up water going south over the hill. 4. Taking storm sewer north up Oak. | Portage County | 3 | 0 to 30 days | \$50,000 |
| Portage | Pump House Renovations | Ranch Club Estates Water is a community water department licensed by the Ohio EPA to servicing approximately 100 homes in rural Charlestown Township, Ohio. We are applying for stimulus money for the installation of a generator, new roof, and updates to equipment. The generator is needed because when the electric is off we are unable to furnish water to the homes for basic needs including sanitary. We are located in a rural area and the electric is off on numerous occasions for 2 or more days. Once electric service is turned back on residents have to boil water for several days before consuming and the water department can get a bacteria sample to be safe to ensure water is safe for consumption. This will insure we can provide safe potable water to our residents 365 days a year. We are also going to use this money to update our equipment to stay in compliance with Ohio EPA regulations also to perform maintenance and upgrades to the structure of our pump house. Ranch Club Estates has not been able to raise their annual fee for over 15 years due to residents income levels to cover these additional cost plus cover the costs of additional laboratory requirements of the EPA. | Ranch Club Estates Water | 2 | 31 to 90 days | \$50,000 |

| Portage | Enhancing Behavioral Medicine Research in NE Ohio | I am requesting funds to hire one postdoctoral research fellow at Kent State University (KSU) to conduct a research study and assist in developing research collaborations in NE Ohio. This request provides one clinician with a 2-year position at a time when faculty jobs are scarce. I have traveled from Irving, TX to complete a study entitled "Depression, Inflammation, and Vagal Function among Patients in Cardiac Rehabilitation" which concerns mechanisms for the relationship between depression and cardiovascular disease. Details can be provided in a full proposal. The fellow will also research research in NE Ohio by enhancing collaboration between KSU, Summa Health System, and University Hospitals of Cleveland. I have research appointments at all these institutions. I have applied for and received NIH funding, but I need help building a larger research enterprise that links these institutions. They are pursuing expanded research and increased NIH funding, and I am developing a College of Public Health. Results of this project will support grant applications, and growing the portfolio of health research in NE Ohio will provide needed jobs in health and higher education. | Kent State University | 1 | 91 to 180 days | \$100,000 |
| Portage | Energy Drinks, Alcohol, and Driving Impairment | We are requesting support for a scientific study investigating the effects of energy drinks and alcohol on driving performance and risk perception. We believe that the popular practice of consuming energy drinks in combination with alcohol lowers perception of risks associated with drinking, that is, we believe that people consuming energy drinks and alcohol will think that they are less intoxicated than they really are and that they will feel more capable of driving a vehicle than their performance would indicate. These hypotheses will be tested using an alcohol administration and driving simulator protocol in our laboratory at Kent State University. Dr. Hargrett is a highly respected and internationally recognized expert in the field of driving performance. He has a team of researchers including a neuropsychologist (Dr. Gurdahl) and an expert in health behavior (Dr. Hughes) to conduct this study. We have assembled a driving simulator in a nearby laboratory and have been collaborating on studies that have shown that energy drinks can improve driving performance. No funds are requested for equipment or faculty support for study materials and the hiring of a full-time research assistant and a graduate student research assistant. | Kent State University | 2 | 0 to 30 days | \$100,000 |
| Portage | Iron Supplementation, Iron Status, and Performance | Iron deficiency and iron deficiency anemia is the most common nutrient deficiency in the world. Among U.S. citizens it has been seen that approximately 6% of college aged females have iron deficiency. In the blood, iron binds to hemoglobin and is important for the affinity for oxygen. The oxygen is then used for normal function throughout the entire body. Therefore, iron is an important component of aerobic and anaerobic metabolism in the human body and studies have shown that deficiencies in iron could potentially have detrimental effects on performance. This can lead to decreases in health status. Currently there has been little research looking at the direct effects iron status has on anaerobic and aerobic performance and how an iron supplement would impact the iron status and performance. The study will be proposed both at women with low iron status and involve ingesting an iron supplement. Also, the women (college aged) will then be tested for anaerobic and aerobic performance throughout the 15 week study to determine if iron status, performance, and health status are related, and if iron supplementation can improve any of these. | Kent State University | 3 | 91 to 180 days | \$50,000 |

|----------------|---|---|--|----------------|--------------------|---------------------------|
| Portage | Fine motor control in older adults, Parkinson's di | As the population ages, degenerative diseases are likely to become more prevalent. As this process occurs, it is well known that fine motor performance of the hands will decline. Fine motor performance of the hands (manual dexterity) is necessary for activities of daily living such as writing and dressing oneself. Cold temperatures (less than 10 degrees Celsius) are common in Ohio, which will also lead to a acute decline in manual dexterity. However, no studies have evaluated how cold influences manual dexterity in the older adult. In particular, the differences between healthy older adults, rheumatoid arthritis patients, and Parkinson's disease patients have never been evaluated in cold temperatures. Generally, overall in the cold, the hands become stiffer, warm the hands and increase manual dexterity but the mechanism has not been determined in older patients. After a period of acute cold exposure, moderate walking may enhance fine motor performance in all older adults. However, the extent of improvement in disabled patients warrants investigation. This information may enhance fine motor performance of daily living and well-being in older adults, which may reduce healthcare costs. | Kent State University | 4 | 181 days or more | \$100,000 |
| Portage | SBIR / STTR Orphans | Ohio is in the top 10 states for SBIR / STTR Phase I awards, but can only assist about 7 annually with commercialization grants. We propose going back to those also unfulfilled firms and other SBIR winners to invest a total of \$500k (not more than \$1 in any single firm and up to 20 firms total) in non-voting preferred stock. The stock is convertible to a loan annually at 2%, ... (6) of the invested amount at the end of years 1, ... If it is so desired by the firm, it is converted to a loan for the last 10% of 10 years. If the firm is not able to raise the stock, the firm will be able to liquidate its substantial assets including intellectual property the loan would be called or payment for the stock required at the multiples stated. The firms would be selected by a committee composed of at least one technical professional, one business professional, one occupational entrepreneur and one member from the RTSBDC, at KSU service area. The selection committee would be chosen by the RTSBDC and SBDC serving the firm's location and possibly Cleveland SBAD and the SBDC lead center. Any net funds returned would be retained to make the program, which could be repeated elsewhere, evergreen. | Kent State University - College of Technology | 200 | 31 to 90 days | \$5,000,000 |
| Portage | A Fire Safety System: Implementing biotechnology a | A strong need exists for a highly reliable metric and notification system for on-scene identification of firefighters who are at significant risk of an immediate cardiovascular or cerebral-vascular incident. By identifying firefighters in immediate peril, fire ground deaths can be prevented as well as the risks to other firefighters and fire responders. According to the New England Journal of Medicine (1998) the risk of a heart attack in first responders by more than 100% relative to other non-emergency duties. Conditions such as extreme heat, exhaustive maneuvers, dehydration, limited sight and communications, smoke and chemical exposure contribute to the increased risk. The highly volatile environment combined with the extreme physiology and stresses involved in fighting fires may increase the risk and onset of fatigue, but most times, the individual fails to perceive their own physiologic status. Therefore, there is a constant drive to improve the safety of the firefighters and reduce occupational hazards. Critical Research (Cleveland, Ohio) will develop a wearable physiologic monitor system to be worn by firefighters to mitigate the human brain is highly vulnerable to any reduction in blood flow. Medical emergencies like stroke often produce severe, irreversible brain damage due to lack of blood flow. Recent medical research shows that common health problems like heart disease and diabetes may also cause subtle changes in blood flow that can create permanent brain damage over time. Newly-developed equipment that produces "lower body negative pressure" (i.e. siphoning blood flow from the trunk to the legs/hips) makes it possible to safely simulate the early effects of these conditions "in-humans." A team of expert researchers from Kent State University and Critical Research is pursuing a research project that will: 1) improve our understanding of these medical conditions night damage the brain; 2) develop biomedical technology to detect when damage is likely to occur; and, 3) begin identification of strategies to reduce brain damage in response to changes in blood flow. In so doing, the project is expected to leverage significant federal and medical funding for further research and the development of biomedical technology for use in medical and military settings. | Kent State University | 4 | 0 to 30 days | \$125,000 |
| Portage | Protecting Brain Blood Flow During Emergency | The human brain is highly vulnerable to any reduction in blood flow. | Portage | Ambulatory Electronic Medical Record Project | This project is designed to provide an electronic medical record for 12 physician practices and one urgent care center comprised of all located throughout Portage County. All of these practice locations are owned by Robinson Memorial Hospital, a county owned hospital. This electronic medical record will allow details of the patient's medical record to be shared electronically across all Robinson Memorial Hospital locations, increasing the number of medical errors. This funding requested will cover the costs of the hardware and software. | Robinson Memorial Hospital | 10 | 91 to 180 days | \$544,000 |
| Portage | Learning Management System | This funding will establish a computerized learning management system to enhance the current training program for the county's 1000 employees. | Robinson Memorial Hospital | 1600 | 31 to 90 days | \$610,261 |
| Portage | Data Center | This project involves the construction of a new data center for Robinson Memorial Hospital, a county owned hospital. | Robinson Memorial Hospital | 25 | 91 to 180 days | \$5,000,000 |
| Portage | Operating Room Expansion and Renovation Project | This project involves the construction of an additional 19,000 sq. ft. to house new operating room suites and related facilities. The 2,000 sq. ft. of existing operating room space at Robinson Memorial Hospital is a county owned hospital. The operating room space has not been significantly updated since the current hospital facility opened in 1977. | Robinson Memorial Hospital | 20 | 91 to 180 days | \$18,500,000 |
| Portage | Ultraviolet Disinfection System | This project will add ultraviolet light treatment process with hydrogen peroxide at the water supply plant. | City of Akron | 10 | 31 to 90 days | \$5,000,000 |
| Portage | Replace Steam Heating System | This project will replace the steam heating system at the water supply plant. | City Of Akron | 5 | 181 days or more | \$450,000 |
| Portage | Electronic Medical Record Project | Installation of a complete electronic medical record system for Robinson Memorial Hospital, a county owned hospital, to include the hospital, all outpatient facilities located throughout Portage County, and the employee physician group. | Robinson Memorial Hospital | 25 | 91 to 180 days | \$32,600,000 |
| Portage | Filter Media Replacement | This project will replace the water filter media at the water supply plant. | City of Akron | 6 | 31 to 90 days | \$125,000 |
| Portage | Cognitive and Physiological Status Monitoring | Quantifying the available energy in a deployed soldier is an impossible task, but an approximation would be very useful to the command center. Monitoring the status of the soldier, whether in re-education or in combat. This would enable central command to recall the soldier as fatigue rises, thus increasing efficiency on the battlefield. While useful for all war fighters (especially in active battle) both the soldier and the commander. After a traumatic loss, an employee must re-qualify to his body's physical capacity and also wear his body differently to minimize discomfort. Signs of fatigue and related risk may present themselves that did prior to the trauma, including decreased coordination and available risk. However, with an Orbital Research, Inc. BPO (Biological and Physiological Monitoring) system, the employee soldier can monitor further energy expenditure during various activities to help them to improve the techniques he has long been using to perform certain activities. Additionally, a better assessment of metabolic cost associated with occupational tasks will allow rehabilitation programs to be individualized. The current project will leverage Orbital Research's expertise in development of sensors for medical monitoring with Kent State University's expertise in the area of exercise physiology, bridging the gap between academics and industry with support from leaders in electrophysiology and increase the likelihood of success. The specific focus and innovation of the CLINIC-WEAR system is the versatility and high reliability of the wearable components for remote physiological monitoring. Successful completion of this program will bridge the gap between communication protocols and wearable technologies for remote medical monitoring in a myriad of physiologically stressful environments (i.e., fire fighter, air traffic controller, pilot, policeman, etc.). The commercial version of CLINIC-WEAR will be a fully wearable, multi-sensor, multi-protocol and estimated parameters of health and disease. CLINIC-WEAR will have interchangeable sensors to meet the specific monitoring requirements for various medical and non-medical scenarios. The system will be easy-to-use such that individuals will be able to self apply or put on this wearable monitoring system with minimal or no assistance. | Kent State University | 4 | 0 to 30 days | \$125,000 |
| Portage | CLINIC-WEAR: A Wearable Disease Management System | The current project will leverage Orbital Research's expertise in development of sensors for medical monitoring with Kent State University's expertise in the area of exercise physiology, bridging the gap between academics and industry with support from leaders in electrophysiology and increase the likelihood of success. The specific focus and innovation of the CLINIC-WEAR system is the versatility and high reliability of the wearable components for remote physiological monitoring. Successful completion of this program will bridge the gap between communication protocols and wearable technologies for remote medical monitoring in a myriad of physiologically stressful environments (i.e., fire fighter, air traffic controller, pilot, policeman, etc.). The commercial version of CLINIC-WEAR will be a fully wearable, multi-sensor, multi-protocol and estimated parameters of health and disease. CLINIC-WEAR will have interchangeable sensors to meet the specific monitoring requirements for various medical and non-medical scenarios. The system will be easy-to-use such that individuals will be able to self apply or put on this wearable monitoring system with minimal or no assistance. | Kent State University | 3 | 0 to 30 days | \$75,000 |
| Portage | Gott Fen State Nature Preserve Expansion | The Gott Fen Expansion Project will permanently protect critical and rare water resources including a Beezel Fen Community within the headwaters of the Trunkers Creek watershed of the Cuyahoga River basin. The 55-acre property contains over 50 acres of high-quality Category I wetland habitat classified as a Great Fen. The Project is adjacent to the 50-acre Gott Fen State Nature Preserve, which also contains a common property boundary on its western edge with the Preserve for approximately 2,880 feet. Protection of this site will ensure that the entirety of the Trunkers Creek floodplain, including the Fen community on both banks of Trunkers Creek is protected in perpetuity. The property will be added to the Gott Fen State Nature Preserve and managed for the preservation of the rare and unique Fen resources existing on it. | The Trust for Public Land | 30 | 31 to 90 days | \$1,500,000 |
| Portage | Aurora Lake - Liberty Park Wetland Protection and | Project will acquire and restore 87 acres of land and associated wetlands in the Trunkers Creek Watershed adjacent to the 1,200-acre Liberty Municipal Park. Wetlands enhancement and restoration will add to the high quality of the site that includes state listed and endangered species. | The Trust for Public Land | 70 | 181 days or more | \$1,900,000 |
| Portage | Village of Hiram Sewer Project | This project is to improve the sewer line at the wastewater treatment plant to maintain consistent discharge with state regulations. | Village of Hiram | 5 | 91 to 180 days | \$25,000 |
| Portage | Riverside Court Waterline Replacement | Residents of Riverside Court receive water from a 1 1/4 inch galvanized waterline installed in 1924. There have been numerous breaks and complaints. The proposed improvements would include the construction of 300 feet of waterline with water replacement. This project will require rock removal and is further complicated by the location of existing utilities and a deteriorated roadway, curb, pavement, and sidewalks. Appearance of street condition infrastructure along Main Street in the downtown business district. | City of Kent | 4.2 | 91 to 180 days | \$232,000 |
| Portage | Mantua Streetscape Revitalization | The Village of Mantua and Downtown Mantua Revitalization, Inc. are responding to the situation by partnering on a revitalization project to implement comprehensive capital improvements and enhancements in the downtown district. The project as envisioned will create a "Great Street" one that is welcoming and attractive, and ultimately supportive of economic development for the village. Planned improvements and enhancements consist of utility modifications (i.e., water, sewer, electric, telephone, and internet), sidewalks, curbs, ramps, historic-style streetlights, traffic signals, landscaping, signage, and furnishings. Measurable outcomes to be realized by the project are much needed infrastructure improvements and enhancements, and job creation; approximately 30 temporary jobs resulting from project construction and 45 permanent full and part-time jobs resulting from new and expanded businesses in the downtown district. | Portage County | 75 | 181 days or more | \$1,000,000 |
| Portage | Water Treatment Plant Parking Lot Repair | The parking lot at the Water treatment plant is in need of reconstruction. This project would require the removal and replacement of 51453 S.O. F.T. of pavement. | City of Kent | 3.6 | 31 to 90 days | \$200,000 |
| Portage | Large fitting project | One of our major customers produces large diameter plastic drain pipe. They have asked us several times to increase our size capabilities as we are currently able to only supply their smaller molds. This project would allow an Ohio plastic mold manufacturer to supply an Ohio pipe manufacturer with equipment needed for Ohio infrastructure. Funds would be used for larger CNC machines, building upgrades, and employment. The mold would be able to call back former employees laid off in 2008 plus add to our employee base. Jobs added would average over 3000 plus annually. Sales would increase over a few years from \$500,000 to \$2,000,000 in addition to our current sales. | Colonial Machine Co | 8 | 31 to 90 days | \$7,200,000 |
| Portage | Renovation and Expansion of the Comparative Medici | Funds will be used to expand the research facilities on the HEDUCOM campus. The existing research facilities were constructed in 1976 and are in desperate need of upgrades and renovation. This expansion will support the significant growth in the Hiram-based research activities including the current focus on linking research to economic development, as well as the growth of new faculty and students associated with the College of Pharmacy and the addition of a fourth partner institution: Cleveland State University. The increase in the number and activity of biomedical scientists on the Hiram campus as well as a projected increase in overall student population in the College of Pharmacy and the College of Health and Human Services has caused a critical need for additional laboratory and office space. The project will increase the capacity for institutional research in Comparative Medicine by 12,000 square feet and will include additional support spaces, isolated animal housing spaces, clean rooms and sterilizing areas for caging, handling and food. The goal is to develop a proper environment to maintain immune-compromised animals and accommodate the use of advanced pathogens. | Northeastern Ohio Universities Colleges of Medicin | 50 | 91 to 180 days | \$7,200,000 |
| Portage | Chlorinator Equipment Replacement- Water Treatment | The current chlorination system at the City's water plant is in need of up-grade. This project would retrofit the current chlorine feed system in place. Included in the replacement system would be a 6-250ppm feed system including vacuum regulator, ejector, control valves and panel inlets. | City of Kent | 1 | 0 to 30 days | \$25,000 |
| Portage | S.R. 59/Main Street Waterline Improvement Project | The waterline on S.R. 59 is a 10 inch cast iron waterline installed in 1957. This line has had numerous breaks and is the cause of frequent rusty water complaints. Reconstruction of this waterline would involve trenchless technology so as to lessen disruption to traffic and the commercial district along the congested route. The improvement consists of pipe bursting and replacing 1700 feet of waterline. Hydrants, valves and service connections would be replaced. | City of Kent | 16.4 | 181 days or more | \$900,000 |
| Portage | Village of Hiram Sewer Project | This project is to improve the sewer line at the wastewater treatment plant to maintain consistent discharge with state regulations. | Village of Hiram | 10 | 91 to 180 days | \$180,000 |
| Portage | Farichild Avenue Water Storage Tank- Lead Abatement | The Farichild Ave. Water Storage Tank supplies water to the west side of the City of Kent. The tank has had based paint that is peeling on both the interior and exterior of the tank. The tank was constructed in 1940. The project will require the abatement of the based paint. The tank will be cleaned inside and out and then re-lined. | City of Kent | 6.5 | 31 to 90 days | \$360,000 |
| Portage | Village of Hiram Sewer Project | Wastewater Treatment Plant Outfall Relocation. This project would relocate the effluent line from the wastewater plant to allow for better access for the required sampling and testing. This project is necessary due to some leak erosion and the enhancement of effluent safety. This wastewater extension will provide a secondary crossing of the Cuyahoga River and will eliminate 2 dead end lines in the system while providing better water quality and improved Flow Flow. The proposed project contains approximately 2,442 feet of 12" ductile iron pipeline, which 112 feet is placed in a casing pipe border or lined, along with 7 line hydrants, 3 valves and pavement repairs. The waterline crossing and DSRP wastewater extension permits have been obtained. | Village of Hiram | 5 | 91 to 180 days | \$20,000 |
| Portage | Cherry-Middlebury Waterline Extension, Phase 2 | Project Specifications encourage the use of U.S. manufactured materials. | City of Kent | 8.5 | 0 to 30 days | \$465,000 |
| Portage | Village of Hiram Water Project | Installation of stand-by generator and automatic transfer switch at north pump station. This project would allow for continued sewer service to its residents in the event of a power outage. | Village of Hiram | 5 | 91 to 180 days | \$31,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Portage | Village of Hiram Water Project | Water main improvement. This project would loop the Village's water system, which would eliminate dead end lines that negatively impact water quality. This project would help to maintain compliance with safe drinking water standards and preserve public health and safety. | Village of Hiram | 12 | 91 to 180 days | \$1,175,000 |
| Portage | Village of Hiram Water Project | A new water production well with a 300 gallon per minute capacity. Currently the Village does not have a back up well with sufficient capacity to sustain normal water service to its residents in the event that the main well will fail. | Village of Hiram | 5 | 91 to 180 days | \$76,000 |
| Portage | State Route 59 Sidewalks | Install 26,400 square feet of sidewalk along State Route 59. Install ADA compliant ramps. This will provide walkability access to retail area for nearby residents, college students and group home residents. | Franklin Township, Portage County | 25 | 91 to 180 days | \$396,000 |
| Portage | Spring Hill Wetlands Protection | Land acquisition of 153 acres containing high quality headwater wetlands of the Chagrin River. The Spring Hill Wetlands project will permanently protect 153 acres containing critical water resources within the high headwaters of the Aurora Branch of the Chagrin River. High quality scruboak and forested wetland habitats are an increasingly threatened resource statewide. The property contains over 65 acres of the highest quality Category I (sandbars) and forested wetlands of the over 1,000 foot wide of the main stem of the Aurora Branch - Chagrin River at its source waters, and over 2,200 feet of primary headwater habitat tributary streams to the Aurora Branch. The large size and exceptional quality of the scruboak and forested wetlands make it an ideal location for amphibian breeding and nest and animal diversity. Large numbers and diverse array of amphibian species have been observed on the property. | The Trust for Public Land | 30 | 91 to 180 days | \$2,500,000 |
| Portage | Village of Hiram Sewer Project | Mira Vilet System Replacement: This Village uses vilet bacteria treatment system has reached the end of its useful lifespan and needs replacement. This is stage of the treatment process is necessary in order to maintain compliance, public health and safety, and minimal environmental impact. | Village of Hiram | 5 | 91 to 180 days | \$120,000 |
| Portage | Village of Hiram Sewer Project | Headworks Screen and Grit Removal System: The replacement of this out dated system would greatly improve filtration at the wastewater plant. Flushing solids at the point of entry improves overall treatment which improves compliance, public health and safety, and environmental impact. | Village of Hiram | 12 | 91 to 180 days | \$540,000 |
| Portage | Village of Hiram Sewer Project | Bales Hill Sewer Line Relocation: This project involves replacing and re-locating a sewer main. The main has reached the end of its useful life span and is a combination of pipe and infiltration. Relocation is necessary as a college dormitory has been constructed on top of the line greatly limiting access in the event of needed maintenance. | Village of Hiram | 10 | 91 to 180 days | \$82,500 |
| Portage | Village of Garrettsville Wastewater Treatment Expa | Expansion and replacement of the Wastewater Treatment Facility to provide more energy efficient treatment units and increase capacity from the current average daily flow of 366,000 gallons per day to 500,000 gallons per day and peak flow from 785,000 to 1,100,000 gallons per day/ | Village of Garrettsville | 10 | 91 to 180 days | \$6,800,000 |
| Portage | Develop Pre-engineered bio-fuels skid | This program will develop a pre-engineered bio-fuels skid technology. The intent is to identify techniques that may be used to generate energy from common, modest waste streams. This program is not intended as a simple research project. The identified techniques will be used to engineer a working system that may be suitable for deployment at residences, neighborhoods or communities. | DCTech, Ltd. | 6 | 0 to 30 days | \$1,500,000 |
| Portage | Wastewater Treatment Control Template | Building on technology already developed in manufacturing systems, this project will develop an advanced control model for wastewater treatment plants. Much of the automation activity in waste treatment facilities is focused on monitoring and record keeping. The intent of the model is to move the focus of waste treatment toward preventative, feedback control. It is expected that the result of the advanced control will be improved stability and a reduction in effluent violations. | DCTech, Ltd. | 4 | 31 to 90 days | \$1,000,000 |
| Portage | Develop HVAC Energy Management Model | Current Energy Management systems are expensive, proprietary and difficult to use. For these reasons, few are installed and fewer are used to the promise of energy savings. This proposal intends to create a simplified approach to energy management in building systems that is both effective and easy to use. The intent is to develop and document principles for energy management as well as methods for monitoring and control. | DCTech, Ltd. | 4 | 0 to 30 days | \$1,000,000 |
| Portage | Street Lighting Energy-Saving Controls | This program will evaluate and develop a system for street lighting control allowing improved energy efficiency. This program is a paper study that creates a design model and an evaluation of the potential savings resulting from improved lighting control systems. The program is a study of automation device technologies has been well characterized. The proposed study is to create a design model for the control of street lighting services. It is intended to improve the operation of existing devices. | DCTech, Ltd. | 4 | 0 to 30 days | \$450,000 |
| Portage | Re-training of displaced work force | The program will provide training resources to displaced workers in an effort to enhance their skill sets and improve marketability. The training is targeted towards employees in the manufacturing sector. It will focus on technical skills related to the manufacturing process. The skills are targeted to allow for re-employment, repair, and enhancement of electronic controls. | DCTech, Ltd. | 2 | 0 to 30 days | \$225,000 |
| Portage | Village of Hiram Sewer Project | Installation of Backup Generators at Pump Station. | Village of Hiram | 5 | 91 to 180 days | \$75,000 |
| Portage | Develop Education Program with Local University | This program will develop an educational program in cooperation with a local college or university. The goal of the program is to develop a laboratory based training program that includes the tools required to visually teach advanced manufacturing concepts related to the engineering curriculum. The preparation of the program will involve expertise from local industry as well as students and faculty from the university. Successful project completion will improve the region's ability to competitively manufacture. | DCTech, Ltd. | 3 | 0 to 30 days | \$450,000 |
| Portage | Provide Training Resources | This request is for funds to provide training for business employees. For small businesses, the costs of training are especially costly as employees cannot provide value to the company during the training period. This request the funds to provide employee training. The new skills will be used to develop process control and manufacturing techniques that keep regional expertise superior to expertise available in other regions and other countries. | DCTech, Ltd. | 4 | 0 to 30 days | \$250,000 |
| Portage | Garrettsville Silver Creek Protection Project | Program WFLCFL: This is a green infrastructure project focused on the establishment of riparian buffers along approximately 2 miles (10,000') of Eagle and Silver Creeks which flow into the Mahoning River. Western Reserve Land Conservancy (WRLC) is partnering with Hiram College to restore important riparian habitat. WRLC has invested significant staff time and financial resources in similar projects throughout Portage County that focus on protecting riparian corridors and the drinking water supply of the county's residents. The work WRLC and its partnering agency are doing directly implements recommendations of the Regional Planning Commission's 2006 Portage County Watershed Plan. | Western Reserve Land Conservancy | 25 | 91 to 180 days | \$500,000 |
| Portage | Aurora Meadows Subdivision Sanitary Improvements | Planning and Design Completed - Prepared to Implement Precaster Activities. This area is very rural area; there is a high percentage of LMI (low to moderate) income. The ratio of lineal feet of sewer to residences and businesses will be tough for the community to pay. Limit the sewer line installed there will be many issues such as declining in property value in the affected area. Engineering projects have been completed. Proposed sanitary sewer service to an existing residential of approximately 80 homes in northwest Mantua Township, Portage County, Ohio. The Ohio EPA has determined that the area is health problem due to a majority of failing septic systems, and has issued final findings and orders for Portage County to correct the situation. The sanitary sewer line to the subdivision, approximately 200 lineal feet of sanitary sewer, a sanitary sewer pump station and nearly 4.5 miles of sanitary sewer force main must be constructed to transport the domestic waste to the Mantua Wastewater Treatment Plant for treatment. The estimated construction cost is \$5,695,000. | Portage County | 20 | 181 days or more | \$3,895,000 |
| Portage | Crestwood Waterline Project | Extend waterline north on BR 44 and east on Hillcrest to service Farmway (up on ridge) with proper pressure and fire flow. This is an important project to Mantua Village and Portage County. It benefits the Crestwood Schools, provides water to a commercial area with potential for an economic driver, and provides additional water to 70 homes, and the School. Replacing the old (circa 1950s) underlined 4" & 6" main on Grandview, Clemons, Ambler, & Farmway. New standard for fire flow on 6" hydrants is an 8" main. All previous ISO hydrant flow tests in this area from 62, 73, 79, 94 have failed. Extending the waterline north on BR 44 and looping to the existing main on Pioneer Trail near the new elementary and middle schools - would not only provide a looped system to the schools, but provide service north of the Village corp line. One steping to eventually providing service to Mantua Corners where commercial development is possible/probable. Always have a 6" sanitary force main from the Corners. | Portage County | 75 | 31 to 90 days | \$50,000 |
| Portage | Shalersville Business Park | Extending waterline north on BR 44 and east on Hillcrest to service Farmway (up on ridge) with proper pressure and fire flow. This project is to create an industrial park in a portion of Ohio that currently has a per capita income of approximately \$19,000. The park will be roughly 250 acres and has the potential to create 1,000 sustainable family wage jobs in Northeast Ohio. This park's location is the intersection of St. Rt. 44, and the Ohio Turnpike in Shalersville. The appropriations request being submitted for is \$5,000,000.00 to be dedicated to water and sewer lines to industrial park, and to add the necessary capacity at the Mantua Water and Sewer Facilities. | Portage County | 1000 | 31 to 90 days | \$5,000,000 |
| Portage | Safety Tech Consultation | The total project cost is \$12,490,750, of which \$7,490,750 is being leveraged as local match. The last remaining hurdle is running water and sewer lines to the project site, and in a loop around the storage tank make up the park's perimeter. Engineering studies have been completed on this site, and commitments have been gathered from the developer, utilities companies, and the community that will provide the capacity for the water and sewer flow. | Safety Tech Consultation | 60 | 0 to 30 days | \$600,000 |
| Portage | no thugs no drugs | This project has the support of many of Northeast Ohio's planning and economic development organizations, along with local governments, and construction of one building to house offices, small retail store and a transportation facility. The building will be used as Safety Tech Consultant's office, providing customers with Occupational Health and Safety, consultation services, OSHA training as well as services dedicated to help keep companies technology up to date. In the retail area companies would be able to purchase and types of safety equipment they may need to purchase for their employees to safety perform their work. Safety Tech Consultation will be targeting companies involved in the Construction Industry as well as General Industry. | drug aware for kids | 50 | 0 to 30 days | \$150,000 |
| Portage | Intelligent Games for Revolutionizing Science Educ | Drug awareness for k to 12 in my community and surrounding areas. The drug problem in portage summit and peasego county has tripled in the past few years. Local law enforcement don't have the funds or man power to spread the word. I believe with help I could make a huge difference in the youth in our county. drugs have ruined many close friends and family members and we need to take a stand and let kids know the truth about drugs. math lets me progress in my own way. I really believe we can make a change. America's pool of scientific talent is declining at a time when scientists and technical professionals are needed to strengthen the economy and ensure future growth and stability. There is an urgent need for innovation in science education in order to attract and retain most students including female and minority students, to science careers. Entry to the science pipeline occurs during high school when, as part of the natural development process, students begin to imagine themselves in future careers and lifestyles. It is within this context that we propose to develop and implement game-based learning environments that open and connect high school science courses. The strength of this project is that it builds on a successful NSF-funded virtual biology software program based in northeast Ohio through a grant from the Ohio Board of Regents. The project will involve faculty and students from Ohio universities and school districts as well as private-sector technology firms. Successful fruition of this project will aid development of a workforce who are scientifically literate, who are able to pursue careers in Ohio's new high-tech academic, and who are inclined to do so. | Kent State University | 30000 | 0 to 30 days | \$2,200,000 |
| Portage | Training | Would use this money to further train myself and another tech. | Ici computer | 2 | 0 to 30 days | \$20,000 |
| Portage | wood pellets | This Project would create jobs by recycling old lumber and wood chips to make wood pellets and raising corn and sell it in bags. I would estimate I could create 10 twenty jobs from doing this project from building to storage of materials. | Iantz family farms | 20 | 91 to 180 days | \$750,000 |
| Portage | Rebuild Personal Finances | \$40,000 to be used as an emergency fund, which is six months of living expenses. The reason for the request is that my finance (see have the same household) for an auto dealership and can lose the job at any time. Currently, we bring home about \$5,200 a month, which is less than our monthly expenses, therefore increasing our debt, which is necessary to pay off. If the economy improves and the job looks somewhat secure, we would use the \$40,000 to pay down credit card debt, that is more than \$50,000 and our home equity line of credit that is \$20,000 and has a variable rate. | Individual | 0 | 0 to 30 days | \$40,000 |
| Portage | Community Sports complex and Youth Training Facili | We would like to start a business for youth and adults in our community, and area communities, that provides indoor athletic fields, training facilities and equipment. For indoor fields and basketball courts, soccer fields and baseball/softball training cages. Our community, and all neighboring communities, lack a recreation facility and this would allow youth through adults the opportunity to train and play sports year round. This business would benefit our youth all the way to the high school level by allowing better prepared athletes. It will also provide the community the opportunity to be healthier and active throughout the entire year. We would like to find an existing warehouse type facility and renovate it if possible. | Kevin and Kristen Kallinowski | 100 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Portage | Northern Climate colony collapse Disorder Research | This money will be used to develop new strains of honey bees resistant to CCD and the Varroa Mite Plague that are also able to survive the northern winters typical to US. With bees, in particular queen bees that carry the Varroa Resistant hygiene that in turn show resistance to CCD, we can help ensure the survival of the world's largest natural pollinator. The initial sample will include both Italian and Carniolan strains, known to be good pollinators, honey producers, and able to withstand northern winters. From this sample we will raise queens - all in Northern Ohio - mated to the natural bee population of Ohio. We will use both the Jenter and Doolittle methods of queen rearing to determine if there is a discernable difference to the natural resistance. We intend to do all natural (homopathic) hive treatments on a minimum sample of 50 to 75 new hives in various locations. The study must extend at least 2 years, preferably 3 years, to ensure the winter viability. | Amoroso Apiary | 30 | 0 to 30 days | \$553,985 |
| Portage | The Firehouse Restaurant Dream | I want to purchase & operate the Firehouse Restaurant in Rootstown, Ohio. It has been for sale for several months & if it closes will cost the area approximately 30 jobs. I would like to employ the students from the Maplewood Vocational School's Culinary program so that they could receive "real life" experience that would provide them with valuable training, experience, and knowledge for the future. I believe this would be an excellent investment in the future that would pay immediate dividends. | Dusan Lee | 30 | 31 to 90 days | \$155,000 |
| Portage | Business Improvement | Purchase new truck to carry demo rescue equipment, purchase two sets of new demo rescue tools make improvements to office purchase top top vehicle new computer for office, new fax and copier/printer. This additional sales rep to provide the best in the equipment and rescue tools to serve the departments and EMS | Dominion Fire Services | 1 | 0 to 30 days | \$150,000 |
| Portage | CAP (Cleveland, Akron, Pittsburgh) Regional Airpor | Study the feasibility of building a new regional airport serving northeast Ohio and Western Pennsylvania. The airport would potentially be located in Portage County, OH. This airport would primarily replace the CLE, CMH, CAK, and PTT airports. High speed rail service would be built offering quick, non-stop service to each major city served. These cities include Cleveland, Pittsburgh, and Akron. Future high speed rail service to Columbus, OH and other urban areas would be added in the future. This would be a highly collaborative undertaking leveraging H-Speed rail funds, airport funds, and the governments of Ohio and Pennsylvania. The two states would establish a commission to undertake the study. This project will provide evaluation and mental health services to nonviolent females who have entered the criminal justice system with a diagnosis of mental illness. The existing program is a collaborative effort between the Portage County Jail, Portage County Adult Probation, and Coleman Professional Services. It offers an opportunity for individuals who have been arrested and booked to receive treatment as an alternative to incarceration. Under the proposed program individuals will receive treatment and transitional services including rehabilitation for substance abuse. | Self | 95,000 | 181 days or more | \$5,000,000 |
| Portage | Post-Arrest Jail Diversion Program for Females wit | | Coleman Professional Services | 10 | 91 to 180 days | \$50,000 |

| Portage | PR Mitchell, Ph.D. | Individuals with disabilities are underemployed and often fail to achieve satisfactory social and economic participation and quality of life. Assistive technology (AT) is critical for such participation and to enhance the contributions of persons with disabilities to Ohio's revenue base, and provision of AT services throughout the educational experience is best practice. While accomplishments have been made in Ohio in AT, many areas of critical need remain, including the direct provision of skilled AT services to high-need areas. The project will establish remote AT evaluation, training and follow-up throughout Ohio, with 4 sites established based on low income, high disability, and lack of AT services. The focus of services will be on AT for communication and learning, as these are key areas of impact related to employability. The AT Matrix will establish a highly innovative, nationally unique, state-of-the-art program of distance-based supports and services for assistive technology for students through college-aged individuals with disabilities. The project will collaborate with Ohio Tech partners, State Education Support Teams and other interested st | Kent State University | 50,000 | 0 to 30 days | \$1,400,000 |
| Portage | Kent Massotherapy and Healing Arts, LLC | This request is for Start-up expenses for a new business. I have registered the name with the State of Ohio, but am unable to obtain a Small Business Loan due to existing debt and I am not bringing in any income at this time. Once started, I will employ other Therapists as well as instructors. I have a Master's Degree in Recreation Management, a B.S. in Therapeutic Recreation. I've been a Licensed Massage therapist for 22 years. I have a space to rent, but it needs much renovation. I can do most of the work myself, but the \$3,000.00 will help me get the space 2 months earlier at \$600.00/monthly just to have the purchase needed supplies to renovate the space. I know this business will be a great asset to the community in providing a means for income reduction, self-reliance, exercise, and social support. If I am in the wrong area in this website to apply, please inform. Thank you! Beth Rinser | Kent Massotherapy and Healing Arts, LLC | 4 | 31 to 90 days | \$5,000 |
| Portage | Electrical contractor | We are currently a Electrical Contractor with 45 employees. Serving Ohio and Pennsylvania, with this help from the Government we will be able to build a new and needed Office/Warehouse which will allow us to increase office staff and warehouse staff. This will also give us the opportunity to take on more projects and increase our manpower out in the field. By the end of 2009 we could be up to 75 to 100 employees. Along with the new Office/Warehouse we would like to incorporate some retail space, bringing more jobs to the area. Proposed Office/Warehouse 10,000 sq.ft. Proposed Retail Building 10,000 sq.ft. | E.P. Powerhouse | 100 | 0 to 30 days | \$1,500,000 |
| Portage | Clean up Meth Lab | We need help! In December of 2005, my husband and I bought our dream house. We never dreamed what might be waiting to happen. One day before we were planning to move in, the Bradford Police Department called my husband at work. He informed him that they had found an operating Meth Lab inside our "dream house". We did not know what to do or who to turn to. We called our attorney and because we funds had already shagged hands there was nothing we could do but to go to court to get the house cleaned. Here we are four years later and still dealing with the same problems. We want to court three years later to find out the lady who owned the house was able to sell her house and get her life back. Our county was to blame for the three year court date. Because they said the courts were so busy. The funny thing is our insurance company gave us some money and they took her to court and won. Now here they able to get a court date so quick and we weren't! Now we cannot do anything to her. This is very unfair to us. We are stuck with a house that is labeled and will never sell. We drained our assets and we have nothing left but a piece that is not worth a penny. We want to court on February 10, 2009 to get a judgment against the drug dealer that was also making the Meth. Its electric utility trucks. | None | 1 | 0 to 30 days | \$25,000 |
| Portage | Landscaping Company, Clean Fuels Ohio Partner | It is well known that the majority of business growth in recent years has come from smaller enterprises. Many of these smaller companies have 5-20 employees and have struggled as they try to grow into larger companies. Some of these firms have the potential to grow into 100-200 employee companies. However, they need technical and business assistance and resources to achieve this growth. My purpose is to provide this help in a greatly reduced cost by using grant funding to reduce cost and pay for expert help for these companies. The expertise needed to help these companies will be obtained through the Kent AT SBDC and faculty members in The Kent State University College of Technology. The MT SBDC has a history of helping and promoting small businesses in areas of manufacturing and technology. The College of Technology has experts in almost all areas of technology including solder, laser manufacturing, plastics and composites, metals and rapid prototyping. Furthermore, the university has faculty experts in all fields and when necessary these experts will be brought in to help on projects. We anticipate helping 5-6 companies approximately 200 new jobs in the first year. | Clean Fuels Ohio | 5 | 31 to 90 days | \$400,000 |

