| 0 | Dist 13, PID 85433, High Speed Rail Ohio Hub | High Speed Rail Ohio Hub and Regional Planning | Ohio Department of Transportation | 215.3 | 31 to 90 days | \$7,500,000 |
| 0 | Dist 12, PID 77331, D12 ITS TRAC | District 12 Its - Freeway Management System (Mot). | Ohio Department of Transportation | 756 | 31 to 90 days | \$26,340,000 |
| 0 | Dist 13, PID 85697, CSX Double Stack Clearance | CSX Double Stack Clearance | Ohio Department of Transportation | 143.5 | 31 to 90 days | \$5,000,000 |
| 0 | Dist 13, PID 85569, Rural Transit 210 Buses | 50 Rural Transit Systems - 210 <30 foot buses (vehicles to replace those beyond useful life | Ohio Department of Transportation | 272.7 | 31 to 90 days | \$9,500,000 |
| 0 | Dist 13, PID 85620, Rural Facility Engineering Des | Rural Facility Engineering Desig | Ohio Department of Transportation | 57.4 | 31 to 90 days | \$2,000,000 |
| 0 | Dist 13, PID 85425, RJ Corman Western Ohio Ln Reha | RJ Corman Western Ohio Lines Rehabilitation | Ohio Department of Transportation | 37.4 | 31 to 90 days | \$1,304,560 |
| 0 | Dist 13, PID 85426, Wheeling & Lake Erie Rail Akro | Wheeling & Lake Erie Railway Akron Subdivision Rehab. | Ohio Department of Transportation | 34.4 | 31 to 90 days | \$1,200,000 |
| 0 | Dist 13, PID 85427, Youngstown/Southeastern Rail L | Youngstown & Southeastern Railroad Line Rehabilitation | Ohio Department of Transportation | 26.9 | 31 to 90 days | \$936,000 |
| 0 | Dist 13, PID 85428, West Cntrl Ohio Port Auth Reha | West Central Ohio Port Authority Line Rehab & Bridge Replacment | Ohio Department of Transportation | 71.8 | 31 to 90 days | \$2,500,000 |
| 0 | Dist 13, PID 85429, US Rail/City of Jackson Ln Reh | US Rail/City of Jackson Line Rehabilitation | Ohio Department of Transportation | 71.5 | 31 to 90 days | \$2,492,000 |
| 0 | Senior Center Expansion | This project will provide a 1,200 square foot expansion to the existing Senior Center for Exercise Equipment and Health Related Support Services | CT Consultants | 30 | 0 to 30 days | \$300,000 |
| 0 | Dist 13, PID 85620, Rural Facility Engineering Des | Rural Facility Engineering Design | Ohio Department of Transportation | 57.4 | 31 to 90 days | \$2,000,000 |
| 0 | Dist 13, PID 85621, Rural Major Equipment Purchase | Rural Major Equipment Purchase | Ohio Department of Transportation | 14.4 | 31 to 90 days | \$500,000 |
| 0 | Dist 13, PID 85486, Statewide Multimodal Plan | Statewide Multimodal Plan | Ohio Department of Transportation | 143.5 | 31 to 90 days | \$5,000,000 |
| 0 | Dist 12, PID 77331, D12 ITS TRAC | District 12 Its - Freeway Management System (Mot). | Ohio Department of Transportation | 756 | 31 to 90 days | \$26,340,000 |
| 0 | Creek Road Phase 1 | Reconstruction of creek road from state route 6 to Ayers Road 2.25 miles - this will include clearing of right of way, road ditches, install subdrainage ditches, grade road and install base material | Cherry Valley Township | 0 | 31 to 90 days | \$940,080 |
| 0 | Dist 13, PID 85430, State-owned Panhandle Line | State-owned Panhandle Line | Ohio Department of Transportation | 287 | 31 to 90 days | \$10,000,000 |
| 0 | Dist 13, PID 85486, Statewide Multimodal Plan | Statewide Multimodal Plan | Ohio Department of Transportation | 143.5 | 31 to 90 days | \$5,000,000 |
| 0 | Dist 13, PID 85507, Project Plans/Design Estimate | Project Plans/Design | Ohio Department of Transportation | 1,033.20 | 31 to 90 days | \$36,000,000 |
| 0 | Dist 13, PID 85507, Project Plans/Design Estimate | Project Plans/Design | Ohio Department of Transportation | 1,033.20 | 31 to 90 days | \$36,000,000 |
| 0 | Dist 13, PID 85507, Project Plans/Design Estimate | Project Plans/Design | Ohio Department of Transportation | 1,033.20 | 31 to 90 days | \$36,000,000 |
| 0 | Dist 13, PID 85486, Statewide Multimodal Plan | Statewide Multimodal Plan | Ohio Department of Transportation | 143.5 | 31 to 90 days | \$5,000,000 |
| 0 | Regional Public Safety Training Facility | | Warren county Joint Vocational School District | | 0 | |
| 0 | Sanitary Sewer Infiltration & Inflow | This project is the rehabilitation with the usage of grouting of over 15,000 LF of sanitary sewer including the rehabilitation 60 sanitary sewer manholes and the installation of 234 chimney seals in sanitary sewer manholes. The current age of this infrastructure is several decades old and has numerous cracks and defects which allow for infiltration and inflow (I & I) of storm water to enter sanitary sewer pipes and eventually be treated, unnecessarily, at our Wastewater Treatment Plant. The elimination of I & I during a heavy rainstorm would stop our Wastewater Treatment Plant from exceeding it's capacity, and causing system backups into homes and overflows into local ponds and creeks. These occurrences put public health at risk and violate state and federal environmental regulations. Plans and specifications for this project are prepared and this project could be ready to go to bid and be completed within 90 days of being funded | City of Greenville | 15 | 91 to 180 days | \$906,000 |
| 0 | Dist 4, PID 85557, SARTA - Bus Wash | SARTA - Bus Wash | Ohio Department of Transportation | 3 | 31 to 90 days | \$170,000 |
| 0 | Campbell Street Improvements | Replacement of 1,500 linear feet of failing storm sewer - project includes replacement of 750 linear feet of water and sanitary sewer, reconstruction of roadway, curb lawn and sidewalks | Village of Loudonville | 15 | 91 to 180 days | \$414,375 |
| 0 | Dist 4, PID 85541, WRTA YSU Integrated Trans Ctr | WRTA - City of Youngstown/Yongstown State University Central Area Integrated Transportation Center | Ohio Department of Transportation | 600 | 181 days or more | \$30,000,000 |
| 0 | Dist 4, PID 85558, SARTA - Bus Lifts | SARTA - Bus Lifts | Ohio Department of Transportation | 4 | 31 to 90 days | \$191,296 |
| 0 | Public Employees | These the money snoug go to helping public employees keep their jobs and reduce cut backs. we have been under staffed for years and are still expected to maintain the same productivity and customer service as if we had all of our resources. Prison guards risk their lives every day at work because of under staffing. No one would want their family member to have to deal with this every day. The public employees are not the slackers and over paid as the public perceives them to be. We provide valuable services and should be treated fairly. | Ohio EPA | | 0 | |
| 0 | Toobla | social networking market space. With an experienced management team in place to drive growth, Toobla is currently in alpha testing with a market launch in Q1, 2009. Funding has been obtained from two Ohio Regional Commercialization Funds a co-investment fund and private investors (\$1.5 M) to develop the product and support the initial launch. Toobla was created to enable Internet users to easily use web applications (widgets) in an integrated way that has never been done before. Mass communication mediums (print, phone, radio, television, Internet) have been introduced in the past but users have never been able to properly use them together; nor have they been able to uniformly communicate over several of them at once. Toobla allows all mass mediums to be stored, accessed and shared within a beautifully simple interface. Toobla isn't just another website or web application. It's a new medium that will take communication to a higher level and allow its users to communicate in real time across several mediums simultaneou | Toobla Inc | 8 | 0 to 30 days | \$500,000 |
| 0 | Village Hall Renovation | The project will consist of the renovation of the current Village Hall and Police Station for energy efficiency and current building codes and accessibility to the public | Village of South Point | 10 | 91 to 180 days | \$1,200,000 |
| 0 | 3C Corridor Construction Funds - Dist 13, PID 85432 | 3C Corridor Construction. The amount requested is the rough estimate of start-up costs for conventional-speed passenger rail service in the Cleveland-Columbus-Cincinnati corridor. Final amount will not be known until Amtrak study and railroad negotiations are completed (summer/fall 2009). | Ohio Department of Transportation | 6992 | 181 days or more | \$250,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---------------------------------------|----------------|--------------------|---------------------------|
| 0 | Delphos Suthoff Street Sanitary Sewer Replacement | Installation of approximately 1600 linear feet of new sanitary sewer and necessary appurtenances to replace existing badly deteriorated lines in the area. Some sections of the lines have experienced heaving which has greatly reduced the capacity of the lines. The existing lines are also undersized and are in need of having increased capacity. The lack of capacity has resulted in flooding events in the nearby park with raw sewage. | City of Delphos | 5 | 91 to 180 days | \$365,000 |
| 0 | Fire Offices Consolidation and EOC surge facility | Regional Operations Center (ROC) Building cost is \$3 million; it needs significant building rehabilitation on the interior. The project would employ carpenters, electricians, laborers, plumbers, surveyors, architects, and technology firms. The rehabilitated building will place Fire Department personnel in one location enhancing safety/service to the public. A Fire personnel resource next to the ROC will enhance public safety/security by serving as a primary incident management (personnel) resource able to ramp up ROC staffing quickly during a City, State, or National emergency. Fire personnel in this building would walk "next door" to the ROC and serve as a ROC force multiplier coordinating with City/County/State and Federal resources for incidents of local/national significance. In unison with the Cincinnati ROC support area project submitted (2-18), the fire service regional coordination benefits/statewide synergy, and resource/labor-intensive rehab of this site would enhance public safety/fire service in SW Ohio. This project employs many and Inre Authentic Italian Restaurant serving the finest homemade Italian food which has been passed down from generation to generation to be called "A Taste of Italy". | City of Cincinnati | 100 | 31 to 90 days | \$5,000,000 |
| 0 | A Taste of Italy | The restaurant will be in Meigs County known to the world as Appalachia. It's a part of the United States that, to some eyes, might look like another country. Appalachia has been called the forgotten America. But this is a different Appalachia from the one President Lincoln addressed targeted 45 years ago in a war on poverty that sought to uplift the region's economic and social plight with an unrelenting infusion of tax dollars. It's generally considered the war was lost. The approach now is self-reliance. People like me need help sustain their community and finally viable salvation for Appalachia is not coming from the outside. I feel the 1st step in revitalizing Meigs County are more homegrown entrepreneurs like myself. I realize opening my restaurant is only a small step...but it's a start to self-reliance for myself and others. More importantly, we would like to rebuild our community one small business at a time. | Restaurant | 8 | 0 to 30 days | \$250,000 |
| 0 | Geothermal Heating installation company start up | Funds or Grants to assist new Geothermal Heating and Cooling Contractor. Business started 1/2017. Funds would primarily be used in employee training, needed equipment, and educating the general public in Geothermal Technology thru seminars and town hall meetings. | Northern High Performance Corporation | 10 | 0 to 30 days | \$50,000 |
| 0 | Energy conservation and efficiency | Install new windows, upgrade heating and cooling systems, upgrade and install weatherized automated control systems in various school buildings. | Athens City Schools | 50 | 91 to 180 days | \$1,500,000 |
| 0 | Youth and Family Resource Center | The Community Foundation of Lansing intends to coordinate school, home, and community efforts to improve the lives and better students. Community efforts will be supported through the development of the Youth and Family Resource Center. The center will provide resources, support, and parenting education to the families of at-risk youth and young children within the school districts of Athens and Belmont Counties, Ohio. Major program components of this endeavor include: Parental and Support Services; A full-time database system and/or resource referral books and information in order to connect families with supportive services; Resource Lending Library; A lending resource to enrich the child's learning environment and to provide the parent with "teaching tools" to use in the home. Parent Education: Topic-specific trainings for families with young children will be offered to strengthen the home and provide preventive measures decreasing family crisis. Family Literacy: Interactive parent and child programming to build family literacy habits in families. Early Childhood Developmental Support: Family play days and programs. | Community Foundation of Lansing | 3 | 31 to 90 days | \$150,000 |
| 0 | Energy Management Program | legislative mandates to conserve energy, the College in 2008 developed and adopted a comprehensive Strategic Energy Plan. This plan would pursue four discrete yet interrelated approaches that would start with putting in place an enhanced building energy management system to include energy systems monitoring and digital controls. Beyond this an array of building envelope retrofits would be provided to impact energy demand volumes. To effect positive change on the supply side management, the College would construction a district wide combined heat and power function to service the various buildings on the campus. At the same time the college would be installing both solar and wind turbine systems to support energy production as well as technical training and demonstration purposes. | Owens Community College | 25 | 91 to 180 days | \$8,900,000 |
| 0 | It Takes Two | goal of the program is to assist the parent to play a positive role in the life of their child, both emotionally and financially. Often this means working on issues with the custodial parent of the family, learning how to spend quality time with the child, or addressing personal issues such as anger management, unemployment, or self esteem. Basic program components are: Career planning, development retention: Each client in ITT completes a career assessment, and receives individual supportive services, which addresses this topic. Personal Development: A prime component of the ITT program is face to face, individual supportive services. Basic Parenting: Many times, new ITT participants have little experience with raising a child. ITT staff reviews the basics. A comprehensive fatherhood curriculum is utilized to assist the fathers in understanding how vital fathers are to the health and development of children. Additionally, ITT participants learn the importance of being financially responsible as well as emotionally responsible for their child. | Four County Family Center | 4 | 0 to 30 days | \$172,000 |
| 0 | Survive bad times | We would expand our snow plowing, snow removal and salting company. We service Akron, Barberton, Copley, Wadsworth, Norton, Fairlawn and Bath areas. We would like to expand company to include purchase of land and build a building to house existing company. We need money to purchase land before the season and purchase more equipment. I am a woman owned company that has been in business for 36 years. I need to expand to help our community and hire more people. By giving people a job and snow plowing, salting and snow removal allows business to function during the bad Ohio winters. We also service many health care facilities. The down turn in market has made money not available to Associated Snow Removal to build the company. High operating expenses and lagging economy makes it impossible to grow this company at this time. | Associated Snow Removal | 20 | 91 to 180 days | \$300,000 |
| 0 | Geothermal Rehabilitation of Homes | I request some help to allow our area to function during heavy snows. This would benefit all not just Associated Snow Removal. Rehabilitating approximately 500 eastern Cuyahoga County suburban foreclosed or vacant homes and renting them to stable families. All these homes will be refitted with Geothermal central heating systems for maximum energy efficiency. The homes will continue to be available for rent until the housing market stabilizes at which time they may be made available to home buying families. | Home Savers LLC | 100 | 0 to 30 days | \$75,000,000 |
| 0 | Medical Monitor | Medical Monitor device and software development that monitors a persons nearn conditions and reports stats electronically to a physician computer or a central server, this device will help keep medical electronically stored and protected. The device can be worn permanently as it looks and functions as a watch, it also monitors blood pressure, heart rate. | WWhite Enterprises | 10 | 0 to 30 days | \$250,000 |
| 0 | Brown CBRDD Tech Project | Prototype and more info available Develop a computer lab for individuals to use who have mental retardation and developmental disabilities served at the habilitation center on a daily basis. This lab would be staffed and consist of 6 computer stations including printers. Note: Currently there are no computers available for the individuals to use. | Brown County Board of MRDD | 2 | 31 to 90 days | \$311,280 |
| 0 | Curves | provide many benefits to over 130 women in the Tipp Cty, OH area. Wellness and Fitness are among the many benefits our Curves' members enjoy daily. We also accept Silver Sneakers, a program sponsored by Medicare to our older members. We want to continue this service to them. We are currently losing members who can no longer afford this valuable service and we are losing approximately \$1000.00 monthly. We can no longer continue to take this loss and are asking you for assistance. We believe if assistance is given we can continue our valuable contribution to the women of Tipp City. | Curves Women's Fitness Center | 8 | 0 to 30 days | \$40,000 |
| 0 | Animal Shelter Facility | An animal shelter is badly needed to contain and care for stray dogs and cats in Madison County | Madison County Commissioners | 12 | 91 to 180 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Adams | North Adams Public Library Capital Project | library branch to be located adjacent to the North Adams High School in Seaman, Ohio. This project will provide educational support, information services, high-speed internet access, and other valuable library services to the 6,556 persons (2000 Census) living in that underserved area of Adams County. Adams County has a significant number of the adult population (one-third) without high school diplomas and high unemployment rates (higher than state averages). One of every two workers travels more than an hour to work and the per capita personal income is well below the state average. Residents are limited in job opportunities by a lack of affordable broadband service throughout the county. Expected outcomes of this project include: learners will utilize online educational resources such as Learning Express, parents will participate in programs such as the Ohio Every Child Ready to Read project, workers will utilize e-government services such as job services, and all residents will benefit | Adams County Public Library | 15 | 91 to 180 days | \$1,200,000 |
| Adams | West Union High School Agriculture Improvement Pro | The project will be the construction of new agriculture science facilities at West Union High School. The construction will include a 1200 square foot greenhouse, a 600 square foot classroom, and a 10,000 square foot shop that will be built as an addition to the existing high school. Approximately 60% of the student body is classified as economically disadvantaged and many of those students are ingrained with a desire to obtain a career as a blue-collared worker. It is my plan to integrate cutting edge science and technology into the new facilities that will motivate students to pursue an education beyond high school and give them an advantage as they pursue their chosen career | West Union High School, Adams County/Ohio Valley S | 100 | 181 days or more | \$4,000,000 |
| Adams | Wastewater Treatment Plant Improvements | The project will allow the Village to address the aged-infrastructure for the wastewater treatment plant in order to meet current National Pollution Discharge Elimination System (NPDES) limits for the existing treatment plant. This project will allow for improved water quality of Beasley Fork and its tributaries due to the ability to address pollutant discharges during storm events. The affected population is 3,081. | Village of West Union | 25 | 91 to 180 days | \$10,000,000 |
| Adams | Wastewater Pump Station Rehabilitation | The project will allow the Village to address the aged-infrastructure for the wastewater collection system by replacing the existing wastewater pump stations and replacing outdated and inoperable equipment. This project will allow for improved water quality of Beasley Fork and its tributaries due to the ability to address pollutant discharges during storm events. The affected population is 3,081. | Village of West Union | 15 | 91 to 180 days | \$2,000,000 |
| Adams | Wastewater Collection System Improvements | The project will allow the Village to address the aged-infrastructure for the wastewater collection system by relining gravity sanitary sewer lines, installation of storm sewers and rehabilitating 438 manholes located throughout the Village. This project will allow the Village to address the aged-infrastructure for the wastewater collection system by relining gravity sanitary sewer lines, installation of storm sewers and rehabilitating manholes that are contributing to the infiltration and inflow in the wastewater system. This project will allow for improved water quality of Beasley Fork and its tributaries due to the ability to address pollutant discharges during storm events. The affected population is 3,081. | Village of West Union | 50 | 31 to 90 days | \$10,000,000 |
| Adams | Water Distribution System Improvements | The project will allow the Village to address the aged-infrastructure for the water distribution system by replacing the systems water meters, paint existing water storage tanks, replace one water storage tank, replace critical waterlines and install fire hydrants throughout the Village. The affected population is 3,081. | Village of West Union | 60 | 91 to 180 days | \$17,800,000 |
| Adams | Saving lives in more ways than One | The Wayne Township Fire Department is seeking the funds to purchase a Sutphen Custom Pumper Shield Fire Truck. At this time our department does not have the funds nor will we ever have the funds to purchase a new fire truck. The Wayne Township Fire Department is a volunteer department with 17 volunteers. We currently serve Wayne Township and mutual aid with 10 more townships. Our operation budget is approx \$39,000. We are looking to replace a 1988 Sutphen Pumper to better serve our customers and provide additional safety to our volunteers. If granted this stimulus money we will purchase a 2009 Sutphen Shield Pumper. The Sutphen Corp is a Ohio based company that has been in Ohio for 116 years, is currently operating with four factories within the State of Ohio and has 135 estimated employees. This is the oldest owned and operated fire apparatus company in the country. The company is based in Hilliard Ohio. Please consider our request, this will help save jobs and save lives in Adams County Ohio. Thank You | Wayne Township Fire Department | 135 | 31 to 90 days | \$325,000 |
| Adams | All Ways Green Growth and Job Opportunities | A 100% disabled veteran, HUBZONE, owned business. Building of infrastructure to increase jobs and local revenue in a HUBZONE area. A 120 ft by 50 ft building with concrete floors, Heated space, electric, a water supply, a chemical mixing and filling station etc, is required and to house Fertilizers, landscaping materials and equipment. Purchase of new equipment, trucks and the hiring of up to 10 personnel for local and outer lying private homes, local, state, and federal contract work. Land has already been purchased for this project. By showing a minimum of 12% increase in contracts to date of the 2009 season, it is necessary to expand and hire personnel. Without the funds, All Ways Green cannot expand and move forward in a business that is not slowing down. I can create jobs and offer stability to the community that has been hit very hard by the economy. Many are looking for work and cannot find it. With this stimulus request we will expand and hire from our local community | All Ways Green | 10 | 31 to 90 days | \$310,000 |
| Adams | Transportation Compound | The transportation building was a 5000 square foot metal structure that would contain the latest EPA requirements for a garage. In addition the compound would provide a secure place to park the school buses. | Manchester Local School District | 20 | 181 days or more | \$750,000 |
| Adams | Smart Board Technology Upgrade | To install smart boards for the high school class rooms. | Manchester Local School District | 2 | 31 to 90 days | \$70,000 |
| Adams | High School Security Upgrade | Upgrade the security at the high school. This would involve redesigning the front office to create a passive entry into the building. | Manchester Local School District | 10 | 31 to 90 days | \$80,000 |
| Adams | Career Technical Education Programs | We wish to increase our educational offerings of career education classes at the high school. We want to increase our students' opportunities with additional programming. The funds would be used to purchase education equipment and restructuring of certain high school classrooms to accommodate the new programs. We would hire 6 teachers for these additional programs | Manchester Local School District | 6 | 181 days or more | \$500,000 |
| Adams | Interventionist Specialist | request funding to continue the existing family intervention program in our school district. Jobs and Family Services has discontinued funding the program due to state cuts taken in December. The family intervention specialist acts as a liaison between the school and other social services. Due to 62% of our students being eligible for free/reduced lunches, our students and their families benefit greatly from this program. | Manchester Local School District | 1 | 0 to 30 days | \$35,000 |
| Adams | Health & Fitness Building | Construct a metal building for the purpose of providing a recreational facility for the students of Manchester Local. There is limited space in the school buildings for afterschool intramural health and fitness programs. This building would allow the district to operate afterschool intramural health and fitness programs. | Manchester Local School District | 35 | 181 days or more | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Adams | Community Youth Center | Develop community youth center for rural town of Manchester, OH and surrounding communities. We will create 1 full time position and 1 part-time position. Develop programs for youth to include, sports programs, community service projects, drug prevention programs, after school programs, summer programs, etc. By providing such programs to the youth we will help to rebuild the community from the ground up. Through mentoring and programs we will help our little citizens to become responsible respectable individuals. This funding will help hire staff to focus on these areas and will help to continue operating the program for the first three years. Funding will also help to repair and maintain building structure and assist with general operations. | Manchester Community Youth Center, Inc. | 2 | 91 to 180 days | \$250,000 |
| Adams | Replace existing buildings on the fairgrounds | Replace existing sheep/goat barn that was built in the 1920's. The structure is used to house the sheep and goat junior fair projects during the fair. This type of project teaches the youth how to care for an animal, how to market their project and social skills. | Adams County Agricultural Society, Inc. | | 0 to 30 days | \$125,000 |
| Adams | Dog shelter | New animal shelter for Adams county, Ohio. Our present shelter has no restrooms, no public admittance, no potable water and is a health hazard to the employees and animals. Our humane society has funding for over 1/2 of the project we are requesting stimulus assistance for. We can provide updated information via the president of our humane society. Our present shelter is over 50 years old, has no windows or fresh air ventilations, no a/c and very minimal heat. We can add at least 3 new jobs and secure current jobs for 3 employees. thank you for considering our request. | Humane society of adam County | 8 | 31 to 90 days | \$150,000 |
| Adams | Install Automated Weather Observing System, obstru | Christine Troutman, Humane Officer, Adams County, OHIC | Adams County Commissioners | 7 | 31 to 90 days | \$5,346,082 |
| Adams | trucking company | Install Automated Weather Observing System; Obstruction removal: grading, runway overlay and runway extension. | trucking | 3 | 31 to 90 days | \$275,000 |
| Adams | Community Cleaning Resource | POOREST COUNTY IN OHIO. THERE IS A DESPERATE NEED FOR THIS SERVICE IN THIS AREA AND SURROUNDING COUNTIES. SOME SOUTHERN OHIO TOWNS ARE LOCATED IN THE FLOOD PLAINS SO WE NEED TO EXPAND OUR SERVICES TO INCLUDE FLOOD DAMAGE RESTORATION. ALSO, THE BUILDINGS WE WOULD LIKE TO REHAB FOR OUR BASE IS LOCATED ON MAIN STREET. IT IS A BUILDING WHICH WOULD INVIGORATE A DEPRESSED DOWNTOWN AND INCREASE THE CITY, COUNTY AND STATE TAX BASE. WE WOULD LIKE TO ADD TWO ADDITIONAL TRUCKS TO OUR FLEET, INCLUDING THE MOUNTED EQUIPMENT. WE WOULD THEN BE IN A POSITION TO EDUCATE THE PEOPLE IN A TRADE AND EMPLOY AROUND TEN PERSONS IN AN AREA THAT HAS HAD ONE OF THE HIGHEST UNEMPLOYMENT RATES IN THE STATE OF OHIO FOR A LONG TIME. | 1ST CHOICE CARPET CLEANERS | 10 | 0 to 30 days | \$110,000 |
| Adams | North Adams After School Program | This would be for an after school program in the North Adams School District if the principal and administrators were in agreement. This would be for the 2009-2010 school year. Also, since obesity is a real problem in children today, I would like to have nutritional counseling and an exercise room for parents and children. The outcomes would be to increase test scores in the public schools, establish positive self esteem through better grades and for a better understanding of why nutrition, exercise and weight loss are significant for children. This is a dream I have to make a difference in the lives of children in my local area. I have not discussed this with our local principal or admistrators, but I feel sure we would partner well. | Churches of Christ in Christian Union | 12 | 181 days or more | \$200,000 |
| Adams | building and remodeling | build and remodel homes for low income using as much enery efficient materials and recycled materials as possible to help familes to more afford an enery efficient or low cost home | self | 5 | 31 to 90 days | \$150,000 |
| Adams | keeping 24 employees working | we have been in business operating a new car dealership for 44 years. we have lost money for the past 2 years, and again losing money in 2009. We are at the place where decisions will have to be made soon, as to what to do. We are in Adams County, the county highest in unemployment in the State. We are not able to sell enough inventory to make the profit we need to pay the employees. It will have to end soon. | bob malcom chrysler dodge jeep,inc | 24 | 31 to 90 days | \$1,500,000 |
| Adams | General Electric Peebles Test Operation Access Roa | General Electric Peebles Test Operations has undergone a \$90 million expansion in the past three years. This expansion has increased the traffic load on the narrow, county road (Jaybird Road) that serves as the only access road to the facility. Currently, four fuel trucks a day holding 1200 gallons of jet fuel each use this road for access as well as oversize trucks hauling jet engines. To improve traffic safety to the GE Facility, this project will flatten a sharp curve in Jaybird Road, widen existing road from 9 foot lanes to 11 foot lanes, add 6 foot wide aggregate shoulders, and install an open drainage system of ditches with pipe culverts to handle occasional high water events from a nearby creek. | Adams County Board of Commissioners | 270 | 31 to 90 days | \$772,000 |
| Adams | Adams County Natural Gas Line Expansion Project | Adams County has suffered from chronic unemployment and high poverty. A lack of infrastructure, particularly the lack of natural gas availability along the State Route 32 corridor, has been a barrier to development opportunities for the county. The General Electric Test Operations located along the SR 32 corridor also needs natural gas availability in order to expand testing capabilities for marine and other engines. This project would expand natural gas lines from the Village of West Union to State Route 247 in Seaman and then east along SR 32 to serve the Village of Peebles and the General Electric Peebles Test Operation facility. | Adams County Board of Commissioners | 30 | 31 to 90 days | \$27,000,000 |
| Adams | Lawshe/Louisville Roads Water Line Extension | This project consists of approximately 26,000 linear feet of 6" water line, 50,300 linear feet of 4" water line and 50,300 linear feet of 3" water line as well as valves, hydrants and service connections for approximately 150 households in an area where a potable supply of drinking water is needed. This project will result in improved health, better quality of life and a safer environment for these households. | Adams County Regional Water District | 15 | 91 to 180 days | \$2,100,000 |
| Adams | Paint Road Water Line Extension | 8,500 linear feet of 12" water line installed to serve a rural area of inadequate service where water pressures fluctuate. | Adams County Regional Water District | 10 | 31 to 90 days | \$300,000 |
| Adams | Lawshe Water Line | 32,000 linear feet of 6" water line; 32,000 linear feet of 4" water line, 40,000 linear feet of 3" water line to serve 165 rural customers who are without a basic need - clean, safe drinking water. The current wells have been tested and are positive for e-coli. | Adams County Regional Water District | 10 | 91 to 180 days | \$1,050,000 |
| Adams | Broadband Connectivity | Adams County has been working toward broadband for all residents of the entire county. With the creation of the Governor's Task Connect Ohio committee, we have set goals to obtain this vision. With this funding we will meet those goals. And help ensure the residents of Adams County new economy and educational opportunities. | Adams County | 10 | 31 to 90 days | \$750,000 |
| Adams | Eckmansville Tank | Installation of an elevated water storage tank to provide adequate water pressure and service to a rural community in Eckmansville, Ohio. | Adams County Regional Water District | 10 | 31 to 90 days | \$200,000 |
| Adams | General Electric Peebles Test Operation Access Roa | General Electric has invested \$90 million in the facility in the past three years and has hired more than 50 employees since 2000. This expansion has already increased traffic volumes on the access road to the site called Jaybird Road. Currently four fuel trucks, hauling 1200 gallons of jet fuel each, use Jaybird Road daily. Jaybird Road is a county road with only 9 foot lanes and a dangerous 90 degree curve. Oversize trucks hauling jet engines pose a traffic hazard on this inadequate county road. A portion of Jaybird Road is below flood level and access to the facility is closed during flooding events. This request will allow Adams County to make safety improvements to Jaybird Road including widening the entrance from SR 73, flattening the curve, widening the road from 9 foot lanes to 11 foot lanes, raising a portion of the road so it is out of the flood plain, and removing unused railroad tracks from a section of the road. This project will retain the current 270 jobs at the facility and allow General Electric to continue to expand its operations in Adams County | Adams County Board of Commissioners | 270 | 31 to 90 days | \$1,300,000 |
| Adams | Parker Ridge Water Line Extension | 17,500 linear feet of 6" water line; 28,000 linear feet of 4" water line to serve approximately 75 rural residences with potable water. Residential wells have been tested and found to contain e-coli. | Pike Water, Inc. | 10 | 31 to 90 days | \$725,000 |
| Adams | WWTP Screen Installation | Existing wastewater treatment plant has no screening process. This will allow the raw sewage lagoons to fill with solid materials that could be removed and landfilled, thereby increasing the life of the facilities. The outcome is one raw waste screen | Village of Winchester | 5 | 31 to 90 days | \$108,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Adams | Treated Wastewater Distribution System | The existing finished wastewater distribution system is manual and extremely labor intensive to operate. A hardpiped system will allow the Village employees to operate the system with much reduced man-hours and stay out of the untreated waste stream. This will be a much healthier environment to work in. Outcome - Piping, spray heads and automated control panel | Village of Winchester | 5 | 91 to 180 days | \$180,000 |
| Adams | WWTP UV System | Project to eliminate unsafe chloring gas used to disinfect wastewater. This project will allow an environmentally friendly product to be used to obtain the same results. The outcome is on wastewater treatment plant ultraviolet disinfection system. | Village of Seaman | 5 | 31 to 90 days | \$180,000 |
| Adams | Police and Fire Emergency Generator | The project will install an emergency generator and associated electrical components that will run critical facilities at the police and fire stations. | Village of West Union | 8 | 91 to 180 days | \$150,000 |
| Adams | Water Storage Tank Improvements | The project will replace and existing 250,000 gallon water tank that was constructed in the 1950's with a new elevated tank that meets current standards. The project will also paint a second 500,000 gallon tank to improve water quality. | Village of West Union | 25 | 91 to 180 days | \$1,700,000 |
| Adams | Automated Water Meter Replacement | The poroject will involve the replacement of 1,300 existing water meters with new automated meter reading meters and associated software. | Village of West Union | 15 | 31 to 90 days | \$450,000 |
| Adams | Adams County/Ohio Valley Pavement Project | To replace/repair/add new asphalt sections in the current parking lots at the Ohio Valley Career and Technical Center, Central Office, Alternative School, and Special Education buildings. This work will require some lime stabilization, soil modifications, removal of chip/seal, and some additional site modifications. Undercutting could be extensive. This will require environmental and structural engineers. After the repairs are made, we will need to put sealant on the asphalt | Adams County/Ohio Valley Schools | 20 | 31 to 90 days | \$75,000 |
| Adams | School Safety, Student and Family Support | disadvantaged families and a high rate of poverty. The Adams County/Ohio Valley District operates three elementary schools, three high schools, a preschool program and a Career Technical Center. We have supported our families, parents, students and teachers with the services of three School Resource Officers (SRO) and three Family Support Specialists (FSS). These people work to reduce violence and drugs in our schools. The FSS work as social workers to be a support and liaison for our parents and families. They also work within the schools to develop and implement student interventions, be advocates and role models for students. These people work closely with community agencies and have been essential in providing services for our young people. Funding sources through Job and Family Services have been eliminated and a result these services will be terminated. Stimulus funding would assist in maintaining these essential student and family supports. | Adams County/Ohio Valley Local School District | 6 | 31 to 90 days | \$400,000 |
| Adams | West Union High School Pavement Project | To replace/repair asphalt sections in the current parking lot at West Union High School. This work will require some lime stabilization and soil modifications. Undercutting could be extensive. This will require environmental and structural engineers. After the repairs are made, we will need to seal with blacktop. | Adams County/Ohio Valley Schools | 10 | 0 to 30 days | \$35,000 |
| Adams | Peebles High School Pavement Project | To replace/repair asphalt sections in the current parking lot at Peebles High School. This work will require some lime stabilization and soil modifications. Undercutting could be extensive. This will require environmental and structural engineers. After the repairs are made, we will need to seal with blacktop. | Adams County/Ohio Valley Schools | 10 | 0 to 30 days | \$35,000 |
| Adams | North Adams High School Pavement Project | To replace/repair asphalt sections in the current parking lot at North Adams High School. This work will require some lime stabilization and soil modifications. Undercutting could be extensive. This will require environmental and structural engineers. After the repairs are made, we will need to seal with blacktop. | Adams County/Ohio Valley Schools | 10 | 0 to 30 days | \$35,000 |
| Adams | Lawshe/Louisville Road Project | Provide a fresh source of water to families that currently have none. This will require running approximately 20 miles of water line, a pumping station, and water taps to individual homes. Purchase and install digital cameras into 46 regular route school buses. We currently have VHS tapes which are ineffective and unreliable. By installing digital cameras in buses we can monitor the behavior of student passengers in order to prevent violence and other unsafe behaviors and reduce the liability of our bus drivers. | Adams County Regional Water | 50 | 31 to 90 days | \$1,000,000 |
| Adams | Bus Safety and Violence Prevention | Test | Adams County/Ohio Valley Local School District | 4 | 31 to 90 days | \$66,585 |
| Adams | Test | Test | Test | 1 | 0 to 30 days | \$0 |
| Adams | widening burnt cabin road | widen aproximately one quarter mile of burnt cabin road. remove existing trees, establish drainage, move existing utility lines, add four feet width to pavement to enhance safety and usability as this is a major secondary highway within the village | village of seaman | 20 | 0 to 30 days | \$250,000 |
| Adams | Rural Broadband Infrastructure Development | Expand broadband infrastructure to extend High Speed data services and voice applications to unserved and underserved rural areas, in such a way that this infrastructure could potentially be shared with Emergency services. This is an updated version of a previous submission. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Adams | Radio Meter Reading Installation | Installation of 7,000 radio read meters to better serve the residents of Adams County. This will allow for the conservation of water. | Adams County Regional Water District | 75 | 31 to 90 days | \$1,200,000 |
| Adams | Rural Broadband Infrastructure Development | Expand broadband infrastructure to extend High Speed data services and voice applications to unserved and underserved rural areas, in such a way that this infrastructure could potentially be shared with Emergency services. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Adams | Saving Peebles Monument Company | Dear Sirs, Peebles Monument Company sells and installs Monuments , Markers and Mausoleums in southern ohio. The company was started in 1922 by several local businessmen. Eventually, was purchased by one of the original purchasers. It is in the same family today. We have some employees that have been with our company for 30 years or more. With stimulus money we could ensure that we could keep these employees, and add new full time workers. We now have to keep as many part-time workers as possible. We could relieve debt that we have acquired over the past 8 years. It is becoming more and more difficult to remain in business in these troubling times. | Peebles Monument Company | 10 | 0 to 30 days | \$250,000 |
| Adams | Monarch Pointe | Stephen C. Ryan New construction of 50 resident skilled nursing nursing facility on 10 acre site. New jobs created (22) and retained jobs (37), plus construction jobs/ New taxes created (real estate and income) to locality and State. Equity and loan funds provide the remainder of financing | Elixir VI, LLC | 57 | 91 to 180 days | \$800,000 |
| Adams | North Adams Outdoor Recreational Complex | The Adams County/Ohio Valley School District would like to design/build a new lighted recreational sports complex in between the new elementary and current high school. This complex would have restrooms, lockers, storage and concessions. Due to location, we would ask for concrete padding and additional bleachers for spectators at baseball, softball and track events. Adjacent to the new complex, we propose a tennis court area that would benefit from the complex lighting | Adams County/Ohio Valley School District | 20 | 91 to 180 days | \$500,000 |
| Adams | West Union Outdoor Recreational Complex | The Adams County/Ohio Valley School District would like to design/build a new lighted recreational sports complex in between the new elementary and current high school. This complex would have restrooms, lockers, storage and concessions. Due to location, we would ask for concrete padding and additional bleachers for spectators at baseball, softball and track events. Adjacent to the new complex, we propose a tennis court area that would benefit from the complex lighting | Adams County/Ohio Valley School District | 20 | 91 to 180 days | \$500,000 |
| Adams | Peebles Recreational Complex | The Adams County/Ohio Valley School District would like to design/build a new lighted recreational sports complex in between the new elementary and current high school. This complex would have restrooms, lockers, storage and concessions. Due to location, we would ask for concrete padding and additional bleachers for spectators at baseball, softball and track events. Adjacent to the new complex, we propose a tennis court area that would benefit from the complex lighting | Adams County/Ohio Valley Schools | 20 | 91 to 180 days | \$500,000 |

|----------------|---|--|---|----------------|--------------------|---------------------------|
| Adams | Adams County Highway Department Facilities | Our existing facilities were constructed during the mid-1970s. The facility has limited energy efficiency and environmental control. With current age and conditions of the facility it is not considered cost effective to update. This project would provide completion of engineering/construction plans and permitting for the construction of a new equipment barn and garage/employee facility meeting current energy and environmental standards. Existing garage and storage buildings would be removed as part of the project to acquire room for a future office complex. The overall site would be re-worked for more efficient utilization and environmental control. | Adams County Engineer | 20 | 181 days or more | \$2,300,000 |
| Adams | Bratton Road Recovery | This projects main focus would be to cut down on maintenance cost, upgrade the asphalt consisting of 15 mile, shovel ready roads. | Bratton Township | 5 | 0 to 30 days | \$1,642,665 |
| Adams | Thermal Imaging | To purchase a thermal imaging camera for use to inform and promote energy efficiency to consumers by detecting heat and air loss. Through thermal imaging consumers may understand and take steps to prevent heating and cooling losses therefore reducing the amount of energy consumption in their homes. | Adams Rural Electric Cooperative | 1 | 31 to 90 days | \$33,760 |
| Adams | Adams County Senior Center energy efficiency retrof | Energy efficiency retrofit for Senior Center that serves Adams County Senior Citizens. Involves replacing roof and gutters and installing roof insulation. | Adams-Brown Counties Economic Opportunities, Inc. | 20 | 31 to 90 days | \$18,000 |
| Adams | Peebles & Tiffin Head Start Centers geothermal ret | Geothermal heating/cooling retrofit for two Head Start centers that serve 120 Head Start families. | Adams-Brown Counties Economic Opportunities, Inc. | 30 | 31 to 90 days | \$28,500 |
| Adams | Bentonville Head Start Center energy efficiency re | Geothermal heating/cooling system installed for Head Start facility that serves 80 Head Start families. | Adams-Brown Counties Economic Opportunities, Inc. | 15 | 31 to 90 days | \$45,933 |
| Adams | Geothermal Installation | Installation of geothermal heating/cooling system for building that houses WIC and Family Planning services for Adams County residents. | Adams-Brown Counties Economic Opportunities, Inc. | 10 | 31 to 90 days | \$17,404 |
| Allen | Industrial Park Roads | Construction, reconstruction and resurfacing of certain industrial park roads. | City of Lima, OH | 30 | 181 days or more | \$2,500,000 |
| Allen | Return employees and maintain positions | Since December 31, 2008, financial cutbacks and lack of funding by the Allen County Commission has eliminated six (6) Deputies and five (5) Correction Officer positions. Projected lack of additional funding in calendar year 2009, indicates five (5) additional Deputies and two (2) Correction Officers will be lost. These initial layoffs have already caused a shortage of Deputies being able to provide law enforcement services to the citizens of Allen County and have created a serious safety concerns for the remaining Deputies. The shortage of Correction Officers has created a critical lack of personnel in the Detention Facility, causing a safety issue for both the inmates and staff. Staffing levels currently are below minimum and are forcing mandated overtime for both Deputies and Correction Officers. This requested funding will allow the retention of seven (7) positions and the return of eleven (11) individuals to employment. | Allen County Sheriff's Office | 18 | 0 to 30 days | \$830,000 |
| Allen | Ash Borer Remediation | Removal of damaged ash trees and installation of appropriate trees throughout the city urban forest | City of Lima, OH | 20 | 31 to 90 days | \$500,000 |
| Allen | Bellefontaine Park | Construction of a park adjacent to Lima Stadium with bike/walk paths and landscaping | City of Lima, OH | 30 | 31 to 90 days | \$2,000,000 |
| Allen | Bridge Restoration | Restoration of Main St. bridge deck, Waste Water Treatment Plant bridge, Bellefontaine structural steel, and culvert replacement. | City of Lima, OH | 80 | 31 to 90 days | \$10,500,000 |
| Allen | General Roadway Resurfacing | General roadway resurfacing with 1.5" of 448 asphalt. | City of Lima, OH | 150 | 0 to 30 days | \$5,000,000 |
| Allen | COPS Hiring Grant | Allen County Ohio consists of both large urban and rural populations and has 13 political subdivisions with a total population of 106,000. The County in recent years experienced high increases in illegal drug sales and use, violent crime, and illegal immigration issues. Due to geographic location, The Joint Systems Manufacturing Center, the multiple bulk oil facilities, the Husky Refinery, and several chemical producing plants, Allen County is considered a high risk area by Homeland Security Experts. Funding for eight (8) additional Deputies would allow for the Sheriff's Office to provide adequate law enforcement services with one (1) of these Deputies being assigned as a full time school resource officer and one (1) Deputy being assigned as a Terrorism Liaison Officer. The other six (6) Deputies will be assigned in various positions as needed combating the drug, immigration, and rising criminal activity which the County is encountering. | Allen County Sheriff's Office | 8 | 181 days or more | \$400,000 |
| Allen | Closing the Gap (Computers and Internet Access to | access to assist these low to moderate income families and their children with tools to study. Our program will make available online tutoring and this study is a requirement with criteria being met by the students, to receive the computer systems. We will monitor the child's success weekly and work with their educational institutions to assure that the program is successful and that the youth are actually learning. We will also require that the families have a minimum number of hours weekly set aside to log into the program together and share in family programming. This part of the program offers family studying, movies, games, parent assisted tutoring, and even library book check-outs. This section of the programming is also mandatory for families to qualify and keep in compliance and will be monitored the same as with the children and their schools. We seek to not only provide families with access, but also to teach them how to utilize this access and how to grow together as a family with it's benefits. We'll teach internet safety as well. We seek to teach as well as | Shiloh Missionary Baptist Church | 2000 | 91 to 180 days | \$10,000,000 |

| Allen | Install geothermal system for the Water Treatment | Green Initiative - Install geothermal system to offset the cost of operating Water Treatment Plant. | City of Delphos | 40 | 91 to 180 days | \$400,000 |
| Allen | Install Power Optimizing devices at the Water and | Green Initiative - Install power conditioner on the equipment that has heavy power consumption at the water and waste water plants. Both plants are equipped with large motor and blowers that rapidly draw large amounts of power off the grid. This rapid draw causes spikes in power consumption. | City of Delphos | 20 | 31 to 90 days | \$200 |
| Allen | Replace water tower erected in 1892 | Replace a one hundred year old water tower. The replacement water tower will serve an area of Delphos that suffers from low water volume and pressure. | City of Delphos | 50 | 181 days or more | \$1,500,000 |
| Allen | Erect new water tower to service the northeast cor | Erect a new water tower to serve an area of Delphos that suffers from low water volume and pressure. | City of Delphos | 50 | 181 days or more | \$1,500,000 |
| Allen | Convert sodium street lights to LED | Green Initiative - Convert the current sodium street lights to high efficient LED units | City of Delphos | 40 | 91 to 180 days | \$400,000 |
| Allen | Replace First Street Water Line | Replace approximately 1500 linear of sand case water line and replace with PVC. | City of Delphos | 40 | 91 to 180 days | \$360,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Allen | Health Department Office Space | Currently the Health Department is housed in 4 separate locations in private buildings, and we are paying out rent amounting to \$146,568 per year. Our desire is to bring our facilities under one roof into a more convenient and energy efficient county owned building in downtown Lima. The building is essentially an empty shell and would need floors, walls, plumbing, HVAC, electrical, and related upgrading. This project would allow us to reduce our housing costs significantly to our taxpayers, and much of funding now used to pay rent could be used to support public health services. This project would also give a boost to local construction workers so they have paychecks, and upgrade an old building in our downtown. | Allen County Health Department | 30 | 181 days or more | \$750,000 |
| Allen | Install a backup generator for the City's Water Tr | The Delphos Water Treatment Plant's only power supply is the local electrical company (AEP). When AEP is down the city cannot produce water. This project would help protect the city's ability to provide safe drinking water. | City of Delphos | 25 | 31 to 90 days | \$400,000 |
| Allen | Install remote water meter readers | Install 2700 remote water meters on the city's residential services. This project would cause the installation of remote which will reduce the cost of collecting the information and billing the city customers. | City of Delphos | 20 | 31 to 90 days | \$340,000 |
| Allen | Install Solar Panels at Public Safety Building | Green Initiative - Install solar panels to offset the cost of operating the Public Safety Building. The Delphos Public Safety Building was constructed in 1888. Because of the building's age it is not very energy efficient. The installation of solar panels will supply power during normal operating hours when the demands on the electrical grid is highest and the cost of electricity is also at a premium. | City of Delphos | 30 | 91 to 180 days | \$250,000 |
| Allen | Install Solar Panels at Water Plant | Green Initiative - Install solar panels to offset the cost of operating the water plant. The Delphos Waste water plant's annual electrical demand exceeds \$280,000 per year. The installation of solar panels will supply power during normal operating hours when the demands on the electrical grid is highest and the cost of electricity is also at a premium. | City of Delphos | 40 | 181 days or more | \$370,000 |
| Allen | Water line loop Gressel Drive to Marsh Avenue | Install approximately 600 linear feet of twelve inch water line. The project would link two dead end lines into one continuous line. This would improve the water quality by increasing the water flow and provide a greater volume of water, needed in the event of a fire. | City of Delphos | 15 | 181 days or more | \$60,000 |
| Allen | Water line loop Carolyn Drive to Main Street | Install approximately 2800 linear feet of twelve inch water line. The project would link two dead end lines into one continuous line. This would improve the water quality by increasing the water flow and provide a greater volume of water, needed in the event of a fire. | City of Delphos | 20 | 181 days or more | \$350,000 |
| Allen | Water line loop Main Street to Hunt Street | Install approximately 1200 linear feet of twelve inch water line. The project would link two dead end lines into one continuous line. This would improve the water quality by increasing the water flow and provide a greater volume of water, needed in the event of a fire. | City of Delphos | 30 | 181 days or more | \$450,000 |
| Allen | FIRE STATION EXPANSION AND RENOVATION | house a volunteer fire department. The Township's population has grown by nearly 2000 since 1960 to a community of 10,000 residents. Bath Township is also home to five of Allen County's ten largest employers, an Ohio State University Regional Campus, and Allen County's Metro Park District. Bath Township's fire department has drastically changed since 1960. Today, the department answers over 1200 calls annually providing fire, EMS, and hazardous material response. The current station is inadequate to house personnel on duty 24 hours a day. The apparatus room and overhead doors are also inadequate to house modern fire apparatus. In 2007 the Board of Trustees hired RP Hughes Architects to conduct a feasibility study for the expansion and renovation of the fire station. The new facility will include a satellite location for the Allen County Sheriff, whose Deputies provide police protection to Bath Township. The new facility will also be ADA compliant, follow NFPA standards, greatly improve energy efficiency and will be a G | Bath Township | 30 | 91 to 180 days | \$2,000,000 |
| Allen | Radios, Cruiser Laptops, etc. | Replacement of communication devices, including mobile data terminals, personal radios and base units with interagency capability. | Lima Police Department | 10 | 91 to 180 days | \$1,000 |
| Allen | COPs | Hire 25 police officers and reestablish neighborhood officers for community policing effort | Lima Police Department | 25 | 0 to 30 days | \$2,000 |
| Allen | Crime Prevention | Hire ten (10) civilian crime prevention officers to assist in implementation of proactive crime prevention measure. | Lima Police Department | 10 | 0 to 30 days | \$500,000 |
| Allen | Allen County Livestock Pavilion | The Allen County Livestock Pavilion will add needed infrastructure to the Allen County Fairgrounds. The approximately 39,000 square foot building will allow the fairgrounds to attract livestock oriented events to the fairgrounds and area. A feasibility study has shown a need for the structure and the estimated annual income to the fairgrounds is over \$100,000.00 with an economic impact to the area in cold dollars of \$850,000.00 annually. The construction of this building would add require the addition of an employee to the fairgrounds staff and help save the jobs of two present employees. The Livestock Pavilion will also enhance the youth involvement during the Allen County Fair allowing a weather protected venue for Jr. Fair Horse and livestock shows. | Allen County Agricultural Society | 3 | 31 to 90 days | \$900,000 |
| Allen | Drug/Violence Reduction Program | Multi-dimensional approach in dealing with the community's drug dealers, and associated community impacts. | Lima Police Department | 3 | 91 to 180 days | \$300,000 |

| Allen | Lima City of - Storm Sewer Improvements, Black Dri | Storm Sewer improvements Black Drive Area of Lima | CITY OF LIMA, OHIO | 100 | 91 to 180 days | \$500,000 |
| Allen | Phone/Communication Upgrade | Police and Road Departments and Dispatch. Employing approximately 50 Full-time employees, we serve a community of approximately 12,000. To better serve our residents and industry, a new phone system is necessary. Additional hubs on the existing phone systems are obsolete and parts have become unavailable. Shawnee Township has phone lines directly connected to our industry for emergency purposes. Industries that we are responsible for include: Husky Refinery, INEOS Chemical Plant (formerly BP) and JSNC (formerly General Dynamics Tank Plant). Response and communications with these facilities are vital to the security of our community, and environment. We are in the process of upgrading our dispatching systems to a CAD system requiring hands-free answering capabilities and compatibility with the phone system. Our project includes the equipment necessary to replace the current system for full and reliable functionality and compatibility. Specifications have been created and a local company will implement the project. The project will im | Shawnee Township | 10 | 0 to 30 days | \$18,896 |

O&P review and approval not required. (Storm Sewer & Open Ditch/ Infiltration & Inflow Elimination) Project consist of 3,200 L.F. of Open Ditch Reconstruction which shall include Leaving Significant Trees; Flush Cutting Trees on Banks and Flowline; Stump Treatment; Flowline Restoration where Necessary; Seeding, Fertilizing, and Mulching Disturbed Areas, Erosion Prevention, and the Establishment of a 20' Permanent Easement for Maintenance. | City of Lima, OH | 50 | 31 to 90 days | \$2,000,000 |
| Allen | Allen County Commissioners ~ Lost Creek Petitioned | Region of Commercial Development. O&P review and approval not required. (Storm Sewer & Open Ditch/ Infiltration & Inflow Elimination) Project consist of 3,200 L.F. of Open Ditch Reconstruction which shall include Leaving Significant Trees; Flush Cutting Trees on Banks and Flowline; Stump Treatment; Flowline Restoration where Necessary; Seeding, Fertilizing, and Mulching Disturbed Areas, Erosion Prevention, and the Establishment of a 20' Permanent Easement for Maintenance. | Allen County Engineer/ Allen County Commissioners | 20 | 31 to 90 days | \$1,000,000 |
| Allen | Lima City of - Reservoir, Pump Station, & Force Ma | Construction of an upground reservoir, pump station, and force main | CITY OF LIMA, OHIO | 100 | 91 to 180 days | \$30,000,000 |
| Allen | Lima City of - Granulated Activated Carbon Filter | Granular Activated Carbon Filters to help manage taste and odor episodes, to lower total organic carbon which would lower disinfection by-products. | CITY OF LIMA, OHIO | 50 | 181 days or more | \$10,000,000 |
| Allen | Allen County Commissioners ~ Colucci Petitioned Di | The project includes a new Culvert Structure, Clearing & Grubbing as Required, 3,700 L.F. Waterway Reconstruction, 9,300 L.F. Conduit Installation, Pavement Replacement, Driveway Repair, and Seeding & Mulching. | Allen County Engineer/ Allen County Commissioners | 100 | 31 to 90 days | \$550,000 |
| Allen | Lima City of - Elevated Water Storage Tank and Boo | Elevated Water Storage Tank and Booster Station to enhance water pressure in the south portion of system. | CITY OF LIMA, OHIO | 25 | 181 days or more | \$3,500,000 |
| Allen | Facade Improvements on Corridors | Grants/loans for improvement of non-design compliant facades and signage; streetscape improvements. | City of Lima, OH | 50 | 0 to 30 days | \$2,000,000 |
| Allen | Bellevue Corridor | Installation of decorative lighting, mast arm signals, and landscaping. | City of Lima, OH | 50 | 91 to 180 days | \$3,200,000 |
| Allen | Allen County Commissioners ~ Baughman Petitioned D | LMI Neighborhood/ O&P review and approval not required. (Storm Sewer/ Infiltration & Inflow Elimination) Project consists of 500 L.F. of Open Ditch re-construction and erosion stabilization, 9,000 L.F. of Storm Sewer Conduit ranging in size from 15" - 30". | Allen County Engineer/ Allen County Commissioners | 20 | 31 to 90 days | \$400,000 |
| Allen | Allen County Commissioners ~ Village of Harrod Pet | LMI Neighborhood/ O&P review and approval not required. (Storm Sewer) Project consist of 700 L.F. of Open Ditch Erosion Stabilization, 2,500 L.F. of 36" Storm Sewer Conduit. | Allen County Engineer/ Allen County Commissioners | 20 | 31 to 90 days | \$250,000 |
| Allen | Riverwalk Connectors | Construction of bikeways linking the Ottawa River Bikeway to parks & schools. | City of Lima, OH | 40 | 181 days or more | \$1,900,000 |
| Allen | Allen County Commissioners ~ W.B. Berryman Pettitio | O&P review and approval not required. (Storm Sewer/ Infiltration & Inflow Elimination) The above estimate is based on 3,900 L.F. of Waterway Regrading or Reconstruction, 3400 L.F. of Storm Sewer Conduit Replacement including Catch Basins and Outlet Protection. | Allen County Engineer/ Allen County Commissioners | 20 | 31 to 90 days | \$250,000 |
| Allen | Allen County Commissioners ~ Welty Improvement Pro | O&P review and approval not required. (Storm Sewer/ Infiltration & Inflow Elimination) Project shall consist of 750 L.F. of 18" HDPE Conduit, 1,069 L.F. of 30" HDPE Conduit, 606 L.F. 36" HDPE Conduit, 1,200 L.F. Open Ditch Reconstruction, Catch Basins & Manholes, Road Cut and Repairs, and Seeding, Mulching, & Fertilizing. | Allen County Engineer/ Allen County Commissioners | 20 | 31 to 90 days | \$700,000 |
| Allen | Hall of Justice Renovations | Renovation of 19,900 sq. ft. of Court and Police Dept. office space including mechanical & electrical systems. | City of Lima, OH | 100 | 181 days or more | \$10,500,000 |
| Allen | City Parking Lot Improvements | City Parking Lot Improvements w/Storm Water Catchments & Metered Spaces for Electric Hybrids | City of Lima, OH | 40 | 31 to 90 days | \$3,000,000 |
| Allen | Allen County Commissioners ~ Shawver & Goddard Pet | O&P review and approval not required. (Storm Sewer) (Primary outlet for Shawnee School) (Storm Sewer/ Infiltration & Inflow Elimination) Project consist of 3,000 L.F. of Storm Sewer Conduit, Open Ditch Stabilization, and the replacement two Roadway Structures that are maintained by the Village of Ft. Shawnee and Shawnee Townships | Allen County Engineer/ Allen County Commissioners | 20 | 31 to 90 days | \$125,000 |
| Allen | Riverwalk Landscaping | Landscaping Phase II and Phase IV of the Ottawa River Bikeway | City of Lima, OH | 30 | 31 to 90 days | \$1,500,000 |
| Allen | Park Improvements | Restoration of shelter houses, ball diamonds, bike/walk paths, basketball courts and poles, and landscaping. | City of Lima, OH | 30 | 31 to 90 days | \$2,000,000 |
| Allen | Allen County Commissioners ~ Steinke Petitioned Di | O&P review and approval not required. (Storm Sewer & Open Ditch/ Infiltration & Inflow Elimination) Project shall consist of 2,175 L.F. of 10"-15" Storm Sewer Conduit and 5,000 L.F. of Open Ditch Erosion Stabilization. | Allen County Engineer/ Allen County Commissioners | 10 | 31 to 90 days | \$112,153 |
| Allen | Allen County Commissioners ~ SPEEDCO, Inc. Pettio | Region of Commercial Development. O&P review and approval not required. (Storm Sewer & Open Ditch/ Infiltration & Inflow Elimination) 4,600 L.F. of Open Ditch Re-construction and Stabilization. | Allen County Engineer/ Allen County Commissioners | 10 | 31 to 90 days | \$75,000 |
| Allen | Eastside Grade Separation | Located in the Village of Beavertown and maintained by Allen County | City of Lima, OH | 100 | 181 days or more | \$20,000,000 |
| Allen | Lima Trust Historic Renovation | Grade separation with the IORY to link Lima Memorial Health Systems and St. Rita's Hospital, and provide safe and efficient emergency services. | City of Lima, OH | 50 | 0 to 30 days | \$2,000,000 |
| Allen | Allen County Commissioners ~ Springhill & Oakwoods | Energy efficient historic renovation of anchor downtown commercial building. | Allen County Engineer/ Allen County Commissioners | 5 | 31 to 90 days | \$175,000 |
| Allen | Allen County Commissioners ~ LaPoint Petitioned Di | Storm Sewer Project. Consists of 3,000 L.F. of Storm Sewer Conduit. The existing storm sewer system is inadequate and/or deteriorated to the point of not providing an adequate drainage facility for all parcels within the watershed. The goal shall be to construct a storm sewer to accommodate the needs of all parcels in the watershed and place it on a maintenance program that will eliminate future hazards. | Allen County Engineer/ Allen County Commissioners | 4 | 31 to 90 days | \$50,000 |
| Allen | Allen County Commissioners ~ LaPoint Petitioned Di | O&P review and approval not required. (Storm Sewer & Rural Septic Outlet) Currently there is an existing storm sewer beginning west of the LaPoint parcel. It flows downstream in an easterly and south easterly direction to it confluence with Camp Creek. Reconstruct so that the system can be placed on the County Permanent Maintenance Program. Currently Routine Maintenance must be completed by each parcel owner. Benefits: Septic Outlets for Residential Parcels, Main Outlet for Agricultural Parcels, Storm Sewer Outlet for Commercial. Consists of 1,200 L.F. of Storm Sewer Conduit, and Waterway regrading. | Allen County Engineer/ Allen County Commissioners | 4 | 31 to 90 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Allen | Arterial Upgrades | Reconstruction of Elm St. from Cable to Woodlawn (4000 l.f.) and Kibby St. from Pine to Leonard Ave (5000 l.f.). | City of Lima, OH | 75 | 181 days or more | \$5,000,000 |
| Allen | Sugar Street Connector | Construction of 4000 l.f. of 3-lane roadway with bridge over Ottawa River. | City of Lima, OH | 60 | 181 days or more | \$6,500,000 |
| Allen | Comprehensive Bike Route | Construction of bike trails and paths linking existing trails and paths to schools, parks and points of interest. | City of Lima, OH | 50 | 181 days or more | \$7,500,000 |
| Allen | LED Streetlighting | Retrofit cobra heads and decorative street lights with LED technology | City of Lima, OH | 30 | 0 to 30 days | \$3,000,000 |
| Allen | Spring Street Bridge Replacement | Replacement of single-span bridge over the Riley Creek that was partially damaged during August 2007 Flood (FEMA Disaster #1720). Prior to the flood, the bridge had weight limitations. Following the flood, the bridge has been ruled unsafe to permit vehicular traffic of any kind. This bridge, and corresponding roadway, serves as the secondary access to the Village of Bluffton's Waste Water Treatment Plant, the Village's Service Department Maintenance Garage, the Village's Public Water System Pumping Station and one elevated storage tank, DTR Industries (the Village's largest employer) and residential homes. The primary access to these facilities lies within the floodplain and was in fact inaccessible during the August 2007 flood. In addition, the loss of the secondary access to DTR has resulted in traffic congestion and lost time at shift-change as all employees are now forced to one point of access. The replacement of this bridge would provide secondary access to the Village's Critical Infrastructure, the Village's largest employer, and Village and Township residents. | Village of Bluffton | 0 | 31 to 90 days | \$200,000 |
| Allen | West Side Interceptor Replacement- Parkview Area | Replacement of 2,650 linear feet of deteriorating concrete sanitary sewer line. Existing line was installed in 1952 within the floodplain of the Little Riley Creek. Line is located near the farthest point from the WWTP and greatly reduces the capacity of the sanitary sewer collection system due to its existing condition and the amount of I&I it allows into the system. During rain events, and especially when the creek overflows its banks, this line allows ground water to enter into the collection system and reduces the capacity of the entire system due to its location at the farthest point in the system. The project will result in the Village regaining capacity in the entire collection system and the WWTP and allow the Village to comply with Ohio EPA and NPDES requirements and regulations | Village of Bluffton | 0 | 0 to 30 days | \$275,000 |
| Allen | Job Search Support Group | In 22 Ohio counties, 5+ job seekers will meet once a week for a one hour session customized to provide the following: proper job search grooming and attire, resume, reference, and pocket resume completion, how to obtain and fill out applications, how to cold call employers, how to use the phone, how and when to divulge a disability, accommodations, other resources and services such as the One Stop or VA, practice and mock taped interviews, information regarding problem solving of common job search pitfalls. Weekly participant assignments will include obtaining and completing applications and employer contacts, effective networking, reading job search articles, viewing job search audio-visual materials, and obtaining proper grooming and attire for their job search. Outcomes - 110 people will receive customized job seeking skills help resulting in at least half of them obtaining employment. | Capabilities, Inc. | 55 | 0 to 30 days | \$60,000 |
| Allen | East Side Interceptor Replacement | Replacement of approximately 4,000 linear feet of deteriorating concrete sanitary sewer line. Village has replaced approximately 40% of the line within the past five years. The existing line was installed in the 1950's and is largest source of I&I on the Village's East Side Sanitary Sewer Interceptor Collection System. The completion of this project would allow the Village to regain capacity in the system that is lost during rain events which has a negative impact on the Village's WWTP operations and capacity. | Village of Bluffton | 0 | 31 to 90 days | \$90,000 |
| Allen | Harmon Road Reconstruction | Complete reconstruction of Harmon Road in the Village of Bluffton. Project includes the reconstruction of 3,000 linear feet of roadway, the installation of 6,550 linear feet of concrete curb, 2, 870 square yards of concrete sidewalk and 6,550 linear feet of storm drain. Harmon Road serves as the primary access to the Bluffton Hospital, the Bluffton Schools Bus Depot and athletic facilities. The Bluffton Hospital is preparing for a \$10 million expansion project which will result in increased traffic in the area and especially on Harmon Road. In 2003, the Village reconstructed the roadway that serves as the secondary access to the hospital and has upgraded the utilities that serve the area. Additionally, this roadway is the secondary access to the Bluffton Stone Quarry, which results in heavy trucks traversing the already failing roadway. | Village of Bluffton | 0 | 0 to 30 days | \$1,250,000 |
| Allen | Jackson and Elm Street Water Main Replacement | Replacement of approximately 5,200 linear feet of water main line on Jackson Street, Elm Street, Cherry Street and Church Street within the Village of Bluffton. The existing line is a cast-iron pipe that was installed in the 1960's and provides drinking water and fire protection for the Bluffton Elementary, Bluffton Middle and High Schools as well as three churches and multiple business and residents. The water lines to be replaced have experienced numerous leaks and main breaks in the past 20-years. However, within the past four months, these lines have begun to rapidly deteriorate, resulting in over twenty leaks and main breaks since November 2008. The condition of these lines jeopardizes the water quality for the recipients and the fire protection for the entire area. The proposed project would replace the deteriorating lines with PVC C-900 DR-18 Water Main line and insure the water quality and fire protection for the schools, churches, businesses and residents that rely on that portion of the Village's water distribution system. | Village of Bluffton | 0 | 0 to 30 days | \$425,000 |
| Allen | West Side Interceptor Replacement | Replacement of 8,700 linear feet of deteriorated sanitary sewer line, associated appurtenances and WWTP modifications. Village is under findings and orders from Ohio EPA to complete this project due to I&I associated with line and negative impact on WWTP equal to a 200% increase in flow into the WWTP during rain events. Existing line is concrete and was installed in 1952 and is the primary cause of sanitary sewer overflows due to rain events in the Village. Project is necessary to comply with Ohio EPA and NPDES requirements. The Village has recently completed a 30+ year project to separate its sewers and eliminated all Combined Sewer Overflows in 2007. Completion of the project will allow the Village to regain capacity in the sanitary sewer system caused by the condition of the line and bring the Village into compliance with Ohio EPA and NPDES regulations. | Village of Bluffton | 0 | 0 to 30 days | \$1,800,000 |
| Allen | Project Ohio-Gem | Utilization of cash to purchase and repair minor issues of existing foreclosure homes for preapproved fha/rural development buyers. There are many foreclosures with minor issues preventing fha/rural development buyers preceding to purchase due to the banks unwillingness to work with fha/rural development buyers. Banks don't want to turn utilities on for inspections, fix broken water lines, fix any repairs, etc. Issues that are required by lending standards to proceed on the loan. I want to purchase these homes for the buyer, repair minor repairs and resale to the fha/rural development buyer at the minimum cost, with very little minimum profit. There are so many buyers that want to buy these homes, but cant because of minor issues that cant be overcome and the loan cant proceed. This will in turn get an FHA/Rural Development buyer into a foreclosure and will in turn get the foreclosed home generating revenue back into the county and city municipalities. The money will be used over and over. | Realtor/Owner | 5 | 0 to 30 days | \$175,000 |
| Allen | Jr. Fair Science and Exposition Building | The Jr. Fair Science and Exposition Building is a 25,000 square foot building proposed to be constructed on the Allen County Fairgrounds. The building will allow the Allen County Fairgrounds to continue to serve the community as a place of assembly, youth education and offer a source of income for rental to commercial interests bringing needed business and visitors to Allen County. It is estimated that construction of the building will add one job to the workforce at the Allen County Fairgrounds and enable two others to be saved. Feasibility studies show income to the Fairgrounds with construction of this building of approximately \$100,000.00 and economic impact to the community of over 1,000,000.00 annually. | Allen County Agricultural Society | 3 | 91 to 180 days | \$1,500,000 |
| Allen | Residential Energy Upgrades | Residential energy upgrades | City of Lima, OH | 200 | 91 to 180 days | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Allen | Equipment update | Due to financial cutbacks the Allen County Commissioners have allocated no funds to the Allen County Sheriff's Office for the category of Capital Improvements in the calendar year 2009 and has projected the same no funding in 2010 for capital improvements. The Sheriff's Office is in dire need to replace at least ten (10) vehicles due to age, previous damages, high mileage, and increased maintenance costs. The AFIS (Automated Fingerprint Identification System) is desperately needed as the crime rate has risen, with more fingerprints being obtained that need to be processed. Fingerprints obtained as evidence from crime scenes need to be more rapidly compared for possible matches to identify suspects of criminal activity so the suspects can be prosecuted. This system will allow quicker criminal recognition, case advancement, and storage of suspects fingerprints for future comparison with other agencies. | Allen County Sheriff's Office | 15 | 181 days or more | \$290,000 |
| Allen | Commercial Energy Upgrades | Commercial energy upgrades | City of Lima, OH | 400 | 91 to 180 days | \$10,000,000 |
| Allen | City Building Retrofits | Energy retrofits and building envelope sealing (lighting, windows, doors, mechanical and electrical). | City of Lima, OH | 30 | 31 to 90 days | \$1,500,000 |
| Allen | Fire Stations Energy Retrofits | Fire stations energy retrofits and building envelope sealing (lighting, windows, doors, mechanical and electrical). | City of Lima, OH | 10 | 31 to 90 days | \$500,000 |
| Allen | Reservoir Windmills | Construction of windmills on City-owned property. | City of Lima, OH | 50 | 181 days or more | \$5,000,000 |
| Allen | Hybrid Vehicle Purchase | Hybrid Vehicle Purchase for City Fleet. | City of Lima, OH | 200 | 31 to 90 days | \$5,000,000 |
| Allen | Electric Utility/Distribution | Electric Utility/Distribution - connectors to gasification plant. | City of Lima, OH | 50 | 91 to 180 days | \$4,000,000 |
| Allen | Energy Retrofits | Energy retrofits. | City of Lima, OH | 40 | 91 to 180 days | \$3,000,000 |
| Allen | Lima Public Library Renovations | Lima Public Library Renovations. | Lima Public Library | 50 | 0 to 30 days | \$2,000,000 |
| Allen | Allen County Museum HVAC, Electrical & Systems Upd | Allen County Museum HVAC, Electrical & Systems Updates. | Allen County Museum | 75 | 91 to 180 days | \$3,000,000 |
| Allen | Solar Panels for Rooftops | Solar Panels for Rooftops. | City of Lima, OH | 30 | 91 to 180 days | \$2,000,000 |
| Allen | School Buses | Replace 20 school buses with hybrid vehicles. | Allen County Regional Transit Authority | 15 | 31 to 90 days | \$2,000,000 |
| Allen | RTA Buildings, Shelters & Facilities | Demolish depleted RTA buildings, shelters & facilities, and replace with energy efficient facilities. | Allen County Regional Transit Authority | 30 | 31 to 90 days | \$2,000,000 |
| Allen | RTA Rolling Stock | Replace four (4) passenger buses with hybrid vehicles. | Allen County Regional Transit Authority | 15 | 31 to 90 days | \$2,400,000 |
| Allen | Cairo - Water System | The project would be the village of Cairo containing a water supply from the city or from a well system. A 16" watermain would be extended to the village of Cairo and 8" watermain would be installed throughout the town. The project would consist of approximately 12,000 LF of 16" water main, 15,000 LF of 8" watermain, 30 Fire Hydrants, 200 individual water service connections and other miscellaneous items. | Village of Cairo- Fanning/Howey Civil Engineering Division | 0 | 91 to 180 days | \$1,500,000 |
| Allen | Cairo - Main Street Replacement | The project would be the replacement or main street, which is the most congested street in the village. The street sees a substantial amount of traffic as compared to the rest of the village streets and the existing concrete street is breaking up in many areas. The project would consist of the removal and replacement of approximately 3200 LF of roadway including curbing, driveways and sidewalk. The project would also involve some storm sewer improvements | Fanning/Howey Civil Engineering Division | 0 | 91 to 180 days | \$1,500,000 |
| Allen | Replace bridge on Franklin Street. | Remove and replace insufficient bridge located on Franklin Street | City of Delphos | 20 | 91 to 180 days | \$250,000 |
| Allen | Various Paving Projects | Resurface various streets within the city limits. | City of Delphos | 100 | 31 to 90 days | \$2,000,000 |
| Allen | Construct a new Public Safety Building | Construct a new public safety building to replace the existing structure build in 1888. The new facility will house the fire, EMS, police and a central communication center in one facility. | City of Delphos | 100 | 91 to 180 days | \$5,950,000 |
| Allen | WiFi the City of Delphos | Create a broadband network throughout the City of Delphos. This project will support economic development and the educational needs of the community. | City of Delphos | 50 | 91 to 180 days | \$1,100,000 |
| Allen | Replace Bridge on Third Street | Remove and replace insufficient bridge located on Third Street | City of Delphos | 20 | 181 days or more | \$275,000 |
| Allen | Replace bridge on Pierce Street. | Remove and replace insufficient bridge located on Pierce Street | City of Delphos | 20 | 181 days or more | \$335,000 |
| Allen | Technology Update | Due to financial cutbacks, the Allen County Commissioners have allocated no funding to the Sheriff's Office for the category of Capital Improvements in the calendar year 2009 and it is projected that no funding will exist in 2010. The Sheriff's Office has had little funds for computer upgrades over the past several years and there is a need to upgrade the current operating system so as to make all computers compatible with the various law enforcement agencies and sub divisions within Allen County and statewide. The Allen County Sheriff's Office uses a central records management system which is used by all divisions, including uniform, detective, records, corrections, civil, drug enforcement, and other agencies in the county. As part of the system, computers are placed in mobile patrol units so they might access and enter information in the field. These computers are needed to be upgraded so as to interface with the records management system | Allen County Sheriff's Office | 0 | 181 days or more | \$132,900 |
| Allen | School Buses (REVISED) | Replace 20 school buses with hybrid vehicles. | Lima City Schools | 15 | 31 to 90 days | \$2,000,000 |
| Allen | Video Clarification System | detectives, and 2 part-time officers. With the rise in crime and budgetary cuts, it is necessary to seek funding for equipment to maintain operations so that we may retain our personnel. Shawnee Township's crime rate has increased with the downfall of the economic situation. In order to assist the department in the investigation of crimes we have prepared specifications for a video analysis system. The system will aid the department with enhancing crime video for positive identification or evidence. In addition, the system will be compatible with our local industry's security systems. Shawnee Township is responsible for the response to industry such as: JSMC (Tank Plant), INEOS Chemical Plant, and Husky Refinery. We have intensely collaborated with these industries on homeland security since the attacks of September 11, 2001 to ensure the safety of our community. This system can enhance video from the industry that is directly routed to the Township dispatch. | Shawnee Township | 10 | 0 to 30 days | \$22,699 |
| Allen | Left Turn Lane on Elida Ave | The proposed project cost is \$22,699.00 and will serve a dual purpose of crime solving, reduction and install left turn left, curbs and gutters on Elida Ave. Project consist of resurfacing and widening approximately 2800 linear feet of paving and install approximately 5600 linear feet of curb and gutters with supporting drainage. | City of Delphos | 50 | 91 to 180 days | \$1,100,000 |
| Allen | Convert a cross over intersection to a "T" interse | Convert a high accident cross over intersection to a "T" intersection at Elida Rd. and Elida Ave. | City of Delphos | 50 | 181 days or more | \$800,000 |
| Allen | Left Turn Lane on Elida Road | Install left turn left, curbs and gutters on Elida Road. Project consist of resurfacing and widening approximately 2400 linear feet of paving and install approximately 4800 linear feet of curb and gutters with supporting drainage. | City of Delphos | 50 | 181 days or more | \$1,200,000 |
| Allen | Focussed Energy Solution | Development of Single unit alternate renewable energy systems ..Including Single Family/ farm. and transportation | Quest Machine Sales | 100 | 181 days or more | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Allen | Ubuntu Linux Training | A highly influential international company providing Linux solutions for everything from large businesses to the new netbook mini-computers is looking to expand it's American training offerings. As a small company currently providing linux solutions to my existing customers, I am seeking a partnership with this company to help provide training locally. This training will benefit Ohio businesses because it is an advanced and high-demand technology. I would like to expand my business to be able to provide on-site and in-house training for interested Ohio businesses. The trainees will learn how to build and configure high-traffic servers and to configure Linux servers for advanced solutions such as clustering and engineering applications. | WanTii, Inc. | 10 | 31 to 90 days | \$1,000,000 |
| Allen | American-Bath Sewer Sub-District Trunk Sewer | This project will consist of constructing approximately 5000 lineal feet of new sanitary sewer to alleviate a sanitary sewer overflow that is being required to be closed by Consent Order from OEPA | Allen County Sanitary Engineering Department | 20 | 31 to 90 days | \$1,300,000 |
| Allen | Woodbriar Pump Station and Force Main | This project consists of constructing 2,655 lineal feet of force main and pump station and 300 lineal feet of gravity sewer to replace a package wastewater treatment that has outlived its useful life | Allen County Sanitary Engineering Department | 20 | 31 to 90 days | \$400,000 |
| Allen | Allentown Pump Station Replacement | This project will consist of replacing an existing pump station that has outlived its useful life. This project consists of constructing approximately 14,000 lineal feet of various size gravity sewer, 6,000 lineal feet of 24 inch force main and pump station. This project is being constructed to eliminate sanitary sewer overflows that are being required to be eliminated in accordance with an OEPA Consent Order. | Allen County Sanitary Engineering Department | 10 | 181 days or more | \$600,000 |
| Allen | Shawnee No. II Sewer Sub-District Trunk Sewer Repl | This project consists of constructing an expansion to the existing Shawnee No. II Wastewater Treatment Plant. This project is being constructed to eliminate sanitary sewer overflows that are being required to be eliminated in accordance with an OEPA Consent Order. | Allen County Sanitary Engineering Department | 20 | 181 days or more | \$6,250,000 |
| Allen | Shawnee No. II Wastewater Treatment Plant Expansio | This project consists of constructing an expansion to the existing Wastewater Treatment Plant. This project is being constructed to eliminate sanitary sewer overflows that are being required to be eliminated in accordance with an OEPA Consent Order. | Allen County Sanitary Engineering Department | 30 | 181 days or more | \$19,600,000 |
| Allen | American-Bath Wastewater Treatment Plant Expansion | This project is being constructed to eliminate sanitary sewer overflows that are being required to be eliminated in accordance with an OEPA Consent Order. | Allen County Sanitary Engineering Department | 30 | 181 days or more | \$7,600,000 |
| Allen | MacDonell House roof and gutter repair | Preservation of 1893 Victorian house listed on the National Register. Replace 700 square feet of roof, replace 200 linear feet of box gutters; repair and replace damaged slate roof and the woodwork installation of approximately 1200 linear feet of new waterline to replace existing deteriorated lines. The existing lines have experienced numerous leaks and have thus resulted in the loss of numerous gallons of treated water. | Allen County Historical Society | 15 | 31 to 90 days | \$93,000 |
| Allen | Delphos First Street Waterline Replacement | Bus washer for Allen County RTA | City of Delphos | 5 | 91 to 180 days | \$194,000 |
| Allen | Dist 1, PID 86053 ALL bus washer | Security cameras for Allen County RTA | Ohio Department of Transportation | 1 | 91 to 180 days | \$50,000 |
| Allen | Dist 1, PID 86037 ALL security cameras | Capitalized maintenance for Allen County RTA | Ohio Department of Transportation | 2 | 91 to 180 days | \$87,500 |
| Allen | Dist 1, PID 86033 ALL capitalized maintenance | ADA paratransit service for Allen County RTA | Ohio Department of Transportation | 3 | 31 to 90 days | \$182,927 |
| Allen | Dist 1, PID 86043 ALL paratransit service | Overhead fueling station for Allen County RTA | Ohio Department of Transportation | 2 | 31 to 90 days | \$77,970 |
| Allen | Dist 1, PID 86036 ALL Overhead fueling station | cruisers and 2 unmarked police vehicles from our aging fleet. The vehicles are used daily by our full-time police department. Shawnee Township patrols 54 road miles daily and assists the surrounding entities, including the Allen County Sheriff's Department, the City of Lima, the Village of Fort Shawnee and other connected agencies. While many smaller Townships rely on the County Sheriff, Shawnee Township employs 11 full-time and 2 part-time Officers, 2 Detectives and 8 dispatchers. We respond to over 5645 calls for service annually. Due to budgetary cuts it is necessary to gain funding for outdated equipment so that we can maintain our current workforce. Our vehicles patrol over 3000 miles per month and are scheduled on a rotating replacement program. We have specifications to replace 2 marked cars with 2009 Ford Crown Victorias and the 2 unmarked cars with a Ford Flex-fuel vehicle and a Ford 4-cylinder vehicle, both allowing for a reduction in fuel usage. The requested funding allows Shawnee Township to serve our community of 12,000+ and maintain our w | Ohio Department of Transportation | 2 | 91 to 180 days | \$80,000 |
| Allen | Unmarked Police Cruisers | The Lima Trust building was built in 1928 and is located in the heart of downtown Lima. It has been empty for nearly 20 years and is in desperate need of renovation. The local market has not afforded the renovation to date. There have been several entities interested in moving into the building, but the cost to renovate cannot be covered with the current market rent or even purchase price. This grant, if received, would allow us to take the first step in removing all asbestos and other environmental hazards to begin the renovation of this building. Renovation of this building is the key component to kick starting the renovation of the entire downtown area. All local leaders, mayor and county commissioners are in support of this project. This building is a historic landmark and will undoubtedly be lost if renovation is not began soon. | Shawnee Township | 10 | 0 to 30 days | \$96,125 |
| Allen | The Lima Trust building NPS Project # 22049 | Replace two vehicles with two fully equipped police cruiser. Due to a shortage of funding one police cruiser salvages and another is in dire need of replaced. The request is for two fully equipped cruisers that include MARC's radio, siren, lighting system, radar, in-vehicle camera, and a mobile data terminal. | Town Square Center and WCOIL | 10 | 31 to 90 days | \$200,000 |
| Allen | Replace police cruisers | Construction of a 500,000 gallon water tower to provide more storage and better water pressure in the outlying area of the village water system. | City of Delphos | 10 | 31 to 90 days | \$78,000 |
| Allen | Elida Water Tower Construction | Construction of wastewater oxidation ditch to improve the quality of the effluent to be discharged in the Ottawa River that runs through the Village of Elida, Ohio. This would be the last major construction necessary to bring the wastewater up to a higher standard of effluent to keep the river clean. | Village of Elida, Ohio | 20 | 31 to 90 days | \$1,000,000 |
| Allen | Wastewater Upgrade - Addition of oxidation ditch | The Village has been looking for a way to afford to slip line the main lines in our sewer system to greatly decrease the amount of infiltration in the system | Village of Elida, Ohio | 20 | 91 to 180 days | \$750,000 |
| Allen | Sanitary Sewer Slip Lining | Trim, Edison Welding Institute, The Ohio State University, Ohio Energy & Advanced Manufacturing Center, and Oak Ridge National laboratory to investigate and develop a novel process for metal assembly and joining. This project seeks to employ magnetic pulse joining (MPJ) to both reduce manufacturing energy consumption and as an enabling technology to reduce the structural weight of vehicles by joining dissimilar light-weight, advanced materials. This reduction in vehicle weight will yield significant improvements in energy savings and reduction in the carbon footprint of the transportation sector. Key technologies that will be developed in this proposal - magnetic pulse welding and impact interference fits - have the potential to overcome these obstacles. The automotive industry is a key employer in the State of Ohio, and the competitiveness of the auto industry is critical to the nation's economic progress. This project is a triple win in that it will reduce the manufacturing carbon footprint, reduce manufacturing energy consumption and create high pay | Village of Elida, Ohio | 15 | 91 to 180 days | \$1,000,000 |
| Allen | Magnetic Pulse Joining of Dissimilar Materials for | Revamp the Veteran's Memorial Civic and Convention Center with new energy systems, windows, and building upgrades to become a state of the art energy conversation project. Current system is 25 years old. | EMTEC | 120 | 0 to 30 days | \$2,870,000 |
| Allen | Veterans Memorial Civic and Convention Center Gree | Replace the Library's 50 year old HVAC system with modern efficient components and control systems. | Veteran's Memorial Civic and Convention Center | 5 | 91 to 180 days | \$5,000,000 |
| Allen | Library HVAC Renovation | Outcomes: 1. Increased efficiency (current system is 40% efficient). New system will move efficiency to a minimum of 90%. 2. Increased ability to control humidity and temperature. 3. Improve air quality to meet current standards. 4. Increased reparability. Current components are no longer manufactured and require custom fabrication. 5. Issues code compliance for electrical systems. Relocation of the air handling equipment and efficiency also requires significant repair to and replacement of roof systems. | Lima Public Library | 50 | 0 to 30 days | \$1,416,533 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------------------|----------------|--------------------|---------------------------|
| Allen | Elida Branch of Lima Public Library | Build a state-of-the-art library branch facility for the Library's busiest satellite community location. New space will allow the following outcomes: 1. Increase library material offerings, freed from currently available to community. 2. Increase access to high speed internet computers from 1 to 10. 3. Provide study hour and ready to read programming. 4. Provide adult programming and continuing education. 5. Provide public meeting space. | Lima Public Library | 50 | 31 to 90 days | \$1,250,000 |
| Allen | Spencerville Branch Outdoor Learning Center | The Spencerville Outdoor Learning Center would complete the habitat restoration adjacent to the Library Branch facility, contiguous with Spencer Township Park and Spencerville Village Schools. The area will be planted with native grasses, trees, and plantings. These will be identified in the outdoor gazebo so that educational programming will be possible. Grading and site work is completed. Plantings, pathways, and gazebos are to be completed. | Lima Public Library | 20 | 31 to 90 days | \$125,000 |
| Allen | Spencerville Branch Parking Lot | Pave the gravel parking lot portion the Spencerville Branch of the Lima Public Library | Lima Public Library | 5 | 0 | \$23,000 |
| Allen | Water Treatment Plant Improvements | New nanofiltration membrane water treatment plant with iron removal filters. Plant to provide softened water to our community of 2,200 residents. This will replace the current system which aerates and chlorinates the water before pumping to the consumer | Village of Spencerville | 200 | 181 days or more | \$1,000,000 |
| Allen | Lima Downtown, as College Center | There are several buildings in downtown Lima that offer an excellent location, an existing infrastructure which would make excellent college campus classrooms. The City has done an excellent job of rehabilitating the center city with parks, public transportation, a conference center, and other amenities that would fit well into an overall, coordinated campus center for many of the existing colleges, which could use these spaces for coordinated course offerings and additional classroom space at bargain prices. This proposal is for gathering the information about all the available space, showing it on downtown Lima maps, and preparing information packets for the interested colleges to consider. Several have verbally indicated their interest, but they need more detailed documentation for the presentation and facts of the existing situation. Some of the building owners have suggested their willingness to form a non-profit association to jointly offer these properties in this fashion. | Norton Engineering, LLC | 70 | 31 to 90 days | \$40,000 |
| Allen | Main Street Reconstruction including all infrastru | This project would save restaurant, transportation, and building maintenance jobs within the Lima City Center, and make classroom space | Village of Elida, Ohio | 75 | 91 to 180 days | \$1,500,000 |
| Allen | Greenlawn Avenue complete reconstruction | Rebuild Greenlawn Avenue curbs, gutters, storm sewers and complete water line inside the village | Village of Elida, Ohio | 75 | 91 to 180 days | \$1,000,000 |
| Allen | North Street new construction | sanitary sewers, water lines etc. New construction to extend North Street to better handle school traffic at new school being built on site. | Village of Elida, Ohio | 75 | 31 to 90 days | \$500,000 |
| Allen | Agile manufacturing in metal forming | change the Ohio metal forming industry and enable a shift from mass production to mass customization—the manufacturing frontier. Today's manufacturer must be quick and agile – with reduced lead times to product parts and limited use of expensive tooling. HVMF enables agile manufacturing methodology through green delivery of design changes in a timely manner with minimal cost attributable to tool and die changes. EMTEC will lead a team comprised of American firms, the Ohio State University, Cutting Dynamics, Honda, Whirlpool and the Ohio Energy & Advanced Materials Center to develop and demonstrate the use of HVMF to produce key parts for both the automotive and appliance industries. The project will accelerate commercialization by demonstrating that HVMF eliminates the need for matched tools, and its associated costs in materials and set-up, and can form high strength materials better than competing methods by manufacturing proofs of large scale applications in real world production. Direct job impacts | EMTEC | 275 | 31 to 90 days | \$5,000,000 |
| Allen | Rural Broadband expansion in West Central Ohio | WCOIL has been a leading Internet Service Provider since 1995. Primarily serving West Central Ohio, there are approximately 40,000-50,000 consumers in our service area that do not have access to any broadband internet connection. WCOIL has a proven track record of designing, installing and maintaining networks in an efficient manner. By expanding our network, we will give the residents and businesses in West Central Ohio access to the information highway that will allow them to compete in the global marketplace. It also makes this area more attractive to new businesses looking to locate in West Central Ohio. Being competitive in the global marketplace is essential to putting people back to work in Ohio. | WCOIL | 20 | 31 to 90 days | \$5,000,000 |
| Allen | Plaza Manufactured Home Park replacement Sewer Pro | 3000 feet of 4 to 8 inch sewer pipe replacement or lining of some of it. Project to include traps, and additional fittings. Project has been mandated, but funds are not available at this time | Stites Tri Park Rentals | 12 | 31 to 90 days | \$120,000 |
| Allen | Manufactured HOme Park replacement sewers | Recently the Ohio EPA had mandated that two parks we own be hooked into central sewers. Now it has been determined that the old lines are leaking and must be repaired or replaced. Unfortunately we do not have the funds for this project and there are several hundred people living in these parks. Another park has already closed because they could not afford the sewers either. Hopefully one or both of our parks will qualify for funds. Thank you for your consideration | Shawnee Manufactured Home Park | 12 | 91 to 180 days | \$100,000 |
| Allen | Westminster Volunteer Fire Department | New fire department facility with a - easy apparatus floor and will include large training, fitness, meeting and community crisis center multiple uses room. Also office, radio room, small kitchen, will be totally handicapped accessible, and restrooms with shower facilities. Will be heated and cooled using geothermal system, have a sufficient emergency generator for full operations in crisis circumstances, and will include approximately 8, 600 sq. ft. Exterior will be using Energy Star siding and insulation in walls and roofing. | Westminster Volunteer Fire Department | 75 | 0 to 30 days | \$804,256 |
| Allen | Career Guidance Center | Our educational system has continually fallen short of adequately preparing students for careers that match their interests along with social/industrial needs. This innovative and cost effective statewide project will match students to academic and technical skills needed for success in a weakened economy, along with helping students best identify their strengths and weaknesses when choosing a career path. The goal of this project is to utilize multimedia technology and develop a centralized Career Guidance Center for individualized direction of each person, focusing on their talents and directing them to a possible career path. The effort will work in conjunction with over 1000 guidance counselors and be accomplished via videoconferencing, online computer efforts, telephone and personal interaction. Initially over 50,000 youth will be served yearly, growing to cover all 1728 public/government high schools in Ohio and becoming financially self-sufficient after 3 years. The project will measure outcomes including an experimental process to compare grade improvement, enrollment in vocational and college programs, advancement or related job procurement & reduced training. | Phoenix Homes Inc. | 111 | 31 to 90 days | \$27,962,341 |
| Allen | neighborhood home rehab | Rehab and sell distressed homes for low income families. Hire unemployed skilled labor associates to complete project rehabs (Electrician, Plumber, Carpenter and Masonary) | Segovia properties LLC | 4 | 0 to 30 days | \$250,000 |
| Allen | Home healthcare startup | To provide caring, quality healthcare in and around a rural community with a high unemployment rate. Goal is to start with basic care, providing the training for STNA's in order to control expected standards and maintain personnel. As the demand grows or is required, expand services to include skilled nursing and therapy services. Having owned and operated a related transportation service that is highly respected in this area, we have no doubt that we can acquire and succeed in this growing demand for home healthcare services. | Clymer Medical Transport, Inc. | 25 | 0 | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|----------------------|----------------|--------------------|---------------------------|
| Allen | Organic food production | <p>Increase growing capacity to grow more nutritious and high nutrient vegetables, the ability to have capacity to reach under served economic groups and provide food items to better their diet, reducing healthcare costs, and the growing problem of childhood obesity, and adult on set type 2 diabetes. Funds would allow us to better serve low economic groups by accepting the EBT card and other assistance programs. Employment of 6 to 10 additional college or high school age people, an under employed group would result. This group would also learn life skills and cultural interaction by working with these lower income groups.</p> <p>With additional growing capacity all of our wellness programs could be expanded.</p> <p>Photocatalysis is a novel and efficient method of harvesting light for the removal of hazardous materials from air and water. Light can come from solar energy or existing fluorescent bulbs, meaning the removal process can be incredibly inexpensive.</p> <p>Current photocatalytic methods involve TiO2, a common non-hazardous, inexpensive mineral, and UV light. UV light is available, but is not the most abundant light available from the sun or indoor lighting.</p> <p>Improvements on the performance of TiO2 will be achieved using methods to create TiO2-x, where the change in the material will allow greater use of visible light. This has the potential to increase the effectiveness of photocatalysis by factors of 10-20, meaning greater environmental responsiveness.</p> <p>This project will be directed at developing engineering processes to fabricate TiO2-x that are cost effective and scalable for production. The proposed products will have their performance validated, and be market-ready, with specific applications targeted (i.e. highway-wet-dust-erosion-reduction).</p> | Ber-Gust Farms | 6 | 31 to 90 days | \$300,000 |
| Allen | Photocatalysis Improvements and Devices | <p>The Center of Excellence for Health Sciences, will consist of approximately 52,836 sq. ft. of expanded health science laboratory and classroom space to accommodate the college's steadily increasing enrollment in our 11 health technology programs. By 2011, the student enrollment in health sciences is expected to grow by 14.7% to beyond 3,400 students, placing a tremendous need to build such capacity. Allen County is rapidly becoming a medical hub for the region and Rhodes State College a vital role in supporting the region's workforce development needs. The Center will allow Rhodes State to provide cohesiveness among its health faculty and students assuring an interdisciplinary environment simulating a healthcare team concept. Additionally, a new building designed to integrate existing health programs with capacity to accommodate new programs, community wellness education and services, will help the College fulfill its mission.</p> | NuVironment, LLC | 5 | 31 to 90 days | \$1,100,000 |
| Allen | Center for Excellence in Allied Health Building Co | <p>It is the intent of Rhodes to make the Student Life and Community Center a 25,260 sq. ft. facility, the nucleus of the Campus that binds everyone together for multiple purposes. By design, the Center will promote a dynamic learning environment and a social life where all students can congregate. The aura of the Center must also show an appreciation for the diversity of its student body and programs by displaying artwork and furniture that reflects cultural space.</p> <p>Upon imagining the numerous opportunities of enrichment that this Center will bring to students, several amenities and features will make this facility more than just "bricks and mortar." Here are just a few examples of the outstanding features that a Center of this magnitude can bring to Campus life:</p> <ul style="list-style-type: none"> • Wireless features for internet, speakers, music, electronic message boards, and plasma screens • Multi purpose meeting space with flexibility • Soft space/lounge areas for student groups to gather in a non-classroom style • Food court • Free standing computer space • Pods for privacy to study | Rhodes State College | 100 | 91 to 180 days | \$6,900,000 |
| Allen | Student Life and Community Center Construction | <p>campus environment for future generations. The College will hire an energy consultant firm to review the campus building environment and identify areas to improve on energy efficiencies. The energy audit will provide detailed analysis of projects to be considered and the payback period for the project. The College needs to invest in Building Automation System (BAS) to improve on our energy consumption. These systems will provide a greater control over operating schedules that will permit implementation of demand management strategies to reduce energy consumption and related costs. A new fully utilized system will allow remote monitoring and adjustments to optimize energy consumption of the HVAC and electrical system throughout the campus. The new system will be upgradable and expandable for the future to incorporate new buildings and individual building zone control and monitoring as areas are renovated or desired to be added into the control system. The system shall have capability to perform all control functions necessary to support the energy savings of the current and future students and the advanced technical workforce needs of our regional industrial employers. Through our partnership with the West Central Ohio Manufacturers Consortium (WCOMC) and the Ohio Ready-Mixed Concrete Association (ORMCA) a national need for a distance education degree program with flexible alternative delivery methods such as: distance education; hybrid courses; interactive courses; and video conferencing. As an example, we are building on our relationship with ORMCA to develop three or four additional courses creating an associate of technical studies (ATS) degree program in concrete engineering/management. This grant will focus on the achievement of the following objectives: Create greater accessibility to high-demand manufacturing careers in West Central Ohio; Train more individuals in high-demand manufacturing fields for West Central Ohio; Convert traditional lecture/lab courses in Engineering Technology into a hybrid format; Move to develop an associate of technical studies degree program (low-income, and/or first-generation) college students and will offer a comprehensive student-centered approach to the provision of the necessary programs and services which will enhance and foster student success in the completion of their educational objectives. These programs and services may include: orientation sessions to meet the special needs of the targeted student populations; early alert and referral system; proactive mentoring; personal coaching, career counseling, and referrals; learning communities; dedicated study area; and clinics in math, writing, and student self-management skills. This program will be a major part of the College's retention plan that will have goals, strategies to attain the goals, and includes action plans to ensure achievement. This effort will provide all members of the campus community (faculty, staff and administrators) the most current information, tools, and incentives so that everyone works together to promote the retention and success of all Rhodes State College students</p> | Rhodes State College | 75 | 91 to 180 days | \$5,200,000 |

|----------------|--|---|--|----------------|--------------------|---------------------------|
| Allen | Early College High School | area high school. This proven concept is a bold approach, based on the principle that academic rigor, combined with the opportunity to save time and money, is a powerful motivator for students to work hard and meet serious intellectual challenges. This Early College High School will blend high school and college in a rigorous yet supportive program, compressing the time it takes to complete a high school diploma and the first two years of college. The Early College High School Initiative will focus on young people for whom the transition into postsecondary education is now problematic. Its priority is to serve low-income young people, first-generation college goers, English language learners, and students of color, all of whom are statistically underrepresented in higher education and for whom society often has low aspirations for academic achievement. An Early College High Schools has the potential to improve high school graduation rates and better prepare students for high-skill careers by engaging all students in a rigorous, college preparatory curriculum. | Rhodes State College | 2 | 91 to 180 days | \$250,000 |
| Allen | Galvin Hall Elevator Replacement | renovate/replace elevator in Galvin Hall. This is the first building that was built on the campus in 1966. The two elevators in the building have reached the point where they are in need of daily service from the elevator service contractor. This is a five story building where the elevator use is frequent and sometimes critical. Passengers are getting stuck on a daily basis. The scope of work includes repairs and replacement to the existing elevator components, new machine room, electrical work associated with the elevators and machine room, and temperature control of the new machine room. | Rhodes State College | 10 | 91 to 180 days | \$707,715 |
| Allen | Rhodes State College Center for Workforce & Econom | A relocation is envisioned for the Rhodes State College Division of Workforce and Economic Development and its operations from our Lima campus to downtown Lima. The move will entail renovation of a yet to be determined existing building in downtown Lima. This location will promote downtown revitalization efforts, reach an underserved population, and promote partnership with local government, economic development, businesses and organizations. The downtown location will allow creation and expansion of workforce and economic development programs (STEM, green/sustainability leadership institute, lean manufacturing institute, health/medical informatics, dislocated worker, boomer programs, faith-based and ex-offender outreach), to strengthen our region and drive economic recovery. We anticipate that 50-80 construction workers will be on site for the 4 month renovation period, which could start this summer if funding is in place. | Rhodes State College | 95 | 31 to 90 days | \$2,000,000 |
| Allen | Rhodes State College Center for Culinary Arts | Planning is envisioned for the development of a new educational program at Rhodes State College, the focus of which is culinary arts, high level banquet services, food services management, hospitality management, and arts and cultural programming. Students involved in these programs will not only receive quality education but will also be given the opportunity to manage and oversee these operations for community and college events. The project involves purchase and renovation of a downtown Lima building resulting in the development of a high-level conference center and banquet facility. The completion of this renovation will create a state-of-the-art facility that provides downtown revitalization, a training environment for students, and conference/banquet facilities for community and business use. | Rhodes State College | 110 | 91 to 180 days | \$6,000,000 |
| Allen | Rhodes State College Workforce Development Trainin | Creation of Rhodes State College's Workforce Training Center serving a 10-county region in west central Ohio. Regional employers view Rhodes State College as a leader in workforce and economic development programs and services. The Center is envisioned to provide unemployed, underemployed and incumbent workers with training in the fastest growing careers, increasing the pool of qualified workers for companies in or moving into west central Ohio. The center will deliver customized training for existing and new business and industry; expand entrepreneurial counseling to create new small businesses; skills assessment, re-training, and job readiness training for unemployed or dislocated workers; and medical assisting and other allied health education for students preparing to enter the workforce. | Rhodes State College | 110 | 91 to 180 days | \$5,000,000 |
| Allen | Engineering Technology Building Expansion | As the demand for a higher skilled workforce increases, so does the need for additional information and engineering technology programs. In order to meet this demand, Rhodes State College needs to add lab and classroom space to house new programs, new equipment, and more students. Rhodes State College plans to add approximately 15,000 sq. ft. to the Countryman Engineering Technology Building. | Rhodes State College | 23 | 91 to 180 days | \$2,900,000 |
| Allen | Rhodes State College One-Stop Student Services Cen | comes the One-Stop Center concept. The creation of a Rhodes State College One-Stop Student Services Center will combine several programs and services that had been previously housed in separate buildings or in offices separated in various other ways from each other. The One-Stop Center will provide easy access to our students and help students services be integrated both technologically and physically. Facilitation of a move to student centered services with emphasis on productivity, effectiveness, accountability, satisfaction, and improved access and quality requires an infrastructure that is not separate entities but rather one, integrated center. Elimination of waiting lines and students shuffled from one office to another will allow for quality service and access transition. Departments to be included in the Center include: Admissions, Advising, Financial Aid, Registrar, and Career Services. Cross-training of staff will be another key component of the Center and to the definition of a "student first" philosophy. | Rhodes State College | 75 | 91 to 180 days | \$5,000,000 |
| Allen | Rhodes State College Experiential Learning and Co- | experiential education that links coursework with the real world. Through the creation of a Career Services Center, student offerings will expand to include the following formal programs: cooperative education, community service learning, and global study-abroad. In the current world of immense global competition, employers search for graduates who have classroom theory and the workplace practice which translates into a higher return on investments for the employer. Allowing students the opportunities to learn while serving and strengthening themselves, their community, and the world, the Career at Rhodes State College would serve as a link and point of contact for all entities. In addition to the experiential education expansion, the Center would continue to offer career assessments to assist students in identifying their strengths and potential careers, provide one-on-one career advising, and serve to connect students with area and regional employment opportunities. Job and co-op site development would be intensified requiring additional staff and sp | Rhodes State College | 3 | 31 to 90 days | \$1,600,000 |
| Allen | Rhodes State College Campus Counseling Center | challenges and conflicts may prevent students from succeeding in college. Through the establishment of a Counseling Center, professional counselors can help students develop needed skills in helping to handle problems so that they can be more capable of solving future problems on their own. The Center will offer assistance in crisis intervention, anger management, self-esteem, eating disorders, nicotine dependency, depression, stress and test anxiety, drug/alcohol abuse, relationship problems, student skills and time management. Counselors will provide short-term counseling plus make referrals to other appropriate agencies, services or professionals. The project involves the renovation of space on campus which would provide a safe and private place where students can discuss an array of topics. There will be no fee charged to Rhodes students for counseling services. | Rhodes State College | 5 | 91 to 180 days | \$560,000 |
| Allen | Minority & Displaced Workers | Hospitals and other institutions are and will be contemplating outsourcing food service/dietary components in an effort to realize substantial cost savings. | Professional Kitchen Management Services | 240 | 31 to 90 days | \$450,000 |
| Allen | Orchard Rehabilitation | This project expects to realize significant strategic job creation, targeted at minority and displaced workers, through acquisition of hospital and other institutional food service accounts in northwest and west central Ohio. Rehabilitation of a small orchard, sustaining wildlife growth and feeding the poor of our county. Will also create jobs for several people. | Brehon Fields | 2 | 0 to 30 days | \$12,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Allen | IORY - CFER Connection Track | Improve the connection between the Indiana and Ohio Railroad and the Chicago, Ft. Wayne and Eastern Railroad. This connection will allow for additional dimensional loads as well as being able to use longer cars. This will open the door for a wide variety of products to be shipped to and from Ohio suppliers. This project will also have the potential to eliminate some of the truck traffic on Ohio interstates. This will also reduce emissions. This project will create or help retain Ohio jobs in various occupations with resources to be generated. | Indiana and Ohio Railroad | 10 | 91 to 180 days | \$380,000 |
| Allen | Delphos Railroad Crossing Safety Projects | S. Pierce St., AAR DOT # 532743U S. Franklin St., AAR DOT # 532744B SR66, S. Main St., AAR DOT # 532745H Bredeick St., AAR DOT # 532749K SR697, AAR DOT # 532750E | Ohio Rail Development Commission | 8 | 31 to 90 days | \$1,000,000 |
| Allen | Police Department Expansion | Upgrade and expansion of current outdated and undersized facility. | Perry Township Police Department | 15 | 31 to 90 days | \$597,000 |
| Allen | Perry Township Police Department COPS | Expansion of Perry Township Police Department by four (4) full-time force members for COPS program expansion in the department. | Perry Township Police Department | 4 | 0 to 30 days | \$495,000 |
| Allen | Perry Township Police Department Communications Up | Upgrade current communications system and provide laptop instant communicator computers in cruisers. Significant need due to size of primary area of responsibility. | Perry Township Police Department | 5 | 0 to 30 days | \$65,000 |
| Allen | United Way Community Impact- Issues of Working Poo | Focus on two key identified areas of community need: Removal of barriers to educational progression from birth thru workforce and issues of the Working Poor. In the issues of the Working Poor collaborative, we seek to facilitate progress out of economically disadvantaged situations for 50 family leaders each year through the creation of social capital with community allies and a collaborating network of churches, schools/colleges, social service providers, participating governmental leaders, local county economic development officials and participating governmental leadership. A hands-on educational process wherein family leaders in poverty shape their own goals and are assisted through social capital provided by middle and upper-class allies in accessing and utilizing available resources is the core process within the collaborative. Outside resources are continuously reassessed and realigned according to the experience and results of the family leaders. The collaboration has been created and is now actively engaging the critical sectors within our community. | United Way of greater Lima | 50 | 0 to 30 days | \$250,000 |
| Allen | Online Learning Environment: Foster Care | Learning environment which will create consistency in training regarding the needs of foster parents, offers an accessible and comprehensive delivery of CEUs to social workers, offers independent living training to adolescents and offers education units to primary parents having difficulties with their youth. This Ohio based initiative will offset the relatively small number of new jobs created by meeting the needs of tens of thousands of foster parents, hundreds of thousands of foster youth and millions of child welfare workers nationally, while using state of the art technology for meeting the ever growing training and certification needs of a totally underserved and neglected population. | Phoenix Homes, Inc. | 10 | 0 to 30 days | \$700,000 |
| Allen | City Building Security (REVISED) | Most of the initial groundwork has been accomplished. Funds are now needed to bring the program to fruition (marketers and developers need funds) and the program will roll out after 1 year. The outcomes of the project can be measured in terms of program completion, satisfaction with Courts, police & administration emergency power, security & communication upgrades. | City of Lima, OH | 20 | 31 to 90 days | \$800,000 |
| Allen | City Building Security | Courts, police & administration emergency power, security, and communication upgrades | Lima Police Department | 20 | 31 to 90 days | \$800,000 |
| Allen | CBD Streetscape Renewal | Restoration of curbs, gutters, sidewalks, streets and traffic signals in the Central Business District. | City of Lima, OH | 100 | 181 days or more | \$5,000,000 |
| Allen | Westminster Sewer Sub-District Wastewater Treatment | This project consists of constructing a 60,000 gpd wastewater treatment plant to serve the unincorporated area of Westminster, Auglaize Township. The project is being constructed to eliminate a pollution problem in the Auglaize River as outlined in a compliance program required by OEPA. This area is located within an OEPA non-attainment area, Section L4 303(d) 04100007 010. This project consists of constructing 15,000 linear feet of 8' gravity sewer, 6,000 linear feet of 6' force main, and pump station to serve the unincorporated area of Westminster, Auglaize Township. | Allen County Sanitary Engineering Department | 40 | 181 days or more | \$1,135,900 |
| Allen | Westminster Sewer Sub-District Collection System C | The project is being constructed to eliminate a pollution problem in the Auglaize River as outlined in a compliance program required by OEPA. This area is located within an OEPA non-attainment area, Section L4 303(d) 04100007 010. | Allen County Sanitary Engineering Department | 30 | 181 days or more | \$1,437,200 |
| Allen | Biddle Drive Parking Lot Expansion Project | The Biddle Drive Parking Lot Expansion project consists of the addition of a much needed parking lot off Biddle Drive on the Rhodes State College Campus. As the College's enrollment increases the demands for additional parking spaces also increases. This project involves upgrading a temporary 446 space stone parking lot to an 729 space permanent asphalt paved lot. Concrete sidewalks with lighting have been designed to connect the permanent parking lot to the main campus. | Rhodes State College | 10 | 31 to 90 days | \$985,800 |
| Allen | Rhodes State College Center for Alternative Energy | Development and implementation of solar, wind and biomass alternative energy projects for supplemental energy to college as well as development of educational, research and commercialization initiatives. Result is accelerated commercialization and advancement of alternative energy for the region and training of job-ready skilled workers in the alternative energy fields. | Rhodes State College | 30 | 91 to 180 days | \$2,500,000 |
| Allen | Rhodes State College Informatics Program | Information technology curriculums has been requested by area health care industries. As a result, technological advancements and simulations will become part of our Strategic focus for the next three to five years. RSC plans to integrate informatics simulation within repackaged information technology programs to prepare informatics technicians and records specialists, as well as to incorporate the use of informatics in all Allied Health and Nursing programs. By doing so, the College will advance students' skill acquisition and an overall learning experience that will equip students for success in a future workforce. This curricular redesign will require extensive faculty training, as well as simulation software and equipment in order to provide learning experiences that are aligned with the health industry future standards. This strategic initiative will support the following goal-related metrics developed in support of Ohio's Strategic Plan for Higher Education (2008-2017) | Rhodes State College | 3 | 31 to 90 days | \$300,000 |
| Allen | Biotechnology Associate of Science Degree Program | Rhodes State College's goal is to develop a new biotechnology Associate of Science degree program. This would provide students with advanced technologic skills to enter the growing corn ethano/cellulosic biomass ethanol industries. There are currently four corn ethanol refineries in our greater service area, with more across the border in Indiana. In addition, our area is climatically and demographically suited for further development of cellulosic biomass ethanol refineries. Students could also transfer these skills to area four-year institutions (Ohio State University, Bowling Green State University, University of Toledo) with biotechnology programs. This project would involve hiring of more faculty, purchase of equipment, and developing of internships with industry and area universities. This program would also provide opportunities to benefit our Allied Health and Nursing programs. | Rhodes State College | 3 | 181 days or more | \$180,000 |
| Allen | Disaster Preparedness: Information Technology Infr | When you have thousands of people relying on an extensive network, contingency planning is essential. Rhodes State College needs to continue to invest in its infrastructure to ensure a reliable, safe, and secure environment for all students, faculty, and staff. Vital components of the contingency plans include infrastructure upgrades, such as: server and desktop virtualization technologies, uninterrupted electrical power, redundant network pathways, off-site backup and storage for critical applications, and virtual classrooms. Emphasis will be placed in developing policies and procedures to ensure successful implementation and ongoing, sustainable operations. | Rhodes State College | 3 | 31 to 90 days | \$750,000 |

| Allen | Rhodes State College "Go Green" Program | objective in support of sustainability. The sustainability objective resulted from a recognized reality that the community and the College were going to be greatly impacted by the energy crisis. In order to prepare for the impact of the sustainability movement, Rhodes State College will undergird its foundation by changing its infrastructure, programs, curriculum, and services to meet the efficiency and social demands. Rhodes State College has already begun to invest in the sustainability effort through its Strategic Plan – Vision 2012. It will continue to enhance this effort by: • Strengthening core programs by teaching environmental literacy, linking sustainability across all disciplines, as well as requiring students to demonstrate a general understanding of local or campus ecology and environmental technologies and the ability to make informed eco-friendly choices. • Redesigning policies on consumption and purchasing. • Turning the College into a Learning Laboratory by strategically redesigning spaces into "green space | Rhodes State College | 1 | 31 to 90 days | \$300,000 |
| Allen | Rhodes State College META Program | Minorities in Engineering Technology Academy (META) is a program specifically designed to provide young people, of ethnic background an opportunity to be exposed to various majors offered within Rhodes States' Division of Information Technology/Engineering Technology. The purpose of the academy is to introduce minority students to engineering technology concepts throughout their high school career in an effort to: provide INSIGHT to various engineering technology majors; establish COMFORT with engineering technology concepts, techniques, and skills; create an INTEREST in engineering technology as a possible career choice. In addition, META aims to assist in enhancing the skills necessary for success in any technology related field: science, math, critical thinking, team work, project development, and problem solving techniques. Our goal is to educate and expose young people to engineering technology through real-world experiences. | Rhodes State College | 1 | 31 to 90 days | \$5,000 |
| Allen | Citizen Preparedness and Participation – Engaging | Rhodes State College will make interactive emergency preparedness training available to the new to eighteen year olds in the United States. Our scenario-based branching logic program will be web-based, interactive, downloadable to local providers, and targeted towards this age group. As this age group represents almost twenty-five million young people, approximately 8% of the population, effectively training them in how to prevent, protect, respond, and recover from a disaster must be a top priority. Rhodes State College has developed a plan to engage, educate, and enable many of these young people to save their own lives and those of their family and community members before the first professional emergency responders arrive. | Rhodes State College | 9 | 31 to 90 days | \$1,747,625 |
| Allen | Building an Energy Pathway in West Central Ohio | its manufacturing sector as well as produce oil and ethanol for the transportation industry. The energy sector within the region is rapidly diversifying from the original oil and gas production to advanced gasification technology and ethanol production. This project will allow for additional training to take place within a newly created Process Operator Technician Associate degree or a similar non-credit series of courses that follow a pathway design for the energy industry. Rhodes State and our partners will create regional industry skill standards based upon the Chemical/Refining Process Technician Skill Standards developed by CAPT. They will utilize these competencies to create training activities that will result in stackable certificates or credentials that translate into concrete job opportunities with regional energy employers. A career pathway will be designed and implemented. This pathway will permit individuals to enter at various competency points and will involve participants at emerging and incumbent levels within the industry. | Rhodes State College | 2 | 31 to 90 days | \$998,794 |
| Allen | Home Improvements | own two houses in desperate need of windows, doors, siding, insulation, and a roof. This is for low income families for energy efficient and affordable living, also to improve the neighborhood. 29 windows 4 doors, 52 sq. siding, new roof, insulation | A-ZConstruction | 6 | 181 days or more | \$43,000 |
| Allen | Bike-Ped Master Plan Phase I | Approximately 3500 linear ft. of a Bike-Ped Pathway to connect residential neighborhoods, a Senior Living facility and a nature preserve to the core of the Village where existing sidewalks would provide pedestrian transportation to other parts of town. Currently, there is not adequate pedestrian access from this part of town with which residents can access the central portion of town safely. This project represents the first phase of a Master Plan that was developed by the community to address both functional and recreational non-vehicular modes of transportation throughout the Village of Bluffton. The outcome of this project will be environmentally responsible infrastructure that safely connects neighborhoods and institutions with non-vehicular modes of transportation | Village of Bluffton | 0 | 31 to 90 days | \$100,000 |
| Allen | Allen County Veterans Memorial Hall | The Veterans Memorial Hall was built in 1908 and continues to serve the needs of Allen County residents and the Veterans organizations. The structures exterior is in need of a new roof and extensive soffit and metal work. There are also a tremendous amount of tuck pointing needed. The boilers were installed in 1950 and they are past their service life. If the boilers and air conditioning were updated we feel the building could be utilized alot more increasing the revenue | Allen County | 12 | 91 to 180 days | \$850,000 |
| Allen | Court House Renovation | The Allen County Court House was constructed in 1882 and remains operational for 10 essential (mandated) County offices. The building is in need of exterior renovation of the clock tower, roof replacement, and stone masonry work/ tuck point repair. This project will provide exterior preservation of a historic facility symbolizing our local government. | Allen County | 10 | 91 to 180 days | \$1,250,000 |

| Allen | Food Waste Integrated Bio Refinery | Green Castle Energy is constructing an Integrated Bio-Refinery (IBR) utilizing the waste products from local food manufacturing facilities. The IBR will remediate the waste water and solid waste which currently constitutes a nuisance stream for the processors and limits their ability to expand their operation. The IBR will have the capability of producing Ethanol, Bio-Gas and Electrical Power. The total capacity of the facility will be 3 MGPPY of Ethanol, 80,000 MBTU/YR of Bio Gas and 1.5 MW/YR of electricity. When fully functional, the IBR will employ 21 people: 10 operators, 2 commodity handlers, 4 maintenance technicians, 5 management and professional staff. Green Castle Energy currently operates a pilot plant at their R&D facility in Statesville, NC. This pilot plant employs advanced fermentation techniques to convert food waste to ethanol and bio-gas. Green Castle Energy will employ these advanced techniques developed at their pilot plant to build a full-scale commercial facility in North West Ohio. | Green Castle Energy | 21 | 0 to 30 days | \$1,650,000 |