| Portage | This is a World Enrichment Program in a book. | It would be an honor for me to help you review the economy and the hearts of the people of this country. I'm in the process of writing an extraordinary inspirational book which contains many uplifting and thought-provoking true ideas to share with the world. These positive thoughts and new perspectives will profoundly change the direction in which our country is slipping. My words will lift people up from this fearful and painful negative downward spiral. But I need your help to get the first round of books printed and on the shelves. And I'm hoping you will grant the request in my good faith to make this dream come alive. But it's all up to you. Please just "go with your gut" on this one as to your decision on this request because my book will be wonderful! It's changing to anyone who reads it. And those inner changes it us up to what will turn this country around, making a better world. Please help me to make a difference in healing and saving the community with my writings. Because nothing can help this ailing world more now than these new and revolutionary words of wisdom and joy, healing and love. Please help me publish my powerful, transformational messages. I'm "Incredibly and God Blessed." Reference: 9-15 jobs created and at least 2 retained; 9-15 adults with traumatic brain injury (TBI) served daily; 80 - 100 individuals with TBI, caregivers and family members served overall; at least 15 educational programs regarding TBI provided to community, collaborative and educational relationships created and/or enhanced with Kent State University | Uplifting America | 1,000 | 181 days or more | \$5,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Portage | Aid to local farmers | A produce stand which would sell only produce and meats grown in Ohio. Provide local farmers with a store front to sell their products. | Crawley's Fresh Produce | 10 | 31 to 90 days | \$250,000 |
| Portage | Bounce World Inc. | Bounce World Inc. would be a small business which would consist of inflatable bouncers for children and families as a affordable way to promote family activity and family organization. It would consist of multiple inflatable bouncers of different shapes and sizes with a snack area to promote healthy living and used to celebrate special occasions (birthdays). The livelihood would consist of a large warehouse pre-existing with updated flooring and venting which upon approval location would be determined. | new business owner | 20 | 181 days or more | \$300,000 |
| Portage | Workshop Advancement Program | Our young company has been financially responsible in how we do business and our intent is to encourage people to acquire the skills that will benefit themselves our industry and the economy. We would be reasonable students of the stimulus funds. The state local and employment benefits from this investment proposal for our weigh the cost. | Workshop Wire Cut and Machine, Inc. | 6 | 0 to 30 days | \$1,250,000 |
| Portage | Field House Parking Lot | The parking lot at the Kent State University Field House is in need of renewal. It is the original parking lot from when the facility was built with state funds in 1991. 1/3 of the lot is currently paved, with the other 2/3 being a surface of dirt-gravel mix. The Field House is an auxiliary service of the University and does not receive University assistance, and our operating budget does not have the allocated funds needed to repair the parking lot, thus we are requesting funds to create a new parking lot. The Field House is available for the local community for various events and is a popular site for an opportunity to exercise. During the year, we host many colleagues, high school and other public events within the Field House. The lot is located in a low-lying area. In the winter the lot becomes a sheet of ice and in the spring, areas are under water due to the lack of drainage. The Field House is also a site for the public to come in times of disaster relief and medical emergencies (ie mass immunizations.) Recently the parking lot has become more hazardous because of numerous pot holes and standing water. A new parking lot with proper drainage would make the parking lot safe and more pleasant for all users. | Kent State University | 20 | 0 to 30 days | \$2,000,000 |
| Portage | Preparing Professionals with Asperger Syndrome for | Identification and underemployment among individuals with Asperger Syndrome (AS) is very common, although individuals with AS possess the cognitive ability to contribute to the work-force. This proposal will provide highly prescriptive university training to prepare 30 individuals with AS to successfully obtain a degree from Kent State University and sustain employment. Successfully employed individuals with AS who participate in the program will reduce barriers to becoming contributing members of society. | Kent State University | 30 | 31 to 90 days | \$500,000 |
| Portage | Preparing Public School Professionals to Effective | The number of students with Autism Spectrum Disorders is increasing dramatically. Public school professionals must possess a solid understanding of the diverse needs of this population in order to develop, implement, and evaluate appropriate educational programs. The proposal aims to provide professional development to 90 individuals through the Kent State University Autism Spectrum Intervention Specialist Certificate. The program will address the needs of public schools to hire and retain knowledgeable professionals. | Kent State University | 90 | 0 to 30 days | \$500,000 |
| Portage | Cocker Spaniel and dog rescue for homeless/abandoned | Establishment of a business to rescue and find homes for abandoned and abused dogs and cats due to foreclosure and loss of jobs. Animals would be vet checked, spay/neutered and put up for adoption. Students from local high schools that offer animal care courses would be hired to assist in the care and training of the animals. The program would be a non-profit organization. The program would be a non-profit organization. The program would be a non-profit organization. | Darling Kennels | 5 | 31 to 90 days | \$150,000 |
| Portage | Ohio Computerized Medical Records Center | Establish a secure web-based medical records computerization and electronic patient records. Implement and train on the new small practices and clinics would subscribe and utilize via a web-based system. More than half of Ohio's medical records are still on paper. Small practices in small offices with few doctors or fewer Ohio Medical Records Center would facilitate the digitizing of their medical records. The program would be a non-profit organization. The program would be a non-profit organization. | GADDO | 40 | 91 to 180 days | \$244,000 |
| Portage | Window Replacement | The project includes the installation of 116 replacement windows, 5 entrances and 2 new window wells at the James A. Garfield High School. All windows would be energy efficient with interior blinds. The current windows are over 35 years old. Within the last 3 years we installed an energy efficient boiler, but the aging windows have prevented realization of the full potential of the investment. The main focus of this project is to make our building much more energy efficient. | James A. Garfield Local School District | 5 | 91 to 180 days | \$400,000 |
| Portage | Zoning Guidelines For Energy efficient Development | This project would be a comprehensive review of existing land use and subdivision practices. The purpose of the guideline preparation would be to examine existing the land development codes within Portage County. Emphasis will be given to creating guidelines within the codes for renewable energies, mass transit, green building construction and retrofit utilization. Ultimately the final product will be a comprehensive overview to encourage through building location, design, usage and land use. This will be accomplished through the use of incentives and regulatory controls for development. With the aim of standardizing the use of solar, wind, geothermal, plus encourage the use of park and ride, mass transit, telecommuting as appropriate. | Portage County Regional Planning Commission | 10 | 0 to 30 days | \$100,000 |
| Portage | Court House Security Program | Currently the Portage County Sheriff's Dept. does not have the main power to provide officers to secure the county's court rooms. Judges in the county have cited this lack of security a major issue; however, it is counter intuitive to pull officers off of the roads to address the issue. | Portage County Board Of Commissioners | 3 | 31 to 90 days | \$300,000 |
| Portage | Kent Joint Safety Building | Portage County is in need of a new court house in Kent. The City of Kent is in need of a new police station and jail, and Kent State University is in need of a new police station and jail. Rather than these three public entities duplicating efforts and expenditures on building three independent but similar structures throughout the Co. of Kent, a collaborative effort has formed to build one building meeting the needs of the County, City and University. | Portage County Board Of Commissioners | 200 | 181 days or more | \$15,000,000 |
| Portage | Portage County and Robinson Memorial Hospital Join | With the number of public colleges and universities throughout Ohio, this project will serve as a working model to save this state's tax payers millions of dollars. This project is a collaboration between Portage County and the Robinson Memorial Hospital. Both of these public entities are required to retain and maintain public records for the good of our constituencies. A records building is a specialized and expensive project due to the specific climate controls the buildings must have. These two public partners have a good track record of working together, and hope to build joint records center that will prevent duplication of efforts and expenditures. | Portage County Board Of Commissioners | 100 | 181 days or more | \$22,500,000 |
| Portage | First Response/Command Vehicle | The Joint Records Center will be in Ravenna Ohio which has lost several industries in recent years, and would definitely welcome both the construction jobs and the sustainable long term jobs the center will offer. To replace our current First Response/Command vehicle with one that would fit our operational needs and objectives. Homeland Security Presidential Directive 5 was established to enhance the ability of the United States to manage domestic incidents by establishing a single, comprehensive national incident management system (NIMS). To utilize the NIMS system to its fullest potential the use of a Mobile Data Terminal (MDT) or mobile computer for the incident commander and planning section to complete the required forms and to develop an incident action plan (IAP). This vehicle would be equipped with such a system. Interchangeable communication would be addressed with transceiver (talks to communicate with any agency in Portage Co. and surrounding counties). The First Response aspect would be addressed with equipment and supplies to safely treat at the Advanced Life Support (ALS) level a patient of cardiac arrest with cardiac monitor defibrillator/AED and emergency management equipment. The needs of a trauma patient would be addressed with bandages and supplies for fluid resuscitation. The goal of this first response vehicle would be initial treatment before ambulance arrival. We would like to replace our only ambulance that is over 10 years old and beginning to become a fiscal burden with repairs. The Edinburg Township Fire Department provided Paramedic level emergency medical service. | Edinburg Township Fire Department | 4 | 0 to 30 days | \$35,500,000 |
| Portage | Ambulance replacement | Kent State University seeks funds to provide a comprehensive evaluation of the community-based treatment activities associated with newly diagnosed Community Based Treatment Centers (CBTCs). The Ohio Department of Youth Services (ODYS) created the CBTCs after research showed that moderate risk youth placed in ODYS institutions received a substantially higher rate than similar youth placed in the community. The goals of the CBTCs are to provide a secure, intensive, high fidelity, evidence-based treatment program for moderate risk youth; to reduce the length of stay and recidivism for these youth; and to provide high quality, intensive therapeutic services that improve behavior and family reunification/stability. The evaluation will include the collection and analysis of data related to functioning levels during community treatment, recidivism rates throughout and treatment and cost-benefit data associated with transitioning youth from ODYS institutions to the CBTCs. Jobs created with these funds will include a project director, site coordinators, data managers, and interviewers. | Edinburg Township Fire Department | 6 | 0 to 30 days | \$110,000.000 |
| Portage | School district roof repairs/replacement | Portage Roofing, Inc. completed a roofing assessment of the condition of the school district's existing roof systems. Enclosed a summary recommendation per site. West Park - repairs - \$5,598 West Main - repairs - \$2,815 High School - repairs - \$2,850 Happen - repairs - \$11,096 Curtin - repairs - \$3,965 Brown middle School - repairs - \$49,900 Board of Education - replace - \$16,705 Total - \$93,162. | Ravenna School District | 15 | 91 to 180 days | \$93,162.000 |
| Portage | Boiler Replacement | Stevens Building Technologies, Inc. and Vadean Enterprises, Inc. did an energy analysis of the district. The boilers at the Brown Middle School were reviewed. It is a low pressure steam system with 2 boilers that are 44 years old. Repairs have been made to the system over the years. Each is rated at 1,028,000 BTU/HR output. Part of this is used to supply a steam to water heat exchanger. This unit is rated at approx. 1,600,000BTU/HR. The hot water portion of system will be replaced by installing higher efficiency heat 2 new steam boilers each w/ capacity of 2,500,000BTU/HR out put for 100% redundancy and one new hot water boiler with capacity of 1,600,000BTU/HR. This would give district new boilers for the hot water system. | Ravenna School District | 20 | 181 days or more | \$434,000.000 |
| Portage | Boiler Replacement | Stevens Building Technologies, Inc. and Vadean Enterprises, Inc. did an energy analysis of district. The boilers at WEST PARK SCHOOL, (Middleport) were reviewed. The existing hot water boilers are approximately 44 years old and have served their useful life. They have had multiple service problems including repairs to the near shut sections. They need to be replaced before they fail completely. Their output capacity is approximately 1,340,000BTU/HR. An energy conservation master plan was completed in 2008 and included projects which would save energy in all buildings on the Kent campus. This project will permit the university to meet its goal to reduce its energy consumption by 10% by 2015 and provide immediate savings within the operational budget. The preparation of the request for proposals from energy conservation companies is already underway. | Ravenna School District | 15 | 181 days or more | \$125,000.000 |
| Portage | KSU- Energy Improvements to the University Library | This project will permit the university to meet its goal to reduce its energy consumption by 10% by 2015 and provide immediate savings within the operational budget. The preparation of the request for proposals from energy conservation companies is already underway. | Kent State University | 150 | 91 to 180 days | \$10,000,000.000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Portage | KSU- Academic Building Energy Conservation Improve | An energy conservation master plan was completed in 2008 and included projects which would save energy in all buildings on the Kent campus. This project will permit the university to move forward with the energy conservation projects identified in a number of the academic buildings identified within the master plan and provide immediate savings within the operational budget. This project does not address the science facilities or the University Library which are identified separately within this request. The preparation of the request for proposals from energy conservation companies is already underway. | Kent State University | 225 | 91 to 180 days | \$15,000,000.00 |
| Portage | KSU - Campus District Chilled Water Improvements | Kent State University completed a district cooling master plan in the early 1990's and has slowly initiated projects outlined within the plan as funding availability allowed. The project would reconstruct the sewer sanitary plants completed to date and update the control and piping systems as necessary to maximize efficiency and reliability and minimize operational costs. The next extension of the district chilled water system is scheduled to begin in approximately 2 months. The design for additional extensions and interconnections could be ready for bidding within 9 months with construction beginning immediately after contracts are awarded. | Kent State University | 150 | 91 to 180 days | \$10,000,000.00 |
| Portage | KSU - Power Distribution Upgrades | Kent State University has been working on the phased replacement of the electrical distribution system for more than 10 years. This project, which began in the 1990's, will complete the replacement of the aging 4,160 volt distribution system with a 13,200 volt lagged distribution system. The upgraded system will provide a reliable, energy efficient, and expandable power distribution system for the entire campus. | Kent State University | 60 | 91 to 180 days | \$4,000,000.00 |
| Portage | KSU - Science Building Energy Conservation Improve | An energy conservation master plan was completed in 2008 and included projects which would save energy within the science facilities on campus. The science buildings, facilities with the highest density of laboratories and research equipment, also has the highest energy consumption per square foot on campus and therefore the highest potential for energy conservation. This project will permit the university to move forward quickly with the energy conservation projects identified in the master plan and provide immediate operational savings. The preparation of the request for proposals from energy conservation companies is already underway. | Kent State University | 375 | 91 to 180 days | \$27,000,000.00 |
| Preble | Lewisburg - Cumberland Street Improvements Phase 2 | Installation of 1500 linear feet of curb, 400 linear feet of storm sewers, 6 storm structures and 6000 square feet of concrete walk. The expected outcome is to get stormwater on U.S. 40 underground into the storm sewer system to reduce the health and safety hazard of flooding on the roadway. | Kramer & Associates, LLC | 15 | 0 to 30 days | \$133,000 |
| Preble | City of Eaton Traffic Signal System Upgrade | Establish improved traffic management and operations through application of upgrade traffic signal equipment, traffic signal interconnection, and use of video detection technology. The project is proposed to replace existing old (up to 18 years) equipment, establish interconnection between traffic signals, and reduce the existing maintenance and repair costs. The proposed project will also increase the capacity of existing roadways through application of improved timing capabilities, and centralized management. The City has applied for a Small City Program grant to fund a commitment dated December 6, 2008, contingent upon the availability of future program funding. Declaring State revenues and rising construction cost, coupled with the uncertain levels of future Federal funding from FHWA (I-75), may impact the availability of this commitment. Therefore the above request for funds and bid is based on the current commitment. | City of Eaton | 10 | 181 days or more | \$291,892 |
| Preble | West Hendricks Street Improvements | Installation of 3300 linear feet of curb and gutter, 12 storm inlets, and 375 cubic yards of new asphalt pavement. The expected outcome is to rehabilitate a severely deteriorated street. | Kramer & Associates, LLC | 15 | 0 to 30 days | \$75,000 |
| Preble | Hillcrest Drive Improvements Phase 2 | Installation of .4000 linear feet of curb, 8855 square feet of sidewalk, 1140 linear feet of storm sewer, 20 storm inlets, 6 curb repairs and asphalt paving. Expected outcome is to create a new sidewalk and approximately to increase the safety for school children walking or riding their bikes to school without having to use the roadway of Hillcrest Drive, which is a State Road. | City of Eaton | 15 | 0 to 30 days | \$639,760 |
| Preble | Lexington Road Rehabilitation | Construction of curb and gutter, sidewalk, storm sewer, construction of pavement and asphalt surface, striping, street lighting and markings. The project is 2,000 feet in length and consists of 800' of storm sewers, 12 catch basins, 4,200' of curb and gutter, 1,000' of sidewalk and 1,200 cubic yards of asphalt. | City of Eaton | 15 | 0 to 30 days | \$462,100 |
| Preble | Park Avenue Reconstruction | Reconstruction of 6,100 ft of road. The proposed roadway is a two-lane section with curb and gutter, sidewalks and no on-street parking. Road will be 30' back-of-curb to back-of-curb. In addition to the widened roadway, a curb lane and new sidewalks will be installed on each side of the roadway to facilitate pedestrian traffic along this route in a safer manner. Includes replacement of water main, water services, fire hydrants, sanitary sewer and the installation of new sewer piping, catch basins and manholes to improve storm drainage. This will help also give better access to a new 40-acre park with consist of soccer fields, bike/walking trails and playground area. | City of Eaton | 30 | 91 to 180 days | \$5,045,000 |
| Preble | Dist 8, PID 75897, PRE SR 732 0.00 | Plane And Pave Portions Of Sr 732 In Preble County. Also To Resurface Eaton Oxford Road, C-20, In From Of The Morning Sun Overpost. | Ohio Department of Transportation | 75.9 | 31 to 90 days | \$2,645,000 |
| Preble | Dist 8, PID 84256, PRE US 40 7.38 | Replace Small Culvert Pre-40-0740. The Existing Culvert Is An 8'x4'x4' Cast-In-Place Concrete Culvert. | Ohio Department of Transportation | 12 | 31 to 90 days | \$149,000 |
| Preble | Dist 8, PID 75897, PRE SR 732 0.00 | Plane And Pave Portions Of Sr 732 In Preble County. Also To Resurface Eaton Oxford Road, C-20, In From Of The Morning Sun Overpost. | Ohio Department of Transportation | 75.9 | 31 to 90 days | \$2,645,000 |
| Preble | Shovel & hammer ready projects | There are a few projects to work on around the Boone household, and as long as Uncle Roger is passing out money from the paychecks of future generations, I thought why not take it to the vet urban farmers, the ones we don't talk fat, of course. Oh, you may conclude there might be a couple of planned cost overruns, but you know how those damned government funded projects go. | Boone's Private Household | 2 | 0 to 30 days | \$20,000,000.00 |
| Preble | Enterprise Road Bridge Deck Replacement | The purpose of this project is to replace a structurally deficient concrete bridge deck over Twin Creek. This bridge is 347' long and 29.5' wide. | Preble County Engineer's Office | 12 | 31 to 90 days | \$400,000 |
| Preble | PCSD #2 WWTP Replacement | Replacement of a 37 year old 15,000 gallon per day steel package extended aeration wastewater treatment plant. Project includes the addition of a lift station, ultraviolet disinfection, sludge holding tank and sludge drying beds to the existing WWTP processes. DEFA issued an approved PFI March 2008, but the project was not structurally deficient steel truss bridges with new prestress concrete beam bridges. The Ketterman Road bridge has a span of 47' over Ketterman Creek and the Junction Road bridge has a span of 87' over Howland Creek. This project is currently scheduled as a first quarter 2010 project for 60% federal funding through the CEDA CTTY program. This request is to receive stimulus money for the remaining 20%. | Preble County Sewer Districts | 2 | 91 to 180 days | \$420,000 |
| Preble | Junction Road and Ketterman Road Bridge Replacemen | Replacement of structurally deficient wood deck with a corrugated steel deck and paint the steel truss structure. | Preble County Engineer's Office | 15 | 31 to 90 days | \$110,600 |
| Preble | Sonora Road Bridge Rehabilitation | Painting of the existing steel truss structure to extend the service life of this structure. | Preble County Engineer's Office | 12 | 31 to 90 days | \$95,000 |
| Preble | Paint Road Bridge Rehabilitation | Paint the existing steel truss bridge to extend the service life of the 175' long steel truss bridge. | Preble County Engineer's Office | 8 | 31 to 90 days | \$30,000 |
| Preble | Pyrrmont Road Bridge Rehabilitation | The purpose of this project is to replace a structurally deficient steel truss bridge that spans 44' with a corrugated steel bridge deck. | Preble County Engineer's Office | 8 | 31 to 90 days | \$85,000 |
| Preble | Paint Creek Road Bridge Deck Replacement | The purpose of this project is to replace a structurally deficient bridge deck that spans 44' with a corrugated steel bridge deck. | Preble County Engineer's Office | 8 | 31 to 90 days | \$40,000 |
| Preble | Winnierline Road Bridge Deck Replacement | The purpose of this project is to replace the structurally deficient wood bridge deck on this 53' Steel Beam bridge with a corrugated steel bridge deck. | Preble County Engineer's Office | 12 | 31 to 90 days | \$40,000 |
| Preble | Brower Road Bridge Deck Replacement and Painting | The purpose of this project is to replace a structurally deficient wood bridge deck and replace it with a corrugated steel deck on this 122' structure. Upon the completion of the deck replacement the high arch truss bridge will then be painted to extend the service life. | Preble County Engineer's Office | 12 | 31 to 90 days | \$75,000 |
| Preble | Eaton Lewisburg Road Widening | The purpose of this project is to rehabilitate and widen Eaton Lewisburg Road from the Eaton Corporation Limit to Wynnong Road. The existing road is 18' and will be widened to 20' to handle the increased traffic. Super-elevation will be increased in one location due to the high accident rate at this location. Raised pavement markers and roadway striping will also be included as part of this project. | Preble County Engineer's Office | 15 | 31 to 90 days | \$750,000 |
| Preble | Proces Creek Road Bridge Replacement | The purpose of this project is to replace a structurally deficient and functionally obsolete concrete arch bridge that is nearly 90 years old that spans Prince Creek. The new bridge would have approximately a 130' span and would be 29' wide from face to face of girder. New type 5 and laborer decker girders will be used on the new bridge. | Preble County Engineer's Office | 15 | 91 to 180 days | \$600,000 |
| Preble | Village of Gratis Waterline Rehabilitation | Construct 5000 linear feet of new waterline, replacing existing undersized and 50 year + waterline. Currently multiple breaks have occurred within the past 2 years. 100 service laterals will be reconstructed with new meters and air valves necessary. | Village of Gratis - Beals-Moore & Assoc. | 10 | 31 to 90 days | \$520,000 |
| Preble | RAS Pump Replacement | We need three new return activated sludge pumps at our WWTP. These pumps need to be dry pit pumps, as our designed wet pit pumps have failed one at a time. | Village of Lewisburg WWTP | 10 | 0 to 30 days | \$50,000 |
| Preble | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDI's mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise based in Central Ohio. ECDI's Individual Development Accounts (IDAs), microloans, technical assistance, and access to retail markets. As the only U.S. Small Business Administration micro-lender and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI's Microenterprise Loan Fund fills a gap in the credit markets by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDI is able to serve underserved populations, including low-income individuals, those with little or no credit, or those precluded from paying interest because of religious beliefs. | Economic and Community Development Institute | 20 | 31 to 90 days | \$150,000 |
| Preble | HOWSE OF ANGLES | HOWSE OF ANGLES IS A LIFEHELPS RESIDENTIAL TREATMENT CENTER THAT WILL SERVE THE POPULATION OF YOUTH 10-21 WITH MENTAL HEALTH AND SUBSTANCE ABUSE ISSUES. OFFERING CLIENTS GROUP, INDIVIDUAL AND FAMILY THERAPY, ALONG WITH VOCATIONAL AND ACADEMIC EDUCATION. ALLOWING THE CLIENT TO GAIN THE OPPORTUNITY TO DEVELOPE LIFEHELPS KNOWLEDGES AND EXPERIENCE. UTILIZING BEST PRACTICE FROM LICENSED PROFESSIONALS WHO CAN BE REFERRED FROM CHILDREN SERVICES, PROBATION DEPARTMENTS, JUVENILE COURT OR OTHER INTERESTED STAKEHOLDERS OF PRODUCTIVE CITIZENS WHO WOULD LIVE A GREATER LIFESTYLE. | HR ASSOCIATES | 10 | 91 to 180 days | \$35,000 |
| Preble | Camden Elementary School - Unit Ventilators | Project is to replace 18 Unit Ventilators at Camden Elementary School. Expected Outcome is to increase heating efficiency and create an improved learning atmosphere for children in these classrooms. | Preble Shawnee Local School District | 4 | 31 to 90 days | \$62,000 |
| Preble | RAS Pump Replacement | We need to replace our wet pit RAS pumps with pumps designed for dry pit performance. Out of our three RAS pumps, we are currently only able to operate one. | Village of Lewisburg WWTP | 20 | 0 to 30 days | \$50,000 |
| Preble | Preble County Roadway Winter Safety Initiative | The purpose of this request is to purchase approximately 6000 tons of salt to treat the county and township roads during inclement weather to allow the citizens of Preble County to more safely each their places of employment. | Preble County Engineer | 20 | 0 to 30 days | \$500,000 |
| Preble | Lewisburg 2009 Infrastructure Investment Program | Installation of 26,000 linear feet of curb, 73,000 square feet of sidewalk and 841,000 square feet (approx. 12,000 tons) of asphalt for roadway re-paving. The expected outcome would be a significant improvement of the municipality's transportation infrastructure (sidewalk and pedestrian). Development, build and validation of next generation machine incorporating advanced machining and inspection technologies to improve tolerance capability, repeatability. | Village of Lewisburg | 200 | 0 to 30 days | \$1,500,000 |
| Preble | CM Machine | Need to complete an affordable energy efficient model home. I am up 75% finished. Some of the features are: Timber Frame ICF's, SIP's, Radiant floor heat, Heat Recovery Ventilator, energy star windows & doors. Much of my material to date has been Antique salvage, reclaimed reclaimed material. I want to install an Energy star rated tankless water heater & appliances possibly an outside wood boiler & solar panels. I have done almost all the work myself so far to save money but with the economy in its current state I don't know when I can finish without some financial assistance. | Bullen Ultrasonics | 10 | 0 to 30 days | \$250,000 |
| Preble | Wildwind model home | SIP's, Radiant floor heat, Heat Recovery Ventilator, energy star windows & doors. Much of my material to date has been Antique salvage, reclaimed reclaimed material. I want to install an Energy star rated tankless water heater & appliances possibly an outside wood boiler & solar panels. I have done almost all the work myself so far to save money but with the economy in its current state I don't know when I can finish without some financial assistance. | Wildwind Interiors | 2 | 0 to 30 days | \$100,000 |
| Preble | Municipal Paving | Track cost, pavement planning, and surface courses necessary for the repair and maintenance of approximately 33,000 square yards of road surface on Lexington Road and State Lewisburg Road in the City of Eaton. | City of Eaton | 15 | 0 to 30 days | \$270,000 |
| Preble | Park Trailhead/Restroom Facilities Project | This project will consist of constructing a new 1,200 square foot Trailhead/Restroom Facility with handicap access in the Village of Lewisburg Community Park. This project would include construction of a 2' x 47' x 1,000 square foot building, approximately 405 feet of sanitary sewer, and 200 feet of water service laterals. This project is designed to connect with the Park Trails Project that was completed in 2003 and will further enhance the park recreational trails with much needed restroom facilities. The building will also serve as a community and information center, available year-round. | Village of Lewisburg | 35 | 0 to 30 days | \$200,000 |
| Preble | Horn Street Improvements Phase II | This project will continue the Village's infrastructure improvements project in an area determined to be 64% low to moderate income level. Outcomes include removing and replacing specified pavement, curbs, and sidewalks to include 50 CY of excavation, 668 SY subgrade separation 50 CY pavement repair, 27 CY curbs, 24 CY sidewalks/signage, 152 CY asphalt, 34 SY concrete apron, 2425 SF curb curb, 465 LF of 18" Village In-kind services will include curb, drive and walk removal, pavement removal, backfill, seed and mulch, and traffic control. | Village of Lewisburg | 40 | 0 to 30 days | \$90,000 |
| Preble | Preble Shawnee Local School District - roofs | Project Description: Re-roofing of Preble Shawnee High School and Camden Elementary School. The roofs on these buildings are approximately 25 years old and have exceeded their projected life. Expected Outcomes: Re-roofing will reduce or stop damage to these buildings caused by inclement weather as well as provide a safer place for our children. | Preble Shawnee Local School District | 12 | 91 to 180 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Preble | Gratis EMS new station project | Our current EMS facility is a pole barn, built in the 1980's. It has limited space, no training facilities, and is not energy efficient. Our area is greatly impacted with high unemployment rates and this would create and retain many jobs. It would also allow us to conserve electricity and propose and allow us to possibly save money having personnel to staff a station, instead of depending on a volunteer staff. It would allow us to apply to become a state approved training facility. This would greatly improve our patient care ability for the citizens of Preble County. We currently share a building with our fire department, and both departments have outgrown this facility. | Gratis EMS | 20 | 31 to 90 days | \$300,000 |
| Preble | the unemployed selfemployed | Having small construction companies to do some of the construction work or offering unemployment benefits to the self employed who may not have the unemployment insurance and have lost their work due to the economy. | unemployed selfemployed | 1000 | 31 to 90 days | \$1,000,000 |
| Preble | weaqtherization homeowner | New doors to, New water and plumbing system and bathroom, 100' base of sewer and lines, Window weatherization and solar panels for and skylight(s) Roofing for energy saving costs. | Marshall and Associates | 4 | 0 to 30 days | \$10,000 |
| Preble | PVM Wastewater Treatment Facility | Pleasant Vineyard Ministries is a not-for-profit organization located in southern Ohio that each year provides thousands of youth and adults the opportunity to get away from the bustle of daily life and experience life-changing programs in an atmosphere of love and acceptance. It is an environment where positive relationships are developed, personal challenges are discovered, friendships are rekindled, and memorable experiences are made through fun recreational activities, outdoor education, summer camps programs, and family camping. | Pleasant Vineyard Ministries | 5 | 31 to 90 days | \$200,000 |
| Preble | Rehab Woodland/Cricket camps | MVC Services 11 000+ young people from 5 countries. The camps are some of the oldest in the country and are in Dyer need or rehab. This money would go to replace many tools (some have actual holes), Fixing/Draining Improvements, Clean power lines (utility issues), complete phase 2 of the Water System (lots need safe drinking water), fix shubbers that were destroyed in the wind storm, Repair the Lake House, Fix XC, Judge (Kitchen floor is rotten and drive is falling through the floor). | Miami Valley Council, Boy Scouts of America | 10 | 0 to 30 days | \$875,000 |
| Preble | MVC Woodland Trail Swimming Pool Rehab | Thank you for your consideration. The current swimming pool leaks which waste water, uses more chemicals. This project would rehab the pool, create new bath houses (currently, adult Male/Female have to share a bathroom house). | Miami Valley Council, Boy Scouts of America | 5 | 0 to 30 days | \$125,000 |
| Preble | 17" Ultrapure Defect Free Silicon Wafers | LI Communications and the Air Force have an established need for defect free 17" silicon wafers that are extremely pure and have zero boron content. EMTEC proposes forming a collaborative development team to produce these wafers at Bullen Semiconductors Inc. in Sardin, Ohio. This is the world's largest supplier of high purity silicon components and assemblies serving a broad base of high technology customers. We have extensive expertise in materials, machining and manufacturing including the development of State-of-the-art equipment. Bullen has the best working relationship in Ohio with the opportunity to attain a competitive advantage in this technology. The goal of this collaborative development team is to design and develop ultrapure quartz crucibles. New methods and processes for growing and materials handling will require innovative ideas and input from both Maxwell and Silvester Technologies Inc. located in Troy, Ohio. EMTEC would coordinate this collaborative project including adding additional partners and institutions within Ohio as required. | EMTEC | 104 | 0 to 30 days | \$3,000,000 |
| Preble | Advanced Silicon Characterization for PV Panel Man | Bullen Semiconductor Corporation proposes to establish a competitive advantage for the production of silicon 100% purity. Until recently the single crystal PV industry has relied using symbolically using un-used electronic grade silicon. Solar silicon production has since ramped up with a resulting increase in availability and need for a competitive advantage. Analogous, solar grade silicon has a wide range of electrical characteristics that remain to be optimized. Even low defect crystal silicon has a wide variation in electrical characteristics. The goal of this collaborative project is to design and develop ultrapure quartz crucibles. New methods and processes for growing and materials handling will require innovative ideas and input from both Maxwell and Silvester Technologies Inc. located in Troy, Ohio. EMTEC would coordinate this collaborative project including adding additional partners and institutions within Ohio that specialize in photovoltaic to assist with materials selection and measurement of performance as required. | EMTEC | 28 | 0 to 30 days | \$1,000,000 |
| Preble | New Paris Emergency Electric Upgrade | Installation of a fused disconnect panel and all related apparatuses to feed the newly established Village Office Building from an existing residential switch at the adjacent wastewater facility. This will allow use of the emergency generator system of the wastewater system to power the municipal building for use as an emergency shelter during power outages or weather emergencies. | Key Engineering Group, Inc. | 0 | 0 to 30 days | \$4,785 |
| Preble | Harrison Township Shields & Swisher Mill Road Impr | Installation of 175 LF of storm sewer and related apparatuses at the intersection of U.S. Route 40 and Shields Road to eliminate flash flooding along with clearing of ditch to drainage outlet. Removal of stumps and reshape ditch along Swisher's Mill Road. | Key Engineering Group, Inc. | 0 | 0 to 30 days | \$423,000 |
| Preble | Preble County Sheriff Detective Program | This project would return (3) investigators back to full-time duty with the Sheriff's Office. Due to budget reductions in Preble County, deputies assigned as detectives were forced to be re-assigned to patrol duties. Investigators were responsible for the investigation of all violent felony crimes, rape, sex offenses, where children were the victims, homicides, residential burglaries, white collar crimes, etc. The loss of these deputies has dealt a serious blow to our ability to effectively follow-up on these crimes, and has virtually eliminated our ability to conduct drug investigations. Drug crimes are a known revenue decimator in the number of property crimes in Preble County. Preble County continues to battle the manufacturing, use and selling of methamphetamine. | Preble County Sheriff's Office | 3 | 0 to 30 days | \$150,000 |
| Preble | Preble County Communications Infrastructure Update | This project would allow for the expansion of updated public safety communications in the southwest portion of Preble County. This area consists of rural areas where communication needs improvement. This project would purchase a radio tower/maintenance site for paging and communication with fire and EMS, as well as law enforcement officers in the field. | Preble County Sheriff's Office | 0 | 0 to 30 days | \$150,000 |
| Preble | Patrol Vehicle Replacement Program | This project would allow for the replacement of aging cruisers used by patrol deputies. Budget reductions have eliminated the possibility of replacing cruisers. These cruisers are a crucial element in providing effective law enforcement to a county of 42,000+. | Preble County Sheriff's Office | 0 | 0 to 30 days | \$100,000 |
| Preble | Home improvement project | Remove and replace old insulation in house, remove old painting and replace with new drywall paint new drywall, remove seven existing base board heaters and replace with new energy saving furnaces, replace two doors with new energy efficient doors. After completion of project house will be more energy efficient which will result in less energy usage. | Pro-ficcent services | 4 | 0 to 30 days | \$9,000 |
| Preble | Huston Woods and Paint Creek State Parks Marina I | Replacement of floating docks and anchorage, fuel dispensing and sanitary pumpout upgrades, restroom modifications and miscellaneous site improvements at two state park marina operations. Total number of boat slips to be replaced is 238. Existing facilities are outdated, well beyond their original design life and not sized for current boat sizes/configurations. Design work for the project has been completed and bidding on construction will start by the end of March with construction to start in September of 2008 and be completed by March of 2009. Both marinas provide significant revenue for their respective parks. | Ohio Department of Natural Resources | 45 | 31 to 90 days | \$2,500,000 |
| Preble | Environmental use of farm land | Over and operate a family owned 1700 acre farm and board 10 horses each year plus maintain pastures and hay. Currently all of the manure is dumped in a huge pile when it can be spread to nourish the land. I have taken the Ohio Manure Management course and received my certificate. I will do over now to make these resources. I am asking for a front end loader and a manure spreader to do this wisely. This may create a part time job and keep those working with it. | Martin Cattle Farm | 1 | 0 to 30 days | \$14,500 |
| Preble | Home Investment Projects | gutters, downspouts and soffits for whole house, drain line away from house, crawl space dry out, block foundation, roof repair, and septic tank treatment, all due to water run off problems. | Self | 20 | 0 to 30 days | \$10,000 |
| Preble | McGarvey Construction, Inc | Our company currently does insurance restoration work in 9 counties and 101 cities in Ohio. We go for as East as Xenia/Fairborn, West to Eaton, South to Columbus / Dayton, and North to Bellefontaine/Maplewood. We've been incorporated since 2004, insured & bonded, and doing construction since the early 80's. Currently we work out of our garage to cut cost of overhead. We employ only 2 people. We are wanting to expand our workforce by at least 10 people. We'd like to purchase and renovate houses in these counties. We've already identified a few houses, that are in extremely deplorable conditions. We have the ability to rebuild entire houses, and have been noted by one of our large insurance companies, that we do superior work as well as completed in a timely manner. We would like to be able to have a building of 60,000 sq. ft. holding legs, but something to store the vehicles and the extra materials for jobs. We've not been able to grow with employees, not more of site, due to the cost effectiveness. We are asking for this stimulus funding to guide us into growth and in return make the counties we work out of a better place to live. Thank you very much for this opportunity. | McGarvey Construction, Inc | 6 | 31 to 90 days | \$500,000 |
| Preble | Pave our parking lot | Blacktop or concrete our parking lot and driveways to our firehouse. | West Elkton Fire Department | 25 | 0 to 30 days | \$80,000 |
| Preble | 100 KW Variable Input Electrical Generator Commerc | Hogen Associates and Silvester Technologies Inc. located in Troy, Ohio have developed a 90KW variable input speed electrical generator. There is a ready market and much demand in the wind industry to scale this capability to 100KW or larger. EMTEC proposes a product development project that would design and produce a 100KW generator and their safety use Silvester's turnkey production development capability to design an assembly and manufacturing capability to be located in Ohio. EMTEC would coordinate this collaborative project including adding additional partners and institutions within Ohio as required. | EMTEC | 88 | 0 to 30 days | \$2,000,000 |
| Preble | Preble Shawnee Schools - geothermal heating and ai | Project Description: Preble Shawnee Local School District would replace its present heating system with a geothermal combination heating and air-conditioning system at all 3 district building sites. Expected Outcomes: A combination heating and air-conditioning system based on geothermal energy would provide the following benefits: (1) Would allow the district to become more "green" with the use of a renewed energy source to heat and cool all buildings. (2) Would allow the district to be more energy efficient. With Ohio moving to increasing the length of the school year and more of our buildings' classrooms being air-conditioned, we have limited options concerning having school during hot summer days. (3) Would allow the district to use the funds that are would save from heating our buildings for use in academic projects. (4) Would allow the district to build 40 single family homes to be sold on a lot to own basis to families who have their jobs and/or their homes due to economic hard times. These homes will be available to those in need and will not be lost due to financial crisis. A portion of the money made from the homes will be used to build more homes. This will allow those families who are engaging to get back on their feet and not have the stress of being homeless. This will put many people to work as well. | Preble Shawnee Local School District | 25 | 91 to 180 days | \$2,144,000 |
| Preble | Housing for distressed families | increase company vehicle fleet by 5 vehicles, purchase needed equipment. Hire needed employees | Jacor Services | 75 | 30 to 90 days | \$3,000,000 |
| Preble | Economic Development | increase company vehicle fleet by 5 vehicles, purchase needed equipment. Hire needed employees | Jacor Services | 10 | 0 to 30 days | \$60,000 |
| Preble | Preble Entertainment | Create and operate a business providing entertainment in a small community. Using Young adults to help run this venture will allow them to work and earn valuable life lessons while abiding Preble County in the local community. Providing a safe area where our youth can stay out of trouble and off the streets. The business will also be used as a training center to learn computer skills and microsoft products. The business is easier Tag and Big Screen Movies along with providing computer training to help improve skills. | Sean Maggard | 15 | 91 to 180 days | \$200,000 |
| Preble | Data Processing | Create and maintain all data required by law for the Preble County Auditor in house. Create and maintain computer software to display data. Create ways for public to access data easier, faster, and more effectively. Maintain software and data in a timely fashion. | Preble County Auditor | 5 | 31 to 90 days | \$200,000 |
| Preble | County Appraisal Project | Hire and train citizens to be appraisers and computer clerks in Preble County. To create and maintain an appraisal team for Preble County. Allowing Preble County to be more efficient and create jobs and to cut costs in doing the appraisals in house. | Preble County Auditor | 6 | 91 to 180 days | \$600,000 |
| Preble | GPS Accustion | Purchase GPS equipment and obtain training to use GPS equipment. Becoming self sufficient in GPS would save Preble County money in hiring out projects that could be done in house if we had the necessary equipment. This cost savings would then in turn be passed along to the property owner through reduced flood insurance rates, cheaper surveying / engineering costs, and possibly a reduction in property taxes in some areas. | Preble County Geographic Information Systems | 2 | 31 to 90 days | \$100,000 |
| Preble | GIS Monumentation | Increase GIS monumentation in Preble County with x,y & z coordinates to an accuracy above State Standards. To allow survey and engineer fees to decrease from improved accuracy more monumentation. Allow cities and government to spend less on legal fees and surveying/engineering costs. | Preble County Geographic Information Systems | 5 | 91 to 180 days | \$250,000 |
| Preble | Hometown | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Preble | Brown Transport Inc, a Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------------|----------------|--------------------|---------------------------|
| Preble | Preble County Park District Office Energy Efficient | Provide energy efficient upgrades to Preble County Park District's office including geothermal compression heating and air using vertical loops for 2 levels of the building with 400 efficient backup furnace, foam insulation blown on insulation for 300 linear feet, and blown-in cellulose wall (2.15 in. R) and ceiling insulation (12.05 in. R) ceiling repairs consisting of replacing deteriorated siding (20%), and caulking all siding, window (15) and door (7) repairs, and new storm windows (28) and storm doors (7) as none currently exist on the building. The geothermal unit uses compression hot water and does not discharge back into the environment. The project goal is to improve energy efficiency of the office by reducing total energy use by more than 75% and to provide an educational example for the county for improving energy efficiency. | Preble County Park District | 10 | 0 to 30 days | \$52,536 |
| Preble | Preble County Amphitheater Project | The Preble County Historical Society was organized in 1971 as a non-profit corporation to promote a knowledge of Preble County and Ohio history. As outlined in a Master Plan for Future Development, the Society encompasses a trail of activities, nature, agriculture, and history. As an educational and passive recreational setting, the 255-acre Historical Center site is invaluable. The natural skirting hillsides at the site is an picturesque location for an outdoor amphitheater. Concerts, plays, storytelling, educational programs, are just a few activities that will take place. The project will not only serve citizens of Preble County, but will provide cultural and educational benefits to all citizens of Southwest Ohio. The amphitheater will add an outdoor education program, and demonstrate area. Provide seating for 350+ persons, tenting for up to 1000 lawn seats. Provide additional event/rooftop space at the top of the amphitheater. Provide paved handicap parking. Include electrical support for audio visual. Currently, the project is in the final design phase. We are actively seeking funding sources to obtain other matching funds. | Preble County Historical Society | 4 | 31 to 90 days | \$300,000 |
| Preble | Preble Victim Assistance Improvement | Our office needs a new copier, fax machine and computer work stations. Since the cut in VOCA funds, our budget is not allowing for the purchase of these materials. The expected outcome of obtaining these items would ensure that daily office duties are performed accurately. Also, funds for various trainings for employees would ensure the program's advocates are properly educated on growing trends in victim services. Project funds could also be used to fix the structural problems we have with our office building, including a rotted out floor in the bathroom. The county owned car we have to transport victims to and from hospitals, court, etc. is in extremely bad condition. It has over 130,000 miles on it and has been known to stall. A new car would ensure clients and employees safety during transports. | Preble County Victim Witness | 2 | 0 to 30 days | \$50,000 |
| Preble | Energy Audits & Energy Efficiency Education for K- | This project will allow non-profit Ohio Energy Project to assist Ohio K-12 school districts improve the energy efficiency of facilities & educate students & staff about energy & energy efficiency, including: Analysis of each building's current energy usage & costs; Identification of low-cost/no-cost energy conservation opportunities; Identification of projects for significant energy conservation savings; Assistance to district's science/math curriculum directors & teachers on educational energy efficiency & sustainability programs for classrooms, staff & community; Implementation of district-wide sustainable energy efficiency programs, including energy education & energy efficiency programs for students, staff & community; Assist districts with potential funding avenues to implement energy efficient projects, including federal, state & utility grants & rebates, such as HR 264 and Ohio Advanced Energy program. Expected outcome: to provide districts with information necessary to operate facilities more efficiently, & more importantly, educate students, staff & community to understand how to conserve energy & make our environment a cleaner, safer place to live today & in the future. | Ohio Energy Project | 5 | 31 to 90 days | \$125,000 |
| Preble | Energy Efficiency Education Program for K-12 School | This project will allow non-profit Ohio Energy Project to assist Ohio K-12 school districts improve the energy efficiency of facilities & educate students & staff about energy & energy efficiency, including: Analysis of each building's current energy usage & costs; Identification of low-cost/no-cost energy conservation opportunities; Identification of projects for significant energy conservation savings; Assistance to district's science/math curriculum directors & teachers on educational energy efficiency & sustainability programs for classrooms, staff & community; Implementation of district-wide sustainable energy efficiency programs, including energy education & energy efficiency programs for students, staff & community; Assist districts with potential funding avenues to implement energy efficient projects, including federal, state & utility grants & rebates, such as HR 264 and Ohio Advanced Energy program. Expected outcome: to provide districts with information necessary to operate facilities more efficiently, & more importantly, educate students, staff & community to understand how to conserve energy & make our environment a cleaner, safer place to live today & in the future. | Ohio Energy Project | 5 | 31 to 90 days | \$125,000 |
| Putnam | Orchard Drive Storm Sewer | The Orchard Drive storm sewer project replaces 2400' of 18" old storm sewer with a new 18" high polypropylene storm sewer broken down numerous times over the last two years causing blockage in the pipe which then causes flooding at the 18" floor corner retirement village and in two residential areas. | Village of Leipsic | 50 | 0 to 30 days | \$200,000 |
| Putnam | Prospect Street Reconstruction | The project requires the removal of 2100' of 8" old street pavement, repairing the storm underground, and installing 4200' of new curbing along with the new pavement. | Village of Leipsic | 10 | 0 to 30 days | \$515,000 |
| Putnam | Bennett Park Restroom Concession Stand | Bennett Park is a new athletic facility being constructed by the Village of Leipsic for the Leipsic Local School District. The next phase of the project is to construct a restroom, concession stand and press box for the new baseball fields constructed last year. | Village of Leipsic | 2 | 0 to 30 days | \$75,000 |
| Putnam | Main Street Storm Sewer Phase 4 | Replace undersized aged storm sewers in the community & to alleviate flooding | Village of Cloverdale | 5 | 31 to 90 days | \$105,000 |
| Putnam | Birch, Grove, Tyler, Taft, & N. High Waterline Rep | Sanitary sewer separation of a combined sewer system as mandated by DEPA to eliminate pollutant discharges to the receiving water | Village of Columbus Grove | 10 | 91 to 180 days | \$510,000 |
| Putnam | Sanitary Sewer Separation Phase 1 | Sanitary sewer separation of a combined sewer system as mandated by DEPA to eliminate pollutant discharges to the receiving water | Village of Columbus Grove | 15 | 91 to 180 days | \$1,800,000 |
| Putnam | Elevated Water Storage Tank & Rice Street Waterline | Additional water capacity is required to meet minimum DEPA requirements for water storage | Village of Continental | 15 | 91 to 180 days | \$1,100,000 |
| Putnam | Sanitary Sewer Wastewater Treatment Plant & Force | Replacement of an antiquated trickling filter WWTP with a lagoon treatment system | Village of Continental | 15 | 91 to 180 days | \$3,000,000 |
| Putnam | Family Time Campground | Family unused campground with 19000 sq ft building with full gymnasium to purchase, upgrade and return camping business back to Putnam county. Funds to be used for sewer line separation to EPA regulations. Building removed to meet handicap guidelines and fire/smoke alarm inspection. Site location for campsite regulations through civil engineer blueprints, licensing, and firing. Expected outcome is to have charitable events within the hall, a full service convenience store, events for the public that are affordable and conveniently located and the return of the Ohio National Bicentennial festival. Two years of planning by two families has created a certain following which has allowed us to start seeking investors and have obtained legal counsel for some of our business. Unfortunately our timing met with a negative economy and we are not able to obtain financing. This is a downtown revitalization project that calls for the construction of 66500' of sidewalk and curbs along with curb ramps in the village's downtown area. The project also includes the installation of new street signs and street lighting. | Family Time Campground | 15 | 0 to 30 days | \$900,000 |
| Putnam | Downtown Improvement | The construction of \$500K of lead track needed to connect the three railroads located in Leipsic to present and future industries. When completed, this lead track will provide each railroad access to the Village's industrial area over a common rail line owned by the Village. The project is to replace 12.5 miles of Putnam County Road 5 from SR45 south to SR12 creating a direct access for industries located in the western part of the county to Interstate 75. | Village of Leipsic | 150 | 31 to 90 days | \$1,485,730 |
| Putnam | Industrial Lead Track | | Village of Leipsic | 200 | 0 to 30 days | \$750,000 |
| Putnam | Road 5 Improvement | | Village of Leipsic | 645 | 31 to 90 days | \$4,880,000 |
| Putnam | Storm Sewer 1 | Stormwater for sewer district #1 | Putnam County | 15 | 181 days or more | \$2,651,883 |
| Putnam | Township Road 1-23 Berm | Township Road 1-23 berm stabilization along the Blanchard River | Perry Township | 10 | 91 to 180 days | \$240,000 |
| Putnam | Sanitary Sewer Separation Phase 1 | Sanitary sewer separation of a combined sewer system | Village of Columbus Grove | 25 | 91 to 180 days | \$1,800,000 |
| Putnam | Waterline Replacement | Replace aged undersized waterlines | Village of Columbus Grove | 15 | 91 to 180 days | \$510,000 |
| Putnam | Main Street Storm Sewer Separation System | Replace undersized aged storm sewers in the community and to alleviate flooding | Village Of Cloverdale | 8 | 0 to 30 days | \$105,000 |
| Putnam | Refurbish Water Tower | Sandblast exterior & paint interior & exterior | Village of Columbus Grove | 3 | 91 to 180 days | \$25,000 |
| Putnam | Sanitary Sewer Separation Phase 2 | Sanitary sewer separation of a combined sewer system | Village of Columbus Grove | 25 | 91 to 180 days | \$2,013,065 |
| Putnam | Water Treatment Part 500 MG Reservoir | This project will increase raw water storage capacity from the current 27 to 58 days of usable water storage to the EPA recommended >60 days storage through the design and construction of a 500 MG raw water reservoir. The reservoir is critical for storage during extended periods of drought and flooding, which Ottawa experiences yearly, and will allow for much needed maintenance on the existing 116 MG reservoir, which was constructed in 1971. The project will allow for water treatment plant expansion and reorganization to meet current and future needs, will allow for economic development within communities presently zoned and those zoned in the near future, will create new jobs within the fields of engineering, construction, electrical, manufacturing, public works, parks, etc., will allow for future development within Ottawa, will provide the community with additional recreational areas, will benefit the local school system and cross-county athletic departments and will lower sewer rates. | Village of Ottawa--Water Department | 200 | 0 to 30 days | \$9,000,000 |
| Putnam | Sanitary Sewer Separation Phase 3 | Sanitary sewer separation of a combined sewer system | Village of Columbus Grove | 25 | 91 to 180 days | \$2,092,504 |
| Putnam | Sanitary Sewer Separation Phase 4 | Sanitary sewer separation of a combined sewer system | Village of Columbus Grove | 25 | 91 to 180 days | \$2,146,319 |
| Putnam | WWTP Improvements | Improvements in regard to the effective & efficient operation of the plant | Village of Columbus Grove | 25 | 91 to 180 days | \$2,765,100 |
| Putnam | Wastewater Treatment Plant | Replacement of antiquated trickling filter wastewater treatment plant with a lagoon treatment system | Village of Continental | 25 | 181 days or more | \$2,290,455 |
| Putnam | Elevated Water Storage Tank & Rice St. Waterline E | Additional water capacity required to meet minimum EPA requirements for water storage | Village of Continental | 18 | 181 days or more | \$1,100,000 |
| Putnam | Ottawa Water Treatment Plant Improvements | The project involves the design and construction necessary to update aging treatment equipment and infrastructure, increase potable water production, and add treatment processes to reduce the development of disinfection by-products in potable communities, some of which are in violation of EPA regulations. The improvements include building expansion, updated carbon feeding system, construction of brine sedimentation tanks and relocation of the brine cove, modification to existing effluent clarifiers, aeration improvements to the existing aeration tank system, including new containment, separated gases and maintenance shop, update of conventional filter control/swallow reservoir, cathodic protection and the increase of plant capacity and reduction of disinfection by-products through membrane filtration. The project will benefit current and future customers, provide for current and future community growth and economic development, reorganization, create new jobs within engineering, construction, electrical, manufacturing, public works, automation, etc., and will help to reduce water rates. | Village of Ottawa--Water Department | 200 | 0 to 30 days | \$8,000,000 |
| Putnam | Church Street Reconstruction | Replacement of sewer lines and pavement, curb and gutter, storm sewer and water main | Village of Ottoville | 30 | 91 to 180 days | \$700,000 |
| Putnam | Storm Water #1 | Stormwater for Sewer District | Village of Ottoville | 15 | 181 days or more | \$2,651,883 |
| Putnam | Village-Wide Water System & Water Treatment Plant | New water treatment plant & distribution system | Village of Ft. Jennings | 25 | 91 to 180 days | \$4,550,000 |
| Putnam | Ft. Jennings Street Improvements | Resurfacing streets disrupted by storm sewer improvements constructed in 2009 | Village of Ft. Jennings | 5 | 91 to 180 days | \$155,000 |
| Putnam | Road C Improvements | Reconstruction of Road C with drainage improvements from Road 16 to Road 16-C. Roadway length .05 miles and width 16' feet | Palmer Township | 2 | 91 to 180 days | \$100,000 |
| Putnam | Ottawa Regionalization | The regionalization involves the design and construction of 38.8 miles of regional potable waterlines, including approximately 80,720 feet of 16" PVC waterlines, 248,880 feet of 12" PVC waterlines, one 1,100 MG elevated water tower, valves, fittings, hydrants, and engineering and technical services. The project will further regionalize the water system within Putnam County to provide quality drinking water to rural communities within the surrounding area. These communities are generally of low to moderate income that have been plagued with inadequate water supply and poor water quality, for which the cost of new treatment facilities or transmission mains would be too costly. These regionalization waterlines will provide many surrounding rural communities an opportunity to obtain quality water at an affordable rate. This regionalization will allow for a large amount of economic development these smaller communities they could not have supervised previously, the ability for these communities to adhere to the Safe Drinking Water Act, and the development of 300 new jobs initially and potentially 700+ more jobs with economic development. | Village of Ottawa--Water Department | 1000 | 0 to 30 days | \$29,000,000 |
| Putnam | Dairy Farm Road | Reconstruction of Road 22 from Road to Road R, 1 mile 2" excavation asphalt base and 2" split | Perry Township | 10 | 91 to 180 days | \$189,424 |
| Putnam | Dist 1, PID 25163, PUT SR 189/190/694 3.11/3.43/4. | 2 lane resurfacing | Ohio Department of Transportation | 30.1 | 31 to 90 days | \$1,049,400 |
| Putnam | Dist 1, PID 25163, PUT SR 189/190/694 3.11/3.43/4. | 2 lane resurfacing | Ohio Department of Transportation | 30.1 | 31 to 90 days | \$1,049,400 |
| Putnam | Village of Pandora - Sanitary Sewer Separation | Rural phase of sewer separation project mandated by DEPA findings and orders. The design has been completed plus permits have been obtained. | Village of Pandora | 20 | 31 to 90 days | \$1,400,000 |
| Putnam | Village of Pandora - New 200,000 elevated water st | Need for the construction of a 200,000 gallon elevated water storage tank and improvements to the distribution system. The design is completed plus permits have been obtained. | Village of Pandora | 15 | 31 to 90 days | \$1,600,000 |
| Putnam | Village of Pandora - Safe Routes to School Project | Construct safe route to school pathway with security so students can walk and ride bikes in a safe manner and it will also make a walking path for residents. Currently because of the unsafe pedestrian and bicycle access all students are bussed to the campus. This project will override thousands of dollars in fuel related transportation costs while improving the health and fitness for the children of the community. Preliminary design and cost estimates have been completed. | Village of Pandora | 20 | 91 to 180 days | \$750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Putnam | Sheriff Saving Energy | The Putnam Co. Sheriff's Office current building was built in 2000. The current Sheriff has been interested in making the facility energy efficient, only to find that grants for public facilities to become energy efficient are non-existent. From the quotes that we have gotten this could save the county \$20,000 a year paying for the entire system within 5 years. | Putnam County Sheriff's Office | 0 | 31 to 90 days | \$100,000 |
| Putnam | Securing Putnam County Courts | Bring in an additional Deputy Sheriff to help make the county courthouse more secure and safe for the public. | Putnam County Sheriff's Office | 1 | 31 to 90 days | \$120,000 |
| Putnam | Wireless Broadband Internet Service | This wireless Broadband Internet Service project would target potential customers who are underserved and/or served rural areas who do not have access to Broadband Internet services. The wireless Broadband Internet Service project would target potential customers who are underserved and/or served rural areas who do not have access to Broadband Internet services. The funds would also be used to provide customer premise radio equipment in order to provide the radio line between the customer and the base station radios. The service would be provided in the 700 MHz unlicensed wireless radio band. NKTelco Inc. already owns the 700 MHz license for Putnam and surrounding counties. Unlike other radio services, the 700 frequency is not strictly "line of sight". Thus, NKTelco Inc. will be able to provide service to customers who were previously not able to obtain Broadband service. Approximately 50 to 75 new customers could initially be provided service with the \$85,000 stimulus funds. A total buildout, serving in excess of 200 customers would be possible at an estimated \$225,000 in total project cost estimates. | NKTelco Inc. | 2 | 91 to 180 days | \$85,000 |
| Putnam | Continental 2007 Waterline Replacement | Installation of approximately 1125 linear feet of waterline and necessary appurtenances to replace existing undersized and deteriorating lines. The project will provide better service and protection to residents. | Village of Continental | 5 | 0 to 30 days | \$140,000 |
| Putnam | Rimer and Rd V FTH project | Build Fiber to the Home in two rural areas outside of our service territory where residents have requested that we provide service to them. This would provide access to high quality broadband to approximately 75 underserved homes. | Fort Jennings Telephone Company | 1 | 0 to 30 days | \$189,000 |
| Putnam | Cloverdale Main Street Storm Sewer Replacement Phase 1 | Installation of approximately 1200 linear feet of new storm sewer line and necessary appurtenances to replace an existing deteriorated system in the area of Main Street. This would be the final phase of a multi-phase project the Village has been competing for several years. | Village of Cloverdale | 0 | 91 to 180 days | \$105,000 |
| Putnam | Broad Street Reconstruction | Reconstruct storm sewer, pavement and curbs for 1,850 feet of roadway located on the main highway that passes through the village. | Village of Kalida | 100 | 31 to 90 days | \$750,000 |
| Putnam | Columbus Grove Birch, Gove, Taylor, Taft and North | Installation of approximately 5300 linear feet of waterline and necessary appurtenances to replace existing undersized and badly deteriorated waterline in the area. The project will provide better service and protection to residents. This area is a Small Business Independent Telephone Company in NW Ohio with 645 access lines. Currently we provide DSL at a speed of 768k down and 256k up across an old copper network to our customers. For McClure to increase our speeds and provide better service we applied for and were granted a \$5.2 million BLS Broadband loan to build a Fiber Optic network throughout our service territory. In December 2008 we started the process of building our network. When completed this will be the very best network you can build. We will be able to offer unlimited broadband speeds to all our customers even in the rural areas where there is no coverage of service through our satellite. We will get speeds up to 120k down and 6m up or higher. In these hard economic times we are losing access lines weekly. We are also seeing our revenue decline due to some of the big carriers not paying their CARS bills. Loss of revenue greatly affects the way we are able to operate. If the McClure Telephone Company receives this grant money it would help financially secure our company and allow us to provide top of the line broadband service at an affordable price. | Village of Columbus Grove | 10 | 91 to 180 days | \$400,000 |
| Putnam | Broadband FTTH Project for McClure Telephone Company | 20,000 square ft. building to house Municipal offices, Public Library branch, Police Dept and Fire Department Station with training facilities and EMS. This building would serve the entire community as well as the surrounding Fire Department service areas. | The McClure Telephone Company | 10 | 181 days or more | \$3,500,000 |
| Putnam | Municipal Office / Fire Department Building | 20,000 square ft. building to house Municipal offices, Public Library branch, Police Dept and Fire Department Station with training facilities and EMS. This building would serve the entire community as well as the surrounding Fire Department service areas. | Village of Kalida | 57 | 181 days or more | \$4,000,000 |
| Putnam | East Street Water Main Reconstruction | Remove and replace old water main, hydrants & valves. There are many clamps in line due to numerous repairs. | Village of Ottoville | 10 | 91 to 180 days | \$200,000 |
| Putnam | Columbus Grove Sanitary Sewer Separation Phase 1 | Installation of approximately 17,000 linear feet of new sewer line and necessary appurtenances to complete Phase 1 of a sanitary sewer separation project mandated by DEPA to eliminate pollutant discharges into the receiving stream. | Village of Columbus Grove | 20 | 91 to 180 days | \$1,930,000 |
| Putnam | Ralph and Dry Street Storm Sewer Improvements | Replace deteriorated storm sewer in an area of persistent street and basement flooding for residential area. Project includes installation of approximately 3,227 feet of new storm sewer pipe. | Village of Kalida | 25 | 31 to 90 days | \$330,000 |
| Putnam | Continental Elevated Water Tower & Rice Street Water | Construction of a new elevated water tower to meet storage requirements for Village as set forth by DEPA. Installation of approximately 3500 linear feet of new waterline to provide service to future development. | Village of Continental | 10 | 0 to 30 days | \$1,100,000 |
| Putnam | Ottoville Village Bendale Addition Storm Sewer Project | To eliminate flooding in this project. | Village of Ottoville | 5 | 91 to 180 days | \$200,000 |
| Putnam | Continental Wastewater Treatment System | Construction of a new wastewater treatment facility as mandated by DEPA to eliminate pollutant discharges into the receiving stream. The new facility will replace the Village's existing antiquated trickling filter WWTP. | Village of Continental | 10 | 91 to 180 days | \$3,000,000 |
| Putnam | North Street and Third Street Waterline Replacement | Replace and splice deteriorated waterlines to meet existing lines serving Local High School Facility and residential subdivision areas. Project includes approximately 1,425 feet of waterline replacement. | Village of Kalida | 20 | 31 to 90 days | \$110,000 |
| Putnam | Industrial Park & Community Park Waterline & Sanit | Install and upgrade water and sanitary sewer lines to serve the Village Industrial Park and a new Community Park which will benefit the entire community. Project includes 3,075 feet of waterline and 2,200 feet of sanitary sewer installation. | Village of Kalida | 50 | 91 to 180 days | \$400,000 |
| Putnam | Fort Jennings Water Distribution and Treatment System | Construction of a new water treatment and distribution system through the Village of Fort Jennings. Project would provide water service to approximately 432 households. | Village of Fort Jennings | 30 | 181 days or more | \$4,550,000 |
| Putnam | Fort Jennings Street Improvements | Resurfacing areas disrupted by storm sewer improvements constructed in 2008. | Village of Fort Jennings | 5 | 91 to 180 days | \$155,000 |
| Putnam | Continental 2007 Waterline Replacement (revision) | Installation of approximately 1125 linear feet of waterline and necessary appurtenances to replace existing undersized and deteriorating lines. The project will provide better service and protection to residents. | Village of Continental | 5 | 0 to 30 days | \$140,000 |
| Putnam | Continental Wastewater Treatment System (revision) | Construction of a new wastewater treatment facility as mandated by DEPA to eliminate pollutant discharges into the receiving stream. The new facility will replace the Village's existing antiquated trickling filter WWTP. | Village of Continental | 10 | 91 to 180 days | \$3,000,000 |
| Putnam | Continental Elevated Water Tower & Rice Street Water | Construction of a new elevated water tower to meet storage requirements for the Village as set forth by DEPA. Installation of approximately 3500 linear feet of new waterline to provide service to future development. | Village of Continental | 10 | 0 to 30 days | \$1,100,000 |
| Putnam | New Officer Employment | The Village of Kalida currently has one full time Chief of Police with two part time officers. This request is to obtain funds to hire another Police Officer for the Village of Kalida. Due to the status of the economy and other ongoing capital improvements in the Village, the Village is hesitant to hire another full time officer for the prevention and patrol. This request for stimulus money would add another full time officer without having to pay a two year period until the economy is in better standing. At that time, the Village Council will be approached with the plan to take over the funding of a new officer job costs by the Village. Even though this creation of only one new job is crucial to what the stimulus package will create elsewhere, this would make our Police Department comparable to other departments in Putnam County in regards to staffing. Kalida is a small community populated by about 1000 people per year with three manufacturing plants, an assisted living facility, and multiple small businesses with only one full time police officer that is requested to work days, having evenings and weekends without law enforcement coverage. We would be able to retain a staff of 7 full employees that generate \$1,672,500.70 in annual payroll. Which would allow some of our suppliers to remain open generating positive cash flows into their own respective Ohio cities, counties and etc. | Village of Kalida Police Department | 1 | 0 to 30 days | \$60,000 |
| Putnam | Company Recovery | We have previously attempted to receive a standard asset based loan but the nation's past and current credit crunch eliminated any chance. | Pandora Manufacturing LLC | 74 | 0 to 30 days | \$3,000,000 |
| Putnam | Farmers Market | Establish a Farmers Market in Leipsic Ohio. Funds will be used to hire a part time Market manager, fees, licenses, advertising, bi-lingual nutrition information. Leipsic Ohio is a low income village located in northwest Ohio. Our population is primarily caucasian and hispanic. Over 80% of our public school children qualify for free reduced price lunch. A Farmers Market will be a win-win for this community. Our residents will have a way to earn extra income by selling locally grown and produced fruits, vegetables and "outback" foods. Our residents will have an opportunity to purchase reasonably priced nutritious and healthy products. The Farmers Market will provide the members and add to the economic stimulus of the area. The Farmers Market will employ one part time Market manager whose job will be to cover sale market activities, recruit vendors, conduct educational seminars, ensure compliance with legal issues and serve as a liaison between the Chamber of Commerce and local produce vendors. | Leipsic Area Chamber of Commerce | 1 | 31 to 90 days | \$10,000 |
| Putnam | Putnam County Fairgrounds Commercial Renovation | Fairgrounds consists of 25 ac. Renovation project (in phases as funds are raised) is related to bring to commercial grade to house public events and stimulate economic growth in Northeast Ohio area with depressed economy due to flooding. Goal: Hire Grounds Manager to coordinate trails shows, public entertainment, craft markets, banquets, etc. Phase 1: Front Gate to historical appearance (1850); upgrade veterans area; project including (BSP); Phase 2: Renovation 2 main bldgs to commercial grade for banquets & event situations (est \$200K); Phase 3: Grounds renovation for larger concerts & public events. (BSP) Foundation is 501(c)3 with private donations. Grounds houses 4H, FFA and local County Fair. Many safety needs such as power grid and public sanitation facilities also addressed in these renovations. (B) Engineering & bidding as we have rural agricultural area. Handicapping, by take care of ourselves type of people. Clean's term "red's backbone" type folks. Putnam County would be no tax masses are being used. Utilizing local contractors, will provide more jobs for construction work. Contractors donate materials & labor as they can, volunteers raise funds. | Putnam County Grounds Improvement Foundation, Inc. | 1 | 31 to 90 days | \$100,000 |
| Putnam | Cruiser Technology updates | Digital recorders, laptops and software for laptops for 14 county cruisers | Putnam County Sheriff's Office | 0 | 91 to 180 days | \$100,000 |
| Putnam | Countywide SRO | Shutdown Officer to work in all Putnam County Schools | Putnam County Sheriff's Office | 1 | 0 to 30 days | \$120,000 |
| Putnam | Full Time Officer Needed | The Village of Kalida is in need of an additional full time officer. At the current time the Chief is the only full time Officer | Kalida Police Dept. | 1 | 31 to 90 days | \$90,000 |
| Putnam | New Police Cruiser with recorder/camera | The Kalida Police Dept. is in desperate need of a new cruiser along with a new digital recorder. At the current time the old dated camera does not work and the cruiser used has many miles and is constantly being repaired. | Kalida Police Dept. | 0 | 31 to 90 days | \$40,000 |
| Putnam | Leipsic Golden Triangle Switch | Install new switch to connect with new track at Leipsic Ohio to connect with the new industrial development on site at this location. This will allow the business that is going to be using the site to have access to several different circuits. The access will make them more competitive resulting in being more profitable. | Indiana and Ohio Railroad | 6 | 31 to 90 days | \$120,000 |
| Putnam | Putnam County District Library Rebuilding Project | The Putnam County District Library was destroyed by a flood in August of 2007. Since that time, the county library has operated out of a small 2,000 sq. ft. rental space at the Educational Service Center. All library activities are divided into two small rooms. In order to properly serve the citizens of Putnam County with a functioning library, a new structure has to be built. The former library was 23,000 sq. ft. and we would like to build a similar structure. However, we do not have the funding necessary to build a library of this size. This construction project will provide jobs for construction workers in addition to keeping current library personnel employed. Additionally, the residents of Putnam County would truly have a proper main library. | Putnam County District Library | 30 | 91 to 180 days | \$1,500,000 |
| Putnam | Fort Jennings Street Improvements (Revisions to pr | Resurfacing areas disrupted by storm sewer improvements constructed in 2008. | Village of Fort Jennings | 5 | 91 to 180 days | \$155,000 |
| Putnam | Continental Street Widening Improvements | 2148 linear feet of five streets within the Village that have a deficient width along with areas of structural pavement failure. The streets are in need of widening, structural repair of the pavement and subgrade, and resurfacing. | Village of Continental | 15 | 31 to 90 days | \$216,500 |
| Putnam | Continental Street Widening Improvements | 2148 linear feet of five streets within the Village that have a deficient width along with areas of structural pavement failure. The streets are in need of widening, structural repair of the pavement and subgrade, and resurfacing. | Village of Continental | 15 | 31 to 90 days | \$216,500 |
| Putnam | Community Thrift Store Food Pantry | To mission of the Thrift Store is to provide assistance through emergency funding, school supplies and food to residents of Putnam County who are in need of assistance. Food purchases for the agency's food pantry program in the past few years were: 2007 - \$174,338; 2007 - \$15,844.00; 2008 - \$26,156.00. Client records are kept from year to year and evaluated regarding the percent of new clients versus those who are no longer needing this service. In 2007 there were 177 first time food pantry users. In 2008 there 233 new clients for food. Of those remaining food in 2007, 156 families did not need assistance this year. These numbers show that the program serves those in need and can also assist a family get financially stronger. | United Way of Putnam County | 2 | 0 to 30 days | \$15,000 |
| Putnam | New Water Facilities Project | The Village of Fort Jennings is investigating the potential for constructing public water facilities to serve the Village. Plogemeyer completed a study evaluating several regional options as well as separate treatment facilities for the Village. Regional alternatives included service from Delphos, Ottawa, Kalida and Ottoville. Fort Jennings constructed a central sewer facility in 1998. Residents currently are served by private wells of water quality is very hard and poses a burden on individual households. The Village has met with Delphos several times but the City will only give them commercial rates for purchasing water. The Village is pursuing building their own treatment plant but project financing is unaffordable. With stimulus funds, the Village may be able to proceed if financing is available. bid is \$44,664. Sewer lines are a flat fee of \$36.00 per month. | Village of Fort Jennings | 15 | 181 days or more | \$4,540,900 |
| Putnam | Continental 2007 Waterline Replacement (revision) | Installation of approximately 1125 linear feet of waterline and necessary appurtenances to replace existing undersized and deteriorating lines. The project will provide better service and protection to residents. | Village of Continental | 5 | 0 to 30 days | \$140,000 |
| Putnam | Continental Wastewater Treatment System (revision) | Construction of a new wastewater treatment facility as mandated by DEPA to eliminate pollutant discharges into the receiving stream. The new facility will replace the Village's existing antiquated trickling filter WWTP. | Village of Continental | 10 | 91 to 180 days | \$3,000,000 |
| Putnam | Continental Elevated Water Tower & Rice Street Water | Construction of a new elevated water tower to meet storage requirements for the Village as set forth by DEPA. Installation of approximately 3500 linear feet of new waterline to provide service to future development. | Village of Continental | 10 | 0 to 30 days | \$1,100,000 |
| Putnam | Continental Street Widening Improvements (revision) | 2148 linear feet of five streets within the Village that have a deficient width along with areas of structural pavement failure. The streets are in need of widening, structural repair of the pavement and subgrade, and resurfacing. | Village of Continental | 15 | 31 to 90 days | \$216,500 |
| Putnam | Continental Street Widening Improvements (revision) | 2148 linear feet of five streets within the Village that have a deficient width along with areas of structural pavement failure. The streets are in need of widening, structural repair of the pavement and subgrade, and resurfacing. | Village of Continental | 15 | 31 to 90 days | \$216,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Putnam | Imagination Library program | The Imagination Library is an in-house program of the United Way of Putnam County. The program is designed to engage children in reading and learning before they ever enter a classroom. By providing free hardcover books to all preschool children between the ages of 0-5, the program promotes literacy and future academic success. Today nearly 1,100 children are currently registered in the Putnam County Imagination Library program. An estimated 500 additional children are eligible. All registered preschool children receive one free book every month until their fifth birthday. Books are mailed directly to the child's home in their name. All books are carefully selected by a panel of child development specialists, librarians, and publishers. Books are selected based on age-appropriateness and development of positive themes such as promotion of self-esteem and confidence, respect for diversity and appreciation of art. | United Way of Putnam County | 1 | 0 to 30 days | \$20,000 |
| Putnam | 2009 Inflow and Infiltration Improvements Project | This project will reduce and remove clean water connections currently running into the distribution system of the Village of Ottawa. Smoke and gas leaks will be performed by Village employees to pinpoint the problem locations to better facilitate the necessary repairs. Once clean water connections are determined, the needed repairs to the infrastructure will take place to eliminate the potential cross-contamination. | Village of Ottawa | 6 | 0 to 30 days | \$150,000 |
| Putnam | 2009 Sanitary Sewer Improvements Project | The 2009 Sanitary Sewer Improvements Project will replace aging sanitary lines within the Village of Ottawa. It will greatly reduce inflow into the sanitary system by replacing the numerous heavily sealing collection system. This project will further reduce the number of breakdowns of saturated lines which causes interruption in service to residents and businesses. Several pump stations would be replaced with taller more efficient lift stations to protect the Village employees when repairs are required. | Village of Ottawa | 50 | 31 to 90 days | \$2,000,000 |
| Putnam | 2009 Waterline Rehabilitation Project | The 2009 Waterline Rehabilitation Project will replace deteriorated waterlines that are part of an aging infrastructure system to better supply the residents of the Village with clean and safe drinking water. It will further prevent contamination in service due to breaks and repairs to the fragile pipe. | Village of Ottawa | 50 | 0 to 30 days | \$1,100,000 |
| Putnam | 2009 Storm Water Improvements Project | The 2009 Storm Water Improvements Project will include repairs to aging infrastructure as well as improvements to drainage areas across the Village of Ottawa. The retention and diversion of storm water to further prevent flooding in low lying areas will be addressed. Repair to the Road Shoulder catch basins will improve safety for all traveling within the Village of Ottawa. | Village of Ottawa | 50 | 31 to 90 days | \$1,200,000 |
| Putnam | 2009 Street Resurfacing Project | The Village of Ottawa Street Resurfacing Program has been active for many years. Each year there are areas and/or streets that are unable to be resurfaced due to lack of funding. This project would allow the Village to further improve the streets and maintain safety for Village residents and those traveling through the Village. | Village of Ottawa | 15 | 31 to 90 days | \$750,000 |
| Putnam | Ultraviolet Disinfection System Repairs | The repairs to the disinfection system at the Wastewater Treatment Plant are necessary due to the August 2007 flood. This project will rebuild the disinfection system to prevent the use and construction of a chlorination/dechlorination facility and to bring the plant back to the original design criteria. This project will preserve the safety and well-being of Village of Ottawa residents as well as mitigate future damage from occurring. | Village of Ottawa | 20 | 0 to 30 days | \$350,000 |
| Putnam | Main Lift Station Rehabilitation Project | Replacement of the pump station due to damage created by the flood of August 2007. Currently functioning with an underequipped lift station that is unable to handle high flow situations has the potential to cause sewer backups and health hazards for Village residents. The receiving stream could also be affected due to overflows in the system caused by high flow situations which would negatively impact the environment. The undersizing of the temporary lift station greatly diminishes the Village's opportunity for economic development due to limited flow potential of the pump station. | Village of Ottawa | 59 | 0 to 30 days | \$1,017,853 |
| Putnam | South Oak Street Sanitary Sewer Improvements Proj | The 10' sanitary sewer line backs up typically at the way to South Oak Street. The existing over siphons are unable to pump the sewage. The sewer overflows into South Oak Street, South Walnut and Blanchard Streets as well as into the home's basement system. This situation is detrimental to the health and well being of the approximately 114 homes on 22 South Oak Street. This is a concern for the environment. The proposed project, to include a pump station and 6" sanitary force main, would eliminate the sewer backup and allow the sewer to be pumped away quicker and alleviate the back up of the sewer on South Oak Street and the neighboring areas. | Village of Ottawa | 100 | 31 to 90 days | \$320,925 |
| Putnam | Rail spur Project | This project will construct a rail spur to service an existing industry within the Village of Ottawa's growing economy. The rail spur will enhance opportunities for this industry and retain jobs. | Village of Ottawa | 175 | 31 to 90 days | \$900,000 |
| Putnam | Putnam Parkway Street Infrastructure Project | Industry safety improvements for 44 existing and land designated for development. A 10' sanitary sewer (grades 4'-6') will be located on this property as well as a new County wide library. | Village of Ottawa | 40 | 0 to 30 days | \$873,560 |
| Putnam | Kalida Park Development | Construction of a new village park and recreational area adjacent to multiple residential subdivisions. The park will include walking paths, athletic fields, parking lot, educational areas, aquatic center, theater building, playground area, and landscaping. We expect the new park to provide recreational opportunities to all residents throughout Putnam County. | Village Of Kalida | 30 | 0 to 30 days | \$1,250,000 |
| Putnam | Kalida Volunteer Fire & EMA New Facility | The new facility is designed to encompass 13,700 sq. ft. The need for the facility involves: inadequate space for the vehicles, non-existent meeting, training or fitness facility area and a significant problem with public safety, specifically youth. Our current facility being currently commandeered is part of a facility that involves the city administration, the police department, city council meeting area, and the local library. All share a single meeting room of modest size. The library is immediately next to our vehicle area with an adjoining door. Children and other youth often suddenly speed themselves into this area, particularly when they want to see what is happening with all the noise. Also the vehicles, which are being parked into the library area putting the public at risk. We are unable to house a number of our vehicles or support equipment due to undersized facilities. There is only one set of restrooms serving the entire facility which makes it impossible for firefighters to clean off the hazardous materials that they accumulate as a structure fire. When meetings are in session the single restrooms are not accessible from the fire site. | Kalida Volunteer Fire Department & EMS | 25 | 31 to 90 days | \$1,284,000 |
| Putnam | Bird Ditch Erosion Control | This project involves selective bank stabilization and erosion protection along 2,000 feet of the Bird Ditch as well as the removal of soil deposits in the river due to past soil erosion. This will protect residential property and a historic Putnam Township cemetery from falling into the channel. Trees and rocks will be placed along the banks to protect the channel banks against further erosion. Native grasses and trees will be planted in the work areas to hold soil in place and provide benefits to wildlife. Obstructions in the channel, such as log jams and woody debris will be removed. Habitat areas for aquatic life will be created in the channel. | Putnam Soil and Water Conservation District | 7 | 0 to 30 days | \$100,000 |
| Putnam | Water Pollution Control - Mercury | Demercurizer bed replacement has been identified as a source of mercury in treated wastewater which is discharged to the Village of Putnam's Publicly Owned Treatment Works. Recent reverse osmosis equipment to make demineralized water for process supply. Replacement of demineralizer beds with reverse osmosis technology will eliminate an identified source of mercury in treated wastewater discharged to the Village of Putnam's current reverse osmosis unit. | PRO-TEC Coating Company | 4 | 91 to 180 days | \$175,000,000 |
| Putnam | Runway Widening & Lighting | Relocate existing runway lighting and navigational aids. This project will bring the airport into compliance with FAA standards for runway width and improve the safety and utility of the airport. | Putnam County Airport Authority | 10 | 91 to 180 days | \$550,000 |
| Putnam | Cloverdale Sanitary Sewer General Plan | The Village of Cloverdale has been issued ODEPA Findings and Orders requiring the completion of a Comprehensive General Plan by December 2009 to address water pollution issues resulting from failing on-site septic systems into an unnamed tributary to the Auglaize River. | Village of Cloverdale | 0 | 0 to 30 days | \$4,200 |
| Putnam | Dupont Sanitary Sewer System General Plan | The Village of Dupont received ODEPA Findings and Orders requiring the completion of a Comprehensive General Plan by December 2009 to address water pollution issues resulting from failing on-site septic systems into an unnamed tributary to the Auglaize River. | Village of Dupont | 0 | 0 to 30 days | \$4,200 |
| Putnam | Parking Lot | Install blacktop parking lot and drainage. Our building is used by many individuals and other non-profit groups in the surrounding area. Our parking lot is stone and we often get comments from folks that they really like using our building however they have difficulty getting other citizens with wheelers and wheel chairs into our building because of the stone parking lot. We would like to improve this by blacktoping our parking lot however we just don't have the funds to do this. By doing this it would make the building much more easily accessible and therefore usable by many more especially in the winter months when snow and ice makes the existing parking for more of a obstacle. | Continental Conservation Club | 10 | 0 to 30 days | \$35,000 |
| Putnam | Wind Turbine and Bus Garage Pandora-Gilboa Local 5 | Project would consist of installing a wind turbine of a height between 70 and 100 meters to create our own power and eliminate our annual electric bill of around \$120,000.00. Project would also consist of building an on-site bus garage and storage building which would be more energy efficient than the current off site building and would eliminate wasted miles and fuel of storing and retrieving the buses every school day and for every after school event. | Pandora-Gilboa Local School District | 4 | 0 to 30 days | \$2,000,000 |
| Putnam | Putnam County Water Systems | Public school districts are forced to be some of the highest taxing entities of local areas and this project will have a direct effect in maximizing tax payer dollars and ensuring a lesser burden on the tax payers of this community in the future. | Putnam County Commissioners | 1720 | 181 days or more | \$36,848,000 |
| Putnam | County-wide Sewer Systems | This project involves the design and construction necessary to provide a 1,136.55 mile sewer linking the entire county. | Putnam County Commissioners | 1720 | 181 days or more | \$96,000,000 |
| Putnam | New Sewer System - Road 11-J | This project involves the design and construction necessary to install a New Sewer System for Road 11-J. Approximately two miles, 10560 feet of new sewer. | Putnam County Commissioners | 60 | 91 to 180 days | \$8,000,000 |
| Putnam | New Sanitary System - East 224 | Project involves the design and construction necessary to upgrade aging sewer system. We serve 149 households in addition to six businesses. | Putnam County Commissioners | 280 | 91 to 180 days | \$2,000,000 |
| Putnam | Continental SR 613 Storm Sewer Improvements | Installation of approximately 500 feet of storm sewer in three different locations to alleviate flooding in the Village along SR 613 east and west of the Village and including three boings under SR 613 to achieve a positive outlet for the storm water. Miscellaneous catch basins and manholes will be installed on the new storm sewer line. | Village of Continental | 5 | 31 to 90 days | \$70,000 |
| Putnam | Continental Lakeland/Benton Sanitary Sewer Improve | These two areas have been identified as having the highest rate of inflow and infiltration into the sanitary sewer system which is affecting the amount of water the Village must treat at the wastewater treatment plant. The Village is under findings and orders to eliminate I/I in that system. These areas have been investigated and the video shows a large number of pipe and joint cracking which is allowing the high infiltration of water into the sanitary sewer. There is approximately 2700 linear feet of sewer that has to be fixed or replaced along with complete replacement of residential laterals in the street right-of-way and new manhole structures. | Village of Continental | 10 | 31 to 90 days | \$365,125 |
| Putnam | Heat Recovery for Heating Process Water | The Continuous Galvanizing Line #2 furnace system operates to provide heat required to anneal uncoiled sheet steel for the automotive industry. The annealing process requires a significant amount of heat that does not fully get transferred to the product, and as a result is exhausted to the atmosphere via a stack. There are two natural gas fired boilers that are used to heat circulating water which provides energy to several process heat exchangers. The project is to install an economizer to capture heat being exhausted through the stack and use it to heat process water for the heat exchangers. Implementation of this project is expected to save \$2,000,000 MCF of natural gas per year. | PRO-TEC Coating Company | 8 | 181 days or more | \$200,000 |
| Putnam | Lagoon discharge and Backwash Waste Water Relocati | An effort to improve the water quality within the Blanchard River and the Owsa 116 MLD Logpond Reservoir, the filter backwash waste water will be relocated from where it presently returns to the reservoir to containment and slow discharge into the sanitary sewer, and the spent timeagoon discharge will be relocated from being discharged presently into the Blanchard River to slow discharge into the sanitary sewer. This project will eliminate the return of water with high turbidity, E.coli, and copper/nickel levels back into the Blanchard River and will eliminate the discharge of high pH water into the Blanchard River. This project will also prevent the accidental release of spent lime into the Blanchard River if flood events should ever occur at the existing discharge. The project involves the construction of containment for up to 100,000 gallons of wasted backwash water, new piping abandonment of old piping, a pump station with two pumps, force main, and necessary piping. The planning and design has been completed. The project is ready to bid and begin construction. Replacement of hot water boiler to upgrade from 65% efficiency to 95 to 98% efficiency. | Village of Ottawa | 50 | 0 to 30 days | \$79,020 |
| Putnam | Boiler Replacement | | Continental Community Library, Inc. | 2 | 91 to 180 days | \$4,000 |
| Putnam | Sidewalk Project | 318 feet of concrete sidewalks for safe access to library by students and adults. There are no sidewalks and patrons have to walk on the road. | Continental Community Library, Inc. | 4 | 31 to 90 days | \$12,000 |
| Putnam | I would like compare,study the fuel efficiency of | Inspect fuel savings but I need to study it to see how many hours of operation will meet the cost of modern tractor. | kohls farms | 2 | 91 to 180 days | \$98,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Putnam | SmartFarm | <p>Establish a Wired/Wireless Network Architecture for implementing a SmartHome solution throughout a family farm operation.</p> <p>The SmartHome is a proven application for conserving energy within a home by being able to monitor areas of unnecessary power consumption and turn-off power to such areas from a centralized control panel.</p> <p>This approach has significant merit on a family farm operation especially during winter months when lights are left on in our buildings. By establishing a SmartFarm the family could monitor their power consumption, set timers to be more efficient in their use of energy and provide a central point of control for shutting down power to unnecessary devices at the end of the workday.</p> <p>An additional benefit to such a network would be for Farm Security Monitoring purposes.</p> <p>Establish a Collaborative Consortium between Ohio Farmers in Paulding, Putnam and Van Wert Counties with Paulding/Putnam Electric Co-ops as well as between Farmers in Mercer, Adams and Allen Counties with Midwest Electrical Cooperatives to repair and install Solar panels on Barn roofs facing North-South as well as on vacated storage silos. It has been proven that solar panels installed on such barn roofs can make farm homes and operation energy independent, as well as generating enough excess energy that can be placed back on the grid.</p> <p>The purpose of the consortium would be to establish a win-win relationship between these regional co-operatives and the farmers who are members/customers in these cooperatives.</p> <p>We believe we have an innovative grid and installation design concept that theoretically will have the capability of generating energy on overcast windy and rainy days as well as those days where the sun is undisturbed.</p> <p>A significant portion of our business will be education and support to farmers in these counties on the benefits and opportunities associated with equipping their barn roofs with solar panels.</p> <p>This money will be used to look into and work at acquiring wind energy equipment as well as updating old equipment to help in the conservation of energy on the current operation. Also will be used to for the purpose of updating from electric and propane heat and cooling to the use of geo-thermal.</p> | Berelsman Family Farm | 3 | 91 to 180 days | \$150,000 |
| Putnam | Solar Barn | <p>This funding request for \$1,100,000.00 to construct a Natural Gas Pipeline distribution system capable of bringing natural gas to the Village of Putnam is being sponsored by: 1) The Development Corporation of Continental 2) All American Energy Group, LLC, a subsidiary of All American (a non-profit, member owned natural gas cooperative) and 3) The Village of Continental. This project will involve bringing natural gas service to the business and residences of the Village of Continental (Putnam County) Ohio. All American has been awarded for a Public Utility (PUD) into Columbia Gas Transmission (TGS) line # D500 located in section 14 of Washington Township, Paulding County, Ohio. From this PUD a 3.5 mile pipeline will be constructed to service the Village of Continental. This distribution system will be used to supply both residential and commercial consumers including Cooper Farms & Hatchery, who employ 300 people. The cost of this project is estimated to be \$1,100,000.00 and will be arranged for by All American.</p> <p>A continuation of the pipeline statement for a distance of 6 miles would bring natural gas service to Putnam. All American was planning to bring</p> | Berelsman Family Farm | 9 | 91 to 180 days | \$300,000 |
| Putnam | Knueven Dairy Energy Conservation | <p>We are proposing that a 4,000 foot section of a ditch be moved 20 feet away from the road where it is currently located. Presently, this ditch is causing the road to deteriorate since the ditch bank is eroding away at the base of the road. This road is heavily traveled by commuters as well as by farmers with large agricultural equipment. Since the ditch is located in such close proximity to the road, it is a traffic hazard.</p> <p>We plan to design the new ditch with proper slope and grade so that erosion will be minimized and water pooling will be eliminated. This will prevent potential accidents in the project. One benefit will be that the ditch will be moved away from road which will increase safe driving.</p> <p>Designing the new ditch with proper grade and slope will decrease the amount of pooling of water. Therefore, this will lessen the risk of multiplication of the mosquito population and decrease possible exposure to the West Nile virus. The proposed ditch relocation will be done with increasing soil erosion, thus, minimizing the amount of sediment reaching Ohio waterways.</p> | Knueven Dairy | 2 | 0 to 30 days | \$250,000 |
| Putnam | Road M Ditch | <p>This funding request for \$1,100,000.00 to construct a Natural Gas Pipeline distribution system capable of bringing natural gas to the Village of Putnam is being sponsored by: 1) The Development Corporation of Continental 2) All American Energy Group, LLC, a subsidiary of All American (a non-profit, member owned natural gas cooperative) and 3) The Village of Continental. | Putnam | Natural Gas Pipeline | <p>Elevator replacement in the Putnam County Courthouse, 245 East Main Street, Ottawa, Ohio.</p> | Development Corp of Continental, Village of Contin | 120 | 31 to 90 days | \$1,100,000 |
| Putnam | Elevator | <p>Due to severe revenue reductions, the Village of Belleville has been forced to reduce the number of full time officers on our department from 6 to 4 full time officers. This cutback will result in the village no longer being able to provide 24/7 Police protection for our village residents. This situation has been made more critical due to a severe reduction in road officers by the Richland County Sheriff's office, which we have relied on for back up. The proposed grant request will permit us to hire one additional full time officer for the next 33 months (through 12/31/11), paying salaries and wages. The village will pick up insurance, uniforms, weapons, etc. Our local economic situation returns to normal by 12/31/11, the village should again have adequate financial resources to retain this officer on a full time basis.</p> | Putnam County Commissioners | 60 | 91 to 180 days | \$1,000,000.00 |
| Richland | Community Safety Grant | <p>We need to build a Child and Adolescent Psychiatry facility to meet the increasing demands from the families of North Central Ohio.</p> <p>Currently, we serve adults and children in the same building. Increased demand for the services we provide, but especially the increasing demands on our child and adolescent services, has placed extreme demands on the limited space in our current structure. There are logistical reasons why you want to separate the treatment of children from the treatment of adults. Our current structure makes the separation of adult and child clients very difficult.</p> <p>Our Child and Adolescent staff currently provide support to area pediatricians, schools, the courts, and public agencies in the community. Most of our clients have very limited incomes and cannot easily seek treatment outside the community.</p> <p>The money will allow us to expand and improve mental health services to families in North Central Ohio. We need to retain and attract staff to our community - a new facility would help</p> | Village of Belleville, OH | 1 | 0 to 30 days | \$95,000 |
| Richland | Child and Adolescent Center | <p>SEPA Approved - Grading and Drainage Improvements at a closed solid waste facility to reduce groundwater migration & improve downstream surface water quality.</p> <p>SEPA Approved - Construction of sludge storage pad, truck scales and misc. sludge handling improvements.</p> <p>Marble and sanitary sewer lining to reduce wet weather inflow and infiltration in a separate sanitary sewer system.</p> <p>Various waterline replacement throughout the Village due to aged, undersized and deteriorated waterlines.</p> <p>Installation of 150,000 gal. elevated water storage tank on the west side of the Village. Installation of 12" diameter waterline from the new elevated tank location to SR Street.</p> <p>The retention and/or creation of 15 jobs will create safer neighborhoods within the City of Mansfield, Ohio by implementing an "Intelligence Led Policing Strategy" resulting in REDUCED Part I Crime.</p> | The Center for Individual and Family Services | 26 | 31 to 90 days | \$1,500,000 |
| Richland | Mansfield City Dump Grading/Drainage | <p>The retention and/or creation of 15 jobs will create safer neighborhoods within a 10 county region in north central Ohio. | Richland | Hill Top Storm Water Project | <p>Storm water upgrade project for the Ashland Road Hill top neighborhood south of State Route 42 (Ashland Road), south of Forest Hills Drive, west of Pennsylvania Avenue and east of Indiana Avenue. This neighborhood consists of approximately 250 homes and is served by a 60 year old storm water system that is undersized. When it rains flooding, residential and small business damage. These floods will reduce the threat of food wastes, protect and enhance the life of the counties infrastructure and enhance the quality of life of the population that depends on Richland County for living and earning income. An estimated 25 retention facilities, with a combined area of 1,000 acres will provide a county-wide management system. Each facility will be engineered to temporarily hold water surges until the storm event has passed. The retained water will discharge into the receiving channels when the receiving streams and rivers are returned to normal flow.</p> | Madison Township | 25 | 91 to 180 days | \$500,000 |

|----------------|--|---|---|----------------|--------------------|---------------------------|
| Richland | Madison Township RePaving Program | Since the no-renewal of our road paving levy in 1997 the township has only been able to pave 6 miles of road in the last 12 years. Repeated attempts to pass an additional road levy have been defeated. Our paving has been hit hard with foreclosures (65 of 650 homes in the Northwest part of the township have been lost or sold). We are currently have a property tax collection rate of below 60%. Madison Township has 17,280 residents (2003 census) which makes us the largest township in Richland County. We are the second largest local government entity in Richland County, second only to the City of Mansfield. It has been so long as 19 years since some of our secondary streets have been repaved. They are deteriorating worse and worse with each passing year and we don't have the means to correct them. In the current economic climate, it's been very difficult for us to pass any additional road levies. I based our money request on dividing the amount of federal dollars available per capita (\$80 times 14,680 people). | Madison Township | 15 | 31 to 90 days | \$1,174,000 |
| Richland | S.S.T.P. (Sanitary Septage Treatment Plant) for Se | Proposed 70.00 GPD Phosphorus Plant for septage is intended to service a 2 or 3 County area in Ohio. The construction of each facility is estimated to cost 130,000. | McHree's Technical water Services, Inc. | 139 | 181 days or more | \$3,000,000 |
| Richland | City of Shelby-West Mickey Road Sewer | This project will eliminate 13 septic tanks and would allow for future growth. The existing septic tanks are located adjacent to the City reservoir and the Blackfoot River which is used for the City's drinking water. The plans for this project are complete and have EPA approval. We could start this project very soon if successful in obtaining funding. | City of Shelby | 3 | 31 to 90 days | \$191,254 |
| Richland | City of Shelby-East Mickey Sewer | This project will eliminate 7 residential septic systems that are at the end of their useful life. The project will also eliminate 2 grinder stations for a Wendy's restaurant and a car lot. The size of the lots will not allow for the installation of a new septic system. | City of Shelby | 3 | 31 to 90 days | \$64,170 |
| Richland | City of Shelby- Manhole Rehabilitation | 4 EA Manholes 750 FT 8" Sanitary Sewer Line 112 LF Jack and Bore under Mansfield Avenue 6 EA Sanitary wyes This project will rehabilitate 50 manholes including sealing the inside of the manhole and installing an internal chimney seal and dish. This project will eliminate the infiltration into the City's sanitary sewer system. | City of Shelby | 3 | 0 to 30 days | \$80,000 |
| Richland | City of Shelby- Second St/Oak St. Sanitary Sewer R | 50 EA Manhole Rehab 50 EA Chimney Seals 50 EA Manhole Dishes This project will replace a sanitary sewer line located in an alley in between second street and Oak street. This line was installed in 1970 and is well passed its useful life. Our studies show that this line is a contributor to stormwater infiltration into the City's sewer system. | City of Shelby | 2 | 91 to 180 days | \$282,632 |
| Richland | City of Shelby-ArcelorMittal Sanitary Sewer Replac | This sanitary sewer line serves a major portion of the west side of town. Flow studies have shown that the present line is undersized and has caused backups in basements of homes. The current line is also installed in a river bed and during high water events there is infiltration. | City of Shelby | 3 | 31 to 90 days | \$131,400 |
| Richland | City of Shelby- East Main Waterline | 175 LF 18" Sanitary Sewer 750 LF 18" Directional Drill 70 LF 10" Sanitary Sewer 7 EA Sanitary Manholes 50 LF Concrete Encasement 1250 SF Sidewalk Replacement This project will replace an undersized waterline that was installed in the 1960's. This line had 12 breaks in last year alone. This project will vastly improve the city's water infrastructure by looping the north and south sides of town together and improving flow. This will also increase the flow to the hydrants. | City of Shelby | 3 | 0 to 30 days | \$203,230 |
| Richland | MedCentral College of Nursing - Capital Campaign | Construction of 35,000 sq. ft. academic/student services building for MedCentral College of Nursing (MCN). The college is currently housed in a building built in 1923 which has been maximally renovated both in space and technological capabilities. MCN is the only traditional 4 year Bachelor of Science in Nursing (BSN) program in Richland County. We are educating nurses for the future of our local area as well as for the State of Ohio. It is predicted that Ohio will see a nursing shortage of 32,000 nurses by 2020. Nursing has been declared a federal professional shortage area. Since the 2002 academic year, the number of qualified applicants turned away by Ohio nursing schools has increased by more than 440%. 294 in 2002 to 1952 in 2007. Reasons for this include lack of classroom space and lack of faculty. We need more space. The BSN degree is the launching point for nurses to become nursing educators as well as advanced practice nurses. We are currently investigating the feasibility of co-locating on the Ohio State University-Mansfield (OSU-M) Campus along with North Central State College (NCSC). The feasibility study is in collaboration with OSU-M and NCSC. | MedCentral College of Nursing | 150 | 181 days or more | \$1,000,000 |
| Richland | City of Shelby- East Smiley Water and Sewer Projec | This project will extend water and sewer to an area that was recently annexed. This project will also allow for future expansion on the west side. | City of Shelby | 3 | 91 to 180 days | \$124,562 |
| Richland | City of Shelby- Simeon Avenue Sanitary Sewer | This project will serve homes with a new sanitary sewer. The present sewer line is a 6" line that connects 4 houses and plugs constantly. | City of Shelby | 2 | 91 to 180 days | \$68,787 |
| Richland | MedCentral College of Nursing - Capital Campaign | Construction of 35,000 sq. ft. academic/student services building for MedCentral College of Nursing (MCN). | Richland | City of Shelby- New Fire Station | The existing fire station was built in 1972 and to our knowledge, is the oldest continuing operating fire station in Ohio. It is located 20 feet from the banks of the Blackfoot River. The station has been flooded many times over the years. The last one was in 2007 and there was 3 feet of water inside the building. Damage was so extensive, the police and courts had to abandon the building. Our courts and police are now staying in buildings on opposite sides of town. Prisoners are now transported to jails sometimes 35 minutes away. This has caused an enormous amount of expense in overtime. Officers have to spend that time transporting prisoners instead of answering calls. Preliminary plans have been completed and final plans can be done right after funding is approved. This project would greatly improve the safety of the citizens of Shelby and allow our courts and police to operate more efficiently. | City of Shelby | 25 | 181 days or more | \$2,551,535 |
| Richland | Bridge Replacements (Kuhn, London West & Champion | Bridge Replacements on Kuhn Road, London West Road, and Champion Roads using design / build procedures. | Richland County Engineers Office | 95 | 181 days or more | \$1,320,000 |
| Richland | Mount Zion Road Bridge Replacement | Bridge Replacement on Mount Zion Road using design / build procedures. | Richland County Engineers Office | 95 | 91 to 180 days | \$440,000 |
| Richland | City of Shelby- New Justice Center | The current Police Department and Court was built in 1892 as a furniture store. Modifications and additions were done over the years. This building is located 70 feet from the Blackfoot River. The Blackfoot has flooded many times over the years, the last one occurring in 2007. 3 feet of water entered the building. Damage was so extensive, the police and courts had to abandon the building. Our courts and police are now staying in buildings on opposite sides of town. Prisoners are now transported to jails sometimes 35 minutes away. This has caused an enormous amount of expense in overtime. Officers have to spend that time transporting prisoners instead of answering calls. Preliminary plans have been completed and final plans can be done right after funding is approved. This project would greatly improve the safety of the citizens of Shelby and allow our courts and police to operate more efficiently. | City of Shelby | 25 | 181 days or more | \$4,000,404 |
| Richland | Resurfacing of 100 miles of county highways | Resurfacing of 100 miles of county highways. | Richland County Engineers Office | 71 | 181 days or more | \$5,600,000 |
| Richland | Culvert Replacements (Geisinger, Beam, Shelby - Ga | Replacement of culverts on Geisinger Road, Beam Road, Shelby - Geisinger Road, and Herring Road in Richland County. | Richland County Engineers Office | 125 | 181 days or more | \$1,170,000 |
| Richland | Safety Improvements on Millsboro Road (2) | Removal humps on Millsboro Road at Sugar Maple Land and Westover Lane. | Richland County Engineers Office | 50 | 181 days or more | \$450,000 |
| Richland | Bridge Load Ratings for 90 Bridges | We are consulting engineering firms to calculate bridge load ratings for 90 bridges under the jurisdiction of the Richland County Engineer. | Richland County Engineers Office | 12 | 181 days or more | \$240,000 |
| Richland | Illinois Avenue (Section 1) Reconstruction | Reconstruct 0.6 mile of Illinois Avenue from north of Mansfield - Lucas Road to south of Oak Street. | Richland County Engineers Office | 125 | 181 days or more | \$2,100,000 |
| Richland | Millsboro Road Reconstruction | Reconstruct 1 mile of Millsboro Road from Leaverton - Springhill Road to Hane Road. | Richland County Engineers Office | 125 | 181 days or more | \$3,000,000 |
| Richland | Pavement Marking Project | Project is provide pavement marking on Richland County Highways in 2011. | Richland County Engineers Office | 3 | 181 days or more | \$150,000 |
| Richland | Bridge Load Ratings for 45 Bridges | We are consulting engineering firms to calculate bridge load ratings under the jurisdiction of the Richland County Engineer. | Richland County Engineers Office | 6 | 91 to 180 days | \$120,000 |
| Richland | City of Shelby- Phone and Radio System | This project will replace an aging radio and phone system for our safety forces and city personnel. Our current radio system is not in compliance with current FCC regulations and must be replaced. The proposed system will utilize the city's fiber network and incorporate the radios and phones into one seamless system. This will allow for two large towers to be taken down. | City of Shelby | 10 | 0 to 30 days | \$40,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Richland | Fire Station Replacement | Construction of two fire stations to replace our current stations which are dilapidated and do not meet current electrical or plumbing codes. We have undergone these stations, both have been modified to even fit our trucks inside. We have some equipment sitting outdoors and less than adequate facilities for our on-duty personnel. Both structures are poorly insulated and are extremely inefficient energy-wise. We intend to replace them with buildings that enhance our response capabilities with structures that promote green initiatives that can also serve other community needs. It is our intent to utilize local contractors and suppliers which we hope will have an impact on our local economy in Richland County. | Madison Township Fire Department | 20 | 91 to 180 days | \$3,000,000 |
| Richland | Crimson, George Hawk, Lexington - Ontario, Silving | Replace bridges on Crimson Road, George Hawk Road, Lexington, Ontario Road, Silving Road. The Mary McLeod Bethune Intervention & Enrichment Center from now on called MBEIE) seeks to stimulate job creation and self sufficiency among inner city residents through the development of a shared use commercial kitchen. The kitchen will be located within the Carter Neighborhood Plaza, situated just on the mile east of downtown Mansfield. As part of a five year consolidated plan for economic development, the City of Mansfield has pledged to support projects that increase the viability of small businesses that offer competitive wages. | Richland County Engineers Office | 87 | 31 to 90 days | \$1,300,000 |
| Richland | Carter Neighborhood Plaza | The Carter Plaza will support local economic development plans by providing small scale food service entrepreneurs with the infrastructure needed to grow and expand without incurring fixed costs associated with purchasing or leasing a restaurant facility. In addition to facility rental at this minority owned kitchen, users will have access to technical support to assist them with food safety training, market research and other common business services. Estimates are that the center could be up and running by early in fall of 2009 | Marh McLeod-Bethune Intervention & Enrichment Cent | 25 | 0 to 30 days | \$900,000 |
| Richland | Bridge Load Ratings for 45 Bridges | File consulting engineering firms to calculate bridge load ratings for 45 bridges under the jurisdiction of the Richland County Engineer. | Richland County Engineers Office | 6 | 31 to 90 days | \$120,000 |
| Richland | Traffic Sign Replacement Project | Replace 8600 Traffic Signs on Richland County Highways because these signs do not meet reflectivity requirements. | Richland County Engineers Office | 6 | 31 to 90 days | \$400,000 |
| Richland | Resurfacing of 50 miles of county highways | Resurfacing of 50 miles of the Richland County Highway System. | Richland County Engineers Office | 71 | 91 to 180 days | \$5,000,000 |
| Richland | Pavement Marking Project | Project is to provide pavement marking on Richland County highways. | Richland County Engineers Office | 3 | 91 to 180 days | \$150,000 |
| Richland | Culvert Replacement and Safety Improvements | Replacement of Franklin Church Road pipe culvert, realignment of Marion Avenue Road and removal of a hump on Orchard Park Road. | Richland County Engineers Office | 125 | 91 to 180 days | \$513,000 |
| Richland | Resurfacing of 50 miles of county highways | Resurfacing of 50 miles of county highways. | Richland County Engineers Office | 71 | 31 to 90 days | \$5,000,000 |
| Richland | WWTP Digester Improvements | Sludge digester mixing equipment and piping replacement. | City of Mansfield | 12 | 91 to 180 days | \$1,100,000 |
| Richland | 2009 Inflow & Infiltration Repairs Phase II | Manhole and sanitary sewer lining to reduce wet weather inflow and infiltration in a separate sanitary sewer system. | City of Mansfield | 14 | 91 to 180 days | \$500,000 |
| Richland | Lahm Airport Taxiway Rehab | Resurface taxiways in areas around hangars, finish short section of taxiway to improve access to runways for safety purposes. | City of Mansfield | 34 | 0 to 30 days | \$600,000 |
| Richland | Airport West Industrial Park - Roadway | Complete final phase of an industrial park by extending 3000' of new access road. Water and sewer have already been installed. | City of Mansfield | 683 | 0 to 30 days | \$1,663,000 |
| Richland | Airport West Industrial Park | Complete final phase of an industrial park by extending 3000' of new access road. Water and sewer have already been installed. | City of Mansfield | 683 | 0 to 30 days | \$1,663,000 |
| Richland | Dist 3, PID 85863, RIC (2) <30' buses | 2) <30' buses for the Richland County Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$60,000 |
| Richland | Dist 3, PID 85864, RIC (5) 30' heavy duty buses | 5) 30' heavy duty buses | Ohio Department of Transportation | 27 | 31 to 90 days | \$1,600,000 |
| Richland | US 42 (Lexington Ave) & Sterkel Blvd Traffic Signs | Relocation of US 42 in Mansfield at Sterkel Blvd to accommodate a southbound left turn lane and second phase of traffic signal. Relocated green waste burner also mfg. in Ohio. This helps 2 Ohio "green" mfg. co's that can grow dramatically. | City of Mansfield | 3 | 0 to 30 days | \$120,000 |
| Richland | Biodiesel / Electrical Co-Generation from waste | We will produce all of our own electric needs, and allow other "very green" electric to be sold back to the grid. This money will also allow the installation of retail biodiesel pumps in Mansfield that are already in permitting process. These could be installed, and in use, selling various blends of biodiesel within 90 days of funding. The site work, and concrete would begin within weeks of receipt of the funding. Biodiesel is almost impossible to find for the public and this will add pumps in a retail area that is across from DOT garage and will give them access to the clean fuel also. This money will provide the ability for us to call back former workers and add more permanent jobs. This project can be accomplished quickly as the main plant is existing and was built in a former closed auto dealership, utilizing a former "dark" building, thus re-using resources from the beginning of this project. Biodiesel green waste burner also mfg. in Ohio. This helps 2 Ohio "green" mfg. co's that can grow dramatically. | Arlington Energy, LLC | 23 | 0 to 30 days | \$3,000,000 |

This project can be accomplished quickly as the main plant is existing and was built in a former closed auto dealership, utilizing a former "dark" building, thus re-using resources from the beginning of this project. | Arlington Energy, LLC | 23 | 0 to 30 days | \$3,000,000 |
| Richland | I-71/SR 13/Hanley Road Traffic Improvements | Construction of a new traffic signal, replacement of an existing signal and turn lane construction at the interchange of Interstates 71 & State Route 13, inside the city limits of Mansfield. | City of Mansfield | 5 | 0 to 30 days | \$460,000 |
| Richland | Historic School Renovation Project | Purchase and install two reproduction cross and bible doors to replace damaged wooden doors. Clean and paint building exterior. Replace roof - adding sheathing and insulation. As both doors have holes worn in them, the energy savings on this part alone will be great. In addition, the building now has a standing seam roof, very near the end of its life, with no sheathing and no insulation. Replacing the roof and adding sheathing and insulation would greatly increase the efficiency of our heating and cooling systems, and would help to preserve this historic building for future generations. The Richland County Museum is housed in a neo-classical building that was originally built in 1850 as the Lexington School. It now serves as an historical museum serving the entire county, working with civic leaders and schools to preserve and teach local history. As our building is on the National Register of Historic Places, it is as much a part of the collection as the building contents. All work can be done by local companies and their employees. Replacement of a 100+ year old deteriorated concrete bridge with a new elliptical culvert. Existing structure is rated "2" and is in serious condition. Failure of this structure would shut down AK Street, affecting approx. 350 jobs. Install efficient light fixtures, digital HVAC controls, thermal pane windows and new elevator drive motors at the Mansfield Municipal Building. An estimated 25-30% energy efficiency gains anticipated. Install efficient light fixtures, digital HVAC controls, thermal pane windows and new elevator drive motors at the Mansfield Municipal Building. An estimated 25-30% energy efficiency gains anticipated. Replace existing deteriorated concrete and pavers in downtown streetscape with colored, stamped, concrete. Replace existing deteriorated curbs and sidewalks in Mansfield Central Business District. Replace existing deteriorated concrete curbs within various areas of Mansfield. Repair 326' long steel beam structure over Touhy Run and Richland B&O Bike Trail. Existing coating has faded. Remove existing lead paint from 526' long steel beam structure over Touhy Run and Richland B&O Bike Trail and apply new coating system. Existing coating has faded. Repair and replace 4000' lin. of deteriorated guardrail at various locations. Project includes approx. 50 end assemblies to improve safety. Slope distribution is required at all locations. Complete replacement of taxiway lighting system including new coneupose system. | The Richland County Museum Association | 15 | 0 to 30 days | \$60,000 |
| Richland | Bowman St Culvert Replacement at Crystal Springs | Replacement of a 100+ year old deteriorated concrete bridge with a new elliptical culvert. Existing structure is rated "2" and is in serious condition. Failure of this structure would shut down AK Street, affecting approx. 350 jobs. | City of Mansfield | 7 | 0 to 30 days | \$130,000 |
| Richland | Mansfield Municipal Building Energy Efficiency Imp | Install efficient light fixtures, digital HVAC controls, thermal pane windows and new elevator drive motors at the Mansfield Municipal Building. An estimated 25-30% energy efficiency gains anticipated. | City of Mansfield | 10 | 31 to 90 days | \$900,000 |
| Richland | Mansfield Municipal Building Energy Efficiency Imp | Install efficient light fixtures, digital HVAC controls, thermal pane windows and new elevator drive motors at the Mansfield Municipal Building. An estimated 25-30% energy efficiency gains anticipated. | City of Mansfield | 10 | 31 to 90 days | \$900,000 |
| Richland | Streetscape Concrete Renovation Phase II | Replace existing deteriorated concrete and pavers in downtown streetscape with colored, stamped, concrete. Replace existing deteriorated curbs and sidewalks in Mansfield Central Business District. | City of Mansfield | 21 | 31 to 90 days | \$1,100,000 |
| Richland | 2009 Curb Repair Improvements | Replace existing deteriorated concrete curbs within various areas of Mansfield. | City of Mansfield | 18 | 31 to 90 days | \$1,900,000 |
| Richland | Fourth St Bridge over Bike Trail Beam Painting | Repair 326' long steel beam structure over Touhy Run and Richland B&O Bike Trail. Existing coating has faded. | City of Mansfield | 18 | 31 to 90 days | \$1,628,000 |
| Richland | Fourth St Bridge over Bike Trail Beam Painting - L | Remove existing lead paint from 526' long steel beam structure over Touhy Run and Richland B&O Bike Trail and apply new coating system. Existing coating has faded. | City of Mansfield | 18 | 31 to 90 days | \$850,000 |
| Richland | 2009 Guardrail Repairs & Replacement | Repair and replace 4000' lin. of deteriorated guardrail at various locations. Project includes approx. 50 end assemblies to improve safety. Slope distribution is required at all locations. | City of Mansfield | 12 | 31 to 90 days | \$300,000 |
| Richland | Lahm Airport Taxiway Lighting Replacement | Complete replacement of taxiway lighting system including new coneupose system. | City of Mansfield | 13 | 91 to 180 days | \$2,000,000 |
| Richland | Mill Run Road Bridge Replacement | Replace the Mill Run Road Bridge using Design/Build procedure. This Wireless Broadband Internet Service offering would target potential customers who are in unserved and under served rural areas who do not have access to Broadband Internet Services. The funds would be used to purchase and install Wireless Broadband Radio equipment in the Mansfield (Richland County) area on either an offering or a low power dispenser. The funds would also be used to provide customer premise radio equipment in order to provide the radio link between the customer and the base station radios. The service would be provided in the 700 MHz licensed wireless radio band. NKTelco Inc. already owns the 700 MHz licenses for Richland and surrounding counties. Unlike other radio services, the 700 MHz frequency is not scarce. The "edge" of their NKTelco Inc. will be able to provide service to customers who were previously not able to obtain Broadband service. Approximately 50 to 75 new customers could initially be provided service with the \$85,000 stimulus funds. A total buildout, serving in excess of 300 customers would be possible utilizing the estimated \$225,000 in total project cost estimates. The Village will replace the existing 1/2 gallon wastewater treatment system with a new package treatment plant. The existing system has failed and is not salvageable. | Richland County Engineers Office | 95 | 181 days or more | \$500,000 |
| Richland | Wireless Broadband Internet Service | This Wireless Broadband Internet Service offering would target potential customers who are in unserved and under served rural areas who do not have access to Broadband Internet Services. The funds would be used to purchase and install Wireless Broadband Radio equipment in the Mansfield (Richland County) area on either an offering or a low power dispenser. |----------------|---|---|--|----------------|--------------------|---------------------------|
| Richland | Court-ordered outpatient treatment program | This request would fund up to 40 individuals court-ordered to participate in treatment for Domestic Violence Intervention (BPI) and/or Alcohol/Drug (AOD). Economic problems have limited ability of contributors to pay for their own treatment consistently. Our Financial Advisor does not receive external funding for outpatient treatment programs, at any self-pay. Many of our clients have lost jobs recently, and cannot pay for treatment. Sometimes they go to jail as a consequence. The above requested funds would reduce the need to send people to jail, and costs associated with incarceration. Use of money for AOD is would ease the burden on programs that receive public funding, and enable more people with medical or limited income to use those systems. Our program could be instrumental in reducing the burden on agencies dependent on public funding. The funds would assist people who are court-ordered into to attend consistently, which is likely to increase levels of successful program completion. Ultimately, this increases community safety, helps people make cognitive & behavioral changes and reduces the burden on jails. We would also work in conjunction with our DV Court. | The Center for Individual & Family Services/ Foren | 10 | 0 to 30 days | \$23,000 |
| Richland | Amvets Park Project | The Village of Belleville is proposing to construct a new neighborhood park on a 4 acre site already owned by the village. The Village has an application pending for a Nature Works Grant through the Ohio Dept. of Natural Resources but that grant and available local match will only cover one of the total site development plan. The proposed grant would allow us to complete the development plan by adding a new picnic shelter, picnic shelter, additional playground facilities like furnishings, etc. This project could be ready to bid by June 2009. Include innovations and improvements to energy management, power quality, energy conversion and power generation. With the President's plan to make America energy independent, ETT has been looking for ways to replicate on the wealth of knowledge within the company and its technology partners in and around Ohio. This is further motivated by the public getting behind the concepts of "Green Energy" and "Renewable Energy." | Village of Belleville, OH | 6 | 31 to 90 days | \$95,000 |
| Richland | Modular Renewable Energy Systems | With assistance from the Federal Stimulus, ETT proposes to establish a new operating division that further develops and enhances solar, wind, bio-fuel, and fuel cell technologies into cost-effective modules. These energy generating modules also require power conditioning, management and control modules in order to effectively use the resultant energy. Using a System of Systems approach, these modules can then be combined into client specific configurations according to the end use, local conditions, logistics and economics. The majority of the requested funds would be used for R&D, engineering and pilot operations. | Energy Technologies, Inc. | 300 | 0 to 30 days | \$5,000,000 |
| Richland | Window Upgrade | 16 new energy saving windows for our house | Martin household | 1 | 0 to 30 days | \$5,000 |
| Richland | Taxiway rehab | Rehab taxiway lighting circuits B and C | City of Mansfield | 9 | 31 to 90 days | \$585,000 |
| Richland | Entrepreneurship Education Program | The new Entrepreneurship Education Program at NC State will provide leadership, training, and guidance to individuals wishing to start their own business or become innovators of new products and services. This will become an open-source educational outreach center that will provide training in the major open source software solutions most needed by entrepreneurs as well as innovative, cost-conscious businesses in our service area. It will benefit college students in the Entrepreneurship Education and Scholarship program, start-up entrepreneurs that can develop the entire IT portion of their business in the lab, area businesses seeking to convert their existing systems. It would be a true "train the trainer" center for open source business philosophy as well as open source software solutions. NC State will attempt to blend entrepreneurship education into its many of its existing academic programs. Consequently, it is attempting to convert all of its classrooms into "open classrooms", replacing outdated equipment with multi-media, high-speed technology. This technology will foster better students to trainees and apply real-world, including social entrepreneurship. | North Central State College | 250 | 181 days or more | \$380,000 |
| Richland | Technical Education Center Entrance Way/Study Cent | The facility master plan for the Mansfield campus North Central State College/OSU/Mansfield calls for the extension of the main entrance taxiway around the perimeter of Kue Hall and the northern most parking lots. This extension would facilitate the removal of the corner which divides Kue Hall and the Palumbo Technical Education Center, thereby creating a central campus setting for North Central State College. In preparation for this change, this project is designed to give the main entrance for the Palumbo Technical Education Center a new look. This addition will consist of two stories including approximately 7,000 square feet of space and match the current entrance to the building. It will include ADA compliant ramps, new facility elevator service and enhanced traffic patterns availability. Additionally, strategic design will include gathering and study space with state-of-the-art research and computing equipment and tools as well as new new multi-media facilities available for college and community use. | North Central State College | 25 | 31 to 90 days | \$850,000 |
| Richland | Keheo Center Conference/Banquet Facility | North Central State College is currently pursuing the development of new educational programming including a high level banquet services and food management. This program coupled with the introduction of a student entrepreneurial emphasis will provide a unique opportunity to blend educational theory and instruction with real world application. Students involved in these programs will also be given the opportunity to manage and oversee these operations for community and college events. The Keheo Center for Advanced Learning currently has approximately 10,000 square feet of unfinished space located on the third floor which will be renovated. This project represents the second phase of the development of a high level conference center and banquet facility with the recently completed adjacent kitchen and restroom areas. The completion of this renovation will create a state-of-the-art facility that provides both the training environment for students and the conference/banquet facilities for community and business use. | North Central State College | 150 | 31 to 90 days | \$825,000 |
| Richland | Fairview Water Project | New pump house and well system eliminates ground pit. Will help keep rents down for retired tenants and low income tenants toward the permit phase. It was selected because of limited housing and the sizable acreage controlled by individual owners. Preliminary studies show the quality of the wind, based on speed and compassness, is 5 percent better than expected. They maintenance jobs will be needed once the towers are built. | Fairview Mobile Home Park | 2 | 31 to 90 days | \$25,500 |
| Richland | Wind and Solar Renewable Energy Demonstration Proj | The College's Engineering Technology program is also located in Shelby, and has already become involved in renewable energy projects as part of capstone coursework. We propose installation of a combination solar array and wind generator model (1.9 kW each) to integrate into coursework. This would provide hands-on instruction for the needed maintenance techniques and other students. Installation would have internet based monitoring including environmental parameter monitoring which would serve to bolster comparative study of the technologies. In addition, a DC to AC inverter with battery backup will serve as an educational model for renewable power conversion. Finally, a display kiosk would allow for public public interaction. | North Central State College | 38 | 91 to 180 days | \$75,000 |
| Richland | Street paving | Historic Village Street Resurfacing | Village of Lexington | 10 | 91 to 180 days | \$768,769 |
| Richland | Homeland Security | Security of all Village Facilities | Village of Lexington | 10 | 91 to 180 days | \$118,219 |
| Richland | Patriot Park | Reaking/returfing path/soilwork and seeding/ landscaping/2 shelters | Village of Lexington | 10 | 91 to 180 days | \$472,000 |
| Richland | Police Station | Construct a new 6700 SF Police Station | Village of Lexington | 20 | 91 to 180 days | \$1,286,250 |
| Richland | Village Hall Renovations | Renovation of existing Village Hall for Police Station | Village of Lexington | 10 | 91 to 180 days | \$483,750 |
| Richland | New Elevated Tank | Rebuilding old growth timbers and lumber from Ohio barns and factories to recycle into useful building materials. This will preserve our existing trees from being cut and processed into lumber. This project will create jobs by recycling new building to store material. Buy more equipment to salvage and process of the lumber. This business will be a continuation of our growing green company. Immediate employment of 3.5 people. Future employment of 10 people within 2 years. With the growing demand for green environmental products, the estimated gross company income within 2 yrs. will be 2 million dollars. Thus will produce more jobs for local, jobstarved local government while preserving Ohio history and creating a health green environment. Sincerely: Gary Smith The City of Galion is seeking project funding to demolish our oldest T-hanger (weakest most hangar at airport) and replace it with a new structure. We have a significant demand for hangar space but the existing T-hangers are almost 50 years old. They are technologically and functionally obsolete. | Village of Lexington | 10 | 91 to 180 days | \$700,000 |
| Richland | Electronic Health Records | This would allow us to convert our paper documentation to electronic records within 5 years. Our current budget and staffing only permits select electronic each year. This additional staff to help speed the process as well as needed hardware and software. The additional equipment needed includes 2 scanners, 120 signature pads, updated network wiring and connectors, network storage and related software. Additional staff needs include 1.5 IT staff and 1.5 clinical staff. This would allow us to be on target with the Federal Government's initiative for utilization of an electronic health record for each person by 2014. | The Center for Individual & Family Services | 3 | 0 to 30 days | \$268,000 |
| Richland | Oak Hill Cottage masonry restoration, storm window | Masonry restoration on 1847 brick masonry house, Oak Hill Cottage, a prewar, WHPP Gothic Revival masterpiece which is open to the public by tours. Repair five chimneys. Apply masonry sealant to house. Install 24 storm windows. Repair approx. 4000 sq ft of trim. This will complete an approximately 10 year program to bring maintenance up to date and free up funds for other non-revenue ready, longer term projects including antique restoration and parking development not included in this request. Located in a designated Economically Distressed/Targeted Area. | Richland County Historical Society | 6 | 0 to 30 days | \$30,302 |
| Richland | Reclaimit | Reclaiming old growth timbers and lumber from Ohio barns and factories to recycle into useful building materials. This will preserve our existing trees from being cut and processed into lumber. This project will create jobs by recycling new building to store material. Buy more equipment to salvage and process of the lumber. This business will be a continuation of our growing green company. Immediate employment of 3.5 people. Future employment of 10 people within 2 years. With the growing demand for green environmental products, the estimated gross company income within 2 yrs. will be 2 million dollars. Thus will produce more jobs for local, jobstarved local government while preserving Ohio history and creating a health green environment. Sincerely: Gary Smith | Ohio Valley Barns | 10 | 0 to 30 days | \$200,000 |
| Richland | City of Gallion Municipal Airport - Construction of | The City of Galion is seeking project funding to demolish our oldest T-hanger (weakest most hangar at airport) and replace it with a new structure. We have a significant demand for hangar space but the existing T-hangers are almost 50 years old. They are technologically and functionally obsolete. | City of Gallion | 25 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Richland | City of Gallon Municipal Airport - Construction of | The City of Gallon Municipal Airport Terminal Building is approximately 50 years old. It is functionally and technologically obsolete and is not aesthetically attractive as a centerpiece of an airport should be. Passenger waiting facilities need to be updated as well as pilot flight preparation space. Also, there is currently no area for a rental facility and pilots would address this. | City of Gallon | 50 | 91 to 180 days | \$4,500,000 |
| Richland | City of Gallon Municipal Airport - Runway Extension | The City of Gallon Municipal Airport currently has a 3005-foot paved runway. Due to its length, our airport is limited in the type of aircraft that can use our facility primarily general aviation planes. By extending our runway an additional 1500 feet to the east, we would be able to much better serve the area by being able to land and take off a much wider variety of aircraft. A longer runway would also be much safer for aircraft as are currently using our facility. | City of Gallon | 50 | 91 to 180 days | \$1,500,000 |
| Richland | Renovation and Additional Parking | With 20 additional parking spaces, the addition of 840 square feet of new building and the renovation of 100 square feet we will add 4 new medical exam rooms which will serve 1200 new cancer/endocrinology medical patients. We will add approximately 4 new staff members in Physicians and nursing staff. We will also create additional construction jobs for approximately 6 months. | Third Street Community Clinic | 6 | 31 to 90 days | \$300,000 |
| Richland | Ohio State Reformatory Historic Site | The Ohio State Reformatory in Mansfield has been the focus of a grassroots historic preservation effort since 1994. The progress has been outstanding, primarily due to dedicated personnel, volunteers, privately raised monies and grants input. We have been the recipient of Certified Local Government grants administered through the Ohio Historic Preservation Office and in year 2008 received grants presented as a check for \$100,000 from the State Budget. All of these resources have been utilized to continue restoration of this irreplaceable resource. | Mansfield Historical Preservation Society | 25 | 31 to 90 days | \$800,000 |
| Richland | SR 309 / SR 430 Rehabilitation | Our most current project is teaming with the Ohio Department of Rehabilitation and Corrections to establish a Prison Museum for the State of Ohio. We have already stabilized a wing of the structure and have begun receiving collection items from ODRC. Our goal is to restore the original administration wing as an independent museum open to the public. As we attracted over 50,000 visitors to ODR last year we look to this as a tremendous additional educational opportunity. We have architectural drawings in place and an established mechanism for bring from the construction industry. The project is ready to move quickly. | K.E. McCartney & Associates, Inc. | 227 | 181 days or more | \$640,000 |
| Richland | St. Peter's District Plan | Rehabilitation and resurfacing of 5.08 miles of SR 309 & 430 including two new 5/4 concrete box culverts. | Downtown Mansfield, Inc. | 100 | 31 to 90 days | \$100,000 |
| Richland | Friends of the Park/ Carousel District Farmers Ma | The goals of the neighborhood housing plan include restoration of existing historic housing stock, creation of quality 18th housing compatible with existing houses, homeownership through programs that assist current residents in purchasing property, increased connectivity between neighborhood development and downtown retail and the recruitment of new retail downtown that will serve the needs of the residents. This is a collaborative project that has both public and private support. The St. Peter's district is home to over 5,500 residents many of which are low to moderate income level. This area has also been negatively impacted by the foreclosure crisis and many homes have been abandoned. The neighborhood is fortunate enough to have two long standing anchors, MacCentral Mansfield Hospital and St. Peter's Catholic Church. | Downtown Mansfield, Inc. | 100 | 91 to 180 days | \$75,000 |
| Richland | Wellness and Recovery | To assist in making City parks family friendly, clean and stable. To establish fitness trails and secure safe environments that promote recreation and outdoor play. To provide the community with free outdoor based concerts, establishing an public amphitheater and mobile stage. Encouraging production of green space and community gardening. To maintain the existing Farmers Market and provide locally grown, inexpensive produce to low income families located within downtown. | The Center for Individual and Family Services | 3 | 31 to 90 days | \$108,000 |
| Richland | Sabin Robbins | The Center proposes to initiate a Wellness program for both consumers of our services and the staff who treat them. This involves providing mental health and therapeutic treatment to about 1800 adult severely mentally ill population event. Studies and research demonstrate that people with severe emotional and psychiatric illnesses also suffer from preventable physical illnesses at high rate. Our approach is to provide education and group processes to them to address these issues. Additionally we know that the emotional impact of prolonged hospitalization to this population can have an adverse effect on treatment staff both emotionally and physically. This in turn results in high turnover and less productivity. Our plan is to employ an individual in our Mental Restoration Department to implement a wellness program that addresses both physical and emotional wellness concerns. Expected outcomes are increase in staff satisfaction, monitoring of staff health and increased health in clients as demonstrated by increased involvement in wellness activities, which will be tracked. Also we hope to see an increased utilization of services and increase employment for consumers. | Sabin Robbins, LLC | 140 | 0 to 30 days | \$5,000,000 |
| Richland | Child & Adolescent Mental Health Care | Sabin Robbins, LLC is a 125 year old paper converting company located in Mansfield Ohio that has been a reliable employer for many years. A group of Ohio investors have put their resources into saving the business and are looking for a buyer to finish implementing the turn-around plan that they have put into place. Once employing 140 people in Mansfield Ohio Sabin Robbins, LLC is looking to our employment in Ohio. With a lot of interest from the company could quickly purchase the appropriate inventory pay within term taking a discount, purchase equipment to convert paper for additional uses, increasing the business to employ those who have lost their jobs with plans to consolidate operations from Chicago into Mansfield and grow even beyond the company's former high points. | The Center for Individual & Family Services | 10 | 31 to 90 days | \$443,000 |
| Richland | TeleMedicine | Our current Child & Adolescent Mental Health Care Program has a waiting list of 170 plus clients. By increasing staff, we will be providing a valuable service to our community, we will stabilize families, and create an environment where families can be empowered to meet their own needs. "It is important to note that we are a comprehensive Mental Health & Drug & Alcohol treatment facility... for example, through our educational program, we can identify individuals with jobs in the community and/or through our case management services we can connect people with basic needs." In summary by increasing staffing to this program, we will address a serious community issue (170 plus clients waiting for services and we will also provide much needed jobs. | The Center for Individual & Family Services | 3 | 31 to 90 days | \$329,680 |
| Richland | Retention and/or Reinstatement of Law Enforcement | The Telemedicine project would enable us to deliver more psychiatric services to meet the increasing needs of our community. Unfortunately, there is limited availability of doctors in our area to meet our needs. By using Telemedicine, we would be able to utilize doctors in other areas to provide much needed services to local consumers. These funds would provide us with the equipment and staffing needed to increase our ability to provide these mental health services. | Richland County Sheriff's Office | 27 | 0 to 30 days | \$1,600,000 |
| Richland | City of Gallon Municipal Airport Facilities Upgrad | Due to the current economic conditions and budget cuts, the Sheriff's Office in Richland County, Ohio, has eliminated an IT position, our Citimail Lab is functioning with one less technician, and 7 other positions within our Law Enforcement Division remain unfilled. Additionally, one post in our sheriff's constable jail has been eliminated due to the current economic conditions. Our goal is to retain and/or reinstate the eliminated positions in staffing, we must proceed with plans to layoff additional 20 sworn deputies and 6 non-sworn positions within the Law Enforcement Division, effective March 15, 2009. Of the cuts already made in personnel, plus those to be laid-off, this project would enable us to retain and/or reinstate 20 sworn deputies and 7 non-sworn positions within our Law Enforcement Division. | City of Gallon | 50 | 91 to 180 days | \$3,540,000 |
| Richland | Valve and Hydrant Replacement Pr | RAJLON MUNICIPAL AIRPORT FACILITIES UPGRADE Activities would involve basic pavement maintenance, IRS, REE, and VASI repainting/repaint. In addition to these activities, additional work would be included in order to upgrade apron facilities to meet FAA standards for A-1 (small airplanes exclusively) requirements and to expand the current terminal area to the west. Additional apron maintenance and improvement projects would be performed including removal of obstructions near the approach and end of runway 5 in order to eliminate the displaced threshold, runway safety area grading and the replacement of parallel taxiway lights. A full-length parallel taxiway would be constructed by extending the existing 2000-foot taxiway an additional 1505 feet. Other activities would include the acquisition of snow removal equipment; minor airfield drainage improvements; installation of a light pavement dedicated helicopter landing pad; removal of the westmost hangar; construction of 2 new 10-unit T hangars; construction of 2 new corporate hangars; restoration of the existing airport entrance road; and the installation of a partial perimeter security fence. Replacement of 105 fire hydrants and 20 water valves. | City of Ontario -K.E. McCartney & Associates, Inc. | 29 | 31 to 90 days | \$600,000 |
| Richland | Supported employment | The Center provides occupational treatment for about 1800 Severely mentally ill adults annually. The average monthly income of those is under \$700. As part of our programming we provide vocational services because meaningful activity such as competitive employment reduces utilization of services, thus costs as well, while at the same time increasing level of functioning of those who find employment. Those with Severe and persistent mental illnesses have many barriers to finding work which trained staff can help in overcoming. We propose to add 2 job developers to work specifically with adults who are suffering from emotional and/or psychiatric distress to assist in finding work in the competitive market. They will work with the interdisciplinary treatment teams. Expected outcomes will be increased job placement for the SMI population. Currently we place 15% of those referred for vocational services. With the increased levels of staffing project to increase that to 25% of those referred finding and retaining an employment for at least 90 days. | The Center for Individual and Family Services | 2 | 31 to 90 days | \$73,600 |
| Richland | City of Ontario - Water Main Replacement Program | 10,000 ft of 12" water main replacement, 4,462 ft of 8" water main replacement. | City of Ontario -K.E. McCartney & Associates, Inc. | 66 | 31 to 90 days | \$1,390,000 |
| Richland | City of Ontario - Water Main Extension Program | 3,600 ft of new 8" water main, 500 ft of new 4" water main. The purpose of this project is to create loops in the system where dead ends currently exist thereby increasing the flows and pressure. | City of Ontario -K.E. McCartney & Associates, Inc. | 39 | 91 to 180 days | \$820,000 |
| Richland | Home Road - Lift Station Replacement | Replacement of existing sanitary lift station including 75 ft. of 6" gravity sewer, 35 ft. of 6" force main and 4 sewer manholes. | K.E. McCartney & Associates, Inc. | 22 | 31 to 90 days | \$230,900 |
| Richland | Village of Belleville - WWTP Improvements | New incoming headworks, bypassing valves at secondary clarifiers, sludge pump controls, solids handling improvements - EPA mandated work from Koshland Road to Alexander Road in Village of Belleville including 4,000 ft. of roadway with curb and gutter, stormwater management system, and signal upgrades. This is part one of a two part project to stimulate economic development at the 0771 interchange through a future Industrial Park and most efficient access to existing businesses. | K.E. McCartney & Associates, Inc. | 15 | 31 to 90 days | \$315,000 |
| Richland | S.R. 97- 3rd Lane Widening | Replacement of existing sanitary lift station including 75 ft. of 6" gravity sewer, 35 ft. of 6" force main and 4 sewer manholes. | K.E. McCartney & Associates, Inc. | 86 | 181 days or more | \$1,800,000 |
| Richland | Markey Street - Storm Sewer Improvements | 1,600 ft. of 12"-24" storm sewer with 24 catch basins and street resurfacing. | K.E. McCartney & Associates, Inc. | 11 | 31 to 90 days | \$120,000 |
| Richland | Village of Butler - Sanitary Collection System I & | Manhole repair for entire village, flow monitoring, sewer cleaning and repairs. This work is mandated by the Ohio EPA. | K.E. McCartney & Associates, Inc. | 12 | 31 to 90 days | \$228,000 |
| Richland | Village of Butler - Storm Sewer Replacement Projec | 1,300 ft. of 12"-18" Storm Sewer with 18 catch basins, 1,300 ft. of curb replacement and 2,000 ft. of pavement replacement. | K.E. McCartney & Associates, Inc. | 19 | 31 to 90 days | \$395,000 |
| Richland | Village of Shiloh - I & I Reduction (Manhole Rehab | Village wide manhole evaluation and rehabilitation work as mandated by Ohio EPA. | K.E. McCartney & Associates, Inc. | 10 | 91 to 180 days | \$184,700 |
| Richland | Village of Butler - WWTP Improvements | Rehabilitation of existing Rotating Biological Contractor units. | K.E. McCartney & Associates, Inc. | 11 | 31 to 90 days | \$200,000 |
| Richland | Cedar Creek Court Wastewater & Drinking Water Impr | The project consists of 2 Sludge Wasting Tanks, 1 Combination Chlorination-De-Chlorination Tank and 500 feet of 6 inch Sewer Line. This is an EPA mandated upgrade to our existing wastewater plant and must be completed to retain the system's NPDES permit. | Cedar Creek Court | 10 | 31 to 90 days | \$50,000 |
| Richland | Automated External Defibrillator | The Clear Fork Valley Local School District would like to purchase an Automated External Defibrillator to supplement our already existing defibrillator program. Along with the defibrillator we would purchase an alarm called to save the unit in. | Clear Fork Valley Local School District | 0 | 0 to 30 days | \$1,820 |
| Richland | Safety First | Retention of total number of sheriff's deputies and civilian support staff to maintain the public safety of the 250,000 residents of our County. | Concerned Citizens of Richland County of OHIO | 25 | 0 to 30 days | \$1,600,000 |
| Richland | Downtown Mansfield Two Way Streets | The current street system works as a disadvantage to both developers and also business and property owners in the downtown who are trying to compete for business and keep their doors open. There is currently 4 million dollars in development on the back burner in completed pending the finishing of this project. This development includes the creation of market rate housing in loft style condos by a local developer. This project includes the changing of street patterns on two major streets in the downtown, Main and Walnut both which are currently one way. People traveling in these directions will still have the current one way streets, Diamond and Mulberry to use and would also have the other street to be used for local, business related traffic. Please help us fund this very important project that will not only stimulate the economy of Mansfield, but keep and retain both jobs and business as well as secure future investment. Thank you. | Downtown Mansfield, Inc | 5 | 181 days or more | \$3,000,000 |
| Richland | Richland County Sanitary Sewer GIS Project | This project will prepare a complete digital model and system map of the sanitary sewers owned and operated by Richland County. Existing utilities will be cataloged for asset management and utility location purposes. The system will incorporate maintenance and enable hydraulic modeling to assist in location pollution sources and adjust capacity for future development. | Richland County Building Regulations | 6 | 31 to 90 days | \$150,000 |
| Richland | Energy efficient windows for Baird home. | Replacement of 10 inefficient windows from the 1960's. | Baird Family | 1 | 31 to 90 days | \$6,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Richland | recover from the economic hardships placed on me b | Due to the bush administration raising the economy and allowing the company that I worked for to do a "PAPER MOVE" and say they were investment and decision bankrupt and order to get rid of the union and restructure and terminate all and disabled people like me and not return me back I have lost my job at the age of 61 due to my age and medical problems I will not be able to find suitable employment again and will be forced to take early retirement which will only give me \$700.00 a month for the rest of my life. I have no family and no one to help me. I have no means of transportation, am heavily in debt and basically bankrupt and in debt about \$75,000.00. I cannot afford to continue seeing my doctor since I no longer have insurance and basically can barely survive. I need this money to settle all of my debts and take care of myself and relocate back to San Francisco California and hopefully be able to start up some sort of employment and be able to get health insurance. The existing WWTP is overloaded and it is a problem. The WWTP serves 14 houses and the cost/benefit ratio is very high. The plant must be modified or abandoned to meet EPA NPDES requirements. | Hammer Productions | 1 | 0 to 30 days | \$300,000 |
| Richland | Lust WWTP Abandonment | County Meadows is a small subdivision of 18 houses with a WWTP that is 32 years old. The existing plant is in excess of maximum capacity with much H ₂ S. Flow equalization and H ₂ O removal are necessary. Work at the plant is required to comply with EPA and NPDES requirements. Build building to repair existing basins and buy additional equipment. Additional employees possibly 2. Expect current production and for supplies to grow more money for personal use and continue giving overflows to shelters in Mansfield Ohio area during growing season. | Richland County Building Regulations | 40 | 91 to 180 days | \$1,443,000 |
| Richland | Country Meadows WWTP Abandonment | County Meadows is a small subdivision of 18 houses with a WWTP that is 32 years old. The existing plant is in excess of maximum capacity with much H ₂ S. Flow equalization and H ₂ O removal are necessary. Work at the plant is required to comply with EPA and NPDES requirements. Build building to repair existing basins and buy additional equipment. Additional employees possibly 2. Expect current production and for supplies to grow more money for personal use and continue giving overflows to shelters in Mansfield Ohio area during growing season. | Richland County Building Regulations | 40 | 91 to 180 days | \$1,260,000 |
| Richland | Expand Home Business | Several Estates subdivision has approximately 400 residential homes. There is no storm sewer system installed. There is minimal surface water control in place, however new infrastructure is desperately needed. Much damage has been done to private and public property by uncontrolled runoff. The project has been bid and is a problem. The WWTP serves 14 houses and the cost/benefit ratio is very high. The plant must be modified or abandoned to meet EPA NPDES requirements. | Self Employed | 3 | 31 to 90 days | \$50,000 |
| Richland | Imperial Estates Stormwater Project | The Harp WWTP serves approximately 80 houses and is currently over capacity. An H ₂ S program has been implemented in the area with satisfactory results. Future development in the area is halted until such time as additional capacity can be added. Modifications such as flow equalization are needed to comply with NPDES and EPA requirements. A cost-benefit analysis has concluded the best solution is to abandon the plant and pump the sewage to the City of Mansfield. | Richland County Building Regulations | 40 | 0 to 30 days | \$600,000 |

Future development in the area is halted until such time as additional capacity can be added. Modifications such as flow equalization are needed to comply with NPDES and EPA requirements. A cost-benefit analysis has concluded the best solution is to abandon the plant and pump the sewage to the City of Mansfield. | Richland County Building Regulations | 40 | 91 to 180 days | \$1,107,000 |
| Richland | Imperial Estates SSES | The Imperial Estates subdivision contains approximately 400 houses, 1 elementary school, and several commercial businesses. The WWTP was recently abandoned and replaced with a large equalization basin and several pump stations. It continues to be a problem in the 40 year old subdivision. A complete study with grade and site testing, 70' in excess, flow monitoring, and house inspectors will be conducted to pinpoint sources of H ₂ S. Repairs will include lining, joint sealing, grouting, MH sealing, lateral connection repairs, mapping, modeling, and digitization of the sanitary sewer system. The project is needed to avoid excess user fees and keep the system in compliance with the EPA and downstream WWTP in compliance with NPDES requirements. | Richland County Building Regulations | 46 | 0 to 30 days | \$1,022,000 |
| Richland | Kochheiser Road Sanitary Sewer Extension | A sanitary sewer extension is needed to the existing system to allow expansion for existing properties that have failing septic systems. The septic systems discharge into a tributary of the Canal River. The existing properties do not have room for construction of new septic systems that meet current EPA and county requirements. | Richland County Building Regulations | 40 | 91 to 180 days | \$300,000 |
| Richland | Operating capital to allow hiring of more employee | Working capital to advertise and grow business. This will allow us to move into a larger building and create new jobs for associates. | All-Ways Christmas | 4 | 0 to 30 days | \$125,000 |
| Richland | J&J Spay | I currently own a team insulation business and I am looking to receive this stimulus to help educate and save homeowners and businesses. Money on energy bills for updating existing and new houses and buildings with team. The stimulus would be spent on the energy efficient team branch of my business and updates to existing equipment. It would also afford the opportunity to update my existing energy efficient operation of my business. I believe that I have good opportunities and could create 10-20 jobs in the next 2 years. The stimulus of energy savings with the products I use has been both insured and the environment by reducing the use of energy consuming products. | J&J Spray Inc. | 20 | 0 to 30 days | \$175,000 |
| Richland | Monroe Fire Capital Improvement Initiative | The requested funds would be used to renovate our current station and a residential structure next to our current station. The changes to our current station would include the creation of office space, updating of heating, electrical and telecommunications, and computer networking. Existing NFPA compliant fire gear storage, changing the size of our overhead door to allow our current door to be the station directly and updating our in-house dispatching center. The residential structure would be converted to a training facility with areas for classroom style training and include shower/toilet room facilities which we currently are not able to provide to our firefighters. | Monroe Township - Lucas Fire Department | 0 | 31 to 90 days | \$100,000 |
| Richland | Prevent foreclousurer | Get out of debt to save my home. Back taxes and mortgage payments. visa bill and making a great first impression. | Forclousurer | 1 | 31 to 90 days | \$205,000 |
| Richland | Reentering the Workforce--Successfully and Immedi | Intensifying skills like what to wear, when to arrive, how to answer open-ended scenario questions, how to answer difficult personality questions which could sabotage them, how to ask questions to show their interest and skill level, etc. Resume writing skills like how to enhance work and volunteer experience, how to minimize gaps in work, how to get your resume noticed among hundreds, how to avoid common resume disasters, etc. How to get an interview like when to call and when not to call, how to network, how to enhance networking opportunities, etc. Where to look for assistance like local, state, and federal gov entities and/or profit and nonprofit businesses that can assist with finances and work opportunities, etc. Make a great first impression like how to build your self confidence level despite being unemployed, how to maintain self discipline and emotional control despite stress levels rising, how to lower stress levels using coping strategies. | Desk Enterprises Incorporated | 10,000 | 0 to 30 days | \$2,000,000 |
| Richland | Window replacement | Approximately 1500 air windows and windows that are inefficient including storms. Saving approximately 50% per window since air windows per year for energy costs. Construction of 200-400 ft. academic/business services building for MacCormick College of Nursing (MCN). The college is currently housed in a building built in 1923 which has been maximally renovated both in space and technological capabilities. MCN is the only traditional 4 year Bachelor of Science in Nursing (BSN) program in Richland County. We are educating nurses for the future of our local area as well as for the state of Ohio. It is predicted that Ohio will see a nursing shortage of 32,000 nurses by 2020. Nursing has been declared a national professional shortage area. Since the 2002 academic year, the number of qualified applicants turned away by Ohio nursing schools has increased by more than 40%. Ohio in 2002 to 1992 to 2007. Reasons for this include lack of classroom space and lack of faculty. We need more space. The BSN degree is the launching point for nurses to become nursing educators as well as advanced practice nurses. We are currently investigating the feasibility of co-locating on the Ohio State University-Mansfield (OSU-M) Campus along with North Central State College (NCSC). The feasibility study is in collaboration with OSU-M and NCSC. | Sposito Household Family | 4 | 31 to 90 days | \$9,600 |
| Richland | Construction of new academic building for college | Construction of 200-400 ft. academic/business services building for MacCormick College of Nursing (MCN). The college is currently housed in a building built in 1923 which has been maximally renovated both in space and technological capabilities. MCN is the only traditional 4 year Bachelor of Science in Nursing (BSN) program in Richland County. We are educating nurses for the future of our local area as well as for the state of Ohio. | Richland | Improved efficiency Lithium battery charging | Graywacke Engineering is currently producing power conversion equipment, specifically designed to replace or replicate the military primary portable batteries (i.e. BA5500) and 2500 Lithium batteries by using existing power sources i.e. shore power, vehicle based battery systems, solar, etc. By utilizing these products the military is able to maximize its current power sources and reduce significant battery waste and hazardous material concerns. However in many instances the military is required to utilize the primary rechargeable battery source during operations in areas without access to the above listed existing power sources. This is the area that Graywacke Engineering has focused. We have researched and begun development on portable charging devices specifically for these primary lithium cells. Many factors remain to be examined i.e. different chemical make ups, batteries, temperature effects on charging, or different charging frequencies. This is the focus of our research and development, and why we are requesting this money. | Graywacke Engineering Inc. | 12 | 31 to 90 days | \$650,000 |
| Richland | Green Home | Build a green home using solar panels, windmills, geothermal heating, energy eff. home and basement with proper insulation in the walls and windows. | Hedrick Household | 12 | 31 to 90 days | \$195,000 |
| Richland | The 5th Realm | The intent is for IONG to develop more than one Massively Multiplayer Online Role Playing Game, comparable to World of Warcraft and Guild Wars 2, that would not only create several jobs in the long run but also provide a significant increase in Ohio's tax base through millions of dollars per year in subscription revenues. Most of this income would be from players worldwide sending money to a company in Ohio. Online gaming seems to be a form of entertainment that people will not let go, even in times of recession. Several hundred thousand will be needed for implementation of needed hardware and internet bandwidth allocation. Depending on what is available, several hundred thousand will be needed for company facilities. For about a 4 year development cycle, there will be a need to have about 60-75 jobs (depending on the particular point in the development cycle) for low and higher level developers and quality managers. Most game concepts are already developed and programmed. The 5th Realm thus being a great head start on the project. If they do this in Texas and make money, then we can do it here in Ohio and get some of the entire game market profit. | IONG - Interactive Online Network Gaming | 75 | 0 to 30 days | \$10,570,000 |
| Richland | Recovery of Waste Heat to Electric Generation | We recover waste heat from any heat source and change it into a kinetic rotary motion to drive an electric generation system. | Hydroair | 50 | 0 to 30 days | \$5,000,000 |
| Richland | Fire Station Repacement & Relocation | We feel that we have the next technology change for America and want it keep it in the Mid Ohio region. I'll be glad to release more information if you request. | Washington Township Fire Department | 25 | 181 days or more | \$2,100,000 |
| Richland | Waterline: 5th and Henry | Replacement and relocation of an existing fire station to improve employee and public safety. Access to the present station is impeded by multiple State and Federal highway intersections. The new station will meet current building codes and provide a safe, well lit, more energy efficient and support a greener environment. It is projected that full-time staffing will be necessary in the future and the present fire station is unable to support this public safety initiative. The new complex will also support the Township government's devices and public meeting areas. The construction project will assist in supporting the local economy by utilizing local suppliers and contractors. | Village of Butler | 10 | 91 to 180 days | \$170,000 |
| Richland | TeleCare Ohio | Replacement of 1300 LF of aged & undersized waterline. New waterline will be 12" diameter. Funds will be used to purchase additional telemedicine monitors to allow for much needed growth and expansion of our homehealth telemedicine monitoring program for patients with heart failure and other chronic diseases. The monitors will be used in rural areas in the counties of Ashland, Crawford, Monroe, Knox, Holmes, Wyandot and Wayne. These monitors help reduce Medicare acute care and emergency room expenditures by an average of \$42,000 per patient while at the same time providing health care in the home setting which is preferred by most patients. In the past five years, Ohio has experienced a 50% increase in healthcare costs for chronic diseases. Ohio also ranks in the top ten percent of deaths in the United States related to chronic diseases. These monitors allow the VNA to provide daily care to chronic disease patients and intervene before an acute hospitalization or emergency visit needs to take place. The VNA already has a proven track record with having several hundred monitors in place in our 19 county service area. These funds will allow us to purchase more monitoring devices, hire more telemedicine practitioners, and in the long run produce a greater cost savings. | Visiting Nurse Association of Mid Ohio | 80 | 0 to 30 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Richland | Bulk Materials Distribution Terminal | The funds will be utilized in the creation of a Bulk Material Distribution Terminal and rehabilitation of the Mansfield to Willard main line. The Bulk Material Distribution Terminal will be located on a 160 acre site located approximately 3 miles north of the City of Mansfield. The terminal will allow for the transfer of bulk materials between truck and rail transportation serving customers within a 20 mile radius. To aid in the attraction of customers to the terminal and operate more efficiently a portion of the funds will be utilized in the above mentioned track rehabilitation. Creation of the terminal and rehabilitation of the track will result in the retention and creation of approximately 150 jobs. | Ashland Railway, Inc. | 150 | 31 to 90 days | \$10,821,850 |
| Richland | Expansion of existing facility | Creation of a motorsports facility including but not limited to drag strip, camping, outdoor/recreation equipment. THE BUILDING WAS BUILT IN 1972 AND HAS HAD VERY FEW UPGRADES SINCE THEN. WE HAVE THE ORIGINAL HVAC SYSTEMS, SINGLE PANE WINDOWS, LITTLE INSULATION IN ROOF, POOR LIGHTING SYSTEM. | Mansfield Motorsports Park | 200 | 0 to 30 days | \$5,000,000 |
| Richland | INCREASING ENERGY EFFICIENCIES IN FACILITY | THE CORRECTION OF THESE PROBLEMS WILL ALLOW US TO MAINTAIN THE BUILDING FOR LESS AND ALLOW US TO SERVE MORE LOW INCOME INDIVIDUALS WITH THE LIMITED AMOUNT OF MONEY WE HAVE. The money received will be used to remove old windows and appliances that waste energy and replace them with all new high efficient windows and appliances. I have a list that would benefit from this in multiple ways. They are learning to school about going "green" and this project would show them the procedures to take on a smaller scale in what is being done across the state to a greater extent. The stimulus money will be used to help maintain employment for various local companies and will be used to hire one person to install all the items that does not need professional to install. | REHABILITATION SERVICES OF NORTHCENTRAL OHIO | 2 | 91 to 180 days | \$500,000 |
| Richland | Osborne Household Energy Project | | none | 1 | 0 to 30 days | \$15,000 |
| Richland | Richland B&O Trail resurfacing | 11 miles of asphalt resurfacing on existing Richland B&O Trail - an 18.5 mile bike trail in Richland County that was constructed in 1995. We are a Mental Health and Drug and Alcohol Treatment Agency and we are already responsible to help people with mental illness maintain stable, safe, affordable housing. In addition, many of our clients including our children and adolescents need help with food. We appreciate your consideration of this request. | Richland County Park District | 19 | 31 to 90 days | \$330,000 |
| Richland | Food and Housing Project | Modernization and addition of space to our county health department. Currently, we are housed in a facility originally constructed in the early 1970's with an additional wing added in the early 1990's. | The Center for Individual & Family Services | 2 | 0 to 30 days | \$95,000 |
| Richland | Addition to the Health Dept | This project would allow us the ability to continue and expand the public health services we provide to all of Richland County citizens and businesses. The project would include the redesign of current space with the addition of increased space to provide these services. | Mansfield/Ontario/Richland County Health Department | 10 | 181 days or more | \$2,160,000 |
| Richland | Bi-Metal Generator | Our Bi-Metal generator has the potential to turn all existing gasoline powered vehicles into "mini-hybrids" which could create jobs throughout Ohio and make the US Auto companies competitive once again at a cost of only a few hundred dollars per vehicle. The Bi-Metal generator has applications globally for green energy production of electric. | Medical Safety Solutions, Inc. | 25 | 0 to 30 days | \$10,000,000 |
| Richland | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to those areas without grant monies. Building a wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Providing a services service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding other services to the packages within a year. New WIMAX technology will be able to push a strong enough signal to provide all other services to the areas. Once we are able to establish our first several sites we will have the ability to use local county money, State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Richland | ORGANIC FRUITS, VEGETABLES, AND HERBS | We are certified organic growers of fruits, vegetables, and herbs. We have a system to grow "YEAR ROUND" in "SOLAR HEATED GREENHOUSES" with no "PESTICIDES" herbicides, insecticides, or herbicides, using "SOLAR HEAT" and "WIND GENERATED ELECTRICITY". Our system also incorporates "WATER CONSERVATION" to use up to 70% less water and "VERTICAL HYDROPONICS" which produces 4 to 8 times the normal amount of produce per square foot as conventional systems. Our system grows "YEAR ROUND" and "LOCALLY GROWN" food which requires practically no shipping as compared to California and Florida. We can grow with almost "NO CARBON FOOTPRINT" and "NO PESTICIDES" and "NO POLLUTION" and can ship on airplanes and rail cars nationwide and still come out with "FRESHER, MORE NUTRITIOUS PRODUCE". We will use this funding to expand our business with new greenhouses, new equipment, and new employees. We greatly appreciate your serious consideration of this project. Respectfully, Frank Stank, President, Frankly Organic Inc. 2715 Bluff Rd, Mansfield, Ohio 44840-7474 | FRANKLY ORGANIC INC. | 6 to 8 | 31 to 90 days | \$1,500,000 |
| Richland | Replace Fire Dept. Pumper | Replacement of a 20 year old front line Pumper. Will allow us to have a more up to date and cost effective piece of Fire Fighting Equipment. The Pumper will be able to provide increased days of care and related services to women and children who are victims of domestic violence. In addition, The Shelter will be able to continue to maintain the current 17 shelter staff and to hire a part time licensed social worker to assist in providing mental health treatment to the increased number of women and children. | Mifflin Township Fire Dept. | 15 | 91 to 180 days | \$450,000 |
| Richland | The DV Shelter Program | Replace a 30 year old boiler used to heat the business area and living quarters of the Fire Dept. Replace with Energy Efficient heaters and central air. | The Domestic Violence Shelter | 17 | 0 to 30 days | \$50,000 |
| Richland | Replacement of Boiler system | 3000 wear tear of pavement 2" thick and 1000 linear feet of drain line and 2 drainage boxes. Dept. will serve 85 low income families that can't afford a rate increase. | Mifflin Township Fire Dept. | 5 | 31 to 90 days | \$75,000 |
| Richland | Street re-surfacing | Due to current dramatic drop in city revenue, it has become necessary to forgo a number of police officers and support staff. This project will allow the re-call of layed off police officers and some support staff critical to community safety. | Cedar Creek Court Mobile Home Community | 10 | 0 to 30 days | \$115,000 |
| Richland | Officer Retention/Re-Call Initiative | Violent crime and thefts are currently rising rapidly which is expected to continue. | Mansfield Division of Police | 15 | 0 to 30 days | \$750,000 |
| Richland | Domestic Violence Project | This project will allow the assignment of two police officers to work specifically on the coordination of domestic violence cases. Officers will take the case from the original filing and prepare the case for charge request. | Mansfield Division of Police | 2 | 0 to 30 days | \$325,000 |
| Richland | AoD & community violence outpatient therapy | Officers then will work with the law director or prosecutor to prepare the victim and witness for the prosecution and ultimate sentencing. Hire 2 FTE employees to start an outpatient program based on the relationship of substance abuse and criminal activity and violence. Funds would further enable us to purchase new materials for the program and research best practices. Funds would incorporate support staff time and office resources. Additional funding will be used to provide treatment services primarily in Richland Co. and be made available to neighboring counties/courts. We would work in conjunction with the court and probation systems to monitor offenders, reduce substance abuse and violent acts that are associated with. Estimate we could provide out services to approx 30 individuals with this amount. This will reduce use of jail resources. It will also reduce the burden on agencies receiving CODAS funding to provide services for individuals who are unable to pay for it. Likely lead to overall improvements in community safety. | The Center for Individual & Family Services/ Foren | 2 | 31 to 90 days | \$120,000 |
| Richland | Regional Manufacturing Coalition | Formation of Regional Manufacturing Coalition. The Richland Manufacturing Coalition (RMC) was formed for the purpose of sharing ideas, best practices, business challenges and issues that are common among manufacturers. Presently RMC has 55 member co's with 94 mgt members representing a total employment of over 8400 employees in Ashland, Richland, and Crawford counties. Our mission is: Helping the North Central OH mfg to prosper through education and networking. We intend to take the Coalition regional in the near future to include Knox, Morrow, Marion, Huron, and Wayne counties which would increase our membership to over 100 co's with over 15,000 employees. Expansion of these employees will be possible by the programs and services of RMC to address workforce needs, business expansion and development resources, mgt. education on HR issues, and continuous improvement of best practice strategies. RMC can also assist economic development offices with assistance and facilities. Funds requested would fund a full-time administrator for a 5 year period to maximize opportunities to retain and expand mfg employment in North Central OH similar to WIRE-Net in Cleveland. | Richland Manufacturing Coalition | 15,000 | 91 to 180 days | \$250,000 |
| Richland | Stimulus Pathways | The Community Health Access Project (CHAP) is requesting funding to maintain the Pathways outcome production model in Ohio. CHAP is a nonprofit organization that uses community health workers (CHWs) to reach out to communities that have poor health and social outcomes. CHAP has created a unique outcome-focused tool Pathways to track positive outcomes within these neighborhoods. This funding will be used to maintain the Pathways model at the five existing CHAP sites (Richland County and Area County). Pathways are a tool. A tool used to shift the focus of the health and human services systems to outcomes. Pathways are unique in that the services are tailored to the level of the individual. It is the sum of the individual outcomes that will begin to address the persistent problem of health and social disparities. Each step of the Pathway addresses a clearly defined action towards problem resolution. Many steps deal with social and cultural issues facing a client. Pathways have been developed for many important issues, ranging from homelessness to employment. One client may have many different Pathways depending on the problem identified. | Community Health Access Project (CHAP) | 5 | 0 to 30 days | \$225,000 |
| Richland | Harker St & Main St RR Grade Crossing Elimination | Safety project. Build short section of crossover track to consolidate two unsignalized rail grade crossings into one existing signalized grade crossing. Eliminates an isolated, unsignalized grade crossing on SR 13 as well as an isolated, unsignalized grade crossing on Harker Street. | City of Mansfield | 11 | 91 to 180 days | \$410,000 |
| Richland | Harker St & Main St RR Grade Crossing Elimination | Safety Project. Build a short section of crossover track to consolidate two unsignalized rail grade crossings into one existing signalized crossing. Eliminates an isolated, unsignalized grade crossing on SR 13 as well as an isolated, unsignalized grade crossing on Harker Street. | City of Mansfield | 11 | 91 to 180 days | \$410,000 |
| Richland | Richland County, Ohio Stimulus Request | We would like to see a reinstatement of our Gun Prosecutor/ Clerk which we participated in for several years. This grant allowed us to dedicate the prosecutor to handle all firearm cases within our office, from intake to appeal. | Richland County Prosecutor's Office | 2 | 0 to 30 days | \$75,000 |
| Richland | Violent Fugitive Task Force Unit | We would also be interested in any funding we could qualify for the prosecution of domestic violence cases and/or our victim witness program. We currently operate our Victim/Witness division partially through a grant from the State of Ohio. Funding has been so drastically cut that we had to eliminate the secretarial position, leaving the secretarial work to the advocates and director. | Richland County Sheriff's Office | 26 | 0 to 30 days | \$158,600 |
| Richland | Automated Mobile Reporting System | The RCSI recently originated the Richland County's Division of the Northern Ohio Violent Fugitive Task Force Unit brought with the cooperation of the U.S. Marshall Service in Cleveland, Ohio. The purpose of the fugitive task force unit is to combine the efforts of federal, state, and local law enforcement agencies to locate and apprehend the most dangerous fugitives and assist in high profile investigations. Accurate data on the flight and arrested across different local, state and federal agencies. This project will also allow RCSI to acquire 8 additional laptops. THE PAST FEW YEARS OF HIGH FUEL COST AND THE HEIGHT COST OF TIRES, OIL, AND EVERYTHING THAT'S INVOLVED IN THE TRUCKING INDUSTRY HAS HAD ME TO LET MY EQUIPMENT NEED REPAIRS THAT I CAN'T AFFORD, SO I WOULD USE THE MONEY TO BUY NEW EQUIPMENT TO REPLACE MY WORK-UP EQUIPMENT. | Richland County Sheriff's Office | | 91 to 180 days | \$150,000 |
| Richland | Small business restructure | | mountaineer transfer inc. | 1 | 31 to 90 days | \$200,000 |
| Richland | Replacement of our Training tower and drill area | Replacement of our current training tower and outdoor training facility. This sign is used to train new and currently active Firefighters in this area. | Mifflin Township Fire Dept. | 10 | 91 to 180 days | \$1,100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Richland | First Call of Richland County | First Call of Richland County is a collaborative service of the Public Library and Richland County Job & Family Services. The library purchased a building on street level to move the information and referral agency on street level for better access to the public. Neither agency has the money for construction, given declining revenues. The Richland County United Way and the Richland County Foundation were previous partners. The United Way only yielded about 50% of the campaign. First Call had a 68% increase in telephone calls in 2008 over 2007. The public calls include basic needs, food, rent, assistance, housing utilities and many more needs. By having better access on street level (currently on 3rd floor of the Main Library), we will help more walk in clients. We are seeking \$150,000 to renovate the front of our new building to place First Call in the prominent location. The architect's estimate is \$150,000, which does not include technology/wiring. This will improve the programs of most Human Service Agencies in the county. | Mansfield/Richland County Public Library | 3 | 91 to 180 days | \$150,000 |
| Richland | Sites Lake Cottage Area Wastewater Treatment Proje | Replacement of an outdated, over 40 year old lagoon type wastewater treatment system with a modern package plant to meet EPA requirements. System serves 110 households and about 500 residents. Goal is to meet all EPA requirements, preserve water quality, enhance the quality of life of the area's residents. | Muskingum Watershed Conservancy District | 20 | 91 to 180 days | \$660,000 |
| Richland | Plymouth-Shiloh Schools Stimulus Package | Create a vocational agriculture learning center that would house livestock, educational facility, and storage facility for equipment. This would include the reroofing of utilities and construction of the facility. Any leftover dollars would include the construction of a track for community usage and the necessary security around both facilities. Which would include lighting, fencing, concrete access paths. | Plymouth-Shiloh Local School | 50 | 91 to 180 days | \$1,000,000 |
| Richland | Pleasant Hill Lake Park Bridge Replacement | This project entails the replacement of a bridge in Pleasant Hill Lake Park currently closed by inspectors. This facility is owned and managed by the Muskingum Watershed Conservancy District, a political subdivision of the State of Ohio. Box culvert type construction or modular installation is being considered. We will choose the most cost-efficient solution. The current situation results in difficult access to part of the facility, requiring a long, out-of-the-way drive, typically by campers driving large recreational vehicles. It also makes access difficult to a newly developed equestrian center. The bridge replacement would allow safer, easier and much shorter access, (including for emergency vehicles), and reduce wear on smaller camp roads. As Pleasant Hill Lake is part of the US Green Corps of Engineers flood control system, a bargeable footy, Any restriction on access can thus potentially put people at risk. | Muskingum Watershed Conservancy District | 10 | 31 to 90 days | \$150,000 |
| Richland | Replacement Transit Bus - 35 foot | One (1) 35 foot replacement heavy duty transit bus | Richland County Transit Board | 1 | 31 to 90 days | \$340,000 |
| Richland | Replacement Transit Bus - 35 foot | One (1) 35 foot replacement heavy duty transit bus | Richland County Transit Board | 1 | 31 to 90 days | \$340,000 |
| Richland | Ashland Railway Infrastructure Rehabilitation Proj | Rehabilitation of 22 miles of main line track to meet FRA Class of track from Exempted to Class 2. Rehabilitation of selected track bridge structures including one highway overpass in the interest of the safety of rail traffic and the public. | Ashland Railway, Inc. | 65 | 31 to 90 days | \$10,196,211 |
| Richland | Ashland Railway Infrastructure Expansion Project | Expansion of rail yard facilities in Mansfield, OH, Shelby, OH, Wilcox, OH, and in the Ashland OH industrial Park. These expansions will be needed to retain existing business and to add in community economic development. | Ashland Railway, Inc. | 100 | 31 to 90 days | \$8,200,000 |
| Richland | ManCI HVAC Systems | At the Mansfield Correctional Institution, replace all current HVAC rooftop units with more energy efficient HVAC systems. The current HVAC systems are approximately 18 years old and are in various degrees of danger. Maintenance costs are escalating to keep the systems running. | Ohio Department of Rehabilitation and Correction | 35 | 181 days or more | \$2,135,000 |
| Richland | Richland B&O Trail Resurfacing | This request is for needed asphalt resurfacing of the Richland B&O Trail, better known as the Mansfield Bike Trail. This 18 mile stretch in 1995 and was built on the abandoned B&O railroad bed that connects Mansfield with Lexington, Bellefonte and Buckeye in Richland County. Thousands of people enjoy the scenic, serene and fat and exercise a day during the winter use this trail. Of course, when they're not riding, but it also a destination for bike riding enthusiasts from all over the midwest, and county, for that matter. Resurfacing of the trail was begun with the last couple of years with the 18 miles completed. However, because of the weather and some of the project, we had to stop because of a lack of funds. Because this project is "shovel ready", and an important part of the county's transportation system, we are making a request for some of the Federal Stimulus funds for and some of the state's. Completion of this asphalt upgrade would help to make "the bike trail" more user friendly and provide a viable alternative, that would not include the land, air, or pollutants in these very fragile times. | Gorman Nature Center | 12 | 31 to 90 days | \$330,000 |
| Richland | Renaissance Complex Parking Structure | The Renaissance is seeking funding for the acquisition of an adjoining business property to create a new and improved playground to support enhanced parking for theatre patrons. The Parking Structure Project would include the creation of a new parking structure to Theatre parking located at the rear of the existing Theatre building. The enhanced entrance (with its improved and safer side level) would lead to a handicapped parking lot adjacent to the new building with elevator as well as, support the completion of a dual level parking structure that is contiguous to the existing amphitheatres of Park Avenue and Third Street. This project would include the addition of approximately 100 parking spaces, while resurfacing and upgrading the existing parking areas. This project would also include a covered pedestrian walkway located off the handicapped parking area. Benefits for the community from this project include the following: a safer, more vehicle friendly entrance and exit for patrons attending Renaissance performances or business gatherings, as well as increased parking spaces near the building for handicapped and senior patrons, with expedited safety features. | Renaissance Performing Arts Association | 20 | 31 to 90 days | \$1,950,400 |
| Richland | Replacement o Emergency Squad | Replacement of Emergency Squad Replace with a newer model that is more reliable and A lot less to maintain. | Mifflin Township Fire Dept. | 10 | 91 to 180 days | \$180,000 |
| Richland | Hydrogen Generator | Have successfully built and tested a hydrogen generator to run 10 automobiles using a power supply to regulate hydrogen production - resulting a 20% to 60% fuel savings. Several products are available that do not have the power supply and run much less efficiently, but still safe. I'm going to set up production of the automobile version and research the development a hydrogen generator that works with most cars during off-peak hours. I expect the industry to be self sustaining within one year, with growth as wind mills and demand for a hydrogen infrastructure become more mainstream. Much the same as independent oil wells have never happened, enhanced and renovated parking lots for theatre patrons. The Parking Renovation Project would include the creation of a new entrance to Theatre parking located at the rear of the existing Theatre building. The enhanced entrance (with its improved and safer side level) would lead to a handicapped parking space adjacent to the new building with elevator structure that is complementary to the existing amphitheatres of Park Avenue and Third Street. This project would include the addition of approximately 25 parking spaces, while resurfacing and upgrading the badly damaged existing parking areas. This project would also include a covered pedestrian walkway located off the handicapped parking area. Benefits for the community from this project include the following: providing a major catalyst to the ongoing efforts of the Mansfield Alliance with the master plan of downtown revitalization and producing an even more significant presence in education and outreach serving all of the community with valuable arts opportunities. | Power-Hawk Inc | 12 | 0 to 30 days | \$430,000 |
| Richland | Renaissance Parking/Roadway Renovation Project | Have successfully built and tested a hydrogen generator to run 10 automobiles using a power supply to regulate hydrogen production - resulting a 20% to 60% fuel savings. Several products are available that do not have the power supply and run much less efficiently, but still safe. I'm going to set up production of the automobile version and research the development a hydrogen generator that works with most cars during off-peak hours. I expect the industry to be self sustaining within one year, with growth as wind mills and demand for a hydrogen infrastructure become more mainstream. Benefits for the community from this project include the following: providing a major catalyst to the ongoing efforts of the Mansfield Alliance with the master plan of downtown revitalization and producing an even more significant presence in education and outreach serving all of the community with valuable arts opportunities. | Renaissance Performing Arts Association | 20 | 31 to 90 days | \$515,000 |
| Richland | Replaced all Windows in Buissness area of Fire Dept | Replacement windows in business area of the fire dept. This job has already been completed to help save on heating bills. | Mifflin Township Fire Dept. | 2 | 0 to 30 days | \$1,941 |
| Richland | New K-12 public school building | Build one new K-12 education building serving students (BSE) of the Lucas Local School District that will provide a 21st century learning environment for those students. | Lucas Local Schools | 175 | 181 days or more | \$11,000,000 |
| Richland | Lucas LSD Transportation | Replace all school buses with modern school buses that will operate more efficiently and reduce diesel emissions whenever the Lucas LSD buses operate. | Lucas Local School District | 10 | 91 to 180 days | \$425,000 |
| Richland | Township Hall & Community Center | To construct a Township Meeting and Community Hall within the township; we do not have a facility large enough to accommodate the space required for Township meetings. Presently the Fiscal Officer uses an office in the fire dept. that was previously used by the Fire Dept. personnel. The Township Trustees and Zoning Inspector do not have any space the offices. We are in need of adequate space for Township Offices in conduct administrative duties and have larger space available to conduct public meetings. | Mifflin Township, Richland County | 40 | 181 days or more | #VALUE! |
| Richland | Buckeye Crushing Rail Installation | This project will include the crushing of concrete to a 204 material that can be used on various construction projects. For Buckeye Crushing to bring in Materials on rail and to ship materials on rail and this project will add three to five permanent positions to our company. | B and R Recycling | 5 | 0 to 30 days | \$140,000 |
| Richland | PIK Capitalized Maintenance; PID 86109 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through ODOT. | Ohio Department of Transportation | 1 | 0 to 30 days | \$20,830 |
| Richland | Preventative Mental Health Assessments for People | Funding has been out for our current Preventative Mental Health Assessment Program for people seeking public assistance. This program has been highly effective for our community in that people who are seeking public assistance are also required to seek employment. We provide people with the Mental Health Assessments when they are referred to us by the public assistance staff so that we can help them remove the barrier of debilitating mental illness. Thank you for your consideration of this much needed resource. | The Center for Individual & Family Services | 1.5 | 0 to 30 days | \$99,500 |
| Richland | financial assistance for housing needs | Direct financial assistance will be provided to individuals at or to moderate income for housing needs in Richland County (rent, mortgage). Maximum allocation \$200. # of households assisted: 100. This funding would be utilized in addition to assistance provided for housing through the Richland County Foundation and the Emergency Food and Shelter program. | Catholic Charities Diocese of Toledo | 3 | 0 to 30 days | \$50,000 |
| Richland | Renaissance Conference Center II | His area, (seating for approx 100). This performance space would also be used as a working classroom for students of theatre and playwriting involved with the Renaissance Education Program. This would also include a new catering kitchen on the upper level that would service the Ballrooms and New Bakery Loge boxes. The demand for these services and amenities is high. Expected revenue with these improvements would result in a great operational impact, more satisfied patrons, as well as being a great accomplishment for the community. The benefits from this project include: a significant addition to downtown service assets providing more opportunities for meetings and conferencing in north central Ohio providing a major catalyst to the ongoing efforts of the Mansfield Alliance with the master plan of downtown revitalization. Creating an even more significant presence in education and outreach serving all of the community with valuable arts opportunities, and leaving a lasting cultural legacy for generations to come. | Renaissance Performing Arts Association | 17 | 31 to 90 days | \$500,000 |
| Richland | Operation Bridge-Building | Improving civic involvement (income or non-income) opportunity area are: Homeless Youth, diverse talents, (children, seniors, anxiety, depression, Autism, ADHD, Clear Fork and Kenton). This program enhances classroom curriculum for grades K through 5 by engaging students and teachers with quality performing art programming by the Mansfield Symphony and direct, hands-on contact with nationally known Music Director Robert Franz. Program components of this program include: study guides, professional development workshops, in-school ensemble performances, and continuing in a Mansfield Symphony Educational Concert at the Renaissance Theatre. This three year project will enable these school districts to be able to participate in a program that provides professional development for teachers with integrated on-site and outreach activities with classroom visits by Robert Franz that impacts middle and high school band, orchestra and choral rehearsals for coaching and master class sessions free of charge. | Renaissance Performing Arts Association | 12 | 31 to 90 days | \$990,000 |
| Richland | Patrol Vehicle Replacement Project | This project addresses the acquisition of new patrol vehicles for the RCO. It will enable us to acquire new field units to replace ten (10) of our existing Patrol vehicles that are 3 or more years older and having in excess of 85,000 miles on them. Patrol policy has been to replace vehicles after 3 years of service, but due to a freeze imposed by our Board of County Commissioners for calendar year 2009, we cannot purchase new vehicles due to the county budget being the largest in the state. The county's budget is down 10% from 2008 to 2009 to \$27.5 million for 2009. Cars already made in our operating budget for 2009, and soon force the RCO to lay off 10 Deputies, one (1) Supervisor, and 2 permanent employees in our Records Section. | Richland County Sheriff's Office | | 91 to 180 days | \$200,000 |
| Richland | Village of Butler - Wastewater System Improvements | The construction of wastewater treatment plant improvements (including a new equalization basin), sanitary sewer extension, and a sanitary pump station for the purpose of Economic Development in the Village. The proposed wastewater improvements are required to serve a new commercial development that is to be developed in the Village. The proposed sewer system improvements are required to serve a new commercial development that is expected to provide the Village of Butler 200 new and permanent jobs. | K. E. McCartney & Associates, Inc. | 315 | 91 to 180 days | \$2,550,000 |
| Richland | Marvin Memorial Library Expansion | Expansion of existing library to include community multipurpose room, genealogy room, staff work area. Remodeling of existing library to include quiet study rooms and story time room with family restroom. The new addition will be 3,600 sq. ft. | Marvin Memorial Library | 3 | 0 to 30 days | \$800,000 |
| Richland | Village of Butler - Water System Improvements | Replacement of old and deteriorated water mains throughout the Village of Butler and a water main extension to increase pressure and water flow for the purpose of Economic Development in the Village. The proposed water system improvements are required to serve a new commercial development that is expected to provide the Village of Butler 200 new and permanent jobs. | Village of Butler- K. E. McCartney & Associates, Inc. | 294 | 91 to 180 days | \$2,000,000 |
| Richland | Copus Corner, LLC | Copus Corner LLC increase 6 employees with low income. | Copus Corner LLC | 6 | 31 to 90 days | \$100,000 |
| Richland | Filling the Gap | Upgrade current windows and doors to energy efficient windows, doors, and insulation to help reduce the cost of heating and cooling the buildings. Upgrade showers and install water saving fixtures to both save money and help the environment. | Crossroads Center for Change | 10 | 31 to 90 days | \$80,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Richland | Small Community Diagnostic Clinics & Research Test | Diagnostic clinics and research testing centers spread throughout the state of Ohio in non-metro, small population communities. Funded by partnerships with 15 local community hospitals spread through all corners of the state. IRC-Ohio contracts with pharmaceutical companies that agree to provide free treatment to patients in exchange for exclusive marketing and development rights to partner hospitals. IRC-Ohio provides a rapid, turn-key, open, single-use diagnostic platform for partner hospitals including equipment, training and ongoing administrative functions. In exchange for Federal Stimulus money, IRC-Ohio will create up to 455 high-paying jobs in many of the most economically depressed areas of the state. All of the jobs created will be new positions and encompass areas of health care services, clinical research, information technology & administrative support. The jobs created will enable individuals with no prior experience to acquire new, marketable skill sets. | IRC-Ohio, LLC | 450 | 0 to 30 days | \$2,125,000 |
| Richland | St. Blaise of the Piney Woods Catholic Retreat Cen | Future income tax will offset Federal Stimulus money that IRC-Ohio receives. The Stimulus Money would be used to purchase a beautiful, wooded 16 acre parcel with an existing house (owned by myself) in Plymouth Township, Richland County, to be made into a Catholic Retreat Center. The purchase price of the property is only \$230,000 and the costs of constructing cabins, installing sewer, water and electric to the cabins, painting driveways and walkways and adding recreational facilities would be covered by "donor" money of \$300,000. The balance of the funds received for this project would be used to purchase buses that would transport senior participants from Toledo and other cities to this scenic, rural, outpost. The buses would be powered by natural gas, or aquifers, whichever would have less of a harmful impact on the environment. All of the infrastructure created with this project would be donated by Meane Limited to Bishop Leonard Blair of the Diocese of Toledo for his use and enjoyment. Funds will be used to assist in the purchase and installation of the infrastructure on a currently closed ski resort in Butler, Ohio, which previously employed 200 people, mostly seasonal and part time. Additional private investment of over \$300,000.00 will be made on the project to expand the operation to a year round vacation destination. The full time operation of the resort will employ over 200 full time employees on site, create additional support businesses, and greatly increase the tourist revenue in the North Central Ohio area. The existing ski resort has been maintained, and is ready for immediate operation. However, to make it financially viable, hotel and other amenities will need to be added, which are not part of this request and will be funded privately. It is also important to understand approximately 125 people, in addition to the numbers mentioned above, for construction and related development activities. The ultimate goal of this project is to revitalize the economy of the Clear Fork/Medican area by capitalizing on the many recreational and tourism amenities in the area. The stimulus funding being requested is a critical component. 3,171 linear feet of water lines with valves, hydrants, and water services to replace sections of existing 4" and 6" abseccement and copper pipes. | Meane Limited | 16 | 31 to 90 days | \$1,462,977 |
| Richland | Clear Fork Resort | The existing ski resort has been maintained, and is ready for immediate operation. However, to make it financially viable, hotel and other amenities will need to be added, which are not part of this request and will be funded privately. It is also important to understand approximately 125 people, in addition to the numbers mentioned above, for construction and related development activities. The ultimate goal of this project is to revitalize the economy of the Clear Fork/Medican area by capitalizing on the many recreational and tourism amenities in the area. The stimulus funding being requested is a critical component. 3,171 linear feet of water lines with valves, hydrants, and water services to replace sections of existing 4" and 6" abseccement and copper pipes. | Clearfork Resort Partners | 200 | 0 to 30 days | \$3,842,750 |
| Richland | water Line Improvements | 3,171 linear feet of water lines with valves, hydrants, and water services to replace sections of existing 4" and 6" abseccement and copper pipes. | Village of Plymouth-W. E. Quicksall & Associates, Inc. | 10 | 91 to 180 days | \$1,207,200 |
| Richland | NEW BEGINNINGS DRUG AND ALCOHOL TREATMENT PROGRAM | PRESENTLY THERE IS A 30-60 DAY OF PATIENTS WAITING TO GET INTO TREATMENT THE CURRENT PROGRAM IS BOTH AN OUTPATIENT PROGRAM AND A HALF WAY HOUSE WITH AN INPATIENT TREATMENT PROGRAM LAST YEAR THERE WERE 8 DRUG FREE BABIES BORN AT THE HALFWAY HOUSE ALONG WITH 16 OTHER PATIENTS TREATED THERE LAST SUMMER OPRAH WINFREY AND ISA LING DID A NATIONAL PROGRAM ON THE DRUG PROBLEM IN THE RICHLAND COUNTY AREA BECAUSE OF THE FUNDING PRESENTLY WE ARE ONLY ABLE TO ADMIT 7-8 PATIENTS INTO THE HALFWAY HOUSE AT ANY GIVEN TIME IF WE WERE TO RECEIVE ADDITIONAL FUNDING WE COULD ADMIT UP TO 14 OR 16 PATIENTS AT ANY ONE TIME | REHABILITATIONS SERVICES OF NORTHCENTRAL OHIO | 4 | 0 to 30 days | \$500,000 |
| Richland | Mifflin Township Cemetery Refurbishing | This project would consist of enlisting professional Monument personnel to repair or refurbish deteriorated headstones and monuments in 4 Township owned cemeteries. Many of the headstones have been damaged due to storms and age. They present a safety concern for visitors, as well as an historic, vista impact. Funding for this from a local level is minimal at best, as mowing and basic maintenance usually depletes all resources that are allocated for cemeteries. | Mifflin Township Road Department | 5 | 31 to 90 days | \$20,000 |
| Richland | Culvert pipe and conduit replacement | This project will replace several existing deteriorated galvanized steel conduit pipes with plastic or aluminum conduit. It will replace existing pipes with the same or larger diameter pipe to provide efficient drainage on township roads and rear right of ways. Installation of pipe will be completed on all roadways that are going to be resealed so as to minimize impact to road system. | Mifflin Township Road Department | 4 | 31 to 90 days | \$150,000 |
| Richland | Mifflin Township Asphalt Paving Project 2009 | This project would encompass 40.33 miles of asphalt resurfacing on existing township roads. Project would cover 418.16 square yards and would require 41,250 tons of hot mix asphalt. This would bring all roads involved up to standard for a extended minimum of seven years. The work will be replacement of existing pavement surface course and will require no new right of way. Environmental clearance should not present a problem. | Mifflin Township Road Department | 30 | 31 to 90 days | \$2,541,835 |
| Richland | Training Workers to Advance -A Formula for Economi | The Richland County Board of Commissioners & Richland JFS are requesting \$840,000 to continue and broaden the very effective workforce training pilot programs recently completed in EDR 48. We seek to provide cost effective, flexible, customer driven, incumbent and displaced worker training in Advanced Manufacturing, Health Care, Information Technology, and Alternative Energy. We expect to achieve the following result. Thousands of workers will receive valuable, certificate based training. Substantial wage increases for many. Outstanding new job creation and job retention. Increased corporate competitiveness, productivity, and profitability. "Corporate matching conditions" appropriate for today's circumstances. Simple, effective reporting/less red tape. Numerous public/private training collaborations. Remarkable RETURN FOR INVESTMENT for everyone. | Richland County Board of Commissioners/Job & Family | 90 | 0 to 30 days | \$640,000 |
| Richland | Greenfield Datacenter | Purchase and build a new Technology Data Center to support health system operations. As we migrate to fully digital technology, our current data center located in the basement of an old college dormitory in 1920 is no longer able to keep pace with the power, cooling and overall computing demands that will be placed on it. We will be required to purchase additional property adjacent to the hospital and build a new facility. Additionally, we have maximized the local power grid and will require an electrical substation for use to provide redundant feeds for disaster planning purposes. Jobs created will be in utilities, construction, healthcare and technology sectors. | MedCentral Health System | 100 | 181 days or more | \$5,000,000 |
| Richland | Mid-Ohio Regional Health Information Organization | Development of a Mid-Ohio Regional Health Information Organization (RHIO) that will handle the exchange of healthcare information for patients. These entities are the backbone of the premier President Obama is proposing in the ARRA package to reduce healthcare costs via administrative simplification and standardization. This RHIO will link organizations from Cleveland to Columbus and between to enable security transferal of patient information to speed treatment, reduce duplicate testing and improve outcomes. The Mid-Ohio RHIO will also link to an existing organization in NEC. Ohio is already lagging behind other states, such as Indiana, California, and Michigan who already have similar infrastructure in place. | MedCentral Health System | 250 | 181 days or more | \$2,500,000 |
| Richland | Community Electronic Health Record | Build out our Electronic Medical Record capability to support physicians in our 5 county service area. There are numerous studies and documentation supporting the use of electronic health records reducing expenses and improving quality of care. Most physicians in our area are single practitioners who are currently struggling to break even as small business people and cannot afford to invest in this technology. Electronic Health Records are a cornerstone of the administrative savings and additional reimbursement being proposed in the ARRA by the Obama administration. This capability will also assist in recruiting physicians to our area and Ohio that are badly needed to support our community - there is an extreme shortage of physicians, including primary care, in our community. | MedCentral Health System | 100 | 181 days or more | \$1,500,000 |
| Richland | Housing Rehabilitation Program | The project has two goals. The first goal is to purchase old, dilapidated houses, focusing on older neighborhoods in transition. These houses would be gutted and remodeled with new materials. Renovations would include plumbing, electrical, mechanicals, roofing, siding, lead abatement, interior walls, kitchen, appliances, etc. The goal is to improve affordable housing stock in older neighborhoods. The second goal would be to purchase houses that are beyond repair, tear them down, and build new housing stock. This too, would improve the amount of decent housing stock available in older neighborhoods. A bulk of the housing would be sold to the general public, while a lesser amount would be retained for the purpose of renting to lower income families. The funds would be spent over the course of about 2 to 3 years. All work would be performed by local contractors, giving skilled tradesmen steady work for at least a few years in an area that has seen a collapse in home construction and repair. It is estimated that these funds could help about 15-20 workers in the home repair construction and sales industries keep their jobs. Project will include paving with hot or cold asphalt to level roadways and repair deteriorated sections of roadway. The project will encompass about 30 miles of the Township road system. It will include utilizing crews from paving and chipseal contractors located within local area. As material and labor costs increase, local government entities are able to lose every year to keep up with infrastructure demands. We would expect all aspects of the project to be completed by the end of summer. Environmental clearance will not be an issue as we are recovering existing build out. | Labrador Holdings, LLC | 15 | 0 to 30 days | \$5,000,000 |
| Richland | 2009 Township Resurfacing Project | Project will include paving with hot or cold asphalt to level roadways and repair deteriorated sections of roadway. The project will encompass about 30 miles of the Township road system. It will include utilizing crews from paving and chipseal contractors located within local area. As material and labor costs increase, local government entities are able to lose every year to keep up with infrastructure demands. We would expect all aspects of the project to be completed by the end of summer. Environmental clearance will not be an issue as we are recovering existing build out. | Monroe Township | 15 | 31 to 90 days | \$750,000 |
| Richland | Underground storage tank clean up | In 1990 underground storage tanks were removed from our facility where the Township Road Fire and E.M.S. departments are located. The Township Administration at that time, not fully understanding or due to lack of information from other governmental agencies, never completed the environmental cleanup of contaminated ground. The Township was informed in December of 2008 that the action was taken against them from a state level. This project has to be completed to come into compliance with the BUSTE division of the State Fire Marshal's office. This is not a project that we had any idea we would be undertaking until the first of this year. We would expect to have everything cleaned up and approved by mid summer 2009. | Monroe Township | 10 | 0 to 30 days | \$50,000 |
| Richland | Remote distribution of clinical data | The creation of a virtual desktop infrastructure whose end purpose would be to deploy secure mobile devices to physicians to utilize for remote access to patient information systems from any location that has internet connectivity. This will allow physicians to review patient data as if they were inside the hospital and give them the flexibility to respond to patient needs seamlessly. | MedCentral Health System | 10 | 91 to 180 days | \$150,000 |
| Richland | Disease Management Programs | Create disease management programs for congestive heart failure and diabetes. These two diseases are projected to skyrocket in occurrence over the next 10 years and disease management programs are proven to reduce hospital associated admissions. The programs will allow rural and underserved populations in our 5 county market communicate directly with clinicians who will assist them in managing their disease without necessarily coming to a care location. Remote monitoring of these diseases and the monitoring of the treatments is essential to successful outcomes and improving the quality of life for those affected. Create a linkage for patients to have a personal health record (PHR) from the internet. We will use Microsoft's HealthVault as the starting point, linking in patient to physician communications for distribution of data. | MedCentral Health System | 50 | 91 to 180 days | \$300,000 |
| Richland | Personal Health Records | Personal health records will contain results, interpretations, direct linkage to certain medical device to populate data, and other items required to provide medical care. Patients then control access to their PHR as they travel between care providers to have a truly portable electronic medical record without having the need to carry paper or other means of recording data. This increases security and reliability of the information. | MedCentral Health System | 5 | 91 to 180 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Richland | TRAINING AND FUNDING | WE ARE A LOCALLY, FAMILY OWNED SMALL PHARMACY, AND HOME MEDICAL EQUIPMENT SUPPLIER NEEDING TRAINING FOR ACCREDITATION REQUIREMENTS AND FUNDING FOR DEBT INCURRED BY LACK OF PROMPT PAYMENT BY INSURANCE COMPANIES FOR SERVICES PROVIDED AND BACK PAYMENTS TO MEDICINE SHOPPE CORPORATE. WE ARE IN SEVERE DANGER OF HAVING TO LAY OFF EMPLOYEES AND ALSO CLOSING OUR BUSINESS DUE TO LACK OF FUNDS FOR THESE REASONS. WE HAVE LOST OVER A MILLION DOLLARS IN BUSINESS DUE TO THE CLOSING OF MANY BUSINESSES HERE IN THE RICHLAND AND ASHLAND COUNTY AREA. | THE MEDICINE SHOPPE #1070 | 25 | 0 to 30 days | \$250,000 |
| Richland | Put 'em to Work!!!! | 10-10 new jobs in Ohio to begin and yearly increases of ten per year each following year. These jobs would provide one million dollars of new income to Ohio as a collective whole | Luken's Lawn Care | 50 | 31 to 90 days | \$627,000 |
| Richland | Improving Math Instruction for 21st Century Skills | Creativity and innovation are two key skills needed for jobs in the 21st century. Such creativity and innovation, particularly in science and technology, can only take place with a solid foundation in math, particularly in advanced math, that is the ability to reason mathematically beyond arithmetic skills. The development of such skills currently rests with elementary teachers who are in the real need of training in how to teach math reasoning as they provide students with basic arithmetic. This can be best accomplished by providing math specialist/teacher leaders that demonstrate how such instruction takes place and assist teachers in planning math lessons. The Mathematics Coach/Teacher Leader will: <ul style="list-style-type: none"> Model instructional and assessment strategies in classrooms for teachers; Team-teach with teachers; Demonstrate technology integration Provide professional development for teachers through pre- and post- conference sessions of lessons, analysis of student work and assessment data and discussion of research-based best practice; Assist teachers in learning math content, pedagogy and assessment strategies to improve student learning and understanding. | Mid-Ohio Educational Service Center | 60 | 31 to 90 days | \$1,600,000 |
| Richland | Richland County Property Tax Relief | I would like to work in tandem with the Richland County Treasurer's office to distribute monies for homeowners(including myself) who are behind/in default in property tax payments due to insufficient income. Funds are especially needed for those in danger of losing their homes via Sheriff's sale. I only need a small portion of the request for myself. The Treasurer's office could considerately distribute funds back to homeowners for homeowners with the most need, so that they may keep their homes! | Property Tax Relief Organization | 0 | 0 to 30 days | \$25,000 |
| Richland | North Central Ohio Community Alternative Center | An estimated 38,000 inmates will be released from prison in Ohio alone. Limited community resources, coupled with the fact that many of these offenders will have no permanent residence, no job, and few skills, has led to reduced relative relative to community reintegration. As a result, many re-offend and reenter prison. Jail, too, are overcrowded as non-violent offenders awaiting trial baffle jail populations. These trends impact the functionality of the entire criminal justice system. The Richland County Adult Court Services has implemented a series of programs that have proved effective to reduce prison and jail populations. The Community Alternative Center, a 60-bed residential facility, has been an effective alternative to prison or jail. The program has successfully diverted over 2,100 offenders from prison by providing a multitude of services and collaborating with reworking agencies to ensure offender needs are met. Although successful, the evolution of today's offenders requires the use of the most effective methodologies and evidence-based practices. Our funding request will allow a 30-bed reentry expansion and enhancement of reintegration services through the acquisition of specially licensed and trained staff. The funding request will also assist in the development of 21st Century Skills with a focus on creativity, critical thinking, communications and collaboration in the context of instructional technology. Innovation: Building off the successes of coaching programs throughout our state and nation, this program will connect with districts, businesses, universities, and community members to work as a team in the development of 21st century learners in 9th-12th classrooms. This program will provide a collaborative process for teachers, local businesses/universities, and community members, and regional educators to assist in the development and implementation of contextual technology-enhanced lessons and teaching/instructional methods, based on actual applications of technology in today's world. It will also provide a framework for sustained professional development by 1) creating structures within the school/department to ensure professional development; 2) developing meaningful relationships between multiple regional stakeholders; 3) fostering creative thinking and creative applications of available resources to keep US teachers and students on the cutting edge of the world's most rapidly changing and information-rich marketplace. 1) Removal of old asbestos roofing and proper disposal of hazardous waste according to OSHA and EPA standards. 2) Installation of 8,097 square feet of new roofing on church that meets current government regulations. 3) Installation of new water meter and separate local water system currently owned and operated by original developer. Developer is in his 80's and looking to retire. Project will be setting up a business and purchasing and operating water system. Water system is aged and would need updating to maintain EPA compliance. | Richland County Adult Court Services | 25 | 0 to 30 days | \$300,000 |
| Richland | 21st Century Technology Teaching Teams | Innovation: Building off the successes of coaching programs throughout our state and nation, this program will connect with districts, businesses, universities, and community members to work as a team in the development of 21st century learners in 9th-12th classrooms. This program will provide a collaborative process for teachers, local businesses/universities, and community members, and regional educators to assist in the development and implementation of contextual technology-enhanced lessons and teaching/instructional methods, based on actual applications of technology in today's world. It will also provide a framework for sustained professional development by 1) creating structures within the school/department to ensure professional development; 2) developing meaningful relationships between multiple regional stakeholders; 3) fostering creative thinking and creative applications of available resources to keep US teachers and students on the cutting edge of the world's most rapidly changing and information-rich marketplace. | The Ohio State University-Mansfield | 25 | 91 to 180 days | \$600,000 |
| Richland | New church roof | 1) Removal of old asbestos roofing and proper disposal of hazardous waste according to OSHA and EPA standards. | St. John's United Church of Christ | 25 | 31 to 90 days | \$275,000 |
| Richland | Purchase private owned water system | 2) Installation of 8,097 square feet of new roofing on church that meets current government regulations. | private | 2 | 91 to 180 days | \$350,000 |
| Richland | Richland County Diversion Programs | 3) Installation of new water meter and separate local water system currently owned and operated by original developer. Developer is in his 80's and looking to retire. Project will be setting up a business and purchasing and operating water system. Water system is aged and would need updating to maintain EPA compliance. | Richland County Adult Court Services | 25 | 0 to 30 days | \$312,000 |
| Richland | Plymouth Locomotive, Cummins Bridgeway, Clean Fuel | In Ohio, approximately 38,000 inmates will be released from prison. Limited community resources, coupled with the fact that many of these offenders will have no permanent residence, no job, and few skills, has led to reduced relative relative to community reintegration. As a result, many re-offend and reenter prison. Jail, too, are overcrowded as non-violent offenders awaiting trial baffle jail populations. These trends impact the functionality of the entire criminal justice system. The Richland County Adult Court Services comprises a series of diversionary programs that have proved effective to reduce prison and jail populations. The Community Alternative Center, a 60-bed residential facility, has been an effective alternative to prison or jail. The program has successfully diverted over 2,100 offenders from incarceration by providing a multitude of services and collaborating with reworking agencies to ensure offender needs are met. Although successful, the evolution of today's offenders requires the use of the most effective methodologies and evidence-based practices. Our funding request will allow a 30-bed reentry expansion and enhancement of reintegration services through the acquisition of specially licensed and trained staff. The funding request will also assist in the development of 21st Century Skills with a focus on creativity, critical thinking, communications and collaboration in the context of instructional technology. This program's partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering two locomotive switchers. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 10 | 0 to 30 days | \$200,000 |
| Richland | Expansion of information line and broadband | The Mansfield Richland County Public Library proposes to renovate a recently purchased building across the street from the Main Library. The front street level of the building will house First Call of Richland County, a program that is a partnership between the Library and Richland County Job & Family Services. This program gives referrals via the phone and in person for vital human services including but not limited to jobless, food, and rent assistance for the general public. There has been a 71% increase in calls from 2007 to 2008. This will increase the visibility and access of the program. The rear of the building will be used to house a non-public department of the library that is on the ground floor of the Main Library. The existing ground floor space of the Main Library will be renovated to include a new public computer lab. Members of the public will be able to access the Internet, apply for unemployment and employment. Classes will be held to teach the public office software. | Mansfield/Richland County Public Library | 25 | 31 to 90 days | \$656,910 |
| Richland | Education Technology Improvement | The purpose of this project is to create a technological upgrade in the Middle School with an addition of a new network hub as well as the creation of two computer labs to prepare middle school students for competition in the Ohio job market. This technology upgrade will allow them to access interactive websites as well as tutoring tools that will keep education in Shelby, Ohio to the cutting edge that other districts enjoy in the state of Ohio. By adding technology at the Middle School level, students will be able to better prepare for the rigors of college success as well competing with comparable school districts for better test scores, and for our special education students to have the opportunity to meet AYP. While this goal is not an immediate one, it is a goal that is near to the heart of the school's economic progress and vision. | Shelby Middle School | 0 | 31 to 90 days | \$50,000 |
| Richland | YES Employment and Training Center (Youth Empower) | This project proposes to develop 2,250 square feet of unfinished space in the Mid Ohio Conference Center into the Richland County YES Center (Youth Empowerment for Success). The YES Center will provide training and employment services to Richland County youth between the ages of 16-21. The YES Center will offer the following services: Job Search, Employability Skills Training, Resume Writing, Life Skills Training, Service Learning, Leadership Development, and Math/Reading/Language Intervention. Project costs include: creation of 2 full-time Social Work positions, and purchase of appropriate technology and supplies to provide training and employment services. Project outcomes include: youth placement in employment or post-secondary education; youth completion of diploma/GED/industry; and youth increase basic skills of Math/Reading/Language. | Mid Ohio Educational Service Center | 10 | 31 to 90 days | \$270,000 |
| Richland | Richland County Recreational Revitalization | This project would create an additional recreational benefit to the current members of the Mansfield YMCA and to the community at large. Currently at this time there are no such parks in North Central Ohio and this project is a result of the Mansfield YMCA's ability to change and be creative in order to better meet the needs of the community it serves. For the past 141 years the Mansfield YM has been a part of the healthy part of the people of Mansfield residents. There is concern over the decrease in participation in health/physical activity of residents of Richland County during the summer months of the Y. The Water Park will utilize energy efficient practices and enhance healthy lifestyles for the community and provide the youth and students in the area who need to have a safe and secure place to exercise and enjoy recreational activities when schools are no longer in session. This Water Park will provide an even more significant presence in the recreational aspects of the entire community and become a major destination for residents during the summer months. This Water Park will be a factor in revitalizing Mansfield and increase the family friendly community environment. | Mansfield Area Y | 50 | 31 to 90 days | \$560,000 |
| Richland | Community development | Rehabilitating of vacant building with the addition of restaurant business to create jobs and community improvement. Priority: The SCTC Project will assign one full time "Certified Crime Analyst" with one support clerk to evaluate crime and other relative data to assist agencies in the deployment of law enforcement and support resources. This will include focused efforts on strengthening violent crime and theft which are high priority. The project will also include a strategy to create a central database to track stolen property, not only as a way to regain violent crime cases, but also to properly return the assets to their rightful owners. Secondary goals will include reducing Part I Crime by mapping and identifying hot spots throughout our communities as well as providing similar information to the "METRO" Task Force and as well as the "METRO" Task Force Training Patterns and Drug Trafficking Organizations. Advanced mapping objectives will include layering wanted persons in an effort to remove those with multiple and violent crimes from our neighborhoods. This project would work closely with Analysts from the Fusion Center, ATF and US Marshal | Sorrenti Brothers | 10 | 0 to 30 days | \$20,000 |
| Richland | SCTC (Safe Communities Through Collaboration) | The Shelby Whippoorwill Band has a storied tradition. Serving students in grades 6 - 12 of the Shelby City Schools, the Instrumental Music program is an award winning source of community pride. Many instruments have been used throughout the program for over 40 years. No funds have come from the Shelby City Schools Board of Education to support instrument purchases, repair or replacement for nearly seven years due to constraints of "Fiscal Emergency". Our Band Parents organization has been the sole supporter of our program during this time. We must replace six saxophones at a cost of 29,000 dollars and would like to initiate a percussion ensemble program by adding several mallet instruments at a cost of 15,000 dollars. Additional funds would be used to replace various "other" instruments throughout the band program. Thank you for your consideration. We look forward to hearing from you. | Mansfield Division of Police | 2 | 0 to 30 days | \$95,000 |
| Richland | The SWB Instrument Replacement Project | The Shelby Whippoorwill Band has a storied tradition. Serving students in grades 6 - 12 of the Shelby City Schools, the Instrumental Music program is an award winning source of community pride. Many instruments have been used throughout the program for over 40 years. No funds have come from the Shelby City Schools Board of Education to support instrument purchases, repair or replacement for nearly seven years due to constraints of "Fiscal Emergency". Our Band Parents organization has been the sole supporter of our program during this time. We must replace six saxophones at a cost of 29,000 dollars and would like to initiate a percussion ensemble program by adding several mallet instruments at a cost of 15,000 dollars. Additional funds would be used to replace various "other" instruments throughout the band program. Thank you for your consideration. We look forward to hearing from you. | Shelby Band Parents | 0 | 0 to 30 days | \$50,000 |
| Richland | Perinatal Service Unit | Service unit. Despite our current financial challenges amidst our nation's economic crisis, we feel it is essential to move forward with this project to better serve our patients. This is a proven ready project that is over 20,000 square feet that has a 20-40 construction workers for a period of over 12 months. This project would include new permanent employment of staff of 8 direct care personnel. The health system typically has 1,400 deliveries per year. The unit would include technology to provide, among other things, Central Line Monitoring capabilities. Currently services are not able to observe the fetal monitoring strip continuously from a remote area. Many of the dollars earmarked for technology in this area will assist in the continued development of an electronic health record for this particular service line. | MedCentral Health System | 68 | 0 to 30 days | \$3,500,000 |

|----------------|--|--|---|----------------|--------------------|---------------------------|
| Richland | Green and Clean Trash removal | Convert existing vehicles to bio-diesel as well as adding new bio-diesel vehicles to fleet, implementing a reduced cost service for customers through leasing as an incentive. Providing the opportunity for employment to assist and implement this service, as well as an incentive for research in the recycling and waste reduction needs for the environment. | B&C Rubbish | 5 | 91 to 180 days | \$750,500 |
| Richland | Bubba's | Establishment of the auto wash and repair services to people of low income that can not obtain a loan by other means and to supply them with energy saving auto's with no interest on these loans and And I plan to put six person that are unemployed or are on welfare to work and to trained them to learn the auto sales and repair services. | Bubba's Used Cars | 6 | 31 to 90 days | \$62,000.00 |
| Richland | Crime Lab Project | The crime lab project will hire two (2) employees to fill two (2) vacant positions. The overtime request will maintain two (2) current positions for benching work. The project request will purchase three (3) new crime scene response vehicles and purchase needed crime lab processing equipment. The project will pay for subcontracted crime lab processing, DNA and drug testing. The project request will pay for the renovation reconstruction of an existing structure for crime lab processing and evidence storage. | Richland County Sheriff's Office | 2 | 0 to 30 days | \$458,400.00 |
| Richland | Sex Offender/Victim Program | Family Life Counseling established a new Sex Offender Sex Victim (survivor) Counseling Program. Family Life Counseling will be certified to provide the services and work in collaboration with the Richland County Juvenile Court. This will not only create a much needed service, but also create at least four new jobs with the agency. | Family Life Counseling & Psychiatric Services | 4 | 31 to 90 days | 100,000.00 |
| Richland | CIVILIAN STAFF | THIS PROJECT IS TO HIRE A CIVILIAN AND CROSS TRAIN THIS PERSON IN A NUMBER OF DIFFERENT JOBS. THIS PERSON WOULD ACT AS A DISPATCHER FOR OUR VILLAGE. WOULD TAKE THE ROLL TO TALKING WITH THE COUNTY AND VILLAGE PROSECUTOR MAKING SURE CASES ARE FOLLOWED UP ON AND WOULD BE SPEAKING WITH THE VICTIMS OF CRIME TO INSURE THAT ALL INFORMATION WAS RECEIVED. THE CURRENT PROBLEM WE HAVE IS WE ARE DISPATCHED OUT OF A COUNTY CALL CENTER. THE PEOPLE OF THE VILLAGE FIRST HAVE TO CALL THE STATION AND IF THERE IS NO ONE THERE THEY CALL THE COUNTY. IF THE CALL IS NOT A 911 CALL IT CAN BE PLACED ON THE BACK OF THE LIST. DO TO OUR COUNTY DISPATCHERS FOR THEM SELF ALONG WITH THREE OTHER VILLAGES. THE CURRENT WAY WE EVERYONE LEAVES A MESSAGE AND WHEN THE OFFICER COMES IN OFF THE ROAD THEY CHECK THE MESSAGES. ON THE ITEMS THAT DEMAND A LOT OF TIME, THAT TAKES THE ONLY OFFICER ON DUTY OFF THE ROAD. WITH THIS PERSON OUR DEPT. WILL BE MORE EFFECTIVE IN FIGHTING CRIME AND WILL BE ABLE TO SERVE THE VILLAGE NEEDS BETTER. | BELLVILLE POLICE DEPT | 1 | 31 to 90 days | 19284 |
| Richland | CRIME SCENE INVESTIGATION | THE PROJECT IS TO HIRE ONE FULL-TIME OFFICER AS A CRIME SCENE TECH. WITH THIS PERSON WE WOULD BE ABLE TO CALL THIS PERSON OUT WHEN NEEDED. THIS PERSON WOULD ALSO PROVIDE SUPPORT TO OUR NEIGHBORING VILLAGES (AS WE ARE RURAL AREAS THROUGHOUT OUR MUTUAL AGREEMENTS WE CURRENTLY HAVE A PART-TIME OFFICER WILLING TO TAKE THIS ROLE AND HAS MANY YEARS WORKING IN A CITY CRIME LAB. HOWEVER WITH THE CURRENT DOWN TURN IN THE ECONOMY, THIS PART-TIME PERSON ONLY WORKS A TOTAL OF TEN HOURS A WEEK. WE HAVING AN TRAINED OFFICER ALWAYS ON CALL, WE WOULD BE ABLE TO GET THE PROPER EVIDENCE COLLECTED, NOT ONLY SOLVING THE CRIMES OF OUR VILLAGE BUT THAT OF OUR NEIGHBORING VILLAGES WAS WELL. | BELLVILLE POLICE | 1 | 0 to 30 days | 19284 |
| Richland | Richland County Drug Court Expansion Program | Retention and re-hiring of employees in municipal probation department and treatment facilities. Funding to support treatment as agencies are having funding reductions but continue to have increased number of persons needing treatment for alcohol and drug related issues. Funding specifically will support programming to those involved in specialized dockets including Drug Court, DUI Court, and Domestic Violence Court. | New Beginnings/The Rehab Center | 6 | 0 to 30 days | 500,000 |
| Richland | IN CAR CAMERAS | INSTALL ONE CAMERA IN PATROL VEHICLE WHICH CURRENTLY IS WITH OUT, AND UPDATE OUR OLD OUT OF DATE IN CAR CAMERAS WITH CURRENT MODEL WHICH WILL GIVE US THE ABILITY TO VIEW FROM ANY COMPUTER ALONG WITH PROVIDING THE ABILITY TO PROSECUTORS OFFICE WITH A CLEAR PICTURE OF FOOTAGE TAKEN AT THE SCENE. | BELLVILLE POLICE DEPT. | 0 | 0 to 30 days | 30,105.25 |
| Ross | State Route 104 Widening | State Route 104 is currently a 2 lanes between US Rt. 30 and the new State Route 207 extension to US Rt. 23. This road has two state stations and a VA hospital along with being the connector between US Rt. 30 and US Rt. 23. It serves as a northwedge in Chillicothe. The project consists of widening of approximately 3 miles of roadway from two to four lanes. It also provides for additional signals at two intersections and extending of Pleasant Valley Road. Additionally, entrance to the two state stations will be upgraded. One of the signals will serve Mountville Road which is a main artery for Union Schools, one of the largest districts in the county. The other signal will serve Clayco Industrial Park which is currently home to three businesses and a small building which is used to recruit new business to the area. The upgrades will allow for safe travel of state, federal and local employees of existing businesses. In addition of new businesses in the industrial park. It will also ensure the safety of the traffic moving to and away from the school. The project is listed on the TRAC and has over \$1.5 million in local apptes. | Ross County Commissioner | 1800 | 31 to 90 days | \$2,000,000 |
| Ross | County Road 207 Repair & Resurfacing | Repair and resurfacing of Ross C.R. Road 207 also known as Pleasant Valley Road. This road is classified as a Major Collector in our roadway system. Improvements will be for safety and preservation. | Ross County Engineer's Office | 40 | 91 to 180 days | \$722,000 |
| Ross | County Road 207 Repair & Resurfacing | Repair and resurfacing of Ross C.R. Road 35 also known as Old U.S. 35. This road is classified as a Major Collector in our roadway system. Improvements will be for safety and preservation. | Ross County Engineer's Office | 40 | 91 to 180 days | \$865,000 |
| Ross | County Road 207 Repair & Resurfacing | Repair and resurfacing of Ross C.R. Road 550 west of S.R. 138. This road is classified as a Major Collector in our roadway system. Improvements will be for safety and preservation. | Ross County Engineer's Office | 40 | 91 to 180 days | \$582,000 |
| Ross | Township Rd.236 Widening | This project is identified in our most recent Transportation Plan. It includes profile changes, widening, resurfacing, and relocation work with R.R. 160. This road is a critical connector road in our community for industry, and commuting. | Ross County Engineer's Office | 65 | 181 days or more | \$1,000,000 |