| Allen | Warehouse energy insulation and weatherproofing | Utilization of Ohio contractors to do an energy audit of existing 1950 style warehouses. Taking recommendations for heating, lighting, cooling and implementing as required. With keeping the Ohio contractor base the primary installation methods, implement insulation, air locks, fans, energy bulbs, geothermal to vastly improve the energy efficiency of older style buildings. Formulate a plan and list of contractors that may offer an ongoing business development and improvement process as a group for other Ohio based businesses | Range Kleen mfg., Inc. | 60 | 31 to 90 days | \$500,000 |
| Allen | Wind Energy Self Sufficiency | This project would be to implement and install a wind turbine energy farm on corporate owned land in combination with passive solar energy on roof tops. Both a pre installation audit of carbon footprint and energy use and a post audit would be performed. The installation would be used as a road map for other business as to methods and procedures and results that can be obtained. It would be the intent to not only install but utilize this installation as a State of Ohio beta sight, available to not only science research but also that of educational facilities in the Tri State area. Sharing result and cost data as needed. | Range Kleen Mfg., Inc. | 250 | 0 to 30 days | \$3,000,000 |
| Allen | New Product Development | Project would continue an existing project of new product to properly handle and dispose of waste cooking oils and grease. Consumer home disposal of direct in sewage lines has and is a continued local governmental problem and causes breakdowns and backups. This project targets a biodegradable collection and disposal method to improve current processes. Once research is completed, the methods and manufacturing, packaging and distribution process would be all targeted back to Ohio based business growth. This project would not only provide community distribution of the funds, but would return to the community business development, governmental growth in tax base, and growth in jobs and community worth. | Range Kleen Mfg., Inc. | 100 | 91 to 180 days | \$1,000,000 |
| Allen | Move Manufacturing from China to Ohio | project would be far reaching in that it would impact approximately 100 other support vendors and contractors on an ongoing basis. The primary focus would be on maintaining a high level of Ohio based companies involved, from start to finish. This make or buy project would be far reaching in scope of all products. As progress is made all aspects of manufacturing, building, equipment and people would be impacted. | Range Kleen Mfg., Inc. | 75 | 91 to 180 days | \$5,000,000 |
| Allen | Energy Star study on existing product | Begin study of Ohio based existing product that with modifications or enhancements may be Energy Star rated and provide consumers throughout the nation, an OHIO based, OHIO manufactured and OHIO distributed product, that would save more in energy costs than the product would cost at retail. This project would not only create new jobs in Ohio, but would positively impact approximately 300 existing jobs in Ohio. | Range Kleen Mfg., Inc. | 57 | 31 to 90 days | \$500,000 |
| Allen | Energy Audits for Low-Income Families in West Cent | Engineering at Ohio Northern University (ONU). This organization will focus on providing no-cost energy audits for low-income families in the West Central Ohio region. The audits will detail work that can be done to lower home energy bills. Depending on the scope of the work, it is expected that the recommended repair or improvement work will be performed by area chapters of Habitat for Humanity or area contractors. This organization will use students to perform energy audits using both site visits and software to model housing energy loss due to lack of insulation, degradation, or poor construction practices. Each student will attend training classes on the use of energy audit equipment and software. This organization will be an educational resource for the State of Ohio. ONU is well positioned to start this initiative due to the ongoing relationships with Ohio energy companies, strong engineering student participation in Habitat for Humanity, and the ability to start this program in 2009. | Ohio Northern University | 25 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Allen | Robin Rogers Day Services and Day Habilitation | Construction of a new Day Care Facility with the expansion into a Day Habilitation Center. This facility would allow for increased services to parents of children that have an Intellectual or Developmental Disability. The Day Care facility serves children from 18 months through adult (no top age limit) and enables parents to work, or have a respite in care for their child. The Day Habilitation program would be reviving an old Workshop program that was disbanded due to lack of adequate facility space. This program would be for adults that have Intellectual or Developmental Disabilities, providing them opportunities to learn job skills, earn money, and socialize in a work environment. | The Arc of Allen County | 25 | 91 to 180 days | \$2,500,000 |
| Allen | Drug Screening | Accudiagnostics is a drug screening business in lima ohio i have been in operation for 2 years i do alot of work for several business for pre-employment and random working on drug testings for schools and drug courts. This allows businesses to hire people who are not addicted to drugs, we take every step to make sure they are drug free and can offer them help if in fact they are using drugs, this would give me a way to work with the schools throughout Allen County and surrounding countie | Accudiagnostics Drug Screening | 4 | 0 to 30 days | \$100,000 |
| Allen | K-12 Ethernet Connectivity | 10 Miles of new fiber optical cable installed to provide enhanced route diversity and protected transport between Northwest Ohio School Districts and their Information Technology Center in Lima, OH. This is an enhancement of an existing network established in a collaborative effort between IFN and multiple Broadband Network Providers throughout Northwest Ohio | Independents Fiber Network, LLC | 3 | 91 to 180 days | \$175,000 |
| Allen | Open Source for Ohio Education | This project would create teaching, teaching assistant and IT positions to teach high school students IT programming skills by working on real life examples to develop or enhance software needed for use in the state of Ohio. Initial projects would include enhancing reporting of voter registration roles and registration validation. Expansion could include web site enhancements and other activities. Program could be expanded to other high schools or colleges with more funding This project will consist of replacing approximately 200 windows in a downtown building that is on the National Historical Registry (est. 1921). The building is a monitored living facility where houses approximately 70 elderly and / or disabled residents. The new windows will dramatically and instantly increase energy efficiency. The windows that are currently in place are half original with the other half being replaced around 1970. | Open Source For Ohio | 8 | 31 to 90 days | \$1,000,000 |
| Allen | New Windows for Energy Efficiency | This programmatic partner wishes to begin/continue deployment of US EPA Clean Energy Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. Design, develop, and implement an integrated data system to track individual assessment and student performance relative to Ohio state curriculum standards. Determine the effect mobility on student achievement. | The Argonne Residence Inn | 5 | 0 to 30 days | \$175,000 |
| Allen | Top Line Express | Design, develop, and implement an integrated data system to track individual assessment and student performance relative to Ohio state curriculum standards. Determine the effect mobility on student achievement. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Allen | DASL Data Assessment Project | Firefighters/Paramedics and 4 administrative staff members and 14 Volunteer Firefighters. Our department serves a community of approximately 12,000 residents. We serve as first responders to a large industrial area that includes Husky Refinery, INEOS Chemicals, Ft. Amanda Specialties, Potash Corp., and the Lima Tank Plant (JSMC), all within Shawnee Township. The Department requests this grant to build a second story on the current building, giving separation to the working/equipment and housing areas of the building. Specifications have been created with ADA and Public Building compliance. This update is necessary and is the most fiscally responsible way to bring the building up to date with current compliance and regulations, still allowing our department to continue our excellent service to the community. The update will address safety concerns for the department that operates 24 hours per day, 7 days a week. The requested amount according to the specifications is approximately \$1,365,000.00 and will require a 3 month design phase and a 6 month construction phase. | Data Analysis for Student Learning Cooperatives | 28 | 0 to 30 days | \$3,900,000 |
| Allen | Building Addition | ELIDA Local School District would outfit half the 4th & 5th grade elementary classrooms and half of the middle school classrooms (Grades 6-8) with SMART board technology, and half the elementary and kindergarten classrooms (K-3) with SMART tables. 30 SMART boards at a cost of \$3400 each would total \$102,000. This would place 20 SMART boards in classrooms at the middle school, and 10 SMART boards in Grade 4/5 classrooms at the elementary. 20 SMART tables at a cost of \$8000 each would total \$160,000. This would place 5 SMART tables in the kindergarten building classrooms, and 15 SMART tables in classrooms at the elementary building. 8% shipping costs would total \$20,960.00 SMART Ed Services provides free training and professional development for our 200 district teachers. The district would outfit additional classrooms using general fund dollars over time until each classroom has the SMART technology. Ultimately, the district would bear the cost for half the project. A new high school under construction will already include updated technologies. It proposes to develop a modular modular clean energy system to be utilized by first responder team that will utilize enhanced solar, wind, bio-fuel, and fuel cell technologies. These cost-effective modules can be deployed and configured to meet the rapid response team's power requirements during emergency conditions. | Shawnee Township Fire Department | 25 | 181 days or more | \$1,300,000 |
| Allen | SMART Education | Although diesel emission is a concern of our entire country, it is concentrated and controlled in the most populated areas. However, over the road trucking provides a unique challenge as a truck domiciled in small town Ohio today, can be in Columbus, OH tomorrow, and New York, NY the next day. Our proposal will provide the ability to reduce diesel emission as well as diesel fuel consumption by controlling the non-road use operation of the diesel engine. Over the road truck engines operate nearly as much for controlling comfort (heat and air conditioning) as it does for moving the payload. We propose to install Auxiliary Power Unit (APU) and technology products in trucks domiciled in Northwest Ohio, however operate all over the country. The APU will reduce idle in trucks by up to 80% controlling emissions and reducing fuel consumption. We propose to install 50 APUs in ten specific fleets located in Northwest Ohio. The fleets will provide 50% of the cost while the stimulus will provide 50%. The justification for the fleets is fuel savings and driver retention by maintaining truck comfort in idle restricted non-attainment areas. Primary violence prevention education projects including 1) staff training and consultation with Allen County school staff on bullying in four schools and three Juvenile Correctional Facilities, 2) facilitating parenting programs with up to 20 teen parents at the Opportunity for Teen Parents and up to 40 incarcerated parents at Allen Correctional Institution, facilitating parenting and domestic violence programs online to 15 prisons in Ohio, facilitating teen dating violence prevention programs at three local high schools. Over the years, the village has chipped and tarred the streets so that the curvature of the street is much higher than the yards. Our sidewalks are over 50 years old and hazardous to pedestrians. Curbs do not exist. This all leads to water runoff problems in addition to poor appearance and traffic/parking difficulties. Improvement of the appearance of our village will lead to increased business development. | Elida Local School District | 1 | 0 to 30 days | \$282,960 |
| Allen | Modular Renewable Energy Systems | Although diesel emission is a concern of our entire country, it is concentrated and controlled in the most populated areas. | Allen | Family Violence Prevention Project | Primary violence prevention education projects including 1) staff training and consultation with Allen County school staff on bullying in four schools and three Juvenile Correctional Facilities, 2) facilitating parenting programs with up to 20 teen parents at the Opportunity for Teen Parents and up to 40 incarcerated parents at Allen Correctional Institution, facilitating parenting and domestic violence programs online to 15 prisons in Ohio, facilitating teen dating violence prevention programs at three local high schools. | Partnership for Violence Free Families / LACCA | 2 | 0 to 30 days | \$75,000.00 |
| Allen | LaFayette Community Improvement project | Over the years, the village has chipped and tarred the streets so that the curvature of the street is much higher than the yards. Our sidewalks are over 50 years old and hazardous to pedestrians. Curbs do not exist. This all leads to water runoff problems in addition to poor appearance and traffic/parking difficulties. Improvement of the appearance of our village will lead to increased business development. | Village of LaFayette | 50 | 0 to 30 days | 750,000 |
| Allen | Project: Help Our Dept | Offset cost of new radios(8 radios) and to update our interview and interrogation room | Spencerville Police Dept | 4 | 0 to 30 days | \$10,000 |
| Allen | Allen/Putnam VOCA Recovery | This project retains 1 victim advocate assistant, 3 part time maintenance positions for victim advocate office rehabilitation, 2 part time repair contractors for victim contact copiers/scanners, and fax machines, and 3 part time contract floor covering installers for victim advocate offices. In addition, the project helps create 1 full time victim advocate position for a Court Appointed Special Advocate in Allen County, Ohio. The required project expenses (such as personnel, supplies, postage and rehabilitation costs) requested must be expended. Without Recovery Act funding funding will be taken from personnel line items to pay for the other operational costs | Crime Victim Services | 1.5 | 91 to 180 days | 184,577.64 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Allen | Putnam/Allen Jobs | The projects will create or retain 3 jobs, including 1 full-time victim advocates for rape and domestic violence survivors, 2 victim service support staff, 3 maintenance part-time positions, 4 crisis on-call advocates, and adds 1 full-time outreach and prevention position for sexual assault, domestic violence, and date rape for Allen and Putnam Counties. The retained and new positions provide the court and counseling advocacy for all sexual assault victims in Allen and Putnam Counties, and all domestic violence victims in Putnam County, and adds the only outreach and prevention position for both counties. | Crime Victim Services | 3 | 91 to 180 days | 205,673.67 |
| Allen | 2nd Chance Juvenile Intervention Prog. | Crossroads' 2nd Chance is a juvenile domestic violence intervention program. Collaboration of Crossroads, Juvenile Court, Family Resource Center and Juvenile Probation/Diversion. Program includes Domestic Violence Court Assessment Team meetings, 2nd Chance Initial Class, 6-2nd Chance educational classes and violence educational classes with Day Treatment students from Juvenile court Diversion Services. Outcomes include 1 FTE job created ; 20% FTE job retained; increase # of sessions with juvenile domestic violence offenders and at-risk youth. | Crossroads Crisis Center, Inc. | 1.5 | 0 to 30 days | 67,500 |
| Ashland | George Road Realignment | This project includes the realignment of a busy intersection for safety purposes and improved traffic flow to three of the city's major employers. We estimated approximately 10 construction jobs will be created by this project, with the potential of retaining several hundred jobs from the employers located at those facilities. | City of Ashland | 10 | 181 days or more | \$1,000,000 |
| Ashland | Dist 3, PID 85701, ASD Purchase 1 MMV | Purchase of one modified minivan for the City of Ashland | Ohio Department of Transportation | 2 | 31 to 90 days | \$33,000 |
| Ashland | Dist 3, PID 85702, ASD Purchase 1 computer | Purchase 1 computer for the City of Ashland | Ohio Department of Transportation | 1 | 31 to 90 days | \$1,200 |
| Ashland | Davis Road Waterline | This project will construct 250 linear feet of new 10" waterline including 30 linear feet of boring and jacking with a 24" steel casing pipe under U.S. Rt. 42, to provide additional supply of fresh water to a major corridor in the city. We estimated approximately 5 construction jobs will be created by this project, with the potential of retaining several hundred jobs from the employers located along this corridor. | City of Ashland | 5 | 181 days or more | \$300,000 |
| Ashland | Dist 4, PID 85704, ATB Purchase copier/5 phones | Purchase 1 LTV, 2 bike racks, and a farebox for the City of Ashland | Ohio Department of Transportation | 1 | 31 to 90 days | \$4,700 |
| Ashland | Pathway Bridge Project | 2 Village Parks by spanning the Black Fork of the Mohican River. The bike path runs from the Village of Wally Road Park south to Mohican State Park. The bridge and bike path will provide appropriate recreational transporting (hiking & biking) to our downtown. Much of our economy depends upon visitors to the Mohican State Park and local camping and canoeing facilities. The heavily used Village parks patrons will be able to walk to and from rest room facilities located in Riverside Park only and ball and soccer fields, rather than drive thru town from park to park. A bike path was build by a public/private partnership and completed in 2008. The bridge structure is an essential component of the pathway since it provides the connection over the Black Fork River to the Village and the Village Park facilities. These parks both contain baseball and soccer fields, which experience heavy use during spring, summer and fall seasons, but only the Riverside Park has picnic, playground, concession and rest room facilities. | Village of Loudonville | 15 | 0 to 30 days | \$98,000 |
| Ashland | Educating Ohioians in Personal Finance | The biggest mess we are into today, is the fact that many Americans have been living on borrowed money. The goal of my company is to educate those with personal finance, supplying materials, and software at a minimum cost. This would allow people to pay down their debt, know where every penny is spent, make good financial decisions, and make a strong foundation for Ohio. The classes would be taught by a certified business teacher that could be expanded to all 88 counties, with a test run in my local counties of Ashland, Huron, and Richland. I am currently enrolled into the Masters of Business program at Ashland University and my wife is currently a personal finance teacher at South Central High School. | Lacey's Personal Finance | 50000 | 0 to 30 days | \$300,000 |
| Ashland | Township Road 791 Base Reconstruction & Widening P | Project will consist of reconstructing approximately 2.75 miles of township roadway, in order to remove weak points, upgrade existing culverts and to expand the roadway to 18 feet of pavement surface. Roadway is home to and serves the two (2) largest businesses in our township. Project will also support current and future service levels. Project consists of grading of shoulders, ditching, mailbox relocation, pulvermix of existing road & base, adding 6" base to increase roadway width, utilizing primer and seal on roadway, and replacing culvert pipes with type D conduit. Project useful life is 20 years. | Troy Township, Ashland County | 20 | 31 to 90 days | \$436,000 |
| Ashland | Dist 3, PID 18221, ASD US 0042 03.57 | Bridge Rehabilitation | Ohio Department of Transportation | 37.3 | 31 to 90 days | \$1,300,000 |
| Ashland | Dist 3, PID 19571, ASD SR 0302 00.89 | Bridge Replacement | Ohio Department of Transportation | 25 | 31 to 90 days | \$700,000 |
| Ashland | Bus Garage Renovation/Expansion | Expand existing school bus garage to include 2 additional bays including 1 repair bay and 1 wash bay. Also add section for road salt storage. | Ashland City Schools | 5 | 31 to 90 days | \$200,000 |
| Ashland | Ashland Community Stadium Renovation | Replace visitor bleachers at Ashland Community Stadium that are unsafe with new aluminum bleachers with seating capacity of 1,000. Renovate existing concession stand | Ashland City Schools | 15 | 91 to 180 days | \$350,000 |
| Ashland | Wil Research Pumping Station Improvements | Improvements to an existing lift station located along U.S. Route 250 will improve the inadequate wastewater conveyance to the eastern corridor of the City of Ashland, servicing Wil Research Laboratory, one of the major employers of the city. | City of Ashland | 10 | 181 days or more | \$500,000 |
| Ashland | Lloyd and Blue Creek Road Resurfacing | Resurfacing of local main section of a rural major collector public road # 4-38 (Main Section of a Rural # Minor Collector (on FASS, January, 1991). Project includes placement of 5,500 tons of 448 Asphalt Concrete, Type I, PG64-22 and 1000 tons of 617 Compacted Aggregate berm. | Adams County Engineer | 425100 | 91 to 180 days | \$425,100 |
| Ashland | Dist 3, PID 19601, ASD SR 0089 02.94 | Bridge Replacement | Ohio Department of Transportation | 25 | 31 to 90 days | \$500,000 |
| Ashland | Dist 3, PID 85417, Ashland Rail W Salem Line Impro | Ashland Railway W. Salem Line Improvements | Ohio Department of Transportation | 12 | 31 to 90 days | \$400,000 |
| Ashland | Material Handling | Provide new material handling capabilities in order to improve plant efficiency and throughput. This project is for the installation of 2,500 linear feet of 4" sanitary sewer main trunk line. The new sewer main is designed to replace an older deteriorating service line currently being used as a trunk line. | Maverick Innovative Solutions, LLC | 5 | 91 to 180 days | \$50,000 |
| Ashland | Jamison Creek Sanitary Sewer Line Improvements | The new trunk line will improve the capacity of the east corridor of the city as well as the southern part of the city by reducing backups. | City of Ashland | 15 | 181 days or more | \$1,250,000 |
| Ashland | Trickling Filter Tank VFD Modification Upgrade | Upgrade of existing trickling filter tank equipment VFD modifications located at the Waste Water Plant. This will improve the efficiencies and capacity of the treatment plant. | City of Ashland | 5 | 91 to 180 days | \$200,000 |
| Ashland | Restroom Building Project | The restroom building will be 32 feet by 20 feet, constructed of cement block with interior floor. There will be a covered rest area, storage area, restroom area for men and women including handicapped availability and a baby changing station in each. There are no public restrooms in the Village of Loudonville. The Loudonville Free Street Fair brings in thousands of fairgoers during the annual Fair. This is a tourist community and many events take place throughout the year. Public restrooms will encourage bus tours to the area. This will provide more financial stability to the businesses and the entire community | Loudonville Agricultural Society, Inc. | 25 | 0 to 30 days | \$10,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Ashland | One Million Gallon Elevated Water Tower | This project includes the construction of a new one million gallon elevated water tower. This tank will be located adjacent to the city's industrial park and will provide increased water pressure to the community as well as the industrial park. We estimated approximately 40 job will be created by this project, with the potential of adding additional businesses and employment to our industrial park by providing a adequate supply of water. | City of Ashland | 40 | 181 days or more | \$3,000,000 |
| Ashland | Industrial Park Roadway & Utility Infrastructure | This project includes constructing additional roadways and utilities infrastructure into the city's industrial park. The project adds approximately 3/4 miles of road frontage and several developable shovel ready industrial and business sites to our park. We estimated approximately 20 job could be created during the construction phase with another 50 being created with the increased industrial base. | City of Ashland | 20 | 181 days or more | \$1,000,000 |
| Ashland | Purchase of Hans Building | purchase property located at 165 North Water Street, Loudonville, Ohio. There are two lots - No. 1 has 8507 finished square feet and No.2 has 920 finished square feet. Proposed purchase price is \$125,000.00 with the following major improvements: replacing the roof, new heating, electrical upgrade, new lighting fixtures and insulating the building. Approximate total cost to the Society including purchase price and improvements will be \$175,000.00. The building will be used to display agriculture, horticulture, art., photography, culinary and other displays during the annual Fair. Off season events will be held to promote the Loudonville Free Street Fair and the Village of Loudonville | Loudonville Agricultural Society, Inc. | 10 | 0 to 30 days | \$25,000 |
| Ashland | Dist 3, PID 18221, ASD US 0042 03.57 | Bridge Rehabilitation | Ohio Department of Transportation | 37.3 | 31 to 90 days | \$1,300,000 |
| Ashland | Dist 3, PID 19601, ASD SR 0089 02.94 | Bridge Replacement | Ohio Department of Transportation | 25 | 31 to 90 days | \$500,000 |
| Ashland | Dist 3, PID 19571, ASD SR 0302 00.89 | Bridge Replacement | Ohio Department of Transportation | 25 | 31 to 90 days | \$700,000 |
| Ashland | Hot Mix Paving in Ashland County | Pave approximately 30 miles of roads maintained by the Ashland County Engineer with hot mix asphalt. The village is under final findings and orders from the Ohio EPA to install a wastewater treatment system to include : [Floyd Brown Eng. estimates] | Ashland County Engineer's Office | 17 | 0 to 30 days | \$4,404,952 |
| Ashland | Waste Water Treatment System | 52 48" manholes 17,095 LF of 8" pipe 150 8" wyes 4,209 LF of 6" pipe 1,161 LF of 2" force mains 50 LF of bores Duplex Package Lift Station Pump Station at package plant Maint. of traffic Permanent seeding and mulching Erosion control Site mobilization Building Site work Package wastewater treatment plant Filter media Electrical Secondary power source Basic eng. services Additional eng. services Acquisition expenses-easements Permits, advertising, legal Construction contingencies [10%] An income survey was conducted RCAP, [Regional Community Assistance Programs] that placed the village MHI at \$35,000. This qualifies the village in a low to moderate income group. We are seeking Pave approximately 30 miles of road maintained by the Ashland County Engineer with cold mix asphalt | Village of Polk | 1 | 181 days or more | \$500,000 |
| Ashland | Cold Mix Paving in Ashland County | Pave approximately 30 miles of road maintained by the Ashland County Engineer with cold mix asphalt | Ashland County Engineer's Office | 16 | 0 to 30 days | \$2,349,982 |
| Ashland | Guardrail Installation in Ashland County | Install approximately 13 miles of new guardrail at critical points along Ashland County roads as recommended by a hazard analysis study. | Ashland County Engineer's Office | 5 | 0 to 30 days | \$976,556 |
| Ashland | Widening Ashland County Roads | Widen approximately 15 miles of county roads in Ashland County bringing their lane widths into compliance with ODOT standards. | Ashland County Engineer's Office | 19 | 31 to 90 days | \$1,882,664 |
| Ashland | Bridge Replacements in Ashland County | Replace three bridges in Ashland County with structures that are recomended width and will carry loads 150% of the legal load limit. | Ashland County Engineer's Office | 5 | 181 days or more | \$1,380,120 |
| Ashland | East Main Street Storm Sewer Improvements | Construction of 1,058 linear feet of 36" storm sewer, 100 linear feet of 12" storm sewer to alleviate flooding in residential neighborhood. | Village of Loudonville | 10 | 91 to 180 days | \$144,900 |
| Ashland | Street Repavement Project | Re-pavement / reconstruction of approximately 18,000 linear feet of roadway in Village corporation | Village of Loudonville | 15 | 91 to 180 days | \$497,906 |
| Ashland | Water, Bustle Street ADA Sidewalk Replacement | Construction of Handicap Accessible curb, crosswalk and sidewalks in residential areas with concentration of elderly population. | Village of Loudonville | 5 | 31 to 90 days | \$12,600 |
| Ashland | Signage Improvement Project | Replacement / addition of signage in areas identified with safety concerns | Village of Loudonville | 2 | 31 to 90 days | \$9,225 |
| Ashland | Maintenance Facility Construction | Construction of Village Maintenance Facility for offices; vehicle, material and equipment storage; repair. | Village of Loudonville | 10 | 91 to 180 days | \$336,000 |
| Ashland | Yard Waste Disposal Site Construction | Construction of Municipal Yard Waste facility. | Village of Loudonville | 2 | 91 to 180 days | \$46,400 |
| Ashland | Equipment Purchase - Street Maintenance | Purchase of equipment (dump truck, snow removal equipment) for maintenance of Village streets | Village of Loudonville | 4 | 0 to 30 days | \$61,500 |
| Ashland | Sewer Inspection Equipment Purchase | Purchase of Sewer inspection camera system to maintain wastewater system - aid in I & R identification. | Village of Loudonville | 2 | 0 to 30 days | \$44,521 |
| Ashland | Water Reservoir # 1 Roof Replacement Project | Replacement of deteriorating structural roof / dome on .25 mg water reservoir tank. The tower capacity is 100,000 gallons and it is 100' tall. The exterior coating is in poor condition and is exhibiting chalking, slight mildew growth, and large areas of delamination and corrosion. The scope of this project exceeds the typical tank re-painting project as it involves the removal of the existing lead-based surface in its entirety. In order to preserve public health and safety during this project the tower must be draped, adding significant additional costs to the project. With the permanent removal of lead based paint, subsequent tower painting projects will see a reduction in cost as the paint will be replaced with an epoxy based paint. | Village of Loudonville | 15 | 181 days or more | \$1,400,000 |
| Ashland | Hayesville Tower Painting and Lead Abatement Proje | Due to the high costs associated with this project the Village is seeking funding assistance for this project. Village utility customers are already paying Water and Sewer bills that meet or exceed the affordability standards set forth by most funding agencies. The community has been certified as an LMI community with 59% of the households being low to moderate income | Ohio Rural Community Assistance Program | 5 | 91 to 180 days | \$94,375 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Ashland | Village of Polk Wastewater Collection and Treatment | This Village is under Ohio EPA Findings and Orders to address the large number of failing household septic systems there. The Village has 357 residents, with 129 households and businesses. A recent income survey conducted by the Ohio Rural Community Assistance Program confirmed that the Village's Median Household Income has dropped significantly since the last census, and is now only \$35,000. An earlier survey conducted in 2007 also showed that the Village qualifies for CDBG funding with a Low-to-Moderate-Income (LMI) percentage over 60%. USDA Rural Development has advised the Village it needs to obtain additional grants to be funded by their program. Any special appropriation will be spent on project construction activities. The total project cost estimate is \$2,845,000. This includes: <ul style="list-style-type: none"> \$790,000 is for the installation of a package wastewater treatment plant \$1,280,000 is for the installation of a sewer collection system and pump station \$501,000 covers engineering services for design, construction and inspection | WSOS Community Action Commission | 0 | 181 days or more | \$2,355,000 |
| Ashland | Street Resurfacing | We need to resurface three streets in the village, which range from 9 to 23 years since last paved. All three of these are heavily traveled and in very poor condition. Hopefully, once redone they will last at least another 10 years. The village does not have the monies to do such a large project as this and never has enough points to qualify for other grants due to lack of upfront money. | Village of Jeromesville | 10 | 31 to 90 days | \$268,000 |
| Ashland | Water Treatment Plant Improvements | Chlorine contact line and standby generators. 1700 Lf. of 8" plastic water line, 4-8" gate valves and boxes, sundry electrical work, and standby generators & transfer switches. We have experienced power outages and have had to rent standby generators to provide water for the village. | Village of Jeromesville | 4 | 31 to 90 days | \$234,000 |
| Ashland | Empowering youth for employment | Increase number of youth ages 14-22 who get services in Ashland County beyond the currently funded Workforce Investment Act (WIA) youth. This increase will meet the same standards as the WIA program and allow more youth to be served throughout the whole county. Youth will participate in WIA approved programming and meet WIA approved performance objectives. | Catholic Charities Community Services | 55 | 0 to 30 days | \$105,000 |
| Ashland | Loudonville City Building and Opera House | Additional fund request for architectural, engineering, administrative fees and services necessary to complete renovation / restoration of Village Municipal Hall and Theatre. Project includes replacement of roof, electrical upgrades and various ADA compliance features | Village of Loudonville | 100 | 31 to 90 days | \$110,000 |
| Ashland | Electrical Improvement Project | Construction / upgrade of underground electrical service to operate traffic signals in downtown area of Village. Project includes installation of circulating pump for public fountain | Village of Loudonville | 4 | 91 to 180 days | \$36,375 |
| Ashland | Street Repair Improvement Project | Purchase of model 125DJT spray injection asphalt repair equipment for maintenance of Village roadways. | Village of Loudonville | 6 | 31 to 90 days | \$48,750 |
| Ashland | Energy Conservation Improvement Project | Purchase of insulation, energy efficiency upgrades for various public buildings in Village. | Village of Loudonville | 6 | 31 to 90 days | \$18,800 |
| Ashland | Little Pine Run Bridge Project | Construction of 15' bridge (16' wide - culvert construction) for extension of bike way completing Village path, and providing accessibility to public park system. Site is within public right of way, project is approved by ODOT and is shovel-ready. | Village of Loudonville | 3 | 0 to 30 days | \$40,600 |
| Ashland | Bomb Squad Upgrade | Purchase an EOD robot for the Bomb Squad in order to remain certified by the FBI. The Ashland County Bomb Squad is a regional bomb squad and responds to 7 different counties under the Ohio Response Plan. | Ashland County Sheriff's Office | 4 | 31 to 90 days | \$125,000 |
| Ashland | Courthouse security | To provide security to the Common Pleas Courthouse to the staff and the citizens of Ashland County. Also in order to comply with Ohio Supreme Court Guidelines for Courthouse security measures | Ashland County Sheriff's Office | 0 | 31 to 90 days | \$35,000 |
| Ashland | School leader website | The School Leader website is a one-stop, comprehensive website for educators who are seeking ideas, best practices, data, documents, opinion polling results, and professional networking. The website will provide professional assistance and development to school leaders throughout the nation. Through the development and sustainment of the website, several jobs will be created. | Ashland university | 12 | 0 to 30 days | \$110,000 |
| Ashland | Used Truck and Equipment Supplier (Dealer) | the business I feel I would be a great candidate to have my own used truck and equipment business in Ashland Ohio. I would be able to supply dump trucks, tractors, trailers, cranes and a variety of other equipment to construction companies in Ashland & surrounding counties to be used in the repairing of our infrastructure. To do this I will have to secure land (rent or buy) with a building for an office, a used vehicle license and purchase a good selection of inventory for the start up business. In time I believe I will have a very strong independent business with as many as 5-10 employees and possibly more. Thank You | none | 4 | 0 to 30 days | \$500,000 |
| Ashland | wind powered building | Install and maintain a wind generator to help with electrical costs to maintain a storage facility. Make it available for others to come and see the operation and fine tune it to become only source of power. Test other wind generators for more power for bigger operations. If proven successful hoping to add more generators to be able to sell the excess back to power company and become less dependent on fossil fuels, and, help create power for others to use. Become maybe one of many small operations depending less on foreign oils to help generate fuels we now use. | Puglisi Concessions | 2 | 91 to 180 days | \$30,000 |
| Ashland | Less green more clean | replace approx. 15 acres of muddy area and grass land with stone to eliminate run off polluting the water ways and eliminating the gas and diesel equipment to keep it maintained | Four corners landscaping | 4 | 91 to 180 days | \$220,000 |
| Ashland | Wraparound Ashland | High Fidelity Wraparound is an evidenced based process to assist youth/families remain intact and avoid more restrictive and costly services like Children Services/Child Welfare, the Juvenile Justice System and Department of Youth Services. Due to funding reductions, Ashland had to discontinue it's High Fidelity Wraparound program in Fiscal Year 2009 but with Stimulus funding this program could quickly be reinstated. Expected Outcomes: Approximately 19 high risk youth/families will be served per full time Wraparound Coordinator. Youth/Families will be seen by the Wraparound Coordinator for approximately 12 months. It is expected that youth that would otherwise end-up in more restrictive/costly systems of care, will not. Cost savings estimates will average \$8,000 per youth. Families will remain intact and youth will be given the opportunity to excel. | The Mental Health & Recovery Board of Ashland County | 3 | 31 to 90 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Ashland | Juvenile Justice - Alternative School Liaison | Ashland currently has a state of the art program that brings together the systems of Education and Behavioral Health (Mental Health and Drug/Alcohol). School-community Liaison's are assigned to work in the school environment to identify, assist and facilitate referrals for youth that are struggling with behavioral health conditions. Multi-year outcomes show the incredible benefit of the program. Ashland would like to extend this very successful program to include the Juvenile Justice System (Juvenile Court; Jail and Probation) and the County's Alternative School. Liaisons would be primarily located at the Juvenile Court and Alternative School and provide linkage and coordination between these entities and the behavioral health system. 1 full time equivalent is requested for each location for a total of 2FTE's. Outcomes-Juvenile Justice Liaison Increased coordination between the Juvenile Court Judge and the Behavioral Health System allowing for more informed decision making; 2 fewer youth in residential care; 10% less out of home placement; 10% more youth in community based care; 10% more youth on weekends to take advantage of camping, canoeing, water sports, hiking trails. This project involves Constructing a tornado warning siren south of Loudonville to cover the heavily populated camping and recreation areas. This project will enhance emergency notification to the southern portion of the county and serve as the only method of warning for the thousands who call Loudonville home both temporary and permanent. Weather conditions change rapidly during storm season, and outdoor activities are very vulnerable to these changes. This project is a much needed addition to this area. | The Mental Health & Recovery Board of Ashland Coun | 2 | 31 to 90 days | \$140,000 |
| Ashland | Emergency Notification sirens | Constructing a tornado warning siren south of Loudonville to cover the heavily populated camping and recreation areas. This project will enhance emergency notification to the southern portion of the county and serve as the only method of warning for the thousands who call Loudonville home both temporary and permanent. Weather conditions change rapidly during storm season, and outdoor activities are very vulnerable to these changes. This project is a much needed addition to this area. | Ashland County | 5 | 91 to 180 days | \$30,000 |
| Ashland | American Augers / Jackson Township Rd 133 upgrade | Widen 900' of roadway to 24' wide, pave 1300' of road and chip and seal 2.2 miles of roadway. The improvement will support the expansion project of a local manufacturer which has retained 160 jobs and created another 100. The widening, paving and sealing of the road will create 50 construction and supporting jobs for 3 days. | Ashland Economic Development | 50 | 31 to 90 days | \$81,950 |
| Ashland | Rehab taxiways | Rehab taxiways Our service will be provided to rural areas where there are currently no high speed options. Current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. | Ashland County Airport Authority | 7 | 31 to 90 days | \$400,000 |
| Ashland | Wireless Broadband for Rural Application | Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Ashland | paving our school's parking lot | Right now about 1/3 of my son's parking lot is gravel and it is very uneven...we'd love to be able to get this black topped and we could use the extra parking with lines as we don't have enough room to accommodate every car for our schools' events. Thank you for your consideration, Shannon Wyatt | Edison PTO | 2 | 91 to 180 days | \$60,000 |
| Ashland | Mohican Fitness | Ms. Drouhard is seeking a grant to purchase a building, equipment and supplies, and to cover working capital and fees for the start up of a new business. This business, named Mohican Fitness, will provide our members with a 24-hour keyed entry fitness center for members and their guests. The grant will provide the necessary building, equipment, supplies and working capital to ensure a successful future for the business. Expected new jobs created at start-up is 4. I started planning this business a few years ago, but was unable to obtain financing due to the economic condition. | Mohican Fitness | 4 | 0 to 30 days | \$300,000 |
| Ashland | Snowplow | Replacement of 20 year old snowplow and truck for maintenance of airport property, runways and taxi streets. | Ashland County Airport Authority | 2 | 31 to 90 days | \$122,000 |
| Ashland | GAC installation project | GAC contactor installation for the removal of disfection byproducts. This project is ready for construction. | Cinnamon Lake Utilities Association, Inc. | 30 | 0 to 30 days | \$1,300,000 |
| Ashland | ASD Capitalized maintenance | 2009 capitalized maintenance | Ohio Department of Transportation | 1 | 0 to 30 days | \$39,250 |
| Ashland | Bikepath Rest Room Project | The Bike Path Restroom project would provide rest room facilities in Wally Road Park near the bike path (completed). There are no RR facilities in Wally Rd. park which contains a soccer field and 2 ball fields. | Village of Loudonville | 12 | 91 to 180 days | \$160,000 |
| Ashland | Peer Mentoring | Provide peer mentoring training to high school students in a 4-County region, including Medina, Lorain, Huron and Ashland. The trainings would provide listening skills, role modeling and leadership skills for the high schools students. The high school students would focus their role modeling and listening skills on the areas of substance abuse prevention and obesity reduction when working with elementary age students. | Peer Solutions | 24 | 31 to 90 days | \$6,500,000 |
| Ashland | 5KW Solar Panel Grid Tie-in Installation | By purchasing and installing a solar panel project on our township building, this project will help to greatly reduce our largest utility expense by almost 20% annually. As a small township, we have limited funding, but with an initial investment in alternative energy such as solar power, we will be able to reduce future utility costs from our cooperative electric company. By becoming a trend setter for other villages and townships, we seek to set a good example of how to integrate new energy technologies, while also creating a framework with which we can add additional solar panels to in the future. | Troy Township, Ashland County | 11 | 0 to 30 days | \$30,000 |
| Ashland | Solar Panel & Thermal Heat Sunc | Completion of design & testing of new panels with reduced footprint, and increase in collection area. Testing & design of thermal heat sync for new & existing Thermal solar systems. Establishing of a production manufacturing facility using standard & advanced materials. Also creating new jobs. Produce panels at reduced cost & footprint, with increased efficiency. Allowing the unit to be retrofitted on homes & business or greater expansion of the use of solar. | Mantac LLC | 15 | 0 to 30 days | \$1,500,000 |
| Ashland | Sustainable Fuels for University Vehicles | THE PROPOSED PROJECT IS TO PURCHASE AND INSTALL BIOMETHANE FUEL SYSTEMS ON OUR VEHICLES TO USE THE BIODESEL. We currently have a number of diesel and non diesel grounds and on road vehicles used in our maintenance and grounds departments. We propose to build a processor and replace a portion of our vehicles to make use of this fuel. We are a small private university with limited endowments and the capital to replace vehicles to make use of the available waste vegetable oil from our dining operations is not available in the near or long term outlook. A program that would help us with the initial purchase would allow us to overcome the largest hurdle and position us to maintain a fleet over the long term. | Ashland University | 5 | 0 to 30 days | \$225,000 |
| Ashland | Develop playground for Scarborough Park | This project is to develop a playground for Scarborough Park in Troy Township, Ashland County, Ohio. It includes the purchase and installation of an ADA accessible playground structure for enjoyment by our local youths and their siblings, ages 2 to 15, as well as to encourage greater use of our local township park. Having a nice park is important to our community's quality of life. By adding a playground for our growing community, it will add to the other amenities of our current park, which includes three baseball/softball fields, a pavilion, and a walking track. Many hours have been spent on this project, as our township trustees recently applied for an Ohio Natureworks grant, and should we get accepted for it, will cover a portion of the project also. | Troy Township, Ashland County | 11 | 31 to 90 days | \$12,984 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Ashland | Personal Security for Ashland County | online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rescue operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our devices. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can set location boundaries and trigger notifications when exceeded. For personal safety a panic button can issue an alarm with location information to multiple chosen phone numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self-powered units that continuously monitor underserved areas while employing hundreds in high paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network in Delaware to surrounding counties for people stuck in the digital abyss. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the funds awarded to the providers of cable and DSL, the underserved areas still exist today. Now this the time to try something different. Rural America needs access today not the failed promises of the past. Our unique process for deployment utilizes the most cost effective wireless model available. Each dollar spent produces the most coverage per mile of any existing provider which allows low access fees and universal participation even among the low income and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident by our existing network, the most advanced and cost effective | Nuleaf Ohio Limited | 2 | 31 to 90 days | \$115,000 |
| Ashland | Wireless Broadband for Ashland County | and underserved areas while employing hundreds in high paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network in Delaware to surrounding counties for people stuck in the digital abyss. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. | Ashland | Officer Retention Program | Funding needed due to severe budget cuts requiring us to lay off road patrol and detective units. Divisions are currently operating under staffed at this time. Due to these budget cuts our staffing level will be reduced even further. This grant will enable us to maintain current levels of service to the citizens of Ashland County. We currently are operating with 15 enforcement and detectives for a population base of 55,000 with a 403 square mile area to patrol and maintain public safety | Ashland County Sheriff's Office | 8 | 31 to 90 days | \$400,000 |
| Ashland | Municipal Update and Improvements -211 Claremont A | This project will retro fit the Municipal building located at 211 Claremont Avenue with a new gable steel roof and ventilation system with an upgraded security. Benefits of this project is that it replaces an old roof, making the building more energy efficient, secure, comfortable to work in, citizen friendly and lowers the city's operating expenses. The project will be broken down into different segments: 1. Replace the old roof with a new gable 25 year standing seam steel roof and ventilation system to help keep the building cool. 2. Replace and/or upgrade the security system to provide better security for the building and persons entering or working in it. | City of Ashland | 4 | 91 to 180 days | \$275,000 |
| Ashland | Municipal Building Update and Improvements | This project will retro fit the Municipal building located at 206 Claremont Avenue with new and improved energy technology and environmental friendly building materials. Benefits of this project include making the building more energy efficient, secure, comfortable to work in, citizen friendly and lower the city's operating expenses. The project will be broken down into different segments: 1. Replace the old drafty windows and entrance doors with new energy efficient sun reflecting windows and entrance ways. 2. Replace an antiquated exhaust fan for boiler boiler and the window air conditioning units with zone HVAC systems for each floor of the building. 3. Replace the current lighting throughout the building with new ergonomic lighting to reduce energy consumption and eye strain. 4. Replace and/or upgrade the security system to provide better security for the building and persons entering or working in it. | City of Ashland | 4 | 181 days or more | \$450,000 |
| Ashland | RC DV Safe Haven | term effects are not only detrimental to the survivor him/herself, but can lead to lasting and long term consequences to survivors family members, friends, classmates and ultimately the community at-large. Ashland County is a rural county located approximately half way between Cleveland and Columbus with a population of approximately 53,500. Funding to support the 24 hour crisis intervention supportline and volunteer advocacy peer support services are at risk of shutting down due to loss of funding for such programs. With Stimulus funding dollars we can continue providing this much needed service to those in need. In 2007 we provided prevention, intervention and support to over 800, in 2008; more than 1,000. With funding we will continue to provide immediate response to emotional and physical needs in the aftermath of sexual assault, domestic violence and stalking, including a 24-hour supportline, peer support, support groups, assistance in filing for crime victims' compensation and VINE, safe shelter housing, assistance in securing community resources. | Applesed Community Mental Health Center | 10 | 181 days or more | \$25,000 |
| Ashland | Hayesville Opera House Window restoration | Being requested is funding assistance to reconstruct the windows in the theatre of this historic building. Funds received will be matched through the Save Americas Treasure program. In 2005 the National Park Service awarded a grant in the amount of \$92,000.00 to assist in the renovation and preservation of this historic theatre. Funds awarded will be used by the Hayesville Opera House Restoration Board, Inc who has contracted the Durable Restoration Company of Columbus, Ohio to rebuild the windows in the theatre to make them energy efficient | Hayesville Opera House Restoration Board Inc. | 20 | 0 to 30 days | \$25,000 |
| Ashland | The Father Mentoring Program | Ashland County Family and Children First Council sets a need to provide specialized support services for fathers. The Father Mentor Program will promote healthy fathering as well as coordinate all service supports to assist unemployed and underemployed fathers to increase their employability. Mentors will provide coordination of services to address various employment barriers such as low education and low literacy, mental health and health needs, and limited family management skills. Fathering skills will also be provided. With Council member representation from nearly thirty family-serving agencies in the county, we have the capacity to gain a broad referral base. The Father Mentor program will serve fathers with children from infancy to age 18. Target subgroups are unemployed low-income dads, new fathers, non-custodial dads and fathers enrolled in the Help Me Grow program. Currently, only 22% of fathers. Stimulus dollars will allow the Family and Children First Council to bring in evidence-based curriculum and resources to fathers. ADD APPROXIMATELY 7500 \$ NEW CONSTRUCTION TO EXISTING BUILDING AND/OR AN ADJACENT ANNEX BUILDING. Renovate and update remainder of original structure. | Ashland County Family & Children First Council | 2 | 31 to 90 days | \$115,000 |
| Ashland | Library Expansion Renovation Project | Project would alleviate grossly crowded conditions, providing more work space and public gathering areas, including a teen/young adult area, enlarged children's space, a computer lab area and more space for shelving and display of library collections. | Ashland Public Library | 4 | 91 to 180 days | \$3,000,000 |
| Ashland | need sewage plant to expand business, and create n | Build additional sites for modular housing, sewer existing sites, generally expand every aspect of the existing business, that's been established for well over 30 years. | terrace lakes campground | 4 | 31 to 90 days | \$450,000 |
| Ashland | Green Technology | Replace all existing sewer systems within the district which will conserve electricity and repalce all old energy wasting computers—6 new servers and 100 computers To become Energy independent | Mapleton Local Schools | 2 | 91 to 180 days | \$75,000 |
| Ashland | Energy independence | This would be a project to examine the feasibility of energy independence in the rural setting, i.e. a small home farm. The project would include the installation of a wind generator to become independent from electrical energy, a solar system to become independent from propane usage to heat water and a wood burning unit mounted outside to become independent from propane heating. The project would be tracked over a 10-year period to record the energy savings as well as the amount of electrical power that would be placed back on the power grid with Ohio Edison. The amount of energy savings as well with the replacement of propane usage. This project would also track the amount of maintenance needed for each of the units. This information would be kept in a running log for comparison and be available to anyone who needed the knowledge of systems used. If the test residence would be placed on the market for sale within the 10-year testing period the replacement owners would become responsible for its tracking and reports. | Home study | 0 | 31 to 90 days | \$75,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Ashland | Kinship Care | Kinship Care provides services to help families that foster or adopt a relative child. Using a case management approach, families will receive assistance in fostering or adopting a relative child therefore preventing the child from going into custody of the state. Families will be linked to needed services to assist in the successful foster or adoptive placement. | Catholic Charities Community Services | 20 | 0 to 30 days | \$50,000 |
| Ashland | Strengthening Families | Strengthening Families assists At Risk families to maintain stability and avoid involvement with criminal behavior. Using a case management approach, families that have either youth or adults involved in or at risk of involvement with the court system will receive intensive services designed to address the familial challenges that lead to criminal behavior. Families will receive intensive home based skills enhancement as well as group participation in various best practice curriculums designed to prevent criminal behavior. Since the family is served in a holistic manner all challenges are addressed at the same time. | Catholic Charities Community Services | 50 | 0 to 30 days | \$100,000 |
| Ashland | STNA Training Site | Remodel existing building into training facility for STNA. Estimated cost of remodel including installing bathroom and sewer line, insulation, lighting, training equipment is 35,000. Would like to hire 2 RN's to do training and 2 people with CPR Training and child-care experience to do on-site child care. That way I could offer training day and night with child care available for single mothers or those on limited income. Would like to keep cost of training about \$100-150.00 lower than what is being offered in this area. Could possibly expand into home health aide business. | private business | 10 | 0 to 30 days | \$100,000 |
| Ashland | Loudon Bluffs Project | Loudon Bluffs is a 40 unit senior citizen housing community located in the rural Ashland County village of Loudonville. This senior community is a vulnerable population, especially during times of crisis. As with any aging population, many residents have health issues requiring the use of electrical devices as well as the dependence on phone service for well being checks. We propose to use stimulus funding to purchase a generator for the on-site community room which would serve as an emergency site during emergencies, extreme weather conditions, and power outages. Our residents and their extended families would have the peace of mind knowing that during times of crisis their loved ones will be housed in a safe haven, heated or cooled, and with the electricity needed to sustain emergency medical needs. | Kno-Ho-Co-Ashland Community Action Commission | 0 | 0 to 30 days | \$8,000 |
| Ashland | Helping families in crisis | unemployment. United Way of Ashland County assists Associated Charities and the Salvation Army locally to provide emergency help with food and shelter for families. United Way with a 20% increase of families requesting help in 2008 we are not able to keep up with the demand of these critical services. These new dollars would be used to help improve the lives of those in immediate need. We have lost two major companies locally in the last two years that has displaced approximately 600 workers. In the last six months there has been 625 lay-offs throughout the Ashland County. Like many other counties our forclosures have reached record numbers. We are a very diverse county of approximately 54,000 people with agriculture and industry serving many of the employment opportunities. We have a county that cares about helping others, but we are struggling to meet the increased demands. This funding possibility would certainly assist in providing new food and shelter dollars to individuals and families that never thought they would need help. | United Way of Ashland County | 2 | 0 to 30 days | \$105,000 |
| Ashland | Adult Supported Employment, | The primary goal of the Adult Supported Employment program is to assist individuals in gaining self-sufficiency through securing permanent employment. Services provided to assist individuals in securing employment are; resume preparation, interviewing skills, employment searching, and information regarding education/job prep opportunities, individual employment /employable skills assessment, on the job coaching, employment counseling and career planning. Case management services will be provided and an individual service plan, developed by both case manager and client, will be developed with individual goals and objectives. Continuing contacts by Case Management staff will be throughout individuals job prep, interviewing and securing period and provided as job coaching as needed for up to 3 months to assist individuals in maintaining their job. Final assessment of services will be completed by all individuals completing the Adult Supported Employment program. | Appleseed Community Mental Health Center | 60 | 31 to 90 days | \$100,000 |
| Ashland | Courthouse Security Improvements | Complete modifications or historical courthouse facility which are necessary to implement the Ohio Supreme Court Security Standards, including, but not limited to making the main courthouse entrance handicapped accessible; installing a central security screening station at a single entrance; video security surveillance equipment; new duress alarm system; installation of holding areas within the courthouse for prisoners; and separating paths of travel required under best practices for court security. | Ashland County Board of Commissioners | 5 | 31 to 90 days | \$1,500,000 |
| Ashland | Tri-County Child Development and Learning Center | 5-year-olds. The Center would employ 26 staff members and provide evidence-based best practices in childcare and curriculum. There is a significant need for high quality daycare in Ashland County so that workers can secure jobs and maintain their employment. Evening and weekend care would also be available for shift workers. The center would be located next to an alternative high school and would provide daycare for high school students with children, hence high school graduation will be expected to increase. With Help Me Grow budgets decreasing, the center would serve at-risk, low-income families, who are no longer able to access HMG. Not only would the center serve low-income families, but would also provide much-needed daycare for children with development delays and medical concerns. For children approaching school age, the center will focus heavily on school readiness skills, especially with regard to pre-literacy skills. Many local agencies such as Family Council, Department of Job and Family Services, Help Me Grow, and MRDD are working together to | Tri-County Educational Service Center | 26 | 0 to 30 days | \$250,000 |
| Ashland | Juvenile Diversion Mentor | the juvenile offender population to provide clinical information and recommendations to the court. These professionals will work closely with court personnel, community partners, schools, alcohol and drug addiction services, probation and prosecution to provide linkages and interventions appropriate for this population. There is a need for Juvenile Diversion Mentors who would work with serious juvenile offenders with serious emotional disturbance who are at highest risk of re-offending. providing contacts as necessary, monitoring, and interventions as needed. They would also provide immediate crisis stabilization and safety planning to families referred to the program, as well as facilitates the step-down transition to less intensive services. And establishing a Behavioral Health Family Council consisting of representatives from each of the previously mentioned community partners, but also other professionals in the community, parents and family members, and other juveniles who have successfully completed treatment and been able to remain out of trouble and be | Appleseed Community Mental Health Center | 2 | 91 to 180 days | \$110,000 |
| Ashland | Youth Supported Employment | employable job readiness skills, including professional resume writing and interviewing skills. Working closely with an employment case manager, each youth will be provided an intake assessment to identify interests, skills and abilities, practice interviewing skills, assistance with GED or working closely with Appleseed Community Mental Health Centers School/Community Liaisons to help youth remain and complete high school, job searches, and as needed after the youth secures employment to provide, up to three months, on-site job coaching to promote job retention. The goal of the Youth Supported Employment program is rapid job search. Evidence shows that there is less success if job searches are delayed by extensive pre-occupational training and or assessments, so the goal of the program is to complete the intake assessment quickly and engage youth in actively seeking employment as soon as possible. With the Employment Case Managers, members of the Appleseed Community Mental Health Center team, youth will be more prepared to obtain employment | Appleseed Community Mental Health Center | 60 | 31 to 90 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Ashland | Center for 21st Century Learning - Renovation Of M | Renovation of Miller Hall into the Center for 21st Century Learning. The facility is the oldest building on campus built in 1922 and is currently used for storage. Ashland University in a private, comprehensive university positioned to provide 21st Century Learning Skills Outcomes. The 28,000 sq. ft. building is located in the middle of the University's three Colleges of Arts & Sciences, Business & Economics, and Education. The Center for 21st Century Learning would provide the location for collaboration and joint programming across the campus for undergraduate, graduate and professional development students. The focus would be 21st Century Learning Skills Outcomes. The complete renovation would provide for classrooms, seminar rooms, student study areas, research areas, and faculty offices. The renovation would include and meet all environmental requirements. | Ashland University | 10,000 | 31 to 90 days | \$7,000,000 |
| Ashland | Expansion/Community Support | Creation of 4 new jobs for Ashland County Residents by expanding existing children's resale store. Also creating a new re-sale store for women's clothing (location already secured). Continue to provide necessary clothing at extremely reasonable prices, create an outlet for working women (and those newly entering the workforce) to obtain necessary clothing, allow foster families to continue to provide for children, and assisting Ohio residents in stretching their economic dollar. Our business has been in existence since early 2005. We have established a well respected reputation within the Community and wish to continue to be a blessing to the citizens of Ashland and the surrounding areas. We have an existing customer base and strongly believe there is a great need for the service we currently provide. We are convinced that there is also a great desire for reasonably priced women's clothing within our Community. Thank you for your consideration. This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering a loader. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Worn & Reborn | 4 | 0 to 30 days | \$84,000 |
| Ashland | Seville Sand and Gravel, Cummins Bridgeway, Clean | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering a loader. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$80,000 |
| Ashland | Cowen Truck Line, Inc , Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering a loader. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 31 to 90 days | \$50,000 |
| Ashland | Baker Sand & Gravel, Cummins Bridgeway, Clean Fuel | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering a dragline crane. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$100,000 |
| Ashland | AU Campus Notification and Management Systems | Ashland University (AU) requests assistance to implement a campus emergency notification system for outside spaces, and a public address/paging system for internal spaces, in the event of imminent danger In addition, the University requests assistance to purchase and fully implement a campus-wide signaling and resource allocation system. A centralized system will account for events (classes, seminars, lectures, guest speakers, etc.) throughout the campus so we fully know where a happening in which areas of campus to aid in emergency notification and response. | Ashland University | 10000 | 0 to 30 days | \$185,000 |
| Ashland | Mohawk Pizza Spirits & More LLC | Bring current buildings up to state and local county building and health department codes. By remodeling the current kitchen with all commercial equipment and adding the necessary walls, plumbing, flooring, sealing, and electric fixtures to code, with additional interior walls remodeled. Removal and relocate an existing walk in cooler, removal of two pizza ovens in wall and replace with cement block to cover opening. Paint the outside existing buildings. Being able to put up to ten people to work during remodeling and after remodeling is completed | Mowhawk Pizza Spirits & More LLC | 10 | 0 to 30 days | \$250,000 |
| Ashland | FREER FIELD PARK HARDENED WHEEL CHAIR TRAIL | 1.75 miles of hard surface wheel chair path, of asphalt a width of ten feet by 2 inches thick with 300 linear feet 3 inches thick. On a 304 aggregate base 12 feet in width by 6 inches in depth. Keeping a 1% incline / decline. This will give access to challenged and mobility impaired persons who need wheel chairs to enjoy the natural and educational experience of this park | ASHLALD COUNTY PARK DISTRICT | 50 | 31 to 90 days | \$323,080 |
| Ashland | Geothermal expansion | Purchase of newer equipment to install more geothermal loops more efficiently also for schooling and to insulate our shop area to conserve on heat loss | Rod Rogers Construction and Geothermal Loops | 5 | 0 to 30 days | \$56,000 |
| Ashland | TCV upgrade | To replace our current bomb containment trailer with a Total Containment Vessel (TCV). The current trailer is 24 years old is not a TCV type. The CV typp will handle all current types of explosives including Weapons of Mass Destruction (WMD's). The Bomb Squad handles a 7 county area and is classified as a regional Bomb Squad. | Ashland County Bomb Squad | 0 | 31 to 90 days | \$185,000 |
| Ashland | Response vehicle replacement program | To replace the response truck of the Ashland County Bomb Squad. The current vehicle is a 1996 converted squad that has high hours and not enough room to hold all of the bomb Squads Equipment. The Squad responds to a 7 county area and is important to be able to carry all our equipment in a single vheicle. We would like to replace the current vehicle with a newer, mission specific vehicle that is designed to handle the specialized equipment a bomb team requires on their missions Lighting Upgrade - Details are not available | Ashland County Bomb Squad | 0 | 31 to 90 days | \$200,000 |
| Ashland | Lighting | at the moment as we are waiting for the electrician's report. | Ashland Precision Tooling, LLC | 0 | 31 to 90 days | 100000.00 |
| Ashland | Renovation of Miller Hall | for 21st Century Learning. The facility is the oldest building on our campus built in 1922 and is currently used for storage. Ashland University is a private, comprehensive university positioned to provide 21st Century Learning Skills outcomes. The 28,000 sq. ft. building is located in the middle of the University's three Colleges of Arts & Sciences, Business & Economics, and Education. The Center for 21st Century Learning would provide the location for collaboration and joint programming across the campus for undergraduate, graduate and professional development students. The focus would be 21st Century Learning Skills Outcomes. We feel that this project is important and addresses several focus areas: (A) renovation to this facility will be energy efficient; (B) renovation of this facility into 21st Century Learning to address one of the state's concerns; (C) creating jobs for contractors to actually renovate the facility, and the utilization of the facility to train/educate students for meeting the needs of the 21st Century; and (D) years, and we have cut the teen pregnancy rate by more than 50% during this time. Our program has expanded from 2 original small groups serving 5 youth 4 years ago to over 40 groups serving more than 300 youth today. The benefits of reducing the teen pregnancy rate are seen socially, economically, academically, mentally, and physically. Continuing this program and expanding it can help us further impact the lives of youth entering their teen years through those entering the workforce. Engaging parents to become more involved with their kids will also be a part of the program, as outcomes for such youth significantly improve the likelihood a teen will not become a parent. To date, births to teens have gone from 83 in 2001 to 40 in 2008. This significant reduction is a result of concerted, focused effort and leads to more educated, stable, productive young adults who become parents when they are financially ready to support them on their own. | Ashland University | 10000 | 31 to 90 days | 7,000,000 |
| Ashland | Teen Pregnancy Prevention | This project will include the repavement of an existing tailing arc culvert and repaving of this important arterial street. It is one of only three north-south connections between US Route 20 and State Route 84 west of State Toute 534 and is therefore a critical connection for routine traffic and emergency vehicles. | Ashland Parenting Plus | 10 | 0 to 30 days | 300,000 |
| Ashtabula | West Avenue Bridge Rehabilitation | Rehabilitation of a second bridge located under the West Avenue Overpass/intersects with W38th Street) | City of Ashtabula | 5 | 31 to 90 days | \$1,505,000 |
| Ashtabula | Chestnut Street Bridge Repairs and Repaving | This project will include the repavement of an existing tailing arc culvert and repaving of this important arterial street. It is one of only three north-south connections between US Route 20 and State Route 84 west of State Toute 534 and is therefore a critical connection for routine traffic and emergency vehicles. | City of Geneva | 5 | 31 to 90 days | \$475,000 |
| Ashtabula | Cowles Creek Storm Sewer Repairs | Much of Cowles Creek in the heart Of the City has been channelized with concrete walls and paved inverts. These structures are now failing and contributing to the extensive flooding that the City has experienced over the last several years. In 2006, the City experienced so much damage due to the flooding that there was a Presidential Declaration for this occurrence, which offered the community much needed assistance through FEMA. This project will eliminate this characterization wherever possible to restore as much floodplain as possible. Where it is not possible to remove the channel walls, they will be repaired or replaced. | City of Geneva | 5 | 91 to 180 days | \$2,250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Ashtabula | North Eagle Street Paving and Reconstruction | The City of Geneva's industrial area including our most recent industrial park, the Eagle Industrial Park is located directly off North Eagle Street. The road was constructed in the 1960's of concrete and is in very poor condition. This street is a feeder off of Urd 20 which is heavily traveled by large trucks. | City of Geneva | 2 | 31 to 90 days | \$450,000 |
| Ashtabula | Sherman Street Paving and Reconstruction | The project consists of repaving, base repair and necessary storm water and drainage installation. Sherman Street is an important arterial street which feeds a substantial amount of traffic from our southern corporate limits into our downtown district. | City of Geneva | 2 | 0 to 30 days | \$450,000 |
| Ashtabula | Van Epps Street Improvements | This project includes replacement of an existing undersized (1-inch diameter) badly corroded water main, repairs to the sanitary sewer, and resurfacing of the street. The water main is only marginally capable of providing normal domestic flows and is incapable of providing any fire flow. This project will also provide a loop in the water system between East Main Street and Eastwood Street. The sanitary sewer is badly infiltrated with tree roots. The sewer is only four (4) feet deep, but serves a large tributary area of higher elevation. If these roots cause a blockage, a sewage overflow will immediately flood the basements of two adjacent residential homes and also drain directly into Cowles Creek from the shallow manhole adjacent to the creek. | City of Geneva | 2 | 31 to 90 days | \$240,000 |
| Ashtabula | Water Main replacement of State Route 84 | This project is replacement of an existing water main along an easement inside the corporate limits east of SR 534. This is a primary transmission main through the City, conveying water from the source of supply in Ashtabula City to the two (2) million gallon Harpersfield Reservoir on the City's south limits. This main has been subject to numerous recent breaks. Breaks on this line pose a threat to public health and safety because they could result in the draining of the Reservoir and corresponding depressurization of the distribution system. | City of Geneva | 5 | 31 to 90 days | \$900,000 |
| Ashtabula | Water Street Water Line Repair | This project involves the replacement and relocation of the existing waterline. Portions of this main have become exposed because of erosion. This waterline serves a significant portion of the City's Industrial District. | City of Geneva | 2 | 31 to 90 days | \$150,000 |
| Ashtabula | Wastewater Treatment Plant Equalization Basin and | The City of Geneva's wastewater treatment collection system experiences high flows during wet weather periods. Such high flows have resulted in sewage overflows from the wastewater treatment plant to Cowles Creek eighteen (18) times in the past twelve (12) years. This project will control such overflows through the construction of an equalization basin and associated headworks improvements. | City of Geneva | 15 | 91 to 180 days | \$3,000,000 |
| Ashtabula | City of Conneaut - 2008 Sewer Repairs | Project involves sewer repairs and lining | City of Conneaut | 10 | 31 to 90 days | \$500,000 |
| Ashtabula | City of Conneaut - Aerial Sewer Repairs | Existing aerial sewer is in excess of 50-years old and is in poor structural condition | City of Conneaut | 10 | 91 to 180 days | \$250,000 |
| Ashtabula | City of Conneaut - Wastewater Treatment Plant Head | Existing screening and grit removal facilities are in excess of 50-years old and do not perform efficiently | City of Conneaut | 30 | 181 days or more | \$2,000,000 |
| Ashtabula | City of Conneaut - 2009 Sewer Improvements | Project involves sewer repairs and lining | City of Conneaut | 15 | 181 days or more | \$750,000 |
| Ashtabula | City of Conneaut - Gateway Lift Station Building R | Project involves replacement of failing control building at a sewage lift station | City of Conneaut | 15 | 91 to 180 days | \$150,000 |
| Ashtabula | City of Conneaut - Wastewater Treatment Plant Disi | Improvements to eliminate gaseous chlorine | City of Conneaut | 20 | 181 days or more | \$750,000 |
| Ashtabula | MIDDLE ROAD RESURFACING AND WIDENING | The purpose of the funds is to resurface and improve middle road. This area is heavily traveled due to it being located in a major manufacturing location. Currently, two-thirds of the road is 18' feet wide. The goal is to widen the road to 22' so it would provide a much safer road. | ASHTABULA TOWNSHIP ROAD DEPART | 0 | 0 to 30 days | \$770,000 |
| Ashtabula | Ohio Avenue Sanitary Sewer Improvements | This is a sanitary sewer project for seven residents in the City that presently don't have access to the sanitary sewer system. They are currently discharging their wastewater to a side ditch. This is a very bad health hazard. | City of Ashtabula | 10 | 91 to 180 days | \$96,000 |
| Ashtabula | Wastewater Treatment Plant Chemical Feed Building | The Ashtabula's existing Wastewater Treatment Plant has a Chemical Feed Building. It is in very bad condition and is a health hazard to its employees. This is where the Phosphorus Removal Chemical and De-Chlorination Chemicals are added to the Wastewater. This is required by their NPDES Permit. In order to make this a safe environment for their employees to work in, this building has to be upgraded. | City of Ashtabula | 25 | 91 to 180 days | \$150,000 |
| Ashtabula | W 30th Street Relining Project | This is an existing major sanitary interceptor in their collection system. It is in major need of repair. There is a section of this interceptor that is 1,600 lf that no longer has an invert in its pipe. The solution is to install a liner and repair this section of the sanitary sewer interceptor. | City of Ashtabula | 10 | 91 to 180 days | \$375,000 |
| Ashtabula | Carpenter Road Pump Station | This is a major pump station in Ashtabula's sanitary sewer collection system. It has a major problem with overflows. When it rains the incoming sewerage is much greater than the capacity of its pumps. Therefore, it overflows into a receiving stream. The elimination of this overflow is a requirement of their NPDES Permit. The upgrading of this pump station is a necessary improvement for their compliance with this permit. | City of Ashtabula | 20 | 91 to 180 days | \$210,000 |
| Ashtabula | Roofing in Rural Counties | We are a small roofing company in business for 30 years. Since no one is building or buying houses our work has just about stopped. If we can get some stimulus start up money we will be able to pay for shingles and start bidding on re-roofs in the rural areas in Ashtabula County and surrounding areas. We need to be able to order for jobs which entails shingles, ridge vents, felt, metal, weathershield, vents. | Bill Manning Roofing Inc. | 10 | 0 to 30 days | \$25,000 |
| Ashtabula | South Chestnut - East Mulberry Sanitary Sewer Ext | The project includes the construction of a gravity sanitary sewer extending from East Mulberry Street South along South Chestnut Street to Goodale Road and extending from Chestnut Street along East Mulberry Street to Lenox-New Lyme Road | Village Of Jefferson | 0 | 31 to 90 days | \$718,400 |
| Ashtabula | Water System Stationary Generators | Construction of five (5) stationary generators at five (5) of the existing booster stations in the Ashtabula County Water System. Currently, back up power to these stations is provided by privately owned portable generators. In 2010, these services will no longer be available. Generators must be available during frequent power outages to continue to supply water to a population served in excess of 13,500. These customers include but are not limited to: hospitals, schools, nursing homes, industry, various commercial businesses and residential. | Ashtabula County Board of Commissioners | 2 | 31 to 90 days | \$270,000 |
| Ashtabula | Waste Water Treatment Plant Sludge De-Watering | This project will include permanent improvements to the existing Roaming Shores WWTP that will allow for dewatering of digested bio-solids. The dewatering method is the use of geotextile fabric drainage bags which are installed inside steel roll off container boxes. The liquid digested sludge will be conditioned with a liquid emulsion polymer prior to being pumped into the containment bag for dewatering with the filterate being returned to WWTP for treatment. When the container is full the sludge will be transported to a landfill for final disposal. | Village of Roaming Shores | 0 | 0 to 30 days | \$55,000 |
| Ashtabula | WWTP Retaining Wall Extension | To upgrade and make the necessary improvements to Roaming Shores Waste Water Treatment Plant for the treatment of digested sludge bio-solids | Village of Jefferson | 0 | 0 to 30 days | \$73,591 |
| Ashtabula | West Mulberry Street Phase 2 | The project includes the construction of a retaining wall near the Jefferson Village waste water treatment plant to prevent erosion near the aeration tanks | Village of Jefferson | 0 | 0 to 30 days | \$200,970 |
| Ashtabula | Walnut, Susan, & Satin Resurfacing | The project includes the paving of an asphalt concrete surface course and the construction of a sidewalk along West Mulberry Street with the Village of Jefferson. Mulberry Street is the main route to the new Jefferson Areas School Campus | Village Of Jefferson | 0 | 0 to 30 days | \$220,000 |
| Ashtabula | Sycamore Street Truck Route | The project includes the asphalt concrete resurfacing of East Walnut Street, West Walnut Street, Susan Drive, and West Satin Street | Village of Jefferson | 0 | 31 to 90 days | \$1,502,500 |
| Ashtabula | Poplar Street Culvert Repair | The project includes road construction along an un-improved section of Sycamore Street within the Village of Jefferson. The project includes the construction of a road, an embankment, and a bridge to allow truck traffic to by-pass the commercial center of the Village and remain within the industrial zone. | Village of Jefferson | 0 | 0 to 30 days | \$148,800 |
| Ashtabula | Poplar Street Culvert Repair | This project includes the replacement of the failing existing dual 9' corrugated metal pipe culverts beneath Poplar Street within the Village of Jefferson. | Village of Jefferson | 0 | 0 to 30 days | \$148,800 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Ashtabula | Chestnut Corridor Streetscape | The improvement of the main corridor through the Village of Jefferson by the implementation of safety enhancements for non-motorized transportation, the replacement of crumbling cement sidewalks with antique-style exposed aggregate walkways, the replacement of deficient sidewalk/street lighting with antique-style poles and modern fixtures, the replacement of malfunctioning and inefficient suspended traffic signals with mast arm units, the relocation of overhead power and utility lines underground, the consolidation of existing street signage, and the development and installation of historic signs regarding Jefferson Village. | Village of Jefferson | 0 | 31 to 90 days | \$2,500,000 |
| Ashtabula | Storm Water Drains | Specific purpose of the funds. Please include a detailed breakdown: Replacement of aging, non functional, storm drains and catch basins. | Village of Orwell | 0 | 0 to 30 days | \$97,544 |
| Ashtabula | Orwell Skate Board Park | Purchasing of new equipment and building of a skateboard park | Village of Orwell | 0 | 31 to 90 days | \$75,000 |
| Ashtabula | North Chestnut Street Sanitary Sewer Ext | The project includes the construction of a gravity sanitary sewer extending from Liden Street north 2350 feet along North Chestnut Street (SR46) to Jefferson Village's northern boundary. | Village of Jefferson | 0 | 31 to 90 days | \$676,800 |
| Ashtabula | Roaming Shores Municipal Complex | The project consists of building a new municipal complex for the Village of Roaming Shores. It will be approximately a 3,800 square foot single story structure with a walk-out basement. The administrative offices will be located on the main floor as well as a large meeting room to conduct public meetings. The lower level will primarily be dedicated to the Police Department with additional space for expansion which could serve as an emergency shelter in times of need. The complex will address basic aesthetic issues, site concerns and flexibility to adapt to future change for the residents of Roaming Shores Village. | Roaming Shores Village | 0 | 0 to 30 days | \$1,000,000 |
| Ashtabula | Paving of Streets and Parking Lots | Resurfacing of streets that include Leffingwell Drive, Chaffee Drive, Eddy Court, Jordan Court, Chaffee Court and Parking Lots, to pave rebuild streets and parking lots. | Village of Orwell | 0 | 31 to 90 days | \$462,264 |
| Ashtabula | Lenox Lyme Road Waterline Extension | Construction of approx. 1500 lf of new waterline. This project will provide service to approx. 20 properties. The existing homes in this area are currently served by private well supply. The current supply of water is poor in quality and poses a possible general public health concern. | Ashtabula County Board of Commissioners | 2 | 31 to 90 days | \$60,000 |
| Ashtabula | Jeffersonian Estates Sewer Flow Monitor | The project includes the construction of a sanitary sewer flow monitor station near the Jeffersonian Estates allotment. | Village of Jefferson | 0 | 0 to 30 days | \$30,000 |
| Ashtabula | SR 45/SR 307 Sanitary Sewer Improvements | The Ohio EPA has mandated the construction of approximately 8500 lf of sanitary sewer collection system and pumping station in Austinburg Twp. This project will provide public water sewer to approx. 100 properties. The existing homes in this area are currently served by private septic systems. Many of these systems have been determined to be in failure. This is the Ohio EPA action Resurfacing | Ashtabula County Board of Commissioners | 2 | 31 to 90 days | \$1,025,400 |
| Ashtabula | Dist 4, PID 84417, ATB US 0020 13.72 | | Ohio Department of Transportation | 86.1 | 31 to 90 days | \$3,000,000 |
| Ashtabula | Andover Township Building | The Andover Township building is in need of a new roof, windows and insulation | Andover Township Trustees | 2 | 31 to 90 days | \$90,000 |
| Ashtabula | Andover Township Park | The Andover Township Park needs eight (8) new street lights and new sidewalks | Andover Township Trustees | 2 | 31 to 90 days | \$38,000 |
| Ashtabula | Ayers Road | The resurfacing of 2.28 miles of Ayers Road with two inches (2") of cold mix | Andover Township Trustees | 2 | 31 to 90 days | \$245,000 |
| Ashtabula | Fenkell Road | The resurfacing of 1.54 miles of Fenkell Road with two inches (2") of cold mix | Andover Township Trustees | 2 | 31 to 90 days | \$185,000 |
| Ashtabula | Gibbs Road | The resurfacing of 3.6 miles of Gibbs Road with two inches (2") of cold mix | Andover Township Trustees | 2 | 31 to 90 days | \$380,000 |
| Ashtabula | Marvin Road | The resurfacing of 1.54 miles of Marvin Road with two inches (2") of cold mix | Andover Township Trustees | 2 | 31 to 90 days | \$185,000 |
| Ashtabula | Tuckahoe Drive | The resurfacing of .89 miles of Tuckahoe Drive with two inches (2") of cold mix | Andover Township Trustees | 2 | 31 to 90 days | \$89,000 |
| Ashtabula | Depot, Morley, Ohio and Station water main and pav | The resurfacing of the roadway and replacement of the deteriorated water mains on Depot and Station Streets and Morley and Ohio Avenues | Andover Village | 2 | 31 to 90 days | \$225,000 |
| Ashtabula | I-90 and SR 45 Corridor Improvements | The project would include building at least 220 feet of roadway and create a ROW for truck traffic. It would also widen the roadway within existing 66 ft ROW including curbs, gutters, grading and other improvements. These improvements will help make a congested corridor safer for everyone. | Ashtabula County | 10 | 31 to 90 days | \$622,073 |
| Ashtabula | Ashtabula County Airport Waterline Improvement | This is a waterline extension improvement project will provide public water supply to the Ashtabula County Airport and over 200 properties along the route of service. This service area is currently supplied by private wells. These wells are low producing, shallow in nature and are susceptible to surface water bacteria related pollutants. This current supply of water places severe limits on current and future economic development opportunities at the County Airport and the surrounding areas. | Ashtabula County Board of Commissioners | 25 | 91 to 180 days | \$2,900,000 |
| Ashtabula | Lagoon Marina Dock Replacement | Replace existing docks with new floating docks. The existing docks are are over 40 years old, are not handicapped accessible ADA, and require extense amounts of maintenance by the Port Authority to keep them in service. | Conneaut Port Authority | 0 | 31 to 90 days | \$1,500,000 |
| Ashtabula | Generator Replacement Improvements | The replacement of 10 existing generators and one new generator at existing pump stations in the Ash. Cty. Sanitary Sewer Collection Systems. This project will replace old (25+ yrs) and undependable generators that are critical to County wastewater operations. At times during interruptions in power, untreated wastewater has backed up into private properties creating personal property damage and potential health concerns. Once in place, these new generators will eliminate this interruption of service to over 3,000 customers and permit the county to better serve future growth. | Ashtabula County Board of Commissioners | 2 | 31 to 90 days | \$200,000 |
| Ashtabula | Geneva/Harpersfield Water Improvements | Replacement of approx. 9500 lf of 1950's cast iron waterline which is susceptible to breaks, causing disruption of service, bill orders and a general public health and safety concern. This project also includes the total replacement of a water system booster station. The existing station no longer has the ability to provide fire protection to the City of Geneva and the surrounding service area. | Ashtabula County Board of Commissioners | 25 | 31 to 90 days | \$1,275,000 |
| Ashtabula | Jefferson Street Improvements - Phase 1 | The project includes the removal and replacement of a failed storm sewer and the resurfacing of Jefferson Street within the Village of Rock Creek. | Rock Creek Village | 0 | 0 to 30 days | \$41,032 |
| Ashtabula | Jefferson Street Improvements - Phase 2 | The project includes the removal and replacement of a failed storm sewer and the resurfacing of Jefferson Street within the Village of Rock Creek. | Village of Rock Creek | 0 | 31 to 90 days | \$158,869 |
| Ashtabula | Austinburg Road Bridge Replacement | Replacement of the existing deteriorated bridge with 210' of 16'x10' box culvert. The old bridge once spanned an active rail line. The rail line is now part of the County's park system and the box culvert would serve as a tunnel for the trail. | Ashtabula County Engineer | 2 | 91 to 180 days | \$650,000 |
| Ashtabula | Hadlock Road Bridge and Road Realignment | Replacement of existing four (4) multipan box beam bridge (abutments with guardrail and walkway) and road realignment to improve steep grades and sharp curves. | Ashtabula County Engineer | 30 | 91 to 180 days | \$3,400,000 |
| Ashtabula | Liberty, Station & Willow Reconstruction | The project includes the reconstruction of Liberty Street, Station Street and Willow Street within the Village of Rock Creek. | Village of Rock Creek | 0 | 31 to 90 days | \$630,000 |
| Ashtabula | Horton Road Bridge Replacement and Road Realignmen | Replacement of the existing Steel Truss bridge over the Ashtabula River with new 135' span of Galvanized Steel Truss with Timber Decking, and road realignment to improve steep grades and sharp curves. | Ashtabula County Engineer | 18 | 91 to 180 days | \$1,600,000 |
| Ashtabula | Naylor Boulevard Area Improvements | Installation of utilities (water, sewer, gas, electric) along Naylor Boulevard to facilitate commercial development in the area. Construction of seasonal rental cabins on the North side of Naylor Boulevard near its west end. Construction of a boardwalk along the north side of Naylor Boulevard to connect with the existing Township Park boardwalk to the west and to Public Dock to the East. | Conneaut Port Authority | 15 | 31 to 90 days | \$850,000 |
| Ashtabula | Cemetery Bridge | The project includes rehabilitation of the Iron Thru Truss Bridge located at one of the entrances of the Rock Creek Cemetery. | b.martin@windstream.net | 0 | 0 to 30 days | \$88,000 |
| Ashtabula | Pymatuning Lake Road Realignment and widening | The project would widen the 12.5 mile section of existing substandard roadway to current highway standards as well as improve horizontal and vertical sight distance hazards. | Ashtabula County Engineer | 50 | 91 to 180 days | \$6,000,000 |
| Ashtabula | Latimer, Blair, E 30th and E32nd Allotment Grindin | The project will consist of grinding and resurfacing latimer Avenue, Blair Avenue, East 30th Street and East 32nd Street. It is one allotment where the street are all tied together. After grinding the streets we want to provide three inches (3") of 404 asphalt, which includes the base and top coat. | Ashtabula Township Road Department | 20 | 91 to 180 days | \$240,000 |
| Ashtabula | Northshore Trail | The total length of the project will be about one (1) mile. It will include the construction of the northern most end of the trail which leads to over greenway one path from west end of Street to the shores of Lake Erie. The 4.5 mile long non-motorized transportation route will feature a rapid fire succession of destination that will represent the best of Ohio. There will be three (3) detailed trail heads, authentic 110" timber covered bridge, seven span steel girder covered bridge, observation decks, and a public restroom. | City of Ashtabula | 10 | 181 days or more | \$6,282,402 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|-----------------------------|----------------|--------------------|---------------------------|
| Ashtabula | Forman Rd/Mills, Betts, Chestnut, Maple Rd. Improv | Roadway widening, base addition and drainage to Forman Road. Restoration and grading to Mill, Betts, Chestnut, and Maple Roads. | Austinburg Township | 2 | 31 to 90 days | \$774,500 |
| Ashtabula | Sandbar Access and Canoe/Kayak Launch Facilities | Provide access to the unique habitat of the sandbar in Conneaut Harbor. The proposed roadway will provide vehicular access and parking to allow the public to experience the sandbar either on foot via hiking trails, or from the water in canoes/kayaks. | Conneaut Port Authority | 10 | 31 to 90 days | \$550,000 |
| Ashtabula | Padanarum Road Improvement | Widening of roadway to O.D.O.T. standards of 20 feet. Relocations of drainage ditches. Installation of under drains, line of sight improvements, repaving roadway, removal of numerous trees from road right a way culvert replacements. | Geneva Township | 0 | 91 to 180 days | \$1,550,000 |
| Ashtabula | Walnut Beach Lakefront Trail | The Walnut Beach Lakefront Trail will provide public access alongside the existing Lake Erie breakwall out to the Ashtabula Harbor Light House. The proposed trail will be approximately 7,000 feet in length and nine (9) feet wide, linking the existing Walnut Beach Park and light house. The proposed precast concrete Lakefront Trail will be constructed a few feet outside the existing stone breakwall. This project requires paving Fortney and Huntley Road. Fortney is 2 miles long and Huntley is also about 2 miles | City of Ashtabula | 5 | 31 to 90 days | \$4,000,000 |
| Ashtabula | Windsor Township Road Improvement | | Windsor Township | 0 | 91 to 180 days | \$180,000 |
| Ashtabula | Old Lake Road Pavement Rehabilitation | The complete rehabilitation of Old Lake Road by resurfacing (1050' x 40') with asphalt concrete surface course. This section of road surface has far exceeded its life span and is in dire need of repair | Geneva-on-the-Lake Village | 0 | 31 to 90 days | \$124,519 |
| Ashtabula | Windsor Township Community Center - Heat Upgrade | Replace the existing heating system which is an old fuel oil fired boiler, by replacing the present system with a new more energy efficient system this will provide a comfortable place for the community to use for recreation, voting, meetings, clinics etc | Windsor Township | 0 | 0 to 30 days | \$75,000 |
| Ashtabula | Sludge Filter Press System | Acquire one sludge filter press for the GOTL Waste water treatment plant. Currently, the plant dry's its sludge with an antiquated and inefficient open air drying beds. The rudimentary system is the source of most of the problems at the plant | Geneva-on-the-Lake Village | 10 | 31 to 90 days | \$480,000 |
| Ashtabula | Villagewide Sanitary Sewer Slip Lining / Rehabilitt | Televising, heaving cleaning, cure in place pipe lining, cured in place pipe lining, 526 connection reinstatements and the purchase of two flow monitors. | Geneva-on-the-Lake Village | 10 | 31 to 90 days | \$3,779,955 |
| Ashtabula | Bicycle/Lomas Lane Complete Road Rehabilitation | Includes replacement of the 2" waterline with an 8" waterline, curbs, base, pavement and storm sewers. | Geneva-on-the-Lake Village | 0 | 31 to 90 days | \$208,359 |
| Ashtabula | Competitive needs | Purchase new high speed cnc machining equipment and upgrade existing equipment to compete with the off shore mold mold construction shops of China | B&B Precision Tool Co | 16 | 31 to 90 days | \$500,000 |
| Ashtabula | Presidential Drive Sanitary Sewer Rehabilitation, | Phase I will be completed in early 2009 and include the replacement of 650' of sanitary sewer and 35 laterals. The numerous trench cuts for the sewer repair will be minimally needed during Phase I. Phase II of the project consists of resurfacing all of Presidential Drive (3,000' long x 30' wide) with 215 CU/YD of an asphalt concrete surface course, Type I, PG70-22 | Geneva-on-the-Lake Village | 0 | 0 to 30 days | \$40,000 |
| Ashtabula | University Drive Pavement Rehabilitation | The complete rehabilitation of University Drive by resurfacing with asphalt concrete surface course. This road is one of two main east to west thoroughfares in GOTL, the other being SR 531. The integrity of the street is critical for school buses and public safety | Geneva-on-the-Lake Village | 0 | 31 to 90 days | \$42,829 |
| Ashtabula | South Geneva Drive Drainage Improvements | Includes pavement repairs, catch basins and storm sewers | Geneva-on-the-Lake Village | 0 | 31 to 90 days | \$33,178 |
| Ashtabula | Palmer Drive Street Repair | Excavate 17' of failed pavement, install new base, pavement, and storm sewers. | Geneva-on-the-Lake Village | 0 | 31 to 90 days | \$25,000 |
| Ashtabula | Windsor Township hall | To do the needed repairs and improvements to sustain the integrity of the current building that houses the fire department and Emergency Medical Services. This will be the interior and exterior water drainage, improved bay lighting, additional bay door, brick front, hard surface front drive, parking and entrance bays to improve snow plowing and short term equipment parking for repairs etc - Long term goal of the project is to create adequate living quarters for round the clock emergency staff | Windsor Township | 0 | 0 to 30 days | \$150,000 |
| Ashtabula | Center Street and Lake Road Drainage Replacement | Replacing failing roadway drainage. | North Kingsville Village | 0 | 0 to 30 days | \$30,000 |
| Ashtabula | Lake Road Storm Water Improvements (Broxton to and | Replacement of the existing deficient storm drainage system on the south side of Lake Road and the Austin Road Drainage Easement as well as the elimination of connections between sanitary sand storm drain systems. | Geneva-on-the-Lake Village | 0 | 31 to 90 days | \$41,015 |
| Ashtabula | Playground Equipment Installations | Replace playground equipment for the Community Center because of the Safety Reasons Temp. sediment control; linear grading over storm drain, base material in driveways, asphaltting. | Dorset Township | 0 | 0 to 30 days | \$22,500 |
| Ashtabula | Palmetto Drive Complete Road Rehabilitation | Storm sewers , ten catch basins, reconditions shoulders, seeding and mulching, contingencies, and engineering. | Geneva-on-the-Lake Village | 0 | 0 | \$222,619 |
| Ashtabula | Ultra Violet (UV) Disinfection Unit | Install on UV unit and all appurtenances and electrical. Ultra Violet disinfection is the operation system preferred by the EPA for waste water treatment plants. Currently, GOTL has no such system | Geneva-on-the-Lake Village | 10 | 0 to 30 days | \$89,900 |
| Ashtabula | Cleveland Drive Rehabilitation | This project includes paving of an existing dirt roadway, adding roadway drainage to reduce flooding and achieve maximum pavement life, and replacing a severely deteriorated roadway culvert. This street is home to more than 20 households | North Kingsville Village | 0 | 31 to 90 days | \$480,000 |
| Ashtabula | Reeves Road Upgrade | Culvert replacement and ditch cleaning; also road height elevation to stay above flood level | Monroe Township | 0 | 31 to 90 days | \$53,000 |
| Ashtabula | Derbshire Road Rehabilitation | This project includes paving of an existing dirt roadway, adding roadway drainage to reduce flooding and achieve maxim pavement life, and replacing as severely deteriorate roadway culvert. This street is home to more than 20 households | North Kingsville Village | 0 | 31 to 90 days | \$581,000 |
| Ashtabula | Berkshire Road Rehabilitation | This project included paving of an existing dirt roadway, adding roadway drainage to reduce flooding and achieve maxim pavement life, and replacing as severely deteriorate roadway culvert. This street is home to more than 15 households. | North Kingsville Village | 0 | 31 to 90 days | \$542,000 |
| Ashtabula | Retaining wall on South Side of Bridge St | Completion of Northshore Trail - walkway to the Lighthouse Visitors center on Bridge Street which includes public restrooms and Contructions of Retaining Wall behind the buildings on the South Side of bridge to halt erosion and sliding of the behind building | Lift Bridge Community Assoc | 0 | 0 to 30 days | \$100,000 |
| Ashtabula | Visitors Center in Historical Harbor | Completion of Northshore Trail - walkway to the Lighthouse Visitors center on Bridge Street which includes public restrooms and Contructions of Retaining Wall behind the buildings on the South Side of bridge to halt erosion and sliding of the behind building | Lift Bridge Community Assoc | 0 | 31 to 90 days | \$325,000 |
| Ashtabula | Infrastructure Improvements to Belle Road and Whit | A 12 inch water main extending south form Cork elementary school to SR 534 (26,700 ft). Water line would supply in-line fire hydrants, a proposed 5000 gallon public water tank, agricultural uses, residence, and existing and new commercial enterprises in Trumbull | Trumbull Township | 25 | 0 to 30 days | \$2,200,000 |
| Ashtabula | Wade Avenue Bridge | Wade Avenue Bridge, total rebuild of bridge located 1.2 east of Fenwick Rv | Saybrook Township | 0 | 31 to 90 days | \$350,000 |
| Ashtabula | North Depot One Land Bridge | Total replacement of one lane bridge to a two lane bridge just north of Conrail RR Tracks Clear and grub approximately 2 acres of park property. Replace drain tile, remove Century Building Town Hall and more it to a new site. Refurb. this building to health code standards, install picnic pavilion with grills etc. | Saybrook Township | 0 | 31 to 90 days | \$250,000 |
| Ashtabula | Public Park Improvements | Clear and grub approximately 2 acres of park property. Replace drain tile, remove Century Building Town Hall and more it to a new site. Refurb. this building to health code standards, install picnic pavilion with grills etc. | Trumbull Township | 0 | 0 to 30 days | \$124,750 |
| Ashtabula | Public Water Supply Line | Upgrading six miles of existing gravel roads to coal mix paved and chip and seal. | Trumbull Township | 0 | 0 to 30 days | \$1,000,000 |
| Ashtabula | Dibble Rd Improvement | Rebuild road. | Sheffield Township | 10 | 31 to 90 days | \$158,000 |
| Ashtabula | Shaffer Rd | | Morgan Township | 10 | 91 to 180 days | \$450,000 |
| Ashtabula | Maintenance Building Addition | Add on three bays to existing building. | Rome Township | 25 | 0 to 30 days | \$100,000 |
| Ashtabula | Wade Avenue - Road Rebuild | Wade Avenue Rebuild road for 1.9 miles between ohio avenue and renko road, which includes moving back ditches, drive pipes, under drains, asphalt, this is due to (S) new Elementary Schools being built on this road. | Saybrook Township | 0 | 31 to 90 days | \$900,000 |
| Ashtabula | Bishop Road | Construction of half mile of road from LaReve Rd, to SR 534. Sewer lines are installed and right of way is cleared. work would entail the building of the subsurface, 8 inch concrete surface and installation of Water, Gas and Electric. | Harpersfield Township | 250 | 31 to 90 days | \$1,000,000 |
| Ashtabula | Knapp Road Improvement - Phase 1 | Knapp Road is about 1.3 mile section of township road connecting a state route and country road, this will pay for material and labor for this project | Cherry Valley Township | 0 | 0 to 30 days | \$251,328 |
| Ashtabula | Giddings Road Reconstruction | Widen surface to 20 feet; set back ditches; install side drains; install cross culverts; add 8" limestone base; surface with 4" asphaltic concrete | Jefferson Township | 20 | 0 to 30 days | \$968,200 |
| Ashtabula | Holcomb-Theil Road Reconstruction | Widen surface to 20 feet; set back ditches; install side drains; install cross culverts; add 8" limestone base; surface with 4" asphaltic concrete | Jefferson Township | 20 | 0 to 30 days | \$705,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Ashtabula | Mill Road Improvement Phase 1 | Pave Mill Road with 4" asphalt, Mill Road is 3.3 miles of gravel road has a good base with ditches and subsurface drainage installed | Cherry Valley Township | 0 | 0 to 30 days | \$696,960 |
| Ashtabula | Hall Road Widening Phase II | Continuation of a project started in 05'. Phase II will be completion of the widening project envisioned in 1997. The project includes widening, relocation of ditches and installing drains. Two bridges, numerous culvert pipes and cross piping. | Richmond Township | 20 | 0 to 30 days | \$346,000 |
| Ashtabula | Township Road Improvements (Hall Road/Kyle Road) | Re-pave asphalt on these sections of roads. | Richmond Township | 15 | 0 to 30 days | \$150,000 |
| Ashtabula | Township Garage | build 72' x 40' building to house and maintain township equipment | Cherry Valley Township | 0 | 0 | \$255,000 |
| Ashtabula | Fink Road Improvement | Widening roadway to meet current roadway standards and improving drainage. | Sheffield Township | 8 | 31 to 90 days | \$62,400 |
| Ashtabula | Natural Gas Supply to Conneaut | Eastern portion of city infrastructure to supply natural gas is inadequate East Ohio Gas has cautioned city that there is no gas for industrial useage - Construction of new gas line | City of Conneaut | 0 | 0 to 30 days | \$9,000,000 |
| Ashtabula | Paving of Gravel roads within City Limits | 44 Lane miles of gravel roads need resurfaced and paved. | City of Conneaut | 0 | 31 to 90 days | \$35,000,000 |
| Ashtabula | Clean up Waste Site at 618 State Rt. 6 | Remove industrial trash/debris from former metals salvage yard. Load and transport debris to an approved landfill. Demolish one wooden structure and one block structure. Estimated 50,000 cubic yards of debris on site. | New Lyme Township | 0 | 31 to 90 days | \$20,000 |
| Ashtabula | Fire and Emergency Medical Station | This project will construct a new, modern fire station on a new site to house fire and ambulance services - Conneaut's fire station is part of the original City Hall building that was constructed 1876 - one of the fire stations have already been closed and the Cities ladder and truck have to be housed at other facilities | City Of Conneaut | 0 | 181 days or more | \$2,600,000 |
| Ashtabula | Cold Mix Paving and Parking for Greenway Trail | Cold pave approx. 1 mile of Keturm Rd, and make small parking lot for trail. | Rome Township | 25 | 0 to 30 days | \$200,000 |
| Ashtabula | Public Works Center | The current size of the facility is also inadequate do to the years of the facility due the square footage of the older building - 6,000 sq ft The funds will be utilized to build a new 15,000 sq ft public works building, along with a service garage with office facilities | City of Conneaut | 0 | 181 days or more | \$1,750,000 |
| Ashtabula | Sanitary Sewer System Repairs | Improvement to the waste water treatment plant, repair or a 30 year old aerial sewer improvements to the collection system, limit clean water from entering sanitary - this project would be in phases | City of Conneaut | 0 | 181 days or more | \$4,250,000 |
| Ashtabula | Drinking Water System Repairs | Installation of public sanitary sewers in densely populated areas to eliminate any threat to public health. Creek Road tank replacement, it has sprung numerous leaks and lake rd water main replacement of a 70 year old cast iron water main - the city has been seeking funding for this project to have 10years improvements to the water treatment plant and replace the influent screens and flow lift pump to rebuild the filters | City of Conneaut | 0 | 181 days or more | \$4,000,000 |
| Ashtabula | Seaway Industrial Park Road Repairs | The seaway park on the city's west side is home to many of the City's largest employers. General aluminum, Wayne Dalton and CW of ohio, the pavement is concrete and is thoroughly broken up This entire section must be replaced for the length of the road. | City of Conneaut | 0 | 181 days or more | \$2,000,000 |
| Ashtabula | Roadway and Storm Sewer Repairs | This project would allow Conneaut to repair the roadway storm sewer system and the aging transportation infrastructure. Repairs would be for roadway, curb repair, storm sewer repairs, replacement of failing 36 in storm sewer on chestnut, and prioritize roadways to receive paving. | City of Conneaut | 0 | 181 days or more | \$8,000,000 |
| Ashtabula | Extended Residential Care Project | Construction of two ten bed extended-care facilities for men and women recovering from alcoholism and addiction. The project will create and retain Ohio jobs, as well as create the only Northeast Ohio extended care recovery facility of its kind. The patients when recovered, will once again be productive citizens of Ohio; paying taxes and contributing to their communities in many ways. Extended care is proven to increase the likelihood of recovery by twenty-five percent | Glenbeigh | 35 | 91 to 180 days | \$800,000 |
| Ashtabula | SR 531 Waterline Replacement/534 Phase 1/Tank | ***REVISED*** - This Project of SR 531 Waterline Replacement of approx 2,800 linear feet of 1950 cast iron waterline, which also combines SR 534 - phase 1 - Harpersfield area waterline replacement and booster station. The Station no longer has the ability to provide proper fire protection to the City of Geneva and surrounding areas. This also storage tank capability. The 531 waterline is very critical to providing service to an important commercial and tourist area of the County, which includes the Geneva on the Lake State Lodge. This line is very susceptible to breaks, causing disruption of services and a general public health safety concerns with no water. | Ashtabula County Commissioners | 0 | 31 to 90 days | \$3,080,000 |
| Ashtabula | Restart Business | Reinvest in my faltering business. I'd like to buy more equipment and hire more driver | J&K Trucking | 2 | 0 to 30 days | \$100,000 |
| Ashtabula | Ashtabula Township Industrial Infrastructure Impro | 1000 of the highest paid employees in Ashtabula County. The project consists of the resurfacing of Middle Road along with widening it to 22' for better access to this highly industrial area. Also, the Ashtabula County Port Authority would purchase four new pumps and extend a 36 inch header pipe for the Plant C Water Pumping System that services this area with the millions of gallons of water it needs daily. This project would also allow the Port Authority to replace all existing electrical equipment with new, safe, modern switchgear making the power supply to keep the water flow to the industries more reliable. The final piece of this project is to clean up the former Ekem site directly across the street from Plant C on Rt 531. There are five (5) ponds that need to be cleaned on the site to make it usable for a customer who will be creating some 55 permanent jobs that will pay \$75k/yr. This site will also aide in sustaining the water supply for the area as a new cooling water lake will be created. All in all this joint endeavor will make this industrial area sustainable. | Growth Partnership for Ashtabula County | 1063 | 91 to 180 days | \$8,070,000 |
| Ashtabula | Conneaut Police Personnel | The filling of vacant police and corrections officer positions due to a critical municipal budget shortfall that has caused layoffs and unfilled positions within the department. This has caused a serious compromise in public safety and department operations due to reallocating remaining personnel to jail duties, and working short handed in patrol | Conneaut City Police | 5 | 31 to 90 days | \$400,000 |
| Ashtabula | Conneaut Fire Station | personnel compromising public safety. The City is in desperate need of a new centrally located fire station. The fire department is a mixture of full and part time personnel who cover an area of 27.5 square miles, protecting approx. 14,000 residents. Working out of two stations, one on the east side of the City which was built in the early 1970's housing EMS and part time personnel. The main station is located at the historic City Hall building in the downtown, which was built in 1876 and houses a full time engine company and first response EMS vehicle. This station was condemned many years ago, is unsafe and antiquated for modern fire service use. There is no electrical service or heat to the second floor, the roof leaks and windows are in need of replacement. The truck bay is so small that only one fire engine can barely fit inside. This station does not meet any federal safety or handicap standards and is a danger to the personnel that have to serve out of it. As one of the oldest still in operation in Ohio, it was originally designed for horse drawn fire carriages. | City of Conneaut | 9 | 181 days or more | \$2,000,000 |
| Ashtabula | Deputies in Schools | Start deputies in schools projects in (3) County School Districts and keep Deputy in 4th School District | Ashtabula County Sheriff's Office | 4 | 31 to 90 days | \$210,000 |
| Ashtabula | Rehab runway and apron | Rehabilitate runway and apron C | Ashtabula County Airport | 20 | 31 to 90 days | \$1,146,793 |
| Ashtabula | Funding for indigents | This community is being hit hard by unemployment and lack of resources in the area. The indigent population is growing, and their needs are escalating. This agency needs to be in a position to be able to provide services to this needy population, but there are no funds available. We are asking for consideration for a grant that will cover indigent services in mental health and substance abuse for this population. | Community Counseling Center | Unk | 0 to 30 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Ashtabula | Geneva-on-the-Lake | Total projects submitted for stimulus funding: *Filter Sludge Press -- \$480,000 *Ultra Violet Disinfection Unit -- \$89,900 *Palmetto Drive Drainage/Paving Rehabilitation -- \$222,619 *Lake Road (Broxton to Austin Easement) Storm Drainage -- \$41,015 *Palmer Drive Repairs -- \$25,000 *South Geneva Drainage / Road Improvements -- \$33,178 *University Drive Rehabilitation -- \$42,829 *Presidential Drive, Phase II -- \$40,000 *Bicycle and Lomas Lane Rehabilitation -- \$208,359 *Sanitary Sewer Slip-Lining (Entire Village) -- \$3,779,955 *Old Lake Road Rehabilitation -- \$124,519 TOTAL GOTL REQUEST: \$5,087,374 | Geneva-on-the-Lake | 100 | 91 to 180 days | \$5,087,374 |

| Ashtabula | Ashtabula Wind Energy Project | Development, construction of an 81 megawatt wind energy project in the industrial zone of Ashtabula Township and North Kingsville. Outcome is the installation of 45 2 MW megawatt wind turbines. Project will create 15 development and engineering jobs, 50 to 100 construction jobs and 10-20 permanent operations, maintenance and administration jobs. Project will use the winds along the shore of Lake Erie to produce 225 million kilowatt-hours of electricity annually with no pollution or greenhouse gas emissions. Project sponsor BQ Energy built the "Steel Winds" 20 megawatt wind farm in Lackawanna, NY and plans to repeat the success in Ashtabula County. A meteorological tower is installed, land use has been secured and permitting process has commenced. | BQ Energy LLC | 50 | 91 to 180 days | \$50,000,000 |
| Ashtabula | Ashtabula County Metro Parks Director | The Ashtabula County Metro Parks currently hold title or easement to over 500 acres of important nature resources and other green spaces in the county. This Park system is currently overseen by a board of 5 volunteer appointed commissioners. Since they are volunteers and have careers outside the board, their time available to dedicate to Park matter is limited. It is the purpose of this project to create a full-time Parks Director position. This position would have the following responsibilities: 1. Manage the Park Properties in the best interest of the public and of the environment following the Park system mission statement. 2. Actively seek and find grant monies from State, Federal, and Private organization to maintain and grow the parks system with a minimum impact on local budgets. 3. Educate the public and the Park system and on conservation. 4. Grow tourism in Ashtabula County through promoting the park holdings and other county natural resources. 5. Coordinate and help pass a levy within 5 years or when and if they are appropriate for the county | Ashtabula County Metro Parks | 1 | 31 to 90 days | \$505,000 |
| Ashtabula | Intensive Home based treatment for juvenile sex of | The incidents of juvenile sex offenders has continued to rise over the past 5 years with many juveniles never being formally adjudicated by the courts. Instead, these children are managed through local mental health facilities and/or served by child protective agencies when their behavior is realized. Frequently these children are both perpetrator and victim and struggle to deal with their issues under the care of providers who are not trained specifically in this area. This program would train counselors in the area of sex offender behavior. By following a home-based model, juveniles would be served intensively in the home, school and community, given the safety of each area | The Bair Foundation | 5 | 91 to 180 days | \$225,000 |
| Ashtabula | Youth mentoring | Youth Mentoring is a program designed to meet the psychosocial and social skill needs of children and youth ages 10 yrs to 18 yrs. Mentoring services are designed to meet the individual needs of each child and will include social skill building, interpersonal skill building, peer relationship enhancement, and when appropriate, independent living skill building. Services will be provided primarily in the community with some contacts in the school setting. | The Bair Foundation | 10 | 31 to 90 days | \$200,000 |
| Ashtabula | County Wide Emergency Communication and Public Saf | The purpose of the project is to provide a centralized countywide communications center that will be utilized by all safety forces; to centralize countywide emergency management systems/communications and deployment in cases of major nuclear disaster, terrorist activities, environmental, and civil disasters; to provide a centralized, countywide, technologically up to date training complex for all public safety forces. | Ashtabula County JVSD | 45 | 91 to 180 days | \$4,800,000 |
| Ashtabula | Safe Routes to Schools Sidewalk Replacement | Replace or install new sidewalks and storm drainage on various streets. ODOT has fully funded the North Main, High Street and Liberty Street portions through the Safe Routes to Schools Initiative. The South Main 945' sidewalk improvement and the South Main 600' storm drainage improvement portions are activities that would be funded by the CDBG Neighborhood Revitalization Grant | Rock Creek Village | 25 | 91 to 180 days | \$76,000 |
| Ashtabula | ACDL library building addition/renovation | Adding two-story 22,000 square feet of space to existing library building; includes space for materials, collections, computers, community rooms, study areas, programming space; expansion to permit continuance of library services for next 100 years. | Ashtabula County District Library | 24 | 181 days or more | \$5,000,000 |
| Ashtabula | Job Re-training | Conduct Job and position related job re-training in the Ashtabula, Lake, Geauga counties specifically (but not limited to) the manufacturing industries in Problem Solving, Failure Mode and Effectives, ISO 9001 quality, ISO 9001 Quality Auditor, Gages, Drawing and Blueprint reading etc. | BRS Training | 100 | 0 to 30 days | \$20,000 |
| Ashtabula | Ashtabula County Youth Detention Center | Ability to maintain a youth detention center for the housing of juvenile defendants. Program is at risk for elimination based on dire budget constraints. Closing the youth detention center will put at risk youth and juvenile criminals back on the streets affecting public safety. | Ashtabula County YDC | 30 | 31 to 90 days | \$1,000,000 |
| Ashtabula | Ashtabula Water Treatment Plant Improvements | raw water from Lake Erie. It was originally constructed in 1908, and after major upgrades in the 1950's and again in 1998, the plant today has a filter capacity of 10 MGD, but is unable to reach that capacity due to hydraulic limitations. This project is intended to both allow the plant to meet its projected filter capacity as well as to replace and/or rehabilitate aging infrastructure. The project includes intake de-icing, chemical feed, traveling screen, some modification to the purification units, UV disinfection, clearwell renovation, high service pumps and electrical items will be replaced, new chemical storage and feed, the addition of administration facilities and new clarification and filtration items. | Ohio American Water Company | 25 | 0 to 30 days | \$25,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Ashtabula | Advanced Wind Energy to Displace Natural Gas and F | Develop new wind energy system to be manufactured largely at Iten Industries, Ashtabula System covered by approved patent and two patents pending and will be sold to supply heat and electricity in moderate wind areas (such as most of Ohio). Manufacturing capabilities in composite manufacture available at Iten to make 85% of the product. Balance of components available from existing manufacturing companies in NE Ohio. Expected outcome is a developed turbine and tower manufacturing business with sales of \$350 million in five years with 350 employees added to Iten and a joint venture company with Sustainable Structures LLC. Current work is focused on development of a small scale prototype and will hopefully be followed by an engineering prototype with a diameter of 20 to 30 feet. After test testing, the design could be ready for demo sales by next winter. | Sustainable Structures LLC | 350 | 0 to 30 days | \$750,000 |
| Ashtabula | Ashtabula Water Treatment Plant Improvements | The Ashtabula Water Treatment Plant is a conventional surface water treatment plant that treats raw water from Lake Erie. It was originally constructed in 1908, and after major upgrades in the 50's and again in 1998, the plant today has a filter capacity of 10 MGD, but is unable to reach that capacity due to the hydraulic limitations. This project is intended to both allow the plant to meet its projected filter capacity as well as to replace and/or rehabilitate aging infrastructure. We want to operate a new business in Ashtabula County that will: save energy, create new jobs with benefits, and enhance our youth to stay in Ohio by a) sell/install solar panel windows/rooftop panels b) producing wind turbine power cells to be sold & decrease or alleviate the need for traditional power and find funding for a new innovation which will heat/cool and purify homes and businesses as long as the customer has a water well. | Ohio American Water Co. | 200 | 91 to 180 days | \$25,500,000 |
| Ashtabula | Refreshing economic energy and job development | To develop and provide Telemental health services in rural areas | Self | 10 | 91 to 180 days | \$2,750,000 |
| Ashtabula | TeleMental Health | To develop and provide Telemental health services in rural areas | Community Health Centers of Ohio | 35 | 0 to 30 days | \$250,000 |
| Ashtabula | GENEVA TOWNSHIP FIRE STATION | Construction of a 9,600 square foot 4 bay fire station in the Township. The station will be constructed to accommodate both fire and e.m.s. and will result in quicker response time for residents of the northern section of the Township as well as quicker response to the Village of Geneva on the Lake when mutual aid is requested by them. The station will be constructed to allow for 24 hour staffing and could be utilized as an emergency shelter should the need arise | GENEVA TOWNSHIP | 10 | 181 days or more | \$675,000 |
| Ashtabula | Operating costs/infrastructure | Operating Cost of Homesafe, Inc. to assist with bills, payroll, supplies, uniforms, etc. Expected outcomes would be to assist the victims of domestic violence with updated materials and services. | Homesafe, Inc. | 12 | 181 days or more | \$80,000 |
| Ashtabula | Plant C Water Intake Cleaning | Infrastructure - tear down deteriorating unsafe garage. Expected outcomes would be to have a safe garage to use for storage and to expand parking for visitors and staff. The Port Authority has permitting to clean both water intakes at Plant C which provides process cooling water for local industries. With the additional stimulus funding the Port would be able to clean both intakes which could allow pumping of up to 150 million gallons per day. If the Port Authority cleans only one of the intakes they will need to go through the permitting process again at a later date. | Ashtabula County Port Authority | 850 | 0 to 30 days | \$250,000 |
| Ashtabula | Facility Consolidation for the Ashtabula County Co | The project involves consolidating operations of five antiquated and spread out office buildings into a former elementary school, which is located in a distressed neighborhood in the heart of the agency's service area. Funding will be used for structural renovations, new construction, HVAC conversion to geothermal, transportation and other infrastructure improvements. | Ashtabula County Community Action Agency | 150 | 91 to 180 days | \$2,500,000 |
| Ashtabula | **REVISED** Chestnut Corridor Streetscape | The improvement of the main corridor through the Village of Jefferson by the implementation of safety enhancements for non-motorized transportation, the replacement of crumbling cement sidewalks with antique-style exposed aggregate walkways, the replacement of deficient sidewalk/street lighting with antique-style poles and modern fixtures, the replacement of malfunctioning and inefficient suspended traffic signals with mast arm units, the relocation of overhead power and utility lines underground conduit, the consolidation of existing street signage, and the development and installation of historic signs regarding Jefferson Village. | Village of Jefferson | 125 | 31 to 90 days | \$2,500,000 |
| Ashtabula | **REVISED** Poplar Street Culvert Repair | This project includes the replacement of the failing existing dual 9' corrugated metal pipe culverts beneath Poplar Street within the Village of Jefferson. | Village of Jefferson | 12 | 0 to 30 days | \$148,800 |
| Ashtabula | **REVISED** Walnut, Susan, & Satin Road Resurfacing | The project includes the asphalt concrete resurfacing of East Walnut Street, West Walnut Street, Susan Drive, and West Satin Street. | Village of Jefferson | 15 | 0 to 30 days | \$220,000 |
| Ashtabula | **REVISED** Jeffersonian Estates Sewer Flow Monitor | The project includes the construction of a sanitary sewer flow monitor station near the Jeffersonian Estates allotment. | Village of Jefferson | 8 | 0 to 30 days | \$30,000 |
| Ashtabula | **REVISED** South Chestnut - East Mulberry Sanitar | The project includes the construction of a gravity sanitary sewer extending from East Mulberry Street South along South Chestnut Street to Goodale Road and extending from Chestnut Street east along East Mulberry Street to Lenox-New Lyme Road | Village of Jefferson | 250 | 31 to 90 days | \$718,400 |
| Ashtabula | **REVISED** West Mulberry Street Phase 2 | The project includes the paving of an asphalt concrete surface course and the construction of a sidewalk along West Mulberry Street within the Village of Jefferson. Mulberry Street is the main route to the new Jefferson Areas School Campus | Village of Jefferson | 38 | 0 to 30 days | \$200,970 |
| Ashtabula | **REVISED** North Chestnut Street Sanitary Sewer E | The project includes the construction of a gravity sanitary sewer extending from Liden Street north 2350 feet along North Chestnut Street (SR46) to Jefferson Village's northern boundary. | Village of Jefferson | 1115 | 31 to 90 days | \$676,800 |
| Ashtabula | **REVISED** Sycamore Street Truck Route | The project includes road construction along an un-improved section of Sycamore Street within the Village of Jefferson. The project includes the construction of a road, an embankment, and a bridge to allow truck traffic to by-pass the commercial center of the Village and remain within the industrial zone. | Village of Jefferson | 100 | 31 to 90 days | \$1,502,500 |
| Ashtabula | Road Garage Insulation | Insulation of building to conserve energy. Anticipate a 50% reduction in energy usage and associated costs. | AUSTINBURG TOWNSHIP | Two | 0 to 30 days | \$20,000 |
| Ashtabula | **REVISED** WWTP Retaining Wall Extension | The project includes the construction of a retaining wall near the Jefferson Village waste water treatment plant to prevent erosion near the aeration tanks | Village of Jefferson | 8 | 0 to 30 days | \$73,591 |
| Ashtabula | Preserve Public Safety | reduced revenues due to the economic downturn will result in the layoff or sherriff deputies and Assistant Prosecutors. The stimulus funding will provide for the retention of at least 12 Sheriff deputies and 12 staff members from the Prosecutors office as well as provide for \$750,000 for indigent defense costs which are expected to increase. This influx of funds should preserve public safety until the economy has recovered and sufficient revenues are available to maintain the level of service that is needed. | Ashtabula County Commissioners | 24 | 0 to 30 days | \$2,500,000 |
| Ashtabula | Roadside Mowing Tractor | Purchase of tractor to better maintain roadside ditches for visibility and safety. Better maintenance will also eliminate flooding by providing more efficient drainage. | AUSTINBURG TOWNSHIP | 1 | 0 to 30 days | \$30,000 |
| Ashtabula | Truck | New truck purchase will conserve energy and reduce emissions into environment | Austinburg Township | 1 | 0 to 30 days | \$100,000 |
| Ashtabula | purchase machines to create jobs | would like to purchase machines and building addition to expand existing business | S & S Tool Inc | 6 | 91 to 180 days | \$250,000 |
| Ashtabula | HELP SAVE THIS BUSINESS SO WE CAN HELP OTHER BUSIN | HIRE AND TRAIN ONE NEW TECH. & PUTTING ANOTHER SERVICE VEHICLE ON THE ROAD. AND CATCHING UP BACK TAXES. | JC'S SERVICES | 1 | 0 to 30 days | \$15,000 |
| Ashtabula | Small Business Startup | Site development and construction of a Dairy Queen in our community. This will promote jobs and also stimulate growth in our community and our county | small business | 4 | 0 to 30 days | \$500,000 |
| Ashtabula | Employment expansion | Expand very busy computer repair and sales business (currently run only by very overworked owner w/purchase of building and training of at least 3 people in computer repair. Sell recycled computers at reduced or subsidized prices to families and individuals unable to afford one on their own. Train those purchase these computers in their use. So we increase employment, recycle electronics, and educate all at once! There is a much larger potential for this in this area once it gets started! | Curt4Computers | 3 | 0 to 30 days | \$120,000 |
| Ashtabula | New crack seal and seal coating business | Create 5 new jobs, 1 new business, create tax dollars for the city state and federal government. As well as giving people a quality sealed driveway. And may be expanded across they county | New business | 5 | 31 to 90 days | \$8,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Ashtabula | Buy a Home of my own | poliar w/ADHD. My hand are full. All I'm asking for is a home of my own. Right now I'm in a section 8 home and I have lived here for 11 yrs. I know that's my fault. But I can't seem to save enough money for a down payment, because I'm on Social Security Disability. There's probably other things that are more important than mine, but it doesn't hurt to ask. Eunice Fields | Home owning | 0 | 31 to 90 days | \$50,000 |
| Ashtabula | Lagoon Marina Dock Replacement | Replace existing docks with new floating docks. The existing docks are over 40 years old, are not handicapped accessible and require extensive amounts of maintenance by the Port Authority to keep in service. | Conneaut Port Authority | 0 | 31 to 90 days | \$1,500,000 |
| Ashtabula | Port of Conneaut Pavement Repairs | Repave the Port of Conneaut. The project will include pavement planning, base repairs, and overlaying of all paved areas including access to the Public Dock, marinas, limestone dock, Liberty Park and boat launch ramps, etc. | Conneaut Port Authority | 10 | 0 to 30 days | \$750,000 |
| Ashtabula | Naylor Boulevard Area Improvements | Installation of utilities (water, sewer, gas, electric) along Naylor Boulevard near its west end. Construction of seasonal rental cabins on the North side of Naylor Boulevard near its west end. Construction of a boardwalk along the north side of Naylor Boulevard to connect with the existing Township Park boardwalk to the west and to the Public Dock to the East | Conneaut Ohio Port Authority | 15 | 31 to 90 days | \$850,000 |
| Ashtabula | Sandbar Access and Canoe/Kayak Launch Facilities | Provide access to the unique habit of the sandbar in Conneaut Harbor. The proposed roadway will provide vehicular access and parking to allow the public to experience the sandbar either on foot via hiking trails, or from the water in canoes/kayaks | Conneaut Port Authority | 10 | 31 to 90 days | \$550,000 |
| Ashtabula | Conneaut Human Resources Center | To replace ceiling and lighting in our facility that has become unsafe...as ceiling tiles and light fixtures have fallen when we have large numbers of people gathered in our facility for various services and clinics we provide as well as being a designated warming and cooling center for our community. Freezers and walk in coolers for our food bank to store more food that we distribute to the individuals in our community that are in need. A landmark sign to promote community awareness and inform the community when certain clinics and emergencies are happening. Adequate restroom facilities to accommodate the thousands of people who use our service. | Conneaut Human Resources Center | 20 | 0 to 30 days | \$500,000 |
| Ashtabula | UH Conneaut Medical Center | The mission of our organization is to provide human services that enhance the quality of life in our community. We are currently seeking grant funding to support our mission. We have many opportunities to serve local women. Our plans include renovation of dedicated space within this critical access hospital for a center for women's health using local trades to be completed by Dec. 09 enabling the provision of care to 300+ women annually the first year. Scope includes demo of existing space, install to retrofit exam areas including fire suppression, electrical, flooring and furnishings. Expected Outcome: This project demonstrates our commitment to enhancing the quality of health care services we provide to our community as a critical access hospital. Women in Conneaut and surrounding Ashtabula County have limited access to care. Program will provide: •Comprehensive and follow-up examinations •Pap test •Mammography •Bone densitometry •Blood tests •Risk assessment •Simple access to complete workup •Referrals to specialists | University Hospitals | 8 | 0 to 30 days | \$250,000 |
| Ashtabula | expansion | This project will enable the hospital to retain three full time positions, one nurse practitioner, one to purchase automation machinery to compete with foreign market: | S & S Tool Inc. | 6 | 91 to 180 days | \$250,000 |
| Ashtabula | Ciulla Family Healthcare | My husband became disabled due to an accident at work in 2003. We went from a two income family down to one. I am having to incur the cost of health insurance in excess of \$9,000.00 in order to get my husband the medical treatment he so rightly deserves. In 2001 we took legal custody of a 5 year old relative, thinking we could give her a better life, and took on the responsibility of my brother who is also disabled. I struggle everyday in taking care of my husband and my "child". Now I am ill and on the brink of a nervous break down. How can someone who tries to do good by people be put in this position in this "America". Please, I need help. | The Ciulla Family | 0 | 181 days or more | \$20,000 |
| Ashtabula | Wastewater treatment Plant Disinfection Improvemen | Project involves improvements to existing disinfection equipment to facilitate removal of gaseous chlorine. | City of Geneva | 5 | 181 days or more | \$500,000 |
| Ashtabula | Wastewater Treatment Plant Flow Equalization, Infl | This project will control sanitary sewer bypasses to Cowles Creek which have occurred 18 times in 12 years. | City of Geneva | 45 | 181 days or more | \$2,750,000 |
| Ashtabula | School Transportation / Education Funding / Educat | Looking for grants to fund the purchase 15-passenger vans for transportation needs, provide an educational facility, provide salaries for teachers, and purchase education materials and equipment. Pay off \$215,000 in new construction debt. | Kindlebrook Christian Academy / Open Door Communit | 4 | 0 to 30 days | \$500,000 |
| Ashtabula | Educational & Community Center | Grant Funding to construct Educational / Community Facility | Open Door Community Church / Kindlebrook Christian | 12 | 181 days or more | \$2,500,000 |
| Ashtabula | Rehab runway and apron | Rehab runway and apron | Ashtabula Airport Authority | 20 | 31 to 90 days | \$1,146,793 |
| Ashtabula | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Ashtabula | Wastewater Treatment Plant Headworks and Grit Remo | Project involves replacement of existing screening and grit removal facilities, which have reached the end of their useful lives. | City of Geneva | 16 | 181 days or more | \$1,600,000 |
| Ashtabula | Wastewater Treatment Plant Building | Project involves construction of new building with locker/shower rooms, lab, lunch room, restroom, and garage. Existing lab was built in 1939. No locker rooms exist. | City of Geneva | 4 | 91 to 180 days | \$420,000 |
| Ashtabula | Sewer Jet/Vac Replacement | Project involves replacement of the existing sewer jet/vac equipment. Existing jet has reached the end of its useful life. Equipment with vacuum capabilities is necessary to properly maintain the collection system. | City of Geneva | 2 | 0 to 30 days | \$270,000 |
| Ashtabula | Sewer Camera Replacement | Project involves replacement of the existing sewer camera, which is non serviceable. A sewer camera is necessary for proper maintenance of the collection system | City of Geneva | 2 | 0 to 30 days | \$180,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Ashtabula | Elm Street Sub-Basin Sewer Rehabilitation, Lining | Project involves repair of Elm Street sub-basin along with lining and lateral repairs. The Elm Street sub-basin is the area most in need of repairs in the city | City of Geneva | 3 | 91 to 180 days | \$360,000 |
| Ashtabula | Wastewater Treatment Plant Final Clarifiers | Project involves installation of new clarifiers to remove influent solids prior to sand filtration. | City of Geneva | 15 | 181 days or more | \$1,550,000 |
| Ashtabula | Roosevelt Lift Station Improvements | Project includes replacement of existing pumps to eliminate need to enter wet well to remove pumps. | City of Geneva | 0 | 31 to 90 days | \$65,000 |
| Ashtabula | Austin Road Lift Station | Project involves installation of new lift station to eliminate existing suction lift station which has reached the end of it useful life. | City of Geneva | 2 | 91 to 180 days | \$215,000 |
| Ashtabula | North Broadway Sanitary Sewers | Project involves extending sanitary sewer service to an area of North Broadway which is currently unserved. | City of Geneva | 11 | 181 days or more | \$1,100,000 |
| Ashtabula | Lockwood Street Improvements | Project involves replacement of traffic signal controller at the intersection of Lockwood Street and West Main Street, replacement of existing 8" VCP sanitary sewer with 8" PVC pipe, replacement of existing 6" cast iron water main with 8" PVC pipe, and asphalt overlay of the street. The existing traffic signal at Lockwood and Route 20 is not functioning properly because the traffic signal controller is too old and in too poor a condition to operate with the safety forces' traffic signal pre-emption system. The existing water main and sanitary sewer were installed prior to 1960. The existing 6" cast iron water main from Route 20 to Liberty Street has been subject to more breaks than any other main in the city during recent years. The condition of the pavement on Lockwood is very poor. After the sanitary sewer repairs, the entire street needs to be overlaid with 2" of asphalt. Project includes replacement of an residential and commercial water meters in the city. New meters will be radio read, resulting in energy savings because a meter reader will no longer be needed to drive to each meter site to obtain a reading. The new meters will also be more accurate than the existing ones, allowing the city to perform a more accurate water audit. The audit results will allow the city to aggressively seek out and eliminate sources of lost water. This will improve efficiency, conserve water, and conserve electricity. | City of Geneva | 5 | 31 to 90 days | \$310,000 |
| Ashtabula | Conneaut Water Meter Replacement | Project includes replacement of the 70-year old 6" cast iron water main on Lake Road. The City has been seeking funding for this project for over 10 years. | City of Conneaut | 15 | 31 to 90 days | \$1,500,000 |
| Ashtabula | Lake Road Water Main Replacement | Project includes replacement of the Creek road water tank, which has reached the end of its useful life. It was constructed in 1961, and is now in poor structural condition. It has sprung numerous leaks, with the most recent being in December 2008. The tank's location in the park distribution system also poses a serious health concern because of water quality issues caused from recirculation of old water in a dead end stretch of pipe. The new tank will be moved to a more suitable location. | City of Conneaut | 13 | 31 to 90 days | \$1,500,000 |
| Ashtabula | Creek Road Tank Replacement | Project includes replacement of influent screens and low lift pump and rebuilding of the filters at the plant. Existing screens are over 70 years old and very unreliable. Replacement screens are not available. The low lift pump needs to be replaced, as it too has reached the end of its useful life. | City of Conneaut | 13 | 91 to 180 days | \$730,000 |
| Ashtabula | Fair Grounds Grandstand Structure | To replace a Grandstand Structure used by the Ashtabula County Fair for 4H members as well as the residents of Ashtabula County. This structure is becoming outdated and is a possible dangerous situation for handicap during an emergency situation. | Ashtabula County Agricultural Society | 150 | 31 to 90 days | \$350,000 |
| Ashtabula | Housing Counseling and Assistance | To provide housing and financial literacy counseling and assistance to lower to moderate income households in jeopardy of losing their home to foreclosure. To reduce the number of mortgage foreclosures and delinquencies. To educate the community and homeowners about working with their lender, alternatives to foreclosure, foreclosure terminology and timelines, rebuilding credit, predatory lending, avoiding lending scams and budgeting. To work with potential new homeowners to ensure that they understand the terms of the loan and most importantly, that they can afford the loan. | Catholic Charities of Ashtabula County | 0 | 0 to 30 days | \$200,000 |
| Ashtabula | disabled vets housing stabilization | This project will buy foreclosed homes. Rehab and clean the area to be handicapped accessible for one of the disabled Gulf war veterans who has signed up for the program. Not only are we doing a service for our veteran war heroes, but we will also be fixing our community of the eyesores of foreclosed homes. The city of Ashtabula is trying to revitalize our downtown with medical facilities. This in itself will attract disabled vets to our area. And affordable handicapped housing is one of the biggest obstacle these vets endure when re-entering civilian life. | T.Bell construction | 12 | 0 to 30 days | \$400,000 |
| Ashtabula | Help underprivileged kids | Kidz Games is a not-for-profit organization that will help build self esteem and pride in under privileged kids through sponsorship of after school and summertime involvement in Ashtabula Little League, Ashtabula Y.M.C.A., and Lakeside High School programs. Many minority families in the area cannot afford the many opportunities of sports and after school activities which leaves them left out and our community suffers as these activities, over time, have proven to build self esteem and pride and character that not being able to afford the opportunity has our community more integrated than segregated which could lower self esteem if there is not more minorities in these areas giving hope and pride to the younger kids. | Kidz Games | 20 | 0 to 30 days | \$500,000 |
| Ashtabula | Train in the area of manufacturing and constructio | To train unemployed individuals in heavy equipment, manufacturing, and warehouse industries. Be a pipeline for the construction trade in rebuilding our infrastructure. Also have classes on OSHA safety. | BELLS work center | 5000 | 31 to 90 days | \$375,000 |
| Ashtabula | Ashtabula Water Treatment Plant Improvements | The current water treatment plant is 100 years old and is in critical need of upgrade to meet regulatory requirements. upgrade includes replacement of the filters, raw water screens, chemical feed and containment systems, high service pumps, back-up generator power, high service pumps, raw water pumps, lab and SCADA. | Ohio American Water Company | 200 | 181 days or more | \$26,500,000 |
| Ashtabula | Ashtabula W. 9th Street Water Main Replacement | Replace 7,800 feet of 12" water main. We are being required to relocate the water main due to an ODOT construction project. | Ohio American Water Company | 40 | 91 to 180 days | \$1,250,000 |
| Ashtabula | Paving of Gravel Roads | Project involves paving the city's gravel roads to increase travel safety and ease maintenance concerns. With approximately 44 lane-miles, the City of Conneaut has more gravel roads within city limits than any other Ohio city. These roads are very difficult and expensive to maintain because Conneaut lies in the heart of the Ohio snow belt. They are a danger and clear inconvenience to the traveling public and residents. | City of Conneaut | 100 | 91 to 180 days | \$35,000,000 |
| Ashtabula | Roadway and Storm Sewer Repairs | Project involves road paving and repair of storm sewer infrastructure. Conneaut is maintaining a capital improvements plan for their roadway and storm sewer infrastructure. The City currently spends approximately \$400,000 a year for maintenance and upgrading of these facilities, and an equal in in-kind labor services (Conneaut performs its own asphalt paving). Even at this pace, the City is losing ground to the aging transportation infrastructure. This project will allow Conneaut to accelerate the roadway/storm sewer repairs over the next two years to "catch up" to the failing infrastructure. | City of Conneaut | 25 | 31 to 90 days | \$3,000,000 |
| Ashtabula | Seaway Industrial Park Roadway Repairs | Project involves repaving of existing roads, construction of new roads, and performing water repairs on storm sewers. The Seaway Industrial Park was constructed in the early 1960s and is home to many of the city's largest employers. General Aluminum and Wayne Dalton are on Chamberlain and Fosco and CW Ohio are on Maple Avenue. Chamberlain Boulevard, the primary road of the industrial park, has failed. The pavement is concrete and has thoroughly broken up. The entire pavement section must be replaced for the length of the road. This project will also improve access between Parrish Road and Maple Avenue. | City of Conneaut | 50 | 31 to 90 days | \$2,000,000 |
| Ashtabula | Create Jobs for community | build a 6000 square foot building in a newly developed business park that is not being utilized in Ashtabula, Ohio. By constructing this building with a heavy lift over head crane, and updating our machining capacity, we feel we would provide a service that will keep and create jobs in a financially depressed area. We are a HUBzone certified business in Ashtabula, Ohio and have been in business for the past 8 years. We have built a reputation for work done correctly, on time, and at a reasonable price. We feel that with these Stimulus funds we would be able to jump start a struggling business park, create jobs for the building contractors, and expand on the capabilities of a proven and much needed business. With this expansion, several skilled jobs could be created and sustained in Ashtabula county. | Pendleton Mold and Machine, LLC | 50 | 0 to 30 days | \$475,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Ashtabula | Water Meter System Replacement | Project incurs replacement of all residential and commercial water meters in the city. New meters will be radio read, resulting in energy savings because a meter reader will no longer be needed to drive to each meter site to obtain a reading. The new meters will also be more accurate than the existing ones, allowing the city to perform a more accurate water audit. The audit results will allow the city to aggressively seek out and eliminate sources of lost water. This will improve efficiency, conserve water, and conserve electricity. | City of Geneva | 10 | 31 to 90 days | \$1,000,000 |
| Ashtabula | Ansel Rd and Eastwood St water main replacement | Replacement of an existing water main which is subject to frequent breaks. These breaks result in service interruptions to customers and pose a potential health threat. | City of Geneva | 3 | 91 to 180 days | \$240,000 |
| Ashtabula | Expanding Patient Care Capacity at St. Joseph Emer | This facility is the only 24/7 emergency facility in the county south of Route 90. The current structure is 25 years old and insufficient to meet the medical needs of the community. Use of the facility has seen significant growth since it was opened in 1984. HMHP has been able to provide some updates in services and equipment, however the physical limitations of the space do not permit additional improvements/expansion. This project will enable HMHP to build and equip an addition on the facility that will increase patient care capacity and improve operating efficiency. | Humility of Mary Health Partners - St. Joseph Emer | 6 | 31 to 90 days | \$800,000 |
| Ashtabula | HIRE COPS NRPD | OUR POLICE DEPARTMENT HAS 1 FULL TIME OFFICER AND OUR TWO PART TIME OFFICERS WERE LEFT GO. WE CAN NOT COVER OUR VILLAGE 24 HOURS A DAY 7 DAYS A WEEK. BECAUSE OF THIS, OUR VILLAGE HAS TO GO WITH OUT COVERAGE. WE WOULD LIKE TO HIRE 2 FULL TIME OFFICERS AND 2 PART TIME OFFICERS TO HELP COVER ALL SHIFTS, VACATIONS AND SICK LEAVE. OUR CHIEF IS INCLUDED AS ONE OF THE 4 FULL TIME OFFICERS AND IS FORCED TO COVER PATROLMAN DUTIES AS WELL AS HIS CHIEF DUTIES. | VILLAGE OF NORTH KINGSVILLE POLICE DEPARTMENT | 4 | 181 days or more | \$150,000 |
| Ashtabula | Eastwood Street Water Main Rehabilitation | Rehabilitation of an existing watermain which is subject to frequent breaks. These breaks result in service interruptions to customers and pose a potential health threat. | City of Geneva | 3 | 91 to 180 days | \$280,000 |
| Ashtabula | East Tibbotts Street Improvements | This project will replace an existing water main which has been subject to frequent breaks within the past 18 months. The project will also replace an existing valve at the intersection of Sherman Street and East Tibbotts, which is currently inoperable. | City of Geneva | 2 | 91 to 180 days | \$175,000 |
| Ashtabula | Beach Street Water Main Replacement | This project will include storm sewer repairs and re-paving of East Tibbotts. The storm sewer and paving work will be funded separately by the City. Only the water main replacement will be funded through the Revolving Loan Fund. | City of Geneva | 1 | 91 to 180 days | \$110,000 |
| Ashtabula | North Avenue Water Main Replacement | Replace existing 4-inch water main with an 8-inch main. The existing main has reached the end of its useful life and is incapable of providing fire protection. | City of Geneva | 8 | 91 to 180 days | \$775,000 |
| Ashtabula | Recreation Park for Ashtabula County | Replacement of an existing water main. This main degrades water quality because of its age, material and condition. It is a dead end main with poor flow characteristics, which inhibits proper flushing. | Extreme Dirt Riders | 10 | 181 days or more | \$600,000 |
| Ashtabula | Project Disabled and Independence | The monies would be used to purchase land, create a Recreation Park which would include but not limited to ATV trails, Motor Cross area, ATV Safety Schooling and Trainings. A Community building would also be built to hold public functions and hold meetings. This Recreation park would be a great asset to Ashtabula County, due to the fact it would bring in people from across the County. | Independent Living Services of Ashtabula County | 10 | 31 to 90 days | \$500,000 |
| Ashtabula | Geneva Downtown Streetscape | Therefore, this would promote tourism, which Ashtabula County is in desperate need of. Open a drop in sight for the physically disabled of Ashtabula County. Help those who want to work get the work history they need to get out in the work force and live independently. This will build self worth and self esteem. | City of Geneva | 51 | 31 to 90 days | \$470,000 |
| Ashtabula | Parking Lot Resurfacing | This request is in conjunction with a recently received Ohio Department of Development's Office of Housing and Community Partnerships Downtown Revitalization grant. This request is to complete sidewalk, curb, and signage improvements to the remaining three corners within the downtown. The measurable improvement includes 1,575 LF of sidewalk replaced, 600 LF of curb replaced and five wayfinding signs. | Ashtabula County Community Action Agency | 5 | 31 to 90 days | \$35,000 |
| Ashtabula | ATB Capitalized maintenance; PID 86083 | The division which I manage is moving to a new location, gaining much needed additional space. The location was used by trucks so the parking lot and all driving surfaces are in terrible disrepair. This project would be to remedy that problem. Bids for the job will be accepted and the successful bidder will be able to have additional work because of this project. | Ohio Department of Transportation | 1 | 0 to 30 days | \$84,472 |
| Ashtabula | Wind Farm | 2009 Capitalized Maintenance; This is a rural transit project whose funding flows through the Ohio Department of Transportation. | ESD Technologies, Inc. | 1000 | 0 to 30 days | \$100,000,000 |
| Ashtabula | Sherman Street Repaving | This request is to build a windfarm in Lake and Ashtabula counties. The best wind resources in the state of Ohio (on land) are along the Lake Erie shore line in Lake and Ashtabula counties. Approximately 30, 2MW wind turbines can be installed for \$100,000,000 producing 60 technical maintenance jobs. It will be required that parts of these wind turbines be manufactured in Ohio, jumpstarting the industry in the state. This will then produce hundreds of additional jobs at manufacturing facilities across the state and establish Ohio as a manufacturing center for renewable energy solutions. | City of Geneva | 4 | 31 to 90 days | \$450,000 |
| Ashtabula | North Eagle Street Repaving | Project involves pavement planing, repaving, base repair, utility repairs, and project costs. Eagle Street is an important arterial city street. This project constitutes the third and final phase of reconstruction for this street. This phase will connect the industrial north part to the residential south part of the street. | City of Geneva | 3 | 31 to 90 days | \$325,000 |
| Ashtabula | Chestnut Street Bridge Repairs and Repaving | Project involves pavement planing, base repair, utility (sewer/water) repairs, storm sewer repairs, repair of Chestnut Street bridge/culvert, construction of new headwalls, and project costs. This project includes replacement of an existing, failing arch culvert and repaving of this important arterial street. It is one of only two north-south connectors between U.S. Route 20 and State Route 84 west of State Route 534, and is therefore a critical connection for routine traffic and emergency vehicles. | City of Geneva | 5 | 31 to 90 days | \$475,000 |
| Ashtabula | Geneva Regional Wine, Culinary & Agriculture Insti | Project involves pavement planing, repaving, base repair, utility repairs, and project costs. Sherman Street is an important arterial city street, and this project has been a high priority for a long time. | City of Geneva | 10 | 31 to 90 days | \$800,000 |
| Ashtabula | Small assisted living facility | Project involves pavement planing, repaving, base repair, utility repairs, and project costs. Eagle Street is an important arterial city street. This project constitutes the third and final phase of reconstruction for this street. This phase will connect the industrial north part to the residential south part of the street. | R P Properties LTD | 3 | 91 to 180 days | \$50,000 |
| Ashtabula | water well/ geothermal energy development | Project involves pavement planing, base repair, utility (sewer/water) repairs, storm sewer repairs, repair of Chestnut Street bridge/culvert, construction of new headwalls, and project costs. This project includes replacement of an existing, failing arch culvert and repaving of this important arterial street. It is one of only two north-south connectors between U.S. Route 20 and State Route 84 west of State Route 534, and is therefore a critical connection for routine traffic and emergency vehicles. | Stonehouse Well Drilling | 6 | 31 to 90 days | \$150,000 |
| Ashtabula | Roaming Shores Leafette Collection System | Project involves pavement planing, base repair, utility repairs, and project costs. Sherman Street is an important arterial city street, and this project has been a high priority for a long time. | Village of Roaming Shores | 4 | 181 days or more | \$300,000 |
| Ashtabula | Roaming Shores Off Road Utility Vehicle | Project involves pavement planing, repaving, base repair, utility repairs, and project costs. Eagle Street is an important arterial city street. This project constitutes the third and final phase of reconstruction for this street. This phase will connect the industrial north part to the residential south part of the street. | Village of Roaming Shores | 4 | 91 to 180 days | \$30,000 |
| Ashtabula | Roaming Shores Replacement of Sewer Mains | Project involves pavement planing, repaving, base repair, utility repairs, and project costs. Eagle Street is an important arterial city street. This project constitutes the third and final phase of reconstruction for this street. This phase will connect the industrial north part to the residential south part of the street. | Village of Roaming Shores | 4 | 181 days or more | \$30,000,000 |
| Ashtabula | Roaming Shores Water Main Replacement With Fire Pro | Project involves pavement planing, repaving, base repair, utility repairs, and project costs. Eagle Street is an important arterial city street. This project constitutes the third and final phase of reconstruction for this street. This phase will connect the industrial north part to the residential south part of the street. | Village of Roaming Shores | 4 | 181 days or more | \$30,000,000 |
| Ashtabula | Roaming Shores Compost Grinder | Project involves pavement planing, repaving, base repair, utility repairs, and project costs. Eagle Street is an important arterial city street. This project constitutes the third and final phase of reconstruction for this street. This phase will connect the industrial north part to the residential south part of the street. | Village of Roaming Shores | 4 | 181 days or more | \$60,000 |
| Ashtabula | Liftstation Replacement Project | Project involves pavement planing, repaving, base repair, utility repairs, and project costs. Eagle Street is an important arterial city street. This project constitutes the third and final phase of reconstruction for this street. This phase will connect the industrial north part to the residential south part of the street. | Village of Roaming Shores | 4 | 181 days or more | \$3,650,000 |
| Ashtabula | Roaming Shores Infiltration Rehabilitation Project | Project involves pavement planing, repaving, base repair, utility repairs, and project costs. Eagle Street is an important arterial city street. This project constitutes the third and final phase of reconstruction for this street. This phase will connect the industrial north part to the residential south part of the street. | Village of Roaming Shores | 4 | 181 days or more | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Ashtabula | Roaming Shores Emergency Generator Project | Emergency Generator Power For 28 Liftstations | Village of Roaming Shores | 4 | 181 days or more | \$575,000 |
| Ashtabula | Roaming Shores Sewer Jetter | New sewer Jetter | Village of Roaming Shores | 4 | 91 to 180 days | \$35,000 |
| Ashtabula | Roaming Shores Sewer Camera | New Sewer Camera | Village of Roaming Shores | 4 | 91 to 180 days | \$11,000 |
| Ashtabula | Ashtabula County District Library new library bull | Construction of a new 40,000 square foot public library building. The present building has served the county for over 105 years and based upon a building consultant's report to the Board, is inadequate to continue to serve as a library due to lack of space for the public, materials, additional computers, public areas for meetings, studying rooms or programming. The new library will need 3 - 5 acres to accommodate the building and parking for the next 100 years. Additional staff and service programs will be added as use of the library continues to grow. The new library building could be constructed in the downtown area of the city of Ashtabula and aid in its redevelopment. Over 9,000 people visit the library each month and the traffic flow resulting from a new facility could increase visits for local businesses, restaurants, and generate other activities along the Ashtabula Main Avenue business district. | Ashtabula County District Library | 24 | 181 days or more | \$9,000,000 |
| Ashtabula | KSU - Ashtabula Main Hall Renovations | Ashtabula Main Hall was constructed in 1967, has had no major improvements since it opened. This project will address the failing mechanical and electrical systems, address asbestos abatement and ADA concerns, implement energy conservation measures, and modernize the classrooms, laboratories and lecture halls to match today's teaching needs. | Kent State University | 180 | 91 to 180 days | \$18,000,000 |
| Ashtabula | ATB-Harbor Streetscape, Part 2 | Replacement of badly deteriorated steps and retaining walls to provide access to Point Park from Water Street/Morton Drive in the City of Ashtabula. Also replacement of steps and addition of railings behind Topky Library to access Walnut Beach Park on the shore of Lake Erie. Conditions are currently very deteriorated and dangerous to the Public. | GPD Group | 10 | 31 to 90 days | \$300,000 |
| Ashtabula | Repairs to Harperfield Dam | The dam on the Grand river in Harperfield is in a state of decay. It has been identified as a concern by the US Army Corp of Engineers and US Fish and Wildlife. Repairs to the dam will save an application of lampricide which in turn saves upstream environmental receptors | Ashtabula County Metroparks | 0 | 91 to 180 days | \$1,500,000 |
| Ashtabula | Update of Computer Software | Our current computer software is outdated and will not be supported as of June 2009. The stimulus funds received would be used to purchase and utilize current computer software and handheld equipment. With this update we would be able to operate with increased efficiency that would create an atmosphere for expansion and competition within the industry for additional jobs. | Deck Vend Services, Inc. | 75 | 31 to 90 days | \$95,000 |
| Ashtabula | Delivery Vehicle Update | The local economic climate has deteriorated to such a low level that in order for our business to attempt to maintain employment levels we have had to broaden the scope of our delivery and service areas. This has not only impacted our labor costs but added fuel, maintenance, and vehicle costs. This perfect storm is happening at a time when all other costs are skyrocketing which includes the cost of goods sold, health care, insurance, local, state and federal taxes. | Deck Vend Services, Inc. | 75 | 31 to 90 days | \$250,000 |
| Ashtabula | Emergency Food & Shelter Program - Ashtabula Count | Our present fleet of 10 vehicles have an average age of 15 to 25 years that require an above average maintenance and gasoline requirements. With energy savings garnered from a new fuel efficient fleet of delivery vehicles, we have an improved chance of maintaining our business and employment of 75 associates in a community with high unemployment and low opportunity for local employment. | United Way of Ashtabula County | 0 | 0 to 30 days | \$190,000 |
| Ashtabula | Health Coaching Team Project | United Way of Ashtabula County has administered this program for 27 years in order to help people with emergency assistance, specifically food and shelter. With the most recent unemployment statistics released for Ashtabula county at a rate of 13.4% and climbing, as well as our greatly diminished United Way local fundraising campaign these additional funds are necessary to help provide the desperately needed emergency food and shelter to the many people in need within Ashtabula county. | Ashtabula County Community Action Agency | 2.25 | 91 to 180 days | \$98,000 |
| Ashtabula | Kitchen Equipment | Low income families with children identified to be at-risk for obesity and obesity related issues cannot afford to pay out-of-pocket for the services of dietitians and personal trainers. This project will provide targeted families with a whole-body wellness approach that will motivate and support them to make and sustain healthy lifestyle choices. A health coaching team, consisting of a dietitian and a certified personal trainer, will work with families in their homes on a regular basis to develop and implement personalized care plans that include physical exercise and healthy eating habits. This preventive approach will reduce the incidence of childhood obesity within the targeted population. The project will serve a total of 240 unduplicated individuals in a twelve month period | Country Neighbor Program, Inc. | 50 | 31 to 90 days | \$75,000 |
| Ashtabula | Bridgestone TCE Site Remediation (Lake Erie Basin) | home delivered for homebound throughout southern rural Ashtabula and northern Trumbull Counties, approx. 500 sq. miles area. In 2008, 46,379 meals were served out of a 18'x14' kitchen with aged & inefficient equipment. We have been allocated \$150,000 local money and are seeking an additional \$155,000 for construction of a 20'x40' kitchen addition and renovation of our kitchen facility, and to purchase much needed kitchen equipment, such as walkin cooler/freezer, dishwasher, hood suppression system, double convection oven, grease trap, garbage disposals, etc. This project will provide Country Neighbor the ability to expand meals both onsite and home delivered in Trumbull & Ashtabula Counties. Without the completion of the project we are at risk of not be able to maintain our current meal service, let alone increase to meet the demanding need. We are also planning to provide summer meals for children in need. Country Neighbor also serves as the foodbank for 34 emergency food pantries, soup kitchens, shelters in Ashtabula & Geauga Counties di | Country Neighbor Program, Inc. | 50 | 31 to 90 days | \$75,000 |
| Ashtabula | Control Valve on SR193 | Treatments at nine (9) Ohio Bridgestone sites with deep aquifer TCE plumes. Tim Bent of Bridgestone has identified 9 Ohio sites ABSMaterials swelling glass is the only known solution to deep ground-water plumes. He is currently working \$80M in projects. This would augment this work | ABSorbent Materials Company of Wooster Ohio | 120 | 0 to 30 days | \$18,000,000 |
| Ashtabula | Harpersfield Covered Bridge Dam Repair - Grand Riv | Install a control valve that would improve fir flows in North Kingsville industrial purpose, and is considered a Class III structure. The dam inadvertently protects the upper portion of the State Wild & Scenic Grand River from the effects of Sea Lamprey FTM lampricide non-target by-kill. If the dam were to fail, the downstream sediment load would wipe out a federal candidate species mussel, as well as a globally rare dragonfly and mussel in one of the top 11 watersheds in Ohio based on the ODNR Candidate Streams for Protection and Restoration list, which integrates measures of physical and biological integrity, biodiversity, and recreational opportunity. The costs to the federal government to expand the FTM treatment upstream will be \$355,000 per application treating every three years based on current 2009 estimate from the US Fish & Wildlife Service. Over 50 years this amounts to \$2,983,955. The Grand River Partnership, consisting of 35 conservation agencies operating within the watershed to maintain the pristine conditions of the Grand River Watershed recognize the threat the exotic sea lampreys will have on the river should the | Ohio American Water | 4 | 91 to 180 days | \$216,000 |
| Ashtabula | Forest Ridge Booster Station | Install a 75,000 gallon tank to improve low pressure and fire flow experienced in Forest Ridge | Ohio American Water | 7 | 91 to 180 days | \$332,000 |
| Ashtabula | Cook Rd. pump Station Improvements | Install a pumping station and 400' of 12" main to replace a structurally deficient pump station and eliminate a dead end main | Ohio American Water Company | 13 | 91 to 180 days | \$649,000 |
| Ashtabula | Radiological Contaminant Removal from Water | Remediate a 29 year mixed radioisotopic and solvent waste plume including U, Cs, Pu, V, Ni, Cr, Mn, Co, Sr, Zr, Hf, Zr, Hf, U, Th, Ra, Rn, and other radionuclides. All levels exceed EPA specifications by 5-100x. 30 EPA set monitoring wells on the North Side of the site show TCE's at 84,000ppb over 10,000 times human safe exposure levels. ABS Materials has been approached by engineers who have seen our reactive glass at other locations. | ABSorbent Materials Company of Wooster Ohio | 12 | 0 to 30 days | \$1,250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Ashtabula | Elkem Site | This project will make an old industrial site clean and ready to be used to create new jobs and opportunities for Ashtabula County. Some ponds on the site will be filled and graded and clean soil will make barriers between them and a new pond will be created out of an old one and will be used as a cooling water lake for all of the water from surround industry. A new sanitary plant would be constructed to service the industrial area. New piping would need to be installed to service the entire industrial area, this includes not only the new project area but the existing industry served currently by the C Plant water pumping station across the street from this site. | Growth Partnership for Ashtabula County | 63 | 181 days or more | \$4,000,000 |
| Ashtabula | Hiring/Retention of Personnel | Stimulus funds would be used to retain existing personnel and allow hiring of additional personnel that could not be replaced through attrition due to budget reductions, thus allowing the department to maintain current services. The funding is needed so no reduction in services occurs. | Ashtabula County Sheriff's Department | 9 | 0 to 30 days | \$700,000 |
| Ashtabula | Hiring/Retention of Personnel | Stimulus funds would be used to retain existing personnel and allow hiring of additional personnel that could not be replaced through attrition due to budget reductions, thus allowing the department to maintain current services. The funding is needed so no reduction in services occurs. | Ashtabula County Sheriff's Department | 9 | 0 to 30 days | \$700,000 |
| Ashtabula | Water Well Drilling / Geothermal Systems Developme | Drill and develop new and existing water wells and geothermal heating and cooling systems. By offering a complete turn key system for residential and commercial use we will be able to decrease the costs of heating and cooling and encourage development in our area. Also continue to solve the water problems in areas where city water is not available to bring some relief to people currently living in here and those who wish to move into the area | Stonehouse Well Drilling | 6 | 31 to 90 days | \$250,000 |
| Ashtabula | Minority development training | Provide employed minorities with the gravest job situations (felons, addicts, etc.) with the needed skills and mind set to be able to hold a job in todays economy. Provide infrastructure businesses with minority talent from the program and have these successful candidates come back to the classroom that started their careers and give real time updates on " on the job market" | Bell Development Company | 1000 | 0 to 30 days | \$400,000 |
| Ashtabula | Saybrook Meadows Retirement Center | New construction of 100 skilled nursing and 20 assisted living resident facility on 15.875 acres. New jobs created, plus construction jobs. New taxes created (real estate and income) to locality and State. Equity and loan funds provide the remainder of financing | Saybrook Meadows, LTD | 93 | 31 to 90 days | \$1,200,000 |
| Ashtabula | Lighting Upgrades for Electrical Efficiency | Replace existing industrial lighting with energy efficient LED industrial lighting | ASHTA Chemicals Inc. | 2 | 31 to 90 days | \$250,000 |
| Ashtabula | Compete with Foreign Competition | Install skylights and replace building sheeting with translucent materials for passive day-time lighting | B&B Precision Tool Co | 16 | 91 to 180 days | \$500,000 |
| Ashtabula | Plant Conversion for Mercury and Energy Reduction | Current mercury-cell technology for the facility's electrochemical process is deemed to be less energy efficient and less environmentally acceptable as modern membrane electrochemical technology. This project would retrofit the current mercury-cell technology to state of the art membrane technology, and result in a 30% power savings (or 30% of continuous electrical power consumption) this equates to \$1,300,000 per year. In addition, the plant would not need to use mercury in the process with the new technology - therefore the project would provide for a much more environmentally friendly facility. Based on current federal law mercury is considered a persistent bioaccumulative toxin, and the proper handling and minimization have received consistent attention by both federal and state government. | ASHTA Chemicals Inc. | 125 | 91 to 180 days | \$100,000,000 |
| Ashtabula | Electrochemical Energy Savings Upgrade | Replace existing anode technology with modern electrically efficient "slim" anodes. DeNora, NA (Chardon, OH) manufactures a new style anode and other cell parts that are more electrically efficient than current electrochemical cell parts. This project would upgrade the 24 cells at ASHTA Chemicals to use the new anode technology. By doing so, the money invested would help to retain the jobs of ASHTA Chemicals workers, and through intrastate business provide more work for other Ohioans. The estimated cost of the upgrade is \$6MM with additional continuing operating costs of \$1.5MM over the next five years. The energy savings would be on the order of 12,500 MWH per year. | ASHTA Chemicals Inc. | 100 | 31 to 90 days | \$5,000,000 |
| Ashtabula | East Twp Sewer Lines & Treatment Plant | REPLACEMENT OF NEW SEWER LINES AND WASTEWATER TREATMENT PLANT TO INCLUDE FUTURE AND SUBSISTENCES along Pymatuning Lake Rd. and adjoining allotments. The existing homes in the township are all served by private septic systems, many of which will be inadequate under the new Ohio standards. The eastern half of the township is significant in that it has a more dense population due to the allotments, and it borders Pymatuning State Park which contains the 17,088 acre Pymatuning Lake where water quality is always a concern. | Williamsfield Township Trustees | 200 | 181 days or more | \$2,500,000 |
| Ashtabula | Community Center Re-roofing Project | The Williamsfield Community Center is housed in the former elementary school which has a flat roof. Portions of the roof have been replaced several times, but it continues to be a maintenance concern. Total area is approx. 14,000 sq. ft. The building is heavily used for community meetings and recreation, a preschool, and summer sports. The local community raised enough grant funds and donations last year to complete a new, ADA accessible playground. With a new pitched roof, the building will continue to be used for many years into the future. | Williamsfield Township Trustees | 5 | 91 to 180 days | \$360,000 |
| Ashtabula | financial assistance for displaced workers in a po | Establish a sole-proprietary business that will employ 6 persons. The ashtabula county area is jobless. there is no employment in this area. I have lost three jobs over the past four years due to the economic status of this area. Loss employment has effected my credit, has me on the brink of foreclosure on my home, I am living day to day on miscellaneous jobs so to put food on the table for my family. I am disqualified for assistance through the state agency channels due to bureacratic rules. I will be homeless in a few months if help is not rendered. I wish to start my own business and keep my family in our home and fed as well. This government has put us in this predicament and is spending my hard earned tax dollars in the wrong places. I need help, more so than the corporate big wigs that have millions stashed away. I have nothing but a lot of busted knuckles and sweat to show for nothing | Stimulus bailout | 6 | 31 to 90 days | \$40,000 |
| Ashtabula | Shovel to Shelf | With donated lands, we will be constructing handicap accessible pathways into shovel-ready fields so adults and children will be able to plant and harvest their own crops, reducing the demand on our local food pantries. We will construct the pathways & purchase seeds, plants, fertilizer and equipment for the planting of the crops. Our church will purchase canning supplies and provide hands-on training for the proper re-planting of the crops for future safe consumption. We anticipate creating new jobs for construction workers, jobs for planters for those not able, and jobs for pickers. We will be working closely with our Thrivent Financial for Lutherans local Chapter using matching grants from them and their volunteers. We anticipate this project to bring families closer together, help them learn valuable skills, and provide relief for our local food pantries. | St. John's Evangelical Lutheran Church | 150 | 31 to 90 days | \$10,000 |
| Ashtabula | small business grant | because we couldnt reach payroll and reinvest in inventory with help i could catch up on my credit lines for payroll, reinvest in inventory and hire back all the people we had to let go ,plus put on another 10 people. ive never been in this kind of situation before. i have no where else to turn for help.im a vietnam vet and for the first time im asking for HELP. i really dont want to even think of having to go bankrupt. id like to keep my company going and hire back the workers that help us grow. im begging you for great consideration into my request for funding money thank you looking to hear from you james co | j.c.distributors inc. | 25 | 0 to 30 days | \$125,000 |
| Ashtabula | NEW FIRE STATION | Fire station is in of repairs (leaky roof ,bad doors), Is about 60 years old. Absoulty no room to work in. No bathrooms. We have land. | Austnburg Vol. Fire Dept | 25 | 91 to 180 days | \$750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Ashtabula | Building Project | To consolidate buildings for WIA and One Stop activities, our locally operated public transportation system, Food Stamps, Medicaid, Child Support, TANF, and other programs to one central location in Ashtabula County. Currently, the Department of Job and Family Services operates in three buildings that are separated across 4 miles in distance from each other. This causes issues when streamlining services and causes hardships for customers with limited resources to travel from location to location. And in this time of tight budgets, it will save the local CDFIS money in terms of increased efficiency and effectiveness in terms of service delivery to its customers. By allowing the agency to consolidate its buildings and provide renovation to a space at the local mall it will retain jobs at the Mall because of increased customer traffic from DJFS employees and customers. This increased traffic will then transform into more sales tax dollars left in the county due to more workers purchasing in the county due to a move to a retail setting. | Ashtabula County Department of Job and Family Serv | 100 | 91 to 180 days | \$1,000,000 |
| Ashtabula | ESAB Electrical Infrastructure Improvement | Cable welding and cutting processes in the industrial area of Ashtabula Township, needs to replace their electrical infrastructure connection. The other industries in the area also rely upon this connection; places such as Cristal, Ashta Chemical, Praxair and so on. These companies employ approximately 1000 of the highest paid employees in Ashtabula County. Improving this electrical infrastructure would not only solidify these existing jobs, it would also guarantee room for growth in the vicinity. | General Partnership for Ashabula County | 1000 | 91 to 180 days | \$500,000 |
| Ashtabula | Geneva Area City Schools, Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Ashtabula | Domino Logistics Co., Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Ashtabula | Domino Logistics Co. | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Ashtabula | Norfolk Southern, Cummins Bridgeway, Clean Fuels O | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering a loader. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 6 | 0 to 30 days | \$120,000 |
| Ashtabula | Pinney Dock and Transport, Cummins Bridgeway, Clea | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering 2 loaders. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$100,000 |
| Ashtabula | Delta Railroad Construction, Cummins Bridgeway, CI | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering 20 pieces of rail maintenance equipment. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 8 | 0 to 30 days | \$200,000 |
| Ashtabula | Homelessness Prevention | To prevent homelessness and to meet the emergency needs of homeless individuals and families. To provide assistance for emergency shelter. To provide outreach in the community and to provide individualized assessments to increase the likelihood of future stability | Catholic Charities of Ashtabula County | 0 | 0 to 30 days | \$150,000 |
| Ashtabula | Rental assistance | To assist with local housing needs, specifically rental assistance. | Catholic Charities of Ashtabula County | 0 | 0 to 30 days | \$75,000 |
| Ashtabula | Fiberoptic lighting | I would love to start a business using fiberoptic lighting I Where you can take one light source and light a entire room I Like a fiberoptic christmas tree 4 lights lights the hole tree - You could solar over electric to light schools , offices,homes and save thousands of dollars in electric | fiberone | 50 | 181 days or more | \$1,500,000 |
| Ashtabula | Andover Library/Community Center Project | Andover has no community center, and was unable to afford to renovate its elementary school which was torn down. The Library, truly the hub of Andover, is in a unique position because its Board acquired adjacent property for expansion. We propose to build a community wing using geothermal power and including a solar-enhanced meeting area and teen/young adults and juvenile programming spaces. The Village, Township of Andover, and the Library will coordinate utilization and staffing of the center. Community gardens will surround the wing which is just off the Andover Square. The center will be a model for energy efficiency in a public space. We have a local foundation which may provide support for further growth and improvement of the space in years to come | Andover Public Library | 2 | 31 to 90 days | \$490,000 |
| Ashtabula | Business Expansion to create 20-40 new jobs | 40 employees, and expand our existing product lines and inventory, as well as equipment. By purchasing or building a new facility it would provide immediate construction jobs for local laborers and support other businesses and their employees. Expanding our inventory, which is purchased mostly from vendors here in Ohio, W.L. Bauml's, Outdoor sports headquarter, Crawlers Unlimited, Sports Combo, would help support the states economy. By moving to a large facility, near nationally known natural resources, that draw sportsman to the area we could hold more events like, hunters safety courses and archery events that would draw even more people into the area, helping the local economy. Ohio ranks sixth nationally in annual hunting-related retail sales and fourth in the number of jobs associated with hunting related industries. Each year, hunting has a \$1.5 Billion economic impact in Ohio. Yet 13% more is lost to out of state large chain stores and online sales. If granted the funding this would help to keep that spending here in Ashtabula county | Liberty Outdoors Ltd. | 40 | 0 to 30 days | \$750,000 |
| Ashtabula | UH Conneaut | System certification on all new construction. LEED certification is awarded by the non-profit U.S. Green Building Council. UH plans to meet guidelines developed for the health care industry. We will work to buy more efficient power systems and replace existing air handling units with more energy efficient ones and using latest technology we save on the energy cost for UH and decrease our Carbon Footprint. Compact fluorescent lights and Motion detector light switches are used whenever possible to reduce energy consumption. These, among other efficiencies, will be added to our projects. | University Hospitals | 10 | 31 to 90 days | \$250,000 |
| Ashtabula | UH Conneaut | In 2004, the well-respected obstetrics unit at this hospital closed. Hospital administration has sought opportunities to serve local women. Our plans include renovation of dedicated space within this critical access hospital for a center for women's health using local funds to be completed by Dec 09 enabling the provision of care to 300+ women annually the first year. Scope includes demo of existing space, install to meet fit exam room, and construction of new exam room. LEED certification is awarded by the non-profit U.S. Green Building Council. UH plans to meet guidelines developed for the health care industry. We will work to buy more efficient power systems and replace existing air handling units with more energy efficient ones and using latest technology we save on the energy cost for UH and decrease our Carbon Footprint. Compact fluorescent lights and Motion detector light switches are used whenever possible to reduce energy consumption. These, among other efficiencies, will be added to our projects. | University Hospitals | 10 | 31 to 90 days | \$250,000 |
| Ashtabula | Electronic Medical Records Upgrade | In 2004, the well-respected obstetrics unit at this hospital closed. Hospital administration has sought opportunities to serve local women. |----------------|--|---|--|----------------|--------------------|---------------------------|
| Ashtabula | variable speed air compressor | compressor to handle peak demand and load fluctuations. Existing unit is 10-30% loaded but serves as backup to other 100hp compressors. At 20% load the existing unit uses 80% of full capacity energy. A VSD unit runs at 20% full load amps at 20% capacity. Unit operates 24hrs/day, 5 days/week, 52 weeks/year. Estimated electricity consumption is approx. 300,000kWh/year. Same size unit at same loading with variable speed estimated consumption is approx. 75,000kWh/year. Savings is 225,000kWh annually or 3.4 megawatt/hours over the 15 year expected life of the machine. Additional savings may be realized by replacing an older model compressor with a modern, more efficient unit. | WEK Industries, Inc. | 0 | 31 to 90 days | \$50,000 |
| Ashtabula | Purchase Macrodyne Press to Supply Energy Market | Funding requested for the purchase and installation of a 2,000 ton compression molding press. This press will allow Premix to manufacture larger parts for the solar, wind and lithium battery markets. Estimated job growth is 6-10 resulting new sales to the company of approx. \$4million - \$5 million per year. | Premix, Inc | 8 | 0 to 30 days | \$350,000.00 |
| Athens | Dist 10, PID 85707, ATH Purchase wrench, HVAC, lif | Purchase heavy impact wrench, replacement HVAC for garage, and portable lift for the City of Athens | Ohio Department of Transportation | 1 | 31 to 90 days | \$65,600 |
| Athens | Dist 10, PID 85705, ATH Sheltered bus stops | Construct sheltered bus stops for the City of Athens | Ohio Department of Transportation | 1 | 31 to 90 days | \$6,000 |
| Athens | Athens High School-The Plains Bike Path Spur | Construction of a Bike Path Spur (.75 mi) to allow access to existing Hock-Hocking Bike Way from High School and Elementary School. Currently the County Road is too narrow to allow pedestrian and safe bike travel for students and residence of The Plains Ohio. Will also open The Plains commercial establishments up to Tourist dollars as the HockHocking Bike way has become a tourist destination is South-eastern Ohio | Athens County Engineer Office | 10 | 31 to 90 days | \$700,000 |
| Athens | Athens County Road 25 Bridges replacement | Replacing 5 narrow 1930's era bridges in poor condition with modern 2-lane concrete bridges on a heavily used Athens County Road.25 Many accidents some fatal have occurred on this road due to narrow bridges. | Athens County Engineer Office | 10 | 31 to 90 days | \$490,000 |
| Athens | Nelsonville bypass | I am your constituent and I am writing on the eve of the passage of the vast "stimulus package" to remind you of a vital infrastructure project that could be executed relatively quickly and of great importance to the citizens of SE Ohio, an underdeveloped district in urgent need of stimulus". I am speaking specifically of the Nelsonville Bypass project along route 33 between Athens, OH and Columbus, OH. This project has long been a dream of SE Ohio residents and commuters, but has been constantly beset by bureaucratic and funding delays. It is a project that is already in the planning stages and relative to many projects, could be executed relatively quickly. I even understand the land and route has been identified, secured, and mapped. Furthermore, as you know SE Ohio remains one of the poorest regions in the nation and is certainly in urgent need of such stimulus. I strongly urge you to make every effort to use some of the forthcoming money for infrastructure projects around the state to invigorate this long delayed project. | citizen | 200 | 31 to 90 days | \$0 |
| Athens | Dist 10, PID 24848, ATH SR 356 0.000 | Two-Lane Resurfacing Project. Ath 356 0.00-4.77. Includes Ath 682 5.96-7.75 And Vin 356 0.00-5.97. | Ohio Department of Transportation | 50.2 | 31 to 90 days | \$1,749,000 |
| Athens | Port of Conneaut Pavement Repairs | Repave the Port of Conneaut. The project will include pavement planning, base repairs, and overlaying of all paved areas including access to the Public Dock, marinas, limestone dock, Liberty Park, boat ramps, etc. | Conneaut Port Authority | 10 | 0 to 30 days | \$750,000 |
| Athens | Burr Oak Regional Water Dist. New Water Treatment | The Water Treatment Plant, consists of: -five water production wells (wellfield) capable of producing 4 MGD; -a new 4 MGD water treatment plant including a 12,000 square feet process building, filtration equipment, ion exchange softening equipment, intermediate and high service pumps, two clearwells, chemical application equipment and red water filter beds; -more than 5.5 miles of 18" raw waterline from the wellfield to the new water treatment plant; and -more than 2.5 miles of 20" finished waterline from the new water treatment plant to the existing distribution system. will be placed in operation in order to bring the BORWD system into compliance with federal and state safe drinking water laws. The BORWD sells water to satellite water systems, and correcting the THM MCL issue will positively impact more than 9,000 residential and commercial users in a four-county area served by the BORWD and its seventeen satellite water systems. | Burr Oak Regional Water District- ME Companies | 45 | 91 to 180 days | \$15,775,016 |
| Athens | Rural Hospital EHR Implementation | Purchase and implement EHR in small, rural, not-for-profit hospital facility. In current financial state, hospital will not be able to implement this type of system on its own. Not implementing an EHR threatens the very existence of this facility, the provision of healthcare in this community, and jobs of over 400 employees. Outcomes include improving communication, electronic access to data and documentation, and managing P4P requirements, leading to better clinical and service quality. The ROI sustained through an EHR implementation allows the hospital to sustain itself as a community hospital, continue providing healthcare services to an underserved population, and protect and create jobs in this area. | O'blesness Memorial Hospital | 400 | 91 to 180 days | \$500,000 |
| Athens | Village of Coolville Wastewater Improvements | The proposed project will provide adequate sanitary service to the Village of Coolville in Athens County. Coolville has no community wastewater infrastructure. Sewage from homes and businesses is treated by privately owned systems such as septic tanks and aerators. These systems have been experiencing widespread failures for many years and there is raw and partially treated sewage on the ground and in drains and ditches throughout the community. Contact with sewage is a serious human health risk and the water quality of the Hocking River and small adjacent streams is negatively impacted by these illicit sewage discharges. Repairs of these privately owned systems are impractical and prohibitively expensive, so a community system is necessary. The proposed project will install small diameter sewers and clustered sites of treatment equipment that will serve neighborhoods and vacant lots within the Village. | EMH&T | 50 | 31 to 90 days | \$4,500,000 |
| Athens | A Toll-like receptor signal inhibitor to treat aut | the environmental induction process activating Toll-like receptors (TLR) on nonimmune cells, a novel therapeutic paradigm. Partner with STRR Phase II and Corporate funding to complete preclinical toxicity package and bring drug to Phase III trials in partnership with Ohio University, Ricerca Corp. Complement the STRR Phase II award which has 4 aims: 1. Complete formulation, pharmacokinetics, and dosing. 2. Finalize molecular mechanism studies. 3. Complete testing of mouse models of pancreatic cancer by comparing efficacy against or with gemcytabine, the current drug of choice clinically, that provides no increase in life span. 4. Develop analogs with potential selective efficacy in Type 1 diabetes, Type 2 diabetes, thyroid autoimmune disease. The funding from stimulus package would bring drug through animal safety testing, IND, and complete Phase I/II trials in pancreatic cancer and also demonstrate human safety for autoimmune disease testing. Jobs include Ricerca testing/drug synthesis personnel, research personnel, clinicians, CEO, legal. Time frame 2 yrs. Start at | Interthyr Corporation | 25 | 91 to 180 days | \$1,500,000 |
| Athens | Athens Alternative Education Program | To assist the Athens City and Athens County school districts to operate an alternative educational program for very at risk students in grades 7-12. These students suffer from various disabilities, social and emtional distress, poverty, mental health issues, low socioeconomic status, low self esteem, dysfunctional family structure which prevents them from succeeding in the regular school program. They are at risk of dropping out of school and not attaining their high school diploma. The current program has been identified as a model program and support funding is necessary to attain Governor Strickland's educational goals. He has personally visited the program and was duly impressed with the results. | Athens City Schools | 30 | 0 to 30 days | \$900,000 |