| Ross | Main/Central Library Renovation and Addition | The project will renovate the existing 11,000 sq. ft. Main Library and the approximately 20,000 sq. ft. former Central School, on the same site, and connect them with a new Commons Area. The project provides 100 parking spaces, a new 4,000 sq. ft. children's library, a Career and College Center, and a new Business Services Area as well as group study room, tutoring space, and technology training room with additional computers for the public to use for job search, online education, and increasing social services, among other things. The project also provides almost 7,000 sq. ft. of flexible meeting room spaces for community use. The library will employ newer and "green" technology for operational efficiency and provide some operations from the Northside Branch's services savings through consolidation of administrative offices at the Main/Central site. Some minor renovations of the Northside Library Branch will be done to convert former administrative offices in that location to public use including more room for computers and books. All land purchase, planning, design, and some site prep and demolition has been done. Engineering cost part in 10 days and foundation work in 90 days. | Chillicothe and Ross County Public Library | 50 | 0 to 30 days | \$7,831,000 |
| Ross | Ross County Historical Society Historical Collect | The Ross County Historical Society is currently planning the construction of a museum conservation facility. To provide a climate controlled environment for the care and storage of its historical museum collection. The approximately 2,800 square foot facility will be constructed on the organization's grounds at 45 West Fifth Street in Chillicothe, Ohio. It will house all of the support operations necessary for maintaining more than 30,000 artifacts connected with the history and pre-history of Ross County and southeastern Ohio. The project will replace an older deteriorated structure with a state of the art, energy efficient, environmentally friendly structure that will protect the cultural resources maintained by the historical society on behalf of the citizens of the county well into the 21st century. The daily operations performed there will employ one full-time, professional museum curator and four part-time museum support staff. It is estimated that the construction project will employ approximately 15-20 skilled trades people, a contract manager with support staff, and three architectural professionals during the design and construction phases of the project. | Ross County Historical Society | 10 | 91 to 180 days | \$200,000 |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Ross | State Route 104 Widening | For the past several years Ross County Local Government has worked to develop plans, gain archaeological and environmental clearance, secure right-of-way, and secure funding for the widening of SR. 104 from U.S. 36 to the north entrance of the Veterans Administrative Hospital. This section of SR. 104 spans an 8.5-mile stretch, from State Prison, Hospital Culture National Historic Park, The Veterans Hospital, Mountolive Road Intersection (old road to Linton High School and Junior High School) and is the most efficient route for Chillicothe-west side residents and Ross County west end residents to the Adena Medical Center and access to the U.S. 23 North. Ross County has invested over \$1.5 million on plans and clearance for the project. We have also worked on securing funding of up to \$11.9 million to construct this project. This widening project was identified as one of the top priorities on our 1998 Thoroughfare Plan and it is ready for construction. Our request to you is for help in securing funds to account for any costs in excess of the money we have committed. | Ross County Engineer's Office | 100 | 91 to 180 days | \$2,000,000 |
| Ross | Southern Ohio Telemedicine & Continuing Medical Ed | 20 health care providers in 9 rural, poverty-stricken Southern Ohio counties (Athens, Fayette, Galia, Highland, Jackson, Lawrence, Meigs, Pike & Putnam) will be outfitted with mobile video conferencing/telemedicine capabilities for patient consults and Adena Ambulatory Care/Professional web-conferencing capabilities for staff continuing medical education and community health literacy programs. Adena Health System's PACCCAR Medical Education Center, in Chillicothe, will act as the hub for this telemedicine network. However, the end-user clinics are free to consult with medical professionals across the country via the Southern Ohio Health Care Network's fiber broadband network. Bringing telemedicine to Appalachian Ohio improves quality and continuity of care, while decreasing costs for patients who can least afford expensive visit and payments. | Adena Health System | 18 | 31 to 90 days | \$1,100,000 |
| Ross | Green Industry and Waterway Landscaping | Goals are to continue to enhance and build a show / system model by offering discounts to consumers who will in turn invest in improving our natural eco-system while increasing aesthetics and property values. We will use funds to create models for demonstration and materials that can be applied to on site establishment. Hopeful outcome will be job creation, improved waterways, aesthetics and environmental protection of our streams and waterways. | Scioto Lawn & Landscape | 15 | 31 to 90 days | \$25,000 |
| Ross | SEWER LAND EXPANSION AND GENERATOR REPLACEMENT PR | OUR SEWER PLANT GENERATOR AND ELECTRICAL GRINDER SYSTEM IS ON A EASEMENT GIVEN TO THE VILLAGE. BARRY VILLAGE HAS GIVEN TO THE VILLAGE AND IS FAILING. PROPERTY OWNER WISHED TO SELL PROPERTY OVER THE VILLAGE. THE VILLAGE OF SOUTH SALEM WOULD USE THE PROPERTY FOR ITS SEWER PLANT PURPOSES AND TO BE A PARK. THE PURCHASER OF A BACKUP GENERATOR IS NEEDED TO THE AGE. WE HAVE TO PHYSICALLY KEEP THE GENERATOR RUNNING DURING POWER OUTAGES SOMEONE HAS TO GO OUTSIDE IN EVERY 2 HOURS. THANK YOU. | VILAGE OF SOUTH SALEM, OHIO | 1 | 31 to 90 days | \$40,000 |
| Ross | Eco Friendly recyclable coffee containers | Two Roasting Joes is a local coffee roaster in Chillicothe. We purchase green coffee beans and roast them to create specialty coffee. We have a plan to produce reusable plastic coffee containers for local coffee sales. Goal is to make people aware of the waste associated with every coffee container or bag tossed into the trash without a thought and stress the long term impact on the environment. Once implemented, the reusable containers will reduce costs for both Two Roasting Joes and their customers. More importantly, the reusable waste by discouraging use of disposable containers and as an example to others on how being eco friendly can save money and protect the earth. The average coffee consumer discards on average twelve other coffee containers each month. That's 24-36 per year and we have a market. Maybe that by 1000 consumers and you will have prevented over 100,000 containers from entering our landfills. | Two Roasting Joes | 2 | 31 to 90 days | \$7,500 |
| Ross | Adena Cancer Center | The new Cancer Center will medically underserve rural Appalachian Ohio. Adena is a certified community cancer care provider. Critical needs are provided and we employ a patient navigator program to fast track breast, lung, head and neck cancer patients through the complexities of health care delivery systems. Radiation Oncology delivers Intensity Modulated Radiation Therapy to 30% of our patients, sparing healthy organs surrounding tumors, creating quality outcomes and brighter futures. Presently, patients receive care in two separate locations at the medical center. This is difficult for patients and family who must visit radiation and chemo in the same day/week and inefficient for hospital staffing. In order to meet the need for cancer care we wish to design, build, equip and staff a new third cancer center. The new center will allow patients to receive advanced care with two new linear accelerators and meet the standard of care through the use of a CT simulator and integrated treatment planning. Expanded access to Medical Oncology in rural Ohio will allow more patients to receive advanced, efficient, and convenient care. | Adena Health System | 20 | 181 days or more | \$18,000,000 |
| Ross | Cross Creek Meadow Family Affordable Housing | Creation of 60 units of affordable housing in rural Ross County with all units having 3 bedrooms, 2 baths, and a 2 car garage. | Frontier Community Services | 75 | 31 to 90 days | \$5,100,000 |
| Ross | Sanitary Sewer Plan | 300 linear feet of new sewer line, precast connections, pavement replacement, seeding and mowing. | Ross County Board of MRDD | 10 | 91 to 180 days | \$132,000 |
| Ross | Pioneer Paving Project | 300 linear feet of sidewalks and curbs in front of building This project will upgrade the original parking and sidewalks areas when building was constructed in 1971. | Ross County Board of MRDD | 5 | 91 to 180 days | \$225,000 |
| Ross | Sherman Heights Subdivision | Development of 104 Residential building lots and the construction of New Residential Homes. 3200 linear feet of road, sewer, water, gas, and electric. | Sherman Heights LLC | 65 | 31 to 90 days | \$850,000 |
| Ross | Highway widening project | This is the second phase of highway infrastructure program to connect US Route 36, using Ohio Highway Route 104 and connecting to Ohio Highway Route 207 with new roadway connector to Ohio Highway Route 23. This being done in the west and north parts of the Chillicothe area. The route 207 connector is complete to Route 23 North of Chillicothe, Ohio. This project would widen State Route 104, from Route 36 north to the Route 207 connector to Route 23. This project would act as a turn lane to State Route 104 and widen the existing highway. This project would increase the development of this area, which is a heavy traffic area with industrial, health, two state prisons and a VA hospital. This would literally help draw hundreds and possibly thousands of jobs to the Ross County area. | Ohio House Of Representatives | 100 | 31 to 90 days | \$12,000,000 |
| Ross | Mears Phase 1 Expansion | number of adjacent or other property to expand operation to include inhouse printing, video production, digital photographic enhancement, advertisement creation, marketing campaign consultation and production and upgrade of computers and computer programs with training to assist in high level of educational work. | Mears Photography, Inc. | 5 | 31 to 90 days | \$750,000 |
| Ross | Expansion for Chillicothe Carpet | Purchase of 2.8 acres of property with a new steel building of 10,000 sq. ft. on Hospital Rd. in Chillicothe OH. Plans are to build a new flooring store. We have been in business for 18 months and are present location and would like to expand along side Rt. 23 North of Chillicothe, OH. I plan to create jobs for an additional 10 people once the building is built. The plan is to build in spring and be ready to open by Summer 2009. | Chillicothe Carpet | 15 | 91 to 180 days | \$450,000 |
| Ross | new equipment and trucks | Chillicothe Fire & Security has been in business for over 27 years and is using the old used equipment that we started with like the old tank and related equipment. We need new equipment tools trucks so they can do service work at the site and address the return trips. We are a small company and could expand and take on more employees. We want to go into the new market of fire, security, and alarm systems. With these new trucks we would be able to do this. | Chillicothe Fire & Security Inc. | 12 | 31 to 90 days | \$485,000 |
| Ross | Sanitary Sewer & Waste Water Treatment Project | The project will include 14,800 LF of sanitary sewer and a 3,000 GPD WWTP to serve 170 customers who currently have failing septic systems. | Richmond Dale Sewer District | 10 | 91 to 180 days | \$1,000,000 |
| Ross | Security Camera System for buses | In order to provide for the safety and welfare of our students, we would like to install a complete security system with real-time digital cameras on each of our buses. In addition, this system would include a GPS tracking system along with a biometric student identification system for each student. | Paint Valley Local Schools | 5 | 91 to 180 days | \$65,000 |
| Ross | Renewable Energy Project for Heating Buildings | Install woodchip boilers to reduce overall energy costs for our district. Since our district is located in the heart of several timber operations in the Barbridge area, the ongoing purchase of woodchips would boost our local economy. | Paint Valley Local Schools | 25 | 91 to 180 days | \$800,000 |
| Ross | KMA Equine Rescue | Initiate and develop a local equine rescue resource to provide shelter, feeding and care for horses currently being simply turned out into the wild in Ross County and the surrounding areas. There is currently no equine program in the region. Horses rescued will be vet checked, restored to health as possible, and made available for adoption. Owners will be used in education and training programs to provide skills for use by local and other youth groups in learn about horses, their care, feeding and training. In addition, a select group will be used in the KMA Horses for the Handicapped program to allow physically and mentally challenged young people to experience the joy of horses. Despite extraordinary efforts, some horses will likely be so disabled or in such ill health that they will require euthanasia. Our facility will handle that in the most humane way possible with veterinary assistance, and will inter the remains on part of the facility reserved for such activity. Funding will provide for necessary shelters, healthy vegetable and additional equipment to enable the program to move forward. | KMA Farm | 6 | 0 to 30 days | \$2,000,000 |
| Ross | ICE Center Creation | Creation of a 70 System Interactive Computer Entertainment Center creating jobs, stimulating the local economy, and providing a safe social environment for customers and local youth. | Digital Dominion LLC | 4 | 31 to 90 days | \$150,000 |
| Ross | Extend taxiway | Extend taxiway. | Ross County Board of Commissioners | 9 | 31 to 90 days | \$533,600 |
| Ross | Mental Health/AOD Treatment in County Jails | This would be a program expansion that increases employed staff. The project would involve provision of mental health/substance abuse services to persons in jail, in the Carter's 5 counties. Services would include Diagnostic Assessment and Counseling/Psychiatry. Objectives would be to screen for severe mental illness/danger, divert individuals to inpatient treatment when appropriate, and initiate the rehabilitation process while a person is in jail. Referrals would be made for follow-up mental health/AOD treatment and other community services such as vocational rehabilitation, and housing. Outcomes that we would be seeking include reduced recidivism, decreased cost to the criminal justice system for detention, and restoration of employment. | Scioto Paint Valley Mental Health Center | 6 | 91 to 180 days | \$450,000 |
| Ross | Meeting Basic Human Needs for Most Vulnerable Indi | Program would focus on assisting the most vulnerable individuals with severe and persistent mental illness in addressing basic human needs such as food, shelter, clothing, basic health care services, etc. Program funds would support human service providers and direct purchases on behalf of consumers. Thus, the program would create and maintain jobs and assure that the basic needs of the most vulnerable were met by purchasing health care services, purchasing food and/or clothing, and/or rent, etc. When possible, program would also provide direct purchases to consumers with the needed resources. When no resources were available, required resources or services would be purchased. | Scioto Paint Valley Mental Health Center | 5 | 0 to 30 days | \$70,000 |
| Ross | Focus on Health | This program would employ 12 individuals to focus on prevention and wellness issues. Consumers would include the most vulnerable population of substance abuse and mental illness within 45 county area. The program would provide needed bridge with primary and behavioral health care services, health education prevention services. Unemployment and poverty are high in these predominantly rural Appalachian counties. The most vulnerable individuals frequently do not have access to occupational health care due to limited or no transportation and/or no insurance to pay for health care. In some cases individuals may be eligible for Medicaid or Medicare but need assistance in making application. Many residents have minimal information about precisely healthy lifestyles and limited or no awareness of the significance of disease prevention. In addition to creating 12 additional jobs, the program would promote health and wellness to community members, thus, increasing their personal productivity and/or employability. | Scioto Paint Valley Mental Health Center | 12 | 31 to 90 days | \$300,000 |
| Ross | Frankfort Waterline Replacement Project | The Village of Frankfort has other water lines, post WWI, that have started to deteriorate and have had larger diameter water lines. This system was also completed in pieces, which resulted in larger lines feeding smaller diameter lines which in turn lead to larger diameter water lines. This also causes pressure issues in various sections of the Village. The result of this project will ensure all health concerns are met and better service to the village residents and proper pressure for emergency services. | Village of Frankfort | 25 | 91 to 180 days | \$1,500,000 |
| Ross | Village Community Center | The project involves the replacement of existing lines with the following: 4,267 LF-12-inch PVC C900, 7,586 LF-8-inch PVC C900, 14,707 LF-6-inch PVC C900, 10,626 LF of service lines and associated appurtenances. The Village of Clarksburg is in need of a village center. With the renovation of the local Methodist Church, there is no place for village residents to have meetings, family gatherings, a venue for the county health nurse to visit, a community food pantry, child care programs, etc. Additionally during this last storm emergency, we had no place to safely house people who were forced to leave their homes. I have spoken to USDA about development people who indicated that an area is located in Appalachia that we "may" be able to utilize to house a home. I have spoken to USDA about the project. The program has a maximum of \$ 20K grant. The village would have to borrow the balance from them at 4.5%. The Village of Frankfort will cannot fund the entire project as we cannot borrow more than \$ 75,656 due to budget limitations. This is a severe poverty problem in the village that could be helped somewhat if had a venue that would allow us to offer basic child care and senior citizen programs. The most Poverty Rate Data report of village that I have seen shows that almost 50% of the male children in the village under the age of 6, live below the poverty level. We need help badly. | Village of Clarksburg | 1 | 31 to 90 days | \$175,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Ross | Carlisle and Howson Buildings Restoration | The Carlisle and Howson Buildings are connected 1880's brick Victorian commercial buildings located in the very center of Ohio's first capital in downtown Chillicothe. Though now vacant, the buildings are architectural landmarks containing nearly 40,000 square feet of space. With its high historic tower, the Carlisle building dominates the corner of Pine and Main Streets, Chillicothe's main intersection. This project will completely restore and renovate both buildings for commercial and office uses, and may house Chillicothe's Municipal Courts. Private funds will finance most of the renovation costs, assisted by historic tax credits, but there is a gap of \$700,000 in the private financing capabilities. This project will be a catalyst to at least one other major downtown project and 15 additional jobs beyond those who will be employed in the Carlisle and Howson buildings. | Carlisle Tower LLC | 35 | 91 to 180 days | \$700,000 |
| Ross | Worthington-Macomb House Restoration | The May Worthington Macomb House may be the most historically significant house in Ohio that has survived to this day without being restored and preserved for posterity. Built between 1798 and 1811, this rare sandstone structure may have been constructed by the same stonecutters who built Adena, home of Thomas Worthington, first U. S. Senator from Ohio. Thomas Worthington's daughter, Mary, lived in the house with her husband and together managed one of the first hotels in the state in Ohio and one of the state's earliest industrial enterprises. After restoration, the house will become a major heritage tourism destination and educational center focused on the historical development of Ohio's industry, commerce and building trades. An estimated 10,000 new visitors will visit this site annually with an estimated annual community economic impact of more than \$1,000,000. | Chillicothe Conservancy | 8 | 91 to 180 days | \$200,000 |
| Ross | Lighthouse Youth Center School Construction Project | The Lighthouse Youth Center at Paicr Creek, located in Ross County, Ohio, is the only state DYS institution that is privately owned and privately operated. It provides services each day for 47 serious juvenile delinquents referred to the Lighthouse Youth Center from the Ohio Department of Youth Services. The Youth Center has served Ohio since 1986 and has been a line item in the state budget for each of those years. Lighthouse is requesting \$3,000,000 to construct a school and gymnasium for the students living at the Youth Center. While Lighthouse is capable of supporting the project with \$300,000 privately raised dollars, the agency is unable to secure additional private funds for the project and respectfully requests state assistance to complete the project. The project has been reviewed and is fully endorsed by the Director of the ODYS and will generate jobs for local construction workers from Ross County and will enable us to continue to provide employment for our teachers and school staff at Paicr Creek. | Lighthouse Youth Services | 25 | 31 to 90 days | \$3,000,000 |
| Ross | Dyslexia and ADHD: Reading with your Brain | Program will provide one-on-one Dyslexia and ADHD therapy sessions for adults and children. Morning and evening sessions will be provided for adults who have a history of having difficulty with reading, writing, spelling and writing. Priority will be given to adults who need assistance in areas to retain or obtain a job, get GED and gain entrance into a specialized certificate program. As needed adults will meet with a trained career counselor to make them aware of careers that may best fit their profile. Children who have been identified as dyslexia and/or ADHD by qualified professionals. Families who can not afford to pay for these specialized services will be charged on a sliding scale fee. These services will be provided after school at the clinic by trained professionals with received extensive training in the Orton-Gillingham principles. Parents and teachers will be afforded ongoing training and staff development. Classroom accommodations, up-to-date resources, recent research and strategies that can be effective in the areas of reading, writing, spelling, and behavior, executive skills and techniques for assisting students in their preferred learning mode. | The David Ater, M.D., Dyslexia & ADHD Clinic | 10 | 0 to 30 days | \$165,000 |
| Ross | Fabrication Facility | Set up fabrication facility of custom window treatments to serve Ohio and surrounding states. | Smith Business Group LLC | 10 | 31 to 90 days | \$100,000 |
| Ross | Implementation of store front | These funds would be used for implementing a store front, adding additional inventory of 20,000 book titles, and more. This will also be used for marketing/promoting to increase exposure. | The Bookshelf | 2 | 31 to 90 days | \$40,000 |
| Ross | Energy Efficient Vehicles and Lighting | Replace all existing Lighting fixtures in our three locations with new energy efficient lighting. Replace heating and cooling units with new energy efficient units. Purchase new service vehicles, including bucket truck and box van. With purchase of new vehicles this would allow us to hire more employees. | C & J Electric | 15 | 91 to 180 days | \$625,000 |
| Ross | Distribution Water Line Upgrades | Upgrade Water mains to extend service to portions of Hocking and Vinton Counties that are in need of a reliable supply of water service. | Ross County Water Company, Inc. | 4 | 181 days or more | \$3,000,000 |
| Ross | Tabor Valley Community Acres | Creation of up to 10 additional units of affordable housing in southern Ross County (Harrisonburg Townships) including alterations and repairs to foundation systems, sewage systems and upgrading street construction to asphalt of existing mobile home park. | L.E.D. Property Management LLC | 3 | 31 to 90 days | \$100,000 |
| Ross | High Service Pump VFD Install | Installation of a single variable Frequency Drive which can be manually switched to drive any one of three existing high service pumps at the Chillicothe Water Treatment Plant. Savings in electrical energy costs expected to pay back the cost of installation & equipment in as little as three and no more than ten years, depending on future demand. | City of Chillicothe Ohio | 0 | 91 to 180 days | \$120,000 |
| Ross | Lighthouse Youth Center School Construction Projec | The Lighthouse Youth Center at Paicr Creek, located in Ross County, Ohio is the only state DYS institution that is privately owned and privately operated. It provides services each day for 47 serious juvenile delinquents referred to the Lighthouse Youth Center from the Ohio Department of Youth Services. The Youth Center has served Ohio since 1986 and has been a line item in the state budget for each of those years. Lighthouse is requesting \$3,000,000 to construct a school and gymnasium for the students living at the Youth Center. While Lighthouse is capable of supporting the project with \$300,000 of capital funds, we are not in a position to fully fund this project. In meetings with ODM and ODYS and Senator Sato, we were encouraged to submit this request. This request has been approved by the Director of ODYS who has formally endorsed this with a letter to the Governor's office. | Lighthouse Youth Services | 25 | 31 to 90 days | \$3,000,000 |
| Ross | Tree Removal and Replacement Project | This project involves damaged trees from the wind and ice storms. Approximately 100 trees have been damaged or need removal. This includes pruning, removing and replacing those trees. This project will help to employ many people in many different levels. To remove the trees it is estimated to create 10 steady jobs for 2 month period of time. The tree planting will employ for a longer period of time. Mulching, regrading, and watering for the next 18 months. A professional Forester has inspected this area and believes the area was hit especially hard by the recent storms. | The Chillicothe Jaycees | 25 | 0 to 30 days | \$40,000 |
| Ross | WOUNDED WARRIOR TRAUMA RECOVERY AND REHABILITATION | the WOUNDED WARRIOR TRAUMA RECOVERY AND REHABILITATION PROGRAM will assist PTSD diagnosed military combat personnel and their families process the trauma of combat violence, loss, grief and separation from loved ones and community. WTRTR is comprised of multidisciplinary and local therapeutic projects. They will be provided to PTSD diagnosed combat personnel in major Military Treatment Facilities (MTF) and VA Medical Centers (VAMC). Outcomes: Artistic trained practitioners will promote recovery from trauma, support healing, and develop resiliency and life skills. WTRTR's art and performance projects will be used to build participants' sense of competency, choice making and relatedness to family and community. All of which may be stepped away in varying degrees by PTSD and the victim's ability to control and manage their circumstances. | Art for a Child's Safe America | 12 | 0 to 30 days | \$225,000 |
| Ross | Health Prevention and Wellness Education | This project will provide the citizens of Ross County with a facility to meet and learn about health prevention and wellness topics. The facility will be utilized for lecture style seminars, fitness classes, and meeting center for various health related groups. The project needs educational equipment, computers, projectors, sound system, etc., as well as tables, desks, and chairs. The project also needs to build out the interior of the facility and provide for initial working capital. The outcome would be a more health conscious community therefore reducing cost on the healthcare system. Through education, we can generationaly change to a new healthcare paradigm much needed in the Appalachia region. | Chiropractor Consultants, LLC | 5 | 0 to 30 days | \$10,000 |
| Ross | Hydroponic / Aquaponic Greenhouse | Start a Hydroponic and Aquaponic Greenhouse on our Farm which will provide quality, locally grown produce including tomatoes, herbs, vine crops and leaf crops as well as producing quality perch for resale. Starting this business will ensure an income for our family should anything happen to one of our current jobs. | Valley Vista Fruit Farm and Greenhouse | 4 | 0 to 30 days | \$25,000 |
| Ross | Medical,Public,Private,Courrier transportation Ser | We would also need to employ 2-3 people to assist with the process. Assist state with transportation needs for: County & State Social Service org., Service groups, Health Clinics, Hospitals, Nursing Homes, Assisted living facilities Assist Veterans Affairs Facilities with transportation of Clients. Service for Business/Manufacturing facilities: Courier Service, Airport Shuttle, Group/Org. transportation needs Employment for Highland, Fayette, Pickaway, Ross, Pike and surrounding counties. | Scioto Paint Valley Transportation Services | 10 | 0 to 30 days | \$95,000 |
| Ross | FDA - Auditor Training and Compliance Program | Provide additional trained auditors (contract or for hire) to support FDA for food, medical device or pharmaceutical industry manufacturing, laboratory and distribution points. Expected outcome: 25+ auditors capable of assisting or leading compliance and certification/ registration audits at U.S. (Ohio) facilities to reduce and/or eliminate public exposure to tainted products, processes and negligent management practices. Training and support facilities to be headquartered in Ross county (Ohio), with satellite training and monitoring available at local technology centers potentially partnering with SDC's medical, technical and other professionals within established guidelines. Thank you for this opportunity to potentially generate jobs in Ohio and provide a much needed public service in support of FDA and other public entities. | D2associates | 25 | 31 to 90 days | \$150,000 |
| Ross | Adena State Memorial Sitework Erosion Control | This project will make watershed infrastructure improvements to a hilltop historical site to control stormwater runoff and repair existing damage. Active erosion is undermining roadways, exposing electrical and gas utilities, and threatening the stability of a hillside. The runoff is depositing silt into an adjacent pond and impacting the natural environment. Funds are urgently needed to prevent further damage. Remedies include the constructing two dry retention ponds to hold and release stormwater in a controlled manner, building a 300 foot long flow diversion channel to redirect runoff water from the hillside to ease the erosion, and installing a new culvert under the primary access road to maintain the roadbed. Construction contractors will reinforce approximately 1,000 feet of the roadway with compacted gravel and stone to prevent roadway deterioration due to the severe runoff. They will bury the utilities and grade the berms that form retention ponds and seed them to stabilize the path. The construction project will remove deposited silt from the pond and restore devastated vegetation. Further, the project will clean and repair | Ohio Historical Society | 10 | 31 to 90 days | \$210,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Ross | Chillicothe Ergonomic & Process Improvements | Our Chillicothe, Ohio plant manufactures interior components for Kenworth. These products require sawing and specialized customization requiring high levels of labor activity. Many processes require smelching, pushing, stapling, sewing, cutting, butter installation, etc. ETO needs to create better working conditions and reduce injury risk. We need funding to purchase ergonomic equipment for each associate. Due to the current economic environment, we need funding to purchase these important safety related items. Physical and physically demanding operations affect our turnover rate as well as contribute negatively to the health of our associates. Representatives of the Ohio Bureau of Workmen's Compensation recommended that we treat these diseases by introducing ergonomic equipment. This is an excellent project to apply Federal funding. It supports associate employment, improves the workplace environment by making it ergonomically proficient, improves the morale of the associates, builds a stronger relationship between management and labor. It helps our company by reducing the fiscal impact of expensive medical costs. We will provide a program to provide safety equipment to our associates to provide necessary injury, sprain, strain, career development, occupational support and jobs for those unable to attend in college. | Commercial Vehicle Group | 50 | 0 to 30 days | \$100,000 |
| Ross | PAL's Youth Support Program | Outcomes: Youth ages 8-19 will be given the tools to battle obesity and reduce the risk of diseases such as type 2 diabetes Youth ages 8-19 will be given the tools to resist juvenile delinquency Youth will be given tools to maintain educational excellence in order to attend a secondary education program Youth ages 16-19 will achieve life skills such as job interviewing, financial fitness and self-sufficiency College bound youth will have support through jobs and mentors during the years prior to enrolling and during their first year in college These objectives will be met through after school fitness and educational programs. We will also offer summer educational, music and art programs. We will work closely with local schools, law enforcement and local civic groups in order to meet the needs of all the youth in Ross County. | Chillicothe-Ross County Police Athletic League | 25 | 31 to 90 days | \$500,000 |
| Ross | VA Memorial Stadium Improvements | Upgrading to an 800 amp electrical service, replacing the 10,000 sq. ft. stadium roof and building a 48,000' multipurpose building The urgent need of OUC is a new facility to accommodate the growing enrollment due to (1) regional business and industry industry forcing displaced workers seeking for degree programs (2) area training programs to update employees, and (3) an increase in dual enrollment high school students. The challenge is to increase enrollment resulting in an additional 15% to 18% increase enrollment in the first degree program in the fall quarter. Richard Beiler has forged partnerships that have led to partnerships to embrace higher education's call to provide a pathway to that Century workforce. OUC has partnered with the ABLE Program to have advising and classroom space on campus and the program will have easy access to college programs. The campus is partnering with Economic Region 7 in creating Stackable Certificate Programs for adult learners at all stages of employment. Partnerships with Business and industry have expanded the program to include education classes to upgrade employee skills. The Business and Industry Center will have the latest equipment and technology for current future employment. The center will market well trained employees to learn their skill of shipping, sewing, and buffing floors. The request for funds would allow for additional equipment as well. | Friends of VA Memorial Field | 50 | 0 to 30 days | \$300,000 |
| Ross | OU-C Business and Industry Center | Upgrading to an 800 amp electrical service, replacing the 10,000 sq. ft. stadium roof and building a 48,000' multipurpose building The urgent need of OUC is a new facility to accommodate the growing enrollment due to (1) regional business and industry industry forcing displaced workers seeking for degree programs (2) area training programs to update employees, and (3) an increase in dual enrollment high school students. | Ross | Service and Employee Enhancement | There is a strong need for four technicians in our county and surrounding counties. With the federal stimulus money we would hire and train employees to learn their skill of shipping, sewing, and buffing floors. The request for funds would allow for additional equipment as well. | Corporate Clean Cleaning Services | 5 | 181 days or more | \$10,000 |
| Ross | Keeping a business active that helps low income pe | To expand and keep open an existing business that was established to help lower income people and their children without the high cost. After tax cuts due to financial cuts from our ADAMI (state, federal and local monies) Board. We are requesting five (5) additional counselors that will put us back to the level of our previous level of 10 years ago for our services. These counselors will be used for adults and youth in the area of substance abuse. There is literally a heroin epidemic in Pickaway County that exists in both youth and adults. These five (5) counselors will be divided between Pickaway County and Pickaway County which we have offices. Both counties are a desperate need of these services that these five (5) counselors will provide. These counselors will help us to expand intensive outpatient programs for both youth and adults. They will help us to expand services to women who are abused and to criminal justice youth who need many more services than are provided in our counties. Specifically, intensive outpatient, individual counseling, group counseling, assessment, crisis intervention and case management will be increased for both youth programs and adult programs. Our programs help youth and adults to become substance free that leads to responsible lives and lifestyles. | Kids Kiosk -n -Plus Seconds | 2 | 0 to 30 days | \$25,000 |
| Ross | Pickaway Area Recovery Service new Counselors | Buy a new Foton forestry mulcher to start a conservation land clearing service. This process does not disturb the soil and leaves all residue on the ground to prevent erosion. | Pickaway Area Recovery Services, Inc. | 5 | 31 to 90 days | \$250,000 |
| Ross | conservation land clearing | Buy a new Foton forestry mulcher to start a conservation land clearing service. This process does not disturb the soil and leaves all residue on the ground to prevent erosion. | w.v.wetzel | 1 | 0 to 30 days | \$170,000 |
| Ross | CCI Electrical Distribution Upgrade | At the Chillicothe Correctional Institution, installation of new electrical main and sub-panels within all buildings to be tied to existing transformers. Install energy efficient security light fixtures in inmate housing areas. Existing electrical distribution system within buildings is original from 1930's construction. Panels are loaded in excess of their rated capacity. Transformers by each building have been replaced. This project will now distribute electric throughout each building with appropriate electrical support within rated capacity. | Ohio Department of Rehabilitation and Correction | 35 | 181 days or more | \$5,318,396 |
| Ross | Advanced tire recycling | Advanced tire recycling process development and implementation. Current tire recycling processes are costly and create a limited product quality. This process would allow the product to be used in new tires and the remaining product would be tire derived fuel of a higher quality. | Innovative Functions, Inc. | 25 | 91 to 180 days | \$523,000 |
| Ross | Automated recycling sort process | An automated process for sorting of waste would maximize recycling and greatly reduce the need for land fills. Utilizing a combination of mechanical separation and automated sensors would allow most trash to be separated for recycling. Initially some items could be easily separated and as additional equipment is added more of the trash would be available for recycling. | Innovative Functions, Inc. | 50 | 181 days or more | \$1,200,000 |
| Ross | Homeless Prevention | Currently Ross County Ohio has a Homeless Shelter that can accommodate 8 men. These 8 individuals can stay at this shelter for 2 weeks at a time. Typically the waiting list for the shelter is very long so a person that has no place to stay cannot get into the shelter for many weeks at a time. Pickaway County's Homeless Shelter operates the same. The number of people needing food and shelter is larger than the shelter's capacity. We are asking for money to provide housing to individuals at our Pickaway County Location. Housing can be for Veterans, MRDD, or Homeless as long as there is shelter available to offset the cost after the first year. Average cost per person for case management is \$3000.00. This allows us to properly document daily case management services as well as activities completed for the week. We have monthly outings in the community to keep the participants in a social setting. This money would increase the quality of life for 40 individuals that are not eligible for case management services or are unable to afford the support budget is not great enough for them to work and participate at the level they chose. | Goodwill Industries of South Central Ohio, Inc. | 5 | 91 to 180 days | \$500,000 |
| Ross | MR/DD Employment | Construction of a 25,000 square foot facility to house the City of Chillicothe's Service/Parks & Recreation departments. The number of existing energy efficient lighting for proper recording of city administration and municipal court building to centralize activity, improve security, improve energy efficiency. | Goodwill Industries of South Central Ohio, Inc. | 60 | 31 to 90 days | \$180,000 |
| Ross | Chillicothe Service/Parks & Recreation Garage | Construction of a 25,000 square foot facility to house the City of Chillicothe's Service/Parks & Recreation departments. The number of existing energy efficient lighting for proper recording of city administration and municipal court building to centralize activity, improve security, improve energy efficiency. | City of Chillicothe | 75 | 31 to 90 days | \$4,000,000 |
| Ross | City of Chillicothe Administration and Municipal C | Construction of a 25,000 square foot facility to house the City of Chillicothe's Service/Parks & Recreation departments. The number of existing energy efficient lighting for proper recording of city administration and municipal court building to centralize activity, improve security, improve energy efficiency. | City of Chillicothe | 130 | 181 days or more | \$7,500,000 |
| Ross | Chillicothe Street and Alley Program | Repair and resurfacing of existing streets and alleys within the city of Chillicothe. | City of Chillicothe | 50 | 31 to 90 days | \$2,000,000 |
| Ross | Workforce Development | Currently the average cost per case from the time a person is referred to us for assistance with employment to the time we locate employment is approximately \$5,000.00. With Rehabilitation Services Commission in 2006 we served 248 persons with disabilities and/or disabilities. In 2007 we served 309 persons with disabilities and/or disabilities and in 2008 we served 206 individuals. With unemployment being 8.8% in Ohio the need for assistance in locating and retaining employment is growing. There is not enough funding for these programs. This money would allow us to serve 30 additional clients in the year. The headquarters was built in the early 1900's. In the late 60's or early 70's it was donated to Goodwill Industries from a trucking company. At that time additional space for offices, etc. We currently have our windows and doors boarded. The building is in need of repair as there is cold air in several of the offices and around in the doors. | Goodwill Industries of South Central Ohio, Inc. | 7 | 31 to 90 days | \$150,000 |
| Ross | Weatherization | 2009 Capitalized Maintenance. This is a rural transit project whose funding flow through the Ohio Department of Transportation. This project consists of constructing a new 500,000 gallon elevated water tank to serve the existing regional medical center which is currently in a major expansion process. According to medical center current water pressures are not adequate to serve the present and planned expansions. A new water tank would provide the necessary pressure and supply in order to meet the ever increasing needs and demands of this regional medical center. A preliminary investigation of the project has been completed and construction plans are in the process of being submitted. | Goodwill Industries of South Central Ohio, Inc. | 1 | 91 to 180 days | \$100,000 |
| Ross | ROS Capitalized maintenance ; PID 86089 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flow through the Ohio Department of Transportation. A preliminary investigation of the project has been completed and construction plans are in the process of being submitted. | Ohio Department of Transportation | 4 | 0 to 30 days | \$226,291 |
| Ross | Specialized Transportation | We provide transportation for Ross County Ohio in coordination with Ross County Department of Jobs and Family Services. We also provide transportation to the Ross County Board of MRDD. In 2008 we provided transportation to 1900 persons. 2007 we provided transportation to 174 persons and in 2008 we provided transportation to 2115 persons. Transportation is provided to those appointments, doctors, food banks, employment and quality of life appointments. We traveled 1,467,912 miles over the past 3 years. These miles were done in donated and used vehicles. Vehicles that for the most part have already been used to their maximum potential have been donated to Goodwill. This money would allow this much needed program to purchase new vehicles that would allow a much more comfortable ride for these individuals. | Goodwill Industries of South Central Ohio, Inc. | 5 | 31 to 90 days | \$50,000 |

| Ross | Business Expansion | Expected outcomes are to retain the current 8 positions and to employ at least 10 new full employees at my establishment. This business was started in 2005 with no operating money. With the current status of the economy we have been forced to lay off and cut our hours of operation and to try to stay open for business for operation we will be forced to close our operation which will result in the loss of those 8 jobs indefinitely. We would like to expand the current location to provide a better customer service as well as new products. We would like to offer home gas service delivery as well as in store eating establishment. This project consists of upgrading and replacing approximately 6000 old, outdated water meters. The existing meters are inaccurate due to their age, contributing to a 30% water loss in the system. Replacement of these meters will conserve water as well as increase the efficiency of the meter system, thus reducing costs and reducing water loss increases. This project consists of constructing a new 500,000 gallon elevated water tank to serve the existing regional medical center which is currently in a major expansion process. | Ross | Adena Regional Medical Center Water Pressure Boost | This project is for the installation of a new water pressure boosting system in an area that serves approximately 600 residences. Currently the area experiences low water pressure during periods of high demand and today loses pressurization during water main breaks in the adjacent area. PLANS ARE INCOMPLETE AND READY TO SUBMIT TO THE OHIO EPA FOR APPROVAL. | City of Chillicothe | 300 | 91 to 180 days | \$1,500,000 |
| Ross | Brewer Heights Water Pressure Boosting System | This project is for the installation of a new water pressure boosting system in an area that serves approximately 600 residences. Currently the area experiences low water pressure during periods of high demand and today loses pressurization during water main breaks in the adjacent area. PLANS ARE INCOMPLETE AND READY TO SUBMIT TO THE OHIO EPA FOR APPROVAL. | City of Chillicothe | 12 | 31 to 90 days | \$200,000 |
| Ross | Hopetown Water Line Extension | This project is for the construction of a new water distribution line consisting of approximately 3000' of water line, valves, and fire hydrants serving approximately 50 low to moderate income residences currently on individual wells. In addition to providing public water service to the area, this line will connect two sections of existing water lines that "bypass" the system and stabilize water pressure in the area. | City of Chillicothe | 15 | 31 to 90 days | \$400,000 |
| Ross | Western Ave. Water Line Replacement Project | This project is for the replacement of an existing 9" water line which serves a commercial/ residential area by using directional boring technology and consists of approximately 250' of 12" water main, valves, and fire hydrants. The existing water line is a main supply line and currently has been subjected to an average of more than 2 breaks per year for the past 3 years. The main breaks affect restaurants, businesses, and approximately 500 residences in the area for periods of 24 to 72 hours. The existing line is located in a 4 lane highway and the main breaks also affect traffic flows. This replacement and upgrade will provide the capability to serve additional commercial and residential areas. PLANS ARE INCOMPLETE AND READY TO SUBMIT TO THE OHIO EPA FOR APPROVAL. | City of Chillicothe | 18 | 31 to 90 days | \$400,000 |

| Sandusky | Storm Sewer Replacement/Garfield-Lincoln St. - Lind | Replace 104' of storm sewer between Garfield and Lincoln St. This project will reduce inflow and infiltration (I/I) into the existing Sanitary Sewer. Project includes replacement of two catch basins, grasses, and the asphalt. Mobile data terminals (MDTs) for the WQOS Community Action Commission | Village of Lindsey | 2 | 31 to 90 days | \$34,452 |
| Sandusky | Dist 2, PID 85799, SAN Mobile data terminals | | Ohio Department of Transportation | 1 | 31 to 90 days | \$60,000 |
| Sandusky | Fangbener Road Sewer Improvements | 35 Grinder pumps and approximately 5,000 linear feet of 1-12-inch to 4-inch pressure sewer and appurtenances. | ms consultants, inc. | 15 | 31 to 90 days | \$660,000 |
| Sandusky | B.U.I.L.D. building upon individual learning and | We will move to a location that we will own instead of renting. The new facility is an old building that will need to be brought up to code. The estimated cost of the first phase of the project is \$150,000. In addition to the reformation of the additional space we will also possibly house a soup kitchen or food pantry and provide a new program (Buddi). This program will be a way to extend our current education program and provide job skills for our clients. We would also like to work on personal growth and self-esteem issues. | Heartbeat of Fremont | 15 | 0 to 30 days | \$250,000 |
| Sandusky | Concrete repair | Repair several concrete pads around facility, such dumpster area and truck loading dock | Sandusky County Board of MRDD | 5 | 91 to 180 days | \$12,000 |
| Sandusky | New Vehicles | Replacement of old police vehicles. Currently the newest vehicle we have is one 2007 police vehicle would like to replace the following 1 Patrol car 2004 Crown Victoria 1 Patrol car 2005 Crown Victoria 1 Marked 2002 Ford Explorer 1 Unmarked 2004 Ford Explorer 2 Police Patrol Vehicles est \$25,000.00 each 1 Marked patrol Police est \$25,000.00 each 1 Unmarked 4-wheel Vehicle est \$25,000.00 each Total \$102,000.00 | Police Department | 50 | 31 to 90 days | \$102,000 |
| Sandusky | ADA Restrooms | Install restrooms in school area to make them ADA accessible | Sandusky County Board of MRDD | 4 | 91 to 180 days | \$28,000 |
| Sandusky | Warehouse Roof | Full insulation and sunblast roof on warehouse area | Sandusky County Board of MRDD | 6 | 91 to 180 days | \$32,000 |
| Sandusky | Sandusky County, Ohio, Resurfacing of County Roads | Resurfacing of 3 Sandusky County roads (county roads 41, 92 and 108, 19.47 total miles in length), that would include 101,215 square yards of surface paving, 10,442 cubic yards of asphalt concrete for resurfacing, 2,650 cubic yards of stone base placement, polymer pavement marking on edges and centerline of the 3 roads, and installation of 989 raised pavement markers. County Road #1 is classified as a Major Collector and county roads 92 and 108 were on the Federal Aid Secondary System on Jan 1, 1991. The Sandusky County Prevention Partnership is a community collaboration formed in 1999 following the award of a Drug-Free Community Grant from the Ohio Department of Alcohol and Drug Addiction Services and Mental Health and Recovery Services Board through Sandusky and Wyandot Counties. | Sandusky County Engineer's Office | 64 | 31 to 90 days | \$1,725,000 |
| Sandusky | Drug and Alcohol Prevention | The mission of our coalition is to embrace a collaborative and coordinated approach towards community action to reduce the number of youth and adults who engage in substance abuse and other risky behaviors in Sandusky County. By focusing on environmental change regarding underage alcohol and other drug use within our local community, we hope to influence community standards, norms, policies, and attitudes that shape individual behaviors. | Sandusky County Health Department | 4 | 0 to 30 days | \$45,000 |
| Sandusky | Initial Epoxy Coating - Lindsey Water Tower | Initial painting of Lindsey Village Water Tower interior using paint that meets NESHPS standard 61. The tower was put in service between 1960 and 1962. Section 7.1 of the Recommended Standards for Water Works states that the interior of the tower should be recoated with a new system. The Village of Lindsey requires financial assistance to hire competent technicians to upgrade from a wax coating to epoxy the interior of the water tower. | Village of Lindsey | 3 | 91 to 180 days | \$21,208 |
| Sandusky | Lindsey Wastewater Treatment Plant Improvements | The project includes installation of 225 cubic yards of sand filter material and two grinder pumps and replacement of 666 feet of air piping. These components need to be replaced on the treatment plant to meet EPA current standards. | Feller, Finch & Assoc. | 10 | 31 to 90 days | \$18,000 |
| Sandusky | ?Load Rating Analysis For Various Bridges In Sandu | This project will load rate various bridges in Sandusky County, Ohio. This will help Sandusky County to conform with the Federal and State requirements to have at least 20 percent of all county bridges load rated each year for the next 5 years. | Sandusky County Engineer's Office | 3 | 31 to 90 days | \$100,000 |
| Sandusky | Main Street Waterline | The scope of the Main Street Waterline Replacement Project consists of approximately 3,700 linear feet of 12" waterline, 400 linear feet of 6" waterline, 10 hydrant assemblies, 40 fire pits, miscellaneous fittings, appurtenances, and restoration. The location of the project begins at the Village water tower proceeds east under the NDW Railroad tracks to S. Main Street, this distance being approximately 400 feet. The waterline then proceeds northeast for approximately 3,300 feet ending at the junction of Cedar Street and North Main Street. Along the path this new line will fit into various east-west lateral mains and approximately 40 home/business individual connections. This safety project will determine "no passing zones" of all county roads in Sandusky County, Ohio to assure conformance with current regulations. | Village of Gibsonburg | 15 | 0 to 30 days | \$300,000 |
| Sandusky | ?No Passing Zone Study In Sandusky County, Ohio | This safety project will install pavement markers on approximately 78 miles of Sandusky County, Ohio roads where there are no existing street pavement markers currently. | Sandusky County Engineer's Office | 2 | 31 to 90 days | \$25,000 |
| Sandusky | ?Raised Pavement Marker Project In Sandusky County | This safety project will install pavement markers on approximately 78 miles of Sandusky County, Ohio roads where there are no existing street pavement markers currently. | Sandusky County Engineer's Office | 6 | 31 to 90 days | \$100,000 |
| Sandusky | East Side Storm Separation | Plan and construct a 3,000 foot, 36 inch storm line to drain storm water from east side of Gibsonburg. This area is now a combined sewer area and this project would effectively remove most of the storm water from the sanitary for east side of Gibsonburg. Memorial Hospital is a part of the Ohio State University. The investment in the Hospital is a total of \$1.6 billion project. The investment in the Hospital is a total of \$1.6 billion project. The Hospital has also employed nearly \$1 million in local community support. As the Hospital begins this next step, we are seeking local funds to further fund the better serve communities throughout Ohio through the services of Memorial. Memorial Hospital's Occupational Therapy program, HealthLink is the region's largest occupational health provider, servicing over 52,000 workers, representing roughly 3,000 company contracts annually. HealthLink was developed in 1980, operates three locations and is a model for other occupational health programs in the state. Two of these locations are in cooperation with local hospitals. The program involves 20 therapists in Ohio. Through HealthLink's services, companies throughout Ohio have been able to save millions of dollars by way of fewer healthcare costs, lower insurance premiums, less employee loss time for injuries, etc. As the market continues to get even more competitive and businesses are closing their doors as a result of health care costs, it is vital that HealthLink continue to check drug and allergy interactions for physician ordered medications increasing patient safety. The new Bedside Medication Administration project allows caregivers to utilize bar code scanning technology prior to administering medications for positive patient and medication identification. Caregivers scan the bar code on the patient's wristband and on the medication to ensure the "Five Rights of medication management: Right Patient, Right Medication, Right Dosage, Right Route & Right Time are followed. Assuring these Five Rights are followed has proven to drastically reduce in many cases medication errors, historically preventable medication errors, including medication errors, accounted for over 100,000 deaths last year alone. This advanced technology will allow us to double check patient medication which helps to prevent medication errors, and will solidify our commitment to ensuring our patients receive the best and most advanced care possible in our rural community. | Village of Gibsonburg | 10 | 91 to 180 days | \$1,800,000 |
| Sandusky | Herbert-Perna Center for Physical Health Phase II | Herbert-Perna Center for Physical Health Phase II | Memorial Hospital | 50,000 | 181 days or more | \$1,473,000 |
| Sandusky | Memorial Hospital Integrated Pharmacy System, Medi | The project is for the implementation of the integrated Praxair Laboratory Management solution to automate the processing of lab orders and results, freeing technologists for non-routine functions. Interactive order entry, automated specimen processing, and immediate results reporting enhance and improve patient safety and care. The Lab system will enhance complete review and evaluation of patient results with easily interpreted reports and increases productivity among care team members by automating laboratory functions. The system processes patient results via instrument interfaces allowing for rapid transmission to laboratory technicians and providing laboratory results quickly with indicators of out of range critical lab values to allow physicians rapid responses to critical conditions. | Memorial Hospital | 0 | 0 to 30 days | \$330,000 |
| Sandusky | Memorial Hospital Integrated Laboratory System and | The project is for the implementation of the integrated Praxair Laboratory Management solution to automate the processing of lab orders and results, freeing technologists for non-routine functions. | Sandusky | Kids Fest at Memorial Health Care System | The percentage of children who survive an overnight fire more than doubles in the past 20 years. As part of a multi-prong approach to help parents and their children make good health choices, Memorial Hospital intends to establish a free family event, which will take place in the Summer/Spring each year. The program, entitled Kids Fest will collaborate with partner with Community Health Services and the Health Department of Sandusky County as a way to ensure a quality program that meets the needs of our entire community. The event will promote a healthy and active lifestyle, exercise and proper nutrition, prevention of injuries, and drug awareness. It will also promote parents being positive role models for their children. Activities of this event might include health related games, the food, education on bike helmets, etc. The program would cost roughly \$7,500 per year. However, the hospital has agreed to contribute at least \$2,500 in salary support. This commitment would take the program through the year 2014. | Memorial Hospital | 0 | 91 to 180 days | \$25,000 |
| Sandusky | 9-Mile Ditch reconstruction restoration project | A model project to reconstruct 1 mile of 9-Mile Ditch using 2 stage ditch design, to show its ability to reduce or eliminate maintenance cost over time, and their sediments and pollutants. We will also develop adjacent wetlands areas to comprehensively treat 400 acres of agricultural watershed dramatically increasing water quality and flood storage. Develop educational seminars for stakeholders to allow for implementation of these best management practices. | Sandusky County Park District | 30 | 31 to 90 days | \$1,750,000 |
| Sandusky | North Coast Inland Trail Clyde-Belleuve | Construction of the 5-mile Clyde-Belleuve segment of the North Coast Inland Trail will provide a trail link in the 60+ mile North Coast Inland Trail and Sandusky, Huron and Lorain Counties. Planned US 20, the very popular multi-use North Coast Inland Trail provides an important non-motorized alternative transportation route across northern Ohio. The trail also provides important tourism, recreation and community health benefits. In Sandusky County the trail connects links Ohio, Fremont and Lindsey with major residential neighborhoods, school and recreational facilities, and industrial employers such as Whitford Corp. (3,500 employees) in Clyde. The Clyde-Belleuve segment will have a significant regional influence. The construction of an environmental education facility center at 310-acre Creek Bend Farm, site of Memorial Hospital, is an integral component of the park concept plan. This plan was developed with the active participation of more than 300 Sandusky County residents. The center will serve as a significant increase access to environmental education and exposure to nature for residents of Sandusky County and the surrounding area. Currently the nearest existing Sandusky County Park District Programming Department provides more than 300 environmental education programs each year. The list of residents wishing to attend the programs exceeds our capacity approximately 65% of the time, resulting in many people being excluded from participation. The existing facility in most of these cases is the availability of variable space to accommodate all potential participants. The center will also serve as an accessible link to nature for people of all ages, interests and abilities. Today's children are becoming increasingly disconnected nature, resulting in numerous health and behavioral disorders. The center will provide space for a nature-based preschool, introducing nature early. | Sandusky County Park District | 50 | 0 to 30 days | \$950,000 |

| Sandusky | Dist 2, PID 86025 SAN Computer/communication | Computer/communication upgrade for the Sandusky Transit System | Ohio Department of Transportation | 1 | 91 to 180 days | \$25,000 |
| Sandusky | Memorial Hospital Computerized Physician Order and | Complete the implementation of the hospital in-patient Electronic Medical Record computer system providing the ability for physicians to electronically document and enter orders for all patients. Significant improvements expected in patient safety and patient care by providing real-time feedback and validation of orders and using evidence-based medication guidelines. The system will significantly reduce medical errors and omissions and increase compliance with CMS core measures and quality measures. Patient information will be available in a secure and encrypted manner for remote telemedicine and consulting, providing better patient care for the remote rural community. Patient information to be electronically sent to physician office electronic medical record systems allowing for follow-up and continuity of care of patients needs. | Memorial Hospital | 1 | 181 days or more | \$550,000 |
| Sandusky | Dist 2, PID 86029 SAN Storage facility | Storage facility for the Sandusky Transit System | Ohio Department of Transportation | 7 | 91 to 180 days | \$325,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|----------------------|----------------|--------------------|---------------------------|
| Sandusky | Biggest Loser Weight Loss Challenges | Individuals are chosen to exercise regularly over their lifetime. The program provides people the right exercise programs that make use of their strengths of their starting date. Scientific literature has suggested that exercise programs that produce the best results are structured programs that focus on adherence, that is, provide services in a way that helps individuals stay with the program. Services that improve and help sustain adherence include: skills, training, a positive and supportive group environment, motivational techniques that promote self-efficacy, education about healthy lifestyles, goal setting and rewards for participating and reaching goals. The funding for this program would help with salaries and equipment. Some of the services provided to the community might include: Skin Callers, Certified Weight Scales, T-Shirts, Water Bottles, Speakers, Education, Weight Loss Equipment, Strength Training Equipment, Headsets, Star Shoppers, Etc. The program would allow for Physical Therapist, Occupational Therapist and Speech Therapist go to schools and provide free screenings. Screenings would include but not limited to activities, speech and language, gross motor, sensory, vision, hearing and health risk screenings. The services would be provided to any school who would like to sign up for the program. | Memorial Hospital | 3 | 181 days or more | \$15,000 |
| Sandusky | School Screens | The funds would help with salaries and supplies for the screening program over a three year period. | Memorial Hospital | 4 | 31 to 90 days | \$15,000 |
| Sandusky | Sounds of Summer (Extended School Year) | Children requiring Physical Therapy, Occupational Therapy and Speech Therapy in the local school systems will be provided with extended school year services through this three day a week program. These hours per day will depend on regional and structured therapy sessions and learning opportunities. Specific criteria will be used to address Individualized Educational Plans (IEP) goals from school the year to make the return to school in fall an easy transition. Appropriate level education will take place. The program will be implemented for six weeks each summer. The program funding would assist with implementing a Sensory Room, adding some age appropriate Tables and Chairs, Fitness Equipment, Pool Filtration Devices, Smart Board, and Auditorium. In addition, the program would create scholarships to be awarded to children who do not qualify for the criteria for Extended School Year services but would benefit from the program. | Memorial Hospital | 4 | 31 to 90 days | \$20,000 |
| Sandusky | CSO Improvements | Phase 1, 2 & 3 of a combined sanitary/storm sewer separation, as required by DEPA. Phase 1: The program would assist with the prevention or repairs that are necessary to ensure the protection of the environment and the public health and safety of the community. If a condition exists that predisposes a person to falling, educational assistance could be offered to decrease the likelihood. Home visits will also be conducted to assist with keeping the elderly population in their own homes as long as possible. The program will also lead educational classes regarding lowering injuries from work-related accidents and/or traffic accidents. | Village of Woodville | 10 | 181 days or more | \$6,000,000 |
| Sandusky | Memorial Hospital Violence and Injury Prevention P | A program will be developed to have parents with dealing with the frustrations of raising a family. This will also include information on shaken Baby Syndrome. A program will also be developed to help parents safely install a car seat at the same time, information on how to buy and properly install a child car seat could be given. Another aspect of this program would be education on pedestrian and bike safety and the need for bike helmets. This information could be distributed to the schools, Boy Scout and Girl Scout troops, 4-H clubs, etc. | Memorial Hospital | 0 | 31 to 90 days | \$25,000 |
| Sandusky | Hospice Unit | Memorial Hospital would like to establish an Inpatient Hospice Unit. By establishing a hospice inpatient unit allows hospice programs to effectively and efficiently provide high levels of care to terminally ill patients or dying residents. Not only offering a market advantage, inpatient hospice units also give healthcare facility discharge planners a viable alternative to in-home hospice services. This unit would collaborate with a number of area nursing homes as well as Hospitals. | Memorial Hospital | 10 | 181 days or more | \$4,000,000 |
| Sandusky | Step Up Program | Participants will receive individual exercise instruction by trained professionals as well as attend group educational and exercise sessions for 12 weeks. They will learn how to exercise correctly, how to eat right and maintain a health lifestyle, and every effort will be made to encourage participants to stick up and take control of their health through nutrition, behavior, and exercise. Participants will receive information on how to buy and properly install a child car seat could be given. This funding will assist the program over a three year period. | Memorial Hospital | 4 | 0 to 30 days | \$60,000 |
| Sandusky | Diabetes Education | According to the World Health Organization, the number of diabetics is expected to double by the year 2030. Currently the Sandusky County Health Department reports that 12% of the county residents have been diagnosed with diabetes, a number that could double in the next twenty years. Memorial Hospital wishes to create a Diabetes Education Program to educate the county on this epidemic. To do this, an endocrinologist would need to be hired recruited and employed. The endocrinologist would provide healthcare to the entire county. Another full-time position would be created to offer classes to alert the general public to lifestyle habits that lead to diabetes and how to avoid this disease. Other classes would be presented to demonstrate healthy cooking techniques. The Diabetes Education Program would reach into the schools to educate the children and would build partnerships with YMCA and other recreational centers for exercise programs. | Memorial Hospital | 2 | 31 to 90 days | \$300,000 |
| Sandusky | Home Health – Telehealth | Memorial Hospital's home health department would like to establish a Telehealth Program to provide support for patients with long-term conditions such as diabetes, CHF, COPD, and hypertension. A monitoring device would be given to the patient who would answer questions on a daily basis related to his condition via this monitor, which would send the results to a computer located at the hospital. A part-time nurse located at the hospital would evaluate the responses and determine the care needed. This type of care would provide early detection of potential problems and decrease the cost of emergency room visits and health care costs in general. The hospital would like to purchase 15-20 Telehealth monitors for use in patients' homes, a computer to receive the data from the patients, and a part-time nurse to analyze the data and deliver appropriate care as needed. | Memorial Hospital | 1 | 31 to 90 days | \$120,000 |
| Sandusky | Speed and Agility Clinic | The Physical Medicine Department of Memorial Hospital is offering a speed and agility clinic. The clinic is open to students in grades 8 to 12, athletes and non-athletes. It is a program designed to work with the individuals to increase speed, explosion, stamina and balance. Participants will be worked with in various drills at their skill level which will ensure quality performance. Each session will be taught in a group setting with exercises and drills to help develop and improve muscular strength, endurance and flexibility as well as working on core balance. Individuals who will be attending each clinic are certified in physical therapy, athletic training, strength and conditioning as well as having the experience knowledge throughout their careers in order to lead a successful clinic. Each session will then focus on the participants by helping decrease the occurrence of injuries as well as working on lateral speed, vertical speed, footwork and plyometrics. Working with the equipment that is offered, including agility ladders, speed hurdles, parabolic, resistance bands as well as the knowledge of each instructor will guarantee the improvement. | Memorial Hospital | 3 | 31 to 90 days | \$15,000 |
| Sandusky | Club Health | Currently Memorial Hospital offers an employee health program which supplies health information to promote a healthy lifestyle. This could be expanded to obtain information and tools to improve life styles that impact risk factors such as obesity, stress, smoking, high blood pressure, and high cholesterol to determine what motivates employees to participate in a program aimed to improve their health. To encourage participation, incentives would be offered such as individual counseling, behavior modification classes, newsletters, webinars, massages, etc. Free health screenings, prizes, gifts, meals, and membership to a fitness center would be given to further promote healthy living. | Memorial Hospital | 1 | 0 to 30 days | \$50,000 |
| Sandusky | Women's Health | In Sandusky County, women's health care is lagging behind other counties in the state. The number of women ages 40 and over obtaining a mammogram in the last year in the county was 58%, 21% lower than reported in the state. 58% of Sandusky County women had a clinical breast exam in the last year compared to 78% in the state of Ohio. Regarding women who had pap smears in the last year, 52% were reported by women of the county versus 71% reported by the state. The numbers for the county are drastically lower than they should be. To rectify this situation, Memorial Hospital of Fremont requests funds to purchase a digital mammography machine. In addition, the Hospital will partner with Community Health Services as well as all local doctors offices. To provide assistance for women who are underinsured and may not be able to afford preventative health care. These screenings could significantly increase the number of cancer cases caught in the early stages resulting in fewer death cases. Consequently, health care costs would decrease. | Memorial Hospital | 0 | 31 to 90 days | \$600,000 |
| Sandusky | Golden Threads Senior Program | Membership in Memorial Hospital's Golden Thread Program for senior citizens is offered free of charge to anyone age 55 and older. Membership includes free or low-cost cholesterol screenings, blood pressure screenings, weight management seminars, smoking cessation classes, and education for mental health issues, cardiac care, and living with diabetes. In addition, the program offers low-cost social outings for the members such as trips to Washington D.C. and Cape Cod. Individualized assessments are offered to address stress regarding the different Medicare programs. Funding is needed to cover scholarships for seniors who wish to go on social outings but do not have the resources, the costs of nurses who administer the tests and provide medical education, the costs of dieticians who assist with meal planning for diabetics, the costs for printed material and postage, and any other miscellaneous costs. | Memorial Hospital | 0 | 0 to 30 days | \$25,000 |
| Sandusky | Wireless Cards for Home Health | The home health nurses affiliated with Memorial Hospital are often requested to make unscheduled visits to the patients. If these requests are received while the nurse is away from the hospital, a trip to the hospital is needed to access the patient records and download them to a laptop computer. This procedure wastes time, fuel, or mileage costs, and directly affects the quality of patient care. Providing a wireless card for the laptops the nurses carry with them would eliminate this issue. The nurse could access the internet provider at an off-site location and obtain the patient's rights whenever it is. This would decrease the hospital's costs for mileage and travel. Furthermore, it would allow for more immediate aid to the patient improving patient comfort and peace of mind. | Memorial Hospital | 0 | 0 to 30 days | \$25,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|----------------------------------|---------------------------|
| Sandusky | Health Risk Appraisals | Health Risk Appraisals use a questionnaire based on the latest scientific guidelines for optimal health in order to assess a person's health risks in certain areas so that basic testing and counseling can be given to promote a healthier lifestyle. Businesses are using these appraisals to cut health care costs and are diverting the money saved into programs to educate and promote healthier lifestyles for their employees. It is known, for instance, that race contributes to differences in the acquisition of certain diseases. African-Americans are 60% more likely than whites to become diabetic, are 3 times more likely to die from asthma, are 50% more likely to contract lung cancer, 4 times more likely to die from strokes, and develop hypertension at earlier ages with higher levels. This is due to genetics, environment, and socioeconomic levels. When it is learned via the Health Risk Appraisal that someone is African-American, specific testing and education can be made to lower the risks for that person. This will, in turn, lower health care costs for companies making health care coverage more comprehensive. | Memorial Hospital | 0 | 0 to 30 days | \$30,000 |
| Sandusky | Building Improvements | Renovating building with new energy efficient windows, and other updates to make non-profit organization as green and energy efficient as possible. | Portlief, Inc | 5 | 0 to 30 days | \$100,000 |
| Sandusky | Sandusky County Help Me Grow | Help Me Grow is a voluntary home visiting program for Ohio families who are expecting or have children under three years of age with developmental disabilities and delays or those children at risk for developmental delays. Families receive information on health, child development, evidence based parenting education, finding support in their community and connections to available resources and services as needed. Sandusky County Help Me Grow (SCHMG) strives to meet these goals: that children are healthy, that children live in safe and nurturing environments, and that children enter school ready to learn. Help Me Grow provides important supports to families in its current economic downturn. In Sandusky County, 84% of families now served have a low family income. Without this additional funding, staff and services will likely be lost. This additional funding would provide an expected outcome of providing services to 100 children and families. | Sandusky County Health Department | 3 | 0 to 30 days | \$146,000 |
| Sandusky | Therapy Services | Increase of 40 hours per month of each of the following services: speech therapy, physical therapy, and occupational therapy. These therapies would improve the health and living skills of the children and adults with significant disabilities served by the county board of MRDD. These services would provide increased support and assistance to families and other professionals who work with this population. | Sandusky County Board of MRDD | 1.5 | 0 to 30 days | \$85,000 |
| Sandusky | Early Intervention Services | An additional Early Intervention Specialist to work with families of infants and toddlers who are experiencing delays or who have a medical diagnosis that has a high probability of resulting in a delay. This population has increased significantly in the past several years, while our staffing has remained at the same level. The addition of this person would improve the quality of services we provide to a very needy and vulnerable population. | Sandusky County Board of MRDD | 1 | 0 to 30 days | \$46,000 |
| Sandusky | Spanish Instruction | We wish to employ a Spanish Instructor from our community to teach K-8 Spanish. This will positively impact our Hispanic students and provide an opportunity for all our students to gain a 21st Century skill. Our small non-public school employs 40 people. It is imperative that we find ways to keep our school financially viable and competitive. If we fail then the alternative is to close our doors, putting our staff out of work. | Sacred Heart School | 1 | 91 to 180 days | \$15,000 |
| Sandusky | Science Lab | We believe that a middle school science lab would help prepare our students for higher education and for the work place. We want to replace our current classroom with a sink, which requires a connection to the water line and plumbing to the sewer line. We would also need to purchase chemical waste station to meet lab requirements. Providing for the plumbing is the largest expense of this project. Some additional equipment would also be needed so that our students could safely participate in hands-on science experiments. | Sacred Heart School | 1 | 31 to 90 days | \$7,000 |
| Sandusky | Building-Based Care and Support Teams | These comprehensive service teams will be located in each of our 7 elementary buildings and consist of a guidance counselor, nurse, mental health worker, behavior specialist and student mentor coordinator. The "one-stop" shopping teams will facilitate team meetings to address the emotional, medical, behavioral, and academic needs of our primary-age children. This will link our families, community agencies, students and educators together in an efficient, collaborative manner to impact the overall "wellness" of each student and their home environment. | Fremont City Schools | 28 | 181 days or more | \$1,340,000 |
| Sandusky | Creating a GREEN Economic Future for Sandusky Coun | We expect to increase overall attendance to 98 percent in each building. Decrease late arrivals in each building. Provide immediate counseling services when needed. Afford parents access to training or care classes for children. Measure increased reading and math skills by 3rd grade. Build student assets through daily and weekly mentoring activities. Increase parental involvement in educational planning and interventions. Quarterly report to measure progress or goals listed. | Sandusky County Economic Development Corporation | 3,000 | 91 to 180 days | \$500,000 |
| Sandusky | Income Maintenance Employee Retention | The purpose of this project is to address the issues of energy independence and the creation of green manufacturing jobs, helping Sandusky County to take control of its own economic future. With all that is said and done, this project leads us toward a 21st century commitment to transform the local economy so that it is self-sustaining in terms of its energy requirements, and becomes a magnet for 2,000 green manufacturing jobs. Sandusky County has the opportunity, this year only, to be on the cutting edge of this new direction. Other counties and cities are moving forward in this direction. It is important that Sandusky County also move--and be one of the first counties in the State--to have a sustainable, green, economic development strategy. Sandusky County has the potential of becoming a rural county leader in this field by demonstrating how a local economy can be transformed by the green collaboration. | Sandusky County Department of Job and Family Servi | 10 | 0 to 30 days | \$400,000 |
| Sandusky | White Star Park Sanitary Sewer Extension | To retain employees to process and manage customer applying for TANF, Food Assistance and Medicaid. To maintain an average caseload size of 260 families per worker. If we have to reduce our staff to the average caseload size would increase to 494 per worker. This increase will increase the time it will take to process applications and therefore increase the time it will take for families to receive the assistance they so desperately need. It will affect the quality of the services and the level of service will decrease greatly. | Sandusky County Park District Sandusky County | 258 25 | 91 to 180 days 91 to 180 days | \$175,000 \$5,000,000 |
| Sandusky | Courthouse Annex Building | Extension of a sanitary sewer to White Star Park to provide service to several buildings in the complex | Sandusky County Department of Job and Family Servi | 15 | 0 to 30 days | \$600,000 |
| Sandusky | Children Services Employee Retention | Building would serve the different government agencies for the County and relocate existing offices out of historic courthouse into a new readily building as well as improve appearance. | Sandusky County Department of Job and Family Servi | 15 | 0 to 30 days | \$600,000 |
| Sandusky | Family Planning Program | Retention of employees that investigate child abuse and neglect cases and/or provide on-going services. To maintain an average investigation caseload of 52 per worker and a caseload of 10 per worker. With the potential loss of funds these caseload sizes will double putting children at even further risk of abuse or even death. | Sandusky County Health Department | 9 | 0 to 30 days | \$115,000 |
| Sandusky | Meeting the Transportation Needs of K-12 Fremont C | The Family Planning Program of Sandusky and Seneca Counties is a health clinic that provides services that promote planned pregnancies and healthy sexual practices. As stated in the title, the program provides services to both Sandusky County and Seneca County. Last year, we received 2,784 visits to 1,301 patients. All services are professional and confidential. Services include pap smears, pelvic exams, pregnancy testing, STD testing and treatment, and birth control. The program strives to increase access to care and clinical services for those unable to reach populations, including the uninsured and under-insured, cultural and ethnic minority groups, male, substance abusers, and low-income individuals. All services are offered on a sliding fee scale. | Fremont City Schools | 100 | 181 days or more | \$2,122,125 |
| Sandusky | Instructional Technology with Wireless Labs | Fremont City Schools would like to renovate 19 bus drivers and have the ability to purchase 5 new buses to offer transportation for 2,400 K-12 students. Bring a wide or more from their home school. We wish to live as behavioral monitors and purchase all digital cameras for each bus. The district will implement before and after school tutoring services that would reduce transportation. Projected outcomes include: Providing 65 new bus driver and behavior monitor jobs in the district for a potential of \$1,456,325 that could be used in our community, generate approximately \$500,000 (plus skilled labor earnings) in the bus manufacturing sector, stimulate approximately \$62,800 (plus skilled labor earnings) in the digital camera/holography production industry, provide working positions for 14 teachers with a potential total savings of \$84,000 that would benefit our community, and stimulate \$50,000 (plus skilled labor earnings) in the digital manufacturing and supply industry. | Fremont City Schools | 3 | 181 days or more | \$300,000 |
| Sandusky | Child and Family Health Services | Implement 50 wireless labs in 9 schools with instructional Technology support for installation, professional development, integration into the classroom and maintaining equipment. This will enhance our teaching and learning with technology and give our students access to the technology while in their seats and at their workstations. | Sandusky County Health Department | 7 | 0 to 30 days | \$125,000 |
| Sandusky | Creek Bend Farm Timberframe Barn Restoration | The purpose of the Sandusky County Child and Family Health Services Program is to improve the health status of children and families in Sandusky County. In collaboration with other community partners, Sandusky County Health Department (SCHD) performs a Community Health Assessment and a Child and Adolescent Health Assessment. Based on these assessments, SCHD structures the services provided. Overall, SCHD through the Child and Family Health Services Program improves the access to child and family health care services, improves immunization rates, reduces lead poisoning, perform newborn home visiting, and address community health issues. Client/patient education, case management, service coordination, direct care, and referrals are included in services provided through this program. This program also currently partners with the Teen Pregnancy Prevention Program and the Prevention Partnership Program, which focuses on substance abuse prevention and youth asset development. | Sandusky County Park District | 30 | 0 to 30 days | \$175,000 |
| Sandusky | water supply upgrades and improvements | Creek Bend Farm Park is listed on the National Register of Historic Places as an historic farmstead and has also been recognized as a Century Farm. The Sandusky County Park District is managing the park as a 1930-1950 farm park that celebrates the significant impact of the family farm. The centerpiece of this effort is to restore the five timberframe barn buildings, built in 1971, to their original appearance and use. We have completed restoration on the largest of these barns but budget constraints limit our ability to restore the remaining structures. Timberframe barn structures are quickly disappearing from the Sandusky County landscape and restoring and preserving these barns will provide important historic preservation and education benefits. The restoration effort will involve the replacement of structural timbers, foundation components and siding. The barn will then be professionally painted to match the original color scheme. To complete the restoration work we will employ several local trades, including carpenters, masons, roof resters and painters. Professional historians, engineers and architects have been, and will continue to be consulted. | gibsonburg vol. fire dept. | 20 | 0 to 30 days | \$34,000 |
| Sandusky | Women's Health Services Program | The Disboring Vol. Fire Dept. is seeking funding to purchase and install five dry hydrant systems to improve rural water supplies for fighting fires. These fire hydrants are unusable. The project will also upgrade approximately 150 existing fire hydrants located within the 1700s of Disboring Corporation limits. GVPD covers a primary response area 27 square miles with a population of approximately 5000 persons. The department annually responds to an average of 100 emergency calls for services. The strategic placement of the dry hydrant systems in Madison Township, Sandusky County will greatly enhance our ability to protect life and property. Presently, water supply in the township is limited to tanker trucks. These dry hydrants will also be available to other fire departments for use in emergency type situations. The upgraded hydrants in the village limits will increase visibility, accessibility, maneuverability, and increase water supplies. We intend to use local tankage for replacement of components purchased from Ohio based suppliers. Without funding assistance, this project will not be possible. | Sandusky County Health Department | 9 | 0 to 30 days | \$50,000 |
| Sandusky | Public Health Nursing | The purpose of the Women's Health Services Program will be to improve the health and well being of women, infants, children, and families by assuring health access for a vulnerable population of low income women in both Sandusky and Seneca Counties. The target population is low income women specifically those at or below 100% of the federal poverty level. The goals of care are to maintain healthy lifestyles and minimize health risks. By offering availability to comprehensive medical examinations, we offer preventative services, including appropriate screenings for potential conditions such as reproductive tract infections, breast cancer, sexually transmitted diseases, sexual abuse, substance abuse, and poor birth outcomes. By offering access to Women's Health Services Program clinics, the program strives to minimize chronic health issues and prevent chronic disease and thus improve health outcomes for these women and their families. Last year, approximately 850 visits were provided to 211 clients. | Sandusky County Health Department | 10 | 0 to 30 days | \$225,000 |
| Sandusky | Law Enforcement / E.M.S. building project | Sandusky County Health Department serves Cylex, Fremont, and all of rural Sandusky County. The mission of Sandusky County Health Department is to assure that conditions within the health district allow its residents to lead healthy lives. By continuing programs, the Public Health Nursing, we are committed that. The Public Health Nursing program, in conjunction with the Health Department, promotes a healthy community and protects residents from health risks, prevents disease, disability, injury, and premature death; defines health priorities through community health assessments; and develops health policies that supports and encourages improved health status. Through programs, Public Health Nursing, we assure that health services are available and accessible to all residents. Public Health Nursing provides generalized public health services, including Communicable Disease Investigations, Immunizations, TB Testing, Behavioral Visits, Lead Testing, Nutrition Home Visits, Senior Health Screenings, Case Management, Service Coordination, and Bureau of Children with Medical Handicaps Applications. | Sandusky County Park District | 10 | 31 to 90 days | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Sandusky | Mobile Data Terminal Project | Mobile Data terminals to the law enforcement vehicle along with mobile dash cams. The estimated price per unit is \$12,000 + 4 = 48000 Software and wi-fi cards = 15000 Total project cost = \$63,000 This project would allow law enforcement to serve the public with a greater efficiency. With the addition of the mobile data terminals / dash cams we will be able to provide the public with crime prevention / public safety. A project of this nature would stimulate the organizations that sell these products and install them. It would also provide stimulus for those that create and maintain software. | Sandusky County Park District | 6 | 31 to 90 days | \$63,000 |
| Sandusky | Park Restoration Project | This project would provide removal of over 500,000 tons of lime. With the removal of the lime we would be restoring about 6 acres of land that can be used for wildlife restoration and public recreation. The current property that the lime occupies is not established. The current property is by wildlife indigenous to the area. It is also restricted from public use. The lime use project would stimulate local trucking companies as well as a local quarry where we would be paying a per ton fee to dump the lime. This project could be started at the earliest convenience of the local vendors. With a project of this nature we would be retaining and creating new land for the public that would also be maintained by our staff of approx. 20 employees. This land would also be used for educational programs in relation to public recreation. | Sandusky County Park District | 6 | 91 to 180 days | \$625,000 |
| Sandusky | U.T.V. Patrol Vehicles | This vehicle is for the protection of snow plow / plow vehicles on our law enforcement team. The snow plow vehicle is used to clear snow from our 20 mile bike trail as well as the countless number of horse, hiking, and off road trails that our park district provides for the community. In addition to these responsibilities, the utility vehicle will also be used for wildlife mitigation and opening operations providing an economical and environmentally friendly alternative to tractors. Our Rangers currently patrol our off road trails by foot, or mountain bike. This is a good way to patrol, however if an emergency situation were to come about, we would have no way to quickly respond to a safety without sacrificing precious time. The cost of each U.T.V. is about 20,000 fully modified. This would provide job retention for our L.E. Staff as well as providing stimulation for the sales of the vehicles generated within our local community. | Sandusky County Park District | 6 | 91 to 180 days | \$80,000 |
| Sandusky | US Route 6 Sanitary Sewer Improvements Project | SDWC Grant: \$21,000. Area is under Findings & Orders from Ohio EPA. 5,500 linear feet of new sanitary sewer. 1 new pump station. 2,500 linear feet of new force main. 4 residential grinder pumps. 300 linear feet of low pressure sewer piping to serve 7 properties in the area. | ms consultants, inc | 15 | 0 to 30 days | \$775,700 |
| Sandusky | Timpe Road Sanitary Sewer Improvements Project | Area under Findings & Orders from the Ohio EPA. 3,780 linear feet of new sanitary sewer to serve 47 existing residences & businesses in the area. | ms consultants, inc. | 15 | 31 to 90 days | \$897,000 |
| Sandusky | Hayes Avenue Sanitary Sewer Improvements Project | Area under Findings & Orders from the Ohio EPA. 5,570 linear feet of new sanitary sewer to serve 34 existing residences and businesses as well as new development along Hayes Avenue. | ms consultants, inc. | 15 | 91 to 180 days | \$1,924,000 |
| Sandusky | Bartson Road Sanitary Sewer Improvements Project | 1,700 linear feet of new sanitary sewer to serve approximately 15 existing residences & businesses. 1600 LF of 21-inch interceptor sewer to eliminate existing Grandview LIFT station, which has reached end of useful life. | ms consultants, inc. | 15 | 91 to 180 days | \$259,000 |
| Sandusky | Grandview Lift Station Replacement | Project will serve as interceptor sewer for future Timpe Road Area sewers, which are needed to eliminate falling on-site septic tanks under SDWA Findings and Orders. Includes parallel bypass from SDWC pump replacement and 800 LF of new 18 inch force main to upgrade existing pumping station. | ms consultants, inc. | 18 | 91 to 180 days | \$445,000 |
| Sandusky | Ireland Lift Station Force Main Replacement | Pumps are approaching service life and larger force main needed to improve peak pumping capabilities. | ms consultants, inc. | 12 | 31 to 90 days | \$225,000 |
| Sandusky | Wightmans Grove Area Sewer Improvements | Highmans Grove area is located in Riley Township along east bank of the Sandusky River. Approximately 200 residences with failing on-site sewage systems creating pollution problems. CEQA issued findings and orders for Sandusky County commissioners to prepare General Plan to address pollution problems. Income surveys performed in 2008 to determine LHM status so County could request \$10,000 CDBG local formula funds to prepare General Plan. Studies performed several years ago indicated least cost alternative involved vacuum sewers and pump station and force main to County collection system. Treatment would be provided by City of Fremont. Project implementation delayed due to lack of funding/over prohibitive. Sandusky County Sheriff's Office is requesting funding to upgrade our current radio system to also include the State of Ohio MARCS Radio System. Currently, the dispatch is not having direct communication with state and federal agencies such as the Ohio State Highway Patrol, SONR, and Border Patrol. Sandusky County is recognized as having a direct path of travel from Canada to Ohio and ports beyond via waterways, air and vehicle travel. Problems arising from this direct access include the smuggling of drugs, firearms and illegal contraband. Sandusky County Sheriff's Office is committed to obtaining such activity with a proactive law enforcement presence. To help achieve this goal, direct radio communications with agencies on the MARCS radio system will enhance our communications capabilities with emergency services. This grant will allow the installation and incorporation of the MARCS radio system into the SC90 Communication Center, existing radio patrol cruisers, command vehicles, as well as the Marine patrol boat utilized for patrol of the Sandusky River as well as Sandusky Bay. As always, the SC90 is committed to Mutual Aid with area agencies. | ms consultants, inc. | 18 | 181 days or more | \$1,850,000 |
| Sandusky | MARCS Radio Project | The Gibsonburg Vol. Fire Dept. is requesting funding for the purchase of a First Response EMS Vehicle. This vehicle will be an American made vehicle such as Ford or Chevrolet. This vehicle will be utilized for emergencies of a medical nature. This vehicle will support and enhance our standard of care given to those in need. This vehicle equipment will be purchased from American companies only with all preference given to Ohio based distributors and suppliers. GVFD covers a primary response area 27 square miles with a population of approximately 5000 persons. The department annually responds to over 150 emergency calls for services. GVFD provides emergency services to the surrounding area as well as support services to Sandusky County EMS. This project is for an active storage building. The building would be used to store and maintain equipment for land management and wildlife restoration as well as general operation projects. The building would stimulate the local economy by hiring local construction firms to construct the building as well as local contractors for maintenance and future upgrades. Our organization serves of Sandusky County and provides employment as well. | Sandusky County Sheriff's Office | 5 | 0 to 30 days | \$225,000 |
| Sandusky | First Response EMS Vehicle | The North Coast Inland Bike Trail will soon span the length of Sandusky County and branches into several other counties. The bike trail serves as an alternative mode of transportation by use of alternative energy sources reducing the emissions used for fossil fuels. Our trail is used on a daily basis in all weather. It is frequently traveled by bike, walking, jogging and even roller skating. The repairing project would ease the travels of those interested in traveling by means other than motor. | Gibsonburg Vol. Fire Dept. | 20 | 0 to 30 days | \$75,000 |
| Sandusky | Operational Storage | This project is for a repaving project on the North Coast Inland Bike Trail. A current section of trail is in dire need of repair and funds are limited. The North Coast Inland Bike Trail will soon span the length of Sandusky County and branches into several other counties. The bike trail serves as an alternative mode of transportation by use of alternative energy sources reducing the emissions used for fossil fuels. Our trail is used on a daily basis in all weather. It is frequently traveled by bike, walking, jogging and even roller skating. The repairing project would ease the travels of those interested in traveling by means other than motor. | Sandusky County Park District | 10 | 91 to 180 days | \$180,000 |
| Sandusky | Bike Trail Re-Pave | White Star Park repaving project. This funding would be for the paving of roads in our local park and parking lot. This area is open to the public and provides recreation, wildlife conservation, and educational programs. With the paving of the roadways and parking lots it would provide an easy way for areas to be accessed that are open for the public to enjoy. This would also allow an easier method for those with disabilities to enjoy the park areas. This project would stimulate local economy by the hiring of local contractors. It would also require maintenance personnel to maintain the lots and roadways which would secure employment opportunities with the Park District. | Sandusky County Park District | 10 | 31 to 90 days | \$100,000 |
| Sandusky | White Star Repaving Project | Our organization is looking to hire 2 part time law enforcement professionals. With the allocation of \$80,000 we will be able to employ 2 positions on a part time status and retain the positions for four years. This is a definite benefit to stimulating the economy in that we are actually employing two people. Our organization currently serves seven parks and over 2000 users. Our current law enforcement staff is grossly over staff. With the addition of two personnel, we would be better able to serve the public and provide a safe and secure area for public recreation. | Sandusky County Park District | 2 | 0 to 30 days | \$80,000 |
| Sandusky | Part Time Law Enforcement | We are seeking additional homeless assistance funds to serve the increased number of homeless individuals and families in Sandusky and surrounding counties. We provide up to 60 nights shelter, meals, case management, life skills and referrals. We have seen a 20% increased need for services for homeless individuals and families over the past 6-9 months. We operate mainly on donations and fundraising with the assistance of some grants. With the economy as it is, donations are down while the need has increased. Our goal is to assist our residents in becoming self-sufficient. We present a holistic approach to the homeless issues of our residents. Through meeting emergency needs and providing education we empower our residents to move forward. We traditionally have about a 60% success rate. These funds are needed to continue our operations and to increase services to meet the increasing need. | Liberty Center of Sandusky County | 8 | 0 to 30 days | \$35,000 |
| Sandusky | Liberty Center Homeless Shelter | The purpose of this program is to improve educational opportunities for families by integrating early childhood education, adult literacy and basic education and parenting education in a unified literacy program. Program outcomes are: 1) Increased language and literacy for children 0-5 years of age. 2) Completed transition plans for K-eligible children. 3) Increased promotion rate for students K through 3rd grade. 4) Increased school attendance rate for K through 3rd grade. 5) Achievement in basic skills goal. 6) Achievement in literacy goal. 7) Achievement in reading goal. 8) Achievement of placement in unsubsidized employment goal. 9) Achievement of diploma/GED goal. 10) Achievement of program in parent's support of instructional literacy activities. 11) Achievement of program in parent's support of child's learning in formal education settings. The proposed initiative targets 520 non-custodial fathers and cohabitating fathers, living in the State of Ohio with children exhibiting at-risk behaviors who are interested in strengthening their family unit and creating a healthy, stable family. The program design incorporates best practice techniques, research based outcomes and experience working with fatherhood programs that have been a effective catalyst for moving families out of poverty. | WSOS Community Action Commission, Inc. | 0 | 0 to 30 days | \$190,000 |
| Sandusky | Even Start | Participants access services that will enable them to improve their life and family. Activities: skill-based parenting education, mentoring, mediation, domestic violence prevention, mental health counseling, alcohol and substance abuse treatment, enhancing employment readiness skills, community volunteerism, financial counseling, an internet forum, and family fun activities. Participants will learn to counterbalance their strengths, motivations and supports and will have the opportunity to learn and apply basic life skills. Outcomes: 65% of participants will obtain basic need assistance and/or services; 100% will participate in case management activities; 75% of participants will complete training and obtain a certificate; 60% of participating children will increase their developmental skills; 80% of participants and the workplace. The program will build bridges that connect individuals with both learning institutions and the employer. The focus is on the link between the employer, the school of training institution, and the workplace. This program promotes the types of learning and skills needed to increase the overall productivity of Ohio's workforce. The Occupation, Vocational, and Skills Youth Training Initiative will: 1) enroll and retain court involved and/or educational disadvantaged youth; 2) increase their educational attainment; 3) place them in high growth industries and/or post-secondary education and training to meet employer needs; and, 4) provide them with post-program support to help them remain employed, increase their wages, and reduce recidivism. | WSOS Community Action Commission, Inc. | 5 | 0 to 30 days | \$380,715 |
| Sandusky | VIP program | 100% of the participants will enter their educational career occupation 80% of participants will obtain basic need assistance and/or services to improve family stability 84% of participants will complete an educational goal and obtain a Certificate/Degree 97% of the participants will increase their income | WSOS Community Action Commission, Inc. | 3 | 0 to 30 days | \$554,378 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Sandusky | S.S.T.P. (Sanitary Septage Treatment Plant) | This new patented SSTP (Sanitary Septage Treatment Plant) is designed to treat the waste generated by households outside the sewer infrastructure of a city. The septic holding companies will pump these households on a regular basis, as directed by the local Health Department, and deliver to the SSTP for treatment. Currently this type of waste is pumped (year in Ohio) is disposed of directly on the ground with no treatment, or disposal of a local sewer treatment plant. The local sewer plants are not designed to treat this type of high strength waste thereby reducing the designed population growth rate. Each SSTP is designed to treat 70,000gpd to service a 2-3 county area, each separated by a 20mi. radius. | Eastwood Environmental, Inc. | 140 | 91 to 180 days | \$3,000,000 |
| Sandusky | West Side Water Main Upgrade | Install a ten inch water main from N. Main Street to Sunset Ave, via Bohn, Stevenson, and Madison Streets. This loop to replace existing four and six inch lines which are up to eighty years old and severely corroded. This project needed to supply a safe level of water volume for fire fighting, provide current needs of residents, and allow expected growth for next forty years. | Village of Gibsonburg | 10 | 181 days or more | \$650,000 |
| Sandusky | REPLACE GASEOUS CHLORINE WITH LIQUID CL2 | Replace the gaseous chlorine currently used in drinking water treatment with liquid Hypochlorite. This would entail a building addition for adequate storage and pumping systems and distribution systems to points of entry into water supplies. | VILLAGE OF GIBSONBURG | 4 | 91 to 180 days | \$290,000 |
| Sandusky | REVAMP EAST AND WEST CSO AND ASSOCIATED DITCHES | Revamp combined sewer overflow channels to prevent backflow of water from storm ditch and reshape the storm ditch to properly flow away from the city charter. | VILLAGE OF GIBSONBURG | 6 | 91 to 180 days | \$240,000 |
| Sandusky | Youth Works Program | This money is needed to purchase a new van for our program, both of the program's vehicles have over 100,000 miles and are in the need of replacement. The Sandusky County Juvenile Court currently works with approximately 600 at risk youth annually. 250 of those youth will end up performing Community Service as part of their disposition. Community Service provides 3000+ hours of labor to our county's local non-profit organizations through their job via Car Detailing Program, Summer Gardening Program, landscaping and a variety of other tasks. Symbolically community service is considered a "restorative" way to get our youth to repay the community. By being able to purchase a new vehicle, our program will be able to continue the employment of 3 staff and provide 3000 hours of service to the local business community. Saving them of \$15,000 that they would normally be able to fund. | Sandusky County Juvenile Court | 3 | 31 to 90 days | \$30,000 |
| Sandusky | Employment Specialist | An additional full-time Employment Specialist would be added to assist the SCBRD in securing jobs for the increasing number of disabled adults who have become unemployed or are currently under-employed (27 out of the 89 individuals served by the Community Employment Department meet this description). The Employment Specialist would be responsible for helping these individuals find competitive employment and/or assist their own small businesses; seek alternative employment options such as assisted employment/retail sites in the community; provide on-site job training; and provide follow-up/support services to both the hiring businesses and the workers. Expected Outcome: 30 individuals will be provided with employment opportunities. | Sandusky County Board of Mental Retardation and De | 38 | 0 to 30 days | \$38,050 |
| Sandusky | Building Acquisition | Sandusky County Regional Airport was planned, built and locally funded by the business community of Sandusky County. The Sandusky County Regional Airport now realizes a regional facility that services the economic growth of a multi-county area by providing access to private, corporate, and freight aircraft from around the country. The Sandusky County Regional Airport Authority and the Sandusky County Commissioners are seeking funding to purchase certain buildings on the Airport's property. The structures are currently owned by the Airport and leased to other tenants. This situation has created a barrier to the Airport's growth and ability to lease large aircraft hangars to tenants. The Airport serves as an important economic development tool for Sandusky County. Sandusky County Regional Airport has enjoyed the support of the local business community since the airport's inception. In fact, the business community provided the local match for the planning and expansion of the facility. | Sandusky County Regional Airport Authority | 20 | 0 to 30 days | \$1,800,000 |
| Sandusky | Pharmaceutical Waste Handling Disposal | A Pharmaceutical Waste Compliance program will allow the hospital to fully comply with multiple federal, state and local agencies in order to protect patients, staff and the environment from the disposal of unused medications entering our municipal and rural water supplies. This program originates under the Resource Conservation and Recovery Act (RCRA). Funds will be used to collect and dispose of medications according to the RCRA regulations in accordance to the guidelines set forth. More importantly, funds will be used to communicate to the public the need for proper pharmaceutical waste disposal and make the hospital a central location to collect and dispose of these medications properly. | The Bellevue Hospital | 8 | 31 to 90 days | \$200,000 |
| Sandusky | Eco-Friendly Vehicles | The Facility Resource Management at the hospital requests the purchase of 4 Eco-Friendly American made, 2014 Chevrolet and 1 Saturn hybrid transport vehicles, used as a courier vehicle to transport information from other hospital departments, offices, and 2 E85 Chevrolet trucks with snow removal equipment to be used for facility maintenance and hauling. This project will assist in the reduction of gasoline consumption and lower carbon emissions. These vehicles would be purchased from a local dealer. | The Bellevue Hospital | 14 | 0 to 30 days | \$140,000 |
| Sandusky | WSOS Capitalized Maintenance: PID 86110 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through ODOT. | Ohio Department of Transportation | 1 | 0 to 30 days | \$43,623 |
| Sandusky | Pharmaceutical Waste Handling and Disposal | A Pharmaceutical Waste Compliance program will allow the hospital to fully comply with multiple federal, state and local agencies in order to protect patients, staff and the environment from the disposal of unused medications entering our municipal and rural water supplies. This program originates under the EPA and the Resource Conservation and Recovery Act (RCRA). Funds will be used to collect and dispose of medications in accordance to the guidelines set forth. More importantly, funds will be used to communicate to the public the need for proper pharmaceutical waste disposal and make the hospital a central location to collect and dispose of these medications properly. | The Bellevue Hospital | 8 | 31 to 90 days | \$200,000 |
| Sandusky | Digital Mammography Proposal | To purchase a FDA approved Full Field Digital Mammography unit. This will aid in the detection and prevention of breast cancer, and will cause positive outcomes by lowering the mortality rate by detecting abnormalities within the breast tissue earlier than film screen mammography. Our patients are seeking this kind of early detection unit and we desire to give them the best technology available. We are committed to keeping Quality Care, Close to Home." The digital mammography is a far superior method of capturing mammograms than film screen. We have 3 EFTs from GE, Fuji and Hologic. We would like to maintain our current employment status of 3 radiology technicians to run this program. This is a ready to go project because it will maintain jobs at our facility and alleviate a budget freeze on major purchases. | The Bellevue Hospital | 3 | 0 to 30 days | \$400,000 |
| Sandusky | TTVFD Building modification/upgrade and construct | Townsend Township Volunteer Fire Dept. Inc. is a non-profit 501-C3 organization. This project is for the station modifications and/or new construction. Our current fire station is 50 years old and in need of modifications and repairs. This project would create classrooms for firefighter continuing education and entrance services to our local community. This project would allow local contractors that retaining current jobs and great new jobs in our local economically depressed region of Ohio. | Townsend Township Vol. Fire Dept. Inc. | 100 | 91 to 180 days | \$350,000 |
| Sandusky | Emergency Department Electronic Documentation | The Emergency Department seeks funds for electronic documentation that would interface our hospital's ADT system with the physicians and clinical staff in the Emergency Room. This system would disseminate information from the patient's arrival, admission, until their discharge. The information would give information to physicians in critical situations and help to eliminate medical errors. | The Bellevue Hospital | 31 | 31 to 90 days | \$132,000 |
| Sandusky | Probation Officer | To offset current probation staff salaries in order to hire additional staff. | Sandusky County Juvenile Court | 1 | 31 to 90 days | \$43,200 |
| Sandusky | Probation Officer | Hire a new probation officer. | Sandusky County Juvenile Court | 1 | 31 to 90 days | \$43,200 |
| Sandusky | Juvenile Court Attorney Guardian ad Litem Program | Homeless Guardians ad Litem assist the court in determining the child's best interest. Recently adopted Rules of Superintendence for the Courts of Ohio dictate GALs are to maintain the required educational and training requirements. 30 children will have an appointed Attorney GAL regardless of the financial ability of the parents or custodians to pay for services. A repayment schedule will be figured, depending on each party's circumstances. | Sandusky County Juvenile Court & Probate Court | 15 | 31 to 90 days | \$45,000 |
| Sandusky | CASA/GAL Program for Juvenile Court | CASA/Guardians ad Litem are needed to assist the court in determination of the child's best interest when involved in child protection actions (abused, neglected, dependent). The CASA/GAL acts as a watchdog on behalf of the child and during the lifetime of the case. CASA/GALs will perform the required educational and training requirements. They will conduct research background of the child, participate in hearings and make their recommendation to the court. 50 children will be appointed a CASA/GAL. | Sandusky County Juvenile Court & Probate Court | 15 | 31 to 90 days | \$100,000 |
| Sandusky | Guardian Ad Litem Program for Juvenile Court | Guardian ad Litem are needed to assist the court in determination of the child's best interest. GALs will complete and maintain the required educational and training requirements to operate their appointment. They will perform investigations and make recommendations and findings. GALs will participate in hearings and make their recommendation to the Court. No appointment of a GAL on behalf of a child will be delayed or denied due to the parents or custodians inability to pay for services. In cases where warranted, the parents or custodians would reimburse for said services. | Sandusky County Juvenile Court & Probate Court | 15 | 31 to 90 days | \$45,000 |
| Sandusky | Curfew Accountability Program | Probation officers will conduct after hours curfew checks of youth currently on probation. | Sandusky County Juvenile Court | 5 | 31 to 90 days | \$45,000 |
| Sandusky | Curfew Accountability Program | Probation Officers will conduct after hours curfew checks of youth currently placed on Probation. | Sandusky County Juvenile Court | 4 | 0 to 30 days | \$20,000 |
| Sandusky | Single Sign-on | Implement a single sign-on solution to improve hospital security and productivity. | The Bellevue Hospital | 5 | 91 to 180 days | \$90,000 |
| Sandusky | Web Access | Develop a web interface for patients to access their electronic medical record. This would allow patients to view their medical chart from home or print out the information to take to another care facility or send to an insurance carrier to answer any outstanding medical claims. | The Bellevue Hospital | 4 | 91 to 180 days | \$120,000 |
| Sandusky | Infrastructure | Upgrade hospital infrastructure to support electronic charting. This will interface all programs within the hospital to give physicians, clinical staff and patient accounting information to correctly disseminate information to patients, other hospitals, consulting physicians and insurance carriers. This is a correction to the county of a earlier request. | The Bellevue Hospital | 4 | 0 to 30 days | \$400,000 |
| Sandusky | Skilled Trades Center | Skilled Trades Center for Welding, HVAC, automotive and trucking driving. This project is shored ready and will produce skilled workers for infrastructure type work. | Terra State Community College | 400 | 91 to 180 days | \$3,200,000 |
| Sandusky | Connectivity | Provide internet redundancy for the hospital to facilitate uninterrupted access to the electronic medical record by remote physicians. This will allow physicians to have access to a patient's chart if needed, at their office or in some cases from their home. This will improve accuracy information, cut down on medical errors and provide efficiency for our physicians to make critical decisions on patient care. This is a correction to the County of a earlier submission. | The Bellevue Hospital | 4 | 0 to 30 days | \$61,000 |
| Sandusky | Energy Management Plan | Energy Management Plan that is ready for implementation (includes facility upgrades, alternative energies, building management system and scrubbed heat and power as well as educational opportunities for the College). The plan has been submitted to OER and meets HB 251 requirements (energy reduction by 20%). | Terra State Community College | 100 | 91 to 180 days | \$3,500,000 |
| Sandusky | GE Fetal Monitoring Mandatory Upgrade | Replace current fetal monitoring servers and software and a year of maintenance. | The Bellevue Hospital | 25 | 31 to 90 days | \$52,000 |
| Sandusky | Ob TraceVue Electronic Documentation | This is a documentation package specific for OB documentation while integrating to the GE fetal monitoring system. This nursing documentation system will centralize the electronic patient record for the mother, fetus and newborn. It provides for physician remote access to closely monitor critical status. It will interface with the hospital's current ADT. This will financially help reduce hospital costs by decreasing electronic medical record keeping, and assist with improved efficiency with the clinical staff and physicians, while reducing medical errors. | The Bellevue Hospital | 25 | 31 to 90 days | \$232,425 |
| Sandusky | Clindoc Nursing Electronic Documentation System | The GE Clindoc nursing electronic documentation system will integrate the Operating Room with the currently owned GE surgical case scheduling system. It will improve communications and data workflow within the pre-admission testing area and throughout intra-operative areas to the Post Anesthesia Care Unit. It will provide for improved documentation and provide increased incidence of staff liabilities. | The Bellevue Hospital | 39 | 31 to 90 days | \$140,000 |
| Sandusky | Transportation assistant | Hire a transportation assistant to provide additional training of drivers and monitors and to maintain safety records of our 24 vehicle fleet. In addition they will maintain state mandated forms and licenses. Fleet maintenance records and bus assignments for field trips and delivery including job driver assignments. \$54,000 will hire this new position for 2 years. | Sandusky County Board of MRDD | 1 | 0 to 30 days | \$54,000 |
| Sandusky | Bus Purchase | Buy 72 passenger school bus with wheel chair lift. This will replace a bus in our current fleet that is aging rapidly and will enhance the safety of our students. | Sandusky County Board of MRDD | 5 | 0 to 30 days | \$96,000 |
| Sandusky | Personal Security for Sandusky County | Our security program fulfills the objectives of the Stimulus Act for 3 provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Business and government are looking for ways to cut costs and protect valuable assets. Homebased security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rescue operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our device. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can set location boundaries and trigger notifications when someone enters a location. Our location data can also be shared with location information to multiple choice phones numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self-powered units that continuously | Nuleaf Ohio Limited | 2 | 31 to 90 days | \$145,320 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Sandusky | Wireless Broadband for Sandusky County | Our access system fulfills the objectives of the Stimulus Act for it provides broadband to un-served and underserved areas while employing hundreds of high paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network in Delaware to surrounding counties for people stuck in the digital divide. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the funds available to the providers of cable and all, the underserved areas still exist today. Now the time is to something different. Rural America needs access today not the faded promises of the past. Our unique process for deployment utilizes the most cost effective wireless model available. Each fiber span produces the most coverage per mile of any existing provider which allows low access fees and universal participation even among the low incomes and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident by our existing network, the most advanced and cost effective Wireless technology available. | NexGenAccess | 17 | 0 to 30 days | \$1,700,000 |
| Sandusky | Liberty Center Homeless Shelter-EFSP Mass Shelter | We are seeking additional EFSP funds to serve the increased number of homeless individuals and families in Sandusky and surrounding counties. We have seen a 20% increase in need for services for homeless individuals and families over the past 6 months. Our goal is to assist our residents in becoming self-sufficient. We present a holistic approach to the homeless issues of our residents. Through meeting emergency needs and providing education we empower our residents to move forward. These funds are needed to continue our operations and to increase services to meet the increasing need. | Liberty Center of Sandusky County | 7 | 0 to 30 days | \$35,000 |
| Sandusky | Debt relief, Capital relief | We are currently seeking help for debt relief. We are a small construction company located in Fremont Ohio with a total staff of 10. With the slow down in the economy we have seen major increases in completion for projects. In turn we do not project the usual steady flow of cash that we have seen in the past. The assistance would help us to decrease our monthly outflow for debt expense, and also allow us to maintain our crew staff and their complete benefit package, based on the projected work load we are expecting. | Anderson Construction LLC | 9 | 0 to 30 days | \$150,000 |
| Sandusky | Township Garage & Meeting Hall | Currently we have the lease of a building and garage. We have no inside plumbing. The water source is a cistern and we do have an outdoor. Heat in the meeting hall is a side wall propane heater. Heat in the garage is a portable heater. We have to also rent another building across the road to house equipment. This too is very basic. The new steel building would house the trucks and tractors. We would have an office/meeting hall and storage for the township records. We would also have modern plumbing and energy efficient heat. We would actually have a building "up to code". We would also like to get a phone. This new building would improve the facilities of the township 100 fold. First we would have ownership of the building and land. Also people could attend the meetings of the township in comfort. The equipment will also last longer when it can be placed in a heated environment. | Townsend Township | 5 | 31 to 90 days | \$149,232 |
| Sandusky | SEWER LINE EXTENSION | Please consider our request. | WOODVILLE TOWNSHIP | 0 | 181 days or more | \$50,000 |