|----------------|---|---|--|----------------|--------------------|---------------------------|
| Athens | Residential Treatment Program | pregnant, IV drug users and their children and Bassett House Residential Treatment for addicted male and female adolescents. RWRP is funded (for 15 years) through the Federal Womens Block Treatment Grant that was flatlined then reduced due to the recession. Consequently, pregnant women and their children are being turned away, creating a waiting list of over 30. For 20 years Bassett House has provided medically supported intensive treatment for dually diagnosed teenagers with mental illness and chemical dependency who now must be denied admission and put on a waiting list due to lack of funding. Both facilities are in need of the following capital improvements in order to stay operational and keep patients safe. 2 generators to supply power for heat and water, replacement of water/sewer treatment plant equipment, leaking roofs, exterior siding, 9 fire rated doors, 72 energy efficient windows, 13 shower stalls, attic insulation, retaining walls, sidewalks, blacktop parking lot, and new construction on the premises of an exercise facility with additional storage of 5 mine subsides, possibly installing a limestone leach bed and 1,000 linear feet of open limestone channel to restore stream water quality, improve habitat and provide recreational opportunities in Monday Creek | Health Recovery Services, Inc. | 98 | 31 to 90 days | \$437,875 |
| Athens | Besemer Hollow Reclamation | Repair slow moving slip on Grosvenor St. that has potential to destroy road, utilities, and several houses. 75 Households served by threatened roads and utilities | Rural Action (Monday Creek Restoration Project) | 20 | 181 days or more | \$225,000 |
| Athens | Grosvenor Slip Repair | Install/Replace 260' sidewalk from Fairgrounds to W. Union Bridge. Brings arterial street to full ADA compliance, serves 50 low-income households. | City of Athens | 20 | 31 to 90 days | \$364,000 |
| Athens | West Union Sidewalk Replacement | Extend spur of Hocking Adams Bikeway across city-owned former rail bridge over Hocking River in western Athens. Connects 900 acres of newly-annexed property in NW Athens, including all home and business in University Estates Planned Unit Development to this important transportation resource. Provides incentive for commuters to use bikes rather than auto transport | City of Athens | 10 | 31 to 90 days | \$60,000 |
| Athens | Bikepath Extension over Rail Bridge | Pave 1500' of 3-lane roadway and replace sidewalks on both sides. Improves critical fire department main response route to 90% of city. Directly serves and provides fully-compliant ADA access to 50 households. | City of Athens | 20 | 91 to 180 days | \$227,700 |
| Athens | Lancaster St. Paving and Sidwalk Rehabilitation | Annual street paving and maintenance contract for city streets - managed via ODOT PCR system | City of Athens | 25 | 31 to 90 days | \$225,000 |
| Athens | Citywide Paving | New pavement in select areas throughout entire City of Athens - augments city funds already identified for this purpose. | City of Athens | 15 | 31 to 90 days | \$270,000 |
| Athens | Carriage Hill Bridge Replacement | Replace 2-lane bridge over Coates Run (currently structurally deficient on ODOT list). Replaces badly-deteriorated bridge on Carriage Hill Dr. which is the SOLE access point for 200 residents of the Carriage Hill Apartments (normal traffic AND police/fire). | City of Athens | 10 | 91 to 180 days | \$198,000 |
| Athens | Salt Bin Construction | Replace city street department salt storage building, create loading facility and remediate surrounding salt-contaminated soil. Replacement of 45 year old facility to increase storage capacity by 400%, removal of current salt in ground currently threatening city water supply. | City of Athens | 10 | 91 to 180 days | \$220,000 |
| Athens | Water & Waste Water Improvements | The project will provide an EQ tank to help reduce impacts to the Village WWTP and also replace failing water lines that result in about 25% loss of water and pose a health risk. | Village of Albany | 10 | 91 to 180 days | \$4,000,000 |
| Athens | BBBS of Athens School Based Mentoring Program | The BBBS School Based Mentoring Program partners with Ohio University, area businesses, local high schools, and other interested community members to provide mentors to elementary school students. These matches meet on-site at schools throughout Athens County. Adult and high school volunteers meet weekly with students during lunch or after school, providing social skill building and academic enrichment tailored to the identified needs of the school and individual students. The program runs in all five school districts in Athens and Vinton counties. | Big Brothers Big Sisters of Athens | 4 | 0 to 30 days | \$100,000 |
| Athens | BBBS of Athens Mentoring Children of Prisoners (MC) | In the 08-09 school year we have served over 150 children through this program. With further funding we will be able to serve 250 in the 09-10 school year. Each of these children will receive at least 40 hours of direct one-to-one mentoring for a total of more than 10,000 hours. Independent third party studies of children mentioned through this program are: 46% less likely to begin using illegal drugs 27% less likely to begin alcohol use 52% less likely to skip school 37% less likely to skip a class 33% less likely to hit someone and 59% showed improved grades SENATE REPORT 106-404 from the FY2001 DOJ appropriations bill states that "...children of prisoners are seven times more likely than other children to be incarcerated at some point in their lives..." Through the MCOPI program, BBBS of Athens is providing an opportunity for these children to have a caring role model who can show them new possibilities in their lives. The MCOPI/Amachi program serves a population of children that is overwhelmingly poor and at-risk for succumbing to a host of social problems endemic to their situation, notably dropping out of school, abusing substances, and juvenile delinquency. Through our mentoring programs the cycle of incarceration for the children of prisoners that we serve will be broken. Children served in this program are: 46% less likely to begin using illegal drugs 27% less likely to begin alcohol use 52% less likely to skip school 37% less likely to skip a class 33% less likely to hit someone and 59% showed improved grades Additionally, The Washington Institute on Public Policy notes that for every dollar invested in Big Brothers Big Sisters, there is a \$3.28 savings to the taxpayer. | Big Brothers Big Sisters of Athens | 4 | 0 to 30 days | \$100,000 |
| Athens | Nelsonville Business Incubator Expansion | The funds would be used to expand the infrastructure of the Nelsonville Business Incubator to increase jobs, sales, production, and distribution. (1) We have an existing fast-growing business in the Nelsonville facility, Edmap (95+ employees and \$49+ million in sales), with a defective roof over their 20k sq/ft which has to be replaced. (2) We also have a prospective business which has recently been purchased and looking to move to the Nelsonville facility to restructure and ramp up to expand. This company would mean an additional 20-30 jobs. However we lack parking to accommodate existing workers much less new workers. (3) We need to upgrade the 11 loading docks so that the mechanisms all work and in-bound and out-bound storage infrastructure and equipment is in place. (4) We need to expand the electrical backbone to accommodate multiple users | Appalachian Center for Economic Networks, Inc. (AC | 168 | 0 to 30 days | \$558,900 |
| Athens | ACEnet Food Manufacturing Incubator Expansion | businesses making it imperative to retrofit and expand our facility. We provide unique facilities and services to over 150 food businesses annually throughout Ohio (primarily), West Virginia, Kentucky, and Western Pennsylvania. These businesses are distributing locally, regionally, nationally, and are expanding to international markets. The food manufacturing facility's undersized equipment and existing space is the issue that we will address. Retrofitting the Thermal Processing Center is critical to expand the focus from small scale producers to expanding businesses with larger distributions and frequent production needs. This investment would seamlessly scale up our capacity to that of a small co-packing plant. With a 2 month wait to produce last year for our existing clients, we are anticipating a growing demand this year with over 15 new businesses requesting services in the first 1 1/2 months of 2009. | Appalachian Center for Economic Networks, Inc. | 300 | 0 to 30 days | \$293,950 |

| Athens | Biomedical Engineering Research Assistantships | Families are struggling to make ends meet let alone pay for their children's college education. Funds are requested to create 15 student research assistantships. Each assistant will be paid \$5000 per year and will work in a laboratory that conducts research in biomedical engineering. Current Ohio University students will be eligible for this program. In addition, we will reach out to Appalachian counties to identify promising graduating high school students who would have difficulty attending Ohio University without financial aid. Funding is requested to initiate and maintain this program for 3 years. After this time, the program will be funded through an internal endowment which we anticipate will begin returning income after the economic recovery occurs. This program will have a significant positive impact by (i) providing a means for Appalachian citizens to advance through education at a time when funding for such efforts is desperately needed and (ii) enhancing the number of students trained in engineering disciplines. | Ohio University | 15.5 | 0 to 30 days | \$350,000 |
| Athens | Decision Support Software for Diabetes Management | Diabetes is a chronic disease that can be prevented, but once diagnosed, effective diabetes management can prevent serious long-term complications, including kidney failure, blindness, nerve damage, heart attacks and lower extremity amputations. Effective diabetes management is hindered by the need for busy physicians to analyze vast quantities of patient data, recognizing problems and recommending therapy adjustments. This project aims to provide computerized clinical decision support to physicians managing patients with diabetes. This health information technology could improve the quality of health care for Ohioans while reducing health care cost expenditures. | Ohio University | 0 | 0 to 30 days | \$175,000 |
| Athens | Coolville Water System Improvements | We propose to conduct a clinical research study of patients with type 1 diabetes on insulin pump therapy and to develop a demonstrable prototype of a diabetes management system. We have conducted a preliminary study that provided proof of concept for our system and method of diabetes management. We have state-of-the-art research facilities in the Appalachian Rural Health Institute Diabetes Center, which was the proposed project will replace aged waterline pipes in the Village's distribution network. The Village experiences frequent service interruptions due to water line breaks. Additionally, a significant amount of water is lost due to undetected leaks in the network. | Village of Coolville- EMH&T | 2 | 91 to 180 days | \$200,000 |
| Athens | Sustainable Transportation Infrastructure Recovery | through the sustainability of raw materials, efficient energy utilization, development of new products and equipment, as well as capacity building efforts. STIR will build capacity by training and enhancing knowledge of existing workers and creating new quality jobs in infrastructure markets sectors for workers displaced due to outsourcing and current economic conditions. Production of healthy asphalt, warm asphalt, recycled materials and thermoplastics can be developed and utilized for road and rail in order to decrease construction costs, while increasing the infrastructure's usable life. STIR will establish partnerships among the universities, government and private sectors. Sensors with the capability to assess the health of the existing infrastructure, improve safety and optimize infrastructure utilization can be developed for production in strategic areas in the State. Utilizing new technology and modernized design concepts such as perpetual and long life concrete pavement with improved quality control methods will extend the life of the infrastructure to 50 years. | Ohio Research Institute for Transportation and Env | 600 | 0 to 30 days | \$7,500,000 |
| Athens | Remove obstructions, improve apron, approach light | Remove obstructions in runway approaches, improve aircraft parking apron, install approach lighting. | Ohio University | 50 | 31 to 90 days | \$3,193,575 |
| Athens | Tri-County Mental Health Security Project | Tri-County Mental Health and Counseling Services, Inc. will install security doors between the public waiting area and agency hallways which would better assure employee safety and security from threats of workplace violence. | Tri-County Mental Health and Counseling Services, | 3 | 31 to 90 days | \$24,675 |
| Athens | Providing vital learning services to Ohioans thru | Through the use of 3-D online virtual worlds for preparation (virtual schoolers) project and a 55M DOL-sponsored WIREd project, we have developed start-of-the-art learning technologies based on 3-D online virtual worlds and worked with school teachers to develop standard-based learning materials. Our research indicates that learning in virtual worlds is effective and appealing to learners. Our work has been acknowledged internationally to be on the cutting edge of the field. | Ohio University | 25 | 181 days or more | \$3,000,000 |
| Athens | A*NET: The Next Generation of O*NET (Occupational | Our multidisciplinary team proposes to hire 15 programmers, engineers, designers, & curriculum specialists to create a Vital Learning Service Center to develop a 21st Century educational system in Ohio & provide high-quality educational services to current and future generation Ohio workers hurt by the economic downturn. We will work with teachers & learners from local schools, career centers, & company training centers to offer both asynchronous and synchronous online or physical learning sessions. We will design appealing learning spaces that are connected to virtual worlds, including a virtual fitness system & an instructional emergency room for training nurses. | Industrial and Systems Engineering, Ohio Universit | 4 | 0 to 30 days | \$2,400,000 |
| Athens | Economic Development through Entrepreneurship in A | adults wanting to: 1) join the workforce for the first time or in a full-time capacity, 2) change jobs as a result of downsizing or changing economy, 3) change jobs because of the recognition that the employee's current job will not be feasible for the long-term (because of health or family obligations), 4) develop a new skill set for a better career. Currently O*NET is a tool supported by the Department of Labor and is considered to be the primary source of occupational information. Our proposed research tool, A*NET, will build on and link to O*NET, as well as other sites, will be much more usable for the older population. It will include algorithms that consider lifetime experiences, health status, preferred job environments, job demands, and personality matches. The proposed interface will be user-friendly, interactive, and not intimidating. It is proposed that the products of A*NET will be: 1) a list of possible jobs, 2) training requirements, 3) locations where training can be obtained that are in the geographical area to the user, and 4) possible employers. | Ohio University | 720 | 0 to 30 days | \$2,000,000 |

This has made impacts on telerobotics, plus surgical and flight training. Haptics has the potential to revolutionize K-16 Science and Engineering Education. Imagine a software product on CD to augment textbooks where the student can interact, see animations of the resulting simulations, change parameters for exploratory learning, and feel the results of the science/engineering topic being learned!</p> <p>This project supports innovative STEM education for the state and nation. Often students do not appreciate math and science topics due to the lack of real examples and the static nature of textbook learning. Producing a generation of animated, interactive educational activities that give the feedback to the students can capture the interest of many K-12 and university students who are being left behind currently in technical education. Our nation is seriously behind in STEM education, the reversal of which will lead to good jobs in the future.</p> <p>This project is for commercialization of existing NSF- and NASA-funded projects.</p> | Ohio University | 100 | 0 to 30 days | \$1,000,000 |
| Athens | Immersive Video Intelligence Network (IVIN) for Em | <p>immersive video to provide first responders with an accurate and detailed model of the scene. Using this technology, our team is building accurate models of buildings and other sites that may be considered at risk for terrorist attacks, hostage situations, or other disasters where many citizens may be at risk. For example, if a large-scale fire breaks out at the US Bank Arena in Cincinnati, first responders will be able to access not only the floor plans of the arena, but visual images of each room. We will be packaging the final product and will sell it to cities around the nation, creating a nationwide workforce to help expand and maintain it.</p> <p>We believe that because of its functionality and flexibility, our system will quickly become top of the "must have" list in every police, fire, and emergency management office in the country. To ensure it is ready for diverse scenarios, we want to build on our work with Columbus locations to capture and process immersive videophoto data from locations in each of four major and distinctive cities: Cincinnati, Cleveland, Dayton, and</p> | Ohio University | 6 | 91 to 180 days | \$1,070,000 |
| Athens | OAEI Web-Based Leadership Development | <p>Creating and implementing a web-based delivery system to provide leadership development for the 165 rural and Appalachian school districts in the 29 Appalachian Ohio counties. The program focuses on building leadership capacity in these school districts with the ultimate goal of improved student achievement.</p> <p>During the training process, teams of administrators, teachers and community members are provided with the skills needed to analyze and apply data to identify priorities for system reform in their school communities. Utilization of the web-based program would result in the reduction of travel time, limit the amount of released time requirements, for participants that is now necessary for on-site delivery of instructional components of the training program.</p> <p>Using a web-based approach would take advantage of existing technology infrastructure available in the school districts and would expand the number of schools that can be involved. Finally, the project would serve as a model for rural school improvement across the nation.</p> | Ohio Appalachian Educators Institute, Ohio Univers | 8.0 | 91 to 180 days | \$650,000 |
| Athens | Domestic Violence Intervention Program | <p>This project will provide a direct intervention for 30 families from Athens, Hocking or Vinton Counties, Ohio who are experiencing domestic violence. DVIP services include continued court-mandated counseling for the perpetrator and will add safety planning for the victim and her children.</p> <p>An intensive case management component will focus on independent, non-violent living skills including job readiness. The project will employ a case manager and a clinician.</p> <p>This project will allow My Sister's Place to re-instate satellite counseling and outreach offices, specifically in Hocking and Vinton Counties, Ohio. Victims of family violence in this rural, very Appalachian environment face barriers not found outside of the area due to geographic isolation.</p> <p>Providing services in a victim's home community increases her safety and provides the opportunity to explore a non-violent life for herself and her children. The project will employ two victim advocates.</p> | The Edna Brooks Foundation, Inc. dba My Sister's P | 2.0 | 0 to 30 days | \$50,000 |
| Athens | Safety Planning with My Sister's Place | <p>Innovation and improvement. We will learn about how Ohio's public school districts, now that all have access to value-added analysis as part of the statewide data system, are using the data to make strategic decisions affecting student achievement.</p> <p>Outcomes include actionable data on:</p> <ol style="list-style-type: none"> 1. how districts are using value-added data to individualize educational plans for students; 2. promising practices from districts that have successfully included value-added data into their data-driven decision framework, down to the teacher level; 3. if and how district financial status, proficiency level, and exposure to the pilot program contribute to the variability in utilization; 4. how the use of value-added analysis for accountability affects the utilization of the data and the attitudes of educators toward the system, as compared to Pennsylvania, a similar state using a similar value-added system but not including it as part of the accountability framework. | The Edna Brooks Foundation, Inc. dba My Sister's P | 2.0 | 0 to 30 days | \$75,000 |
| Athens | Value-added analysis systems in practice | <p>Fermentation of plant cell wall material, however, optimization of these procedures will require a deep understanding of the synthesis of cell wall components and how it is regulated as well as the development of a well-trained workforce in this emerging biofuel industry. The Ohio University Cell Wall Group is focused on understanding cell wall synthesis and regulation and thus seeks to acquire state-of-the-art research instrumentation (Liquid chromatography-mass spectrometry/mass spectrometry (LC-MS/MS) and gas chromatography-mass spectrometry (GC-MS) systems) to enable and enhance interdisciplinary research aimed at increasing the biomass of plant cell wall structural components as renewable sources of biofuel and training a workforce for the emerging biofuel industry. This instrumentation will thus provide essential research infrastructure needed to meet our routine and advanced analytical needs for carbohydrate and protein analyses geared to achieving energy independence, while also training a new generation of workers for the emerging biofuel industry.</p> | Ohio University | 3 | 31 to 90 days | \$200,000 |
| Athens | Renewable Energy Derived from Plant Cell Wall Biof | <p>Fermentation of plant cell wall material, however, optimization of these procedures will require a deep understanding of the synthesis of cell wall components and how it is regulated as well as the development of a well-trained workforce in this emerging biofuel industry. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|-----------------------|----------------|--------------------|---------------------------|
| Athens | Establishing a carbohydrate and proteomics facility | and proteomics analysis. The Ohio University Cell Wall Group seeks to acquire gas chromatograph-mass spectrometer (GC-MS), and liquid chromatograph-mass spectrometer (LC-MS/MS) to enhance interdisciplinary research aimed at the increase of the biomass of plant cell wall structural components as renewable sources for biofuel. The LC-MS/MS and GC-MS systems would improve research infrastructure needed to meet our basic and routine analytical needs for carbohydrate and protein analysis. These instruments will not only help Plant Cell Wall group to produce high quality research in biofuel and renewable energy field, but will also allow to reach the detailed structural analysis at the molecular level needed in the modern biology era. A management plan that includes technician will enable the instruments to be maintained and operated indefinitely to serve other researcher at Ohio University. It is important to stress out that the state of Ohio is lagging behind in establishing a strong fundamental research program on renewable energy from plant biomass U.S. 33 four-lane by-pass around Nelsonville in Athens and Jackson Counties. Phase I has been funded and work is continuing. Phase II and Phase III would be funded with stimulus money. Current state funding for Phase II & III have been delayed at least five years. This is the last of the U.S. 33 corridor to be completed from Columbus to the Ohio River. This current two-lane section of highway is very dangerous resting in at least one death every year and many other accidents more frequently. | Ohio University | 2 | 0 to 30 days | \$400,000 |
| Athens | Nelsonville By-Pass | corridor hubs in Appalachian Ohio. Support for all job-creating entrepreneurial endeavors with focus on clusters: biomass in I70/I77 corridor, digital media in US23/RT50-32 quadrant, bio-agriculture along RT32 corridor, and advanced energy companies in hubs in select cities. Service delivery model: proven systems of professional operational support, targeted purchased services, and collaboration with regional network of entrepreneurial support throughout 32-county Appalachian Ohio. Ready-to-go program involves satellite offices staffed by Entrepreneurs-in-Residence with specific cluster focus. Program goals are to accelerate commercialization, prepare companies for debt/equity financing, and leverage additional resources for rapid market entry, job creation, and revenue growth. Job creation and growth in distressed, Appalachian Ohio fueled by entrepreneurial development. Jobs created and retained by expanding successful OU economic development programs, integrated under a Center for Entrepreneurship and supported by regional system, to form a developing industrial corridor. | Individual Citizen | 200 | 31 to 90 days | \$120,000,000 |
| Athens | Corridor Clusters for Entrepreneurial Economic Deve | OUTCOME: Offering cutting edge educational opportunities to approx. 200 students & employing ten educators and ten teaching assistants over five years. In the 21st Century, education no longer needs to stay tethered to the classroom. Technology allows the students and professors to interact with the world from afar, and then share that experience with the rest of the world. Imagine taking a class of students to remote villages in Ecuador to battle the spread of Chagas Disease, and then create, edit and distribute educational video podcasts from the Andes Mountains. The TDI Global Classroom Initiative will allow students enrolled in the Ohio University Study Abroad Program to collaborate on international healthcare projects, use technology to share knowledge from the field instantaneously with a global audience. Such a program would be unique to video programs in the United States. With a small, \$50,000 investment, Ohio University's Tropical Disease Institute could recruit students from across the country by providing a cutting-edge 21st Century Education for those studying subjects as diverse as biology, education, media, and medicine in rural Appalachia. | Ohio University | 620 | 0 to 30 days | \$1,500,000 |
| Athens | TDI Global Classroom Initiative | This project will construct a fiber-optic network for the Southern Ohio Health Care Network, covering all 32 rural southeastern Ohio counties. These counties are currently blanketed by Health Professional Shortage Areas. The network will cover more than 200 health care facilities in an area that currently has limited broadband access and expensive connectivity rates. The SOHCN will combine efforts of the 3 largest health care systems in the region. Outputs: *Installation of fiber-optic ring covering 16,000 square miles, serving a population of 1.7 million people *Interconnection to Ohio Supercomputer Center network *Provides access to urban medical centers and university research centers *Performance to support HD telemedicine *Provide internet access options *Delivers metropolitan-class service to southeastern Ohio *Partner with carriers through competitive bidding process *Health care providers as "anchor tenants" to justify the build *FCC funds to defray capital costs | Ohio University | 20 | 31 to 90 days | \$50,000 |
| Athens | Connecting Appalachia: SOHCN Fiber-Optic Backbone | Build upon the Southern Ohio Health Care Network Fiber-Optic backbone to create a wireless network that covers 32 southeastern Ohio counties. Install 9 primary towers with fiber feeds from SOHCN for high-speed back-haul. Create high-speed wireless links to large businesses in the entire 16,000 square mile service region. Offer small business and residential service saturating 5,000 square miles of the rural expanse. Install 200 secondary towers, fed by high-speed links from the 9 primary towers. Install 100 tertiary towers to fill-in coverage holes from terrain. Outputs: *Install 9 primary towers, 200 secondary towers, and 100 tertiary towers across a 16,000 square mile service area * Stimulate the growth of WISP's (wireless internet service providers) *Support agricultural businesses *Encourage small business development and expansion *Improve educational opportunities for children and adults *Draw telecommuters seeking the rural lifestyle *Support tourism | Reid Consulting Group | 1725 | 31 to 90 days | \$27,800,000 |
| Athens | Connecting Appalachia: Wireless Coverage of the Ru | Build upon the Southern Ohio Health Care Network Fiber-Optic Backbone to provide world-class connectivity for 30 industrial parks in 32 counties of southeastern Ohio. This would build community points-of-presence (C-POP's) and redundant fiber-optic links to the nearest SOHCN point of presence. Connections would be established to local telephone and cable companies, as well as other internet service providers serving the area. It would extend fiber within the industrial park from a C-POP. This process would be repeated throughout the region. Outputs: * Build 30 C-POP's in a 16,000 square mile region, with redundant fiber-optic links to the nearest SOHCN POP. *Offer improved broadband service to 30 industrial parks in 32 southeastern Ohio counties. | Reid Consulting Group | 1725 | 31 to 90 days | \$26,943,860 |
| Athens | Connecting Appalachia: World-Class Connectivity fo | Build upon the Southern Ohio Health Care Network Fiber-Optic Backbone to provide telemedicine to 32 counties of southeastern Ohio. The cost savings of telemedicine are well-documented, and with the large geographic territory included in this region would provide much-needed access to better health care to 1.7 million people. Outputs: *Improved outpatient general practice consultations *Improved in-patient intensive care (in-patient and general) *Offer picture archiving and communications (PACS) *Offer home care telemetry *Provide improved health care services to 1.7 million people | Reid Consulting Group | 230 | 91 to 180 days | \$20,860,500 |
| Athens | Connecting Appalachia: Telemedicine Initiative | | Reid Consulting Group | 380 | 91 to 180 days | \$23,528,772 |

| Athens | Molecular & Cellular Diagnostics in Southeast Ohio | Intellectual property development and commercialization using a \$2M gift from the Osteopathic Heritage Foundation. The new Chair will team up with a core group of our current faculty and other new hires in the medical school and the Russ College of Engineering and Technology to start a program in Molecular and Cellular Diagnostics and Therapeutics, which will be housed in our new \$34M Academic & Research Center (ARC) opening in Jan 2010. We are partnering with Diagnostic HYBRIDS, a local company in Athens that develops, manufactures and markets cellular and molecular diagnostic kits for a wide variety of diseases and medical conditions, to bring our new technology to the healthcare market. We are requesting \$5M in economic stimulus funds for equipment and instrumentation in ARC and 2 years of funding for support personnel to launch the new program, which will provide entrepreneurial opportunities for our faculty and students and generate new ideas for the diagnosis and treatment of human disease that will translate directly to jobs and economic development in the region. | Ohio University College of Osteopathic Medicine | 50 | 0 to 30 days | \$5,000,000 |
| Athens | TOWN STREET BRIDGE REPLACEMENT | THE BRIDGE IS CURRENTLY DOWN TO ONE LANE. THIS BRIDGE WILL SERVE AS A DETOUR WHEN ANOTHER BRIDGE IS REPLACED ON STATE HIGHWAY. THE CURRENT STATE OF THE BRIDGE IS A HAZARD TO EMS, FIRE, AND SCHOOL BUSES. | VILLAGE OF GLOUSTER | 0 | 91 to 180 days | \$380,136 |
| Athens | Besemer Solar company | I have retrofitted an old south facing structure on my property that I would like to turn into a solar energy store, where people can come and buy panels, regulators, batteries and accessories, and see what is available. Being next to the National Forest, people can come from around the state, go for a hike, and shop for some home solar panels. With all of the power outages in the area, many people might choose a small solar operation rather than a generator. People can also contact to have solar panels installed, potentially creating numerous jobs. I will also show the different forms of solar power, such as using it for heating and I have by closing in the south wall of the structure with double paneled windows, as well as the south porch of my house up on the hill from the structure. I would also like to install a solar hot water heater, and a solar cooker, and sell all such products as an having homes of people ready to install them. | Besemer Solar | 7 | 91 to 180 days | \$50,000 |
| Athens | Southeast Ohio Opioid Treatment Project | Rates of Opioid Dependence have doubled within the last year. A dramatic increase in intravenous drug use threatens to produce a public health emergency. The National Institute of Drug Abuse strongly supports the use of "medication assisted treatment," using a combination of buprenorphine and naloxone combined under the trade name Suboxone). Suboxone is an Opioid like drug that prevents withdrawal and markedly reduces the drug craving which often lead to relapse. The current proposal involves administering Suboxone in gradually decreasing doses and concurrently providing intensive counseling and case management services. The goal will be to assist individuals in achieving abstinence from Opioids and other mind altering substances and benefiting the community through decreasing social disruption, crime, and diseases spread through intravenous drug use. The project has strong local support with resolutions of support from county commissioners and multiple letters of support from judges and diverse agencies. | Health Recovery Services, Inc. | 10 | 31 to 90 days | \$170,000 |
| Athens | Consortium of Universities Revitalizing the Econom | The Consortium of Universities for Revitalizing the Economy (CURE) consists of 10 universities, including Ohio University's Voinovich School of Leadership and Public Affairs, along with Cleveland State University, the University of Akron, as well as the Center for Automotive Research (CAR), an automotive industry analysis non-profit located in Ann Arbor, Michigan. The CURE partners represent six states including Michigan, Ohio, Indiana, Illinois, Wisconsin and Minnesota. Each partner will provide a portfolio of programs and projects in accordance with their capacity and needs of the region that they service. Services provided in Ohio would target all 88 counties and would include extensive business development and operational services, commercialization assistance, community-level economic development assistance, and workforce development services for dislocated workers. | Ohio University - Voinovich School of Leadership a | 360 | 91 to 180 days | \$1,800,000 |
| Athens | Ohio Benefit Bank Technical Assistance | The Voinovich School proposes to provide a range of technical assistance services to help the Ohio Benefit Bank expand the economic and social impacts of the Ohio Benefit Bank program. The Benefit Bank links low- and moderate-income Ohioans to work supports, tax assistance and social services they need to retain employment and be economically secure. The Voinovich School's technical assistance services would strengthen and expand the impacts of the program by: (1) using GIS tools to geographically target high-need service areas within Ohio; (2) analyzing client characteristics and outcomes to help develop more effective outreach and intervention strategies; (3) deploying a number of formative evaluation tools to develop and refine strategies to improve program impacts; (4) developing and implementing innovative pilot programs before program enhancements are taken to scale. | Ohio University, Voinovich School of Leadership an | 600 | 0 to 30 days | \$386,750 |
| Athens | Carbon Dioxide Sequestration and Corrosion | under flow conditions (www.corrosioncenter.ohio.edu/). We are ideally placed to exploit research opportunities in corrosion research related to CO2 sequestration. The ICMT is branching into carbon dioxide sequestration but is limited by equipment needs - both for experimentation and analysis. In order to build on our existing expertise, we will need to construct flow loop test equipment that will permit us to study corrosion under conditions representative of actual compression and pipeline systems where the carbon dioxide is supercritical. The research is important for reasons of economics, materials selection and safety. In addition to advancing towards accomplishing the Federal government's goals for the development of clean coal technologies, the research will be of particular benefit to the electricity generation industry. Should we obtain Federal funding for experimental and analytical equipment, we anticipate rapidly adding corporate sponsors to our research program. As a coal mining state, Ohio stands to benefit from the development of clean coal | Institute for Corrosion & Multiphase Technology, O | 10 | 31 to 90 days | \$1,200,000 |

| Athens | 21st Century Mathematics & Science Teaching Fellow | This project will produce 40 new mathematics and science teachers who are especially prepared to transport 21st Century skills into Ohio's Appalachian schools. Teachers (Fellows) will be recruited from STEM undergraduate majors and displaced workers who have a strong applied STEM backgrounds. Prepared within a culture of 21st Century skills, the Fellows receive a teaching license and masters degree within one year. Fellows will teach in one of the following fields: integrated mathematics, integrated science, physical science, life science, or earth/space science. A new program will be built by transforming a current traditional degree program for high school teachers. The new program will be built by STEM and education faculty, highly qualified and national board certified SE Ohio teachers, and visionary, savvy school district and Education Service Center administrators. The Fellows will receive free tuition and a stipend during the one-year program. Fellows receive school-based preparation and support. Support continues during two years of induction teaching with help to work toward national board certification and hone skills that help Appalachian learners to improve and | South East Ohio Center for Excellence in Mathematics | 52 | 31 to 90 days | \$2,000,000 |
| Athens | Athens Child Care Facility | We are currently doing our due diligence on a 7,500 sq ft existing facility in the City of Athens. The center would serve 100 full-time children ages infant to before/after school programming. An existing partnership with Ohio University, the Corporation for Appalachian Development and the Athens Area Chamber has made this a priority to meet the needs of employers, employees and families. The setting will be close to Ohio University and one of our main commercial corridors. Access to the facility will be easy as every highway is within a ½ mile. This location is a targeted revitalization community development corridor. In addition, quality, affordable and ACDC will be a model, state of the art childcare facility that will help to satisfy the significant local needs (see attached study) for infant through before and after-care school children. Ohio University has preliminarily committed to act as a referral and educational partner. The existing facility at OU currently is over capacity. They have a consistent waiting list of more families than they can serve. | Athens County Economic Development Council | 10 | 31 to 90 days | \$1,250,000 |
| Athens | Stuart's Opera House Annex | Stuart's Opera House is a 130 year old theater that was restored in 1997 and welcomes over 20,000 people annually to our venue to experience National music acts, professional plays and educational programming for children. Stuart's is the cornerstone of the historic square arts district and exists to serve our community where the majority of the population is at or below the poverty level. We serve the highly underserved population of Appalachia in Southeast Ohio. Stuart's Opera House is currently in negotiations with a local bank to acquire their 8,000 square foot building on the historic square to our organization to expand our current building and operations. Stuart's will then create a facility that will allow us to establish a heritage center. This center will host visual artists, musical acts and a permanent interactive history of our region. It is planned that the local school districts will be able to incorporate the activities of the annex into their curriculum to | Stuart's Opera House | 4 | 31 to 90 days | \$250,000 |
| Athens | Using Web Technology to Provide Spoken English Pro | 1. Goal: Create 200 white-collar jobs in Ohio Appalachian Region within 3 years by providing spoken English programs online using web technology. 2. Expected outcomes: 1) Improving and finalizing the initially designed and developed online spoken English curriculum, education materials, and innovative new pedagogy. 2) Improving and finalizing the initially used online Spoken English teaching system. 3) Providing training to local residents of Ohio to become qualified online spoken English instructor; 4) successfully marketing this online spoken English program to international students within and outside US. Notes: 1) This project has started more than 3 years by 3 Ohio univ. professors, involving 2 PhD students and more than 5 master degree students; 2) The online spoken English program has been tested to real-life international students in Ohio univ., Shanghai of mainland China, and Taiwan in the last 3 years, which received good results and experience; 3) This project & its initial results were invited to present to Microsoft international workshop in Pan-Ohio Bioinformatics Infrastructure | Ohio Univ. | 200 | 0 to 30 days | \$2,000,000 |
| Athens | Pan-Ohio Bioinformatics Infrastructure | Blue Aronow (JGC/CHMC), Ashok Krishnamurthy (OSU), Mike Raymer (WSU), and Lonnie Welch (OU) The Ohio Supercomputer Center will soon launch its "BioScienceSuperCluster" - a supercomputer that will be used to support next-generation biotechnology research. To empower researchers to exploit the BioScience cluster's capabilities, the Ohio Bioinformatics Consortium proposes to develop a bioinformatics software infrastructure. This will provide the burgeoning Ohio BioScience community with the capabilities needed to mine the massive amounts of data available in the post genomic era. These activities also will unite Ohio's academic institutions and biotechnology industries. This project will significantly boost Ohio's competitiveness in BioScience, enhancing the industries already located within the state, creating new business opportunities, and increasing Ohio's ability to attract to new businesses. According to a 1/2009 BioOhio report: "The overall economic impact of Ohio-based bioScience is \$148.2 billion (15.7% of Ohio's total economic | Ohio University | 12,415 | 0 to 30 days | \$12,000,000 |
| Athens | Adopting Geographic Information Systems (GIS) and | economic, business, and other data that will be in one on-line location. The data will be useful for economic development purposes, such as business attraction and expansion. Local governments will also be able to use the service for other mapping, record-keeping and planning needs, such as water, sewer, electric, road networks, etc. Data important to economic development and small governments will be available for users to search, visualize, and create reports. The data will be accessible on-line with an easy user interface, and GIS data can be shared with the county engineer, planner, and other economic development agencies. The users can have the benefits of a GIS system without becoming GIS experts. Each government entity will have the ability to take advantage of the strength of GIS without all of the costs such as staffing, licensing, and hardware. We believe a web-based system can deliver the most cost-effective method of structuring and maintaining a shared GIS system | Voinovich School for Leadership and Public Affairs | 55 | 0 to 30 days | \$500,000 |
| Athens | Electronic Medical Records/Biorepository Developme | biorepository services to provide a seamless conversion of patient records to the electronic form and a source of de-identified human biological samples for the creation of new diagnostics and therapeutics for disease. The first part of the project will deploy our award-winning software to area clinics and hospitals which will eliminate paper and securely integrate all patient information (Past med history, XRAYs, Labs, etc) electronically. The second phase will provide funding for the expansion of our biorepository service which will hold de-identified human biological samples linked to the de-identified patient electronic record. This will be made available for scientific/drug companies which will greatly accelerate the development of new therapeutics and diagnostic tests that will in turn improve the lifestyle of potentially millions of people. A national source of patient information and biological samples would bring millions of dollars to the state of Ohio while creating countless jobs and improving human life. | XTELL Networks | 100 | 31 to 90 days | \$1,000,000 |
| Athens | In Ground Reservoir Repair | This project consists of repairing the finished water cleanwell, Kimes Reservoir and the replacement of the Hope Reservoir. The concrete is badly deteriorated on the cleanwell and the Kimes Reservoir. The Hope Reservoir was inspected and the leaks temporarily sealed a few years ago with the understanding it needed to be replaced | City of Athens, Division of Water and Sewer | 15 | 0 to 30 days | \$1,350,000 |
| Athens | Water Treatment Plant Security Upgrade | This project is a direct result of federal mandated vulnerability assessment. The intent of the project is to implement all of the recommendations made in the assessment. Replace telemetry system, \$300,000; Isolation valves for reservoirs, \$450,000; Stand-by power WTP, \$500,000; Three additional personnel, \$150,000; Fencing, \$50,000; Security lighting, \$25,000; Remove Athens water taps from The Plains system, \$25,000; Replace reservoir hatches, \$25,000; Engineering, \$200,000. | City of Athens Division of Water and Sewer | 15 | 0 to 30 days | \$1,725,000 |
| Athens | Curtis Street/Mulligan Road Water System Improve | This project consists of replacing the existing water pumping station at Curtis Street Reservoir and replacing 3,700 feet of 8" water line with 12" water line. The existing station was constructed in 1959 and the system is plagued with main line breaks. There are 500 connections affecting 1,000 residents | City of Athens Division of Water and Sewer | 10 | 0 to 30 days | \$800,000 |

|----------------|--|---|--|----------------|--------------------|---------------------------|
| Athens | Water Treatment Plant Telemetry System Upgrade | This project consists of retro-fitting existing telemetry cabinets with modern up to date equipment for monitoring remote water stations, plant levels, tank levels, long watch security cameras, intrusion alarms, high level and low level alarms, and complete controls of pumping systems at all remote sites. This is also part of a security improvement recommended in the vulnerability assessment. | City of Athens Division of Water and Sewer | 8 | 0 to 30 days | \$700,000 |
| Athens | WWTP Improvements, Phase I | This project includes upgrades to wet well, grit tank, primary clarifiers, aeration tanks, secondary clarifiers, control building, pump building #2, and sludge holding. | City of Athens Division of Water and Sewer | 15 | 0 to 30 days | \$2,846,000 |
| Athens | WWTP Improvements, Phase II | This project includes site work, screen building upgrade, grit tank, UV disinfection, and generator replacement. | City of Athens Division of Water and Sewer | 15 | 0 to 30 days | \$2,808,000 |
| Athens | WWTP Telemetry Upgrade (SCADA) | This project would upgrade the existing 1992 telemetry system with state of the art equipment. In addition to monitoring remote lift stations. | City of Athens Division of Water and Sewer | 5 | 0 to 30 days | \$221,000 |
| Athens | Cable Lane Sanitary Sewer Improvements | This project would replace 9,000 LF of sanitary sewer line, and 1,350 feet of storm line. The sanitary line is clay tile and allows a lot of I/I into the system. | City of Athens Division of Water and Sewer | 10 | 0 to 30 days | \$1,900,000 |
| Athens | Court Street Storm and Sanitary Sewer Improvements | This project consists of removal and replacement of a stormwater tunnel under Court Street, replace a small amount of sanitary sewer and replace 3 manholes. | City of Athens Division of Water and Sewer | 5 | 0 to 30 days | \$492,500 |
| Athens | Court Street (Washington to Union) Storm and Sanit | This project consists of replacing 150 feet of 24" storm pipe, 515 feet of 8" sanitary sewer pipe and 4 manholes in the street. | City of Athens Division of Water and Sewer | 5 | 0 to 30 days | \$364,400 |
| Athens | Carpenter/Restrooms | This will be one phase of providing restrooms updates and waits for the move in to a elementary school. This is a former high school this Foundation has ownership and attempting to renovate in part for community purposes. We have a gym/auditorium which we are currently leasing space for Global Gymnastics for the youths. The bldg was built in 1924 and has a connected bldg that was built in 1907. | Nelsonville High School Restoration Foundation, Inc | 2 | 31 to 90 days | \$40,850 |
| Athens | Washington Street Sanitary Sewer Improvements | This project consists of replacing 5 manholes, 485 feet of 8" DIP and 100 feet of 6" DIP in the street. | City of Athens Division of Water and Sewer | 5 | 0 to 30 days | \$104,300 |
| Athens | We are non-profit organization and have ownership | To remove asbestos from the portion of a former high school, so the damaged part of the building can be razed, so renovation can take place to restore the remaining of the building. | Nelsonville High School Restoration Foundation, Inc | 12 | 31 to 90 days | \$20,000 |
| Athens | Countywide Paving and Culverts Program | Resurfacing 2.82 miles of badly deteriorated townships roads and replacing a total of 32 culverts. The townships are willing to put up a 26% local cash and in-kind match in order to receive federal stimulus recovery funding. | Athens County Regional Planning Commission | 5 | 181 days or more | \$380,818 |
| Athens | Ohio University Institute for Drug Discovery | We propose the creation of a drug discovery institute, which would provide drug discovery services to academic and small biotech companies. The facility would carry out the synthesis, optimization and identification of new small molecule drugs. As this work would be carried out in an academic setting, it would provide extremely cost effective synthetic organic chemistry services to small biotech companies as well as academic researchers. We would anticipate hiring chemists (both PhD and BS/MS level) to work in the institute to complete synthetic projects. This project would be housed at Ohio University and would seek to partner with startup biotech companies in the State of Ohio. In addition to the direct generation of jobs, this institute would help sustain and create high-tech companies and the associated jobs. This institute would then help with the transition of the economy of the State of Ohio to a more high-tech knowledge-based economy. The scientists hired by the institute would receive additional training and would expect future employment in companies created in this region as well as all of Ohio with help of this institute. This | Ohio University | 5 | 0 to 30 days | \$1,265,000 |
| Athens | Upgrade for the Edwards Accelerator | We propose to upgrade the capabilities of the Edwards Accelerator Laboratory at Ohio University by replacing two out-dated and trouble-prone components of the facility. The charging belt system would be replaced by a Pelletron system which uses a charging chain (cost: \$300,000) and a 40-year-old low-intensity ion source would be replaced by a high-intensity TORIS source (cost:\$350,000). Both systems are produced by the National Electrostatics Corp. (Middleton, WI). The experimental program at the Edwards Lab involves research in basic nuclear physics, applied nuclear physics, and nanoscience. It is also used as a teaching laboratory for undergraduate and graduate physics students at Ohio University. The users include students, faculty and post-docs associated with Ohio University, and external users from national laboratories, other universities from Ohio and elsewhere, and Ohio companies. The increased capabilities and extended operation time will be of great benefit to all of these users and permit them to perform experiments not currently possible. It will assist in continuing to training of future employees of companies in Ohio at a state-of-the-art facility. | Department of Physics and Astronomy, Ohio University | 10 | 0 to 30 days | \$590,000 |
| Athens | Energy production from agricultural waste process | Two of the more pressing problems facing American farming are 1) energy costs and 2) waste treatment costs. Waste from livestock farming currently is polluting a significant number of watersheds, with notable problems in the Ohio, Mississippi and Potomac River basins. This proposal, led by Magnale (private company) integrates technologies to turn the waste problem into an energy production system using technology developed at Ohio University. The concept is to aggregate the waste from a few (or several) farms at a centrally located processing facility. The waste will be first digested in an anaerobic bioreactor to produce methane (and some CO2). The methane could be used as natural gas, or used to generate electricity for the farm. The resulting CO2 would be processed by an algal bioreactor. The digester sludge has concentrated nutrients required by the algae, including soluble nitrogen, phosphorus and potassium. Ammonia not processed in the bioreactor could be converted to hydrogen using electrolysis. The algae could be harvested for oils, animal feed and nutrients, with any remaining biomass to be fed back to the bioreactor to produce more methane in a closed system. | Ohio University | 20 | 91 to 180 days | \$9,000,000 |
| Athens | Athens County Community Gardens | CFI cultivates hope by helping people be self sufficient in their food production. We help people access the tools and education they need to grow, maintain, harvest, prepare and preserve the bounty of their gardens, as well as composting and seed saving. We also create green jobs by teaching gardeners how to sell at local farmers markets and give away free produce to agencies in need through our CFI Donation Station. We increase food security. In 2009 CFI will continue or create 9+ community vegetable gardens in both Athens and Morgan counties. Thousands of residents will have increased food security and access to fresh food as they grow themselves as well as educational opportunities on how prepare and preserve the food for use all year long. We will also create green jobs by hiring staff to increase our impact and teach youth and other gardeners how to grow and sell at local farmers markets through our Public Housing Hope Garden Summer Youth program and Edible Schoolyard 4H project in Glouster, OH. Our CFI Donation Station will provide free produce that was donated by local residents to our 9 Athens Food Pantries. Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. | Community Food Initiatives | 10 | 0 to 30 days | \$50,000 |
| Athens | Wireless Broadband for Rural Application | Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Athens | Scenic Rivers and Water Trails | Establishment of 5-7 new Water Trails on Scenic and Recreational Rivers providing Eco-tourism opportunities for multiple rural communities in Appalachia. | Ohio DNR Division of Watercraft | 12 | 0 to 30 days | \$800,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Athens | hard surface dirt roads-chip&seal | placing a hard surface, liquid emulsion & limestone, to dirt and gravel country roads approximately 45 miles in Carthage Twp. This process strengthens the road surface smooths the surface and decreases overall maintenance costs , we have in the past used \$3,000 a month in limestone alone to repair damaged road surfaces. It also improves public safety for the daily driver and emergency vehicles. Our workforce in this township must travel these roads daily commuting outside the Twp. to jobs. A better surface would decrease auto expense increase safety&life style. We believe improved roads will entice more people to live in this township thus more revenue at our level. This township is dissected by a 4-lane highway(ft.508&32) all utilities follow this route including highspeed internet.Many sites for bus/ind are available Still hard surface township roads are needed for folks to access this modern 4-lane highway. | carthage township | 5 | 0 to 30 days | \$425,000 |
| Athens | integrated training for GED/occupational training | have some ABLE funds but we are looking at losing funds this year. Ohio has taken ABLE/GED from the Dept. of Education and moved it over to the Ohio Board of Regents. Preliminary numbers show us losing funding here going into next year. We assist over 200 adult learners every year in literacy and over 75 get their GED with us each year for the past 15 years. We would like to take our ABLE program and work with our local One-Stop in a transitions program: moving adult learners/GED graduates into training and employment opportunities. We anticipate taking over 75 - 100 into either training or employment. We would like to utilize the integrated training approach and get folks from ABLE/GED into post-secondary training, apprenticeship programs and employment. We do work with a local WIB board and in Ohio it is referred to as Area 14. Our One-Stop is closely connected to many of the post-secondary schools in our region, over 5 post-secondary schools and for 10 years now we have networked with more than This project will construct a 27,650 sq.ft. facility - the Ohio University Precision Nanoscience Center (OU-PNC). The innovative, state-of-the-art center will be Southeast Ohio's first advanced material characterization and nanofabrication facility including precision microscopy and spectroscopy lab. | One-Stop, Athens County - The Work Station | 100 | 31 to 90 days | \$100,000 |
| Athens | Ohio University Precision Nanoscience Center | The OU-PNC will stimulate major R&D initiatives for economic & technological development by bringing under one roof OU's Nanoscale & Quantum Phenomena Institute (NQPI) - an internationally renowned and interdisciplinary group of scientists from 7 different OU departments. The goal of the new Nano Center is to produce transformative basic and applied research, focusing on new device development. Enormous educational benefits will also be derived, inspiring Ohio students to create a bright Ohio future. The OU-PNC will work with academic, industrial, and government laboratory partners throughout Ohio and will be dedicated to initiation of business ventures to create new high tech and high paying jobs in the region and State. | Ohio University Nanoscale & Quantum Phenomena Inst | 450 | 0 to 30 days | \$17,088,400 |
| Athens | HAPCAA NV Parking Improvement Project | This project will provide engineering, drainage and paving for approximately 2000 square feet of parking for the Nelsonville Head Start facility. This majority of the parking for this facility is graveled and located with a slope that drains towards the building. There is no drainage system under this parking lot so the majority of the water stays on the lot. When the weather has been snowy or rainy with freezing temperatures the lot becomes a solid sheet of ice. Parents and staff exiting their vehicles are forced to navigate solid ice uphill to enter the building. There have been numerous accidents because of this situation. Over 80 children are served at this site with about half of them dropped off by parents who must navigate this ice/snow/mud. This project would provide and help retain local jobs for an engineer, backhoe operator and the local asphalt company. | Hocking Athens Perry Community Action | 4 | 31 to 90 days | \$29,000 |
| Athens | Build with enhanced mud/put Appalachia to work | The project is a research concept that can address carbon sequestration for clean coal, sustainable building products, jobs for Appalachia. Imagine a product that makes the act of building regenerative for the environment - not just neutral. Imagine if that product made Ohio cool more environmentally viable. Imagine if the process put thousands of people to work in Ohio's Appalachian regions. The project is concept only right now. If not stimulus money, where would I take this concept to discuss development and jobs in Ohio in these areas. | Bass Studio Architects | 100 | 31 to 90 days | \$200,000 |
| Athens | HAPCAA NV Preschool Enrichment | This project will provide 6 weeks of preschool enrichment for 40 low income children ages three to five. Children will be transported to and from the center each day and while at the site be provided with a developmentally appropriate preschool enrichment program that focuses on literacy and math skills. Each child will also receive a breakfast and lunch while at the center as well as participate in other enrichment activities. Our research has shown that children provided with summer enrichment activities enter the public school system with a better retention of skills than those of their peers who had no summer enrichment. Many of these same children frequently come from homes that experience severe food shortages during the summer months. Food provided by this program will lessen the financial burden on parent faced with providing meals for their child in the summer that may have been previously provided by a preschool program. | Hocking Athens Perry CAA | 4 | 0 to 30 days | \$36,000 |
| Athens | HAPCAA AHS Preschool Enrichment Program | This project will provide 6 weeks of preschool enrichment for 40 low income children ages three to five. Children will be transported to and from the center each day and while at the site be provided with a developmentally appropriate preschool enrichment program that focuses on literacy and math skills. Each child will also receive a breakfast and lunch while at the center as well as participate in other enrichment activities. Our research has shown that children provided with summer enrichment activities enter the public school system with a better retention of skills than those of their peers who had no summer enrichment. Many of these same children frequently come from homes that experience severe food shortages during the summer months. | Athens | Jeff Hill Water, Sewer, and Road Replacement | Replacement of water lines, sewer lines, and road surface on E. Union Street (Jeff Hill portion) in the City of Athens. Work would be done with city staff as an in-house project, but with the paving contracted out, and all material and equipment rental procured from local businesses. Road is currently closed to traffic due to a 2002 water line rupture which destroyed large amounts of the pavement. Improvements would provide an additional means of ingress and egress to the central business district, plus upgrading extremely old and fragile utilities that serve hundreds of residents | City of Athens | 5 | 0 to 30 days | \$61,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Athens | Combustion Engine Heat Recycling | thermal efficiency of less than 27%, which means 73% or more of the fuel is wasted as heat dissipation. We propose to develop a Thermo-Electric Generator (TEG) system to harness energy wasted by an ICE from the radiator and the exhaust system. TEG is a device that produces electricity with a temperature difference, known as the Seebeck effect. Commercially available TEG devices have a thermal efficiency of about 5%. Thus, if 5% of all wasted heat by an ICE of an automobile is recovered and used to drive the vehicle through an electric motor at 80% efficiency, it would amount to 15% improvement of the vehicle fuel efficiency (e.g. 20 mpg to 23 mpg). New technology for TEG devices is on the horizon promising 20% efficiency with lower costs, which will further improve the vehicle fuel efficiency by 60% (e.g. 20 mpg to 32 mpg). This amounts to an annual fuel saving of some \$28-Billion nationwide (based on 2005 gasoline consumption data and \$2 per gallon fuel price). The project will create a new automobile component manufacturing industry with great ripple effects on closing the achievement gap. Up to 40 (each) principals, and science and mathematics teachers will be served each year and from those groups up to 40 specialized mathematics and science curriculum and instruction supervisors will be developed to lead school programs into the 21st century. Regional and state math and science content and leadership experts will prepare the program and provide the instruction. Efforts will accumulate in transformed K-12 programs that will emphasize the rigors and applications of science and mathematics, and help students develop essentials skills such as critical thinking, problem solving, collaboration, communication, creativity and innovation. Specialists (leaders) are produced to assist school districts in each Appalachian county. Specialists will arise through a teaching career ladder, and will arrange teacher time for collaboration, professional development and mentoring. Programs will improve, foundations for regional STEM schools will be constructed, school instruction will be transformed, achievement will rise. STEM inter Design and development of a range of energy recovery ventilators based on our current manufactured model. There is a large market request for a broader range of our current product. Funding will be used to develop and introduce new product sizes into the market | Ohio University | 20 | 0 to 30 days | \$1,398,000 |
| Athens | 21st Century Science and Mathematics Leadership Ac | Ohio University in partnership with Ohio Health and other hospital partners, propose to develop and implement a new telehealth system for rural Appalachia Ohio. This system will leverage the infrastructure of the Appalachian Health Information Exchange (AHIE) – a regional health information organization (RHIO) of twenty healthcare providers in Southeastern Ohio to develop an advanced integrated health information system to improve the wellness of individuals, families and communities. The creation of a regional broadband network and health provider partnership will reduce cost and present new opportunities for biomedical research. Contribute to the economic develop of the region and serve as a model for the state and nation | South East Ohio Center for Excellence in Mathematics | 360 | 91 to 180 days | \$3,000,000 |
| Athens | Energy Recovery Ventilation Units | Design and development of a range of energy recovery ventilators based on our current manufactured model. There is a large market request for a broader range of our current product. Funding will be used to develop and introduce new product sizes into the market | UltimateAir Inc. | 50 | 0 to 30 days | \$265,000 |
| Athens | Connect Appalachia Healthcare Network | Ohio University in partnership with Ohio Health and other hospital partners, propose to develop and implement a new telehealth system for rural Appalachia Ohio. This system will leverage the infrastructure of the Appalachian Health Information Exchange (AHIE) – a regional health information organization (RHIO) of twenty healthcare providers in Southeastern Ohio to develop an advanced integrated health information system to improve the wellness of individuals, families and communities. The creation of a regional broadband network and health provider partnership will reduce cost and present new opportunities for biomedical research. Contribute to the economic develop of the region and serve as a model for the state and nation | Ohio University | 250 | 31 to 90 days | \$50,000,000 |
| Athens | Water Treatment Plant Upgrade | Complete new filter system, new piping, new pumps, new switch gear and new well pumps, and a back-up generator A probability of one new well. All this will provide the residents with much improved water quality to the village and safer equipment and more reliability. In the event of power outage a new generator would provide the village water for emergency situations . | Village of Chauncey | 15 | 181 days or more | \$2,000,000 |
| Athens | Sewer Treatment Plant Upgrade | Install generating system in case of power outage, upgrade all electrical system in the sewer plant. Install new roofs at sewer plant. Plant has not been upgraded since 1967. Better service for the residents of the village, better equipment to run more efficiently, less maintenance, less downtime | Village of Chauncey | 15 | 181 days or more | \$1,000,000 |
| Athens | COPS Hiring Grant | Ohio University Police Department currently has three vacant Police Officers positions that due to the current budget are unable to fill. With the COPS Hiring Grant we will be able to fill the positions now to better protect the community and we will retain the police officer after the three years of the grant when the economy is better. Thank you. | Ohio University Police Department | 3 | 0 to 30 days | \$111,384 |
| Athens | HJob Training Program | With the WIRED grant Job Training Program for incumbent workers project about to begin, ITAAO could partner with and take advantage of this opportunity to begin what could be a successful job training program for the 29 - 32 county region of S.E. Ohio. | Information Technology Alliance of Appalachian Ohio | 350 | 0 to 30 days | \$200,000 |
| Athens | Southeastern Ohio Dislocated Worker Program | HAPCAP proposes to identify, recruit and enroll 250 dislocated workers from across southeast Ohio effected by both WARN and non WARN events into short and long term training programs in high demand fields that will lead to employment. This program will focus on linking the efforts of the Ohio Skills Bank, the State's economic development strategies and local WIA efforts in order to respond to the ongoing needs of employers. Intensive case management and supportive services will be provided to participants from initial wrap around services at time of dislocation to the skills needed to re-enter the workforce in order to guarantee that participants have all of the tools necessary to become self sufficient in the changing economy | Hocking Athens Perry Community Action | 4 | 0 to 30 days | \$1,500,000 |
| Athens | ST-5 biomass Stirling engine | A 5 hp. biomass burning Stirling engine was put into limited production in the late 1980s. This engine burns wood and agricultural waste and generates up to 3 kW and approximately 30 kW of heat energy, a combination well suited for remote home CHP (combined heat and power) use as well as alternate fuel agricultural applications, especially greenhouses and fish farms. Over the past 6 months, e-mail and phone calls from potential customers and resellers, NGOs and missionaries in North America and around the world have made inquiries about the availability of this engine and a list of "highly interested" customers has been kept. The request for funds is to utilize the distressed manufacturing infrastructure in Ohio to produce enough engine/burner/systems to seed the market and interest investors and automotive parts suppliers to join in producing a product here in Ohio for a vast global market. Specifications on the ST-5 as well as system configurations can be found at www.stirling-tech.com , under Literature, The ST-5 and Total Energy Independence | Stirling Technology, Inc. | 75 | 0 to 30 days | \$750,000 |
| Athens | Youth Leadership Development and STEM Career Path | Hocking Athens Perry Counties in a year round program focused on leadership development through community based project initiatives and career exploration. Additional program elements will include: 1) Identification of a career pathway for each youth through exploring opportunities in alternative energy, nursing and other high demand STEM fields. 2) Hands on work experience, job shadowing and employment in the career pathway of their choice. 3) Funding for training in career pathway. This program will utilize partnerships with workforce development organizations in order to achieve desired outcomes. | Hocking Athens Perry Community Action | 4 | 0 to 30 days | \$600,000 |
| Athens | Circle Drive Access Road | Project creates access road along existing city right-of-way to serve several commercial parcels, including a large parcel currently being developed to house a continuing care facility | City of Athens | 20 | 181 days or more | \$600,000 |
| Athens | Sustainable Preschool Pilot Program | Installation of commercial kitchen in existing space at an early childhood center so that children can grow and eat their own food - 11 staff and over 40 families in Athens County will benefit from this sustainable development - food security, life skills, improved health through better nutrition. Program development will ensure stability of current 11 jobs, as well as leading to the creation of at least 2 new jobs. | Sycamore Run Early Childhood Center | 11 | 0 to 30 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Athens | Philanthropic Infrastructure in Appalachian Ohio | The Foundation for Appalachian Ohio (FAO) is building lasting philanthropic infrastructure in Appalachian Ohio, in order to unleash the potential of the region's people to succeed. FAO's strategy for growing philanthropic infrastructure is based on mobilizing resources that significantly accelerate the region's educational attainment. In order to help the region lead in educational attainment in the near-term -- while building the philanthropic capacity that will help the region access opportunities over the long-term -- FAO is developing philanthropic infrastructure in the region and simultaneously implementing a strategic plan to bring FAO's internal capacity "to scale" with what is required to realize present and future opportunities. Stimulus funding will accelerate current momentum, building FAO's capacity quickly, thereby accelerating the region's ability to lead in educational attainment and access the resources it needs to succeed. | Foundation for Appalachian Ohio | 9 | 0 to 30 days | \$1,500,000 |
| Athens | Preservation of Canal | Such as Canals, Stage Coach. A village will be created to resemble an 1800's era town with appropriate shops and houses. Since Southeast Ohio is a large tourist area with a high poverty rate. It would create jobs and bring in tourist dollars adding to the economy. It would also serve as an educational adventure for the public in general. We want to make this into a tourist destination with camping, shopping and historic rides | Hocking Canal | 30 | 91 to 180 days | \$3,000,000 |
| Athens | Tinnitus Therapy Device | Tinnitus is any number of sounds that is perceived by the ear for which there is no actual sound present. There are 40-50 million people with tinnitus in the U.S. 11.4 million have debilitating tinnitus, of which almost 400,000 are veterans. Tinnitus is the second most common complaint among veterans costing the VA \$539 million in 2006, and will top \$1.1 billion in 2011. Otothera has a patent-protected device to treat tinnitus. The device is based on research that shows that using sound therapy is 80% effective. The device to be manufactured fits all the parameters to maximize tinnitus treatment and/or provide relief from hearing loss. This device would reduce the cost burden to the taxpayer and the VA by providing a treatment to replace the disability compensation. This could save over \$40 and \$21 million for 2008 and 2011, respectively. Civilian medical costs would also be reduced by improving quality of life and reducing secondary medical costs. The device would also stimulate funds, we will contract a major hearing aid manufacturer to develop existing technologies to make the device more effective and proceed with a major, multi-site, clinical trial for FDA and market launch. | Otothera LLC | 5 | 0 to 30 days | \$750,000 |
| Athens | restoration and preservation of Frost GAR Hall | The project is to restore the Frost Grand Army of the Republic hall built in 1896. The hall is in need of a new roof, paint job, tree trimming, plaster work, and other projects. You can see the project at http://book.cas.ohio.edu/~sweetygar/frostvethall.htm It is estimated that the number of jobs would be 10 or more. The number roofers, tree trimming, plasterers, painters are not know at this time. We are asking for around \$20,000 but any funds would be grateful. We currently have \$3600 raised. | Camp #108 John S. Townsend SUVCW | 10 | 31 to 90 days | \$20,000 |
| Athens | Positive Vehicle Control for Intelligent Transport | Background: The Ohio University is the worldwide unique facility that specialized in advanced communications, navigation, and surveillance (CNS) systems for advanced transportation systems. Project Description: A Positive Vehicle Control for Intelligent Transportation Systems will positively locate and track a vehicle that can be used by surface mobile platforms. The system will utilize a combination of sensors such as the Global Positioning System (GPS), inertial, infrared, Lidar, Loran, map data bases, and communications for robust position, navigation, and timing (PNT). The systems could be used in applications for Department of Transportation mobile platforms to include automotive, rail, and maritime. The system could be used as a building block for: intelligent transportation systems for the Federal Highway Administration; to enable Positive Train Control (PTC), as mandated by Congress, for the Federal Railroad Administration; as well as, for Harbor and Harbor Approach for the Department of Homeland Security. Expected Outcomes: Two prototype Positive Vehicle Control for Intelligent Transportation Systems | Ohio University | 14 | 0 to 30 days | \$2,450,000 |

| Athens | Development and implementation of accountable proj | progress by the reforms we make and the results we achieve," (Dec. 6, 2008). However, the challenges that the nation is facing is without precedent. First of all, the need for new infrastructure investments is urgent in time and immense in scale. In order to be cost-efficient, infrastructure investments, including projects to be funded by the stimulus funds, must be evaluated and prioritized. Once get started, all infrastructure projects must be monitored and evaluated and their outcome must be forecast. This research project aims at developing, testing, and implementing an advanced and practically-working control system for strategic management of large-scale multi-purpose infrastructure investments. The advanced infrastructure project management system will be effectively used for, • Risk-based prioritization of statewide infrastructure investments; • Performance monitoring and periodic evaluation of ongoing projects; • Independent project review based on similar projects in the past; and | Ohio University | 3 | 91 to 180 days | \$190,000 |
| Athens | Armory Building Renovation | The goal of this project is the renovation of the historic Armory building into government office space, a multi-modal transit center, a storage facility for government documents, and public meeting space. The Armory is situated at a key point in downtown Athens and the restoration of the building is an important connector between the Ohio University campus and the city of Athens with Court Street linking the two together. The project includes asbestos and lead paint remediation, significant repairs to the flat roof and brick masonry, new plumbing, electric, and ADA accessibility. 1700' of waterline to provide water to an area not currently served by a public water district. 5 residents could be served | City of Athens | 10 | 91 to 180 days | \$1,400,000 |
| Athens | Old Rt 33 Water Service | | Le-Ax Water District | 0 | 91 to 180 days | \$39,300 |
| Athens | Efficient Boiler Unit | Echoing Meadows Residential - a 36-bed ICFMR - serves special needs individuals. The facility's current boiler is 30 years old, and is the original boiler. This winter alone, the boiler has been down at least 5 times due to malfunctions. This is our only source of heat for the building which serves as home to the 36 residents. Since the boiler is so old, there is a great potential for continuous breakdowns as these. A major breakdown would mean relocation of the clients until repairs are done which would be rather traumatic for our special needs residents. Echoing Meadows is requesting funds to purchase a new boiler. The 94% efficient boiler would be more efficient to operate. With the new proposed model, it would cut down our gas usage and carbon footprint. Finally, the new boiler would be more cost effective to operate. | Echoing Hills Village (Echoing Meadows) | 55 | 0 to 30 days | \$31,780 |
| Athens | New Flood Wood | 4800' of water line providing service to an area currently not served by a public water district - total number of residents to be served is undetermined at this time | Le-Ax Water | 0 | 91 to 180 days | \$127,800 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Athens | Grass Run Water Service | 35,000' of water line servicing approx 30 households currently without water service from a public water district. Hiring a designer sewing snop incuoging designer accessones and clothing. This snop will employ five full-time workers. Necessary equipment and workshop will be purchased and located locally. This enterprise will help stimulate the economy in southeast Ohio with its products and in its outreach to the rest of the state(s). This will be a homegrown enterprise specializing in using Ohio-made products. | Le-Ax Water | 0 | 91 to 180 days | \$677,600 |
| Athens | Business expansion | | X 5 or Ease | 5 | 91 to 180 days | \$250,000 |
| Athens | Deferred Maintenance Infrastructure Projects | of worthy projects was prioritized but, only \$6.3M was made available in the Basic Renovation appropriations to Ohio University in HB 562. Following is a list of \$40M of important infrastructure projects which both address deferred maintenance needs and, in certain cases, have energy efficiency impacts. 1. Porter Masonry Repair - \$250,000 2. Glidden Humidification - \$500,000 3. Trisolini Structural Repair - \$50,000 4. Wilson Waterproofing - \$200,000 5. West Green Storm Sewer - \$600,000 6. Electrical/Generator Improv. - \$200,000 7. HVAC Improv. - \$400,000 8. Alden Precast Repair - \$500,000 9. Utility Bridge Repair - \$100,000 10. Fire Alarm Upgrades - \$1,500,000 11. Richland Ave. Improv. - \$850,000 12. ADA Improv. - \$125,000 13. Theater Upgrade - \$1,500,000 14. Ridges Bldgs. Repairs - \$12,000,000 15. Elevator Improv. - \$900,000 16. Bldg. Envelope Improv. - \$2,000,000 17. Roof Improv. - \$17,000,000 | Ohio University | 500 | 31 to 90 days | \$40,000,000 |
| Athens | Energy Savings Projects | targets. The University has a history since 1999 of implementing energy saving projects and utilizing debt and performance contracting as a tool. It has been calculated that a \$25M investment is needed in order for Ohio University to reach the legislation's 2014 target with energy savings capital projects paired with low cost scheduling set backs and modified target temperature. This project, if implemented, includes lighting retrofits, heating and air conditioning controls and metering devices. In order to perform the work associated with this project, it is estimated that 250 construction/trades jobs will be created/retained. In addition, professional engineering services will be required. It is estimated that approximately 20 professional engineers and architects will be involved with the design and document production associated with this project. Lastly, it is estimated that 30 jobs will be created and/or retained in relation to materials supply and manufacture for this project. | Ohio University | 300 | 31 to 90 days | \$25,000,000 |
| Athens | Funds Supplement for State Union Employees | Supplement the state's union employee's pay by providing funds for the projected ten furlough days over the next two years. If additional funds are available, also supplement the employees' lost cost of living raises, step raises, holiday pay and personal time. | State of Ohio | 35000 | 181 days or more | \$250,000,000 |
| Athens | Central Steam Distribution Lines - Renovation and | system serving 90% of the buildings on campus. Central utility plants like this are more energy efficient than stand alone building boilers. Many of the lines are aged and need repair. This \$6.5M project if implemented will save its value in energy costs in a five year period. Existing insulation will be repaired and a higher level of insulation added. Removable steam valve insulation will be added. Faulting condensation pumps and receiver tanks will be repaired and/or replaced as needed. Failed steam traps will be replaced. The number of jobs created (80) is multi-faceted. An estimated work force of 65 laborers will be needed to complete the repairs and improvements to the steamlines. This work would be conducted over a twelve month period. Professional engineering design and documentation services would comprise approximately 5 jobs. Lastly, an estimated 10 jobs would be retained/created associated with the material supply and manufacture necessary to complete this project through the sustainability of raw materials, efficient energy utilization, development of new products and equipment, as well as capacity building efforts. STIR will build capacity by training and enhancing knowledge of existing workers and creating new quality jobs in infrastructure market sectors for workers displaced due to outsourcing and current economic conditions. Products such as healable asphalt, warm asphalt, recycled materials and thermoplastics can be developed and refined for road and rail in order to decrease construction costs, while increasing the infrastructure's usable life. STIR will establish partnerships among the universities, government and private sectors. Sensors with the capability to assess the health of the existing infrastructure, improve safety and optimize infrastructure utilization can be developed for production in strategic areas in the State. Utilizing new technology and modernized design concepts such as perpetual and long life concrete pavement with improved quality control methods will extend the life of the infrastructure to 50 years | Ohio University | 80 | 31 to 90 days | \$6,500,000 |
| Athens | Sustainable Transportation Infrastructure Recovery | through the sustainability of raw materials, efficient energy utilization, development of new products and equipment, as well as capacity building efforts. STIR will build capacity by training and enhancing knowledge of existing workers and creating new quality jobs in infrastructure market sectors for workers displaced due to outsourcing and current economic conditions. Products such as healable asphalt, warm asphalt, recycled materials and thermoplastics can be developed and refined for road and rail in order to decrease construction costs, while increasing the infrastructure's usable life. STIR will establish partnerships among the universities, government and private sectors. Sensors with the capability to assess the health of the existing infrastructure, improve safety and optimize infrastructure utilization can be developed for production in strategic areas in the State. Utilizing new technology and modernized design concepts such as perpetual and long life concrete pavement with improved quality control methods will extend the life of the infrastructure to 50 years | Ohio Research Institute for Transportation and Env | 600 | 0 to 30 days | \$7,500,000 |
| Athens | SE Ohio Biotechnology | Many lead compounds for pharmaceutical research are found by examining plants. The plant family Fabaceae has yielded several promising anti-cancer compounds, including isoflavonoids from Lespedeza species. While many of the Fabaceae are widely spread over much of the USA, there are a few species which are found only in Ohio or the OH/WV/KY region. We will explore the unique phytochemicals of these regional species, and to test them for anti-tumor activities. This would immediately provide 6 high-tech jobs. Plants with promising lead compounds will then be raised in small plot agriculture, providing jobs for small farms. This would provide part time work for up to 20 agricultural workers. The plant material will be extracted and concentrated to provide sufficient material for further testing. This will provide another 4 high-tech jobs starting in year 2 of the project. Once the lead compounds have made it through preliminary testing, clinical testing can be funded through either further grants or through an IPO. Increased cultivation to provide sufficient material will lead to the creation of more agricultural and high-tech positions. | Aevum Laboratories | 15 | 31 to 90 days | \$250,000 |
| Athens | Chip and Seal | Chip and Seal of township roads | Canaan Township | 2 | 91 to 180 days | \$22,500 |
| Athens | Chip/Seal Roadways | 25 miles of township roads chip sealed. Provide work for sealing company and provide upgraded road surfaces. | Waterloo Township Trustees | 10 | 0 to 30 days | \$825,000 |
| Athens | Stimulate Stewart | date from the 1890s to 1938 and are eligible for the National Register of Historic Places. A National Register campus will inspire community pride and tourism providing opportunities for work and self-improvement in a chronically economically distressed area. While repairs and restorations that respect the historic integrity of the buildings have been accomplished since it became the Federal Valley Resource Center (a 501(c)3 non-profit organization) much more is needed. The campus is a jewel in the rough that hosts a senior club, basketball and volleyball courts, computer lab, monthly concerts/events, exercise room, thrift store, and rental spaces. This is the only place in the area offering community access to these activities and opportunities. Upgrades are needed for the heating system. Floors, walls, doors and other repairs are needed in all buildings. Computers, furniture, and fixtures need replacing. Exit lights and signs are needed to meet state code. A paid staff is also needed. | Federal Valley Resource Center | 10 | 0 to 30 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Athens | Multi-Hybrid Power Vehicles with Cost Effective an | will allow for longer trips and widespread utilization, will also eliminate the use of gasoline in light vehicles, reduce or eliminate carbon dioxide emissions, and create jobs in Green Technology. This is one of the primary foci in many federal agencies and in the proposed stimulus package. This project deals with the design and creation of prototype hybrid power distribution systems for vehicles with cost effective and durable fuel cells, long-lasting and high performance battery, and ultracapacitors. The project is based on the hybrid power distribution and fuel cell technology recently developed by Dr. Anima Bose based on several patent applications, and long-lasting Li-ion battery by Tad Malinski. The device will have ability to maintain a 60% battery charge capacity during the five hour driving period, will save 46% energy in long city driving cycle and about 7% energy in highway driving compared to similar power systems using simple on-off hysteresis controls from simulation. In addition, this system will expend two-fold life-span of Li-ion battery and decrease (about 20%) the op | Ohio University | 1,000 | 181 days or more | \$4,000,000 |
| Athens | Integrating Primary and Behavioral Health through | approximately 5,000 square miles with a total population of approximately 440,000. The proposed project would connect three regional FQHCs and their satellite clinics, which would add fourteen additional sites to an already existing network. The overall need is for increased access to behavioral health services. The objectives and outcomes are to use technology to increase access, integrate behavioral and primary health, and increase distance learning opportunities. Expected outcomes include, creating FQHC access for child psychiatry and expanding access for adult psychiatry through telepsychiatry, systematic planning for the integration of behavioral and primary health, co-locating staff to increase care management between the two regional health systems, and create a comprehensive distance learning workforce development program for the FQHCs. Additional activities include but are not limited to clinical supervision, team meetings, management purposes between main and satellite sites, additional training events outside the network, and access to special | Southern Consortium for Children | 25 | 31 to 90 days | \$500,000 |
| Athens | High Temperature PEM Fuel Cell Systems With Practi | The propose project is aimed at developing advanced power systems (LAAWV-ZUAAWV) based on high temperature (HT) PEM fuel cell technology for a variety of portable as well as small stationary power applications in existing niche and emerging industrial/commercial markets. Based on recently developed HT PEM materials, the fuel cell systems will operate with low-cost practical fuels (e.g., alcohols, methane, propane, butane, etc. yielding efficiencies as high as >80%. The two year project work will include extensive work on selection, design, evaluation and optimization of multiple fuel cell processes, components, and system prototypes. Ohio University teamed with WE Sys Technologies, Inc. (a new start-up in Boston suburb) will pursue the funding of the university facilities; WE Sys is actively exploring the opportunity to relocate to the OU Innovation Center. The project will lead to a new generation of products with enormous market potential which is projected to be >\$1B by 2015; WE Sys is committed to exploit this opportunity at a total cost of ~\$20M. Success of this project is expected to create >200 jobs and generate profitable revenue for the | Ohio University | 200 | 181 days or more | \$3,000,000 |
| Athens | Water Treatment Plant | Construction of a new water treatment plant, utilizing ion exchange process, for the city and regional customers with a total population of 9,200. The area in question also includes Hocking College. In order to be in compliance with future EPA requirements, increase the plant capability, reduce operational expenses and become more environmentally friendly, a new plant is necessary. The plant was built in the 1940's and expanded in 1985. It was originally designed to function as a surface water source plant but was converted to a groundwater source operation. Current peak plant treatment capability is 1.06 mgd; future requirements will make the plant need to produce 1.41 mgd. Based on the age and condition of the facility, current water design standards, along with new water quality goals, it is necessary for the City to consider this treatment alternative. | City of Nelsonville | 100 | 91 to 180 days | \$2,700,000 |
| Athens | Facility Energy Upgrades | Insulation upgrades to physical facility, replacement of outdated power service and lighting, installation of emergency power equipment -- The SEOVEC is a non-profit consortium of 28 public K-12 school districts serving 40,000 students and 4,000 staff in 8 counties of southeastern Ohio. We provide administrative and instructional programs and are the largest Internet service provider for schools in the region. These upgrades and new equipment will lower operational costs for participating member districts, reduce energy consumption, improve reliability of the services delivered to schools, and provide an alternative operations center for all member districts in the event a local disaster leaves their district offices unavailable. These upgrades are currently scheduled over a period of years, but use of stimulus funds would provide these improvements and energy savings now and create or retain local contractor jobs now. Local insulation and electrical contractors would be hired to make these improvements | Southeastern Ohio Voluntary Education Cooperative | 3 | 31 to 90 days | \$102,000 |
| Athens | Renewable Hybrid Distributed Power Generation for | national grid will support a distributed power generation system which has the potential of increasing reliability, efficiency and reducing costs. In addition, if the system uses renewable energy it will avoid volatile fuel prices and reduce the environmental impact compared to large power generating stations. This proposal, which is based on current research projects and partnerships at Ohio University, will create a hybrid micro power station that will become a component of a distributed power system. The project will focus on supplying power to an industrial park in Southeast Ohio. The system will use a hybrid generation system including renewable(s), wind and solar, with a proton exchange membrane fuel cell (PEMFC) as a backup system. This hybrid power generation system will be a demonstration project for cost benefit analysis, technical training (installation and operation) and an environmental impact assessment. This project will support the growth of a distributed power system that will attract businesses and create high paying jobs within | Ohio University | 3,000 | 181 days or more | \$5,000,000 |
| Athens | Athens County Emergency Food and Shelter Program | Total project cost reflects \$10,000 request and EFSP Phase 27 allocation of \$48,629. Additional funds would be allocated as follows, based on percentages as determined by our local board: \$4000 = 427 shelter nights for individuals, families and victims of domestic violence \$4000 = 3281 meals through food bank provisions, "other food" \$200 = 207 served meals purchased from food bank for children in summer reading program in zip codes 45790, 45732, 45719, 45732 \$1600 = rent and/or utility assistance to prevent homelessness for at least 6 households Due to loss of jobs and increasing demand for charitable donations, United Appeal's donations were down 23% in 2007 with an additional decrease of 9% in 2008. Requests for assistance at our partner agencies and from EFSP partner agencies are increased twofold. On top of numerous coal mine, manufacturing and retail closings over the past seven years, in the first quarter of 2009, Athens County has directly seen the loss of over 150 jobs from layoffs at O'Business Memorial Hospital, Doctors Hospital, Athens County Department of Job and Family Services, Stoddy's and Athens County employees at the Meigs County based Century Aluminum plant. | United Appeal for Athens County, Ohio | 29 | 0 to 30 days | \$10,000 |
| Athens | Tuppers Plains-Chester Water - Vanderhoof Waterlin | Vanderhoof Waterline Upgrades The project will be located in Meigs and Athens Counties and consist of approximately 11,000 feet of 12" water line extensions to the Vanderhoof Booster Station. The Vanderhoof Booster Station provides water to a large portion of the distribution system. On average, the station currently runs at approximately 65% of its maximum capacity. This project will provide a larger supply line which will increase the station capacity. The relative alignment has been established and easements have been obtained for this project. Increasing the capacity of this major artery in the distribution system is critical for the proper operation of the Tuppers Plains-Chester Water District. | Tuppers Plains-Chester Water- ME Companies, Inc. | 10 | 31 to 90 days | \$513,000 |
| Athens | general repair and upkeep on existing roads | We would like to repair some of our gravel road with better ditching and drainage, by installing new culverts and stone this job will improve the condition and safety of our roads and make it easier and cheaper to maintain for years. | Bern Township | 5 | 0 to 30 days | \$25,000 |
| Athens | Replace old road eq. | We need to replace or township work truck so we can repair and work on township roads. This truck would be used for snow and ice removal as well as maintaining 30 miles of gravel road. | Bern Township | 1 | 0 to 30 days | \$40,000 |

|----------------|--|---|--|----------------|--------------------|---------------------------|
| Athens | Renewable hybrid power generation for Appalachian | technology in Appalachian Ohio. The pilot project will be demonstrated in an industrial park in one county. This project deals with the design and creation of prototype power generation systems utilizing combined solar and wind as the primary energy collectors with PEMFC as a backup power. The backup power will be run on pure hydrogen generated from water electrolysis and reforming hydrocarbon using solar and wind during low load demand from the grid. This development is based on fuel cell research and patented (filed patent application) technology by the applicant. Most components in the hybrid system are commercially available although further R&D will be done to improve the efficiency. Project will be lead by Anima Bose of Ohio University with a team of scientists and engineers who will be hired in the initial phase. The team will analyze carbon footprint in the environment. She will also setup a training program to create a skilled work force to install and to maintain the technology. In parallel, two-year college curriculum will be developed in renewable energy. Two miles of new backstop on a road starting to break down as well as about 15000 gallons of chip in seal and 500-600 tons of stone to repair roads that are breaking up and becoming difficult to travel. | Ohio University | 100 | 181 days or more | \$5,000,000 |
| Athens | Road Repair and upgrade | such as RFID, wireless sensor networking, and ad hoc data mining technologies. Wireless technologies can be a good enabler for better health care service delivery to the people living in a rural or remote area by reducing time and space constraints. This research will be concentrating on the development of foundational technologies to the wireless health care service system and how to create more service value to patients as well as health care service providers with such a large investment towards wireless environments in the health care. Expected outcomes are as follows: • Stream data mining and spatiotemporal data mining in convergence of location-aware devices, wireless communications, and geographic information system functionalities to support sustainable operations of remote (or rural) area health care services • Stochastic or game-theoretic optimizations for the design of a real-time load balancing protocol for information access and distribution between service recipients and service providers in a geographically commercializing them. A licensing model provides access to a much larger technology base. It also allows the Institute to more closely match the technologies to the interests of investors and the life science industry. For this model to be successful, the Institute must gather feedback from life science investors and potential industry partners on the technologies being considered. The review board will consist of members from the university, venture capital community, and biotech industry. The involvement of investors and industry also helps with business planning and strategy and executive recruitment as well as opening the door to sponsored research. The licensed technologies will be developed by first assigning an EIR and building a team. Three EIRs will be hired and assigned 4-6 opportunities. Within 36 months one of the companies will be a viable startup company that would be able to hire the EIR full time as the CEO. The company can seek funding from a variety of sources including SBIR proposals as well as funding from early stage investors. | Barn township | 12 | 0 to 30 days | \$50,000 |
| Athens | Operational computing models for rural area health | communications industry. The devices will be triggered by short pulses of laser irradiation at different energies or colors. The unique features of the molecule-based nanoscale device permit it to convert visible light into an electronic signal on an ultrafast timescale, about 100-1000 faster than with traditional conversion devices. This improvement in conversion efficiency will increase the speed of optical communication networks and enhance their utility in a variety of new areas. The samples which provide this reactivity have been developed at Ohio University and are covered by existing patents in which the sole inventor is an employee of Ohio University. Expected outcomes include the formation of a STEM company, the hiring of new workers (2), the generation of new intellectual property and the fabrication of devices. Such a venture will greatly influence the economy of the city of Athens and Athens county located in Appalachian region of Ohio. This endeavor will to expansion including the hiring of additional workers. The installation of water meters and tertiary filters would serve the entire system and address OPEA recommendations | Ohio University | 60 | 0 to 30 days | \$450,000 |
| Athens | Life Science Commercialization | The Village of Albany experiences I&I that inundates there WWTP during wet conditions. This project would provide an EQ tank and appurtenances to slow the peak flows and prevent future washouts at the WWTP. The EPA has notified the Village that they need to address the I&I in there system as it does affect the operation of the WWTP and if not fixed will result in violations of there NPDES permit. The project will replace the existing Albany water lines that have reached there useful life and result in about 25-30% loss due to leaks. This creates a hardship on the Village because they purchase water from the Le Ax water district and on a regular basis are billed for more water than they sell to there customers. This project will address the water loss and also get them financially stable in there water fund. | Edison Biotechnology Institute | 250 | 181 days or more | \$5,000,000 |
| Athens | Picosecond Isomerization in Photochromic Complexes | The funds will be spent on the removal of 1 older sanitary sewer life station and replace with new one that has increased capacity and lower maintenance costs. This will affect the major employer in the area, Hocking College and the only hotel in the area, the Inn at Hocking College, the vocational school with an enrollment of over 200 students, as well as over 75 homes served | Ohio University | 5 | 181 days or more | \$600,000 |
| Athens | 2008 Capital Improvement Project (Water Meters) | The new water treatment plant will include iron filtration, ion exchange softening followed by disinfection. Ohio EPA, SW District office has strongly urged the City to replace the aging facility as soon as possible thus avoiding any failure to produce water | Village of Albany Mayor's Office | 3 | 31 to 90 days | \$363,675 |
| Athens | Village of Albany WWTP Improvements | ITAAO is a non-profit corporation serving the IT industry in 29 Appalachian Ohio counties. ITAAO is dedicated to the growth of regional IT companies by promoting investment and job creation in the IT industry ITAAO has created a plan to direct broadband investment into these 29 counties that will provide the following benefits Invest \$24-330 million in regional infrastructure Deliver Broadband Service to a 14,000 sq mile region Promote small business development and expansion Create 700-900 jobs Highlights of ITAAO Plan: We are shovel ready. Our region contains experienced provider partners positioned to rapidly deploy broadband service through the last mile. Efficient-We will take advantage of existing and planned regional backbone infrastructure to ensure the greatest amount of investment focuses on the neglected last mile solution. Last Mile Focus-Our plan funds the deployment of service directly to the door of rural residents. |----------------|--|--|---|----------------|--------------------|---------------------------|
| Athens | Schoonover Center for Communication | Communication at Ohio University. This facility will bring together into one location the five schools in the Scripps College, currently housed in nine different locations across campus, as well as the WOUB Center for Public Media. The building project has funds committed from a combination of private giving, including a \$7.5 million lead gift from alumnus Steve Schoonover, and State Capital dollars in the amount of \$25.6 million. This facility will be the primary home for what is one of the nation's top colleges of communication, providing state of the art space and technology for the college's almost 90 faculty, 100 staff, and 2750 students. Asbestos abatement on the site of the old Baker University Student Center is beginning and the RFP to hire the firm to plan the construction is ready to be issued. University planners estimate that the project will create 400 jobs in the construction/trade industry over a two year period, as well as 40 jobs in design and engineering in planning and documenting the project, and 60 jobs would be created or maintained in materials man | Scripps College of Communication | 500 | 0 to 30 days | \$8,500,000 |
| Athens | Wastewater Treatment Plant | The City's wastewater plant permit expires in 3 years and will not then meet EPA discharge limits associated with ammonia and phosphorus. The plant was constructed in 1956, but Ohio EPA will impose more stringent Total Maximum Daily Loads requirements on our facility, which discharges into the Hocking River, a watershed tributary of the Ohio River. It was upgraded in 1987 to an average design flow rate of 550 mgd and a peak daily flow of 1.8 mgd. A new plant, with current technology, will allow for a peak daily flow of 3.0 mgd. The plant currently averages a daily flow of 725 mgd and a peak flow of 1.9 mgd. As the community and businesses grow, the plant will not be able to meet daily requirements or EPA mandates and will have to be closed. | City of Nelsonville | 200 | 91 to 180 days | \$2,520,000 |
| Athens | Water System Meter Replacement | The City of Nelsonville is located in an area where the water utility is the largest. It includes the installation of approximately 1,500 remote read meters and appurtenances to replace the existing outdated meters. The district experiences high water losses. The replacement of the water meters will help to eliminate human error when reading the meters and allow the meters to be read in a shorter period of time, thus eliminating water loss at the meters and enabling the district to better evaluate where other losses are present. The District has approximately 1,500 customers who serves approximately 4,500 people. | Sunday Creek Valley Water District | 10 | 31 to 90 days | \$350,000 |
| Athens | Municipal and Industrial Wastewater Remediation | Environmental Protection Energy in water streams. Current facilities available in municipal wastewater treatment plants can't handle the streams from all industries as they can never pass the capacity of the facility. Ohio University has developed a portable new technology that allows the simultaneous removal of ammonia, urea, and dissolved metals in wastewater streams. The technology is compatible with renewable energy sources (wind, solar). The energy required is significantly lower than current technologies, it offers portability, and is economically feasible. The market applications include: municipal wastewater, cruise ships, industrial waste, airplanes, etc. Outcomes: 1. Construction of large-scale prototype, 2. Spin out of Ohio companies based on Ohio University's intellectual property, 3. Demonstration of the technology, 4. New wastewater treatment unit, 5. Job generation in the wastewater treatment facilities; and 6. Job retention in different industrial process. | Ohio University | 100 | 0 to 30 days | \$1,200,000 |
| Athens | Engineering Kids Birthday Parties Scholars Program | an alarming rate for several decades. This may be caused from intimidation that these subjects pose to primary and secondary education students. Educating these students (K-12th grade) on the social and economic benefits of pursuing careers in science and technology through fun, unique, and interactive parties is an excellent opportunity. Typically, educational outreach programs teach students who are already interested in science and engineering. These engineering parties "Scholars Program" are a surprise and capture attention from children who have never expressed interest in science and math before. In addition, these parties, organized by volunteering college students at local universities and/or colleges, help parents plan and operate educational and fun parties. Outcomes: 1. Implementation of the "Engineering Birthday Parties Scholars Program", 2. Generation of scholarships in Engineering and Science for undergraduate students, 3. Job creation in the educational sector, and 4. Reach out to at least 1,000- K-12 students per year per program. | Ohio University | 50 | 0 to 30 days | \$500,000 |
| Athens | Ammonia Fuel Automobile | A multidisciplinary program is proposed to demonstrate the use of an ammonia fuel engine (AFE) for vehicle applications. The AFE is integrated by an ammonia electrolytic cell (Ohio University's patented technology) in combination with a proton exchange membrane fuel cell to power an electric motor. This novel patented and unique technology shows the potential to overcome the limitations of the use of fuel cells for transportation purposes: hydrogen storage and fuel flexibility. Furthermore, it will provide low cost of fuel for automobile applications (under \$1 per gallon), high efficiency (60 mpg), and minimization of pollution (no CO2 generation). Outcomes: 1. Construction of ammonia powered automobile, 2. Spin out of Ohio companies based on Ohio University's intellectual property, 3. Demonstration of the technology for automobile applications, and 4. Job generation in the automobile industry. | Ohio University | 10000 | 0 to 30 days | \$1,200,000 |
| Athens | The Center for Excellence in Alternative Fuels | Demand will continue to peak. Furthermore, current methods of power generation are based on the combustion of hydrocarbons, which causes environmental problems. Within this context, it is mandatory to search for the next-generation fuels, which can provide safe, secure, and sustainable future. To answer this problem, a group of researchers from OHIO, have formed a multidisciplinary team that combines the fields of engineering, electrochemistry, and nanotechnology to develop a Center for Excellence in Alternative Fuels that will focus on the synthesis of fuels and petrochemicals by the direct use of renewable energy sources such as wind and solar energy and diverse feedstock (coal, wastewater, biomass, petcoke, etc). Outcomes of the center include: 1. Development of high-class facilities for the synthesis of alternative fuels, 2. Spin out of Ohio companies based on Ohio University's intellectual property, 3. Alternative routes for the synthesis of fuels for mobile and stationary distributed power applications, and 4. Prototypes and demonstrations for the different synthesized fuels. | Ohio University | 300 | 91 to 180 days | \$12,500,000 |
| Athens | Acid Mine Wastewater Remediation | of the Appalachian region. The problem originates at abandoned coal mines and related facilities that were operating in the region throughout much of the 19th and 20th centuries. Ohio University has developed a new technology that allows the remediation of the AMD water with the aid of small quantities of coal and the advantage of simultaneous cogeneration of hydrogen. The technology also has the potential of reducing fresh water consumption in coal power plants. The economic implications of this approach make the technology attractive. The proposed system is portable and allows the generation of a clean fuel (hydrogen), which will also, represent carbon credits for CO2 mitigation. Outcomes: 1. Construction of large-scale prototype, 2. Spin-out of Ohio companies based on Ohio University's intellectual property, 3. Demonstration of the technology, 4. New wastewater treatment for AMD, and 5. Job generation in the coal mining and power generation industry. | Ohio University | 100 | 31 to 90 days | \$1,200,000 |
| Athens | GIS Initiative for southeast Ohio | This project would create a two-year timeframe for the employment of one person, working with the already-existing Southeast Ohio GIS Center (information at http://www.athensconservancy.org), to update, refine and expand GIS resources for southeast Ohio. The resource person would perform mapping that is relevant for general public use and for general map creation, but also for environment monitoring and control, species assessment and protection, recreational planning, and other public service purposes. | Athens Conservancy, Athens Trails, others | 1 | 0 to 30 days | \$70,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Athens | Trail Construction | This project would create a new long-distance recreational hiking trail, extending from the Buckeye Trail / North County Trail / American Discovery Trail in northern Athens County, down to Lake Hope State Park in Vinton County, for a distance of about 28 hiking miles. This would be a Federal Class III trail, though some segments may be more appropriately classified as Class II. A full plan is being developed for this project. The rights-of-way are mostly already public land, including the Wayne National Forest, Trimble Community Forest, and Zaleski State Forest, but also Sunday Creek Coal Company land (now the Sunday Creek Wildlife Area) and AEP Perry Ridge tract, as well as a few very small private tracts. This would connect Ohio's most major trail system with other important trails in southeast Ohio. It is hoped that this trail could someday be extended down through REMA (Raccoon Ecological Management Area) down to OH-32, and perhaps even eventually to the Shawnee State Forest. | Athens Conservancy, Athens Trails, others | 4 | 0 to 30 days | \$100,000 |
| Athens | Invasive Exotic Plant Control | This project would be sponsored by the Athens Conservancy, a 501 (c) (3) land trust based in Athens, Ohio. It would be for invasive exotic plant control and removal in southeast Ohio. First focus would be on the Strouds Run State Park area, then other public areas. Plants to be removed would include multiflora rose, garlic mustard, Asian stilt grass, Asian bittersweet, Eurasian privet, various bush honeysuckles, autumn olive, burning bush, and others. Except for the project leader, this project can hire relatively unskilled people, and would provide part-time employment for a period of one year. | Athens Conservancy, Athens Trails, others | 5 | 0 to 30 days | \$70,000 |
| Athens | Ohio GAP | Ohio to date has not participated in the Federal Gap Assessment Program, initiated by the U.S. Geological Survey. This is a program to assess land status and protection and its relationship to species status and protection of both plants and animals, not concentrating on threatened and endangered, but on the full range of species. This would hire two people to create a GAP staff for Ohio, to coordinate this project between government, universities, and nonprofits. | Athens Conservancy, Athens Trails, others | 2 | 0 to 30 days | \$80,000 |
| Athens | Kids on Campus | and Athens City Schools focusing on literacy and wellness of school-aged children during the summer. We request summer 2009 funding to serve 150 low-income children and create/retain 65 summer jobs. The Kids on Campus program provides: structured, small group activities led by professional tutors and trained counsellors focusing on 1) reading skills, arts, technology and science activities; 2) recreational activities including swimming, recreation/sports, and field trips; and 3) nutrition (two meals and one snack daily). This evidence-based summer program measures outcomes using Dynamic Indicators of Basic Early Literacy Skills (DIBELS), and parental surveys. The most recent survey (conducted by the Voinovich School) reported improved reading skills (76%), preparedness for the upcoming school year (97%), and satisfaction (100%). The Kids on Campus Summer program is successful in enhancing 1st through 6th grade children's readiness for the challenges of school and life through positive social/recreational, emotional, and nutritional experiences. | Ohio University Kids on Campus | 65 | 31 to 90 days | \$195,000 |
| Athens | Rural Appalachian Youth Adventure Program | Offered in partnership with community service agencies in the southeastern Ohio region, the Rural Appalachian Youth Adventure Program (RAYAP) will involve the Recreation Studies program and the Campus Recreation Outdoor Pursuits program at Ohio University. The RAYAP will provide part-time summer employment opportunities for students and full-time employment for one administrative staff member (total employed: 7). The goals of the RAYAP are: (1) to serve the southeastern Ohio's youth, and 2) to fulfill the university's mission of community service. The specific aims of the RAYAP are: (1) to address health-related issues among rural Appalachian youth in southeastern Ohio, notably, lack of fitness and the high prevalence of obesity and associated disorders; and (2) to provide a learning laboratory for students in the Recreation Studies program (both graduate and undergraduate) by providing them with practical opportunities to engage in the design, implementation, and evaluation of adventure programs for area youth. | Ohio University | 7 | 91 to 180 days | \$555,000 |
| Athens | Development of a New Bachelor's Degree in Integrat | for higher education: graduate more people, keep them in Ohio after graduation, and attract more talent to Ohio so that we become a net importer of people with college degrees, and not a net exporter as we are today (University System of Ohio, 2008). The proposed Bachelor of Science in Integrated Sport Sciences is strategically congruent with the first two goals. Ohio University's five regional campuses "provide access to quality learning opportunities for both traditional and non-traditional students, broadening the University experience to those who cannot attend the Athens campus" (Ohio University Regional Higher Education, 2009). This proposal calls for the creation of a Bachelor of Science in Integrated Sport Sciences to be offered at Ohio University Regional Campuses. The four-year degree program will broaden the educational options for location-bounded students. Graduates of the program will probably remain in the region to find employment in fitness clubs, local parks and recreation departments, etc. | School of Recreation and Sport Sciences, Ohio Univ | 2 | 181 days or more | \$150,000 |
| Athens | Athletic Trainers as Rural Healthcare Providers | eight counties in southeastern Ohio where this project will operate, all but two contain federally-designated Medically Underserved Areas and all but two contain federally-designated Health Professional Shortage Areas. The goal of this project is to improve access to healthcare in these rural communities by placing licensed athletic trainers (ATs) in 14 high schools throughout southeastern OH. ATs provide in-house diagnostic and rehabilitation services at a fixed-cost and function as the point of first contact for individuals who may require further medical assistance. ATs can prevent needless or unwarranted medical visits, thus reducing the financial burden on the family, school system, insurance providers, and the overall health care system. Annually, this project will improve the healthcare access of 5,500 high school student-athletes, their parents, coaches, students, and others in 14 southeastern Ohio communities. Graduates will be uniquely prepared to enter the rural healthcare workforce. We are requesting funding to help defray the cost of the AT's stipend and faculty salaries. The project will be a model for other rural communities. | Ohio University - School of RSS - Division of Athl | 16 | 91 to 180 days | \$267,509 |
| Athens | Vanderhoof Waterline Upgrades | The Vanderhoof Booster Station provides water to a large portion of the distribution system. On average, the station currently runs at approximately 80% of its maximum capacity. This project will provide a larger supply line which will increase the station capacity. The waterline alignment has been established and easements have been obtained for this project. Increasing the capacity of this major artery in the distribution system is critical for the proper operation of the Tupper Plains-Chester Water District. | Tupper Plains-Chester Water District | 10 | 31 to 90 days | \$513,000 |
| Athens | Ohio Rural Wastewater Improvement Project | counties. Funds will be provided for the physical assessment of existing rural home sites, review of need (preference given to owner-occupied and low income applicants). Local private sector contractors will be used for assessment, system design and installation. Local health departments will issue the permits and provide inspection with existing staff and programming. (There is no intention to create additional health department jobs, though this may occur). Operation and maintenance of the systems fall to the homeowners, who are direct beneficiaries of the improvements. THE PROJECT CREATES AND RETAINS SMALL BUSINESS PRIVATE SECTOR JOBS, MAKES SUBSTANTIAL PUBLIC HEALTH GAINS, COMPLIANCE WITH CLEAN WATER ACT STANDARDS, EMPOWERS LOCAL HOMEOWNERS, INCREASES INDIVIDUAL HOME AND HOME SITE VALUES, AND IMPROVES RURAL COMMUNITIES AESTHETICS AND HEALTH STATUS. The focus is to create private sector jobs and have long-term community benefits. The needs are very great, and the benefits are substantial for a sector of our State that is often overlooked. This can | Athens City-County Health Department | 400 | 0 to 30 days | \$5,000,000 |
| Athens | Emergency Generator for Low-Income Elderly Housing | A recent power outage that spanned more than 48 hours during an ice storm, at a HUD subsidized housing project exclusively for the elderly, brought to light the fact that an emergency back up generator system was desperately needed. We manage 7 low-incor | Silverheels Property Management, LLC | 0 | 31 to 90 days | \$495,000 |