| Sandusky | Workforce Development Program | Effective youth employment and career development programs working with juvenile offenders are greatly needed in Sandusky County. Often there is a gap between the courts, local workforce development programs and the youths. Therefore, to increase the workforce development and increase the likelihood youths will become productive citizens of the community, the Sandusky County Juvenile Court, in partnership with Ohio Department of Youth Services developed and implemented a Workforce Development program that targets juvenile offenders. Referrals are received from juvenile court staff based on the youth's employment or career development needs. This program began in August 2005. It has since served 40 youth with 42 of them completing the program. Youth earned the workforce, vocational, and GED programs or remained in school. Unfortunately, this past year the Department of Youth Services lost it's funding for this program ceased. Hiring one full time staff person in addition to the two full time staff will allow us to appropriately serve approximately 30 youth. | Sandusky County Juvenile Court | 3 | 31 to 90 days | \$43,000 |
| Sandusky | Green Energy Efficient Commercial Window Expansion | being specified and supplying Ohio schools under the DQPC, otherwise out of state. Our project will develop and manufacture energy efficient LED systems for lighting the nearest technology available in our industry. We feel this major component of the building envelope will contribute to energy efficiency and result in fuel consumption savings. These windows can: 1 Supply LED certified projects to schools for new construction and retro school application. 2 Provide Ohio schools with an Ohio manufactured energy efficient window system. 3 Reduce Carbon Footprint 4 Reduce GHG Emissions 5 Enable 30 people including fabricators, warehousemen, maintenance, engineers, estimators, sales, accounting, and clerical positions 6 Build a 40,000 sq ft manufacturing facility, and an 11,000 sq ft warehouse utilizing wind turbines to generate power. This expands our 75,000 sq ft facility, thus providing construction jobs in the process. 8 Increased taxable revenue | Capitol Aluminum & Glass Corporation | 75 | 0 to 30 days | \$3,000,000 |

| Sandusky | Rural small wind energy program test program | This is the following for an earlier study for the "Rural small wind energy program R&D". This would be the implementation phase of the project that would attempt to locate and install a large base (size to be determined based on study) of wind turbines in a controlled area and measure the results. Generation output and metering would be needed to determine program effectiveness. If successful a further implementation phase would be needed in multiple locations. This would also be the time to have the installed redesigned wind turbines against standard wind turbine designs and determine effectiveness. | Private Engineer | 25 | 181 days or more | \$4,500,000 |
| Sandusky | Rural small wind energy program R&D | This is the development and testing phase of a bigger project to develop smaller scale wind generation for rural areas in Ohio or other states. The project will develop a system for small scale installed wind generation with minimal installed costs to help promote the implementation. The main objective is to come up with a reduced cost installation so that many installers can be made within a region and distribute the generation across a larger area. This will allow many to participate in the generation of electricity and reduce the cost of larger installations making it more accessible to the general population. This will also help farmers use their land to its fullest extent. A large goal is to develop a smaller installed wind turbine with modified tower to reduce installed cost and manufacturing. A second project is also being proposed for a larger implementation phase. This type of approach can be used on rural farms and field grounds but should also be able to be modified for smaller sites as well as rural factories. Solar could also be used to supplement the program where large existing roof areas are available. There is a wide area of farmland affected by Haden in the state, un-sold and/or under used services or resources that would otherwise be readily available. - 7,000 sq ft. It will consist of a multi purpose room for public training workshops and seminars in all areas of the Autism Spectrum. We will also hold monthly support Group Meetings and special events to educate anyone who may come into contact with our children affected by Autism. - 2,400 sq ft. It will be used as a resource center multi media center and sensory play for children while families use the resource center. As a parent I am dependent affected by autism on a personal level and a business person. I hope you will consider this request and we will work with our Board of Directors to manage the money and see if gets used for absolutely needed projects and supplies. Thank you for reading this and considering our request. Although we've not received our non profit from Iris w | Private Engineer | 2 | 31 to 90 days | \$250,000 |
| Sandusky | AUTISM EDUCATION CENTER | The Sandusky County Family and Children First Council Project is a joint collaborative project that will address local priorities in the areas of poverty, work, and opportunity, crime and safety, education, and health care. Through cooperative planning, maximizing resources, leveraging other funds, and tracking accountability, Council members will work together equitably to retain and enhance a seamless delivery system for families. Priority services include: service coordination (engagement and school case management), health care services, food needs services, child abuse prevention and case management, all day kindergarten and school technology, substance abuse prevention, teen pregnancy prevention, and juvenile crime prevention. Our outcome goal is for FCFC to provide wraparound services to 70 children and their families directly and through our partner organizations and projects relate public sector jobs, and provide vital services to thousands of county residents that will help them also prepare for and maintain jobs. We are building a new hospital which will offer Emergency and Inpatient services to patients. We are privately funded and scheduled for completion of our building in May 2009. These additional funds would be utilized to purchase equipment and assist in operational cost at start up. You can visit our website at: physicianschoicohospital.com for more information. | The Sensory Playroom and Autism Family Resource Ce | 10 | 0 to 30 days | \$200,000 |

| Sandusky | Continued operation of a 159 year old retail hardw | This will be the most affordable healthcare in the area and look to serve our community well with new professional jobs and greater access to emergency services. | Swint Reineck Hardware, Inc | 12 | 0 to 30 days | \$600,000 |
| Sandusky | Genesis Afterschool Program- Curriculum | To re-establish a strong retail base within our county, and surrounding counties The Genesis Afterschool Program is designed to reduce and/or eliminate illegal and unhealthy behaviors in selected court-ordered Sandusky County youths. Youthful participation in this behavior development program for up to 25 hours per week. Participation includes healthy snack, homework assistance, cognitive behavioral based groups, family style dinner, and life and social skills training. The Genesis Afterschool Curriculum is an integral component and contributes to the low recidivism rates of Genesis Program participants. The 11 week curriculum focuses on problem solving, risk factors, criminal thinking errors, positive vs. negative thinking, anger management, job and life skills, social skills, and reducing the Risk. Currently, this highly structured afterschool program is only offered in Sandusky County, OH. It would be beneficial to the state if more counties had this program available to help decrease recidivism. This proposal would provide for the replication and publishing of the Genesis Curriculum and the training and start up of a Genesis Program in another county in Ohio. Eventually, the program will be able to spread just to reach all corners of the state. | Sandusky County Juvenile Court | 7 | 181 days or more | \$326,700 |

|----------------|--|---|--|----------------|--------------------|---------------------------|
| Sandusky | Genesis Afterschool Program-Main | The Genesis Afterschool Program strives to reduce the illegal and unhealthy behaviors that result in the incarceration of juveniles through a structured leadership development program. All participants, including parents/guardians, are court ordered to participate. Annually, this intensive, behavior modification, program will help 30 youths and their families to change their thinking so their behaviors will change. Of the 30 participants, about 50% will not re-offend 6 months post program, 30% 12 months post program, and 20% 2 years post program. Daily, the Genesis Program operates from 3:00pm-6:00pm, and provides transportation to the program, healthy meals, homework assistance, cognitive behavioral based groups, dinner, and life and social skills training. The Genesis Program provides the cognitive behavioral based groups by using a curriculum, developed by Genesis staff, which focuses on problem solving, criminal thinking errors, risk factors, positive vs. negative thinking, anger management, social skills, job and life skills, and Reducing the Risk. | Sandusky County Juvenile Court | 6 | 31 to 90 days | \$300,000 |
| Sandusky | Genesis After School Program | Many of the children, the Sandusky County Juvenile Court works with have learning challenges due to both ability and behavior. We know that school failure is one of the risk factors for a life of adult crime. The Genesis Program strives to increase school success. Online learning programs have proven to be successful as youths can learn at their own pace with some instruction. NovaNET is the online learning program that the Fremont City Schools have adopted for use. Developed, validated, and refined by research, NovaNET has been demonstrated to improve test results, reduce drop-out and at-risk rates, and increase student self-confidence. When the youths enroll in NovaNET, they complete several modules for specific subject areas. When they complete the modules, they take a test. What the test is, please. The youths earn 12 credit in the subject based on graduation. The school, however, only has 18 licensed computers to be used for the students in need. When the youths are signed up for the NovaNET Program, they can access it from any computer. We would like to construct a computer lab, with 10 computers and internet access, at the Genesis Afterschool program. | Sandusky County Juvenile Court | 2 | 91 to 180 days | \$40,000 |
| Sandusky | Project Payback | The Sandusky County Juvenile Court currently works with approximately 600 at risk youth annually. Two hundred of these youth will end up performing Community Service as part of their disposition. Community Service provides 6000 + hours of labor to our county's local non-profit organizations. Symbolically community service is considered a "redemptive" way to get our youth to repay the community. The offenders' ages range from 12 to 18. The Restitution Program holds youth financially responsible for the loss and/or damages they have caused. The program is designed to aid victims in at least partial reimbursement of such losses. The Sandusky County Juvenile Court has program that will benefit our community and assist the victims of juvenile crimes. The Juvenile Court Restitution Program offers the opportunity to earn the money to compensate their victims for property/personal damage. In order for youth to carry out this commitment we need assistance with the construction of a building that will allow us to work in all conditions. This will provide us in the construction industry as well keep our 3 current staff. | Sandusky County Juvenile Court | 15 | 31 to 90 days | \$200,000 |
| Sandusky | Youth Works Community Garden | A partnership between the Court, OSU Extension, CARDC and the Master Gardeners goal is to continue to offer educational programs and opportunities to the youth of Sandusky County in a way that increases productive citizenship, accountability, and job skills. The garden is a place where youth can complete community service, learn about gardening, and become involved in marketing projects that benefit victims of crime. The focus of the garden is to engage juveniles, through hands-on experience, in the gardening process and help them develop stronger connections with the local and their community. It is our sincere hope that this garden will become a place where more than plants grow and flourish. The Youth Garden will be a place of hope for its future, where youth can experience pride in a job well done. This project underscores our dedication to bringing a gap between youth and the community in which they live. Most of the juveniles assigned to the garden never ever clean house, vegetables are grown and are amazed at the fruits of their labor. We will use to purchase supplies, seeds and salaries for our three staff. | Sandusky County Juvenile Court | 3 | 31 to 90 days | \$10,000 |
| Sandusky | Probation Officer Safety Training | Bring in a presenter to provide probation officer safety training for Sandusky County Juvenile Probation and surrounding counties. | Sandusky County Juvenile Court | 0 | 91 to 180 days | \$10,000 |
| Sandusky | Probation Officer Safety Training | Bring in a presenter to provide probation officer safety training for Sandusky County and surrounding counties. | Sandusky County Juvenile Court | 0 | 91 to 180 days | \$12,000 |
| Sandusky | Indoor Family Amusement Center | Finish the remaining 9,000 sq ft of 28,000 sq ft building. This remaining 9,000 sq ft will allow our existing indoor amusement center to meet the demanding physical needs of our handicapped needs community, and act as a physical recreation area for the local and surrounding youth age children and senior citizens. This 9,000 sq ft building will also act as a meeting facility for our handicapped community. | Indoor Family Amusement Center | 43 | 0 to 30 days | \$100,000 |
| Sandusky | Renovation/Restoration of Lindsey Volunteer Fire S | The Lindsey Volunteer Fire Station is currently in Village owned building, dating back to the 1800's. As the fire department has increased in size, the building is currently marginal and equipment is outdated. The station is currently in need of a major renovation. The current fire hall is in Sandusky County which was completed in Nov. 2007. The plan calls for the existing fire station to be demolished, and a replacement fire hall to be constructed on the same site. The new building would be designed to replicate the 19th Century architecture that surrounds it, and enhance the downtown Lindsey area. Increased sales are needed to be achieved by removing interior walls and windows, and a replacement fire hall to be constructed on the long term. | Village of Lindsey | 40 | 91 to 180 days | \$1,185,000 |
| Sandusky | Erie Shore Propane, Inc | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Sandusky | Jet Express Inc | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Sandusky | Fisher & Paykel | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |

| Sandusky | Sandusky Bay Area Goodwill Industries, Inc. | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Sandusky | R.W. Sanders Trucking, Inc , Clean Fuels Ohio Part | We plan to invest in A Certified efficient engines, bodisest, auxiliary power units, and other fuel saving equipment. | Clean Fuels Ohio | 5 | 31 to 90 days | \$5,000,000 |
| Sandusky | fremont distribution facility roof replacement | The fremont distribution facility includes a roof that needs extensive rehabilitation. In order to maintain building integrity, reduce heat loss and possibly introduce rainwater capture to the facility, the roof must be replaced. The current facility has a roof that covers approximately 70,000 square feet. | alfred nickles bakery, inc. | 0 | 91 to 180 days | \$160,000 |
| Sandusky | R.W. Sanders Trucking Co., a Clean Fuels Ohio part | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions by utilizing air-riding technologies. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Sandusky | Energy Management | The above mentioned projects are all implemented to reduce energy consumption. They consist of the following: upgraded lighting, efficiencies in compressed air, electrical demand reduction, building insulation, and production of cooler system. The expected savings would be the reduction in energy to the sum of \$300,000 per year. | Private Business | 40 | 31 to 90 days | \$531,250 |
| Sandusky | Genesis II- Prevention | The Sandusky County Juvenile Court has noticed that new offenders are getting younger in age. Changes against these youths include school unruly and domestic unruly issues. Unfortunately, these youths do not always get services to help change behavior until they become court involved. The Sandusky County Juvenile Court would like to collaborate with the Fremont City Schools to create a "prevention" program. The program would target three local elementary schools that have higher delinquent youth. The goals of the program would be to increase parent achievement by 50%, increase attendance by 50%, increase parent participation by 50%, decrease negative behaviors and discipline issues by 50%. This innovative program could be expanded to other communities after a pilot period. The projected cost includes staff, supplies, vehicles, training, and incentives for participation. | Sandusky County Juvenile Court | 13 | 181 days or more | \$500,000 |
| Sandusky | Additional Funding for Clean and Efficient Energy | The Clyde Green Springs Middle School construction package is currently out to be bid in April 2009 and has been funded by the Ohio School Facilities Commission. The school has been designed to have some of the most sustainable design features, such as roof light monitors to provide daylighting in the classrooms, a "tilted beam" mechanical system to save over 30% of the HVAC energy, plus other features designed to meet the LEED Gold rating (at present). The requested money is for the following additional clean and efficient energy features: 1) We can achieve 2 points by buying Green Power Renewable Energy Credits to offset 70% of the energy used by the school. This would be purchased under a 2 year contract; cost for this is \$ 6500.00 2) We would like to add Solar PV (photovoltaic) arrays to produce 2.5% of renewable energy on site to achieve 1 extra point; cost for this is \$ 50,000.00, for producing 10 KW of power for the school. | Clyde-Green Springs Exempted Village Schools | 6 | 181 days or more | \$56,500 |
| Sandusky | Technology for Lakota's Tomorrow | We are building a Pre-K through 12 grade facility through an OSFC project. We have passed a Bond Issue and raised the funds with construction beginning in June, 2008. There are no funds for technology hardware within this project and we need to update and improve on the technology we have. The district is a consolidation of five smaller communities that have no public libraries and a very few businesses. Our goal is to make this a community center which would also be for our farmers. The majority of these folks have full time jobs, but at our family time on the side. This technology would allow us to provide programs for them collaborating with Terra Community College, Owens Community College, and Vanguard/Sentinel Career. Technology will make the difference in their future and help secure their farms here in northwest Ohio. | Lakota Local School District | 191 | 31 to 90 days | \$500,001 |
| Sandusky | Transportation to the Community! | STEPS is a unique supported living provider agency. STEPS (Supports to Enhance Personal Skills) focuses on the needs of individual clients so that they can live an individualized and self-directed life. We believe in quality, personal care. We have an experienced and caring staff who are trained to focus on education, community inclusion, and family involvement. We need a passenger van to transport our clients to various community programs, including work, arts and entertainment activities, shopping, and community events. This would benefit the clients as it improves the quality of their lives. | STEPS (Supports to Enhance Personal Skills) | 0 | 0 to 30 days | \$29,455 |
| Sandusky | Sandusky County Reentry Program | This would benefit the community by providing them an opportunity to be educated about adults with disabilities in real-life settings as well as assisting the local economy with their services and money. The reentry program currently operates offering local social service agencies to provide services to inmates. These services provide necessary skills and services to allow inmates to reenter society to become productive citizens. The programs funding does not allow for any case management services to coordinate services that best suits the inmates needs. These case management services are vital to continue the success of this program. By providing these services we are reducing recidivism rates within Sandusky County, serving to moderate income, inmates and their families, reducing the need for public assistance and preparing the participants for work, and to be a productive citizen. The program accommodates approximately 120 participants per year. We would like to hire 2 case managers and 1 psychiatrist to provide services during the participants transition back to society. Their main goal is to coordinate services during and after incarceration between social service agencies, faith based organizations and the court system. The reentry program currently operates under the Sandusky County Community Corrections Board and has support of local courts, social services and faith base. | Sandusky County Community Work Program | 3 | 0 to 30 days | \$120,000 |
| Sandusky | 21st Century Teaching and Learning Community | In partnership with the University of Toledo, this project will transform a rural district's only high school into a 21st teaching and learning community that will equip students with essential 21st Century skills necessary for success in a digital and global society. The 5-year plan, which will require funding for collaborative classroom technologies, one-to-one laptop computing, and mission-critical professional development for educators, will integrate the common themes of electricity, math and science career exploration, and service learning into a student-centered and engaging curriculum containing a variety of projects and digital portfolios characterized by 21st Century skill sets. Recovery funds will be used to purchase hardware and software for every classroom that will allow teachers and students to interact with digital materials used in class making it easy to collaborate and work in project teams and software to extend learning beyond the physical boundaries of the classroom. The project will provide opportunities to connect with nationwide experts and global contacts and will leverage limited resources in this rural area to provide access for all students. | Benton-Carroll-Salem Local School District | 3 | 91 to 180 days | \$1,000,000 |
| Scioto | Pedestrian Friendly Upgrades | Replace 50,000 linear feet of sidewalks and 500 curb cuts in conjunction with the City's paving project in residential areas and high pedestrian traffic areas in downtown. | City of Portsmouth | 10 | 31 to 90 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-----------------------------------|----------------|--------------------|---------------------------|
| Scioto | Recreational Facilities Improvement | <p>Portsmouth plans to upgrade facilities at Municipal Stadium, once home to the Portsmouth Spartans who later became the Detroit Lions and is now home to local football, and Branch Rickey Stadium which is used by multiple schools and other baseball and softball leagues.</p> <p>This project will help preserve two facilities which have a rich history of sports. Both facilities have been home to amateur, semi-pro and professional sports teams.</p> <p>Both facilities will receive electric and plumbing upgrades. Locker and shower rooms will be updated and all bathrooms will be made ADA accessible. At Branch Rickey, bleachers will be replaced. At Municipal Stadium, visitor seating will be replaced and a new track will be installed.</p> <p>Costs include: Track \$1,000,000 Seating \$900,000 Electric \$800,000 Plumbing \$1,250,000 Other site construction \$550,000 Engineering fees \$325,000 Construction supervision \$150,000 Permits, legal ads \$25,000</p> | City of Portsmouth | 50 | 91 to 180 days | \$5,000,000 |
| Scioto | Haverhill Water Tank | A new water storage tank will be installed in the Haverhill area. This tank will double the current water reserves for this area. A new 1,000,000 gallon elevated tank will be installed in addition to 5,000,000 gallon tank of 12 foot water main. This increase is vital to meet the demands of the residents and the industries such as Sun Cakes Park, Sunoco which are located in the Haverhill area. Over the past three years, demand has more than doubled. | City of Portsmouth | 25 | 91 to 180 days | \$1,100,000 |
| Scioto | Portsmouth Skate Park | The City will create a skate park to benefit the area's youth. The closest skate park is located in another state, so not only is Portsmouth the only city in the state of Ohio to bring revenue as monies are being spent out of state. The City has currently set aside \$26,000 from its 2019 budget to implement a project fund to help assist a design build company. The cost of design and building an approximately 10,000 sq. ft. skate park is \$800,000. | City of Portsmouth | 20 | 181 days or more | \$800,000 |
| Scioto | Dist 9, PID 85805, SCI 1 light transit vehicle | Purchase 1 light transit vehicle for the Scioto County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$55,000 |
| Scioto | Dist 9, PID 85806, SCI 10 drive cam systems | Purchase 10 drive cam systems for the Scioto County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$10,000 |
| Scioto | CR250 Roadway Safety Improvements | Safety Improvements of County Route 250. Included in project is curb & gutter, hazard elimination, drainage, resurfacing, pavement markings, and signs. | Scioto County Engineer | 6 | 31 to 90 days | \$600,000 |
| Scioto | Dist 9, PID 85807, SCI Security systems & recorder | Purchase 10 bus security systems/GPS and time lapse DVD security recorder for the Scioto County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$27,500 |
| Scioto | Lawson Run WWTP Project | <p>The Lawson Run waste water treatment plant services the residents of the City of Portsmouth and surrounding areas of Scioto County. The primary treatment processes have reached the end of their useful lifespan and require significant upgrades to allow the City to comply with the NPDES permit limits established by Ohio EPA. The following will receive upgrades:</p> <ol style="list-style-type: none"> 1. Primary clarifiers 2. Trickling filter 3. Sludge and ball filter 4. UV disinfectant 5. Flow monitoring telemetry 6. Sewer maintenance support facility <p>Ohio EPA permits where applicable have been received. Upon completion, the City will be able to achieve reliable compliance with water quality requirements.</p> | City of Portsmouth | 20 | 91 to 180 days | \$6,000,000 |
| Scioto | Portsmouth Street Paving Project | <p>Over 39,000 linear feet of streets would be milled and replaced with this project. This figure is computed with the current cost of asphalt at \$100 a ton and mileage at 80 a square yard. Streets throughout the City would be included from the downtown to the historic district. The identified streets as in most need of paving as determined by the last time they were paved are:</p> <p>17th Street Thomas Avenue Dorman Drive Shawnee Road Grandview Avenue Harding Avenue Galia Street Court Street Market Street Midlake Road</p> <p>The City currently only can budget approximately \$200,000 annually on paving projects which allows for only the most dire of streets to be paved. The City is not able to keep up with the deteriorating street conditions.</p> | City of Portsmouth | 10 | 31 to 90 days | \$1,250,000 |
| Scioto | Resurfacing Program | Resurfacing around 8-10 miles of roadway including milling, when necessary, signs and pavement markings | Scioto County Engineer | 4 | 31 to 90 days | \$1,200,000 |
| Scioto | Guardrail: Safety Improvements I | Installation of around 3 miles of Guardrail and end assemblies for roadside embankment hazards, etc. | Scioto County Engineer | 4 | 31 to 90 days | \$500,000 |
| Scioto | Sign Replacement: Safety Upgrade I | Replacement of around 3000 road signs relative to the County Highway System to provide higher intensity signs to meet upcoming FHWA requirements. | Scioto County Engineer | 2 | 0 to 30 days | \$500,000 |
| Scioto | County-wide Pavement Markings | Pavement Marking Upgrade/Re-Stripes on over 100 miles of county roads with significant deterioration of existing markings. Plans include related pavement marker installation and auxiliary markings. | Scioto County Engineer | 3 | 0 to 30 days | \$300,000 |
| Scioto | CR377 & CR38 Traffic Signal & Intersection Improve | Replacement of existing Traffic Signal and performing intersection improvements to increase level of service and functioning of intersection. | Scioto County Engineer | 3 | 31 to 90 days | \$225,000 |
| Scioto | Bridge Load Rating | Load rating of existing county maintained bridges to determine the safe load carrying capacity of the bridge to meet FHWA requirements. | Scioto County Engineer | 2 | 0 to 30 days | \$150,000 |
| Scioto | Portsmouth- Wheelersburg Water Tank/Waterline Project | <p>Due to the increasing water demands of the eastern portions of Scioto County and equipment that is a minimum of 40 years old, the City of Portsmouth will be upgrading its water capabilities. A 180,000 gallon water tank serving Wheelersburg and Eastern Scioto County area will be replaced with a new 803,000 gallon potable water storage tank. This tank also provides water to Scioto Water which provides drinking water to another 20,000 residents. In addition, 15,000 linear feet of water line will be installed to increase system performance and storage. The existing pump station will also be replaced. A new duplex booster pump capable of 1,200 gallons per minute will be installed along with additional water lines.</p> <p>This project is approved by Ohio EPA and ready for construction</p> | City of Portsmouth | 40 | 31 to 90 days | \$1,350,000 |
| Scioto | Sign Replacement: Safety Upgrade II | Replacement of road signs relative to the County Highway system to provide higher intensity signs to meet upcoming FHWA requirements for efficiency. | Scioto County Engineer | 2 | 0 to 30 days | \$250,000 |
| Scioto | Filtration Plant Upgrade Project | Main plant upgrades will benefit all water system customers and will improve service to the east, including residents of Sciotoville, Wheelersburg, and the businesses and industries in the Haverhill area and the Paradise Furnace Industrial Park. Replacement includes a complete filter rebuild including valves, piping, 2 high service pumps, 1 backup pump, filter media and variable frequency drives which are 40 years old and are at the end of their life cycle. The new pumps will have 150 horsepower and be able to handle 2,000 gallons per minute as well as provide variable frequency drive, electrical service upgrades, and telemetry. These replacements will make the system more efficient, add more capacity, and will also be more green friendly. | City of Portsmouth | 25 | 91 to 180 days | \$2,100,000 |
| Scioto | CR2 Roadway Improvements | Replacement of deteriorated one lane truck bridge with a single span structure of 135x feet long and widened for two lane traffic. Some roadway approach work. | Scioto County Engineer | 6 | 31 to 90 days | \$2,250,000 |
| Scioto | Mill Road TR262 Bridge Replacement | Replacement of deteriorated one lane truck bridge with a single span structure of 135x feet long and widened for two lane traffic. Some roadway approach work. | Scioto County Engineer | 6 | 91 to 180 days | \$1,500,000 |
| Scioto | CR1 & CR2 Traffic Signal & Intersection Improvem | Traffic Signal Replacement and Intersection Improvements to increase level of service and functioning of intersection. Project includes new traffic signal system, pavement widening, pavement markings and signs. | Scioto County Engineer | 4 | 31 to 90 days | \$275,000 |
| Scioto | Guardrail: Safety Improvements III | Project includes around 3 miles of Guardrail and end assemblies on county roads for safety and protection of motorists due to roadside hazards. | Scioto County Engineer | 4 | 31 to 90 days | \$500,000 |
| Scioto | Guardrail: Safety Improvements IV | Project includes around 3 miles of Guardrail and end assemblies on county roads for safety and protection of motorists due to roadside hazards. County has a total need of around 85 miles of guardrail countywide. CR15, CR17, CR21, CR23, CR24 | Scioto County Engineer | 4 | 31 to 90 days | \$500,000 |
| Scioto | Guardrail: Safety Improvements V | Project includes around 3 miles of Guardrail and end assemblies on county roads for safety and protection of motorists due to roadside hazards. County has a total need of around 85 miles of guardrail countywide. CR25, CR2 | Scioto County Engineer | 4 | 91 to 180 days | \$500,000 |
| Scioto | Mackeltree Road TR99-4.81 Bridge Replacement | Project includes replacement of 128 foot multiple span bridge with single span bridge. Project to State Forest and immediately downstream of State Forest Lake Dam. Project will need to tie into existing dam spillway walls and blend with natural aspects of the location. | Scioto County Engineer | 6 | 91 to 180 days | \$1,500,000 |
| Scioto | Guardrail: Safety Improvements II | Installation of around 3 miles of Guardrail and end assemblies for roadside embankment hazards, etc. | Scioto County Engineer | 4 | 181 days or more | \$500,000 |
| Scioto | Portsmouth Fire Department Expansion Project | As part of an 11 county regional response unit and as part of the Ohio Homeland Security Strategic Plan, it is imperative the City of Portsmouth expand its current fire facilities and purchase 2 new pumper trucks. The current City of Portsmouth fire station was built in the 1970s and was designed to house current rescue equipment not on the station accommodate new fire apparatus. Recent funding from Federal and State Homeland Security Grants enabled the department to expand by purchasing a 24 foot older seawall and rescue trailer, a Ford 350 tow vehicle and a 24 foot long boat. The boat was an integral part of the formation of the City of Portsmouth, Fire and Police water response unit that provides water rescue, fire operations, and supports law enforcement on the Ohio River. The pumper trucks will replace an over 20 years old and an old consultant in part due to their open cab design. This project will bring our fire department into compliance with NFPA standards. | City of Portsmouth | 15 | 31 to 90 days | \$900,000 |

|----------------|--|--|---|----------------|--------------------|---------------------------|
| Scioto | Portsmouth Bridge Rehabilitation | Six bridges have been identified as needing rehabilitation. A 1-10 scale is used to determine whether or not a bridge needs to be rehabilitated and if of the following size or less: <ol style="list-style-type: none"> 1. Valley Street over Murrn Run 2. Offshore & 10th over the N&W railroad 3. Middle over Murrn Run 4. Sterling over Murrn Run 5. Galia Street over Little Scioto River 6. Pleasant Ave over Schenck Run Costs for each bridge are currently estimated at \$10,000 each. | City of Portsmouth | 5 | 91 to 180 days | \$100,000 |
| Scioto | Generator Project | This project's objective is to provide an emergency power source for residents of three facilities and establish an emergency shelter for power outages in the community. This project is to serve the most vulnerable target population, the chronically homeless. It, elderly, and handicapped. The generators would allow for the operation of elevators, and emergency lighting and would also provide an emergency heat source. The project would include 1. Washington Arms, Friday Manor Arms, and Shawnee Arms, in Portsmouth, Ohio. The project locations would allow for purchase, installation, and maintenance of emergency power source in the housing projects mentioned. The budget includes three emergency generators at a cost of approximately \$150,000 each. | Portsmouth Inner City Development Corporation | 12 | 91 to 180 days | \$450,000 |
| Scioto | Scienc Scioto Heritage Trail Project Point Signage | The Scienc Scioto Heritage Trail, Inc. is a nonprofit corporation organized and existing under the Ohio Nonprofit Corporation Law. The Scienc Scioto Heritage Trail is designed to capture the full flavor of our region. The Trail identifies a relatively large route of 84 miles primarily on county roads in western Scioto County. This scenic byway begins in Downsville, Portsmouth, the County Seat of Scioto County, going up the historic Ohio River Scienc Byway Portsmouth Mount Pleasant Point. It then follows the Ohio River westerly into Shawnee Forest, heading northward and upwards to the highest elevations in the county and then easterly and southerly around to some historical landmarks before turning back towards Portsmouth. There are 44 points of interest along the Byway designated by the committee to be enhanced and/or developed to encourage use by local citizens and promote tourism in general. The outcome of this project will place a descriptive sign at each of these 44 project points which will aid in promoting tourism in this spectacular area. | Scienc Scioto Heritage Trail, Inc | 5 | 0 to 30 days | \$6,000 |

| Scioto | City Center Project | The City plans to develop a City Center, an innovative concept that will utilize an existing city-owned downtown building to house and consolidate many city offices including the court system. The recent building was constructed as a poured-in-place concrete structure, thus, the structural integrity is superior to that of most modern construction materials. Consolidating city offices will facilitate a more effective working environment and allow the Health Department to expand. This project will impact the City's approximately 250 employees and 20,000 yearly visitors to the building. Renovations will provide a safer and more secure environment. The Center will have commercial space available to rent. Part of the purchase price of the property established a community foundation, and this foundation has reduced the City's liability to apply for funding of renovated building. The building housed a local department store, Martingale, for over one hundred years. Thus, this project is not only a major step in the future of Portsmouth but also shows our commitment to preserving our past. | City of Portsmouth | 250 | 91 to 180 days | \$10,661,250 |
| Scioto | Scioto County Sewer Improvements | Description: This project is a regional sewer project that affects approximately 17,000 county citizens, provides sewer service to the New Beal manufacturing facility in Haverhill that involves the creation of 1500 jobs and \$3 billion in private investment, provides sewer service to areas affected by the Portsmouth Bypass/Ashtabula Development Highway System that will open up 15 square miles of agricultural and light industrial development, reduces sanitary sewer overflows with collection system improvements, improves water quality in the Scioto River that have been determined by the OEPA to be inadequate and provides required improvements to a wastewater plant that is under construction and has been approved by the OEPA. The project benefits both public and private funding on a magnitude rarely seen in today's economic climate. <ol style="list-style-type: none"> 1 new waste water treatment plant 2 new pump stations 100,000 linear feet of new sewer line 50,000 linear feet of new force main 2 new equipment upgrades | Scioto County Board of Commissioners | 950 | 31 to 90 days | \$19,962,000 |
| Scioto | The Green School of Tomorrow | We propose to build a new school for the Green Local School District that will utilize all green technology--wind, solar and geothermal power and be designed for 21st century learning environments--use of technology, collaborative learning centers, research areas, instructional learning software, wireless communication and other high-tech learning solutions. The outcome for this high quality, Appalachian school will be to improve learning programs in all subject areas, foster communication between home and school, improve student attendance and overall replacement of current poor and unhealthy learning facilities. The community is isolated both from a technology standpoint and distance standpoint. The school is the center of the community and the focal point for all community activities. This would be a high profile project in one of the poorest areas in Ohio. This project would combine green energy technology with current state-of-the-art technology. TV monitor for training room for the Scioto County Commissioners | Green Local Schools | 200 | 181 days or more | \$35,000,000 |
| Scioto | Dist 9, PID 85808, SCI TV monitor for training room | Computer equipment for the Scioto County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$3,000 |

| Scioto | Dist 9, PID 85812, SCI Replace roof & rehab ceiling | Install accessible replacement doors for the Scioto County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$30,000 |
| Scioto | Dist 9, PID 85813, SCI Accessible replacement door | This project will install an 800,000 gallon Potable Water Storage Tank to add the existing 185,000 gallon Sun Hill Water Tank in serving the Wheelersburg and Eastern Scioto County area. Along with the tank over 15,000 linear feet of sewer line will be installed to increase system performance and storage. This project has been approved by the Ohio EPA and is ready for construction. | Howerton Engineering & Surveying PLLC | 15 | 91 to 180 days | \$1,200,000 |
| Scioto | The City of Portsmouth – Wheelersburg Water Tank/W | Due to the current pump station being over worked, the increasing water demands of the Wheelersburg area, and the pump station is nearing its end of life cycle, it is important that it be replaced to better serve the residents. This project will replace the existing pump station and increase the performance of the water distribution system in the Wheelersburg, Ohio area. The Project will require the existing pump station and the installation of a pump house building. A new double booster pump capable of 1,200 gallons per minute at 250 feet of head will be installed, along with additional water lines. Utilities will also have to be run to the pump station, which will include electric, and a telemetry system. This project can be shovel ready by July of 2009. | Howerton Engineering & Surveying PLLC | 10 | 91 to 180 days | \$150,000 |
| Scioto | The City of Portsmouth – High Service Pumps | This project will entail the replacement of existing pumps at the city's filtration plant. The current pumps are ending their life cycle and inadequate in meeting the demands for the current water distribution needs. By replacing the current pumps it will provide additional capacity and efficiency in the distribution network. The high service pumps will be installed at the Filtration Plant, one for each of the sub system in the distribution network, along with an emergency backup pump. The new pumps will have 150 horsepower and be capable to handle 2,000 gallons per minute, as well as provide variable frequency drive, telemetry, surge capabilities, and redundancy. This project will be shovel ready by July of 2009. | Howerton Engineering & Surveying PLLC | 8 | 91 to 180 days | \$100,000 |
| Scioto | The City of Portsmouth – Haverhill Water Tank | This project will install a new water storage tank in the Haverhill area, which is located in Scioto County and southern Green Township. The project will double the current water reserves for this area. With an increase in water demand in this area it is important the water system be able to meet the demands of the industries such as Sun Cakes, Pepsi, Sorbus, and additional proposed industrial industries building at existing in the Haverhill area. The Haverhill water tank will be a 1,000,000 gallon elevated tank, it will also include the addition of 5,000 linear feet of 12 inch water main. The project will allow the City of Portsmouth along with a transmission line project to provide adequate service to this area. This project will be shovel ready by July of 2009. | Howerton Engineering & Surveying PLLC | 15 | 91 to 180 days | \$1,100,000 |
| Scioto | Village of New Boston, Ohio - Sanitary/Storm/Combi | Project involves Sanitary Sewer Rehabilitation including Collection System Cured riprap line, excavate riprap, Manhole Liners and replacements. Portion of Project involves Separating storm sewer connections from Combined Systems. Part of a Multi-Phase Project - Estimated at \$7,000,000. | Howerton Engineering & Surveying PLLC | 20 | 181 days or more | \$2,500,000 |
| Scioto | Village of New Boston Buildings Rehab. | Project involves the Community building, Safety building, Service building installing new windows, doors, garage doors, New heating/air units, duct work, New generator for Safety Building, New lighting in all buildings, E generator for Safety Building, New lighting in all buildings, Extend the service building for storage of Police/Fire department inventory and storage of road salt | Village of New Boston | 100 | 31 to 90 days | \$750,000 |
| Scioto | The City of Portsmouth – Wheelersburg Water Tank/W | This project will install an 800,000 gallon Potable Water Storage Tank to add the existing 185,000 gallon Sun Hill Water Tank in serving the Wheelersburg and Eastern Scioto County area. Along with the tank over 15,000 linear feet of sewer line will be installed to increase system performance and storage. This project has been approved by the Ohio EPA and is ready for construction. | Howerton Engineering & Surveying PLLC | 15 | 91 to 180 days | \$1,200,000 |
| Scioto | Village of New Boston Pump stations, Flood defence | Project involves installation of 5 pump stations and one shed for Flood defence in the Village of New Boston. The Village has over 2 miles of floodbank. Need to replace 3 tubes that feed water to an larger pump station. Need to replace the pumps. The Village has a hard time getting sand built back in the late 1920's to early 1940's. The Village has a hard time finding electrical parts like buses Work needs to be done on the weak system. Pumps just need upgrading. | Village of New Boston | 100 | 181 days or more | \$6,500,000 |
| Scioto | SCI 104-9.70 Canal Lock 48 Enhancement | Rehabbed along the newly state designated Scienc Scioto Heritage Trail byway, Ohio and Erie Canal Lock Number 48, located along State Route 104 at the 9.707 mile marker in Scioto County Ohio is one of the few deep excavation, high earthen embankments and massive structures of either earthen or concrete built to withstand such Sun Cakes, Pepsi, Sorbus, and additional proposed industrial industries building at existing in the Haverhill area. This project consists of adding an existing driveway on State of Ohio right of way and providing easy access and a two car parking space for visitors to pull off the highway to view the existing Lock 48 on the Ohio and Erie Canal which is rich in local history and natural beauty. The average traffic count for this area is 6,500 vehicles according to the Ohio Department of Transportation traffic records. The Project will provide a safe off-ramp, parking area, sidewalk and protection handrail for visitors. A historical marker will be sought from the Ohio Historical Society to be erected on the site after the pull-off is completed. | Scioto County Engineer | 3 | 0 to 30 days | \$35,000 |
| Scioto | Village of New Boston Street, Alley, Curb & Sidewalk R | RP 7.876 sq. ft. Curb & Sidewalk = 3000 sq. ft. of concrete 823,700 sq. ft. Street paving 9672 tons of asphalt, 198,600 sq. ft. Alley paving 1740 tons of asphalt. All new Curbs include 2000 sq. ft. of concrete 823,700 sq. ft. Street paving 9672 tons of asphalt, 198,600 sq. ft. Alley paving 1740 tons of asphalt. | Village of New Boston | 150 | 31 to 90 days | \$11,189,141 |
| Scioto | Village of New Boston Sanitary and Storm Sewer Reh | 10,000 linear feet of new sanitary and storm sewer line. Project involves sanitary sewer rehabilitation including collection system cured riprap line, excavate riprap, Manhole Liners and replacements. Separating storm sewer connections from combined system. | Village of New Boston | 150 | 91 to 180 days | \$7,000,000 |
| Scioto | Nile Township Fire and Rescue Building | The project will construction a new 5 bay fire and rescue station with associated training facilities and necessary offices of administration. To hire two additional officers under the COPPS Program. By adding these additional officers, this will allow us to put more police officers out on the street for patrol functions. Also it will allow us to designate maybe 1 officer to work only drug enforcement cases or 1 officer assigned as a detective to work only drug cases and follow up on criminal investigations cases. As of now, our patrol officers take criminal reports and follow up on the crimes as they can and basically work drug complaints on a overtime basis. With hiring two additional officers this will allow us to assign an officer to identify handle drug complaints or follow up on crimes. Currently, we have nine full time police officers that work the streets and answer calls for service and are a Chief of Police that handles all administrative functions in the department. The estimated costs of the project includes the cost to the village to hire two police officer. The yearly cost for one officer is at around \$70,000 which includes everything from salaries, health costs, retirement, costs uniforms and officer equipment costs. | Nile Township | 15 | 0 to 30 days | \$1,100,000 |
| Scioto | More COPPS on Duty | Employ 2 firefighters to help meet the NFPA guidelines of two men in two men out. For the safety of the citizens and firefighters. This will also allow us to have a person to do the presentation on a much more needed basis, along with fire inspections. Our township has somehow got left behind when it comes to funding. We get approx. 1.4 mill when there are other townships in our county that get 16.5 mil. We are the only township in our county that does not have a road mill on taxes to help on roads. Our roads are 90% gravel and the fire department and schools both complain to us because they are despoiling their equipment traveling our roads. If we had \$500,000 we could prepare the roads by chipping them, grading them to level them and then go over them with two coats of chip and seal. The first layer with 1ST stone then the second with 4th stone. We have tried getting a heavy paver but that is all but irresponsible with a poor paving. Any help or advice would be appreciated. | New Boston Police Department | 2 | 31 to 90 days | \$420,000 |

| Scioto | Morgan Twp. Volunteer Fire Dept. | Volunteer Fire Dept needs turn on gear to bring our department up to code. We are in need of 20 complete sets of fire trucks. We are in need of 20 complete sets of fire trucks. We are in need of 20 complete sets of fire trucks. | Morgan Township Board of Trustees | 27 members | 0 to 30 days | \$50,000 |
| Scioto | Patriot Truck and Travel Center | Total project is to grow a current convenient store with one diesel pump and limited tractor trailer parking to a full service truck stop including restaurant, showers, laundry facilities, movie/ride room, chapel, and bank. The exterior of the project includes three diesel lanes, scales and approximately 50 truck parking spots. This requires the installation of 20 air-riding Ansock Units that can be seen at www.cadillacmanufacturing.com. Cost of installation is \$14,500 each. The closest truck stop is in town on the east side of Rt 64 in KY or on Rt 35 in Jackson, OH. It is my understanding that the state of Ohio must be the standard form 284 in order to be eligible for the state funds for the parking project. I do not understand which agency must submit and/or who I must work with to obtain funding. I have much more information should you need it. I have a good relationship with the local county commission and township trustees should they be required to apply for funding. | Patriot Holdings Unlimited | 25 | 0 to 30 days | \$250,000 |
| Scioto | Haverhill Water Tank | A new one-million gallon elevated water storage tank will be installed in the Haverhill area, located in eastern Scioto County and Green Township. The new tank will double the current water reserves for the area which includes a large industrial area. Currently, Sun-Coke, Pepsi and Borden area located in Haverhill with additional industries looking to locate here. This project includes the addition of 5,000 linear feet of 12 inch water main. This project allows the City along with transmission line project to provide adequate service to the residents and industries in this area. | City of Portsmouth | 25 | 31 to 90 days | \$1,100,000 |
| Scioto | School Renovation | Replace all windows (DSB) with more energy efficient ones. Lower ceilings in (15) rooms for more energy efficiency. Reglazing the windows and lowering the ceilings will reduce our heating bills. Improve handicap accessibility with an elevator, chair lifts, ramps. This will make more of our building accessible. Airconditioning in (35) areas currently without. This would make the rooms more comfortable for students during warm weather. General property repairs (sidewalks, steps, building). These repairs would eliminate potential safety issues. Auxiliary gymnasium (100'X65'X25). This would reduce the problems we have with scheduling the many activities that require the use of the gymnasium. | Sciotoville Community School dba East High School | 20 | 31 to 90 days | \$6,000,000 |
| Scioto | The City of Portsmouth - Franklin Furnace Water Sy | With current industry expanding and new industry in talks to move to the Franklin Furnace area it is important to insure that there water needs can be fulfilled. This project will include the installation of over 5,000 linear feet of 24" force main to raise the proposed 1,000,000 gallon ground water storage tank. This project can be shovled ready by January of 2010. | Howerton Engineering & Surveying PLLC | 20 | 181 days or more | \$14,000,000 |
| Scioto | The City of Portsmouth - West Portsmouth Water Tan | This project will install a new water storage tank in the West Portsmouth area, which is located in Solido County and Niles Township. The project will double the current water reserves for this area. With an increase in water demand in this area it is important the water system be able to meet the demands of the area residents. The West Portsmouth water tank will be a 1,000,000 gallon-ground storage water tank, along with upgrading the existing pump stations. This project will be shovled ready by January of 2010. | Howerton Engineering & Surveying PLLC | 20 | 181 days or more | \$1,250,000 |
| Scioto | The City of Portsmouth - New Pipe Yard Facility | This project will consist of the building of a new pipe yard facility for the Public Utilities water distribution department adjacent to The City's filtration Plant located at 4862 Galia Street, Portsmouth, Ohio 45662. This project can be shovled ready by January of 2010. | Howerton Engineering & Surveying PLLC | 10 | 181 days or more | \$250,000 |
| Scioto | The City of Portsmouth - New Pipe Yard Facility | During times of power outages it is crucial for the city to still supply it's residents with water. This project will consist of the installation of emergency generators to insure the water systems in times of power outages. This project will be shovled ready by January of 2010. | Howerton Engineering & Surveying PLLC | 10 | 181 days or more | \$100,000 |
| Scioto | The City of Portsmouth - Complete Filter Rebuild a | This project will consist of the installation and rebuilding of the City Filtration Plant's 16 filters. | Scioto | Fire Station Construction | To construct a new fire station with an attached community center to also double as an emergency shelter in the event of a disaster. Our current station was constructed in 1962 by volunteers, is very small and in a deteriorating shape with the roof showing signs of mold to form as well as the walls cracking and falling apart. This facility is in need to be replaced with a modern facility to house the fire department and also serve as an emergency shelter. Any assistance that is available to assist in this project would be greatly appreciated. We are not able to fund any project of this size due to budget constraints with the 2009 budget appropriation for the fire department only being projected at \$38,000 for the year. This is barely enough funding to operate efficiently. Our current station shows that 20% of our residents are above the poverty level with 10% below the median household income level therefore making it unfeasible to ask for an increase in revenue from Small Business Startup consisting of conv. gas and would employ a startup employment base of about 6 future employees. | Union Township Volunteer Fire Department | 25 | 91 to 180 days | \$750,000 |
| Scioto | Small Business Startup | Small Business Startup consisting of conv. gas and would employ a startup employment base of about 6 future employees. | D&I Convenient LLC. | 6 | 181 days or more | \$400,000 |
| Scioto | Village of New Boston Pump Stations, Flood defence | Project involves rehabilitation of 5 pump stations that are used for Flood defence in the Village of New Boston. The Village has over 2 miles of floodwall. Need to replace 3 tubes that feed water to our largest pump station. Need to replace the pumps. The Village has a hard time getting parts for the pumps since they were built back in the late 1930's or early 1940's. The Village has a hard time finding electrical parts for the buses. Work needs to be done on the creek system. Pump stations just need upgraded. | Village of New Boston | 100 | 181 days or more | \$6,500,000 |
| Scioto | New Boston Community Rec Center | Prevalent drug use and a high crime rate are serious problems across the United States. New Boston is no exception. New Boston has an office and industrial land use and a varied DEMOGRAPHIC in Ohio on the PMA index. This translates to the fact that we have very poor students on the top end PBA Districts in Ohio. New Boston is one of maybe two that does not have a community center for after school activities and summer activities. The school district is willing to assume a leadership role in the development of year-round activities to combat the associated drug use and crime rate of our youth. The annual savings from such a program will result tremendous savings in medical care associated with teen drug use and pregnancies while also saving our court system and juvenile justice system. We appreciate your consideration of this worthwhile endeavor. Sincerely, Mike Staggs | New Boston Local Schools | 20 | 91 to 180 days | \$5,000,000 |
| Scioto | Preschool Intervention | The Preschool Intervention Program works with families who have a preschooler with a developmental delay or disability. The program helps connect families with preschool services and helps them to better understand their rights and responsibilities in the special education process. The program holds an inclusive summer program for preschoolers to provide social emotional school readiness and works with families and teachers to implement positive behavior supports. This program helps families by developing an informed decision base during the preschool years which will help them to be equal partners in educational decision making. We partner with many local agencies and school districts to provide educational services coordinator for preschoolers and their families. We serve approx. 125 families per year and serve at least 40 children each year to school districts to receive services. This program has been in place in our county for over 8 years but due to budget cuts and divesting start funds we fear that we will no longer be able to secure additional funding to sustain the program beyond this year. The project will include the construction of industrial access road, sanitary sewer, storm sewer and water. The project will help to create and retain 200 additional jobs and create 40 construction jobs. This is the fifth phase of the industrial park infrastructure and will provide access to future development at the Park. The project will involve the construction of industrial access roads, water, sanitary sewer, storm sewer, and an spur for access to 400 acres of industrial area. The project will create and retain 470 jobs and provide industrial development area along the Ohio River and the Norfolk and Southern Railroad. | REACH Inc. | 3 | 31 to 90 days | \$100,000 |
| Scioto | Bob Walton Industrial Park Infrastructure Phase V | Ken Price, LLC (the Ken Price Trucking) is a long-haul trucking company that has been in business since 1980. The company is looking to expand by adding three (3) additional semi-trucks, as well as to upgrade their current fleet. The company will also need to expand their service facility to accommodate the increase in vehicles. Recent projections shown in the Portsmouth Daily Times indicate the potential for a significant increase in unemployment for Scioto County. This project will result in a 50% increase in employees for Ken Price, LLC (an additional 3 drivers and 2 mechanics). Additionally, the semi-trucks will be purchased from an area manufacturer in Ross County, which will be of economic benefit to that company and its employees, thereby making this a multi-county economic initiative. Ken Price LLC DBA Boland's Mini Mart will expand their existing convenience store to accommodate more parking, addition of services inside the store to include total remodel to accommodate a deli and food services. Double the store money would be used to upgrade gas pump system to meet new biodiesel and e85 ethanol fuel. Upgrade to all digital pumps and fuel monitoring system and add a canopy to cover pumps with lighting. Recent projections shown in the Portsmouth Daily Times indicate the potential for significant increase in unemployment for Scioto County. This project will result in a 50% increase in employees for Ken Price LLC DBA Boland's Mini Mart. Additionally all remodeling will be contracted out to local contractors in the area which will benefit the economy and its employees, thereby making the economy in the Portsmouth area by providing work for local laborers. | Southern Ohio Port Authority | 420 | 31 to 90 days | \$3,114,646 |

This project will result in a 50% increase in employees for Ken Price LLC DBA Boland's Mini Mart. Additionally all remodeling will be contracted out to local contractors in the area which will benefit the economy and its employees, thereby making the economy in the Portsmouth area by providing work for local laborers. | Southern Ohio Port Authority | 290 | 31 to 90 days | \$5,745,000 |
| Scioto | Long Haul Trucking Expansion Initiative | Ken Price, LLC (the Ken Price Trucking) is a long-haul trucking company that has been in business since 1980. The company is looking to expand by adding three (3) additional semi-trucks, as well as to upgrade their current fleet. The company will also need to expand their service facility to accommodate the increase in vehicles. Recent projections shown in the Portsmouth Daily Times indicate the potential for a significant increase in unemployment for Scioto County. This project will result in a 50% increase in employees for Ken Price, LLC (an additional 3 drivers and 2 mechanics). Additionally, the semi-trucks will be purchased from an area manufacturer in Ross County, which will be of economic benefit to that company and its employees, thereby making this a multi-county economic initiative. Ken Price LLC DBA Boland's Mini Mart will expand their existing convenience store to accommodate more parking, addition of services inside the store to include total remodel to accommodate a deli and food services. Double the store money would be used to upgrade gas pump system to meet new biodiesel and e85 ethanol fuel. Upgrade to all digital pumps and fuel monitoring system and add a canopy to cover pumps with lighting. Recent projections shown in the Portsmouth Daily Times indicate the potential for significant increase in unemployment for Scioto County. This project will result in a 50% increase in employees for Ken Price LLC DBA Boland's Mini Mart. Additionally all remodeling will be contracted out to local contractors in the area which will benefit the economy and its employees, thereby making the economy in the Portsmouth area by providing work for local laborers. | Ken Price, LLC | 12 | 0 to 30 days | \$915,000 |

| Scioto | Columbia Music Hall Rebuilding | Columbia Music Hall had the large rear part of the structure destroyed by fire in Nov. 2007. This facility had just been rebuilt and was beginning to play a large role in the revitalization of our downtown area with great shows and entertainment before the tragedy. After playing off of debts and rebuilding the facility which includes approx 3000 sq ft with new rear stage and restroom and concession facilities, we will still need to build a new rear room (2 walls to be in place now) with new stage (blatant stage light and sound) and we would still need a minimum of 100,000 to open the Columbia as a bar/restaurant business that would only cost one job but would bring life back to our downtown area as we have proven in the short time it was open before the tragedy. The new room that we would like to complete already has a newly installed wall that is approx 75 feet tall and 700, with floor and boiler in place to build new rear room. What I could tell you how the Columbia (built in 1910) brought back life to our downtown and other merchants in the 10 months before the fire. Lee Scott, Manager | Columbia Music Hall | 16 | 91 to 180 days | \$750,000 |
| Scioto | SR 104 to SR 348 Water Line Extension | 48,000 linear feet of 12" water line 2, locate stations: 1 - 500,000 gallon water storage tank. The existing system has been in service for 30 years and is beyond it's capacity. The existing pump station runs over 20 hours per day and leaves no time for maintenance or emergencies. Almost half of the Scioto County population is served by the Northwest Regional Water District and is subject to prolonged service outages during power outages and ice storms that have impacted the city the last several years. This project will resolve the service issues and allow the residents and businesses to stay in water service during those periods. | Northwest Regional Water District | 10 | 0 to 30 days | \$1,350,000 |
| Scioto | Dry Run Tank | 48,000 linear feet of 12" water line 2, locate stations: 1 - 500,000 gallon water storage tank. The existing system has been in service for 30 years and is beyond it's capacity. The existing pump station runs over 20 hours per day and leaves no time for maintenance or emergencies. Almost half of the Scioto County population is served by the Northwest Regional Water District and is subject to prolonged service outages during power outages and ice storms that have impacted the city the last several years. This project will resolve the service issues and allow the residents and businesses to stay in water service during those periods. | Northwest Regional Water District | 5 | 31 to 90 days | \$200,000 |
| Scioto | System Generators | 48,000 linear feet of 12" water line 2, locate stations: 1 - 500,000 gallon water storage tank. The existing system has been in service for 30 years and is beyond it's capacity. The existing pump station runs over 20 hours per day and leaves no time for maintenance or emergencies. Almost half of the Scioto County population is served by the Northwest Regional Water District and is subject to prolonged service outages during power outages and ice storms that have impacted the city the last several years. This project will resolve the service issues and allow the residents and businesses to stay in water service during those periods. | Northwest Regional Water District | 2 | 31 to 90 days | \$800,000 |
| Scioto | South Webster Tank | The people of South Webster are served with a water storage tank that is underused and beyond it's useful life. A new tank would allow the residents and businesses of the small village to continue to have adequate potable water service and be able to grow and prosper beyond the current limits of the Village. | Scioto County Regional Water District | 5 | 31 to 90 days | \$250,000 |
| Scioto | Booster Station Number 1 Rehab | The existing Number 1 booster station feeds approximately 1/3 of Scioto County. This station has reached it's useful service life and is in need of upgrading. This will allow potable water service continue and grow with the residents and businesses of central and eastern Scioto County for many years to come. | Scioto County Regional Water District | 5 | 0 to 30 days | \$200,000 |
| Scioto | Project Kyle/Entrance Rd | Major road to handle heavy steel carrying trucks to serve Project Kyle/Steel Plant in Haverhill Ohio. Road will serve new Steel plant and Sun-Coke plants. New steel plant to be approximately \$3 billion investment. The cost for the road is an addendum from the Ohio Department of Transportation. Plans to estimate to employ 500 during phase I with a potential total of 1500 as other phases are built. A musician + construction workers will be employed to build the plant. The new road will be used by employees and heavy steel carrying trucks. | Scioto County Economic Development Office | 1500 | 91 to 180 days | \$2,500,000 |
| Scioto | Project Kyle/New Steel/ Braunlin Rd. Project | To expand new plant site for Project Kyle/Steel Plant by closing a public road and relocating it (Braunlin Rd.) The New Steel Plant will initially employ 500 employees during phase I and potentially 1500 with all new steel facilities in place during further phases. The plant will be 1.88 million square feet producing flat-rolled steel. This specific road project is critical to future job growth. | Scioto County Economic Development Office | 1500 | 181 days or more | \$2,500,000 |
| Scioto | SCI Capitalized Maintenance; PID 86112 | 2009 Capitalized Maintenance. This is a road transit project whose funding flows through ODOT. | Ohio Department of Transportation | 1 | 0 to 30 days | \$46,770 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Scioto | PORTER TOWNSHIP ROADS AND FIRE/EMS SAFETY | The Porter Township Roads and Fire/EMS Safety Project will involve two major efforts. First, at least nine township roads will see significantly needed drainage concerns addressed. The phases of the project will include the installation of these catch basins and the following road drainage pipe: 80" - 10", 12" - 18", 18" - 24", 24" - 30", 30" - 36", and 48" - 60". Associated road paving will be performed, after the drainage lines are installed, to bring the roads into safe condition for resident travel. The second phase of the project will involve the replacement of the roof on the Fire/EMS safety services building. This will involve the removal of 12,700 sq. ft. of single membrane roofing and insulation and the installation of two layers of 1/2" poly insulation and a new membrane roof surface. Architectural plans and specifications have already been secured for all of the above referenced work and therefore both phases of the project are ready for immediate implementation. | PORTER TOWNSHIP TRUSTEES | 20 | 31 to 90 days | \$720,000 |
| Scioto | Home/Office heating request | Our home/offices were setup with radiant heating which is costly and inefficient. These need updated with cost efficient heating systems. 2 to 3 system and 1 ca system needed installed. This project will be accomplished by local construction which have had bid by the downturn in our local economy and in that downturn it will also help our office to be more energy efficient and lower our expenses hopefully allowing us to also continue to serve the Southern Ohio and Northern Kentucky markets. | Hicks Appraisal Services | 1 | 0 to 30 days | \$5,000 |
| Scioto | Food Voucher Program for the Working Class | This project is in the process of being in articles of incorporation and will seek 501 (c) 3 status. The board has without on the business plan for this project for two years while unemployed and struggling to make ends meet. The first fees have been an obstacle and are the first thing to do. Mallory's Food Voucher Program will give our \$50.00 food vouchers to those who earn minimum wage or less and/or looking for work and out of work. The concept is not new and states that if food basics like food shelter or water are not met then we can not function to seek work or start a new job or maintain a job. Food vouchers are good for food only and don't perish. The project consists of a musical group that will travel to all of Ohio Counties handing out cards that are eligible. A week of advertising would be given for notes. If you have money to give a away and nobody knows it, then your mission to help is useless. The concept is borrowed from Willie Nelson's Farm Aid. We all know about that project to save farmer's farms from foreclosure. From March 8th to November 1st the project will play in each counties main city's park to entertain and give out vouchers. | Mallory's Food Voucher Program | 10 | 31 to 90 days | \$120,000 |
| Scioto | Portsmouth City Schools Athletic Complex | Project: Phase One, construction of a new football stadium and field house, along with the renovation of an old gymnasium for use as a visitor's locker room, is now underway. This site now ready for Phase Two, which is shovel-ready and dependent on securing funding. We will use the stimulus money to build the baseball and softball fields, basketball and tennis courts, and a track. The complex includes public green space and walking areas, and is synergistic with the school property and downtown. The building of the new athletic complex will prove to stimulate the local economy by employing over 100 people while at the same time stimulate displaced industrial sites and blighted residential properties. The construction of three new schools was completed two years ago. Already we are starting to see students who left via open enrollment coming back to our schools and families coming back to our area. New schools, downtown improvements, and new athletic complex are part of efforts to revive the Portsmouth economy. | Portsmouth City Schools | 100 | 0 to 30 days | \$1,800,000 |
| Scioto | 21st Century Education in Southern Ohio | Learning with technology... uses we help use resources with resources, knowledge and ratios on experience ensuring strong to compare with other Ohio students. Our goal remains the same, give our students opportunity to excel at the state, national and global levels. Understanding the importance of "on-line" classes and curricular offerings empowers us to develop these avenues for our students. Our traditional school class offerings (schedule) with "on-line" classes increases our creativity for class offerings allowing us to expand our traditional student interest. Providing this endeavor requires necessary equipment and staff support. We have the staff support for the resources for tools for implementation. Realizing the significance of college for our southern Ohio students and future earnings potential we plan to provide more technology courses at the Middle School. Our plan will get our students preparing for the future at a younger age and will provide more resources to compete in a global economy. | Minford Local School District | 4 | 0 to 30 days | \$500,000 |
| Scioto | Scioto CAO Rural Health Clinics | The clinic is federally designated as a "Rural Health Clinic", one of eleven in Ohio. Both facilities have struggled financially for years due to the increased number of uninsured, rising fee patterns and reductions on the rates of reimbursement from Medicaid, Patient Fee and Medicaid and their only consistent source of revenue. With the dramatic increase in the county's unemployment rate, we expect the ratio of uninsured patients to increase in coming months. Without additional funding support we can't sustain present levels of service, let alone absorb additional non-paying patients. The federal stimulus provides some new funding for Federally Qualified Health Centers, but none for Rural Health Clinics. | Community Action Organization of Scioto County | 18 | 0 to 30 days | \$250,000 |
| Scioto | Law Enforcement Vehicle Replacement | Purchasing eight law enforcement vehicles in year one at a cost of approximately \$168,000.00 and eight more law enforcement vehicles during year two and three for a total cost of \$504,000.00. This will allow the Scioto County Sheriff's Office to upgrade their law enforcement fleet to an acceptable standard since the Office failed to purchase vehicles in 2008 and do not anticipate to purchase any in 2009 due to a deficit in our annual 2009 budget of over \$800,000.00. | Scioto County Sheriff's Office | 9 | 0 to 30 days | \$504,000 |
| Scioto | Stormwater Pumping Station and Express Sewer | As part of the Long Term Control Plan for combined sewer overflows, the City will implement a project to address the offloading of stormwater runoff near Grandview Avenue. The major collector sewer in this location, the Lawson Run Interceptor, is undersized in certain sections. Stormwater runoff from approximately 500 acres in the northern portion of the City's service area flows through this combined sewer system. This project is a priority due to the stormwater related issues in the Grandview Ave. area and throughout other portions of the service area which include: overland flooding; basement backups (near Grandview Ave.); public health concerns; CSOs; and other environmental concerns. This project will construct an express tunnel sewer that conveys the stormwater runoff from the drainage area described above directly to the river. The project consists of approximately 10,000 linear feet of 7-foot diameter express sewer that conveys flow by gravity to the river. Expand broadband infrastructure to extend High Speed data services and voice applications to unserved and underserved rural areas, in such a way that this infrastructure could potentially be shared with Emergency services. | City of Portsmouth | 50 | 181 days or more | \$20,000,000 |
| Scioto | Rural Broadband Infrastructure Development | New 1.5 mgd Water Treatment Plant, upgrade existing 2.0 mgd water treatment plant, 20 miles waterline, New Water tank. The project involves the replacement of the existing 7,300 water meters with radio read type meters. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Scioto | Phsae V Improvements | Paving of roads in the township that are in need of repairs. | Scioto Water, Inc. | 50 | 91 to 180 days | \$7,000,000 |
| Scioto | Water Meter Replacement Project | Among adults, with professional guidance, will create a weekly YouTube series that explores how the recession, stimulus and other budget measures affect the lives of southern Ohio citizens. At the end of the series, the most important segments will be edited professionally into a two-hour program to be submitted to regional PBS stations. DVDs will be created and distributed through CreateSpace, using Amazon.com and other retailers for fulfillment. | Scioto Water, Inc. | 0 | 181 days or more | \$1,195,000 |
| Scioto | Blacktopping of various roads in township | In the second and third years, the young adults will embark on documentaries of their own design, relevant to the lives and needs of Ohio residents. The project will be sustainable through revenue streams and other outside fundraising. Expected Outcomes: 1. 15 Ohio jobs; 10 FTE, sustainable after funding ends. 2. Creation of documentary movies that explore the effect of the stimulus and economic recovery 3. Development of marketable skills in a group of young adults that will enhance their future economic security | Jefferson Township | 8 | 0 to 30 days | \$150,000 |
| Scioto | Documenting the Economic Recovery | This project will develop a small cost touring production on historic American themes that will travel the southern Ohio, West Virginia, Kentucky, Tennessee region to schools, libraries, museums, theaters and other venues. The project will provide full-time employment to four to five theater artists, as well as part time employment to several more. It will offer educational activities based on Lincoln's mission statement, "education through dramatization." Education will be relevant to regional state standards for American history, literature and the arts. Expected Outcomes: 1. 35 full time jobs, 3-7 part time jobs; 5-10 FTE 2. Educational activities that focus on American history and American literature | A Working Theatre Company | 15 | 0 to 30 days | \$850,000 |
| Scioto | Reviewing American History | The continuation of the program past the funding period, based on revenues from bookings, resulting in at least five permanent Ohio jobs. Seed money for every part of a touring production company that tour small cost productions on American themes. The productions will be sold to schools, libraries, museums, theaters and other venues, providing educational enrichment in American history and American literature to schools in the OH/WV/TN/VA/KY region. Educational components will reflect state educational curricular standards in history and literature through Lincoln's stated mission of "education through dramatization." Program will be self-sustaining through program revenues after initial funding ends. Expected Outcomes: 1. 5 FTE Ohio jobs 2. Enhanced educational opportunities in American history and American literature 3. One self-sustaining theatre company that will continue to provide jobs and education for many years. | Unicorn Players, Inc. | 10 | 0 to 30 days | \$200,000 |
| Scioto | Reviewing American History | Professional artists will train 10-15 young adult apprentices in the development of documentary videos that record the effects of the recession and the economic stimulus on the lives of ordinary citizens in southern Ohio. The videos will air as a weekly series on YouTube, and at the end of the year a two-hour DVD will be professionally edited from the most important segments. It will be offered to regional and national PBS stations, and will be distributed for sale through CreateSpace, which works with Amazon.com and other retailers. Expected outcomes: 1. 5 FT jobs; 10-15 PT jobs; 10 FTE 2. A series of DVDs focusing on the economic recovery and its impact on southern Ohio citizens 3. Young adult apprentices will develop marketable skills, thus enhancing their future economic security | Unicorn Players, Inc. | 5 | 0 to 30 days | \$200,000 |
| Scioto | Documenting the Economic Recovery | This new Washington Township Volunteer Fire Department New Construction will not only serve as our fire station but will also serve as an emergency shelter in place building or any other emergency as needed in the community. This will also serve as a meeting place for our Little League, Washington Township Volunteer Fire Department Ladies Auxiliary, Scioto County Homeless Society, Scioto County Blood Drive, Ohio Valley Firefighters Association Training Center for our county, Scioto County Soccer League and Ohio State Highway Patrol for the Shop with a Cop Program for underprivileged children. This new building will greatly enhance our ability to serve our community now and in the future. | A Working Theatre Company | 15 | 0 to 30 days | \$850,000 |
| Scioto | Washington Twp.Vol.Fire Dept. New Construction | | Washington Twp.Vol.Fire Dept. | 75 | 31 to 90 days | \$1,200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Scioto | Air Ambulance Medical Base and maintenance facility | Purchase and construction of base and needed equipment for air and medical base and maintenance facility. Also, if available grants for medical equipment and electronic billing and working capital. | Life Air, Inc. and Life Ambulance Service, Inc | 60 | 31 to 90 days | \$1,500,000 |
| Scioto | Southern Ohio Job Retention and Expansion | Provide working capital to an existing business, Mitchell's Inc. to hire workers and purchase materials to produce aerospace products to fill orders and grow a current export business in the U.S.A. and foreign markets. | Mitchell's, Inc. | 140 | 0 to 30 days | \$7,500,000 |
| Scioto | resurfacing road | Resurface and upgrade a mile of township road. The road is heavily traveled and is used by school buses and emergency vehicles so it connects three county roads. Resurfacing and upgrading the road will make it safer for school buses and emergency vehicles to travel. | Vernon Township | 4 | 31 to 90 days | \$100,000 |
| Scioto | resurfacing roads | Install a fence around a park to prevent theft and vandalism. Outcome is to protect current equipment and property as well as to protect new property that is being installed in the near future. | Vernon Township | 5 | 31 to 90 days | \$50,000 |
| Scioto | 21st Century STEM Education | Understanding the importance of "on-line" classes and curricular offerings implies us to develop these avenues for our students. Combining the traditional school class offerings (schedule) with "on-line" classes increases our creativity for class offerings allowing us to capture and maintain student interest. Forwarding this endeavor requires necessary equipment and staff support. We have the staff support and are preparing for book for implementation. Realizing the significance of college for our southern Ohio students and future earnings potential we plan to utilize career and technology courses at the Middle School. Our plan will get our students preparing for the future as a younger age and will provide them with the resources to compete in a global economy. | Minford Local Schools | 3 | 0 to 30 days | \$500,000 |
| Scioto | Parttime Assistant Prosecutor/Correctional Facility | The funding of this project will allow us office to hire a part time Assistant Prosecutor. This position will prosecute crimes committed in State Correctional and Rehabilitation Facilities located in Scioto County. Southern Ohio Correctional Facility, River Valley Juvenile Correctional Facility and the STAR Community Justice Center. The large number of crimes committed in these facilities generally Southern Ohio County prosecutes these cases leaving our County to carry the burden of these expenses. The loss of county funding and a county budget shortfall over the last three years has impeded the prosecution efforts in these facilities. These budget shortfalls endanger those awaiting justice which prevents them from competing in a global economy. | Scioto County Prosecutor's Office | 1 | 0 to 30 days | \$91,590.26 |
| Scioto | Additional Investigator/Law Enforcement | The funding of this project will allow this office to hire one additional full time investigator. The loss of county funding and a county budget shortfall of the last three years have prevented this office from hiring a second investigator. The second investigator position has been vacant since December 5, 2008. Currently we rely on only one investigator for this office, our grand jury and trial preparation. Unfortunately with the magnitude and ever growing number of felony cases in Scioto County, it is impossible for one person to devote the essential time and attention these cases require. A portion of the funds requested is for the purpose of hiring several off duty law enforcement officers to aide in our county's increasing problem with pH diversion (Chrysothrin) and related crimes, all which have greatly increased over the last few years. Additionally, the requested funds will allow this office to train those younger law enforcement officers in regards to history that presented. | Scioto County Prosecuting Attorney | 1.5 | 0 to 30 days | \$114,486.12 |
| Scioto | District Technology Infrastructure Upgrade | Providing the tools of technology to enhance educational opportunities for our students is a goal for our district. Technology infrastructure is critical to the successful implementation of this goal. Our faculty desires to incorporate best practices in teaching and learning with technology. We must have dependable tools and resources. Our current technology infrastructure is more than ten years old and does not meet the needs of our students need connectivity to the outside world via the internet. Realizing our goal will require significant upgrades to internal equipment which includes minimum connectivity of gigabit connectivity and distribution point. Our district is prepared to support these new technologies by providing support staff to implement and maintain the equipment. Faculty will work to evaluate and update our curriculum to ensure we are providing enhanced educational opportunities for our students. Dedication to our students requires we assist by meeting the demands and preparation requirements of a technology rich global community. | Northwest Local School District | 150 | 0 to 30 days | \$500,000.00 |