|----------------|--|--|---------------------------------------|----------------|--------------------|---------------------------|
| Athens | A New Route to Biofuel Production--Degradation of | this reason, the conversion of cellulose to polyols such as small sugars and eventually ethanol is attracting tremendous attention. The traditional degradation of cellulose includes chemical and enzymatic hydrolysis. However, these processes are green (e.g. using strong acids) and suffer from low degradation yield and long processing time. Thereby new routes with fast degradation rate and cleaner processing are in need. We are proposing a protocol to degrade cellulose, in which cellulose is fragmented after conversion to ions followed by ionic dissociation. The advantages of this protocol are that the dissociation occurs very fast (in seconds) and it does not need any acid or enzyme. In a preliminary experiment of testing the sample of maltoheptaose, a linear polysaccharide structurally similar to cellulose, we have observed its ease and fast dissociation into maltohexaose, maltopentaose and maltotetraose by successive loss of glucoses. We have also collected these small saccharide products and are currently examining this protocol to larger biopolymers including cellulose | Ohio University | 5 | 0 to 30 days | \$450,000 |
| Athens | Water Works (local bottled spring water to be used | The existing Buchtel water trough east of Nelsonville(from 1930's WPA project) produces 40-million gallons per year. Bottling only 1-shift at night (so as not to get in anybody's way) could tap 10-million gallons. 40,000 college students and others drink a lot of water here. If used as a public trust, money could be then funneled into high-tech energy/jobs projects. Spring water as a public trust could be used as a model for whole state and nation. It follows the old formula of "The Wealth of Nations"--- that natural resources coupled with manpower to transform them into usable products equals wealth. Even in America's present bad economic climate, people still want good clean water, and this particular site has proven itself for 100 years. Rather than make one CEO very rich or spend several million buck on fancy development, the states can use the Forestry Department, Army Corps of Engineers and drill a ground tap to eliminate EPA restrictions. Bottle gallon and 5-gallon jugs. | Athens Archives | 3 | 31 to 90 days | \$100,000 |
| Athens | Rural Appalachian Scholars Program (RASP) | (electronic health records, telehealth, and accessible distance education). The funds will be used to establish a "Rural Appalachian Scholars Program (RASP)," a scholars program that stipends fellowships for education and training, who, in return, will work for 3 years & practice in medically underserved SEO Appalachian regions. The approach will be an interdisciplinary clinical education model between nursing and medical students at Ohio University, with clinical placements throughout the region. The anticipated benefits to southeastern Appalachian Ohio will be improved healthcare jobs, access to care, quality of care using a cost-effective team-based approach, more time college degrees, use of electronic medical records (EMR), and access to care via telemedicine. Impact will be felt in 34 counties in addition, the project has potential to create 1000 new nursing jobs over two years (2009-2011), 60 new Family Nurse Practitioners (2009-2011), 250 new Doctors of Osteopathy, 25 new nurse educators that will teach nursing in AD, BSN, MSN programs | Ohio University | 1335 | 91 to 180 days | \$6,000,000 |
| Athens | Educational and research opportunities in genomics | from secondary and post-secondary institutions. The opportunities will include direct experience using state-of-the-art techniques in molecular biology. Individual student projects derived from the proposed research will serve as the basis for undergraduate or graduate thesis/dissertation work and/or summer research. These experiences will help contribute to increasing available human resources in the sciences. This project will also provide avenues for students from underrepresented minority groups to become intimately involved in bench-level research, give serious consideration to a career in science or teaching, and help diversify the scientific workforce involved in biological research. This collaborative project between a traditionally research intensive institution (Ohio University) and a predominantly undergraduate institution (Youngstown State University) will establish a reciprocal, beneficial relationship that will significantly enhance the educational and research activities at both schools as well as provide current and future economic benefits to Ohio | Ohio University | 2 | 91 to 180 days | \$750,000 |
| Athens | Little Rosie's Asian Creations | Who is Little Rosie? Little Rosie's LLC is company that brings to market products that reflect the culture and taste that I developed as a second generation Filipino American. The relationship I've had with my mother has inspired me to bring to the market place the unique. We currently have 2 salad dressings on the market but plan to expand on the popularity of many of my mother's creations. What are Little Rosie's Dressings? Following a recipe created by my mother and used within our family for years, we've established a specialty foods line of Salad Dressings based on this recipe. Briefly the flavors could be described as 'vinaigrettes with an Asian twist'. These products are positioned as a uniquely branded and flavored product intended for sale through gourmet retailers, grocery stores, direct to the consumer and the internet. | Little Rosie's LLC | 10 | 0 to 30 days | \$250,000 |
| Athens | Proteomics Infrastructure at Ohio University to Di | Little Rosie's is produced and warehoused at ACEnet (Appalachian Center for Economic Networks) www.acenetworks.org located in Athens, Ohio. By building on our established customer base and the relationships we have developed through our work with ACEnet, we are creating a new market for individuals in the United States and is predicted to affect 300 million people worldwide by 2025. The pathogenesis of type 2 diabetes is not completely understood, but over 50% of individuals with type 2 diabetes are obese. Obesity-induced type 2 diabetes typically involves a progression from a normal phenotype through an insulin resistant/hyperinsulinemic state (pre-diabetes) to overt diabetes. We believe that serum contains distinct protein profiles indicative of stage and severity of diabetes and pre-diabetes. To identify and validate protein biomarkers that can distinguish between these conditions, serum from individual humans and mice with normal glucose tolerance (NGT), impaired glucose tolerance (IGT), or type 2 diabetes will be studied by matrix-assisted laser desorption/ionization mass spectrometry (MALDI-MS) and two-dimensional gel-electrophoresis (2D GEL). | Ohio University | 7 | 0 to 30 days | \$2,250,000 |
| Athens | Energy Conservation Public Service Announcements a | These studies will provide insight about the onset and progression of type 2 diabetes and may yield important validated targets for disease diagnosis or drug discovery. Produce 12 video spots and accompanying print materials promoting simple ways for people to conserve energy. Produce a series of video blogs documenting the preparation, planting, maintenance and harvesting of a community garden plot. Energy conservation spots will be suitable for broadcast throughout the state of Ohio and will be made available to all major stations at no cost. Video record of creating a community garden plot will be incorporated into a website and print materials which provides resources to beginning and experienced gardeners. The site will allow for user generated content to share information. A final summary video will be created using material from throughout the year. This will be made available online and provided to television stations at no cost to promote community gardening. Print material will be made available via local libraries and media outlets. Effectiveness will be measured by number of videos distributed, airtime/frequency and information requests. Support of media production in Athens, Ohio will be an additional benefit as local talent has opportunities to remain in Ohio to do media work. | Ohio University | 6 | 0 to 30 days | \$112,000 |
| Athens | Community Service Center Solar Project | Installation of a ~204kW photovoltaic solar energy system on the roof of our multi purpose service center in Glouster, Ohio. This system would reduce energy consumption for all tenants in the building (Community action, Village Police and Medical Health Clinic) thus reducing their utility costs that could be applied to providing services to low income residents in the community | Hocking.Athens.Perry Community Action | 5 | 181 days or more | \$930,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Athens | Community Revitalization Project | Buildings and homes need demolished and new structures built to replace early nineteenth hundreds structures. New structures built to attract new community members and retain existing. New bridges, streets, and a new railroad station are to be built along with other critical infrastructure. A main piece of the project is the acquisition of land to build a warehouse and commerce park to create and attract jobs to this area to replace coal mining jobs that were lost. | Trimbale Township Revitalization Program | 1000 | 181 days or more | \$25,000,000 |
| Athens | Experimental Research Station in Southeast Ohio | deficiencies in facilities for research using large mammals. The first phase of development targeted infrastructure for animal holding and procedure rooms for feeding studies. Completed in January 2009, its \$500K cost was shared by several Colleges across the Athens campus as well as the OU Office of Research. Equipping the building with scientific instrumentation continues as a cooperative effort between OU faculty, National Science Foundation and Ohio Board of Reagents (\$725K). Existing funds are inadequate for the second phase of development, namely, the construction of a building dedicated to locomotion studies. Therefore, we are requesting \$500K in economic stimulus funds which would include infrastructure development (new building with integrated runway) and 2 years of funding for support personnel to manage the facility. Participating faculty have a long history of involving students in research, many of whom go on to pursue careers in health-related fields and biomedical science research. Hence, we view OUIERS as a scientific recruitment and training resource provide state and national leadership in fostering technology and translational research in the area of technology to enhance communication for people with disabilities. Cutting-edge work in four areas is ripe for enhanced technology transfer possibilities to be based in Ohio: (1) augmentative communication technology to assist with verbal communication for those who cannot speak intelligibly, or at all; (2) eye-tracking technology to enhance cognitive and language assessment of people with stroke and brain injury; (3) cochlear implant technology to enable deaf individuals to perceive music and speech; and (4) level sound processing to improve the clarity of speech for the hearing impaired. Funding is required to enable: (1) development of prototype systems in each of the four key areas and (2) complete field testing of new methods, an essential step in developing new technologies for technology transfer in this important area. Funding will position us to build business opportunities in Ohio and enhance federal funding to further support technology transfer in this important area. | Ohio University | 20 | 0 to 30 days | \$500,000 |
| Athens | Technology to enhance communication for people wit | living and quality of life of older blind people. The Ohio University Respite Volunteer Program is dedicated to enhancing quality of life for adults with disabilities living at home. It helps older blind persons and caregivers, providing services that are otherwise costly or not available, improving quality of life/social interest, and enhancing independence for older adults, many of whom have multiple disabilities in addition to blindness but have the capacity to live more fully. Such programs enrich students' professionalism and leadership opportunities, provide much-needed services to families, and enhance university-community relationships. Funding is requested to: train staff and students at a minimum of eight institutions to develop and run such programs; enhance relationships with the Ohio Independent Living Council and Area Agencies on Aging; and ensure sustainability. The OUI program has been active for 12 years, with a 98% success rate in terms of quality assessment. It is run by students, with supervision by faculty members with expertise in gerontology. The purpose is to enhance job opportunities and cross-institutional collaboration among Ohio's CSD academic programs, which are among the very strongest in the nation. Ohio is home to expertise in highly specialized areas of CSD across these institutions, six of which offer research-intensive PhD programs. There are dire national and state shortages of PhD-educated CSD professionals to educate students in speech-language pathology, audiology, and hearing, speech and language sciences. A strategic action-focused cross-institutional collaboration program will lead to cost savings for research and teaching/mentoring of PhD-level personnel, increased federal funding through joint grant-writing projects, enhanced clinical services, and improved evidence to support clinical practice with people of all ages who have life-impacting disabilities. The program is ideal for Ohioans who have lost jobs in other sectors and are eligible for advanced graduate study. One year of funding is requested to recruit and re-tool at least 10 displaced workers for PhD study, develop web-disorders throughout the state. Ohio's academic programs in this area are among the very strongest in the nation. Nine of these programs offer MA-level programs in speech-language pathology (SLP), one of the nation's fastest-growing occupations and a profession in which there is a dire shortage of clinicians in Ohio. There were about 100 school-based SLP openings alone last year in Ohio and shortages continue to worsen in areas of private practice, community-based, medical, rehabilitative, and gerontological SLP. Consequences of not addressing this shortage include: failure to address life-impacting communication disorders in people of all ages, from birth through old age; excessive caseloads; decreased availability and quality of services; and increased numbers of staff without appropriate certification and education. The profession is ideal for Ohioans who have lost jobs in other sectors and are eligible for graduate study. Funding would enable training of 40 dislocated workers as SLPs in Ohio within this two-year period. | Ohio University | 30 | 31 to 90 days | \$197,600 |
| Athens | State-wide expansion of free in-home adult respite | model using an Android robot, called Ever, which was invented in a Korean national research institute—KITECH. The most unique feature of the Ever is an ability of doing human-like emotional movement in facial tissues and micro-muscles. To convert such technological uniqueness into social value, we are attempting to take an innovative step into looking for a social service with contents aiming at a theme in society, along with development of coherent technologies. Examples can be found in health care, art performance, education, human companion, and so on. In collaboration with KITECH, the PI at Ohio University will concentrate on the development of computing models for services with the Ever. To this end, Ever will be installed at Ohio University this year. KITECH prepares for committing a research fund to this joint project. The other important goal of this project is to give a birth to a startup company in the form of joint venture between KITECH and participating parties. The company will be set in the United States, which means it will create more jobs through this research alumni. Current society is undergoing a rapid change in every aspect. As such, societal demand in educational training changes from traditional issues. In this sense, higher education in the State of Ohio and the United States sees an important challenge; to address the most demand from society and economy and to provide pertaining education service. Unlike investments in other areas, education requires huge amount of budget and returns its reward over time directly or indirectly. Thus, it is imperative that a higher education system should have a capability of reading on changing educational demand in future society and re-allocating its resources and staff more effectively, thereby giving additional insight into student and society that gives insight into a higher education system. To this end, this research will investigate optimal allocation model of enormous educational budget and investments in terms of balancing supply and demand in educational service by developing and Inquire acreage to set up a facility to receive any type of wood fiber which could be stick wood, wood chips (from tree trimmers), storm damaged trees from this area and surrounding areas to keep it out of landfills. This is to generate suppleable material for alternative fuels projects including ethanol, biopolygen, coal biomass to liquids and biomass to liquids. In creating this facility we would create approximately 25 new jobs to start this would be spread among transportation, yard work and office help. For the Transportation at least 5 new tractor trailer with open top vans to haul the materials. we would need 2 wood Grinders approx. 2 Loaders, 1 set of scales, other supporting equipment. We would hire Approximately 2 office worker approximately 10 truck drivers 1 forester , approximately 12 maintenance and facility workers Once the facility is up and running we would be self-sufficient. | Ohio University | 2 | 31 to 90 days | \$157,400 |
| Athens | Enhancing job opportunities and related federal fu | model using an Android robot, called Ever, which was invented in a Korean national research institute—KITECH. The most unique feature of the Ever is an ability of doing human-like emotional movement in facial tissues and micro-muscles. To convert such technological uniqueness into social value, we are attempting to take an innovative step into looking for a social service with contents aiming at a theme in society, along with development of coherent technologies. Examples can be found in health care, art performance, education, human companion, and so on. In collaboration with KITECH, the PI at Ohio University will concentrate on the development of computing models for services with the Ever. To this end, Ever will be installed at Ohio University this year. KITECH prepares for committing a research fund to this joint project. The other important goal of this project is to give a birth to a startup company in the form of joint venture between KITECH and participating parties. The company will be set in the United States, which means it will create more jobs through this research alumni. Current society is undergoing a rapid change in every aspect. As such, societal demand in educational training changes from traditional issues. In this sense, higher education in the State of Ohio and the United States sees an important challenge; to address the most demand from society and economy and to provide pertaining education service. Unlike investments in other areas, education requires huge amount of budget and returns its reward over time directly or indirectly. Thus, it is imperative that a higher education system should have a capability of reading on changing educational demand in future society and re-allocating its resources and staff more effectively, thereby giving additional insight into student and society that gives insight into a higher education system. To this end, this research will investigate optimal allocation model of enormous educational budget and investments in terms of balancing supply and demand in educational service by developing and Inquire acreage to set up a facility to receive any type of wood fiber which could be stick wood, wood chips (from tree trimmers), storm damaged trees from this area and surrounding areas to keep it out of landfills. This is to generate suppleable material for alternative fuels projects including ethanol, biopolygen, coal biomass to liquids and biomass to liquids. In creating this facility we would create approximately 25 new jobs to start this would be spread among transportation, yard work and office help. For the Transportation at least 5 new tractor trailer with open top vans to haul the materials. we would need 2 wood Grinders approx. 2 Loaders, 1 set of scales, other supporting equipment. We would hire Approximately 2 office worker approximately 10 truck drivers 1 forester , approximately 12 maintenance and facility workers Once the facility is up and running we would be self-sufficient. | Ohio University | 15 | 31 to 90 days | \$279,600 |
| Athens | Retraining dislocated workers to address the state | model using an Android robot, called Ever, which was invented in a Korean national research institute—KITECH. The most unique feature of the Ever is an ability of doing human-like emotional movement in facial tissues and micro-muscles. To convert such technological uniqueness into social value, we are attempting to take an innovative step into looking for a social service with contents aiming at a theme in society, along with development of coherent technologies. Examples can be found in health care, art performance, education, human companion, and so on. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Athens | Connecting with our Global Future: Africa | In order to stimulate excellent education for global preparedness we would like to hire educational specialists- instructors- in the fields of African history, African sports and development, and support staff to work on incorporating these fields into the Ohio K-12 curriculum and teacher training. While we have built one of the nation's strongest African Studies Programs, ranked as one of the ten best in the country, hiring an additional historian of Africa would allow us to move more of this important global information into Ohio schools. We would target school teachers particularly with the resulting curriculum and it would assist in our remaining competitive. We would also like to have an African sports specialist to increase the unique value of our program and again intensify our competitiveness. The additional support staff would allow us to improve our technological outreach to K-12 teachers and the community with African arts, history, languages and other exciting features of a changing world. | African Studies Program and Institute for the Afri | 4 | 31 to 90 days | \$1,000,000 |
| Athens | Enhanced bio-fuel production from photosynthetic c | Algae-based fuel production and waste remediation processes have drawn significant attention and investment in the last year. Microalgae is seen as the ideal biofuel source, because of relatively high productivity per unit land mass and minimal competition with food-use crops. However, when considering the problem of producing fuels from algae, even algae is very inefficient at converting solar energy to oils. Photosynthetic conversion efficiencies in nature averages about 1%. The low conversion efficiency is a significant impediment to market breakthrough for algal-based biofuels. This project aims to design hybrid living organisms with enhanced photosynthetic efficiency and increased growth speed by utilizing the nanotechnology approach. In particular, this project proposes the use of nanoparticles that are highly efficient at absorbing photons (tiny antennas) to create hybrid photosynthetic organism. It is theorized that this approach may allow us to make a breakthrough in bio-fuel production technology. | Ohio University | 10 | 0 to 30 days | \$1,500,000 |
| Athens | Internet-Based Problem Solving Instruction | Problem-solving skills are essential when using distance learning technologies and solving clinical problems in health care settings. The goal of this proposed project is to develop, implement and evaluate a problem solving skills curriculum designed to teach communication disorders students, professionals and pre-professionals how to solve clinical problems related to speech, language pathology and audiology. Specific outcomes will be: problem identification and definition, b) generation and evaluation of solutions, c) solution action planning and d) solution implementation. Innovative methodological techniques will include: a) interactive video production, ETC and will be delivered in an online format accessible from anywhere with a computer connected to the Internet. The project will employ video production personnel, internet programmers, actors, and a focus group of health professionals to identify key scenarios for instruction. | Ohio University | 3000 | 91 to 180 days | \$55,750 |
| Athens | Creation of an employment/training dual program fo | The objective of this project is to create a new form of practical training in an academic environment (Ohio University, Athens) to individuals with a B. Sc. in chemistry or biochemistry (or equivalent) who would like to join local industries as laboratory technicians. This training would be a full-time, 1 - 3 year employment; the employee would be incorporated into a research group, participate in all its activities, and perform practical laboratory tasks, such as organic synthesis and standard protocols associated with biochemical assays. The employee would be supervised by the professor/ senior staff members; he/she is expected to make rapid progress towards efficiency and independence. By the end of the program, he/she will be a candidate of choice for local chemical industries, which will be invited to identify and interview candidates on a regular basis. This program is taking place in Swiss and German universities and has been remarkably successful. It would create well-paid Ohio jobs, be beneficial to the employees, to the affiliated research group, to the university and to local Ohioan industries, which could hire highly competent and experienced technicians. | Ohio University, Department of Chemistry and Bioch | 15 | 0 to 30 days | \$750,000 |
| Athens | Southeastern Ohio Science, Technology and Sustainab | museum for STEM educational outreach to rural underserved Ohio. Audiences will be engaged by concept-driven interactive exhibit stations featuring topics including biotic responses to global climate change, sustainable energy, human health and the environment, and prospective careers in science and technology. The facility will partner with K-12 schools and green businesses from Athens, Meigs, Vinton, Hocking, Jackson and surrounding counties, as well as neighboring areas in West Virginia and northern Kentucky. The proposed facility is the only science museum within 1.5 hours of Ohio University, and will advance 21st century education systems in dimensions including K-12 and public initiatives, undergraduate courses, and faculty/graduate studies. Completion of building renovation will provide jobs to local contractors and other workers particularly hard hit by the economic downturn, and the finished product will promote tourism in the region as well as serving to showcase the university and local communities by uniting them in forward-thinking technology-drive Project involves the milling/rehab/repaving of city streets serving as major traffic arteries, with an approximate length of 3,800 linear feet. The street improvements will contribute to improved traffic flow and reduced maintenance requirements. | Ohio University | 45 | 0 to 30 days | \$7,250,000 |
| Athens | Street Rehab | Project involves the milling/rehab/repaving of city streets serving as major traffic arteries, with an approximate length of 3,800 linear feet. The street improvements will contribute to improved traffic flow and reduced maintenance requirements. | City of Nelsonville | 50 | 91 to 180 days | \$1,850,000 |
| Athens | OHIO UGRIP PROGRAM -DEVELOPING A 21ST CENTURY EDUC | OHIO UGRIP PROGRAM In June of 2007, Ohio University approved the Center for Ecology and Evolutionary Biology (OCEES). The mission of the center is to advance the knowledge and training in ecology and evolutionary biology (EEB) through an interdisciplinary learning and research community at Ohio University by integrating cutting edge science and technology with undergraduate and graduate education. The Center's core philosophy is that the frontiers of EEB advance by integrating diverse conceptual and methodological approaches from different academic disciplines and separate units (currently 6 science departments) within the University. This approach stimulates new areas of research and collaboration and increases interchange among diverse faculty and students. Accordingly, the best preparation we can provide our students is formal engagement in research training in the modern science of integrative biology. The center is in the process of initiating programs to increase research immersion in graduate and undergraduate students and to expand science awareness on campus and Demolish and remove two flooded houses in Gloucester Ohio that were purchased through delinquent tax auction so said properties may be donated to the city of Gloucester for use as community use such as a garden project. I would like to complete this project using local labor as this is a extremely high poverty stricken area. | Ohio Center for Ecology & Evolutionary Studies | 42 | 0 to 30 days | \$1,040,000 |
| Athens | Glouster Flood Properties | Demolish and remove two flooded houses in Gloucester Ohio that were purchased through delinquent tax auction so said properties may be donated to the city of Gloucester for use as community use such as a garden project. I would like to complete this project using local labor as this is a extremely high poverty stricken area. | Individual | 3 | 0 to 30 days | \$7,500 |
| Athens | Central Chilled Water Expansion Project | plants that use underground distribution piping to deliver chilled water to remote buildings on a campus during the cooling season. Currently, Ohio University utilizes central chilled water for 21 of its 201 campus buildings. Ohio University has very recently completed a Chilled Water Master Plan for its main Athens Campus that maps out the strategies needed to complete a central chilled water system for the campus. The next phase for implementation of this project involves completing the main chilled water loop; adding 2-2500 ton chillers to the loop and installing underground take-offs to multiple buildings for a total cost of \$33,900,000. The study associated with the chilled water master plan, in comparison with remaining with the status quo, indicates that when the chilled water system is completed, a carbon footprint savings of over 10,000 tons of CO2 per year and a decrease of energy use by 38% will be realized. | Ohio University | 440 | 31 to 90 days | \$33,900,000 |
| Athens | Support hire | Train, hire and outfit one new employee for newly created support and sales telecommute position. Position responsible for web hosting customer light technical support and sales via email, IM and incoming phone. Grant covers all equipment, training and compensation for one year with expected retention after grant period. This position will allow us (Calico Hosting LLC's partners) to focus on building better infrastructure and growing our reseller base while our new employee handles support and sales triage. Our business model has been profitable from day one, but we need a little boost to take it to the next level and to empower us to employ more people in the Appalachian Ohio region | Calico Hosting LLC | 1 | 0 to 30 days | \$20,000.00 |

| Athens | Outpatient Treatment | healthcare clinical treatment services to residents of four socio-economically disadvantaged counties: Athens, Hocking, Vinton and Meigs. The consumers this project focuses on have no means to pay for treatment for their addiction pathologies and are at high risk for being unemployed due to the impact of their diagnosis on all of their life domains. Dually diagnosed consumers suffering from mental illness and abuse/abuse and dependency on alcohol and other drugs are unable to work without the support of individual, group and casemanagement services for them and their families. Left untreated they become involved in the justice system due to their inability to function as productive members of society. Working with the local courts HRS plans to provide these consumers and their families with the tools they need by removing barriers to working and living as law abiding citizens. The court mandated sanctions connected to lack of compliance, along with regular interface between treatment and court personnel, produces outcomes that more than double the ability to m | Health Recovery Services, Inc. | 10 | 31 to 90 days | 375,000 |
| Athens | Athens Police Mobile Data System | visual force multiplier and enable officers to more effectively and efficiently protect the city. This system will reduce redundant handwritten reports that are manually entered multiple times. Instead, reports, citations, and other data are entered directly by the officers into the data systems. This system will also provide instant information to officers which provides a safer environment for officers and citizens alike. The mobile office environment will enable officers to perform 90% of their office tasks from the street saving trips to the office which makes for a more fuel efficient fleet. The mobile system provides interoperability to state, & local data systems which enable officers to submit & access OIBRS & LEADS information directly from the vehicle. By providing the police department with a more efficient means of operation this system will free up unnecessary funds spent on wasted time. By freeing up these funds the department will be able to retain current staffing levels without needing to layoff support personnel or officers. | Athens Police Department | 4 | 31 to 90 days | 98,000.00 |
| Athens | Roman F Warmke | design as well as other tech related duties. Stimulus money would help us hire an administrative assistant to help with routine duties as well as court more sales to bring more money into Appalachia. | Eden Marketing LLC | 10 | 91 to 180 days | 24000 |
| Auglaize | Dispatch | We have operated for over 7 years and are ready to take "the next step" to grow the business but lack the resources to make the additional hire. Our website is http://www.edenmarketing.com/ and upgrade security for the entire facility. We will install dispatch furniture to accommodate new radio consoles We are going to install 2 variable speed ductless air-conditioning systems one for the dispatch room and the other one for the equipment room that houses all the computer, radio, telephone, and other systems that operate the facility. We will install new electromechanical operator control panels in Dispatch and the Jail. The system shows doors open that are locked and doors locked that are open which creates a safety issue. These panels operate the electric control locks on doors in and out of the facility, jail cell doors, visitation doors, and prisoner transport entrance doors. The five intake cell doors will be retrofitted with food chutes to increase security when feeding inmates. The estimated cost for this project is \$225,000. The project is ready to proceed and can be completed in three months once funding is available. | Auglaize County Sheriff's Office | 10 | 31 to 90 days | \$225,000 |
| Auglaize | Wireless Broadband Internet Service | This Wireless Broadband Internet Service offering would target potential customers who are in unserved and under served rural areas who do not have access to Broadband Internet services. The funds would be used to purchase and install Wireless Broadband Radio equipment in the New Knoxville, Ohio (Auglaize County) area on either an existing or a new tower depending on the best coverage area obtainable. The funds would also be used to provide customer premise radio equipment in order to provide the radio link between the customer and the base station radios. The service would be provided in the 700 Mhz licensed wireless radio band. NKTelco Inc. already owns the 700 Mhz license for Auglaize and surrounding counties. Unlike other radio services, the 700 Mhz frequency is "not line of sight". Thus, NKTelco Inc will be able to provide service to customers who were previously not able to obtain Broadband service. Approximately 50 to 75 new customers could initially be provided service with the \$85,000 stimulus funds. A total buildout, serving in excess of 350 customers would be possible utilizing the estimated | NKTelco Inc. | 3 | 31 to 90 days | \$85,000 |
| Auglaize | JTDMH Electronic Medical Records Project | To significantly reduce costs and medical errors the current paper records will be changed to digital form and will mesh with the new desired format Medicare/Medicade reporting and billing system. It will also provide much more information to the patient and their family, as well as the various medical and support personnel and programs. Will significantly impact on the main hospital facility as well as all out-patient sites and practices. | Joint Township District Memorial Hospital | 60 | 0 to 30 days | \$2,750,000 |
| Auglaize | Labaratory Upgrade | years. Current AIA standards are more than twice that of the existing space. This department is a major revenue-producing department and currently performs at the top 25th percentile with productivity benchmarks. To support the employees and the function of this department, a major renovation is needed. The current space does not adequately support the information technology requirements now and certainly will not in the rapidly changing future. The current space does not allow for conference/employee break area. And as mentioned, the space does not allow for productivity improvements needed to sustain a quality, efficient, revenue-producing unit. Of primary importance is the need to complete this unit of expansion and update to allow for the future Ambulatory Surgery Unit expansion which is vital to the hospital and area's ability to reduce costs. JTDMH is a Medicare Dependent Hospital with more than 60% of our patients utilizing The current surgery space requires addressing a grossly inadequate heating and ventilation system. This is not merely a physical comfort issue for surgeons and employees, but a compliance issue with the life-safety code. | Joint Township District Memorial Hospital | 75 | 31 to 90 days | \$5,183,850 |
| Auglaize | JTDMH Surgery and Support Update | Decreasing our surgery rooms by one and using the space to efficiently address supplies and equipment storage is a function of the new design. A new surgery room is designed that will provide three (3) equal, "right-sized" rooms, again supporting the flexibility of efficient scheduling in any room. The final major need that will be addressed is expanding the sterile instrument and supply processing area. All of this, as well as focusing on a family waiting area, are incorporated into our upgraded surgery design space. The ability to provide significantly more out-patient services with this upgrade will further reduce significantly the costs of services to the patient and will be reflected in the reduced medicare costs desired by the federal government and private insurers. | Joint Township District Memorial Hospital | 60 | 31 to 90 days | \$3,087,700 |

|----------------|--|---|---|----------------|--------------------|---------------------------|
| Auglaize | JTDMH Ambulatory Surgery Unit | <p>our average daily census greater than 10, the ten-bed Ambulatory Surgery Unit does not support the quick turn-around time needed for beds to keep customers satisfied, both patients and surgeons, and maintain an efficient flow of a very expense-driven yet revenue-producing unit. On several days, the volume and type of specialty dictates patients being moved frequently to accommodate the processes of submission, procedure, post procedure and discharge.</p> <p>Our primary ambulatory specialty is endoscopy. Expanding from one endoscopy room, to a two-room endoscopy suite will differentiate our service for surgeons, employees and patients further supporting growth, quality and long term efficiency.</p> <p>Not only will we be adding rooms, from 10 to 25, but if successful with this request for support, our physical space will provide the ability to dramatically change our current model of specific space for each stage of recovery to one generalized space. This will allow us to reduce cost to our patients, insurance services and Medicare (which currently accounts for more than 60% of our patients).</p> | Joint Township District Memorial Hospital | 75 | 31 to 90 days | \$4,901,600 |
| Auglaize | JTDMH Outpatient Rehabilitation Center | <p>For the ease of patient use and accessibility we have combined our current and future space needs of our growing number of outpatients needing physical, occupational and speech therapy services. It also includes a fitness center as well as incorporating wellness coaching and integrated services. This new center will be a comprehensive center for all ages.</p> <p>This integrated medical fitness center will be able to improve patients' health before the onset of an illness and provide rehabilitative and therapy services after recovery. Our center will include exercise equipment, heated therapy pool, gym, running and walking track.</p> <p>Physicians (for our Cardiac Rehabilitation patients), nurses, personal trainers, instructors, dietitians and therapists will work together to meet individual's needs as well as improve the overall health of the community. This center will reduce cost to patients, insurers and Medicare.</p> | Joint Township District Memorial Hospital | 60 | 31 to 90 days | \$3,520,000 |
| Auglaize | JTDMH Inpatient Rooms and Support Center | <p>Renovation on the first floor will tie the existing lobby to the new community center. This will accommodate areas such as: surgery waiting, volunteers, improved segregation of patient and staff circulation, cashiers office, PAT/Surgery consult suite and related reconfiguration of Information services and administrative offices to accommodate additional space needs.</p> <p>The new addition is designed to see the expansion of patient beds to private beds by expanding the 2nd and 3rd floors where more operationally efficient nursing units can be developed. This would include a new 6-bed Critical Care Nursing unit on the 2nd floor with two additional acuity-adjustable to accommodate peaks in Critical Care census. The remaining 2nd floor would house a 22 bed Acute Care Nursing Unit. All upgrades and expansions will assist JTDMH in improving it quality and cost of care.</p> | Joint Township District Memorial Hospital | 140 | 31 to 90 days | \$27,090,000 |
| Auglaize | Electric Car Conversion Shop | Starting an electric car conversion company. This entails taking existing automobiles and removing the internal combustion engine and replacing with an electric motor to power the drive train. This is a low cost alternative to buying the high priced all electric vehicles currently available and implementing existing vehicles for new purposes. This is a start-up company and hopefully will keep growing sustainably by itself and keep adding jobs in the future | DC Conversions | 5 | 0 to 30 days | \$250,000 |
| Auglaize | St. Marys City Schools District Administrative Off | <p>Construction of a 6000 square foot office building to house district administrative staff. Attached to this building will be a 4800 square foot storage building for district equipment, materials, and motor vehicles.</p> <p>This pre-engineered steel structure will be located at the site of our district's new combination high school/middle school that is currently under construction.</p> <p>Cost includes 3 overhead insulated garage doors with openers, windows, double entry door, stone accent on the office side, storage/shop area is fully insulated, 6" reinforced concrete floor in storage/shop area, floor covering for office area, all HVAC, electric, plumbing, painting, landscaping, restrooms, parking area, and all soft costs associated with this project.</p> <p>Thank you for your serious consideration of our shovel ready project</p> | St. Marys City Schools | 25 | 31 to 90 days | \$750,000 |
| Auglaize | St. Marys City Schools Athletic Complex | <p>Construction of 6 tennis courts.</p> <p>Construction of new 4340 seat football/soccer stadium to replace the existing WPA project stadium, to include synthetic sports turf combination football/soccer field.</p> <p>Construction of a 10 lane all weather track.</p> <p>Construction of a field house on site for locker rooms, team meeting room, training room, concessions, storage, public toilets.</p> <p>Estimated total project cost noted above includes all soft costs, hard costs, and all sound systems, lighting, scoreboards, and other amenities needed for these facilities.</p> <p>Thank you for your serious review of our shovel ready project.</p> | St. Marys City Schools | 100 | 31 to 90 days | \$7,928,196 |
| Auglaize | CR# 33A Roadway Improvements | <p>is the main connector between the cities of Wapakoneta and St. Marys and is one of the highest traveled roadways under county maintenance within Auglaize County. The pavement meets all federal design standards with no additional right-of-way. There will be no excavation planned for the project and therefore, no environmental review is necessary.</p> <p>Plans from the last reconstruction project 15 years ago are being revised and will be complete within the next 30 days. If the project were approved, the bidding and award date could be completed prior to the opening of the asphalt plants in the area in April.</p> <p>The jobs creation/retention not only focuses on the actual crews needed to construct the project but also impacts the local stone quarry and asphalt emulsion suppliers due to the fact the project requires 20,000 tons of hotmix to be applied. This project has been submitted for the past several years for federal aid secondary highways funds, but due to the lack of dollars, has not been funded</p> | Auglaize County | 30 | 31 to 90 days | \$1,868,110 |
| Auglaize | Dist 7, PID 77490, AUG/SHE SR 362 0.00/1.52 | Resurfacing | Ohio Department of Transportation | 13.7 | 31 to 90 days | \$476,250 |
| Auglaize | Auglaize River Enhancement Project | <p>agricultural ground in Auglaize and Allen Counties. A petition, under Section 1515 of the Ohio Revised Code has been filed with the Joint Board of Soil and Water Conservation Districts and Joint Boards of County Commissioners in Auglaize and Allen Counties, for the removal of logjams and debris throughout a 60 mile stretch of the Auglaize River, and tributaries. The petition begins near the Village of Westminster in Allen County and then travels downstream through the City of Wapakoneta, then north to the northern boundary of Allen County. A logjam inventory has been completed which clearly shows the recent continual flooding experienced along the river is directly related to the debris buildup within the stream. Plans have been completed and a permit from the Army Corp of Engineers has been obtained. The project may only create an estimated 6 jobs, but the project will last well over one year. At least 90% of project estimate will be labor related. The DRC requires maintenance of the improvement to address future debris buildup, thus creating future job</p> | Auglaize County | 6 | 31 to 90 days | \$600,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Auglaize | Skip Baughman Stadium Renovation | Renovation of the lower level of the current Memorial High School building (the 1923 section) to accommodate home, visitors, and officials locker rooms. Construct home and visitors grandstands with seating for 4340. Install synthetic sports turf combination football/soccer field. Included would be electrical, lighting, communications, and all soft costs | St. Marys City Schools | 75 | 181 days or more | \$3,571,885 |
| Auglaize | Auglaize County Airport Terminal and SRE Storage B | The existing terminal building and snow removal equipment storage building are inadequate and a new facility needs to be constructed. This project will provide for site grading, drainage, utility construction, airside access construction, and construction of the new buildings. New building Construction: Terminal Building: 8,450 square feet Snow Removal Equipment Building: 3,500 square feet | Auglaize County Airport Authority | 100 | 91 to 180 days | \$1,068,000 |
| Auglaize | Dist 7, PID 83717, AUG Guide Sign Replacement | Signing | Ohio Department of Transportation | 12 | 31 to 90 days | \$400,000 |
| Auglaize | Dist 7, PID 83717, AUG Guide Sign Replacement | Signing | Ohio Department of Transportation | 12 | 31 to 90 days | \$400,000 |
| Auglaize | Dist 7, PID 83717, AUG Guide Sign Replacement | Signing | Ohio Department of Transportation | 12 | 31 to 90 days | \$400,000 |
| Auglaize | Village of Cridersville WWTP Rehabilitation Incl. | WWTP in response to frequent permit violations. Permit violations are being driven by increased flows which are a result of steady growth, acceptance of sewerage from newly developed subdivisions (one of which is in the next county-Allen), and I/I from an aging collection system. Project will upgrade treatment train No. 2 with to meet current design standards. Project consists of replacing obsolete blowers and installing fine bubble diffusers. Current blowers are no longer made and some repair parts are no longer supplied. Clarifier internals will be replaced to improve process. Solids handling will be upgraded to take on additional loads. Improvements consist of new aerated digestion and storage, belt filter press, and building to house press and additional sludge storage. New blowers will increase energy efficiency. Solids Press will reduce water content thus reducing handling cost and fuel usage. Project goals: Eliminate permit violations. Improve plant efficiency. Reduce electrical costs. Reduce maintenance costs. Reduce fuel usage in hauling solids from plant | Floyd Browne Group | 25 | 91 to 180 days | \$1,544,430 |
| Auglaize | Keeping Ohio's Youth Driving and their Parents Wor | providing a stipend to pay half the cost of their driver's education for their child, two benefits emerge. Teens are still able to learn to drive so they can find work and become employed. To obtain the stipend money, parents will attend a weekly job Club focusing on: Self-Presentation, Resume, Cover letters, Identify job leads, Filling out paper and computer applications, Interviewing, Taped Interview Critique, Interview day, Reasonable Accommodations, Thank you notes, Letters, Contacting employers by phone, Transportation, Networking, Internet Social Networking, Using the One Stop. Using the internet and newspaper. Each week will conclude with sharing of job search tips, how to overcome job search frustration, and job leads. Outcome - 120 students can take drivers education at half cost, \$150. X (30) of these can then find employment. 120 parents will learn new job search techniques so that X (30) of them will find a new job. One new driver's education teacher will be hired, one current employee can retain their job, and one career consultant can increase their hours Upgrade of the City of St. Marys electrical transmission system. Includes additional 69KV electrical service lines and elimination of 2400V lines. System update will assure major electrical power capacity to serve our industrial customers and the general public. Project provides for additional growth and retention in the industrial sector. | Capabilities, Inc. | 62 | 0 to 30 days | \$30,000 |
| Auglaize | City of St. Marys Electrical System upgrade | Upgrade of the City of St. Marys electrical transmission system. Includes additional 69KV electrical service lines and elimination of 2400V lines. System update will assure major electrical power capacity to serve our industrial customers and the general public. Project provides for additional growth and retention in the industrial sector. | City of St. Marys | 500 | 31 to 90 days | \$5,000,000 |
| Auglaize | Minster West Business Park Development | Development of a business park for the community. Development would consist of installation of utilities and approximately 700 linear feet of road way. Development of the 11 acre business park is designed to attract new business into the community and thus creating jobs | Village of Minster | 150 | 181 days or more | \$175,000 |
| Auglaize | Minster Wastewater Treatment Plant Expansion | Renovation and expansion of the village's waste water treatment plant. Current plant is sized at 1.05 mgd and is currently undersized for existing flow. New plant design will be 2.5 mgd per day and will allow the treatment plant to process waste stream from the Dannon Company as well as allow them to expand their production by 30% over the next three to four year. | Village of Minster, Ohio | 300 | 181 days or more | \$8,000,000 |
| Auglaize | Minster Wellfield Development | Addition of three new drinking water wells as well as reconstruction of 2,700 linear feet of roadways, which will include installation of utilities, curb/gutter, sidewalks, street lighting, traffic signalization and new asphalt. Street is the main street through the communities business district and the project is designed to enhance the central business district and encourage redevelopment of the area. The goal of this project is to create approximately 50 new jobs as a result of the project. | Village of Minster, Ohio | 300 | 181 days or more | \$2,000,000 |
| Auglaize | Fourth Street Reconstruction | Installation of 1800 linear feet of 12" sanitary force main. Current force main is over 50 years old and is at capacity. New force main will allow for growth in the communities' business district, with the goal of creating new investment and jobs. | Village of Minster, Ohio | 50 | 181 days or more | \$1,797,000 |
| Auglaize | Miami-Erie Canal Sanitary Force Main Project | Installation of 1800 linear feet of 12" sanitary force main. Current force main is over 50 years old and is at capacity. New force main will allow for growth in the communities' business district, with the goal of creating new investment and jobs. | Village of Minster, Ohio | 25 | 91 to 180 days | \$86,000 |
| Auglaize | Osgood Sanitary Sewer Collection and Treatment Sys | The construction of a sanitary sewer collection system and a sanitary sewer treatment system for the village of Osgood. The treatment plant will also treat the wastewater from the villages of North Star and Yorkshire. The project will consists of a lagoon type treatment system, one pump station, 25,000 LF of gravity sanitary sewer collection pipe, and 25,000 LF of force main piping | Fanning/Howey Civil Engineering Division | 5 | 0 to 30 days | \$1,500,000 |
| Auglaize | New 2.5 MGD Water Treatment Facility | New 2.5 MGD Water Treatment Plant, new connecting transmission main (20"). Lift station and force main for waste removal. Completion of wellfields to supply the facility We would like to take our business to a national/ global level | City of Wapakoneta | 30 | 0 to 30 days | \$6,500,000 |
| Auglaize | GeneSys_Gaming | Currently we specialize in service and custom PC builds of high end computers for our local customer base. With stimulus funds we would be able to increase our customer base via the internet and move into new computer sales. By taking the business global we could increase sales of new equipment and create from 30 to 50 jobs in our local area utilizing the current labor pool of unemployed workers. Stimulus funds would be used for website design and publication (outsourced locally), inventory increases, and purchase of either a new or existing facility. Expected Outcome: Creation of 30 or more technology jobs in Eastern Auglaize County within our company. Retention of 8 to 10 skilled Trades jobs in Eastern Auglaize County via construction. Retention of 10 to 20 jobs via increased freight. Decreasing municipal dependence on state grants by increasing tax revenues. | GeneSys_Gaming | 30 | 0 to 30 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-----------------------------------|----------------|--------------------|---------------------------|
| Auglaize | GeneSys_Gaming Hydrogen Cell | Currently we have 4 volunteer employees who are in the process of creating an on demand hydrogen gas generator that has a multitude of foreseeable applications such as: For use in vehicles as a supplement to fossil fuels. For use in homes as a substitute for natural gas or propane heat. For use in small engines for generation of electricity. With stimulus funding we would be able to double our efforts in this endeavor and come up with an affordable more refined product than our current prototype. With mass production we see an eventual need for up to 20 employees solely dedicated to assembling this product. | GeneSys_Gaming | 20 | 0 to 30 days | \$500,000 |
| Auglaize | Alternative Energy | We are currently an industrial battery supplier. We are wanting to expand our business scope to include alternative options, i.e: solar, wind, with industrial battery back-up. Reviewing the process of manufacturing solar panels and installation into business/home environments. Currently working with an organization to establish business relationships to qualify a companies kwh usage power, and reviewing process or equipment to significantly lower those cost. | Warehouse Equipment Products | 8 | 91 to 180 days | \$1,000,000 |
| Auglaize | asphalt resurfacing program | Asphalt resurfacing of 7 different streets including grinding as needed - total of 17,000 lin. feet or 3.2 miles. estimated cost of \$650,000 | Village of New Bremen | 15 | 31 to 90 days | \$650,000 |
| Auglaize | Bremen and Werheim Street Reconstruction | The project will consist of the complete reconstruction of 550 feet of Bremen Street and 300 feet of Werheim Street including pavement, curbs and sidewalks. The project shall include the replacement of under-sized storm sewer which serves a large portion of the Village. | Village of New Knoxville | 10 | 91 to 180 days | \$530,600 |
| Auglaize | German and Bielefeld Street Reconstruction Project | The project will consist of the complete reconstruction of 450 feet of German Street and 270 feet of Bielefeld Street including pavement, curbs and sidewalks. The project shall include the replacement of under-sized and failing storm sewer which serves a large portion of the Village. The German Street portion would include the replacement of 1000 feet storm sewer while the Bielefeld Street portion would include 327 feet of storm sewer. | Village of New Knoxville | 10 | 91 to 180 days | \$427,000 |
| Auglaize | Bremen, Mill, and East Street Asphalt Resurfacing | The project would consist of the resurfacing of a portion of E. Bremen Street, N. Mill Street and East Street totaling 1,390 length of street. | Village of New Knoxville | 6 | 91 to 180 days | \$75,000 |
| Auglaize | Village of New Knoxville Electric Transmission Line | The project would consist of the construction of an 4.5 mile 69KV electric transmission line as well as the construction of 69KV/12.47 KV substation. The substation would consist of two 69KV SF6 breakers, each feeding a 5 MVA power transformer to step the voltage down from 69KV to 12.47KV | Village of New Knoxville | 30 | 181 days or more | \$8,500,000 |
| Auglaize | Street Reconstruction Project | Reconstruction of 1400 lineal feet of Canal, Cherry & Oak Streets with new storm and sanitary sewers and new street base, curbs and sidewalks. | Village of New Bremen | 12 | 31 to 90 days | \$750,000 |
| Auglaize | Water Treatment Plant Standby Generator | New 800 KW standby generator for municipal water treatment plant. This would replace a 40 year old obsolete, unreliable, and inadequate portable generator to support the water treatment plant in case of power outage. Electrical connections to the existing water treatment plant are included in the cost. | Village of New Bremen | 2 | 31 to 90 days | \$100,000 |
| Auglaize | Brewery | Minster had made its village know for many years starting in 1869, in which the Wooden Shoe Brewing Company was established and supported the entire tax revenue for the village. The brewery closed in 1954 and had survived where many smaller breweries had faild. In 2005 we reintroduced teh one lost brewery legendary brews. Currently we are contract brewing in a city approximately 75 miles away. The village of Minster is undergoing a branding initiative and also a downtown revitalization project. We feel Wooden Shoe Beer belongs back into the heritage that brought our village to recognition. We look forward to advancing our project and feel this and avenue to enhance multiple oportunites of employment | Wooden Shoe Brewing Company | 4 | 31 to 90 days | \$500,000 |
| Auglaize | Approach lighting, runway resurfacing, terminal bu | Approach lighting, runway resurfacing, terminal building | Auglaize County Airport Authority | 35 | 31 to 90 days | \$2,225,000 |
| Auglaize | 69 KV Transmission Line Loop - Substation Improvem | Improvements to Village's three electrical substations to increase capacity of the substations while also creating a loop of the village's electrical transmission lines to increase reliability for the village's industrial customers. | Village of Minster, Ohio | 20 | 0 to 30 days | \$2,039,550 |
| Auglaize | Auglaize Industry Project | Re. West Bus Lot-All concrete except entrance drive Area: 1633 sq.yds. Excavate and haul off site Asphalt and replace with 6" #304 Aggregate Base 6" concrete paving. Grass area at north end of parking lot extend lot area 100x62' Runway 08 currently has no RILs or visual guidance lighting approach aids. Runway 08 has a published instrument approach and having RIL's and PAPI's is crucial to a successful instrument approach during low visibility, IFR conditions. Additionally, Runway 08 approach extends over teh Village of New Knoxville, Ohio. A PAPI will provide precise vertical guidance over New Knoxville and enhance the safety and efficiency of the airport. | Auglaize Co. Board of MRDD | 12 | 181 days or more | \$104,870 |
| Auglaize | Runway Approach Lighting | The existing runway surface pavement is reaching it's usefull life and is in need of a normal maintenance overlay. The overlay will prolong/restore the useful life of the pavement and will enhance teh safety and efficiency of the airport. | Auglaize County Airport Authority | 15 | 91 to 180 days | \$92,000 |
| Auglaize | Runway 08-26 Friction Course Overlay, Groove and R | Pavement overlay: 5.650ft x100ft | Auglaize County Airport Authority | 80 | 91 to 180 days | \$745,000 |
| Auglaize | Combined Sewer Overflow Long Term Control Plan | Long term control plan project to reduce the annual combined sewer overflow within the City of Wapakoneta; install 3736 l.f. of 36" storm line, 2485 l.f. of 48" storm line and construct a 7.3 MG storage/treatment component at the waste water plant; project will replace the City's main combined sewer South Interceptor; it will impact the entire City - 3650 households; project will also meet recommendations of Ohio EPA | City of Wapakoneta | 25 | 31 to 90 days | \$22,650,000 |
| Auglaize | East Benton Street Reconstruction Project | Infrastructure project to reconstruct 1400 l.f. of E. Benton Street; including separation of sanitary from existing combined sewer; new storm, water, and sanitary laterals; new curb/gutter and sidewalk; new asphalt street pavement; project will bring City into EPA compliance. | City of Wapakoneta | 30 | 0 to 30 days | \$755,781 |
| Auglaize | Water Treatment Plant - Raw & Finish Water Lines | Infrastructure project to install raw and treated water lines to a new water treatment plant; install 3000 l.f. of 20" and 16" raw water line with all appurtenances; install 6500 l.f. of 20" and 16" finish water line with all appurtenances; this project will serve the entire Wapakoneta community - 3650 households; the new water treatment plant is being funded with current federal grants and local funds. | City of Wapakoneta | 30 | 31 to 90 days | \$695,705 |
| Auglaize | Water Treatment Plant - Sanitary Sewer Line | Infrastructure project to install 3000 l.f. of sanitary sewer line to serve new water treatment plant; project will serve 3650 households; project is in connection with new water treatment plant currently funded with federal and local funding. | City of Wapakoneta | 10 | 31 to 90 days | \$119,250 |
| Auglaize | Auglaize River Corridor Park Project | Infrastructure project to create a new linear park along the north and south banks of the Auglaize River in historic downtown Wapakoneta; install 2800 l.f. walk/bike path, 1500 l.f. curbing, 530 s.f. pavers, 10,400 s.y. asphalt paving, 74 trees, 173 shrubs; the project will also include local history signage and an events plaza along the riverfront; it will impact an estimated 5000 households and provide a significant amenity and tourist asset to the historic downtown district in Wapakoneta. The City was established by the Shawnee Nation along the banks of the Auglaize River in the 1780s. | City of Wapakoneta | 50 | 0 to 30 days | \$617,064 |
| Auglaize | Commerce Drive Industrial Park Loop Project | Infrastructure project to loop new road, sanitary sewer, and water lines between existing Commerce Drive Industrial Park and new Ohio Job Ready Site project in Wapakoneta; install 4800 l.f. of roadway 4800 l.f. of sanitary sewer, 2200 l.f. of 16" water line; this project will connect an existing industrial park with Wapakoneta's new 471-acre JRS manufacturing site at I-75 and US 33; this project will have an potential regional economy shifting impact. | City of Wapakoneta | 25 | 0 to 30 days | \$3,483,585 |
| Auglaize | Armstrong Air & Space Museum Projects | Infrastructure project to renovate the interior of the Armstrong Museum's Astrodome, install new audio/visual equipment in the Astrodome Theater, and construct a much needed museum sign on the Interstate 75 side of the facility. An estimated 20 million people drive past the museum annually. This new lighted sign would greatly increase tourist awareness of this world-class museum. The improvements will have a positive impact on the museum's current annual attendance of 25,000 visitors. | City of Wapakoneta | 15 | 0 to 30 days | \$152,404 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Auglaize | Development of Fuel Cell Integrated Lift Trucks | of the lead acid battery normally used in such vehicles. The lift trucks are generally not irreversibly modified to accept fuel cell power packs. This allows the owner flexibility in asset allocation to battery or hydrogen powered facilities and is designed to reduce risks to early adopters. The compromises inherent in the packaging constraints may be reduced if the components are optimized for the most efficient packaging. Integration of the components may also allow a more efficient use of energy throughout the truck system. The proposed project will create a running prototype of a lift truck designed specifically and exclusively for fuel cell power. A system architecture will be developed driven by the desired duty cycle to optimize the design. Integration should allow the higher power levels from the efficiency of packaging and the optimization of energy management. Crown Equipment will lead this project with assistance from EMTEC and other key collaborators with the expectation of creating 32 new jobs. The manufacturing facility is dated and needs to have upgrades to various safety/security systems. This would improve the safety not only for the employees of the facility but due to the chemicals involved secure them from any potential terrorist activity. The systems would involve both electronic and mechanical means. | EMTEC | 32 | 31 to 90 days | \$1,000,000 |
| Auglaize | Production Center 3 Security Enhancement Project | Work includes a new WTP, wells & raw water lines, clearwells, finished waterline, sanitary sewer pump station and force-main. This project is to bring an empty, rundown building up to state code to be used as a retail facility and food pantry. This will help improve the downtown of Wapakoneta, create approximately 3 additional jobs, and allow our non-profit to serve individuals who need help with finances, prescriptions, food, and other necessary basic needs. Funds requested for business expansion to include but not limited to land acquisition, equipment purchases, and the addition of 3 new employees. | American Trim, LLC | 87 | 31 to 90 days | \$60,000 |
| Auglaize | Water Treatment Plant | This expansion will allow us to operate year round rather than on a seasonal basis. It will allow for additional parking areas to accommodate our customers and purchase the necessary equipment needed. | Village of Wapakoneta | 30 | 91 to 180 days | \$8,200,000 |
| Auglaize | 38 E Auglaize | Continued development of bio-mass heating for residential and light industrial use. | Mercy Unlimited, Inc. | 3 | 0 to 30 days | \$200,000 |
| Auglaize | Business Expansion | This project would involve the reconstruction of North Westminster Street (from 1000 From St. Rt. 67 to the newly constructed Waynefield public schools. The project would involve the reconstruction of approximately 2000 LF of street. The project would also include the replacement of 2000 LF of storm sewer to improve drainage in this area of town. 3500 LF of waterline replacement and upgrades would also be included in the project. The waterline would extend further North to the Waynefield Industrial park to allow improved water capacity at the Industrial Park. | Tatco Corporation | 3 | 91 to 180 days | \$300,000 |
| Auglaize | Bio-Mass Heating Equipment | The project would involve the replacement and upgrading of approximately 2500 LF of storm sewer lines in the Southeast portion of the village. This area experiences flooding and standing water during rain events and it has been a goal of the village to improve this area for many years. The upgrading of approximately 2000 LF of the main electrical service line in town. This line is at it's capacity and is being pushed to the limit by the load demands of the new high school and the industrial park. | Bethel Engineering and Equipment, Inc. | 7 | 0 to 30 days | \$100,000 |
| Auglaize | Waynesfield - N. Westminster Street Reconstruction | renovation of the 1898 Auglaize County Courthouse to enable the preservation of this iconic, historical building and to enable 21st century justice to be served. The plan includes: relocating courthouse functions for the 2 years of renovation, replacing the 1904 coal burning system with 21st century HVAC using alternative energy technology, undergoing a complete electrical upgrade, restoring the stained glass windows and domes, repairing walls, trim and ceilings, and overhauling the current IT infrastructure. Once completed it's our intention that the courthouse will be at minimum a Silver LEEDS building. This project was scheduled to start 2008 and to be paid in full by the Auglaize Co. Commissioners, however, financial difficulties have prevented this project from starting and without financial assistance, it will not be feasible to start for an undetermined time. This project is shovel ready and will employ several hundred, prevailing-waged construction workers for a projected 2 year period, thereby having a positive effect on the local and state economy | Fanning/Howey Civil Engineering Division | 5 | 91 to 180 days | \$1,000,000 |
| Auglaize | Waynesfield - Southeast Area Storm Sewer Improve | Provide \$1000 rebate to homeowner building an energy efficient Touchstone Energy/Energy Star qualified home. Inspections and builder education costs paid by electric cooperatives. Cooperatives also provide varying levels of rebates and/or incentives for homeowner. Stimulus funding would encourage construction of 50 new homes homes. Counties (77) included in this program could include Adams, Allen, Ashland, Athens, Auglaize, Belmont, Brown, Butler, Carroll, Champaign, Clark, Clermont, Clinton, Columbiana, Coshocton, Crawford, Darke, Defiance, Delaware, Erie, Fairfield, Fayette, Franklin, Fulton, Gallia, Guernsey, Hancock, Hamilton, Hardin, Harrison, Henry, Highland, Hocking, Holmes, Huron, Jackson, Jefferson, Knox, Lawrence, Licking, Lorain, Logan, Lucas, Madison, Marion, Mercer, Medina, Meigs, Miami, Monroe, Montgomery, Morgan, Morrow, Muskingum, Noble, Paulding, Perry, Pickaway, Pike, Preble, Putnam, Richland, Ross, Sandusky, Scioto, Seneca, Shelby, Stark, Tuscarawas, Union, Van Wert, Vinton, Washington, Wayne, Williams, Wood, Wyandot | Fanning/Howey Civil Engineering Division | 0 | 181 days or more | \$200,000 |
| Auglaize | Waynesfield - Electrical Line Improvements | Manufacturing expansion for the production of utility grade wind turbines and for development and manufacture of machinery to be utilized for component production serving the energy efficient motor and generator industries. | Fanning/Howey Civil Engineering Division | 0 | 91 to 180 days | \$50,000 |
| Auglaize | Auglaize County Courthouse Renovation | operate in a five county area with well drilling, plumbing and water treatment systems. The demand for geothermal heating and cooling in our area has become quite significant. With this system the community can become more environmentally friendly which will in turn require less use of fossil fuels. If the company were able to expand, it would create new jobs in the community since we live in a rural community and economic times are difficult. The project would benefit more than just new employees to the community. respectfully yours sincerely: Robert Hasson owner of Hasson Well Drilling LTD. | Auglaize County Commissioners Office | 200 | 0 to 30 days | \$8,000,000 |
| Auglaize | Touchstone Energy Home Program | Expansion of manufacturing capabilities for wind turbine production | Buckeye Power, Inc. | 0 | 31 to 90 days | \$50,000 |
| Auglaize | Wind energy manufacturing expansion | open a new state-of-the-art Chiropractic and wellness office with rehab and x-ray and with room for possible expansion to include PT and/or MD/DC | The Minster Machine Company | 350 | 0 to 30 days | \$5,000,000 |
| Auglaize | geothermal heating and cooling | To install new energy efficient windows and doors and blow insulation into the walls of the home, which is 70 years old. | Hasson well drilling ltd | 5 | 31 to 90 days | \$700,000 |
| Auglaize | Wind turbine manufacturing | I have been without employment for almost 2 years. | Minster Machine Company | 350 | 0 to 30 days | \$10,000,000 |
| Auglaize | Cridersville Chiropractic | Buying and refurbishing homes to sell or rent at lower costs to low income families. Hoping to establish a business to specialize in this area | Patton Chiropractic | 6 | 31 to 90 days | \$250,000 |
| Auglaize | Home Energy Improvements | Funding will be used in prototype development of a remote sensing device using a new Patent Pending technology. Device(s) will be capable of remote sensing Mammal Hair / Feathers. Devices will integrate into collision avoidance systems for automobile / vehicle, air port / aircraft, and into detection systems for search and rescue, law enforcement, and other warning systems to provide public safety. Initial jobs will be created in the development and a wide variety of future jobs will be created in Ohio in manufacturing, assembly, sales, distribution and training. These will be high tech jobs as well as entry level positions. Estimates for gross sales in the first five years are projected at \$36,000,000 and new job growth in this industry is estimated at 225 to 300. Affected industries are Automotive, Aviation, Military, and Electronics. | Home Owner | 2 | 31 to 90 days | \$20,000 |
| Auglaize | Company Expansion / | An example of the applied technology would be an on board aircraft device that would image bird / flock activity and alarm crew members for an evasive response. Another example of the technology would be vehicle device that would image mammal hair (deer, cattle, humans, etc) and alarm the vehicle's system to provide a safety response | Huwer Renovating LLC | 8 | 0 to 30 days | \$175,000 |
| Auglaize | Transportation, Hazard Detection Equipment | | CrossHair Technologies, Inc. | 10 | 31 to 90 days | \$350,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Auglaize | Wind turbine component manufacturing | Capital equipment procurement for wind turbine component manufacturing for 7 miles. The Canal Towpath was originally constructed for transportation long ago. This proposed project will enhance the opportunity for people to use this historic corridor for present use. | The Minster Machine Company | 350 | 0 to 30 days | \$12,000,000 |
| Auglaize | Towpath Trail- Lock 14 to Deep Cut Park | This project would employ local contractors to develop handicap accessible trail for use as alternative transportation for foot and bicycle traffic. The land is leased by the Heritage Trails Park District of Auglaize County from the Ohio Department of Natural Resources, Division of Water. The Towpath Trail is shared by the National Country Scenic and Buckeye Trails. Other partners are Noble Township, Auglaize County, Miami and Erie Canal Corridor Association, Joint Township Hospital, Auglaize County Historical Society, and Audubon Ohio. When complete, commuters will be able to travel from St. Marys to Allen County on paved trail. This will provide for safe travel, health benefits, and safe school routes. The Towpath Trail also links to other trail systems in surrounding Shelby, Mercer and Allen Counties. The Towpath Trail when complete will once again help connect west Ohio people and communities. | Heritage Trails Park District of Auglaize County | 20 | 31 to 90 days | \$2,100,000 |
| Auglaize | Family Help | I have a 4 bedroom apartment and my girlfriend. we just want to move to a bigger home so we have enough room for our family. The money would pay our rent for a few years until we can move up in our jobs or find better ones. We currently pay 350/month and we are barely making it. I would also like to buy another bed for them, a new kitchen table, and our couch is falling apart. We need help and I am at a loss of what to do for my family. Can you help me? Or direct me in the correct path? | none | 0 | 0 to 30 days | \$10,000 |
| Auglaize | Towpath Trail- Lock 2 to St. Marys | The Towpath Trail will create paved bike/walking trail on the existing Miami and Erie Canal towpath for 6.5 miles. The Canal Towpath was originally constructed for transportation long ago. This proposed project will enhance the opportunity for people to use this historic corridor for present use. This project would employ local contractors to develop handicap accessible trail for use as alternative transportation for foot and bicycle traffic. The land is leased by the Heritage Trails Park District of Auglaize County from the Ohio Department of Natural Resources, Division of Water. The Towpath Trail also serves as the National Country Scenic and Buckeye Trails. Other partners are Noble Township, Auglaize County, Miami and Erie Canal Corridor Association, Joint Township Hospital, Auglaize County Historical Society, and Audubon Ohio. When complete, commuters will be able to travel from St. Marys to New Bremen on paved trail. This will provide for safe travel, health benefits, and safe school routes. The Towpath Trail also links to other trail systems in surrounding Shelby, Mercer and Allen Counties. The Towpath Trail when complete will once again help connect west Ohio people and communities. | Heritage Trails Park District of Auglaize County | 23 | 31 to 90 days | \$1,950,000 |
| Auglaize | Feeder Trail- Grand Lake to St. Marys | The Towpath Trail will create paved bike/walking trail on the existing Miami and Erie Canal towpath for 2.5 miles. The Canal Towpath was originally constructed for transportation long ago. This proposed project will enhance the opportunity for people to use this historic corridor for present use. This project would employ local contractors to develop handicap accessible trail for use as alternative transportation for foot and bicycle traffic. The land is leased by the Heritage Trails Park District of Auglaize County from the Ohio Department of Natural Resources, Division of Water. The Feeder Trail also connects in with Grand Lake Bike Trail, the National Country Scenic and Buckeye Trails. Other partners are Noble Township, Auglaize County, Miami and Erie Canal Corridor Association, Joint Township Hospital, Auglaize County Historical Society, and Audubon Ohio. When complete, commuters will be able to travel from St. Marys to Grand Lake St. Marys on paved trail. This will provide for safe travel, health benefits, and safe school routes. The Towpath Trail also links to other trail systems in surrounding Shelby, Mercer and Allen Counties. The Towpath Trail when complete will once again help connect west Ohio people and communities. | Heritage Trails Park District of Auglaize County | 22 | 91 to 180 days | \$750,000 |
| Auglaize | FIX MY ROOF. | A NEW HOOD FOR MY HOUSE. I AM AN EMPLOYED PRISONER WHO'S IS NOW ONLY WORKING 4 DAYS A WEEK BECAUSE OF THE ECONOMY. I ONLY MAKE ENOUGH TO PAY MY BILLS, MAKE ENDS MEET. MY ROOF NEEDS REPLACED, IT LEAKS, IS ROTTING, IF I DONT GET IT FIXED, WILL BE CAUSING MORE DAMAGE TO MY HOUSE. I DONT HAVE THE MONEY TO REPLACE IT, THIS WOULD HELP TREMENDOUSLY. | MY PLACE | 5 | 91 to 180 days | \$5,000 |
| Auglaize | Auglaize County Sheriff's Department Emergency Dis | Upgrade of Auglaize County Sheriff's Dispatch Center which dispatch's all village and small town police and fire departments as well as the Sheriff's Department and backs up the Police and Fire Department's of Wapakoneta and St. Marys. The Motorola dispatch center electronic equipment are no longer being supported by Motorola. To repair the vital equipment parts must be taken from non working units. Even if they work they have a relatively short life-span. An upgrade must be undertaken immediately to preserve the system of vital dispatch and response. This includes upgrading the HVAC in that area to protect the operating environment of this equipment, change the consoles to fit the new equipment and alignments, and add additional electronic security to the area which is relatively available now to public or jail employees/inmates. Program is supported by the Auglaize County Commissioners and the Auglaize County Sheriff and considered extremely necessary to the well-being of the County. | Auglaize County Sheriff's Department | 10 | 31 to 90 days | \$396,075 |
| Auglaize | Elk and Bear Drives Reconstruction Project | Reconstruction of 1100 linear feet of Bear and Elk Drives with new storm and sanitary sewers (if needed) and new street base, curbs and sidewalks | Village of New Bremen | 6 | 181 days or more | \$324,000 |
| Auglaize | KD Natural Area Canal Tow Path Trail | N2260 linear feet of paved trail along the Miami Erie Canal Tow Path from Lock Two south to New Bremen Village. The path will be 8 feet wide built over compacted earth. . This proposed project will enhance the opportunity for people to use this historic corridor for present use. This project would employ local contractors to develop handicap accessible trail for use as alternative transportation for foot and bicycle traffic. The land is leased by the New Bremen Foundation from the Ohio Department of Natural Resources, Division of Water. The Towpath Trail also serves as the National Country Scenic and Buckeye Trails. Other partners are The Heritage Trails Park District, German Township, Auglaize County, Miami and Erie Canal Corridor Association, Auglaize County Historical Society, the Village of New Bremen and Audubon Ohio. This will provide for safe travel, health benefits, and safe school routes. The Towpath Trail also links to other trail systems in the KD Natural area being developed next to this trail segment. The Towpath Trail when complete will once again help connect west Ohio people and communities. | New Bremen Foundation | 5 | 0 | \$129,000 |
| Auglaize | Towpath Trail- Lock 14 to Deep Cut Park | The Towpath Trail will create paved bike/walking trail on the existing Miami and Erie Canal towpath for 7 miles. This project will enhance the opportunity for people to use this historic corridor for present use. When complete, commuters will be able to travel from St. Marys to Spencerville on paved trail. The Towpath Trail will employ local contractors to develop handicap accessible trail for use as alternative transportation for foot and bicycle traffic. The land is leased by the Heritage Trails Park District of Auglaize County from the ODNR, Division of Water. The Feeder Trail also connects with Grand Lake Bike Trail, the National Country Scenic and Buckeye Trails. Other partners are Noble Township, Auglaize County, The City of St. Marys, Miami and Erie Canal Corridor Association, Joint Township Hospital, Auglaize County Historical Society, and Audubon Ohio. This will provide for safe travel, health benefits, and safe school routes. This project is in the boundary of the St. Marys River Important Bird Area. The Towpath Trail also links to trail systems in the Towpath Trail will create paved bike/walking trail on the existing Miami and Erie Canal towpath for 6.5 miles. This project will enhance the opportunity for people to use this historic corridor for present use. This project would employ local contractors to develop handicap accessible trail for use as alternative transportation for foot and bicycle traffic. The land is leased by the Heritage Trails Park District of Auglaize County from the ODNR, Division of Water. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Auglaize | Feeder Trail- Grand Lake to St. Marys | The Feeder Trail will create paved bike/walking trail on the existing Miami and Erie Canal feeder towpath for 2.5 miles. This proposed project will enhance the opportunity for people to use this historic corridor for present use. The Feeder Trail will employ local contractors to develop handicap accessible trail for use as alternative transportation for foot and bicycle traffic. The land is leased by the Heritage Trails Park District of Auglaize County from the Ohio Department of Natural Resources, Division of Water. The Feeder Trail also connects in with Grand Lake Bike Trail, the National Country Scenic and Buckeye Trails. Other partners are St. Marys Township, Auglaize County, The City of St. Marys, Grand Lake State Park, Miami and Erie Canal Corridor Association, Joint Township Hospital, Auglaize County Historical Society, and Audubon Ohio. | Heritage Trails Park District of Auglaize County | 22 | 91 to 180 days | \$750,000 |
| Auglaize | Oil Field Component Manufacturing Technology | When complete, commuters will be able to travel from St. Marys to Grand Lake St. Marys on paved trail. The trail will be approximately 2.5 miles long. The trail will be used by the oil and gas exploration companies conducting offshore drilling in the Gulf of Mexico. This particular portion of the U.S. domestic energy program is expanding and requires new technologies to lower the cost of exploration and to lessen the environmental impact of offshore drilling. Machine Concepts is well positioned to develop new drilling technologies for our oil-field customers. The requested funds would be directed towards new technology for the manufacture, inspection and repair of drill casing and heavy welded pipe. | Machine Concepts Inc. | 6 | 0 to 30 days | \$400,000 |
| Auglaize | Village of Buckland Sewer Project | build village of buckland of 100 houses with sewer system at epa request | Village | 10 | 181 days or more | \$1,200,000 |
| Auglaize | Wind Turbine Manufacturing Technology | Research and development of a material handling system that would allow high speed manufacturing of wind turbine generators. Demand for wind turbines has increased to the point that current manufacturing technology is unable to meet demand for certain components. Machine Concepts (www.machineconcepts.com) is well positioned to develop the needed technology to support this demand for high-speed generator lamination manufacturing systems. If this development program is successful the total unit could potentially be sold to our customer and the proceeds returned to the Federal government program that would fund this grant. | Machine Concepts Inc. | 12 | 0 to 30 days | \$800,000 |
| Auglaize | Energy Audit | Advanced Energy Conservation Control Project and programming. This program will control the amount of outside air required based on actual CO2 levels within the library. Currently the system does not allow for the control of outside air being brought into the building. This project is estimated to save the library in excess of \$150,000 over a 7 year period. The library currently uses over 30 percent of its yearly natural gas consumption during the summer months to recondition the air after passing through the HVAC system. The planning for this project has been completed and has been approved by the Ohio Department of Development | St Marys Community Public Library | 10 | 0 to 30 days | \$93,570 |
| Auglaize | ATV | The Sheriff Office plans on purchasing 2 All terrain vehicles and a trailer for the use in the rural areas of the county for search and rescue. There is presently no local funds available to this project | Auglaize County Sheriff's Office | 5 | 91 to 180 days | \$16,000 |
| Auglaize | Firearms Range | The Sheriff's Office plans to build a firearms training range on county owned property. All Law Enforcement Officers must qualify with their arms yearly. This range will include a lead containment system which will minimize the leaching of lead contaminants into the water and soil. The range will also include remote targets, storage building and covered shooting area. | Auglaize County Sheriff's Office | 12 | 91 to 180 days | \$150,000 |
| Auglaize | Technology | Due to the financial cuts in Auglaize County the Sheriff's was not appropriated sufficient equipment funds. The Sheriff's Office needs to replace existing computers, printers, and other related equipment due to the age of the equipment. | Auglaize County Sheriff's Office | 5 | 31 to 90 days | \$33,000 |
| Auglaize | Vehicle Replacement | Due to financial cutbacks in Auglaize County we did not have funds appropriated in our equipment account to replace the four vehicles that need replaced due to age, high mileage and the increase in maintenance. The vehicles are two marked patrol cars and two unmarked detective vehicles | Auglaize County Sheriffs Office | 20 | 31 to 90 days | \$100,000 |
| Auglaize | Garage Addition | The Sheriff's Office need to add on to the existing garage. The garage is used for a secure area for our patrol cars, maintenance tools and supplies. The addition would be for adding a secure evidence area for larger items of evidence. With the ever increasing amount of evidence collected and the requirement of maintaining the evidence we are out of physical room. This project would also include an out door secure impound for vehicles which we have none at this time | Auglaize County Sheriff's Office | 12 | 181 days or more | \$200,000 |
| Auglaize | Document management | The Sheriff's Office wants to set up a paperless records system for the Law Enforcement and Jail portions of the office. Our office is at the point that we have no more storage to store records. Utilizing a Document Management system would solve the storage problem without building additional rooms to store paper and would help in the use of natural resources to make paper | Auglaize County Sheriff | 10 | 91 to 180 days | \$150,000 |
| Auglaize | employee retention | Since December 2008, financial cutbacks and lack of local funding by the Auglaize County Commissioners four employees are at risk of layoff. These include one road Deputy Sheriff, on corrections officer, one dispatcher and one administrative assistant. The layoff of a Deputy will cause a shortage of enforcement and can cause safety concerns for the County residence. The layoff of a corrections officer will create a critical lack of personnel in the Corrections facility, causing safety issues for both staff and inmates. The layoff of a dispatcher can cause safety issues for the County since we are the only 9-1-1 center and dispatch for all but two fire and police departments in the county. The layoff of the Administrative assistant can cause issues with our administrative staff | Auglaize County Sheriff Office | 4 | 181 days or more | \$149,000 |
| Auglaize | Canal Park Development | Development of a brownfield site into a local park. The site is located in the downtown area of the community and lies adjacent to the Miami-Erie Canal. The park would be developed to reflect the heritage of the community and the importance of the canal to the community | Village of Minster | 5 | 181 days or more | \$375,000 |
| Auglaize | Work Truck | I am getting less than half of the jobs that I would normally be doing. Therefor there is no way for me to afford replacing the truck. However, with a grant from the government I could replace my truck and at the same time, in my own small way, help out our ailing auto industry. | Heitkamp Electric, Inc. | 1 | 0 to 30 days | \$39,000 |
| Auglaize | WeldTec Survival | We are a family owned rap shop located in St. Marys, OH. With the downturn of the economy, we have been hit hard. We build racks for the automotive industry, so of course there is no work out there. On the upswing, we have quoted to Honda of America, but because of our cash flow issues, the bank is not willing to cooperate and is threatening to pull our line of credit, which in essence would shut us down! We need the funds from the stimulus package to keep in business in case the bank is unwilling to help! | WeldTec Inc. | 22 | 31 to 90 days | \$450,000 |
| Auglaize | Replacement Windows | Greetings, This project involves the replacement of two large windows to reduce energy costs, retain jobs at local branch of window company and improve overall functionality/appeal at the address, which will increase business revenues and opportunities. The window company, Erie Construction (contracts based out of Dayton, OH), will customize the window size, which is typical of most window installations. The energy costs savings (25% or more - between \$30 and \$50 a month based on current estimations) since these two windows are the least efficient windows at the address, which was also confirmed by the Erie Construction representative during the on-site visit. Several negative comments from people approaching the address regarding the outdated/damaged windows also prompted this request. Increased revenues from a more professional physical appearance at the address could be very substantial since the roof and siding are very new. Estimation information came from an on-site visit from the window company in February 2009 and includes the window materials and labor costs. Feel free to contact us if you need correct information and more details. Your consideration is appreciated. | Tall Writer Writing Services | 5 | 31 to 90 days | \$3,200 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Auglaize | Trucking | With stimulus funds we would have the ability to purchase semi trailers and semi tractors to expand our recycling services to a wider range of businesses, offering a landfill alternative for their recycling needs. In turn this would provide new jobs. Thank you for your consideration | Ray's Recycling, Inc. | 2 | 181 days or more | \$250,000 |
| Auglaize | Updating Machinery | We are a commercial recycler, with a large impact on the environment, processing over 3 million lbs. of plastic a year that will not go to a landfill. The funds would be used to update existing machinery to better and more efficiently process materials for current and future customers. With more efficient equipment we can obtain new customers and double our output of material, which in turn would create more jobs. Thank you for your consideration | Ray's Recycling, Inc. | 4 | 181 days or more | \$350,000 |
| Auglaize | Noble Township Community Park | New Heating & Air Conditioning Unit installed to conserve Heating and Electric costs within the Noble Township Community Center. We opened bids March 9 and project needs to be completed by May 15 | Noble Township | 6 | 0 to 30 days | \$23,000 |
| Auglaize | Warehouse | The funds would allow us to erect a warehouse with docks to improve on faster more efficient shipping/receiving. With these improvements, we are making a safer working environment for our employees, in addition continuing to maintain and grow in business. These improvements would also create permanent jobs, and jobs for local contractors. Thank you for your consideration | Ray's Recycling, Inc. | 2 | 181 days or more | \$450,000 |
| Auglaize | Updating Machinery | We are a commercial recycler, with a large impact on the environment, processing over 3 million lbs. of plastic a year that will not go to a landfill. With more efficient equipment we can obtain new customers and double our output of material, which in turn would create more jobs. Thank you for your consideration | Industrial Recycling | 4 | 181 days or more | \$350,000 |
| Auglaize | needing major repairs energy efficient | needing new furnace, insulation, air conditioner, parking lot redone. new piping throughout building, outside painted, new roof, new compressor on outside freezer, new hot water heater new electrical rewire, our building is 48 years old, everything is the original. | lee's famous recipe | 15 | 0 to 30 days | \$32,500 |
| Auglaize | Energy Conservation in Recycling Processes | Install two Eaton/Cutler Hammer (or equivalent) soft-start capacitor units to address motor amperage spikes that occur during processing of recycled rubber materials. | Midwest Elastomers, Inc. | 50 | 31 to 90 days | \$315,000 |
| Auglaize | Equipment Update | Energy consumption and increased electrical "demand" charges have made it less economically feasible to continue rubber recycling efforts that have been made over past 20-30 years at this facility. Millions of pounds of scrap rubber are kept from landfills each year, but these recycling jobs are threatened by high electric charges and increased demand. | Bendco Machine & Tool, Inc. | 15 | 0 to 30 days | \$18,000 |
| Auglaize | Technology Update | The equipment update we are requesting would allow us to add the latest technology to our phone and machining systems. Our objective is to update our systems so that they work more productively and efficiently and to also use less energy. The savings generated from this update will provide a more cost effective service for our customers. Through this project, we will retain all of our current employees and potentially add several new positions. | Bendco Machine & Tool, Inc. | 15 | 0 to 30 days | \$34,500 |
| Auglaize | Minster Oil Contamination Removal | The technology update we are requesting would update our design and computer operating systems to run more efficiently and increase our processing and file storage volume. Our current system has been in place since the 1990's and has started to reach its full capacity. This update will improve our ability to timely address our customers' projects of redesigning or retooling their equipment to operate more productively and with better energy efficiency. In turn, this will increase productivity, efficiency, and profitability for both our customers and our organization. Through this project, we will retain all of our current employees and potentially add several new positions. | Village of Minster | 4 | 91 to 180 days | \$50,000 |
| Auglaize | Development of an Integrated Fuel Cell Forklift Tr | The project would consist of remediation of contaminated soils at a former gas station site within the village of Minster. The Village has conducted both Tier I and Tier II evaluations of the site and has determined that some of the soil has been contaminated by fuel products. The proposed project is to investigate, model, and create a running prototype of a fuel cell powered lift truck. Crown will investigate the system architecture driven by the desired duty cycle to optimize the design. This will direct the selection of components. Crown will evaluate component suppliers, create a system model of the truck to validate the model, create a test bench to evaluate components. The product deliverable is the roadmap to create an integrated fuel cell truck. | Crown Equipment Corporation | 24 | 31 to 90 days | \$771,000.00 |
| Auglaize | Find, Get, Keep a Job | Fuel cell power packs are a collection of components that are not ideally packaged into a rectangular solid shape. The shape is dictated by the renewable energy source, standard sizes of lead-acid batteries. The compromises inherent in the packaging constraints may be reduced if the components are optimized for the most efficient packaging. Integration of the components may also allow a more efficient use of energy throughout the truck system. Current fuel cell power packs appear to be inadequate for the highest throughput lift trucks. The packaging dictates smaller components than the most demanding applications would require. Integration should allow the higher power levels from the efficiency of | Capabilities, Inc. | 200 | 31 to 90 days | \$1,000,000 |
| Belmont | Student Services | Over the past 12 years Capabilities has provided vocational rehabilitation services to people in Ohio with all types of disabilities. Last year we worked with over 500 people successfully placing 75% of them in employment. New customized and supported employment options are essential to people's success and as a community based rehabilitation facility, we know we can improve the current system. Working together with the Rehabilitation Services Commission, local MR/DD's, local mental health boards, and others, the funds would be used to research and implement new employment options for people with disabilities that will include innovative customized employment, supported employment, etc to custom-design jobs and provide employers the incentives needed to negotiate for employer gain and make this successful. | Student Services/Bellaire Local School Dist. | 6 | 31 to 90 days | \$125,000 |
| Belmont | Kirkwood Heights Water Line Replacement | of four school districts and our local career center. Expected outcome will be: 1) Decrease in student involvement with Juvenile Court. 2) Decrease in student violence in the schools. 3) Maintain and increase the number of students receiving services in each school. 4) More comprehensive service delivery and availability in each District. 5) Ability to enhance services to meet the growing need of elementary students needing mental health intervention services. 6) Maintained support services for Parents/Guardians of at risk students. Student Services will be able to provide prevention and intervention service to student in a comprehensive manner during their total school involvement from Kindergarten to Graduation. Student Services works closely with community services and has a long-standing referral relationship with all child serving agencies in Belmont County. Belmont County is a rural Appalachian area that has needed stimulus money for many years and this economic depression has made the situation dire and it is essential to maintain services to our youth and families. | Village of Bridgeport- Street Engineering & Surveying | 20 | 31 to 90 days | \$500,000 |
| Belmont | Shadyside Median Strip Project | supplied with 4" waterlines in the Kirkwood Heights area in the Village of Bridgeport. The existing waterlines are anywhere from 25 to 40 years old. Most of the older lines are steel lines and the newer lines are transit pipe which are creating continuous maintenance problems for the Village of Bridgeport. Also all the property owners do not have adequate fire protection. Most importantly replacing the 2" and 4" waterlines with new 6" waterlines will provide the 135 home owners adequate fire protection. | Village of Shadyside | 40 | 181 days or more | \$500,000 |
| Belmont | Barnesville Reservoir # 2 Improvements | Revitalization of Main Street in the Village of Shadyside. Power lines have to be moved out of the downtown area, new sidewalks, curbs, and lighting fixtures. | Village of Barnesville | 12 | 31 to 90 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Belmont | Barnesville Reservoir # 1 Improvements | Improvements have been mandated by ODNR for the safety of the dam as sponsored by the Governor's Office. Hydrological and flood inundation studies have been performed by the Village at a cost of \$17,000. Plans have been completed and approved by ODNR to add an emergency spillway and a secondary emergency spillway channel. Engineering is complete and plans have been approved by ODNR and the project is ready for construction. It is mandated and must be completed by the Village. | Village of Barnesville | 12 | 0 to 30 days | \$150,000 |
| Belmont | Barnesville Park Lake Dam Improvements | Improvements have been mandated by ODNR as sponsored by the Governor's Office. Hydrological and flood inundation studies have been completed at a cost of \$23,500 to the Village. Plans have been completed and approved by ODNR to raise the dam approximately 3 to 4 feet, install a 70 ft. wide emergency spillway, relocate an existing boat ramp, install a lake siphon drain, and replace a deteriorated spillway culvert pipe with a concrete box culvert. Engineering is complete and plans have been approved by ODNR and the project is ready for construction. It is mandated and must be completed by the Village. | Village of Barnesville | 12 | 31 to 90 days | \$400,000 |
| Belmont | Barnesville Paving Project | Resurface 14 streets within the Village for a total of 11,428 center line feet at an average width of 23 feet for approximately 1,171 cubic feet of asphalt material applied at 1 1/2" thick. Grind and remove 3,071 center line feet for an approximate 8,236 square yards of materials. Adjust 31 manholes to grade. Adjust 36 valve boxes to grade. Provide 2,268 center line feet of double yellow line | Village of Barnesville | 10 | 0 to 30 days | \$200,000 |
| Belmont | Barnesville Reservoir # 1 Improvements | Improvements have been mandated by ODNR for the safety of the dams as sponsored by the Governor's Office. Hydrological and flood inundation studies were previously performed at a cost of \$17,000 to the Village. Plans have been completed and approved to add an emergency spillway to prevent dam failure in the event of a massive rain event. Also to add a secondary emergency spillway channel. The Barnesville Water Treatment Plant sets directly below this dam. 12,500 people in a portion of four counties rely on this water source and it must be protected from dam failure. This project is designed, approved, and ready for construction. It is mandated and must be completed by the Village. | Village of Barnesville | 12 | 0 to 30 days | \$150,000 |
| Belmont | Easten Ohio Regional Industrial Park Water System | Installation of approximately 20,000 feet of 8" water line and construction of a million gallon water tank. This system will enhance the 200 acre industrial park site creating a few dozen temporary construction jobs and a few hundred permanent jobs. The Belmont County Commissioners, Belmont County Port Authority, Warren Township Trustees, and Village Council are all working on the completion of this project to bring much needed economic benefit and jobs to the area. This project will also provide water service to needed residential areas. O.D.N.R. has mandated the addition of an emergency spillway to this reservoir owned by the Village of Barnesville. Original estimated cost was to be between 2 and 4 million dollars. Flood inundation and Hydrological studies have been completed at a cost of \$40,000 to the village in anticipation of construction. | Village of Barnesville | 300 | 181 days or more | \$2,000,000 |
| Belmont | Slope Creek Reservoir Dam Improvements | 2 General System - Poor Performing Pavements1 General System - Minor Rehab | Village of Barnesville | 12 | 181 days or more | \$2,000,000 |
| Belmont | Dist 11, PID 81695, BEL SR 149 31.390 | General System Resurfacing | Ohio Department of Transportation | 29.2 | 31 to 90 days | \$1,016,508 |
| Belmont | Dist 1, PID 80412, HAN SR 568 3.15 | General System Resurfacing | Ohio Department of Transportation | 54 | 31 to 90 days | \$1,881,380 |
| Belmont | Bel-Kirkwood Heights Resurfacing | The project begins at the Westerly Corporation Line for the Village of Bridgeport on Kirkwood Heights Road (CR30) and proceeds in an Easterly then Northerly direction for a distance of approximately 10,300 feet to a point of termination at the intersection with Bennett Street. The resurfacing will consist of planing portions of the existing roadway, then resurfacing the complete roadway with 1-3/4" to 3" of asphalt. ODOT Item 617 reconditioning of shoulders for a width of 2 feet will be used on the existing shoulders. Temporary and permanent striping will also be provided | Street Engineering & Surveying | 10 | 31 to 90 days | \$324,000 |
| Belmont | Village of Bridgeport's Water Valve Replacement | The Village of Bridgeport's water system utilizes 320 valves ranging in size from 4" to 12". At this time 49 valves do not operate, which can create major safety issues for the Village. To isolate a section of water line for repair or maintenance often requires a large area of the Village to be without water, which causes a large number of residents to be without fire protection, sanitary services, and needed water. This project will insure that only a minimum number of residents will be without the above described services when repairs are needed | Village of Bridgeport- Street Engineering | 10 | 0 to 30 days | \$180,000 |
| Belmont | Shadyside Wastewater Collection and Treatment Impr | Work is for the Village of Shadyside in Belmont County. This project includes the rehabilitation of an existing wastewater treatment plant serving a community of 3,675 from the 2000 Census. Work in the collection system includes rehabilitation of 2,280 lineal feet of sanitary sewer and replacement and/or rehabilitation of 20 manholes. Work will be created by the different trades of contractors that will be necessary to complete the improvements | Burgess & Niple, Inc. | 10 | 91 to 180 days | \$2,000,000 |
| Belmont | BEL-CR2 & Various - Centerline Pavement Markings | Place polyester centerline pavement markings on 98 miles of various county roads | Belmont County Engineer's Department | 2 | 31 to 90 days | \$150,000 |
| Belmont | BEL-CR34 & Various - Centerline Pavement Markings | Place polyester centerline pavement markings on 98 miles of various county roads | Belmont County Engineer's Department | 2 | 31 to 90 days | \$150,000 |
| Belmont | BEL-CR2 & Various - Edge Line Pavement Markings | Place polyester edge line pavement markings on 130 miles of various county roads | Belmont County Engineer's Department | 2 | 31 to 90 days | \$150,000 |
| Belmont | BEL-CR5 & Various - Edge Line Pavement Markings | Place polyester edge line pavement markings on 130 miles of various county roads | Belmont County Engineer's Department | 2 | 31 to 90 days | \$150,000 |
| Belmont | BEL-CR28A & CR28B - Misc. Pavement Markings | Place polyester pavement markings on Mall Road & Banfield Road: 1.56 miles of lane lines, 3012 feet of channeling lines, 634 feet of stop lines, 596 feet of transverse lines, 114 sq. ft. of island marking, 45 each lane arrows, & 11 each word on pavement. | Belmont County Engineer's Department | 2 | 31 to 90 days | \$50,000 |
| Belmont | BEL-CR2 & Various - Load Rating & Gusset Plate Ana | Load rating & gusset plate analysis of all Belmont County Bridges 20 foot span and greater | Belmont County Engineer's Department | 3 | 91 to 180 days | \$930,000 |
| Belmont | BEL-CR28A & CR28B - Milling, Resurfacing & Long Li | Mill, resurface & place long life pavement markings on Mall Road & Banfield Road. Engineer's estimate of quantities & probable cost on file | Belmont County Engineer's Department | 3 | 91 to 180 days | \$934,205 |
| Belmont | Dist 11, PID 84912, BEL SR 379 0.000 | General System Preventive Maintenance - B11 Single Chip Sea | Ohio Department of Transportation | 12 | 31 to 90 days | \$379,600 |
| Belmont | BEL-CR2 & Various - Guardrail | Remove, replace & install new guardrail - 10000 lineal feet with end treatments, linear grading and shoulder fill material. | Belmont County Engineer's Department | 2 | 91 to 180 days | \$300,000 |
| Belmont | BEL-CR4 & Various - Guardrail | Remove, replace & install new guardrail - 10000 lineal feet with end treatments, linear grading and shoulder fill material. | Belmont County Engineer's Department | 2 | 91 to 180 days | \$300,000 |
| Belmont | BEL-CR5 & Various - Guardrail | Remove, replace & install new guardrail - 10000 lineal feet with end treatments, linear grading and shoulder fill material. | Belmont County Engineer's Department | 2 | 91 to 180 days | \$300,000 |
| Belmont | BEL-CR408-00.74 & BEL-UNI-TR814-00.21 Stone Arch B | Design or rehabilitation of 2 stone arch bridges - currently identified for transportation enhancement funding by the Ohio Department of Transportation. These are 2 of the oldest bridges in Ohio on the Old National Road and they still carry vehicular traffic. The bridges (or portions thereof) are near collapse and local funds are not available to proceed with this historically significant project. If need be the project may be changed to design/build | Belmont County Engineer's Department | 1 | 91 to 180 days | \$80,000 |
| Belmont | Dist 11, PID 80103, BEL SR 148 12.000 | General System- Resurfacing - B8- Low Vol. OI (1 3/4") W/ Chip Seal And 2% Full Depth Repairs: Includes Work At Odnr Brush Creek Wildlife Area (Tr 289) Which | Ohio Department of Transportation | 74.9 | 31 to 90 days | \$2,610,520 |
| Belmont | Dist 11, PID 80131, BEL 00148 25.12 | Bridge Deck replacement | Ohio Department of Transportation | 40.2 | 31 to 90 days | \$1,400,000 |
| Belmont | General System - Poor Performing Pavements | 2 General System - Poor Performing Pavements1 General System - Minor Rehab | Ohio Department of Transportation | 29.2 | 31 to 90 days | \$1,016,508 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Belmont | BEL-CR40B-00.74 & BEL-UNI-TR814-00.21 Stone Arch B | Renovation of 2 stone arch bridges - currently identified for transportation enhancement funding by the Ohio Department of Transportation. These are 2 of the oldest bridges in Ohio on the Old National Road and they still carry vehicular traffic. The bridges (or portions thereof) are near collapse and local funds are not available to proceed with this historically significant project. If need be the project may be changed to design/build. Funding requested is to change the project from 80/20 to 100% Federal funding. | Belmont County Engineer's Department | 5 | 91 to 180 days | \$144,540 |
| Belmont | Bethesda Elevated Tank & Distribution System Upgra | Phase 1: Elevated Water Storage Tank rehab vs. replacement. Recent tank evaluation and estimates suggest that new water tank construction should be addressed. Environmental Study for the project is being initiated. Phase 2: Water Distribution upgrade featuring replacement of 4" lines - upgrade includes 15,000 linear feet of 6" water lines and Fire Hydrants - Half of existing hydrants tested showed pressure less than 20 psi residual pressure - During hydrant flushing or fire fighting, residential pressures drop below 20 psi. There are also chlorine level concerns due to interior conditions of the old lines. Phase 3: Meter upgrade and replacement for all metered customers - electronic read capabilities - Long overdue. | Village of Bethesda | 50 | 91 to 180 days | \$2,500,000 |
| Belmont | Dist 11, PID 81695, BEL SR 149 31.390 | 2 General System - Poor Performing Pavements1 General System - Minor Rehat | Ohio Department of Transportation | 29.2 | 31 to 90 days | \$1,016,508 |
| Belmont | Dist 11, PID 80419, BEL SR 147 14.380 | General System Resurfacing | Ohio Department of Transportation | 54 | 31 to 90 days | \$1,881,380 |
| Belmont | Dist 11, PID 80419, BEL SR 147 14.380 | General System Resurfacing | Ohio Department of Transportation | 54 | 31 to 90 days | \$1,881,380 |
| Belmont | Highland Avenue Sewer Extension | Installation of approximately 4,661 feet of 8" SDR35 Sanitary sewer pipe, 1,200 feet of 4" CL 160 Force Main Pipe, 24 precast concrete manholes, a sewage lift station complete with generator, & 25 service taps. This project has come as a result of complaints received by the Ohio EPA. The area within Village Corporation Limits is currently not provided with sewer service. The residents currently have septic systems which are failing. The health and safety concerns within a corporation will dictate a mandate from the OEPA to complete this project. | Village of Barnesville | 6 | 181 days or more | \$600,000 |
| Belmont | Barnesville Wastewater Treatment Plant Improvement | Aeration for pathogen reduction and vector attraction treatment by a rotomixer system powered by blowers in a building housing. Also a dry sludge storage building complete with a sewage press for dewatering of human waste product allowing the Village to land or landfill the dry product. We have included a new lab building as well. US EPA Sludge Regulations and a violation of our NPDES permit. We have been working on this project since the year 2000 and have received a \$400,000 grant and a \$49,000 loan from OPWC. Engineering is 100% complete and submitted to OEPA for review by DEFA for the lab, tanks, and blower building. Design has begun for the dry storage area and press. | Village of Barnesville | 6 | 181 days or more | \$2,400,000 |
| Belmont | Biofuel from Algae | Production of bioenergy to capture additional tons of CO2 per year, produce 100,000 gallons of biodiesel and 350,000 tons of animal feed, in 5 years. | Independence Bio-Products | 10 | 0 to 30 days | \$2,000,000 |
| Belmont | Water System Improvements | Project will be to expand our one acre pilot plant of algae growth ponds and processing to 10 acres, ultimately moving to 1,000 acres and then 10,000 acres (5 years). The business will provide jobs (80 direct jobs estimated in 5 years) and revenues to rural areas of the state, save jobs in high CO2 emitting industries, increase competitiveness of Ohio animal agriculture, create clean, domestic fuels. | Village of ShadySide | 0 | 91 to 180 days | \$1,714,000 |
| Belmont | Mt.Victory Waterline Project Phase 1 | Replacement of 13,700 LF of small diameter (2-inch and 4-inch) water main to improve water service and fire flow capability. Replacement of nine (9) gate valves and 55 obsolete hydrants to improve system reliability. Installation of an emergency generator at the water treatment plant to allow operation of water system during a power outage or other emergency. Improvements to interior valving at South Reservoir to facilitate cleaning and maintenance of the reservoir. All aspects of this project have been recommended by Ohio EPA District personnel. | Belmont County Sanitary Sewer District | 15 | 181 days or more | \$1,000,000 |
| Belmont | Neffs Sanitary Sewer Project Phase 1 | The Mt.Victory Waterline Project Phase 1 consists of: constructing 52,000 feet of 8" waterline, 25 fire hydrants and approximately 160 services connections. The engineering Design has been completed and ready to be submitted to the Ohio EPA for a Permit-to-install. We are currently in the process of completing the environmental study and the preliminary engineering report. The Ohio EPA strongly supports this project because the Village of Powhatan's current water source is at risk of bacterial contamination during flood events. The residents along Mt.Victory Road also have contaminated wells and are depleted during dry weather conditions. | Belmont County Sanitary Sewer District | 30 | 181 days or more | \$1,000,000 |
| Belmont | BEL-CR18 & Various - Edge Line Pavement Markings | The existing septic systems cannot be replaced due to the condensed areas of the residential homes. | Belmont County Engineer's Department | 2 | 31 to 90 days | \$150,000 |
| Belmont | BCHD Building | Place polyester edge line pavement markings on 130 miles of various county roads | Belmont County Health Department | 50 | 31 to 90 days | \$3,500,000 |
| Belmont | Belmont County Fairgrounds Water & Sewer Project | We are requesting funding to build a new health department in Belmont County. Currently we are in two separate locations. Our WIC office is in a very old building owned by the County Commissioners and is in extremely poor condition. All our other services are performed in the current Health Department building which is very much undersized and not environmentally friendly. We would like to combine with our WIC program in one new, environmentally friendly building to be able to serve our clients in a more efficient manner. This project would give a much needed boost to the contractors and their supplies in this area and other parts of Ohio. | Belmont County Sanitary Sewer District | 31 | 91 to 180 days | \$600,000 |
| Belmont | Courthouse Security | Water System; 2,200 feet of 6" waterline, 1,400 feet of 4" waterline, 4 fire hydrants, 16 service connections and 1 meter vault. The engineering design has been completed and ready to be submitted to the Ohio EPA for a Permit-to-install. The proposed water and sewer system is necessary for serving the needs of vendors, community groups and the public who attend the fairgrounds. The project consists of a potable water supply system, a sewage lift station, sewer collection system and force main. | Belmont County Sheriff's Office | 7 | 31 to 90 days | \$21,000 |
| Belmont | Re-Submitted Kirkwood Heights Water Line Replaceme | Belmont County Courthouse is in NEED of line scan equipment. This will be used for security at the courthouse. There are currently 3 Belmont County Sheriff's Deputies employed to work at the courthouse to provide security. The equipment in use is over 12 years old and was 2 years old when purchased. The Line Scan equipment, cameras and network connections with audio/video capabilities to each courtroom would increase security and keep the 3 deputies employed and employ 3 to 4 people for installation, training and upgrades to equipment | Village of Bridgeport- Street Engineering & Surveying | 20 | 31 to 90 days | \$500,000 |
| | | The following project description has been modified to include the estimated length of 6" waterline which was not included in the original application #73RA6. At this time there are approximately 98 homes being supplied with 2" waterlines and 97 homes being supplied with 4" waterlines in the Kirkwood Heights area in the Village of Bridgeport. The existing waterlines are anywhere from 25 to 40 years old. Most of the other lines are steel lines and the newer lines are plastic pipe which are causing maintenance problems for the Village of Bridgeport. Most of the property owners do not have adequate fire protection. Most importantly replacing the 2" and 4" waterlines with new 6" waterlines will provide the 132 home owners adequate fire protection. The total length required for the new 6" water lines is 15,200 feet. | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Belmont | Barnesville Hospital Emergency Department Renovati | Emergency department renovation and expansion- 20,000 square feet new space, 8,194 feet renovated space. Total- 24,994 new/renovated space. Addresses the hospital's most underused and crowded areas. Providing covered, handicapped accessible main entrance, expanded emergency department providing individual treatment rooms, updated patient monitoring/technology, observation rooms. Also included - expanded physical therapy department and diagnostic imaging department, and renovated central registration and lab collection/drawing area. Barnesville Hospital is a critical access hospital providing quality healthcare to area residents who tend to be rural, elderly, low income, and medically underserved. The project will provide significant economic benefit for the community through job retention, job creation, and bolstering the local economy. Barnesville Hospital is the largest area employer, generating \$25 million in economic activity within the community and region. The hospital also provides \$2 million annually for uncompensated health care. | Barnesville Hospital Association, Inc. | 505 | 0 to 30 days | \$1,470,000 |
| Belmont | Dist 11, PID 85922, EORTA (2) <30' buses | Purchase (2) <30' buses for the Eastern Ohio Regional Transit Authority | Ohio Department of Transportation | 4 | 31 to 90 days | \$250,000 |
| Belmont | Dist 11, PID 85923, EORTA 2 converted vans | Purchase 2 converted vans for the Eastern Ohio Regional Transit Authority | Ohio Department of Transportation | 2 | 31 to 90 days | \$90,000 |
| Belmont | Dist 11, PID 85924, EORTA 1 service truck | Purchase 1 service truck for the Eastern Ohio Regional Transit Authority | Ohio Department of Transportation | 1 | 31 to 90 days | \$32,000 |
| Belmont | Dist 11, PID 85925, EORTA GPS units for buses | Purchase GPS units for buses for the Eastern Ohio Regional Transit Authority | Ohio Department of Transportation | 0 | 91 to 180 days | \$13,500 |
| Belmont | St. Clairsville Downtown Parking Garage | New elevated parking deck to accommodate 48 additional cars in the heart of the downtown district. Adequate parking is very difficult to find in the district due to the steep terrain and spacial limitations. Parking has been identified as the number one need of the downtown area according to a recent study. | City of St. Clairsville | 100 | 91 to 180 days | \$985,000 |
| Belmont | Community Project Work Crews | Belmont CDJFS has a history of providing a work program that also benefits our local communities. We operated a DOL National Emergency Grant for two years that provided employment opportunities after two floods. We have also operated community crews with TANF funds. These projects provided both short term employment and income for those working on the projects. We helped with building, repairing and maintaining public facilities such as cemeteries, parks and more. Providing this service again would be an excellent way to get money into the pockets of those employed and make our communities a better place. It also allowed us to employ non-custodial parents who owe child support making sure that their children are receiving the help they need. Community work programs like these have a long history in our country and can work again. Belmont CDJFS has the expertise to operate this program effectively and will be our great assistance to our community. | Belmont County Department of Job and Family Servic | 50 | 0 to 30 days | \$400,000 |
| Belmont | Dist 11, PID 85926, EORTA Passenger shelters | Passenger shelters for the Eastern Ohio Regional Transit Authority | Ohio Department of Transportation | 2 | 31 to 90 days | \$81,225 |
| Belmont | St. Clair Commons Development | stimulus funds, thereby returning the original earmark to the budget. Original was for Mall Road interchange. This proposal does not connect to the Interstate. This is the top stimulus application for Belmont Co. according to the county commissioners. Project is listed on the Belomar Transportation Improvement Plan (MPO). 5700' of new 36' wide road, curbs, stormdrains 4500' waterline 3200' gravity sewer 3700' force main 2 WW pumping stations 700,000 gallon water storage tank 1 new bridge over I-70 And associated work. Top project of City, Township, Transportation Improvement District, and County. Protects existing assets and jobs in face of out of state competition. Stimulus lobbied for since 2004. Now losing tax base. This project protects and enhances jobs. Project is well know to leaders at all levels of government. | City of St. Clairsville | 2000 | 91 to 180 days | \$6,765,790 |
| Belmont | development for marketing/production of a patented | I designed, developed, and patented (I did my own patent work...US patent no. 6,761,519. I have a total of 3 US patents with another one in the patent pending stage) a product for the motorcycle industry that has universal marketing and sales viability. Prototypes are finished, testing is scheduled. I need funding to continue work towards final development, testing, marketing, and production of this unique product. Plans are to have it manufactured in Ohio and marketed worldwide through dealers and the internet operation I have based here in Ohio. | Luggage Locker Inc. | 4 | 0 to 30 days | \$250,000 |
| Belmont | Upgrade old water meters for billing | 290 new meters to replace existing ones that have been in use since 1957. We will be able to bill accurate usage monthly to pay our debt for a long waited sewage system in all types of weather. Old meters in ground pits are not able to be read in bad weather | Belmont Water & Sewer Department | 2 | 31 to 90 days | \$40,000 |
| Belmont | Zane Highway Waterline Replacement Project | Replace an aged twelve (12) inch waterline that provides services to businesses, residences and serves as emergency service for the Village of Bridgeport and for the City of Martins Ferry, should either water plant be shut down. This line has had to be repaired many times and the shut-off valves do not work, causing an entire section of Martins Ferry's water to be shut down. It will also be necessary to remove eight (8) inches of concrete and old street car tracks. Two (2) new fire hydrants and new service lines will be installed. Abandoned and existing old water lines will be capped. This project would be an immediate and necessary step to ensure the community is not shut off from the three water treatment plants be shut down for any plant repairs or water supply failure. For instance, the Village of Bridgeport only has one non-contaminated water well supplying water to its businesses and residents. They also provide water to customers outside of there village limits. The City of Martins Ferry provides water to areas outside of its corporation limits including parts of three Counties(Belmont, Harrison and Jefferson). | City of Martins Ferry, Ohio | 100 | 31 to 90 days | \$326,000 |
| Belmont | Multi Community Emergency Waterline Project | Replace an aged twelve (12) inch waterline that provides services to businesses, residences and serves as emergency service for the Village of Bridgeport and for the City of Martins Ferry, should either water plant be shut down. This line has had to be repaired many times and the shut-off valves do not work, causing an entire section of Martins Ferry's water to be shut down. It will also be necessary to remove eight (8) inches of concrete and old street car tracks. Two (2) new fire hydrants and new service lines will be installed. Abandoned and existing old water lines will be capped. | Belmont | Solar Power for Park Building | <p>The Bellaire Park District has been renovating a former swimming pool bath house into a community building. Providing power to the building and two ball fields, one which currently has lights and the other that we hope to add lights is a large expense for this small village park district.</p> <p>Installing solar panels on the building will help with the ongoing energy costs of using the building and the ball fields. Saving money on energy costs will allow the park district to have more funding available for other operating, maintenance and project costs.</p> <p>This project would ensure an uninterrupted supply of water to all three communities should any of the three water treatment plants have to be shut down for any plant repairs or water supply failure. This will provide additional health and safety protection to all three communities and their environs. Additional businesses and industrial development will be attracted into our areas, thus creating jobs and improving our economic structure. The end result being the possible influx of people relocating into our communities. The Village of Bridgeport and the City of Martins Ferry provides water to customers outside of their corporation limits. Martins Ferry provides water to parts of Belmont, Jefferson and Harrison Counties.</p> | Bellaire Park District | 8 | 31 to 90 days | \$25,000 |
| Belmont | Multi Community Emergency Waterline Project | <p>The following supplies will be used:</p> <ol style="list-style-type: none"> 12" Waterline - 1,950 linear feet 8" Waterline - 6,000 linear feet Booster Station - 1 (Yorkville) Valves - 12" & 8" (4 each) Booster Pump Station Arrangements (Bridgeport) Asphalt Pavement Replacement - 2,200 linear feet Connections to existing waterlines - 2 | City of Martins Ferry, Ohio | 3,000 | 31 to 90 days | \$1,607,000 |
| Belmont | Backup generator replacements | <p>Sixteen electrical generators to provide backup power for 16 wastewater pump stations to prevent sewer bypasses in the event of power failures. One replacement generator to operate all units of a secondary treatment plant. Current generator only operates primary treatment</p> | Eastern Ohio Regional Wastewater Authority | 16 | 91 to 180 days | \$1,870,000 |
| Belmont | Mental Health for the Uninsured | <p>Tri-County Help Center, Inc. provides ongoing services to victims of mental illness, domestic violence, and sexual assault regardless of the ability to pay. Tri-County's catchment area is Belmont, Harrison, and Monroe counties. These counties have very little public transportation, very high unemployment, and a severe lack of mental health resources for the under- and un-insured. Tri-County is the ONLY agency in this area consistently provided services to this group. Approximately 150 consumers who do not have health insurance or Medicaid will be provided mental health services of counseling, case management, and psychiatric services.</p> | Tri-County Help Center, Inc. | 25 | 0 to 30 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Belmont | Lift Station Replacement Project | The village or raising has three dry wey wet lift stations for their sewer system that were constructed in the late 1950's and a smaller submersible lift station constructed around 1970. The three older stations are in extremely poor condition and need replaced with new stations constructed adjacent to the three older stations. The three older stations would then be demolished after the new stations are operational. The fourth smaller lift station will be abandoned and its flows rerouted to one of the new lift stations | Village of Flushing | 6 | 31 to 90 days | \$800,000 |
| Belmont | Main Office Purchase | Tri-County Help Center, Inc. has been renting office space in two locations in Belmont County Ohio. Due to flat funding and cost of doing business increases, our occupancy costs continue to rise. If we were able to purchase the building in which we are now located and combine the staff from our other location the agency would realize a minimum of \$450,000/month savings. This savings could be used to improve staff salaries, benefits, and working conditions, thereby improving services the Belmont, Harrison, and Monroe County residents. The cost of purchasing the current structure would be approximately \$450,000. The business utilizing the bottom floor would vacate. Tri-County would renovate the bottom floor at an approximate cost of \$75,000.00, for a total of \$525,000 | Tri-County Help Center, Inc. | 30 | 31 to 90 days | \$525,000 |
| Belmont | Crisis Intervention and Community Stabilization Un | This project will purchase 20 beds of crisis intervention units for people with severe and persistent illness in southeast Ohio who can benefit from crisis stabilization in the community. It will prevent inpatient admissions and/or it will shorten the length of state psychiatric hospital stay. It is anticipated to reduce the average number of individuals in a state hospital from 6.5 per day to 4 per day and reduce the number of bed days consumed from estimated 2928 in 2009 to 1460 days per year. It will provide over 7 professional and paraprofessional positions for nurses, nursing assistants, and mental health technicians. | Southeast, Inc. | 7.25 | 181 days or more | \$682,500 |
| Belmont | Crisis Intervention Team Training | This project would provide training to law enforcement personnel in five eastern Ohio Counties (Tuscarawas, Carroll, Belmont, Harrison, and Monroe) in the CIT model. The CIT program is a partnership between law enforcement, the mental health system, and consumers of mental health services and their families. Police/sheriff officers are trained about the mental illness, the mental health system, and how to deescalate a crisis situation involving a person with mental illness. Once trained, CIT officers are first responders to calls involving persons with mental illness. | Southeast, Inc. | 0 | 31 to 90 days | \$50,000 |
| Belmont | Water Meter Project | The City of Martins Ferry currently does not have water meter to measure the amount of water that are businesses and residents are using. By placing water meters into all of our customers locations, including residential, commercial and industrial, the City will be able to determine the actual amounts of water being used. It has been determined that the City of Martins Ferry would need about four thousand (4,000) water meters. The City also serves water customers outside of our corporation limits including parts of Belmont, Harrison and Jefferson Counties. The following are the costs involved in the purchasing and installation of the water meters and supporting equipment: 1. 4,000 Meters @ \$176.00 = \$704,000. 2. 4,000 Pits for Meters @ \$75.00 = \$300,000. 3. 4,000 Installation Fees @ \$75.00 = \$300,000. | City of Martins Ferry, Ohio | 2 | 31 to 90 days | \$1,327,950 |
| Belmont | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WIMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Belmont | Expansion of TR | Final renovation of century old building into a women's spa that provides beauty services at reasonable rates to maintain affordability lower income families. A portion of the building will also be used as a community room / meeting place for groups that cannot afford to purchase or rent a permanent meeting space. | Tropical Rays | 10 | 0 to 30 days | \$124,900 |
| Belmont | Rehab runway lighting | Rehab runway lighting | Belmont County Airport Authority | 5 | 181 days or more | \$323,522 |
| Belmont | New Central Fire Station | The existing fire station at 1400 Main St is in need of renovation. It is currently being used and are outdated and beginning to show their age. The new station would be located in a central part of the town with five ten bays as well as sleeping, living and general quarters as well as office space and training rooms. We would make the station compliant with new green standards for the environment and by building one station would save thousands of dollars in wasted utilities at the current stations. This would be a benefit to our city as well because all of our firefighters would be under one roof and be able to respond necessary equipment more efficiently. | Martins Ferry Volunteer Fire Department | 150 | 91 to 180 days | \$18,000,000 |
| Belmont | Project for Workers & Jobless workers Facing House | 1. Utilize the 12,000,000 dollars that are required 2. 70,000 jobs secured will be employed within 3 months 3. Additional 30,000 will be employ after 16 months 4. We expect to double digit employment at the end of 24 months 5. Jobs will be allocated in counties that have faced house foreclosures and those that are facing house foreclosures 6. The project will be in collaboration with welfare & unemployment department | Taslem | 300,000 | 0 to 30 days | \$1,700,000,000 |
| Belmont | Repaving Township Road #298 Lockwood Run Road | Repave 4.5 miles of township road #298. This project was the last one cut per Issue II funding awarded in 2008 in District 18 of the Ohio Public Works program. | Mead Township, Belmont County | 7 | 0 to 30 days | \$60,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------|----------------|--------------------|---------------------------|
| Belmont | Wastewater Lift Station on North End | Lift Station for new housing development including the following 2- 7.5 HP pumps @87 gal/min. @ 60' of head, 5' diameter wet well 20' deep, 5' diameter valve box, 8x10 building for controls,1000' of 4" force main, electrical work, engineering | Village of Powhatan Point | 2 | 181 days or more | \$205,000 |
| Belmont | Wastewater Lift Station on North End | Lift Station for new housing development including the following 2- 7.5 HP pumps @87 gal/min. @ 60' of head, 6' diameter wet well 20' deep, 5' diameter valve box, 8x10 building for controls,1000' of 4" force main, electrical work, engineering | Village of Powhatan Point | 2 | 181 days or more | \$205,000 |
| Belmont | Relining of Sewer Lines | 8" CIPP lining 45,000' 4" CIPP lining 28,000' Chamber install 800 Mobilization Reinstatements/Grout 800 Manhole Rehab Traffic Control Bonds Any amount of funding would be greatly appreciated to assist our small village with the relining of the deteriorating sewer lines. We have been working on this project but have depleted our funding. If the relining is not performed soon, the lines will be unable to be relined and will have to be dug up and completely replaced which is extremely more costly. | Village of Powhatan Point | 12 | 0 to 30 days | \$8,277,250 |
| Belmont | Powhatan Point Waterline Replacement | 13,500' of 2" SDR 21 CI 200 PVC 3,600' of 4" SDR 21 CL 200 PVC 48,500' of 6" C900 DR 14 PVC 2,500' of 8" C900 DR 14 PVC 19,600' of 3/4" PE Service tubing (avg. 20'/service) 980- Water Meter & Box 40- 2" Gate Valve & Box 10- 4" Gate Valve & Box 75- 6" Gate Valve & Box 2- 8" Gate Valve & Box 80' of 4" Steel Casing (Bore & Jack) 420' of 12" Steel Casing (Bore & Jack) 400' of 6" Bridge Crossing 80- Fire Hydrant complete 5,000 lbs of fittings 26,500' of asphalt repair Traffic Control Testing Video Taping Mobilization Seeding & Mulching Bonds Engineering & Inspection | Village of Powhatan Point | 32 | 91 to 180 days | \$9,397,750 |
| Belmont | Powhatan Point Waterline Replacement/County Connec | The expected outcome for this project would be that the old, deteriorated waterlines would be replaced and eliminate the numerous breaks/repairs that are made yearly. The village water system | Village of Powhatan Point | 32 | 91 to 180 days | \$9,397,750 |
| Belmont | Powhatan Paving & Storm Drainage Project | 1,341 cy of 1 1/2" Surface Course 3,225 gallons of Tack 11,265 gallons of Prime 19,434' of Linear Grading 35- Catch Basins Mobilization Traffic Control Engineering & Inspection Bond | Village of Powhatan Point | 11 | 31 to 90 days | \$1,324,259 |

The drainage from streets located on hills would be better maintained and routed to improved disposal areas. Any | Village of Powhatan Point | 22 | 91 to 180 days | \$3,127,322 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Belmont | Allen Avenue & Hopple St. Storm Sewer Improvements | 1,302' of 24" Pipe 868' of 36" Pipe 28- Catch Basins 600' of Pavement Repair Mobilization Traffic Control Bond Engineering & Inspection This project will connect a storm water drainage issue at the bottom of a very steep grade along with numerous low lying areas where water collects and does not drain. Numerous streets and residents would benefit from this project. Traffic Control Device at the intersection of State route 7 and State route 146 including labor, equipment, material, contingencies and engineering | Village of Powhatan Point | 11 | 31 to 90 days | \$663,490 |
| Belmont | Powhatan Point Traffic Light at Intersection of SR | The project will ensure the safety of the motorists at this busy intersection as suggested by a study performed by ODOT. | Village of Powhatan Point | 4 | 31 to 90 days | \$122,000 |
| Belmont | Powhatan Park & Pool Renovations | Renovations/Replacement of swimming pool, bathroom, pump house and basketball courts Construction of a new Skate Park and Shelter This project would increase the revenue of the Park District and create outdoor activities for the youth of our village and surrounding areas. | Municipal Park District of Powhatan Point | 10 | 91 to 180 days | \$930,000 |
| Belmont | Technology updates and improvements | To maintain complete edge, keep long established jobs ongoing, the school would like to provide smart or "white" boards for every classroom in the building. The additional technology will enhance and improve the education of children, by involving them more in the learning process. Instruction have integrated the technology into classrooms and informed parents are looking to schools to provide the latest aides. The addition of this technology will help the school to market to new students, thus securing the long heritage of services. This will allow the current professional and support staff to maintain their positions and may open new avenues to previous positions or create new positions. This technology in our school would allow us to be more competitive for retaining and future students. The addition of this to all our classrooms would benefit our program. Statistics and references on the positive effect of this service are readily available. Better educated students at our level, better prepares them for lifelong learning and performance | St. John Central Grade School | 22 | 91 to 180 days | \$28,542 |
| Belmont | Pearl Street Waterline Project | Replace an aged eight (8) inch waterline that provides water service to businesses and residences. This line has had to be repaired many times and the shut-off valves do not work, causing an entire section of Martins Ferry's water system to be shut down. Three (3) new fire hydrants and new service lines will be installed. Any abandoned and existing old waterlines will be capped. This new water line will allow the residents and businesses to have safe and uninterrupted drinking water and other safety related services. Listed below are the improvement to be made: 1. 8" Waterline - 750 Linear Feet 2. 8" Valve - 2 3. Fire Hydrant & Watch Valve - 3 each 4. Union Street Tie-in w/Valve - 1 5. Buckeye Street Tie-in w/Valve - 1 6. Breitenstein Lane Tie-in w/Valve - 2 each 7. Type II Asphalt Pavement Replacement - 750 | City of Martins Ferry, Ohio | 11 | 31 to 90 days | \$225,000 |
| Belmont | I-70/Mall Road Interchange Amendments | Eliminate 15 standard design locations and 16 ODOT crash hotspots in the project study area (according to ODOT's consultant HDR Engineering, Inc.) by constructing a split diamond interchange at Mall Road & I-70. To also include: Longer bridge over I-70 at Banfield Rd. New bridge over I-70 at old weigh station New connector road from Rt. 40 across new bridge to Willow Grove Rd. And other work identified in ODOT PDP Study Steps 1-4 This project as applied for herein is a total project concept. It is supported by the County Commissioners, Township Trustees, Transportation Improvement District and City. Project is well know to ODOT, ODOD, and elected officials at state & federal levels. A first phase has been applied for as an alternative project under the name "St. Clair Commons Development". | City of St. Clairsville | 2500 | 181 days or more | \$14,000,000 |
| Belmont | Automated Utility Meter Reading Project | Provide an automated water and electric meter reading systems gain efficiency and effectiveness in reading 3000 utility accounts and billing for wastewater, water and electric systems respectively, Rehabilitate former fairgrounds building for reuse as a community center. Stimulus funds will pay for "green" improvements including HVAC, windows, insulation, storm water control, etc. as part of our overall building renewal project. | City of St. Clairsville | 20 | 31 to 90 days | \$450,000 |
| Belmont | Community Events Building | | City of St. Clairsville | 50 | 31 to 90 days | \$200,000 |
| Belmont | tennis courts | New tennis courts to enhance the Mead Township Park Districts amenities, while expanding it's user base. Will also provide a resource for improving the residents quality of life, wellness and physical fitness while also expanding the park's financial base with lesson and competitive events. | Mead Township, Belmont County | 20 | 0 to 30 days | \$25,000 |
| Belmont | Batting Cage | The batting cage will enhance the Parks baseball fields and training capabilities for youth leagues. The batting cage will be available to the public for a minimal fee through the use of automated equipment thus providing an additional revenue source to the park | Mead Township Park District | 20 | 0 to 30 days | \$60,000 |
| Belmont | Park Shelter(s) | Construct two new park shelters which will expand the Parks facilities allowing the park to provide more summer programs for our youth while also providing covered areas for picnics, graduation/birthday parties and places for park users to relax and find shade | Mead Township mPark District | 25 | 0 to 30 days | \$56,000 |
| Belmont | Park Marina Fitness Trail | Park Marina Walking and Fitness Trail will be a mile long connecting all the Park's amenities as well as partnering with the Village of Shadyside and the Shadyside Marina, a privately owned facility. The Marina Park Trail will have ten fitness stations for all ages as while being handicapped accessible. An overlook is planned at the Marina for viewing the Ohio River and natural surroundings. The amenity will expand the Park's users groups while also enhancing it position as a destination point for both the immediate and surrounding communities. | Mead Township Park District | 50 | 0 to 30 days | \$175,000 |
| Belmont | Miniature Golf Course | We would like to diversify the activities offered at the Park by providing a miniature golf course. This activity would increase both the Park's users groups and financial base while also increasing the Park's overall appeal and amenities. | Mead Township Park District | 20 | 0 to 30 days | \$35,000 |
| Belmont | Paving of Park's Main Entry Drive and Parking Lot | We would like to request funding for paving of the Mead Township Park's main entry drive/road through the park as well as its parking lot. Paving the road would eliminate dust and mud problems as well as making it more accessible to all age groups and handicapped. | Mead Township Park District | 40 | 0 to 30 days | \$59,000 |
| Belmont | TRAIN DEPOT REHAB | REHABILITATE KUMBER TRAIN DEPOT TO SERVE AS A COMMUNITY LOCAL POINT FOR THE EXISTING BIKEWAY, CENTERPIECE OF COMMUNITY GARDEN PROJECT (BUILT BY OTHERS), AND TO BE AN EDUCATIONAL RESOURCE FOR THE ADJACENT K-12 SCHOOL, AND FOR THE MASTER GARDENERS PROGRAM OPERATED BY OSU EXTENSION SERVICE. ALSO SERVE AS A PIECE OF TRANSPORTATION HISTORY. | CITY OF ST. CLAIRSVILLE | 10 | 91 to 180 days | \$280,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Belmont | Residential Homes Demolition in Bridgeport, Ohio | At this time there are many homes in the Village of Bridgeport which have not been occupied for years. The Village has prepared an inventory of the following unoccupied homes as shown below. 1. On Kennon Street --- 3 homes 2. On Whitely Street --- 1 home 3. On Bennett Street ---- 1 home 4. On Howard Street ---- 3 homes 5. On Bench Street ----- 1-home 6. on High Street ----- 1 home 7. On Mann Street ----- 1 home 8. On Oak Street ----- 1 home 9. In Aetnaville -----1 home 10. On Old Cadiz Road -1-home The above described homes are all a public nuisance presenting health hazards from rat infestations, physical hazards particularly to kids who might consider the house a safe place to play, and also the homes are fire hazards. Property values for adjacent property owners are also negatively affected. Removing the homes will not only remove the present dangers addressed above but will provide a building site for new construction which will provide the Village of Bridgeport with much needed additional revenue. | Street Engineering & Surveying | 5 | 0 to 30 days | \$250,000 |
| Belmont | Old County Home Project | will result in the restoration of the 30,000 s.f., 1870 Old County Home and a 20,000 s.f. addition. The project will house the award winning Building Preservation Technology Program, Industrial Trades Program and the college's science labs consolidating these programs currently offered in different structures that are physically inadequate and lack proper ventilation. Designed to show that historic buildings can be rehabbed green and energy efficient, the building will solidify Belmont as the premier center for Building Arts training in the nation. The BPA program, a state Center of Excellence, restricted by limited space, will be able to recruit more out-of-region students increasing its direct contribution to the local economy which now stands at over \$250,000 per year. The building will include the creation of biology, anatomy, cadaver, microbiology and chemistry labs, allowing the college to offer STEM related courses and alleviate overcrowding in its existing single science lab. Increased industrial labs will allow the college to meet the retaining needs of local industry. Provide two Park shelters to expand our facilities allowing us to provide more outdoor programs for our youth, while also providing covered areas for picnics, graduation/birthday parties and places for users to relax, find shade and simply enjoy the Park. The shelters will also create an additional revenue source for the park as more monies to be put back into the Park for more amenities and youth programs | Belmont Technical College | 250 | 91 to 180 days | \$7,000,000 |
| Belmont | Park Shelters | Provide a Boat ramp and parking facility that's handicap accessible with picnic grounds and viewing areas. Currently there is no such facility in Mead Township with the closest such facility some 10 miles away in an entirely different City and Township. The Ramp has been ready to go for over five years with out available funding for construction. This project would be a wonderful asset to the Park District and the community as a whole making the areas most valuable resource, The Ohio River, accessible to all for boating, fishing and general recreational use. | Mead Township Park District | 20 | 0 to 30 days | \$28,000 |
| Belmont | Mead Township Park Marina | Power Wash Interior and Exterior of 175,000 gal water tank. Scrape and repair interior and exterior for Coatings on outside and inside. Fix water gauge, install osha safety ladders and climbing cable devices, stabilize tank floor to foundation, lightning protection, weld anchor bolts, replace roof vent, weld any pits, chalk where necessary. | Mead Township Park District | 45 | 31 to 90 days | \$300,000 |
| Belmont | Maintenance for Village water Tank | Installation of approximately 4,661 feet of 8" SDR35 sanitary sewer pipe, 1,200 feet of 4" CL 160 force main, 24 precast concrete manholes, a sewage lift station complete with a generator, and 32 service taps. This project has come as a result of complaints received by the Ohio EPA. The area within Village corporation is currently not provided with sewer service. The residents currently have septic systems which are failing. The health and safety concerns within a corporation will dictate a mandate from the OEPA to complete this project. | Village of Belmont, Ohio | 6 | 31 to 90 days | \$96,700 |
| Belmont | Highland Avenue Sewer Extension | Aeration for pathogen reduction and vector attraction treatment by a rotomix system powered by blowers in a building housing. Also a dry sludge storage building complete with a sewage press for dewatering of human waste product allowing the village to landfill apply the product. We have included a new lab building as well. U.S. EPA Sludge Regulations and a violation of our NPDES permit calls for completion of this project. We have been working on this project since the year 2000 and have received a \$400,000 grant and a \$40,000 loan from OPWC. Engineering is 100% complete and submitted to OEPA for review by DEFA for the lab, tanks, and blower building. Design is near completion for the dry storage and press. Site facility plan and flood Zone study are also near completion. | Village of Barnesville | 12 | 181 days or more | \$600,000 |
| Belmont | Barnesville Wastewater Treatment Plant Improvement | Construct a precast concrete pressure reducing valve vault with 8" and 6" ductile iron pipe, 2" red brass pipe, two pressure reducing valves, miscellaneous fittings and valves, sump pump, two tie-ins on 12" ductile iron pipe and related appurtenances. | City of Martins Ferry | 6 | 0 to 30 days | \$51,000 |
| Belmont | Sunset Heights PRV Vault | Project will solve a low pressure problem in a portion of the outside distribution system. | Bellaire Park District | 10 | 31 to 90 days | \$20,000 |
| Belmont | Boat Launch Pavillion | The Bellaire Park District in cooperation with the Village of Bellaire would like to build a pavillion at the newly constructed boat launch in Bellaire. The boat launch was built with funds from the Ohio Department of Natural Resources and it provides access to the Ohio River for fishing and recreational boating. Building a pavillion at the site will make it more attractive for boaters to use the site. It will also provide a facility that would be able to be used for fishing tournaments and other activities. | City of St. Clairsville | 500 | 91 to 180 days | \$1,127,000 |
| Belmont | St. Clair Commons Water-Wastewater Systems | 3700LF Sanitary Force Main --- 1 WW lift station w/generator --- One 700,000 gallon water storage tank. Project will provide main line utilities into a 100 acre development site adjacent to the Ohio Valley Plaza thereby helping to create a job ready site for construction and more importantly permanent jobs. | Bellaire Park District | 20 | 91 to 180 days | \$60,000 |
| Belmont | Park sewage and restroom project | This project would extend sewage to a park and build restrooms. ODOT is currently doing a highway improvement and relocation project in the area so this project would fit in with the work currently being done. Sewer lines are very close to the park and it would not be difficult to extend them. Park currently includes 3 ballfields, a shelter and a playground. Plans are to add another ballfield. | Belmont County Department of Job and Family Serv | 100 | 181 days or more | \$4,000,000 |
| Belmont | Indoor Swimming Pool | There is currently no indoor pool facility in Belmont County. This project would serve people throughout the county including school swim teams, people needing rehab, older citizens and all residents in the county. Bellaire Park District is in the process of requesting that the state of Ohio turn over property they acquired as a result of problems with an abandoned coal mine. The new facility would be built on this property. This would both provide a much needed facility for an entire region but also deal with a brownfield site. | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Belmont | Epworth Community Center | 154' x 96' parking lot, remove large oak tree dangerously hanging over parking lot, and replace 24 old primary windows in EpC with new energy efficient windows in Village of Bethesda. Repaving will prevent further access road deterioration, tree removal prevents bodily harm and/or auto damage, and new windows will improve room temp from cold to comfortable. EpC is the only community facility serving Bethesda's low-to-middle population of approximately 2500, meeting their housing repair, food and furniture needs. EpC supervises community work projects conducted by inmates while providing lunch daily until projects are completed. Girl's Group Home participates in hunger outreach program, community service projects, and supervised social events. Special luncheons are held for both inmates and group home throughout the year. EpC hosts health fairs, supplemented screenings, flu shots and informational events. EpC also hosts retreats and educational experiences for both youth and adult groups. EpC can begin project 31-90 days upon receipt of funds for a total of \$12,500. The Village of Belleaire has been in a non-compliance situation with the Ohio EPA since approximately 1999 due to low water pressure in the service area known as Brooks Run (McCorkle's Addition). This area is comprised of approximately 87 households on the Belleaire Municipal water service. All services have low pressure. There are also several fire hydrants in Brooks run which also have low pressure. This situation poses a health and safety problem for residents on the water system due to low water pressure and no fire protection. | Epworth Center | 2 | 31 to 90 days | \$12,500 |
| Belmont | Brooks Run Water System Improvements | Brooks run is outside of the corporation limits, thus water customers pay a higher water rate. This higher rate along with a \$3.50 monthly infrastructure fee make it able to sustain the cost of planning and design. However the Village has found that the project could be completed in a more timely fashion, thus providing adequate pressure for the area if a loan were to be granted to finance the project. | Village of Belleaire | 12 | 91 to 180 days | \$965,000 |
| Belmont | Higher Education | My background includes a save years at springport school district as a systems administrator. I am a single father of a beautiful 3 year old son. I strive to be successful and would like to give back to my community. My district's tuition reimbursement program provides a mere \$500.00 a year. At this time I can not afford college and fear that my lack of education may someday cost me my job. | Bridgeport School District | 1 | 31 to 90 days | \$25,000 |
| Belmont | Pediatric Therapy Clinic | Currently kids with special needs travel @30 miles for therapy and there is no early intervention services for therapy. I propose to build a state of the art therapy center that employs therapist for outpatient, home early intervention and school based therapy. I currently work out of my home providing early intervention to a small number of kids and service a school district. I would service children with special needs including autism. The building would need to be built to specifications for disabled kids. I want to offer a technological therapy clinic. This will give our kids in Ohio a great advantage. Currently, the kids that do get service go to West Virginia. This project would help keep Ohio dollars in Ohio! Thank you | KatOT, LLC | 100+ | 0 to 30 days | \$1,000,000 |
| Belmont | Cabin Project | to house work teams that make building repairs for people who can't afford them. Building repair projects are completed in 6 area counties. Cabins also house retreat and educational participants. Each cabin would sleep 25 persons. Estimated cost per cabin is 250,000. Waterline and roadwork also need to be completed. We feel with improved cabins more groups would enroll in our program and we'd be able to triple projects completed in a year. While visiting other repair organizations, those that increased quality housing doubled in participation and effectiveness. More educational and retreat events could also be held. All work will be done with union labor. We estimate 30 jobs will be created by this project. Total estimated cost is \$810,000 and can begin 31-90 days after funds received. | Epworth Center | 30 | 31 to 90 days | \$810,000 |
| Belmont | New Police Station | The project would consist of the construction of a 30'x60' building to house the police department. The building that is currently utilized by the department has been sold for a minimal amount due to the condition of the building. | Village of Powhatan Point | 4 | 31 to 90 days | \$180,000 |
| Belmont | OVERVIEW POINTE | SERVICES FOR MENTALLY ILL AND NON-VIOLENT SEX OFFENDERS BEING RELEASED ON PRC OR PAROLE. THIS FACILITY WOULD PROVIDE EDUCATIONAL, MENTAL HEALTH AND APA SERVICES WHILE CREATING EMPLOYMENT OPPORTUNITIES FOR LICENSED AND CERTIFIED PROFESSIONALS. THIS PROJECT WOULD ASSIST IN HOUSING FELONS WHOM EXPERIENCE A LACK OF SERVICES UPON RELEASE. THIS PROJECT WOULD CREATE COMMUNITY SERVICE OPPORTUNITIES TO "GIVE BACK" TO THE TAXPAYERS AND CREATE BRIGHTER FUTURES FOR THESE FELONS IN HOPE TO DECREASE RECIDIVISM AND ASSIST IN A SMOOTHER AND MORE PRACTICAL TRANSITION BACK INTO THE COMMUNITY. THIS IS CERTAIN TO PROVE TO BE A "WIN-WIN" PROJECT FOR THESE TIMES OF NEED FOR BOTH BELMONT COUNTY AND ODR&C. | BELMONT CORRECTIONAL INSTITUTION | 35 | 31 to 90 days | \$6,500,000 |
| Belmont | J.W. Stenger Trucking, a Clean Fuels Ohio partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Belmont | martins ferry bakery roof replacment | the martins ferry bakery includes a roof that needs considerable repair. in order to reduce facility heat loss and possibly introduce rainwater capture to the facility, the roof must be fully rehabilitated the current bakery has a roof that covers approximately 80,000 square feet. | alfred nickles bakery, inc. | 0 | 91 to 180 days | \$250,000 |
| Belmont | Music Studio | Urban teens are constantly being influenced by music. Music and poetry allow them to express their thoughts and feelings. Our desire is to give them a safe creative environment where they can express their feelings and grow in their creativity. This will also give teens an opportunity to learn how to use the equipment and open their horizens to different career paths | Dirty Vagabond Ministries | 2 | 31 to 90 days | \$25,000 |
| Belmont | Enhanced Domestic Violence Program | To provide increased training to law enforcement, prosecutor's offices and court systems in the response and handling of domestic violence cases in Belmont, Harrison, and Monroe Counties. To increase staff at the domestic violence shelter to provide for increase victims of domestic violence who are presenting to shelter. To provide one more support staff for the increase in clients | Tri-County Help Center, Inc. | 3 | 0 to 30 days | \$60,000.00 |
| Belmont | mobile equipment | A) For 1 cruiser: in-car video system with wireless microphone and radar system with dual antennas B) Three laptops for three cruisers with cell-cards and L.E.A.D.S. access for one year | Village of Powhatan Point Police Department | 3 | 0 to 30 days | \$22,500.00 |
| Belmont | The City of St. Clairsville Street Light Bulb Repl | vapor street light bulbs in the city with energy efficient LED (light emitting diode) bulbs. A total of 65 mercury vapor bulbs will be replaced with LED bulbs. By switching bulb types, it is anticipated that we will reduce by 80 percent the energy consumption and the energy costs associated with the existing bulbs. The City will share the cost of this project. Twenty percent of the cost of the project will be funded by St. Clairsville while the remaining eighty percent will utilize the Federal Stimulus Program funds. Increasing energy efficiency is a goal of most American communities today. With this project, St. Clairsville will become more energy efficient and reduce energy consumption. This will result in financial savings making us more fiscally responsible. This project will be innovative, as it will be the first in Belmont County and improve efficiency. The savings the City realizes will allow other projects to be accomplished while creating employment opportunities. | City of St. Clairsville, OH | 5 | 31 to 90 days | \$80,000.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Belmont | Emerging Energy Technologies Program | energy programs by identifying the most cutting-edge, commercially available technologies that are available throughout the U.S. Federal laboratory system. The selected opportunities will address current technological and market limitations while being available for rapid deployment. Targeted technologies must: increase energy efficiency, improve the reliability of energy, and substantially reduce life-cycle greenhouse gas emissions. This project is expected to lead to the transfer of developed technologies and innovative approaches that will improve renewable energy applications and promote energy efficiency. This project will encompass the in-depth knowledge of current research projects focusing on water, energy and the environment within the DOE's National Energy Technology Laboratory and EPA's Office of Research and Development. Results of this program represent a collaborative effort with industry to leverage federal dollars, providing Ohio companies with a competitive advantage in the global marketplace. No research will be funded with this grant. | Strategin, LLC | 6 | 0 to 30 days | \$350,000.00 |
| Belmont | Green Technology Transfer: Water & Wastewater Mana | infrastructure practices, including but not limited to green roofs, rain barrels, pervious pavement and rain gardens. It will also provide the knowledge of how to transfer green technology systems that will improve water/wastewater management and resources. Green infrastructure techniques utilize natural or man-made systems to capture and cleanse storm water where it falls. On a local scale, green infrastructure techniques consist of site specific best management practices that have been proven effective across the country. In fact, many cities have found green infrastructure to be a cost effective strategy for reducing combined sewer overflows. Using commercially available products and state-of-the-art techniques, the use of innovative best management practices (green infrastructure) are making a difference both with capture of storm water and the implementation of cost saving strategies. By creating partnerships with leaders in the field, a consortium will be created to promote and assist with implementing green projects in Ohio. | Strategin, LLC | 4 | 0 to 30 days | 300,000.00 |
| Belmont | In Car Video System | install an in car video system in police cruiser. Video system aid in the officers duties while on patrol and with court cases involving traffic stops. | Barnesville Police Dept. | 0 | 31 to 90 days | 5,000 |
| Brown | Critical Fire and EMS Communications Upgrade | improvements to the aging Countywide fire and EMS communication infrastructure to increase the safety of public safety first responders by adding/enhancing equipment to be located at five radio sites within the County. This system is the primary means of communication from the 911 dispatch center to the various Fire and EMS departments within the county. Age and deterioration to the existing system has created a critical infrastructure need. | Brown County Communication Center/E911 | 50 | 31 to 90 days | \$750,000 |
| Brown | Dist 9, PID 78174, BRO SR 221 0.00 | Overlay the existing asphalt surface w/asphalt concrete in order to preserve and maintain the existing roadway. | Ohio Department of Transportation | 37.2 | 31 to 90 days | \$1,294,953 |
| Brown | Brown CBMRDD Building Project | 1.5x4 existing has a bad leaky flat roof. Remove existing single ply roof system to the insulation; repair/replace deck as needed; install blocking; install 2" ISO board; install 1/2" woodfiber board in BUR+ 102; install Genisys system HS21; install flashing/metals. Tile, carpet, drafty windows need replaced. Sidewalks and wheelchair ramps needs replaced (concrete crumbling). A super generator for the facility to house our 78 individuals with disabilities in Brown County during outages/disasters (no electric). | Brown County Board of MRDD | 8 | 31 to 90 days | \$155,000 |
| Brown | Aberdeen Water Treatment Plant and Wellfield Proj | The Aberdeen Water Treatment Plant and Wellfield Project involves the construction of a new water treatment plant and wellfield to serve the 1100 customers in Aberdeen. The existing water treatment plant and wellfield are inadequate and cannot provide the quality and quantity of water needed. | Village of Aberdeen | 150 | 181 days or more | \$500,000 |
| Brown | Resurface Runway, Rehab Lighting, Expand Apron | Resurface runway, rehabilitate medium intensity runway edge lighting, expand aircraft parking apron. | Brown County Commissioners | 35 | 31 to 90 days | \$2,106,500 |
| Brown | Brown County Waste Water Treatment Lines | The Village of Russellville. The lines will, in the short term connect to the existing lagoon system currently employed by the village. We also will expand the existing line width to accomodate additional growth in the area. Currently the lines are 3" diameter lines. We propose to upgrade to 8". Our expected outcome is approximately 2000 linear feet of new sewer lines and increased wastewater removal capacity for a portion of the County. | Brown County Board of Commissioners | 50 | 0 to 30 days | \$2,500,000 |
| Brown | Higginsport Fire Station | The Brown County Commissioners are seeking \$1.5 Million to construct a new firestation in the Village of Higginsport. Currently the Village Station is in urgent need of upgrade. This funding will allow the Village to add additional space for trucks and equipment as well as sleeping/living quarters for the firefighters. The County will additionally, be able to ensure excellent fire service to more of our residents. | Brown County Board of Commissioners | 50 | 31 to 90 days | \$1,500,000 |
| Brown | Russellville Volunteer Fire and EMS Departments | The Fire and EMS volunteer organizations in the Village of Russellville are becoming a joint Fire and EMS district. They presently serve the adjoining Townships, Village and do cover runs for districts close to them. Their members are being cross-trained in order to provide more efficient emergency services. The present Fire house has the land and the room necessary to put on an addition which is need to house the EMS supplies and equipment. They need funds to build this addition. The plans have been agree to by both departments. They will work together to accomplish this venture that will make for a stronger organization, which intum will provide much needed services. | Brown County | 30 | 31 to 90 days | \$150,000 |
| Brown | Mediation Coordinator | Our county is in need of a mediation program for disputes where there isn't sufficient evidence for a criminal prosecution. People feel twice victimized when a criminal isn't prosecuted. When people feel let down by the legal system, they are tempted to take the law into their own hands. Often when we decline to prosecute an alleged misdemeanor offense it is because we can't distinguish between the victim and the perpetrator. These parties are often left in volatile situations with no forum to vent their disputes, short of litigation. I would like to have someone to send the parties to work out their disputes. | Brown County Prosecutor's Office | 2 | 0 to 30 days | \$55,000 |
| Brown | Small scale bio-pellet production | The program would need an attorney with mediation background, and a secretary. The purpose of this project is to create a viable public and fuel pellet production facility. This facility is to serve both as a producer of combustible pellets to be sold and as a pilot center to demonstrate the viability of small scale pellet production in rural Ohio. Pellets will be made utilizing various stock plants grown easily in Southern Ohio, including grasses, wood, and crop waste. In addition to providing rural Ohio with additional sources of income, this approach to bio-fuel production will provide farmers and rural residents with a local, self sufficient alternative to foreign fuel. This fuel will be "carbon neutral" and, due to local production, will minimize the need for excess transportation. | Free Soil Farms | 5 | 31 to 90 days | \$75,000 |
| Brown | Waste to Energy Project at the Rumpke Landfill | The Village of Georgetown, Ohio is seeking funds to build an electric generating facility that will utilize methane removed from the Brown County Landfill. When Complete we will be able to generate electrical power for the Village residents and businesses. We are specifically asking for funds to assist in constructing the building, purchase two Caterpillar 3516 generators and construct the associated infrastructure needed for the methane separation process. As we mentioned earlier, this project will provide renewable electric power to over 1000 Georgetown residents and businesses. | Village of Georgetown | 30 | 31 to 90 days | \$7,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Brown | Active Directory Migration | The purpose of this project is to establish a stable and scalable platform on which Georgetown Schools will be able to plan for and build a robust solution based on their product roadmap. Georgetown Schools requires a secure, efficient, and cost-effective infrastructure that is centrally managed and promotes product integration. The above will be achieved by migrating from Netware 6.5 to Microsoft Active Directory using MS Server 2008. This is a necessary move since Novell will no longer be supporting its version of a network operating system. This project will not only create skilled jobs, but Georgetown Schools will experience an immediate Return On Investment through resource consolidation. This is a move that will reduce energy consumption and provide long-term economic benefits to the school district. Project would include installation of an underground fuel tank. Currently, the School District's buses are fueled off-site. Installation of an on-site tank would enable the School's buses to fuel on-site and would enable the district to pursue soy biodiesel as a fuel option. | Georgetown Exempted Village Schools | 2 | 0 to 30 days | \$25,000 |
| Brown | Underground Fuel Tank for Soy Biodiesel | The Village of Georgetown is seeking funds to expand and upgrade sewage lines. The project seeks to upgrade lines and extend new lines to portions of the Village currently with out service. The existing lines will be expanded and repaired to allow for additional capacity. The remaining portion will run lines north along OH-68 into Wahlsburg, Ohio. This kind of infrastructure improvement will serve to benefit the Village from both an economic development standpoint but, just as importantly, from an environmental standpoint as well. Stop existing water infiltration, eliminate existing and prevent future mold growth. Stop masonry deterioration. Stop existing water infiltration, eliminate existing and prevent future mold growth | Georgetown Exempted Village School District | 2 | 31 to 90 days | \$50,000 |
| Brown | Village of Georgetown Sewage Line Expansion and Up | Replacement Hospital - Sole Community Provider This project will allow our hospital to have a state of the art CT Scanner to replace our current 10 year old machine. New services that will be offer will be vascular, carotid, and spine scanning. | Village of Georgetown | 75 | 91 to 180 days | \$2,000,000 |
| Brown | Exterior Building Maintenance | This project will replace a delapidated modular wood lab, eliminate fire hazard and improve safety Replace existing, obsolete system. Decrease energy consumption and improve patient and occupant comfort. | Brown County General Hospital | 3 | 0 to 30 days | \$500,000 |
| Brown | Roof & Gutter Replacement | The current Boyd Road wastewater pumping station was constructed to serve the residential development along Boyd Road. Since that time, substantial residential growth has occurred in the area and a large area has been created for present and future industrial and commercial growth along Brooks Malott Road and SR 32 which are tributary to the Boyd Road Station. At the present time there is an existing manufacturing facility, a new medial office and a new emergency care medical facility under construction and several new commercial projects in the design or planning stage which all drain to the Boyd Road station. In order to make wastewater capacity available for present and future job creating project, the station needs to be replaced with a new higher capacity station, with standby emergency power facilities. | Brown County General Hospital | 4 | 0 to 30 days | \$1,882,000 |
| Brown | Hospital Replacement Project | Additionally, the Boyd Road station discharges to the gravity sewer system along West Main Street and, once upgraded, will overload the gravity sewer system in that area. Therefore, a new force main must be constructed to reroute the Boyd Road discharge directly to the Treatment Plant south of SR 32. Sidewalks are in dangerous condition. Village does not have the funds to fix them and have discussed trying to find funds to do them before someone gets hurt. We are trying to enhance the village for future prospects of any new business or future housing and making the town safer for its citizens To help meet the demand for primary care services by those residents without insurance in Brown County and the surrounding areas, HealthSource of Ohio must expand its current community health center. There is increased need for primary care, dental, behavioral health and Ob/Gyn services-all which will be offered on a sliding fee scale for those without insurance. HSO has secured financing for the "bricks and mortar" for the new facility now under construction. The financing does not include funding for patient care equipment. This includes exam tables, infant scales, ultrasound, and computer equipment. As a community health center, HSO has extremely limited funds for capital needs. Without funding, rooms will go unequipped. Without equipment, providers and staff cannot be hired. Without personnel, fewer numbers of our most vulnerable population will go without the care they need. | Brown County General Hospital | 400 | 181 days or more | \$40,000,000 |
| Brown | Update of CT Scanner | Maintain school-based health center in Western Brown School District in jeopardy of closing in 2009-2010 due to lack of operational funding. The SBHC serves over 900 children in its program. To provide better, more cost effective healthcare for our rural community with Electronic Health Records. Our high school has never had football and our soccer facilities are lacking. We will be playing our first varsity football season in the fall of 2010. We have no where to play and we are currently playing all of our younger level games away. With not having any home games, we are unable to make money to benefit our athletic programs except through fundraising. Our baseball and softball fields have been moved to an off campus location because of construction on our new high school. Our community has a very proud tradition of supporting the school and have done so with passing a tax levy allowing us to build a new school. We have started fundraising for our new stadium but need additional funds to complete our goal. I thank you for your time and consideration | Brown County General Hospital | 6 | 0 to 30 days | \$1,500,000 |
| Brown | Laboratory Replacement | consisted of a wastewater treatment plant, 3 wastewater pumping stations and a grid of 8 and 10 inch diameter gravity sewers. Based on a report and flow study prepared by URS Greiner, that system is the source of a great deal of infiltration and inflow, which leads to reduce capacity at the WWTP during rainfall events. Additionally, there are sewage backups due to hydraulic overloads in the system. The Village has recently conducted smoke testing and a physical inventory of the entire sewer system to determine areas of inflow and infiltration. Approximately 5000 feet of the gravity sewer needs to be replaced or repaired in place and over 25 manholes need to be worked on to reduce the extraneous water. Additionally, the West Main Street pumping station needs to be upgraded. Since that study, the original Highmeadow Drive pumping station has deteriorated and must be replaced. In order to have wastewater treatment capacity to serve the existing population and to any future growth and job creation projects, it is essential that any extraneous water be kept | Brown County General Hospital | 25 | 31 to 90 days | \$1,400,000 |
| Brown | HVAC Control System Replacement | The Village has recently completed a \$ 3million dollar upgrade to their existing wastewater treatment plant (WWTP) as required by Ohio EPA. The project was done 100% with local funds without any outside funds used. Ohio EPA has indicated that additional facilities still need to be added to the plant satisfy their concerns and requirements. In addition to the previously completed work, the Village needs to install a new pretreatment screening facility, upgrade the digester, install an emergency generator and expand the UV disinfection facilities at the plant. In order to accomplish this work and to be able to handle future capacity expansions, the exiting electrical service, which is loaded to its rated 600 amp capacity at this time, needs to be increased to a 1200 amp service. After spending \$ 3 million for the recent improvements, the Village needs assistance to accomplish the remaining required work. Without complying with Ohio EPA's requests, the ability of the WWTP to accommodate job creating development will be severely limited | Brown County General Hospital | 3 | 0 to 30 days | \$96,750 |
| Brown | Boyd Road Lift Station Replacement | | Village of Mt. Orab | 20 | 91 to 180 days | \$1,600,000 |
| Brown | Deteriorating Sidewalks for the Village | | Village of Hamersville | 10 | 91 to 180 days | \$1,500,000 |
| Brown | HealthSource Mt. Orab | | HealthSource of Ohio | 15 | 31 to 90 days | \$600,000 |
| Brown | Western Brown School-based Health Center | | HealthSource of Ohio | 5 | 31 to 90 days | \$100,000 |
| Brown | Electronic Medical Record Project | | Brown County General Hospital | 3 | 91 to 180 days | \$719,990 |
| Brown | Fayetteville Athletic Facility | | Fayetteville High School | 50 | 181 days or more | \$500,000 |
| Brown | Sewer Rehabilitation Project | | Village of Mt. Orab | 8 | 31 to 90 days | \$910,000 |
| Brown | Wastewater Treatment Plant Improvements-Phase 1 | | Village of Mt. Orab | 20 | 91 to 180 days | \$1,955,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|----------------------------|----------------|--------------------|---------------------------|
| Brown | Wastewater treatment Plant Improvements-Phase 2 | In addition to the Ohio EPA required improvements noted for the Phase 1 WWTP Improvements, Ohio EPA has indicated that the Village must install a new clarifier and modify the existing aeration system and a install new oxidation ditch and modify the flow equalization basin and pumping system. Appurtenant site piping and electrical work must also be done in conjunction with the equipment installation. With the recent \$3 million outlay, the Village has no ability to spend additional monies on these improvements. Without complying with Ohio EPA's requests, the ability of the WWTP to accommodate job creating development will be severely limited. | Village of Mt. Orab | 20 | 91 to 180 days | \$3,345,000 |
| Brown | Grant Birthplace Exterior Restoration and Repaint | Ulysses S. Grant was born on April 27, 1822 in this home in picturesque Point Pleasant near the mouth of Big Indian Creek at the Ohio River. This one-story, three-room cottage, built in 1817, was adjacent to the tannery where Grant's father worked. At one time the birthplace made an extensive tour of the United States on a railroad flatcar and was also temporarily displayed on the Ohio State Fairgrounds. Scope of exterior restoration work: Restore or replace deteriorated sections of original beaded clapboard siding Restore and re-glaze window sash Install interior storm windows | Ohio Historical Society | 4 | 31 to 90 days | \$35,000 |
| Brown | Grant Boyhood Home Site Development & Landscaping | The Grant Boyhood Home is on the National Register of Historic Places and is a National Historic Landmark. The building was the home of Ulysses S. Grant, 18th president of the United States, from 1823, when Grant was one year old, until 1839 when he left to attend West Point. Ulysses Grant lived in this home longer than any other. Jesse and Hanna Grant, the parents of young Hiram Ulysses Grant, built the original two-story brick section of the Grant Boyhood home in 1823. A large kitchen was added the following year and five years later they built a new two-story home connected to the side of the original structure. Scope of Work: ?Construct handicapped-accessible entry to home to satisfy requirements of the Americans with Disabilities Act Accessibility Guidelines, a federal mandate. Excavate and restore extant original brick walkways around home and leading to outhouse and install new brick to complete the walkways as necessary. Remove trees in poor condition and replace with native oak and beech trees. The Village of Georgetown is seeking funds to upgrade their existing wastewater treatment facility | Ohio Historical Society | 5 | 31 to 90 days | \$50,000 |
| Brown | VILLAGE OF GEORGETOWN WASTEWATER TREATMENT PLANT I | The improvement program will include new processes and/or upgrades to the existing works. For compliance with wet weather regulations, the plant throughput will be increased to 3.0 MGD, and will maintain treatment for a sustained flow of 2.4 MGD. The wastewater treatment train will be upgraded as follows: • Headworks – the influent meter will be upgraded to provide a feed forward signal to control the advanced secondary treatment processes, the screen works will be enclosed for weather protection to enable winter operation, and the equalization basin pump station will be modified for continuous duty. • Advanced Secondary Treatment – a new four stage reactor train for biological phosphorous removal and nitrification will be installed in one tank of the equalization basin. The reactor tanks will consist of fermentation tank, anaerobic tank, and two stage aeration tanks for removal of biological oxygen demand and nitrification of the ammonia. Deep tank clarifiers will be constructed for | Village of Georgetown | 100 | 91 to 180 days | \$4,000,000 |
| Brown | District Security Improvements | Replace 10 worn out buses we currently don't have funding for. Add Security cameras to all of our school buildings for safety. Change building entrances in the school buildings for security purposes | Western Brown Local School | 10 | 91 to 180 days | \$1,100,000 |
| Brown | Water System Improvements-Phase 1 | The current water system, constructed in the early 1960's and upgraded in 1974 is in need of rehabilitation and repairs to continue operating at its present capacity. The repairs and rehabilitation needs to occur in four areas; the raw water intake pumping facility; the filtration facility, emergency power supply at the Water Plant and the system monitoring and metering equipment. The present raw water intake is located alongside Sterling Run and pumps water to the existing upground reservoir system during high flow events in Sterling Run. The intake structure is inadequate to optimize the capture of raw water during these high flow events and must be replaced with a unit that can maximize the supply of water to the reservoirs. The filter media at the water filtration plant must be removed and replaced with new media to enable the plant filtration equipment to maximize flow through the filters and to maintain Ohio EPA water quality filter effluent standards. | Village of Mt. Orab | 8 | 31 to 90 days | \$660,000 |
| Brown | Water System Improvements-Phase 2 | As the need to provide water to serve job creating development and the growing Village population, the present water plant needs to be expanded and the upground reservoir system needs to be reconditioned and modified to allow some pretreatment of the raw water supply to the plant. To that end, a new clarifier, filtration unit need to be installed at the water plant and the clearwell needs to be enlarged. Additionally, the personnel and lab facilities must be expanded to accommodate increased staffing and water production and testing needs. The original 1974 upground reservoir has accumulated a great deal of silt from 34 years of pumping silt laden raw water. In order to maximize available storage for long term drought conditions, the silt needs to be removed. To enable plant operators to reduce the incoming concentration of manganese at the plant, a solar powered aeration system needs to be installed at the reservoirs. | Village of Mt. Orab | 8 | 91 to 180 days | \$635,000 |
| Brown | Rankin House Interior Restoration | The Rankin House was an important stop on the Underground Railroad through which many slaves escaped from the South to freedom. The original barn and summer kitchen both figure prominently in the site's Underground Railroad history; the barn had a secret cellar that was used to hide fugitive slaves. Scope of Project: This project will produce an archeological investigation to determine the location of two major structures at the site: the summer kitchen and the barn and the configuration and condition of their foundations. This will allow for re-constructing the buildings in proper locations. The archeological excavations are expected to yield additional findings of Rankin-era significance, enabling OHS to expand its knowledge of the site and strengthen the quality of its interpretation. | Ohio Historical Society | 6 | 31 to 90 days | \$175,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---------------------------------------|----------------|--------------------|---------------------------|
| Brown | Rankin House Archaeology at Summer Kitchen | The Rankin House was an important stop on the Underground Railroad through which many slaves escaped from the South to freedom. The original barn and summer kitchen both figure prominently in the site's Underground Railroad history; the barn had a secret cellar that was used to hide fugitive slaves. Scope of Project: This project will produce an archeological investigation to determine the location of two major structures at the site: the summer kitchen and the barn and the configuration and condition of their foundations. This will allow for re-constructing the buildings in proper locations. The archeological excavations are expected to yield additional findings of Rankin-era significance, enabling OHS to expand its knowledge of the site and strengthen the quality of its interpretation. Replace existing, sinking deteriorating line. Eliminate current and avoid future back-ups and flooding in an operating kitchen. Avoid food contamination and infection conditions. Replace existing obsolete system. Decrease energy consumption and improve patient and occupant comfort. Replace existing fifty-seven year old deteriorating system. Eliminate current and avoid future back-ups of interior building spaces as well as flooding of crawl spaces used for maintenance. Also avoid soil contamination and infectious conditions. Provide a roof top air handling unit specifically for three operating rooms. Allows for the shut down of main chillers which are currently operating during the winter only because of the operating rooms resulting in significant energy savings, more reliable cooling for critical areas and overall better comfort for patients and operating staff. | Ohio Historical Society | 5 | 31 to 90 days | \$100,000 |
| Brown | South Annex Sanitary Sewer Replacement | Replace existing, sinking deteriorating line. Eliminate current and avoid future back-ups and flooding in an operating kitchen. Avoid food contamination and infection conditions. | Brown County General Hospital | 6 | 31 to 90 days | \$140,000 |
| Brown | Patient Room HVAC Unit Replacement | Replace existing fifty-seven year old deteriorating system. Eliminate current and avoid future back-ups of interior building spaces as well as flooding of crawl spaces used for maintenance. Also avoid soil contamination and infectious conditions. | Brown County General Hospital | 4 | 0 to 30 days | \$130,000 |
| Brown | West Wing Sanitary Sewer Replacement | Replace existing obsolete system. Decrease energy consumption and improve patient and occupant comfort. | Brown County General Hospital | 6 | 31 to 90 days | \$210,000 |
| Brown | Air Handler with Pre-cooler for Surgery | Replace existing fifty-seven year old deteriorating system. Eliminate current and avoid future back-ups of interior building spaces as well as flooding of crawl spaces used for maintenance. Also avoid soil contamination and infectious conditions. | Brown County General Hospital | 6 | 31 to 90 days | \$650,000 |
| Brown | Brown County Emergency and Public Safety Center | The Brown County Commissioners are seeking funds to construct a new 10,000 sq ft facility to be used to house a combined Sheriff office, 911 Center and Emergency Management Center. The overall plan calls for expansion of the Sheriff's offices, additional meeting and training rooms, improved evidence storage rooms as well as vehicle support bays. Additional space will be used to combine our 911 and emergency services into the complex. The plan also will allow for expansion of jail facilities by including holding cells for up to 80 prisoners. Our longterm plan is to use this as phase one of a larger jail expansion/rebuild. Brown County currently has space for approximately 50 prisoners. Based on a jail needs assessment done in 2007 the County will need 180 to 200 beds over the next 10 years. This facility will move us closer to that goal. | Brown County Board of Commissioners | 100 | 91 to 180 days | \$12,000,000 |
| Brown | Energy Initiative- Lighting Retrofit/Variable Freq | Replace energy inefficient fluorescent T-12 lamps and ballasts as well as incandescent lamps, throughout the facility, with new T-8 and electronic ballast technology. Greatly reduce energy consumption while improving lighting levels. | Brown County General Hospital | 7 | 31 to 90 days | \$97,112 |
| Brown | Fire Suppression System | Replace inoperative and inefficient valves on three major air handlers with new Variable Frequency Drive Technology. save significant energy, improve comfort with less air and provide for zone set backs for demand heating purposes. Replaces an existing old, non-addressable system that is often failing. This greatly improves life safety, allows for much better identification of threatened areas resulting in faster arrival of first responders to emergency locations. | Brown County General Hospital | 10 | 91 to 180 days | \$261,000 |
| Brown | Medical Air System for the Critical Care Unit | Provide central medical air supply to an existing Critical Care Unit that currently has none. This eliminates the need to operate patient, life-support ventilators on less reliable portable units. Greatly improves patient safety. | Brown County General Hospital | 5 | 31 to 90 days | \$156,250 |
| Brown | reclaimed lumber | reclaim all and any old lumber to recycled into usable materials for ne homes and projects, reclaimed lumber is in high demand all over the world , reclaiming cleans up the environment and allows for more development of homes | bruan reclaimed lumber | 10 | 0 to 30 days | \$75,000 |
| Brown | A Green Farm | We would like to make our farm "green" using solar and wind energy to operate the cattle and sheep family farm. This would serve as a model for other family owned and operated organizations to use the inexhaustible resources that are available to us to reduce the overhead of our farming operation. We would like to ensure a larger profit margin for this farm. | Skinner Farms | 3 | 91 to 180 days | \$15,000 |
| Brown | Save Pine Valley Subdivision | replace of culvert (bridge) into back half of subdivision (affecting 30 families) and upgrading of road so can go from private to township controlled. Saving homes from foreclosure because cannot resell with road in current condition and we cannot afford to replace with current economic conditions and cannot get help from township or county government | Pine Valley Subdivision | 10 | 0 to 30 days | \$87,000 |
| Brown | green insulation | This will benefit home owners and the public in general with energy savings and the fact the product is a green product made from soy it will benefit the American farmer and the environment | royalty construction and remodeling | 10 | 31 to 90 days | \$150,000 |
| Brown | FPLSD Athletic Field Improvements | Renovation and upgrading of existing athletic fields. The current fields do not drain properly and do not accommodate the athletic program. The school buildings are being replaced/upgraded by an OSFC project, but OSFC funds can't be used for athletic fields. The fields need regrading, installation of underground drainage, installation of a running track with soccer/football field, concession stand with restrooms and storage, lighting and permanent seating. The Board of Education has committed \$500,000 to the project, but that will only scratch the surface. Preliminary plans have been drawn and project could be shovel ready in a matter of months. Any assistance would greatly benefit the school district and community. | Fayetteville-Perry Local Schools | 25 | 91 to 180 days | \$2,000,000 |
| Brown | Homeless Veterans Community Integration | will seek to provide sustained employment for veterans who were discharged from service with an honorable or general discharge and who are currently homeless. Full-time employment coupled with intensive case management and emergency or temporary assistance such as food, shelter and clothing will provide the foundation for the homeless veteran to acquire and maintain stable, affordable housing and to access appropriate health care. All of these factors (employment, housing and health care) are essential for the disadvantaged veteran to achieve the ultimate goal of full community integration and participation. The HWCR project will serve veterans living in Brown and Clermont Counties. 50 will be served in the first year of the project with 40 placed in permanent unsubsidized jobs as well as 45 into permanent housing. 35 veterans will be referred to community human and social service agencies for further assistance as needed. This project is an expansion of the services to homeless veterans Ohio Valley Goodwill has been providing in Southwest Ohio, with g | Ohio Valley Goodwill Industries, Inc. | 41 | 31 to 90 days | \$114,650 |
| Brown | Improvements to Entertainment Complex (Only one in | always wanted to open an entertainment complex in our area as we have none. When we grew up here in Brown County Ohio, just about 20 minutes east of Cincinnati, we had a drive-in, we had a bowling alley, we had a skating rink, now there is NOTHING. We went racing on Saturday nights at a little dirt track out further in the country or we went towards the city in later years which worried our parents greatly. We are the only entertainment complex in this county. We can hold concerts, car shows, rodeos, racing, fundraisers and just about any other kind of company event or activity that you would want to have here. It is very popular and everyone who comes here loves it. We could use more bleachers, more space to expand and a way to pay off the quarter million dollars in debt that we have accumulated so that we can expand the facility ourselves and through our sponsors. Dirt track racing is where all the big shots started, look at Tony Stewart, Darrell Waltrip, Dale Earnhardt, just to name a few, it's great family entertainment, it's kept a | Moler Raceway Park, LLC | 500 | 0 to 30 days | \$250,000 |

|----------------|--|---|--------------------------------|----------------|--------------------|---------------------------|
| Brown | Pike Township Road Equipment Storage / Maintenance | Construction will be steel, with poured concrete knee walls for longevity and security. We are a growing township in the Mt. Orab, Ohio area. Local residential and business growth has required an increase in the services we provide. These increased services have required the purchase of additional and improved equipment. Traditionally, the little bit of equipment owned by the township has been stored in Trustees' own buildings. Our growth has made this type of storage both impractical and undesirable. Currently we have no equipment storage facilities at all. The cost of recent road improvements and additional equipment has left us unable to pay the cost of constructing this building. In the fall of 2008, we were very near a financing agreement for the project, then with the souring economy, financing offers were withdrawn. We have purchased land and are ready to go ahead with site work immediately. We have completed building plans and are ready to bid the project. Completion of this project will secure our equipment and protect it from the | Pike Township | 40 | 0 to 30 days | \$200,000 |
| Brown | Angilo's Pizza Fund | Angilo's Pizza Shop started in Nov. 2008, with little start up expenses. Seeking help in maintaining operating expenses. This will allow us to pay off our debt and create more jobs Cincinnati, Ohio and currently have racing on Friday nights. | Angilo's Pizza | 6 | 0 to 30 days | \$25,000 |
| Brown | Entertainment complex | We would like to expand, this year to go-kart racing on Sundays, swap meets, flea markets, car shows, concerts, gatherings for big company picnics, etc, would like to build a rental hall also for indoor activities, rodeos, etc. It is endless what we could do here. We have a full concession stand and bleachers and scoring tower. would like to add more bleachers also. The opportunities are endless but we need more funds. We have a huge debt to pay off the construction of the place before we can make more improvements. We have a large lake and would like to have church camps and outdoor gatherings here as well. We have parking, would like to have graveled access to some of the parking which costs money too, the road could be widened, there are numerous things we could do to create jobs and keep money in the county. Please consider this a great stimulus for Brown/Clermont Counties in Ohio as we are right on the line and it would be a | Moler Raceway Park, LLC | 100 | 0 to 30 days | \$250,000 |
| Brown | Pike Township Hall / Community Building | Pike Township will construct a 4500 sq feet township hall / community building. Construction will be brick and stick built. Pike Township is a zoned township in a rapidly growing area of Mt. Orab, Ohio. The only building Pike Township presently has is 16 X 20 feet block building with restrooms and restroom facilities. A community committee of citizens has helped develop the plans for the building. Property has been purchased and an architect has completed plans. Resonable financing was offered in the fall of 2008, but while we completed plans, the offer was withdrawn in response to the nation's economic crisis. This is a shovel ready project. Jobs are on hold as this project awaits construction. Completion of this project should serve the needs of the community into the foreseeable future. | Pike Township | 40 | 0 to 30 days | \$500,000 |
| Brown | Norfolk Southern Grade Crossing Improvements on Ce | This project is for improvements to grade crossings on Norfolk Southern's Central Division in southern Ohio. This request is made in order to improve the safety of the crossing for the public and extend the life of the crossings. This estimate includes about 69 new full depth concrete grade crossing surfaces at varying lengths. I am not exactly sure about narrowing down the county or zip code as the project will be spread out. Thank you. | Norfolk Southern Corporation | 20 | 91 to 180 days | \$2,930,400 |
| Brown | Recipient of Stimulus Verification Program (RSVP) | With so many proposals being made by existing business entities, municipalities, and individuals; accountability, and verification of the recipients' legitimacy, character, and veracity of their intended use of the relatively limited funding available should be of paramount concern to the agencies responsible for dispersing these funds. Background Screening of all applicants slated to receive funding should be conducted and completed prior to any resources being released. Our existing staff can provide the Basic background screening necessary, and additional staff (new job creation) would be necessary for a more robust and in-depth review of all individual applicants submitting a proposal for funding. Accountability will be key to utilizing these available funds in the most efficient manner possible. We can help to ensure that the money is provided to both entities and individuals that are a good bet to make the most of the opportunity. | Phoenix Research Inc | 10 | 0 to 30 days | \$500,000 |
| Brown | MAC'S ATTACK!!! | Individual background checks, Business and personal Credit reports, Motor vehicle reports and other A service I would like to start: and offer to oaks, reators and lending co. Offer a cleaning, painting and general fix-up service to homes that are on the market and the previous owner had let run down. Maybe due to foreclosure. I would be able to hire local people to help in the light renovation work. The startup money would equip two service vans with needed tools, ladders etc. and allow me to purchase the necessary insurance, supplys and advertising necessary to get this type of service off the ground | MAC ENTERPRISE | 5 | 31 to 90 days | \$100,000 |
| Brown | Meditech Expansion | Expansion of Meditech to include the Emergency Department, Same Day Surgery and Operating Room services. medical records capability. The all services communication to hospital better patient care. | Brown County General Hospital | 3 | 31 to 90 days | \$225,000 |
| Brown | eickleberry electronics small business expansion | Small business expansion of repair of consumer electronics (TV's, stereos, DVD's), expansion to include purchase /setup of facilities, tools, test equipment. Mt Orab does not have such services currently available. This is a growing retail market which is slated to construct a new Kroger and Walmart within the next 2 years. I have over 19 years experience in electronic repair. My primary electronics education was recieved through the Marine Corp Communications / Electronics schools. I am currently employed as a TV repair technian and have been for the last eight years. I also have a side business doing electronic repair run out of my home. I have been the service manager for multiple companies. | eicklebery electronics | 5 | 0 to 30 days | \$30,000 |
| Brown | Aberdeen Water Treatment Plant and Wellfield Proje | The Aberdeen Water Treatment Plant and Wellfield Project involves the construction of a new water treatment plant and wellfield to serve the 1,100 customers in Aberdeen. The existing water treatment plant and wellfield are inadequate and cannot provide the quality and quantity of water needed. | Village of Aberdeen | 150 | 181 days or more | \$500,000 |
| Brown | Brown County Waste Water Treatment Lines | The Brown County Commissioners are seeking funds to extend and expand sewer lines from the Village of Russellville, in to at least two adjoining townships. The lines will, in the short term connect to the existing lagoon system currently employed by the village, to a new site in order to accommodate additional growth in the area. | Brown county Commissioners | 50 | 0 to 30 days | \$2,500,000 |
| Brown | Aberdeen Water Treatment Plant Replacement | The project involves the construction of a new water treatment plant in the Village of Aberdeen | Aberdeen Village | 0 | 91 to 180 days | \$3,500,000 |
| Brown | CT Scanner/Digital Mammography | Replacement of current machine which is 10+ years old with a machine that can be upgraded. Both items will aid our rural county hospital in having state of the art equipment for our community and save our patients from having to travel a good distance to receive much need diagnostic testing | Brown County General Hospital | 5 | 91 to 180 days | \$1,500,000 |
| Brown | Steam Boiler Replacement | Two new energy efficient 200 horsepower steam boiler. These would replace two existing, inefficient, seventeen year old boilers which some parts are already obsolete. This new unit saves significant energy while providing more reliable steam service to critical surgical services. | Brown County General Hospital | 45121 | 31 to 90 days | \$220,000 |

| Brown | Fire and Smoke Simulator | Description: To have built on the school's property a fire and smoke training simulator to train fire fighters in Adams, Brown, Clermont and Highland counties. There are no training facilities like this in the area. Expected Outcomes: 1. Will help train and/or serve 300 or more fire fighters in the how to properly extinguish fires in various types fire and smoke conditions. 2. Will provide better training than existing methods in the area dealing with actual fire and smoke simulator in a controlled environment. 3. To reduce the number of fire fighters and victims injuries and/or deaths due to unrealistic training conditions by having a simulator to better train fire fighters and fire conditions. | Southern Hills JVSD | 300 | 31 to 90 days | \$50,000 |
| Brown | Jail/Courthouse Rock | Jail/Courthouse A jail to house at least 120 prisoners. Present jail hold 30 prisoners, and the building is very out-dated. Our cost of Maintenance has run up to 80,000 per year. And their is great concern for the safety of our correction officers, as The Citizens along US State Route 68 Highway They need DRINKING water. They have wells that have been condemned, and they don't have any other options | Brown County | 115 | 31 to 90 days | \$48,000,000 |
| Brown | Perry TWP Drinking Water Access | New building for existing dome so that groups may view for special events. ex. girl/ boy scout groups Solar and electrical connections to power the slide dome for viewing. Some upgrading of older equipment and computers to further study the solar system and to educate others in astronomy. Driveway upgrades to accommodate more parking and handicap accessibility in parking and the building. | Brown County Commissioner | 35 | 31 to 90 days | \$500,000 |
| Brown | Brown County Observatory | | | 2 | 31 to 90 days | \$125,000 |
| Brown | Additions and Alterations to Fire Station | The existing fire station is too small to house the equipment and the full time personnel required to be on duty to protect the Village. There is no room for the crews to get into gear with their moving units out of building. The fire personnel crew actually are quartered in a separate building adjacent to the actual station. There is no room for any training, physical fitness equipment, sleeping quarters and crew areas. Additional storage space for equipment is needed | Village of Mt. Orab | 16 | 91 to 180 days | \$1,800,000 |
| Brown | Local Farmer's Market & Meeting Barn | tobacco barn (over 100 years old) is located in the front field, proudly displaying two painted quilt squares as part of the Appalachian Quilt Barn project. It is one of the most photographed barns in Brown County, Ohio. This beautiful old structure will be restored, with electric and water service, to provide an indoor facility for local Appalachian farmers to sell their produce. As a service to these local farmers, space will be provided at no cost. These produce sales will serve as a supplement to the Appalachian farmer's income to help provide family nutrition during winter months. This local produce would stay within the county and farmers would not have to drive to the city to sell their produce, reducing their overhead costs. The restored barn would provide an ideal indoor facility, extending the season beyond normal outdoor markets. Unsold produce will be donated to food banks/kitchens or local churches. The barn can also be used for non-profit meetings. Up to five individuals will be hired, at minimum wage, for the restoration project and to manage the facility | Creek's Edge | 5 | 181 days or more | \$100,000 |
| Brown | Computer Aided Dispatch System | Replace aging Computer Aided Dispatch (CAD) system. This replacement would put in place newer technology that would provide for information and reporting systems not currently available and also be used to provide better protection for all police officers and deputies dispatched by the Brown County Communication Center. | Brown County Communication Center | 15 | 91 to 180 days | \$175,000 |
| Brown | Emergency 911 Dispatch Personnel | This is the estimated cost to hire two additional 911 dispatchers and one additional dispatch supervisor to service the citizens of Brown County and handle the dramatic increase in calls for service from the general public. This would also enhance the safety of all Police, Fire and EMS first responders by ensuring that there is adequate staff in the Communication Center | Brown County Communication Center | 3 | 0 to 30 days | \$105,713 |
| Brown | Health to Poverty | Upgrade serving equipment and nearby options based upon the most recent data for nutrition and the pyramid. This data will be utilized to instruct and feed a high poverty based school population and present ongoing opportunities for training in the food service industry to create job based hands on active education with a drive for healthier lifestyles and group think processes. This becomes an action research tie into current poverty based funding for an above 50% free and reduced lunch population. | Ripley-Union-Lewis-Huntington High School | 402 | 31 to 90 days | \$250,000 |
| Brown | Future Tech | Bringing a high poverty school district opportunities for technology integration through the use of smartboard technology, blackboard applications, classroom sets of notebook and interactive scoring equipment. This will include the purchase, installation, and upgrade of equipment to provide a 21st century education allowing better preparation for students with a foundation in integrated technology. This shall also include online versions of current texts through subscription means rather than consumables to take a proactive role in a greener environment | Ripley-Union-Lewis-Huntington High School | 402 | 31 to 90 days | \$178,000 |
| Brown | Liberty Hill Legacy Project | a National Historic Landmark of the Underground Railroad to be developed into a living history and cultural site. The goal is to keep visitors in the area longer by giving them additional things to experience related to history, arts and the outdoors. The plan calls for the remodeling of a historic home that was documented as part of the Underground Railroad, 2 barns to be used for the arts, farmers market and special events and the building of a shelter to be used by families for picnics and demonstrations. Thirty acres of this property are located across a creek and are wild and hilly. This part of the property will be developed into hiking trails leaving as much in its natural state as possible. | Brown County Economic Development | 12 | 91 to 180 days | \$750,000 |
| Brown | LEWIS TOWNSHIP FIRE AND EMS STATION | OUR FIRE AND EMS COVERAGE IS CURRENTLY PROVIDED BY THE VILLAGE OF HIGGINSPORT VOLUNTEER FIRE DEPARTMENT. THE FIRE STATION IS LOCATED IN THE VILLAGE OF HIGGINSPORT, WHICH IS THE SOUTHERN PORTION OF LEWIS TOWNSHIP. DUE TO THE INCREASE IN POPULATION OF THE TOWNSHIP RESIDING IN BUILDING A STATION IN THE CENTRAL PORTION OF THE TOWNSHIP WILL DRASTICALLY IMPROVE OUR RESPONSE TIME FOR FIRES AND EMS CALLS THROUGHOUT THE REGION BY SEVEN MINUTES. THE CURRENT STATION IS IN DESPERATE NEED OF REPAIR AND IS NO LONGER ADEQUATE FOR OUR EQUIPMENT DUE TO SPACE CONFINEMENT. | LEWIS TOWNSHIP TRUSTEES | 50 | 91 to 180 days | \$2,000,000 |
| Brown | RULH School Bus Program | It is our intent to replace nine school buses that are on routes currently. These buses are ten to seventeen years old. We would improve energy efficiency and improve student safety | Ripley Union Lewis Huntington School District | 0 | 91 to 180 days | \$765,000 |
| Brown | Probation Operations | This request would enable the Court of Common Pleas to add 2 full-time probation staff - 1 probation officer and 1 clerical position and retain 3 full-time probation staff. It would also allow the Court to purchase needed equipment including a vehicle for the purpose of county travel and prisoner transport, drug testing supplies, portable breathalyzer tests. This request would also provide the necessary funding for continuing education and training to probation officers. These monies would be utilized to better protect the citizens of Brown County through increased supervision and treatment of felony offenders. The calculated expenses would provide these services for a period of 4 years at which point the county could be in a position to cover the personnel expenses. | Brown County Court of Common Pleas | 5 | 31 to 90 days | \$520,000 |

| Brown | Technology Upgrade | The Ripley Union Lewis Huntington School District has received over one million dollars in competitive grant dollars over the last 15 years for educational technology. However, many sources have been subjected to the same issues that schools face with decreased funding. Although we have been applying for various types of funding to upgrade our technology, the existing educational technology available throughout the school district is now unable to keep up with the current demands by students and teachers. This proposal includes the installation of wireless access points in each of the three school buildings, upgrading the computers in two labs in each building, upgrading the computers in 8th grade and the high school classrooms, and SmartBoard technology systems that include video projectors for the classrooms. The skills and knowledge associated with the integration of educational technology in our schools lends itself to opening doors to many new and innovative learning opportunities for students. As the Project proposes an inter-county, inter-city bus service and routing network serving virtually ninety-five percent of Ohio's population, providing daily transportation to and from Cleveland/Columbus, Cincinnati, Dayton, Toledo, Youngstown, Akron and most County seats, StarForce is a preferred transportation planner/provider for U.S. Department of Defense, operating over sixty daily routes in twenty-six states for U.S. DOD. The company has an excellent record of hiring Veterans, and is rated "outstanding" by the qualifying Federal Agency. StarForce was founded and incorporated in Ohio in 2000 and has been headquartered in Brown County, Ohio since its inception. Senior management is tenured and highly qualified in passenger transportation and risk management. | Ripley Union Lewis Huntington School District | 2 | 31 to 90 days | \$305,000 |

The Community Action Agency provides health and social services to low and moderate income households. | Adams-Brown Counties Economic Opportunities, Inc. | 230 | 0 to 30 days | \$25,000 |
| Brown | Social Enterprise - small scale solar & wind power | Establish a small scale franchise to offer solar panels and wind generation equipment in rural Appalachian Ohio. Social enterprise will offer employment and opportunities to reduce energy use. | Adams-Brown Counties Economic Opportunities, Inc. | 40 | 31 to 90 days | \$150,000 |
| Brown | Renewable energy - Community Action Agency buildin | Install solar panels on existing building that serves low to moderate-income households through various programs: WIC, Family Planning, affordable housing, Individual Development Accounts, Microenterprise, Help Me Grow, Head Start, Senior Companions, Home Care and Adult Day Care for Seniors, Meals on Wheels, E-HEAP and HWAP. Will serve as a model for community and reduce costs for programs that serve the most needy in the community. | Adams-Brown Counties Economic Opportunities, Inc. | 35 | 31 to 90 days | \$400,000 |
| Brown | Career Exploration Teacher | Use new teacher for the eastern district who will facilitate a career exploration/leadership course for students. This course will provide students with information about the different types of careers available. We will also explore issues such as job security, and jobs needed for the economy and area we live in. Additionally, students will explore their own interests and skills and develop leadership skills that will help them be successful. | Eastern Local School District | 1 | 91 to 180 days | \$45,000.00 |
| Brown | Law Enforcement Communications Interoperability | Brown County proposes to purchase 800 MHz portables, 800 MHz mobiles and 800 MHz mobile repeaters for all Law Enforcement Departments within Brown County and to discontinue use of the existing, aging low band system currently used to dispatch police departments within the County. This project would migrate police dispatch of all Law Enforcement within Brown County to the Ohio MARCS System and also address the critical coverage issues within the County that routinely place police officers in harm's way with no reliable communications system. Furthermore, this project will provide interoperability with other local and State Departments. | Brown County Communication Center | 55 | 181 days or more | \$800,000.00 |
| Brown | Court Security | Replace 1 Deputy sheriff at door that was taken from the court effective January 1, 2009. The replacement will provide needed court security. The officer will check and maintain security of incoming persons and items. Monitor and defuse situations | Brown County Municipal Court | 1 | 31 to 90 days | 45360 |
| Butler | BUTLER COUNTY SHERIFFS OFFICE HELICOPTER | asset seizure funds to pay for the operation. We could expand the use of our current helicopter for various programs such as Project Lifesaver, to patrol our river and water ways, & to service the numerous requests for our helicopter. We need to expand Pilot & Flight Crew training to include the use of the FLIR & Project Life Saver tracking equipment. This program would pay for the cost of personnel training and the operational costs of the helicopter for missions. We could utilize a UH-1 helicopter to become involved in Air Search and Rescue, & to assist SWAT with personnel insertions for critical incidents. We could purchase a hoist for rescue & obtain Pilot & Crew training in the proper use of a hoist. Pilot and Crew training could be obtained for SWAT insertions. We respond to calls from all of the surrounding counties, various local, state, & federal police agencies for assistance in search operations several times each month. We try not to charge for our services whenever possible. We could better service the requests for our helicopter with monies for operational expenses. The money that provides the greatest benefit to our community is the money that we use to maintain the D.A.R.E. program, we are requesting your assistance. We will provide the following services: core curriculum to schools in the county; in service training to faculty of participating schools; parent education at participating schools, local businesses and social service agencies; promotional opportunities through local media will be used to increase public awareness and support for the program; active membership in participating schools' Drug Free School Advisory Boards; and involvement in extra curricular activities at participating schools. Without this funding, the BCSO D.A.R.E. program can not function | BUTLER COUNTY SHERIFF'S OFFICE | 4 | 0 to 30 days | \$500,000 |

We try not to charge for our services whenever possible. We could better service the requests for our helicopter with monies for operational expenses. The money that provides the greatest benefit to our community is the money that we use to maintain the D.A.R.E. program, we are requesting your assistance. We will provide the following services: core curriculum to schools in the county; in service training to faculty of participating schools; parent education at participating schools, local businesses and social service agencies; promotional opportunities through local media will be used to increase public awareness and support for the program; active membership in participating schools' Drug Free School Advisory Boards; and involvement in extra curricular activities at participating schools. Without this funding, the BCSO D.A.R.E. program can not function | BUTLER COUNTY SHERIFF'S OFFICE | 1 | 0 to 30 days | \$75,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------|----------------|--------------------|---------------------------|
| Butler | Manure to Organic Fertilizer | <p>We are working with Earth Renew Organics, developing plants that convert manure to organic fertilizer. This uses the exhaust heat from a gas turbine to cook the manure, which is then pelletized. The product is sold to organic farmers, golf courses etc. The gas turbine generator produces electricity which is sold back to the grid, and pays the operating costs for the plant.</p> <p>The patented process solves the environmental problem of what to do with manure from feed lots, pig farms, chicken farms etc. ERO have a test site operational at a 20,000 head feedlot in Calgary AB.</p> <p>We would use this project to develop a project in Ohio, either pig or chicken farm to have a demonstrator/marketing site. The site would develop new jobs in construction of the equipment, operation of the plant and distribution of the product. At US Turbine we will be the overall project managers, we will construct the gas turbine generator set, and operate the plant!</p> | US Turbine LLC | 30 | 31 to 90 days | \$10,000,000 |
| Butler | RiversEdge | General streetscape repair/improvements to include asphalt, curb, gutter, sidewalks, crosswalks, striping, street trees, and lighting. Project involves improvements to three streets in downtown Hamilton surrounding a planned riverfront mixed-use residential development. | City of Hamilton | 50 | 91 to 180 days | \$720,896 |
| Butler | Gallagher Road Reconstruction | City of Monroe - Galaher Road Reconstruction - Roadway reconstruction and utility replacement - Lebanon Street to South Corporation Line | City of Monroe | 95 | 0 to 30 days | \$760,000 |
| Butler | City of Monroe - SR 63 Loop System | City of Monroe - SR 63 Closed Loop System - Traffic Signal Interconnect and Management System for SR 63 throughout the City Limits. | City of Monroe | 2350 | 0 to 30 days | \$350,000 |
| Butler | City of Hamilton, Municipal Garage Renovation | <p>1) Garage Wall Replacement: \$1,000,000, 2) Relocation of Gas Pumps: \$250,000, 3) Salt Barn: \$500,000, 4) Acquisition of south property for expansion of facility: \$250,000, 5) Inlay Avenue Improvements: \$300,000, 6) Ingress/egress Improvements at Tubular Sales: \$200,000.</p> | City of Hamilton | 120 | 91 to 180 days | \$2,500,000 |
| Butler | Booker T. Washington (BTW) Community Center | The B.T.W. Community Center, located in the City's Second Ward, serves as the recreational and community center of the City's African-American community. The building requires renovation and/or replacement of mechanical systems HVAC to make the building more energy efficient. | City of Hamilton | | 91 to 180 days | \$1,500,000 |
| Butler | Frederick Mueller Municipal Building Renovation | Repair and/or replacement of building mechanical systems to make facility more energy efficient. Installation of photovoltaic cells for building energy generation. Facility is currently used as a local business incubator housing over 100 employees in different small businesses. | City of Hamilton | 100 | 91 to 180 days | \$1,500,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE CRIMINAL INVESTIGAT | The Butler County Sheriff's Office Criminal Investigations Division is asking for funding for the purchase of 25 Dell Laptop docking stations with aircards. Being able to purchase these laptops with aircards would mean the ability to work in the field. With that capability, investigations would be more efficient as they would be able to process their reports on the scene. Without this funding, we can not buy these laptops with aircards. | BUTLER COUNTY SHERIFF'S OFFICE | 3 | 0 to 30 days | \$75,000 |
| Butler | BCSO CRIMINAL INVESTIGATIONS DIVISION FLEET VEHICL | The Butler County Sheriff's Office Criminal Investigations Division is in need of this funding for the purchase of detective vehicles. These vehicles would be American made. Currently, the cars are older and have many miles on them. With investigations using the same cars for years, the dependability is not there. Also, the idea of undercover car is lost as people start to recognize the older style detective cars. With this funding ten new Ford Taurus Fleet Vehicles could be purchased and outfitted. | BUTLER COUNTY SHERIFF'S OFFICE | 45011 | 0 to 30 days | \$300,000 |
| Butler | Miami Heritage Solar Farm | <p>A solar farm, at Miami Heritage Technology Park (MHTP), with initial capacity of 2MW DC, expandable, initially to sell power to Miami University (MU) in Oxford Ohio. This initial solar field would be positioned on 10 acres next to the newly opened Miami Heritage Algae Research Center, a collaboration under MOU with MU.</p> <p>A mix of stimulus funding, low interest loan, loan guarantee, and tax equity funding is being sought.</p> <p>Supply of all solar panels will be through an Ohio manufacturer, First Solar, supporting an estimated 30 new jobs (15/MW).</p> <p>This project is intended to save MU on energy costs, potentially save MU future capital expenditure for incremental energy generation, and create incremental Ohio jobs to maximise the ROI for any stimulus money awarded through the State of Ohio.</p> <p>The project would also support development at MHTP and its vision of having an energy research and education center, along with the Miami Heritage Algae Research Center, to demonstrate on alternative energy sources and support advanced energy research and student engagement at MU.</p> | Miami Heritage Technology Park | 30 | 0 to 30 days | \$1,250,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE CORRECTION RAPISCAN | The Butler County Sheriff's Office houses United States Marshals inmates, Armed Forces inmates, Illegal Customs Enforcement (ICE) Alien inmates, and inmates from numerous jurisdictions within the State of Ohio. Some of these jurisdictions are Montgomery County, Brown County, City of Hamilton, City of Fairfield, City of Trenton, City of Loveland, Monroe, Warren County and the Federal Bureau of Prisons. 33,000 inmates are booked and released at our facility on a yealy basis. Part of the intake process is searching of the prisoners. The Rapiscan 1000 would greatly reduce the opportunity for contraband to enter the correctional facility, which could lead to the injury or death of a Corrections Officer or another inmate. The United States Department of Homeland Security has certified the Rapiscan 1000 as an approved product for homeland security. | BUTLER COUNTY SHERIFF'S OFFICE | 10 | 0 to 30 days | \$125,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE TRAFFIC/CRASH UNIT | equipment. The ability to purchase the equipment would be due to these funds. The result being that the equipment would enhance & improve the work performed in crash investigations, reconstructions and traffic safety enforcement efforts. We would be able to purchase a 3 D Mapping Unit, two 3 D Crash Software, Portable Pocket PC for traffic reconstruction, and with this comes the annual True Partner Maintenance Stand Alone Maintenance which is 24/7 priority technical support, with upgrades & updates up to 5 years. The total of the above items would net \$14,515.00 Also needed for being able to better update our unit, would be a four LSI 20-20 Ultralyte 200LRs for speed enforcement to be used for daily speed/traffic enforcement & citizen complaints of speeding. Two Canon 430 EX Speedlite flash units for current unit cameras. The additional flash units are needed due to the internal flashes not meeting the necessary lighting during night crash scenes. Four SNAP On brand digital tire gauges & 24 inch digital LaserTrac Levels, used during on scene & reconstruction | BUTLER COUNTY SHERIFF'S OFFICE | 4 | 0 to 30 days | \$30,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE CRIMINAL INVESTIGAT | The Butler County Sheriff's Office Criminal Investigations Unit would like to use funds to update the unit with training needed to obtain certification. We would like to train an investigator to be a Polygraph Examiner and our Investigators to have Multimedia Processing LEVA Certifications. The total cost of this project would be \$17,500.00. With the funds for this training, the Criminal Investigations Unit will be able to replace positions that have been recently eliminated | BUTLER COUNTY SHERIFF'S OFFICE | 3 | 31 to 90 days | \$17,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------------|----------------|--------------------|---------------------------|
| Butler | BUTLER COUNTY SHERIFF'S OFFICE CRIMINAL INVESTIGAT | The Criminal Investigations Division would like to update the outdated furniture that currently resides. We would need 15 - 20 office chairs, filing cabinets, new computers and printers and fax machines. The update of these items would greatly help to keep our department running as efficient as possible. Currently the office chairs are worn, most broken, the computers are older which means slower processing, file cabinets are full, and the fax machine is old and non efficient. Also needed, is the updated covert operation equipment needed for special operations. The award of these funds will help these needs to be met | BUTLER COUNTY SHERIFFS OFFICE | 3 | 0 to 30 days | \$21,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE SHOOTING RANGE IMPR | The Butler County Sheriff's Office must conduct annual firearms training and qualifications of its officers by Ohio Law. The Butler County firing range is in dire need of upgrades to it's facilities. Our goal is to provide upgrades to the current shooting facilities. This includes upgrades to buildings, ammunition storage, drinking water system, and sewage systems. Also upgrades to shooting ranges including target systems and equipment to maintain the premises. The current alarm system also needs to be updated. The range is also in dire need of a drainage system of poured concrete. The drainage system will prevent standing stagnant water from accumulating and this in turn will help with the mosquito population that exists | BUTLER COUNTY SHERIFF'S OFFICE | 3 | 0 to 30 days | \$288,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE ROAD PATROL RIOT HE | This Grant would provide funds to purchase X-26 Tasers, training cartridges and duty cartridges for all personnel within our agency currently assigned to the Patrol Division. We currently have 15 X26 Tasers that have been obtained and worn due to age and use. Our agency has 15 X26 Tasers that have been obtained through various means over the past several years. These tasers are disbursed across several divisions within the agency and are not immediately available on all volatile situations our patrol personnel routinely have to deal with. Providing each patrol deputy with the less than lethal capability of the X26 taser would follow for a more effective non-lethal means of efficiently resolving these volatile situations thereby avoiding the potential for injury associated with striking type weapons or the use of deadly force. New riot helmets are needed as the ones the Sheriff Officer currently have are deteriorated and worn. Providing the deputies with new riot helmets assures their safety in any event that the use of them would be deemed necessary | BUTLER COUNTY SHERIFF'S OFFICE | 0 | 0 to 30 days | \$76,500 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE INMATE INTAKE AND B | Forces inmates, Illegal Customs Enforcement (ICE) Aliens, and inmates from numerous jurisdictions such as City of Hamilton, City of Fairfield, City of Trenton, City of Loveland, Montgomery County, Brown County, Warren County and the Federal Bureau of Prisoners. Contracting with these agencies has created the need to remodel our current intake/release area to receive and process large groups of inmates. Additional holding areas, processing centers and security fencing are needed. An addition of 19,000 square feet of blacktop parking, 200 feet of security fencing and electronic gates, 12 gun lockers, 8 metal benches, 4 hand held scanners, and a remote call box are part of the needs of the renovation project. Remodel for additional inmate processing space will include 10 new processing work stations, 5 inmate holding areas, 4 inmate phone lines, 10 computer work stations and 12 x 20 feet of security fencing with a door. Without this funding, this project will not be possible. | BUTLER COUNTY SHERIFF'S OFFICE | 22 | 0 to 30 days | \$71,300 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE CARRY CONCEALED WEA | improve the service and thoroughness of background investigations by expanding the unit from 3 part time positions to 3 full time positions. This will help us to be more accurate in giving out the concealed to carry a handgun permit. Our technology equipment shuts off during critical inputting times, which makes the job more difficult. The BCSO CCW Division is getting about 60 people every Tuesday and Thursday, which is equivalent to approximately 7,000 people a year. With only three part time positions and only two days a week of applicants, the job is outweighing the staff. Budget cuts and lack of funds prohibits the CCW division from making the part time positions full time. Another thing, bringing in this many people, we are overloading our filing cabinets. There are no more cabinets or spare rooms to file. There is not enough desk space nor sufficient workstations to keep up with the volume of applicants. We would like to purchase larger filing cabinets to house the paperwork. We would appreciate a chance to make the CCW Division more efficient | BUTLER COUNTY SHERIFFS OFFICE | 3 | 0 to 30 days | \$213,266 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE TACTICAL RESCUE VEH | provide LE services. Special operations units have deployed in support of communities throughout SW Oh, N Ky & SE In. Teams respond to barricaded violent and armed subjects, reported explosives/IED's, narcotics lab raids, arrest warrants for violent fugitives & provide site security for potentially violent confrontations at labor disputes & public demonstrations. Request is to buy a tactical rescue vehicle capable of supporting emergency operations while providing ballistic protection from gunfire & bomb blast debris during LE deployments or evacs of citizens from hazardous areas. It'd be operational in WMD/CBRNE environments; monitoring/testing equipment to determine CBRNE danger present & prov. telecommunications equip.; be NIMS compliant for deployment anywhere in OH or the US; deploy to support SWAT ops, bomb squad, civil unrest, & site security at high risk operations; be utilized w/the regional HAZ-MAT team and EMA operations; be deployed in direct support of any humanitarian efforts in the event of a natural or terrorist disaster & track and locate missing persons who may be suffering from disorders such as Dementia, Autism, Down syndrome, and Alzheimer's disease. | BUTLER COUNTY SHERIFF'S OFFICE | 10 | 0 to 30 days | \$330,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE PROJECT LIFESAVER | Trained personnel use electronic equipment and search techniques to locate people who are identified as "high risk" of wandering due to their illness. Butler County's Project Lifesaver has grown. With an expected total number of five thousand citizens eligible for the program, the Butler County Sheriff's Office must supply a deputy and provide transportation to visit each client monthly to replace batteries in the client's monitoring bracelet, and to check the bracelet's serviceability. The Butler County Sheriff's Office currently has twenty adults and children enrolled in the Project Lifesaver Program in six surrounding cities, outlying townships, and villages. Due to projected costs associated with equipment demands, replacement, and upgrades, and the training of more personnel, the Butler Count Sheriff's office would like to appoint a full time deputy | BUTLER COUNTY SHERIFF'S OFFICE | 2 | 0 to 30 days | \$132,718 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE CITIZENS ON PATROL | The Citizens On Patrol (COP) program was established by the Butler County Sheriff's office in 2006. Trained volunteers in a marked cruiser perform non-enforcement duties such as traffic control, high visibility patrol, and premise checks acting as "eyes and ears" for law enforcement. With budget cuts facing most departments, including ours, the COP program helps keep more deputies available for crucial duties while providing more manpower for traffic control and emergency scene management. The Butler County Sheriff's office would like to increase our COP program patrols from one to two units and replace one older COP cruiser while adding a second fully equipped cruiser to our COP program. We would also need funds to provide uniforms, training, and equipment to ten new COP recruits | BUTLER COUNTY SHERIFF'S OFFICE | 2 | 0 to 30 days | \$86,960 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------------|----------------|--------------------|---------------------------|
| Butler | BUTLER COUNTY SHERIFFS OFFICE CORRECTIONS MAXI BUS | The Butler County Sheriff's Office participates in the Joint Alien Transportation System (JATS). An average of 40 illegal aliens are transported by our department each week to be deported. Sometimes this number is higher and twice a week. This bus project would allow us to continue to assist the Federal Government in the removal of criminal aliens. The company that gave us the estimate for this bus is capable of handling state bids. | BUTLER COUNTY SHERIFF'S OFFICE | 19 | 0 to 30 days | \$450,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE MINI BUS PURCHASE | The Butler County Sheriff's Office houses unco states warant inmates, Armoes forces inmates, illegal Customs Enforcement Alien inmates (ICE), and inmates from numerous surrounding jurisdictions, villages, townships and counties. We are responsible for the transportation to and from different courts throughout the state. This transportation vehicle (33 passenger) will save taxpayers money by being able to transport double the amount of inmates compared to the 15 passenger vans which we currently have. | BUTLER COUNTY SHERIFF'S OFFICE | 14 | 0 to 30 days | \$85,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE CORRECTIONS MENTAL | approximately 16 beds to house mentally ill inmates while attempting to address their mental health issues. Such a unit would allow for close medication monitoring, close monitoring of individuals on suicide watch, separation of the mentally ill inmates from the general population, and social worker management in connection to community resources prior to release from jail. This unit would allow for mentally ill inmates to be monitored, on a consistent basis, by social workers and a jail psychiatrist. This level of monitoring would assist with stabilization of inmate through more effective treatment. If able to stabilize efficiently prior to release to the community, along with connecting the inmate with community resources, the rate of recidivism would be lowered along with cost. The unit would staff correction officers that would be provided additional mental health training to effectively work with this population, nursing/medic staff to pass meds and monitor health needs and concerns, social workers 24/7 and jail psychiatrist and psychologist. | BUTLER COUNTY SHERIFF'S OFFICE | 11.5 | 0 | \$2,895,242 |
| Butler | Butler County Regional Drug Task Force Building | sheriffs from multiple agencies. These agencies service Butler County, Ohio, which is situated between two major High Intensity Drug Trafficking Areas; Cincinnati and Dayton, OH. Butler County is also within 120 miles of two other High Intensity Drug Trafficking Areas (Columbus, OH and Indianapolis, IN). During investigations for the year 2008, narcotics were confiscated coming from Cincinnati OH, Dayton OH, Columbus OH, Indianapolis IN, Chicago IL, Texas and Arizona. Butler County, OH also has Interstate 75 running through it. I-75 is a known major drug route for narcotics to flow to the north and currency from drug trafficking to the south. Currently, the office rents office space that is far too small. The Butler County Regional Drug Task Force is requesting \$475,000.00 for construction of a stand alone building or purchase and renovation of existing office space. The current level of drug funds do not allow for this extremely needed expansion. Only U.S. made steel will be used in any construction or renovation projects funded with this money. | Butler County Sheriff's Office | 40 | 0 to 30 days | \$475,000 |
| Butler | Butler County Regional Drug Task Force Equipment | sheriffs from multiple agencies. These agencies are housed in Butler County, Ohio, which is part of a High Intensity Drug Trafficking Areas that includes Cincinnati and Dayton, OH. During investigations for the year 2008, narcotics were confiscated coming from Cincinnati OH, Dayton OH, Columbus OH, Indianapolis IN, Chicago IL, Texas, Arizona, and Mexico. Butler County, Ohio also has Interstate 75 running through it. Interstate 75 is a known major drug route for narcotics to flow to the north and currency, from drug trafficking, to flow to the south. In the year 2008, The Butler County Regional Drug Task Force expended over \$168,000.00 for rent, training, surveillance equipment, lab and tow fees, vehicle maintenance, and helicopter fuel and maintenance. Even with seizures, the task forces drug funds are at the lowest point in years. The Butler County Drug Task Force expects to spend approximately \$200,000.00 this year for rent, surveillance equipment, lab fees, and helicopter fuel and maintenance. The Task Force can not operate efficiently without these funds. | Butler County Sheriff's Office | 10 | 0 to 30 days | \$200,000 |
| Butler | Butler County Regional Drug Task Force Law Enforcement | sheriffs from multiple agencies. These agencies are housed in Butler County, Ohio, which is part of a High Intensity Drug Trafficking Areas that includes Cincinnati and Dayton, OH. During investigations for the year 2008, narcotics were confiscated coming from Cincinnati OH, Dayton OH, Columbus OH, Indianapolis IN, Chicago IL, Texas, Arizona, and Mexico. Butler County, Ohio also has Interstate 75 running through it. Interstate 75 is a known major drug route for narcotics to flow to the north and currency, from drug trafficking, to flow to the south. In the year 2008, The Butler County Regional Drug Task Force expended over \$410,000.00 in salaries. The task force has been so successful that there is a need to add officers/deputy sheriffs and/or increase overtime availability. The Butler County Drug Task Force is requesting \$400,000.00 for salaries and overtime to be expended in the years 2009 and 2010. With the current budget cuts, the Task Force will not be able to operate as efficiently without these funds. | Butler County Sheriff's Office | 10 | 0 to 30 days | \$400,000 |
| Butler | The Butler County Regional Drug Task Force Survell | sheriffs from multiple agencies. These agencies service Butler County, Ohio, which is situated between two major High Intensity Drug Trafficking Areas; Cincinnati and Dayton, OH. Butler County is also within 120 miles of two other High Intensity Drug Trafficking Areas (Columbus, OH and Indianapolis, IN). During investigations for the year 2008, narcotics were confiscated coming from Cincinnati OH, Dayton OH, Columbus OH, Indianapolis IN, Chicago IL, Texas and Arizona. Butler County, OH also has Interstate 75 running through it. I-75 is a known major drug route for narcotics to flow to the north and currency from drug trafficking to the south. The drug task force has been extremely successful. Currently the task force is without a surveillance platform and the undercover fleet is depleted. The Butler County Regional Drug Task Force is requesting \$120,000.00 for a surveillance van manufactured by Specialty Vehicle Solutions LLC or other bidder and \$200,000.00 to replace 5-6 undercover vehicles. All undercover vehicles will be purchased from Ford, General Motor | Butler County Sheriff's Office | 10 | 0 to 30 days | \$120,000 |
| Butler | Butler County Sheriff's Office New Miami Patrol | This grant would be in collaboration with the Butler County Sheriff's Office and the Village of New Miami. The BCSO would be able to provide patrol coverage for the Village of New Miami who disbanded their part-time Police Department over a year ago due to lack of funding. New Miami is one of the poorest villages in the state of Ohio. They have received basic patrol coverage from the Butler County Sheriff's Office; however, this would provide specific personnel assigned to work the area 40 hours a week each for a total of 80 hours. This grant would provide for two deputies, vehicles, uniforms, fuel, and all necessary equipment to provide the Village of New Miami with coverage more similar to their previous level of protection. With this funding, the Village of New Miami and their children would keep their crime rate down and feel safe. | Butler County Sheriff's Office | 2 | 0 to 30 days | \$231,800 |
| Butler | Gilmore Road Pumping Station and Force Main | Replace existing 45-year old sanitary sewage pump station to preserve service to over 1,000 apartments and homes, and several dozen businesses which employ 3,025 workers. Construct 9,000 linear feet of 16" sanitary force main and build 2700 gallons per minute pump station. With new station, Hamilton will not only preserve existing service but will be able to extend service to additional commercial and residential development areas. | City of Hamilton | 3,000 | 91 to 180 days | \$3,268,080 |
| Butler | Butler County Sheriff's Office Highway Interdictio | To create a designated Highway Interdiction Unit consisting of three deputies, one of which will be a canine handler trained in the detection of illegal narcotics. This grant would provide for three deputies, training, vehicles, uniforms, fuel, and all necessary equipment to efficiently conduct highway interdiction enforcement focusing on high intensity drug trafficking areas within Butler County. This specialized unit will be capable of drastically reducing the amount of illegal narcotics being transported to and/or through the Southwestern Ohio area | Butler County Sheriff's Office | 3 | 0 to 30 days | \$390,200 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Butler | Butler County Sheriff's Office Level III Tactical | This grant will provide funds to purchase Level III Ballistic Vests with carriers for members of the Butler County Regional Special Weapons and Tactics Team. This team is a multi-agency joint tactical team that responds to multiple jurisdictions to include assisting other county Sheriff's Offices (Preble County Sheriff's Office, Ohio and Union County Sheriff's Office, Indiana) who are without SWAT capabilities due to funding. Butler County Sheriff's Office personnel currently utilize a load bearing vest worn over basic level II body armor that is standard issue to certified officers for patrol duties. These vests would provide more protection as they include groin, shoulder, and neck protection that the basic issue body armor does not provide. In addition, they would provide a higher level of protection stopping more types of rounds from additional types of weapons including rifle rounds that would be stopped by the trauma plate inserts included with the vests. | Butler County Sheriff's Office | 3 | 0 to 30 days | \$30,000 |
| Butler | LeSourdville Regional WRF - Phase I Improvements | Solids Reduction, Sludge Receiving, Vector Receiving, Clarifier Upgrade and Effluent Aeration facility improvements. | Butler County Water and Sewer Department | 18 | 31 to 90 days | \$1,750,000 |
| Butler | Wade Mill Regional WRF Upgrade | Upgrade and expansion of regional WRF to increase capacity from 0.5 MGD to 1.0 MGD and meet increasingly stringent regulatory requirements. | Butler County Water and Sewer Department | 33 | 181 days or more | \$11,000,000 |
| Butler | LeSourdville Regional WRF - Phase II | Influent pumping, headworks, flow equalization, secondary treatment expansion to improve wet weather handling and reduce overflows. Project has green components such as the elimination of sanitary sewer overflows and it plans for and addresses more stringent nutrient limits. | Butler County Water and Sewer Department | 136 | 181 days or more | \$45,400,000 |
| Butler | Sharon Creek Force Main Replacement | Replace 2400 feet of 16" ductile iron force main. Green component consists of the protection of Sharon Woods Lake by preventing sanitary sewer spills and overflows. | Butler County Water and Sewer Department | 3 | 31 to 90 days | \$250,000 |
| Butler | Williamsdale/Overpeck Sanitary Sewer Project | Installation of 30,000 feet of sanitary sewers to eliminate 420 failing septic systems and 3 failing small package plants in the Williamsdale and Overpeck communities. Green component includes protection of Butler County's sole source aquifer | Butler County Water and Sewer Department | 27 | 181 days or more | \$9,000,000 |
| Butler | Village of Seven Mile, St. Clair and Wayne Townshi | Installation of 58,300 feet of sanitary sewers to eliminate 500 failing septic systems. Green component includes protection of Butler County's sole source aquifer | Butler County Water and Sewer Department | 39 | 181 days or more | \$13,000,000 |
| Butler | Dist 8, PID 77928, BUT US 27 18.61 | Minor Rehabilitation On But Us 27, Us 127, And Sr 122. | Ohio Department of Transportation | 84.7 | 31 to 90 days | \$2,952,000 |
| Butler | Ross Township Sewers | Installation of sanitary sewers to eliminate approximately 100 septic systems within the metropolitan areas of Ross. This project has a green component in that it will help to stimulate the term sustainable economic development and will protect Butler County's sole source aquifer. | Butler County Water and Sewer Department | 6 | 181 days or more | \$925,000 |
| Butler | Linn Road Sewer Improvements | Installation of sanitary sewers to eliminate over 50 failing septic systems which drain to storm sewers or roadside ditches. This project will improve groundwater quality. | Butler County Water and Sewer Department | 3 | 181 days or more | \$500,000 |
| Butler | Butler County Wellfield and Water Plant | Siting of new wellfield, land acquisition, design and construction of water treatment facility for Butler County, Ohio. | Butler County Water and Sewer Department | 225 | 181 days or more | \$75,000,000 |
| Butler | Blu Max Service Line Replacement - Phases II & III | This is a green project which saves energy and reduces lost water from over 7000 service connections installed with faulty Blu Max pipe. | Butler County Water and Sewer Department | 15 | 31 to 90 days | \$5,250,000 |
| Butler | Blu Max Complete Replacement | Complete replacement of all remaining Blu Max service lines in service area (approximately 7,000). Blu Max is a faulty material that is prone to failure. This project reduces energy use and lost water. | Butler County Water and Sewer Department | 26 | 31 to 90 days | \$8,750,000 |
| Butler | Liberty Fairfield Ground Storage | Project includes construction of ground storage to maximize efficiency of pump station; it will allow for the delivery of water at a more constant rate and provides system storage and emergency supply during interruptions of supply. | Butler County Water and Sewer Department | 16 | 31 to 90 days | \$2,700,000 |
| Butler | Butler County Regional Special Weapons and Tactics | Weapons and Tactics team. SWAT is a multi-agency, multi-jurisdictional tactical team that serves 469 square miles & about 355,000 citizens in Butler County. SWAT responds to jurisdictions outside of Butler County to assist other agencies that do not have tactical capabilities due to lack of funds. SWAT has served multiple warrants for narcotics, hostage-barricade situations, & fugitive apprehensions in Preble Crty, Ohio & has also assisted Union Crty, Indiana Sheriff's Office in a tactical capacity. Several barricade & hostage-barricade situations in both Butler and Preble Crty have req. negotiations to resolve the situation. A result of having no rescue phone, negotiators have been required to utilize cell phone service to communicate with the barricaded subject. This equip. would provide a more reliable means of communication; & the capability to listen to any communications inside the residence while the receiver/transmitter is not in use & to view the conditions of the situation, while identifying victims & suspects through the use of a pinhole camera to provide a secure means of communication. Project includes equipment for vehicle maintenance and provide protective and secured storage of highly specialized vehicles. These vehicles include Crime Scene Vehicles, SWAT Vehicles, Bomb Truck, Marine Patrol Vehicles and Boats Helicopter, Prisoner Transport Buses and seized Drug and Confiscated vehicles. Also a portion of this building would be to provide additional offices, a squad room and an exercise and locker room for the Road Patrol. | BUTLER COUNTY SHERIFF'S OFFICE | 2 | 0 to 30 days | \$10,000 |
| Butler | BUTLER COUNTY SHERIFFS OFFICE VEHICLE MAINTENANCE, | Restore approximately 100 feet of severely eroded stream bank adjacent to existing detention basin wetland retrofit project that was featured in Stormwater Magazine. | BUTLER COUNTY SHERIFF'S OFFICE | 5 | 0 to 30 days | \$2,800,000 |
| Butler | Upper Mill Creek Riparian Restoration and Stormwat | Retrofit a 2 acre residential detention basin located on hydric soils to a wetland/water quality basin to treat pollutants as it functions for water quantity. | Butler Soil and Water Conservation District | 6 | 0 to 30 days | \$10,000 |
| Butler | Brittony Woods Subdivision Detention Basin Wetland | Stabilize and restore approximately 100 linear feet of bank of Gregory Creek to improve water quality in Gregory Creek and Great Miami River watersheds. | Butler Soil and Water Conservation District | 6 | 0 to 30 days | \$50,000 |
| Butler | Dudley Woods Metropark Stream Restoration | Counties to provide emergency LE services. The special operations units have deployed in direct support of other communities throughout SW OH, N KY & SE IN. Currently we have no functional communication interoperability with agencies we respond to assist. Due to the nature of some emergencies, reliable communications are non-existent. Reliable communications & data availability is a necessity for emergency services operations. Goal is to purchase a self sufficient communications/command vehicle capable of supporting emergency operations. It would contain workstations for radio, data, & related telecommunications equipment with generators, full climate control & a hygiene facility; NIMS class II compliant for deployment anywhere in OH or US; deploy to support SWAT, bomb squad, water rescue, search/rescue operations & incidents of civil unrest; be utilized in cooperation with the regional HAZ-MAT team & EMA operations; be deployed in direct support of any humanitarian efforts in the event of a natural or terrorist disaster; & be available to stabilize and restore approximately 300 linear feet of bank of Gregory Creek, thereby stabilizing an exposed sanitary manhole structure that is susceptible to rupture. | Liberty Township | 8 | 0 to 30 days | \$40,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE MOBILE COMMAND COMM | Restore and stabilize approximately 1000 feet of Seven Mile Creek stream bank which continuously threatens the stability of West Elktion Road. Stabilization will also have water quality benefits for the Seven Mile Creek and Great Miami River watersheds. | BUTLER COUNTY SHERIFF'S OFFICE | 4 | 0 to 30 days | \$500,000 |
| Butler | Cherokee Park-Gregory Creek Stream Restoration Pro | Edgewood City Schools will soon be building a new high school which will contain approximately 3 acres of impervious roof area and several acres of parking lot. The new school is also located over and within the time of travel zone of a buried valley aquifer that supplies drinking water to tens of thousands of people. The school will require funds to install Best Management Practices to properly treat stormwater before it enters the groundwater system. | Liberty Township | 8 | 0 to 30 days | \$120,000 |
| Butler | Seven Mile Creek- West Elktion Road Stabilization P | Restore and stabilize approximately 1000 feet of Browns Run to enhance water quality and stabilize roadways. | St. Clair Township | 10 | 0 to 30 days | \$250,000 |
| Butler | Edgewood Jigh School Green Infrastructure Project | Deliver broadband service to rural counties (Butler, Warren, Montgomery, Clinton) using fiber optics and microwave technology. Requires build out of fiber optic cable to remote tower sites over our current 250 mile network. Request is for Labor and Equipment. | St. Clair Township | 10 | 0 to 30 days | \$100,000 |
| Butler | Browns Run Bank Restoration Project | | Butler Soil and Water Conservation District | 15 | 0 to 30 days | \$300,000 |
| Butler | Broadband rollout to Rural Ohio | | Innovative Fiber Optic Solutions, LLC | 20 | 31 to 90 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Butler | The Butler County Sheriff's Office Regional Drug T | sheriffs from multiple agencies. These agencies service Butler County, Ohio; which is situated between two major High Intensity Drug Trafficking Areas, Cincinnati and Dayton, OH. Butler County is also within 120 miles of two other High Intensity Drug Trafficking Areas (Columbus, OH and Indianapolis, IN). During investigations for the year 2008, narcotics were confiscated coming from Cincinnati OH, Dayton OH, Columbus OH, Indianapolis IN, Chicago IL, Texas and Arizona. Butler County, OH also has Interstate 75 running through it. I-75 is a known major drug route for narcotics to flow to the north and currency from drug trafficking to the south. The drug task force has been extremely successful. Currently the task force is without a surveillance platform and the undercover fleet is depleted. The Butler County Regional Drug Task Force is requesting \$120,000.00 for a surveillance van manufactured by Specialty Vehicle Solutions LLC or other bidder and \$200,000.00 to replace 5-6 undercover vehicles. All undercover vehicles will be purchased from Ford, General Motors installation of approximately 3,300 feet of 1/2" ductile iron pipe to serve growing area and allow for more utilization of energy efficient pumping station. | BUTLER COUNTY SHERIFF'S OFFICE | 4 | 0 to 30 days | \$320,000 |
| Butler | Morris Road Water Main | Replacement of 3,200 feet of aged cast iron water main | Butler County Water and Sewer Department | 3 | 31 to 90 days | \$440,000 |
| Butler | Cherrywood Drive Water Main | Replace approximately 2,500 feet of aged pipe. | Butler County Water and Sewer Department | 2 | 181 days or more | \$350,000 |
| Butler | West Chester Road Water Main | Replacement of approximately 1700 feet of aged pipe that is prone to leakage | Butler County Water and Sewer Department | 2 | 91 to 180 days | \$230,000 |
| Butler | Dues Drive Water Main | Replacement of approximately 950 feet of aged pipe prone to breaks. This will be coordinated with highway improvements. | Butler County Water and Sewer Department | 1 | 91 to 180 days | \$170,000 |
| Butler | Cincinnati-Dayton Road Water Main | RedMan Training Gear is the law enforcement industries toughest blunt trauma protective gear. Designed for defensive tactics training, RedMan provides maximum body coverage, durability, maneuverability and versatility, and it can be sanitized between users. The suit can be worn for both baton and weapons training. You can shoot at the WDS suit with approved Training Projectiles; incorporates blunt trauma protection and features of the RedMan XP suit and adds special designs and materials; Enhanced for use with Simunition FX Marking Cartridges; form fitting; maneuverable for subject control training (OC, Baton and hand cuffing); full body coverage, minimal gaps, covered head, face, throat, back of head; impact mesh adds durability for training projectiles; easy to clean, disinfected and drier after each use; lightweight and shock dispersing construction. The advantage of "Impact Mesh" for durability and use with RedMan approved training projectiles. Includes D2 Helmet. | Butler County Water and Sewer Department | 1 | 0 to 30 days | \$110,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE DEFENSIVE TACTICS T | Camera monitoring system for inmate holding cell areas of Butler County Municipal Court. Currently two cells (in a remote building location) are used for holding adult inmates awaiting court proceedings. A camera system to monitor their activities while in those cells would permit Butler County Sheriff Deputies to continue with other activities, yet still be able to detect safety/security issues within those cells. Approx. cost - \$10,000. | BUTLER COUNTY SHERIFF'S OFFICE | 2 | 0 to 30 days | \$6,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE COURT SERVICES SECU | 1 additional X-ray scanning machine for screening packages at the Butler County Court entrance security checkpoint would speed flow of visitor traffic into the court area while helping to maintain/increase security by detecting potential metal contraband. Approx. cost - \$32,000. 3 walk-through metal detectors for Butler County Court area security checkpoint (to replace existing outdated and potentially unreliable detectors currently in use) would help to properly scan court visitors for metal weapons/contraband. Approx. cost for 3 - \$15,000. | BUTLER COUNTY SHERIFF'S OFFICE | 3 | 0 to 30 days | \$57,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE LESS LETHAL CONTROL | uncontrolled crowds. In addition, the PepperBall System can be used in cell extractions and high-risk transport of inmates. Suspects can be individually targeted or pepper powder agent can be distributed over an entire group by launching a volley of projectiles against a wall, floor, or hard object above, near, or upwind of a group of suspects from distances up to 150 feet away. Dye Marking rounds are also available to allow officers to mark individual suspects for later identification. The are an alternative to lethal force; affordable addition to less lethal arsenals; safe at point blank range; provide increased officer safety; allow suspect targeting ranges up to 30 feet; utilize a unique combination of kinetic impact, psychological shock, and PAVA powder to irritate and gain compliance; can be used to saturate areas as distances up to 150 feet. Pepperball brand non lethal compliance products are designed to give corrections officer's safe, effective, and simple to use alternatives to existing compliance systems. | BUTLER COUNTY SHERIFF'S OFFICE | 2 | 0 to 30 days | \$9,225 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE CORRECTIONS DVR SEC | The Butler County Sheriff's Office houses US Marshal inmates, Armed Forces inmates, Illegal Custom Enforcement (ICE) Alien inmates, and inmates from numerous jurisdictions such as Montgomery County, City of Hamilton, City of Fairfield, City of Loveland, City of Trenton, City of Monroe, Warren County, Brown County and Federal Bureau of Prisoners. Installation of a DVR security system to our maximum security facility housing 848 inmates would increase security and record critical incidents. The DVR system contains the following: 2 Dell Minitorwer workstations costing \$2,311.00; 1 Dell Minitorwer Logging Server costing \$1,781.00; 2 Touch Screen Monitors costing \$1,742.00 and 1 18 channel 500 GB MPEG4 Compression Card costing \$5,837.00. | BUTLER COUNTY SHERIFF'S OFFICE | 10 | 0 to 30 days | \$11,761 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE FLEX FUEL REIMBURSE | This grant would provide funds to cover Flex Fuel costs for the Butler County Sheriff's Office Patrol Division for the period of one year. Butler County Sheriff's Office serves approximately 355,000 citizens over an area of 469 square miles within the county. The area consists of 6 cities, 13 townships, and 7 villages. patrol operations consist of a patrol division of approximately 80 personnel, Civil Processes consisting of 6 full time and 2 part time personnel, motorcycle unit, traffic investigations unit, aviation unit, marine patrol, and SWAT. The financial relief to the agency that this grant would provide will dramatically increase our capability to retain all personnel involved in these operations and avoid personnel reductions that are currently being considered. | BUTLER COUNTY SHERIFF'S OFFICE | 15 | 0 to 30 days | \$300,000 |
| Butler | BUTLER COUNTY SHERIFF'S OFFICE DRIVERS VISIONAIR P | This grant would provide funds to purchase VISIONAIR'S Drivers' License Reader (DLR) Software; along with the hardware, Vision Air's MagTek USB DL Reader for the Road Patrol Division's cruisers. This software is compatible to our VisionAir RMS system t | BUTLER COUNTY SHERIFF'S OFFICE | 1 | 0 | \$41,000 |
| Butler | Hamilton Street Improvements | Repave 12 miles of city streets to restore surface integrity and preserve investment in pavement structure. Hamilton has 216 centerline miles of streets, of which approximately 40% are in good to excellent condition. 60% are in fair, poor or critical condition. Efforts will be focused on resurfacing of streets classified as Minor Arterials and Collector streets. Work will include replacing catch basins in storm water collection system which require replacement due to age and deteriorating condition. Replace sidewalk ramps which do not meet current ADA standards. | City of Hamilton | 80 | 91 to 180 days | \$10,000,000 |
| Butler | SR 4 Bypass Phase 5: SR 129 to SR 4 North | The existing bridge where SR Bypass4 crosses over SR129 will be widened from 2 lanes to 5 lanes. The existing Ramps will be modified to adjust to the newly widened bridge and signals updated accordingly. The remaining 2 lane section from Princeton Road to SR 4 North (about 6600') will be widened to 4 lanes. The existing intersection at Bypass4 and SR 4 North will be modified to accommodate the new 5 lane project and adding turn lanes as required on both legs. The project include widening the bridge over SR 129, additional lanes, traffic signal remodeling, and various drainage items. The area is a mix of commercial business and some residential. The project is already a 4 lane right of way and we expect very little if any additional right of way. The environmental documents are already approved. | Butler County Transportation Improvement District | 540 | 181 days or more | \$13,500,000 |
| Butler | Consolidation | Due to economic condition company is looking to consolidate 3 operation into one (operation currently located in the state of Ohio, Michigan and Mississippi), preferably in Ohio. New jobs that will be consolidate include R&D facility from Michigan and production from Mississippi. Company will need to relocate from current facility to accommodate R&D lab. | Usul International corporation | 30 | 181 days or more | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Butler | SR 4 Bypass Phase 3: Symmes Rd to Hamilton Mason R | Phase 3 of SR Bypass 4 widening starts just north of Symmes Road intersection (Phase 2) and runs north for about 8700' to just south of the Hamilton Mason Road intersection (Phase 1). Approximately 4000' will be 6 lanes wide. The rest will be 5 lanes. The existing roadway is presently only 2 lanes. The project will cross the intersection of Tylersville Road. This intersection will be remodeled to be a new "Super Street" (First ones in Ohio). This project is located in an area of light commercial business. The project includes a new access point to the Butler County Regional Airport. This future intersection will provide the Airport with direct access to a major limited access highway facility. The project includes widening the existing 2 lane bridge over CSX Railroad. Various drainage items and traffic management for Super Street intersection. | Butler County Transportation Improvement District | 462 | 181 days or more | \$5,500,000 |
| Butler | SR 4 Bypass Phase 1 at Symmes Road | SR 4 Bypass is an existing 2 lane facility on a 4 lane R/W built in the mid 60's. Today's traffic volumes are so high that this intersection no longer meets a satisfactory level of service. The proposed solution is a "Super Street" type intersection (First in Ohio). The lengths of the 5-6 lanes on Bypass 4 are approximately 2400' (about 1200' each way). The lanes on Symmes Road are about 1200' in length (600' each way). Various drainage and traffic management components are part of this project. The intersection is located in a commercial/light industrial area. These businesses' rely on moderate to heavy highway shipping to and from their locations. 1,560 feet of 15" corrugated plastic tile that will be installed to eliminate standing water in crop fields that are affecting crop yields. This problem affects approx. 9 landowners in Wayne Twp., Butler County. If funded and problem fixed, this will eliminate standing water and better yields in fields. It will also eliminate the excessive erosion that is taking place. Stabilize approximately 450 linear feet of the Hick's Creek stream bank, which is undergoing severe erosion and threatening the stability of New London Road, a principal arterial and major truck route in Hamilton. Project will reduce soil erosion and improve water quality. Project will stabilize stream banks and stream bottom to stop erosion on either side of two check dams on Two Mile Creek near Cleveland Ave bridge. Project will also include the installation of energy dissipaters. The upstream check dam protects a 33" diameter sanitary sewer trunk line. The downstream check dam protects the footers of the Cleveland Ave bridge. Project will reduce soil erosion and improve stream water quality. | Butler County Transportation Improvement District | 240 | 181 days or more | \$1,000,000 |
| Butler | Wayne Twp. Drainage Project | 1,560 feet of 15" corrugated plastic tile that will be installed to eliminate standing water in crop fields that are affecting crop yields. This problem affects approx. 9 landowners in Wayne Twp., Butler County. If funded and problem fixed, this will eliminate standing water and better yields in fields. It will also eliminate the excessive erosion that is taking place. | Butler Soil and Water Conservation District | 5 | 31 to 90 days | \$25,000 |
| Butler | New London Road Stream Bank Stabilization | Stabilize approximately 450 linear feet of the Hick's Creek stream bank, which is undergoing severe erosion and threatening the stability of New London Road, a principal arterial and major truck route in Hamilton. Project will reduce soil erosion and improve water quality. | City of Hamilton | 20 | 31 to 90 days | \$490,000 |
| Butler | Two Mile Creek Stream Bank Stabilization | Project will stabilize stream banks and stream bottom to stop erosion on either side of two check dams on Two Mile Creek near Cleveland Ave bridge. Project will also include the installation of energy dissipaters. The upstream check dam protects a 33" diameter sanitary sewer trunk line. The downstream check dam protects the footers of the Cleveland Ave bridge. Project will reduce soil erosion and improve stream water quality. | City of Hamilton | 20 | 31 to 90 days | \$160,000 |
| Butler | Trenton Industrial Park fibre optic cable extenso | Fibre optic cable extensions to the Trenton Industrial Park | City of Trenton | 500 | 91 to 180 days | \$49,000 |
| Butler | Butler County Sheriff's Office SORN Funding | The abstract is based on the addition of 2 new full time deputies assigned to the Butler County Sheriff's Office accompanied by a full compliment of equipment and logistical support, and in addition to the part time clerical specialist already in place. The number of registrants (689) would be equally divided between each deputy and that number would be the continuing case load. In summary, in order to achieve full compliance with the Adam Walsh Act, the level of proficiency for the SORN division to attain will be to hire additional personnel with the full compliment of needed equipment and logistical support. This will enable the SORN division to have the appropriate personnel to not only "keep up" with the ever increasing demands of the sex offenders, but to be proactive in the continued aggressive investigations of all registrants that are not compliant. | Butler County Sheriffs Office | 4 | 0 to 30 days | \$211,660 |