| Seneca | Dist 2, PID 85910, SEN Facility design | Administrative/storage facility design for Seneca County Agency Transportation | Ohio Department of Transportation | 2 | 31 to 90 days | \$100,000 |
| Seneca | Dist 2, PID 85912, SEN Facility construction | Administrative/storage facility construction for the Seneca County Agency Transportation | Ohio Department of Transportation | 20 | 31 to 90 days | \$1,000,000 |
| Seneca | 1884 Seneca County Court House | Good morning, This project is to save the 1884 Seneca County Courthouse or replace it with a new green building. The courthouse has been sitting empty for over 70 years because of funding issues to renovate or replace it. This building has been a HOT TOPIC for years throughout the community, great state of Ohio and the nation. This project would bring national attention to Ohio for its effort to preserve history, create jobs, and a tourist ready project. I feel this would show the governor's consideration to history and stimulate the economy. This issue has been in the courts and has cost the county thousands of dollars in attorney's fees. The project does not affect the Courthouse. This project does not affect the 400+ employees for our county courts and allow us to consolidate offices to save energy. The governor has endorsed this project for renovation to save the history of Ohio, and Seneca County government. The building is a historical landmark for the community. Governor DeWine had been willing to support this project with two million state tax dollars if the tax was passed locally. The voters defeated supporting renovation last fall because of a new fire is needed. We have plans for the renovation. Our voters covering in his meeting state requirements are in only seven counties in one geographical area. We have been granted \$2,000,000.00 from a state of Ohio grant. This is the first time we have been offered this grant. Because of funding issues we have turned down two bids before. I am being laid off and would like the last time to receive funding I turned down this opportunity we do not have the funds to match to move this project ahead and with our help we will have to turn it down. This project could include the infrastructure for a new business park for business growth also. This could be a project to renovate what I believe is a stone to last county project for housing kids. Please consider this project because of the state funding, infrastructure for Business Park, regionalized location with other counties and the kids. This project could be ground breaking in a very short time with the state grant, county owned property and your help. Thanks David Sauber Seneca County Commissioner. | Seneca County Ohio | 65 | 91 to 180 days | \$11,000,000 |
| Seneca | Juvenile Detention Center | This project includes the cleaning of 24 inch diameter and larger sewer lines. The purpose of the sewer cleaning is to remove the buildup of grease, dirt, sand, rocks, grates and other solids or non-solid material from the sewer pipes. The cleaning of the larger diameter sewer lines will help the city maintain the design flow capacity and help to reduce the combined sewer overflows under normal operational conditions. By cleaning the larger diameter sewers in the city's system, the system will regain lost inline storage capacity which will allow the city to reduce the number of SSO events in the entire system as required by the consent decree. | Seneca County Government | 16 | 91 to 180 days | \$4,000,000 |
| Seneca | Large Diameter Sewer Cleaning | supplier who competes everyday against Frito-Lay, the world's largest snack food company. We currently supply everyone from the local bar & grille to the largest company's in the world, as Kroger, Wal-Mart and the GREAT Ohio State University. We distribute mostly within the State of Ohio. | City of Fostoria | 5 | 31 to 90 days | \$500,000 |
| Seneca | Wind Electric Generator | We are constantly looking for ways to reduce costs and to make our company more competitive. This wind generator has an estimated total cost of \$314k and will produce a projected annual savings of \$18,805. The "Estimated Federal Stimulus Request" figure of \$250K should be less, dependent upon state and local grants in place during 2009. We have requested very little, if any, help from the State of Ohio in the past. We believe this project really sets the tone for our company to be a leader in "Green Energy" in an "old", traditional, small, local manufacturer - for the next 89 years of our life. Our business continues to grow and we would supplier who competes everyday against Frito-Lay, the world's largest snack food company. We currently supply everyone from the local bar & grille to the largest company's in the world, as Kroger, Wal-Mart and the GREAT Ohio State University. We distribute mostly within the State of Ohio. | Balfreich Bros., inc. dba Balfreich's Potato Chips | 3 | 31 to 90 days | \$250,000 |
| Seneca | Plant Expansion - New "Trans Fat Free" Oil Line | We are constantly looking for ways to improve our products and to make our company more competitive. This money would allow us to install an additional storage tank and the necessary packaging machinery to use sunflower or corn oil. It would allow us to make 100% organic potato chips and "trans fat free" products for the first time. We have requested very little, if any, help from the State of Ohio in the past. We believe this project really sets the tone for our company to be a leader in pro-active, healthy food production from an "old", traditional, small, local manufacturer - for the next 89 years of our life. Our business continues | Balfreich Bros., inc. dba Balfreich's Potato Chips | 10 | 91 to 180 days | \$490,000 |
| Seneca | SEN-Jones Road Grade Crossing Elimination PID 2311 | This project was part of the grade crossing elimination program started several years ago. This project includes a new overpass of the CSX Railroad at Jones Road in the City of Fostoria. ODOT District 2 has more information concerning the project. | City of Fostoria | 15 | 31 to 90 days | \$3,000,000 |
| Seneca | SEN-TR 43 Grade Crossing Elimination PIE 75322 | This project was part of the rail grade crossing elimination from several years ago. The project engineering design has been completed and is ready to bid. This project includes the construction of an overpass over the Norfolk Southern RR and the construction of a connector road to serve an area known as the "Ton Triangle" in the City of Fostoria. | City of Fostoria | 15 | 91 to 180 days | \$7,000,000 |
| Seneca | CSO No. 5 Elimination | This project includes a design to partially separate the existing combined sewer upstream of CSO No. 5. The project will include inflow redirection of a 250 ac. area of the City. The project will require a study and construction of raising the existing weir at CSO No. 5. The goal of raising the weir and other construction will be to ensure that the City complies with the current Combined Sewer Overflow (CSO) Control Policy. The project involves the investigation and elimination of all sanitary cross connectors and installation of backwater prevention devices to protect sewer customers. The goal of this project is to eliminate a CSO and expedite compliance with the Clean Water Act. | City of Fostoria | 5 | 91 to 180 days | \$1,625,000 |
| Seneca | CSO Retention Basin | The City intends to eliminate all existing CSOs with the exception of CSO No. 1, which is at the WYWT. The addition of a new retention basin of multiple basins will allow the city to achieve this goal economically. The ultimate goal of this project is to reduce the combined sewer overflows frequency. By reducing the CSO frequency, the city can expedite compliance with the Clean Water Act, NPDES permit, and the consent decree. | City of Fostoria | 5 | 181 days or more | \$2,250,000 |
| Seneca | Embryo transfer facility | Construction of new donor housing and up to date laboratory for multi livestock species embryo collection and transfer. | Ovagenis, LLC | 7 | 31 to 90 days | \$55,000 |
| Seneca | Replacement of 25 yr. old fire engine-pumper | The fire district board of trustees had planned this pump replacement during mid 2009. We have specs and cost sheets in hand. As the economy worsened our board hesitated to spend \$50,000 of taxpayers hard earned \$ when they were losing their jobs and struggling to make ends meet. This seems to be a good way to keep the employees of a fire apparatus mfg. on the job and at the same time help the citizens of a small rural community replace their aging, rusting, 25 year old fire engine pumper. | Bascom Joint Fire District | 25 | 31 to 90 days | \$100,000 |
| Seneca | Dist 2, PID 23111, SEN JONES ROAD Grade Separation | Railroad Grade Separation | Ohio Department of Transportation | 263.6 | 31 to 90 days | \$9,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Seneca | Road and Parking Lot Resurfacing | ROR2This project is to provide road and parking for resurfacing for three main loops of Tiffin Developmental Center campus roadways. The total surface area to be addressed is approximately 240,000 sq. ft. looping through 48 acres of the main campus. The project must include reconstructive work to deteriorated roads, parking lots, and identified spots to curbing, manholes and storm grids. Surface grinding is needed for preparation of a new asphalt surface as well as completion of the work with road and parking lot re-striping. Asphalt cracks and pothole patching is currently necessary throughout the spring and summer months to keep up with roadway deterioration. The surface distress of roadways and base course is being laid on all surfaces, as deterioration escalates with each season. Deteriorating surfaces are beginning to affect safe vehicular travel and increasing wear and tear on facility vehicles used on campus. | ODMRDD Tiffin Developmental Center | 8 | 31 to 90 days | \$240,000 |
| Seneca | Demolition and Downsizing Utility Infrastructure | This project is to demolish the 8 structures - 2 two-story brick cottage homes, and 2 brick support buildings. These structures date to the early 1900's and have outlived their useful life for any purpose for operations at Tiffin Developmental Center and ODMRDD CFMR facility. Targeted structures represent approximately 32,500 sq. ft. of space which, by their existence, require continued security and maintenance resources as well as support for an aging campus infrastructure for storm heat to prevent accelerating deterioration. Removal of these buildings will enable a reduction in utility distribution loads, a reduction in energy loss experienced through long distribution lines, and a right sizing of campus size in terms of the number of needed structures. | ODMRDD Tiffin Developmental Center | 8 | 91 to 180 days | \$350,000 |
| Seneca | Masonry and Tuckpointing | The project is for reconstruction and tuckpointing of the limestone block at 3 entrances of the Ohio Memorial Church on the campus of Tiffin Developmental Center. The Ohio Memorial Church is on the National Registry of Historic Places under the historic name "National Orphan Home, Junior Order United American Mechanics." This building is a treasure to the Tiffin, Ohio, community as many of this city's citizens and parents grew up on the Tiffin campus when it was an orphanage prior to State purchase in 1944. The Ohio Memorial Church's exterior condition is beginning to deteriorate rapidly, especially the limestone walls and step construction at each of the three entrances. Some stone repair or replacement of some steps is needed with cracking at joints that may be due to a shift in the bottom Railroad Grade Separation. | ODMRDD Tiffin Developmental Center | 4 | 91 to 180 days | \$150,000 |
| Seneca | Dist 2, PID 23111, SEN JONES ROAD Grade Separation | Railroad Grade Separation | Ohio Department of Transportation | 263.6 | 31 to 90 days | \$9,000,000 |
| Seneca | Dist 2, PID 23111, SEN JONES ROAD Grade Separation | Railroad Grade Separation | Ohio Department of Transportation | 263.6 | 31 to 90 days | \$9,000,000 |
| Seneca | Tiffin Cultural District Project | Rehabilitation of existing historic facility Purchase and restoration of a facility for educational, cultural, commercial and residential space | The Ritz Theatre | 150 | 0 to 30 days | \$2,500,000 |
| Seneca | Dist 2, PID 23595, SEN SR 67 2.43 | Replace Bridge | Ohio Department of Transportation | 57.7 | 31 to 90 days | \$2,010,000 |
| Seneca | Improving Access to Care | The Improving Access to care project would access to FCH's outpatient kidney dialysis and oncology services by redesigning the patient areas to provide easy access through an exterior door adjacent to a parking area. The patient care area would be secured with a secure entrance and allow for close patient monitoring to improve quality of care and enhance patient safety. This project would also include the purchase of a contingency, wheelchair accessible, patient transportation van to transport patients from their residences to the oncology service. | Promedica Health System | 4 | 91 to 180 days | \$280,000 |
| Seneca | Dist 2, PID 23111, SEN JONES ROAD Grade Separation | Railroad Grade Separation | Ohio Department of Transportation | 263.6 | 31 to 90 days | \$9,000,000 |
| Seneca | Tiffin University Campus Development Project | Completion of a Clear Ohio Revitalization project on a former sports yard will conclude a six year plan to revitalize the site and develop it into four permanent uses: retail, public parking, and a 120,000 square foot energy-efficient office building. The site is the site of the former campus of Tiffin and Seneca County as well as the 2,700 students of TU. This unique predevelopment project will leverage state, federal and private university funding to complete one the largest building projects planned for Seneca County and the region. Architectural and engineering plans are complete and the project is to begin in March, 2009. A three million dollar shortfall threatens the completion of the project and the development may be halted in January 2011 if the funds are not quickly secured. Three million dollars are needed for the following to insure completion of the project: A. A \$50 linear sq. ft. sewer \$100,000. | Tiffin University | 400 | 0 to 30 days | \$3,000,000 |
| Seneca | Meadowbrook Park Wastewater Project | The EPA has decided that the Hamlet of Bascom is establishing a sewer district. This proposed district includes the Township Park (Meadowbrook Park), which currently operates 2 wastewater treatment plants. Meadowbrook will have to abandon the existing line plants and construct a force main to pump the wastewater to the new facility. As part of this major renovation, existing buried electric and fresh water line will have to be replaced due to the construction of the force main. Additional sewer lines will have to be installed to connect the waste water from existing facilities that now flow into the Wolf Creek Water Street from the Swimming Pool Meadowbrook Park has been in operation for over 100 years and is an important part of the local economy. The Historic Meadowbrook Ballroom is the largest rental hall in the region. Last year more than \$1,000,000 was raised by the non-profit groups that use the Ballroom. Meadowbrook Park has a long history of paying its own way. When the now mandated plant is installed, the increased cost of operation will bankrupt the park and we will be forced to close, placing the entire wastewater burden on the community and local school. The project is for the repair or replacement of bridge at Huss Street - main entrance to Tiffin Developmental Center. The concrete bridge located on campus property at the Huss Street entrance is the primary entrance to the grounds of Tiffin Developmental Center. The bridge was constructed in the early 1900's and spans Willow Creek. The underside of the bridge as well as the concrete rails has shown cracks and signs of deterioration. While the bridge has not been deemed officially unsafe at this point in time, truck traffic is diverted from this entrance whenever possible to conserve its integrity. Replacement of the concrete bridge entering the grounds of Tiffin Developmental Center will assure continued access to the facility through R's primary entrance at Huss Street. | Hopewell Township | 19 | 91 to 180 days | \$1,500,000 |
| Seneca | Bridge Repair | Replacement of the concrete bridge entering the grounds of Tiffin Developmental Center will assure continued access to the facility through R's primary entrance at Huss Street. | ODMRDD Tiffin Developmental Center | 8 | 91 to 180 days | \$300,000 |
| Seneca | Demolition and Downsizing Utility Infrastructure | This is for demolition of eight (8) structures that have outlived their useful life for any purpose for residential or other support operations at Tiffin Developmental Center. They consist of one story support buildings and six two-story cottages at approximately 32,500 total sq. ft. By their continued existence, these structures require constant resources i.e. maintenance and security attention as well as the cost of maintaining a distribution of heat to prevent accelerated deterioration and becoming unsightly and unsafe structures. This project will facilitate plans to reduce energy costs by shrinking the size and energy loss of a long loop of an underground gas and hot water distribution system. | ODMRDD Tiffin Developmental Center | 6 | 91 to 180 days | \$350,000 |
| Seneca | Resurface Campus Roads and Parking Lots | This project is to provide road and parking lot resurfacing for the three main loops of campus roadways at Tiffin Developmental Center, a State Operated ICFRRD. This project requires reconstructive work to badly deteriorated roads, parking lots, and sections of curbing. General surface and underground work is required as well as manholes or storm grid repair where needed. A new top coating of asphalt material is to be applied including road and parking lot re-striping. | ODMRDD Tiffin Developmental Center | 8 | 91 to 180 days | \$240,000 |
| Seneca | Building Masonry Repair | The project is for tuck pointing and reconstruction of the limestone block at 3 entrances of the Ohio Memorial Church on the campus of Tiffin Developmental Center. This building is on the National Registry of Historic Places in Ohio and its exterior condition is beginning to deteriorate rapidly, especially the limestone walls and step construction at each of the three entrances. Some stone repair or replacement of some steps is needed with cracking at joints that may be due to a shift in the bottom. | ODMRDD Tiffin Developmental Center | 8 | 91 to 180 days | \$150,000 |
| Seneca | Dist 2, PID 85826, SEN 1 light transit vehicle | Purchase 1 light transit vehicle for Seneca County Agency Transportation | Ohio Department of Transportation | 1 | 31 to 90 days | \$47,000 |
| Seneca | Dist 2, PID 85827, SEN Purchase 1 LTN | Purchase 1 light transit vehicle for Seneca County Agency Transportation | Ohio Department of Transportation | 1 | 31 to 90 days | \$45,000 |
| Seneca | Dist 2, PID 85828, SEN 1 modified minivan | Purchase 1 modified minivan for Seneca County Agency Transportation | Ohio Department of Transportation | 2 | 31 to 90 days | \$35,000 |
| Seneca | Building Lockdown | The Seneca County Board of MRDD serves approximately 500 individuals with disabilities of all ages. Our main facility is a 40,000 square foot of electric brick building built in 1975. In our main facility, we serve approximately 50 school age students and 125 adults. When our building was built in 1975, security was not a major concern and our building reflects that. We have contacted a local company to retrofit our entrance doors to address concerns about building security. Plans include installing electronic locks and a video/surveillance system that will allow us to control access to our building, increasing the security of the individuals with disabilities we serve. While we realize increased security is always "a bit of the silver" we are struggling to spend \$21,000 on this project that would take scarce resources from the day to day services we provide to individuals with disabilities. We face this application would be seen as a "win-win" situation as it will allow us to make the necessary security changes while not taking away funds needed to provide daily services. Local taxpayers provide over 70% of our revenue by local levies, we hope stimulus money from the State will help offset the cost of this project. | Seneca County Board of MRDD | | 31 to 90 days | \$21,000 |
| Seneca | Energy Efficiency Program | The Seneca County Board of MRDD serves approximately 500 individuals with disabilities. Our main facility is a 40,000 square foot of electric brick building built in 1975. While the present structure is very sound, the energy efficiency is poor when compared to the energy efficient products of today. Utilizing an "energy audit" performed by Johnson Controls, it is estimated that a savings of \$400,000 could be realized in energy savings over a 10 year period by retrofitting our existing infrastructure with new high efficiency fixtures. While the estimated \$100,000 savings over 10 years is very appealing, the initial outlay of \$300,000 would take scarce resources needed to serve individuals with disabilities today. If we were able to begin making the potential savings today without the initial investment, these savings could be used to continue to provide services to Seneca County, an area hard hit with a current unemployment rate of 9.2 percent, with another 200+ jobs loss just announced from the local taxpayers of Seneca County already paying over 70% of our revenue from local taxes, it would be more than appropriate to ask the local taxpayers for additional funds. | Seneca County Board of MRDD | | 31 to 90 days | \$300,000 |
| Seneca | North and South Water Tower Painting | This project includes the painting (inside and outside) of the City's two water towers. The towers were inspected several years ago and are in need of cleaning and painting. | City of Fostoria | 10 | 31 to 90 days | \$650,000 |
| Seneca | Center Street Underpass Inflow Redirection | The existing underpass was constructed in the late 1990's. The storm water from the underpass is pumped to a combined sewer on Town Street. This project would eliminate the storm water from the combined sewer system. This project will eliminate the inflow into the sewer system and therefore could reduce the number of CSO events. | City of Fostoria | 10 | 181 days or more | \$1,500,000 |
| Seneca | Sandusky Street Pump Station Replacement | This project consists of the replacement and installation of existing sanitary pump station that was constructed in the 1960's. The city will receive an OPMV grant in the amount of \$100,000 and a loan in the amount of \$36,546. With this project the city will have completed the last of 13 pump station upgrades in the sewer system. | City of Fostoria | 5 | 31 to 90 days | \$206,010 |
| Seneca | North Poplar Street Sanitary Sewer & Waterline Ext | The City received a letter from the Ohio EPA dated November 2002 requesting that a sanitary sewer be installed in this area to serve approximately 16 homes that are currently on failed septic systems. This city has completed the plans for the construction but we are awaiting funding to complete the project. | City of Fostoria | 5 | 31 to 90 days | \$350,000 |
| Seneca | East Park Sanitary Sewer Extension Project | The project consists of the extension of a sanitary sewer to serve an area with failing septic systems. There are 11 homes in this area. The county board of health has issued notices on the residents. The residents in the area are generally retired and are on fixed incomes. This project will improve public health and safety for the citizens. | City of Fostoria | 5 | 91 to 180 days | \$150,000 |
| Seneca | Downtown Tiffin Petroleum Clean-up and Revitalize | The Seneca Industrial & Economic Development Corp., a 501 C3 community development organization intends to acquire, and conduct the environmental clean-up of two filling stations on North Washington Street in Downtown Tiffin. These stations sit across from each other on N. Washington Street, sit next to the Sandusky River, and form part of the entry into downtown Tiffin from the West. The project would be to acquire the properties, conduct Phase I & II Environmental assessments, develop an approved remediation plan, clean-up the properties according to CERCLA protocol and then sell the properties to a local entrepreneur business that will stay in its current location. An estimated 20 jobs will be retained by the project. Full funding for the assessments has already been procured, and acquisition funding is being developed at this time. SEDEC is requesting the \$400,000, \$200,000 per lot for the environmental clean-up of the sites. A newly constructed 60 bed direct supervision unit to assist us with our housing needs. In 2008 we averaged 112 ICE detainees daily from our 35 different counties. The majority of our ICE detainees come from the Cleveland ICE Office however, we also work with the Columbus, and Detroit ICE offices. The U.S. Border Patrol opened a new office in Sandusky, Ohio in 2009 and we are now housing their detainees. Border Patrol told us they anticipate over 600 arrests a year. At times we told ICE we can't house any more ICE detainees due to the lack of bed space. I want to increase the available beds we have for housing ICE detainees, but possibly with an ICE detention center. I would like to see the ICE detention center in a building that was built in the 1970s center is in Chicago. Our 60 bed direct supervision unit cost roughly \$1.3 million to build. We could utilize the same plans for a new jail, which would save time, an additional eight people could be housed, and we could continue to provide the jail space for both ICE and the Border Patrol needs. | Seneca Industrial & Economic Development Corp. | 20 | 31 to 90 days | \$400,000 |
| Seneca | Immigration Custom Enforcement (ICE) Housing Project | The U.S. Border Patrol opened a new office in Sandusky, Ohio in 2009 and we are now housing their detainees. Border Patrol told us they anticipate over 600 arrests a year. At times we told ICE we can't house any more ICE detainees due to the lack of bed space. I want to increase the available beds we have for housing ICE detainees, but possibly with an ICE detention center. I would like to see the ICE detention center in a building that was built in the 1970s center is in Chicago. Our 60 bed direct supervision unit cost roughly \$1.3 million to build. We could utilize the same plans for a new jail, which would save time, an additional eight people could be housed, and we could continue to provide the jail space for both ICE and the Border Patrol needs. | Seneca County Sheriff's Office | 8 | 91 to 180 days | \$1,700,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Seneca | Seneca County - Bascom Wastewater Collection and T | The Ohio Environmental Protection Agency has determined that Bascom is served by inadequate or failing on-site sewage treatment systems that discharge untreated sewage into a Wolf Creek tributary stream, that subsequently empties into Lake Erie. The Seneca County Commissioners are presently under "Findings and Order" as directed by the Ohio EPA to complete and implement a general plan for sewage improvements to abate pollution and correct the unsanitary conditions in the Bascom area. A wastewater collection and treatment system to serve Bascom is currently under design. This project will save jobs in Bascom and has the potential to create jobs in the future. | Seneca County Commissioners | 160 | 0 to 30 days | \$2,000,000 |
| Seneca | Community Crime Prevention | The project goal is to improve the quality of life for our citizens by reducing drug and major crimes, visit a series of community between citizens and improve the community relationship with the police department. The police department needs to make the community aware of the problem, identify target locations and get the community involved in resolving the problem. To accomplish these goals we will need to implement a Community Block Watch Program, Drug Awareness Programs and a Community Crime Prevention Team. The Block Watch Program will assist citizens to become part of the solution and create a strong bond between the police department and the citizens. Through this program, we will target children and teens through educational workshops that include fun games and mentoring. A Community Crime Prevention Team will be established and comprised of uniformed officers who will be assigned to bike or foot patrol. This will increase officer presence as an immediate crime deterrent. Through these techniques, drug crimes will be reduced and ultimately reducing other related crimes. In addition, this will maintain jobs for officers and create 1 additional job. | Republic Police Department | 5 | 31 to 90 days | \$55,000 |
| Seneca | HL School Project | Construction of a new K-12 Educational Facility and Community Center in an economically depressed rural area already being severely impacted by the current economic situation. This facility would provide 21st Century Educational Opportunities for the students and adults in this area. The success of this project would result in: The employment of skilled trades for construction would begin early in the process, to be followed up by the continued employment of trained educators and support staff in both the K-12 and Adult educational areas, offering not only training for those of school age, but Vocational rehabilitation for the numerous displaced workers of this community. | Hopwell-Loudon Local Schools | 100 | 31 to 90 days | \$28,000,000 |
| Seneca | Seneca County Courthouse Dome Reconstruction | The Seneca County Courthouse is an 1883 landmark and one of the state's finest historic courthouses. Application has been made to help fund its rehabilitation, but the not-for-profit The Historic Trust has obtained to raise funds to reconstruct its magnificent dome. The dome was removed and replaced by an elevator shaft through the central rotunda and a penthouse atop the building. This elevator is too small and is deteriorated. Restoring it will permit restoration of the rotunda below. The original dome was made of metal, like that of the U. S. Capitol. So an economical and durable replacement can be made from fiberglass. It would be a breathtaking landmark of the city and would induce for many years as a proud symbol of our economic rebirth and commitment to historic preservation. Rebuilding the dome now would also be subsidized through tax credits. | Steven McQuillin & Associates | 100 | 91 to 180 days | \$200,000 |
| Seneca | Water Service to New Washington | The project includes the installation of approximately 20 miles of 8 inch water main and the construction of a booster pump station to provide water service to the Village of New Washington. | Northern Ohio Rural Water | 25 | 91 to 180 days | \$3,600,000 |
| Seneca | Water Service to Pleasant Township - Seneca County | The project includes the installation of over 10 Miles of new 8 inch, and 4 inch water main in Pleasant Township in Seneca County. The project will include replacing water service to the Village of Old Fort. | Northern Ohio Rural Water | 20 | 91 to 180 days | \$3,000,000 |
| Seneca | Iron Triangle Rail Park and Visitor's Center | The project is to create a safe venue for viewing trains and showcasing rail transportation at a site virtually surrounded by very active rail tracks. This project includes a new entry road, paved parking lot, handicap accessible restroom, interpretive kiosk, viewing pavilion, parking lot, southern mound to allow outdoor viewing. The project has been approved for State of Ohio Enhancement funds. The City of Fostoria approves construction match of 20%. This project would help Fostoria develop a rail tourism sector in our community after for many years the construction of hotels, restaurants, etc. leading to additional jobs in the community. | City of Fostoria | 5 | 181 days or more | \$419,200 |
| Seneca | Water Meter Replacement Project to Radio Read | This project includes the installation of new radio read water meters in the City of Fostoria. We have approx. 1500 meters that need to be replaced. The new radio read meters will allow the city to bill on a monthly basis instead of quarterly. This meter change will be more affordable to our customers. | City of Fostoria | 10 | 31 to 90 days | \$1,860,000 |
| Seneca | West Adams Street Improvements | The project includes the widening and resurfacing of West Adams Street from Kansas Street to the Corporation Street. Project includes new sidewalks, surface courses, curb, storm sewer, and catch basins. The project includes the following: 2,300 LF of 12" Storm Sewer, 4,000 LF of 6" Storm Sewer, 2,300 LF of 12" Storm Sewer, 4,000 LF of 6" Storm Sewer. The project also includes utility improvements (including and including), 2,300 LF of 12" Storm Sewer, 4,000 LF of 6" Storm Sewer. | Village of Green Springs | 25 | 31 to 90 days | \$369,900 |
| Seneca | South Kansas Street Emergency Waterline | This project is a waterline replacement located on South Kansas Street that will include approximately 1,000 feet of 12" Water of PVC Waterline. In addition the hydrants will be replaced and all service connections to be replaced to the right-of-way. The Project includes approximately 2,000 feet of PVC Waterline, 5 hydrants, and 33 connections. | Village of Green Springs | 18 | 0 to 30 days | \$129,745 |
| Seneca | Sewer Separation Improvements Phase I | The project is to install in the Village's Current NPDES Permit implementation Schedule. The Village is required to minimize the inflow and infiltration entering the collection system. Work will consist of a number of various improvements to the sanitary sewer including cross connection removal. The improvements will occur within Zones 1A and 2 of the Village's Collection System. | Village of Green Springs | 18 | 31 to 90 days | \$143,000 |
| Seneca | ODMRDD Developmental Center Bridge Replacement | Replace the main entrance bridge at one of the ODMRDD Developmental Centers. | Ohio Department of MRDD | 20 | 91 to 180 days | \$300,000 |
| Seneca | Project Fresh Vegetables for Low income | To grow and distribute Ohio grown Hydroponic produce for low income people. Produce would be grown in our greenhouses and distributed to Food Banks and Low income people. Through the Farmers Markets through out Ohio. This would be in operation year round. | All seasons Produce Co. LLC | 10 | 31 to 90 days | \$1,200,000 |
| Seneca | Electronic Medical Records Initiative | The MR/RS/BSW contracts for mental health and substance abuse services with a behavioral health department (Friends Counseling and Recovery Services) of a regional medical center. Friends County serves this Board areas three counties with a caseload of 2,000 to 3,000 active clients, of which 40% are inpatient psychiatric services and 30% are severely mentally disturbed. Appropriate medical records standards also serves Huron County, Erie County and Lorain County through Board contracts. This area struggles with the demand for psychiatric services and the ability to recruit psychiatrists. Routine and active attempts to recruit psychiatric services have been fruitless, resulting in the use of a locum tenens services, which is not conducive to continuity of care for the client. Purchasing an electronic medical record (EMR) system would set the foundation for video-conferencing and accessing records when emergency services are provided to a county in which the client is not a resident. | Mental Health and Recovery Services Board of Senec | 5 | 181 days or more | \$100,000 |
| Seneca | Village of Attica water line replacemet | Implementation can be accomplished within 12 months (or less) of notice of award. The initial cost of implementing this system in four Board areas would be approximately \$540,000. We would be replacing approx. 5400 ft. of 100 year old water lines. These lines fail approx 10 to 12 times per year causing many customers to be without water service. These new lines will be beneficial to the existing businesses as well as accommodating new who are looking to this area. | Village of Attica | 20 | 31 to 90 days | \$540,000 |
| Seneca | Adolescent Clinic | To reduce the rate of births to Seneca County teens through community, health, and education prevention efforts. The clinic will target youth 12-19 years of age, with a projected caseload of 200 youth. Provide 12 educational pamphlets for each youth seen as one for identified risks: benefits of abstinence and for information to promote healthy lifestyle choices. Provide access to a physician and registered nurse. Through the adolescent clinic, a number of approaches and interventions will be implemented to reduce teenage pregnancy. A youth risk screening instrument will be completed for each teen and updated yearly and as needed. Appropriate medical referrals will be made as needed. Parental involvement and interaction will be encouraged according to behaviors identified, if possible. Follow up services will be provided including referral to appropriate ancillary services. | Seneca County General Health District | 4 | 0 to 30 days | \$47,150 |
| Seneca | Telephone Systems Upgrade | Replace antiquated phone system in the Health District in order to operate more efficiently and save in budget costs in the long term in the areas of personnel and time. 6 port fiber separation module, trunk modules, station modules, CID line cards, DSS consoles, XC Software 7.0, 77316 E. Telephones, Pilot 150 to channel Auto Attendant volcomat. | Seneca County General Health District | 2 | 0 to 30 days | \$20,000 |
| Seneca | Dental Clinic Expansion | Expand dental clinic hours of operation to 2x per month, approximately 5 hours per clinic. To serve a total of up to 216 clients who have low to no income and are unable to get dental services through local or regional area providers. | Seneca County General Health District | 4 | 0 to 30 days | \$17,800 |
| Seneca | Old Post Office | Renovation of the historic 1915 former post office for use as a community based center for cultural activities including the Tiffin Art Guild and American Civil War Museum of Ohio and offices for local non-profit organizations. Renovations would include new electrical and HVAC systems and interior coverings for walls and floors, as well as elevator for handicap accessibility to all floors. Finished building would house cultural activities that would increase tourism to the community and help to educate children from around the region including the universities. | Seneca Industrial & Economic Development Corp. | 5 | 0 to 30 days | \$930,740 |
| Seneca | Attica Police Salary | Salaries and benefits for 2 police officers. | Attica Police Department | 2 | 31 to 90 days | \$100,000 |
| Seneca | Improving Access to Care - REVISED | The Improving Access to care project would access to CHS outpatient kidney dialysis and oncology services by redesigning treatment areas to provide easy access through an exterior door adjacent to a parking area. The patient care area would be designed to increase patient visibility and allow for close patient monitoring to improve quality of care and enhance patient safety. This project would also include the purchase of a non-emergency, wheelchair accessible, patient transportation van to transport patients from their residences to dialysis or oncology services. | Promedica Health System | 4 | 91 to 180 days | \$280,000 |
| Seneca | NBS Joint Fire District Fire Station | Construction of a new 3 bay fire and 1 bay EMS fire station approximately 140' x 150' with combination training/meeting room, restroom and shower facilities, EMS and fire offices, governmental hearing system and natural gas emergency electric generator sized to allow for full function of the facility in times of crisis as well as a short-term community shelter. The Village of Republic currently operates out of three buildings located several blocks apart from each other. Two of the three buildings are over 100 years old and are a potential hazard to employees and citizens of this community. The costs of operating these buildings is outrageous. In addition, the location of the building creates a non-efficient working environment. | NBS Joint Fire District | 45 | 0 to 30 days | \$630,156 |
| Seneca | Village Office Complex | We would like to propose a project to erect a new "green" building that would serve the community for all their government needs. This building would house the Public, road department, police department, Mayor, Council, Fiscal Office and Court. We feel that we need to lead by example. This building will be built with the latest energy saving technology. Solar panels will be installed for heating water and either a heat pump or geothermal system be installed as well as using the best insulation package available. The efficiency of the building along with using renewable energy for daily operations would save thousands of dollars in our annual budget. Republic is a small town with no other sources of revenue and this project could restore financial stability within this government. | Village of Republic | 30 | 91 to 180 days | \$700,000 |
| Seneca | Railroad Street Waterline Replacement | Replacement of 1800' of cast iron waterlines, six valves, and three hydrants serving approximately 20 customers. Our goal is to improve the quality of water in this area. | Village of Bloomville | 0 | 91 to 180 days | \$85,000 |
| Seneca | Progressive Education Center for Best Management P | The task is to establish a state-wide "Progressive Education Center for Best Management Practice Design" to be operated by the National Center for Water Quality Research. The center will generate funds by offering web-based and on-site training for critical agricultural and environmental quality issues including energy savings and improved environmental outcomes through better fertilizer management, improvements to stream habitat, soils and water quality, and improved Lake Erie water quality resulting from alternative agricultural best management practices (BMPs). Training will emphasize alternative BMPs for providing our local water quality customers of off-farm water quality management practices. Web-based materials. The Center will provide an accelerated, certificate curriculum for continuing education credits to environmental and water quality practitioners and educators throughout Ohio that includes the material. Recovery funds will launch this center by provision of support for two years for an Education & Outreach Coordinator (Web site and curriculum development; liaison with county and state agencies) and two staff positions (specialized educational activities). | National Center for Water Quality Research, Heidel | 2 | 31 to 90 days | \$77,000 |
| Seneca | Academic Alliance-centric Enhancement of Grants Fu | Pharmaceuticals, pesticides, herbicides, agricultural fertilizers, and nonionized fire-retardants are among many contaminants found in Ohio's water bodies and threatening environmental health. The best technology to identify such chemicals is Liquid Chromatography/Mass Spectrometry/Mass Spectrometry (LC/MS/MS). It is used worldwide to meet environmental regulatory standards. Many State, Regional and Federal grant opportunities to monitor these chemicals in the environment are posted annually. The National Center for Water Quality Research, Heidelberg University, is the only Ohio EPA Level 4 certified laboratory using academic institutions. We request that you consider LC/MS/MS technology that will enable us to bring new federal and regional funds to Ohio. NCEWQ holds the largest river pollution database of its kind in the U.S. LC/MS/MS will permit size separation of our understanding of watershed chemical dynamics. Thus, augmenting our ability to generate additional funding for academic research. A major anticipated outcome will be provision of scholarships, lab technicians, research associates and faculty positions to Heidelberg and its many collaborative partners, e.g. BGSU, U of Toledo, U of Findlay. | Heidelberg University | 10 | 0 to 30 days | \$350,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Seneca | Ritz Theatre Rehab | Rehabilitation of the 1928 Ritz Theatre in Tiffin, OH, including but not limited to seat repair, repair of wall damage, obit retirement, replacement of energy saving front doors, repair of facade and marquee, replacement of inefficient windows, dressing room upgrade, purchase of new lighting and sound equipment and control units, repair of interior brick walls, repair of exterior lighting, purchase of energy efficient lamps, HVAC upgrades. | The Ritz Theatre | 100 | 31 to 90 days | \$1,500,000 |
| Seneca | Greening of The Ritz | Replacement of heavily inefficient doors and windows, purchase of energy saving lamps for marquee, replacement of hot water heaters | The Ritz Theatre | 10 | 0 to 30 days | \$200,000 |
| Seneca | Ritz Boiler Replacement | Replacement of Ritz Theatre boilers and heating systems | The Ritz Theatre | 10 | 31 to 90 days | \$200,000 |
| Seneca | Ritz Basement Rehab | Investigation and repair of the basement of the facility which floods frequently | The Ritz Theatre | 30 | 31 to 90 days | \$250,000 |
| Seneca | Ritz Snow Removal | Purchase and upgrade of snow removal equipment. | The Ritz Theatre | 5 | 0 to 30 days | \$60,000 |
| Seneca | Ritz Transportation | Purchase of a Ford E-350 Extended XLT for patron and artist transportation | The Ritz Theatre | 6 | 0 to 30 days | \$50,000 |
| Seneca | Ritz Stabilization | The Ritz Theatre in Tiffin Ohio has provided over \$20 million in economic activity to our region in the last decade. Unfortunately the theatre suffers a total of \$1.35 million from its 1988 renovation. The theatre faces constant hardship through it has been closing back. Retirement of the debt would enable the theatre to grow and continue to have an impact on our local economy. If The Ritz were to close, the very heart of the city would be broken | The Ritz Theatre | 100 | 0 to 30 days | \$1,500,000 |
| Seneca | Ritz Technology Upgrade | Upgrade of aging computer systems. | The Ritz Theatre | 20 | 0 to 30 days | \$25,000 |
| Seneca | Seneca County Court House Renovation | The complete renovation of the historically significant 1884 Seneca County Courthouse. This can serve as the springboard for downtown Tiffin revitalization. This will create hundreds of new jobs and maintain over 100 existing jobs. This will allow Seneca County to become ADA accessible in both Common Pleas Court and Juvenile Court. All three divisions of the judicial system in Seneca County are currently operating in temporary facilities that are approximately a third of the size appropriate for court functions. The 1884 Court House is not suitable in its current condition. If this funding request is unable to be granted, the result will be the removal and replacement of the 1884 Courthouse. | Seneca County Ohio | 65 | 91 to 180 days | \$11,000,000 |
| Seneca | Workstations | 20 workstations @ \$702.41 per station (total \$14,048.20). 15 laptop computers (total @ \$14,581.75). Office pro Plus for 30 employees priced at \$172.30 each (total estimate of \$5,169). | Seneca County General Health District | 42 | 0 to 30 days | \$45,973 |
| Seneca | Preserving Jobs and the Environment: Increased Eff | In 2007, \$160,000,000 worth of nutrients traveled down six major Ohio rivers monitored by the National Center for Water Quality Research (NCWQR), based on 2008 fertilizer prices. Increased corn production for ethanol may lead to even greater losses. These nutrients, mostly from farm fields, represent total value to the agricultural community, add to over-enrichment of Lake Erie and the Ohio River, contribute to oxygen loss in Lake Erie and the Gulf of Mexico, and negatively impact fisheries. They waste energy, rob crop fertilizer of petroleum-based. Research at NCWQR shows these losses could be greatly reduced, at minimal cost to farmers. We request funding for field- and watershed-scale research and education to continue to characterize the distribution of nutrients in Ohio's soils, identify management practices to avoid excess fertilizer application and keep nutrients on the farm, and transfer these technologies to the Ohio farming community. We will work with the Ohio Agricultural Research and Development Center and OSU Extension to perform these important tasks to help optimize farm land use, preserve agriculture jobs, save energy, and improve Ohio's water quality. | Heidelberg College | 250 | 0 to 30 days | \$300,000 |
| Seneca | Expand Business | Purchase two new American Made Traxx & equipment then to operate. Hire one full time individual to expand into commercial work. Upgrade equipment. Pay off current debt. | Robbins Pest Control | 2 | 0 to 30 days | \$150,000 |
| Seneca | Survive, Create, Innovate | The site I have given indicates what I intend to do with the help from this stimulus package. In this community like so many others we are in a tough new era. I intend to give this company. As a result of this economy many businesses have failed and there is still work that needs to be done that they had to leave behind. We need this, we can put 100 people back to work now if only we had the money to invest in our community. We need projects, and we need the stimulus money. | Alpha Coatings, Inc | 100 | 0 to 30 days | \$450,000 |
| Seneca | Job Creation | Roppe Corporation has been in business since 1955 and is an industry leader in the use of post-industrial waste water. Roppe has been a leader in resources for commercial rubber and vinyl flooring products. Roppe is dedicated to making a positive impact on the environment through its "green" products meet high environmental standards and may contribute to the U.S. Green Building Council's LEED Green Building System. | Roppe Holding Company | 40 | 0 to 30 days | \$2,500,000 |
| Seneca | Poplar Mobile Home Park Water System Update | Replace equipment for water system in mobile home park which has 100 plus spaces. Tenants are low income. Ohio EPA has mandated updates to the system and it is unlikely that the tenants can sustain rent increases which would be required to fund the new equipment. Space rent per lot is \$200 per month currently. We have the civil engineer's recommendations and are ready to request bids for the project immediately. | Poplar LLC | 0 | 0 to 30 days | \$50,000 |
| Seneca | Poplar Mobile Home Park Sewer System Update | Accomplish EPA-required sewer plant and sewer system repair work for 40 year-old mobile home park with 100 plus spaces, about sixty percent occupied. The Poplar Village Mobile Home Park in Fostoria, Ohio is trying to complete EPA-mandated repairs to its sewer plant and sewer system. An EPA-mandated civil engineer approved survey and assessment of the sewer system, including underground sewer pipes is ready to start but has not been completed. The civil engineer has completed the request for bid criteria for the survey, repair work will be based on survey results and analysis by the civil engineer and EPA engineers. We are also needing to repair the sewer plant itself, and have done approximately \$10,000 of repairs that fit with tenants' needs, estimated at \$40,000, ready to obtain bids. Tenants are low income, paying \$200 per month for sewage rent. It isn't feasible to raise rates enough to cover these expenses. This work would help keep the park available for low income tenants. The work can start almost immediately. | Poplar LLC | 0 | 0 to 30 days | \$100,000 |
| Seneca | BCO | Installation and hook-up of new sewer lines for business as required by health department and EPA prior to opening. | Bascom Holding Company | 10 | 91 to 180 days | \$75,000 |
| Seneca | Fire tanker project | Development of building and service area. Additional footage added to existing building doubling size and productivity. Expansion and upgrades will provide community with a more environmentally friendly business along with reduced costs due to volume purchased discounts passed on to customers. | Bloom Township, Seneca county | 0 | 31 to 90 days | \$150,000 |
| Seneca | Airport Parallel Taxiway Extension | New Water tanks for our volunteer fire department, our present tanker is very old and not dependable. We are a rural fire dep. and transporting water to rural homes and barns is very important. | City of Fostoria | 4 | 91 to 180 days | \$400,000 |
| Seneca | waste water plant | The project extends the parallel taxiway at the Fostoria Metropolitan Airport in Seneca County providing a safer facility for airport operations. This project continues to strengthen the airport's ability to retain airport users, attract new users due to the visibility and safety of operations at the airport. The project will enhance the visibility and competitiveness of the airport to existing and future users. This project would replace an current. Single plant that is in violation. With a new 1.0mgd plant servicing 540 customers. This would also give us the capacity to receive sewage from two new regions. | Village of Attica | 20 | 181 days or more | \$4,000,000 |
| Seneca | Parallel Taxiway, Apron rehabilitation and Draining | The projects will provide benefits to the airport in rehabilitation the parallel taxiway to serving our primary runway, restoring surface conditions and pavement strengths to excellent evaluation scores, and provide for enhanced drainage of subsurface layers that adversely impact our asphalt pavements. The project will enhance the visibility and competitiveness of the airport for existing and future users. | City of Fostoria | 5 | 91 to 180 days | \$505,000 |
| Seneca | Accessible Parking At Miller Conservation Farm | Install an existing 150 x 150' one parking lot to create all weather, year-round disabled access to our existing park facilities at Miller Conservation Farm. We currently provide conservation education programs to over 2000 school and public participants touring the farm annually, and this number continues to increase. We also provide tours and hunting opportunities for over 40 disabled hunters yearly throughout our 80 acre farm using specialized ATV equipment, which is unique to Ohio. Asphalting the parking area will allow self access to the farm, rather than having to rely on volunteers most people in the area lack and physically disabled areas for need registration. | Seneca SWCD | 10 | 0 to 30 days | \$30,000 |
| Seneca | Sandusky River Wall | Replacement of a 100 feet of existing masonry built c. 1914. This wall is our city's primary defense against flooding and is vital for the well being of the downtown commercial area. | City of Tiffin | 50 | 181 days or more | \$25,000,000 |
| Seneca | Fire & Police Station #3 | Rapid City expansion in necessitating building an additional fire station on our city's west side. It is vital for the safety of our citizens that we build this facility to greatly enhance fire and police response time. | City of Tiffin | 14 | 31 to 90 days | \$3,750,000 |
| Seneca | Municipal Court Building | A recent audit by the state has indicated that our Municipal Court is causing a significant security problem for other City offices. We have the opportunity to purchase an adjacent building that can be converted to use as a Court facility. This safeguarding that operation from the general public. | City of Tiffin | 40 | 31 to 90 days | \$2,000,000 |
| Seneca | Community Swimming Pool | Our current municipal swimming pool is rapidly approaching the end of its useful life. It is the main source of entertainment for our youth during the summer season. Not only does the pool provide a healthy recreation activity, it also has been proven to take pressure off our law enforcement personnel by keeping our younger people occupied. | City of Tiffin | 30 | 91 to 180 days | \$4,000,000 |
| Seneca | Ella Street Bridge | This river bridge is part of a main artery to one of our local schools. The bridge was rebuilt in the mid-70's and is now in need of major repairs. | City of Tiffin | 25 | 31 to 90 days | \$150,000 |
| Seneca | Art Education/Classes | The Tiffin Art Guild has started a program to offer free art classes to senior citizens and to the youth of the community. We have gone into nursing homes to offer art classes. We have had a high number of folks interested in this project. We would like to offer transportation to and from the classes for senior's not able to drive to the classes. We have students from 8 years of age to 92 years of age. On the other end of the spectrum, offer free art classes to children to boost self-esteem and creativity in youth of all ages. | Tiffin Art Guild & Gallery | 2 | 0 to 30 days | \$10,000 |
| Seneca | Re-location of the Guild | The Tiffin Art Guild is looking to re-locate into a permanent building for the local artist to display, work and sell their art. We now have a small building in which we rent space. The object of this application is to obtain funds to purchase and restore an old building in downtown Tiffin, which also adding to the art district which would be created if located in the block with the Ritz Theatre and the Tiffin Glass Museum. We have a great deal of talent to pull from in the area and the income generated from this art and promote local art would be benefit to the state and the tourism trade in Ohio and in Seneca County. | Tiffin Art Guild & Gallery | 5 | 0 to 30 days | \$500,000 |
| Seneca | Springville Marsh State Nature Preserve Site Remed | Funding will be used to remove a large concentration of carbon rods buried at the site. Prior to acquisition by the Department, a portion of this 200 acre site was used as an industrial facility by Union Carbide, and over the years the carbon rods (part of battery production) have become exposed. The Ohio EPA has been to the site and requested that the rods be removed and properly disposed of. The exact extent of the problem is not known. However funds are currently allocated in the CDEPR capital improvements budget to perform a detailed study and develop a clean-up strategy. Federal funds would be used to perform the actual cleanup of the site, which is currently a dedicated state nature preserve. | Ohio Department of Natural Resources | 15 | 91 to 180 days | \$750,000 |
| Seneca | Web-based Laboratory for Understanding Pollutant T | 100,000 samples collected at NCWQR and US Geological Survey stream gage stations. This wealth of data is unparalleled anywhere in the United States. In 2005, we created a web site on the Web, along with a data analysis tool and a set of tutorials that describe appropriate ways of analyzing and interpreting the data. More than 100,000 visits to this site demonstrate the interest of governmental agencies, academics, and non-profit and commercial entities in the information to be found there. We now seek to expand the website into a complete learning laboratory (Web 2.0) for water quality in rivers and streams, which will support a continuum of learning from the high school through university and professional level research, faculty research, and professional environmental modeling. Our goal is to reach every high school, community college and university in Ohio with this resource. | National Center for Water Quality Research, Heidel | 3 | 31 to 90 days | \$140,000 |
| Seneca | SEN Capitalized Maintenance; PID 86111 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through CDOT. | Ohio Department of Transportation | 1 | 0 to 30 days | \$25,660 |
| Seneca | recycle and waste collection building | 80 x 100 steel structure building for recycle and waste collection which will sit on 4 acres of land in the Village of Republic, Ohio. Expanded Outcome would be to become a full operating business and expand to generate jobs and revenue to our local community. | Sonic Hauling Ltd. | 12 | 31 to 90 days | \$60,000 |
| Seneca | Paving of Stone Roads | Raise and pave approximately 3 1/2 miles of stone roads. This will complete paving of the 41.25 miles of roads in the township. The paving of these roads will allow for safer travel and encourage growth of the township by making it easier for residents to make more accessible. Community school buses travel the rough stone roads to pick up children on either end. The Trustees want to encourage township growth and provide safer roads in the township. Any remaining money would be used to improve the remaining roads in the township. | Scipio Township, Seneca County | 2 | 91 to 180 days | \$400,000 |
| Seneca | State Route Improvements | This proposal is for \$5 million dollars to improve turn lanes on our major State Routes throughout Seneca County. We are one of four counties in Ohio that do not have a four lane highway. The purpose of this request is primarily public safety. Seneca has one of the highest crash rates per volume in Ohio. It will stimulate the economy by creating new jobs and creating a safer community for the county, hence stimulating economy by retaining current jobs as well. The project includes State Routes 53 NMS, State Route 224 E&W, SR12 Belleville to Fostoria, and SR 4. | Seneca County Commissioners | 50 | 31 to 90 days | \$35,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Seneca | Modeling the Impact of Climate Change Using a Labo | This location is a close, semi-arid grassy meadow on campus adjacent to Lake Erie. It is easily accessed by KU students and by neighboring community colleges and high schools. This site is an ideal location for a laboratory for the study of watershed hydrology and the possible impacts of climate change. Predicted changes in the frequency and strength of storm events will have profound impacts on the movement of water, nutrients, and contaminants through terrestrial and aquatic ecosystems. NCIWQ has 30 years experience in assessing status and trends in water quality and to respond to changes in climate and land use. An MS program in watershed sciences both focused on modeling the Rock Creek watershed would integrate this experience, providing students with the aquatic, atmospheric, and agricultural sciences with a unique, hands-on, place-based yet holistic education that would be unique in Ohio. This program could serve as a prototype for similar laboratory watershed programs in other parts of the state. | National Center for Water Quality Research, Heidelberg | 50 | 91 to 180 days | \$500,000 |
| Seneca | Food Service Business | 2 conveyor covers used for cooking food products 1 walk in cooler for storage of food products 2 stand alone coolers for storage of food products 1 stand alone freezer for storage of food products 1 cut table for preparing food products 1 refrigerated milk line unit for preparing food products 200 screens and pans of varied sizes for cooking 2000 ceramic plates for dining 1000 boxes of varied sizes for containing food products 1 vehicle for delivery of food products 1 commercial mixer for preparing food products 1 commercial burner for preparing food products 8 tables for dine in business 36 chairs for dine in business 1 beverage mixer unit for carbonated beverages 1 ice machine 1 cash register various other miscellaneous items used in the day to day operations of a food products business, such as utensils, cleaning supplies, napkins, aprons, etc. | Rock-n-Roll Pizza | 10 | 0 to 30 days | \$150,000 |
| Seneca | NORTH SR 19 STORM TILE REPLACEMENT | REPLACE 200-300 FEET OF STORM DRAINAGE TILE | Village of Republic | 6 | 31 to 90 days | \$36,000 |
| Seneca | Personal Security for Seneca County | Our security program fulfills the objectives of the Stimulus Act for it provides security and real time tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security programs require immediate action to report suspicious activity. Central control, child care, senior citizens, travel, rescue operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our devices. With our GPS trackers, location data can be sent to mobile phones or instant messages to help prevent vehicle theft. Geo-fencing functions can alert location boundaries and trigger notifications when exceeded. For personal safety a panic button can issue an alarm with location information to multiple chosen phone numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self powered units that continuously | Nuleaf Ohio Limited | 2 | 31 to 90 days | \$131,040 |
| Seneca | WATER VALVE AND FIRE HYDRANT REPLACEMENT | REPLACEMENT OF 13 WATER VALVES AND 21 FIRE HYDRANTS WITHIN THE DISTRIBUTION SYSTEM. | Village of Republic | 5 | 31 to 90 days | \$120,000 |
| Seneca | Accessible Lane | Asphalt an existing stone lane (180' x 16') to create all-weather, year-round disabled access to our existing park facilities at Miller Conservation Park. The currently provide conservation education programs to over 2800 school and public participants touring the farm annually, and this number continues to increase. We also provide tours and outdoor opportunities to more than 40 disabled citizens yearly throughout the farm using specialized ATV equipment. Asphalting this lane will allow safe access to the back of the farm, where we have our fishing pond, windbreaks, walk-grove demonstration area, and also have our agricultural research stations located. We are asking this money be granted to the Seneca SWCD to help us provide further handicapped accessible areas on our public area. Thanks for your time in considering this request. | Seneca SWCD | 10 | 0 to 30 days | \$63,276 |
| Seneca | Wireless Broadband for Seneca County | Our access system fulfills the objectives of the Stimulus Act for it provides broadband to un-served and underserved areas while employing hundreds in high paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network to Delaware to surrounding counties for people such in the digital divide. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the funds awarded to the providers of cable and DSL, the underserved areas still exist today. Now it's the time to try something different. Rural America needs broadband today not the faded promises of the past. Our unique process for deployment utilizes the most cost effective wireless model available. Each dollar spent produces the most coverage per mile of any existing provider which allows low access fees and universal participation even among the low income and the disconnected. The current assignment should fulfill the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident by our existing network, the most advanced and cost effective WiMax technology available. | NexGenAccess | 17 | 0 to 30 days | \$1,700,000 |
| Seneca | Bascom Wastewater Collection and Treatment System | Bascom is a small hamlet in Hopewell Township, Seneca County, Ohio with a population of approximately 348 residents. Bascom is the home of the Hopewell Local School, with 825 students in grades K-12. Also, within the service area is Madadenan Park, owned by the township, with a large ballroom, swimming pool and a 225 site RV campground. The Ohio Environmental Protection Agency has determined that Bascom is served by inadequate or failing on-site sewage treatment systems that discharge untreated or partially treated sewage to the roadside ditches and the storm water system. The Seneca County Commissioners are presently under "Firing and Order" as directed by the Ohio EPA in complete and permanent general foul sewage improvements to abate pollution and correct the unsanitary conditions in the Bascom area. A wastewater collection and treatment system to serve Bascom is currently under design. We have constructed a new Water Treatment plant this would allow us to pay it off and lower rates in place to help generate more money for the economy. | Board of Commissioners | 160 | 0 to 30 days | \$2,000,000 |
| Seneca | Village of Attica Water Plant | | Village of Attica | 2 | 0 to 30 days | \$3,000,000 |
| Seneca | Police Protection Improvements | Addition of four new officers. Replacement of dated police cruiser. structural improvements of existing deteriorated police station. | Bettsville Police Department | 10 | 0 to 30 days | \$80,000 |
| Seneca | Install Chlorine Scrubber | Install a chlorine gas scrubber for safety | Ohio American Water Company | 5 | 181 days or more | \$230,000 |
| Seneca | Replace 495' of main on Fostoria Street | Upgrading from a 2" main to 6" main due to age of original main. | Ohio American Water Company | 9 | 91 to 180 days | \$29,500 |
| Seneca | County Road 16 road flooding. | Evening this project will address highway and residential flooding. During these conditions resident's homes are flooded out making them uninhabitable. During heavy down pours this area will flood OR 16 making the road impassable. During these conditions emergency services cannot pass this area causing unsafe conditions for public safety. As county commissioner this has happened at least five times in four years. This road is used every weekday transporting school children on buses to and from school. Thanks for your assistance. | Seneca County | 10 | 91 to 180 days | \$146,000 |
| Seneca | Fostoria Police Department Communications Upgrade | Upgrade of mobile terminals in 8 police cruisers and support software for dispatch. | Fostoria Police Department | 5 | 0 to 30 days | \$160,000 |
| Seneca | NCOESC Business First | This project is designed to assist potential high school drop-outs and their families from local educational entities to receive intense mentoring, training and learning through an alternative learning program which features intense work with the court system of Marion, Seneca, Wyandot and Sandusky Counties, providing classes, special programs for developing a work profile. Also including are significant sessions with counselors from a local institution, local business owners speaking to students and targeted assistance for graduation credit for all students enrolled in the program. The program will feature parent and student interviews prior to acceptance into the program and include digital on-line learning. The program is designed to improve the graduation rate of students and increase their ability to receive and sharpen targeted job skills. This program will provide a true alternative learning program for students in a four county area. | North Central Ohio Educational Service Center (NCO | 6 | 91 to 180 days | \$75,000 |
| Seneca | Seneca County Enterprise Incubator | Tifin and Seneca County minor national economic trends of slower wealth growth, and loss of higher paying jobs due to downsizing, and globalization. To compete effectively, the Tifin area must be aggressive in the promotion of wealth creation. To that end, the BECC, in cooperation with Heidelberg and Tifin Universities propose the formation of the Tifin-Seneca Enterprise Incubator (TSEI) has three goals: 1. To increase the probability of survival of fledgling businesses over the first five years of operation; 2. To increase the growth rate of existing businesses; and 3. To assist in the formation of new businesses by identifying persons with the potential to establish a business and providing the introduction of new business ideas into the local market. Clients will accepted into the TSEI will go through a 12 to 24 month program where they will have access to the resources of the Masters Degree programs of both Universities, and successful local businessmen who have volunteered to participate in the program. TSEI anticipates graduating 8 clients in year 1, 8 in year 2 and 8 by year 3. Funds will be used to incur a training location, and program director. | Seneca Industrial & Economic Development Corp. | 25 | 31 to 90 days | \$100,000 |
| Seneca | Bus Garage | 16x48' bus garage for storage of school buses. single story, slab on grade, pre-engineered wood frame structure, 5 bus bays with 22'x12' overhead doors 1 bay with 12'x12' overhead door. | New Riegel Local School | 25 | 91 to 180 days | \$150,000 |
| Seneca | Eden Township Community Fire and Safety Services B | Eden Township Community Fire and Safety Services Bldg - 607 by 140' 8400 sq. ft. plans already developed. We have acquired 5 acres of land in which to build a Community Fire Station that would be centrally located, and no more than 4 miles to any location in the township. This building would also be used for a disaster area, training for fire and safety classes, voting precinct, Township Trustee and zoning meetings, along with numerous community organizations. | Eden Township | 20 | 31 to 90 days | \$600,000 |
| Seneca | Sandusky County Conservation Equipment buydown | The proposed project would provide an incentive to agricultural producers to purchase conservation tillage, planting or application equipment to utilize in their operation. The dollar amount requested would be used to provide a 20% buydown on newly purchased conservation tillage, planting or application equipment. The equipment would reduce the number of trips across a field in turn reducing the amount of fuel used and thereby plant an agricultural crop. Not only will this reduce the amount of fossil fuel used but also improve water quality and provide environmental benefits. Industries positively impacted by this program include manufacturing, agricultural production as well as retail dealerships. | Seneca Soil and Water Conservation District | 300 | 31 to 90 days | \$1,000,000 |
| Seneca | Chapman's Books | I want to open a bookstore in Fostoria, Ohio. I would like to open a new and used bookstore. In the bookstore I want to sell books that are written by Ohio authors as well as other authors, but the main focus will be on local authors. The bookstore will also promote reading and writing. It will have a book club, story time for children, and a writers group. It will give Ohio authors a place to promote their work. The money would be used to purchase shelving, get a building, supplies, and inventory. | no organization name | 5 | 0 to 30 days | \$5,000 |
| Seneca | Emergency/Transitional Shelter | According to the Ohio Coalition on Homelessness, 179,716 people experience homelessness in Ohio over the course of a year. Addressing this issue in rural counties can be particularly difficult because of limited resources, high poverty rates, lack of affordable housing, and geographic spread. Currently, there is no homeless shelter in Seneca County. Recently, First Step began serving male victims of domestic violence and homeless men through a new program service called The Bridge. The program was initiated through collaboration with a local Nazarene Church. Unfortunately, because the shelter is across town from our main site, there are significant program limitations particularly in staff time, space, and transportation. To address this, First Step is embarking on a building campaign that would increase our capacity to care for shelter and program services for rural homeless with an additional 4000 feet on site. First Step has already secured financial and moral support from city and local public officials and partner social service agencies. All architecture design work for the project is being donated and we hope to have the building completed by late 2010. | First Step | 25 | 181 days or more | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Seneca | Honey Creek Wind Farm | Reserve Energy would like to install and operate a 150 MW wind energy project. We have obtained the land through leases and easements and have access to transmission lines. The local economy will benefit through jobs created as well as the creation of full time jobs in the area and an influx of state and local taxes. The turbines, substation and cables and other equipment needed for this project would be substantial, hence increasing manufacturing and engineering opportunities. | Reserve Energy Exploration | 35 | 0 to 30 days | \$750,000.00 |
| Shelby | Wireless Broadband Internet Service | This Wireless Broadband Internet Service offering would target potential customers who are in unserved and under served rural areas who do not have access to Broadband Internet services. The funds would be used to purchase and install Wireless Broadband Radio equipment in the Shelby, Ohio (Shelby County) area on either an existing or a new tower depending on the best coverage available. The funds would also be used to provide customer premise radio equipment in order to provide the radio link between the customer and the base station radios. The service would be provided in the 700 MHz licensed wireless radio band. NCTelco Inc. already owns the 700 MHz license for Shelby and surrounding areas. Approximately 50 to 75 new customers could initially be provided service with the \$85,000 stimulus funds. A total buildout, serving in excess of 100 customers would be possible utilizing the estimated \$225,000 in total project cost estimates. | NCTelco Inc. | 3 | 31 to 90 days | \$85,000 |
| Shelby | Dist 7, PID 85837, SHE 2 light transit vehicles | Purchase 2 light transit vehicles for the City of Sidney | Ohio Department of Transportation | 1 | 31 to 90 days | \$108,000 |
| Shelby | Dist 7, PID 85831, SHE Computers, storage, vault | Purchase 3 computers, power vault MD3000 storage unit, and server to manage power vault for the City of Sidney | Ohio Department of Transportation | 1 | 31 to 90 days | \$29,000 |
| Shelby | Dist 7, PID 85832, SHE IP phones and switch power | IP phones and 48 port switch power for phones for the City of Sidney | Ohio Department of Transportation | 1 | 31 to 90 days | \$9,200 |
| Shelby | Dist 7, PID 85833, SHE AVL/GPS and upgrade dispatc | AVL/GPS system and upgrade Easy Rides dispatch software for the City of Sidney | Ohio Department of Transportation | 1 | 31 to 90 days | \$55,000 |
| Shelby | Dist 7, PID 85836, SHE Security cameras | Security cameras for the City of Sidney | Ohio Department of Transportation | 1 | 31 to 90 days | \$10,000 |
| Shelby | Dist 7, PID 85838, SHE Facility equipment | Purchase snow blower, lawn mower, and floor buffer equipment for the City of Sidney | Ohio Department of Transportation | 1 | 31 to 90 days | \$4,500 |
| Shelby | Dist 7, PID 85834, SHE Facility signage and awning | Building signage and facility awning for the City of Sidney | Ohio Department of Transportation | 1 | 31 to 90 days | \$17,400 |
| Shelby | Dist 7, PID 85835, SHE Sidewalks and landscaping | Sidewalks for parking area and landscaping for the City of Sidney | Ohio Department of Transportation | 1 | 31 to 90 days | \$19,000 |
| Shelby | Defibrillator Program | Drafts several fire, rescue and police units throughout the county with Automated External Defibrillators and to provide training to first responders on the proper use and maintenance of the units. | Perry Port Salem Fire and Rescue | 0 | 0 to 30 days | \$33,710 |
| Shelby | Shelby County Jail | We would purchase approximately 18 defibrillators. | Shelby County Sheriff's Office | 15 | 181 days or more | \$2,000,000 |
| Shelby | Constitution for the Kids Book Series | New communication system. Repairs to the jail, upgrade security system. Build additional training facility. | please contact* | 10 | 0 to 30 days | \$150,000 |
| Shelby | Dist 7, PID 84056, SHE SR 47 0.87 | We will be able to educate our children about our Constitution and how great our country is. Information that is vital for children to know about our country's future. With this money, we will be able to produce and distribute over 60,000 children's books in Ohio as well as their parents. We are interested in purchasing them as well as prepare for distributing a second round of books. We will also be able to use the money to visit schools and prepare a fun, interactive, educational presentation for them. | Ohio Department of Transportation | 12 | 31 to 90 days | \$160,789 |
| Shelby | Dist 7, PID 77544, SHE SR 47 4.53 | Culvert Construction | Ohio Department of Transportation | 21.8 | 31 to 90 days | \$759,867 |
| Shelby | Sidney Water Source Project | Mega-Farm within our watershed, agriculture run-off into the Great Miami River; municipal waste discharges and severe droughts in three of the previous six years. The City of Sidney has looked for an alternate water supply for 50 years. The City has identified sand and gravel buried aquifer approximately 7 miles southeast of Sidney as a new water source which can produce over 10 MGD (million gallons per day). The request for funding this Water Source Project involves the acquisition of land, design, and construction of a new 10 MGD wellfield and a 9 mile transmission main back to Sidney's Water Treatment Plant. The total project cost is estimated to be approximately \$23,000,000. In order for the City to finance such a large project would require a very large increase in the water user rates. The impact to our industrial community would be substantial. Therefore, in order to bring the rates down to a reasonable level, we have been seeking at least \$10,000,000 in assistance. | City of Sidney | 5,000 | 91 to 180 days | \$10,000,000 |

| Shelby | Southwest Sanitary Sewer Rehab Project | The Southwest Sanitary Sewer Interceptor in Sidney serves 90% of the City's industrial base. This intercepting sewer is subject to a large amount of inflow and infiltration and is taking up needed capacity for future industrial growth. | City of Sidney | 90 | 91 to 180 days | \$300,000 |
| Shelby | Wastewater Treatment Plant Peak Shaving Generator | This project would involve the installation of a Large Generator at the City's Wastewater Treatment Plant and will be used in coordination with DPL to operate during periods of high demand. During periods of high demand, the Wastewater Treatment Plant would operate the Peak Shaving Generator and would be removed from the power grid for a period of time. This could also be used to help control the peak power demand at the facility. | City of Sidney | 90 | 91 to 180 days | \$1,000,000 |

| Shelby | Lime Sludge Lagoon Remediation | The byproduct of the City's Water Treatment Process is lime sludge which still has a high fertilizer value. Currently, there is a backlog of farmers wanting this free material. This project would involve the cleaning of a 3 acre Lime Sludge Lagoon, dewatering and storing the material and then giving it away free to local farmers. During the process of cleaning the lagoon, a divider wall will be installed to separate the lagoon in half for better operations. | City of Sidney | 400 | 91 to 180 days | \$2,400,000 |
| Shelby | SHE-050-06.20 | Replace an existing three span bridge with a new structure. | Shelby County | 5 | 31 to 90 days | \$400,000 |
| Shelby | SHE-CR25A-10.61 | Replace an existing three span bridge with a new three span prestressed box beam structure. This will be a design build project. | Shelby County | 10 | 91 to 180 days | \$550,000 |
| Shelby | SHE-CR25A-01.48 | Replace an existing single span box beam with a new precast box culvert. This highway is a major collector and this project would qualify. I plan to let this project as a design build. | Shelby County | 10 | 91 to 180 days | \$250,000 |
| Shelby | SHE-CR25A-12.27 | Replace an existing single span bridge with a new single span prestressed concrete box beam structure. | Shelby County | 10 | 91 to 180 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Shelby | CR25A Resurfacing I-75 to Anna | The mill of existing pavement and do some minor pavement repair and then to replace the wearing surface with new asphalt concrete. This project is 4.50 miles in length. Pavement upgrade will include new raw water, digesters, effluent flow meter, raw wastewater screens and ultraviolet disinfection system. Depending on funding opportunities, these raw water pump assemblies will also be included in the project. | Shelby County | 10 | 91 to 180 days | \$750,000 |
| Shelby | Waste Water Treatment Plant Upgrade | Because the current plant at the end of its useful life it is necessary to upgrade components in order to remain efficient and stay within the parameters of our EPA operating permit. | Municipality | 4 | 31 to 90 days | \$1,150,000 |
| Shelby | Lockington Dam Foundation Grouting | Permitting grouting of the fractured bedrock in the foundation of a Class I flood protection dam to control underseepage and increase the factor of safety of the dam. | Miami Conservancy District | 20 | 31 to 90 days | \$3,000,000 |
| Shelby | Lockington Dam Concrete Rehabilitation | Rehabilitation of deteriorated concrete in the walls, spillway and conduits of a Class I flood protection dam. | Miami Conservancy District | 10 | 181 days or more | \$480,000 |
| Shelby | Young Street Reconstruction | 1500 ft. of water line, storm sewer, sanitary sewer along with curb, gutter, sidewalk, and pavement reconstruction | Village of Anna | 1 | 91 to 180 days | \$650,000 |
| Shelby | West South Street Reconstruction | water, storm sewer, curb, gutter, sidewalk, and pavement reconstruction | Village of Anna | 1 | 31 to 90 days | \$420,000 |
| Shelby | RETAINMENT & EMPLOYMENT OF POLICE OFFICERS | MY STAFF HAS BEEN REDUCED TO 1 FULL TIME AND 3 PART TIME EMPLOYEES. WE ARE IN NEED OF AT LEAST 3 FULL TIME AND AN UNKNOWN NUMBER OF PART TIME OFFICERS. CURRENTLY MY BUDGET IS NOT HEALTHY ENOUGH TO ALLOW ME TO PROPERLY STAFF MY DEPARTMENT AND ENHANCE THE PROPER SERVICES TO THE COMMUNITY. | VILLAGE OF ANNA POLICE DEPARTMENT | 3 | 31 to 90 days | \$150,000 |
| Shelby | SIDNEY INDUSTRIAL PARK | This project, the subject of two City Ohio Job Ready Site Grant applications, would generate 250 acres of industrial property adjacent to the intersection of First Road and I-75. | CITY OF SIDNEY | 250 | 91 to 180 days | \$3,456,000 |
| Shelby | NORTH END FIRE STATION | PROVIDE TIMELY MUNICIPAL SERVICES (HEALTH, SAFETY AND WELFARE) TO GROWING RESIDENTIAL DEVELOPMENT IN NORTH END OF CITY | CITY OF SIDNEY | 12 | 91 to 180 days | \$1,500,000 |
| Shelby | RUNWAY 10/28 RELIGHTING/EXTENSION | The east-west runway would be extended 200 feet, to a total of 5,000 feet. The Airport is home to the aircraft of Continental Trucking and Parkway Foods industries. Would provide for Emersons, Axxon and a number of other international corporation, transient planes. This antiquated bridge has weight restrictions that interrupt flow of goods and services to a variety of enterprises including Ring Can Corporation, Cooper to Cargill | CITY OF SIDNEY | 2 | 91 to 180 days | \$262,500 |
| Shelby | PARK STREET BRIDGE DECK REPLACEMENT | The north end industrial facilities, including 180 acres of vacant property located at the intersection of Russell Road and I-75 would be served by the new water tower. | CITY OF SIDNEY | 50 | 91 to 180 days | \$611,250 |
| Shelby | SIDNEY INDUSTRIAL WATER TOWER PROJECT | The north end industrial facilities, including 180 acres of vacant property located at the intersection of Russell Road and I-75 would be served by the new water tower. | CITY OF SIDNEY | 15 | 91 to 180 days | \$2,625,000 |
| Shelby | SIDNEY WATER SYSTEM IMPROVEMENTS | A number of distribution upgrades are necessary to provide desirable water flow and pressure to the many corporations throughout the community. | CITY OF SIDNEY | 30 | 91 to 180 days | \$4,500,000 |
| Shelby | HOEWISHER ROAD SHOULDER IMPROVEMENTS | Hoewisher Road is the north boundary of the community, adjacent to I-75. It connects the commercial nodes of the community. | CITY OF SIDNEY | 30 | 91 to 180 days | \$172,500 |
| Shelby | RUSSELL ROAD-ST MARY'S TRAFFIC SIGNAL UPDATE | The intersection of Russell Road and St. Mary's SR 209 provides access to north industrial property, employing approximately 200 employees. Airport's east-west runway needs a taxiway to move planes such that the conflict with an active runway is reduced. Hence the Parkway Foods and Continental Trucking, the two firms with corporate planes on site. | CITY OF SIDNEY | 2 | 91 to 180 days | \$114,000 |
| Shelby | APRON/TAXIWAY EXPANSION | Goodie Street provides access to local manufacturing facility, servicing employees, suppliers and customers. | CITY OF SIDNEY | 2 | 91 to 180 days | \$63,750 |
| Shelby | RECONSTRUCT GODEE STREET | SR 47 provides east-west access to town connecting second largest employer in town, NK Parts, with the Honda plant in East Liberty and Marysville. | CITY OF SIDNEY | 40 | 91 to 180 days | \$56,250 |
| Shelby | SR 47 GUARD RAIL REPLACEMENT | SR 47 provides east-west access to town connecting second largest employer in town, NK Parts, with the Honda plant in East Liberty and Marysville. | CITY OF SIDNEY | 1000 | 91 to 180 days | \$90,000 |
| Shelby | SR 47 GUARD RAIL - JERSEY BARRIER | SR 47 provides east-west access to town connecting second largest employer in town, NK Parts, with the Honda plant in East Liberty and Marysville. | CITY OF SIDNEY | 1000 | 91 to 180 days | \$232,500 |
| Shelby | RESURFACING OF CITY STREETS | Contract Resurfacing of City Streets @ \$20/SF ... Road 50, 26 & 23K | CITY OF SIDNEY | 10 | 91 to 180 days | \$1,387,500 |
| Shelby | BROADWAY AVE STORM PIPE REPLACEMENT | Based on expected useful life of 30 years, the City's resurfacing budget is not keeping up. | CITY OF SIDNEY | 20 | 91 to 180 days | \$22,500 |
| Shelby | DECOMMISSION OF BIO SOLIDS SLUDGE STORAGE LAGOON | Stormwater in this area exceeds existing pipe size thus inundating private property The City's Wastewater Treatment Plant provides sewage service to the 15,000 employees who work in the City of Sidney. The sludge lagoon is no longer necessary and needs to be closed. | CITY OF SIDNEY | 10 | 91 to 180 days | \$26,250 |
| Shelby | HANDICAP RAMP PROGRAM UPDATE | Per Ohio Dept of Transportation regulations, "improved" handicap ramps for visually impaired need to be installed along SR 20, SR 47 and Co. Rd 20A. | CITY OF SIDNEY | 20 | 91 to 180 days | \$93,750 |
| Shelby | Kettlersville Sewer Collection System | Installation of a gravity sewer collection system in an unsewered Village and transportation via pump station and force main to an existing County treatment system. Approximate quantities: 6000 feet of new 8 inch PVC gravity sewer line 11 grinder pump stations 6000 feet of new 2 inch PVC force main 1 duplex pump station | Shelby County Sewer District | 10 | 181 days or more | \$1,763,630 |
| Shelby | Sludge Dewatering | 17250 feet of new 4 inch PVC force main Install either a sludge belt press or a sludge rotary fan press to handle biosolids from the Anna Wastewater Treatment Plant process. It would process nearly 365,000 gallons of sludge per year. | Village of Anna Public Works | 2 | 0 to 30 days | \$500,000 |
| Shelby | Mill Creek Subdivision Wastewater Facilities | Rehabilitation of an existing sewer collection system, abandonment of two wastewater package plants, transportation via pump station and force main to an existing County wastewater treatment plant. Some modification will need to be done at the existing County WWTP. Two point source discharges will be eliminated by this project. | Shelby County Sewer District | 10 | 91 to 180 days | \$597,200 |
| Shelby | Arrowhead Hills WWTP UV Disinfection | Approximate Quantities: 5000 feet of new 8 inch PVC sewer line 1 duplex pump station 6000 feet of new 4 inch PVC force main | Shelby County Sewer District | 2 | 91 to 180 days | \$40,000 |
| Shelby | Lake Loramie WWTP Improvements | Install UV disinfection in existing County WWTP. Elimination of chlorination and dechlorination chemical feed systems. | Shelby County Sewer District | 5 | 181 days or more | \$201,300 |
| Shelby | Fair Haven & Arrowhead Hills Water Storage Improve | Rehab existing tower building, upgrade existing blowers, and reline the existing sludge pond. | Shelby County Sewer District | 5 | 91 to 180 days | \$165,000 |
| Shelby | St Rt 66 (Main Street) Reconstruction | Install mixing system in two County standpipes to improve water quality. Also includes cleaning and minor repairs to both standpipes. 3400 linear feet complete reconstruction of street, curb and sidewalks on St Rt 66 (Main Street). This will project also includes 3400 LF of new storm tile and 12" water line which replace our existing park. | Village of Fort Loramie | 10 | 181 days or more | \$2,500,000 |
| Shelby | Water Treatment Plant Replacement | This project entails a total replacement of our water treatment plant. Due to an EPA requirement to install IRON filters and the age of our existing WTP, sulfates and electrical system, we are completely replacing our WTP. We have already drilled 2 new wells at a new site which will serve as the water source for the new WTP. We are in the process of designing the plant and will be ready for construction. The system currently serves 20 businesses, 15 Commercial users, 15 Industrial and 580 residential customers. We are also in the process of getting approval to add an additional 100 residential users who are out side of our corporation limit. This will eliminate all small systems and reorganize those systems with ours. | Village of Fort Loramie | 10 | 91 to 180 days | \$1,500,000 |
| Shelby | SR 362 (Elm Street) Reconstruction | 3400 linear feet complete reconstruction of street, curb and sidewalks on SR 362 (Elm Street). This will project also includes 3400 LF of new storm tile and 12" water line replacement which will be the main outlet line from our new water treatment plant. | Village of Fort Loramie | 10 | 181 days or more | \$1,500,000 |
| Shelby | Village of Fort Loramie - Sanitary Sewer I & IStu | The construction of an I & I study for the village of Fort Loramie. This study would help the village identify areas of our sanitary sewer collection system which are allowing significant amounts of storm water into the system. The results of the study would be used by the village for making decisions on and prioritizing improvements needed to our sanitary sewer collection system. The study would include flow monitoring, televising of the sanitary sewers, smoke testing, etc. | Village of Fort Loramie | 3 | 0 to 30 days | \$25,000 |
| Shelby | Street Repaving project | Grind and resurface village roadways to include 81,771 square yards of asphalt pavement. Installation of a bridge leading into the Russia industrial park. | Village of Russia | 0 | 0 to 30 days | \$568,459 |
| Shelby | Industrial Park Bridge Construction | Although this project does not immediately create new jobs, it is the first step in the process to develop rail accessible property in our industrial park, thus creating the potential for hundreds of new jobs in our community. | Village of Russia | 0 | 31 to 90 days | \$189,199 |
| Shelby | Energy Efficiency | WestCON Council of Government consolidates nine County Board of MRDD services into one location. The office we work out of is poorly insulated and poorly heated. The heating and air conditioning and insulation are drastically out of date. The building has not been updated for decades and is very inefficient. If the building is updated we can expect significantly lower energy use. This is a relatively small project, but with significant impact on nine counties. Thank you for your consideration in this important project! | West Central Ohio Network COG | 2 | 0 to 30 days | \$20,000 |
| Shelby | Parking lot expansion | West Central Ohio Network Council of Government (WestCON COG) consolidates services for nine County Boards of MRDD. The facility we use is 18 hours out operating that is not happy enough parking for our personnel. We provided trainings and meetings at our facilities and plan to expand our services. We need to expand our parking facilities to expand our services. We currently have enough parking for nine vehicles. We need to expand to enable 15 car parking. | West Central Ohio Network COG | 2 | 31 to 90 days | \$25,000 |
| Shelby | Fiber Optic Link to Houston, Ohio High School | Thank you for considering this project This project would extend NKT'sco's fiber optic network to reach the Houston, Ohio High School which currently serves approximately 450 students. The fiber would connect to existing NKTco's Inc. Facilities in Newport, Ohio and follow Route 66 to the High School in Houston, a distance of three (3) miles. The High School would then have the opportunity to connect to the Internet via a 100 Meg Ethernet connection into Sidney Ohio. Other services would also be available to the school by way of lower cost telephone service. The expected benefits include obtaining a choice for very high speed internet service, benefiting both Students and faculty and the lowering of the school's overall telephony costs. | NKTco Inc. | 3 | 31 to 90 days | \$75,000 |
| Shelby | Extend runway, improve apron, rehab lighting | Extend runway, improve apron, rehab lighting Convert gravity and grinder pump sewer collection system with transportation via pump stations and force main to an existing County WWTP. Some expansion of existing WWTP. | City of Sidney | 7 | 31 to 90 days | \$435,000 |
| Shelby | Newport Sanitary Sewer Project | Quantities: 18,000 feet of 8 inch PVC gravity sewer line 5,000 feet of 4 inch PVC sewer laterals 10,000 feet of 2 inch PVC force main 34 grinder pumps 2 pump stations 30,000 feet of 6 inch PVC force main | Shelby County Sewer District | 10 | 181 days or more | \$5,000,000 |
| Shelby | Fiber Optic Link between Sidney and Newport Ohio | This project would connect the communities of Sidney and Newport Ohio with Fiber Optic cable. This would result in the completion of two major objectives. First, it would provide a high speed Internet option to approximately 75 unsewered and underserved residents and businesses located along State Route 47 between Sidney and Newport. Secondly, it would complete a self-healing fiber optic ring which connects the communities of Sidney, Newport, Ft. Loramie, Mineral, New Bremen, New Knoxville, Bolivar, Anna and back to Sidney Ohio. This ring would then provide broadband redundancy to the nine (9) school districts currently served on the above mentioned route. The completion of the ring through this project would also position NKTco to compete with other providers of telephone service and broadband services (i.e. Internet connectivity and mobilization networks) resulting in lower costs to consumers. This project is construction ready within 30 days. Once complete, the benefits of offering new service to 75 customers along Route 47, in addition to providing better choices to thousands of school children and choice for residents of the above communities will be fulfilled. Expansion opportunity into business cluster of satellite businesses. Currently employees 6, it would like to expand the base of clients bases by either new or buyout of existing failing salon in the Sidney OH area. | NKTco Inc. | 10 | 0 to 30 days | \$335,000 |
| Shelby | salon expansion | This project is construction ready within 30 days. Once complete, the benefits of offering new service to 75 customers along Route 47, in addition to providing better choices to thousands of school children and choice for residents of the above communities will be fulfilled. Expansion opportunity into business cluster of satellite businesses. Currently employees 6, it would like to expand the base of clients bases by either new or buyout of existing failing salon in the Sidney OH area. | The Looking Glass Salon & Spa | 6 | 31 to 90 days | \$250,000 |