This will enable the SORN division to have the appropriate personnel to not only "keep up" with the ever increasing demands of the sex offenders, but to be proactive in the continued aggressive investigations of all registrants that are not compliant. | Butler County Sheriffs Office | 4 | 0 to 30 days | \$211,660 |
| Butler | Partnerships for Housing REHAB | Renovation and acquisition of four homes to be rented for individuals currently being served by the Butler County Board of Mental Retardation and Developmental Disabilities. One house has been acquired. Three homes must be acquired and be renovated for accessibility. Removal of a collapsed stone structure and the installation of a check dam to control the flow over the 18" diameter sanitary crossing in Hick's Creek south of Columbia Road. Project will reduce soil erosion and improve water quality. | Resident Home Corporation | 4 | 0 to 30 days | \$200,000 |
| Butler | Hick's Creek Bank Stabilization | Bank stabilization is needed to halt erosion along 40 feet of the right bank of Shaffer's Creek that is contributing to the deterioration and loss of a residential backyard on North Eastview Parkway. Project also includes removal of existing pedestrian bridge which is only usable during periods of low stream flow. Existing bridge to be replaced with a pedestrian bridge designed to allow for high stream flows while ensuring safe passage for children to access the nearby elementary school. Project will reduce soil erosion and improve water quality. | City of Hamilton | 20 | 181 days or more | \$480,000 |
| Butler | Shaffer's Creek Bank Stabilization | Bank stabilization is needed to halt erosion along 40 feet of the right bank of Shaffer's Creek that is contributing to the deterioration and loss of a residential backyard on North Eastview Parkway. Project also includes removal of existing pedestrian bridge which is only usable during periods of low stream flow. Existing bridge to be replaced with a pedestrian bridge designed to allow for high stream flows while ensuring safe passage for children to access the nearby elementary school. Project will reduce soil erosion and improve water quality. | City of Hamilton | 50 | 181 days or more | \$180,000 |
| Butler | Trenton water supply system fibre optic cable exte | Fibre optic cable extensions associated with monitoring Trenton's water supply system. This is important to the entire existing Trenton community, as well as any future industrial and office development. | City of Trenton | 1200 retained | 91 to 180 days | \$45,000 |
| Butler | Trenton Industrial Park internal road improvements | Internal road improvements for the Trenton Industrial Park, ultimately expected to employ 500. These road improvements will serve users within the 175-Acre park adjacent to and across the street from MillerCoors Brewing Co. The funds could also be used to construct railroad spurs should that be the desire of a Park user. | City of Trenton | 500 | 181 days or more | \$2,000,000 |
| Butler | Training - Equipment and Tuition | New program offerings to get worker job ready to include equipment needs, assessments and administrative support. Tuition reimbursement opportunities for students | Butler Tech | 55 | 31 to 90 days | \$500,000 |
| Butler | Trenton southeast bypass | This bypass road around the southeast side of Trenton, Ohio will facilitate the development of Trenton Industrial Park (expected to ultimately employ over 500), as well as improve shipping access for the MillerCoors Brewing Co. (which currently employs 700). The bypass will avoid two busy railroad grade crossings in Trenton and several congested intersections. It is not proposed to build to limited access standards but rather may be three lanes with curbs and sidewalks. This road will be compatible with an extension of SR 63, should such an extension be funded and built. | City of Trenton | 500 | 91 to 180 days | \$6,400,000 |
| Butler | Trenton Industrial Park frontage road improvements | Pavement, curb and sidewalk improvements for existing Wayne Madison and Kennel Roads, to facilitate marketing and development of the Trenton Industrial Park. | City of Trenton | 500 | 91 to 180 days | \$390,000 |
| Butler | Trenton Industrial Park house moving | Move a historically-significant house, intact, to another property for an adaptive re-use. Removal of the house will facilitate development of the Trenton Industrial Park | City of Trenton | 500 | 91 to 180 days | \$42,000 |
| Butler | MMI Energy and Environmental Solutions | MMI manufactures equipment in Ohio that controls combustion thereby reducing fuel use and lowers emissions for steel, process chemical, incineration, etc. applications making them more competitive with lower costs and better quality. MMI was the 2007 Ohio Exporter of the Year and continues to keep production in Ohio. The project would design and take to market new sensors for energy and emissions reductions and create up to 10 new jobs in West Chester and maintain the current 30 jobs. The new sensors would also increase export sales by as much as \$2million in the first year. Making US companies making more competitive and increasing exports is a priority of this project. An expected 5 year outcome of this project is a larger production facility in Ohio, up to 20 new employees in Ohio and 20 more nationally, additional green energy enabling products manufactured in Ohio and better efficiencies for many industries in the US and abroad | Marathon Monitors Inc. | 30 | 0 to 30 days | \$250,000 |
| Butler | Butler County Partnerships HVAC | Replacement of HVAC systems in affordable homes rented by individuals served by the Butler County Board of Mental Retardation and Developmental Disabilities Outcome: 13 new HVAC systems Outcome: 6 new air conditioning systems | Resident Home Corporation | 4 | 91 to 180 days | \$100,300 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-----------------------------------|----------------|--------------------|---------------------------|
| Butler | Butler County Partnerships Roof Replacement | Replacement of Roofs in affordable homes rented by individuals served by the Butler County Board of Mental Retardation and Developmental Disabilities. Outcome: 5 roofs replaced | Resident Home Corporation | 4 | 31 to 90 days | \$265,000 |
| Butler | Butler County Partnerships Driveway replacement | Replacement of driveways and widening of driveways for accessibility for individuals served by the Butler County Board of Mental Retardation and Developmental Disabilities. Outcome: 3 replacement driveways and 2 driveways made accessible for individuals using accessible vans. | Resident Home Corporation | 4 | 31 to 90 days | \$25,000 |
| Butler | Software Automation, Websites | Professional Computer Consultants Inc. (PCC) is a women owned business in Ohio for the past 20 years. PCC develops software for Senior Center Agencies, Corporations, Websites, Internet Security Cameras, PC Repairs, Build Custom Personal Computers. We would like to be part of automating the old government systems. One very important area is where the public applies for funding, i.e. Foodstamps. The current process is not effective. I know of many people applying for assistance and getting it from the state and federal government and they have millions of dollars in their bank accounts. A lot of these people in Dayton Ohio are Moslems, they hate the United States and feels this is how they are winning the war against us. Same software to be used for all illegal Aliens, used in other States. PCC can create any software needed by the government. This software will save the government millions of dollars. PCC has many references and a great reputation of honesty, integrity and doing things right. | PCC Internet Group | 24 | 31 to 90 days | \$4,000,000 |
| Butler | Sensible Housing | efficient means those that are salvagable and tearing down those that are not. Replacing with affordable, efficient housing. Middletown is currently in the top ten tending city list and this would be way to create jobs and help the city of Middletown. Sensible Housing would use its available resources to develop a network of local manufacturers, suppliers, contractors and sub-contractors to produce high quality and highly energy efficient housing with a great effort towards green building. Ultimately these houses would have to be affordable for the average citizen of the area. At an average cost of 135,000 per house this project would bring 75 new affordable houses to the city of Middletown and would bring in or retain upwards of 150 to 200 jobs. There is a definite need for this in the impoverished neighborhoods of Middletown. We would be able to provide more details in future applications for these funds. | Sensible Home Design | 200 | 91 to 180 days | \$10,000,000 |
| Butler | Technology Park | There are several Technology Parks under development in Butler County. The University and Butler Tech provide research and development resources. Infrastructure construction and construction of lab facilities would be possible with funding partnership. Land owner(s) and developers can provide detailed cost budgets. | Butler County Port Authority | 300 | 181 days or more | \$2,000,000 |
| Butler | Overflow 014 & 022: Sanitary Sewer Improvements | 2,170 linear feet of 15" sanitary relief sewer from Overflow 014 at intersection of Hyde Park Dr and Harrison Ave to Ross Ave to eliminate Sanitary Sewer Overflow (SSO) to Great Miami River. 1,505 linear feet of 15" sanitary relief sewer from Overflow 022 at intersection of Kenworth Ave and Western Ave to Thomas Blvd to eliminate SSO to Great Miami River. Repair concrete curbs and sidewalks and repave streets. City of Hamilton is under Modified Consent Decree with OEPA to mitigate five sanitary sewer overflows. This project will provide additional pipe carrying capacity during rain events at two locations which presently experience sewer overflows when flows exceed capacity of existing 8" sanitary conduit. Will reduce OEPA fines to Hamilton rate payers | City of Hamilton | 20 | 91 to 180 days | \$859,700 |
| Butler | Butler County Partnerships Flooring | Replacement of flooring in affordable homes rented by individuals served by the Butler County Board of Mental Retardation and Developmental Disabilities. Some homes need replacement flooring due to accessibility issues. Outcome: replacement flooring in 38 properties | Resident Home Corporation | 3 | 31 to 90 days | \$188,000 |
| Butler | Overflow 002: Sanitary Sewer Improvements | 4,400 linear feet of 18" sanitary sewer replacement from See Ave to Hensley Ave to eliminate Sanitary Sewer Overflow (SSO) to Great Miami River. Repair concrete curbs and sidewalks and repave streets. City of Hamilton is under Modified Consent Decree with Ohio EPA to mitigate five sanitary sewer overflows. This project will provide additional pipe carrying capacity during rain events at one location which presently experiences sewer overflows when flows exceed capacity of existing 8" sanitary conduit. Will reduce OEPA fines to Hamilton rate payers | City of Hamilton | 20 | 31 to 90 days | \$1,808,100 |
| Butler | Energy Conservation | Lighting retrofits for commercial and industrial facilities. A/C efficiency upgrades. Power quality improvements. Infrastructure energy improvements. Electric metering | Quality Energy Consulting, LLC | 3 | 91 to 180 days | \$500,000 |
| Butler | 2MW wind turbine deployment | Installation of 6, 2MW wind turbines, transition of manufacturing from Czech Republic, and development of infrastructure to build future turbines. The funding is needed to develop manpower and equipment resources needed, train the resources, to accomplish the project by year end. | US Turbine LLC | 30 | 31 to 90 days | \$6,000,000 |
| Butler | City of Monroe - SR 63 Gateway | City of Monroe - SR 63 Gateway - gateway towers and landscaping in the infield areas located within the new SPU interchange for Interstate 75 at SR 63 | City of Monroe | 595 | 0 to 30 days | \$1,200,000 |
| Butler | City of Monroe - Cin-Day Collector | City of Monroe - Cin-Day Collector - new roadway construction, approximately 170 acres of land, roads and utility infrastructure will be required to open a new Miami Valley Business Center. In addition to opening the Miami Valley Business Center for development, these roadways will be the catalyst for the development of an additional 170 acres of adjacent land that can accommodate more than 2 million square feet of comparable facilities and have the potential to generate an additional 1,200 jobs. No additional right-of-way will be required to construct the infrastructure. Simply stated, the opening of Miami Valley Business Center will add significantly to the potential of future development. | City of Monroe | 1250 | 0 to 30 days | \$4,000,000 |
| Butler | Dura-Therm Crosswalk Installations | Dura-Therm cross walk installations at four (4) key intersections with high pedestrian traffic. 1) Route 4 & High Street, 2) Route 4 & Grand Blvd., 3) Route 4 & Hamilton Crossing Shopping Center entrance, 4) Route 4 & Bobmeyer Road. | City of Hamilton | 50 | 91 to 180 days | \$50,000 |
| Butler | Artspace Mixed-Use Project | The \$1M request is for anticipated gap funding for construction of work/live affordable housing for Artists. The project would be located in downtown Hamilton and upon completion would house approximately 36 artist who work/live on site. Expected outcome is the redevelopment of the surrounding area to create more jobs and economic development | City of Hamilton | 36 | 181 days or more | \$1,000,000 |

|----------------|---|---|--|----------------|--------------------|---------------------------|
| Butler | Butler Tech Bio-Medical Educational Facility | Health care careers continue to grow and show promise as a growing market for adult education programs. Current facilities are not adequate for long term success in this market. In December 2008, Butler Tech purchased land adjacent to Interstate 75 in the West Chester Community for the future development of a Bio-Medical Educational Facility. The school will be a 9-16 school focusing on 21st Century Skill development while teaching college preparatory academics and career technical education in law-med, radiology, nursing, pharmacy, physical therapy, dental, biotechnology, genology, and other bio-medical fields. The programming beyond the high school level would be focused on technical and customized training specifically designed to get people to employment and to meet industry needs. The expected outcomes are: 1. A 9-16 Educational Facility with high school, adult workforce, community college, and university level education. 2. 200 secondary graduates and 100 adult graduates who are employment ready on an annual basis. 3. Multiple community partnerships involving all levels of the health care marketplace and numerous post secondary institutions in southeast Ohio. 2-1-1 is an easy-to-remember 3-digit dialing system (similar to 9-1-1 and 4-1-1) that makes a simple, but critical connection between individuals and families who are seeking services or volunteer opportunities and the appropriate community-based organizations and government agencies. 2-1-1 connects individuals with resources in their community. With approximately 1.5 million nonprofit organizations in the United States plus scores of government agencies, finding help can be confusing and intimidating. Butler County 2-1-1 is staffed by trained certified specialists who quickly assess the callers' needs and refer them to the help they seek. It's simple to remember, accessible to everyone at no cost, and available 24/7. The database of more than 700 social agencies will be annually updated with some programs being updated more frequently due to more current changes. New programs and agencies will be added to the database at a rate of 20 new agencies annually. Callers will report they received an accurate and timely referral 90% of the time which will be obtained by follow-up phone calls. Replacement of existing traffic control signals with LED energy saving signals. | Butler Technology and Career Development Schools | 34 | 181 days or more | \$35,000,000 |

| Butler | LED Signal Upgrade | Replacement of existing traffic control signals with LED energy saving signals. | City of Oxford | 5 | 0 to 30 days | \$50,000 |
| Butler | School Safe and Secure Entrances | Construct safe and secure entries at 12 school buildings and complete classroom additions at 3 school buildings in the Lakota Local School District. Complete renovation of existing buildings support systems such as technology, HVAC, electric and plumbing. Bring the building in compliance with current ADA standards and look at opportunities to create LEED certified buildings. The projects could be ready to start within 6-8 months after receiving funding. | Lakota Local School District | 200 | 181 days or more | \$129,000,000 |
| Butler | Beech to College Brick Street Rehab | Replacement of failing street and restoration of historic brick surface of US27 (High St.) in Oxford. | City of Oxford | 30 | 31 to 90 days | \$1,250,000 |
| Butler | New School Buildings | One block of this route was restored in 2008. Construct two new school buildings to support the Governor's education initiative of all day kindergarten. Currently, the Lakota Local School District does not have the necessary space to house all of the kindergarten students residing in our District and would need the additional buildings to support this initiative. | Lakota Local School District | 120 | 181 days or more | \$40,000,000 |
| Butler | US27 Intersection Improvement High/Patterson | Safety improvements for US27 intersection in the heart of the Miami University campus. Curb, gutter, and sidewalk would be constructed with new traffic and pedestrian signalization. Failing storm sewers would be replaced. | City of Oxford | 15 | 31 to 90 days | \$350,000 |
| Butler | New High School Sidewalk / US27 | Construction of new sidewalk on US27 to service a new High School in the Talawanda School District. | City of Oxford | 10 | 31 to 90 days | \$600,000 |
| Butler | Energy improvements to Municipal Building | Replacement of antiquated windows and HVAC systems in the Oxford Municipal Building. New windows and systems will greatly reduce the energy required to heat and cool the facility. | City of Oxford | 5 | 91 to 180 days | \$250,000 |
| Butler | US27 South Water Main Replacement | Replacement of antiquated cast iron water main with greater capacity ductile iron main along US 27 | City of Oxford | 15 | 91 to 180 days | \$950,000 |
| Butler | Conversion to sodium hypochlorite from chlorine gas | Conversion to safer disinfection process per Homeland Security Dept. Replace existing gas disinfection process with safer sodium hypochlorite system. | City of Oxford | 5 | 91 to 180 days | \$350,000 |
| Butler | Phosphorus removal | Addition of phosphorus removal to POTW. Will improve water quality of Four Mile Creek and meet OEPA initiative. | City of Oxford | 5 | 91 to 180 days | \$200,000 |
| Butler | Water Treatment Plant roof replacements | Replacement of roofs for two water treatment plant buildings. | City of Oxford | 5 | 0 to 30 days | \$90,000 |
| Butler | Police Officers, Community Servants | Our community is in need of three additional police officers to enhance the police services they want and deserve. One officer would serve our community as a full-time community resources officer to proactively engage the community through educational venues. The second officer would serve the community as an investigator full-time to follow-up on crimes to enhance our solvability rate for citizens. The third officer would serve the community by working the road during peak call volumes full-time to better respond to the needs of the public. | Trenton Police Division | 3 | 31 to 90 days | \$255,000 |
| Butler | Technology: Police In-car Computers | We are in need of replacing our lap top computers in our police cruisers. We need for new advanced technology would enhance our capability to serve our community. We have purchased two new laptops, however, we do not have the funds to purchase new laptops to replace the others in need of replacing. The newer technology provides more options for officers on the street by enabling them to keep their eye on the road more, and less time viewing the screen. | Trenton Police Division | Unknown | 0 to 30 days | \$40,000 |
| Butler | Local Street Resurfacing Program | The project consists of rehabilitating over 580 lane miles of streets in the City of Middletown. The project can be phased over a multi-year period to fund the work in smaller increments. The City would provide water and sewer to the northern portion of teh airport to promote corporate hangar growth. The airport is currently at capacity and new hangars are needed to allow for expansion and development opportunities. | City of Middletown | 250 | 91 to 180 days | \$60,000,000 |
| Butler | Water & Sewer to Middletown Regional Airport | The airport is currently at capacity and new hangars are needed to allow for expansion and development opportunities. | City of Middletown | 25 | 31 to 90 days | \$750,000 |
| Butler | Oxford State Road Improvement Project | The City intends to widen this minor arterial to five lanes to accommodate the increased industrial traffic to Interstate 75. | City of Middletown | 100 | 181 days or more | \$12,500,000 |
| Butler | Brownfield Redevelopment Program | The City has been working with a redevelopment expert to identify brownfield sites that are good candidates for reinvestment. This funding will provide the local match to secure Clean Ohio funding for these projects. | City of Middletown | 200 | 181 days or more | \$5,000,000 |
| Butler | Hydraulic Canal Restoration | The City would restore the the 3.5 mile canal as a drainage course for the City's storm water conveyance system. | City of Middletown | 25 | 181 days or more | \$9,500,000 |
| Butler | Bulls Run Stream Restoration | The City would restore the Bulls Run stream and develop a wetlands/detention component upstream to prevent additional erosion of the streambank. | City of Middletown | 25 | 181 days or more | \$1,400,000 |
| Butler | Long Term Control Plan | The City would install the necessary improvements to comply with the national CSO Policy, including an express sewer to the treatment plant and high rate treatment facilities to treat the combined flows. | City of Middletown | 250 | 181 days or more | \$60,000,000 |
| Butler | Police and Fire Public Safety Building (new constr | Both the current Oxford Police Division and Fire Division stations are inadequate, outdated, completely energy inefficient, undersized, unsuitable for their present use, and in serious need of either complete overhaul or replacement. The proposal is to build a police/fire/ems/court complex that would integrate services into one location in a more eco-friendly, citizen-friendly modern and efficient building. Collaboration efforts would involve the police department, the fire department, and the county court and include the use of existing city property or private donation of property. | Oxford Division of Police | unknown | 91 to 180 days | 6 million |
| Butler | Lefferson Road Widening | Collector widening to 3 lanes to accommodate increased traffic on collector | City of Middletown | 50 | 181 days or more | \$2,000,000 |
| Butler | University Boulevard Resurfacing | Resurfacing of 6 lane minor arterial. | City of Middletown | 50 | 91 to 180 days | \$3,000,000 |
| Butler | Breiel Boulevard Resurfacing | Resurfacing of 6 lane minor arterial. | City of Middletown | 50 | 91 to 180 days | \$3,000,000 |
| Butler | Truck Weights & Measures Enforcement | This will establish a vehicle, train an officer to enforce trucks weights & measures. In our city we have three major 4 lane divided highways, and major I-75. We have thousands of trucks that use our roads on a regular basis. We do not have a designated unit. We do not have scales or a vehicle to utilize for this speciality program. This is paying the officer's salary via grant for 3 years. After that the city would assume the salary. | Monroe Police Department | 1 | 91 to 180 days | \$280,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Butler | New Police Facility | The city of Monroe is a fast growing city. In the past several years we were one of the fastest growing city in Ohio. Our police facility is out dated and much too small. The construction of this facility will put many construction workers to work for at least 12 months and will allow us to continue the permanent hiring of needed police officers. | Monroe Police Department | 25 | 181 days or more | \$12,000,000 |
| Butler | High St. Water Main Improvement - Poplar St. to Mai | 720 Linear feet of new water main. This main replaces an old main that requires high maintenance | City of Oxford | 25 | 31 to 90 days | \$355,322 |
| Butler | High St. Water Main Improvements - Lynn to Locust | 560 linear feet of new water main that replaces an existing water main, prone to breaks | City of Oxford | 20 | 0 to 30 days | \$236,575 |
| Butler | High St. Water Main Improvements - Locust to Colle | 1,350 linear feet of new water main, which replaces an existing water main that is prone to breaks. | City of Oxford | 20 | 31 to 90 days | \$395,735 |
| Butler | High St. Water Main Improvements - College to Beec | 700 linear feet of new water main, which replaces an existing water main that is prone to breaks | City of Oxford | 20 | 31 to 90 days | \$319,425 |
| Butler | High St. Water Main Improvements - Poplar to Campu | 575 linear feet of new water main, which replaces an existing water main that is prone to breaks | City of Oxford | 20 | 31 to 90 days | \$229,961 |
| Butler | High St. Water Main Improvements - Campus to Talla | 1,100 linear feet of new water main, which replaces an existing water main that is prone to breaks | City of Oxford | 25 | 31 to 90 days | \$356,142 |
| Butler | Walnut Street - Sanitary Sewer Improvements | 415 linear feet of new sanitary sewer main, which replaces an existing main that has collapsed | City of Oxford | 10 | 0 to 30 days | \$50,000 |
| Butler | Bonham Rd. - Water Main Improvements | 270 linear feet of new water main, which replaces an existing and exposed water main crossing a creek. | City of Oxford | 15 | 0 to 30 days | \$62,605 |
| Butler | Kindergarten Building | The request is in order to meet the educational demands of providing equal opportunity for all Fairfield kindergarten students to attend an all day kindergarten facility or facilities. We would like to propose re-building or renovating our current kindergarten facility or building a new kindergarten facility in order to provide 2 facilities in which to hold kindergarten for our community. This plan would be finalized and analyzed based on the availability of funding. It would provide new jobs to early education teachers, classified employees for assisting the teachers and secretarial staffing. The project would also provide a construction company with much needed work. Our drive would be to provide an adequate setting for our most developmentally impressioned students to have the greatest learning experiences provided to them on a daily basis. Please feel free to contact me with any questions. Sincerely, Chad Lewis Business Director Fairfield City Schools | Fairfield City School District | 50 | 181 days or more | \$6,000,000 |
| Butler | Chestnut St. - Sanitary Sewer Improvement | 220 linear feet of new sanitary main, part under RR track, which replaces an existing main that is partially collapsed. | City of Oxford | 10 | 31 to 90 days | \$118,575 |
| Butler | Upgrade of Athletic Facilities | current usage standards. The Fairfield City School District provides educational and athletic opportunities to approximately 10,198 students in Butler County. The current football, soccer, and track facilities need to be improved and moved from its current location. The high school facility is in a different location than Fairfield Stadium. It is located approximately 2 miles from the high school facility and the location would be better served as a pass way for cars from one busy intersection to another. It would serve in a capacity as a gateway for two communities, the City of Fairfield and Fairfield Township. The current stadium is over 30 years old. The existing structures (bleachers, restrooms) are inadequate for the number of activities and people that are hosted at the facility. The new athletic facility would be built at the high school and become the center piece of the entire community. This project would bring a certain level of pride back to this community. Thank you for your time and consideration | Fairfield City School District | 50 | 91 to 180 days | \$8,000,000 |
| Butler | New Asphalt | on 2 Fairfield City School District sites. The current asphalt at the school sites have many cracks in them are becoming a cause for concern. The asphalt is the original asphalt that was laid when the facilities were built. We ran a Permanent Improvement Levy in order to secure funding to replace the asphalt. The levy failed and we are unable to provide this repair for our 2 facilities at this time. We are requesting this assistance to upgrade these 2 facilities and protect the current investment in those facilities. Thank you for your consideration of this request. Sincerely, Chad Lewis Business Director Fairfield City School District | Fairfield City School District | 10 | 31 to 90 days | \$2,000,000 |
| Butler | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDI's mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, Individual Development Accounts (IDAs), microloans, technical assistance, and access to retail markets. As the only U.S. Small Business Administration microlender and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI's Microenterprise Loan Fund fills a gap in the credit industry by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDI is able to serve unbankable populations, including low-income individuals, those with little or no credit, or those precluded from paying interest because of religious beliefs | Economic and Community Development Institute | 20 | 31 to 90 days | \$150,000 |
| Butler | RESTORE OUR FOUNDATION | Outdoor security fencing for public school | New Miami Local School District | 25 | 91 to 180 days | \$100,000 |
| Butler | RESTORE OUR FOUNDATION | Outdoor public restrooms, running water, concession stand | New Miami Local School District | 25 | 91 to 180 days | \$250,000 |
| Butler | RESTORE OUR FOUNDATION | Non-competitive outdoor track for public school district | New Miami Local | 20 | 31 to 90 days | \$500,000 |
| Butler | Reconstruct Apron and runup area | Reconstruct Apron C and Runup Area | Butler County Regional Airport | 15 | 91 to 180 days | \$888,000 |
| Butler | Install Automated Weather Observing System | Install Automated Weather Observing System. The funds requested will be used to complete asbestos abatement and mold remediation in three historic commercial buildings that together comprise the High Street Commercial Block. The buildings are being combined together and rehabilitated in a single \$6.5 million project to bring market-rate rental housing and retail and office uses to the primary thoroughfare in downtown Hamilton. This catalytic project is expected to generate significant additional economic development in the city. | Miami University | 3 | 31 to 90 days | \$158,700 |
| Butler | High Street Commercial Block | This project will mobilize 40 Community Support Staff to better serve the severely mentally ill and homeless in the Butler County, Ohio. We will transfer more than 2000 paper medical records to an electronic document filing system. We will stop creating paper with the implementation of the electronic signature in the field where the community need is. This project will reduce costs and increase productivity, increase our ability to do statistical reporting improving our ability to make informed sound business decisions and provide stakeholders with the data they require. The successful implementation of this project will allow us to be proactive and improve our ability to remain solvent in a fragile economic environment. | Historic Developers Inc. | 20 | 31 to 90 days | \$25,000 |
| Butler | CPST Mobility and EHR Implementation | Replace the windows and roof on drop in center for psychiatrically disabled adults. Center provides social and educational opportunities without regard to ability to pay. | Transitional Living, Inc. | 40 | 31 to 90 days | \$80,000 |
| Butler | Rehabilitation of Adult Drop-in Center | Building is an old house that is presently very energy inefficient because of the old windows and leaking roof. The requested improvements would help the center to remain more comfortable during the winter months and significantly reduce the cost of utilities. | Butler Behavioral Health Services | 5 | 31 to 90 days | \$40,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-------------------------------------|---|--------------------|---------------------------|
| Butler | Rehabilitation of Adult Drop-in Center | Repair existing parking lot and replace existing HVAC control system for mental health center building. Asphalt parking lot is cracking and in need of patching. Building HVAC is a 45 year old boiler system with existing thermostatic control system. Current control system is obsolete and repair parts are no longer available. In addition, current control system lacks all the improvements now available that significantly reduce the cost of heating and cooling the building. | Butler Behavioral Health Services | 5 | 31 to 90 days | \$30,000 |
| Butler | Airblock for Entrance | Building is a mental health center providing outpatient services to adults and children regardless of ability to pay. Currently there is an airblock at the entrance which results in the significant loss of heating & cooling, thus high utilities cost. Addition of foyer to the outside of the building would eliminate the above referenced loss and significantly reduce the Agency's energy cost | Butler Behavioral Health Services | 3 | 31 to 90 days | \$8,000 |
| Butler | Municipal Building HVAC upgrade | Upgrade HVAC digital control system at our Municipal Building. This project will decrease our electric and gas energy demand for our building and reduce our carbon footprint. Control strategies include resetting chilled and hot water setpoints from building demand and optimizing start and stop times of equipment using adaptive software to reduce equipment run times | City of Fairfield | 4 | 0 to 30 days | \$105,000 |
| Butler | Career Crisis Management & Support | Project would target individuals who have become unemployed due to the financial emergency, returning military veterans, transitioning youth with disabilities, minorities and others who are unemployed and vulnerable for chronic unemployment. Programming would combine education, job development and mental health support to assist these individuals with transition back to work during the economic downturn. Curriculum would include job instruction trained skills, financial counseling, networking, mastering medical records coverage, career counseling, developing a new career plan, career change resources, job search techniques and adjusting while "starting over" in a new career. Participants will be prepared to address community needs in a changing work environment. Each session will include opportunities to network with and support others during the job search and to access available community supports. Finally, there will be weekly supplementary psycho-educational services provided by mental health professionals. The focus of these sessions will be to help individuals cope in order to reduce their risk for self-harm, domestic violence, substance abuse and depression. Project would target greater energy job skills to vulnerable population who are at risk of chronic underemployment. A second outcome would be the assembly of wind turbine hot water heating units and/or solar electric generation units for homeowners who wish to convert to alternative energy at an affordable cost. | Butler Behavioral Health Services | 288 | 0 to 30 days | \$12,250 |
| Butler | Green Energy Technician Training | The project has been designed to address the need for laborers who can speed the nations transition to alternative energy by producing simple, low cost units that can be purchased and installed by low and middle income homeowners. Trainees would be recruited from populations at risk for chronic unemployment including: a) returning veterans, b) young adults who reside in a community with unemployment rates above 15% of the national rate, c) persons with disabilities. Management & supervision roles would be filled by returning veterans with leadership skills or other individuals who have been laid off from a related industry. Deliverable outcomes would include home units sold as well as graduation of 12 trainees/year who are ready for self-employment/employment as green energy assembly technicians. Training would be sustained through sales revenue. | Butler Behavioral Health Services | 19 | 91 to 180 days | \$497,050 |
| Butler | Student Safety | We would like to increase school security. We are the largest High School in the state of Ohio. We have over 100+ visitors in the building daily. We would like assistance purchasing a identity system. When someone would visit our high school, there I.D. would be scanned into a computer system. The system cross references their name against state and local law enforcement agencies to check for any criminal or sexual offense history. It also prints out a temporary ID with a picture, that will expire after 4 hours of use. The system allows us to monitor who is entering and exiting our building. We have 18 points of entry into our facility and do a very good job monitoring, but not good enough. We have limited staff to monitor these entry points, and we cannot lock them from the inside. Any person can allow someone to enter without us knowing. This system would prevent this. I appreciate your consideration and hope you choose to help us with this project. We will interconnect to signals in the City with fiber optic cable. The project will upgrade much of the existing signal equipment and traffic monitoring equipment will also be installed. This project is scheduled in ODOT's fiscal year 2009 program and plans are scheduled to be completed within 30 days. This project will be constructed with a \$1,900,000 OKI surface transportation grant. The City portion is estimated to be approximately \$500,000 for the remainder of the project. This phase of the bypass project is the City of Fairfield's portion and will when the existing two lane bypass to four lanes. The project is approximately 5500 feet in length. The project will include upgraded intersections at the south end of Route 4 and at Port Union Road. A new bridge will be constructed over the existing CSX railway. This project will also include drainage and signal improvements for the entire segment. This phase is being designed to accommodate phases 2 and 3 being designed by the Butler County TID | Fairfield High School | 0 | 31 to 90 days | \$10,000 |
| Butler | City of Fairfield Central Traffic System | Asphalt resurfacing of approximately 11.5 miles of existing roadway mainly located in the vicinity of I-75 in West Chester township. Phase 1 of 5 for the improvement of the SR4 Bypass corridor near Hamilton and Fairfield Ohio. Project is to include the construction of a new superstreet intersection to be the first of its kind in Ohio. The project has been approved through the Federal NEPA process and is programmed on the OKI TIP. | City of Fairfield | 375 | 31 to 90 days | \$500,000 |
| Butler | BUT-4B-0.00 | Asphalt resurfacing of approximately 11.8 miles of rural roadway located in Reily, Wayne and St. Clair townships in Butler County. | City of Fairfield | 300 | 181 days or more | \$10,500,000 |
| Butler | Multi Use Path | Approximately 2 miles of a multi use path for walking and bikes | City of Oxford | 20 | 91 to 180 days | \$375,000 |
| Butler | Kehr Road Stabilization | Approximately 600 linear feet of road stabilization. Road is sliding into creek. | City of Oxford | 25 | 31 to 90 days | \$185,000 |
| Butler | Butler County Engineer's Office OKI Resurfacing | Asphalt resurfacing of approximately 11.5 miles of existing roadway mainly located in the vicinity of I-75 in West Chester township. | Butler County Engineer's Office | 75 | 31 to 90 days | \$3,647,634 |
| Butler | SR4 Bypass Phase 1 @ Hamilton Mason | Phase 1 of 5 for the improvement of the SR4 Bypass corridor near Hamilton and Fairfield Ohio. Project is to include the construction of a new superstreet intersection to be the first of its kind in Ohio. The project has been approved through the Federal NEPA process and is programmed on the OKI TIP. | Butler County Engineer's Office | 115 | 181 days or more | \$3,304,000 |
| Butler | Butler County Engineer's Office CEAO Resurfacing | Asphalt resurfacing of approximately 11.8 miles of rural roadway located in Reily, Wayne and St. Clair townships in Butler County. | Butler County Engineer's Office | 50 | 31 to 90 days | \$1,992,228 |
| Butler | SWOCA facility expansion | SWOCA is an Ohio Information Technology Center that is a collaboration of nearly 100 public, charter and private schools throughout the state. Over 120,000 P-12 students are served by our facility. A number of adult students are also on our network "after hours" at the Career Centers we serve. Our current staff of 19 is housed in a 5000 square foot space rented from a Career Center. Our expansion to a new site of approximately 15,000 square feet will allow us to expand our staff to approximately 25 while providing improved services and training for our districts. This project has been in the planning stages for over a year but financial considerations have hindered its implementation. We would be ready to move very rapidly with the infusion of these funds. In addition to the 6 new jobs that SWOCA will create, our contractor estimates 50-60 people at a time on the job for 8 to 12 months with hundreds actually "touching the project" over its course | SouthWest Ohio Computer Association | 75 for 8 to 12 months. 6 permanent positions. | 91 to 180 days | \$2,000,000 |
| Butler | Patterson Drive Redevelopment | Redevelopment of a vacant shopping center along Patterson Drive in Fairfield, OH. Stimulus funds are requested for the demolition of the existing center and construction of a regional stormwater retention facility. After this site preparation work is complete, mixed-use private development will occur on the site, including the development of new retail and office space, senior housing, and other market development. | City of Fairfield | 100 | 31 to 90 days | \$750,000 |
| Butler | Help The Spanish Community | Help the Hispanic community to purchase and fits, they houses accorder to the community Improv needed. | GOOD CHOICE BUSINESS CENTER,LLC | 10 | 31 to 90 days | \$2,579,200 |

| Butler | Butler County Success | fasted, collaborative model to help children and families in poverty. We support the development of specific skills critical to the formation and main-tenance of self-sufficiency and intact families, parent/family engagement and involvement in meeting the needs of children in ways that do not compromise parents' employment. All of this is accomplished through partnerships with the school and community. Through these partnerships it is estimated that services leveraged because of the Success Program are a 1:1 ratio. These services include churches who are providing after-school enrichment and mentoring opportunities for children, backpack food to help children eat on the weekends, and mental health services for children at school. The employment of 15 Community School Liaisons and 1sup. to work with schools, families and communities is the cornerstone of the Success Program. The Liaisons are each assigned to a district and specific elementary buildings. The evaluation of the Success Program is conducted by Miami University. Results are significant across all districts. This program has been a successful model for other districts. In 2009, the City of Hamilton via a six inch (6") waterline approximately 2100 feet in length, has served forty-four (44) City of Fairfield customers. Fairfield agrees to purchase the water line from Hamilton and connect the water lines at Pleasant Avenue. This project will improve billing efficiencies between the two systems and reduce Fairfield customer costs. Subsidies paid by the City of Fairfield will also cease. In addition, the project will provide another emergency water interconnection between the two jurisdictions. | Butler County Educational Service Center - Success | 15 | 0 to 30 days | \$700,000 |

| Butler | BellyBe - Expand Performing Arts & Fitness Offerin | <p>Establish permanent facilities and educators for teaching a variety of performing arts, health, and fitness courses in the Fairfield area. Facilities will ideally be eco friendly utilizing planted rooftops, natural lighting, and other features.</p> <p>BellyBe will retain and/or employ 6-10 persons while providing opportunity for approximately 30-50 other individuals to earn income by teaching classes and fitness sessions.</p> <p>We work in conjunction with BTS Technology Services, Inc to help market and promote individual teachers and session leaders.</p> <p>By working with a variety of session leaders, we provide a wide range of offerings suitable for all ages and genders. Our students have a high ratio of weight loss and better overall health and happiness.</p> <p>Our goal through this project is to establish permanent facilities and expand opportunities for individual instructors by expanding our reach to new audiences.</p> | BellyBe Belliydance & Exercise | 15 | 31 to 90 days | \$897,500 |
| Butler | Amberly Drive Elevated Water Tank | <p>elevated water tank. The existing tank does not meet operational storage requirements required by the Ohio EPA for balancing the system demands, outages, peak hourly demands and fire protection. Based on hydraulic analysis of the system, the elevated tank is undersized by 640,000 gallons for current operations and deficient by 740,000 gallons for future requirements. Replacement of the tank will remedy storage deficiencies throughout the system. This project will create or retain approximately 120 jobs. This estimate was developed utilizing the American Public Works Association's formula that 40,000 jobs are created for every \$1 billion in spending. Approximately 30 construction workers will be on-site for the erection and painting of the elevated tank, which will yield income tax revenue to the City of Hamilton and support local businesses by way of housing, meals, and entertainment. The remaining jobs will be created or retained at the contractor's office, and at support industries (pipe, paint, etc.). The project will utilize domestic steel for the construction.</p> | City of Hamilton | 120 | 31 to 90 days | \$2,000,000 |
| Butler | Indoor Facility Expansion/Field Completion | <p>Expand an existing indoor training facility to be able to accommodate 25 athletes in each session compared to the current limit of 15. Use other part of the funding to help complete base of field that has been started, but work has halted due to economy. The combination of these two things will allow the current business to remain open keeping the current staff of 3 employees and enable the business to add 2 full time or 6 part time workers. These jobs can be filled by individuals currently unemployed and the flexible hours will allow them to go to school or re-train. Look for employment in a previous related career field. This also will create summer employment jobs for youths in the area with camps that will be run on the field, along with umpiring, and concessions. These jobs although not staffed by Barracks employees will exist due to the expansion.</p> | Barracks Baseball Academy | 5 | 0 to 30 days | \$60,000 |
| Butler | Amberly Drive Booster Pump Station | <p>Based on the City's water master plan, the booster pump station on the 940 water system needs to have a firm capacity of 1,000 gpm. The existing booster station, off of Amberly Drive, does not meet these requirements with one pump out of service. The existing facility, built in 1949, is unable to be expanded to meet the required pumping capacity; therefore, a new booster pump station will be constructed and the existing booster station will be demolished.</p> <p>It is estimated this project will create or retain 26 jobs. This estimate was developed utilizing the American Public Works Association's estimate that 40,000 jobs are created for every \$1 billion in spending. A portion of the jobs will be construction workers on-site for the construction of the booster pump station, which will yield income tax revenue to the City of Hamilton and support local businesses by way of housing, meals, and entertainment. The remaining jobs will be created or retained at the contractor's office and at the support industries (pipe, building materials, pump manufacturer, etc.).</p> | City of Hamilton | 26 | 91 to 180 days | \$450,000 |
| Butler | Home Insulation | <p>Foam insulate my home that currently has no insulation and update the water heater to a tankless model.</p> | N/A | 7 | 0 to 30 days | \$25,000 |
| Butler | 2.0 MG Clearwell | <p>Production swings at the City's water treatment plant are common due to pumping changes throughout the City's distribution system. A new 2.0 million gallon clearwell is recommended in the City's water master plan to improve operational flexibility, increase overall onsite storage capacity and provide an additional level of safety with respect to fire flow protection. The new clearwell will be constructed at the City's South Water Treatment Plant.</p> <p>It is estimated this project will create or retain 120 jobs utilizing the American Public Works Association's estimate that 40,000 jobs are created for every \$1 billion in spending. A portion of the jobs will be construction workers on-site for the construction of the clearwell, which will yield tax revenues and support local businesses by way of housing, meals, and entertainment. The remaining jobs will be created or retained at the contractor's office, at the concrete plant, and at the support industries (pipe, building materials, etc.).</p> | City of Hamilton | 120 | 31 to 90 days | \$2,000,000 |
| Butler | Wellfield Generators | <p>This project also serves the Butler County Department of Water and Sewer who purchases water throughout the City. While the City's South Water Treatment plant has emergency generator backup, the City's wellfield does not. In the past, it was assumed that a double feed from Hamilton and Duke Energy to the wellfield would enable the City to provide water to the plant. The hurricane force winds proved that is not a guarantee. The project would provide generators at 6 of Hamilton's wells which will enable the City to produce enough water to maintain average daily production of 18 mgd.</p> <p>It is estimated this project will create or retain 18 jobs. This estimate was developed utilizing the American Public Works Association's estimate that 40,000 jobs are created for every \$1 billion in spending. A portion of the jobs will result from the workers on-site installing and wiring the generators. These workers will yield income tax revenues and support local businesses by way of housing, meals, and entertainment. The project will also stimulate jobs within the generator.</p> | City of Hamilton | 18 | 181 days or more | \$450,000 |
| Butler | Water Main Replacement Projects | <p>The City of Hamilton's water system dates back to 1882. Some of the City's older cast iron water mains experience numerous breaks creating water pressure and/or quality issues in their service areas. The City has identified six water mains comprising 15,700 linear feet of 8" and 12" pipe requiring replacement. Replacement of the mains will ensure a more reliable water supply and increase/sustain pressure to the residences and businesses served by them.</p> <p>It is estimated this project will create or retain 76 jobs. This estimate was developed utilizing the American Public Works Association's estimate that 40,000 jobs are created for every \$1 billion in spending. A portion of the jobs will result from construction workers installing the new pipelines. These workers will yield income tax revenue to the City of Hamilton and support local businesses by way of housing, meals, and entertainment. The project itself will provide water service to the businesses along the routes and potentially supply new businesses. The project will also stimulate jobs within the pipeline industry (valves, fittings, hydrants, etc.) and among supporting industries (ba</p> | City of Hamilton | 76 | 91 to 180 days | \$1,150,000 |

|----------------|--|--|----------------------------------|----------------|--------------------|---------------------------|
| Butler | 24" Water Main Lining | The 24" water transmission main, constructed in the late 1930's, transports water to the City's East Reservoir. The main is spirally welded plate iron pipe with a history of leaks. In 1988 3,000 feet were replaced and 4,455 feet were lined in 2008. The project will line the remaining 15,000 feet to preserve the dependability of supplying water and eliminate potential health and safety hazards due to main breaks including lack of fire protection; low water pressure that can potentially allow bacteria to enter the system; and damage to property. This project will create or retain 148 jobs based on the American Public Works Association's estimate that \$1 billion in spending creates 40,000 jobs. The majority of the jobs are construction workers completing the project, which will yield income tax revenue to the City and support local businesses by way of housing, meals, and entertainment. The project will also stimulate jobs within the pipeline industry (valves, fittings, hydrants) and supporting industries (backfill, concrete supply). The project will also benefit Butler County Water and Sewer as the main is their primary source of water to the L | City of Hamilton | 148 | 181 days or more | \$2,680,000 |
| Butler | North Water Treatment Plant Improvements | The City of Hamilton North Water Treatment Plant, constructed in the mid 1930's, has received several upgrades and is a historic structure. The City's Master Plan recommended the plant be renovated including a new lime feed and storage building; flocculation basins; renovations to the building; replacement of the washwater tank, high service and backwash pumps; structural and piping repairs; generator for standby power; and electrical and instrumentation improvements. These improvements are critical to maintain the functionality and reliability of the water system. The North Plant has a capacity of 6 mgd, is used during periods of high demand, and is the emergency supply to the City and Butler County. The project will create or retain 280 jobs based on the American Public Works Association's estimate that \$1 billion in spending creates 40,000 jobs. Many of the jobs will result from construction workers completing the renovations. These workers will yield income tax revenue and support businesses by way of housing, meals, and entertainment. The project will also stimulate jobs within | City of Hamilton | 280 | 181 days or more | \$5,400,000 |
| Butler | West Reservoir 16" and 20" Transmission Mains Lini | The project will create or retain 15 jobs based on the American Public Works Association's estimate that \$1 billion in spending creates 40,000 jobs. The majority of the jobs will result from construction workers completing the water main lining. These workers will yield income tax revenue to the City of Hamilton and support local businesses by way of housing, meals, and entertainment. The project will also stimulate jobs within the support industries (fusible PVC pipe manufacturing, valve manufacturing, etc.) to line an additional 5-10 miles of water main. This will improve our infrastructure, purchase new systems and safe guard proprietary electronic data | City of Hamilton | 15 | 91 to 180 days | \$250,000 |
| Butler | Project Growth | Project comprises a 2.5 million gallon precast prestressed concrete water storage tank on City of Hamilton owned property on Old Oxford Road in Hanover Township and 12" water mains to be utilized to fill and distribute water from the tank. The tank will be utilized to increase storage throughout the system and reduce pressure variations. The system currently experiences water hammer and increased pumping as system usage varies. The addition of the tank will eliminate the pressure swings within the distribution system alleviating main breaks. | Convergence Research, Inc. | 5 | 31 to 90 days | \$150,000 |
| Butler | Old Oxford Reservoir and Water Line | Project comprises a 2.5 million gallon precast prestressed concrete water storage tank on City of Hamilton owned property on Old Oxford Road in Hanover Township and 12" water mains to be utilized to fill and distribute water from the tank. The tank will be utilized to increase storage throughout the system and reduce pressure variations. The system currently experiences water hammer and increased pumping as system usage varies. The addition of the tank will eliminate the pressure swings within the distribution system alleviating main breaks. This project will create or retain 140 jobs utilizing the American Public Works Association's estimate that \$1 billion in spending creates 40,000 jobs. A portion of the jobs will be construction workers on-site for the construction of the reservoir and installation of the water mains to and from the reservoir. The on-site workers will yield income tax revenue to the City of Hamilton and support local businesses by way of housing, meals, and entertainment. The remaining jobs will be created or retained at the contractor's office, and at the support industries (pipe manufacturers, delivery service) | City of Hamilton | 140 | 31 to 90 days | \$2,500,000 |
| Butler | COBRA Help for those laid off PRIOR to Sept. 1st. | Expand our current business to new location and install energy efficient spray booth with improved air cleaner system. Also convert to a water based paint system. | self | 100 | 0 to 30 days | \$20,000,000,000 |
| Butler | Environmental Improvements/ Expansion | Participants enrolled in GED to Health Care will receive instruction to obtain a GED diploma and obtain an STNA certificate. Upon completion of the program, students will be guaranteed an interview at a local health facility which could lead to placement in an entry level position. As part of the Butler County Health Collaborative, the health facilities offer opportunities for employees in entry level jobs to move up the career pathway into nursing jobs and other health related jobs. It will be very difficult for laid off workers without a high school diploma or GED in our county to obtain new jobs. There are job opportunities in health care. This project would provide dual instruction in a GED educational program and an STNA certificate program and offer good opportunities for job placement and advancement. | Boltnott's Custom Body | 4 | 31 to 90 days | \$150,000 |
| Butler | GED to Health Care | Participants enrolled in GED to Health Care will receive instruction to obtain a GED diploma and obtain an STNA certificate. | Butler | Building Renovations and Early Childhood Center | project. This plan was a community engagement project that involved the school district, the community and local government officials working together to plan out the future of our facilities and educational needs. The recommendation was to realign our District into smaller grade levels at the elementary buildings realigning from two 1-5 buildings and one K-5 building to an Early Childhood Center, two buildings grades 1-2, and one grades 3-5 building. This extensive study was researched based driven and results clearly showed that Early Childhood education and working with small children in small groups is the most educationally sound way to go. Recently the community passed a Bond Issue to generate 26 million dollars of local funds to build a new high school. The Ohio Schools Facilities Commission has matched 20.7 million to help segment a portion of the project. Unfortunately this is only one segment of the project. The rest of the project requires us to renovate our five current buildings and build an Early Childhood Center. We are requesting \$3.5 million to finish Renovation of two older schools, Milford Junior High and Boyd E. Smith Elementary, renovation is to comply with Ohio School Facilities' Standards. Renovation is part of master district building plan in which four elementaries have already been built new with local bond money. High School is currently being renovated with bond money. | Edgewood City School District | 750 | 181 days or more | \$53,485,718 |

|----------------|---|--|---|----------------|--------------------|---------------------------|
| Butler | New Firehouse for Wayne Twp Fire Dept. | several times. It was designed to hold 3 fire trucks but now holds 5. The station is far out dated, does not meet NFPA standards for a fire house. Does not meet EPA standards for floor drain run off. A recent wind storm blew down part of a retaining wall. We have tried to pass a bond issue, but, do to the economy the township residents failed the issue. The land to build the fire station was donated by the Governor Cox Farm museum, a former Governor of the state of Ohio. We are in need of a new fire station and getting the stimulus funds would keep construction workers working and the residents would also see a savings as they would not have to pay out more for taxes. | Wayne Township Fire Department | 35 | 181 days or more | \$800,000 |
| Butler | Madison Township Community Park Walking Path | This project is shovel ready. We need 6200 linear feet of asphalt to overlay the walking path that is an intricate part of our community park which serves our community of 10,000 rural residents. The walking path is currently being used, but only on a limited basis, due to its gravel base and surface. By installing asphalt as the finished top coat, it then becomes accessible to more of our residents including those who need such a surface to be accommodated; wheel chairs, strollers, cyclist, etc. Our township has already provided all the necessary material and labor for the base material, as this was included in stage one of the park developments. We simply lack the local government funding to currently complete the project and offer a better service to our all our residents. This project is truly "shovel ready" as we could begin immediately once funding was appropriated. | Madison Township, Butler County, OH | 6 | 0 to 30 days | \$104,000 |
| Butler | Replacing 100 year old Fire Station | One of our two fire stations is a converted school house almost 100 years old. We are severely limited in space for personnel and space for Fire/EMS vehicles. We currently have to park the vehicle at an angle simply to get them into the building. Because of the age of the building, we're constantly administering maintenance services well above and beyond what is reasonable. Aside from the age aspect of the building, its geographical location is not advantageous to the safety of our township. We have acquired land in a much better location that would serve the residents with a higher and more efficient level of Fire/EMS services; we simply do not have the funding for the project. We are also trying to secure funding to replace our fireman bunkers and air apparatus equipment which is 10 years old. We would like to include this as part of the overall project cost, which would allow us to procure the safety equipment immediately. | Madison Township, Butler County, Ohio | 105 | 31 to 90 days | \$4,425,000 |
| Butler | Workplace Basic Skills | to the success of modern business such as hospitals, schools, and government agencies. These skills include literacy skills as well as attitudes and behaviors that are necessary to generate high performance in the workplace. Employees gaining basic skills almost always improves attitudes and behaviors that can be an asset to employers. As employees begin to understand how their role impacts the overall success of an organization and basic skills instruction takes place, the quality of work generally increases. The ABLE center would strive to help employees understand reports, letters, and equipment manuals. They would teach communication in English and promote the ability to use and understand instruction documents. Critical thinking, problem solving and the ability to manipulate numbers alone and in tables and charts is also a strong focus. Technology and information systems would be explored and a commitment to lifelong learning as a member of a team or alone would be a goal to aid in developing and maintaining a positive attitude toward work and change. | hamilton City Adult Basic Literacy Education | 4 | 31 to 90 days | \$40,000 |
| Butler | Resort for Ski & other Recreation | Multi Recreational Resort 165 part time jobs 4 full time jobs created With first year's profit, improve ski resort & build new white water rafting facility for summertime bring hundreds of thousands of dollars in new income and in sales tax to impoverished central Ohio Bring hundreds of thousands of dollars to surrounding hotels, motels, restaurants, attractions, State & local parks such as Mohican and Salt Fork Lake. Cut hundreds of thousands of dollars off unemployment Cut many people off welfare Just plain good for everybody involved. | Central Ohio Resorts, Inc. | 165 | 31 to 90 days | \$2,250,000 |
| Butler | Lakes at West Chester | 240 apartment complex needs new driveway, also needs clubhouse redone. HVAC and roofs need upgraded for energy efficiency | Summit management Services Inc. | 10 | 181 days or more | \$1,500,000 |
| Butler | Pricing System for Development for Online Contract | My company is BidMyCrib-LLC, which is based in Butler County, Ohio. We are a 111C qualified entity that has raised seed capital from Queen City Angles via matching funds from the Ohio Department of Development. Our technology and company are protected via trademark and patent pending measures. We can immediately hire 15 full-time employees. We are seeking \$1,200,000, but are willing to accept more or less if the program requirements have limitations that allow or not allow for this level of funding. Project involves in building a pricing system that provides commercial and residential contractors the ability to pull real-time product pricing & inventory levels at the local level suppliers, such as lumber yards, home improvement centers, plumbing & electrical suppliers, etc., so they can quickly provide quotes for private and public customers. Pricing system will also set standards for the "fair market" value for materials and labor on projects, so that customers can also determine the fairness of a quote they receive from contractors. The pricing system will be a new technology we will deploy within a new platform tied to our existing online bidding system. | BidMyCrib-LLC | 15 | 0 to 30 days | \$1,200,000 |
| Butler | "Be Credit Savvy" - Don't Make the mistake that you | Pay off credit and educate others, especially junior high/high school students about using credit responsibly. I would like to hopefully design and operate a website that provides junior high/high school students with various scenarios in how and when to use credit, knowing the difference between "wants" and "needs," understanding credit terms, ways to improve credit scores, and making sure they understand that they are responsible for their credit and credit education. I believe universities and colleges should make it a mandatory course that all freshmen take a "credit" course as well. I would even volunteer to share my credit experiences with these students, and how fast you can find yourself in the credit "blackhole." I started my free spending credit days in college and it took many years to recover from it. | Credit Counseling | 1 | 0 to 30 days | \$100,000 |
| Butler | Employment New Hires | 3 new employees to be hired. Duties include office work, customer communication, and research | Law Office of Bradley Swillinger | 3 | 31 to 90 days | \$100,000 |
| Butler | New Fairfield Stadium project | is in violation of Ohio's Jared's Law due to unsafe conditions. The current stadium is used for all Fairfield Football games, track and field events and DCI Drum Corps, these events garner over \$100,000.00 yearly to provide funds for the districts extracurricular sports and music programs. This stadium is the largest outdoor seating facility (4600 seats) in the City of Fairfield of which, due to it's antiquated design, more than 1000 seats are not useable. The current stadium does not meet handicap seating requirements. It features dysfunctional concession and restroom facilities. Plumbing and drainage systems are substandard. Larger parking facilities are needed. This Stadium is currently maintained by Fairfield Athletic Boosters Association and The Fairfield Tempo Club (music boosters) and Fairfield City Schools which are all nonprofit organizations. There is no funds available for this project that would be administered and accounted for by The Fairfield Community Foundation. No groups or individuals would have access to any stadium construction funds | tax payer and booster of Fairfield City Schools | 30 | 31 to 90 days | \$3,800,000 |

|----------------|--|---|--------------------------------|----------------|--------------------|---------------------------|
| Butler | Homes for families | In my city of Trenton, Ohio, we have many foreclosed homes/homes that need to be fixed up. I would like to be able to buy these types of homes, fix them as needed/required (utilizing energy efficient products/retrofits) and either rent them to those who do not have the credit to buy or sell the refurbished homes with only a modest profit, making the homes truly affordable while improving neighborhoods and increasing property values. I would employ local contractors/individuals to perform refurbishing needs, while managing the properties. I would concentrate on re-vitalizing these homes in my city of Trenton and surrounding areas, refurbishing the homes with energy efficient products/retrofits, including using renewable energy programs where available. I would work to make these homes as environmentally friendly as possible. | Home Again | 5 | 0 to 30 days | \$750,000 |
| Butler | home buying | to buy a home for me and my seven children. and to start a auto sevice to repair peoples cars | my home fund | 2 | 0 to 30 days | \$175,000 |
| Butler | Dick's Classic Transport | To start a classic auto transport company and to hire 5 employees to pickup and deliver auto's coast to coast. | Auto Transport Company | 5 | 0 to 30 days | \$500,000 |
| Butler | JUMP START THE ART | permit the hiring of staff to travel to local daycares and public schools to offer dance education for free especially to lower income families. This is a program we did years ago but had to drop because the program grew and I couldn't handle on my own. This would also permit the expansion of my existing business to accommodate evening programs for parents to join in with their children. Many of my students have gone on to do college dance teams, high school dance teams, choral groups and dramatic productions with the education afforded them. | JCA Dance Academy | 5 | 0 to 30 days | \$40,000 |
| Butler | Assistance | I am requesting funds to help my family pay for medical bills and take care of my elderly parents. The insurance we have had in the past has not covered many bills and medications. I am now looking into paying off medical bills that should not be paid because we needed to pay certain medical bills immediately and finding my basement to accommodate my elderly parents and afford to live on their own. I need to accomodate my legally blind mother and my father who has joint problems and cannot use the stairs safely. I can take a loan against my house for some of the necessary money, but I can't afford to do all of it. | Personal | 4 | 0 to 30 days | \$80,000 |
| Butler | Greentree Academy | Please approve this application and I will do my share to help this economy. This project will create a secondary educational facility on the site of the Existing Atrium Medical Facility in Middletown Ohio. The project will include the Warren County Career Center, Miami University and the Atrium Medical Facility along with Cincinnati United Contractors as partners. The campus will be constructed to provide approximately 60,000 square feet of Building to train Primary Care Nurses, Nurse Practitioners, Medical Technicians, Pharmacy Care Technicians and other Medical Practitioners. The Project will provide direct employment for approximately 100 sustainable jobs and more than 300 jobs during the construction phase of the project. This development will also train more than 200 students annually for medical (related) positions at a time when there is a significant shortage of qualified personnel. The site is ready and the structure has been designed and is ready to proceed immediately, stimulating the local, regional, state and national economy. The project has the support of the City of | Cincinnati United Contractors | 100 | 0 to 30 days | \$5,000,000 |
| Butler | Literacy Program | This is an educational literacy program. It is designed to provide new reading books to children in preschools, kindergarten and first grade in an effort to educate them to read, learn safety, health and wellness and ways to help the environment. New books would be distributed quarterly through the schools. First roll out of the program would be to the communities hardest hit by the economic crisis. In addition to the on-staff employees, it would provide numerous opportunities to authors and illustrators. We are creating a reading program for children via public access television stations. It will create an hour of reading various books by different authors and age levels, produced weekly and distributed to PBS around the state and eventually the nation. Grandma's Reading Time will feature 3-5 books per half hour intermixed with easy-crafts for the kids to do. It will be entertaining and educational, stressing reading to your children and reading in general. | Journey Stone Creations, LLC | 8 | 0 to 30 days | \$2,000,000 |
| Butler | Public Access Television for children | Grandma's Reading Time will feature 3-5 books per half hour intermixed with easy-crafts for the kids to do. It will be entertaining and educational, stressing reading to your children and reading in general. | Grandma's Reading Time | 25 | 0 to 30 days | \$500,000 |
| Butler | Cash4Deadbeats | Dead Beat Parent this will allow consumers to turn in Dead Beat parents with Fugitive Warrants, in return once the Dead Beat parent is arrested the consumer would be able to collect a cash reward of \$100. As of 2/28/09 there are a total of 2,616 fugitive Dead Beat parents just in Hamilton county alone. Bringing in the fugitive parents will substantially decrease the cost of tax payers monies needed for the neglected child(ren). These Deadbeat parents will be held accountable and most of all be persuaded to take care of their responsibility because the cash reward on their head will hardly leave any place for them to hide. Cash4DeadBeats.com will also allow the caring parent to add funds too the cash reward to bring more attention to his or her case. Preferably Cash4DeadBeats.com will need to be a nationwide searchable database for all those living amongst us be retrieved and brought to justice. Cash4DeadBeats.com would partner with Child Support Enforcement Agencies in turning in these parents to the state and county courts. 2,000 sq. ft. building and more it energy efficient. When burned down. | Cash4Deadbeats | 1 | 31 to 90 days | \$275,000 |
| Butler | butler general Business location | Buy some new / more energy efficient equipment to help the environment while educating / training our future blue collar tradesmen so that the U.S.A. stops losing our tradesmen skills on this country was built. This will create est. 10 new jobs and many more. This is to put skill tradesmen in the work field with out being under union control, this will allow small companies to hire skill tradesmen at hourly rate that they can afford and still be a competitive bidder in none prevailing wage projects. | butler general contracting LLC | 10 | 31 to 90 days | \$2,500,000 |
| Butler | TisExpansion | Cincinnati area, female owned and operated apartment cleaning company is looking to grow utilizing local unemployed residents from in and around Cincinnati area primarily lower income areas. This project insures the availability of workout space for Moeller High School students who are willing to put the time in to get BRICK. This Project also will guarantee the cost affordability of a private education. | TLS Cleaning Service | 10 | 0 to 30 days | \$50,000 |

|----------------|---|---|----------------------------------|----------------|--------------------|---------------------------|
| Butler | Small Thrift Store Seeks to Utilize Space to Assist | A new thrift store who contributes a large portion of their net profits to a local not for profit social service program, seeks to celebrate their recent recovery from Hurricane Ike etc. by presenting other opportunities in the community. While they do not anticipate that any new use of their extra space will pay any remaining liabilities from their struggles, they do predict that they could assist the community as a whole by presenting health screening opportunities to the seniors who shop in their store on designated "senior" days. We are a depressed community with a large elderly population, most of whom are underserved therefore placing a huge stress on our medical facilities especially hospitals. They are not writers of strategic plans and associate with the incubator for consultation and administrative assistance. | We Can - Business Incubator, Inc | 15 | 0 to 30 days | \$25,000 |
| Butler | New Business Incubation is Not For Everyone, Let's | Often those who come to my small business incubator are not appropriate for business ownership, and will likely fail. Most recently those come to the incubator need to change their employment circumstances and the industry they know is flat. Many have no idea how to begin to think of what to do to take care of their families. As a certified evaluator of the results of "The Achiever" and consultant to many who changed career direction during the last downturn in Ohio, and more specifically our tri-county area, is interested in making changes for more than the few that can afford to pay for the assessment and the consultation. Our offices are in Middletown, in the top ten dying cities, we need to ramp up efforts to gainfully employ more. | We Can - Business Incubator, Inc | 15 | 0 to 30 days | \$25,000 |
| Butler | save my home | My wife does child care out of our home. She has taken a loss the last 2 years do to the economy with clients losing jobs. We have gotten behind on renovations. We need to make our home more energy efficient. We have an old fuel oil furnace, and have the original old wood windows. The doors leak and our electricity is the old 110. We need lots of updates to our home so that my wife can run a successful and safe business. We currently have a very bad rate with our mortgage so it would be nice to have the money so that that can get taken care of. With these renovations it will help the business to be sort of separated from our everyday living area. Also we have the aspiration to expand and hopefully be able to get enough kids so that we can hire young help to give them a chance to gain experience working with kids. Thank you for what help you will be able to give | Hopes Daycare | 1 | 31 to 90 days | \$250,000 |
| Butler | PAY OFF WIFE'S MEDICAL BILLS | Pay off wife's medical bills. She had bypass surgery done in October 2008. At my job I do not qualify for medical insurance because I only work 24 hours a week and my wife is unable to work because she is still on oxygen. The doctors said her heart is only working 30%. We do not qualify for Medicaid because I make too much money and if we want Medicaid we have to pay \$1407.00 a month for it. Which we don't have to get | | 0 | 0 to 30 days | \$40,000 |
| Butler | Giving Students the Edge | challenge because many of our veteran teachers are not equipped with these skills themselves. We have found a software program from learning.com called EZTech. This software puts teachers at ease and provides them with a comfort zone without depriving students of the technology opportunities in the classroom. Our district has found the funds to support our middle school students and grades 2 and 3 at the elementary. I feel in order to move our students forward this program must be included consistently in grades 1-8. My request is for the additional funds to support our remaining grade levels. We have already seen a reduction in the amount of paper-pencil tasks in the classrooms where this software is being used. Assignments have become more project oriented. Students are producing movies, podcasts, visually enhanced speeches etc. Teachers are comfortable with this software and learning the 21st century skills right along with the students. We would appreciate your consideration for this project. | Edgewood City Schools | 5 | 31 to 90 days | \$10,000 |
| Butler | buyerbuysandsells | Enable business partnerships with 3 online companies and many online vendors. This would allow a start up electronic business to quantify business partnerships through the increasingly effect online sales. | Buyer Buys and Sells | 5 | 0 to 30 days | \$22,500 |
| Butler | 21st Century Teaching Tools | The ability to not only lease jobs for 5 people at the home site, but also to keep employed many many more through business dealings online with the general public as well as through other online vendors who will buy, sell and distribute electronic products for home, business. This will span all worldwide web opportunities to encompass sales across the globe | Edgewood City Schools | 10 | 31 to 90 days | \$400,000 |
| Butler | I need to replace a heat pump that has a freon leak | would install interactive whiteboard technology in 200 of our classrooms. Project would include LCD projectors, ceiling mounts, Mimios, Smartboards and installation of ceiling electric. In some classrooms whiteboards would need to be purchased also. The district's BOE has supported our efforts to move toward this change, but could only find the funds to support 25 classrooms. The results in those 25 classrooms have been higher attention level of students, increased student understanding of concepts with more visual presentations and student interaction with the lessons. We have also surveyed teaching staff and found a higher level of enthusiasm and creativity from these 25 classrooms. I feel the other students are missing a great opportunity for increased learning opportunities. Our district has been hard hit by the economic stress of AK Steel. The fulfillment of this request would allow us to take a giant step forward in a shorter time frame than we had originally thought. The district will take total responsibility to train all teaching staff in the use of this | Private homeowner | 3 | 31 to 90 days | \$4,900 |
| Butler | Computer World | I bought my cond 2 years ago. I am in need of a new heat pump for my condo as it has a freon leak which I have been told may be in the line inside the walls. This unit is 22 years old and I need to place for something more energy efficient. As for my finance situation getting more difficult as time goes on being the sole provider for my daughter and myself I need the help. My hours at work are being cut as our projected sales are declining making things very difficult at this time. I need air conditioning in the summer (my condo assn. wont allow window units) so I have been having the unit filled even though it leaks out as I have no choice, which I know is not good for the environment. Please help, as am a responsible parent that has been put in a bad situation because of a divorce, and doing my best to provide for my family working hard everyday but still unable to afford this repair | Cpputr World Express | 10 | 31 to 90 days | \$250,000 |
| Butler | Neighborhood revitalization | this is a new operation. I am starting a computer store with sales in dvd's and software and computers. Also 2 rooms that will be used for family gatherings and entertainment | Kasabar Group, LLC | 3 | 0 to 30 days | \$52,200 |
| Butler | All-Ohio Fire Planning Improvement | Recondition foreclosed homes in a price range that will make them affordable to lower income families. Offer reconditioned homes to prospective families on a lease-to-buy arrangement We propose that the State of Ohio will purchase one copy of PREPLAN(METM) Fire Pre-Planning Records Management software for each fire company in Ohio (2,826 fire agencies) at a cost of \$499.00 each. Each license includes 1 (one) year of: Basic support and software updates for the Version 1.x software series. This software is intended to standardize fire pre-planning records, improve fire crew awareness on scene, and decrease audit effort and time expended. This software is among the least expensive software available on a per-license basis. | PREPLANAME, LLC | 10 | 0 to 30 days | \$1,410,174 |
| Butler | Lawn/Landscape | Possible ancillary savings include better fire department ISO PPC ratings, leading to decreased fire insurance costs for community members. Fire agencies that do not desire the use of the software will be able to contribute their unused license to a 'pool' which will be used to provide a second license to Ohio fire agencies that request them. | Mac's Lawn Service | 5 | 0 to 30 days | \$75,000 |
| Butler | Getting a House for my son | This software is in use at Pierce Township in Clermont County, Loveland-Symmes Fire Department in improve/update and purchase new equipment for lawn/landscape business. Use environmentally friendly products as much as possible. | | 0 | 31 to 90 days | \$2,500 |
| Butler | New school side walk US27 | Increase business capacity to employ 4-6 people if business grows. Single father just wanting to give my son the best possible in our current economic situation. A place to call our home. | Excavation | 2 | 31 to 90 days | \$600,000 |

| Butler | trucking company | Starting a trucking company that will provide 10 truck driving jobs with once started will lead to a large scale of employment for truck driving jobs as well as office employees, and mechanics. | transportation | 10 | 31 to 90 days | \$220,000 |
| Butler | Upgrade equipment and supplies, repairs for building | High utility cost because of lack of insulation. 2008 created much credit card debt. Turned down for loan from two different banks, for no collateral. I consider the business collateral. Four pet grooming shops have closed in our area, we are now serving 6 small city's. Currently we have 1,700 customers and expect more in the future. Need to upgrade dryers, tables, clippers, and blades, ect. Have found a better location, very well insulated, and equipped. Needs some repairs inside. Diania Clark/ Owner D & D Doggy Wash & Grooming Salon, 2903 Cin-Day Rd. Middletown, OH 45044 | D and D Doggy Wash and Grooming Salon | 6 | 0 to 30 days | \$15,000 |
| Butler | Police Facility Construction | The Hamilton Police Department, which caters to 104 authorized full-time personnel, is housed in a building that was, at one time, a small Kroger Supermarket. The building was remodeled in 1977 to become our current police facility. However, the building does not meet the needs of modern policing. Our detectives are housed in two separate offices, which greatly impedes communication. Additionally, most other offices are cramped for space. Our Property Room is crowded due to an antiquated storage system. Without the use of stimulus funds, we have no hope of building a new facility. | Hamilton Police Department | 20 | 181 days or more | \$18,000,000 |
| Butler | capisj childrens/adult care homes | open 2 foster care homes 1 for 10-18 y/o and the other for adult care have homes need to obtain beds, bedding and office equipment, computers, desks..... | capisj children/adult care homes | 7 | 31 to 90 days | \$25,000 |
| Butler | Rehab | Money will be used to help purchase run down housing units helping to get the market moving with undesirable houses. Contractors will be used to perform all work including but not limited to plumbers, carpenters, roofers, electricians, painters, landscapers, house inspectors. The houses will then be sold which will help to stimulate the housing industry | Kiowa Services LLC | 12 | 0 to 30 days | \$250,000 |
| Butler | Employee Retention Program | Due to severe fiscal distress, the City of Hamilton has been in a hiring freeze since early 2008, and is currently looking at laying off an additional eleven police officers. This, coupled with our current shortage of one police officer position, one dispatcher position, two corrections officer positions, and one records clerk position will mean a total loss of 16 full-time law enforcement positions, or roughly 10% of our 164 person workforce. Unfortunately, the rate of Part I Crimes for the City of Hamilton is comparable to the larger Ohio cities per 1,000 population. At 7,452 Part I Crimes per 1,000 population, we are higher than Cincinnati, and only slightly below Cleveland, Columbus and Toledo. We desperately cannot afford to lose 10% of our manpower and request the listed monetary amount to re-hire/retain those personnel for the next 3-year period, to give the economy time to turn around. | Hamilton Police Department | 16 | 31 to 90 days | \$3,120,000 |
| Butler | Lawn and Garden | I would like to purchase one of these properties and start a Lawn and Garden store. This store would sell lawn and garden equipment, garden products, provide services such as landscape installation, power equipment sales/service, disposal service of oils, etc...., as well as, provide a place to reuse and distribute mulch, etc.... for city/county residents. I would plan to hire initially sales, customer service, and repair techs. Initial estimates would be 12-15 employees, with pay range from minimum wage - / depending on skills and job. I would look to provide at least 40 hour work weeks with health benefits. I would look to promote/sell environmentally sound products, and provide education services to local school and community members regarding best ways to take care of properties in a safe and environmentally sound way. | Mac's Lawn Service | 15 | 181 days or more | \$1,200,000 |
| Butler | Rialroad Crossing Improvements | Improvements include the upgrade of deteriorated crossings within the City limits. Quiet zones are currently under consideration in the northern portion of the City as well | City of Middletown | 25 | 91 to 180 days | \$750,000 |
| Butler | employment agency/government referrals from stimul | would use a site that is vacant already | work force agency | 1,500 | 31 to 90 days | \$300,000 |
| Butler | Business Startup | Buying properties that are in danger of being taken back by the banks, or have already been taken back, as well as properties that may have been abandoned. Initially these properties will be renovated and rented or leased until such time as the market improves and they can be sold. Some properties may be leased with the option to buy. We will also consider buying mortgages of homes that in danger of taken back by the banks, and keeping the current home owner in the home, leasing it at a lower rate, until such time as they can afford to buy it back. We expect to make a modest living at this, and hopefully help some deserving people in the process. | Coastal Pacific | 6 | 0 to 30 days | \$300,000 |
| Butler | Urban Forestry Tree Planting Program | The City is in its infancy in establishing an urban forestry program to restore tree canopy levels to acceptable standards. In addition, the emergence of teh Emerald Ash Borer has raised concern that this insect will hasten the tree canopy decline. These funds would be used to reestablish trees within the public rights-of-way and parks facilities. | City of Middletown | 10 | 91 to 180 days | \$500,000 |
| Butler | Park Playground Equipment Upgrade | Outdated playground equipment would be replaced with new meeting all the national safety standards. | City of Middletown | 25 | 31 to 90 days | \$250,000 |
| Butler | Great Bikepath Connection | This is the final phase of bikepath construction to connect Middletown to the City of Franklin. This is a small segment in the overall project to connect Hamilton to Sidney. Once completed, the trail would be 96 miles long. The project has been sponsored by the Miami Conservancy District | City of Middletown | 50 | 181 days or more | \$1,000,000 |
| Butler | SR 73 Water Main Improvements | 3455 linear feet of new water main. | City of Oxford | 15 | 31 to 90 days | \$367,105 |
| Butler | Massage Therapy Wellness Center | Health and wellness center designed toward college students, alumni, and community residents. Center will provide massage therapy, vitamin supplement sales, health and wellness support including sports therapy. | Medical/Therapeutic Massage Therapy Center | 6 | 31 to 90 days | \$225,000 |
| Butler | Police Firing Range Upgrade | Upgrade to the Police Firing Range. Needs new pavement, covered shooting stands, baffling, electricity, water, storage building and target system. This will benefit the Middletown police division as well as other local police agencies, the Ohio National Guard and the Navy ROTC located at Miami University in Oxford. | Middletown Ohio Division of Police | 10 | 31 to 90 days | \$100,000 |
| Butler | Automated Traffic Citation Writers | These funds would purchase 20 automated traffic citation writers, at a cost of \$3,000 per unit. This equipment will drastically shorten the time officers spend writing citations, thereby allowing the officer to return to service more quickly. The units would be purchased from American companies with American workers. Software, installation and training would also create/retain jobs. The end result would be safer roadways for the citizens of Middletown | Middletown Ohio Division of Police | 5 | 91 to 180 days | \$60,000 |
| Butler | Geo thermal energy | geo thermal energy around my house for sufficient energy | scott seaton | 4 | 31 to 90 days | \$28,000 |
| Butler | Emergency Generator for Municipal Building | These funds would be used to purchase a generator to power the City of Middletown municipal building. The building was constructed over 30 years ago, prior to many electronic advances. The current emergency power system is woefully inadequate to power the building, and can only power a very small portion. The new system would power the entire building and would be invaluable in the event power were lost. All City departments could continue to function, but most importantly, the Division of Police and the Emergency Operations Center (EOC) would remain in operation. | Middletown Ohio Division of Police | 4 | 31 to 90 days | \$250,000 |
| Butler | River Road Improvements near the Bolton Water Plan | This project consists of \$390,000 in asphalt and earthwork. This widening and road relocation will improve safety and operation of the road between Cincinnati's water plant and the Great Miami River. The plans for this project are complete and the right-of-way is clear for construction. | Ohio Kentucky Indiana Regional Council of Governme | 133 | 31 to 90 days | \$390,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Butler | Replace 100 yr old Fire Station | old. We are severely limited in space for personnel and Fire/EMS vehicles. We currently have to park the vehicles at an angle to get them into the building. Because of the age of the building, we're constantly administering maintenance services well above and beyond what is reasonable. Efficient weatherization is almost non-existent with such a building. Our utility bills are extremely high. Aside from the age aspect of the building, its geographical location is not advantageous to the safety of our township residents. We acquired land in a much better location that would serve the residents with higher, more efficient level of Fire/EMS services; we simply do not have the funding. We're also trying to secure funding to replace our fireman bunkers and air apparatus equipment which is 10 years old. We currently replace them as funds allow. We would like to include this as part of the overall project cost, which would allow us to procure the safety equipment immediately. We would also like to include a newer ambulance to replace our outdated 10 yr old vehicle, very high in maintenance. | Madison Township, Butler County | 124 | 31 to 90 days | \$4,425,000 |
| Butler | Police Impound Lot | This proposal would allow the City of Middletown to construct an impound lot including fencing, security system, building, water and computer access. This represents a centralized service to the citizens of Middletown and a potential revenue source for the city. | Middletown Police Department | 2 | 31 to 90 days | \$150,000 |
| Butler | Additional Police Officers | These funds would be used to hire three additional police officers, at a rate of \$75,000 per officer. Since the year 2000 the Middletown Division of Police has lost 13 sworn officers, plus clerical staff, dispatchers and corrections officers. These 13 officers represent 13% of our sworn officers. As a result, DARE is no longer taught in Middletown schools and there are fewer School Resource Officers, detectives and vice officers. We have seen a rise in crime over this same time period, attributed, at least in part, to the reduced number of police officers. | Middletown Ohio Division of Police | 3 | 91 to 180 days | \$225,000 |
| Butler | Airport Industrial Park | Acquire 50 acres of abandoned real estate next to current airport facility to provide job ready industrial sites. | City of Middletown | 500 | 31 to 90 days | \$3,000,000 |
| Butler | Multi Use Path | City would construct on-site infrastructure. Construction of bike/walking path | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$375,000 |
| Butler | Middletown Business Incubator | Development of a Middletown Business Incubator facility in the former Senior Center in downtown Middletown. | City of Middletown | 100 | 31 to 90 days | \$750,000 |
| Butler | Downtown Revitalization | Funding would be used to renovate the 30,000 sq ft facility for use as a business incubator. The City of Middletown would donate the property to the project at an estimated value of \$500,000 | City of Middletown | 250 | 31 to 90 days | \$1,000,000 |
| Butler | Project Heroux Devtek McSwain Mfg | Acquire abandoned commercial property in downtown Middletown. | McSwain Manufacturing | 40 | 31 to 90 days | \$3,373,902 |
| Butler | Railroad Safety Upgrades, Statewide Preemption Pro | two Lathe machines @ \$1,686,951 each. Recruiting, training, and learning mfg for employees to operate and machine parts. Attracting companies from France, Denmark, Europe and Germany to our company to manufacture their parts for Wind Energy parts This project is a statewide project attempting to bring preemption online at crossings that need preemption, and to fix preemption at crossings that have improperly implemented preemption. Preemption is required when a traffic light and railroad warning signals may trap a car on the tracks, causing accidents. At this time there are numerous crossings identified by this project, some of which are listed below: City of Middletown, First Ave., AAR DOT # 524678V City of Middletown, Central Ave., AAR DOT # 524677N City of Medina, Court St., AAR DOT # 002088G City of Medina, S. Elmwood Ave., AAR DOT # 002087A These crossings are ready to be rolled out. Numerous other crossings exist in Carrollton, London, and throughout the state. Other crossings will also be identified, and the cost estimates are very rough at this point. However, work at the above identified crossings can begin very soon. | Ohio Rail Development Commission | 100 | 31 to 90 days | \$20,000,000 |
| Butler | Lakota School District Building Improvement | Expansion of both Lakota Freshman school buildings, both Lakota high school buildings, and renovation of 3 existing Lakota elementary school buildings. | Lakota Local School District | 5000 | 0 to 30 days | \$50,000,000 |
| Butler | Victim Advocate | The victim advocate will provide a voice for the domestic violence victim in Hamilton Municipal Court, provide referrals for services, aid law enforcement in contact with victims; between court hearings, and other duties as needed. Additionally, in cooperation with other local agencies, she will help develop, implement and monitor programs for victims and families which will assist the victim in acknowledging the problem, creating a safety plan, and empowering the victim. She will follow up on court ordered counseling for the victims and perpetrators. By working with other victim advocates in the county, they will try to implement a consistent approach in the treatment of domestic violence victims and defendants | City of Hamilton | 1 | 0 to 30 days | \$45,000 |
| Butler | Oxford Community Arts Center Historic Building Fac | Repairs and restoration of 1840 era building. (Formerly Oxford College For Women) owned and operated by the Oxford Community Arts Center, maintaining its historic character. Entry Door Weatherization; Lower Level East Wall Weatherization; East Entry Door & Hardware Improvements; Elevator Hydraulic Room Floor Sealing; Subtotal \$9,080 \$9,080 Storm Drainage Scoping and Repair; Theater Egress Addition; Downspouts & Gutter Repairs/Replacements; Northwest Façade Restoration Test Area; Porch Repair & Improvements; Kitchen Improvements; First Floor Area Development; First Floor Corridor Improvements; Soffit, Fascia, Frieze, Entablature & Molding Repair; Subtotal \$295,395 First Floor Window Replacement; First Floor Air Conditioning; Subtotal \$243,000 Second & Third Floor Window Replacement \$260,000 Exterior Masonry Restoration & Sealants; Exterior Painting; Subtotal \$460,000 Roof Repair & Upgrades; First Floor Main Entry Reconfiguration; West Parking Area Development; to create a walkway to the building and raw materials to produce our own products in Butler County. We would hire two to five people and train them to compound tea and coffee flavors. Presently, we have our products co-manufactured by another company in New Jersey. This would create jobs in our area in Ohio. Our company presently exists and has a strong customer base in the coffee & tea industries in North America. We create our own formulas for our customers and are well known in the market place. | Oxford Community Arts Center | 25 | 31 to 90 days | \$1,781,645 |
| Butler | Tea & Coffee Flavors | | Blue Star Flavors, Inc. | 6 | 91 to 180 days | \$2,000,000 |
| Butler | Gas turbine/wind turbine controls development | we would use the funds to develop state of the art gas turbine and wind turbine controls systems. This includes PLC programming, display programming, low voltage and high voltage controls and voltage and frequency conditioning for permanent magnet motor outputs. This will give us a competitive edge to provide new controls and upgrades to older gas turbine project. | US Turbine LLC | 6 | 0 to 30 days | \$600,000 |
| Butler | Development of permanent magnet generator technolo | The focus for future wind turbines is to use Perm. Magnet generators, convert the output to DC and then back to AC to make the system speed insensitive, and provide reliable frequency. We would like to use funds to develop a perm. Magnet generator for low speed wind turbine applications. We have technical expertise to do this and set up a manufacturing facility in Ohio to produce the units | US Turbine LLC | 10 | 0 to 30 days | \$850,000 |
| Butler | All-Ohio Fire Planning Improvement - Revision Req | This entry is intended to revise the previous entry for the above named project. Our information regarding the number of Ohio fire departments appears to have been faulty; we understand there are approximately 1,300 fire departments in Ohio. This number of departments times our software license cost of \$499.00 each comes to 648,700.00 not 1,400,000.00. To create a contract, we would be interested in obtaining a list of eligible departments from the state to determine the precise contract cost and scope. Please vacate the previously submitted project cost of \$1.4M and replace with the new value of \$648,700 | PREPLAN4ME, LLC | 10 | 0 to 30 days | \$648,700 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Butler | save my bussiness | 7 new styling stations,3 new shampoo bowls,7new styling chairs,reception desk, 7 new mats,4 new rugs, 2 new shampoo chairs, efficient or alternative fuel vehicles, depending on cost per unit and design re our needs. Current fleet is old and is facing break-down. This would mean we must reduce services that are keeping older adults in their homes instead of needing more costly out-of-home placement (and possible Medicaid costs). Outcome would allow us to continue program without serious interruption for additional five years. We generally have five vehicles per day in use. We currently average 20,000-21,000 trips per year throughout southern Butler County, with about 1000 unduplicated riders, often each having multiple trips per year. We have no regular stream of funding for capital purchases, although we have operating funds. Accounting rules from our operating grants do not allow us to depreciate and accumulate vehicle replacement funding. | hairvanvage | 8 | 0 to 30 days | \$100,000 |
| Butler | Replace Senior Transportation Vehicles | readiness activities. Adults are unemployed, underemployed, displaced workers, live in shelters, at risk of homelessness, and/or recovering from substance abuse. Still others are incarcerated. Our overarching goal is to create effective workers, prepared to enter the workplace family members, and citizens who can make informed decisions and take informed action to strengthen their families. 700 adults will improve reading skills, complete job applications and resumes, assess work readiness skills, improve computer skills, demonstrate computer application skills, and/or prepare for training. Other adults will gain the skills to work in food service through hands-on training and food preparation. 60% will gain employment or go on to training programs. 150 parents will improve knowledge of strategies to help their children be better prepared for school or improve levels in school. 120 children who cannot read, are learning disabled, or are well-below grade level in school will receive educational assistance through small group or one to one tutoring to improve reading skills. City of Monroe - Gallaher Road Reconstruction - Roadway reconstruction from Lebanon Street to South Corporation Line (utilities submitted separately). Roadwork would improve transportation opportunities in the area. | Partners in Prime | 3 | 91 to 180 days | \$120,000 |
| Butler | Work and school readiness programs | City of Monroe - Gallaher Road Reconstruction (Roadway reconstruction from Lebanon Street to South Corporation Line (utilities submitted separately). Roadwork would improve transportation opportunities in the area. | YWCA Family Literacy Program/YWCA | 8 | 0 to 30 days | \$200,000 |
| Butler | City of Monroe - Gallaher Road Reconstruction (Roadway reconstruction from Lebanon Street to South Corporation Line (utilities submitted separately). Roadwork would improve transportation opportunities in the area. | City of Monroe - Yankee Road Extension - The extension would facilitate regional development and provide access to a future planned industrial parks. | City of Monroe | 75 | 0 to 30 days | \$443,000 |
| Butler | City of Monroe - Yankee Road Extension | Christian ministry. Haven House Emergency Shelter, the only shelter in Butler County that accepts children, has been in existence for 27 years. We are able to continue helping those in need 24 hours a day, 7 days a week solely from contributions made by individuals, churches and local businesses. As a result of the various donations our shelter receives, we are able to stay open 365 days a year. Haven House benefits those in need from Butler, Warren, Hamilton and Clermont counties. In the past year, we have seen a 18% increase in the people helped by our shelter. Overall, the shelter has provided over 350,000 nights of shelter and served over 1,000,000 meals. Our shelter is equipped to assist homeless families. We accept single mothers, married couples with children and are the only homeless shelter in the tri-state that accepts single fathers with their children. The Bible says in Psalms 41:1, "Blessed is he that considereth the poor; the Lord will deliver him in | City of Monroe | 150 | 181 days or more | \$2,400,000 |
| Butler | Haven House Emergency Homeless Shelter | Fairfield Water Treatment Plant Garage Facility The city of Fairfield, Water Division facility currently has limited garage space. Front line vehicles and equipment used for main break emergencies, routine maintenance and customer service are stored outside. During periods of extreme cold, the fact that the vehicles are stored outside increase response times for repairs, particularly if back to back events take place. A most common problem is that tools freeze inside tool boxes, snow and ice must be cleared off the vehicles and fuel is wasted when vehicles are left running to warm up and defrost. This new garage facility will permit vehicles/equipment to be parked inside would reduce rust and corrosion increasing the overall life expectancy of equipment, reduce fuel cost and greenhouse gases and greatly improve response times during emergencies. Dave Dave Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile) | Haven House Emergency Shelter | 5 | 0 to 30 days | \$500,000 |

| Butler | Water Distribution Improvements Ross Road - Dixie | <p>Water Distribution Improvements Ross Road - Dixie Highway (Route 4 Corridor)</p> <p>This is a major water transmission main upgrade along the Route 4 corridor and Ross Road. The project will include the installation of 3000 feet of 12 inch ductile iron main and other appurtenances. This project will increase water pumping capability at the Kay Drive pump station. Benefits include increased capacity, improved fire flow capability and will reduce dependency on the Muskopf Road pump station. This is critical public water infrastructure. The Kay Drive pump station serves major commercial areas in southern Fairfield. Customers include Mercy Hospital, Cincinnati Financial, Cincinnati Mills Mall and Meijer's.</p> <p>Dave David E. Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile)</p> | City of Fairfield | 20 | 91 to 180 days | \$300,000 |
| Butler | Chosen | <p>housing units are completed next month, we will be serving well over 1,000 homeless individuals annually. Currently, we do not have a dedicated case manager for this program. We have volunteers that help with employment coaching, job applications, follow up on critical appointments, transportation, etc. but we do not have an individual to oversee and direct this very vital area. The addition of 1 formerly homeless person who has succeeded and can be trained to fill this vital role would dramatically increase the success rates of the individuals that we see. The emphasis on individual help, direction, and accountability would help to employ and house the population which contains some of the highest need individuals who have been desperately impacted by the economic downturn.</p> | Serve City | 50 | 31 to 90 days | \$35,000 |
| Butler | Water Distribution Improvements Seward Road and DI | <p>Water Distribution Improvements Seward Road and Dixie Highway (Route 4 Corridor)</p> <p>This is a major water transmission main upgrade along the Route 4 corridor and Seward Road Industrial zone. The project will include the installation of 10,000 feet of 16 inch ductile iron main and other appurtenances. The project will increase water transmission capability from the Route 4 Pump Station to the Seward Road water storage tanks. Benefits include increased capacity, improved fire flow capability and will reduce maintenance events. This is critical public water infrastructure. The Seward Road pressure zone serves multiple industrial parks and 250 homes in the Millers Run Subdivision.</p> <p>Dave David E. Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile)</p> | City of Fairfield | 20 | 91 to 180 days | \$1,500,000 |
| Butler | The Lord's Cupboard | <p>Our Lord's Cupboard food pantry is desperately in need of increased emergency food supplies as the demand is now greatly exceeding the supply. Additionally, our emergency homeless shelter recently lost our source of lunches for residents that fed approximately 50 people daily who are currently homeless. With 1,000 additional a month for emergency food and shelter needs, we could increase our capacity to meet the needs of the more than 1,000 families that are coming to us for services.</p> | Serve City | 1 | 0 to 30 days | \$12,000 |
| Butler | Water Distribution Improvements Dixie Highway (Rou | <p>Water Distribution Improvements Dixie Highway (Route 4 Corridor)</p> <p>This is a major water transmission main upgrade along the Route 4 corridor. The project will include the installation of 1,347 feet of 20 inch ductile iron main and other appurtenances. The project will increase and sustain the pumping capacity at the Route 4 Pump Station and address issues of aging infrastructure along the vital Route 4 business corridor. Benefits include increased capacity, improved fire flow capability and will reduce maintenance events. This is critical public water infrastructure supporting two other water zones serving well established commercial business districts and a hospital.</p> <p>Dave David E. Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile)</p> | City of Fairfield | 20 | 91 to 180 days | \$450,000 |

|----------------|--|---|-------------------------------------|----------------|--------------------|---------------------------|
| Butler | Domestic Violence Shelters | Funds would be used for staffing, food, and other supplies for two shelters. Dove House is Butler County's protective shelter for victims of domestic violence. Services include: two confidential locations - Hamilton and Middletown - with 24-hour protective shelter, child advocacy, court advocacy, complete confidentiality, support and educational groups. In addition, victims of federal crimes will be served. The shelters also provide a 24-hour crisis line. 50% of adults demonstrate new skills and goal achievement by living violence free for 90 days. 50% of adults and children attending educational groups report gaining knowledge about domestic violence. 80% of adults achieve at least three goals toward violence avoidance and self-sufficiency related to employment, housing, and medical care. In addition a new part-time staff position, Racial Justice/Special Projects, would be created to help us address racial/ethnic disparities in domestic violence and other areas empowering women | Dove House Shelter/YWCA of Hamilton | 10 | 0 to 30 days | \$200,000 |
| Butler | Hicks Manor Subdivision Water Line Replacement | Phase 3 The city of Fairfield, Hick Manor Subdivision water line project will replace aging water infrastructure in one of Fairfield's oldest neighborhoods. The project will replace the older water mains and provide safety upgrades for improved capacity and better fire protection. The project will include installation of a new 8-inch main on Gall Avenue, Holiday Drive, McGreevy Lane and Walter Avenue. Over one mile of main line will be replaced and all hydrants and other appurtenances will also be replaced with new. This project will not require easement acquisition and will take place within the public right-of-way. Dave David E. Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile) | City of Fairfield | 15 | 0 to 30 days | \$600,000 |

| Butler | Goodman Place Program | Women are empowered by learning the skills they need to become self-sufficient and to progress toward recovery in a healing and structured environment. The Goodman Place Program incorporates the development of client strengths by structuring the program to meet the individualized needs of each client. This allows the client not only to build on her strengths, but also to develop new skills, while avoiding hospitalization and progressing toward recovery. The program provides supported housing, medication monitoring, individual and group counseling/support, individual and group independent living skills training sessions, recreational and social programs. 80% of residents demonstrate three new coping skills/behaviors to address their mental illness. 51% of residents manage their own medications and graduate from Goodman Place medication monitoring. 75% of residents attain and report increased mental/emotional stability and well-being while avoiding hospitalization. | Goodman Place/YWCA of Hamilton | 3 | 0 to 30 days | \$100,000 |
| Butler | WORK STIMULUS | the unemployed and underemployed in Middletown Ohio and the surrounding areas with preparing for and securing gainful employment. With stimulus grant funding, we will be able to expand the existing program and meet the increasing demand in the area. Middletown is rated 1 of the 10 worst cities in the U.S. and program expansion will allow us to vastly improve the fiscal condition in the region. The programming will provide an increase in case management and skill development along with job training and placement with added focus on job retention and advancement. We will increase collaboration with the local homeless shelter, partnering to provide direct, immediate assistance for an aggressive response to the need for stabilization and re-establishment in the community. Funding will alleviate duplication of services and help streamline service delivery our highly distressed community. Family Service has been providing emergency assistance in Butler County since 1944. We look forward to an opportunity to expand and improve our services in response | Family Service of Middletown | 4,500 | 0 to 30 days | \$850,000 |
| Butler | Deli/Catering | personal chef service, catering, food education and in-store food service. The following describes the lines of business. Personal chef service - preparation of meals that will last a client for up to two weeks. Catering - for large, corporate events and smaller in-home events. Food education - using an in-store culinary classroom the focus will be on healthy foods and easy preparation. The objective is to teach as well as feed. The in-store food service will provide a natural source of cash flow from walk-in business and customers of the other business lines. To be successful, this business needs a storefront that has been configured for in-store dining, cooking demonstrations and preparation for off-site events. This requires commercial kitchen facilities - walk-in refrigeration, multiple ovens and cook tops, triple sinks, automated dishwashers and food service areas. A vehicle with refrigeration capabilities will be required for catering events. This project will create an ongoing business that will create jobs and teach our clients how to eat healthy and eat well | Savory Times, LLC | 5 | 0 to 30 days | \$100,000 |
| Butler | Childcare Center | build a update Early Childhood Development Center for infants through age 13 to enable parents to work during and after the period of economic crisis. We would expect to provide childcare to 100 families in this new, updated, facility. | Immanuel Lutheran Church | 25 | 31 to 90 days | \$1,000,000 |

| Butler | Jacksonburg Elevated Tank Painting | Paint 150,000 gallon elevated tank. | Southwest Regional Water District | 6 | 31 to 90 days | \$200,000 |
| Butler | SR4 Poststown Water Main | 3,200 feet of 12-inch water main to loop the distribution system and provide redundancy | Southwest Regional Water District | 10 | 31 to 90 days | \$155,000 |
| Butler | Hamilton New London Water Main | 3,100 feet of new 8-inch water main. Allows SWRWID to serve its customers with its own water, thereby eliminating a Hamilton-served area. This is a project that OEPA has strongly encouraged for a long time. | Southwest Regional Water District | 10 | 31 to 90 days | \$135,000 |
| Butler | Main Street Crosswalk Replacement | Removal of damaged brick crosswalks and replacement with asphalt with Dura-therm imprint crosswalks on all 4 sides of each intersection of Main Street with B, C, D, E and F Street. | City of Hamilton | 205 | 91 to 180 days | \$250,000 |
| Butler | South Treatment Plant Clearwell 2 Painting | Painting 400,000 gallon ground storage tank. | Southwest Regional Water District | 6 | 31 to 90 days | \$220,000 |
| Butler | Gold Mine | <p>The Gold Mine is an educational, retail & entertainment business. It has been in the planning stages since 2006. A 7 week successful test market was completed in the fall of 2007. It revealed a high probability of success.</p> <p>The facility will be located in Southwestern Ohio. It will house a Craft Beer, two classrooms, a Bead Supply Shop & Lapidary, 4 outdoor & 1 indoor gem mining flumes (completely recyclable). We will also cater to special events and private parties.</p> <p>Local schools will be invited to share in the Mother Earth's Precious Resources Program designed to enlighten the students through hands-on earth science.</p> <p>This venture will provide entertainment opportunities that will create additional jobs in other sectors (hotels, restaurants, etc.) thereby adding financial growth to the Southwest Ohio region.</p> <p>The venture was scheduled to launch in the spring of 2008 following my husband's cancer treatments, however, unexpected health issues prevented the start-up. Health issues have been</p> | Gold Mine - Treasures Galore, LLC | 11 | 31 to 90 days | \$464,045 |
| Butler | Mentoring | <p>We operate a very strong, best practice, mentoring program for at-risk youth. We would like to bring it to capacity at this point. This effort will not only employ individuals it will build a stronger future work force. We have over 150 children currently waiting to be matched with a mentor. In the last five months we have seen a 56% increase in the number of inquiries. At this time, we have already lost two TANF funded grants, had numerous cuts from corporate sponsors and had many individuals who cannot make their normal donations. We cannot possibly serve all of these new children with the severe reductions that we are facing due to the economic hardships faced by all.</p> <p>With these funds we will be able to increase our public exposure and therefore recruit more mentors to serve the ever growing list of children waiting to be matched. We will serve at least 100 more children annually with these funds. If no funding is given to non-profits such as Big Brothers Big Sisters then you will see not only another sector taking an employment hit but you will also be hurting an entire future generation.</p> <p>Under the Federal Emergency Management Agency, the Butler County Emergency Food and Shelter (EFS) Program serves the hungry and homeless in the cities of Fairfield, Hamilton, Middletown, Oxford, and all across the county. For the 2007-2008 fiscal year, Butler County EFS partnered with 15 agencies to provide over \$231,000.00 for food, shelter, and utilities.</p> | Big Brothers Big Sisters of Butler County | 7 | 0 to 30 days | \$100,000 |
| Butler | Butler County Emergency Food and Shelter Program | <p>For the 2008-2009 fiscal year, funding requests received by Butler County EFS increased 37% from last year's total distribution. Of the \$318,049.00 requested, only \$287,928.00 (less than 90%) will be available for allocation. As unemployment rates soar to almost 11% in parts of the county, the remaining \$50,121.00 could be readily used to provide for the basic needs of our struggling residents.</p> <p>This year 34% of allocated funds were set aside for food, 34% for shelter, and 30% for rent, mortgage, and utilities. Applying this same percentage, the requested \$50,121.00 will provide an additional \$266 groceries, over 3,000 hot meals, over 1,500 nights of shelter, 36 mortgage payments, and 60 utility bill payments. These funds would pass through the Butler County United Way grants to the Butler County Winton Road Collection System expansion</p> | Butler County United Way | 0 | 0 to 30 days | \$50,121 |
| Butler | Winton Road Collection System Expansion | <p>This is an area where septic systems and leach lines still serve multiple residents and one business. The project will extend the public sanitary system permitting residents and businesses to connect to the public sewer and abandon their septic systems. This project will improve the environmental integrity of local groundwater resources and also support the development of approximately 40 acres of undeveloped land.</p> <p>Dave David E. Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile)</p> | City of Fairfield | 10 | 91 to 180 days | \$75,000 |
| Butler | ICI (Inner City University) | <p>This program would provide on site lifeskills, job readiness, and computer skills to residents of Serve City's homeless and housing programs. A minimum of 16 individuals would receive specialized training in employment services during a 60 day period, resulting in training of 96 homeless or at risk homeless individuals being trained in a one year period. This training will be offered on site and during the evening so that individuals who are doing day labor type work can have access to learning new skills and improve overall job performance. Program coordinators will work with the local chamber of commerce and businesses to develop job placements for individuals upon graduation from the program. GED instruction will be offered to those who have not completed high school. Overall emphasis will be to help prepare for interviews, increase job performance ratings, and gain technical training to increase both employability and earning capacity.</p> | Serve City | 50 | 31 to 90 days | \$20,000 |
| Butler | Elevated Storage/Clearwell | <p>This project is designed and bid and ready to be awarded to caldwell tanks. It is a 250,000 gallon elevated storage/clearwell and the village has run short on any contingency monies. | Butler | Ross Road Sanitary Relief Sewer | The project will remediate an SSO on Ross Road. This sewer line serves the New England Hills Subdivision. This is an infrequent occurrence however, during recent surveys the OEPA, Southwest District Office has identified this SSO and directed the city of Fairfield to take appropriate action to correct the problem. The relief sewer project consists of the installation of 1500 feet of 8" main line and will route excess flow to Woodridge Drive sewer where there is sufficient capacity to carry the flow. Dave David E. Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile) | City of Fairfield | 10 | 91 to 180 days | \$400,000 |
| Butler | SR 127-Jacksonburg Road Water Line Extension | This is a needed waterline extension of approximately 7000 linear feet of 8" and 12" waterline with new fire hydrants. This project is needed to serve Advanced Drainage Systems, Inc. and other businesses along the SR 127 corridor and residents along Jacksonburg Road. This project is partially funded through OPWC and has a PFI and is ready to bid. | Village of New Miami, Ohio | 100 | 0 to 30 days | \$100,000 |
| Butler | Residential Alcohol and Drug Treatment (adult male) | There are currently 100 beds in the current facility for residential treatment clients. The facility could be placed on the current property or an alternative location within close proximity. Increasing bed space decreases the amount of money spent incarcerating low level offenders. Our drug dependence by almost half through utilization of our community corrections and recovery house treatment program. This building project would keep many construction jobs working for several months. | Southwestern Ohio Serenity Hall | 20 | 31 to 90 days | \$1,000,000 |
| Butler | Back to Work Landscaping and Maintenance | Create a Landscaping/Lawn Care branch to employ graduates of our treatment facility who need jobs and are having difficulty finding viable employment due to criminal records, and problematic work history. Teach former clients the interpersonal skills needed to get and keep a job in vivo. Purchase one 3/4 ton pick up truck (American Made) with a snow blade to use in the operation. Hire one Crew chief and others as business increases over time. Market the service to Butler and Warren County businesses and individuals. All proceeds go back into the operation of Southwestern Ohio Serenity Hall to build the business and provide more client services. Work with the local Community Action Agency (SELF) in collaborative effort as feasible. | Southwestern Ohio Serenity Hall | 20 | 0 to 30 days | \$200,000 |
| Butler | Youth Summer Enrichment Program | This program will include various activities such as our Open gym Program, basketball leagues and table games, pool, air hockey, etc. activities for children age groups 6 through 17 years. There will be adult supervision at all times of operation. This program will include both morning and evening activities. We plan to include educational field trips if funds are available. A Family Movie Night on every third Saturday of the month is included. Program will operate from June through August. Based on our experiences of the past few years, most of the children are from the inner city although the programs draw children from throughout the county. Our goal and desire is to see lives touched and enriched everyday with a focus on teamwork and each child having an opportunity to participate regardless of economic standing. | The Salvation Army | 4 | 31 to 90 days | \$15,000 |

| Butler | Community Meal Center West | The Community Meal Center in Hamilton, Ohio provides a safe, inviting, dignified haven where anyone in need can enjoy a hot, homemade meal. The focus is on meeting some of the social, physical and spiritual needs of the homeless, the working poor and the hungry. Founded in 2001, the Center serves an average of 450 meals on Friday evenings to guests who may have as many helping as they want. On most Fridays, volunteer entertainers contribute their talents to the evening experience. On various occasions we offer free haircuts, chair massages and manicures. Our all volunteer force of servers and cooks is made up of scout troops, college students, high school students, church members and often dinner guests of the Center. Community Meal Center West will offer free clothing as well as opportunities to purchase inexpensive groceries. Currently, a Miami University student is developing our "Hot Program" here which should be in place by mid April. This program will offer several volunteers to help some of our people meal center guests to get and drop a free meal in their own homes, hotels or other facilities, family and neighbors. | Community Meal Center | 0 | 0 to 30 days | \$5,000 |
| Butler | Indoor Sports Programs / Leagues | The program emphasizes: Team Work, improved Physical Abilities, self Esteem and a sense of accomplishment. This program involves approximately 350 to 400 children regardless of the child's economic level. The age range is from 6 to 13. Both basketball and indoor soccer are offered to boys and girls under this program. Also a men's basketball league is offered. This program also proudly hosts the county's Special Olympic teams. | The Salvation Army | 2 | 0 to 30 days | \$20,000 |

| Butler | Care Fair (7th one scheduled on Aug. 13, 2009) | Care Fair has become a way to reach the health needs of an impoverished neighborhood, offering over 300 attending (2226) help and hope. Outcome: Increased wellness and prevention strategies. Pat. train, RN, MSN, CS | Open Door Pantry | 2 | 31 to 90 days | \$60,000 |
| Butler | Computers for Home Schools | My wife and I have a 10 year old computer that is being replaced and we are not computer literate. We can teach the skills necessary for children to utilize technology in the 21 century, but we lack the funds necessary to purchase it. I have built every computer I have ever had, and our current home computer is nearly five years old. With the funds I plan to purchase two Netbooks for my daughters to use. Netbooks are smaller, lesser, but sufficiently powered laptops that are less expensive than traditional laptops. Netbooks use less energy than traditional laptops, and since they depend on internet applications for much of their functionality, they can scale and provide for a longer life of use. | None | 0 | 0 to 30 days | \$1,200 |
| Butler | Made in America | Made in America – a retail craft mall. Mission: Bring back prosperity to Americans by providing jobs, manufacturing opportunities & re-establishing the American Dream. Purpose: -Provide jobs for Americans (Ohioans). -Provide an outlet for talented Americans to sell their goods which will provide income for hundreds of hand-craftsmen and tradesmen. -Provide manufacturing opportunities: Promising Made in America hand-crafted items will go to the R&D department to be assessed for manufacturing feasibility in America (Ohio). Royalties and other company positions will be awarded. -Provide manufacturing facilities for these exceptional Made in America items. -Provide jobs on all levels in the Made in America (Ohio) manufacturing facilities. -Provide educational programs through craft classes -Provide entertainment opportunities that will create additional jobs in other sectors (hotels, restaurants ,etc.) thereby adding financial growth to the Southwest Ohio region. Note: The Gold | Team CBO | 55 | 31 to 90 days | \$1,385,180 |
| Butler | Walking path for community park | Currently there are no paved walking paths in our local community of approx. 10,000 residents. This walking path was one of the first items that was requested when the park was being designed. Currently all we have is the gravel base that was originally installed. It is currently being used, but in a very limited fashion due to the gravel surface. This existing surface does not allow for any type of wheels (wheelchair, bicycle, Etc), thus limiting the clientele it serves. Besides paving this path and having it safer to walk and run on for the average adult, we open up its use to a larger portion of our elderly who need the assistance of a wheel chair, or perhaps simply do not feel safe walking on gravel rutted paths. It would also drastically increase the usage by younger children being able to ride their bicycles and use roller blades on the paved surface. We would expect to see an approximately 45-60% increase in usage for the path alone, thus increasing over visitors to our park. We are truly "shovel ready". All we need is the funding for the asphalt and we can begin | Madison Township | 16 | 0 to 30 days | \$115,144 |
| Butler | ohio food equipment business start-up | Retail / warehouse building purchasing - (12123 princeton pike, springdale, oh 45246). Building is vacant for 4 years now. Job creation for 8 Ohioans in first year of operations. Equipment / supplies for new and existing area restaurants, bars, cafes, schools, cafeterias, gov. organizations, day cares, retirement homes, etc., etc... Ohio Food Equipment physical establishment (this warehouse) will contribute to creation and start-ups of new food related businesses in area. Business like this does not exist in area and is very sought for. Business is profitable now and will promise complete return on investment in first 4 years of operations. | dindic & sons llc / ohio food equipment | 8 | 31 to 90 days | \$450,000 |
| Butler | Raw Water Production Well | Well will be used in rotation with six other existing wells to supply water to the treatment plant. Currently Fairfield has only one well capable of operating using power from the emergency generator. This project in conjunction with another well modification project will increase the number of wells that can run on auxiliary/generator power to three. During emergencies this combination of wells would produce in excess of the plants average daily demand. This would greatly reduce our vulnerability to regional power outages such as the one that occurred on September 14, 2008. Dave David E. Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile) | City of Fairfield | 10 | 91 to 180 days | \$350,000 |
| Butler | Route 4 - Magie Avenue Water Line Project | The Route Four Magie Avenue Project will serve to replace the old Butler County waterline located in the middle of the Route 4. Approximately 500 feet of 10" main will be installed on the east side of route 4 between Magie Avenue and Hicks Boulevard. This work will improve water quality for the many businesses in the area. All existing water services will be reconnected to the new main. Dave David E. Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile) | City of Fairfield | 10 | 31 to 90 days | \$80,000 |
| Butler | Water Main System Improvement | Install 4,000 feet of new water main to connect Cincinnati Dayton Road to Lawton Avenue. This will provide a loop of the distribution system that will help correct flow deficiencies in the surrounding commercial/industrial area. | City of Monroe | 270 | 91 to 180 days | \$495,000 |
| Butler | Gallaher Road Utilities Improvement | City of Monroe - Replace 1,400 feet of old, failing, and undersized six inch main with twelve inch main and install 1,400 feet of new storm sewer along street. | City of Monroe | 290 | 91 to 180 days | \$275,400 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---------------------------------|----------------|--------------------|---------------------------|
| Butler | Mason Water Main Replacement | Replace old, failing and undersized six inch main with 2,800 feet of 12 inch main to serve commercial development areas. | City of Monroe | 290 | 31 to 90 days | \$300,000 |
| Butler | Britton Lane Water Main Replacement | City of Monroe - Existing six inch line is old, failing, and undersized. This line is also the main feed to the tower on Britton Lane. It will be replaced with 5,600 feet of 12 inch water main | City of Monroe | 290 | 31 to 90 days | \$520,000 |
| Butler | 1.25 MG Elevated Storage Tank to Serve the East Wa | City of Monroe - Installation of 1.25 MG elevated storage tank to support continued growth in a commercial and industrial area. The tank will help the City meet EPA storage requirements and facilitate development along the I-75 corridor route four stadium drive water line project | City of Monroe | 900 | 31 to 90 days | \$2,000,000 |
| Butler | Route Four Stadium Drive Water Line Project | Route Four Stadium Drive Project will serve to address aging infrastructure along the vital Route 4 business corridor. Approximately 2000 feet of 10" main will be installed on the east side of Route 4 from Stadium Drive to Donald Drive. This will eliminate an old Butler County water line. The old line causes water quality concerns when flushing hydrants in this area which affects the businesses that are served by this main. Resizing from an 8" main to a 10" main will also improve fire flow in this area. Dave David E. Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile) | City of Fairfield | 10 | 91 to 180 days | \$250,000 |
| Butler | Ross Road Water Line Extension | The Ross Road Project will to extend 600 feet of 10" water main from 5880 Ross Road to the corner of Ross Road and Kay Drive. At the present time, this area is served by a 6" main which is connected to an 8" main at Chapel Hill. That water main serves a private system called Wildwood. The Wildwood community is heavily populated with multi-family housing units and condominiums. Extension of this water main would increase the fire protection in the area. Dave David E. Crouch Public Utilities Director City of Fairfield 5350 Pleasant Avenue Fairfield, Ohio 45014 (513) 858-7775 (513) 678-5741 (Mobile) | City of Fairfield | 10 | 91 to 180 days | \$75,000 |
| Butler | Step - Up Mentoring Program | The Step - Up Mentoring program commits to the ideal of improving the Middletown community by empowering youth to become productive citizens by guiding them through school high graduation and through a first year post high school experience. Together, parents, students and the mentor participate in the design and implementation of an individualized approach to achieving high school graduation and a first year post high school experience. Step - Up begins the second semester of the 8th grade year. Students are identified by their academic achievement and potential. Students, along with their parents/guardians, and mentors, are invited to design a 5 year program. The program includes a summer academy following 8th grade graduation; community, and academic mentors; ongoing team meetings to provide progress reviews and support; clear academic, behavioral, and social standards; and incentives that support student learning, interests, and social needs. Goals of the Program: Build plant to process 100,000 tons of low rank (high in moisture but low in mercury, sulfur, and ash) coal for the Hamilton Municipal Power plant. Outcome is to increase electricity out put and reduce emissions for this older coal fired plant. | Middletown City School District | 1 | 0 to 30 days | \$50,000 |
| Butler | Utility Low GHG Emissions Coal Fuel | Project can be reproduced around Ohio, at older coal fired utility plants (processing more tons) to create more jobs and reduce Green House Gas emissions while permitting utilities to sell more electricity. Old, small coal fired plants are needed to meet electric demand but have had to convert to western US low rank coals (for emissions purposes). As such they are not as efficient as they were when burning eastern coals. Our technology removes water from these environmentally sound coals and improves the efficiency of older boilers. | FMI NewCoal | 12 | 0 to 30 days | \$10,000,000 |
| Butler | TII Art & Soul Shop | Objective: To establish an outlet where products created by individuals with mental retardation and other developmental disabilities (MR/DD) can be displayed and purchased by the admiring public. Toward Independence, Inc. has conducted artistic programs for over 15 years and we have promoted and sold these items which produce pride and revenue for the persons who fashioned and produce them. The goal would be to collaborate with similar organizations from around the state of Ohio-gather on consignment some of the best items- and have an outlet where the creations and there by products could be sold. The impact is in benefit to the artist with disabilities, the creation of jobs related to marketing and sales, the exposure of positive images on the abilities of the consumers to the general public and is helpful to all the respective agencies involved in the project. We would also have a traveling program to appear at various art and fair venues. There would be related fund raising, training and educational programs as well. If successful, this project could be duplicated elsewhere in Ohio. The start-up funding would cover the first two years | Toward Independence, Inc. | 4 | 31 to 90 days | \$350,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Butler | Middletown Promis | Middletown City Schools and the Miami University propose a revolutionary and comprehensive program to give all students, regardless of socioeconomic and racial background, strong and attractive pathways to thrive in the public schools and to enter Miami University, thrive in the university environment and become a Miami University graduate. We envision this as an unprecedented cooperative effort among a public school system, a highly-rated university, and community and corporate partners to: - Raise academic achievement for all students, and at the same time - Eliminate the racial achievement gap; - Stimulate economic development in Middletown; - Make a university degree obtainable for all. The Middletown Promise pairs the extensive Miami University financial aid packages (including the Access Initiative) with funding from private and corporate donors, to offer a free Miami University college education to every Middletown High School graduate who also lives in the MCSSD. This should encourage novice and veteran teachers to stay in-district so that their own children can benefit from a paid college tuition. | Middletown City School District | 1 | 31 to 90 days | \$1,000,000 |
| Butler | Teacher Induction and Equity Program | learning community. To do this, the Middletown City School District will hire a special cohort of twenty-two new teachers, pair each novice teacher with a veteran teacher who will split their teaching loads with the new teachers, and support all forty-four teachers as they engage in a customized master's degree program at Miami University of Ohio. In the school buildings, these veteran-novice pairs will engage in their local professional learning communities, as well as the building-level work to implement the district's equity plan. MCSDD's goal is to equip a critical mass of teachers with the knowledge, tools, resources, and supports to effectively intertwine racial awareness and instructional decision making so that classroom practice is transformed and student achievement is accelerated district-wide. The program has the potential to fundamentally change how we deliver quality education to all students, most specifically students of color who have historically been underserved by our education system. | Middletown City School District | 22 | 31 to 90 days | \$3,000,000 |
| Butler | 21st Century Infrastructure | Our buildings cover 80% of Middletown City proper. We want to build a wireless network system to provide low or no cost internet access to our entire community. In addition, we would hire technology professional development specialists to train our teachers and staff in converting our curriculum to a job force development curriculum. This would provide a skilled workforce who could take advantage of the jobs created with the wireless/fiber based commerce created. Doing so converts our entire school system and community from an industrial based economy to a 21st Century broadband based community. We have much of the design completed and need only the money and coordination with the city to make it happen | Middletown City School District | 25-50 | 91 to 180 days | \$10,000,000 |
| Butler | NLM Food & Clothing Assistance | New Life Mission provides groceries, clothing, hot meals, a crisis pregnancy center, occasional financial aid, and a safe haven for the poor in Hamilton, Fairfield, and the surrounding areas. We provide a way for one's paycheck or food stamps to last longer by providing a free lunch everyday, as well as groceries and clothing once a month. We provide free pregnancy tests, formula, diapers, and clothing, as well as counseling for mothers and their children. The outcome of these services is that our clients' income can go toward rent and utilities because we are alleviating the need to buy as much food or clothing. With the downward economy, our numbers are higher than ever and more people than ever are seeking first-time assistance. We need assistance with the costs of food and overhead expenses in order to continue serving our community on a daily basis | New Life Baptist Mission | 3 | 0 to 30 days | \$10,000 |
| Butler | Layhigh Elevated Tank Painting | Painting 200,000 gallon elevated tank. | Southwest Regional Water District | 6 | 31 to 90 days | \$200,000 |
| Butler | SR 122 Water Main Replacement | Replacement of 5,000 feet of 12-inch water main and 32 residential service lines, all aging and repeatedly failed. | Southwest Regional Water District | 10 | 31 to 90 days | \$320,000 |
| Butler | SR126 6-inch Loop | 7,300 feet of 6-inch water main to provide a loop in the distribution system | Southwest Regional Water District | 10 | 31 to 90 days | \$230,000 |
| Butler | New Biddinger 6-inch Water Main Replacement | 1,700 feet of 6-inch water main to replace aging, failed main. | Southwest Regional Water District | 10 | 31 to 90 days | \$65,000 |
| Butler | Grooming business | I have just become a certified groomer and have worked for another business for the past six months grooming animals. I want to start a pet grooming business with potential business of 400 customers or more. I need a receptionist, bather and another groomer besides myself to take care of the initial business and grow from there. Thank you | Always A Happy Tail | 4 | 91 to 180 days | \$25,000 |
| Butler | Boehm Farm - US27 Water Main | 2,800 feet of 8-inch water main to provide an important loop in the distribution system | Southwest Regional Water District | 10 | 31 to 90 days | \$130,000 |
| Butler | Kirchling-NewLondon Cross Country Main Replacement | 5,900 feet of 8-inch water main to replace aging and failed main | Southwest Regional Water District | 10 | 31 to 90 days | \$227,000 |
| Butler | West Alexandria Tank Painting | Paint 250,000 gallon standpipe. | Southwest Regional Water District | 6 | 31 to 90 days | \$200,000 |
| Butler | 3.Hughes Hall Instructional Science Laboratory Ren | strong history in preparing Ohio and out-of-state students for careers in the Biological Sciences, Chemistry and Biochemistry. This project will impact approximately 1000 students per year who are enrolled in courses in Organic Chemistry, Analytical Chemistry and Biochemistry. These students are typically training for careers in health care fields, as well as in analytical fields and biotechnology. Because it is not possible to offer individualized research opportunities to all undergraduate students, the Department of Chemistry and Biochemistry is developing research modules for use in the classroom as a way of introducing research in undergraduate courses. Retaining Underserved Populations in STEM Fields: This pwill contribute to Ohio's goal of having more STEM graduates from underrepresented groups. The renovations will facilitate the curricular changes that will have broader appeal to Ohioans from these underrepresented groups. This renovated space will allow us to provide new and meaningful research opportunities for students in i | Miami University | 48 | 91 to 180 days | \$4,000,000 |
| Butler | 2.Laws Hall Instructional Science, Technology, Eng | Supporting the Expanding Instructional and Information Needs of Ohio Students and Faculty in Their STEM, Business, and Psychology Pursuits: The creation of a technology-rich, modern STEM, business, and psychology library in Laws Hall will serve the information needs of Ohio undergraduate and graduate students and Miami faculty in the STEM, business, and psychology disciplines. The completed Laws Hall Project will provide Ohio students and faculty with access to the latest technology and services necessary for them to hone their information literacy skills. By becoming information fluent, Ohio students will possess the capacity to apply these skills immediately to their chosen fields of professional endeavor. This project will assist Miami in the continual development of life-long Ohio learners who possess the necessary skill sets to seamlessly transition from the undergraduate experience to making positive contributions to the Ohio market place. In addition, the renovation of Laws Hall will provide a modernized space for Miami University's Physics Department and Mathematics (STEM) students. Miami University's Physics Department has a successful history of mentoring both Ohio and out-of-state undergraduate and graduate STEM students. The number of undergraduate physics majors that Miami University graduates is in the top 4% of over 570 undergraduate and masters granting physics departments in the country. In 2003, the Miami's Physics Department was ranked #1 in the country in undergraduate majors awarded by a masters granting physics department. The modernized space will provide better opportunities for hands on science and more efficient delivery of courses, as well as better interaction between students and between faculty and students. Recruitment of Underrepresented Groups to STEM Fields: The Department also performs outreach to economically disadvantaged students of Ohio. This year the department will have 100 high school students visit the department. | Miami University | 84 | 31 to 90 days | \$7,000,000 |
| Butler | 1.Kreger Hall Instructional and Research Physics R | Recruitment of Underrepresented Groups to STEM Fields: The Department also performs outreach to economically disadvantaged students of Ohio. This year the department will have 100 high school students visit the department. | Miami University | 192 | 31 to 90 days | \$16,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-------------------------------|----------------|--------------------|---------------------------|
| Butler | Closing the Technology Gap K-12 | Project "Closing the Technology Gap K-12" will provide up-to-date technology across the school district for students and staff. This will enable them to have the equipment for instruction, learning, parent communications and office work to implement a 21st Century Education System. Items include laptop computers, desktop computers, computing stations, smart boards, student response systems, document cameras, LCD projectors, DVD/VCR players, scanners, printers, laser pointers and media production costs. | Hamilton City School District | 20 | 0 to 30 days | \$5,500,000 |
| Butler | 26.Steam Main Line Expansion Joint Replacement | The main steam line that serves the campus contains over 60 expansion joints to compensate for the normal expansion and contraction of the steam piping. These expansion joints are more than 30 years old and a failure of any one could jeopardize delivery of steam to most of the campus. This project will replace these expansion joints with a new, safer type and reduce the chances of a catastrophic failure in the joint. | Miami University | 45 | 181 days or more | \$3,700,000 |
| Butler | 25.Hamilton Campus: Mosler & Phelps Hall Systems R | This project is not only necessary as a maintenance repair, but it would also provide energy conservation by replacing variable air volume boxes, as well as new energy efficient lighting, in addition to replacement of fire suppression and ceiling systems | Miami University | 33 | 181 days or more | \$2,700,000 |
| Butler | 24.Middletown Campus: Finkelman Auditorium Renovat | This project will address building deferred maintenance including: ADA improvements, roof replacement, auditorium seat repair/replacement, floor covering repair/replacement, stage hanging stock repair/replacement, stage floor repairs, painting, repair loading dock and dock door | Miami University | 36 | 181 days or more | \$3,000,000 |
| Butler | 23.Elevator Replacements for ADA Compliance | This project will provide modernization of elevators in Upham Hall, the Center for Performing Arts freight elevator, Murstein Hall, Boyd Hall, and two elevators in Bachelor Hall. It will also include replacement of the stage lift in the Center for Performing Arts | Miami University | 14 | 181 days or more | \$1,200,000 |
| Butler | 22.Middletown Campus: Thesken Hall Renovations | Replace penthouse exterior walls (asbestos containing material which is beginning to deteriorate). Replace building transformer and electrical panels and wiring as needed. Accessibility improvements including handrails, door hardware, guardrails, tier-classroom access, water fountain improvements | Miami University | 18 | 181 days or more | \$1,500,000 |
| Butler | 21.Residence Halls Roof Renovations | Exterior masonry work, replace cantilevered entry roofs Life safety systems fire alarm system exits, egress lightings. Other deferred maintenance items including painting, floor coverings, exterior door repair/replacement. | Miami University | 75 | 181 days or more | \$6,250,000 |
| Butler | 20.Residence Hall Plumbing Upgrades | This project will replace roofs on Richard Hall, Hamilton Hall, and the Culinary Support Center. The roofs on these buildings have exceeded their anticipated life expectancy and are consequently beginning to fail. Leaks are increasing which causes damage to areas within the buildings and increases maintenance costs. | Miami University | 7 | 91 to 180 days | \$600,000 |
| Butler | 19.Residence Hall Security Upgrades | Upgrade of shower and bath fixtures in fifteen restrooms in selected residence halls has become a high priority as aged facilities are leaking into lower levels of the buildings causing significant damage to materials and property. | Miami University | 5 | 91 to 180 days | \$400,000 |
| Butler | 18.Hamilton Campus: Electrical System Distribution | Student safety is becoming an increasingly important aspect of residence halls. This project will re-key all residents' rooms in thirteen residence halls for increased security and reliability of locking mechanisms. | Miami University | 17 | 91 to 180 days | \$1,400,000 |
| Butler | 17.Electrical Switchhouse Number 1 Replacement | This project will replace the Mosler electric service (which are the main switches on the Mosler dock), the Phelps transformer, and replace the Phelps and gym emergency generators. All this equipment is between 30 and 40 years old and needs to be replaced to reduce the chances of frequent and prolonged electrical outages in these buildings | Miami University | 24 | 91 to 180 days | \$2,000,000 |
| Butler | 16.Middletown Campus: Roadways, Walks & Accessibil | Switch House 1, in Gaskill Hall, is 4kV electric distribution switchgear that provides service to 42 buildings in the Central Campus area. The switchgear is fifty years old and beyond its useful life. It is increasingly difficult to operate and maintain, and has experienced multiple equipment failures. Therefore, it is imperative to system reliability to relocate and replace its functionality with new facilities and conversion of some buildings to the new 12kV system | Miami University | 27 | 31 to 90 days | \$2,250,000 |
| Butler | 15.Academic Buildings Exterior & Interior Painting | The project would include paving driveway to BRC and Maintenance Barn and Lot Area, pave and repair/replace curb and gutter as needed East, South Library, Verity and Levey parking lots, widen Drive Verity Lodge to Book Depository drive. Repair/Replace Exterior Stairway from Upper Campus area to Lower. Widen drive to two lanes from Johnston Hall to Rec Center lower parking lot accessible sidewalk next to roadway from Thesken to Rec Center. Nature Trail improvements including bridge replacements, ADA improvements, trail maintenance, signage. Child Care Center repairs and improvements including building accessibility playground other improvements to meet current code requirements. Renovate library outdoor patio and provide for accessibility. Deferred landscape maintenance and renovations including retaining wall repair, lawn restoration, replacement plant material, tree maintenance, minor drainage improvements, hardscape repairs | Miami University | 11 | 31 to 90 days | \$850,000 |
| Butler | 14.Residence Hall Exterior & Interior Painting | Complete exterior painting of the following buildings – Hughes Hall, East End, Sios Center, MacMillan Hall, Steam Plant, South Chiller Plant, and Laws Hall. Complete interior painting of the following buildings – Hughes Hall, Bachelor Hall, Shideler Hall, Upham Hall, Phillips Hall, Harrison Hall, and Pearson Hall. | Miami University | 23 | 31 to 90 days | \$1,850,000 |
| Butler | 13.Residence Hall Emergency Generators | Complete painting of the exteriors of twelve residence halls and the interior of 14 halls | Miami University | 6 | 31 to 90 days | \$500,000 |
| Butler | 12.Residence Hall Elevator ADA Upgrades | Replace three residence hall emergency generators and install a new generator at the Culinary Support Center. | Miami University | 4 | 31 to 90 days | \$350,000 |
| Butler | 11.Residence Hall Accessibility Upgrades | This project will update aged elevators in two residence halls for accessibility and safety. | Miami University | 6 | 31 to 90 days | \$500,000 |
| Butler | 10.Academic and Administrative Building Generator | This project will provide installation of ADA compliant ramps at ten residence halls to provide greater accessibility and improve safety for students, faculty, staff and visitors. | Miami University | 7 | 31 to 90 days | \$550,000 |
| Butler | 9.Academic Building Roof and Insulation Upgrades | Replace the emergency generator at the Art Building, Bachelor Hall, Center for the Performing Arts, King Library and Upham Halls. | Miami University | 30 | 31 to 90 days | \$2,500,000 |
| Butler | Miami Univ Cook Field Sanitary Sewer Replacement | This project will replace roofs on Withrow Court, Hiestand Hall, Laws Hall, Irvin Hall, the Center for Performing Arts, and the Art Museum. The roofs on all of these buildings have exceeded their anticipated life expectancy and are consequently beginning to fail. Leaks are increasing which causes damage to areas within the buildings and increases maintenance costs | Miami University | 6 | 31 to 90 days | \$500,000 |
| Butler | 7.Steam Pipe Asbestos Abatement | This project would redesign, upgrade and replace the existing sanitary sewer line traversing Cook Field on the eastern edge of campus. The slope of the existing sewer line is too shallow and the pipe deteriorating, resulting in silt, debris and grease build up requiring frequent repair, cleaning and maintenance. | Miami University | 30 | 31 to 90 days | \$2,400,000 |
| Butler | 6.Steam Plant Roof Replacement | Much of the over steam lines in the utility tunnels are insulated with asbestos containing insulation which is hazardous and less effective than modern insulation materials. Whenever work is required on the piping, the asbestos must first be abated which adds much time, labor and expense to work that is often needs to be completed as soon as possible to restore heat to the affected areas of campus. This project will abate all the asbestos insulation and replace it with a non-hazardous insulation material. | Miami University | 3 | 31 to 90 days | \$250,000 |
| Butler | 5.Hamilton Campus: Roadways, Walks & Accessibility | The roof on the Steam Plant is the original roof, now about 30 years old, which needs complete replacement. This project will replace the roof material and upgrade the insulation and flashing there are three parts to this project. First, the main student lot which provides parking for 800 vehicles needs to be re-graded, covered with a geo-tech membrane for ongoing settling issues, and then resurfaced. The second part would replace a connector road between University Hall and the main student lot. The third part would install new lights, and repave the parking area at University Park. | Miami University | 15 | 31 to 90 days | \$1,250,000 |
| Butler | 4.Hamilton Campus: Roof Replacements | Replace the roofs at Phelps Hall/Parrish Auditorium and replace the gym roof. This project will replace roofs at Phelps Hall/Parrish Auditorium and the physical education building. The roofs on each of these buildings have exceeded their anticipated life expectancy and are consequently beginning to fail. Leaks are increasingly causing damage to areas within the buildings and increasing maintenance costs. | Miami University | 12 | 0 to 30 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-------------------------------|----------------|--------------------|---------------------------|
| Butler | 3.Academic and Administrative Building Fire Alarm | There are a number of buildings on campus with outdated fire alarm systems. This project would replace these old fire alarm systems with state of the art smoke detectors, visual and audible alarms and fire alarm panels. The buildings include Bachelor Hall, Withrow Court and Harrison Hall. The project would also upgrade the campus-wide Keltron system which provides central monitoring capabilities. | Miami University | 7 | 91 to 180 days | \$650,000 |
| Butler | 2.East Quadrangle Steam Line Replacement | The existing steam line to Marcum Conference Center was installed over 30 years ago and has had numerous leaks repaired over the last two years. It needs to be completely removed and replaced. This project will provide a new insulated steam and condensate piping system to replace the old deteriorated piping. | Miami University | 4 | 0 to 30 days | \$300,000 |
| Butler | 1.Western Campus Bridge Renovation | The original structure was made of stone and has deteriorated to the point where it is unsafe to use this bridge. The increased amount and type of traffic has caused much damage to the walls of the structure. This project will improve safety and durability by repairing and replacing the deteriorating guard walls and roadway on the bridge spanning the spillway at the Duck Pond on the Western Area of the Oxford campus. Improvements will bring the guard walls to ODOT standards and will use the stone from the existing wall as a façade to maintain the appearance of the historic existing structure. | Zachry University | 7 | 0 to 30 days | \$575,000 |
| Butler | 11.Hamilton Campus: Single Pane Window Replacement | Replace all the inefficient single pane windows with Energy Star rated windows. Forty year old windows would be replaced in Mosler, Rentschler and Phelps Halls. This will save a significant amount of heating and cooling energy. | Miami University | 18 | 181 days or more | \$1,500,000 |
| Butler | 10.Campus Wide Direct Digital Control Mechanical S | This project would replace the pneumatic controls that remain on a number of air conditioning units in campus buildings and upgrade the central Siemens controls system. This system manages all the heating and cooling systems on campus. A new server is needed as well as a dedicated alarm video monitor. Additional test instruments are needed to analyze control anomalies. A weather station is needed to determine how to most optimally operate the HVAC units | Miami University | 30 | 181 days or more | \$2,500,000 |
| Butler | 9.Campus Wide Single Pane Window Replacements | Replace all the inefficient single pane windows on the Oxford campus with Energy Star rated windows. This will save a significant amount of heating and cooling energy. | Miami University | 36 | 181 days or more | \$3,000,000 |
| Butler | 8.Middletown Campus: Johnston Hall Systems Upgrade | This project will replace the Johnston Hall building transformers, of which there are two, and convert the electrical configuration from a delta to a safer Y configuration transformer to allow for proper grounding. The voltage is stepped down from 12470 to 480/277 and 208/120 | Miami University | 4 | 181 days or more | \$300,000 |
| Butler | 7.Middletown Campus: Window Replacements | Replace all existing single pane windows with Energy Star rated windows. This will save a significant amount of heating and cooling energy. | Miami University | 7 | 91 to 180 days | \$650,000 |
| Butler | 6.Residence Halls Retrofit Radiators with Thermost | There are 15 residence halls on campus with original steam radiators with no controls. Consequently, there is a significant loss of efficiency in the system. The project will replace the shut off valves on each radiator with a local temperature control valve. Thermostatic valves will provide control of room temperatures to the room occupants and greatly improve energy conservation | Miami University | 7 | 91 to 180 days | \$600,000 |
| Butler | 5.Residence & Dining Hall Exhaust Hood Optimizatio | The exhaust hood control system speeds the fan up when cooking is taking place and reduces the fan speed when there is no activity. There are 14 locations on campus where this control system can be installed. The primary energy savings will come from reduced cost of make-up conditioned air when the hoods are not used | Miami University | 4 | 91 to 180 days | \$350,000 |
| Butler | 4.Occupancy Sensors for Lighting & Mechanical Syst | Occupancy sensors will be wired to variable air volume (VAV) boxes and lighting circuits to set boxes to minimum flow and turn off lights when the room is unoccupied. There are approximately 3,200 VAV boxes on campus that are suitable for this modification including 35 residence halls | Miami University | 16 | 91 to 180 days | \$1,300,000 |
| Butler | 3.Flower Residence Hall Mechanical System Efficien | This project will replace all the fan coils and unit ventilators in the building. It will provide for Direct Digital Control for all the HVAC systems. The domestic hot water heaters will be replaced with semi-instantaneous heaters, heat exchangers, steam pressure reducing station, water softener, and condensate set will also be replaced. | Miami University | 15 | 31 to 90 days | \$1,250,000 |
| Butler | 2.Chilled Water Plant Controls Integration | New chillers have been added to the South Chiller Plant recently and now the programming of the control systems needs to be upgraded to efficiently run all the chillers in the plant properly. This upgrade will sequence the chillers to operate the plant for maximum energy conservation | Miami University | 3 | 31 to 90 days | \$250,000 |
| Butler | 1. Pearson Hall Biological Sciences Renovations | This project will replace many of the approximate 100 exhaust fans with several manifold exhaust systems and only a few central exhaust fans. This arrangement will provide a more energy efficient exhaust system and remove many of the fans from their roof mounting. Also, part of this project will be the replacement of approximately 20,000 square feet of the original 20 year old roof | Miami University | 25 | 0 to 30 days | \$2,100,000 |
| Butler | TO stimulate my house hold | We will be self supportive until the economy becomes stable. We will be able to take care of our seven children until we are able to get to get our business up and running. We will be able to pay our bills and get better housing. | Iacrone house | 1 | 0 to 30 days | \$50,000 |
| Butler | Job stimulus for environmental industrial solution | Sourcing skilled workers to area machine shops and fabricators through project development for industrial needs. The focus is to find out of work tradesman to meet needs of the paper and steel industries. The goal is to refurbish used equipment which in turn will provide a greener alternative to replacing with new equipment. | Massey, LLC | 250 | 0 to 30 days | \$275,000 |
| Butler | 7. Laws Hall Instructional & Research Humanities R | This project will modernize, renovate and repair the 2nd and 3rd floors of Laws Hall consistent with a recognized green building rating system. The finished Laws Hall floors will be used to support undergraduate and graduate instructional and research pu | Miami University | 84 | 91 to 180 days | \$7,000,000 |
| Butler | 6.Miami University Middletown Instructional Classr | The finished classrooms will be used for undergraduate instruction. The classroom project provides improvements in all 36 general use classrooms in need of upgrades including technology, proper door hardware for access and safety, furnishings, floor cove | Miami University | 30 | 91 to 180 days | \$2,500,000 |
| Butler | 21st Century Educational Facilities | The Hamilton City School District needs 65 additional classrooms in order to implement class sizes of 15-1 in grades K-3. | Hamilton City School District | 180 | 31 to 90 days | \$35,000,000 |
| Butler | 5.Upham Hall Instructional and Research Technology | The Governor proposed this lower class size after the voters of Hamilton had already approved 2 bond issues to build new school faci Technology Training and Research Support: The renovation of Upham Hall will provide expanded space for our electron microscopy facility. The EMF provides instruction in transmission and scanning electron microscopy, light microscopy, and digital imaging | Miami University | 61 | 0 to 30 days | \$5,100,000 |
| Butler | 4.Pearson Instructional Science Laboratories Renov | Preparing Science, Technology, Engineering, and Mathematics (STEM) Professionals: Miami has a strong history in preparing students for careers in the Biological Sciences and in Chemistry and Biochemistry. The Pearson Hall Project will have a major impac | Miami University | 12 | 91 to 180 days | \$1,000,000 |
| Butler | Maple St Mixed Use Building | Funding is requested to rehab a existing structure that is located in a federally designated community renewal zone. This project would create commercial space for tenants such as offices, retailers, medical providers with housing located on the floors above for employees in those spaces or the community at large. | Morriscal Realty | 30 | 181 days or more | \$2,500,000 |
| Butler | Social Security and Welfare Fraud Investigators | the social security and welfare benefits system. The money would be used to purchase property to house business, employ initially 25-30 people/agents, training, office equipment, etc.... The business would be directly linked to federal and state gov. offices that would contact us to investigate possible fraud in our operating area. | SSWFI | 50 | 31 to 90 days | \$1,000,000 |
| Butler | providing electrical services to the community | One goal of this business would be to investigate and expose fraud within the social security and welfare systems and return funds to the government To bring back my laid off employees and to grow my electrical business | Puckett Electrical Services | 6 | 31 to 90 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---------------------------------------|--|--|----------------|--------------------|---------------------------|
| Butler | Community EMR Program | <p>Introduce a community based EMR application that provides to local physicians, free clinics, and nursing homes.</p> <p>Funds would be for initial startup costs, with subscribers paying a small monthly fee for usage.</p> <p>Data such as Laboratory Results, Imaging results, transcription notes and consults generated at the hospital would be shared electronically with EMR subscribers via interfaces with the Hospital Information System.</p> <p>Physicians would have the capability to e-prescribe via the EMR application.</p> <p>The EMR application would also provide a patient health record, where patients can view predefined information via secure internet connection.</p> <p>The EMR could also be interfaced with the local RHIO (HealthBridge) to create a more complete patient record by ensuring all information from specialist or larger hospitals are consolidated into one record.</p> <p>The continuity of patient care would improve significantly using this model</p> | McCullough-Hyde Memorial Hospital | 3 | 91 to 180 days | \$500,000 |
| Butler | Business Expansion | <p>Duplicate lab testing would be greatly reduced by having lab results available for all physicians. We intend to purchase one new work truck. We will retain two current positions and hire three new employees. We also would like to pay off existing equipment loan</p> | Murrill Construction L.L.C. | 5 | 0 to 30 days | \$50,000 |
| Butler | My Proposal to Boost New construction | <p>Crossings. It is a fairly large neighborhood and has TONS of room to grow. The developers are asking for retail space, but I think that instead of ruining the neighborhood by inviting in more, cars, parking noise etc. Not to mention tearing down trees and covering a creek. I think that a wind farm needs to be built there. It would be a HUGE incentive for people in the neighborhood. With the Housing Association fees paid, the residents would have access to the energy that the wind farm is producing. With how windy it has been lately, we could have stored SO much energy. People would have more money to spend, and people will want to live in the neighborhoods that are going to help the environment, as well as energy bills. (Which in our area are averaging over \$40/month. That is a lot of money. The new houses that will be built because of the demand to live in a neighborhood that will reduce electric bills, will provide additional tax dollars and will put people to work. We need to spend a little money now, to make it better in the future.</p> | Alternative Energy | 10 | 181 days or more | \$2,500,000 |
| Butler | Eliminate Morbid Obesity | <p>New capitol would be used to pay off old debt to allow us to stay open to service our 650 + patients who have had weight loss surgery but need ongoing support. Also, we would use money for marketing to promote the efficacy of the medical and surgical treatment of obesity to prevent and eliminate many health issues that drain our health care resources. We improve health, but we need to clean up old debt so that we can use our necessary vendors and advertise our services</p> | Cincinnati Weight Loss Center | 10 | 0 to 30 days | \$500,000 |
| Butler | Psychological Office and Services | <p>Psychological practice. The practice is currently small, with the owner as the only Full Time employee, but with a number of contractors and part-time employees.</p> <p>The practice currently works under contract to the Mental Health and Recovery Centers of Warren County, and also does Psychological evaluations for the Ohio Bureau of Disability. The business is located in a leased incubator space, which has limited handicap accessibility, and has no free parking. The office acquired or built would be used to buy or build a handicapped accessible location, with close, free parking, with handicap parking spots in a safe part of town. It would be a larger space, which would allow more Psychologists/Psychological Assistants to be hired, and allow the practice to expand into other areas of interest, which would include doing forensic Psychological work for various county and state agencies and courts. This expansion would benefit the local population, which is underserved with Psychological services, as well as the city of Hamilton, and local and state</p> | Katherine A. Myers PsyD & Associates LLC | 8 | 91 to 180 days | \$500,000 |
| Butler | Low Income Housing Weatherization | <p>This funding would allow our company to perform weatherization in the form of door and window replacement, using Energy Star components, on approximately 400 homes. This would include the installation of approximately 6000 Energy Star windows and 800 Energy Star doors. The typical selected house would have 11 house windows, 4 basement windows, and 2 entry doors. Selection of homes would be based upon regulations set forth from state or federal income limitations. We can begin work as soon as funding and regulations are clarified. Other systems of weatherization could easily be added in the form wall and/or attic insulation, which is preferable when trying to maximize the efficiency and effectiveness of home weatherization. This project would not only save jobs for our company, but would also allow us to create new jobs as we would employ more people directly from our local community.</p> | Kingdom Construction Inc. | 11 | 0 to 30 days | \$4,350,000 |
| Butler | Expand Busings | <p>To advertise our business, which we started in December, 2008 and to hire extra people. To expand our business. To pay off our equipment debt</p> | E & L Catering | 4 | 31 to 90 days | \$100,000 |
| Butler | Convenience Store | <p>will open another convince store for a local community that will offer competitive prices for goods and services. with a small business, local employment and services will be offered which will help the local community.</p> | maptwo, corp. | 8 | 91 to 180 days | \$500,000 |
| Butler | Greenhouse Energy Efficiency Retrofit | <p>Retrofit existing greenhouses with new energy efficient technology, control systems and insulation-reducing fuel costs by at least 40%. New energy efficiency will allow greenhouses to be used in plant production for a full 12 months during the year adding up to 10 new greenhouses, sales, and delivery jobs.</p> | Gears Garden Centers | 10 | 0 to 30 days | \$65,000 |
| Butler | Mobile Automated License Plate Reader | <p>The Middletown Division of Police is in need of funding for an Automated License Plate Reader System. This system can be mounted in police units and capture license plate numbers during an entire shift. This system can analyze this data and lead to among other things, recovery of stolen vehicles, terrorist interdiction, and witness location. The system is American made and will require local installation.</p> | Middletown Division of Police | 3 | 0 to 30 days | \$25,000 |
| Butler | Middletown Division of Police Patrol | <p>The Middletown Division of Police is in need of funding for additional patrol vehicles. The vehicles purchased will be American made. The units will be equipped with computers and cameras that will require local installation. The additional units will aid in homeland security and create a higher level of police visibility. With this funding we will be able to purchase and outfit 25 Ford Police Interceptors.</p> | Middletown Division of Police | 10 | 0 to 30 days | \$750,000 |
| Butler | Center for Community Revitalization | <p>The Center for Community Revitalization (CCR) brings together local government initiatives, public safety programs, educational institutions, nonprofits and small business to provide a workplace that fosters community collaboration between stakeholders in an effort to revitalize the community. CCR would include a Nonprofit Development Center to train nonprofits on how to operate effectively and efficiently using CDP's established CDPBridgeWorks program. CCR would house CDP's Center for Safe Neighborhoods which encourages collaboration between law enforcement and community residents and would include the local Weed and Seed office and aspects of law enforcement. CCR would also house CDP's Center for Social Enterprise which trains nonprofits how to develop for-profit microenterprise businesses as an ongoing source of revenue for the nonprofit</p> | Community Development Professionals, LLC | 100 | 31 to 90 days | \$500,000 |
| Butler | APPRENTICESHIP PROGRAM | <p>PHASE 1: PARTING FOR CURRENT ON SITE EQUIPMENT AND ADDITIONAL ATTACHMENTS PHASE 2: HIRE STUDENTS FROM D. RUSSEL LEE FOR APPRENTICESHIP PROGRAM OF TEACHING MACHINING OF MILITARY BALLASTIC MATERIALS AND OTHER HARD TO MACHINE ITEMS. WE CURRENTLY MACHINE BALLISTIC MATERIALS FOR THE MILITARY.</p> | R.L. CUSTOM MACHINING, INC. | 15 | 0 to 30 days | \$905,123 |
| Butler | energystar | <p>ALLOW HOME BUYERS TO INSTALL ENERGY EFF. APPLIANCES TO THEIR HOMES. FURNANCES, WATER HEATERS, INSULATION, WINDOWS, DOORS.</p> | VILLA MORTGAGE INC | 10 | 31 to 90 days | \$850,000 |

| Butler | Police Officers, Community Servants | ***This is a correction from a previously submitted form*** Our community is in need of three additional police officers to enhance the police services they want and deserve. One officer would serve our community as a full-time community resources officer to proactively engage the community through educational venues. The second officer would serve the community as an Investigator full-time to follow-up on crimes to enhance our solvability rate for citizens. The third officer would serve the community by working the road during peak call volumes full-time to better respond to the needs of the public. Woman who were and are being sexually harassed on the job. My case is on nie Deters Vs Koca Tenn. My case ended up in the Appeals court in Cincinnati, Ohio. I had 2 Bush appointed judges and 1 Democrat. The judges found that Yes I was sexually harassed, but that I waited too long to turn him in. How long is too long when you need a job and don't realize the damage being done to you, until you break? | Trenton Police Division | 3 | 31 to 90 days | \$691,587 |
| Butler | crimes aganist woman | I need money to pay off my credit cards that I lived off of for a year and a half until I found another job. I also owe my attorneys for trying to help me. I had nothing up for myself but only ended up in debt. This company continued to let people harass women. There is now an active case in Kansas. When will this happen? I hope there is help for me, so I can retire someday. Thank you. | Debrae Deters victim of a crime | 1 | 0 to 30 days | \$30,000 |
| Butler | Meals on Wheels Fleet Replacement | Debrae Deters Partners in Prime, a non-profit multipurpose social service agency serving older adults throughout southern Butler County, cooks, packages and delivers more than 600 Meals on Wheels each weekday across a 640 square mile section of our county. Currently our fleet is a mixture of vehicles received via the Older Americans Act and employee owned vehicles. Our newest agency vehicle is a 2004 with moderately high mileage, like all in our fleet. Repair costs are high and gas mileage is poor. We also use donated used vehicles. We propose to purchase a fleet of 15 new passenger vehicles, preferably American made such as a Chevrolet Tahoe. The estimated cost of \$18,000 each. As members of Meals on Wheels of America, we are eligible to receive a fleet purchase discount that has not been included in our price estimate. Our operating costs would be reduced and new vehicles would have a life expectancy of at least 10 years. A side benefit is that a fleet of like vehicles would also offer fleet marketing to our community service program. | Partners in Prime | 15 | 31 to 90 days | \$270,000 |
| Butler | EE Renovations for West Chester prime club | Current West Chester OH library, owned by the township trustees, will be reworked into a multi-purpose all-generations community clubhouse that will house the prime club (senior center), operated by non-profit Partners in Prime, an organization with 55 years experience in serving local older adults, as the primary and operating occupant. New library is under construction for occupancy in late third quarter CV2009. Its current vaulted ceiling and open design of space requires upgraded sewer line, expanded restroom facilities, room separation that accommodates the building's current eight curved HVAC ducts, addition of a food-prep kitchen, and increased natural lighting and handicap accessibility. | Partners in Prime | 12 | 181 days or more | \$2,250,000 |
| Butler | Helping Youth Bridge International Divides | West Chester Township and Partners in Prime have 15 year history of public-private cooperative work to serve the area's older adults. A long-term friendly lease is being created for Partners to operate and improve the building, with some supplementary operating subsidy provided via the township. Changes will include others, who to consider the immediate ownership. and cultural barriers. Adding an education director, resource development and clerical staff, will increase interaction with public and private K-12 schools serving "at risk" to "gifted" students. MI has provided students contact with people from different countries and ethnic backgrounds on a yearly basis since 1981. Programs include resources for educators, sharing international experts, performing & visual artists and others, tours of exhibits, and international student exchanges with online conferencing to the guest country. With additional staff, international education projects that reach 60 schools can be expanded, others added. The resource development person will focus on securing long term funding to sustain the program. Global issues matter more now than ever and statistics indicate that U.S. schools are not sufficiently preparing students to effectively function in an increasingly interdependent world. MI history qualifies it to provide this international link. Funding additional staff will significantly aid in its commitment to reach students throughout Southwest Ohio | Middfest International Foundation | 3 | 31 to 90 days | \$100,000 |
| Butler | Barnitz Stadium | Keep a legacy alive. The Barnitz family leased to the school district, free of charge, for ninety-nine years, more than eight acres of land behind Rosa Parks Elementary School on South Main St., for a stadium. The stadium opened in 1950. | Butler | Atrium/ABLE Education Project | Education (ABLE) on the site of Atrium Medical Center. The current program offers GED, Medical Terminology and computer skills for all existing and prospective employees as well as members of the community. This new program would assess the math, reading and language skills of any employee who has a GED/high school diploma and wants to apply for tuition assistance to further their education in the medical field. If testing indicates remediation is needed to strengthen skills in order to be successful in medical training, the ABLE instructor will work with those employees prior to their admittance to Miami University, Cincinnati State or Sinclair College before receiving tuition reimbursement. This project would also fulfill the hiring needs of the Atrium in the fields of Respiratory, nursing, lab techs and many other hospital positions. In addition, new jobs would be created by replacing the current employees' former positions as they move into professional positions in the workforce. | Middletown City Schools ABLE Program | 60 | 181 days or more | \$75,000 |
| Butler | Facilities Support | The district is rapidly growing. We are out of space for children and learning. We currently house our PreK-2 grade students in a very old building and in 10 year old modular units. The environment is not conducive to 21st century education. The district has little hope of passing a bond levy, but the stimulus money could show good faith on our part in trying to secure alternate funding. A new preK-4 building is needed to house approximately 1300 students. The technology could also be increased for these children in a new facility. Currently, the technology is very limited. | Monroe Local Schools | 35 | 91 to 180 days | \$15,000,000 |
| Butler | Demolition of LMHS | Lemon Monroe High School must be abated and demolished. This building is an eye sore and a problem for the community and school system. Costs continue to soar in this abandoned building due to vandalism and energy heating. The money would be used to abate and demolish the structure and return the land to a natural state. | Monroe Local Schools | 35 | 91 to 180 days | \$2,000,000 |
| Butler | Technology for All | THE DISTRICT PURCHASES SMART BOARDS FOR EVERY CLASSROOM. THE SMART BOARDS WOULD BE USED TO purchase SMART boards and projectors for every classroom. This equipment would enable the teacher to enhance classroom instruction through a more engaging, interactive venue. It would enable students to learn through interactive technologies, the district would also like to purchase Mimeo's for each teacher. With this additional technology 21st century skills can be taught more effectively and efficiently. | Monroe Local Schools | 15 | 31 to 90 days | \$200,000 |
| Butler | Sign Shop | Open new sign shop to help small business advertise and create and keep businesses running in Ohio. Money goes toward building, equipment, and payroll. | Type R media | 5 | 0 to 30 days | \$20,000 |
| Butler | Out of School Time Learning Opportunities Project | The Middletown City School District and the City of Middletown have agreed to partner in a citywide approach to build and sustain Out-of-School Time (OST) learning opportunities for all of Middletown's youth. Middletown City School District is a low-income community with a free and reduced lunch rate 68 percent, and growing. In accordance with the Wallace Foundation's research, we envision a quality program with: Committed leadership including top political, school, community leaders; Public coordinating entities to manage the development of plans, build citywide attention and support for OST; Multi-year planning to set goals and priorities, develop ways to hold key players accountable for results; Reliable information to document the needs and wishes of parents and children, track participation and identify underserved neighborhoods and families; Expanding participation to reach more children and ensure that they attend often enough to benefit; and A commitment to quality. Evidence shows that youth from lower income families are less likely to have opportunities to participate in wholesome activities after school. | Middletown City School District | 5 | 31 to 90 days | \$100,000,000 |
| Butler | Kidz-n-Character Program | Kidz-n-Character is an after-school character education drama program that, in partnership with the schools, uses the creative and performing arts as an educational and experiential tool to develop assets, self-esteem and empowerment in youth. Kidz-n-Character positively impacts 31 of the 40 developmental assets (Search Institute), thereby decreasing the likelihood these youth will engage in high risk behaviors and become at risk for violence, delinquency and other problems. This is accomplished while the kids participate in various art forms including drama, music, puppetry, dance and fine arts. This maintains their interest and excitement in participating while strengthening their abilities, character and confidence. The youth also participate in community service and volunteer activities. Kidz-n-Character has served over 200 youth directly and entertained/educated audiences in excess of 3000 over the past 4 years and hopes to expand to new locations. Funding has been provided in the past by Ohio Dept. of Youth Services, Ohio Dept. of Drug and Alcohol Addiction Services, Hamilton County, and Middletown City School District. | The Alcohol and Chemical Abuse Council | 5 | 0 to 30 days | \$65,000 |
| Butler | Family Anger Management & Life Skills Program | The Family Anger Management & Life Skills Program addresses issues related to anger, violence, conflict and other risk factors for youth (ages 12-18) and their parents. The majority of youth are referred by our collaborating partners, the Butler County Juvenile Court and various school districts. The Family Anger Management Program provides education and mediation services as an early intervention to teens dealing with anger management/life skills problems and their families. This program builds skills and relationships that prevent substance abuse, violence and other associated high risk behaviors. Problems with anger are associated with family conflict, violence, crime, and abuse and neglect. The service combines an education/life skills series concluding with a family mediation and follow-up. A small fee is charged to the family for enhanced commitment. The local United Way is also a partner which fiscally supports this concept of service delivery to intervene at earlier junctures to impede further disruption to the child, family and society. | Alcohol & Chemical Abuse Council | 3 | 0 to 30 days | \$26,000 |
| Butler | Manchester Building | Replace roof on main school building at Manchester Building. This will improve school environment. | Middletown City School District | 20 | 0 to 30 days | \$500,000 |
| Butler | Barnitz Stadium | THIS IS A CORRECTION TO A PREVIOUSLY SUBMITTED REQUEST. Keep a legacy alive. The Barnitz family leased to the school district, free of charge, for ninety nine years, more than eight acres of land behind Ross Parks Elementary School on South Main St., for a stadium. The stadium opened in 1950. The property is in need of repair: field, press box, scoreboard & lights, seating, etc. | Middletown City School District | 50 | 91 to 180 days | \$8,500,000 |
| Butler | Measuring sustainability | Note: The subprogram falls "other" was not an option, so Education Technology was chosen. This does not affect Education Technology. This proposal provides a proof of concepts for an energy efficiency and waste reduction measurement and prioritization system. By leveraging existing assets and talent within the University System, this pilot will create a scalable model to assist the State of Ohio in becoming a leading force in sustainability education and operations. This project will: * Pilot an energy efficiency and waste reduction system at one urban and one rural university * Create a foundation of baseline carbon, energy and waste, scalable for use across the state * Utilize proven tools and methods to prioritize investments and measure outcomes in a consistent manner (e.g. build a database of academic buildings with initial energy and waste metrics, capture assessment and estimated savings from EE projects and measure results via smart meters and related infrastructure. The net outcome will be a fact-based before-and-after model of EE projects across the system.) * Establish a student co-op program to cascade sustainability education, assist with pilot and related activities and cultivate top talent for the State's sustainability investments | Attevo, Inc. | 15 | 0 to 30 days | \$899,000 |

|----------------|---|--|---|----------------|--------------------|---------------------------|
| Butler | Technology Training Center for Staff and Community | I am writing to request the consideration of funding a new building project for a Staff Development/Community Technology Center. This facility would be built on the current grounds of our high school facility. This facility would house staff training opportunities, state-of-the-art technology equipment, offices for our technology department, and a server room. The space would also be used to hold community training seminars, GED classes and tests, as well as focus on educating the community as a whole during non-school hours. This type of center could become the epicenter of a community such as the City of Fairfield and allow for our community to have an opportunity to enhance their educational background and open doors for them that have not previously been available. This proposal is supported by the idea of improving the community as a whole and maximizing the opportunities available for an entire community. Respectfully submitted, Chad Lewis Business Director Fairfield City School District | Fairfield City School District | 50 | 91 to 180 days | \$5,000,000 |
| Butler | Central Air Conditioning for All Buildings | The request/project is to place central air conditioning in 6 buildings that currently do not have air conditioning. This process will need to be completed in order to meet the guidelines of adding additional days to the school year and having school closer to a year round option. This will also improve the air quality and the learning environment for students during the warmer months of the year. I respectfully submit this request to be considered for the use of stimulus money to provide our district necessary upgrades to move towards adding days to our school year. Sincerely, Chad Lewis Business Director Fairfield City School District | Fairfield City School District | 10 | 91 to 180 days | \$12,000,000 |
| Butler | Green Roof Demonstration Project | The City of Hamilton is seeking federal support to put a "green" roof on the building housing the BizTech entrepreneurial center. This project includes a photovoltaic (solar) roof and a vegetative roof. Green roofs have become popular because they are friendly to the environment. A vegetative roof is eco-friendly because the vegetation on the roof converts carbon dioxide into oxygen, lessening the strain on the ozone layer. The vegetation also absorbs rainwater, reducing runoff and flooding. Vegetative roofs also increase insulation, increasing building energy efficiency and reducing power consumption and utility costs. The use of PV-generated power will reduce the BizTech building's dependence on fossil fuels and decrease its overall power bill. This will make more funding available to support the entrepreneurial activities of the tenant companies in the building. The vegetation will also absorb rainwater, reducing run-off and flooding. Finally, the project will provide educational opportunities for tenant companies and Hamilton-area students. | BizTech Center (City of Hamilton) | 1,000 | 31 to 90 days | \$650,000 |
| Butler | Conversion/Purchase of Natural Gas Vehicles (NGV's) | The City of Hamilton has owned and operated a natural gas distribution utility since 1890. The city is requesting funding to convert portions of our fleet to NGV's. This will include conversion of existing and purchasing new vehicles. A refueling station would be constructed for fueling city and potentially private vehicles. Carbon emissions will be reduced while providing an economical means of fueling the fleet. As the majority of natural gas is domestically produced, reliance of foreign produced oil would be reduced. Jobs would be created/retained for vehicle conversion/purchase. Fuel cost savings can be used for system improvements or other operational expenses. | City of Hamilton | 30 | 31 to 90 days | \$500,000 |
| Butler | The Algae Answer: Clean Energy (Hydrogen and Biodiesel) | Algae is currently the most efficient all around environmental solution and funds for this project will go towards the farming of algae for biodiesel production. Algae farming combats carbon emissions and treats wastewater simultaneously, while at the same time producing unmatched yields of oil per acre per year that can be used for biodiesel in a manner that is both cost efficient and time efficient while consuming land for food production at the same time, thus making it less environmentally invasive than other biodiesel solutions. Algae farming also produces Hydrogen in a manner that is less expensive than current electrolysis methods, and it also produces nutrient-rich livestock feed cheaply. Algae farming can currently combat more environmental threats while simultaneously offering more environmental solutions than any other biodiesel source. It cleans our ground water, wastewater, and air while utilizing significantly less area than traditional midwestern biodiesel crops like soybeans and corn, not to mention that pigs have successfully tested the algae biodiesel which could in turn ensure thousands of jobs at the Schenck and Dayton airports for years to come. The project description for One Way Farm Children's Home provides shelter for children, homeless, physically abused, counseling, medication, food, clothing, tutoring and education. The financial crisis has left One Way Farm Children's Home at a loss and is expected higher. February 2009 alone, was a \$20,000 loss. For children who have disabilities, they are MRDO, others have mental or abuse related mental health issues. | Clean Living through Energy Alternatives Now (C.L.A.N.) | 100 | 31 to 90 days | \$2,250,000 |
| Butler | Homeless Children Shelter and Psychiatric Care | We employ 30 individuals, provide health and life insurance. Many of our employees are single women with children and a limited education. The outcome of this program is to secure children who are homeless or abused and provide shelter, so that they may begin a life with dignity, and to keep those needy individuals employed. One Way Farm Children's Home was founded in 1976 and has cared for approximately 8,000 children. Licensed by Ohio Job and Family Services. Specialty services in mental health and education, children ages 6 to 18 and to 21, if the are mentally challenged. We feel at this point a stimulus package is vital to the survival of this children's home. Due to the loss of our contribution we've had to shut down our services. | One Way Farm of Fairfield, Inc. | 30 | 0 to 30 days | \$200,000 |
| Butler | 21st Century Digital Media at Edgewood | This project involves the continuation of two digital media programs at Edgewood High School that are in need of new computers and equipment. Specifically, a digital photography course and a video production lab that are seriously outdated but would cost far too much money to be dealt with locally from established funding. The project would include multiple computers, professional cameras and software. These courses are so important because many of the students taking these courses have used the knowledge and skills as a springboard into a career. We have two of the finest most creative staff, that we want to keep in our school district to teach these courses to our students. Thank you so much for your consideration of our project. | Edgewood City Schools | 2 | 31 to 90 days | \$150,000.00 |
| Butler | CASA Volunteer background check system | National Webcheck system which has a fingerprinting data system. We will use the computer/National Webcheck system to screen prospective volunteers who are being trained as CASA (Court Appointed Special Advocates) who will be assigned to advocate for a abused / neglected child crime victim in the court/ child protection systems. The current webcheck system we have was received in August 2001 and it is not up to date. The purchase of a new Cogent System National Webcheck system will allow us to ensure the safety and security of the abused children we serve by thoroughly checking the adults we train as CASA volunteers. The cost for computer webcheck system is approximately \$6,100. Cost to pay for background checks is approximately \$25 per volunteer and we estimate training 20 new CASA volunteers in 2009 for fingerprinting processing costs of \$500. 20 New CASA volunteers will advocate for approximately 60 additional child victims of crime. PARACHUTE had 68 active CASA volunteers in 2008 who advocated for 147 child victims of crime. Pro | PARACHUTE: Butler County CASA | 1 | 0 to 30 days | \$6,850.00 |