|----------------|--|---|---------------------------------|----------------|--------------------|---------------------------|
| Shelby | Sidney Water Meter Radio Read System | Installation of radio reads on all water meters in the City. Installation of central data relay hubs for the transmission of the radio reads to the City's Utility Billing Office. Will allow for real time readings - reduce water loss through leaky abstraction. This is the installation of a new spiral screen in a modified influent chamber to provide new influent screenings at the Jackson Center WWTP. This is required per EPA mandates. In addition, we are experiencing premature pump wear and clogging clarifier pumps which is disrupting flow and disturbing downstream processes. | City of Sidney | 15 | 31 to 90 days | \$1,500,000 |
| Shelby | Wastewater Treatment Influent Screen Replacement | This will bring us in compliance with the EPA and address our failing current screening process at the WWTP. Funding has become an issue with our largest employer (Airstream) experiencing dramatic layoffs and even planned shutdowns of a month at a time, on more than one occasion. | Village of Jackson Center | 5 | 31 to 90 days | \$99,500 |
| Shelby | girls high risk CBT group | Individual group created and to be held in our service area (5 counties Shelby, Darke, Miami, Auglaize, and Mercer counties). Focus: adolescent females identified to be high risk, referred from court, children services, school, community & parents. Group to last 8 weeks last week of group parents invited for wrap-up/celebration. 2x per year (November, March) for 8-10 girls per group total potential 100 girls involved in program, 200 parents, goal to decrease high risk behavior (i.e. drugs, alcohol, sex, tobacco, increase body care/maintenance and personal safety, group format using combination education and CBT treatment modality | Catholic Social Services | 8 | 31 to 90 days | \$30,000 |
| Shelby | incredible years continuous modules | After parenting program incredible years to all counties in our service area (Miami, darke, shabty, auglaize and mercer) setting it up in modules in each individual county so consumers can be administered at any time, certificate of completion given when all 12 modules completed. Have the program available in the county for a 48 week period. 4-12 week modules, starting again with 1 at the completion of 12, numbers increased, open as there would be no maximum attendees for this education program. To perform pipe bursting of a collapsed 24" storm sewer located under a box culvert on State Route 274/East Pike Street that is causing flooding in the neighborhood housing development. The AATD is 5850 with 1140 B/C Commercial Vehicles. This route is used extensively by Honda of America and its subsidiaries, Plastipak, Rising Sun, Airstream, etc. | Catholic social services | 3 | 31 to 90 days | \$45,000 |
| Shelby | SR 274/East Pike Street Pipe Bursting Project | This project would eliminate the flooding of the residential area without disturbing traffic flow of the industries. Funding has become an issue with our largest employer (Airstream) experiencing dramatic layoffs and even planned shutdowns of a month at a time, on more than one occasion. | Village of Jackson Center | 5 | 31 to 90 days | \$100,000 |
| Shelby | anger management | After anger management class for high risk middle and high school students in each county of our service area (shelby, darke, miami, auglaize, mercer) 4x per year for 8 sessions each, 2 hours long, 8-10 students per session, referred by: court, CBR, community, parents, certificate given session completion | catholic social services | 2 | 31 to 90 days | \$30,000 |
| Shelby | trauma treatment | Purchase training and equipment to provide EMDR and neurological feedback therapy to trauma, PTSD, and RAD diagnosed individuals throughout our 5 county service area (Miami, darke, shabty, mercer and auglaize), after initial training program will continue via telehealth, including scale fees, and insurance, our location will be able to provide services in an area between Toledo and Dayton OH (between the two cities, within 100 miles in radius) | catholic social services | 2 | 31 to 90 days | \$60,000 |
| Shelby | 2nd chance Ranch | I would like to build a combination bunkhouse, horse arena, school and living quarters. I would also need some help with an existing horse barn to accommodate more horses. We would employ 2 cooks, 2 teachers or tutors, a horse trainer, house parents, and a farm hand. My idea is to have troubled youth live here, be educated here (maybe only at first to catch up on grades), live as a family and learn responsibility and respect for themselves and others. They would be in school during the day. After school they would care for "their" horse. They would be responsible for it's feeding, cleaning and grooming, etc. We would eat, do schoolwork, work and live as a family. They would learn responsibility by having chores on the farm and being responsible for the care of another living being. | 2nd chance Ranch | 20 | 91 to 180 days | \$600,000 |
| Shelby | Lockington Locks Restore Lock 2 | The Lockington Locks, components of the Miami and Erie Canal are listed on the National Register of Historic Places. The locks, built in the early 1840s, serviced commercial shipping between Lake Erie and the Ohio River. The locks, all inoperable in varying degrees of disrepair, are historic and maintained as a vestige of the canal system and as an important example of civil engineering work in the 19th century. This project will stabilize the Lock 2. Scope of work to stabilize Lock 2 Disassemble, rebuild a 30 foot section of the lock at south end; includes repair or replacement of missing and damaged stones. Replace the backsill with a drainage system to prevent water from seeping through stone wall, a source of the deterioration. Provide at the top of the new sod to stabilize the earth. | Ohio Historical Society | 10 | 31 to 90 days | \$315,000 |
| Shelby | Stetson Express Expansion - Phase II | This money would be used for the following: Remodel an existing 100x60' shop/garage building and equip it with capabilities to service 4 to 5 Semi Tractors Cost of 4 to 5 Used Semi tractors Employ 5 to 8 drivers and 2 to 3 Mechanics. (These Tractors would be leased to Companies to haul freight coast to coast) The remaining jobs created would be those employed in the remodeling. The remodel would require additional doors and 1 additional bay with an oil change pit. A bathroom would be required. Additional tools and equipment would need purchased. An Office would need framed in and equipped. I would purchase well maintained used tractors, I own and operate my own now. I have been around Semi Tractors my whole life - 54yrs) In the future I would like to purchase trailers to go with the Tractors. Additional Tractor purchases would occur with additional growth. Being only 7 miles for the 175 corridor I feel I am in a great area for growth in the Transportation Industry. | Stetson Express | 20 | 31 to 90 days | \$400,000 |
| Shelby | Inner City Alternate Truck Route | This project enlarges three City Intersections (roads) to allow safer and more efficient commercial and industrial truck traffic to flow around the downtown business district. This project entails several areas: Education, Employment, and Energy reduction. This funding would be used to go to college to obtain skills that would expand the services I provide. Also it would retain my job longterm with potential of creating several other positions. Also it would allow less gas spent in travel. | City of Sidney | 4 | 91 to 180 days | \$200,000 |
| Shelby | Expansion with less energy | Purchases: \$16,000 in an energy efficient vehicle \$ 7,000 in higher education \$1,200 in a laptop for on-the-road job requests \$ 200 in advertising for increased business I own a Mortgage Servicing business where I currently travel within a 5 county area. It is tied to the housing market which is in a slump. A newer more efficient car would reduce gas consumption while allowing me to expand my services to other counties with a more reliable car. If I can expand business I can hire more people. Currently I receive job requests from a fax machine, a laptop with WIFI would allow me to receive jobs while on the road, this saves major gas money when I'm already in the same vicinity. I am a photographer as a hobby but would like to expand into a small professional business. Since times are tough right now, I could provide to my local communities the chance to have quality service while still in the budget of those who have had hours and pay cut, been laid off or on their job completely. Within my small photography business I could also offer gift and other merchandise from a few local individuals who are also looking to start small businesses. The outcome that I would expect would be to supply a community, schools and churches with the services of a professional while their damaged budgets so that they could maintain their level of service. I would also provide to the families who still want document their family and special life events at a very reasonable price allowing them to spend more of their money on the holidays. Furthermore, I hope to help a few local individuals expand their businesses. In all of this, I hope to help others who have been forced to look back still have the opportunity to maintain their lifestyles while supporting my own family of 7. Thank you for your time and consideration. Sincerely, Jenny Pleiman | Fultz Mapping | 2 | 0 to 30 days | \$24,500 |

| Shelby | equipment upgrade | Funds would be utilized to purchase outdated and wornout equipment. Equipment would include mowers, trimmers, trailers and other misc. lawn maintenance items. Funds would also be used in the form of advertising with the hope of expanding the business. | C & W Lawn Service | 3 | 31 to 90 days | \$19,000 |
| Shelby | House expansion | Additional 200 square feet is needed for our house - 7 family members and only 3 bedrooms. Our current house has not appreciated any, and any new building or construction is disperateous today with the current economy. C & W Goubeaux Enterprises LLC invests in vacant homes and remodels them into affordable rental homes. This helps the community by increasing housing that was vacant and by providing affordable rental homes to those that can't afford a home of their own. This also improves the community by raising home prices and adding to the tax base. I want to upgrade and make my home energy efficient, it is 27 yrs old and needs updates that I can't afford due to the housing market, job market, and the predatory lending. | Pleiman Family | 0 | 31 to 90 days | \$25,000 |

|----------------|--|--|---------------------------------------|----------------|--------------------|---------------------------|
| Shelby | Home protection | I would some of the stimulus money that I pay for because I go to work daily and pay my taxes. Due to the downturn in economic process of industry by looking the increase it comes in on the way up and see to get worse. I am requesting some funds to purchase and upgrade my families arms and ammunition to protect my family in the case of more increase crime. The whole country will be Kayos by the time the government gets anything done doing it the way they are doing things. Thank you, Sincerely, Scott Flarum | Scotts organization | 3 | 0 to 30 days | \$2,000 |
| Shelby | Home improvements | I am making a proposal to have new doorbells installed at my home and all of my neighbors throughout my neighborhood. I figure Washington is getting new doorbells to help produce jobs, then myself and my neighbors will help also. Please consider this, I know the doorbell on my home is almost 40 yrs old and I also need a doorbell at the back of the house..... Thank You, Sincerely, Scott Flarum | Scott Home organization | 2 | 0 to 30 days | \$4,000 |
| Shelby | Fairlawn Energy saving project | The district would like to add geothermal heating/cooling units throughout the District's new K-12 school building to reduce our carbon footprint. In addition, the District would like to add solar panels and windmills to have greater a percentage of renewable energy used. These projects will help the District reduce its energy cost and allow the District to better manage it educational needs. Replaced air handlers, heat exchangers, membranes and more solar zone gaslines. The plan would include the purchase of a modern hybrid vehicle for commuting back and forth to work on a 125mile daily round trip to an out of town job as well as modern high efficiency tractor for low emissions high efficient farm duties. The scope of this project would help 15-20 various local home builders/contractors partially employed for no less than 6 months, producing jobs and spending much needed cash flow to a very rural area of Ohio. The long term pay off is lower use of natural resources due to the energy efficient improvements for the family and future generations of the children that would continue to live there for years to come. | Fairlawn Local School District | | 31 to 90 days | \$1,000,000 |
| Shelby | Eco Fauver Habitat | Replace approx. 184 linear feet of existing 40 year old produce, dairy, and meat display coolers and meat and frozen food cases. Upgrade with new more energy efficient equipment. Also, replace the compressors with new and more energy efficient ones. Have all existing 100 year old lights with the new energy efficient T-8 lighting system. would like to continue to convert and update our business to a more energy and energy efficient model for other businesses to hopefully consider to do the same. More importantly, we should have "more green" jobs to sustain the full and part time employees we have and give them hope in our community(Jackson Center) that has been hit with the layoffs at Arsteman and other companies and returning cash back at Honda. We are just a small, family owned grocery store and very competitive with the bigger stores (e. wal marts). Thank you in advance for any consideration. | Tax Payer | 25 | 91 to 180 days | \$600,000 |
| Shelby | energy saving and job retention | As my husband and I both are currently unemployed home owners we are behind on our bills including mortgage. We are receiving some government assistance right now such as food stamps and unemployment but it is not enough to get by. Our living expenses until we find work again. The amount we are seeking amounts to about two months of my husband salary as he is job hunting. get paid? This amount would allow us to catch up our mortgage and utilities. Thank you for your time and consideration. | Phi's Cardinal Market | 24 | 0 to 30 days | \$425,000 |
| Shelby | Trucking Company Start Up | To start a trucking company as an owner operator. The money requested would be use to purchase two semi trucks and start a maintenance and fuel account for those two trucks. The trucks would be used for a local freight company and would employ myself and one other driver to begin. Since I am currently unemployed due to lay off from Hydro Aluminum this would create a job opportunity for myself and another person. | Individual | 0 | 0 to 30 days | \$6,000 |
| Shelby | Redskins Memorial Park Development | This project is to develop a 29 acre Park. The property is already owned by the village. When finished the park will contain 4 baseball / softball diamonds, a restroom / concession building, a shelter house, playground area, parking lot and walking trails. Building of an indoor sportsplex which houses soccer and basketball, etc for the youth of shelby and surrounding counties. All of these type complexes are atleast an hour + away from our community. | Individual | 2 | 0 to 30 days | \$100,000 |
| Shelby | Fairlawn - Buses | The District would like to replace all buses that are 15 years and older. | Village of Fort Lorame | 10 | 31 to 90 days | \$600,000 |
| Shelby | Fairlawn - playground | District would like to build a track. District currently does not have a track and has to run on roads. These conditions are not ideal and are a safety problem at times with traffic. A track would also allow local residents to use it for personal fitness programs. This proposal would not only benefit the District but also the community. | There isnt one yet. | 30 | 31 to 90 days | \$1,400,000 |
| Shelby | Fairlawn - Track | District would like to build a track. District currently does not have a track and has to run on roads. These conditions are not ideal and are a safety problem at times with traffic. A track would also allow local residents to use it for personal fitness programs. This proposal would not only benefit the District but also the community. | Fairlawn Local School District | 0 | 31 to 90 days | \$450,000 |
| Shelby | Transition First Grade | As the conclusion of the kindergarten program, many students are still unprepared for the rigor of the first-grade curriculum and standards. These students need an alternative which could be a transitional first grade program. It would allow for an adaptive curriculum and provide for a more flexible timeline of activities as well as providing for more individual communication. It would be expected that participating students would flourish in such a setting that they would then be prepared for the traditional educational program. | Fairlawn Local School District | 2 | 31 to 90 days | \$100,000 |
| Shelby | Botkins WWTP Upgrade | New aeration digester, UV disinfection, raw water pumps, new screening method, new parshall flume meter, auxiliary backup pump, safety ladder, upgrade decant arms | Fairlawn Local School District | 20 | 31 to 90 days | \$200,000 |
| Shelby | Signal Replacement (Main St/Pike Street) | This is for replacement of the only traffic signal in the Village of Jackson Center at the intersection of SR 274(Pike Street) and SR 65 (Main Street). The aging controller has been recommended to be replaced. The signal heads are not LED. Switching to LED signal heads would result in energy savings. This would also include the replacement of the existing poles with mast arms and ADA sign replacement. We have had problems in the past of the building on the corner being hit by semi's. The AADT is 5680 with 1140 B/C Commercial Vehicles on SR 274 and the AADT is 2570 with 260 B/C Commercial Vehicles on SR 65. This intersection is used extensively by Honda of America and its subsidiaries, Pontiac, Rising Sun, Avonlark, etc. Funding has become an issue with our target employer (business experiencing dramatic layoffs and never planned shut downs of a month or a year, on more than one occasion. | Sidney City Schools | 2 | 91 to 180 days | \$125,000 |
| Shelby | New Well for Village of Jackson Center | This would be the installation of a new well for the Village of Jackson Center. This is part of our 10 year master plan to be able to continue to provide adequate and safe drinking water to the residents of the Village of Jackson Center. | Village of Botkins | 7 | 91 to 180 days | \$1,350,000 |
| Shelby | Rehabilitation/Replacement of Wastewater Collectio | This is the rehab/replace of portions of our deteriorating wastewater collector system. This reduces the infiltration into the system and thus reduces the amount of treatment at our wastewater treatment facility. This also improves the collection of our wastewater system by repairing/replace/rehabilitating deteriorating sections of the old collection system. The proposed primary care family practice clinic will attract primary medical care for many of severe and persistently mentally ill clients who are currently unable to establish care due to the lack of Medicaid providers in Shelby County. Even when primary care can be established, continuity of care is extremely difficult with a non-compliant population. The establishment of the clinic on site will attract new opportunities for integrated care. As a federally designated HPSA (Health Provider Shortage Area), the establishment of such integrated services would prove to be an invaluable asset to Shelby County. | Village of Jackson Center | 5 | 91 to 180 days | \$150,000 |
| Shelby | Integrated Primary Health Care Clinic for SPMI Pop | CONTRACT STREET RESURFACING: The City of Sidney annually resurfaces City streets by a pavement rating management system (PMS) similar to ODOT. This work includes possible asphalt milling, pavement resurfacing, pavement markings, utility adjustments, and repair/replacement of curb and gutter. to build a new shop energy efficient that will add a new mechanics and possible a new office person Planning and resurfacing of village streets including 81,771 square yards of surface area. This project will help in the long term maintenance of our village streets. | Village of Jackson Center | 5 | 91 to 180 days | \$180,000 |
| Shelby | CONTRACT STREET RESURFACING | Twenty-one active bridges are located within the City of Sidney limits. Due to the new load rating guidelines recently passed by the Federal Highway Administration, the City desires to update existing bridges that the City is responsible to maintain and inspect. | Village of Jackson Center | 5 | 91 to 180 days | \$450,000 |
| Shelby | building a bigger shop for expansion | 2009 Capitalized Maintenance: This is a trust transit project whose funding flows through ODOT. | Shelby County Counseling Center, Inc. | 5 | 91 to 180 days | \$200,000 |
| Shelby | village street resurfacing project | PAY OFF EXISTING LOANS THEN ACQUIRE SERVICE OIL CHANGE MACHINERY. PROFIT, AND UPDATE ELECTRIC. RENOVATING OF INTERIOR OF BAKERY TO MAKE IT MORE APPEALING AND FUNCTIONAL. | City of Sidney | 10 | 91 to 180 days | \$600,000 |
| Shelby | Load Rate 21 Inner-City Bridges | Said diagnosis goes to prevent collapse and enhance quality of life, offer in miami, dakota, shelby, augusta and meritor. gpr offered 35 per year for 2 weeks in each service county. 4-10 group members per session | rolen inc -bucks truck repair | 4 | 91 to 180 days | \$550,000 |
| Shelby | SHE Capitalized Maintenance: PID 86114 | To construct playground equipment and install it in the existing Village Park area in conjunction with appropriate landscaping. | Village of Russia | 2 | 31 to 90 days | \$757,945 |
| Shelby | PAY OFF BUSINESS LOANS AND EXPAND | Installation of a stormwater retention basin to reduce flooding in the north west end of the village. | City of Sidney | 3 | 31 to 90 days | \$35,700 |
| Shelby | duela diagnosis process group | group for couples thing of marriage, value/belief and compatibility exploration, communication and goal planning, goal to decrease number of conflictual marriages. | Ohio Department of Transportation | 2 | 0 to 30 days | \$56,440 |
| Shelby | City Park and Playground | Drainage and restoring the bank integrity and contour of the Miami Erie Canal Feeder inside the Village corporation limits. | SMALL BUSINESS | 7 | 0 to 30 days | \$100,000 |
| Shelby | marriage enhancement | Installation of a municipal drinking water system for the village. | catholic social services | 2 | 31 to 90 days | \$45,000 |
| Shelby | Retention Basin | Installing sidewalks throughout the village. | The Village of Port Jefferson Ohio | 1 | 31 to 90 days | \$100,000 |
| Shelby | pre marriage counseling and process group | Repair and Resurfacing of village streets. | catholic social services | 2 | 31 to 90 days | \$45,000 |
| Shelby | Canal Dreging and Restoration | This project entails three new City sidewalks (sid) to allow safer and more efficient movement of commercial and industrial truck traffic in the area around the busy downtown business district (square blocks). This alternate route involves two State roads and one County route entering the City of Sidney. (SR 47, SR 29 and CR 25A). | The Village of Port Jefferson Ohio | 2 | 31 to 90 days | \$150,000 |
| Shelby | Municipal Water System | This anticipated bridge has weight restrictions that interrupt flow of goods and services to a variety of enterprises including Ring Can Corporation, supplier to Cargil and students within Sidney City School buses. In addition, emergency vehicles (Fire Trucks) cannot safely use this mid city bridge, strategically located over the CSB railway. | catholic social services | 2 | 31 to 90 days | \$45,000 |
| Shelby | Sidewalks | Per Ohio Dept of Transportation regulations, "Improved" handicap ramps for visually impaired need to be installed along SR 26, SR 47 and Co. Rd 25-A. These funds would update the ramps to required standards and allow access to handicap residents and visitors within the community. | The Village of Port Jefferson Ohio | 2 | 31 to 90 days | \$250,000 |
| Shelby | Street Repair and Resurfacing | | Village of Port Jefferson Ohio | 10 | 181 days or more | \$2,000,000 |
| Shelby | Inner City Alternate Truck Route | | The Village of Port Jefferson Ohio | 4 | 31 to 90 days | \$300,000 |
| Shelby | PARK STREET BRIDGE DECK REPLACEMENT | | Village of Port Jefferson Ohio | 10 | 91 to 180 days | \$600,000 |
| Shelby | Handicap ramp Program Update | | City of Sidney | 6 | 91 to 180 days | \$210,000 |
| Shelby | | | City of Sidney | 25 | 91 to 180 days | \$611,250 |
| Shelby | | | City of Sidney | 20 | 91 to 180 days | \$93,750 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Shelby | Down A Country Lane | We need to create a better energy field with wind mills, and better heat in our home. My wife has had cancer 3 times and my only son had leukemia his whole childhood no one has ever helped us. We have always paid our bills and if we can pay ours, then why can't we get up roads like all the people who drive over here every day getting help, and don't have to worry about paying anymore. I don't think it is fair!! Everyone should get a voucher for money to get what they need for being a good consumer. You don't pat the bald guy on the back, that doesn't say much for the young people. They will get their own help. They will get their own help. They will get their own help. Howsoever Road is the north boundary of the community, adjacent to I-75. It connects the commercial nodes of the community with the expanding residential to the North. The shoulders drop dramatically in some areas, causing safety issues for the roadway with traffic volumes near 3000 AOTD. | lanewiewfarm | 10 | 31 to 90 days | \$100,000 |
| Shelby | Howeithier Road Shoulder Improvements | | City of Sidney | 10 | 91 to 180 days | \$172,500 |
| Shelby | Railroad Grade Crossing Surface Reconstruction | Grade Crossing Surface Reconstruction of three Railroad Crossings that are in terrible condition. The locations are: SHE# 46-7.12, CHP-29-3.63, and LOD-598-6.69. I have received several complaints on the existing crossing conditions. | Ohio Department of Transportation | 8 | 31 to 90 days | \$343,000 |
| Shelby | Small Business Expansion | Funds requested for business expansion to include but not limited to new equipment purchases, possible land acquisition with new building construction or existing building upgrades, and the addition of new employees. This expansion will allow the company to provide local professional services to a highly reduced need compared to current non-local vendors. The company would also use the resources of their local suppliers to help boost the local economy in which would stimulate new jobs. | Alig Imagery Service | 4 | 0 to 30 days | \$175,000 |
| Shelby | Tea Time for Mothers | Establish a support center for teenage mothers which offers educational classes on effective parenting and the choices. Provide mentors who teach young mothers on a daily basis and offer guidance on improving quality of life for self and children such as obtaining job and college education and helping to become self-sufficient and productive to society. Provide a place for young mothers to feel support and learn how to become strong women and team to mentor others. With high unmet mother statistics, this will make a positive impact on the community and nation. | SKinies, Incorporated | 10 | 0 to 30 days | \$1,000,000 |
| Shelby | Business Expansion | Expand small business. ADD employees, advertise, purchase product inventory. Outcome will be positive for community in adding 2 jobs and expanding a company which uplifts and encourages mothers. | SKinies, Incorporated | 2 | 0 to 30 days | \$350,000 |
| Shelby | Home Improvements | To insulate home, install 8 new windows, 2 new entry doors, new siding on home | Homeowner | 2 | 31 to 90 days | \$15,000 |
| Shelby | this old house | This house was built in 1980, we do all the electric, plumbing, fixing the walls and floors. The price of heating with our newer furnaces is very expensive. We have run out of money to replace the windows and roof. This home is a piece of Ohio's history, being a 1 1/2 acre brick home in good condition. We have 24 windows in poor condition and the roof, that needs replaced. We keep patching it. This house also needs insulation. Thank You for your time. Roseann Sherman | historical home | 5 | 31 to 90 days | \$45,000 |
| Shelby | WWTP Microturbine Electric Generation | Produced in the City of Sidney WWTP's anaerobic digester. The methane gas would be used as fuel in the micro-turbines to generate an estimated 250 KW of electricity day. The heat from the micro-turbines will be captured and used to maintain the required temperature in the anaerobic digester. The micro-turbines will provide about 33% of the electricity needed at the WWTP reducing energy costs, reduce the load on the grid, and by reduce the total fuel needed to provide the electricity needed. The methane is a renewable energy source. Methane is approximately 20 times more potent than carbon dioxide as a green house gas. This project would help prevent the release of methane to the atmosphere. The energy provided from the micro-turbines will eliminate the need for natural gas for maintaining the temperature of the digester. The project will reduce CO2 in nature and will allow additional micro-turbines to be installed at a later date as gas production increases. | City of Sidney | 90 | 91 to 180 days | \$800,000 |
| Shelby | WWTP Peak Shaving Generator | This project would provide purchase and installation costs of a diesel or natural gas generator. The generator will be incorporated into the monitoring system of the WWTP to provide emergency back up power to allow continuous full treatment of wastewater. The generator will provide peak shaving capabilities to reduce energy costs, and allow participation in a demand response program. The current generator has been in service for 15 years and does not provide sufficient power to maintain operation of all of the WWTP's treatment units. The new generator will be sized to allow full treatment capacity and will protect public health during extended power outages. The peak shaving capability will allow the generator to operate at lower demand. This will reduce the peak load on the grid, reduce the need for an already stressed grid and reduce the facility's overall peak demand charges. This generator proposal will also allow the facility to participate in a demand response program. This program is intended to remove electrical load from the grid during high peak periods, which will assist the grid operator in reducing rolling blackouts/brownouts. | City of Sidney | 90 | 91 to 180 days | \$1,000,000 |
| Shelby | Biosolids Class A Storage | This project would provide for additional storage for the City of Sidney WWTP's biosolids. Evidence suggests that extended storage reduces fecal coliform concentration below the threshold for Class A biosolids. Preliminary sampling and analysis of the biosolids produced already meet the minimum oxygen concentration of less than 1 per Agram. Based on observation of other facilities that also experience re-growth of fecal coliform after centrifuge dewatering, extended storage of the biosolids causes the fecal coliform concentration to fall below the threshold of Class A biosolids. | City of Sidney | 5 | 91 to 180 days | \$200,000 |
| Shelby | remodel | My business has been hit hard by our local economy's downturn. I would like to remodel and expand my menu offerings. This is very difficult due to the many gov. regulations you need to follow. I have been in business 5 years and without some changes I may fail again in this economy. With a little help, I believe I can create some jobs and prosper again, sincerely, Bart | j.c. pizza l.l.c. | 8 | 31 to 90 days | \$50,000 |
| Shelby | Employee Retention | Last year Quality Steel Fabrication was recognized by Governor Ted Strickland and Inc. magazine as one of the fastest growing companies in the entire United States. At present plans for the company has always been expanded into operations to continually grow the company. In 2008 the projections from all of our customers looked very promising and Quality Steel decided to expand operations with a Cincinnati CL-4 plasma cutting laser and laser of a larger facility based on this information. Projections for this year are around 60% of our last year's business was last year. Showing the commitment to the employer management in 2008 did not take any pay increases. Since the economic downturn and Quality Steel's investment in our employees there will not be any raises, bonuses, profit sharing, or shareholder payments. We are very concerned that we will have to lay off employees and EOL coming into our company will greatly help us try to retain all our employees. The plant would be granted to Quality Steel directly go to pay equipment, building taxes, and payroll. The District would like to replace current heating and cooling condenser units with a geothermal system. This is allow the District to be more environmentally friendly. In addition, solar panels would be added to increase the renewal source of electric being used. These system should show the District to reduce it carbon footprint and operate more efficiently. | Quality Steel Fabrication | 20 | 0 to 30 days | \$50,000 |
| Shelby | JC- GEO/Solar | This is a residential street that does not have curb and sidewalk. This project would install curb, sidewalk and street lights for the safety of the residents who are currently walking in the street. | Jackson Center local school district | 20 | 31 to 90 days | \$1,200,000 |
| Shelby | West Street Reconstruction | We are currently struggling to stay open from month to month, and at times worry if we can make it through a given week. I have released three part-time employees and we are working with a diesel crew and my staff to cover weekend and drop into the area as a requirement of people. When we do get busy we cannot always provide the level of service to our customers as in the past as a result of this. We contribute a large amount of our dollars to the state including tobacco and alcohol and lottery tax dollars that would be missed in this county along with employment tax dollars. Everything has continued to go up in price and we have not been able to raise our prices in fear of losing our customers. We need something to help us and to update some heating and cooling condenser units with a geothermal system. This is allow the District to be more environmentally friendly. In addition, solar panels would be added to increase the renewal source of electric being used. These system should show the District to reduce it carbon footprint and operate more efficiently. | Village of Jackson Center | 5 | 91 to 180 days | \$120,000 |
| Shelby | Maintaining and Operating my business to continue | This is a residential street that does not have curb and sidewalk. This project would install curb, sidewalk and street lights for the safety of the residents who are currently walking in the street. | Lauren's In Good Taste, LLC | 8 | 0 to 30 days | \$75,000 |
| Shelby | Business Expansion Project | Acquisition of land, machinery upgrade, building expansion, update computer systems and programming. Purchase of machinery to expand product line. With the improvements listed above our business will be able to meet the needs of more customers in our state and out of state. Also with the funds provided will be able to add additional training for our employees. We are hopeful to add at least 6 employees to our business, hopefully more in the future with the expanded product line and better training. Our business is 5 years old and has been looking for an opportunity to expand our business by adding employees and adding to our product line. | T & K Laser Works Inc. | 6 | 0 to 30 days | \$250,000 |
| Shelby | Northbrooke Mobile Home Park | Replacement of wastewater collector and treatment system at Northbrooke Mobile Home Park that is outdated, inefficient to operate, has non-compliance problems, and would result in connection to municipal sewer system. | MHP Holdings - Northbrooke Mobile Home Park, Ltd. | 5 | 31 to 90 days | \$500,000 |
| Shelby | Northbrooke Mobile Home Park | Replacement of wastewater collector and treatment system at Northbrooke Mobile Home Park that is outdated, inefficient to operate, has non-compliance issues, and would result in connection to municipal sewer system. | MHP Holdings - Northbrooke Mobile Home Park, Ltd. | 5 | 31 to 90 days | \$500,000 |
| Shelby | McCartyville Water improvements | Water System Improvements to remove arsenic | McCartyville Well Association | 3 | 31 to 90 days | \$150,000 |
| Shelby | Northbrooke Mobile Home Park | Replacement of existing drinking water distribution system within Northbrooke Mobile Home Park that has elevated arsenic problem, connection to City water system, installation of master and individual water meters, installation of the protection line, and creation of water loop for water and gas protection lines. | MHP Holdings - Northbrooke Mobile Home Park, Ltd. | 5 | 31 to 90 days | \$506,750 |
| Shelby | Northbrooke Mobile Home Park | Replacement of existing drinking water distribution system within Northbrooke Mobile Home Park that has elevated arsenic problem, connection to City water system, installation of master and individual water meters, installation of the protection line, and creation of water loop for water and gas protection lines. | MHP Holdings - Northbrooke Mobile Home Park, Ltd. | 5 | 31 to 90 days | \$506,750 |
| Shelby | Anna Athletic Field Walking Path Asphalt | The Schools Baseball complex is used for the Summer Youth Program for 300 plus youth at no cost. The Track is available to the public for walking and running to improve the health of our community. The Football facility is a major community gathering area during the football season. 10 years of football and 7 years making the State Playoff has brought our small community together. The Anna Athletic Boosters was established in 1991 and has donated over 2 million dollars to build or improve the athletic facilities for the Anna Public School. With the changes in school state funding it has become more and more difficult for school to justify spending money on athletics when we are trying to keep a balance budget. | Anna High School Athletic Boosters | 5 | 31 to 90 days | \$50,000 |
| Shelby | West Lake Water Line Extension | Extend city water to West Lake Village and Lake View Village to provide city water to approximately a hundred residents. | West Lake Village Mobile Home Park | 1 | 91 to 180 days | \$101,599 |
| Shelby | Sawmill Drive Resurfacing | This project consists of resurfacing 4.13 SF of Sawmill Drive. The project will include milling 1750 SF of old road surface. | Village of Fort Lorame | 5 | 31 to 90 days | \$20,000 |
| Shelby | BMV and Nurse Charting | Implement electronic Nurse charting and Barcode scanning of medications. BMV: Project team hours (46,049). Support trip to vendor (3,000). On-site training on nursing units (11,263). Training materials supplies (11,000). purchase work stations (117,700). Additional Software Solutions (50,000). For Nurse charting Project team hours (66,616). screen testers (3,780). go live training (25,667). training facility (17,500). additional software solutions (41,400). This two part project will improve workflow in the hospital allowing us to retain quality nurses and improve patient medication safety. | Wilson Memorial Hospital | 183 | 31 to 90 days | \$368,855 |
| Shelby | Salmik Drive Reconstruction | This project consists of resurfacing 4.13 SF of Sawmill Drive. The project will include milling 1750 SF of old road surface. | Village of Fort Lorame | 5 | 31 to 90 days | \$20,000 |
| Shelby | Elm Street (St Rt 362) Street Reconstruction | 1400 LF of curb, gutter and sidewalk replacement on SR 362 (Elm Street). This will project also include 3400 LF of new storm line and 3400 LF of 12" water line replacement which will be the main outlet line from our new sewer treatment plant. 3400 LF of street resurfacing will also be part of the project. | Village of Fort Lorame | 10 | 181 days or more | \$1,500,000 |
| Shelby | Leaking Tank Carryout lot | Clean out oil from leaking fuel tank. Further plans. | Village of Botkins | 4 | 0 to 30 days | \$20,000 |
| Shelby | Burying electric lines | Bury the old dated (but in just after WWII) electric lines that run through the area of our downtown revitalization grant that will be done by 2011. Should not give by the work being done, and repair jobs by providing stable power to the industrial area of our community. | Village of Botkins | 15 | 181 days or more | \$2,000,000 |
| Shelby | New Multi-purpose Fairground | Currently the county owns 61 acres of land located immediately adjacent to I-75 and offers an ideal location for development of new multi-purpose facilities that would allow dollars to filter into the county through various activities that would take place at this location. Our current arena building houses several public service offices for the general public. The facility is very inefficient to operate and is in a need of new heating and cooling equipment. | County | 5 | 181 days or more | \$5,000,000 |
| Shelby | Administration Building | Renovate the exterior of the County Courthouse which is listed on the Historic list. Needs complete refurbishing on the outside and up-to-date energy efficient heating and cooling system. | County of Shelby | 5 | 181 days or more | \$4,500,000 |
| Shelby | Courthouse Renovation | Renovate the exterior of the County Courthouse which is listed on the Historic list. Needs complete refurbishing on the outside and up-to-date energy efficient heating and cooling system. | County of Shelby | 5 | 181 days or more | \$4,500,000 |
| Shelby | JC-laptop | The district would like to fully implement a laptop program for the students at Jackson Center. The District would like to purchase laptop computer for each student to be able to use. This grant would allow the students to take home a laptop. This would give student greater access the new and changing technology of today. This program would allow the students to have a better chance of success once they graduate from the District. | Jackson center | 0 | 0 to 30 days | \$150,000 |
| Shelby | Fairlawn-tech | The district would like to fully implement a laptop program for the students at Fairlawn. The District would like to purchase laptop computers for each student to be able to use. This grant would allow the student to take home a laptop. This would give student greater access the new and changing technology of today. This program would allow the students to have a better chance of success once they graduate from the District. | Fairlawn Local School District | 2 | 0 to 30 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Stark | Sunnyside Street / Park Lane Dr Sanitary Sewer Rep | This project replaces 1,380 linear feet of various size sanitary sewer collection lines along Sunnyside Street and Park Lane Drive in the Village of Harville. The project will also include the replacement of six associated sanitary sewer manholes. The existing vitrified clay pipe sanitary sewer line is approximately 50 years old. Excessive settlement has caused the pipe to sag and cause the existing sanitary flow to back-up on occasion. In addition, this settlement has caused the individual pipe sections to separate allowing infiltration of groundwater into the sanitary sewer system (IS). Engineering plans and specifications for this project are complete and the Village is ready to sell the project pending the receipt of Stimulus monies to pay for construction. This proposed construction project is "shovel ready". | Village of Hartsville | 12 | 31 to 90 days | \$187,500 |
| Stark | Solar panel and Wind Turbine fabrication and insta | We intend to remodel a fabrication facility in downtown Canton, OH for the purpose of fabricating solar panels and assembling wind turbines. The second phase will be to install the devices in commercial buildings and potentially incorporate other devices such as LED lighting. A licensed mechanical engineer and contract sales members of the company. The company will coordinate all of use and grant incentives for the purchasers to facilitate the sales. Many jobs will be created for production and installation. | GreenTec, LLC | 30 | 91 to 180 days | \$2,000,000 |
| Stark | Vector truck purchase | Replace existing outdated equipment. | City of Canton | 5 | 0 to 30 days | \$310,000 |
| Stark | Cleveland Ave reconstruction | Reaving ADA curb ramp/sewer reconstruction at 4th | City of Canton | 15 | 91 to 180 days | \$1,800,000 |
| Stark | Sherrick Road Stabilization | inch stabilization by HPMU injection/ ADA curb ramp/sewer resurfacing | City of Canton | 15 | 91 to 180 days | \$1,500,000 |
| Stark | US Route 30 extension | JIS 30 extension | City of Canton | 10 | 91 to 180 days | \$400,000 |
| Stark | 24th Street Reconstruction | brick street construction | City of Canton | 10 | 91 to 180 days | \$380,000 |
| Stark | Fulton/Park Drive Intersection reconstruction | Intersection reconstruction and signalization | City of Canton | 15 | 91 to 180 days | \$1,200,000 |
| Stark | 22nd Street Reconstruction | brick street construction | City of Canton | 10 | 91 to 180 days | \$380,000 |
| Stark | Judges Capital Expansion | This project proposes addressing severe space constraints and providing required improvements of the Canton Municipal Court by expanding the Probation Office and adding a jury assembly area. The current probation office was designed to accommodate 4 employees, but now accommodates 9 staff members. In addition, the probation officers have to perform urine drug screens on defendants in the public restrooms as there are no bathroom facilities in the department. The select for Ohio courts require courts to have a designated area for jurors to assemble away from parties in the case in order to maintain their impartiality. There is presently no separate jury assembly area and several cases have been overturned due to jurors being tainted by overhearing discussions related to the case. The anticipated outcome of the project will be the compliance of the Canton Municipal Court with the Rules of Superintendence for Ohio Courts promulgated by the Supreme Court of Ohio, reduced potential contamination of evidence in drug screening labs, protection of jurors, and the retention of 83 jobs. | Department of Development | 83 | 31 to 90 days | \$2,800,000 |
| Stark | Family to Family | Newly unemployed workers will receive emergency rent and/or utility assistance without the usual 3 months required to qualify. These workers will also be provided with peer advocacy and linkage to other appropriate supports and services available in the community. | FACES of Stark County, Inc. | 3 | 0 to 30 days | \$100,000 |
| Stark | Modern Tech | Replacement of 200 sets of data computers used by teachers and students. Some computer are 8 years old. The Ohio SchoolNet project stimulated teachers to start using technology in the classroom. Now teachers and students can not access or use many of the newest technologies and resources available for the enhancement of learning in the classroom due to out of date computers. New computers will continue the Ohio SchoolNet project goal of using technology in the classroom | Minerva Local School District | 0 | 31 to 90 days | \$400,000 |
| Stark | Healthcare IT Medical Records | Deploy IT solutions including electronic medical records in physician practices and hospitals. | GBS Corp. | 30-40 | 91 to 180 days | 1MM - 2MM |
| Stark | Connect the district | Install 3,000 feet of fiber to connect school building for wide area network. Our existing WAN connections can not keep up with the increased demand for access to online resources and distance learning. Having a fiber WAN will give all schools better access to online resources and distance learning. It will also help to lower support cost by allow centralized management of tech resources | Minerva Local School District | 0 | 31 to 90 days | \$300,000 |
| Stark | Modified 1 to 1 | Instead of 1 to 1 for students, this would be 1 to 1 for each classroom at the high school. It would achieve many of the goals of student 1:1 by allowing all student access to computers during class time in most all classroom during the school day. The support and maintenance cost would be lower than student 1:1 | Minerva Local School District | 0 | 31 to 90 days | \$625,000 |
| Stark | Hydrodec green refining completion | Purchase and install two (2) new hydrogen generators, replace hydrogen generator room to accommodate new generators. Install four new reactors designed to scrub sulfur from oil during reaction. Pay off final construction debt for plant. Complete PCB storage tank area in compliance with EPA regulations. | Hydrodec North America, LLC | 36 | 0 to 30 days | \$2,500,000 |
| Stark | Information Technology Infrastructure Upgrade | Conversion of college's administrative and academic IT network backbone to 10 gigabit speed to give growing numbers of students, faculty and staff adequate support. This upgrade will also accommodate future growth at the college, which is one of the fastest growing mid-sized two-year colleges in the nation. Outcomes are that the students will have the technology support necessary to learn their chosen field, so they can become productive employees within the state, since more than 90 percent of Stark State graduates stay in Ohio. In addition, the college will have the IT support needed to remain an efficient provider of education services to the northeastern Ohio community. | Stark State College of Technology | 4 | 91 to 180 days | \$250,000 |
| Stark | Disaster Recovery for IT System | Maintaining safe and secure information technology services within business, government and education entities has become a major challenge in today's world. To meet this challenge, Stark State College is developing a Disaster Preparedness and Recovery Plan for our IT infrastructure so our students, staff, faculty and administrators can continue being productive if the main computer facility were disabled. A critical component of addressing this plan will be implementing a "cold site" back-up of the College's websites, ANGEL, email and other critical IT systems. Heat Straightening Of Bridge Beams. Two Structures. | Stark State College of Technology | 8 | 91 to 180 days | \$300,000 |
| Stark | Dist 4, PID 84751, STA/SUM 62/225/76 37.88/ 59/4.9 | Safety Reconstruction, Related Safety Improvements, Including Access Management And Drainage. | Ohio Department of Transportation | 37 | 31 to 90 days | \$200,000 |
| Stark | Dist 4, PID 80686, STA SR 0172 08.83 | Safety Reconstruction, Related Safety Improvements, Including Access Management And Drainage. | Ohio Department of Transportation | 74.6 | 31 to 90 days | \$2,600,000 |
| Stark | Traffic signal LED Conversion | This project will convert the remaining 635 low watt incandescent signals to 12 watt LEDs. | City of Canton | 35 | 31 to 90 days | \$81,000 |
| Stark | Mahoning Road Corridor | The Mahoning Road Corridor will provide much needed infrastructure, utilities, street lighting, and streetscape improvements in a 3 mile suburban friendly commercial area. This project in the Northeast area of Canton will help to attract commercial investment, improve neighborhood safety, and instill community pride. | City of Canton | 350 | 91 to 180 days | \$15,000,000 |
| Stark | SR183 Union Ave. Underpass | The Norfolk and Southern RR is a low clearance bridge over SR183 in Alliance. On both sides of this bridge are the two highest cash interchanges for 2007. We are under design to lower the roadway, relocate several large utilities, install retaining walls, increase turning radii at the intersections, and upgrade signals. We are requesting the ROW acquisition portion of the design, anticipated in FY2010. This project is partially safety funded. It will benefit the residents of the City of Alliance. Roughly 12,000 (2003) vehicles travel this section of roadway daily. Trucks hit the bridge about once per month, according to DOT numbers. There is a great deal of reduction to safety losses, insurance companies and policy holders for reduction of traffic crashes at the bridge and at the intersections. The construction and operation of a waste to energy and fuel-cell production facility that will produce ten million gallons of mixed alcohol. The process will divert approximately 130,000 tons of municipal solid waste annually from local landfills. | City of Alliance | 20 | 91 to 180 days | \$152,500 |
| Stark | Green Environmental Solutions | The Johnson Ave. Project is the full depth reconstruction of 4,627 ft. of roadway and the addition of new sidewalks along the corridor in front of the new Northside Elementary School. The proposed project begins at Ely and ends north of Elmira St. The project includes improved drainage, increased turning radii at the intersections, and ADA compliant curb ramps at all corners and at the school. The project replaces failing and rutted macadam roadway that was not designed for the current bus traffic now carried. We will provide sidewalks for residents and for children to walk safely to school. The design provides improved drainage for the residents along the corridor. The increased turning radii will provide safer turning for buses, so they will no longer go over the curbs or off the road. | City of Alliance | 360 | 91 to 180 days | \$125,000,000 |
| Stark | Johnson Ave. Reconstruction | The Johnson Ave. Project is the full depth reconstruction of 4,627 ft. of roadway and the addition of new sidewalks along the corridor in front of the new Northside Elementary School. The proposed project begins at Ely and ends north of Elmira St. The project includes improved drainage, increased turning radii at the intersections, and ADA compliant curb ramps at all corners and at the school. The project replaces failing and rutted macadam roadway that was not designed for the current bus traffic now carried. We will provide sidewalks for residents and for children to walk safely to school. The design provides improved drainage for the residents along the corridor. The increased turning radii will provide safer turning for buses, so they will no longer go over the curbs or off the road. | City of Alliance | 12 | 31 to 90 days | \$1,655,400 |
| Stark | MLK Viaduct Rehabilitation | The MLK Viaduct project is a rehabilitation of a 435 foot, five span bridge over Main St., a parking lot, four railroad tracks, and an entrance to a RR. It is located in downtown Alliance. The project includes waterproofing the concrete bridge deck, placing a new asphalt wearing surface, replacing the concrete railing and safety fence, installing new lighting and erecting new Martin Luther King, Jr. tribune signage. Most items for the project are to increase safety. The project will provide newer and safer lighting for the bridge. We will replace spalling and cracked concrete railing, curbs, and sidewalks for safer pedestrian traffic. The asphalt wearing surface is broken up and needs replacement for safer vehicle traffic. Other items such as waterproofing and paint protect the structural integrity of the bridge. The bridge is one of only three crossings over or under the railroad in the City so it is vital for economic life in a main artery. | City of Alliance | 15 | 31 to 90 days | \$548,450 |
| Stark | Glamorgan St. Partial Reconstruction | The Glamorgan St. Partial Reconstruction will begin by grinding 2.5" - 3" of asphalt and concrete pavement off 1,100 feet of the existing road. We will then repair and replace broken up concrete base, repair joints, and place Type III membrane over the concrete joints to reduce reflective cracking. We will then place 2" of intermediate course asphalt and 1" of asphalt surface course to rebuild the roadway. The project repairs and rebuilds a substandard, broken up arterial roadway in the City in front of our Alliance High School. The roadway received a failing score of 69 for its pavement condition rating by CDOT two years ago. The partial reconstruction will break a cycle of frequent overlays. The project is a new traffic signal installation on State St. The project includes new signal heads, signal controller, vehicle detectors, the reconstruction of a plaza entrance, and ADA pedestrian crosswalks. The project is planned for design and installation in 2009. We wish to increase safety and reduce wait time for motorists by installing this busy five lane section of State St. (US62). This will also provide left turn phases for traffic turning into College Plaza or Brayton Ave. | City of Alliance | 9 | 31 to 90 days | \$80,300 |
| Stark | US62/ Brayton Ave. Traffic Signal | The project is a new traffic signal installation on State St. The project includes new signal heads, signal controller, vehicle detectors, the reconstruction of a plaza entrance, and ADA pedestrian crosswalks. The project is planned for design and installation in 2009. We wish to increase safety and reduce wait time for motorists by installing this busy five lane section of State St. (US62). This will also provide left turn phases for traffic turning into College Plaza or Brayton Ave. | City of Alliance | 4 | 91 to 180 days | \$126,000 |
| Stark | Dist 4, PID 82922, STA US 0030 21.55 | Resurfacing - 2 lane | Ohio Department of Transportation | 86.1 | 31 to 90 days | \$3,000,000 |
| Stark | Federal Ave. Reconstruction | The Federal Ave. Reconstruction will be a full depth replacement of a failing concrete street with a new asphalt street. The project is 1,700 feet of roadway replacement with new curbs, sidewalks, drainage ditches, drive aprons, and ADA curb ramps. The project includes a substandard, broken up roadway in the City. The roadway received a failing 69 grade for its pavement condition rating by CDOT, 2 years ago. The reconstruction will increase a heavily used and broken down street. | City of Alliance | 9 | 181 days or more | \$920,000 |
| Stark | HIGH MILL / LAFAYETTE INTERSECTION IMPROVEMENT | THE EXISTING INTERSECTION HAS A HIGH ACCIDENT RATING DUE TO SIGHT DISTANCE AND STOPPING SIGHT DISTANCE. THE NEW CONSTRUCTION WILL SOLVE BOTH PROBLEMS AND MAKE IT MUCH SAFER. THIS PROJECT CONSISTS OF NEW ALIGNMENT AND PROFILE WITH NEW CURB AND PAVEMENT RECONSTRUCTION. IDENTIFIED SIGHT DISTANCE DEFICIENCIES AND CRASH PATTERNS INDICATE REDUCTION OF THE GREST VERTICAL CURVES TO IMPROVE THE INTERSECTION CROSS CORNER SIGHT DISTANCE VIEW EAST IN ADDITION TO IMPROVING THE STOPPING SIGHT DISTANCE FOR SOUTHBOUND VEHICLES. | JACKSON TOWNSHIP | 30 | 91 to 180 days | \$694,000 |
| Stark | South Rockhill Ave. Reconstruction | The S. Rockhill Ave. Reconstruction will be a full depth replacement of a failing concrete street. The project is 1,250 feet of roadway replacement with new curbs, sidewalks, drainage ditches, drive aprons, and ADA curb ramps. The project is located behind the Parkway Elementary School where buses and parents drop kids off. The project replaces a substandard, broken up roadway in the City. CDOT rated the roadway a failing 68 for its pavement condition rating, 2 years ago. | City of Alliance | 8 | 181 days or more | \$575,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-----------------------------------|----------------|--------------------|---------------------------|
| Stark | Beech St. Watermain Extention | The Beech St. Water Main Extension, Ph I & II are 8,350 linear feet of 12" water main, 15 valves and 11 hydrant assemblies. The project connects three dead end mains of the city's water infrastructure together, providing a "looped" water system. The proposed main begins on Beach St. east of Beechwood Ave. and runs west to be into the Washington Mills residential development on Davidson. It will also run up Beechwood Ave. where it will tie into our system at Eastmore St. (Phase I was Beech St. from Ridgely to Beechwood, completed in 2008). The project provides a water system that feeds from multiple directions, or loops. This equalizes water pressures, provides safer more reliable fire protection, increases water flow rates, and extends our service area. Residents of both Alliance and Washington Township will benefit with access to water and with increased safety. Homeowner's insurance rates will decrease. The drainage of water into an area typically causes development. | City of Alliance | 4 | 31 to 90 days | \$350,700 |
| Stark | Dist 4, PID 80686, STA SR 0172 08.83 | Safety Reconstruction, Related Safety Improvements, Including Access Management And Drainage. | Ohio Department of Transportation | 74.6 | 31 to 90 days | \$2,600,000 |
| Stark | Dist 4, PID 77863, STA SR 0800 00.00 | Resurfacing Culvert Repair To Sln 766729. | Ohio Department of Transportation | 39.6 | 31 to 90 days | \$1,380,000 |
| Stark | Dist 4, PID 84735, STA IR 0077 08.40 | Rehabilitation Of 10 Machine Structures To Pave The Roadway Between The Structures. | Ohio Department of Transportation | 172.2 | 31 to 90 days | \$6,000,000 |
| Stark | Dist 4, PID 84751, STA/SUM 62/225/76 37.88/ 59/4.9 | Heat Straightening Of Bridge Beams, Two Structures. | Ohio Department of Transportation | 37 | 31 to 90 days | \$200,000 |
| Stark | Dist 4, PID 82750, STA IR 0077 02.57 Slide | Slide repair | Ohio Department of Transportation | 12 | 31 to 90 days | \$300,000 |
| Stark | Jackson Branch Library | This construction project would repair, improve, and enlarge the Jackson Branch of the Stark County District Library. This branch is heavily used, as evidenced by its having 400,000 items last year. To better assist the public, with education and information services, this branch needs to be physically improved, with 3,700 sq. ft. added. There are three parts of the construction plans. The design plans have already been done, and we are ready to get started. With its state revenues going down, the library cannot pay for this project. Advantages inherent in this infrastructure project are that the library serves a large number of people, it is a public facility, and the results will be of enduring value for decades into the future. | Stark County District Library | 140 | 0 to 30 days | \$2,800,000 |
| Stark | Alden and Norman Ave. Sanitary Sewer Extension | Installation of 380 feet of 12-inch sanitary sewer divided evenly on Alden Avenue and Norman Avenue. This portion of the project will be a work force account project by the City of Alliance within the Alliance sanitary sewer service area. Engineering and the balance of the project construction will be the responsibility of Mahoning County and upon completion will become part of the Alliance sanitary sewer system and operated by the City of Alliance. This area is under an EPA mandate due to the existence of standing sewage and leaching into water wells. Our goal is to provide sanitary sewer service to an area where septic systems have failed and there is standing sewage and leaching into water wells. | City of Alliance | 4 | 91 to 180 days | \$40,000 |
| Stark | Wastewater Treatment Plant Clarifier Rehabilitation | Rehabilitation of an 842,000 gallon primary clarifier, a 571,000 secondary clarifier and a 147,000 gallon gravity thickener clarifier at the wastewater treatment plant. The project provides for sandblasting and painting mechanisms, resurfacing of the minor tank walls, replacing scum troughs and FRP center wells, and concrete patch and repair. Two additional pairs of primary and secondary clarifiers were rehabilitated in prior years under Phase I and II. Our goal is to extend the useful life of the clarifiers for a minimum of 20 years in the most economical way possible for the benefit of the users of the City's sanitary sewer system. | City of Alliance | 4 | 31 to 90 days | \$174,195 |
| Stark | Sidewalk Construction Project - Alliance City Scho | Installation of 1.7 miles of sidewalks to improve the safety of students walking to nearby constructed schools. The City of Alliance currently has 10 schools are elementary schools and one is a middle school. The recent construction of new schools in the City of Alliance did not include construction of sidewalks in nearby areas where students walk to school and there are no sidewalks. The schools' properties have large lots, but areas leading to the schools do not. This project would allow for the construction of sidewalks leading to school property and improve the safety of students. | City of Alliance | 4 | 91 to 180 days | \$202,750 |
| Stark | Various Street Improvements | Rehabilitation of various deteriorated Roadways within the City Of Massillon. Major project components shall consist of pavement planning and resurfacing, drainage and sanitary structure rehabilitation, ADA compliant curb ramps and pavement markings. | City of Massillon | 15 | 31 to 90 days | \$3,000,000 |
| Stark | Main Avenue West Improvement Project | Rehabilitation of the deteriorated Roadway. Major project components shall consist of pavement planning and resurfacing, drainage and sanitary structure rehabilitation, ADA compliant curb ramps, pavement markings, and updating traffic control devices. | City of Massillon | 15 | 31 to 90 days | \$490,000 |
| Stark | Tremont Avenue SW Improvement Project | Rehabilitation of the deteriorated Roadway. Major project components shall consist of pavement planning and resurfacing, drainage and sanitary structure rehabilitation, ADA compliant curb ramps, pavement markings, and updating traffic control devices. | City of Massillon | 15 | 31 to 90 days | \$740,000 |
| Stark | Center for Business & Entrepreneurship | The Center will provide 37,729 sq. ft. of instructional, administrative, and incubator office space. New construction accounts for 25,228 sq. ft. of the proposed space, while 12,500 sq. ft. represents renovated space in the existing Business Technology Building. The new Center will house: <ul style="list-style-type: none"> 14 classrooms 6 incubator company offices 1 large conference space (40 people) 1 small conference space (8 people) 1 Financial Service Resource Lab 1 Study/Research Area 2 Computer Labs 1 Carpentry/Dimension Lab 1 Texting/Tutoring Lab 1 Faculty/Administrative offices Key impacts of the proposed Center include: <ul style="list-style-type: none"> Ongoing educational and development offerings for regional businesses Four emerging entrepreneurs per year utilizing the incubator facilities Cross collaborative activities for students, local businesses and emerging entrepreneurs Creation of new businesses in Ohio Retention of small businesses in NE Ohio The Center will benefit Ohio by investing in innovative market development aimed at supporting and engaging up-and-coming businesses, industry, and related supply chain models, to promote economic development in the State. | Stark State College of Technology | 470 | 91 to 180 days | \$4,500,000 |
| Stark | Center for Student Access and Success | 102,500 sq. ft. of student support and administrative space dedicated to fostering student success and retention in Ohio's post-secondary education system. New construction accounts for 54,495 sq. ft. of the proposed space, while 47,950 sq. ft. represents renovated space in the existing Student Services Building. The Center will house key student service and access offices such as Admissions, Financial Aid, Registration, Disability Support Services, and Student Life. Additionally, the center will house the administrative and logistical support offices of the college. Lastly, the Center will provide study areas, one reading lab, one math lab, one computer lab, and a digital library to enhance student opportunities for academic success. | Stark State College of Technology | 925 | 91 to 180 days | \$9,925,000 |
| Stark | Dist 4, PID 80686, STA SR 0172 08.83 | The anticipated impact of the project is an increase in student success and retention rates - a common dilemma in the two-year post-secondary model. The overall goals of the project are to centralize student support services and create a "one-stop" shopping location where our growing student population can receive academic, financial, and social support (10% growth per academic year since 2003) to promote success in post-se | Ohio Department of Transportation | 74.6 | 31 to 90 days | \$2,600,000 |
| Stark | Science Laboratory Expansion and Renovation | This Phase 2 project will consist of approximately 38,000 sq. ft. of expanded science laboratory and classroom space to support the college's growing health technologies programs and support the Ohio's effort to respond to the anticipated shortfall of nearly 32,000 healthcare workers by 2020 (19% shortage forecasted by HERSA). The renovated space will provide new classrooms and ten science labs as listed below: <ul style="list-style-type: none"> 4 health classrooms 1 dental classroom 2 chemistry labs 2 microbiology labs 1 biology lab 1 occupational therapy lab 1 anatomy and physiology lab 1 dental simulation lab 1 environmental sciences / human biology lab 1 computational science lab The anticipated impact of the new Center is an increase in the number of students able to access health programs/reduction in students waiting for open spaces in health programs, and increased capacity for training of healthcare professionals in NE Ohio. Through this project, Stark State will respond to healthcare employment needs and shortages now and in the future. | Stark State College of Technology | 367 | 91 to 180 days | \$1,830,000 |
| Stark | Tremont Avenue SE Improvement Project | Rehabilitation of the deteriorated Roadway. Major project components shall consist of pavement planning and resurfacing, drainage and sanitary structure rehabilitation, ADA compliant curb ramps, pavement markings, and updating traffic control devices. | City of Massillon | 15 | 31 to 90 days | \$515,000 |
| Stark | Catch Basin Improvement Project | Rehabilitation of deteriorated catch basins at various locations throughout the City. Major project components shall consist of the basin walls utilizing the existing basin bottom with a precast structure, and new grates and castings. | City of Massillon | 5 | 31 to 90 days | \$145,000 |
| Stark | Lincoln Way East/Wales Road Intersection Improve | Rehabilitation of the deteriorated Roadway and Traffic Control Devices. Major project components shall consist of full depth pavement replacement, drainage and sanitary structure rehabilitation, ADA compliant curb ramps, pavement markings, and updating traffic control devices. | City of Massillon | 15 | 91 to 180 days | \$380,000 |
| Stark | Municipal Parking Lot Reconstruction Project | Reconstruction of existing deteriorated municipal parking lot. Major project components shall consist full depth pavement repair, pavement resurfacing, and pavement markings. | City of Massillon | 10 | 31 to 90 days | \$201,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Stark | Street Monumentation Project | Establishing a camera/traffic control system throughout the City. | City of Massillon | 8 | 31 to 90 days | \$200,000 |
| Stark | Noble Place Sanitary Sewer Improvement | Major project components consist of replacement of 1100 LF of existing 8" sanitary sewer and manholes, full depth pavement repair, and new concrete curbing. | City of Massillon | 10 | 31 to 90 days | \$650,000 |
| Stark | NecCom Sanitary Sewer Interceptor Project | Major Project components shall consist of installation of 1710 LF of 16" sanitary sewer including manholes to provide sanitary services to an existing industrial park. This extension will serve proposed industrial users with projected job creation of 600 jobs. | City of Massillon | 10 | 31 to 90 days | \$195,000 |
| Stark | WWTP Clarifier Rehabilitation - Phase III | Replace one Primary & one Secondary Clarifier & gravity thickener. | City of Alliance | 4 | 91 to 180 days | \$181,305 |
| Stark | WWTP Bar Screen Replacement Project | Replacement of the existing Bar Screens at the City of Massillon Regional WWTP. The bar screens were originally installed in 1974 and are designed to treat 31.5 MGD of wastewater. Problems have become more prevalent with being able to replace parts due to the age of the screens. | City of Massillon | 50 | 91 to 180 days | \$895,000 |
| Stark | Nova Pump Station Replacement Project | Major Project components include the replacement of an existing deteriorated pump station with a new pump station including a natural gas back up generator and telemetry system to the pump station or existing industrial park within the City of Massillon which employs approximately 300 employees. | City of Massillon | 10 | 31 to 90 days | \$245,000 |
| Stark | State Avenue Sanitary Sewer Replacement Project | Major Project components consist of replacement of 2059 LF of existing deteriorated 8" sanitary sewer, manholes and reconstruction of existing streets, full depth pavement repair, and roadway resurfacing. | City of Massillon | 20 | 91 to 180 days | \$750,000 |
| Stark | 7th Street SW Sanitary Sewer Project | Major Project components consist of replacement of 1865 LF of existing deteriorated 8" sanitary sewer, manholes and reconstruction of existing streets, full depth pavement repair, and roadway resurfacing. | City of Massillon | 15 | 91 to 180 days | \$400,000 |
| Stark | WWTP Improvements | Major project components will consist of adding the necessary infrastructure to accommodate increased BOD loadings from existing and proposed industrial users of the City of Massillon Regional WWTP. The number of jobs that the industrial users have in the City is approximately 2000 employees. | City of Massillon | 75 | 91 to 180 days | \$10,000,000 |
| Stark | Genshaft Park Relocation Project | Major Project components consist of the relocations of 4 softball fields, concession building, parking lot, and the extension of sanitary sewer and water lines. | City of Massillon | 50 | 91 to 180 days | \$1,200,000 |
| Stark | Dist 4, PID 82922, STA US 0030 21.55 | Resurfacing - 2 lane | Ohio Department of Transportation | 86.1 | 31 to 90 days | \$3,000,000 |
| Stark | Marshallville Street Sanitary sewer | Project will include 4725 linear feet of new sanitary sewer to serve unsewered homes, two planned businesses, and promote economic development of a key corridor adjacent to SR 21. | City of Canal Fulton | 100 | 31 to 90 days | \$503,213 |
| Stark | Locust Street Water and Sewer Lines Extension | Project will include 1,088 linear feet of new sanitary sewer and 1,108 linear feet of waterline to serve planned businesses and healthcare facilities east gateway to City. | City of Canal Fulton | 100 | 31 to 90 days | \$447,720 |
| Stark | Milan Street Waterline Replacement | Project will replace inadequate 6" diameter waterline with 12" diameter waterline to strengthen vital interconnection between City's two elevated water storage tanks. | City of Canal Fulton | 15 | 91 to 180 days | \$259,200 |
| Stark | High Street/Erie Avenue Culvert Replacement and WI | Replacement of undamaged floodproof culvert and resurfacing and widening of 1.8 miles of roadway. The frequent flooding has a major impact on the health and safety of its 1,860 users per day and the 2,000 students and staff at the Northwest Local Schools campus. When this roadway floods, the City's safety forces are forced to travel an additional ten miles to reach the west side of the City which results in an additional response time of 13-14 minutes. Traffic congestion at the northwest schools campus whiles travel time and emergency vehicles travel time. | City of Canal Fulton | 50 | 31 to 90 days | \$1,174,340 |
| Stark | Locust Street Paving Replacement | Replacement and resurfacing of pavement which has reached its useful life along the 3.3 mile length of the Locust Street business corridor. | City of Canal Fulton | 150 | 91 to 180 days | \$897,200 |
| Stark | Dist 4, PID 82922, STA US 0030 21.55 | Resurfacing - 2 lane | Ohio Department of Transportation | 86.1 | 31 to 90 days | \$3,000,000 |
| Stark | Dist 4, PID 77858, STA US 0062 04.04 | Resurfacing | Ohio Department of Transportation | 76.1 | 31 to 90 days | \$2,650,000 |
| Stark | Solar Black Chrome Coating | The goal of this project is to re-market a value added coating for the Solar Industry called Solar Black Chrome Coating. This is a key test facility for coating that provided excellent results for the Solar industry during the early 1970s through the early 1990s. The Solar industry manufacturers either went out of business or products shifted. China took over the Solar industry as a whole has been in decline. Our coating is a high quality coating that produces results of 95% absorption and less than 10% emissivity where paints is now near 80% emissivity. With this project to re-introduce our product of Solar Black Chrome to the world. Being able to stay in business as well as create jobs for the future. With the heavy push for Solar energy this project will benefit our growth. This is still a value added process some 30 yrs later and is still better than many other coatings being used today. The coating will help put Canton, Ohio on the World Map for Solar Energy. If further info is needed please contact me. I want to continue a high school diploma while learning marketable skills in the construction field. We have the experience to complete such a project. | Olymco, Inc. | 10 | 0 to 30 days | \$100,000 |
| Stark | Project RENEW | Project REBUILD will purchase and demolish a four story brick apartment building constructed in 1919 that now has a history of illegal activity and has been abandoned. The site will be prepared to build four single family, one-story homes that will be fully ADA compliant for special needs accessibility and will be built using GreenBuild practices and technology. The expected outcomes include: 1) Attain a minimum GOLD L.E.E.D certification on all four housing units by utilizing GreenBuild techniques, Energy Star appliances/HVAC systems and renewable energy enhancing systems. 2) Qualify four families who are low to moderate income eligible and where one or more family member requires special needs adaptable housing access. 3) Employ a minimum of 12 students to build the four housing units. 4) Employ 8 additional individuals during demolition and site preparation phases of the project be open for working parents/families (8am to 6pm). The center will meet the educational as well as social/emotional needs of the children it serves. The Early Childhood Education Alliance, Inc. and the Stark County Community Action Agency (Head Start) have had discussions to work collaboratively within the designated location. The center will also collaborate with Alliance City Schools to provide a smooth transition into school. Furthermore, the center will work closely with Mount Union College to provide authentic learning opportunities for the Early Childhood Education majors. Finally, the center will work with the City of Alliance and the local business leaders. Together, we can increase awareness to the direct correlation of quality early experiences to quality employees. | Project REBUILD Inc. | 20 | 91 to 180 days | \$770,000 |
| Stark | Community Child Development Center | The Early Childhood Education Alliance, Inc. and the Stark County Community Action Agency (Head Start) have had discussions to work collaboratively within the designated location. The center will also collaborate with Alliance City Schools to provide a smooth transition into school. Furthermore, the center will work closely with Mount Union College to provide authentic learning opportunities for the Early Childhood Education majors. Finally, the center will work with the City of Alliance and the local business leaders. Together, we can increase awareness to the direct correlation of quality early experiences to quality employees. | Early Childhood Education Alliance, Inc. | 48 | 91 to 180 days | \$1,804,425 |
| Stark | Project GreenBuild School-Greenbuilding Training F | This project is truly a COMMUNITY project. The Community Child Development Center will create 48 new jobs in the Greater Alliance Community. Project REBUILD Community High School (PRCHS) is a non-profit community high school located in Canton Ohio. We provide academic instruction as well as construction training to students through both classroom and on-site training building or rehabilitating affordable housing in neighborhoods of Stark County. PRCHS allows the DOE approved National Center for Construction Education and Research (NCCER) curriculum and each student receives a nationally recognized NCCER certificate upon completion of the program. Project REBUILD would like to build new facility to house our growing greenbuilding training initiative, which includes on-site training techniques, from paneled walls to solar panel installation. The high school would be built BY students FOR students, employ a variety of professional subcontractors (plumbing, HVAC, electrical) and help the graduates of Project REBUILD gain employment in a growing greenbuilding environment. Currently, Community Schools are ineligible to receive state funding for and struggle to maintain decent facilities for a growing number of students choosing community schools. PRCHS is poised & ready to build a green school. | Project REBUILD Community High School | 100 | 91 to 180 days | \$2,000,000 |
| Stark | Create new jobs in ohio | We are a new aluminum extrusion company located in Canton Ohio with our goal in the next year to create at least 75 new jobs. I need additional funding to install a high pressure gas line and mixing system to run our processing equipment at full capacity. We also need it to purchase raw material to keep up with our customer growth. We all know Ohio really hasn't been hit with job creation with this funding but start to help with things around I have put my life in to this business to keep our jobs in the USA and will do what ever needs to be done to make it happen. I would deeply appreciate anything you can do for our business. | S&K Extrusions / Manufacturing | 75 | 0 to 30 days | \$150,000 |
| Stark | Arts-Education program distribution infrastructure | OUTCOME: A comprehensive multi-disciplinary distribution system for school site-based arts education programs in Stark County and surrounding area public schools. DESCRIPTION: High quality on-site programming, designed to support the Ohio Academic Content Standards in the arts and other academic disciplines - is able to augment or replace the more costly arts programs that have been cut from most school budgets. Such programs carry a per-child cost that is affordable within even the most diminished school budgets, and are an invaluable once-in-lifetime (Unfortunately, Stark County has no functional administrative distribution system for the large scale delivery of these programs, even though many arts organizations in the county are equipped to provide them. As the largest provider of arts education services in the area, the Canton Symphony will take the lead in establishing a free-standing administrative entity able to serve all area schools and arts disciplines. If administrative positions will be created, as well as dozens of sustainable part-time employment opportunities for area artists. | Canton Symphony Orchestra | 31 | 31 to 90 days | \$85,000 |
| Stark | Stark County MRDD-6 | Stark MRDD is looking to replace old, damaged and stained carpet in six of our school classrooms and add carpet to two classrooms that never had carpet. These classrooms are used by students that are disabled and spend a fair amount of time working activities on the floor. I would like to start a program to assist those who are addicted to substances and have health issues. I am a recovering Alcoholic and would like to educate others and help them get through tough times. | Stark County Board of Mental Retardation and Devel | 2 | 91 to 180 days | \$15,000 |
| Stark | New start | The movies would be used to create new security systems and safe environments for our two schools that serve children with disabilities. Upgrade and replace components of a 40 year old security system at our four Adult Workshops and Transportation Building. Components such as complete system wiring, control panel, video cameras, motion sensors, hot beams, computer recording, new secured video entries and keypad entry locks would be installed. | New Start | 5 | 91 to 180 days | \$300,000 |
| Stark | Stark County MRDD | The system will service in excess of 300 families presently and be able to serve more in the future as the community grows. Also some additional new piping will be needed to keep the system properly. | Stark County Board of Mental Retardation and Devel | 4 | 31 to 90 days | \$500,000 |
| Stark | Runaway's Safe Haven | Acquiring homes in the Stark County area to be used as safe houses for at risk youth runaways that are looking to get off the street. While being housed they will be given emotional and mental health by qualified counselors in each facility. They will be sent to school closely with the court system, other government agencies, schools and families. This will require hiring employees to cover each shift to watch over juveniles, filing court, house rehab, counseling, coordination and bookkeeping, along with a director and supervisor. I will recruit the director. We will need to purchase furniture, books, office equipment, which will boost the economy by the purchases and including a temporary transport van. | Runaway's Safe Haven | 30 | 91 to 180 days | \$840,000 |
| Stark | new water system | Modernize the present water system, encompassing a new wellfield, new water treatment plant and a new 200,000 gallon water tower. The system will service in excess of 300 families presently and be able to serve more in the future as the community grows. Also some additional new piping will be needed to keep the system properly. | village of east sparta | 2 | 181 days or more | \$3,000,000 |
| Stark | Stark County MRDD | This project would expand the current parking lot to add a new bus pick up and drop off location for the adults with disabilities that attend our adult day habilitation center. The project would also increase parking by 25 and would also allow us to park buses at the site to conserve our ever growing fuel costs. | Stark County Board of Mental Retardation and Devel | 10 | 91 to 180 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Stark | Save jobs | Purified storm in the economy (oil based plastics packaging business) forced our 23 year old company to abandon its \$25 million expansion. The new business has always been strong. The divestiture of the newly expanded equipment and building is from River Basin Recovery (RBR) Ohio. The need help to INSURE River Bank does not liquidate the WYHCOE business after selling off these assets which will cause the loss of 65-70 jobs. The expected losses in the capital stock structure must be written off causing a TEMPORARY balance sheet problem. (Direct to us to pay equity). This can be over come in its life time to two years, but the bank has the "right" to liquidate us if that liquidation value comes close to what the work-out loss to them. They want cash about the jobs loss or our continuation if a scenario where they necessary the same amount in what eventually. We need help to make insure they don't arbitrarily chose liquidation. Again, the "business behind business" is a 23 year old marvelous success story that will continue to grow, add jobs and once again be paying close \$2 million in taxes per year along with employing benefits of 100 over the next 5-6 years. PLEASE HELP! | Polymer Packaging, Inc. | 65 | 91 to 180 days | \$3,000,000 |
| Stark | Stark County MRDD | Project monies would be used to make our buildings more energy efficient by replacing less efficient, damaged windows and doors with new efficient ones. We are planning on replacing approx. 35 windows or doors. | Stark County Board of Mental Retardation and Devel | 2 | 31 to 90 days | \$40,000 |
| Stark | Stark County MRDD-4 | The monies would be used to build a permanent pavilion in our school playground. Our school educates students with disabilities and there is a need for a pavilion to protect the children from the sun when experiencing outdoor time. Approx. size of pavilion would be 24' x 24' | Stark County Board of Mental Retardation and Devel | 5 | 91 to 180 days | \$12,000 |
| Stark | Cline and Canal Streets Storm Sewer Project | This project would construct storm sewers in an area of the Village that has no storm sewers at the present time. There is no room for the water to go and toward the side of the street causing the street to overflow. The storm sewer would help to relieve surface flooding in the portion of the Village. The Village does have the funds to do the project. | Village of Magnolia | 12 | 91 to 180 days | \$300,000 |
| Stark | Stark MRDD-5 | Project would involve Stark County MRDD replacing approximately five HVAC units that are older than ten years and have a history of continuous repair. Stark MRDD is working towards the outcome of having all its buildings energy efficient. | Stark County Board of Mental Retardation and Devel | 3 | 91 to 180 days | \$50,000 |
| Stark | West Main Street Water Tower Rehabilitation | Inspection and painting (interior and exterior) of water tower | City of Louisville | 0 | 31 to 90 days | \$360,000 |
| Stark | Ohio, Indiana & Pennsylvania Underground Utilities | Replace existing 8" and 6" CDPW water main with 8" CDPW, replace existing 8" VCP sanitary sewer with 8" PVC and replace or install 12" PVC storm sewers. | City of Louisville | 0 | 181 days or more | \$2,469,000 |
| Stark | Beck Road Commerce Center | Install street, install bridge, install water line, storm water management system for industrial park on existing 250 acre parcel | City of Louisville | 100 | 181 days or more | \$6,366,390 |
| Stark | Saw Blade Manufacturing Advancement | Install manufacturing capability required to handle steel manufactured in the USA. Current capability requires steel bodies used for industrial circular saw blades to be purchased from Europe or China as heat treating process capability does not exist in the USA. Heat treating capability is for industrial saw blades up to 84" diameter. Current customer portfolio includes U.S. Steel, Timken, Evraz Roddy Mountain Steel, Republic Steel, Steel Dynamics, Steeltek and numerous tier two suppliers, including Steel Distribution Centers. Three tier benefits: add 8 jobs associated with new process capability, add 77 jobs associated with additional volume created by new process step, displace European and Chinese suppliers with domestic suppliers and in turn become a fully integrated domestic supplier for infrastructure build-out. | Heinemann Saw Company | 25 | 0 to 30 days | \$750,000 |
| Stark | New Building for the Early Childhood Resource Cent | The mission of the Early Childhood Resource Center (ECRC) is to improve the quality of early education and care in Stark County through comprehensive professional development, resources, and support services for individuals working in all early childhood settings. The ECRC is expanding Federal Stimulus monies to purchase and renovate a building that can house the programs and services currently provided at our center. While the current space was appropriate for the establishment of the center, expansion of programs and services have forced us to reconsider our needs for the future. | Early Childhood Resource Center | 50 | 31 to 90 days | \$300,000 |
| Stark | The Community Campus at Goodwill | Goodwill Industries of Greater Cleveland and East Central Ohio, Inc. believes in building community through collaboration. A belief that has led to the creation of the Community Campus at Goodwill. The Community Campus is both a place and a concept based on the philosophy of collaboration. The Campus, located at Goodwill's Corporate Office on Main St. 891 in Canton, currently houses seven community organizations including Goodwill. Each organization has a different mission and a different purpose, but many of us share the same goal: to help individuals who are identified human service workers to find a place where they can thrive. The Community Campus at Goodwill is a place where individuals can obtain help from various organizations in one location. The Campus is being established to help positively impact the lives, while providing and efficiently using existing community resources. Goodwill will provide the physical space and the necessary support services. The transformation of vacant space into offices will allow other non-profits to live in the facility at a reduced cost, and will give them access to back room services. | Goodwill Industries of Greater Cleveland and East | 500 | 31 to 90 days | \$200,000 |
| Stark | 21st Century Learning Initiative | Establish 21st Century Learning Centers in each of Ohio's 88 counties, train staff, recruit students and improve teaching. This is a curriculum that teaches 21st century skills. This model applies to all ages of students in Ohio. | StrategyONE, Inc | 880 | 0 to 30 days | \$5,000,000 |
| Stark | Ohio Chautauqua | 5 day educational event with school/universities from across the nation. Each will present a historical presentation and give the background, the significance of the contribution to society and what obstacles needed to be overcome by each of the presenters. The Ohio Chautauqua is a historical site. The historical figures are George Washington Carver, Alexander Graham Bell, Mary McLeod Bethune, Andrew Carnegie, and Thomas A. Edison. Each will be presented one per night, on successive nights. This will be open to the public. Questions will be encouraged by the audience. The following day we will have staff and workers available to further educate, discuss and discover the significance of each of these historically significant individuals. The County Library system will have reading material available for further study by anyone who is so inclined. | Stark County Bicentennial Commission | 1 | 0 to 30 days | \$35,000 |
| Stark | Lindford Avenue NE Storm Sewer Project | This storm sewer installation project will consist of the installation of various sized storm sewer conduit, catch basins, manholes, and roadway manholes sufficient to replace existing lines. The project will include 2,250 linear feet of roadway reconstruction of Lindford Avenue NE, 6" to 18" diameter full depth asphalt pavement, 24" to 36" concrete curb and gutter, 3,525 LF of various size storm sewer conduit, and all drainage structures. Project limits are the proposed storm sewer main to the Middle Branch of the Nemahitic Creek to just north of 49th Street NE. The proposed improvements will replace the structurally deficient pavement and will allow for sufficient roadway drainage. Currently after rainfall events, standing water is observed along the edge of the roadway at various locations. Construction of the proposed storm sewer system including concrete curb and gutter and a sufficient catch basin to the Middle Branch of the Nemahitic Creek will alleviate the current drainage issues. To date, the Plain Township Board of Trustees have completed the project's preliminary engineering design, including a plan and elevation report, some concrete, rock and curb materials, and reconstruction of the pavement at two intersections. Location is North and South Main Street from Rose Lane to 7th Street. Project length is approximately 6,000 ft. The typical width is 40 ft. (including curb and gutter) plus some areas some intersections. | Plain Township Board of Trustees | 20 | 181 days or more | \$1,065,000 |
| Stark | Main Street Resurfacing | SARTA - 15 - 30 Hybrid Diesel/Electric buses | City of North Canton, Ohio | 10 | 91 to 180 days | \$1,200,000 |
| Stark | Dist 4, PID 85554, SARTA - 15 - 30' Hybrid Buses | SARTA - 23 - 30 Paratransit Hybrid Diesel/Electric buses | Ohio Department of Transportation | 145 | 31 to 90 days | \$8,673,000 |
| Stark | Dist 4, PID 85555, SARTA - 23 <30 Paratransit bus | Widen existing County Highway from 2 to 4 lanes for 2.25 miles. | Ohio Department of Transportation | 111 | 31 to 90 days | \$6,670,000 |
| Stark | Hills and Dales Rd. Widening Phase 2 | A new 15' and 20' waterline to transport water from North Canton's Well #10 (which is currently under development) to the raw water piping system that flows to the North Canton Drinking Water Plant (CWP). The completion of Well #10 and this raw waterline will enhance the water supply system for the service area. The length of the project is approximately 6,000 feet and is currently under design. | Stark County Engineer | 40 | 0 to 30 days | \$7,400,000 |
| Stark | Well #10 Raw Waterline | A new 12" water transmission main to complete a gap in a loop in the water transmission system. This will provide for redundancy and improve reliability, flow, and pressures to the portion of the water system servicing an area which includes industrial, commercial and residential consumers. The length of this project is approximately 4,400 linear feet. | City of North Canton, Ohio | 20 | 31 to 90 days | \$1,400,000 |
| Stark | Mount Pleasant Waterline - Phase II | SARTA - Transit Center | Ohio Department of Transportation | 15 | 91 to 180 days | \$615,000 |
| Stark | Dist 4, PID 85556, SARTA - Transit Center | SARTA - Bus Lanes | Ohio Department of Transportation | 71 | 91 to 180 days | \$3,530,000 |
| Stark | Dist 4, PID 85559, SARTA - Bus Lanes | A new 12" water transmission main to complete a gap in a loop in the water transmission system. This will provide for redundancy and improve reliability, flow, and pressure to the portion of the water system servicing the Akron-Canton Airport area. This area includes industrial, commercial and residential consumers. The length of this project is approximately 3,700 linear feet. | Ohio Department of Transportation | 16 | 31 to 90 days | \$805,000 |
| Stark | Frank/Applegrove Waterline | Our current business due to the local economies of the past summer of 2008 and more in regards to the automotive industry that we have been servicing for over 30 years now, we need to help us to help pay for the bills that we are getting from the local area Dealers and Trucking Companies so we are requesting that you help with the purchase of outfitting 2 new or newer box trucks fully equip with hot pressure washers and all tools, materials and equipment necessary to operate our services on a day to day basis. | City of North Canton, Ohio | 15 | 91 to 180 days | \$525,000 |
| Stark | Washtek Rebuild | Other equipment like a waste water recovery system, reverse osmosis machine will be an advantage to the state on environmental efforts and to create jobs and protect jobs in our company serving jobs like the United States Post Office for example, which is a contract for work that we would like to seek if we can get back into business. A working capital for the first year would help out with cost of employee pay and benefits but repair and equipment replacement tools/parts, materials, etc. We anticipate about \$200K to begin the first year. renovating buildings, homes, moving residential, weather stripping, replacing fixtures, weeping water heaters, pipes, trash out homes. Buying & remodeling homes, employing ex-convicts. (Priority) | Washtek Mobile Pressure Washing | 6 | 0 to 30 days | \$120,000 |
| Stark | Retrofitting Trash Out Homes | POTASSIUM PERMANGANATE FEED AT RAW WATER INTAKE TO CONTROL ZEBRA MUSSELS | JONES REHAB INC. | 8 | 31 to 90 days | \$1,500,000,000 |
| Stark | POTASSIUM PERMANGANATE FEED AT RAW WATER INTAKE FO | This project will consist of acquiring and resurfacing the Frank Street for approximately 5.1 miles. | CITY OF ALLIANCE WATER TREATMENT DEPARTMENT | 4 | 181 days or more | \$350,000 |
| Stark | Erie Street Resurfacing | CHANGE IN DISINFECTION METHOD TO CHLORAMINES SO THAT CHLORINE GAS FEED AT THE BOOSTER STATION LOCATED IN A RESIDENTIAL AREA COULD BE REMOVED. | Stark County Engineer | 10 | 91 to 180 days | \$1,360,000 |
| Stark | DISINFECTION METHOD CHANGE AT BOOSTER STATION | This projects consists of repairing, resurfacing, striping and adding loop detectors to Dressler Road and Riverhead Road. | CITY OF ALLIANCE WATER TREATMENT DEPARTMENT | 2 | 91 to 180 days | \$100,000 |
| Stark | Dressler and Everhard Resurfacing | Construction of a Power Activated Carbon Feed system to remove water contaminants and taste and odor components of drinking water. | Stark County Engineer | 10 | 91 to 180 days | \$735,000 |
| Stark | Carbon Feed System | The project will consist of repairing, resurfacing, striping and adding loop detectors to Portage Street between Frank Road and I-77. | Alliance Water Treatment Department, City of Allia | 6 | 181 days or more | \$1,000,000 |
| Stark | Portage Street Resurfacing | The job will consist of repairing and resurfacing of Fort Street for approximately 4 miles. | Stark County Engineer | 10 | 31 to 90 days | \$400,000 |
| Stark | Fohl Street Resurfacing | The Village's current salt storage facility is located next to the Tuscarawas River and is within 425' of the Village's well field which poses water quality issues via storm run-off and seepage into the ground. Erecting a new 24' x 36' facility with a concrete floor would alleviate these current problems as well as provide access for delivery trucks. | Stark County Engineer | 10 | 91 to 180 days | \$780,000 |
| Stark | Salt Storage Facility | The job consists of repairing and resurfacing 3.7 miles of Justice Avenue from US 62 to Beach City. | Village of Navarre | 10 | 31 to 90 days | \$50,000 |
| Stark | Justus Avenue Resurfacing | Major project components shall consist of installation of 170 LF of 18" sanitary sewer including manholes to provide sanitary services to an existing industrial park. Shearer's Food Inc. is building their million dollar corporate headquarters in this area and the City is committed to the City to be able to offer necessary sanitary sewer services to their company. This project will also enable the rest of the undeveloped industrial park to be serviced by sanitary sewer. | Stark County Engineer | 10 | 91 to 180 days | \$590,000 |
| Stark | NeoCom Sanitary Sewer Interceptor Project | This project consists of replacing deteriorated concrete box beams on a bridge on Deerfield Avenue. | City of Massillon | 10 | 31 to 90 days | \$195,000 |
| Stark | Deerfield Bridge | Installation of the segregation equipment to preserve the historic five-story wooden Magistra Flouring Mills, in continuous operation since 1834. The mill is the second oldest structure in Stark County that is on the Federal Register of Historic Structures. This will allow sales of corn meal, seeds, and pet foods to continue and will serve needs of local farmers. This project is the first of many designed to convert the mill into a first-rate urban venue and treated along the Sandy & Beaver Canal Trail. | Stark County Park District | 10 | 31 to 90 days | \$330,000 |
| Stark | Magnolia Flouring Mills Phase 1 | This project will consist of repairing deteriorated concrete boxes on a bridge on Wooster Street. | Stark County Park District | 20 | 0 to 30 days | \$247,628 |
| Stark | Wooster (Eton) Bridge | This would involve rehabilitation of existing conduit by relining the existing sewer in its very poor condition. | Stark County Engineer | 10 | 31 to 90 days | \$1,010,000 |
| Stark | Portage Street/West Park Road Sanitary Sewer Rehab | This rehabilitation of existing conduit would be by cured-in-place pipe method. 40% of the Design has been completed. | City of North Canton, Ohio | 15 | 91 to 180 days | \$425,000 |
| Stark | Woodside Basin Outfall Storm Sewer Rehabilitation | Build 260-foot pedestrian bridge over Deer Creek Reservoir. Spillway to connect northern/southern sections of 3.2-mile off-road Mahoning Valley Trail that links Stark County's three largest cities with one of the county's largest lakes. | The City of North Canton, Ohio | 15 | 91 to 180 days | \$825,000 |
| Stark | Deer Creek Spillway Bridge | This project consists of repairing deteriorated concrete box beams on a bridge on Kenary Avenue. | Stark County Park District | 30 | 0 to 30 days | \$791,336 |
| Stark | Kemary Bridge | This project consists of replacing deteriorated concrete box beams on a bridge on Battelsburg Street. | Stark County Engineer | 10 | 91 to 180 days | \$459,000 |
| Stark | Battelsburg Bridge | Build a 1.4-mile wide, 250-foot pedestrian/bicycle bridge spanning the former aqueduct of the historic Ohio & Erie Canal over the Tuscarawas River between Stark and Tuscarawas Counties; build an 8-foot wide limestone trail, paved parking lot for at least 50 cars, a picnic launch area. Completion of the project is critical for Tuscarawas County to realize the economic development potential of this area including Fort Fluens State Memorial that preserves a Revolutionary War site and Deer Village State Memorial. The bridge will connect Tuscarawas County residents to 25 miles of the Trench Trail open to Stark County, as well as portions completed in Summit County. | Stark County Engineer | 10 | 31 to 90 days | \$516,000 |
| Stark | Ohio & Erie Canalway Aqueduct Bridge | | Stark County Park District | 30 | 91 to 180 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Stark | Molly Stark Park Brownfield Cleanup | Complete Phase 2 Environmental Assessment and demolish buildings at former Molly Stark Hospital, known to have asbestos throughout, so that this 35-acre site may become a public park; build a Visitor Center housing the historic entry to the hospital, a community room, and public restrooms. This project will protect public health, remove a dangerous eye-sore, and provide recreational opportunities in rural Stark County where there are no sidewalks and few recreational opportunities. | Stark County Park District | 25 | 91 to 180 days | \$1,500,000 |
| Stark | County-wide Load Ratings | This is a county-wide project to test the bridges that the county maintains for their load ratings. | Stark County Engineer | 3 | 31 to 90 days | \$150,000 |
| Stark | Navarre Water Treatment Plant Improvements | Addition of a clarinet, two pressure filters, and a backwash holding tank at the Navarre Water Treatment Plant will correct current plant operational deficiencies. Addition of a backup generator will provide emergency power not currently available. The project will enable future water supply to approximately 300 acres of developable rural area recently annexed into Navarre. | Village of Navarre | 35 | 91 to 180 days | \$1,200,000 |
| Stark | Stark County Anti-Gang Initiative | 1. Increase communication between police and prosecutors, increase communication between residents and law enforcement and enhance prosecution of gang-related offenses. 2. Enhance asset forfeiture of gang property, reduce recidivism of gang members released from custody and reduce incidence of gang affiliation. | Stark County Prosecutor's Office | 3 | 0 to 30 days | \$303,000 |
| Stark | KSU Stark State Campus Trail | Build a 2.4-mile, 8-foot wide walking/bicycling trail on the campus of Kent State University Stark (County) Campus and Stark State College of Technology and linking to Pike Park on the west side of North Canton, OH. Project includes installation of a stonewalk along Crestview Rd and another at the corner of Whipple Ave/Glenwood St., and installation of interpretive, directional, mileage and other confidence-building signage. This trail will provide an amenity in one of Stark County's fastest growing territories, promoting exercise and healthy lifestyles in a high-use recreational area where sidewalks are non-existent. Its centralized location will overcome the time and family-responsibility barriers to outdoor exercise documented in Ohio's Statewide Comprehensive Outdoor Recreation Plan and contribute to the statewide goal of providing recreational trails within 10 minutes of all Ohioans. | Stark County Park District | 25 | 181 days or more | \$1,495,000 |
| Stark | New Navarre Water Tower | Approximately 2000 linear feet of 12" water line will be installed to the site where a new 500,000 gallon water storage tank will be erected. This tank will improve inadequate system pressure and storage capacity for the Village of Navarre as well as improving fire flows in town. It will also serve as a gateway to ~300 acres of undeveloped land recently annexed into the Village and purchased by a private developer. | Village of Navarre | 20 | 91 to 180 days | \$500,000 |
| Stark | Magnolia Flouring Mills Phase 2 | Create a final design and implement preservation of the exterior and interior of the five-story Magnolia (OH) Flouring Mill, in continuous operation since 1934, to allow the structure to become a full-fledged destination, educational venue, and trailhead for the Stony & Beaver Canal Trail. Included would be repairs to concrete, wood siding, doors and windows, exterior masonry and damaged steel siding; replacement of existing roof, gutter, downspouts, interior structural analysis of framing; replacement steel beams of existing floor joists; replacement of masonry beams, slider floor joists, girders, post-beam connectors, installing electrically driven hydraulic pumps, tubing and exhaust fans; replacing electric motors with hydraulic motors; repaving existing lighting/photocopies; installing ADA Compliant; making facility handicapped accessible with ramps, lift, interior elevator, exterior exit stairs and basement stairs, construction of a Visitor Center with gift shop, restrooms, parking and interpretive signage and equipment. This project will preserve one of the most important historical buildings in Stark County and maintain an important connection to the area's industrial heritage. | Stark County Park District | 80 | 181 days or more | \$4,940,000 |
| Stark | North Canton to Schneider Park Trail | Build a 7-mile pedestrian/bicyclist trail connecting Hoover Park Connector Trail near a mid-size retail shopping center, to First Christian Church, to a long-range farm housing alternative, Glendale High School campus, Pike Township Schneider Park, connecting to an existing trail, and to the town of North Canton. A portion of the trail will be a concrete sidewalk, but a majority will be an 8-foot wide limestone surface. To accommodate the project will include installation of two trails, a paved, ADA-compliant, and a limestone surface, and installation of interpretive, directional, mileage and other confidence-building signage. This trail will address the statewide goal of providing recreational trails within 10 minutes of all Ohioans. Its location through areas with residential areas and family-friendly amenities will encourage recreation, promoting exercise and healthy lifestyles in a high-use recreational area where sidewalks are not provided. Trails such as this are a vital part of our transportation infrastructure and help the community by reducing congestion, providing cleaner air, and greater energy independence. | Stark County Park District | 25 | 181 days or more | \$2,180,000 |
| Stark | O&E Canal Dredging and Tourism Enhancements | Funds would be used to dredge the historic Ohio & Erie Canal in Stark County from Lock 4 Park north to the Village of Massillon, including a feeder canal. Lock 4 is a historic structure that provides water to the canal. To design the dredging project, including bank regrading, the various sections of the feeder canal, submission of reports to Army Corps of Engineers, filing of Section 106 Review to State Historic Preservation Office, submission of local NEP Development Permit to Franklin County, and installation of a new structure for the canal. The project will include dredging, regrading, installation of disposal area, restoration of existing drainage control structures and recreational trail; improvement of tourist facilities at Lock 4 Park including installation of public restrooms, ADA accessibility, replacement of 18' Hecla III canal lock with a replica having a decorative trail. This project will preserve an old lock site along the historic National Heritage Canalway, honoring and respecting an important local historical site, including a historic structure (the canal) for functional reuse in our modern world. Dredging will conserve an important part of local heritage, as well as the Ohio Canal. | Stark County Park District | 55 | 181 days or more | \$2,327,743 |
| Stark | Jackson-Massillon Fire Station | This is a joint project with Jackson Township for the construction of a new joint Fire Station that will be staffed by both The City of Massillon and Jackson Township Fire Department. It will also serve three different governmental entities, City of Massillon, Jackson Township, and Stark County. This will enable the two agencies to work cooperatively together to provide both fire and EMS service protection to the communities. | City of Massillon | 30 | 91 to 180 days | \$1,700,000 |
| Stark | Jobs through Green Initiatives | Onsite Jobs through Green Initiatives Group Midwest is a Small Business that specializes in Reuse and Recycling of electronic and telecommunications equipment. Our green operation was founded on the fact that 100% of everything we bring into our facility is reused or recycled. The problem Ohio is faced with today is that our landfills are constantly dealing with the disposing electronics scrap, CRT tubes, and old PCs. The cost to sort the units, remove any hazardous components, and properly sort off metals, plastics, and other non-degradable materials leaves very little incentive for recyclers to efficiently and effectively accomplish this task. We have 21 years of experience in this business, but in order to accomplish this undertaking we need the machinery. A Federal Stimulus grant would enable us to purchase a CRT granulator, conveyor system, and sortation equipment. Not only will this be a "green" grant, but it will also provide new jobs for the many unemployed. This is a win-win-win that will create jobs, reduce landfill and expense, and make the State of Ohio a green example for the rest of America. | GroupMidwest | 30 | 31 to 90 days | \$2,800,000 |
| Stark | Beck Road Commerce Center | Project was submitted as a 2008 JRS project to provide a new access road and utilities to the Beck Road Commerce Center. Improvements include 3,300 lin. ft of new roadway, new bridge, 2,300 ft of storm sewer, 2,300 ft of gas main, 2,000 ft of sanitary sewer. The 200 acre site will be primarily marketed toward "green" industries, such as alternative energy, or manufacturing related to the energy industry. However, the City is not limited to only "green" or energy related manufacturing. This project is supported locally through the chamber of commerce, Stark County and the Greater Alliance Economic Development Board. The City of Louisville has partnered with Jos. A. Jefferson to develop this property. | City of Louisville | 250 | 0 to 30 days | \$6,366,390 |
| Stark | Wastewater Effluent Re-use Pump Station | Project will include the construction of a pump station to provide treated wastewater effluent to a manufacturing facility for non-contact cooling water. By using the treated effluent, less pollutants will be discharged into the Nimshtaler creek and less potable water will be used for cooling water. The project will include the installation of a duplex pump station; 1,300 ft of force main; construction of a 2.0 MG. Gal. storage tank; installation of concrete floor and membrane liner in an existing equalization basin at the wastewater treatment plant; engineering; construction contingencies; mobilization; insurance. Columbus will include additional employment for the construction period and permanent employment at the manufacturing site. Conservation of ground water for drinking and sanitary purposes will also be accomplished by this water re-use. | City of Louisville | 200 | 91 to 180 days | \$2,667,000 |
| Stark | Family Life Center | This project is the construction of a new 17,992 square foot facility on land purchased at 514 North Ave., NE, Massillon, Ohio for a total project cost of \$3.5 million dollars. This facility will allow The Army, which is the main social service provider in Western Stark County, to have adequate space to provide current services, as well as expand its services to the community by providing space for agencies based out of the area to offer their services, which in turn benefits all of Stark County. Highlights of the building include a "Choice Closet" Parity, "Working Clothes" Closet, and a family social service office. The "Choice Closet" Parity will allow clients to "shop" for food items, learning how to provide proper nutrition for their families. The "Working Clothes" Closet will provide a space for clothing to be laid out with a focus on working professional clothes. And, the Family Social Service office will provide space for Canton based agencies to offer their services in our community - a centralized Compassion Campus, so to speak. | The Salvation Army | 120 | 91 to 180 days | \$1,000,000 |
| Stark | Fire Station Energy Conservation | Perry Township Fire Department provides fire and EMS protection operating out of three (3) fire stations. The stations are respectively 45, 50, and 70 years old. The station was constructed as a time when the concept of energy efficiency was unheard of. Over the years, nothing has been done to improve the energy efficiency of the buildings. The proposed project would involve the installation of insulation, new roof decks, energy efficient windows, and the installation of energy efficient heating and lighting at all three stations. The current utility budget for the 3 fire stations is \$72,000.00. Should this project be funded, we estimate that in the first year, we could obtain at a minimum of a 25% reduction in our overall energy costs. | Perry Township Fire Department | 25 | 91 to 180 days | \$285,000 |
| Stark | Navarre Kinsey Ct. Improvements | Stormwater rehab | ADR and Associates | 5 | 0 to 30 days | \$50,000 |
| Stark | Navarre Salt Storage Facility | Construction of Salt Storage Facility | ADR and Associates | 15 | 0 to 30 days | \$50,000 |
| Stark | Navarre-Bethlehem Park Improvements | Improvements to Navarre-Bethlehem Park | ADR and Associates | 15 | 0 to 30 days | \$50,000 |
| Stark | Navarre Fire/Tornado Siren | Northern area of village currently has NO tornado warning device | ADR and Associates | 3 | 0 to 30 days | \$20,000 |
| Stark | Navarre Market Street Rehab | Curbs and gutters, stormwater, repaving, sidewalk | ADR and Associates | 35 | 0 to 30 days | \$400,000 |
| Stark | Navarre Main Street Handicap ramps | Sidewalk improvements to bring to ADA compliance | ADR and Associates | 5 | 0 to 30 days | \$50,000 |
| Stark | Navarre Water Treatment Facility | Expansion of Water Treatment Facility | Village of Navarre- ADR and Associates | 100 | 0 to 30 days | \$3,750,000 |
| Stark | Navarre Wastewater Treatment Facility Improvements | Improvements to Waste Water Treatment Facility | ADR and Associates | 100 | 0 to 30 days | \$250,000 |
| Stark | Navarre-Pocahontas Park Improvements | Base Park installation at Pocahontas Park | ADR and Associates | 15 | 0 to 30 days | \$150,000 |
| Stark | Transportation Safety Apparel | Due to lack of funds from the rise in fuel prices, phasing out of personal tax, unable to pass additional levy's due to the economy. In addition, personnel costs increase, which in return limits funding to purchase new personal equipment or maintain facilities. The rise in fuel prices, loss of Statewide tax coming into the Road Department, and the much needed Drainage Projects. More Mandates, less money in which puts a strain on the Road Budget. With all of the expenses that the Road Department is responsible for, the safety equipment for the Road Department employees has had to take a back seat. On September 14 2008, a windstorm that came through affected many people in our area. To assist in the cleanup effort the Road Department released safety gear to utility workers. Policy had been that the Road Department would purchase safety gear as needed to be reached. It is at these times when we realize that the Road Department is in need of proper safety equipment. They are in need of 100 Park Performance, 40 safety reflective safety vest, 100 dozen Car Reflects, 2000 Safety Safety Glasses, 100 Safety Safety Glasses, 100 Safety Safety Glasses, and 2 dozen Leather Work Gloves, 30 Saw Horse Barbedwire, 50 - 28 inch cones with 2 reflective stripes, and 4000 ft of caution tape. | Perry Township Board of Trustees | 1 | 0 to 30 days | \$4,778 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|----------------------------------|----------------|--------------------|---------------------------|
| Stark | New Perry/Massillon Fire Station | This project involves two objectives: (1) the replacement of two antiquated, obsolete fire stations. Perry Township #2 which is 65 years old and Mission #4 which is 20 years old and (2) the combining of four fire departments, operating out of five one (1) station. The location of this station would accommodate growth projections and current response deficiencies for the communities of Perry Township, Perry Township, the Village of Navarre, and the City of Massillon. The staffed, single-story, 4-bay station would serve both fire and EMS and provide common areas such as a dispatch, kitchen, office, conference room and physical training area. The facility would include a large multi-functional room, equipped with a kitchen designed for public functions and for use as an emergency evaluation or operations center with lighting protection, security protection, and emergency generator. | Perry Township Fire Department | 50 | 91 to 180 days | \$2,600,000 |
| Stark | Phase II & Phase III library Addition & Remodeling | In 2002 the Canal Fulton Library Board funded a master plan for growth and improvements. Phase II includes an addition of 2,085 square feet, with a renovation of 3,300 with a design and document phase of 6 months and bidding period of 1 month. This addition provides a computer lab, local history room, expanded children's and adult sections and an elevator for interior handicaps, accessibility between two floors. Phase III is a meeting room of 1,112 square feet, has a design and document phase of 4 months and a bidding period of 1 month. If such a renovation is completed, the design, document and bidding for both could be done concurrently. The present library board would like to revisit the master plan for 2002 to evaluate the use of the space and propose cost savings if possible within the existing building costs. The cost of a revised study would be included in the \$2,368,822 cost which has been adjusted for an 8% inflation in the cost of construction for each year from the date of the study. | Canal Fulton Public Library | 10 | 181 days or more | \$2,398,822 |
| Stark | C.O.P.S. GRANT PROGRAM | The Canton Police Dept would like to secure funding through the C.O.P.S. grant program to hire an additional 12 police officers to augment our department. | CITY OF CANTON POLICE DEPT | 12 | 31 to 90 days | \$707,352 |
| Stark | Regulatory Signs and Street Signs up Grade | Due to the rise in fuel prices, phasing out of personal tax, unable to pass additional levies due to the economy. In addition, personal costs increase, the rise in fuel prices, lack of Gasoline tax coming into the Road District, which in return limits funding to purchase Regulatory Signs and Street Signs. In 1996, Stop Signs were replaced, but due to age, weather, and fading, and because of all those issues the reflectivity of the all signs have drastically declined. In order to comply with the FHWA Federal Highway Administration the signs need to be up graded by law. The signs that the Township is in need of, 1,000 Stop signs, 2,446 street signs, 20 Yield signs, 20 Yield signs, and 100 up grade signs. The Expected Outcome is to make all signage in Perry Township visible for Fire, Police, EMS Workers, Residents and whoever may travel the Perry Township Roads during the day and at night. Perry Township will be in total compliance with the FHWA standards of visibility and reflectivity for safety. | Perry Board of Trustees | 6 | 31 to 90 days | \$91,917 |
| Stark | Paving 60 Miles of Roads in Perry Township | Due to the rise on fuel prices, phasing out of personal tax, unable to pass additional levies due to the economy. In addition, personal costs increase, the rise in fuel prices, lack of Gasoline tax coming into the Road Department, the much needed Dearborn/Dodge Projects, more mandates, less money in which they can claim a share on the Road Budget. With all of the expenses that the Road Department is responsible for, the Road Department is lacking the money to acquire the much needed paving of the Perry Township Roads. According to our paving records, 1992 was the last year some of the Perry Roads to have been paved. The Road Department also had to pave 75% of the 2000 Paving Budget to purchase Road work. Perry Township needs to pave 60 miles of road in order to come back into our 15 year Rotation Paving Program. Perry Township maintains 140 miles of road. The Goal is to have Perry Township roads in better condition and to get back into our 15 year rotation paving program. We need the local paving companies in retaining employment in the area. It will also make the Township Roads safer for all motorists. | Perry Township Board of Trustees | 32 | 91 to 180 days | \$4,275,340 |
| Stark | Hartville Wastewater Treatment Plant Upgrade | Due to the current 4.4 mgd gallon (MGD) average daily flow (ADF) capacity to 0.60MG ADF. This will provide treatment for future capacity including both residential and commercial. Improvements to the plant include new headworks facilities; secondary treatment works; tertiary filters; UV disinfection; sludge thickening and laboratory. Design will incorporate energy efficient motors and HVAC units. Rates are being adjusted to cover the cost of the current debt burden, projected debt and O&M costs associated with the facility and expansion. Additional funding, especially in periods of needed capital to have the plant available for future growth and expansion. Hartville is located in Lake Township, one of the faster growing areas in Stark County. A local pipe manufacturing firm is proposing to expand and without additional capacity, the firm would have to build or open facilities somewhere other than Hartville. | Village of Hartville | 500 | 0 to 30 days | \$6,400,000 |
| Stark | Part-time staffing | Perry Township F.D. provides fire and EMS protecting operating out of three stations. The department consists of (2) fulltime firemen working a 40-hour shift and (20) volunteer firefighters. The time, there are only fulltime medical working and the volunteer response is not a guarantee. In 2008, Perry Twp. F.D. responded to 2884 alarms. Perry Twp. F.D. is not immune to the daily dynamics of staffing. On any given day, Perry Twp. F.D. has not been able to deliver the public safety services that has promised to citizens. This project proposes to supplement the fulltime staff with the hiring of part-time personnel. The project would allow for the placing of (2) part-time personnel, 24 hours a day in the two remaining fire stations. Supplementing the staffing with part-time personnel is not just as efficient and more cost effective than hiring fulltime personnel. The community would also receive the benefit of quicker response times to emergencies. The department benefits from the availability of increased staffing through enhanced fireground safety and decreased injuries (less BWC claims). Part-time personnel would be paid \$10.00 per hour. | Perry Township Fire Department | 12 | 0 to 30 days | \$480,000 |
| Stark | Hercules Project -- Public Parking Garage | The Hercules Motor site encompasses 26 acres and 610K sq. ft. of lighted, vacant industrial property in about 29 warehouse style buildings built from 1955-1945 in downtown Canton. The Hercules Redevelopment Project (the "Hercules Project") is an adaptive re-use project that will use historic revitalization and sustainability principles (target LEED Gold) to turn the site into a vibrant neighborhood that will include office, residential, retail, boutique hotel, public exhibition/venue space and a 4,000 square public parking garage (the "Public Garage"). Phase I (remediation of the Hercules Project) is under way. Phase II (151M) in adaptive re-use construction and renovation is scheduled to begin immediately, provided that that financing gaps can be filled. The Hercules Project is expected to generate approximately 861M of construction wages, 1,508 person yrs. of construction employment, 611 permanent jobs and 15 yr. federal, state and local taxes of \$159M. The Public Garage to begin in 151-180 days. | Cormony Development LLC | 611 | 91 to 180 days | \$13,500,000 |
| Stark | Hercules Project -- Public Event Center | The Hercules Motor site encompasses 26 acres and 610K sq. ft. of lighted, vacant industrial property in about 29 warehouse style buildings built from 1955-1945 in downtown Canton. The Hercules Redevelopment Project (the "Hercules Project") is an adaptive re-use project that will use historic revitalization and sustainability principles (target LEED Gold) to turn the site into a vibrant neighborhood that will include office, residential, retail and boutique hotel space and approximately 100K sq. ft. of public exhibition/venue space (the "Public Event Center"). Phase I (remediation of the Hercules Project) is under way. Phase II (151M) in adaptive re-use construction and renovation is scheduled to begin immediately, provided that that financing gaps can be filled. The Hercules Project is expected to generate approximately 861M of construction wages, 1,508 person yrs. of construction employment, 611 permanent jobs and 15 yr. federal, state and local taxes of \$159M. The Public Event Center can begin in 30-60 days. Among other important uses, the Public Event Center can host NFL Hall of Fame Entertainment Festivities, which have an annual economic impact to the State of \$48M. | Cormony Development LLC | 611 | 31 to 90 days | \$24,000,000 |
| Stark | YMCA/ Community Pool | We are adding a new pool to the Township Trail YMCA. This will add jobs to our community, some will be through project construction, and some will be YMCA staff. When completed the pool will provide a great source of recreation and fitness. A pool is a key addition to all the other health and exercise programs we already provide. It is a key on the joints for elderly and disabled, participants. It provides a source of cardio and resistance training for our more active health seekers. It is a great place to rehab an old injury, recover from surgery, or prevent a new injury. One of our focuses at the YMCA is to provide a healthier community. A active healthy community will result in a lower cost of health care. We keep our cars running longer by preventative maintenance, we feel we can do the same with our bodies. Other benefits of a community pool are swim lessons, water safety classes, and family fun. Who better to invest money into the community, than an organization that has stood the test of time, and offers something for everyone. Best of all everyone is welcome, no one is ever turned away because of age race religion, or their ability to pay. | YMCA of Western Stark County | 25 | 91 to 180 days | \$800,000 |
| Stark | Deer Creek Spillway Bridge-2/19/09 Revision | DOTD revised the budget 2/19/09 due to increased cost of prefabricated bridge-all other info same as first report | Stark County Park District | 30 | 0 to 30 days | \$1,020,000 |
| Stark | Hillview Mobile Home Court Waterline Extension | Hillview Mobile Home Court (HMHC) is under CEPA Findings and Orders to connect to the Village of Brewster's water and sewer system. Hillview has the highest arsenic levels in the state. Approximately 32 residences are affected. The Village of Brewster has agreed to extend water and sewer service to HMHC, which is in the process of annexing. The Village will extend a 6-inch waterline under Sugar Creek to the Hillview Mobile Home Court. The project will be done in tandem with a sewer line extension, in conjunction with a sewer extension project. The project will include 2,000 LF 6-inch line, 4 hydrants, a meter vault and monitoring vault. The total project cost for the waterline is estimated to be \$170,200. | Village of Brewster | 0 | 91 to 180 days | \$170,200 |
| Stark | Hillview Mobile Home Court Sewer Line Extension | Hillview Mobile Home Court (HMHC) is under CEPA Findings and Orders to connect to the Village of Brewster's water system, and will be under Findings and Orders if it does not connect to the sewer system. HMHC is on-site treatment system for filling, and discharging directly into Sugar Creek. Approximately 32 residences are affected. The Village of Brewster has agreed to extend water and sewer service to HMHC, which is in the process of annexing. The Village will extend an 8-inch sewer line under Sugar Creek to the Hillview Mobile Home Court. The project will be done in tandem with the waterline extension, in conjunction with a sewer extension project. The project will include 2,200 LF 8-inch pipe and manholes. The total project cost for the sewerline is estimated to be \$177,800. | Village of Brewster | 0 | 91 to 180 days | \$177,800 |
| Stark | Stark Parks Community Policing | Hiring of two full-time park rangers in 2009 and two full-time rangers in 2010, increasing current staffing by 50%. Since 1994 the Stark County Park District has expanded from 20 parks with 400 acres to 11 parks with 6,000+ acres, 4 lakes and five miles of recreational trails. Our long-range "Stark County Trail & Greenway Plan" identifies 240 more miles of trails and additional future parks. With these aggressive plans for growth, security and enforcement needs are a top priority. However, our philosophy is that our rangers are ambassadors of our park district who patrol on foot, bicycle and by vehicle, assist and inform park patrons, increasing our staff will allow us to increase more personal foot and bicycle patrols and increase personal service. Increased staff will also allow for an increase in community education programs such as hunter education and classes on fire/marshland laws, fire response and water safety. After three-year life of the grant, we will keep the officers on our full-time staff. | Stark County Park District | 4 | 31 to 90 days | \$420,000 |
| Stark | Canton-Stark County Agricultural & Livestock Expo | The new 174,000-square-foot Canton-Stark County Agricultural & Livestock Expo Center will be located just west of Wertz Avenue NW and north of the fairgrounds grandstand. Inside the building would exist a 240,400-square-foot main show area, a slightly smaller warm-up area, 380 stalls, wash areas, a food court and a viewing area. Seating is available for 968 spectators. The new Expo Center will be in close proximity to I-77 and US-30, downtown Canton and the Pro Football Hall of Fame Museum. A new expo facility will provide a significant stimulus to the economy of the City of Canton and Stark County by attracting thousands of visitors to the area that will be participating in events held at the new facility. Based on industry studies, the average participant at indoor horse show events stays 3-4 nights in the community and spends over \$1,500 for hotel, meals, show fees and retail purchases while in the community. If the indoor arena is able to book between 40-50 events each year and each event attracts 200 participants, not including spectators, the economic impact will result in creating \$12-\$15 million per year in new sales and income to the area. | Stark County Port Authority | 130 | 31 to 90 days | \$10,000,000 |
| Stark | Canton-Stark County Agricultural & Livestock Expo | The new 174,000-square-foot Canton-Stark County Agricultural & Livestock Expo Center will be located just west of Wertz Avenue NW and north of the fairgrounds grandstand. | Stark | YMCA Downtown Renovation | The YMCA of Western Stark County has two branches. The branch that YMCA built in Navarre, that opened in 2006. As well as the downtown location, that opened in 1925. We believe it is important for the area to stay downtown. It provides access to health and wellness, children, youth sports and several other programs. Last year the YMCA sponsored over 50,000 worth of memberships, not to mention thousands of classes, and thousands of dollars of volunteer hours. We provide a lot of needed services, and they are for everyone, no one is ever turned away because of their inability to pay. Being downtown allows easy access to those who live here, and the train bus station is on the main block, very close to the main block. As downtown business are closing, we will see an influx of people who come downtown. Hundreds of people daily come to the YMCA. This is a win-win situation. We employ people, provide high quality services, and bring people downtown. If the YMCA would move out of downtown, it would have a terrible effect on many other businesses that benefit from our staff and members. Our programs are great, our facility is in need of some repairs. | YMCA of Western Stark County | 60 | 91 to 180 days | \$250,000 |
| Stark | Canton YMCA | The proposed project is for asbestos abatement and related environmental remediation in the historic downtown Canton YMCA building. Remediation is the first phase in a planned \$8 million redevelopment of the property to include market-rate rental housing and retail and office space, as well as an indoor ice skating rink. The YMCA, by retaining the YMCA's presence in downtown Canton and adding new housing, the project is expected to generate significant economic development for the city. | Historic Developers Inc. | 20 | 91 to 180 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Stark | Hotel Onesto | These funds are requested to complete asbestos abatement and environmental remediation work at the historic Hotel Onesto in downtown Canton. Although much of the remediation has been completed, additional asbestos has been discovered that must be removed before proceeding with the project. Abatement is the first phase in the planned \$6 million rehabilitation of the building to create 40 units of rental housing as well as ground-level retail space. By bringing many new residents to downtown Canton, this catalytic project is expected to spur significant additional economic development in the city. | Historic Onesto LLC | 20 | 31 to 90 days | \$85,000 |
| Stark | Older Adult Community Service Coordinators | Each year Trillium's Adult Protective Services program investigates elder maltreatment of over 700 adults age 60+. It is estimated nationally that for every older adult referred to APS, 5 elderly abuse victims go unreported. Trillium plans to implement an Older Adult Community Services Team (subcommittee) - that would facilitate community service options to older adults identified as being victims of, or at risk for, elder maltreatment. This team would provide the service coordination necessary to implement and secure ongoing medical, behavioral health, and social services. Services would be provided in the "homes" of the elderly, via home visits, include transportation. Benefits of this service include: more older adults will be able to remain living in their own homes, effective service strategies will increase the older adults medical compliance and wellness, effective emergency room visits and hospitalizations, caregivers and older adults will benefit from support to caregiving roles, eldercare providers will be supported in more effectively engaging elders in needed medical, behavioral health, and social services. | Trillium Family Solutions | 6 | 31 to 90 days | \$350,000 |
| Stark | Putting good people back into the workforce | Project "FelonForce" will require an office with several computers, secretaries and myself to compile a list of felons (sign up online for a one time fee of 19.95) via a website or mail in application. We then contact state, local and community entities to gauge the need for the FelonForce... With the many projects that the stimulus is creating we will need good hard working people to build, dig, sweat and labor. | FelonForce | 10 | 0 to 30 days | \$175,000 |
| Stark | Ways to Work Loan Program- Stark and Summit Counti | I am a connected felon, two years ago I was desperate for a job and I did everything possible to get back into the workforce... Luckily I got into Timken Steel Co in Canton, Ohio... But I swore to myself that I would somehow get this project started and operating... This would eventually be a nationwide project but we need to start somewhere... The 19.95 not only helps the project finance itself but if needed we could finance an insurance package to leary employers. | Trillium Family Solutions | 150 | 0 to 30 days | \$650,000 |
| Stark | Benefit Bank Coordinator | Ways to Work Loan Program is a nationally replicated program designed to eliminate employment barriers for families. The program assists families eliminate public assistance needs by providing low interest loans to low income families who are not credit worthy. By providing loans to eliminate barriers, we provide a head start to our clients, which helps them to concentrate on being successful employees and self-sufficient families. Loans are available to support the purchase of job equipment, uniforms, and our most frequent request - automobiles. Trillium has been a part of the Ways to Work Loan Program since 1996 and has provided 450 families loans in the amount of \$1,323,909.17. Summit County's office located at Greenway Mall, has been in operation since 1996 and has provided 450 families loans in the amount of 1,205,695.00. We are requesting funds to expand the program into Cuyahoga, Wayne and Lorain Counties - all counties have expressed an interest. We are requesting a total of \$400,000 that \$300,000 will be used as loan pool. These funds are "recyclable" and will become available to other applicants with the next payment. \$100,000 will be used for salaries and program operations for the 3 sites. | Trillium Family Solutions | 600 | 0 to 30 days | \$65,000 |
| Stark | Downtown YMCA Redevelopment | Trillium Family Solutions has been a Ohio Benefit Bank (OBB) site in Stark County since May 2007. The OBB is an innovative, counselor-assisted income enhancement program that enables moderate/low income individuals/families increase their income by identifying, finding, and economically applying for benefits to which they may be entitled. OBB can assist individuals in determining eligibility for Social Security, Health Savings/Healthcare, Child Care Subsidy, Ohio Works, Medicare Savings Programs, Voter Registration and EITC. The OBB likewise links individuals and families through tax preparation services. We have 25 OBB Coordinators. Since 2007 we have assisted individuals and families receive \$2,400,000 in tax credits and \$18,360 in benefits. We are asking for \$65,000 to support the costs of a OBB Coordinator. This position would be responsible for providing tax/counselor/transportation, and promote the program in the community. Assisting individuals increase needed benefits to improve economic family stability - including job retention. We project to serve at least 400 families a year. | Historic Y, LLC. | 50 | 91 to 180 days | \$200,000 |
| Stark | MANUFACTURING ADDITION | We will be renovating an old downtown YMCA facility (105,000 square feet) to include a new YMCA, retail, and residential spaces. The project will be a "green" project. We will use green building technology for the entire project. | BIERY CHEESE CO. | 23 | 31 to 90 days | \$1,429,000 |
| Stark | North Canton Sewer Jet-Vac Truck | ADD NEW BUILDING AND EQUIPMENT PROVIDING 23+ NEW JOBS THERE WILL BE 2-3 TECHNICAL, 19-21 LABOR JOBS CONSTRUCTION WILL TAKE APPROX. 3 MONTHS AND WILL EMPLOY 50 TO 60 PEOPLE - WE CAN START IN 31 DAYS BIERY CHEESE HAS BEEN IN BUSINESS SINCE 1929 FOUR GENERATIONS BIERY CHEESE COULD USE YOUR HELP ! THANKS FOR CONSIDERING OUR APPLICATION DENNIS | The City of North Canton | 10 | 31 to 90 days | \$250,000 |
| Stark | Chef 's of Ohio | Purchase of a new Sewer Jet Vac Truck to maintain sanitary sewers. This will reduce the probability of sanitary sewer blockages and overflows. We have a existing successful restaurant and a new opening coming when we would train and employ students in local trades of the business with on the job training. These students' employees would get paid while training in programs for chefs, sous chefs, line cooks, pastry and bakery chefs. | syvester&syvester inc | 75 | 181 days or more | \$3,000,000 |
| Stark | New Engineering & Technology Facility | The Stark County Port Authority will acquire and renovate an old existing 25,000 square foot building which is currently vacant on the Mount Union Campus. The building will be LEED certified. Leadership in Energy and Environmental Design (LEED) Green Building. The Federal funds will be used for the construction & renovation of the building facility. | Stark County Port Authority | 10 | 31 to 90 days | \$5,000,000 |
| Stark | Continue the AdultCare Facility | Mount Union already contributes significant revenue to Stark County through its payroll and is one of the largest employers in the City of Alliance with approximately 300 people working on campus. In order to remain viable the College must have a modern building to accommodate the need for a vibrant new engineering program for students. Multiple benefits from this project including partnering with Mount Union College is considered key to the project, given the College's past and projected growth. In addition, approximately 150 to 175 trade workers will be employed during the renovation and construction period. | Zimmerman Group Home | 3 | 31 to 90 days | \$30,000 |
| Stark | Fire House | Owner is nearing retirement and wants to sell the business. By purchasing the business I can continue providing housing and care for elderly clients. | East Sparta Vol. Fire Dept. | 26 | 181 days or more | \$2,100,000 |
| Stark | Canton Township Fire Station / Community Building | We are asking for your help with a problem that we have been unable to solve on our own. We would like to replace our current building that is not energy efficient due to age and numerous additions over several decades and is insufficient for training due to space restriction. Because businesses have closed in our area with no new businesses to replace them, our tax base has suffered. We own an area of 55 square miles and over 12,000 people. In our district we have one school (pre-school through high school), two trailer parks, major highways, and flood zones. Our district is primarily in Stark County, but also some in Tuscarawas County, which has been deemed a severely Appalachian area, the only one in Ohio. Although we have the personnel and would like to retain them, we struggle with a place to house equipment and to train. We would like to have a fire station that is centrally located in our district and is energy efficient. Our district also does not have a place for people to come in extreme weather and power outages. We would like to be that place. We are sincerely asking for your assistance with our dilemma. Our community would be grateful. | Canton Township Board of Trustees | 235 | 31 to 90 days | \$2,700,000 |
| Stark | Moreland Sanitary Sewer Project | Canton Township desires to efficiently and effectively combine three (3) aged fire stations with consolidation of equipment into one central building and location. Average age of the buildings is very (60) years. The combination of three buildings into one will eliminate the duplication of expenses for maintenance, utilities, and provide for reduction and consolidation of vehicles. The three buildings are not energy efficient lacking insulation, energy efficient windows and doors. Also, the buildings currently leak. The central location will provide sufficient room for current personnel and support expansion of services as needed. The fire stations are in the center of the Canton Township and does not support the most efficient location for firefighters and equipment to respond from. The new building would be designated by the local EMTs as an evacuation center. Located within 24 miles are three schools and a middle school. Located within one mile is an additional school and an MRSD workshop. There are no approved evacuation centers within the 27 square miles of Canton Township. The fire department employees 71 persons either full or part time. | Canton Township Board of Trustees | 65 | 31 to 90 days | \$1,725,000 |
| Stark | greener home | Canton Township desires to replace the sixty-three (63) year old septic system for residents in what is commonly referred to as the Moreland subdivision. The aging septic system will be replaced with a sanitary and efficient system for the removal of wastes in the area. The scope of this project is a safe and sanitary water and waste removal system for residents living in the designated area. The benefit to be derived shall be a major reduction in bacteria in the surface waters. The average of bacterial counts from the sampling conducted on August 19, 2008 was in excess of 11,000 FCU/100ml. Three of the eight samples were above 20,000 FCU/100ml. To be in compliance with CEQA, the threshold bacterial count must be less than 6,000 FCU/100ml for insulation of sewers. Therefore, the overall benefit to be derived is a ninety-four (94%) percent reduction in the fecal coliform bacterial load. | HOME OWNER | 4 | 31 to 90 days | \$20,000 |
| Stark | cleaner mowing and landscaping equipment and vehic | want to install solar roof panels and heat and electric for house to make it greener. I know I won't get any but I will put pepel to work doing this work. I am not sure how many but with jobs from So. 5. I will hire a company to do work and that will help companies keep working. I am a small man in a big market and don't make alot doing this on my own and have money and there and an old truck. I hope to get better and greener equipment and truck. I want to pick up more mowing and create jobs. I figure with better equipment and better vehicle and burn clean and look better customers will like someone who use better and cleaner equipment. I know I am not asking for much but hope to get and some money to. I know people don't like to do this kind of work and with baby boomers getting older this is a big market I mean I make things better and pay and all I want to do is make healthy. | irisheys gardens | 3 | 31 to 90 days | \$15,000 |
| Stark | Orchard Acres Sanitary Sewers | install new sanitary sewer system for the Orchard Acres subdivision. This subdivision was platted in 1923 and is currently served by individual septic systems. | The City of North Canton | 20 | 91 to 180 days | \$450,000 |
| Stark | Salt Storage Reconstruction Project | This project seeks to replace the existing salt storage structure for the City. Currently the existing structure has deteriorated and needs replaced. This project has been identified as one of our stormwater plan and by completing it, it would enable the City to be in compliance. | City of Massillon | 10 | 31 to 90 days | \$150,000 |
| Stark | Belden Village Area Waterlines Replacement | The replacement of approximately 10,000 linear feet of 12" (dual wall) water mains. | City of North Canton | 25 | 91 to 180 days | \$2,000,000 |
| Stark | Critical Unit Training & Equipment Acquisition | Cost efficient volunteer force of trained first responders in support of the local civil authorities and the Ohio National Guard. Primary use of funds would be used to acquire equipment and training. | 51st battalion Ohio Military reserve | 50 | 31 to 90 days | \$25,000 |
| Stark | Stimulate and Expand | To expand the Carwash King for year three, by fitting 4 full time used auto sales persons, 8 full time detail positions and 1 full time office manager position. We are also obtaining a local carry-out restaurant in which we require 2 full time dishwashers, 2 full time delivery drivers, 2 full time prep persons, 2 full time cooks, and 2 full time "front house" staff. To save costs we are utilizing 1 accountant for all our needs. Thank you greatly for your consideration! Sincerely, Daryn Hill | Carwash King | 24 | 0 to 30 days | \$300,000 |
| Stark | P-557 | Install 1900 feet of new sewer to provide service to 8 properties. | Stark County Sanitary Engineering Dept. | 16 | 31 to 90 days | \$200,000 |
| Stark | P-525, Contract No. 3 | Replacement of 2 lift stations. | Stark County Sanitary Engineering Dept. | 17 | 31 to 90 days | \$900,000 |

| Stark | P-549 | Intercept lift station with 6,742 feet of new sewer. | Stark County Sanitary Engineering Dept. | 21 | 31 to 90 days | \$2,100,000 |
| Stark | P-559 | Install 9,252 feet of new sewer to provide service to 111 properties. | Stark County Sanitary Engineering Dept. | 20 | 31 to 90 days | \$750,000 |
| Stark | P-560 | Install 3,278 feet of new sewer to provide service to 35 properties. | Stark County Sanitary Engineering Dept. | 20 | 31 to 90 days | \$450,000 |
| Stark | P-561, Contract No. 1 | Replacement of 2,658 feet of sewer with cured-in-place pipe and installation of 403 feet of new sewer. | Stark County Sanitary Engineering Dept. | 23 | 0 to 30 days | \$1,400,000 |
| Stark | P-561, Contract No. 2 | Replacement of 2,800 feet of sewer with cured-in-place pipe. | Stark County Sanitary Engineering Dept. | 23 | 31 to 90 days | \$2,000,000 |
| Stark | P-561, Contract No. 3 | Abandonment of 10,500 feet of sewer and replacement with 11,000 feet of new sewer. | Stark County Sanitary Engineering Dept. | 23 | 31 to 90 days | \$2,500,000 |
| Stark | P-525, Contract No. 3 (This is revised, see belo | Replacement of 1 lift station and rehab of 3 lift stations. DISPOSE OF EARLIER SUBMITTAL FOR P-525, CONTRACT NO. 3. THIS REVISED VERSION IS CORRECT.) | Stark County Sanitary Engineering Dept. | 17 | 31 to 90 days | \$640,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Stark | Bridge for school bus exit from Minerva High School | We are requesting funds to build a bridge that would allow our school buses to exit our high school lot separate from our car traffic. Separation of car and bus traffic is a requirement of the Ohio Schools Facilities Commission (our partner in funding construction of our new and renovated schools). The bridge (75 feet and seasonal roadway approximately 800 feet) used during student arrival and dismissal would keep our student car traffic separate from our school bus traffic creating a safer environment for our students. We attempted in the past to fund this project with state funds as a joint proposal with our local government. The bridge could also be used for bus traffic during non-school periods. | Minerva Local Schools | 20 | 91 to 180 days | \$650,000 |
| Stark | GreenTec | This is an update. We are now very close to becoming a franchise for an ideal wind turbine. We have also begun discussion regarding quality for public facility installations for wind turbines and solar panels. The cost of manufacturing the panels in the City of Canton, OH. The turbine assembly and warehouse will also be undertaken there. An existing facility in this location will be refurbished. Other components of green building restoration may be undertaken as the company develops. The estimate of 30 jobs is very realistic and very sustainable. Note: the original application had a few geographical errors as they could not be corrected. | GreenTec | 30 | 31 to 90 days | \$2,000,000 |
| Stark | A Woman Owned Business Needs-Business Growth | Business growth to such a point that I can't take it any longer and I need to help with my business that is less than a year old, while helping grow the economic base of Stark County in Northeast Ohio, where at this time jobs are seriously needed. | ProSingsUSA, LLC | 1 | 0 to 30 days | \$15,000 |
| Stark | Canton Local 21st Century Technology Infrastructure | Upgrade building infrastructure to support 21st Century technology, including networking, networking security, and electrical needs in 5 buildings. | Canton Local Schools | 10 | 0 to 30 days | \$500,000 |
| Stark | Canton Local Community Wireless Mesh Network | Providing equal access to wireless broadband for the Canton Local and Canton Township community, which is a rural, low income area. This would be a public wireless mesh network that would provide broadband access to areas in the community where commercial broadband is unavailable or unaffordable. The network would be available to local law enforcement and emergency agencies. | Canton Local Schools | 20 | 0 to 30 days | \$1,000,000 |
| Stark | Canton Local Roofs | Replace leaking sections of roofs on 5 buildings. | Canton Local Schools | 50 | 0 to 30 days | \$500,000 |
| Stark | Canton Local One to One Computing | Adding 700 computers for high school students to experience 21st Century Learning | Canton Local Schools | 15 | 0 to 30 days | \$775,000 |
| Stark | Canton Local Sewer Plant | Upgrade the existing sewage treatment plant. | Canton Local Schools | 10 | 0 to 30 days | \$150,000 |
| Stark | Five Oaks Restoration Project | The Massillon Heritage Foundation, a 501(c)3 private nonprofit corporation, has as its main mission the preservation of Five Oaks. Five Oaks has been on the National Register of Historic Places since 1973. Restoration work is needed to preserve Five Oaks. The mortar has deteriorated in areas of Five Oaks which necessitated emergency repairs last year. Additional mortar work is needed to prevent further water damage to the interior of the structure. Several rooms have been damaged by water and need restored. The boiler which heats Five Oaks and maintains moisture levels also needs replaced. Finally, a Historic Structures Report needs produced to guide the Board in future restoration. | Massillon Heritage Foundation, Inc. | 6 | 91 to 180 days | \$200,000 |
| Stark | Canton Local Amos McDannel Outside Bleachers | Replace outside bleachers due to safety reasons and to meet current Juvenile Law and local codes. | Canton Local Schools | 2 | 0 to 30 days | \$7,000 |
| Stark | Canton Local Restroom Upgrade | Replace and upgrade 8 toilets, 30 urinals, and 50 sinks at Canton South High School to meet current plumbing and health standards. | Canton Local Schools | 15 | 0 to 30 days | \$850,000 |
| Stark | Canton Local Energy Efficiency - High School | Replace the heating, electric, plumbing, door entry, and lighting systems at the high school. This would improve the energy efficiency of this building to save resources and reduce the overall cost of operation. | Canton Local Schools | 50 | 0 to 30 days | \$2,200,000 |
| Stark | Canton Local District Roof Replacement | Replace the roofs on 8 school buildings with modern materials to improve energy efficiency and longevity of the roofs, and to reduce maintenance and repair costs. | Canton Local Schools | 75 | 0 to 30 days | \$2,100,000 |
| Stark | Canton Local Science Labs | Upgrade 6 science labs at the high school to bring them up to safety code, equip them with modern devices and technology, and make them 21st Century learning and improve our ability to provide strong STEM (science, technology, engineering & math) experiences for our students. | Canton Local Schools | 30 | 0 to 30 days | \$660,000 |
| Stark | Canton Local Paving | Replace 7 driveway and parking lots at the high school to provide for safer ingress and egress for buses and emergency vehicles, parents, and staff. | Canton Local Schools | 25 | 0 to 30 days | \$750,000 |
| Stark | Canton Local Entrance Doors - High School | Replace doors in 5 entrances to meet new energy standards and Juvenile Law mandates. | Canton Local Schools | 4 | 0 to 30 days | \$67,000 |
| Stark | Canton Local Refrigeration - middle and elementary | Replace water cooled refrigeration units with air cooled units (2 teachers and 2 cooks) in 2 buildings to make them more energy efficient and reduce the usage of ground water. | Canton Local Schools | 6 | 0 to 30 days | \$17,500 |
| Stark | Canton Local Ceiling Tiles - District | Replace suspended ceiling and system including damaged ceiling tiles to meet current building codes and improve energy efficiency. This is necessary due to water damage and would be done after the appropriate roof repairs. | Canton Local Schools | 50 | 0 to 30 days | \$1,000,000 |
| Stark | Canton Local Amos McDannel HVAC Systems | Replace boiler, unit heaters, duct systems, cooling control, and other applicable building and HVAC systems at an elementary school. This will allow for increased energy efficiency, improved health and safety factors, and reduced maintenance and ongoing costs. It will also reduce environmental impact by maintaining the building. | Canton Local Schools | 10 | 0 to 30 days | \$1,000,000 |
| Stark | Canton Local Amos McDannel Windows/Doors | Replace windows and doors in an elementary school to improve safety, security, and energy efficiency. This will reduce the maintenance and ongoing costs for energy at this building. | Canton Local Schools | 8 | 0 to 30 days | \$350,000 |
| Stark | Canton Local Amos McDannel Security | Install complete building security exterior lighting at an elementary school, including exterior cameras and recording equipment to improve building safety for students, staff, and the public. | Canton Local Schools | 5 | 0 to 30 days | \$100,000 |
| Stark | Canton Local Amos McDannel Plumbing | Upgrade building wide plumbing, including restroom fixtures, backflow preventers, and auto-flush units to provide improved water usage and health factors. | Canton Local Schools | 8 | 0 to 30 days | \$251,000 |
| Stark | Canton Local Classroom Furniture | Replace outdated school classroom furniture to improve student engagement and safety and to reduce maintenance costs. | Canton Local Schools | 8 | 0 to 30 days | \$1,500,000 |
| Stark | Canton Local Buses | Replace 10 buses to improve energy efficiency and reduce greenhouse emissions while also reducing maintenance and ongoing fuel costs. | Canton Local Schools | 25 | 0 to 30 days | \$1,000,000 |
| Stark | child and adolescent behavioral health | Phoenix is a nonprofit behavioral healthcare agency that offers counseling, therapy and case management services to children, adolescents, and young adults. Phoenix has increased over the past 6 months to treat children, adolescents, and young adults. Phoenix provides individual, family, and group therapy services. Phoenix has requested our services. There are many evidence based practices to treat individuals and families and the schools that have contacted us would be the best of treatment to include families in action which is a program that deals with behavioral issues, mental and emotional and alcohol and drug issues and working with the parents and children together to change behaviors and practices. Other issues that will be addressed with this population is sex education, stress in school, offender issues. Stats indicate that many of our youth have co-occurring disorders. The breakdown for primary diagnosis is: 50% disruptive disorders, 20% anxiety, 25% depression, 16% alcoholism, 13% ADHD. With our current staff and practices 34 of families seeking a medication, 20 of kids working on graduation completed school. 50% of kids that use substances are clean and working a recovery relapse plan. | Phoenix Rising Behavioral Health Care and Recovery | 12 | 0 to 30 days | \$300,000 |
| Stark | Canton Local Amos McDannel Lighting | Replace all interior lighting because it does not meet current building codes. This will also reduce the amount of electricity needed to run the lighting for the building, thus saving money and environmental costs. | Canton Local Schools | 10 | 0 to 30 days | \$195,000 |
| Stark | Township Hall / Administrative Offices | New brick, 9,000 sq. ft. energy efficient, police offices, meeting hall, records & copy room, kitchen, etc. | Lake Township Board of Trustees | 45 | 181 days or more | \$500,000 |
| Stark | Uniontown Police Complex | Replace wind turbine for alternate electrical source. | Lake Township Board of Trustees | 45 | 181 days or more | \$1,000,000 |
| Stark | Electronic Medical Record | Electronic medical record (EMR) systems have the potential to provide substantial benefits to health care organizations. These systems can facilitate workflow and improve the quality of patient care and patient safety. Although EMRs provide financial benefits by helping to reduce costs and improve revenue, the cost of implementation is a major barrier for public health. Having funding available to support this endeavor will have a positive impact on the sustainability of our organization. | Canton City Health Department | 3 | 31 to 90 days | \$100,000 |
| Stark | Rockwood Park | The development of an environmentally friendly, self-sustaining, "Business Green" community, which will evolve the field of commercial development into a new and innovative area. The goal of this development is two-fold. First, job creation through the encapsulation of a business community built to the standards of LEED certification. Federal funding is requested for the \$200+ million improvements required to develop the business park, which includes water lines, sewer lines, and improvements to the existing retention basin. | City of Canton | 120 | 0 | \$1,300,000 |
| Stark | Bus Garage and offices | The Ohio Schools Facilities Commission (OSFC) has partnered with Minerva Local Schools to renovate our high school and build a new middle school and elementary school. The project is scheduled to be completed by Fall of 2009. The state will not allow our OSFC project dollars to be used to build a bus garage and associated offices. Currently our bus garage and offices are over 90 years old. The offices are in two old houses. The bus garage structure has been deemed unsafe. The walls of our existing bus garage are constructed of brick and block. Each summer we repair the building to attempt to keep the working environment safe for our bus mechanics and bus drivers. The bricks are bowing out and beginning to fall out of the upper levels of the garage. When the building is condemned in the near future we will not have a facility to maintain our buses. We are proposing the construction of a three bay bus garage with offices for our district administrators. The completion of this project would save our district operating expenses, as well as provide a safe and efficient environment for our bus mechanics to repair our buses. Safe buses equal safe transportation to school for all students. | Minerva Local Schools | 35 | 91 to 180 days | \$550,000 |
| Stark | Hercules Motor Corporation | Rehabilitation of historic vacant 27 building industrial complex for event center, office, retail, hotel, and housing. | Sandwich Architects, Inc. | 562 | 31 to 90 days | \$37,500,000 |
| Stark | Fire Station | New 2 bay fire department 1 New ladder fire truck | Lexington Township Trustees | 35 | 31 to 90 days | \$300,000 |
| Stark | Using EXPLORE and PLAN Tests to Increase Course RI | This two-year pilot project seeks to increase the chances for college access and success, particularly among low-income, minority and first generation college students by helping teacher and district capacity to develop and deliver rigorous curriculum aligned with standards for college readiness at the middle and high school level in Stark County, Ohio. | Stark Education Partnership, Inc. | 2 | 181 days or more | \$305,920 |
| Stark | money to live off of and to get out of debt | We further propose this project be considered a pilot for the entire state of Ohio to help inform the redesign of standards and assessments as outlined in Governor Ted Strickland's education reform plan. | home | 0 | 0 to 30 days | \$20,000 |
| Stark | PROJECT NEW START | In doing so, we will utilize ACT's College Readiness Benchmarks, the EXPLORE and PLAN tests, and teacher professional development building on lessons learned from our project, Increasing Student Access and Success in College through Expanding District Capacity to Offer Dual Credit Coursework, and the NCA (National Governors' Association)/ACT Pilot Project: Increasing College Rigor. While that project was concerned with high school coursework, it will provide valuable guidance for our own professional development activities. To the best of our knowledge, this will be the first credit get out of debt raise my family and fix some things around the house | Greater Stark County Urban League, Inc. | 30 | 31 to 90 days | \$1,050,000 |
| Stark | Hotel Onesto | Rehabilitation of historic vacant hotel for housing and retail. | Sandwich Architects, Inc. | 14 | 31 to 90 days | \$1,000,000 |
| Stark | Mercy Medical Center - Practice Management & Elect | The proposed initiative will establish a framework for a comprehensive, interoperable health information infrastructure. This project will provide a means for Mercy's healthcare providers to securely share faces of patient care including electronic referrals, patient record summary, lab results, and billing. The establishment of health information technology will result in improved quality of healthcare, reduced medical errors, reduced healthcare costs, increased administrative efficiencies, decreased paperwork, expanded access to affordable care, and compliance with healthcare-related guidelines. The benefits of this project include Mercy's service area to the consumers of health care in the state of Ohio and the nation. The program will allow for the early detection of infectious disease outbreaks, improved tracking of chronic disease management, and a healthcare evaluation tool based on value. By harnessing the power of health information, Mercy Medical Center will advance 21st century medicine and produce better health outcomes and greater patient satisfaction. | Mercy Medical Center | 89 | 0 to 30 days | \$306,466 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Stark | ADULT TASC SERVICE EXPANSION | Funding this request will allow expansion of needed assessment and case management services for adults with alcohol and drug problems who are involved with the criminal justice system. TASC case managers will work closely with the municipal courts to provide timely assessments and referrals, community-based case management. Workers would link our referrals to the appropriate treatment and assistance to make their transition back into the community. TASC workers will assist our clients in removing barriers for their employment and will provide linkages to job training sites, job openings, as well as assistance to higher education as appropriate. Therefore, while the direct result of funding would be adding 2 new jobs and retaining one, the end result will be an increased number of individuals who may not have been able to secure employment based on their alcohol/drug use and criminal behavior will secure employment and have someone to monitor and assist in their progress. Each TASC case manager would have an approximate case load of 35 individuals at any one time. These workers will be located in the cities of Massillon and Alliance. | STARK COUNTY TASC, INC. | 3 | 31 to 90 days | \$200,000 |
| Stark | Aerial Truck Purchase | The Canal Fulton Fire Department is in desperate need of a fire truck that is equipped with an aerial ladder. This truck would be replacing a 1985 jumper that has served the community well but is approaching the end of its service life. The department has applied for a Assistance to Firefighters Grant for this truck but has not been awarded. The City has grown since 1985 and has numerous commercial buildings that would require the services of an aerial ladder in the event of a fire. The main target hazards are our schools and a large skilled care facility. We cannot currently reach the second and third floors of these buildings with our current ladders. If this project is funded it would help in reducing the property loss caused by fires and would give the firefighters quicker access to upper levels for rescue and fire suppression. This truck would also provide service to the City of New Franklin, The Village of Clinton in Summit County and Lawrence Township in Stark County. The mission of the "Call Me MISTER" acronym for Mentors Instructing Teachers Toward Effective Role Models (Smith)' initiative is to increase the pool of available teachers from a broader more diverse background particularly among the state's lowest performing elementary schools. Students participants are largely selected from among under-served, socio-economically disadvantaged and educationally at-risk communities. | City of Canal Fulton Fire Department | 0 | 181 days or more | \$646,600 |
| Stark | Call Me MISTER Smith | The "Call Me MISTER Smith" program is contributing to the talent pool of excellent teachers by identifying and supporting students who are literally "touching the future" by teaching children. The project provides: • 2 safe educational environment for elementary school students • Tutoring assistance • Mentoring opportunities for middle and high school students • Encouragement to pursue a career in education. | Greater Stark County Urban League, Inc. | 4 | 0 to 30 days | \$25,000 |
| Stark | Your Health, Your Voice, Your Choice | Greater Stark County Urban League, Inc. will establish a health care initiative in the inner city communities of Stark County that will provide information and an opportunity for input on an array of preventive and educational health care issues affecting low-income individuals. Beginning in March 2009, the health care initiative will work closely with Stark County Local Health Districts to conduct community discussions on health related issues that disproportionately affect inner-city residents. Staff will also look for opportunities to engage individuals aimed at providing physical, immunizations, treatment, and education to underserved clients. The health care initiative will also maintain linkages with other community health care partners' extensive network of community social services. Key Expected Results • There will be a clearer picture of the reasons behind the healthcare disparities in Stark County. • Affected populations will be more involved in designing an improved delivery network for health care services. • Project will provide more than 2,000-education and preventative health care and social services. | Greater Stark County Urban League, Inc. | 4 | 0 to 30 days | \$25,000 |
| Stark | Louisville City Water Tower Project | In my mind, the project would include a new water tower for the city and maintenance money for the existing tower. Other similar projects to fund would include water line and fire hydrant replacement. At a recent goal setting session, council agreed to create a "water tower fund" and started with \$50,000 seed money. That is why I flagged "additional funding for an existing program" above. Unfortunately, with our current revenue flow I will be many years before we ever see our project come to fruition without other funding issues. Please understand that this is my idea, and the idea to exempt funds from the Federal Stimulus Initiative has not been voted on by other council members or discussed with the city manager. I feel pretty confident they would agree with my plan. Thank you for your consideration, Clay Gustin Louisville City Council Member Louisville, Ohio | City of Louisville | 30 | 91 to 180 days | \$2,500,000 |
| Stark | Community Employment Initiative | Over the past three years, our job program has placed 50 men and women in full-time employment. However, we are contacted by hundreds of men who have a limited education, few skills, and lack a strong work ethic necessary to hold a job. Many times these individuals come from families who have been on welfare for years, and really did their parents or peers stress the importance of responsibility and self-sufficiency. Today they are dependent on public social service systems, and lack a positive outlook toward their future. They may cope with their present situation by abusing alcohol and drugs and the limited income they are able to obtain. We propose to address this issue through our job training and placement program, which also incorporates case management services. We can help unemployed, inner-city men and women increase their self-confidence, skills in reading, math, English, and computers, and eventually obtain and retain employment, escaping unemployment for good. With your help, over the next year 75 men and women will participate in the program, in 45 participants placed in full-time jobs. To further my education so that I can either obtain a better job to support my family or start my own business so that I can support my family. | Greater Stark County Urban League, Inc. | 60 | 0 to 30 days | \$33,000 |
| Stark | Education help | Request funds to install solar energy for my home. | Griffith Group | 5 | 0 to 30 days | \$35,000 |
| Stark | solar power | Continue my education so I can support my future wife and two kids. I have been laid off and am trying to go back to school but have not been able to achieve this goal of mine due to past bad debt, lack of job, and struggling to find a new job. | Self | 4 | 31 to 90 days | \$10,000 |
| Stark | School Funding | Request funds to install solar energy for my home. | My new and better future | 1 | 0 to 30 days | \$30,000 |
| Stark | caregiver | would like some financial assistance with caring for my younger brother who lives with me. He is on SSI and that helps him with his needs but I feel I should receive some compensation for my shelter and his care, making sure he gets his meals and cook and get him to his dr appointments. Funds would be used to buy adjacent property approx \$300,000. We then would build a new store that would be approx 3000 sq feet we would build down our old store and put in a car wash and add a full service deli. We would like to update our old deli to be more energy efficient models. The new building would be built more energy efficient and create approx 5 new jobs and maintain the current 5 employees totaling 10 employees total. In addition we would add a mix of 2 new store fronts. These opportunities would be passed out to other starting business a greatly reduced rate to help lower to middle income business people the opportunity to start and own their own business. This would create more jobs and opportunity's. | none | 1 | 0 to 30 days | \$10,000 |
| Stark | Expand and Modernize | My husband (an OTR truck driver) and his brother have been working on a project to change the way truck and freight shipping work. They are working with Clinton Score Office, and have been advised that they could have as many as 7-8 patentable items in this project. The money I am requesting for them will cover the patents and allow my husband to get out of the truck and his brother to be free to work full time on this project. My figures for total costs and jobs created/built are guesses/estimates as he is in VA, and I just saw this on the news. But this idea is going to bring many jobs nationwide, not just Ohio, and is going to be a huge positive effect on the environment, and many other areas. Please consider this seriously, and thank you for your time. The phone number I left is mine, if you want to contact my husband, he is at: 330-327-8903, and his name is Bill Brothers. Thank you, Deborah Brothers | Volker's Party Store LLC | 10 | 0 to 30 days | \$1,250,000 |
| Stark | R-TESS | My husband (an OTR truck driver) and his brother have been working on a project to change the way truck and freight shipping work. | Stark | energy efficiency remodel | New construction, and addition to existing housing with new solar power equipment roofing to keep energy usage to a minimum as well as install other energy efficient equipment internally | development | 10 | 31 to 90 days | \$61,876 |
| Stark | Wind Turbine Installation | Our 5.35 acre farm is in a high-wind area (according to wind maps), is surrounded by 850 acres of adjoining farm land and we have a 1/2 mile driveway. Two wind turbines would supply all of our electrical needs and during low electrical usage cycles (spring, summer, fall) our excess electrical generation would be fed back to the electrical grid to help supply other homes. Because of our extremely isolated location, it would be a perfect "example" site with no impact whatsoever on surrounding homes or businesses. We would open our property for other land-owners to view the operation of the equipment and generate for their own properties. We are located on the north end of Stark County, Ohio, only 2 hours from Columbus and slightly over 1 hour from Cleveland or Youngstown, close to interstate 77 and 62, thereby making us easily accessible to a large portion of the state. Our investigations lead us to believe that cost of the equipment sufficient to generate power usage or our use would be approx. \$500,000. Thank you, Elizabeth & Terry Campbell | Campbell's Farm (private) | 3 | 91 to 180 days | \$50,000 |
| Stark | New roof and home improvements | We need a new roof and some home improvements this would about 5 to 10 to work. | Our Home | 5 | 0 to 30 days | \$25,000 |
| Stark | Retail video game software/hardware store | To start up a retail video game software/hardware outlet in Alliance, OH that will create 10 to 15 new jobs to help revitalize the economy here in Stark Co. The industry that is being entered into is a multi-billion dollar a year business. This is a Barney type collector well, whose latents no longer function properly. This well is 60+ years old, and the carbon steel latents will need shipped and then replaced. New business steel latents will be installed. | Legendary Games | 10 | 0 to 30 days | \$1,500,000 |
| Stark | Northwest Collector Well No. 3 Rehabilitation | Once completed, this well should be able to supply 5 million gallons of water per day to the water treatment plant. This is for my family, we have needs, we need to fulfil. we need to pay of some of our loans so our quality of life can be better. Also there are some basics we love to be able to provide for my children, we are desperate as those banks who requested a bailout, only on a smaller scale. IF THIS IS THE WORKING FORM PLEASE DIRECT ME TO THE RIGHT WEBSITE, BECAUSE I AM DESPERATE. THANKS | City of Canton, Water Department | 15 | 31 to 90 days | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Stark | Solutions Center | This project would solve many of the social service problems in our county by creating a "one stop shop" for any/all social service needs. In Stark County, we have many social service agencies that specialize in very specific programming. As a result, many of our community service agencies share the same clients. A typical client referred to us will be asked to travel to the North side of the county for mental health care, then to Southern Stark County for alcohol counseling, then downtown for Anger management, and to the East side to sign up for employment assistance. It is tedious to ask an individual who needs food, to travel all over the globe to seek the help they need. Inevitably, these clients comprehend to this complicated system and retreat to their old destructive lifestyles. The Solutions Center would bring all the social service agencies together to one campus. This would streamline issues for the client, for the client, etc. Consequently, if you need help in Stark County (i.e. a job, shelter, medical care, mental health counseling, etc.); you simply report to one center. Additionally, the Center would offer a new in-patient treatment center. | Project Solutions of Stark County Inc. | 80 | 181 days or more | \$3,000,000 |
| Stark | New Windows and New Furnace | Furnace is at least 45-50 years old have estimate for \$5,200 for new installation, in addition to a bill for \$460 for recent repairs to furnace. Windows are at least 40-50 years old, cheap to begin with, are very drafty and provide very little insulation. Gas bills have been at least \$300 per month, with thermostat set at a normal 65 deg. I was forced to take early retirement due to company bankruptcy as a result of housing competition. My wife is employed parttime. We are on a low, fixed income, and most of our retirement funds have been exhausted due to my recent retirement and the economy. We would appreciate assistance to waterproof our home and make it more energy efficient. | Individual | 4 | 0 to 30 days | \$12,000 |
| Stark | Improve, enlarge program | hire and keep employees, also to repair and maintain sewer line, furnace and play equipment for the children | Johnson & Johnson Day Care | 4 | 31 to 90 days | \$100,000 |
| Stark | Retirement Fund | Due to outsourcing of jobs to China and Mexico, I was forced into early retirement with a big reduction in my pension. I would like to recoup at least part of what was lost. | Terry Nemeth Retirement | 2 | 181 days or more | \$150,000 |
| Stark | Personal Financial Recovery | As an unemployed person, I find it very difficult to secure a job that pays enough to support my obligations. I have been working a security officer job that pays \$5.00 per hour. My obligations far exceed that amount. I am being swindled by late fees and no visible escape from the money that I owe. I would use the funds to pay off my first and second mortgage, I call bank, medical bills that have gone into collection, a car loan and other credit card bills. Any remaining money will be returned to the State of Ohio. | Individual | 2 | 0 to 30 days | \$125,000 |
| Stark | easyMEDS | I served the State of Ohio and Stark County for twenty-four years in law enforcement and find myself unable to earn enough to escape these hard times. Dear Governor Strickland, easyMEDS is a consumer health machine and system developed to address medication non-compliance. This innovation will create new Ohio based jobs in the following areas: 1.) manufacturing the medication dispenser, 2.) national marketing and sales staff, 3.) emergency assistance call center staff, 3.) pharmacy dispensing machine cartridge with prescription medications for the Meds-By-Mail operation. This is an important opportunity for Ohio because the market for this product and related services here and that growing due to three factors: 1.) the growing number of seniors, 2.) longevity increases due to better healthcare and 3.) the number of new medications that have been developed. We have met with National Institute of Health, Lamplight and Engage in Cleveland, Stark County Development Board and Dublin in Landon County who all see great promise in the concept. The location of the business will be in Ohio or in Massachusetts where other partners reside depending on the source of funding and support. It is my goal to create jobs in Stark Ohio to the location. Thank you, Kenneth M. Berman, 513.235.4705 | easyMEDS Medication Management System - a new Ohio | 250 | 0 to 30 days | \$500,000 |
| Stark | Downtown Canton Recovery | New English Pub/Restaurant and Billiards club in Downtown Canton will clean up a street corner and add to the rejuvenation efforts in Canton. Will add minimum 10 new jobs, and install a club and friendly environment and order for the new furniture and equipment. I would like to help secure additional funding to put this project in action. I can provide half of the project funding through individual loans and grants. I would like to request for funds to purchase, move and install large CNC Horizontal Boring Mill, purchase necessary special tooling for this Mill and (2) existing Mills, and add additional capacity for larger projects. | Not yet established | 10 | 91 to 180 days | \$100,000 |
| Stark | Machine Shop Addition | With this addition (3) Large HMTS would be located in Canton Ohio at one facility. This addition would bring work across the USA and more business in Canton, Ohio. Current demand for these machines has us working 24/7 schedules and turning work away. A short term job would require \$500,000 to local Union Trades to install foundation, move machine, electrical. Long term would be to full time jobs in excess of \$60k per year. | CND Industries Inc. | 10 | 31 to 90 days | \$2,470,000 |
| Stark | Update Family Restaurant | New kitchen flooring, Expanding and updating current facility. By expanding and updating it would create 12 new positions. | Ashley's Restaurant | 12 | 0 to 30 days | \$28,000 |
| Stark | Roofing project | Roof is in dire need of major repair to help grow my business and add new customer base. | Knapp Enterprises | 2 | 0 to 30 days | \$125,000 |
| Stark | Care Tracker System | In an effort to effectively manage operations and enhance resident care at Echoing Ridge Residential, it is our desire to implement Care Tracker, the Resource Care Tracker System uses well-mounted touch screen devices located at strategic locations throughout the facility and portable computers to allow staff members to quickly and easily record supportive documentation of all types. Supportive documentation inaccuracies in the form of missed assessments, copied assessments and staff confusion in many long-term facilities has been proven to ripple throughout organizations in quality issues and reimbursement shortfalls. We want to alleviate any potential inaccuracies with the installation of this technology. With Care Tracker, information for all departments can be easily retrievable in a variety of formats for MDS completion, trend analysis, care planning and staff management. Care Tracker can help Echoing Ridge enhance quality of care, improve reimbursement accuracy, advance facility safety and reduce liability exposure. Overall, the addition of Care Tracker would provide us with a much clearer and concise picture of our residents which is crucial for us to | Echoing Hills Village, Inc. | Stark | Drop-Out Intervention Program | Jobs for Ohio's Graduates of Greater Canton proposes to serve 100 at-risk, low income, multi-cultural youth, ages 16-21, who have left the education system prior to attaining a high school diploma. The program will provide instruction of employability skills, self-development skills, internship opportunities and postsecondary education opportunities. Instruction will focus upon skills including career exploration, job attainment, job retention, basic math and reading, communication skills, leadership skills, independent living, teambuilding. Additionally, program will partner with Stark State College of Technology to provide 8 hours of college instruction to program participants. These program specialists will be responsible for success of participants, including job development and placement, high school graduation, postsecondary education enrollment. Expected outcomes include a graduation rate of 50% among drop-outs, a Full Time employment rate of 60%, and a positive customer rate of 60%. Jobs for Ohio's Graduates of Greater Canton has been successfully serving at-risk youth for the past 22 years in the state of Ohio. The Golden Key Center for Exceptional Children, Inc. is a center that cares for children with disabilities as well as medically fragile children. Our program allows parents to return to work or school as we can provide quality programs for children with Down syndrome, autism, cerebral palsy, etc. We have trusted our staff and qualified teachers. The center is new but much needed in the community. We are a 501(c)3 and have raised \$25,000.00 for our center to renovate and open the center. Our project is to assist the community in childcare so that their family can remain healthy and financially secure. We are also approved for the autism scholarship and the Jobs program from the Department of Jobs and Family Services. | Jobs for Ohio's Graduates of Greater Canton | 75 | 0 to 30 days | \$150,000 |

| Stark | renewable energy investment project | operate a small construction company im currently looking to add a green power option to my customers unfortunately I need funds to invest in equipment and training but with the economy right now I must seek assistance thus I am submitting this request I thank you for your consideration | gc construction | 10 | 0 to 30 days | \$50,000 |
| Stark | Modernizing & Greening Facilities for Student Succ | Walsh University will expand and modernize an existing academic building to provide students with the resources they require for academic success. Our plans include incorporating best practice education as we expand our library, increase the space devoted to our learning commons (i.e., study tables, research assistance, tutoring, media resources, etc.), and create state-of-the-art classrooms for student use. All design and construction processes will be accomplished from a "green" perspective, and we intend to seek LEED certification at the next level. Leadership in Energy and Environmental Design | Walsh University | 10 | 181 days or more | \$500,000 |
| Stark | Retrofiting Trash Out Homes | retrofiting buildings, homes, blowing insulation, weather stripping, replacing tiles, wrapping water pipes, trash out homes. Buying & remodeling homes, employing ex-felons. (Plenary for Prison) | JONES REHAB INC. | 8 | 31 to 90 days | \$1,500,000 |
| Stark | KK'S RENNOVATIONS | FIX UP TWO HOUSES AND USE THEM AS TRANSITIONAL UNITS FOR HOMELESS ADULTS AND FAMILIES | KK'S RENNOVATIONS | 8 | 181 days or more | \$40,000 |
| Stark | Marlboro Sewer Project | This project will provide public sewers to approximately 120 households and businesses in the unincorporated town of Mulltown, and potentially a school, commercial and possibly 60 more additional homes. The project will also include replacement of an outdated, undersized stormwater drainage, approximately 4,000 LF, running through the center of the project area. The project will alleviate problems that exist, in part, because of the failure of an old storm water collection system that was constructed with the help of the WPA in the 1930's. During rain events, much of the proposed service area is subject to localized flooding, which causes many of the on-street electric systems to fail. These lines discharge into what used to be a free flowing stream. Several years after Marlboro's drainage system was constructed, the City of Alliance built a dam to create the Marlboro Reservoir for their primary drinking water source. The City of Alliance's public water system, which serves over 25,000 people, has invested a significant amount of money into filtration over the past year because algae blooms in Walborn have created a musty taste and smell to the water. | Marlboro Township | 0 | 181 days or more | \$1,425,000 |
| Stark | Pet Boutique | Pet Boutique selling pet apparel, treats, supplies. Offering dog grooming, and other services to pet owners. I would like to employ people with disabilities and offer them a career. Expected monthly sales to exceed \$12,000 and to bring jobs to canton, oh. | Puparazzi Pet Boutique | 6 | 0 to 30 days | \$50,000 |
| Stark | Ohio Magic | We would like to create a magic shop train people to become Professional Magicians, and teach magic for therapy and treatments as David Copperfield had done with Project magic. We would like to build a team of magicians to not only assist in the magic shop but reach out to the community at local events. How will magic help with Therapy? Magic uses alot of dexterity which helps improve muscle strenght in hands and arms after a Surgery. For children who have speaking problems magic gives those children a chance to shine and encourages them to speak up and clearly. Many Motor skills can benefit this magic from learning to not a coin across your hand and so much more. | Ohio Magic Shop | 8 | 0 to 30 days | \$100,000 |
| Stark | Get jobs in my neighborhood to stimulate spending | Our teaching to the lower incomes, Magic can assist in many ways from giving that child in a group home an opportunity to shine to entertaining children whom other wise has nothing to look forward to but school. This program can become a mentoring program for children who could use a helping hand in our community and keep them off drugs and out of the system. Invite neighbors to spend money by cleaning up the neighborhood and increasing home value | Massillon Neighborhood | 20 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Stark | Family Mentoring | Programming will provide counseling & case management services to at-risk families and families currently involved with the criminal justice system. This program will work to create functional family units. Will assist families with basic needs, food, shelter, medical care, transportation, etc. Will also help establish employment via helping with job skills, putting together resumes, etc. Mental health counseling, alcohol/drug counseling, family therapy will also be incorporated. | Project Solutions of Stark County & Stark County J | 10 | 31 to 90 days | \$800,000 |
| Stark | Family Mentoring | Our agency specializes in working with an adjudicated population, but lack funds to properly assist the client once they are finished with their court counseling program. For example, our jail based program provides a 30 day intensive in-patient counseling program. At the end of their jail sentence, the prisoners are released with only weekly aftercare services and very little supervision/assistance in re-establishing their families. Our success rate would greatly improve if we had the means to closely monitor and assist these individuals/families. | Project Solutions of Stark County & Stark County J | 10 | 31 to 90 days | \$800,000 |
| Stark | Low Income Housing Renovation and Sales | Purchase, renovate and sell abandoned and foreclosed city properties to low income families in order to provide safe, secure housing to those in need. Homes will be sold with interest rates at Prime (currently 3.25%). Interest generated will provide additional, ongoing funding to permit the project to continue and grow. Jobs will be created in the renovation phase and selling phase. Additional work will be provided in the form of subcontractors during the project. All of the funds will end up in the local economy as all building materials will be purchased locally. | Nick Codispoti Construction Inc. | 12 | 31 to 90 days | \$788,000 |