As the majority of natural gas is domestically produced, reliance of foreign produced oil would be reduced. Jobs would be created/retained for vehicle conversion/purchase. Fuel cost savings can be used for system improvements or other operational expenses. | City of Hamilton | 30 | 31 to 90 days | \$750,000.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Butler | Teen Dating Violence Prevention Program | One full time and 4 part time employees would be hired to expand the Teen Dating Violence Prevention Program. The project educates students 13-19 years old on what constitutes dating abuse, the warning signs and how to break free of an abusive relationship. Also provided are packets of materials to refer to for information and places to seek help. The program will also maintain a website for teens to visit for additional information and to receive help | CADV Citizens Against Domestic Violence | 5 | 0 to 30 days | 150,000 |
| Carroll | Stimulus Paving | 19.41 miles of highway paving | Carroll County Engineer's Office | 15 | 31 to 90 days | \$2,130,000 |
| Carroll | Dist 11, PID 85711, CAR 2 modified minivans | Purchase 2 modified minivans for the Carroll County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$66,000 |
| Carroll | Elevate County Road #20 (Avalon Road) Above the fl | Elevate Avalon Road approximately 3' from its intersection with Bedrock Road south 4000 feet to the last residence. In doing so it would eliminate the 10 plus homes from becoming stranded without access to their property, fire protection and emergency medical treatment | Carroll County Engineer's Office | 10 | 31 to 90 days | \$500,000 |
| Carroll | 2009 Guardrail Program | Install 20,000 linear feet of guardrail along existing county highways. | Carroll County Engineer's Office | 15 | 31 to 90 days | \$400,000 |
| Carroll | Dist 11, PID 85710, CAR Purchase 2 computers | Purchase 2 computers for the Carroll County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$2,000 |
| Carroll | Dist 11, PID 85948, CAR 1 copier | 1 copier for the Board of Carroll County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$5,000 |
| Carroll | Dist 11, PID 85709, CAR Facility engineer & design | Facility engineering and design for the Carroll County Commissioners | Ohio Department of Transportation | 3 | 31 to 90 days | \$150,000 |
| Carroll | Dist 11, PID 85949, CAR Facility construction | Facility construction for the Board of Carroll County Commissioners | Ohio Department of Transportation | 24 | 31 to 90 days | \$1,200,000 |
| Carroll | Dist 11, PID 84165, CAR SR 183 0.000 | General System Resurfacing | Ohio Department of Transportation | 17.4 | 31 to 90 days | \$605,230 |
| Carroll | Dist 11, PID 85422, Ohi-Rail Piney Fork Ln/Minerv | Ohi-Rail Piney Fork Line & Minerva Yard Rehabilitation | Ohio Department of Transportation | 14.4 | 31 to 90 days | \$500,000 |
| Carroll | Dist 11, PID 84914, CAR SR 9 15.820 | General System Preventive Maintenance - 87 Pm Chip Sea | Ohio Department of Transportation | 20.6 | 31 to 90 days | \$717,600 |
| Carroll | Salt Storage Bin | PROJECT DESCRIPTION Construct a 55' x 88' salt storage bin. Approved plans have been completed and approved and the project is ready to bid. Construction could begin within 30 to 90 days. When rain and snow freeze, a highway can quickly become unsafe for motorists. Having immediate access to a dry salt supply can save lives. By keeping our salt covered we are ready for quick deployment. Also, covering our salt would help protect it from dissolving from the rain water and consequently running into our streams and lakes, an ongoing environmental issue on all our minds. General System Resurfacing | Carroll County Engineer's Office | 5 | 31 to 90 days | \$250,000 |
| Carroll | Dist 11, PID 84163, CAR SR 39 23.410 | General System Resurfacing | Ohio Department of Transportation | 42.7 | 31 to 90 days | \$1,486,660 |
| Carroll | Carroll County centerline striping | PROJECT DESCRIPTION 307 miles of centerline striping. | Carroll County Engineer's Office | 8 | 0 to 30 days | \$300,000 |
| Carroll | Carroll County Rail | This project involves a 26 mile stretch of railroad that is in need of repair. Several business along this route are affected and would like to be able to begin using it again. One business will be lost if the rail isn't repaired, Heritage Plastics. The Ohio Rail Commission has committed \$250,000 and the owner of the rail line, Wheeling & Lake Erie has also committed \$250,000. | Ohio Regional Development Corp. | 73 | 0 to 30 days | \$500,000 |
| Carroll | Carroll County Commerce Park | The County would like to expand the current wastewater system and construct a new water system to accommodate an area with a nursing home, a school, and would like to turn this area into a commerce park. There would be approximately 425 users of this site, and 250 jobs created/retained | Ohio Regional Development Corp. | 250 | 31 to 90 days | \$500,000 |
| Carroll | Atwood Sewer District | The Atwood Regional Water and Sewer District needs to make several repairs to its collection system that would improve the water quality of the Atwood Lake and surrounding areas. These improvements would also reduce operation and maintenance costs of the system and allow future rate increases to be minimized. | Ohio Regional Development Corp. | 0 | 31 to 90 days | \$700,000 |
| Carroll | South Lisbon Waterline Project | The water line services the Carroll County Industrial Park, which currently houses several corporations with 150 employees. 1560 Linear Foot of 10" Water line 615 Linear foot of 6" water line All appliances and equipment associated with the installation of the line | Village of Carrollton | 150 | 0 to 30 days | \$100,000 |
| Carroll | Fire Engine Replacement | Purchase of a new Class A fire engine for the Car | Village of Carrollton | 0 | 181 days or more | \$300,000 |
| Carroll | Street Improvements | The following streets to be reconstructed: Lincoln Ave, Moody Ave., and Crest Street, to include new water, sanitary sewer, storm sewer lines and new curbs with sidewalks. 16200 l.f. of storm sewer lines 2740 L.F. of Water lines 3100 L.F. of Sanitary Sewer Lines 11000 L.F. of Curb and Gutter 44100 Sq Ft of Side Walk 14000 Cub Yds of Asphalt | Village of Carrollton | 85 | 31 to 90 days | \$2,000,000 |
| Carroll | Water Tank Replacement Project | Replace two existing water reservoirs in the village of Carrollton water system. Currently, the one tank was deemed in violation of the OEPA regulations. The second facility has had major repairs in the last few years. We are the sole water sources for the community and need to replace the tanks. Tank #1 400K G Tank \$400000 Tank #2 300K G Tank \$310,000 1500 L.F. of Water line \$67500 Other gate valves and necessary equipment including a float system \$745000. | Village of Carrollton | 700 | 31 to 90 days | \$1,500,000 |
| Carroll | Sewer Line Project | Replace and install 750 feet of sewer line on High Street | Village of Carrollton | 25 | 31 to 90 days | \$60,000 |
| Carroll | Carroll County Commerce Park Water Line Repalcemen | Replace the existing water line currently servicing the Carroll County Commercial Park. The construction includes: 6400 L.F. of 12 in water line 150 G.Pm. Booster station 200K Gallon water storage Tank | Village of Carrollton | 250 | 181 days or more | \$1,423,000 |
| Carroll | Carroll County Commerce Park Water Line Repalcemen | Install 2700 L.F. of force sewer main Install 1800 L.F. of Lateral Sewer Lines Install 7800 L.F. of gravity sewer line Install 2 sewer lift stations This will ensure the future development of the commerce park area and will address all future infrastructure needs. This will also encourage development by making the properties shovel ready. | Village of Carrollton | 200 | 181 days or more | \$1,300,000 |
| Carroll | Fire Engine Replacement | Purchase of a new Class A fire engine for the Carrollton Fire Department. The existing engine is non compliant with NFPA rules and is unsafe to operate in the event of a conflagration. The purchase of the new engine will ensure that lives and property are preserved in and around the village of Carrollton. | Village of Carrollton | 0 | 181 days or more | \$300,000 |
| Carroll | Traffic Signal Replacement | Installation of new energy efficient LED traffic signals with integrated traffic demand devices to reduce traffic idling and fuel waste. With the installation of 4 new traffic signals, the village can place the signals on a traffic demand change rather than the current time. This will reduce the traffic idling and reduce fuel costs for consumers. The new energy efficient lights will reduce energy demands and reduce overall maintenance costs to the municipality. The new signals will also provide a public safety benefit with new cross walk signals and emergency vehicle changing devices to allow emergency traffic to have the right of way. | Village of Carrollton | 0 | 91 to 180 days | \$800,000 |
| Carroll | Leesville Wastewater System | The project includes the construction of a sanitary sewer system to serve the Village of Leesville. The village currently has 85% failing septic systems. Construction will include a 20,000 gallon per day packaged wastewater treatment plant, 13,500 linear feet of 8" gravity sewer line, 1,500 linear feet of 6" sewer laterals, 40 manholes, and 1,350 linear feet of storm sewer pipe | Engineering Associates, Inc. | 20 | 181 days or more | \$800,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Carroll | Competitive Facility Upgrade | Update and upgrade manufacturing facility to improve competitiveness to retain and create jobs manufacturing leaf and litter collection, recycling equipment and sewer cleaners primarily sold to municipalities. Funds would be used for new or used equipment purchases, factory renovations and training of existing workforce and hiring and training of additional workforce. | American Road Machinery, Inc. | 30 | 31 to 90 days | \$1,500,000 |
| Carroll | Carrollton Schools | Our project would include the construction of a new middle secondary high school housing for 1,400 students. The building would follow the master plan submitted to OSFC - approximately 175,000 sq. ft. We are a poor, rural appalachian county struggling to survive in these tough economic times. We desperately need new facilities since some of them date back to the 1800's. Not only would this project serve the students, it would serve as a stimulus package for all of Carroll County. We have secured the land, the master plan, the architects and the construction management firm...we just need the money. | Carrollton Exempted Village School District | 275 | 31 to 90 days | \$17,100,000 |
| Carroll | Replacement of Vehicle Storage Garage | Brown Township Board of Trustees desires to save taxpayers' money and further mitigate problems associated with the main storage building for all road vehicles, equipment, tools, and supplies. Brown Township desires to replace their only storage garage that is in excess of fifty (50) years of age. The current building is a huge financial drain due to an inadequate heating system, no insulation and openings in the walls. Monthly heating bills for this aged building costs close to \$1000 monthly. The roof constantly leaks onto vehicles and floors. Foundation is eroded due to the extreme weather leaks, and no heat. Brown Township employees shall be responsible for the demolition and removal of current building. Brown Township simply does not have sufficient revenue to replace this building. The tax base in this Appalachian region is low and improvement levies are not passed by the voters. Brown Township is in a flood zone and current mitigation efforts and continual flooding have taxed their resources to the limits. | Brown Township Board of Trustees | 12 | 0 to 30 days | \$191,729 |
| Carroll | Brown Township Flood Mitigation Project | project area is in a flood plain. The proposed project and requested funds is for the mitigation of up to 30 residences out of the flood zone. The remaining structures will be razed, debris removed with remaining land being turned into a restricted green space. Desired outcome is to have homes relocated into safe sanitary housing, land turned into green space, and the Township as well as public safety services, the County, and the public will no longer expending funds in an area that will continue to flood. The project includes partnerships with the FEMA, Ohio EMA, Carroll County EMA Director, Carroll County Flood Plain Manager, and the Carroll County Commissioners. However, due to the low income level funding for this project can not come from the Brown Township budget. Brown Township has been working diligently since 2004 on this project. As of March 5, 2008 flooding that displaced residents occurred. Finding financial support continues to be a major obstacle. Good intentions are great, however funding is a necessity to complete this ongoing project. | Brown Township Board of Trustees | 15 | 0 to 30 days | \$1,250,000 |
| Carroll | West Main St. Water line Project | To replace old water lines and to tie in existing lines to eliminate stagnant water | Village of Malvern Water Department | 1 | 181 days or more | \$200,000 |
| Carroll | Cherry Ave. Water line project | To replace old water lines and to tie in existing lines to eliminate stagnant water | Village of Malvern Water Department | 1 | 181 days or more | \$200,000 |
| Carroll | Bridge St. Water line project | To Replace old water lines and to tie in dead end lines to eliminate stagnant water. To replace storm sewer lines. | Village of Malvern Water Department | 1 | 181 days or more | \$200,000 |
| Carroll | Bridge St. Water line project | To Replace old water lines and to tie in dead end lines to eliminate stagnant water. To replace storm sewer lines. | Village of Malvern Water Department | 1 | 181 days or more | \$200,000 |
| Carroll | Carroll County Rail | The County in conjunction with the Wheeling Lake Erie Railway will repair a 26 mile portion track. This line is the main rail route into the center of the County. This line serves four of the Carroll Counties largest industries. The potential is there for further industrial expansion along this 26 mile corridor. | Carroll County Economic Development/Chamber | 73 | 91 to 180 days | \$1,000,000 |
| Carroll | Carroll County Commerce Park Expansion | The replacement and expansion of our current waste water system, the installation of two wells and a new water treatment plant at the County Commerce Park will allow for further Industrial Park Development. The systems will serve an existing nursing home and allow for future expansion for a county annex building, transit station, engineers department and the inclusion of an existing animal shelter and MRDD School Complex. The development has the potential to serve 303 individuals at this site. The construction, engineering and related costs are estimated and based on historical costs and knowledge of projects of this type. | Carroll County Economic Development/Chamber | 150 | 181 days or more | \$1,000,000 |
| Carroll | Carroll County Broadband | This project is a public/private partnership involving a information technology firm, local electrical coop and County Governments to roll out broadband internet service to rural customers. The intent is to serve five Appalachia Counties, who are currently served by Carroll Electric Coop, using existing power lines as a conduit for a regional internet network. | Carroll County Economic Development/Chamber | 30 | 181 days or more | \$5,000,000 |
| Carroll | Atwood Sewer District | This is a joint project that will serve residents in sections of Carroll and Tuscarawas County. Estimated population served include 1180 residents 65 commercial with a residential equivalent of 1810 and 3300 seasonal residents. Public repairs in Carroll County are estimated at \$418,900 and include rehab or replacement of 68 manholes, rehab 740 LF gravity pipe and repairing 19 Lateral connections. In Tuscarawas repairs/rehab include 6 manholes and 2 lateral connections totaling \$14,300. Private repairs for Carroll County are estimated at \$248,200; Tuscarawas County at \$18,400. The scope of work includes lateral rehab and the removal of clean water connections, roof, area and foundation drains. In order to accommodate high flows at the treatment plant the project includes the construction of a 600,000 gallon flow equalization basin at estimated cost of \$1,679,400. | Carroll County Economic Development/Chamber | 6 | 181 days or more | \$2,380,300 |
| Carroll | Micro Biological Lab for Carroll County (Drinking Water SRF) | To provide a local Micro Lab for Carroll County to provide a service for the Health Dept. and everyone in the area. We would need to purchase \$15,000.00 in equipment for the lab and we would provide the service. We would purchase this equipment from 3 possible sources, Fisher, Hawk or Bluebook, whoever gives us the best price. We need to buy an auto claw, M.F. funnels, rinse bottles, Di water System, and misc. equipment. The lab would be run by DeeDee Wise and myself (Jim Bates) | Village of Malvern Water Department | 2 | 181 days or more | \$15,000 |
| Carroll | Brown Township Road Improvement Project | Brown Township is located in rural Appalachian Ohio. Brown Township suffers from extremely low tax revenues. The project is to grade and pave approximately fifty (50) miles of Township Roads. Brown Township bandaids pot holes on a continuous basis. The roads are repeatedly faced with deterioration due to harsh winters and even worse is the continual flooding. Brown Township is currently in the middle of a flood mitigation project dealing with the low income residents of the area. Everytime it floods the roads erode further. The most recent flood was March 5, 2008. Ninety percent of the roads have never been paved. Brown Township needs assistance the maintenance of the roads. Flooding and daily expenses simply does not leave any "extra" funds | Brown Township Board of Trustees | 12 | 0 to 30 days | \$6,750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Carroll | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Carroll | Carroll County Interoperable Communication System | Carroll County Interoperable Communication System, for all first responders and law enforcement in our county. To date Carroll County is working on an out dated Low band system. We are currently building out a MARCS 800mhz trunked system for law enforcement at a cost of \$977,000.00 dollars. Five fire departments in the county have built a UHF System that will gateway to the MARCS System at a cost of \$185,000.00. The reason for the dual system is there is no paging permitted on the 800mhz band per the FCC and all of our fire departments are volunteer working on little to no budgets there for can not afford the user fees charged by MARCS. We are requesting funding to complete our system. \$451,898.00 dollars will complete the UHF System and \$350,000.00 will allow us to put a CAD System in our county dispatch center. The total amount we are requesting is \$801,898.00 this will give added safety to all first responders and law enforcement personnel in the county making us P-25 complaint giving Carroll County interoperability statewide. | Carroll County EMA and Homeland Security | 2 | 0 to 30 days | \$801,898 |
| Carroll | FARM-Family Agriculture Reaching Many | Retain and expand small family farm for continued feeding of local families at a reasonable cost currently on the list where the state would pay for 65% of the project and we need to support 35%. We will never pass a bond issue in this county. We have not passed a levy to increase money for our district since 1977. Can the state of Ohio help us in any way? Our youngest building was built in 1959. Our middle school and elementary buildings are 70-80 years old. We need new buildings for our district. On the final application I will supply you with all of the details you would need to make a good decision. We need this for our children. | Abbott Farms | 4 | 0 to 30 days | \$20,000 |
| Carroll | Carrollton Schools - Building Project | Mark Spears go back to nursing school to benefit my income to take care of family and pay the bills and get a reliable car. | Carrollton Schools | 80 | 181 days or more | \$14,000,000 |
| Carroll | schooling | replace deteriorated railroad grade crossing in downtown Minerva, OH, (Market Street / SR 183) improve safety and transportation | back to school | 2 | 0 to 30 days | \$20,000 |
| Carroll | Railroad Grade Crossing Market St Minerva | Replace a deteriorated railroad grade crossing on a busy county road. The railroad crossing is on track owned by the State of Ohio. | Oh-Rail Corporation | 6 | 31 to 90 days | \$89,000 |
| Carroll | Railroad Grade Crossing Arbor Road | Replace a deteriorated railroad crossing on Bay Road. The crossing will be replaced with a new timber surface replacing the pot-holed asphalt. The crossing is located on track owned by the State of Ohio. | Oh-Rail Corporation | 6 | 31 to 90 days | \$79,000 |
| Carroll | Railroad Grade Crossing Bay Road | Harvest spring water that flows naturally, and continuously, by building a containment basin. In a structure built for the purpose, test and treat the water harvested to ensure water is safe for drinking. In the same structure, the water will be bottled for local distribution, at minimal cost to the many local residents who suffer with poor, unsafe or an inadequate water well; and sell the remainder at market price for profit to keep the business going | James and Marlene Pikus | 6 | 91 to 180 days | \$150,000 |
| Carroll | CAR Capitalized maintenance | 2009 Capitalized Maintenance; This is a rural transit project whose funding flows through the Ohio Department of Transportation. | The Ohio Department of Transportation | 1 | 0 to 30 days | \$16,150 |
| Carroll | Atwood Resort Improvements | Atwood Resort and Conference Center is the second largest employer in Carroll County, a designated Appalachian Ohio county. The facility is owned by the Muskingum Watershed Conservancy District, a political subdivision of the State of Ohio. The facility employs over 100, and is in desperate need of upgrades to remain a viable operation in order to retain these jobs. Closing the Resort and the elimination of these jobs is now being seriously considered. If funding was available to upgrade the facility, we feel that the operation can continue, thereby saving jobs and even potentially, creating jobs. We are also in serious negotiations with Kent State Tuscarawas, who would operate the Resort for educational purposes under a lease agreement. The project entails the replacement of all mattresses, case goods, and televisions in the facility's 105 rooms, the repair and extension of the golf course cart paths, and the renovation of all 105 bathrooms. We believe this will keep the Resort marketable and retain this important source of employment | Muskingum Watershed Conservancy District | 100 | 31 to 90 days | \$1,153,000 |
| Carroll | Atwood Water Tower | The Muskingum Watershed Conservancy District is a political subdivision of the State of Ohio, managing over 50,000 acres of public lands and waters in 18 Ohio counties. Atwood Lake, in Tuscarawas and Carroll counties is one such area. Atwood Resort and Conference Center is a Muskingum Watershed Facility, and one of the largest employers in Carroll County, a designated Ohio Appalachian County, with relatively high levels of unemployment. The facility's water tower is in need of repair and re-painting - this project would entail this much-needed maintenance. The newly repaired and painted water tower will be an integral part of the facility's water system, which plays a role in the Resort and Conference Center's viability, and ability to remain open and provide employment to over a hundred area residents, a significant number in this Appalachian county. | Muskingum Watershed Conservancy District | 5 | 31 to 90 days | \$200,000 |
| Carroll | Atwood Water Treatment Plant | The Muskingum Watershed Conservancy District, a political subdivision of the State of Ohio, operates Atwood Lake Park and Atwood Resort in Carroll County. These two facilities currently receive drinking water from two older treatment plants. A design for a new, single treatment plant has been completed, including bid specifications. It is certainly "shovel ready". This water treatment plant, will supply water for the two facilities, and is scalable to be able to supply water to the surrounding area, an area currently with no public water system. This new plant, could become part of a regional water system. Atwood Regional Sewer District is in support of the project. This area is in Carroll County, a designated Ohio Appalachian county, with high levels of unemployment. The new plant could spur development in the area and could also help retain the operation of Atwood Resort, one of the largest employers in the county. | Muskingum Watershed Conservancy District | 100 | 31 to 90 days | \$3,817,500 |
| Carroll | Micro Biological Lab for Carroll County | To provide a local Micro Lab for Carroll County to provide a service for the Health Dept. and everyone in the area. We would need to purchase \$15,000.00 in equipment for the lab and we would provide the service. We would purchase this equipment from 3 possible sources, Fisher, Hawk or Bluebook whoever gives us the best price. We need to buy an auto clone, M.F. funnels, rinse bottles, DI water System, and misc. equipment. The lab would be run by DeeDee Wise and myself (Jim Bates) Carroll County EMA is seeking funds for a county hazmat truck. To date our county's hazmat team has been using a trailer with little to no room for equipment. Our county hazmat team is made up of volunteer firefighters from several county fire departments. There is no funding for the team in the county budget due to the present economy | Village of Malvern Water Department | 2 | 181 days or more | \$15,000 |
| Carroll | Haz-Mat Truck | | Carroll County EMA and Homeland Security | 3 | 31 to 90 days | \$119,672 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Carroll | Loudon Township Equipment Proposal | The Loudon Twp. VFD is in desperate need of new turnout gear to bring us into the standards set by the NFPA and with this proposal we can outfit our firefighters an help insure there safty and at the same time support the Ohio economy. The gear we are asking for is made in Dayton Ohio and we can help keep jobs in Ohio if awarded this request, an help insure that we return home to our families at the end of the day. We are a volunteer department with a high poverty level an we dont have the funding to beable to do this project without you help | Loudon Township Volunteer Fire Department | 20 | 0 to 30 days | \$38,943 |
| Carroll | Upgrade emergency relief shelter. | Our fire house has been designated as a limited emergency relief shelter by The American Red Cross. By limited we mean that there is no kitchen facilities and space is limited. The heating, ventilation, and air condition (HVAC) system is outdated and ine | Carroll County Volunteer Fire Department, Inc. | 50 | 0 to 30 days | \$297,500 |
| Carroll | Road equipment | Brown Township located in federally declared Appalachia Ohio suffers from a low tax base and residents will not pass any additional levies. Brown Township is middle of a major flood mitigation project and simply does not have any funds to improve or upgrade our road equipment. Current road equipment is not fuel or cost efficient | Brown Township Board of Trustees | 12 | 0 to 30 days | \$65,316 |
| Carroll | Road equipment | Brown Township is located in the federally designated Appalachian region of Ohio. Due to the low tax base, Brown Township has been forced to run their road vehicles for 30 or more years. Brown Township desires to purchas a truck and salt spreader. The winters are brutal to our 50 miles of unpaved miles. Brown Township desires to purchase equipment that is road worthy, reduce maintenance costs, and fuel efficient. | Brown Township Board of Trustees | 8 | 0 to 30 days | \$54,610 |
| Carroll | ADA Ramp | building. Currently there is no accessibility by those individuals who are confined to or mobility is limited to a wheelchair. Brown Township, located in the federally designated area of Appalachian Ohio suffers from an extremely low tax base. Brown Township is also located in a flood zone that has suffered annually since 2003 from floods. (The most recent being March 5, 2008). | Brown Township Board of Trustees | 5 | 0 to 30 days | \$9,990 |
| Carroll | concrete business | All this lends to the inability to designate funds from general fund for any "extra" projects. The public has used this 50 plus year old building for township meetings and meetings concerning the flooding. Brown Township simply does not have even this amount of money to ensure accessibility by all into the building. | private business | 20 | 91 to 180 days | \$200,000 |
| Carroll | Summit Glove Robotic Line | I am 40 yrs. old and unemployed, no security in the right now as far as things security goes, retirement security, I have no insurance, no savings account, would like to own my own home. I'm interested in stimulating our community and the economy by providing concrete services, which would also create jobs. Starting out with a few employees with the potential of growing into 3 or 4 crews of 6-8 men. To do so I will need a dump truck, skid loader, pickup truck and all necessary cement tools. I ran my own business in the past so I do have experience in business management. I have the determination to succeed. | Minerva Area Chamber of Commerce & Economic Dev | 25 | 91 to 180 days | \$1,800,000 |
| Carroll | OFFICE EFFICIENCY | Summit Glove is a \$6M local Minerva based company involved in manufacturing and distribution of gloves across numerous industries including steel; agriculture; medical etc. Most of the production of gloves occurs overseas including China; Malaysia, etc. This project is designed to construct a robotic line for production of gloves initially intended for the steel industry; using newly developed aramid fibers and polymers; thereby bringing back an industry back to Northeast Ohio which has been decimated by the industries transition to overseas operations. The companies current facility is capable to house this new robotic line and distribution requiring internal electrical and enviornmental modifications. The golve industry is estimated to be a \$100M industry which is currently dominated by overseas production. This project would return this expanding industry to Northeast Ohio and create an estimated 25 new manufacturing jobs | ROSEBERRY & BRINDLEY, CPA'S | 2 | 0 to 30 days | \$10,000 |
| Carroll | Loudon Twp Volunteer Fire Company | REPLACE INEFFICIENT WATER HEATER, INSTALL WIND TURBINE AND SOLAR PANELS ON ROOF. OBJECTIVE IS TO BRING ELECTRICAL CONSUMPTION TO ZERO. We need to improve our heating efficiency in the Fire House and are unable to fund this project. I would however assist in the jobs in our area all contractor bids were with in the State of Ohio which inturn means that we could keep the stimulus money in Ohio. Your consideration for this project would be greatly appreciated. | Loudon Twp. Volunteer Fire Company | 10 | 31 to 90 days | \$18,528 |
| Carroll | Building Appalachia | The business supplies building materials for repairs and new construction at reduced prices to community members living in the foothills of Appalachia. The owner is a 74 year old ex-Marine who has invested several hundred thousand dollars of personal money to buy inventory to serve the need of an impoverished area. Costs to consumers are kept well under retail prices as the current county unemployment rate is 13.4% and the median income is below the state average as well as the percentage of educated residents. The owner due to the current economic climate has been forced to lay off workers and will not be able to continue to provide these services to the community without relief. The business has extensive loans as profits margins have always been slight due to the business being more of a service than a profit making body. The owner has always donated heavily to community organizations as well. | Lincoln's & Things, Inc. | 5 | 0 to 30 days | \$100,000 |
| Champaign | Fulfillment Capability Enhancement | seen on HGTV's "Home Buyers" and at HBO's Golden Globe Awards party among other venues. Current economic conditions have significantly reduced traditional retail sales. Statements must develop the capability to work with internet e-tailers to survive the current downturn. Several e-tailers including Amazon.com, Overstock.com and Costco.com have approached the company to sell our products but we are not currently capable of drop shipping product to consumers. Funds are needed to purchase material handling equipment and supplies to drop ship high volumes of items along with photography and inventory to support e-tailers requirements. Jobs would be created through the facility upgrade and on-going fulfillment positions and retained by avoiding closing the business. The community has lost in excess of 500 jobs in the recent past and cannot afford additional losses. The city/county is soon to lose another major employer so it is expected that the city/county would give their full cooperation to the start of a new business through a project such as Restoration of existing structure, which will allow local growers to have a location to sell there product. | Statements Ltd. | 50 | 0 to 30 days | \$500,000 |
| Champaign | Market Community | Our county has lost most of our major companies, being a rural area this project would allow education of local food sources and how youth as well as adult to have a perment place to sell their product. It also would help to support local business to utilize space to sell there products. Also, by working with local schools and colleges to provide alternative sources of employment. At the same time it would help promote agri business in our county to have place to sell their products without the high cost of transportation associated with the food chain. By working with locals schools, it give more opportunity to give hands on knowledge of the field, it also, help in explaining just how the food chain works in this county. Also, it would lead traffic back into the downtown area and allow businesses to have added traffic flow through their businesses. | Champaign County Farmers' Market | 500 | 91 to 180 days | \$100,000 |
| Champaign | Dist 7, PID 85712, CHP Purchase 1 MMV | Purchase 1 modified minivan for the Champaign County Commissioners | Ohio Department of Transportation | 2 | 31 to 90 days | \$33,000 |
| Champaign | Dist 7, PID 85713, CHP Purchase 1 power washer | Purchase 1 power washer for the Champaign County Commissioners | Ohio Department of Transportation | 1 | 31 to 90 days | \$1,700 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Champaign | Plastic Recycling Operation | Damewood purchased the mill and is proposing to install a plastics grinding operation to recycle plastics for reuse in commercial applications. Project cost is estimated to be approximately \$500,000. Costs would include all equipment, with the largest expenses to purchase and install the grinder, reinstall the rail tracks and install material handling systems to move product to and from the grinder. Damewood would be a principle partner along with the Urbana/Champaign County community. Jobs would be created through the upgrade of the facility as well as through the new company started. The city will soon lose another major employer so it is expected that the city/county would give full cooperation to the start of new businesses through this project. This project also targets local requirements - a 2007 County economic summit identified the facilitation of jobs and investment growth and entrepreneur development as key focus areas. This project also fits a DDC targeted | Damewood Enterprises | 100 | 31 to 90 days | \$500,000 |
| Champaign | Infrastructure Transportation Services | Dingledine Trucking Co., Inc. is a certified Minority Business Enterprise (MBE) based in Urbana, OH providing transportation services. Dingledine plans to start providing transportation services in support of the pending infrastructure improvement projects including moving any materials related to the projects. Providing the new offering will require purchasing additional equipment including dump trucks and trailers, adding administrative and management personnel and also drivers. Dingledine would be a principle partner/sponsor as well as the Urbana/Champaign County community. The city/county is soon to lose another major employer so it is expected that the city/county would give their full cooperation to the start of a new business through a project such as this. In 2007, the Community Improvement Corporation conducted an economic summit. Of the several areas identified then and still of key interest today is the facilitation of jobs and investment growth as well as entrepreneur development. | Dingledine Trucking Co., Inc. | 30 | 0 to 30 days | \$500,000 |
| Champaign | Countywide communications | Countywide communications system for an law enforcement personnel to incuse car satpos, interface with the countywide dispatch center. Computers would allow units to conduct a portion of their work from the vehicles, these will also enhance the communication to the dispatch center and made information readily available to officers. In car cameras to provide additional enforcement capability and safety for officers, gps on cars so that first responders could be tracked on the Countywide 911 mapping system. | Champaign County Sheriff's Office | 0 | 91 to 180 days | \$100,000 |
| Champaign | Urbana-Bellefontaine Connector | Bellefontaine, passing through the Village of West Liberty on leased property of the West Central Ohio Port Authority. This project would be an extension of the Simon Kenton Trail which connects to over 200 miles of shared-use trails in southwest Ohio. These trails as well as this project would offer non-motorized transportation routes to schools, businesses, places of employment, parks, churches and residential neighborhoods. The trails also provide recreation, health and social interaction opportunities for all ages, races, cultures and economic groups. This project is designed to meet ADA accessibility standards. This project is supported by the cities of Urbana and Bellefontaine, The Village of West Liberty, The Champaign and Logan County Commissioners, state and federal representatives, the Logan Union Champaign Regional Planning Commission, local chambers of commerce and numerous businesses and community organizations. The project will retain jobs in the highway construction trades. | Simon Kenton Pathfinders | 30 | 91 to 180 days | \$2,500,000 |
| Champaign | Manufacturing and Distribution Company Incubator | A paper mill employing over 250 workers closed in 2006, leaving a huge hole in our local economy. Damewood purchased the mill and is proposing to renovate the structure, cordoning off sections to promote the growth and development of new general purpose manufacturing or distribution businesses. Project cost is estimated to be approximately \$300,000. Costs would include all materials, with the largest expenses to upgrade the electrical service, section off the space and add shipping doors and material handling equipment for a common warehouse area. Damewood would be a principle partner along with the Urbana/Champaign County community. Jobs would be created through the upgrade of the facility as well as through the new company(s) started. The city will soon lose another major employer so it is expected that the city/county would give full cooperation to the start of new businesses through this project. This project also targets local requirements - a 2007 County economic summit identified the facilitation of jobs and investment growth and entrepreneur development as key focus areas. This project also fits a DDC targeted | Damewood Enterprises | 100 | 31 to 90 days | \$300,000 |
| Champaign | Facility Upgrade | Sidewalk & Curb Replacement & Parking Lot Lighting Replacement | Champaign County Board MR/DD | 1 | 0 to 30 days | \$12,512 |
| Champaign | Window Replacement | Window Replacement of old windows @ preschool and adult workshop | Champaign County MR/DD | 1 | 0 to 30 days | \$23,086 |
| Champaign | Dist 7, PID 82780, CHP SR 559 6.91 | Bridge Replacement | Ohio Department of Transportation | 25 | 31 to 90 days | \$610,066 |
| Champaign | Dist 7, PID 19708, CHP SR 559 1.65 | Bridge Replacement | Ohio Department of Transportation | 25 | 31 to 90 days | \$486,326 |
| Champaign | Dist 7, PID 77492, CHP SR 55 11.70 | Resurface the existing roadway | Ohio Department of Transportation | 15.2 | 31 to 90 days | \$529,650 |
| Champaign | Dist 7, PID 77492, CHP SR 55 11.70 | Resurface the existing roadway | Ohio Department of Transportation | 15.2 | 31 to 90 days | \$529,650 |
| Champaign | Wastewater Screenings Removal System | A screenings removal system will clean the debris from our influent wastewater resulting in a cleaner treated effluent from our wastewater plant. This will help for a cleaner creek and a more efficient wastewater treatment plant. build a water treatment plant for iron/manganese removal. We have been passed by tor new business because of our water quality. This will allow us to be proactive in economic development. If we could be competitive with development then this will create even more building jobs as well as long term jobs for St. Paris. This will also give the opportunity for the Village to become financially independent. This is our goal. | Village of St. Paris | 2 | 91 to 180 days | \$600,000 |
| Champaign | Water Treatment Plant | Resurface the existing roadway | Village of St. Paris | 2 | 181 days or more | \$3,500,000 |
| Champaign | Dist 7, PID 77492, CHP SR 55 11.70 | Resurface the existing roadway | Ohio Department of Transportation | 15.2 | 31 to 90 days | \$529,650 |
| Champaign | Sewer Systems Improvements | Mechanical Bar Screen Sewer Rehab relocate outfall This project is being required by OEPA and help the Village continue to meet OEPA requirement | Village of Mechanicsburg | 50 | 91 to 180 days | \$400,000 |
| Champaign | US ROUTE 68 PROJECT | US Route 68 at Dallas Road and will end at SR 55 in Champaign County. Phase I of this project was completed on fall 2000 which terminated at Dallas Road. Current phase has been moved into Tier II projects in 2001. This project started in 1958 with the concept of connecting I-70 with US33. The project was halted in the late 1960s due to the concerns about potential impact on Cedar Bog in Champaign County. Relocation of the corridor around Cedar Bog set the stage for follow on Phases. \$ US Route 68 was designated as Macro-corridor in 2004 Access Ohio. 1.8 million Federal earmarked and \$1 million local funds committed to this project. This project will provide \$6.48 million annual savings on its estimated Travel Time Saving. More than 25 major employers in Urbana will be directly impacted with this project. Over 5800 jobs will be protected and ultimately will be retained. | Champaign County Engineer | 336 | 181 days or more | \$46,000,000 |
| Champaign | Driveway & Parking Lot Paving | Asphalt Cap of 2" driveway and parking lots at early childhood (preschool & early intervention) and adult workshop. | Champaign County Board of MRDD | 5 | 31 to 90 days | \$215,152 |
| Champaign | Micro Loan Fund | We are in the process of developing a micro loan fund to assist people in our local community who are not able to obtain needed credit. This program will involve financial management and budgeting training that we will provide. | First Baptist Church | 1 | 91 to 180 days | \$10,000 |
| Champaign | North Lewisburg Trunk Sewer extension | Extend 12" sewer line from manhole #5 to west corporate boundary. Taking pressure off of existing sewer lines and allowing for industrial growth on the west side of the Village of North Lewisburg | Village of North Lewisburg | 20 | 91 to 180 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Champaign | New Firehouse | housing or new facility to allow for equipment housing and for start housing. Currently have 1 mil tax levy in place to start funding. Have property and are currently working on site preparations for it. Have a set of plans for the building. Also looking at increasing the number of full-time staff. | Northeast Champaign County Fire District | 40 | 91 to 180 days | \$2,000,000 |
| Champaign | North Lewisburg Storm Shelter | Construction of a Storm Shelter/Administrative Office. The Village of North Lewisburg has been tentatively approved for a grant from FEMA. The Village of North Lewisburg is seeking funding from alternative sources to assist in the completion of this Storm Shelter project, benefitting the safety of the community and surrounding area | North Lewisburg | 50 | 91 to 180 days | \$200,000 |
| Champaign | Roads Project | Four miles of repaved roads and a new highway salt storage building. (current storage bin is withered 20 feet of well) and three miles of the repaving will complete current highway projects | Jackson Township | 10 | 31 to 90 days | \$250,000 |
| Champaign | North Main Storm Sewer | Installation of new storm sewer line; approximately 150 homes and businesses affected in the elimination of flooding issues. This will also eliminate the need to close down a US route during minimal rainfall. Design will be completed by April 2009; bid documents will be ready within 2 business days once grant agreement received. This will create or retain employment for the length of the project to an estimated 15 people in the excavation and pipe-laying industry. | City of Urbana, Ohio | 15 | 31 to 90 days | \$300,000 |
| Champaign | Powell Avenue Sanitary Sewer | Install new and upgrade existing sanitary sewer mains. Existing mains currently under-sized and dilapidated. Approximately 5000 lineal feet of sewer line will be installed. | City of Urbana, Ohio | 15 | 31 to 90 days | \$320,000 |
| Champaign | DUGAN RD | INSTALLATION OF NEW SANITARY SYSTEM WITH FAILING SEPTIC SYSTEMS. OUTCOMES INCLUDE REDUCTION OF POTENTIAL BIO-HAZARD LEECHING INTO GROUNDWATER, INSTALLATION OF APPROXIMATELY 5000 LF OF NEW SANITARY MAINS, WITH AN IMPACT TO APPROXIMATELY 50 HOMES. | CITY OF URBANA | 15 | 31 to 90 days | \$260,000 |
| Champaign | MUZZY ROAD BRIDGE | REPAIR BRIDGE AND ROADWAY AT AN UNUSUAL 6' FOUR INCHES. EACH BRIDGE HAS BEEN CLOSED TWO TIMES IN PAST SIX MONTHS DUE TO SEMI TRAFFIC IN INDUSTRIAL AREA HITTING/REMOVING GUARDRAIL AT TURN RADIUS. THE PROJECTED IMPACT TO THIS PROJECT INCLUDES LESS DOWN-TIME DUE TO BRIDGE REPAIR/WELDING, WHILE MAINTAINING ACCESS TO INDUSTRIAL PROPERTIES IN THE AREA. | CITY OF URBANA | 15 | 91 to 180 days | \$50,000 |
| Champaign | SANITARY SEWER REPLACEMENT | REPLACEMENT OF APPROXIMATELY 2000 LF OF DETERIORATED AND PIPING UNDERMINED SANITARY SEWER LINES WITHIN THE PUBLIC USE OF THE CITY CORPORATION LINES. PRIORITY WILL BE TO CAMERA ALL LINES, IDENTIFYING MOST HAZARDOUS-RISK RELATED TO PUBLIC AT LARGE IN CARE OF COMMUNITY. MAJORITY OF LINES INSTALLED IN 1930'S-1940'S WITH A LONG HISTORY OF AREAS IN NEED. | CITY OF URBANA, OHIO | 40 | 31 to 90 days | \$320,000 |
| Champaign | PHOENIX DRIVE | PROJECT INCLUDES REMOVAL OF EXISTING CONCRETE STREET AND INSTALLATION OF NEW ASPHALT APPROXIMATELY 4000 LF OF STREET IN COMMUNITY'S ONLY INDUSTRIAL PARK. SIX INDUSTRIES (LOCAL AND INTERNATIONAL) CURRENTLY LOCATED IN PARK AREA, WITH ROOM TO EXPAND AT MINIMUM 700000S.F. OF NEW BUILDINGS. | CITY OF URBANA | 25 | 91 to 180 days | \$200,000 |
| Champaign | Community Mentor Collaboration of Champaign County | will allow for collaboration among community sectors in the creation of mentoring opportunities across FCFC systems. HB289 focus includes reducing behaviors associated with mental illness. Mentoring is a structured and trusting relationship that brings young people together with caring individuals who offer guidance, support and encouragement aimed at developing the competence and character of the mentee. Involvement in mentoring will strengthen our community. Mentoring, when done correctly, makes a huge difference in the lives of young people that we reach. Outcomes will include training of partner agencies, mentors and mentees, reducing barriers of cost for background checks of mentors, and marketing of "Mentoring" brand. Model is based on the best practices as outlined by MENTOR/National Mentoring Partnership and is proven successful. Once trainings have been established, mentoring options within the community will be more readily available as needed when working to improve over-all well being of at-risk youth | Champaign County Family & Children First | 4 | 31 to 90 days | \$50,000 |
| Champaign | SOLAR COMPANY | PROJECT INCLUDES THE PURCHASE OF SOLAR PANEL PRODUCTION EQUIPMENT, WORKFORCE TRAINING UTILIZING PROGRAMMING EXISTING AT LOCAL CAREER CENTER. PROJECTED IMPACT IS SIGNIFICANT IN THAT THE WORKFORCE WOULD BE LOCAL TO INSTALL SOLAR PANELS FOR STATE, FEDERAL, AND PRIVATELY OWNED BUSINESSES, AS WELL AS REGIONAL COMPANIES WHO HAVE COMMITTED TO PURCHASING PANELS FOR GREEN ENERGY NEEDS. | CITY OF URBANA | 50 | 31 to 90 days | \$500,000 |
| Champaign | Stimulate Employment | Purchase 3 lots next to existing property to build a building large enough to drive a semi through. The trailers will be dropped, washed, cleaned and graphics applied all indoors. A must for this area. This will employ 3 people now and add employees as needed. | W Productions (Business) | 5 | 91 to 180 days | \$250,000 |
| Champaign | Douglas Hotel | On the South side of the building will be music education studios to provide music classes to individuals and groups as well as AOD, ADHD and music therapy. This will employ an additional 3 to 5 teachers. feet and needs a complete renovation. We expect the project to create or retain 60 construction jobs and create 57 permanent jobs once complete. The first floor will contain Retail stores, Hotel lobby and a banquet-meeting facility. The second floor will have offices which part will be reserved for local non profits. The Third through the Fifth floor will be 20 boutique hotel rooms. Our objective in restoring the Hotel is that it will spur economic activity to the businesses downtown and provide the community a Landmark Hotel that the Business and Tourism industry can market around. In addition to the economic impact is the emotional impact it will have on the community. In the past couple years Urbana has lost three major employers, (Fox River Paper, W B Marvin Manufacturing and Siemens). The Hotel will restore not only economic activity downtown but restore a sense of pride in our downtown. Note that the supporters of this project include: The City of Urbana, The Community Improvement Corporation, The Champaign County Preservation Alliance, and The Monument Square | Miami Scioto Holding | 60 | 0 to 30 days | \$2,000,000 |
| Champaign | Classroom Technology Update | Our school is only nine years old (Graham Middle School) but was completed without the necessary classroom technology to give students the best possible education. We need to equip our classrooms with the latest "smart" technologies to help staff and students meet our Ohio Achievement test goal and No Child Left Behind. We have approximately 30 rooms that need this upgrade. The upgrade will enhance our standards based curriculum and help us to meet our action plan goals as designed during the Ohio Improvement Process. Technology will include Air Liners in each room with LED projection units integrated with online connectivity (closed circuit) as well as information (open/circuit). Each class room shall also receive an online timelog assessment system so that teachers can do short cycle formative assessments in order to achieve mastery of lower indicators linked to our curriculum maps and pacing guides. All the computers built in the last several years are receiving this technology as a matter of course. We want to keep pace and give our students the best education possible. Specific Location This project is Phase II of Race Street improvements. Project components Replacing existing asphalt pavement, repaving the existing sidewalks with a 4' ADA compliant curb ramps, increasing the water line from a 4" to an 8" pipe, installation of 6" curb and gutter and 12" storm drain. Physical Deminions 301 Bituminous Base 465 CY 402 Asphaltic Concrete 155 CY 404 Asphaltic concrete 155 CY 4" Waterline abandonment in place 1100 LF 8" water line complete in place 1100 LF concrete sidewalk 7390 SF 6" curb & gutter 1847 LF 11 acres of land, and 16,000 sq ft tire and ems building with living quarters for future plans to be a full time fire and ems department. We are ready to award the bid and break ground within 30 days from today. | Graham Local School District | 4 | 31 to 90 days | \$100,000 |
| Champaign | Race Street Drainage and Road Improvements | This project is Phase II of Race Street improvements. Project components Replacing existing asphalt pavement, repaving the existing sidewalks with a 4' ADA compliant curb ramps, increasing the water line from a 4" to an 8" pipe, installation of 6" curb and gutter and 12" storm drain. Physical Deminions 301 Bituminous Base 465 CY 402 Asphaltic Concrete 155 CY 404 Asphaltic concrete 155 CY 4" Waterline abandonment in place 1100 LF 8" water line complete in place 1100 LF concrete sidewalk 7390 SF 6" curb & gutter 1847 LF 11 acres of land, and 16,000 sq ft tire and ems building with living quarters for future plans to be a full time fire and ems department. We are ready to award the bid and break ground within 30 days from today. | Village of Mechanicsburg | 20 | 31 to 90 days | \$555,406 |
| Champaign | JSP Fire and EMS Building | also there will be water and sewer lines installed, final figures are not in yet on footage | Johnson St. Paris Volunteer Fire and EMS Joint Fir | 45 | 0 to 30 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------------------|----------------|--------------------|---------------------------|
| Champaign | Logan/Champaign County TeenScreen | We will be maintaining the current Logan/Champaign TeenScreen program, now offered to 7 schools and 3 community programs in our area. We offer screening to high school students at each school, and provide follow-up and referral information to families. Current funding is near depletion, with several scheduled screenings yet to go this school year. | Consolidated Care Inc | 8 | 0 to 30 days | \$1,500 |
| Champaign | Logan/Champaign Counties CIT Program | The CIT Program of Logan and Champaign Counties will continue to offer training to local law enforcement and corrections officers as funding is available. Logan and Champaign County's CIT Program has hosted two previous trainings and have trained a total of approximately 40 officers. The next training is scheduled for April 27, and the program hopes to offer 3 trainings per year as money is available. | Consolidated Care Inc | 5 | 31 to 90 days | \$1,500 |
| Champaign | Mental Health Education in Local Schools | We have been providing a two-day mental health education program to health class students in our two local counties of Logan and Champaign. We aim to educate students on signs and symptoms of depression as well as suicide risk factors and warning signs in teens. We also watch a video on Signs Of Suicide and discuss how to use ACT (Acknowledge, Care and Tell) skills to intervene and provide help to those they care about that may be displaying warning signs. We also provide the opportunity to talk to a therapist if the visit illicit any concerns from the students. The standardized curriculum SOS (Signs of Suicide) is used during these visits. Money would be used to supplement the cost of the professional providing these visits. Current funding for education and prevention programs is being cut and needs to be supplemented. | Consolidated Care Inc | 3 | 0 to 30 days | \$2,500 |
| Champaign | Save Ohio Jobs | These funds will be used to assist beyond our workforce until our existing customers recover from this severe recession. It will also give us some time to attempt to find new business. Our business is a manufacturing company specializing in numerically controlled machining. | C.A.M. Machine Inc. | 20 | 31 to 90 days | \$1,125,000 |
| Champaign | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options. Our data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without state monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Champaign | Construct taxiway | Construct taxiway | Bellefontaine Municipal Airport | 5 | 31 to 90 days | \$315,000 |
| Champaign | Paving Champaign County Roads | Paving the following County roads within Champaign County. Parkview Road, Hanna Road, Ludlow Road, Middle Urbana Road, Prairie Road, Short Cut Road and Springfield Urbana Pike | Champaign County | 0 | 91 to 180 days | \$1,400,000 |
| Champaign | Bair Road Bridge Replacement | Replacement of a bridge on Bair Road between US 36 and Old Troy Pike | Champaign County | 0 | 0 | \$300,000 |
| Champaign | Calland Road Bridge Replacement | Replacement of a bridge on Calland Road between State Route 29 and Nine Mile Road | Champaign County | 0 | 181 days or more | \$300,000 |
| Champaign | Upper Valley Pike Road Reconstruction | Reconstruction and paving of Upper Valley Pike between State Route 296 and US Route 61 | Champaign County | 0 | 181 days or more | \$1,300,000 |
| Champaign | County Engineer Garage | Replacement of Champaign County Engineer's garage built in the early 1920's. | Champaign County | 0 | 181 days or more | \$4,000,000 |
| Champaign | My BAILOUT | This stimulus would allow me to be debt free. I am retired and on a fixed income and it would allow me to exist in a better environment with less stress | Private Individual, retired | 1 | 31 to 90 days | \$30,000 |
| Champaign | Low Income Car Assistance | People who cannot finance cars are looking for \$2-3k cars. People need cars to work. I would start my own type of lot, and assist people of low income obtain an automobile. In addition, I would need help with a lot technician to detail cars, a small lot, and be able to put a few people to work. I could make a fair profit instead of preying on these people as have been happening, thus becoming self sufficient myself. I have numerous years selling cars, and know this would fill a void in our local community. | Kelly B Kaylor | 2 | 0 to 30 days | \$75,000 |
| Champaign | Village of North Lewisburg SR 559 Reconstruction | The village of north Lewisburg would like to reconstruct a portion of SR 559 that runs through the Village. Currently the lanes are to narrow and there is no storm sewer, curbs, or sidewalks to allow for drainage and pedestrian traffic. The Village has applied to OPWC in the past to fund this Phase I project but does not have the resources to compete with the other projects that were submitted. This project will allow for a safe and travelable roadway that will serve the residents and the traveling public for many years to come. | Stantec Consulting Services, Inc. | 10 | 91 to 180 days | \$726,500 |
| Champaign | Turn lane at Graham High School | Create a turn lane for Graham High School or Jsuu reet. According to a recent traffic study, this issue is becoming more of a safety concern due to the increase traffic flow. | Graham Local Schools | 10 | 91 to 180 days | \$200,000 |
| Champaign | Countrytryskies 74 acre wind Farm | We in a major renovation project at the High School but state rules will not allow the district to use state dollars to improve the infrastructure. We are considered a low wealth district and the implementation of this turn lane will create a significant funding problem. The proposed site has an elevation change of 60' from top to bottom and would provide an ideal location for a wind farm according to the Ohio wind maps currently available. Transmission lines run close to the project site as well as a small local village could use the energy directly. As additional wind power becomes available, more electricity customers are signing up to invest in clean, sustainable wind power. As concerns about global warming increase, utilities and their customers may support an even more prominent role for wind in meeting the nation's needs for new power generation. Many states are implementing policies such as renewable portfolio standards and net metering to hasten the development of their wind resources. Wind energy provides more jobs per dollar invested than any other energy technology. Wind power is versatile, adaptable, and readily available. Wind's many advantages have made it the fastest growing source of energy in the world since 1990 | Countrytryskies, LLC | 7 | 0 to 30 days | \$3,900,000 |
| Champaign | CHP Capitalized maintenance ; PID 86088 | 2009 Capitalized Maintenance; This is a rural transit project whose funding flows through the Ohio Department of Transportation. | The Ohio Department of Transportation | 1 | 0 to 30 days | \$15,000 |
| Champaign | Algae-derived Biodiesel Utilizing Wastewater Treat | rural wastewater treatment facility. The treatment facility uses state-of-the-art green technologies and environmentally-friendly alternatives to conventional wastewater treatment systems by using constructed wetlands and aquaculture bioreactors. These other facilities have been designed by Dr. Smith at Young's Jersey Dairy near Yellow Springs, at the Greene County Career Center, and at the Cedar Bog Nature Preserve. All three projects achieved Ohio EPA approval. This project will involve cooperation with PK Biodiesel, a local biodiesel producer in Champaign County to evaluate commercial production parameters and feasibility. Possible expansion of project results to rural community wastewater treatment facilities and to larger municipal facilities in next phase of project. Expected outcomes of this project are new non-food sources of energy via algal-biodiesel using low-cost green technologies, recycling wastes, improvement of wastewater treatment in rural communities, and additional revenue for municipalities that operate wastewater treatment plants at the Village of North Lewisburg would like to upgrade a portion of SR 559 on the south side of town. | Freshwater Farms of Ohio, Inc. | 880 | 0 to 30 days | \$575,000 |
| Champaign | Village of North Lewisburg SR 559 Reconstruction | The project would provide curb, sidewalk, storm sewer and widen the existing roadway to provide a safe and travelable roadway. Currently there is poor drainage and no sidewalks for pedestrians to travel alongside the road. | Stantec Consulting Services, Inc. | 10 | 91 to 180 days | \$801,900 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Champaign | Bridges Out of Poverty Getting Ahead Workshops | 85,801. 11.5% or roughly 10,000 of these individuals live in poverty. The diversity of socioeconomic class within these counties has prompted a collaborative agreement to better educate professionals and social service providers who work directly with those in poverty. By utilizing the Bridges-Out-of-Poverty curriculum, we have been working over the last 2 years to teach and provide a better understanding of poverty in efforts of creating supportive relationships with individuals living in poverty. We can achieve greater impact by providing the client portion of the Bridges-Out-of-Poverty trainings, known as Getting Ahead in a Just Getting by World. Understanding the hidden rules of the middle class and wealth, and choosing to use them, can open doors to such resources as new relationships and new jobs. By empowering the people who live in poverty and including them in our collaborative efforts through mutual respect and shared responsibility, we feel we can engage this sector to help make organizational and administrative changes to reduce poverty in our counties. | Champaign County Family & Children First | 2 | 0 to 30 days | \$23,480 |
| Champaign | i dont make enough money to pay my bills | work 1 full time job and work 1 part time job my husband works a full time job but we still do not have enough money to pay bills. thank god we have an understanding baby sitter who will let us pay a little late. im surprised we havent received foreclosure papers because we always pay our bills late we need help. | n/a | 0 | 0 to 30 days | \$10,000 |
| Champaign | Sanitary Sewer System | New 8" sanitary sewers to service entire Village along with regional connection to St. Paris. 33,250 LF of 8" sanitary; 3,860 LF of regional forcemain connection 6" PM | Village of Christiansburg | 30 | 91 to 180 days | \$4,575,000 |
| Champaign | Storm Sewer Improvements | 2100 LF of 36-42 inch storm sewers along Monroe Street to Wilson Street and discharge to local stream | Village of Christiansburg | 15 | 91 to 180 days | \$325,000 |
| Champaign | West Liberty Wind Farm | The installation of 6 100 foot tall wind turbines rated at approx 3kw each near the city of West Liberty Ohio. This would generate roughly 18kw of electricity. This project would show that parts of Ohio can be used for wind power generation. | Renewable Designs | 3 | 31 to 90 days | \$150,000 |
| Champaign | screenings removal system | A screenings removal system will enhance our sewer treatment plant to be more efficient and eliminate the chance for a unacceptable effluent. This will make our receiving stream a better quality as well as our meeting Ohio EPA requirements. | village of st. paris | 5 | 91 to 180 days | \$600,000 |
| Champaign | water treatment plant | the water treatment plant is currently only pump and chlorinate. This will not only improve our water quality, but will make us better candidates for economic development. We have on several occasions been passed by for new business and industry because of not having a treatment plant. It is our intent to grow to a point of being financially self sufficient. We have most of the other components to make this happen but lacking a water treatment plant. Not only will this boost our economy and create jobs to build a plant but will place us in position for more industry that will create even more jobs. Hopefully you will consider us for funding. | Village of St. paris | 15 | 31 to 90 days | \$3,900,000 |
| Champaign | Project Jacel | home and then expand but I think I could do more good and create jobs if I have the ability to open a store front. My downtown area has many empty storefronts and I would like to help revitalize the area and create jobs at the same time. My target area would be Champaign county and surrounding counties but I would also be selling baskets over the internet eventually so it would affect the whole state and potentially all across the nation, with the tax revenue staying here in Ohio. Over time, the job creation figure may actually be considerably more, depending of course on the effectiveness of the online sales. Initially, I anticipate needing 5 employees, other than myself, to put together baskets, take orders, and work the store front so that we are able to be open longer. Most of the 20,000 requested would be to secure a location and make it ready for open, order inventory, initial advertising costs, and to have capital on hand to help cover the first few months as we are getting off the ground. If the business is a success, some proceeds would go to charities | Jacel | 5 | 31 to 90 days | \$20,000 |
| Champaign | Phase II-WWTP no Generator | This project is for the rehabilitation/upgrade of the Urbana Water Pollution Control preliminary treatment system. The system was installed in 1976 and is well beyond its useful life. The project includes a new mechanical bar screen and a new grit collection system. The project would replace current equipment that is not functioning due to needed repairs and would improve all downstream processes by reducing wear on equipment and plugging due to rags and debris not being taken out. Work would include an influent mechanical bar screen, collection conveyor, screenings washer/compactor, control panel and pole building to house for freeze protection. The grit washing, classification and dewatering system will replace the existing equipment which is out of service | City of Urbana | 20 | 31 to 90 days | \$450,000 |
| Champaign | Phase II WWTP-Front End | treatment system and new emergency generator for peak demand shaving of electrical service. The system was installed in 1976 and is well beyond its useful life. The project includes a new mechanical bar screen and a new grit collection system. The project would replace current equipment that is not functioning due to needed repairs and would improve all downstream processes by reducing wear of equipment and plugging due to rags and debris not being taken out. Work would include an influent mechanical bar screen, collection conveyor, screenings washer/compactor, control panel and pole building to house for freeze protection. The grit washing, classification and dewatering system will replace the existing equipment which is out of service. The existing grit tank can be used and is in fair shape. The new generator would not only be used during power outages but also to reduce very high electrical demand charges due to a new microwave sludge drying unit that produces Class A biosolids for beneficial reuse. Installation will also reduce operating costs for the City. | City of Urbana | 20 | 31 to 90 days | \$1,200,000 |
| Champaign | Water-Childrens Home Road | This project includes the extension of water mains to an environmentally sensitive area surrounding an abandoned landfill. Residents in this area are currently using wells as a source of drinking water. Installation of approximately 8000 LF. of water main from its existing terminus will enable approximately 150 residents, one church, and one private school will be immediately served, with the potential to serve an additional 300 residents in the future with other extensions | City of Urbana | 25 | 91 to 180 days | \$700,000 |
| Champaign | Sanitary Extension--36 & Dugan to Mutual | This project includes the installation of nearly 50,000 l.f. forced sanitary main, 5200 l.f. sanitary laterals, 3 lift stations, 3 air releases w/valves, 54000 s.y. seeding, 4.8 tons of fertilizer, 172 individual grinder pump stations, and associated clearing & grubbing, asphalt resurfacing, and storm sewer replacement regarding extension of sanitary sewer mains as proposed in a county-wide effort to eliminate potential ground contamination associated with poorly rated septic systems. This service area will serve approximately 500-800 residents and multiple commercial properties. The public welfare is at risk under current environmental conditions with the exposure to untreated sewerage in surface water resources. The local health department has had complaints within the proposed service areas concerning lack of treatment facilities. | City of Urbana | 30 | 91 to 180 days | \$3,150,000 |
| Champaign | Sewer Extension-RT 29 to Dugan | The proposed project will include the extension of sanitary sewer main (approximately 4000 l.f.) from existing terminus to Dugan Road, and will serve residential and commercial properties. Currently, EPA and the County Health Department will not allow any new septic systems in this area. Two commercial properties are currently facing the need to remove leaching systems and hook into city services. The plans are complete and PTIs have been received. Project can commence immediately upon approval of funding. | City of Urbana | 15 | 0 to 30 days | \$250,000 |
| Champaign | Water Extension-SR 29 to Dugan | currently, water quality in this area have caused the County Health Department and the EPA to deny well permits to an existing industry and an existing church that serves over 500 members. Plans have been completed, PTI has been obtained, and construction is ready to begin for the extension of this line from it's existing terminus to Dugan Road. There will be approximately 4000 l.f. of 14" water lines installed to serve existing owners and future development in a residentially and commercially-owned area. Approximately 300 acres of additional growth can be served by this extension. | City of Urbana | 15 | 0 to 30 days | \$450,000 |
| Champaign | Patrick to Powell Water | This proposed projects includes the installation of approximately 5000 feet of water main line from its existing terminus to Powell Avenue to South Main Street to complete a looped system for increased pressure and capacity to residential and commercial properties. The existing infrastructure in this area currently dead-ends and is capped. The water superintendent highlighted a need to have a closed-loop system to adequately serve the population | City of Urbana | 15 | 31 to 90 days | \$350,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Champaign | US 68 South Water Extension | Currently, there is no water service for an approximate one-mile area between existing infrastructure to a nursing facility (formerly county-owned) and a school for the MRDD population for which this serves. This 12" main would allow for safe drinking water to an underserved and ailing population. The extension will also allow the nursing facility and MRDD school to terminate their required daily testing of the drinking water for their consumers. The City has also been approached by developers who are interested in approximately 200 acres in the area, for industrial development. The installation of this line will allow for industrial, commercial, and residential growth. Timing of the project start date will also be dependent on EPA PFI. | City of Urbana | 20 | 31 to 90 days | \$540,000 |
| Champaign | 68 South Sanitary Extension | (formerly county-owned) and a school for the MRDD population for which this serves. This 4" main is not adequately sized to accommodate any growth, including EPA/Health Department mandated vacation of septic systems in this area once existing systems fail. The nursing facility has recently been bought by a private corporation, and without a "grandfather" clause in place, the need to increase capacity is present. The City has also been approached by developers who are interested in approximately 200 acres in the area, for industrial development. The upgrading of this line will allow for industrial, commercial, and residential growth. Timing of the project start date will also be dependent on EPA PFI. | City of Urbana | 20 | 31 to 90 days | \$540,000 |
| Champaign | West Ward Culvert | The proposed project includes the replacement of an existing combination 12' x 5' bridge/culvert and is located on W. Ward Street within the City limits. Bank protection in the form of heavy stone and/or sheet piling is needed at all corners except the NW corner to prevent scour and erosion around the ends of the box culvert. Debris needs to be removed from the channel bank and additional stone needs to be placed to control slumping of the bank. Guardrail post anchorage in the sidewalks does not meet proper design criteria. Bridge guardrail terminal assemblies should be installed at both approaches. | City of Urbana | 15 | 31 to 90 days | \$200,000 |
| Champaign | Twin 96 | The proposed project includes the installation of a twin 96" storm sewer line that drains into the Mad River in Champaign County. Currently, our community experiences major flooding with a little as 1" of rain along Dugan's Run. This portion of an estimated \$8 Million dollar improvement project is the last phase of ten projects that has, to date, taken the City 15 years to accumulate. Grant funding to alleviate some of the stormwater issues we have been facing in our residential neighborhoods. The existing system is undersized and not connected in an efficient way to current damage to roadways and residential properties. This project has top priority with Administration and Council on a Capital Improvement Plan. | City of Urbana | 15 | 91 to 180 days | \$1,000,000 |
| Champaign | Landmark Restoration - Woodstock Unitarian Univers | The Landmark Restoration - Woodstock Unitarian Universalist Church project entails restoration of a small community church built in 1844, steeped in Civil War history. The building structure is sound, however, repairs are needed to restore the roof, window frames and wall plaster. Without these repairs, the building will suffer further disrepair and will lose its unique historic elements. *The church is a memorial to the small town's rich Civil War history. *Columbus Dispatch, Town aims to save its historic church, December 24, 2008) The distinct stained-glass windows, in particular, are full of Civil War imagery; the window came from Massachusetts in 1894 - the top pane bears a seal with Union General John A. Logan's image; the larger bottom section portrays two soldiers headed to war. | Woodstock Lions Club | 20 | 91 to 180 days | \$400,000 |
| Champaign | Adams Township Fire House | Construct a new fire house to replace aging housing with limited space. Leaning height is too low for laying hose on back of fire engine. None of the new fire and rescue equipment will fit in the old building - all new equipment is located off site in separate privately-owned facilities in the small community of Rosewood, Ohio. Proposed site is "shovel ready" for new building with all necessary utilities available; redevelopment of old school site. | Adams Township Fire Department | 20 | 91 to 180 days | \$900,000 |
| Champaign | Green Work Opportunities for Adults with Disability | supporting adults with disabilities. We have outgrown our current location, with many more applications from a three-county area, and many more dreams to achieve on behalf of our clients. DFSS will use Recovery Funding to purchase and renovate a new campus, and to launch a dynamic new program interweaving mini-eco-business projects run by our disabled population. This rural Champaign County property, situated in one of the best locations for wind-powered turbine utilization, will be designed as a green facility, ultimately supplying its own power for program use, including client operation of greenhouses for organic food. This complex will be a hub of nimble work opportunities, mentoring social skills for community engagement and broadening life-choices to this typically unnoticed, poverty-ridden class of citizens, enabling them to be vital, contributing members of the community. DFSS will employ additional staff from an area with little employment opportunity in this phase. DFSS expects to provide income to over 50 people. This program will be easily scalable and affordable housing, and to have opportunities to be part of their communities. As a clear contrast to the often substandard housing or group homes available to this poverty-involved population, DFSS proposes to further develop its campus to include a unique supported living community. This residential complex of green-built doubles will be designed to retain the rural ecological harmony, and will be wind-turbine-powered, with the goal of being "off-grid". The homes' wall panels will be purchased from the Dayton ISUS alternative school, and designed specifically for safety and functionality for disabled adults who require staff support for independence. The site prep and construction will employ these adults as possible, and will additionally engage a number of local craftsmen. Up to 10 planned homes could house as many as 40 adults and will ultimately employ an additional 25 people for supportive and program activities. With the enhancement of existing DFSS opportunities, this will become a small community engaging with the larger community in positive manner. | Downsize Farm Support Services | 50 | 0 to 30 days | \$450,000 |
| Champaign | Green Supported Living and Life-Enhancement Commun | supporting adults with disabilities. We have outgrown our current location, with many more applications from a three-county area, and many more dreams to achieve on behalf of our clients. DFSS will use Recovery Funding to purchase and renovate a new campus, and to launch a dynamic new program interweaving mini-eco-business projects run by our disabled population. With the enhancement of existing DFSS opportunities, this will become a small community engaging with the larger community in positive manner. | Downsize Farm Support Services | 50 | 0 to 30 days | \$450,000 |
| Champaign | School Outreach Worker Program | more involved with their child's education by providing support, linking and referring families to services and resources. The workers are assigned in each school district to work directly with the parents, teachers, and the community, addressing the concerns and needs of the families and of school personnel, in a holistic approach by helping to empower families to remove barriers that may impede their child's learning. Some barriers may include but not limited to: • Housing • Medical assistance • Clothing • Food • Counseling • Parenting (in-home and group) Services to be provided: Champaign and Logan County Schools has expressed a concern that parents need to be more involved in their child's education. Studies (Ohio Mental Health Network for School Success) show that teacher's priorities are to have more positive parent involvement in the education of their child. We believe the institution of the school outreach worker in each of our districts will lead us closer to achieving this goal. The school outreach worker collaborates with other agencies to improve access to multiple agencies. Work directly with parents, teachers, and other school | Mental Health Drug & Alcohol Services Board | 7 | 31 to 90 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Champaign | EE retrofit of Municipal building | Replace single pane window unit with double pane glass, install insulated entry & garage doors, install service entry door to workshop area of garage, build workshop sub-space within garage workshop to cut down on amount of area required to heat garage, retrofit traffic light with L.E.D. bulbs, installation of drop ceiling in municipal building & workshop, installation of energy efficient furnace and air conditioning units for municipal building. We would anticipate these EE retrofits to cut our energy consumption for the municipal building by 50%. | Village of Woodstock | 12 | 0 to 30 days | \$36,000 |
| Champaign | Handicap Access and Replacement of Deteriorated SI | The Urbana-Champaign County Senior Center project involves construction or an enclosed attachment to the Senior Center main entrance for a wheelchair lift and associated walkway; the reconstruction of deteriorated sidewalks leading to the facility; the reconstruction of steps to the west entrance, and redesign of the stormwater system for the basement ramp. The existing ramp to the main entrance has extensive deterioration. Design of this project is nearly complete and would be ready for construction within 90 days. | Urbana-Champaign County Senior Center | 20 | 91 to 180 days | \$250,000 |
| Champaign | Main Storm system & detention structure to double | Install storm sewer infrastructure for village and drain to a detention pond which will eliminate flooding of roadways one of which is a state route that is a major artery for workers at Honda. The state route floods to a depth of 3 feet under heavy rains at least a couple of times yearly this is very dangerous as even though we post signs stating the road is closed workers still try to drive through it. It will also provide a water supply for fire protection as our village does not have a municipal water supply. This will also eliminate the flooding of houses within our village that flood to the floor just at least three times annually. All of this has been a documented problem in our village since 1950's. We have a stormwater plan prepared to resolve the flooding issues inside of our village. It includes installation of 1400' of 36" storm tile, 200' of 15" storm tile, 600' of 12" storm tile, 8 manholes, 22 catch basins, pond excavation & control structure. | Village of Woodstock | 6 | 31 to 90 days | \$220,000 |
| Champaign | Burnwell Street sidewalks and curbs | Replacement of deteriorated & unsafe walks as well as installation of curbs to control stormwater runoff from our streets. Project would consist of 1700 linear ft of curbs as well as 8500 square feet of walks along this street. This street has the post office for the village located on it & would provide a formerly unsafe walkway a safe passageway for our elderly residents to walk to and from the post office. | Village of Woodstock | 5 | 31 to 90 days | \$127,000 |
| Clark | Springfield Resurfacing and ADA Ramps | Resurface roadways and install ADA curb ramps in Springfield, Ohio. All of the federal development status regulations will be met by 4/10/2009. | Clark County Springfield Transportation Coordinati | 20 | 0 to 30 days | \$1,104,059 |
| Clark | Blacktop repair | 1/4 mile asphalt drive repair, including regrading about 1/2 of this to improve drainage. Area includes an emergency exit to building which serves 200 adults with disabilities. This exit is prone to heavy ice during winter months posing a safety hazard if the building must be evacuated. | Clark County Board of MRDD | 6 | 91 to 180 days | \$100,000 |
| Clark | Repair to single membrane roof | Repair of single membrane roof over 53,000 square foot building housing services for 200 adults with disabilities. | Clark County Board of MRDD | 6 | 91 to 180 days | \$200,000 |
| Clark | West Central Ohio I-70 Widening Project | By 2009, I-70 in Montgomery and Madison Counties (directly west and east) will be widened to three lanes, while a majority of I-70 in Clark County will remain at two lanes. This will pose a significant threat to safety of motorists on one of the nation's most important trade routes and will make it even more challenging to promote economic development in Clark County. | Clark County Springfield Transportation Coordinati | 5,000 | 31 to 90 days | \$92,600,000 |
| Clark | SR794 Realignment Project | The project was initiated under former Governor Taft's Jobs in Progress Program and is a TRAC tier II project. Due to inflation increases the funding for a large portion of the project to be completed in the short range (under TRAC tier II) was pulled in order to fund inflation on other projects. The project is now slated for 2016 because it is waiting on funding. | Clark County Transportation Coordinating Committee | 100 | 31 to 90 days | \$2,800,000 |
| Clark | WESTCO Port Authority Track Rehabilitation | The project was initiated in 2005 after the BRAC report. As it stands because of the lack of funding the project will not be able to move forward until at least 2012. | West Central Ohio Port Authority | 200 | 31 to 90 days | \$6,500,000 |
| Clark | Styer and Stratmore Project | Rail line passing through 4 small urban centers and 3 major grain elevators currently under slow orders because of track deterioration. Potential and current rail customers are deterred not to use the line because of slow response and safety issues. Maintenance fees are generated from line usage. Line usage will never be able to match maintenance needs if the line falls into further disrepair. This railroad line has between 5,000 - 8,000 annual carloads. The Port Authority earns approximately \$500,000 a year in maintenance fees. Several potential customers on the line are motivated by the economy of using train transportation for their goods over trucks. However, due to slow orders and safety concerns many still continue to use truck as their primary means of transportation. The project will span 3 counties: Clark, Madison, and Fayette. | Bethel Township | 30 | 31 to 90 days | \$540,000 |
| Clark | Maintenance | 43 manholes to grade, 3/4" leveling using 1450 ton of asphaltic concrete, surfacing using 2,400 ton asphaltic concrete. Additionally, remove and replace 4,700 linear ft. of curb and gutter, reconstruct 30 catch basins, remove 935 S.F. of curb ramps and replace with ADA compliant, replace two traffic loops, and other affiliated costs. Under a multi-jurisdictional agreement with the Clark County Utilities Department this project would also replace ten outdated fire hydrants along these two streets with 5" NST hydrants. | Clark County Park District | 6 | 0 to 30 days | \$124,800 |
| Clark | Old Columbus Road resurfacing | Styer Dr. and Stratmore St. are in Park Layne, a 50 year old subdivision that is rated low to moderate income on the census. This project was engineered in 2007 but funding has not been available. At that time the cost for this work was estimated at \$489,620. | Clark County Engineer | 25 | 0 to 30 days | \$1,440,000 |
| Clark | Old Columbus Road resurfacing | The Clark County Park District has a better idea of what to do. The city of Springfield would try and merge all parks together. We being a park district could not merge, but had to contract with them. The past 8 years we were contracted with the city for our maintenance. In December the city decided to void the contract and we are once again to stand on our own. We currently have 2 employees to try to maintain over 900 acres of green space, wetlands, old growth forest and county bike trails. | Clark County Engineer | 10 | 0 to 30 days | \$225,000 |
| Clark | Clark County Load Rating | We need to hire additional maintenance in order to keep up a healthy park system. This project would preserve & improve existing infrastructure to an acceptable level of service as well as improve the safety for the users with new raised pavement markings as well as new pavement markings. Old Columbus Road is classified as a major collector on the rural functional classification through ODOT's Technical Services Committee. | Clark County Engineer | 10 | 0 to 30 days | \$225,000 |
| Clark | Dayton Road Bridge | The load ratings would identify bridges that should be posted for a reduced legal load carrying capacity and will pinpoint deficient elements on each bridge. This will enable the county to better plan for bridge rehabilitation projects and possibly delay full scale replacements of structures. | Clark County Engineer | 10 | 0 to 30 days | \$390,000 |
| Clark | Tremont City Road Bridge #270 over Mad River | The load ratings would identify bridges that should be posted for a reduced legal load carrying capacity and will pinpoint deficient elements on each bridge. This will enable the county to better plan for bridge rehabilitation projects and possibly delay full scale replacements of structures. ODOT ID: 85973 | Clark County Springfield Transportation Coordinati | 20 | 0 to 30 days | \$390,000 |
| Clark | | Repair and paint bridge on Dayton Road at CLA-CR333-0.13. All federal regulations will be met by 4/30/2009. | Clark County Engineer | 10 | 0 to 30 days | \$880,000 |
| Clark | | This would replace the deteriorating concrete deck and deficient guardrail on the structure. Tremont City Road is the primary connection from the village of Tremont City to Urbana Road in northern Clark County. | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Clark | Old Columbus Road Repair | ODOT Project ID: 85974 Repair and resurface Old Columbus Road in Springfield, OH in addition to installing RPM's from CR382-1-99. All federal regulations will have been met by July 1, 2009. | Clark County Springfield Transportation Coordinati | 25 | 31 to 90 days | \$1,440,000 |
| Clark | Clark County pavement markings | This would replace the deteriorating pavement markings (centerline, edgeline, lane line and channel line) on county roads in Clark County. | Clark County Engineer | 10 | 0 to 30 days | \$290,000 |
| Clark | Clark County pavement markings | This would replace the deteriorating pavement markings (centerline, edgeline, lane line and channel line) on county roads in Clark County. | Clark County Engineer | 10 | 0 to 30 days | \$290,000 |
| Clark | Bechtle Avenue Bridge Replacement | ODOT Project ID: 85172 The funds requested are only for the Preliminary Engineering and Right of Way costs, \$140,000 and \$30,000 respectively for the Bechtle Avenue Bridge. | Clark County Springfield Transportation Coordinati | 10 | 181 days or more | \$170,000 |
| Clark | Crystal Lakes Drainage Restoration Project | This project would dredge and restore water flow to approximately 1500 feet of channels varying from 15 to 20 feet in width that connect and drain four small glacial lakes. The community of Crystal Lakes was developed in the early 1900's around these lakes with summer cottages and has become a full-time community over the years; it is classified on the census as a low to moderate income area. The lakes, channels, and waterfront property are all owned by the Crystal Lakes Property Owners Association, a federally chartered non-profit organization. The channels have silted in over the years and the organization has no money to dredge them. The concern is that during rainy periods water fills the channels, properties, road right-of-ways, and many road surfaces. The roads are owned and maintained by the township and can become a safety concern with the flooding and eroding of material near them. | Bethel Township | 5 | 91 to 180 days | \$150,000 |
| Clark | Giving Stimulus--Community Poverty Mentoring Inti | Mountain/Circles campaign from five sites in Ohio to 15 around the state. The Circles Campaign is a transformational, high-impact approach that partners volunteers and community leaders with families in need. Circles is designed to help many demographics, including displaced or unemployed Ohio workers. It involves business/government leaders, community organizations and individuals in an ongoing local discussion that results in the development of a long-term action plan to end poverty. It makes systemic changes in community needed to eliminate barriers and impact poverty. The current economic downturn has only accelerated the problems facing Ohioans--Circles is actively working to provide resources, support, counseling and mentorship opportunities to those facing unemployment and are living in poverty. With an increased demand for services, Circles works to empower those with mentorship, support and career counseling. Circles is in need of the resources required to address this growing demand for services in Ohio. | Move the Mountain/Circles Campaign | 60 | 31 to 90 days | \$500,000 |
| Clark | Hertzler House Restoration | Project would clean and repaint 2 story brick 1854 Hertzler House, replace 20' spouting, fix fireplace chimney and replace wood cook stove in kitchen. Outside spotlights would be replaced with energy efficient lights; 12' stone retaining wall would be repaired as well as stone walkway. | Hertzler House Advisory Committee | 10 | 91 to 180 days | \$8,000 |
| Clark | Police Officer Position's | This request is to have funds for two more full time officer's hired at our department. This is to assist in the call volume and trying to keep the proactive police presence to assist in keeping the crime level down. | Village of Enon Police Department | 2 | 0 to 30 days | \$100,000 |
| Clark | Cruiser update | This request is to have two new cruisers. This is to replace two older cruisers that are in need of replacement. The new cruisers would allow for the older ones to be replaced and the money saved to be placed into other funds where needed to assist in funding of training and other equipment needed to operate the department. | Village of Enon Police Department | 2 | 31 to 90 days | \$80,000 |
| Clark | K-9 program | This request is for mules to start and maintain a k-9 program for the Enon Police Department. This unit would be able to assist in the combating of drugs in and around our neighborhoods. This unit would also be utilized as a public resource in a public relations atmosphere at the school and community level. | Village of Enon Police Department | 1 | 181 days or more | \$10,000 |
| Clark | Evidence Collection cameras | This request is for in car cameras for four vehicles. This request would allow for better evidence collection while on Traffic stops and crime scenes. This would also be able to be used to prevent frivolous complaints or lawsuits against officer's. | Village of Enon Police Department | 0 | 91 to 180 days | \$30,000 |
| Clark | Community & Migrant Urgent Care Center | We need 10,000 sq ft of office and clinic areas as well as sitework, parking, lighting and underground utilities. Our community has one of the fastest growing Hispanic populations in Ohio and we are in desperate need of local healthcare for these people (migrants) as well as the local residents. This facility would be built next to our local YMCA that already has an information and referral program (Casa Amiga) who would also assist in interpretation and referral to the facility. The Center would provide 35 to 50 new jobs to the local economy and stimulate other planned healthcare services for the elderly and specialty services such as cardiac and dialysis programs. Your consideration for this project would greatly be appreciated by all of our community and people of Clark county. | A.R.Ashbaugh Inc | 50 | 91 to 180 days | \$4,000,000 |
| Clark | EU Approved Barn | Construction of new European Union approved bull housing barn. This barn is designed to house twenty-four bulls who have been approved for semen export to the European Union. | RC Agri Genetics, LLC | 8 | 31 to 90 days | \$75,000 |
| Clark | Enon Community Center | Community Health Center for the Village and the surrounding Township. Land will be donated and project would facilitate the hiring of approximately 6-8 employees on a part & full time basis after project is complete. At the present we do not have any facilities in are community to get are Kids off the streets and into a community center and get involved in sports and swimming, basket ball, exercise. This facility would also be open for adults and our older citizens. The population that the center would cover would be around 15,000 residents. | Village of Enon | 10 | 31 to 90 days | \$750,000 |
| Clark | Park Layne Upper Plat Collection System | This project affects fourteen streets in the upper portion a housing development with 5,000 mostly LMI residents. This part of the plat was installed without storm drains, and all storm water run-off flows to the lower area of the housing development. The storm water flows to two collection streets and then down a steep hill to the creek below. This flow creates flooding and safety hazards on the roadways during moderate to heavy rains. Debris, mud, and gravel are washed onto the road surfaces. Road and curb deterioration as well as possible bridge structural damage are all concerns of the township. This project would require engineering and developing a storm water collection system for this upper portion to collect and move water to a detention pond/area in the lower plat area before entering the existing system for the lower plat of the housing development. The township owns the land where the detention pond would be build, and it is part of a large park. | Bethel Township | 30 | 91 to 180 days | \$950,000 |
| Clark | Park Layne Catch Basin Replacement Project | We are requesting funding for replacement of 150 catch basins out of a total 308, in a 50 year old subdivision with approximately 5,000 residents. We have been replacing about 10 per year for about five years, but the rate of collapse is accelerating beyond our ability to fund adequate replacements. The failing catch basins are affecting the ability of the stormwater system to effectively carry water from the streets, and this will become increasingly critical over time. Large portions of this subdivision are qualified as LMI on the census, and other parts have been qualified by door-to-door surveys. I believe the entire subdivision would qualify now if surveyed | Bethel Township | 10 | 31 to 90 days | \$225,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Clark | Fernciff Boulevard Neighborhood Renewal | The focus of this project will be the redevelopment of Fernciff Boulevard neighborhood, a significantly blighted area located between the new downtown hospital and Wittenberg University. In this neighborhood, the housing stock and property are in a state of long-term underutilization. Moreover, the negative physical appearance of the area and the introduction of undesirable elements create an environment that is unsafe and unappealing to residents, students, and visitors. The project includes the upgrading of existing roads and sidewalks; the addition of pocket parks, pedestrian paths, streetlights, and signage; and the installation of fencing and landscaping along Fernciff Boulevard overlooking downtown and the new hospital complex. The proposed investment will ensure the long-term stability of the Fernciff Boulevard Neighborhood; increase resident, student, and visitor access to downtown; and bring future economic development to the community. | Wittenberg University | 14 | 91 to 180 days | \$2,000,000 |
| Clark | Development of 4 Acre Green Space for Recreation | The proposed project will convert the former area of an existing school building into a green space to be used for recreation by the Wittenberg community and the local neighborhood. The site is located between the struggling College Hill neighborhood to the south and upper middle class neighborhoods to the north. Development of this site will help stabilize the declining urban neighborhoods to the south and east. The development of the green space on newly purchased land includes the relocation of utilities currently on the site and the re-grading, seeding, and landscaping of the area to enhance the neighborhood and create an attractive venue for recreational and general use. | Wittenberg University | 30 | 0 to 30 days | \$199,000 |
| Clark | Construction of a Facilities Management Bldg. to P | building in downtown Springfield currently located on property designated for redevelopment. The site of the existing building is strategically located at the intersection of the new hospital, the Wittenberg campus, and the concentration of downtown commercial and retail establishments. redevelopment of this site is key to the city's plans for urban renewal. A developer for this site has been identified, and the university is a key collaborator on plans for a mixed use and retail project. Plans cannot move forward until this property is available. Ultimately, a revitalized downtown will attract 1000's of new jobs to the Greater Springfield area and spur economic development. The new facilities management building will house centralized warehouse space, craft shops for university maintenance departments, and office space for Physical Plant Management, Business Services, Grounds Services and Custodial Services. The site for the new building is owned by the university and ready for construction. The project will utilize energy efficient systems | Wittenberg University | 100 | 31 to 90 days | \$3,200,000 |
| Clark | Dist 7, PID 77495, CLA US 42 0.00 | Resurfacing | Ohio Department of Transportation | 28 | 31 to 90 days | \$976,121 |
| Clark | Dist 7, PID 83189, CLA SR 54 5.61 | Bridge Deck Overlay | Ohio Department of Transportation | 25 | 31 to 90 days | \$190,602 |
| Clark | Dist 7, PID 84494, CLA IR 675 0.00 | Removal And Replacement Of Guide Signs And Supports (As Required) On Mainline, Ramps, Anc Overpass Intersections, As Per Odot Design Standards. | Ohio Department of Transportation | 12.2 | 31 to 90 days | \$426,473 |
| Clark | Renovation of Blair Hall for Teacher Education | Renovation of Blair Hall, a 21,400 sq. ft. academic building housing the Education Department, includes the transformation of a structure built in 1926 into a flexible, highly efficient, modern facility for preparing 21st century teachers. The project is green sensitive, incorporating highly efficient systems, as well as green construction materials. Renovation priorities include electrical upgrades, conversion of a black box theater into a multi-use facility, air conditioning, smart technology, painting, a new roof, ADA compliance, group work areas, and social gathering places. Blair Hall is the home to numerous regional initiatives advancing K-12 education. Wittenberg annually graduates more than 60 teachers in 14 licensure programs. Over 65 % of Wittenberg graduates teach in Ohio following graduation. Its graduate program trains practicing teachers from districts throughout the region. | Wittenberg University | 100 | 0 to 30 days | \$4,300,000 |
| Clark | Repair or Replacement of Roof Systems on 13 Buildi | Stately trees and beautiful flowers are breathtaking. However, our historic buildings require exterior and interior renovations to provide a quality academic environment that fosters learning and creativity. New roofs are often the highest priority to protect interior spaces prior to their renovation. The proposed project calls for the repair or replacement of roof systems on 13 university buildings. Improvements include slate roof replacements, metal roof systems, shingled roofs, and flat roofs of varying kinds. | Wittenberg University | 50 | 0 to 30 days | \$2,400,000 |
| Clark | Renovation of Six University Residence Halls | The renovation of six university residence halls will include the replacement of all furnishings, renovation of bathroom facilities, and exterior masonry repairs. The project is green sensitive, incorporating highly efficient systems. Renovation can begin immediately. It is well established that universities are engines of economic development in urban communities. Wittenberg University is a key asset to the City of Springfield. The city's success and the university's success are inextricably tied to one another. Investment in the renovation and maintenance of university buildings and property will attract 21st century students, contribute to urban revitalization, and demonstrate commitment by the broader community to the region's future. | Wittenberg University | 50 | 0 to 30 days | \$2,500,000 |
| Clark | Ohio Circles Campaign | Match people across class and race lines to form intentional relationships that are supported by both formal and informal resources. To educate and change the community mindset about poverty issues and prepare a sustainable community for the next generation who have a future story and choose education and work instead of poverty cultures. To advocate for poverty issues and engage those in positions of power to change systems, infrastructures and policies that will allow a large number of families to escape poverty across the state. To join with a national campaign that in 3 years will impact 25,000 families from generational poverty and 75,000 middle class/wealth families in ending poverty in the US as we know it. To have greater access to informal resources as a result of these intentional relationships and to create a sense of urgency about how to solve poverty without the burden being on government - that people need to support people and only through stable relationships across class lines can this happen. | Think Tank, Inc. | 10 | 0 to 30 days | \$500,000 |
| Clark | Renovation of a Central Steam Plant & Campus Field | The renovation of the Central Steam Plant and campus Field House replaces a 40+ year old, inefficient steam plant with a highly efficient, dual fueled steam generation plant that will provide steam heating for ~ 70% of campus. Also included are the upgrade of very inefficient lighting systems and some renovation and remedial work required in departmental offices. Engineering and design has been completed, and the project can begin immediately. | Wittenberg University | 50 | 0 to 30 days | \$2,035,000 |
| Clark | Dist 7, PID 77495, CLA US 42 0.00 | Resurfacing | Ohio Department of Transportation | 28 | 31 to 90 days | \$976,121 |
| Clark | Dist 7, PID 77495, CLA US 42 0.00 | Resurfacing | Ohio Department of Transportation | 28 | 31 to 90 days | \$976,121 |
| Clark | Southern Interceptor Water Line | Water line extension from SR 72 to Burnett to E. Leffell Lane | City of Springfield | 25 | 181 days or more | \$1,500,000 |
| Clark | WTP Emergency Generator | Back-up power supply for treatment plant and wellfield. | City of Springfield | 10 | 181 days or more | \$650,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Clark | Lawrenceville Water Line | 12-inch water main and elevated tank for residential fire demands, residential and business water needs. | City of Springfield | 65 | 181 days or more | \$4,535,000 |
| Clark | North Urbana Road | Extend sanitary sewer from Tremont City Road north 16,000 feet | City of Springfield | 25 | 181 days or more | \$1,500,000 |
| Clark | Tremont City Sewer Line | Extend sanitary Sewer from Moors Run to Tremont City - includes sanitary lift station | City of Springfield | 65 | 181 days or more | \$1,750,000 |
| Clark | WWTP Emergency Generator | Back-up power supply for treatment plant | City of Springfield | 15 | 31 to 90 days | \$650,000 |
| Clark | Mill Creek Sewer Replacement | Replace existing trunk sewer to prevent infiltration and improve flows | City of Springfield | 10 | 31 to 90 days | \$600,000 |
| Clark | WWTP CSO Improvements | Construct permit required wet weather HRC; expand plant capacity to facilitate development and additional HRC pollutant capture. | City of Springfield | 150 | 181 days or more | \$70,000,000 |
| Clark | Erie Express Sanitary Sewer | Construct extension of Erie Sanitary Interceptor directly to treatment plant. This is a permit required wet weather project. | City of Springfield | 45 | 181 days or more | \$9,000,000 |
| Clark | Southern Gateway (Phase 2) | Streetscape the South Limestone corridor with trees and hedges along property frontages. Project may include creating a tree lined median boulevard. | City of Springfield | 425 | 31 to 90 days | \$1,000,000 |
| Clark | NTPRD - Snyder Park Bridge | Renovation of the old stone bridge that has been in the park approximately 60 plus years | City of Springfield | 10 | 181 days or more | \$225,000 |
| Clark | Blee Road (Repaving and Widening) | Reconstruction of 3,750 lineal feet of roadway known as W. Blee Road - east of SR 72 to Springfield Beckley Municipal Airport. | City of Springfield | 100 | 181 days or more | \$750,000 |
| Clark | East 40 Transmission Line and Booster Pump | New water booster station at Garden Acres and 26,000 feet of transmission line to loop with high pressure district. | City of Springfield | 65 | 181 days or more | \$6,250,000 |
| Clark | Sugar Grove Water System Replacement | The current system is in constant disrepair and does not provide an adequate water supply to the residents. The replacement water line will resolve the persistent maintenance problem and provide a sustained water service line to the area. | City of Springfield | 7 | 31 to 90 days | \$500,000 |
| Clark | Upper Valley Pike Water Line Extension | Install 5,300 feet of 16-inch water line to loop system. | City of Springfield | 25 | 181 days or more | \$525,000 |
| Clark | WWTP Wet Weather Effluent Pump Station | Install emergency back-up pumps to keep plant in operation during high river staging | City of Springfield | 20 | 31 to 90 days | \$450,000 |
| Clark | State Route 794 Realignment | Realignment of SR 794 to provide appropriate distance between OAG Base and State highway - meeting DOD antiterrorism standards and providing better access for Springfield-Beckley Municipal Airport and Airpark/Ohio industrial park. | City of Springfield | 2,100 | 181 days or more | \$2,800,000 |
| Clark | Prime Ohio 2 (Roads and Utilities) | Development of "shovel ready" sites east of I-70 and south of SR 41 (Prime Ohio II). Expansion to industrial park. | City of Springfield | 300 | 181 days or more | \$2,500,000 |
| Clark | Lagonda International Redevelopment | Redevelopment of existing industrial site - formerly occupied by International Harvesters. Installation of roads and utilities; spec. building. | City of Springfield | 300 | 181 days or more | \$6,000,000 |
| Clark | Veteran's Bridge | Replacement of existing bridge - entrance to urban core - bridge is over 60 years old. | City of Springfield | 1,630 | 31 to 90 days | \$2,500,000 |
| Clark | Buck Creek Whitewater Project | This is for the removal of low-head dams from Buck Creek waterway along with the introduction of natural backfill material in an effort to improve both the natural habitat and the recreational safety of the stream. | City of Springfield, Ohio | 15 | 31 to 90 days | \$1,500,000 |
| Clark | Major Resurfacing Project for Arterial Streets | The wearing surface on these streets are deteriorated and are in need of resurfacing. Approximately 54,700 lineal feet of roadway resurfacing. | City of Springfield | 50 | 31 to 90 days | \$2,000,000 |
| Clark | Former South High School Renovation and Reuse | This is for the adaptive reuse of the historic South High School building in an effort to provide space for the YMCA, Elderly United, and other community or recreational users | City of Springfield, Ohio | 500 | 181 days or more | \$18,000,000 |
| Clark | Traffic Signal at Villa & Red Coach | Intersection meets warrant for signal. The signal would provide for a safer intersection. Allow for a safer flow of traffic due to increased volume from Bechtle Avenue extension | City of Springfield | 5 | 31 to 90 days | \$75,000 |
| Clark | Bridge Repair and Maintenance Project | To extend the life of the bridges and in many cases would raise the rating of the individual bridges | City of Springfield | 5 | 31 to 90 days | \$250,000 |
| Clark | Former Community Hospital Reuse and Renovation | This is for the adaptive reuse of the former Community Hospital site to provide space for office for research and technology industry users. Community Hospital will relocate their operations to a new downtown hospital in 2012. | City of Springfield, Ohio | 3,100 | 181 days or more | \$10,000,000 |
| Clark | NTPRD - Road Resurfacing | Road resurfacing in Snyder, Old Reid and Davey Moore Parks. | City of Springfield | 20 | 31 to 90 days | \$1,020,000 |
| Clark | Energy-Related Infrastructure project for all City | This is to install solar panels on the City Hall, Police Station, Central Fire Station, and Service Department buildings. | City of Springfield, Ohio | 25 | 181 days or more | \$1,500,000 |
| Clark | NTPRD - Bike Trail Resurfacing | Spot resurfacing and seal coating for 17 miles of multi-use recreational trails. | City of Springfield | 15 | 31 to 90 days | \$320,000 |
| Clark | Family Recreation Center Construction | This is for the construction of a full service family recreation center that would include: gymnasium space, fitness space, multi-purpose rooms, an aquatic center, an elevated walking track, and meeting rooms. | City of Springfield, Ohio | 170 | 181 days or more | \$12,000,000 |
| Clark | Partial demolition and Partial reuse of Former Cro | This is for the partial demolition and partial renovation and reuse of a 1,000,000 sq. ft. manufacturing building located in the center of downtown. | City of Springfield, Ohio | 850 | 181 days or more | \$15,000,000 |
| Clark | East Home Road Reconstruction (Balsam to Spish Sp | Volume of traffic has caused the outside lanes to fail. Project would also widen the roadway, which will aid in increasing the LOS. Approximately 6,482 lineal feet of roadway improvements | City of Springfield | 15 | 31 to 90 days | \$1,000,000 |
| Clark | Purchase of Survey Equipment | This is for the purchase of new survey equipment for the City of Springfield, Ohio so that we can continue to provide the survey work necessary to support certain road and utility projects throughout the City. The current equipment is outdated because of software changes and new technology. | City of Springfield, Ohio | 2 | 0 to 30 days | \$100,000 |
| Clark | Villa Road and Middle Urbana Road Improvement | These two projects would increase the capacity of the roadways and also the LOS | City of Springfield | 30 | 181 days or more | \$4,000,000 |
| Clark | Olive Branch School Renovation | The renovation of Olive Branch School is based on its inclusion in the National Register of Historic Places. Originally built in 1908 it served as a school for students of western Clark County into the 1970's and currently is a warehouse for the Tecumseh Local Schools District. The vision for the building is that it will be a Central Office for the district including a Board of Education Meeting Room, a Community Center for residents to conduct meetings, and a museum for the preservation and display of local artifacts. The scope of work will include: exterior cleaning, spot tuckpointing, stucco repair, window repair, step replacement, new doors, handrailing, landing replacement, pillar restoration, roof replacement, demolition/abatement, woodwork restoration/ replacement, plastering, electrical work, plumbing, lighting, landscaping, water, security, sprinkler system, heating/ cooling, wall and floor finishing, technology, architecture, inspection. | Olive Branch School Preservation Society | 300 | 31 to 90 days | \$1,600,000 |
| Clark | Harding Road Reconstruction | Repair failed street base and resurface from North Yellow Springs Street to Fountain Avenue. Approximately 2,600 lineal feet of street reconstruction. | City of Springfield | 30 | 31 to 90 days | \$1,000,000 |
| Clark | National Trails Parks and Recreation Reid Golf Cou | This is for the renovation of the existing Reid Golf Course Clubhouse in an effort to enhance the kitchen and dining space in order to accommodate large banquet crowds. | City of Springfield, Ohio | 45 | 181 days or more | \$615,000 |
| Clark | Downtown Intermodal Facility Construction | This is for the construction of a downtown intermodal facility to allow a traveler to change from one transportation mode to another in order to reach any destination throughout the city. It will allow additional space and facilities for travelers, including parking, non-transit retail, and other services. | City of Springfield, Ohio | 850 | 181 days or more | \$10,000,000 |
| Clark | City Hall Parking Garage and Plaza Repairs | This is to replace the existing plaza surface, repair the concrete columns in the parking garage, and to seal the exterior of the garage. | City of Springfield, Ohio | 15 | 181 days or more | \$2,000,000 |
| Clark | Streetscape (Main Street to McCreight) | Streetscape project is one component of overall infrastructure improvements connecting Wittenberg University with Springfield's urban core. Project will include streetscape elements - sidewalk, curb, gutter, benches, trees, planters, and trash receptacles. Project continues urban redevelopment efforts downtown by connecting infrastructure improvement from downtown to university - approximately 5,200 lineal feet. | City of Springfield | 500 | 31 to 90 days | \$1,500,000 |
| Clark | East Side Fire Station Construction | This is for the construction of a new fire station/ community center to provide fire, rescue, and EMS protection to two industrial parks and one technology park within NFPA guidelines | City of Springfield, Ohio | 32 | 181 days or more | \$3,000,000 |
| Clark | Relocation of Fire Station One | This is for the construction of a fire station in an area that will directly support the new downtown hospital that is currently under construction as well as Wittenberg University. This station will provide fire, rescue, and EMS protection within NFPA guidelines | City of Springfield, Ohio | 32 | 181 days or more | \$5,000,000 |
| Clark | Three "C" Terminal Building Construction | This is for the land acquisition, construction of a terminal building, and a rail platform for an Amtrak train to connect Cleveland-Cincinnati corridor. This site will provide a rail stop in downtown Springfield along this line. | City of Springfield, Ohio | 5,015 | 31 to 90 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Clark | PrimeOhio (resurfacing, restructuring, street light) | The current roadway is in need of repair to support the current levels of truck and car traffic in the industrial park. Estimated 7,693.7 lineal feet of resurfacing, restructuring and associated street lighting. | City of Springfield | 500 | 31 to 90 days | \$850,000 |
| Clark | Downs Army Reserve Center renovation and communica | This is for the renovation to the interior to allow for the addition of a County wide Communication Center (PSAP), and for Fire Division Training. | City of Springfield, Ohio | 38 | 181 days or more | \$5,000,000 |
| Clark | Public Safety Training Facility Construction | This is to prepare a site for a public safety training facility. This includes installing water lines, controlling for water runoff, installing roadways through the facility's training grounds, installing training pads, constructing a security fence around the perimeter of the facility, building a metal structure, and constructing a masonry burn room. | City of Springfield, Ohio | 15 | 31 to 90 days | \$2,000,000 |
| Clark | National Trails Parks and Recreation Ice Arena Con | This is for the land acquisition and construction of an ice arena through the National Trails Park and Recreation District. | City of Springfield, Ohio | 125 | 31 to 90 days | \$6,000,000 |
| Clark | Garden Acres Water Line | Water line extension to Garden Acres Subdivision | City of Springfield | 35 | 181 days or more | \$1,750,000 |
| Clark | Limecrest Water Line | Water line extension - approximately 18,750 lineal feet - from SR 72 along Highway to Selma to East Leffel Lane | City of Springfield | 25 | 181 days or more | \$1,700,000 |
| Clark | East 40 Sewer and Pump Station | Construct lift station and sewer from Tuttle to east of I-70 to serve US 40 corridor | City of Springfield | 80 | 181 days or more | \$4,000,000 |
| Clark | CSO Phase II | Construct balance of CSO improvement projects. | City of Springfield | 150 | 181 days or more | \$100,000,000 |
| Clark | 12" Water Main | Installation of 12-inch line to loop system for fire flows and back-up feed | City of Springfield | 25 | 181 days or more | \$385,000 |
| Clark | Redevelopment of Former International Lagonda Body | This is for the redevelopment of the former International Lagonda body plant property located at 2069 Lagonda Avenue, Springfield, Ohio 45504. The City of Springfield has already secured \$5 million from the State of Ohio to remediate the site. This request is for additional money to continue the redevelopment by adding necessary infrastructure (roads and utilities) for the completion of a light industrial park. This will also support the construction of a spec building located on five acres of the 60 acre tract of land. | City of Springfield, Ohio | 2,100 | 181 days or more | \$6,000,000 |
| Clark | Replacement of High Service Pump | Replace two 700 HP pumps due to obsolescence and energy efficiency | City of Springfield | 15 | 31 to 90 days | \$1,500,000 |
| Clark | Springfield-Beckley Municipal Airport Taxiway "A" | This is for the reconstruction of 3,525 lineal feet of Taxiway "A" at the Springfield-Beckley Municipal Airport. | City of Springfield, Ohio | 1,500 | 181 days or more | \$930,000 |
| Clark | AirparkOhio East Roads and Utilities | This is for the acquisition and development of infrastructure for shovel-ready sites east of the Springfield-Beckley Municipal Airport. | City of Springfield, Ohio | 750 | 181 days or more | \$5,500,000 |
| Clark | AirparkOhio Phase 2 Roads and Utilities | This project is for roadway and utility construction for AirparkOhio Phase 2. This would also provide for the removal of trees and a lift station. | City of Springfield, Ohio | 620 | 31 to 90 days | \$500,000 |
| Clark | Springfield-Beckley Municipal Airport Runway Repal | This project is for the reconstruction of portions of runway 6/24 at the Springfield-Beckley Municipal Airport. This would alleviate safety barriers at the airport. | City of Springfield, Ohio | 1,500 | 31 to 90 days | \$500,000 |
| Clark | Springfield-Beckley Municipal Airport Fencing | This would provide wildlife fencing for Springfield-Beckley Municipal Airport. | City of Springfield, Ohio | 0 | 0 to 30 days | \$500,000 |
| Clark | Springfield-Beckley Municipal Airport Apron for C- | This project would be for the construction of an airport apron for business operations at the Springfield-Beckley Municipal Airport. This would provide necessary accommodations for C-17s. | City of Springfield, Ohio | 50 | 31 to 90 days | \$750,000 |
| Clark | Springfield-Beckley Municipal Airport Apron for Pr | This project is for the construction of an airport apron to accommodate for a private business development expansion at the Springfield-Beckley Municipal Airport | City of Springfield, Ohio | 100 | 31 to 90 days | \$200,000 |
| Clark | Springfield-Beckley Municipal Airport T-Hangar Con | This project is the construction of T-Hangars at the Springfield-Beckley Municipal Airport, which will provide support for corporate and general aviation needs. | City of Springfield, Ohio | 500 | 31 to 90 days | \$4,000,000 |
| Clark | Springfield-Beckley Municipal Airport Utilities | This is for the construction of a sewer utility line in order to connect the Souther Interceptor Sewer Line to the Springfield-Beckley Municipal Airport. This would also be for the removal of a package plant. | City of Springfield, Ohio | 2,120 | 181 days or more | \$2,000,000 |
| Clark | Airport Maintenance Hangar 2 Renovations | Addition of thirty to forty parking spaces, energy efficient windows, and hangar doors to Maintenance Hangar 2 to accommodate for Select Tech a new employer with 50 high-paying jobs. | City of Springfield, Ohio | 60 | 31 to 90 days | \$190,000 |
| Clark | miscanthus planting stock | Develop facilities and processes associated with bringing to market planting stock for miscanthus x giganteus. We are specializing in rhizome production in the field as well as climated controlled facilities. Using corn or switchgrass to produce enough ethanol to offset 20 percent of gasoline use - a current White House goal - would take 25 percent of current U.S. cropland out of food production, the researchers report. Getting the same amount of ethanol from Miscanthus would require only 9.3 percent of current agricultural acreage. (To view an audio slideshow about Miscanthus research, please go to: http://www.publicaffairs.illinois.edu/slideshows/Miscanthus_Yield/index.html). Research indicates Ohio's climate and soils are ideal for large scale miscanthus production. Our goal is to position company to be primary supplier of planting stock for large scale planters. ODOT PID: 85975 | dooley nursery | 20 | 91 to 180 days | \$2,000,000 |
| Clark | Fountain Avenue Resurfacing and Streetscape | The project will resurface Fountain Avenue as well as provide new streetscaping. All federal regulations will be met by 5/29/2009. | Clark County Springfield Transportation Coordinati | 20 | 31 to 90 days | \$1,168,253 |
| Clark | Medium Duty Transit Vehicles | Replacement of Springfield City Area Transit fixed-route buses with medium duty transit vehicles. The current fixed-route fleet includes vehicles that are 16 years old (4 years beyond the suggested vehicle life). Medium duty chassis are built here in Ohio and the purchase of these vehicles will support local work forces, reduce emissions, reduce the cost of operating the transit system and vehicles can be purchased for about 60% of the cost of a standard fixed-route bus. Medium duty vehicles also provide flexibility to offer a variety of services to the passengers. Many jobs are indirectly involved in the production of these vehicles, over and above the number of jobs previously listed as retained. | Clark County-Springfield Transportation Coordinati | 26 | 91 to 180 days | \$815,000 |
| Clark | SCAT Maintenance Facility Improvements | Repair and revitalization of the 20 year-old transit maintenance facility. The facility is in need of a new roof with re-routed roof drainage, replacement of HVAC systems and interior repairs. It is anticipated that this project will reduce the cost of operating this facility by replacing the worn HVAC system with high-efficiency equipment and replacing the worn roof with a maximum lifetime membrane roof. It is anticipated that this project will utilize local contractors and create employment for numbers over and above that number listed as retained. | Clark County - Springfield Transportation Coordina | 26 | 91 to 180 days | \$150,000 |
| Clark | SCAT Preventive Maintenance Project | Funding is requested for preventive maintenance of the 23 vehicle fleet of Springfield City Area Transit. Funding will be used for much needed parts that will be utilized to maintain an aging fleet of fixed-route vehicles as well as light and medium duty vehicles. It is anticipated that this project will utilize local contractors and create employment for numbers over and above that number listed as retained. | Clark County-Springfield Transportation Coordinati | 26 | 91 to 180 days | \$183,714 |
| Clark | Medium Duty Transit Vehicles | Replacement of Springfield City Area Transit fixed-route buses with medium duty transit vehicles. The current fixed-route fleet includes vehicles that are 16 years old (4 years beyond the suggested vehicle life). Medium duty chassis are built here in Ohio and the purchase of these vehicles will support local work forces, reduce emissions, reduce the cost of operating the transit system and vehicles can be purchased for about 60% of the cost of a standard fixed-route bus. Medium duty vehicles also provide flexibility to offer a variety of services to the passengers. Many jobs are indirectly involved in the production of these vehicles, over and above the number of jobs previously listed as retained. | Clark County - Springfield Transportation Coordina | 26 | 91 to 180 days | \$282,874 |
| Clark | Dist 7, PID 85932, Springfield 8 medium duty buses | Purchase 8 medium duty buses for Springfield City Area Transit | Ohio Department of Transportation | 22 | 31 to 90 days | \$1,315,000 |
| Clark | Cruisers | This project is requested to replace two existing older model cruisers. The cost saved by replacing these cruisers would allow for better training and retention of officer's | Village of Enon Police Department | 0 | 91 to 180 days | \$80,000 |
| Clark | Spangler Road Bridge | The project would repair and paint the Spangler Road Bridge in southwestern Clark County. All federal regulations will be met by 4/30/2009. | Clark County Springfield Transportation Coordinati | 18 | 31 to 90 days | \$302,500 |
| Clark | BAC Machine | This would allow the officer's to better utilize thier time and resources available in enforcement and reduction of crime. | Village of Enon Police Department | 0 | 31 to 90 days | \$5,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Clark | Prime Ohio Infrastructure | ODOT PID: 85977 The project would provide for the reconstruction and resurfacing of the roads throughout the Prime Ohio Industrial Park. The project will also include the installation of streetlights. All federal regulations will be met by 5/29/2009. | Clark County Springfield Transportation Coordinati | 2200 | 31 to 90 days | \$562,796 |
| Clark | Dist 7, PID 85933, Springfield facility improvemen | Facility improvements for Springfield City Area Transit | Ohio Department of Transportation | 3 | 91 to 180 days | \$150,000 |
| Clark | Dist 7, PID 85936, Springfield facility rehab | Facility rehabilitation for Springfield City Area Transit - Market Square bus center ticket vending system and miscellaneous improvements | Ohio Department of Transportation | 6 | 91 to 180 days | \$300,000 |
| Clark | Church Street Resurfacing | ODOT PID: 85978 This project will provide for the repaving of Church St. in the City of New Carlisle. All federal regulations will be met by 7/20/2009. | Clark County Springfield Transportation Coordinati | 12 | 31 to 90 days | \$241,612 |
| Clark | Sidewalks, curbs and gutters | The Village of Tremont City has seriously deteriorating sidewalks and has no gutters presently. There are stormwater issues that also need to be addressed as well as the new for water and sewer. Sidewalks are crumbling and an estimate would be about 3,000 ft needing replaced or built. Curbing is non-existent on all streets, therefore there is no control of stormwater flow in the Village. Several recent projects have installed storm water drain and piping, but it eventually flows into farmer's fields and not into a nearby waterway named Mad River. Estimate is for a need of 4,000 ft of curbing. The Village is small, 500 pop in an area of less than 1/2 sq mile. Lots are 50' each in width with all lots on septic systems with many in need of repair. All properties (about 125) have water wells that are located generally within 50' of septic systems. Pressurized water from a treatment plant is desperately needed. | Village of Tremont City, Clark County 45372 | 10 | 181 days or more | \$4,000,000 |
| Clark | Dist 7, PID 85935, Springfield Prew maintenance | Preventive maintenance for Springfield City Area Transit | Ohio Department of Transportation | 11 | 0 to 30 days | \$532,428 |
| Clark | Clark County raised pavement markings | This would install raised pavement markings on county roads in Clark County to improve safety for the users of the roads. ODOT PID: 85979 | Clark County Engineer | 25 | 0 to 30 days | \$95,000 |
| Clark | Upper Valley Pike Resurfacing | The project would include the resurfacing of the Upper Valley Pike in southern Clark County. All federal regulations would be met by 8/1/2009. | Clark County Springfield Transportation Coordinati | 20 | 31 to 90 days | \$560,000 |
| Clark | Clark Bridges Load Ratings | The project would consist of completing a load ratings analysis investigation for Clark County Ohio | Clark County Springfield Transportation Coordinati | 10 | 31 to 90 days | \$225,000 |
| Clark | Croft Road resurfacing | This project would preserve & improve existing infrastructure to an acceptable level of service as well as improve the safety for the users with new pavement markings. Croft Road is classified as a rural major collector on the rural functional classification through ODOT's Technical Services Committee | Clark County Engineer | 25 | 0 to 30 days | \$340,000 |
| Clark | Derr Road resurfacing | This project would preserve & improve existing infrastructure to an acceptable level of service as well as improve the safety for the users with new pavement markings. Derr Road is classified as a rural major collector on the rural functional classification through ODOT's Technical Services Committee. | Clark County Engineer | 25 | 0 to 30 days | \$340,000 |
| Clark | Upper Valley Pike resurfacing | This project would preserve & improve existing infrastructure to an acceptable level of service as well as improve the safety for the users with new pavement markings. Derr Road is classified as a Rural Collector/rural major collector on the rural functional classification through ODOT's Technical Services Committee. | Clark County Engineer | 25 | 0 to 30 days | \$630,000 |
| Clark | PARKING LOT DRAINAGE AND PAVING | Health and Safety Project to reduce worker injuries and wear / tear on vehicles. Parking lot is currently gravel with poor drainage. The surface is quick to ice over, and remains iced over long after pavement has cleared. Mud sink hole occur at high moisture times. Constant grading of the gravel to maintain a relatively level surface is required. The parking area has been identified by BWC as a health and safety risk area for employees. The drainage project will also reduce icing in an adjoining parking lot due to storm water runoff. We may be able to subsidize a portion of the project cost: This project would preserve & improve existing bridge infrastructure. This project includes structural repairs as well as cleaning and painting the bridge. In addition this would allow analysis of the gusset plates. | CLARK COUNTY BOARD OF MRDD | 15 | 91 to 180 days | \$225,000 |
| Clark | Croft Road bridge repairs | This project would repair pavement throughout the City of Springfield and will have met all federal requirements by 4/3/2009. | Clark County Engineer | 25 | 31 to 90 days | \$210,000 |
| Clark | Springfield Pavement Repair | The project would repair pavement throughout the City of Springfield and will have met all federal requirements by 4/3/2009. | Clark County Springfield Transportation Coordinati | 10 | 0 to 30 days | \$225,000 |
| Clark | WATER SUPPLY IMPROVEMENTS | a depth of approximately 85 feet. Install submersible pump and motor with pitless adaptor, flow meter, and meter pit. Estimated water production at 1500 gpm. New pump installation in existing production well #1 along with paving access road (1650 linear feet) to wells. This project would greatly enhance the supply of water to the Enon area and help create jobs associated with the actual construction itself and ensure a plentiful supply of water for future demands associated with the commercial development located at Route 444 and Interstate 675. This development is expected to employ many Enon area and Clark County residents when completed. The Village of Enon is willing to contribute \$15,000 in estimated engineering fees required for the project. Maintaining Enon's existing wells in addition to expanding its water supply with additional wells is critical to the success of future developments, both residential and commercial. The economic impact would provide long-term employment opportunities for the Enon/Clark County region | VILLAGE OF ENON, OHIO | 7 | 31 to 90 days | \$200,000 |
| Clark | Home Road Reconstruction | ODOT PID: 85171 The project will consist of reconstructing, resurfacing, and widening Home Road in Springfield, Ohio | Clark County Springfield Transportation Coordinati | 15 | 181 days or more | \$1,950,000 |
| Clark | Harding Road Reconstruction | The project will consist of reconstructing and resurfacing Harding Road in Springfield, Ohio. | Clark County Springfield Transportation Coordinati | 30 | 31 to 90 days | \$953,000 |
| Clark | Tremont City Road Bridge | The project will consist of repairing the Tremont City Road Bridge in Clark County, Ohio | Clark County Springfield Transportation Coordinati | 15 | 0 to 30 days | \$880,000 |
| Clark | Huntington Road Reconstruction | The project will include minor widening and resurfacing on Huntington Road southeast of South Charleston in Clark County Ohio. | Clark County Springfield Transportation Coordinati | 25 | 0 to 30 days | \$675,000 |
| Clark | Croft Road Bridge Repair | The project will consist of the repair and repainting of the Croft Road bridge in Clark County Ohio. All federal requirements will be met by 5/15/2009. | Clark County Springfield Transportation Coordinati | 19 | 0 to 30 days | \$216,500 |
| Clark | Clark County Traffic Signals | Replacing the incandescent bulbs in the traffic signals with LED lights for better visibility and increased safety. All federal requirements will be met by 4/15/2009. | Clark County Springfield Transportation Coordinati | 5 | 0 to 30 days | \$50,000 |
| Clark | Springfield-Xenia and West Possum Signal Replaceme | Replace the traffic signal at the intersection of Springfield-Xenia Rd. and W. Possum Rd. in Clark County Ohio. | Clark County Springfield Transportation Coordinati | 6 | 31 to 90 days | \$125,000 |
| Clark | Clark County Pavement Markings | Repaint the pavement markings throughout Clark County to provide for increased safety for motorists and pedestrians. | Clark County Springfield Transportation Coordinati | 10 | 0 to 30 days | \$290,000 |
| Clark | Clark County Retroreflectivity | Replace the signs in Clark County to meet retroreflectivity standards. | Clark County Springfield Transportation Coordinati | 10 | 31 to 90 days | \$90,000 |
| Clark | State Route 571 Streetlights | The project would consist of installing decorative streetlighting in the City of New Carlisle along State Route 571. | Clark County Springfield Transportation Coordinati | 12 | 31 to 90 days | \$581,150 |
| Clark | Clark County Guardrail Replacement | The project will consist of installing and replacing guardrails throughout Clark County. | Clark County Springfield Transportation Coordinati | 10 | 31 to 90 days | \$370,000 |
| Clark | Clark County Bridge Painting Project | The project will consist of painting bridges throughout Clark County. | Clark County Springfield Transportation Coordinati | 5 | 0 to 30 days | \$550,000 |
| Clark | Village of Enon Main Street Reconstruction | The project will consist of resurfacing Main Street in Enon, OH and providing streetscape | Clark County Springfield Transportation Coordinati | 10 | 0 to 30 days | \$210,000 |
| Clark | Clark County bridge painting | This project would preserve & improve existing bridge infrastructure. This project includes reduce & delay the number of bridges that are posted for legal load reductions improving movement of freight Clark County received project safe neighborhoods grant for calendar year 2008 to pay for part of the costs of an assistant prosecuting attorney dedicated to prosecuting gun crimes in state court and serving as a special assistant U.S. attorney for cases in federal court. The federal grant was not renewed due to lack of funds and we are requesting stimulus funds to replace the lost PSN grant funds. | Clark County Engineer | 5 | 31 to 90 days | \$550,000 |
| Clark | Project Safe Neighborhoods | | Clark County Prosecutor's Office | 1 | 0 to 30 days | \$35,973 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Clark | Dayton Rd engineering/drainage study | This project would study the necessary improvements on the main county road connecting Enon & Springfield. This study would compliment an existing improvement project on Dayton Road and complete the entire corridor. | Clark County Engineer | 5 | 31 to 90 days | \$75,000 |
| Clark | Clark County Guardrail improvements | This project would allow for significant guardrail improvements in conformance with a study already completed. This would improve safety on many Clark County Roadways | Clark County Engineer | 10 | 31 to 90 days | \$370,000 |
| Clark | Springfield-Xenia & Possum Rd Traffic Signal | This project would allow for an upgrade of the existing traffic signal at the existing school | Clark County Engineer | 6 | 31 to 90 days | \$125,000 |
| Clark | Revitalization of Ohio's Rivers | Economic Impact: This is a green, shovel-ready, infrastructure project that will create jobs and save lives. Job creation will begin on day one and the project will be fully staffed within weeks. Real estate, building construction, and manufacturing will also benefit. Major Outcomes: This project improves all of Ohio's rivers and bridges, including water quality, erosion, and recreational safety. Preventable deaths occur on Ohio's rivers due to logjams. All dead logs will be removed from the rivers to prevent the formation of new dangerous logjams, and unnecessary erosion. All trash will be removed from the rivers, the banks, and the bridges. The trash will be sorted and recycled. Water analysis will be performed on samples taken at each feeder stream and wastewater treatment plant intake. Bridges: Log jams will be removed from the bridge pylons, a common collection point and potentially harmful to the bridges. All trash within 100 meters of the bridge will be picked up. Summary: Good paying jobs with health care benefits will be created. Safety will be improved, lives | MHWest River Clearing LLC | 128 | 0 to 30 days | \$23,390,000 |
| Clark | Clark County Jail Expansion/Sheriff Office Relocat | Currently, the Clark County Jail has the official capacity of 197 prisoners and houses the Clark County Sheriff's administrative offices. For the past several years the jail has housed prison populations over capacity on a regular basis. To maintain basic government services and protection of the public an expansion of the jail is needed. After a review by an architect, the most cost effective way to add an additional 84 beds would be to renovate and relocate the Sheriff's administrative offices to a County owned building. The vacation of the Sheriff's administrative offices would allow for that space to be renovated into prison bed space. There are no other jail facilities in Clark County, therefore all jurisdictions must use the Clark County Jail. | Clark County Commissioners | 50 | 91 to 180 days | \$4,600,000 |
| Clark | Clark County A.B. Graham Energy Efficiency Upgrade | Currently, the Clark County A.B. Graham Building is still using its original windows and much of its original heating and electrical systems. The building was built nearly one hundred years ago. By replacing windows, centralizing HVAC systems and upgrading electrical panels and systems, the County hopes to save electricity and natural gas usage and extend the useful life of the building. The building currently houses the County's Auditor, Treasurer, Recorder, GIS, Tax Maps and Domestic Relations Court. These departments perform basic government functions for all jurisdictions within the county from tax collection to justice benefits | Clark County Commissioners | 30 | 91 to 180 days | \$860,000 |
| Clark | Clark County Courthouse Energy Efficiency Upgrades | Currently, the Clark County Courthouse Building is still using its original windows and much of its original heating and electrical systems. The building was built nearly one hundred years ago. By replacing windows, centralizing HVAC systems and upgrading electrical panels and systems, the County hopes to save electricity and natural gas usage and extend the useful life of the building. The building currently houses the Common Pleas Court, Domestic Relations Court, Adult Probation, Law Library and the Clerk of Courts. These departments perform criminal justice services for the entire county and its jurisdictions. | Clark County Commissioners | 30 | 91 to 180 days | \$720,000 |
| Clark | Springfield Resurfacing and ADA Ramps | Resurfacing five (5) Federal-aid roadways in the city of Springfield and installing new ADA compliant curb ramps (ODOT PID #85972). The roadways are Sunset Avenue from John Street to Burnett Road; John Street from Fountain Avenue to Clifton Avenue; Fountain Avenue from High Street to Pleasant Street; Pleasant Street from Fountain Avenue to Limestone Street; Columbus Avenue from Belmont to the IORY RR. | Clark County-Springfield Transportation Coordinati | 20 | 91 to 180 days | \$1,104,059 |
| Clark | Dayton Road Bridge | Repair and paint the bridge over the Norfolk Southern railroad near the Greene County Line (ODOT PID #85973). Work consists of repairing the existing piers, painting all substructure concrete, painting the superstructure steel, and sealing the existing concrete bridge deck. | Clark County-Springfield Transportation Coordinati | 20 | 91 to 180 days | \$390,000 |
| Clark | Old Columbus Road | Repair and resurface Columbus Avenue and Old Columbus Road (ODOT PID #85974). Project is located on Columbus Avenue (CR382) from Pumphouse Road to Old Columbus Road (CR362) (CR382 log pts. 1.99-2.73) and Old Columbus Road (CR362) from Columbus Avenue (CR382) to SR54 (CR362 log pts. 1.30-8.55). Work consists of repairing and resurfacing the roadway, improving the shoulders, installing raised pavement markings, repainting existing markings, and repairing and/or replacing drainage structures. | Clark County-Springfield Transportation Coordinati | 25 | 91 to 180 days | \$1,440,000 |
| Clark | Bechtle Avenue Bridge PE and RW | Prepare environmental documentation, prepare detailed design plans, and acquire right-of-way for the Bechtle Avenue Bridge replacement project (ODOT PID# 85172). Project is located on Bechtle Avenue over Buck Creek in Springfield. | Clark County-Springfield Transportation Coordinati | 10 | 31 to 90 days | \$170,000 |
| Clark | Fountain Avenue Resurfacing and Lights | Resurfacing and streetscape of Fountain Avenue in Springfield (ODOT PID# 85975). Project is located on Fountain Avenue from McCreight Avenue to the bridge over Buck Creek. Work consists of resurfacing the roadway, installing ADA compliant curb ramps, installing decorative trees, and installing decorative street lights. | Clark County-Springfield Transportation Coordinati | 20 | 91 to 180 days | \$1,168,253 |
| Clark | Spangler Road Bridge | Repair and paint the Spangler Road bridge over Mad River (ODOT PID# 85976). Work consists of repairing the bridge concrete deck, painting all substructure concrete, sealing the existing concrete deck, performing an underwater scour investigation, and inspecting the existing piers | Clark County-Springfield Transportation Coordinati | 18 | 91 to 180 days | \$302,500 |
| Clark | Upper Valley Pike Resurfacing | Resurfacing Upper Valley Pike (ODOT PID# 85979). Project is located on Upper Valley Pike (CR327) from Ross Lane to St. Paris Pike (log pts. 1.93-3.75) and Upper Valley Pike (CR327) from the Tremont City NCL to the CHP CL (log pts. 6.46-7.37). Work consists of repairing and resurfacing the existing roadway, improving the shoulders, installing raised pavement markings, and repainting existing markings. | Clark County-Springfield Transportation Coordinati | 20 | 91 to 180 days | \$560,000 |
| Clark | VEHICLE REPLACEMENT | Replace an existing water department vehicle currently being used for emergency response to water department emergencies such as water main breaks. This vehicle is nearly 20 years old and in need of replacement. Upgrades to repair equipment stored in the vehicle are also needed as they are outdated. This vehicle is important to the operations of the water department and is used as a quick response vehicle to promote the continuation of safe/adequate water supply to approximately 7,000 people. A replacement for the water department administrator would also be included. Manufacturing of these vehicles would ensure continuation of existing. The Village of Enon would contribute \$5,000.00 for the purchase of new equipment for the vehicles such as radios, yellow lights, repair items, etc. | VILLAGE OF ENON | 2 | 31 to 90 days | \$35,000 |
| Clark | MONITORING WELLS INSTALLATION | The Village of Enon's water supply has documented groundwater contamination from activities associated with an adjacent manufacturing operation. Clean up at the site of the source of contamination has been completed but continued monitoring of the levels of contaminants is vital to assuring safe drinking water to Enon's 7,000 consumers that rely on that supply. Installing five 4 inch monitoring wells in strategic locations and varying depths would provide the village beneficial information regarding changes of contaminants, location and movement of contaminants, and concentrations of contaminants. It is estimated that 3 workers would be required to drill the monitoring wells and set the casing. Consultation with a hydrogeologist would be required to determine the best location for the monitoring well installations. The Village of Enon would pay for the fee associated with hiring the hydrogeologist and is estimated at \$5,000.00 | VILLAGE OF ENON | 4 | 31 to 90 days | \$25,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|----------------------------|----------------|--------------------|---------------------------|
| Clark | WATER METER CHANGE-OUT | those meters are well over 20 years old and in need of replacing. Old meters typically read slow thus reducing water revenues. They are also difficult to read and create potential for errors when entered into the computer for billing. This project would replace the existing direct read meters with remote read meters allowing for more efficient and more frequent reading periods. Also, the master meter located at the village's water treatment plant which is currently a direct read meter would be upgraded to a remote read thus increasing accuracy of recording flow of treated water to the distribution system. It is estimated that it would take approximately 130 working days using 2 part-time employees to complete the proposed meter change-out. The Village of Enon would be willing to hire the additional laborers(2) for the project at an estimated cost of \$20,000. Also, a possible increase in meter reading frequency would ensure job security for existing employees including office staff. | VILLAGE OF ENON | 2 | 0 to 30 days | \$255,000 |
| Clark | WATER TREATMENT PLANT UPGRADES | The Village of Enon Water Treatment Plant treats water for consumption for approximately 7,000 people in Enon and western Mad River Township. The existing softening system utilizes three main ion exchange media pressure tanks. These tanks are 25-35 years old and in need of replacement. This project would replace the old tanks with three new 72 inch diameter tanks. These tanks are the main component for softening water at the treatment plant. Also, upgrading/expanding the existing telemetry system which feeds information to the water treatment plant would be included in this project. The tanks would have to be manufactured and assembled before delivery to the water treatment plant thus creating/maintaining manufacturing jobs. Actual installation of the softeners would require an estimated 6 workers approximately 3-6 months to complete including associated piping/plumbing work. The Village of Enon would pay the estimated engineering fees of \$10,000 for this project. | VILLAGE OF ENON | 8 | 91 to 180 days | \$500,000 |
| Clark | HAUCK MEADOWS WATER STORAGE AND BOOSTER STATION IM | The Village of Enon would pay the estimated engineering fees of \$10,000 for this project. Meadows Subdivision of the Village. This storage tank is responsible for providing pressure and volume for domestic consumption and fire fighting purposes to the southern half of the village. The inside of the tank needs sandblasting, minor welding, priming and painting to maintain its full useful life. Installation of handrails and other OSHA approved equipment would greatly improve worker safety. Two booster pumps in Hauck Meadows increase water pressure from the tank to local residents for domestic consumption and use. These pumps operate in association with pressure reducing valves and can be upgraded to newer more energy efficient variable speed pumps. True energy savings can be realized by the village by replacing the older pumps with the newer pumps. It is estimated that it would take 6 workers 30-90 days to re-coat the water storage tanks. Two workers within 30 days could complete the replacement of the booster pumps. This project would help maintain the workforce in the pump/plumbing profession and tanking/cleaning/painting profession approximately 30 homes have been ordered to tie into the Saint Paris City Sewer by the Champaign Health District. However, most of the properties are lower income and can not afford the tie-in cost. The tie in would prevent future issues of pollution and would stimulate the local economy by putting local firms to work. | VILLAGE OF ENON | 8 | 91 to 180 days | \$70,000 |
| Clark | Saint Paris Sewer Tie-in order | Approximately 30 homes have been ordered to tie into the Saint Paris City Sewer by the Champaign Health District. However, most of the properties are lower income and can not afford the tie-in cost. The tie in would prevent future issues of pollution and would stimulate the local economy by putting local firms to work. | Champaign Health District | 5 | 91 to 180 days | \$450,000 |
| Clark | Church St. Water Main Replacement | Installation of approx. 3000 linear feet of 8" water main, reconstruction of approx. 3000 linear feet of roadway, to include installation of ADA curb ramps, and 450 ft of curb and gutter. | City of New Carlisle | 20 | 91 to 180 days | \$448,603 |
| Clark | Northwood Reconstruction | Project will reconstruct the Northwood neighborhood infrastructure to include reconstructing curb, gutter, sidewalk, storm water system, adding ADA curb ramps and 24,580 linear feet of roadway | City of New Carlisle | 30 | 91 to 180 days | \$2,696,037 |
| Clark | Utilities North Extension Phase II | Project will address two needs for the City of New Carlisle. It will improve our fire fighting capabilities within our immediate emergency response area by installing water system and hydrants north of Galewood Drive. The installation of the sanitary sewer will allow for the elimination of septic and mound systems within our one year time of travel to the City's public water supply | City of New Carlisle | 20 | 31 to 90 days | \$194,187 |
| Clark | Flora Street Storm System Installation | To install storm water system and reconstruct Flora Street, approx. 4,000 linear feet | City of New Carlisle | 20 | 181 days or more | \$139,318 |
| Clark | Clay Street Resurfacing | To resurface approx. 4,640 linear feet of roadway. | City of New Carlisle | 20 | 31 to 90 days | \$50,000 |
| Clark | SAFETY AND EMERGENCY PREPAREDNESS | Department, parks department, police department and mayor's court. Department head offices are also located at the government center and include the mayor, chief of police, water works superintendent and clerk of court. When power is lost to the government center there is no back system available to use. Installing an automatic switch over generator would ensure continued operations of the village in times of emergencies. Safety and security of the village's government offices would also be maintained during severe weather events such as wind storms, tornados, blizzards, etc. Also included in this project is purchase of safety equipment such as cones, warning lights, portable generators, vests, ect. to be used during emergency situations to ensure safety of employees. Finally, the village would purchase and install approximately 250 new regulatory signs including stop signs, yield signs, 25 mph speed signs, 35 mph speed signs, etc. The new regulatory signs would be ODOT specified prismatic finish signs to conform with newer federal sign regulations. | VILLAGE OF ENON | 6 | 31 to 90 days | \$75,000 |
| Clark | Northwood Subdivision Storm Water Replacement | Project will reconstruct the storm water system in the Northwood neighborhood. | City of New Carlisle | 20 | 31 to 90 days | \$458,904 |
| Clark | State Route 235 Widening | Project will install storm water system and widen State Route 235, installing a center turn lane for 14,000 linear feet. Addition of sidewalk and ADA curb ramps **REVISED** | City of New Carlisle | 100 | 181 days or more | \$187,853 |
| Clark | Revitalization of Ohio's Rivers **REVISED** | Economic Impact: This is a green, shovel-ready, infrastructure project that will create jobs and save lives. Job creation will begin on day one and the project will be fully staffed within weeks. Real estate, building construction, and manufacturing will also benefit. Major Outcomes: This project renovates and improves all of Ohio's rivers, including water quality, recreation, and recreational safety. Preventable deaths occur on Ohio's rivers due to logjams. All dead logs will be removed from the rivers to eliminate current logjams and prevent the formation of new dangerous logjams and unnecessary erosion. All trash will be removed from the rivers, the banks, and the bridges. The trash will be sorted and recycled. Water analysis will be performed on samples taken at each feeder stream and wastewater treatment plant inlet. Bridges: Logjams will be removed from the bridge piers, a common collection point and potentially harmful to the bridges. All trash within 100 meters of the bridges will be picked up. Summary: Good paying jobs with health care benefits will be created. Safety will be improved, lives will be saved, and the rivers will be pristine again. | Midwest River Clearing LLC | 170 | 0 to 30 days | \$19,344,000 |
| Clark | FACILITIES RENOVATIONS/CONSTRUCTION | This project includes the renovation of a Village of Enon structure for the expanded use by the local community historical society and new use by the local Elderly United, providing services to an aging population would benefit many local residents including Enon and Mad River Township. Providing activities such as exercise programs, health fairs, financial assistance, and social events would greatly enhance the quality of life for the elderly. Replacement of electrical wiring, plumbing and fixtures, HVAC system and interior remodeling would be required to bring the structure to current code standards. Installation of new signage would be included in this project. The village would contribute \$10,000 to the design plans needed for the project | VILLAGE OF ENON | 12 | 91 to 180 days | \$240,000 |
| Clark | State Route 571 (Jefferson Street) Lighting | Install decorative lighting on both sides of SR 571 from west of Smith St. to Church St | City of New Carlisle | 20 | 91 to 180 days | \$116,230 |
| Clark | STORAGE GARAGE CONSTRUCTION | The Village of Enon owns and maintains several vehicles and equipment necessary to operate its water, street and parks departments. Construction of a 40ft. X 60ft. garage would allow for all village vehicles and equipment to be adequately stored in a safe and secure manner. The structure would be serviced with water, sewer, and gas heat. The concrete floor would contain floor drain for inside washing and maintenance of vehicles during winter months. The village would contribute \$10,000.00 to the project which would employ approximately 8 people | VILLAGE OF ENON | 8 | 31 to 90 days | \$100,000 |
| Clark | Edgebrook Avenue Resurfacing | Project will resurface and curb and gutter repair on Edgebrook Avenue, approx. 3232 linear feet. | City of New Carlisle | 20 | 0 to 30 days | \$100,000 |
| Clark | Silver Lake Estates Resurfacing Projects | Project will resurface and curb and gutter repair on various streets in the Silver Lake Estates Subdivision, approx. 8220 linear feet. | City of New Carlisle | 40 | 31 to 90 days | \$291,800 |
| Clark | Automated Water Meter Reading Installation | Purchase and installation of automated water meter reading equipment for 2200 accounts | City of New Carlisle | 20 | 91 to 180 days | \$350,000 |
| Clark | Upgrade of New Carlisle Wastewater Treatment Facility | Various upgrades to existing WWTP to include one digester, one flow meter, and one pump | City of New Carlisle | 30 | 0 to 30 days | \$150,000 |
| Clark | Construction of Public Safety Building/Municipal C | Demolition of existing deteriorated structure and construction of an approx 11,000 sq feet. Public Safety Building/Command Center | City of New Carlisle | 30 | 91 to 180 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Clark | Construction of Public Safety Building/Municipal C | Demolition of existing deteriorated structure and construction of an approx 11,000 sq feet. Public Safety Building/Municipal Center | City of New Carlisle | 30 | 91 to 180 days | \$2,000,000 |
| Clark | MUD RUN CREEK STUDY | This project consists of a study of the Village of Enon which will include environmental, flooding, and other these subdivisions as well as parts of Mad River Township during periods of heavy rain. This proposed project would study flow rates, topography, elevations, physical characteristics, etc. A detailed study of this stream would provide beneficial information leading to projects that could ultimately alleviate flooding of residential properties. Approximately 5,000 feet of Mud Run within the village corporate limits would be included in the study and possibly another 5,000 feet in Mad River Township. Field surveyors and engineers would be employed to complete this project | VILLAGE OF ENON | 4 | 0 to 30 days | \$45,000 |
| Clark | Construction of Public Safety Building/Municipal C | Employment of two police officers to augment four current officers to serve as COPS for a population of 6000. | City of New Carlisle | 2 | 0 to 30 days | \$180,000 |
| Clark | Construction of Public Safety Building/Municipal C | Replacement of 30 year old roof on existing Fire Station. | City of New Carlisle | 10 | 31 to 90 days | \$45,000 |
| Clark | ASPHALT RESURFACING PROJECT | This project consists of resurfacing roadways within the corporate limits of the Village of Enon. Approximately 3300-3800 tons of asphalt would be needed for this project. The project would also include raising/adjusting valve box covers, manhole covers, meter pits, etc. The project is estimated to employ 12 people for approximately 7 days and would help to retain/increase labor positions in Clark County. The village would contribute \$25,000 of street funds to this project | VILLAGE OF ENON | 12 | 31 to 90 days | \$225,000 |
| Clark | NORTH PLEASANT STREET RECONSTRUCTION | This project consists of a highly traveled section of roadway in Enon that is adjacent to an extremely busy gasoline station. This project would include grinding of existing asphalt, resurfacing with base and final asphalt course. Curb and gutter (310 ft.) and approximately 300 ft of 4ft concrete sidewalk would also be constructed on this roadway. Safety of customers walking to and from the business and other pedestrian traffic would be enhanced with this project. The Village of Enon would contribute \$10,000 of street funds for this project. It is estimated that 12 workers would be employed on this project. | VILLAGE OF ENON | 12 | 91 to 180 days | \$25,000 |
| Clark | ENON PARK IMPROVEMENTS | This project consists of removing approximately 600 ft of split rail fence around an Adena Indian Mound (National Historic Site) and replacing with new plastic split rail fencing. Asphalt overlay of existing walkingpath with exercise stations to improve walking conditions along with charcoal grills, trash receptacles, playground equipment would be included. Installation of a skate park equipment would provide more activity for area youths. This Park is used by adults and youth and all ages would benefit from this project. The Village of Enon would provide \$5,000.00 in labor to install the new fence and other smaller items such as grills and trash receptacles. Labor would be needed for overlaying the walkingpath and installing new playground and skate park equipment and is estimated at 6 people. | VILLAGE OF ENON | 6 | 0 to 30 days | \$40,000 |
| Clark | GALLOWAY PARK IMPROVEMENTS | Galloway Park in Enon is a joint park with Mad River Township and is currently being developed as opportunities for funding become available. Its main use is for soccer and playground. This project would greatly enhance the use of this facility by youths and adults and would provide for use by handicapped individuals. The project includes paving of the existing gravel parking lot with asphalt, installing handicap accessible playground equipment and approximately 300 feet of concrete walkway. The Village of Enon would contribute \$5,000.00 to this project. Workers would be needed to lay the asphalt and install the sidewalk and playground equipment | VILLAGE OF ENON | 6 | 31 to 90 days | \$40,000 |
| Clark | Rehab taxiway, repair runway, install fencing | Rehab taxiway, repair runway, install fencing | City of Springfield | 21 | 91 to 180 days | \$1,235,000 |
| Clark | Hybrid Commercial Trucks | Navistar builds hybrid commercial trucks and shuttle buses in Springfield, OH. This funding would be used to replace state owned trucks and shuttles with hybrid vehicles. This funding will help retain jobs in Ohio and the vehicles will reduce fuel consumption by over 30%, reduce CO2 emissions by over 30% and lower NOX emissions by up to 40% over current vehicles. | Navistar | 200 | 0 to 30 days | \$7,000,000 |
| Clark | Renovation of Rental Property | Replace old leaky windows, replace improperly installed roofs on all 4 buildings which will include rafters and sheeting in addition to the shingles to be able to patch ceilings damaged. Put glass block in leaky basement windows to help with high gas bills. and be able to do laundry in the winter and freeze while doing it. It will also provide added security. Blow in insulation in brick walls that has no insulation. Add hand rails for safety on exterior and interior stairs. Finish remodeling the bathrooms to keep the stools from falling through the floor because of poor initial installation. Put up some fencing to keep some troublesome neighbors at bay and make it a more pleasant place to live and add privacy. Put up railing on the large porch for safety. | self employed | 5 | 31 to 90 days | \$75,000 |
| Clark | Family Business Recovery | Fifty year old family excavating business hit hard by sagging economy. Need to repay existing debt and finance rebuilding of company to viable status. All employees currently laid off. Hope to employ 12 to 20 operators and laborers as the need for businesses to rebuild infrastructure in Ohio increase as result of stimulus. | Conley Brothers Inc. | 20 | 0 to 30 days | \$400,000 |
| Clark | OSFC Building Project | develop a Master Plan for approval in June. We hope to go on the November 2009 ballot to get voter approval for the local share of the funding. The current project plans will replace all of the existing school buildings in the district with two new campuses. Each campus will have an elementary building, a middle school building and a high school building. The \$78,000,000 figure above reflects the local share. If the project is approved, the state will give matching funds of \$44,422,581. Any stimulus money that could reduce our local share would give us a much greater chance of voter approval in November 2009. Passage of the Bond Issue would allow for construction to begin and job creation to occur. | Northeastern Local Schools | 150 | 181 days or more | \$78,000,000 |
| Clark | Clark Bridge Load Ratings | Inspect bridges and complete a load ratings analysis inventory (ODOT PID#86051). The inspection and inventory would involve the majority of bridges that are maintained by the Clark County Engineer's Office. | Clark County-Springfield Transportation Coordinati | 10 | 31 to 90 days | \$225,000 |
| Clark | Goethermal conversion | Goethermal conversion on a 144,000sq.ft. facility which reduces energy costs by approx. 37-40% | Ohio Equine and Ag. Assoc. | 10 | 31 to 90 days | \$1,500,000 |
| Clark | Springfield South High School Redevelopment | The exterior of the original and monumental portion of the old Springfield South High School still looks exactly as it did in 1919. Designed by Dayton architect and modeled after the Library of Congress, the original structure was eventually expanded to include over 240,000 square feet of space. A new use is now planned for both the building and surrounding acreage which will require the restoration of the altered portions of the formerly grand interior spaces beneath the magnificent dome together with the restoration of the adjacent auditorium and theater. The project will create at least 30 new jobs and have a major positive economic impact of the entire region. This impact will be professionally estimated during the next 30 days. | Springfield Port Authority c/o Ken Stone | 30 | 181 days or more | \$400,000 |
| Clark | George Rogers Clark Heritage Association - Fair at | Fair at new location - our educational living history events - has been an important part of safety and security in our park. The living history events at George Rogers Clark Park bring hundreds of thousands of dollars into our community and support many jobs and small businesses. Needed is the repair of a log stockade - the centerpiece of a historical park - which brings tourists and money into our area. A new fort gate is needed so that the "fort" can be locked securely for safety reasons. Requires replacement of some logs in wall. | George Rogers Clark Heritage Association | 6 | 31 to 90 days | \$10,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Clark | Shelters at George Rogers Clark Park | hundreds of thousands of dollars into our community and supports many jobs and small businesses. Needed is the construction of three free standing "shelters" - each 6-8 poles with wood shake roof construction for sheltered food service areas for education events, tourist activities. Very simple construction - dirt floor - no concrete required. Immediate Outcome - 5 to 10 - local construction workers employed for repair. Ultimate outcome - structure secure, protect participants from inclement weather, non-profit organization able to continue service to schools and community, Living history event continues as a venue for local artisans, food vendors, small merchants, entertainers. Shelters can be used for picnics when not in use for living history events. | George Rogers Clark Heritage Association | 6 | 31 to 90 days | \$50,000 |
| Clark | Hydroponics - Growing and Energy Efficiency Comple | The Hydroponics Energy Complex will be accomplished in several phases 1. Development of Advanced Hydroponics Engineering 2. Construction of Growing Facility 3. Licensing of Recycling Energy Engineering 4. Construction of Recycled Energy facility 5. Development of Geothermal Grid 6. Construction of Geothermal Grid 7. Development of Biologically Sensitive Packaging Engineering 8. Construction of State of the Art Packaging Facility These well engineered components will be combined together to produce a complex capable of producing high nutrient vegetable products with minimal energy consumption while recycling all organic waste products produced in the complex. This complex will be adapted for the handicapped citizens of Clark County and surrounding communities. TAC Industries of Clark County will provide the management and oversight of the Complex. | TAC Industries, Inc. | 50 | 91 to 180 days | \$3,500,000 |
| Clark | Donnelsville Street Resurfacing | Resurface approx 1800 ft of North and South Hampton Street. Resurface approx 1500 ft of Harrison Street. Add 1/2 inch blacktop to Heistand Estates existing streets approx 1 1/2 miles All jobs created by this project will be on a limited basic only. | Village of Donnelsville, Ohio | 20 | 91 to 180 days | \$250,000 |
| Clark | Project Lead the Way expansion | 54 laid off engineers or new graduates in engineering will be hired to serve as "mentors" in residence" for the 209 Ohio school districts operating Project Lead the Way (PLTW). This will supplement the PLTW pre-engineering curriculum and training and to provide employment in Ohio for engineers who are affected by the temporary downturn but who are needed for the long-term future of Ohio in engineering and research leadership. In addition support will be provided for districts wanting to implement Project Lead the Way. This advances Ohio's preparation for 21st century jobs for Ohioans in science and engineering. | AVETEC | 54 | 0 to 30 days | \$2,800,000 |
| Clark | Community Mental Health Center | Although Avetec is submitting the idea, the project will be a partnership with the State Department of Education, local community colleges, universities and school districts. This concept has been discussed with the Ohio Department of Education and met with support. Assist in building a new energy efficient facility for community based mental health programming. This new facility would provide inpatient treatment as well as outpatient and walk-in crisis counseling services. We are currently located next to the acute care hospital which is relocating to a new downtown location. Our existing structure will be razed to accommodate land for Wittenberg University. | Mental Health Services for Clark & Madison Counties | 120 | 181 days or more | \$5,000,000 |
| Clark | Street scape project | Install street lights on West National Road (State RT-40) inside city limits.Approx 1/2 mile of roadway. Install new trees along West National Road (State RT-40) approx 130 trees. Replace village sidewalks along West National Road (State RT-40) All items are needed for both North and South side of street. All jobs created doing this project would be on a limited time basic. | Village of Donnelsville, Ohio | 10 | 31 to 90 days | \$231,000 |
| Clark | Street equipment and facility | Donnelsville is a small historic village located on National Road with approx. 300 residents. Build new salt storage barn and new street equipment maintenance facility. Replace outdated snow removal equipment for village street maintenance. | Village of Donnelsville, Ohio | 20 | 181 days or more | \$118,000 |
| Clark | Existing Sewer | Request includes one snow plow 7' salt spreader truck and one skid loader to load salt. Small historical village located on National Road. Shortfall on money on new sewer system installed Due to changeorders and add ons to project requested by EPA | Village of Donnelsville, Ohio | 0 | 0 to 30 days | \$650,000 |
| Clark | Full time Officer's | This program is to hire two full time officers for the three year period allotted and to continue their employment. This would hire a couple of officer's already laid off from other agencies. | Village of Enon Police Department | 2 | 0 to 30 days | \$300,000 |
| Clark | connection to public utilities | connection to public utilities - annexation to the City of New Carlisle | Ladder Oaks Investments Ltd | 50 | 31 to 90 days | \$15,000 |
| Clark | Intensive Treatment Unit | Approximately 15,000 sq. ft. of living, therapeutic and recreational space for the treatment of mentally retarded/developmentally delayed special needs youth with diagnosed mental health illness. Goal is to provide treatment services that will rehabilitate the youth to allow a return to living in the open community. | Oesterlen Services For Youth, Inc. | 20 | 0 to 30 days | \$1,300,000 |
| Clark | The Westcott House Neighborhood Rehabilitation | experienced many years of degradation and proved to be a challenging neighbor for the public site. These properties have been vacant and subject to crime. The Westcott House Foundation purchased all the houses with the hope of the neighborhood's revitalization. Immediate action is needed to provide an attractive, safe and sustainable context for the museum, which attracts thousands of tourists every year. Requested funds would enable the foundation to hire consultants and contractor to rehabilitate the neighborhood under the guidelines of the existing structural report, the LEED for Neighborhood Development Rating System and the Secretary of the Interior's Standards and Guidelines for Rehabilitation. We would demolish the structures not feasible to preserve and rehabilitate the eligible buildings; stabilize the foundations; upgrade the infrastructure; secure the roofing, insulate the attic spaces; conduct energy audits; repair and paint the exterior walls, test for asbestos and lead, install heating system and adapt interiors into feasible use for the Westcott House | The Westcott House Foundation | 200 | 0 to 30 days | \$800,000 |
| Clark | Frank Lloyd Wright's Westcott House Improvement | approximately \$1 million in revenue to the region's economy each year. The museum serves learners of all ages through a diverse program series throughout the year. We have been recognized by the American Architectural Foundation as one of the top sites in the country for K-12 Architectural Education. The house is the single example of Frank Lloyd Wright's Prairie style on Ohio and the only Wright site in the state that offers public programming throughout the year. Stewardship of this architectural gem obligates us to apply best practices in historic preservation. The maintenance of this distinctive landmark poses many challenges and requires immediate action in order to prevent deterioration of the structure. Requested funds would enable the museum to hire contractors and immediately start improvements of the site. Identified projects include a comprehensive stucco analysis and repair, re-installment of the drainage system in affected areas, reinforcement of the garage foundation, energy audit, conservation of exterior wood and interior furnishings, and skylight | The Westcott House Foundation | 25 | 0 to 30 days | \$250,000 |
| Clark | Ferncliff Boulevard Neighborhood Renewal | The focus of this project will be the redevelopment of Ferncliff Boulevard neighborhood, a significantly blighted area located between the new hospital and Wittenberg University. In this neighborhood, the housing stock and property are in a state of long-term underutilization. Moreover, the negative physical appearance of the area and the introduction of undesirable elements create an environment that is unsafe and unappealing to residents, students, and visitors. The project includes the upgrading of existing roads and sidewalks, the addition of pocket parks, pedestrian paths, streetlights, and signage; and the installation of fencing and landscaping along Ferncliff Boulevard overlooking downtown and the new hospital complex. The proposed investment will ensure the long-term stability of the Ferncliff Boulevard Neighborhood; increase resident, student, and visitor access to downtown; and bring future economic development to the community | Wittenberg University | 14 | 91 to 180 days | \$2,000,000 |

| Clark | Horticultural Nursery Project | This is a Social Enterprise Project that involves the purchase and operation of a Horticultural Nursery for the purpose of providing transitional employment opportunities to individuals returning to the community from Ohio Correctional Facilities. The goal of the project is to increase the number of previous offenders who re-enter the community and become successful productive members of society by providing them with fundamental needs upon their re-entry to the community. Outcomes include: ? Creation of approximately 70 new jobs; ? The freeing-up of jobs currently held by migrate workers to provide opportunities for United States (Ohio) residents; ? Increase in State and Local Income tax (through the promotion of taxable wages); ? Generation of Local Sales Tax; ? Providing employment & training opportunities for offenders recently released from incarceration; ? Provide transitional employment opportunities to more than 250 inmates estimated to be release back into Clark County from Ohio Correctional Facilities; ? Assisting in the long-term sustainability of ex-offenders and their families; | OIC of Clark County | 70 | 91 to 180 days | \$6,000,000 |
| Clark | Pro Gear Warehouse, Inc. | small business in Springfield, Ohio in its sixth year trying to grow and keep jobs in Springfield. I am a lifetime resident and would love to keep this business in Springfield but economic conditions are slowly but surely forcing us out of business. Have exhausted all aids from banks, relatives, and the Small Business Development Center. Definitely feel that we can recover if we had a little bit more funding to ride out the current conditions. No where else to turn - seems like none of the stimulus package is going to help small business people like myself and we are the backbone of any thriving economy. If you cannot help, can you please point me to someone who can. You can see my business on website - progearwarehouse.com | Pro Gear Warehouse, Inc. | 13 | 0 to 30 days | \$100,000 |

| Clark | Delivery Now USA | Let's say a machine breaks down in a factory in Dayton, and the part needed is in a warehouse in Toledo. Each hour the machine is down the company is out big bucks so they need a Delivery Now. They place an ad on my site saying they are willing to pay a hundred dollars to someone that will take the part right now. A courier finds the ad listed on the website and accepts. The courier delivers the part, and gets delivery confirmation. When delivery is confirmed, the courier, and my new company, gets paid. The part is delivered, the machine is up and running, a taxpayer just earned enough money to feed his family or pay his electric bill, and I make a profit. It's a win win! The project is a one time investment, and I've included in my budget (i.e.d, a year worth of expenses, and minimal advertising. The couriers will be required to prove identity, and any that can be prosecuted. | Delivery Now USA | 100 | 91 to 180 days | \$50,000 |
| Clark | AES Affordable Energy Solutions | I am proposing a new business that offers affordable efficiency options to it's customers. The product line will include winterization, high efficiency lights, solar panels, and where applicable wind or geothermal options. I will notify my customers of grants and other subsidies available. We will also collaborate with local business to offer special deals on energy efficient appliances. This project has many social, and economic advantages. We will improve the efficiency of taxpayers homes, reduce our overall energy consumption, and put this country one step closer to energy independence. We will educate homeowners and renters about their opportunities to help themselves by lowering their utility bills, and utilize government subsidies to help pay for it. We will also put window makers, and light manufacturers, and solar panel manufacturers to work, because someone has to make the products we're selling and installing. I'm starting from scratch as I'll need funding for inventory, advertising, i.e.d, and operating costs for one year. I'm estimating 5-10 employees, and plan to subcontract out some of the installation. | AES Affordable Energy Solutions | 10 | 31 to 90 days | \$50,000 |
| Clark | To open my own business to run with my family, and | economy with limited funds, an HVAC company will thrive even though the economy struggles. I will also be incorporating other services such as Locksmith, Security systems installations, and other home improvement programs. I would like the base of the company to be directed towards HVAC, with incorporating the other home improvement programs, such as listed above. I will be able to provide the community with a full service home improvement and repair service. Like a one stop shop, I am licensed in everything, from commercial to residential HVAC, Plumbing, Electrical, Remodel, and Replacement. I would really love to create a company where all of my children, and their children will have to provide their families with a stable employment, and also to provide jobs in every county and community. I really think I can provide the communities with fast reliable service, while providing the education, and training to ensure my employees are prepared for every job they are called out to complete. I would like to provide programs for training and continuing education that we have been working with Dr. Kong at Rutgers University. We supplied him with broccoli sprout material we grew using our patented sprouting method. His findings revealed significant inhibitory activity on Prostate Cancer in TRAMP mice. The research suggested increased protein activity in three separate pathways in the mice. Since broccoli is not known to be rich in protein we investigated the source of the protein activity in the sprouts. During the investigation it was discovered that although using the same seed store bought sprouts contained 10% carbon while our sprouts contained 26% carbon or about one and a half times more carbon. Apparently for unknown reasons the carbon has displaced the oxygen in our sprouts. We have managed to bring the research to this point with self generated funding. But it is apparent that the next phase of research on our sprouts will involve the services of a molecular biologist. If we are talking about doing research at this level it would be ideal to supply the researchers with the highest quality material possible. This would require seed funding for a pilot research and development facility to achieve maximum potential benefit. | HVAC, and Home Improvement | 50 | 91 to 180 days | \$750,000 |

| Clark | Ms. Sharon's Clubhouse | Have three children to support and would love to go back to school as a medical assistant opportunity to spend additional time in specialized classes of math, science and language. Teachers will be trained in specific subject matter. The pre-school math teacher will be trained in pre-school math she will learn specific activities and how to present activities and how to set-up a math class for pre-school children. Children will visit her/his class for an hour each day. During that visit children will have an opportunity to spend time with hands on material where children will learn about numbers, money, telling times, measurements etc. There will be a group time where children will work as a group with teacher directed math activities and games. Children will also have a table time activity where they go to the table to work more individualized work. Children will then move to another class. Each class of math, science and language will be structured out in a similar manner. During the day other classes will be incorporated such as, social studies, music, pre-school drama, art and gross motor. Gym and Dramatic play will also be incorporated daily. | ms. sharon's clubhouse | 20 | 31 to 90 days | \$300,000 |
| Clark | Appleseed History/Writing Project | The Johnny Appleseed Learning Center and Museum is a non-profit educational organization devoted to research and writing related to the life and historic times of John Chapman (Johnny Appleseed) who spent the major part of his life in Ohio. I am a founding member of the Center which is housed at Urbana University. New and continuing research require writing an updated and factually accurate, as well as interesting account of the life and times of Johnny Appleseed, and his great impact upon the history and development of Ohio and the entire region. Schoolchildren all over Ohio, the United States, and even worldwide are fascinated by the life of this gentle, sensitive, hard-working pioneer and conservationist/ agriculturalist who had a great impact with his vision and work. He is a true American hero whose story is told and read in countless classrooms every year! I propose to write a new and updated and accurate life of Johnny Appleseed that is usable in classrooms at all levels, and in Teacher Preparation Programs as well (Social Studies and other methodology classes are appropriate). As a retired educator with a limited pension and no other income I need your help. | Johnny Appleseed Learning Center Museum | 1 | 0 to 30 days | \$15,000 |

|----------------|---|--|---|----------------|--------------------|---------------------------|
| Clark | Digital Information Sharing Pilot (DISP) | Using previously approved federal funds and already developed data sharing technology from the National Air & Space Intelligence (NASIC), continue efforts already underway to provide additional funding to establish a Digital Information Sharing Pilot, supporting national, state, and local government authorities. This capability will allow sharing of sensitive information among government and state agencies, operating on separate networks, at varying levels of security or restriction; yet ensure access and the ability to retrieve information appropriate to users' need and access on demand. This DISP capability ensures critical information does not remain trapped in databases on separate networks that, today, cannot be leveraged to generate a complete, integrated and common understanding for law enforcement or emergency officials to deal with national security or natural disaster events. This program was briefed to the Ohio Director, Department of Public Safety, Director Ohio Emergency Management Agency, and Director, Ohio Homeland Security and they have given their approval and support for the initial prototype. Additional funds will allow the program to be expanded the land and install all of the necessary utilities and roadways to open site for prospective customers. Utilities include 16" water main, 12" sewer main, 12" to 24" storm sewer, 8" natural gas main and electric transmission line extension. Roadways include the upgrading of Ridge Rd. and the construction of the new internal roadway. Site is adjacent to I-70 and the I&O Railroad. Site is currently being marketed but without the proposed improvements, interest is minimal. This new industrial park will compliment the existing successful PrimeOhio Corporate Park developed by the CIC in the 1980's at this same interchange (Exit 59 on I-70). The project site is under option and the preliminary engineering is complete. Site is currently zoned Industrial so the zoning is already in place. Hence we feel the start time can easily be met. Based on CIC's success with the development of the PrimeOhio Corporate Park, we feel this new park can generate 200 jobs within 5 years of opening and up to 500 jobs within 10 years of opening. This is a great site will begin on day one and the project will be fully staffed within weeks. Real estate, building construction, and manufacturing will also benefit. | The Greentree Group | 10 | 0 to 30 days | \$2,800,000 |
| Clark | PrimeOhio II Industrial Park | This project renovates and improves all of Ohio's rivers, including water quality, erosion, and recreational safety. Preventable deaths occur on Ohio's rivers due to logjams. All dead trees will be removed from the rivers to eliminate current logjams and prevent the formation of new dangerous logjams, and unnecessary erosion. All trash will be removed from the rivers, the banks, and the bridges. The trash will be sorted and recycled. Water analysis will be performed on samples taken at each feeder stream and wastewater treatment plant inlet. Log jams will be removed from the bridge pylons, a common collection point and potentially harmful to the bridges. All trash within 100 feet of the bridge will be picked up. Summary: Good paying jobs with health care benefits will be created. Safety will be improved, lives rivers due to logjams. This devastating loss of life can be prevented. This project removes all logjams from all of Ohio's rivers. Measures will be taken to prevent the formation of future logjams. Additional benefits of this project include improved water quality and reduced erosion. Water analysis will be performed on samples taken from each feeder stream and wastewater treatment plant inlet. Whole dead trees will be removed to reduce erosion and prevent damage to bridges. All trash and debris will be removed from the rivers, the banks, and the bridges. The trash will be sorted and recycled. All trash within 100 feet of each bridge will be picked up. Job creation will begin on day one and the project will be fully staffed within weeks. Real estate, building construction, and manufacturing sectors will also see an economic benefit. Summary: Good paying jobs with health care benefits will be created. Safety will be improved, lives will be saved, and the rivers will be pristine again. | Community Improvement Corporation Springfield-Clark | 500 | 91 to 180 days | \$7,500,000 |
| Clark | Cleaning up Ohio's Rivers | currently beginning design. This project would extend the park both south and north of the first phase. The overall park was developed as part of the VISION PLAN for Downtown Springfield by the Center City Association. The continuation of the park beyond Phase I will compliment the redevelopment that is currently underway in Downtown Springfield by adding a needed green space component. Projects underway in the Downtown include a new surgical hospital, a new regional hospital, the updating of an 85 unit residential center and the upgrading of an exiting office building. These combined projects are injecting over \$ 250M of improvements to the Downtown area of Springfield. The first phase of the green space to be known as Center City Park has been funded and is under way. This would allow the balance of the park to be constructed now to better compliment the aforementioned improvements. While the project will not create jobs beyond the temporary construction jobs, it will allow us to market the downtown as being a center for office space thus return | Midwest River Clearing LLC | 170 | 0 to 30 days | \$19,344,000 |
| Clark | Preventing Deaths on Ohio's Rivers | International Truck factory in Springfield. The City is currently clearing the site for environmental contamination and once complete, the site will be subdivided into industrial parcels for redevelopment. The CIC is proposing to construct a new building on one of the resulting lots to then be marketed as facility ready for occupancy. A lack of new industrial space in Springfield has placed our region in a disadvantage when recruiting prospective industrial clients. This project will be located within the City School District thus providing new tax base for the schools as well as the City. The project will generate 45 construction jobs and then 50 jobs within 5 years of completion. We feel this figure could rise to 200 jobs within 10 years. The redevelopment of the site is critical in bringing new industrial development to the inner city and thus to the city school district. The current vacant site is not producing tax revenues of any significance for either of these entities. This project would be the catalyst for the redevelopment of the overall site | Midwest River Clearing LLC | 170 | 0 to 30 days | \$19,344,000 |
| Clark | Center City Park | As SCAT transitions to light duty and medium duty vehicles, changes must be made to the current bus transfer center involving concrete work, renovation of indoor shelter, addition of passenger friendly waiting area equipped with ADA accessible restrooms. We also plan to purchase ticket 2 vending machines with cash changers for simplified use of the passengers. This will eliminate the need for passengers to travel 3 blocks to make ticket purchases. Number of retained jobs is inconclusive at this time but we expect the direct impact will be 23 retained and 20 jobs indirectly created | Greater Springfield Chamber of Commerce | 10 | 91 to 180 days | \$4,700,000 |
| Clark | Industrial Spec Building | Illnesses and disabilities to remain in their homes with the objective of preventing premature institutionalization. The program will operate as a patient advocate for enrolled participants to successfully maneuver through the health care system. Our existing Adult Day Center will be used as the base to coordinate medical services provided by community physicians and specialist. A physician will be used for over site of a nurse, and social work services, to coordinate the medical care of individuals residing in the community enrolled in the program. The team will manage physician visits, provide instruction and monitoring of medication, to avoid duplication, education on disease management, reduce the duplication of medical test, and provide medical analysis of all services rendered. A case file will be established and maintained for the care giver. The program will improve the health status of the participants. Reduce medical expenditures from Medicare and Medicaid by reducing duplication of medical test, emergency room | Community Improvement Corporation of Springfield-C | 50 | 181 days or more | \$1,600,000 |

| Clark | Conversion of former e-check building to a Fire Ho | Takes an existing, former e-check facility and rehabs it into a full service Fire House. The current Fire House occupies a concrete block and frame building with 3,000 square feet. The finished, proposed building, will contain just under 9,000 sq feet, including a building addition of 1,000 square feet. This will be a great addition to the neighborhood of East National Road in Springfield Township, Clark County. All drawings are ready, and all studies have been completed for this project | Springfield Township | 5 | 31 to 90 days | \$800,000 |
| Clark | Project Lead the Way/Gateway to Technology | implementing at our high school. We currently offer one class and will have the ability to offer two or more classes next year. (Introduction to Engineering and Principles of Engineering) We are trying to expand the program to the middle schools where students will learn about Science, Technology, Engineering, and Math careers and get rigorous curriculum in the STEM areas. This exciting curriculum is expensive to implement but the outcome are many: 1. a better prepared workforce for the high tech jobs Ohio is trying to retain. (Increase Clark-Shawnee students locating in Ohio by 10%) 2. generate student interest in the fields of Science, Technology, Engineering, and Math. (increase by 5% each year the number of students entering STEM fields) 3. effect hundreds of students in the Clark County area with a academically rich curriculum (increase the number from 0 to 100% of students exposed to the middle school STEM program.) Monies will be used to purchase equipment, curriculum modules, and to train teachers in the Project | Clark-Shawnee Local Schools | 7 | 31 to 90 days | \$80,000 |
| Clark | Electrical Service Upgrade | We are a machine shop with 22,000 sq ft total in 2 buildings. Our current power service is a 240 volt delta b phase and is obsolete and cannot be increased in capacity. I would like to upgrade as follows: 1. Install a new 1200 amp 480 volt service 2. install a new transformer vault for the Ohio Edison pad mount transformer 3. install (2) 300 KVA 120/208 volt dry type transformers to feed the existing 240 delta service. 4. Install a new 480 volt panel for new lighting. This would take care of any service needs for years to come, making it possible to upgrade more efficient CNC machines without any problems in power. I believe this will also be a more efficient and reliable system for us and Ohio Edison on the grid. | Promac, Inc. | 4 | 91 to 180 days | \$100,000 |
| Clark | Equipment Upgrade | marketplace. Modernization of shop essential to stay in business. Current employment is 15 with 5 laid off for a total of 20. Replace worn out manual lathe with new Manual/CNC Programmable lathe (100K) Replace worn out 12x36 surface grinder with late model 3 axis 16 x 32 automatic surface grinder currently available at local machine dealer (40K) Rebuild of 2 Moore jig grinders to like new specs. These are good solid machines in just need of repair.(30K) Replacement of 25 yr old CNC lathe with new that will have more capacity in size. (150K) | Promac, Inc | 3 | 31 to 90 days | \$300,000 |
| Clark | The Petticrew Wellness Center | Construction of a 15,000 sq. ft. center offering designated space including a pool to provide program for adults over the age of 55. The centers programs would include health education and health screenings, medical coordination and monitoring for enrolled participants, exercise therapy, water aerobics, Adult Day Services, therapeutic meals, cooking healthy classes, transportation, and coordinated social events and outings. The center will improve the health status of individuals over the age of 55 by promoting healthy lifestyles, offering strength training, reducing the risk of falls; provide medical monitoring and coordination, which will reduce the incidents of hospitalization, and re-hospitalization avoiding the excessive use of Medicaid and Medicare dollars | The Petticrew Center for Adult Services | 25 | 91 to 180 days | \$6,000,000 |
| Clark | Township Subdivision #2 | Repair and resurface and add ADA curb ramps to township roads within Northridge subdivision #2. Total miles of resurfacing are 1.2 miles. | Moorefield Township | 16 | 31 to 90 days | \$171,000 |
| Clark | Parking Lot Replacement | Parking lot in very, very poor condition. Has taken a beating over the last 20+ years with heating/cooling and truck traffic. It is beyond patching and needs to be completely removed and replaced. Have not got an actual bid and this is just a guesstimate. Lots include access to 2 buildings and a rear connector. | Promac, Inc. | 4 | 31 to 90 days | \$50,000 |
| Clark | Township Subdivision #1 | Repair and resurface and add ADA curb ramps to township roads within Northridge subdivision #1. Total miles of resurfacing are 1.6 miles. | Moorefield Township | 16 | 31 to 90 days | \$218,000 |
| Clark | US Route 42 Improvements | 5,280 LF curb & gutter replaced, 9,300 SF sidewalk removed & replaced, 32 curb ramps, 300 LF of various size drainage conduit, 1,400 LF 6" underdrain, 1,400 LF erosion control, 90 CY aggregate base, 410 5Y 6" concrete drives. | Village of South Charleston | 2 | 91 to 180 days | \$100,000 |
| Clark | Electrical Service Upgrade | We are a 20 man machine shop with 22,000 total sq ft cover 2 buildings. Our current service is an obsolete 240 volt grounded B phase that cannot be increased in capacity. As the years have gone by old equipment has been upgraded to newer and more powerful CNC machines. We are on the threshold of maxing the system and further growth in this area will be very difficult, if not impossible with the current service. We would like to upgrade as follows: 1. Install a new 1200 amp 480 volt service 2. Install a new transformer vault for the Ohio Edison pad mount transformer. 3. Install (2) 300 KVA 120/208 volt dry type transformers to feed the existing 240 delta services. 4. Install a new 480 volt panel for new lighting. This would service our power needs for years to come, as well as increase the efficiency of what we have now. | Promac, Inc | 2 | 91 to 180 days | \$100,000 |

| Clark | Lighting Replacement | We have 42,000 sq ft of existing (machine shop) w/tn approx 4,118 fluorescent fixtures. we would like to convert to T8 fixtures. Based upon our usage our electrical contractor has estimated an approximate savings of over \$7,000.00 per year on our electrical utility bill with Ohio Edison. We have budget information available from Tric Electrical Services for review if needed. Please note this is not replacing entire fixture but rather installation of T8 retro-fit kits into existing fixtures. This is more economical than full replacement. | Promac, Inc | 2 | 31 to 90 days | \$35,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Clark | New Love Rd. from Platts. to U.S. 40 | Pavement Planing Butt joints \$250.00 Tack Coat @0.10 gal/sy \$3,880.00 Compacted Aggregate 600 ton \$15,000.00 Asphaltic Concrete Type 2 (3/4") \$28,350.00 Asphaltic Concrete Type 1 (1 1/2") \$57,750.00 Temporary Centerline 2500.00 Center Line \$400.00 Edge Line \$600.00 | Harmony Township | 15 | 31 to 90 days | \$109,680 |
| Clark | North SR41 Improvement Project | Curb, gutter, sidewalk and roadway improvements and reconstruction including 240 square yards of concrete pavement, 2,090 square feet of concrete walk, 4,555 lineal feet of curb and gutter, four traffic signals, 22,000 square yards of paving. | Village of South Charleston | 3 | 181 days or more | \$200,000 |
| Clark | County Line Road Corridor | Repair and resurface deteriorating township roads. Five (5) miles of roads contained within an area bounded by County Line Road on the West and East | Moorefield Township | 16 | 31 to 90 days | \$375,000 |
| Clark | Police Cruiser | This request is for one (1) new cruiser that is in need of replacement Project will include, at Uio Springfield Road, a stone sign saying "South Charleston" with landscaping surrounding and enhancing the sign. At Huntington Road, project will include a stone sign saying "South Charleston" with the addition of signage indicating the direction to go to find several agri-businesses located outside of the Village and the mileage to those business sites with landscaping surrounding and enhancing the signage. | Moorefield Township | 80 | 31 to 90 days | \$28,000 |
| Clark | SR41 Gateway Landscaping | intersection of the I&O Railway and Mound Street. On the north side of Mound Street, concrete pedestrian crossings will be installed. On the south side of Mound Street, brick pavers will be removed and reinstalled to meet the elevation of the tracks. Additional pavers will be installed connecting the Ohio to Erie trailhead in South Charleston to the depot property owned by the Heritage Commission. Existing concrete pavers will be removed and replaced with new clay pavers to create a surface consistent throughout the project. Existing commemorative engraved stones will be salvaged and re-laid. The new pavement will encircle the depot on three sides and extend to include the drive between the depot and log cabin. Concrete curb and gutter with curb ramps will front the property at the property line and a low, stone retaining wall will be installed in front of the cabin. | Village of South Charleston | 1 | 0 to 30 days | \$220,000 |
| Clark | Handicapped-Accessible Railroad Crossing | Replacement of an outdated medic unit. This unit is needed to provide ambulance service for over 12,500 Moorefield Township residents. | Village of South Charleston | 2 | 31 to 90 days | \$184,220 |
| Clark | EMS Medic Unit | John Street and a one block portion of William Street lead to the Moberg View elementary school. Presently, these streets are narrow, meander through the right-of-way, and consist of deteriorating chip-and-seal materials. However, the primary problem is that these streets provide important ingress and egress to the elementary school. The neighborhood is mixed use - an aging greenhouse sits in the middle of single family residences. There is no off-street parking for automobiles and no sidewalks on which children can walk to and from school. The result creates a free-for-all where vehicles and pedestrians mix casually and constantly, a roadway environment that is unsafe, especially for children, and hazardous for drivers. Without designated sidewalks, a controlled roadway and an impetus to develop off-street parking, pedestrians and drivers find themselves in a situation that is bad for all involved. | Moorefield Township | 125 | 31 to 90 days | \$215,000 |
| Clark | John & William St. Project | Project will include, at Uio Springfield Road, a stone sign saying "South Charleston" with landscaping surrounding and enhancing the sign. At Huntington Road, project will include a stone sign saying "South Charleston" with the addition of signage indicating the direction to go to find several agri-businesses located outside of the Village and the mileage to those business sites with landscaping surrounding and enhancing the signage. | Village of South Charleston | 1 | 0 to 30 days | \$242,000 |
| Clark | Gateway Landscaping Project | Additional 12 Police Officers for city and city schools programs | Village of South Charleston | 1 | 31 to 90 days | \$220,000 |
| Clark | New Police Officers | Link new medical facilities to existing fiber loop and to WPAFB, OSU, etc | City of Springfield | 12 | 91 to 180 days | \$5,400,000 |
| Clark | Downtown Fiberoptic Loop Extension | New electrical substation at Nextedge Technology Park | City of Springfield | 150 | 91 to 180 days | \$750,000 |
| Clark | Nextedge ARTP Electrical Substation | Railroad Corridor Crossing Upgrade for quiet zone / safety project. | City of Springfield | 250 | 181 days or more | \$1,700,000 |
| Clark | Railroad Corridor Crossing Upgrade / Safety Project | Paving of West Columbia Street - Bechtel to Spring | City of Springfield | 10 | 91 to 180 days | \$258,500 |
| Clark | West Columbia Street Paving | Paving of South Burnett Road | City of Springfield | 20 | 31 to 90 days | \$91,000 |
| Clark | South Burnett Road Paving | Start up new Secured Document Destruction and paper recycling. E recycling of Computers Need: 1 Salesperson 2 Truck Drivers 37 employees to work in recycling center 1 Truck 100 Recycling Containers 1 Shredder 1 Baller 1 30' sorting conveyor 12 Cameras with Disc Drive Recorder Fenced area for Securing Documents Fork Lift 5000 lbs This project is designed to employ individuals with Mental Retardation and Developmental | City of Springfield | 20 | 31 to 90 days | \$350,000 |
| Clark | Shredding and Recycling of Paper and Computers | Since the township/county are broke I will use these funds to resurface approx 1.5 miles of streets in Green Meadows beginning with schenley st. Preliminary research indicates this should employ 8-10 illegal immigrants which should pass the liberal requirements for funds. We will be able to accomplish: •Clinical messaging—a secure interface that delivers lab & radiology results, transcribed documentation and admissions, discharges and transfers to physicians electronically. •Secure email- practitioners will be able to communicate securely via email. •Electronic disease reporting and public health alerts—hospitals and labs can meet their mandated public health reporting requirements within minutes; web portal provides public health alerts to providers. CCHIE's Medical Trading Area contains several rural counties which have small hospitals with little discretionary funding. For \$1,000,000 we will be able to implement the following: •8 rural county hospitals •Approximately a population of 360,000 •370 practitioners •8 health departments The estimated increase in jobs is 10. These jobs will be highly technical varying from EMR trainer, EMR computer support and local technical support. | Quest Adult Services | 40 | 181 days or more | \$450,000 |
| Clark | Streets | | Citizen for Streets | 10 | 91 to 180 days | \$100,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Clark | Organic Garlic and Produce | The goal of this stimulus request is to produce an organic garlic and produce farm. Organic farming is a growing phenomenon in this state and the demand continues to grow for wholesome foods that do not have harmful herbicides and pesticides. Currently my farm is producing commercial corn and soybeans. This grant would allow the farm to become organic certified and produce wholesome garlic and produce that will be readily consumed by the local community. The grant will be for the construction of farm buildings and to purchase special equipment for organic farming. A garlic test plot was prepared last year and it is clear that additional soil conditioning is required. It will take at least three years to convert the current agricultural land into certified organic land that will produce high quality produce. Labor will be required to improve the soil and the harvesting of the produce will be labor intensive. It is estimated that 2 additional jobs will be produced by this grant. | Rosenberger's Organic Garlic and Produce | 2 | 91 to 180 days | \$150,000 |
| Clark | Lawrenceville Water Meters | This is a Green Infrastructure project. Water customers of the former village of Lawrenceville are not metered. Installing meter pits and meters for each of the 100 customers on the system will significantly reduce water consumption and water waste. | Bd of Clark County Commissioners | 10 | 91 to 180 days | \$80,000 |
| Clark | Lawrenceville and Northridge Water Improvements | Replace undersized water lines in former village of Lawrenceville, about 8400 lf, fire hydrants, valves. Northridge portion of project includes replacement pumps, motors and valves at booster station, add standby power, add chemical feed room | Bd of Clark County Commissioners | 15 | 91 to 180 days | \$257,000 |
| Clark | Save Thermometer Business | To save the last thermometer company in the USA. We would use the money to purchase new equipment for our company. The new equipment would retain jobs and create new jobs. This money would keep Echo Inc. from closing the doors and jobs would be lost. Thank yo | Echo Inc. | 15 | 0 to 30 days | \$1,200,000 |
| Clark | car repair | to build a new building and have it for the public to come and work on there cars/trucks them self while they are indoor. for cheap prices. this would employ severl people plus provide a benfit to the comminty. there would be tools provide an assiant if the customer needs it. the expected out come would result in more jobs saving the comminty money and more tax revune for the state | small bussins | 5 | 0 to 30 days | \$300,000 |
| Clark | Business Growth | Purchase, repair equipment, provide jobs and working capital for multiple new projects which could include improvements to schools, governmental buildings as well as upgrade and improve energy efficiency to businesses as well as residential sites. | All Pro Construction Services Ltd. | 50 | 0 to 30 days | \$950,000 |
| Clark | Hawk Haven Stimulus | I currently have a thriving business that is in dire need of cash flow to keep operating. With stimulus money, I would be able to hire additional personnel to help with daily operations of the business and stimulate the economy by keeping our suppliers in business. We employ many suppliers so that we can operate successfully and a majority of our suppliers and associates are located in the state of Ohio. Therefore, we would be able to help with keeping Ohio jobs in Ohio and stimulating the agriculture market. | Hawk Haven Thoroughbreds, Ltd. | 10 | 0 to 30 days | \$25,000 |
| Clark | Limecrest Water System | Install approx. 18,000 LF of 6 inch water main in existing Limecrest subdivision with about 290 low and moderate income homes. Subdivision contains small lots on private wells | Bd of Clark County Commissioners | 20 | 181 days or more | \$1,600,000 |
| Clark | Rockway Water Distribution Replacement | Replace 3000 LF of undersized water main originally installed in 1940. Replace fire hydrants in existing subdivision serving 150 homes, businesses and a school. | Bd of Clark County Commissioners | 15 | 91 to 180 days | \$900,000 |
| Clark | Clark County Hydrant Replacement Program | Replace about 60 leaking hydrants in multiple water districts with new models to increase reliability to reduce water loss. | Bd of Clark County Commissioners | 8 | 0 to 30 days | \$180,000 |
| Clark | Raymond Drive Lift Station Replacement | Construct replacement sanitary sewer lift station with two submersible pumps, 20 Hp motors and appurtenances. Demolish existing station. | Bd of Clark County Commissioners | 10 | 0 to 30 days | \$180,000 |
| Clark | Park Layne Sewer Rehab Project | Rehabilitate 2500 lf of 8 inch sanitary sewer, by cured in place methods, in area subject to infiltration/inflow. | Bd of Clark County Commissioners | 5 | 31 to 90 days | \$150,000 |
| Clark | Garden Acres Sewer Rehab Project | Rehabilitate 1200 lf of 8 inch sanitary sewer, by cured in place pipe methods, to remove sources of infiltration/inflow. | Bd of Clark County Commissioners | 5 | 31 to 90 days | \$825,000 |
| Clark | Northridge Manhole Rehab Project | Rehabilitate 30 manholes in Northridge district with waterproof coating to seal out infiltration. | Bd of Clark County Commissioners | 3 | 31 to 90 days | \$50,000 |
| Clark | Northridge Sewer Rehab Project | Rehabilitate 2500 lf of 8 inch sanitary sewer by cured in place pipe methods, in area subject to infiltration/inflow. | Bd of Clark County Commissioners | 5 | 31 to 90 days | \$150,000 |
| Clark | Dayton Parkridge Sanitary Sewer Project | Construct 24,000 lf of 8" and 12" gravity sanitary sewer, 12,500 lf of force main, and four lift stations to serve residents in Parkridge Acres and two mobile home parks. The project was designed and bid in 2002 but was not constructed due to high user costs. This unsewered area sits atop a fractured bedrock aquifer. Installing sanitary sewers would remove septic leachate from the aquifer | Bd of Clark County Commissioners | 20 | 91 to 180 days | \$2,000,000 |
| Clark | Water Line Extension to West National Road | Construct a water line, storage tank and booster station to serve local manufacturer on West National Rd. Current water system cannot meet arsenic standard and constrains the manufacturer. Business has used bottled water for a decade. Business has been ordered to connect to public water, but not public water system nearby. Project will create 30 construction jobs, retain 50 manufacturing jobs and make a safe public water supply available to nearby residents, churches and a village | Bd of Clark County Commissioners | 80 | 91 to 180 days | \$1,946,250 |
| Clark | Clark County Utilities Energy Efficiency Improve | Replace 32 high Hp motors at Southwest Regional WWTP, water plants, and lift stations with high efficiency motors to reduce energy consumption at 24 hr/day facilities. Replace standard motor drives with Variable Frequency Drives (VFD) to further reduce energy consumption. Project creates about 12 jobs for fabrication and installation. Reduced energy costs benefit ratepayers now and in future. Reduced energy consumption reduces greenhouse gases | Bd of Clark County Commissioners | 12 | 31 to 90 days | \$281,600 |
| Clark | Southwest Regional WWTP Solids Handling Improvmts | Install a biosolids belt press, weatherproof housing for the press, digester piping, related electrical upgrades to transport liquid biosolids to the new press. This project will eliminate a bottleneck in the treatment process and will likely allow Clark County to forgo \$10M in capacity expansion costs WWTP serves 11,000 residents and businesses in Clark, Greene and Montgomery Counties. Project will create 20 construction jobs and retain 900 jobs in the service district. | Bd of Clark County Commissioners | 920 | 91 to 180 days | \$1,200,000 |
| Clark | School based counseling | middle school students in the Springfield City Schools. A majority of our students come from poverty They experience many barriers to their education including abuse, drugs/alcohol use, violence, depression, PTSD, parents in prison, pregnancy and a lack of basic needs. We provide them a safe place to come and talk and help remove these barriers. The district is in the middle of major budget cuts, lay-offs and restructuring all of the schools. There will soon be nobody there to help the many lost, hurt, scared, sad and angry students. Teachers and administrators will be stretched so thin while still trying to reach testing benchmarks. We help connect students and their families to services within the community. We have time to build positive relationships and are able to help before a crisis occurs. As a result of helping kids and their families we can help keep the schools safer, improve attendance and help improve test scores. Thank you for considering our application. We are all very worried about how this community will function with all of the upcoming changes. | Mental Health Services for Clark County | 3 | 0 to 30 days | \$250,000 |
| Clark | connection to public utilities | Connection to public water and public sewer for facility used as a migrant head start school and daycare for over 100 children and to employ 35-40 people. | Ladder Oak Investments | 40 | 31 to 90 days | \$75,000 |
| Clark | Green Filter Water Filtration System | Christ Chapel operates a fully licensed day care and after school latch key program . At present our water supply comes from a well because public water is not available to us yet. This system will help us keep the Arsenic level, normally found in well water below an acceptable level making the water safer for our children to drink. Our Day Care and Latch Key Program works with Clark County Jobs and Family Service Dept. assisting parents of low income to be able to attend college or accept jobs to help support their families. Kiddie Care has been licensed and operating since 1984 | Christ Chapel Church of God Kiddie Care | 8 | 0 to 30 days | \$25,000 |
| Clark | SR42 Water Transmission Line Replacement | because the existing 4" main supply the west elevated storage tank relatively small volumes of water are pumped to this tank & high pressures are experienced in the distribution system. Replacement with 3,500 LF of 12" DIP line, with appurtenances, between Jamestown St & Sprague Rd will alleviate these problems & reduce power consumption/operating&maintenance cost for well pumps. | Village of South Charleston | 10 | 31 to 90 days | \$584,000 |
| Clark | Honey Creek Mobile Home Park Water Extension | To extend 12" water line from the City of New Carlisle approximately 19,000 linear feet to serve three low income mobile home parks in Pike Township, Clark County | City of New Carlisle | 30 | 181 days or more | \$1,330,000 |

| Clark | Accessing Ohio's Rivers | This is a follow-on project to another project that was submitted with the title "Cleaning up Ohio's Rivers." That project was submitted to the Energy and the Environment program, under the Energy and the Environment General/Other sub-program. The Cleaning up Ohio's Rivers project will identify areas that are adjacent to Ohio's rivers that will serve as excellent access locations for Ohio's resident to launch canoes and kayaks. The project being proposed here will use that information to improve and build the access locations. Good paying jobs with health care benefits will be created | Midwest River Clearing LLC | 40 | 31 to 90 days | \$800,000 |
| Clark | Erosion Intervention for Ohio's Rivers | This is a follow-on project to another project that was submitted with the title "Cleaning up Ohio's Rivers." That project was submitted to the Energy and the Environment program, under the Energy and the Environment General/Other sub-program. The Cleaning up Ohio's Rivers project will identify all locations on Ohio's Rivers that are in need of erosion control measures. The project being proposed here will use that information to implement the erosion control measures in coordination with ODNR and the Ohio EPA. Good paying jobs with health care benefits will be created | Midwest River Clearing LLC | 40 | 91 to 180 days | \$4,000,000 |
| Clark | Pollution Mitigation for Ohio's Rivers | This is a follow-on project to another project that was submitted with the title "Cleaning up Ohio's Rivers." That project was submitted to the Energy and the Environment program, under the Energy and the Environment General/Other sub-program. The Cleaning up Ohio's Rivers project will pinpoint the sources of all pollution for every river in Ohio. The project being proposed here will take that information and mitigate the sources of pollution. Good paying jobs with health care benefits will be created | Midwest River Clearing LLC | 40 | 91 to 180 days | \$4,000,000 |
| Clark | Wastewater Treatment System | The project involves the installation of an extended aeration WWTP including sand filtration and disinfection. The economic viability of this very small mobile home park depends on its ability to comply with its NPDES permit. Without this WWTP, the MHP will go out of business with both the loss of jobs and the loss of homes for the mostly low income and elderly residents. Jobs will also be created in the construction and installation of the WWTP. estimated at ca. \$7.1 million total. (See www.hollandiabotanical.com.)The Plan refers to our site of ca. 11 acres, leased to us by the Springfield Conservancy District. Phase 7, located in an industrial zone, is to include support and education buildings, community gardens, and parking. Phase 7 estimate: \$2.265 million. Our request would be for environmental cleanup and preparation of the Phase 7 section of the site. We have just begun to study the issue of brownfield classification for this section and the nature of contamination within it. The "worst case" estimate for remediation is \$500,000. | Tecumseh Mobile Home Park, Inc. | 5 | 31 to 90 days | \$80,000 |
| Clark | Hollandia Botanical Garden | CLARK-SHAWNEE Local has deteriorating elementary schools. These schools were built in the early 1900's. Existing structures make it impossible to offer the curriculum and technology needed to prepare our students for the 21st Century. The ability to build two grade K-8 school buildings would enable students to prepare for an ever-changing workforce as we could offer curriculum based on problem-solving and innovative technology. These buildings would serve as a focal point for community activities. Community members would use the facilities for a number of events. This project would enhance the local economy by creating construction jobs for our area. Educating our children for the 21st century is essential! We must have the building infrastructure to allow this learning to take place. Outcomes: 1. Create learning environments that support project-based learning, community service, advanced technology curriculum, and active student engagement. 2. Enhance the course offering to students to include Gateway to Technology (STEM) and technology curriculum. 3. Provide greenspace and stormwater re-use at new Public Health Center addition. New addition is highly energy efficient and needs appropriate landscaping for greenspace, stormwater re-use and existing and new parking lot storm water collection. | Hollandia Botanical Gardens | 15 | 31 to 90 days | \$500,000 |
| Clark | Construction of Two K-8 Schools | CLARK-SHAWNEE Local has deteriorating elementary schools. These schools were built in the early 1900's. | Clark | Emergency Operations and Training Center of Excellence | This highly collaborative project will create a National Center of Excellence for Emergency Management training, as well as an operational Emergency Operations Center. Partners in the project include Clark State Community College, City of Springfield, Clark County Commissioners, EMA Region 3, Springfield Air National Guard, and 11 county police, fire, and EMS departments. This training facility will also specialize in NIMS-compliant Incident Command instruction as well as enhance the training exercises available for existing fire, hazardous materials, police, and EMS programs. This Center of Excellence will serve local, regional, state and national needs. It will assist Ohio municipalities to achieve the federal compliance required under NIMS. Since this is the only facility in the State of Ohio (and one of the few in the country) to offer live incident command and emergency operations training, it will serve as a model for other states that will come, train and replicate our Center of Excellence. The Emergency Operations Center will be constructed to withstand any type of local or regional d | Clark State Community College | 100 | 91 to 180 days | \$4,500,000 |

|----------------|--|--|---|----------------|--------------------|---------------------------|
| Clark | Staff House 1 and 2 Windows | Replace all windows in both original farm houses. The homes were built in 1910 and 1917 and have the original sash windows. Install efficient replacement windows. | Oesterlen Services For Youth | 5 | 91 to 180 days | \$140,000 |
| Clark | Solar Panels for Township Buildings | This grant would provide for grid-tied solar photovoltaic systems at three locations: Mad River Township garage, Enon-Mad River Township Fire and EMS Station, and the Husted Fire and EMS Station. This system will reduce electric consumption by about 50% and save approximately 1650 tons of CO2 over 25 years as well as significantly reducing the cost of energy to the township. | Mad River Township | 10 | 0 to 30 days | \$700,000 |
| Clark | energy home improvements | new energy efficient water heater; air conditioner; furnace; windows; wiring for home. | Patricia McVey | 1 | 31 to 90 days | \$25,000 |
| Clark | STEMM Lab for Future Jobs Training - amended | high-demand jobs in Information Technology (IT) and other Science, Technology, Engineering, Math and Medical (STEMM) fields. IT jobs are documented as the highest growth, highest wage single occupation by Ohio Skills Bank, ODJFS partners, and area employers. Further, training in these fields has become a critical component of all occupations from supply chain management to nursing. This laboratory construction project will reconfigure the entire ground floor (12,300 square feet) of a college campus building. Flexibility in design will enable our corporate and civic partners to also utilize our high-tech training facilities with their own trainers or in collaboration with the college's faculty. An economic impact study estimated that Clark State increased the output of local industries by \$111 million through skills gained by former students in the present-day workforce. Employment for community college graduates is expected to grow by 21.7 percent in Ohio over the next | Clark State Community College | 10 | 31 to 90 days | \$250,000 |
| Clark | STEMM Lab for Future Jobs Training | demand jobs in Information Technology (IT) and other Science, Technology, Engineering, Math and Medical (STEMM) fields. IT jobs are documented as the highest growth, highest wage single occupation by Ohio Skills Bank, ODJFS partners, and area employers. Further, training in these fields has become a critical component of all occupations from supply chain management to nursing. This laboratory construction project will reconfigure the entire ground floor (x square feet) of college campus building. Flexibility in design will enable our corporate and civic partners to also utilize our high-tech training facilities with their own trainers or in collaboration with the college's faculty. An economic impact study estimated that Clark State increased the output of local industries by \$111 million through skills gained by former students in the present-day workforce. Employment for community college graduates is expected to grow by 21.7 percent in Ohio over the next decade because we prepare individuals to fill the jobs needed in their business communities. | Clark State Community College | 10 | 31 to 90 days | \$250,000 |
| Clark | Ohio Performing Arts | Ohio Performing Arts Institute is a not-for-profit organization that provides high quality instruction in dance, acting, and music for students of all ages. We have a current enrollment of approximately 250 students from Clark and several surrounding counties. We produce an annual production of the Nutcracker plus two or more Children's Theatre productions each year. We also sponsor and produce a "pre-professional" ballet company, The Springfield Ballet Theatre. As is the case for many Arts Organizations, we have seen a decline in philanthropic and other support for our ongoing activities. The requested funds would provide much needed help to keep our small staff of teachers and creative personnel employed. | Ohio Performing Arts Institute | 6 | 0 to 30 days | \$25,000 |
| Clark | Call Center Worker Training Program | Clark State Community College, in collaboration with the Clark County Work Plus Job Center and area employers, will create a call center worker training program that will retrain dislocated workers to fill workforce demand. According to the US Department of Labor, the occupation classified as customer service representative has the highest anticipated growth between 2006 and 2016. The call center program will be short-term, yet comprehensive. Participants will be required to attend Monday through Friday, 8:00 a.m. to 4:00 p.m. for two weeks, a total of 80 contact hours. They will learn the necessary technical skills along with work ethics and interpersonal/customer relations. Students successfully completing the program will receive a nationally-recognized certification. Career placement and retention will also be program components. The call center training program will train 160 people per year for seven years. | Clark State Community College | 1120 | 31 to 90 days | \$40,000 |
| Clark | Greening Technology | A reduction of the number of servers on a public college campus from 8 to 2 will save 24 kilowatts of energy a day, with additional savings in the future as more servers are consolidated. | Clark State Community College | 15 | 0 to 30 days | \$50,000 |
| Clark | Replacement of water lines | Replace complete waterline system in Village consisting of approximately 6000 feet of new water lines including all shutoffs. This system has been in service since 1955. It is getting very bad. The village does not have the finances to replace this system. WE are the lowest LMI area in Clark County. WE have a very limited budget and no money to finance a project like this. | Village of Catawba | 25 | 181 days or more | \$1,400,000 |
| Clark | This Place Has Gone to the DOGS | Foreclosures, lay-offs and economic hardships have increased the number of animals entering our shelter. This increase coupled with helping less fortunate counties place their animals has put our shelter in a bind. The health of these animals is a concern with our building in disrepair. The kennel doors are broken, the concrete is cracked, the paint is peeling off of the walls and the power washer is broken. The energy loss through broken guillotine doors, old washers/dryers and air control furnace/air is immense. The outdated kennels need epoxy paint, doors to seal in heat and air, and a power washer to save on water usage. The old washers and dryers are a big loss of energy as well as our climate control system. We need to hire a contractor to do these repairs, creating jobs for a painter, a mason, a fence person and a contractor for door installation. The end results would be less energy used to heat and cool the kennels and building and less water used for cleaning, and jobs would be created. Together saving lives. | The Humane Society serving Clark County, Inc. | 4 | 0 to 30 days | \$50,000 |
| Clark | Conserving Energy for Cost Savings | Prudent stewardship of public funding and energy resources requires investment in energy infrastructure. In the long term, Clark State can cut costs by investing now in more efficient systems, including: installation of a new boiler for heating; installation of a new chiller for air conditioning; installation of digital controls to better manage utilities; upgrading entry/exit doors with access controls; installation of a new roof membrane on a campus building; window replacement; elevator replacement; power factor correction; cooling tower replacement; and fire alarm upgrades. These improvements will enable us to develop leaner operations, minimize costs and reduce our environmental footprint. | Clark State Community College | 25 | 0 to 30 days | \$655,000 |
| Clark | Fire Training Tower | Clark State Community College is required by state charter to deliver training to firefighters in basic and advanced rescue skills, ventilation, and fire suppression. Once trained, firefighters are mandated by the State to receive continuing education. In the last year, Clark State has trained 100 firefighters; this number will grow by 50 percent with mandated continuing education and expected growth in fire protection and homeland security occupations (as documented by the US Department of Labor). Unquestionably, Clark Stat must have a safe and effective training environment that encompasses all mandated training needs. A fire training tower will provide the necessary facilities for training both fire and rescue services. Current composite/metal technologies extend the expected life of a training tower while reducing maintenance costs by 40 to 60 percent. An estimated 1500 jobs will be created or retained through 2019. | Clark State Community College | 1500 | 91 to 180 days | \$675,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Clark | Town & Country | The Town & Country Early Childhood Center was a former school for children with disabilities built in the late 1960's. It was remodeled 6 years ago to permit childcare, community rooms, various agency occupancy. Although owned by Clark Co. MRDD, the building is occupied by the YMCA child care, Head Start, local health district, local hospital out patient clinic, early intervention programs, etc. There was not enough money to replace the dozens of large and small aluminum framed windows. They leak air like a sieve. A tight match will blow out. With replacement, we will reduce the investment in energy costs within a few years as well as make the building more comfortable for the children and others who occupy the facility year round. | Clark County Board of Mental Retardation & Develop | 7 | 31 to 90 days | \$155,000 |
| Clark | Ohio National Road Education Initiative | The Association itself has limited funds and is seeking funding for a education/print project of the Ohio National Road Design Handbook which is estimated to cost \$25,000. Along with the print of the Handbook, the funds would also allow for distribution and workshops to introduce the Handbook to local officials and assist them in its use. Ohio National Road Design Handbook provides key information on planning and suggested design practices along the National Road. The Ohio National Road Design Handbook and the affiliated workshops also constitute "free" advice to struggling counties and communities along the National Road, advice that will certainly encourage local and state-wide economic stimulus. | Ohio National Road Association | 15 | 91 to 180 days | \$25,000 |
| Clark | Certifying Adults to Fill High-Demand IT Jobs | Provide 240 \$1,000 technology certification testing scholarships between 2009 and 2011. Students successfully complete affordable community college courses with help from Pell grants, financial aid, loans, and part-time work but cannot afford IT industry certifications which cost between \$500 and \$1,000 per certification. Certification ensures eligibility for the most highly-demanded, high-paying (\$35/hour) jobs in Ohio EDR 4 (300 current; 600 between 2009 and 2011); Ohio (+20-50%; +18,700 jobs between 2006 and 2016), and the nation (+20% with 300,000 jobs open between 2006 and 2016). Businesses in the region needing certified IT workers include NCR, International Harvester, Northrup Grumman, Reynolds and Reynolds, CDW/Berbee, Ball Aerospace, DoNet, RSIS, CACI, LexisNexis, and Teradata. Certifications required to work at these businesses include Novell, CompTIA, Checkpoint, CISCO, ORACLE, MS, and others. Clark State administers over 100 scholarships every year and has the capacity to administer IT scholarships to fill workforce demands. | Clark State Community College | 240 | 0 to 30 days | \$240,000 |
| Clark | Retraining Dislocated Manufacturing Workers | Certify 40 workers who are dislocated from International Harvester with a national credential through the Manufacturing Skills Standards Council (MSSC) at a cost of \$3,000 each. The credential ensures workers are knowledgeable in the areas of safety, quality, manufacturing production and processes, and maintenance awareness. Certification assures employers that workers are qualified for advanced manufacturing jobs. In Ohio EDR 4, employers seeking MSSC certified workers include Yamada, KTH, Midwest Express, and Morgal Machine and Tool. Ohio-based national employers seeking MSSC certified workers include Honda Corporation, Cummins Engine, Dow Chemical Company, Harley-Davidson Motor Company, and Steelcase, Inc. | Clark State Community College | 40 | 0 to 30 days | \$120,000 |
| Clark | Firefighter Training: Burn Trailer | Clark State Community College provides fire training in 11 counties to potentially innumerable firefighters and trainees. Clark State's role and responsibility has been intensified by the recent State of Ohio mandate that all firefighters and trainees must have a life fire drill whether as part of initial training or continuing education. Clark State is also obligated to provide a safe training environment. The addition of a burn trailer will allow Clark State to fulfill its mandate of live burn training to as many firefighters and trainees as possible in the safest environment. This is part of a wider training program that will create or maintain 200 jobs over the next 18 months. | Clark State Community College | 200 | 31 to 90 days | \$185,000 |
| Clark | Police Academy | According to the March 16 2009 Poynter Online, recruiting among law enforcement agencies from the FBI to city police departments has increased dramatically. This is especially significant for city police departments because of the increased demand the quality of police academy graduates has been the highest in years. Clark State Community College, with its police academy, is at the locus of meeting the increasing demand by training a growing supply of highly skilled public safety and police officers who will be qualified for a range of safety and security occupations. The police academy at Clark State Community College will train graduate 20 highly qualified in the next 12 months. | Clark State Community College | 20 | 31 to 90 days | \$50,000 |
| Clark | Commercial Transport CDL Training | applicants. Indeed, the US Department of Labor notes the increasing demand of transportation-related occupations. This ranges from CD-licensed long-haul tractor-trailer drivers to hazardous materials transporters to vehicle and equipment inspectors. These market demands are not limited to any given geographic area. The skills cross industry sectors and the occupations provide opportunities for expansion and growth. The Commercial Transport Training Center at Clark State Community College is at the leading edge of driver training with a program that grows and adapts to supply the market needs with highly skilled driver. The CCTC will train to CDL 54 people over the next year. | Clark State Community College | 54 | 31 to 90 days | \$270,000 |
| Clark | Historic building renovation | Rehab and renovation of 99 year old buildings in downtown business district to continue and enlarge the operation of a family owned retail home furnishings business originally founded and continuously operated since 1888. Expansion would allow increased employment and increased sales of predominantly Ohio and American manufactured furniture products | Trostel's Home Furnishings | 12 | 31 to 90 days | \$318,000 |
| Clark | Green Energy Retrofitting, Energy Rating and Consu | that once anchored the American middle class, but in the industries of the future: solar panel installation, energy efficiency audits and retrofits, and green building. Unlike traditional blue-collar jobs, green-collar jobs can't be outsourced; these jobs are local-the money stays in the community. Green jobs represent an exciting new category of workforce opportunity, but these high-skill, specialty workers do not currently exist. In Ohio there are only 22 listed HERS-certified rater companies to evaluate the mandated requirements for the entire State's new construction, home weatherization, and commercial and public building retrofits, and even fewer certified installers for green energy upgrades. Alpha Omega will obtain training for new workers and purchase equipment for implementing energy audits, green retrofits and construction, solar panel installation and public education. By two months post-funding, the first trained and equipped team will be ready to launch. By the end of the first year, Alpha Omega will employ 20 people for green energy services throughout | Alpha Omega Sustainable Energy Solutions | 20 | 0 to 30 days | \$203,200 |
| Clark | Boiler Replacement | to replace (2) oil fired boilers that are 38 yrs old, (1) oil fired boiler 32 yrs old, and (1) oil fired boiler 31 yrs old, with (4) new 90% efficiency natural gas fired programmable boilers. This would eliminate (2) 1000 gallon above ground oil tanks located in a well protection area of Enon, Ohio. A preliminary quote from contractor available now upon request | Promac, Inc. | 4 | 31 to 90 days | \$80,000 |
| Clark | Layered Sensing for Advanced Manufacturing & Eng | platforms for the purposes of situational awareness and enhanced security within power-generation, water resource, and manufacturing facilities. This \$9 million proposal would create 300 jobs for the Dayton/Springfield area over the next 10 years. The primary focus will be to address needs as they pertain to CBRNE materials and domestic water resource management. This platform will interactively manage, integrate and display layered inputs from numerous data sources deployed in the operations of such facilities. Data sources would include: real time video, audio, maps, sensors, building plans, textual data and GIS data. The facilities will realize dramatic benefits in three specific areas: 1) Significantly enhanced situational awareness and security 2) In the event of an emergency, improved information delivery for first responders. 3) Dramatically increased efficiencies in manufacturing through waste reduction and power conservation. Additional collaborators on this project include Wilberforce University and the Ohio Manufacturers' Association | National Environmental Technology Incubator at Cen | 300 | 0 to 30 days | \$9,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------------|----------------|--------------------|---------------------------|
| Clark | CAD/911 System | Replacement of our CAD, 911 and Jail Management systems. Integration of our Records and Property Management systems with the CAD and Jail systems. New mobile data system. Data Interoperable with all agencies in Greene County and the City of Springfield's Police, Fire/EMS departments. This would allow us to share Law Enforcement and Fire/EMS data (bookings, warrants, emergency calls, robberies, etc...) with these departments. We seem to have met the limitations on our existing system. It was not made for the amount of calls and information that we enter. The records and property management systems will be integrated to save man hours reentering information that had previously been entered into three different systems. The 911 system will be IP based to allow for Next Generation 911 (texting, video, pictures, crash telemetry, etc... that will be sent to 911). The mobile data system will save time and improve officer safety. Sharing data with other surrounding agencies will allow us to solve more cases and protect the channels would be encrypted for private and tactical conversations. Our main channel would still be open to the public. Motorola P25 System. Interoperable from the dispatch consoles with no other patched systems to deploy. We would still be able to patch in with the City of Springfield 800mhz system. Interoperable with Champaign County, Madison County, over 10 police/sheriff's offices, 33 fire/ems departments in and around our county. Interoperable with 52 total agencies/departments including public works and schools. Lower maintenance costs than 700/800 mhz systems. 6 new dispatch consoles, 2 new transmitter sites, Replacement of 5 UHF satellite repeater sites with microwave systems to avoid our regular interference problems. Removal of our problematic in-car repeaters to lower our maintenance fees. Replacement of our portable radios with emergency (officer down) buttons. Replacement of 12 mobile radios that are about 25 years old. Replacement of transmitter and satellite repeaters that range from 20 to 30 years old. 1 transmitter tower and 1 tower replacement of Aluminum Siding on 3 Residential Buildings for Adults with Developmental Disabilities. The project will include modifications to the sidewalk substrate and installation with Commercial Grade Vinyl Siding. | Clark County Sheriff's Office | 1 | 91 to 180 days | 980,000 |
| Clark | Digital Simulcast Radio System | Storm sewer improvements consisting of 450 linear feet of new storm sewer pipes, 48,500 cubic feet of underground detention and a storm water quality feature; 300 space public parking lots & streetscape improvements consisting of 3,700 linear feet of sidewalk, street lights, furnishings, and handicap ramps at intersections to support a new commercial development. The public infrastructure will leverage over 60,000 square feet of commercial office and retail space that will add \$10,500,000 of new valuation. A minimum of 35 construction jobs will be created for the public improvements and new commercial construction that the private sector will invest in. Over 180 new permanent jobs will be created by the private sector. | Clark County Sheriff's Office | 1 | 31 to 90 days | 1,900,000.00 |
| Clermont | Residential Siding Replacement | REPLACE BRIDGE NO. CLE-276-0104, SFN: 1304658. Bridge carries SR 276 over Kain Run. | Southwest Ohio Developmental Center | 2 | 0 to 30 days | \$25,000 |
| Clermont | Downtown Loveland Job Creation and Revitalization | REPLACE BRIDGE NO. CLE-276-0104, SFN: 1304658. Bridge carries SR 276 over Kain Run. Resurfaced | City of Loveland | 215 | 91 to 180 days | \$590,000 |
| Clermont | Clermont County Drug Unit | Scarificing of existing asphalt roadways and parking lots. Patching of deteriorated areas where necessary. Pave all roadway and parking lot areas. Total surface area is approximately 2 lane miles. This project encompasses replacement of approximately 2400 square feet of walkways. This project will include ADA (Americans with Disabilities Act) improvements. | Clermont County Sheriff's Office | 3 | 0 to 30 days | \$188,000 |
| Clermont | Operation Safe Community | This project would include the construction of one new energy efficient Fire Station for Wayne Township Fire and Rescue, Clermont County, Ohio. This new facility would replace two existing buildings built in the mid 1900's which are not energy efficient. Wayne Township is a rural community located in northeastern Clermont county at the intersection of Clinton and Warren Counties. The new facility would have energy efficient windows, heating system and power system which would greatly decrease the current energy usage associated with the two current buildings. The project has had preliminary Engineering work and drawings completed. Specifications for the building have been completed and would need review and updated. The site has had some work done to it to ready it for construction. This project could be underway very quickly after a short Engineering review and update process. It is estimated that construction could be started in less than 90 days after funding is received. Thank you for your consideration of our project | Monroe Township Fire Department | 45 | 31 to 90 days | \$2,000,000 |
| Clermont | Dist 8, PID 22375, CLE SR 276 1.00 | REPLACE BRIDGE NO. CLE-276-0104, SFN: 1304658. Bridge carries SR 276 over Kain Run. | Ohio Department of Transportation | 37 | 31 to 90 days | \$455,000 |

| Clermont | Union Township Police Staffing | At this time, projected total cost is \$12 million for two years of funding, with roughly 9 million (4.5 million/year) in local revenues available at this time to support the PD over the next two years. Revenues are established through property taxation, which has not kept pace with inflation and community protection needs, leading to a recent Safety Service Levy proposal. Unfortunately, tight economic conditions in the surrounding community contributed heavily to the defeat of this levy at a recent special election, and now Union Township Police faces the prospect of possibly laying off 24 of 48 road patrol officers, thereby greatly impacting public and police officer safety and reducing quality of service and response times. | Union Township | 25 | 31 to 90 days | \$3,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Clermont | 21st Century Renewable Fuel-Electric Hybrid Locomo | (www.AHL-TECH.com) is developing and will test & demonstrate the world's first ethanol-electric hybrid locomotive, the cleanest & greenest available. The AHL-TECH locomotive will be cost-competitive with conventional diesel locomotives, and reduce to near zero emissions of carcinogenic fine particulate matter and ozone forming oxides of nitrogen, in addition to significant reductions in net greenhouse gas (CO2) emissions through the exclusive use of ethanol to fuel the locomotive. The design incorporates reliable and proven flooded lead acid battery technology provided by Crown (www.crownbattery.com) with a sophisticated computer-enabled power management system and other highly-efficient means of recapturing energy (e.g., regenerative braking, etc.). With sufficient funding, testing can begin immediately to be followed by the assembly of the first demonstration prototype(s) which could be put in service in Toledo/NW Ohio in 2009. This demonstration project, which crosses over a number of programmatic categories, will help create the replacement of approximately 60,000 sq.ft. of roof that is currently leaking and progressively becoming worse. | Alternative Hybrid Locomotive Technologies, Inc. (| 150 | 0 to 30 days | \$2,500,000 |
| Clermont | Ebon C. Hill Intermediate School Reroof | Replace and/or modify existing unit ventilator HVAC system in order to remove humidity properly. We are extremely concerned about the high humidity levels (at and above 70%) in our building which leads to mold growth. | Bethel-Tate Local School District | 20 | 0 to 30 days | \$650,000 |
| Clermont | Bethel-Tate Middle School HVAC Renovation | Replace and/or repair approximately 110,000 sq.ft of parking lot needed to make it safe for the staff, students and community which use the building and grounds | Bethel-Tate Local School District | 10 | 0 to 30 days | \$250,000 |
| Clermont | Bethel-Tate Middle School HVAC Renovation | Replace failing 100 ton rooftop condensing unit with more economical and energy efficient packaged chilled water unit. Thousands of dollars have been spent in repairs each year | Bethel-Tate Local School District | 15 | 0 to 30 days | \$250,000 |
| Clermont | Bethel-Tate Middle School HVAC Renovation | expenditures for the end of 2009 and early 2010 relative to Police and Fire services. Union Township projects all carryover funds to be exhausted, and further projects a shortfall approaching \$5.5 million for the 2010 Fiscal Year. Further economic prospects have led to an overwhelming levy defeat - this levy, meant to be effective in 2010, would have filled the projected shortfall for 3 years. However, the failed levy could potentially result in the layoffs of 25 police officers and 25 firefighters, if cuts cannot be realized. It is anticipated that funding can be immediately utilized to fund salaries and benefits for existing township police and firefighter personnel. | Bethel-Tate Local School District | 15 | 0 to 30 days | \$180,000 |
| Clermont | Union Township Safety Services Preservation Fundin | Stimulus funding is expected to be applied immediately towards supplementing funding for the day-to-day operations of the Police and Fire Departments at Union Township. Supplemental funding will assist in preserving existing revenue for operation in 2010 and will help offset the severe personnel cuts in Union Township until such time that the case can be made to pass an additional Safety Services Levy plan to build a 120 foot solid gold Statue of Obama in the middle of the town. | Union Township, Clermont County, Ohio | 50 | 31 to 90 days | \$5,500,000 |
| Clermont | Obama d'or | This way everyone can bow down to the great savior and realize that that without him and government our lives would have no meaning. I want to make it in Gold because I want to show that government spending has no bounds and all of our prayers for free jobs safe from layoff, 0 percent home loans, free gas, and free medical care for every person on Earth. I figure this will employ 2000 artist including a number of redundant people standing around looking busy. It will likely result in 10,000 people keeping their jobs. This number may be revised to 100,000,000 people since there is no real way to determine if a job was saved. Look forward to getting my piece of the pork pie. | Cerdo Masivo | 12,000 | 0 to 30 days | \$100,000,000 |
| Clermont | Safety in Pierce | We usually have only 2, rarely 3, officers to cover 23.5 square miles. We are an Appalachian Region County located on the Ohio River, East of Cincinnati OH. Our entire County is facing law enforcement shortages and cut backs due to the economy. We have 1 School Resource Officer which covers 3 schools and that position may have to be eliminated. Our department is grossly understaffed per the statistics supplied by both DOJ and the Ohio Attorney General's Office re per 1,000 residents in the mid west and in OHIO. The total cost of 675 K would allow us to continue the SRO program for 3 additional years and to hire 2 additional officers for 3 additional years. I understand we would be responsible for retaining the officers for the 4th year. Clermont County has been hit by an exponential increase in drugs including meth labs and heroin. Now the unemployment issue is hurting funding for the police department and contributing to criminal activity. These 3 jobs would be good jobs and be very visible to the public. It would be win-win, showing the tax payers the result | Pierce Township Police Department | 3 | 31 to 90 days | \$506,250 |
| Clermont | Dist 8, PID 85886, CLE 4 hybrid LTVs | Purchase 4 hybrid light transit vehicles for the Clermont Transportation Connector | Ohio Department of Transportation | 8 | 31 to 90 days | \$500,000 |
| Clermont | Dist 8, PID 85887, CLE 1 diesel light transit vehi | Purchase 1 diesel light transit vehicle | Ohio Department of Transportation | 2 | 31 to 90 days | \$110,000 |
| Clermont | Dist 8, PID 85888, CLE 3 support vehicles | Purchase up to 3 support vehicles for the Clermont Transportation Connector | Ohio Department of Transportation | 1 | 31 to 90 days | \$40,000 |
| Clermont | Keep Police Presence in Pierce | under Byrne Memorial/JAG. The SRO has 3 schools but we may be forced to cut the position completely due to a lack of funding. That is our only SRO position. The undercover narcotics officer is part of a county wide narcotics unit. All the local departments are too small to have their own narcotics units so we must contribute to one agency. We have seen an exponential growth of crime, heroin, meth, and crack cocaine. This grant would allow us to continue the SRO officer and the narcotics officer position. Both will be highly publicized and acknowledged given to the stimulus program. This would be for one year and local government would pay 25%. We are a small, understaffed (by DOJ and Ohio Attorney General stats) police department in an Appalachian designated county on the Ohio River. Often times we have only 1-2 officers attempting to patrol 23.5 square miles and help is a long way off. We need and ask for your help. Our funding is through tax levies and our local economy is poor county wide. This would be visible jobs to keep the community Operations and maintenance facility for the Clermont Transportation Connector | Pierce Township Police Department | 2 | 31 to 90 days | \$120,000 |
| Clermont | Dist 8, PID 85889, CLE Operations & maint facility | The Village of Williamsburg currently operates on a one-tower water system. Another tower exists in the Village, but that tower is currently offline. This system is unable to provide adequate fire protection pressure to Dualite Manufacturing, the Village's largest employer, providing approximately 31.5% of the 2007 gross income tax revenue of the Village. In order to permanently provide the needed fire protection to Dualite, as well as provide higher pressure and redundancy in the system, the Village of Williamsburg, in partnership with Clermont County, would like to raise the 8th Street tower 46 feet to the same elevation as the primary tower. The tower would also be rehabilitated and repainted. The following outputs will be accomplished as part of the project. ? 184 linear feet of each of the following: riser shell, interior inlet/outlet pipe, ladder, electrical conduit. ? Additional bell stiffeners and anchor bolts to the foundation ? 7550 Sf of exterior surface painting ? 5500 Sf of interior surface painting (wet portion) Installation of an emergency back-up generator for the New Richmond Water Treatment Plant. Currently electric outages leave the water plant without any operational function. | Ohio Department of Transportation | 100 | 181 days or more | \$5,000,000 |
| Clermont | North 8th Street Water Tower Elevation & Rehabilitt | The Village of Williamsburg currently operates on a one-tower water system. Another tower exists in the Village, but that tower is currently offline. This system is unable to provide adequate fire protection pressure to Dualite Manufacturing, the Village's largest employer, providing approximately 31.5% of the 2007 gross income tax revenue of the Village. In order to permanently provide the needed fire protection to Dualite, as well as provide higher pressure and redundancy in the system, the Village of Williamsburg, in partnership with Clermont County, would like to raise the 8th Street tower 46 feet to the same elevation as the primary tower. The tower would also be rehabilitated and repainted. The following outputs will be accomplished as part of the project. ? 184 linear feet of each of the following: riser shell, interior inlet/outlet pipe, ladder, electrical conduit. ? Additional bell stiffeners and anchor bolts to the foundation ? 7550 Sf of exterior surface painting ? 5500 Sf of interior surface painting (wet portion) Installation of an emergency back-up generator for the New Richmond Water Treatment Plant. Currently electric outages leave the water plant without any operational function. | Village of Williamsburg, Ohio | 315 | 0 to 30 days | \$128,840 |
| Clermont | Water Treatment Plant Emergency Generator | Installation of an emergency back-up generator for the New Richmond Water Treatment Plant. Currently electric outages leave the water plant without any operational function. | Village of New Richmond | 1 | 31 to 90 days | \$60,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Clermont | Williamsburg Wastewater Treatment Plant Upgrade, P | existing infrastructure to a Biological Nutrient Removal Process, allowing the Village to meet new NPDES permit levels for phosphorus and nitrogen. These improvements will significantly improve the daily operation and the future capability of this system, allowing for economic expansion for both existing and new employers. During wet weather events, the plant currently operates at over 100% capacity. The addition of a Flow Equalization Basin will eliminate this problem, lessening circumstances where EPA violations occur & minimizing environmental impacts on the surrounding community. The addition of the Aerated Sludge Tank would expand the capacity and ease the burden of the two existing, older sludge tanks. The following outcomes will be generated by this project: 350 linear feet 6-inch sludge line, 130 linear feet 6-inch air piping, 300 cubic yards excavation, 150 cubic yards fill, 55 cubic yards concrete slabs, 80 cubic yards concrete walls, 10' wide overhead doors, 750 square feet concrete foundation, Village of Amelia - Church/Chapel Roads Improvements - Street to accommodate new school, remove/replace and widen existing pavement, with upgrading storm drainage. | Village of Williamsburg, Ohio | 15 | 0 to 30 days | \$400,000 |
| Clermont | Village of Amelia - Church/Chapel Road Improvement | Village of Amelia - Church/Chapel Roads Improvements - Street to accommodate new school, remove/replace and widen existing pavement, with upgrading storm drainage. | Village of Amelia | 100 | 0 to 30 days | \$950,000 |
| Clermont | Village of Amelia - Woodlans Drive/Main Street Int | Village of Amelia - Woodlans Drive - Main Street Intersection Improvement | Village of Amelia | 10 | 181 days or more | \$280,000 |
| Clermont | Village of Amelia - Main Street (SR 125) Improve | Village of Amelia - Main Street (SR 125) Improvements and Streetscape complete the remodeling of the old high school that now serves as the Rivervalley Community Center. Create office space for county satellite offices, disaster relief center and space for village offices. | Village of Amelia | 50 | 181 days or more | \$4,400,000 |
| Clermont | Community Center Remodeling | Constructed a CORPS of Engineer certified eath mound around the current WWTP for flood protection. This would remove the WWTP from the flood hazard area | Village of Moscow | 2 | 181 days or more | \$750,000 |
| Clermont | Moscow WWTP | Remove five old fuel tanks and restore the area. This project would improve the entrance to the village. | Village of Moscow | 0 | 31 to 90 days | \$550,000 |
| Clermont | Tank Removal at US 52 | Elevation Wells Street for an emergency evacuation route | Village of Moscow | 4 | 91 to 180 days | \$35,000 |
| Clermont | Wells St Road Elevation | To replace the water departments lime slaker (10 years old), which has become problematic and difficult to maintenance. The second part is to repair, sandblast and paint the existing lime silo which had began to deteriorate because of exposure to outside elements. | Village of Moscow | 6 | 181 days or more | \$450,000 |
| Clermont | Lime slaker replacement and Lime silo rehab | Due to the current economic conditions within the State of Ohio and Clermont County, Ohio, attrition will result in the loss of approximately six (6) Deputy positions. | City of Milford | 8 | 31 to 90 days | \$200,000 |
| Clermont | Deputy Retention | In order to maintain our current staffing for First Responders, the aforementioned funding will be essential. The County expects an increased workload for Road Patrol Deputies due to layoffs and cutbacks in other local law enforcement agencies which requires additional coverage by the Sheriff's Office. | Clermont County Sheriff's Office | 6 | 0 to 30 days | \$471,978 |
| Clermont | Clermont County Adult Detention | Due to current economic conditions within the State of Ohio and Clermont County, Ohio, Correction Officer layoffs have begun and will result in the closing of a 32 inmate pod at the Clermont County Adult Detention Center. As a result of the closing of the inmate pod, four (4) Corrections Officers have been given layoff notices effective March 7, 2009. An additional five (5) Corrections Officers will be given layoff notices no later than November of 2009. Currently the Adult Detention Facility has approximately 100 persons on a waiting list to begin serving their sentences. This number is expected to increase with the closing of the 32 inmate pod | Clermont County Sheriff's Office | 9 | 0 to 30 days | \$526,100 |
| Clermont | Village of Amelia - Jenny Lind-Oak Street/Locust L | Village of Amelia - Jenny Lind-Oak Street/Locust Lake Intersection | Village of Amelia | 10 | 181 days or more | \$200,000 |
| Clermont | Village of Amelia - Church/Chapel Road Improvement | Village of Amelia - Church/Chapel Road Improvement | Village of Amelia | 100 | 0 to 30 days | \$950,000 |
| Clermont | Village of Williamsburg - Fifth St. Improvements | Village of Williamsburg - Fifth St. Improvements - Willow Street to Main Street - Remove and replace existing pavement, widen, upgrade storm drainage, sidewalks, replace water main, line and repair sanitary sewer | Village of Williamsburg | 20 | 0 to 30 days | \$861,000 |
| Clermont | Village of Williamsburg - Fourth St. Improvements | Village of Williamsburg - Fourth St. Improvements - Phase 2 Improvements Gay Street to railroad - Remove and replace existing pavement, widen, upgrade storm drainage, sidewalks, replace water main. | Village of Williamsburg | 20 | 0 to 30 days | \$500,000 |
| Clermont | Township Deputy | Due to the current economic conditions within Monroe Township, officials lack the funds to maintain current staffing levels. At present Monroe Township contracts two (2) Road Patrol Deputies. As a result, the Clermont County Sheriff's Office would be required to absorb the cost of one (1) of the assigned Deputies. Due to the budgetary constraints within Clermont County and the Sheriff's Office one (1) Deputy would be laid off. | Clermont County Sheriff's Office | 1 | 0 to 30 days | \$78,663 |
| Clermont | Technology Infrastructure Update | New student computers, associated new servers, routers, switches and wireless technology along with appropriate software updates including installation. Our district is a low wealth/high poverty district. Replacing all student computers would enable our students to better participate in the real world job market that is heavy in technology. This will also help our students have higher achievements in the classroom as well to prepare for the high tech jobs they will be competing for in the Ohio job market. | Felicity Franklin Local School District | 2 | 91 to 180 days | \$450,000 |
| Clermont | Mobile Computer Labs | Procurement and deployment of fourteen 32 unit mobile laptop computers and associated carts and extra batteries. To allow teachers access to computers for use in whole class research and study lessons and projects. Sufficient computer lab space is not now available nor the funds to purchase the mobile computer labs. 6000 total students would have access to these units at our eight schools. | Milford Exempted Village Schools | 1 | 0 to 30 days | \$420,000 |
| Clermont | Wireless Infrastructure | Equip all 6 elementary schools, one junior high school and one senior high school with wireless access points and associated servers, software and equipment. To allow teachers and students access from anywhere on campus for use in individual and whole class research and study, lessons and projects. Sufficient computers and lab space are not now available nor the funds to purchase. This project would allow students to access data from their own laptops or electronic devices. It will also allow for use of school owned systems from anywhere as well as create a "hotspot" for use by community members. | Milford Exempted Village Schools | 4 | 31 to 90 days | \$420,000 |
| Clermont | Replacement Computers | Funds to replace old computers which are from 4 to 9 years old and are at or near the end of functionality in the educational setting. Teachers rely on classroom desktops to allow students the ability to do math, practice, research and composition. 2000 of the districts computers were purchased with the aid of state and local funds which are no longer available. | Milford Exempted Village Schools | 6 | 31 to 90 days | \$990,000 |
| Clermont | VOIP Phone Systems | Purchase and deploy VOIP phone systems to six elementary schools Provide a telephone in every classroom to increase student safety and enhance teacher/parent communication. Also, to capture savings on utility expenses which can then be redirected to direct educational needs such as teaching staff and student books and supplies. | Milford Exempted Village Schools | 4 | 31 to 90 days | \$380,000 |
| Clermont | School Renovation | We are currently renovating and adding on to our high school. The older section of the high school needs a new roof, but this is not currently in the project. The cost of the new sections of roof are priced at \$1,000,000. The total cost of the renovation and addition without the roof is \$31,000,000 | Milford Exempted Village Schools | 100 | 0 to 30 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------------|----------------|--------------------|---------------------------|
| Clermont | Amelia Olive Branch and SR 125 Intersection | Improve Intersection of SR 125 and Amelia-Olive Branch Road. Project includes constructing an access road to eliminate full movement access locations along SR 125, add left-hand turn lane from North Amelia-Olive Branch onto eastbound SR 125, curb and gutter drainage to be installed along South side of SR 125, and right-hand turn lanes and a left hand turn onto extended Amelia Olive Branch Road. This project will also include a 36 space Park and Ride | Clermont County Engineers Office | 50 | 31 to 90 days | \$3,817,094 |
| Clermont | Wards Corner Road Repair | Resurfacing and full Depth Repair of Wards Corner Road. (SR 126 to SR 48) plus associated pavement markings and raised pavement markers - 4.22 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$337,600 |
| Clermont | Nine Mile Tobasco Road Repair | Resurfacing and full Depth Repair of Nine Mile Tobasco Road. (US 52 to SR 125) plus associated pavement markings and raised pavement markers - 3.98 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$318,400 |
| Clermont | Merwin Ten Mile Road Repair | Resurfacing and full Depth Repair of Merwin Ten Mile Road. (Locust Corner Road to SR 125) plus associated pavement markings and raised pavement markers - 1.8 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$144,000 |
| Clermont | Roundbottom Road Repair | Resurfacing and full Depth Repair, Berm Repair and Pre-Leveling Roundbottom Road. (Hamilton City Line to US 50) plus associated pavement markings and raised pavement markers - 4.29 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$700,000 |
| Clermont | Old SR 74 (West) Road Repair | Resurfacing, full Depth Repair and Pre-Leveling Old SR 74. (SR 32 to SR 32-West End) plus associated pavement markings and raised pavement markers - 1.17 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$150,000 |
| Clermont | Tealtown Road Repair | Resurfacing and pre-Leveling Tealtown Road. (Old SR74 to Teal Lane) plus associated pavement markings and raised pavement markers - 1.84 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$128,800 |
| Clermont | Buckwheat Road Repair | Resurfacing and pre-Leveling Buckwheat Road. (SR 131 to SR 28) plus associated pavement markings and raised pavement markers - 1.83 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$128,800 |
| Clermont | Loveland Miamiville Road Repair | Resurfacing and pre-Leveling Loveland Miamiville Road. (Wards Corner Road to Price Road-West End) plus associated pavement markings and raised pavement markers - .80 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$56,000 |
| Clermont | Gleneste Withamsville Road Repair | Resurfacing Gleneste Withamsville Road. (Shayler Road to Old SR74) plus associated pavement markings and raised pavement markers - 2.67 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$160,200 |
| Clermont | Old SR 74 (East) Road Repair | Resurfacing and pre-Leveling Old SR 74. (Amelia Olive Branch Road to Dead End East End) plus associated pavement markings and raised pavement markers - 1.0 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$70,000 |
| Clermont | Clough Pike Repair | Resurfacing and pre-Leveling Clough Pike. (Gleneste Withamsville Road to Amelia Olive Branch Road) plus associated pavement markings and raised pavement markers - 3.33 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$233,100 |
| Clermont | Shayler Road Repair | Resurfacing Shayler Road. (Gleneste Withamsville Road to Old SR74) plus associated pavement markings and raised pavement markers - 2.67 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$160,200 |
| Clermont | Beechwood Road Repair | Resurfacing Beechwood Road. (SR 32 to Summerside Road) plus associated pavement markings and raised pavement markers - 1.79 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$107,400 |
| Clermont | ODMRDD Developmental Center Replace Gas Line | Replace a deteriorating gas line at an ODMRDD Developmental Center | Ohio Department of MRDD | 10 | 91 to 180 days | \$250,000 |
| Clermont | Woodville Pike Repair | Resurfacing Woodville Pike. (SR 28 to SR 727) plus associated pavement markings and raised pavement markers - 7.45 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$447,000 |
| Clermont | Branch Hill Guinea Pike Repair | Resurfacing Branch Hill Guinea Pike. (SR28 to Branch Hill Loveland Road) plus associated pavement markings and raised pavement markers - 4.88 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$292,800 |
| Clermont | Bethel New Richmond Road Repair | Resurfacing Bethel New Richmond Road. (New Richmond to SR 232) plus associated pavement markings and raised pavement markers - 7.31 Miles | Clermont County Engineers Office | 20 | 31 to 90 days | \$438,600 |
| Clermont | Sign Upgrades for Various Roads | Upgrade existing traffic signs to current standards | Clermont County Engineers Office | 20 | 31 to 90 days | \$250,000 |
| Clermont | Old SR 74 Extension to College Drive | Extending existing Old SR 74 at the eastern dead-end section to College Drive. The new connection will provide alternative access to UC Clermont College as well as other area businesses. | Clermont County Engineers Office | 50 | 31 to 90 days | \$475,000 |
| Clermont | Bridge Load Ratings | Perform load ratings on approximately 25 bridges. | Clermont County Engineers Office | 25 | 31 to 90 days | \$400,000 |
| Clermont | MAC | With the power of the internet, it is now possible to leverage that existing infrastructure to provide robust security systems to customers. Our project revolves specifically around access control (cardkey) systems and the opportunity to create attractive options to potential clients to affordably secure their property and safeguard their employees. By providing us a modest \$400,000 grant from the stimulus funding, we will invest in upgrades to our facility to accommodate customer demand. We will immediately create (5) new full-time jobs in our company, with an average salary over \$37,000 per year. We will invest dollars in other trades, thus helping stimulate economic growth. For example, we will need the services of carpenters, painters, electricians, advertising & marketing firm, as well as, buying the equipment to install at each customer site. This venture has long-term positive effect, especially on our local economy. We view the stimulus package as a wonderful opportunity to accelerate our plans. | DigiCOM Systems | 5 | 0 to 30 days | \$400,000 |
| Clermont | New School Construction | compliance with Ohio School Facilities Commission with consideration for added expense to integrate various energy efficiencies for long term benefit. Master plan includes options of athletic complex to accommodate revenue generating tournaments, auditorium for performing arts, library for public use and reconfiguration of youth athletic complex currently on land to be used. Clermont Northeastern School District is in need of replacing one (constructed 1923) and updating all (constructed '57, '67, & '70) buildings currently in use. Currently working with Steed, Hammond, Paul Architects. | Clermont Northeastern Local Schools | 150 | 91 to 180 days | \$60,000,000 |
| Clermont | Batavia Local Schools - Facilities Master Plan | - Replacing existing PK-4 Elementary School with a new PK-5 Elementary School of 125,195 Sq. ft. with student enrollment of 1,083. - Replace existing 5-8 Middle School with new 6-8 Middle School of 80,631 sq. ft. with student enrollment of 557. - Additions and renovations to existing 93,412 Sq. Ft High School to enlarge facility by 24,183 Sq Ft. with student enrollment of 696. - District has grown over 25% in the last 10 years. Current elementary built 1916, with addition in 1934, 1955, 1983. Facility is no longer educationally adequate as assessed by the Ohio School Facilities Commission. Current renovation cost is 99% of cost to build new. Current enrollment 878. Designed for 550. - Current Middle School houses 5-8 with enrollment currently at 600. Current renovation cost is 81% of cost to build new. - Project is shovel ready - New facilities would be built on existing 60 acre site owned by the school district. - Project has an architect and construction management company | Batavia Local School District | 100 | 31 to 90 days | \$26,000,000 |
| Clermont | Milford Parkway/Chamber Drive Long Term Intersect | Long term intersection safety improvements to Milford Parkway/Chamber Drive in Clermont County as proposed by a safety study completed by TEC Engineering | City of Milford | 15 | 181 days or more | \$161,000 |
| Clermont | Milford Parkway/Chamber Drive Intersection Safety | Short term intersection safety improvements to Milford Parkway/Chamber Drive in Clermont county as proposed by a safety study completed by TEC Engineering | City of Milford | 10 | 31 to 90 days | \$22,000 |
| Clermont | US 50 & SR 131/Milford Parkway Intersection Short | Short term intersection safety improvements to US 50/SR 131/Milford Parkway in Clermont county as proposed by a safety study completed by TEC Engineering | City of Milford | 10 | 31 to 90 days | \$15,500 |
| Clermont | US 50 & SR131/Milford Parkway Long Term Improvem | Long term intersection safety improvements to US 50/SR 131/Milford Parkway in Clermont County as proposed by a safety study completed by TEC Engineering | City of Milford | 20 | 181 days or more | \$1,403,650 |
| Clermont | New Richmond Sewer Plant Clarifier Modifications | Project entails modifying the piping within the Village of New Richmond Sewer Plant Clarifier. Modifying the piping will improve the sewer treatment process reducing down time and potential EPA permit violations. | Village of New Richmond | 1 | 31 to 90 days | \$23,715 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Clermont | Village of New Richmond - Sewer Collection System | The project entails the internal lining of approximately 3600 linear feet of sanitary sewer collection lines to eliminate storm water infiltration into the Village's Waste Water Treatment Plant. The process will be accomplished through the installation of "Cast-in-Place" pipe material which forms to the existing lines following an extensive cleaning to remove roots and sludge buildups. The project also includes the rehab of existing manholes. With aging sewer infrastructures, more and more communities are investing time and money into sewer investigation and repair work in order to remove extraneous water from the collection system. Groundwater and surface water run-off can enter the sewers through deteriorated manholes, sewer joints, cracked sewer mains/laterals and cross-connections (including downspouts, sump pumps and driveway drains). During precipitation events, surges of "clean" water in the collection system can create compliance problems at the WWTP or even illegal sanitary sewer overflows. | Village of New Richmond | 2 | 31 to 90 days | \$35,459 |
| Clermont | Village of New Richmond Septic Hauling Station | The selected lines to be corrected for phase 1 was based upon an extensive combination of smoki Proposes project entails mooning an existing job-utilized tank at the village's waste water Treatment Plant to serve as a septic receiving station. Project would improve the septic hauling business within Clermont County by allowing an additional disposal site. Proposed design would allow the receipt of septic by private haulers which following proper testing all flow will be transferred to the Village's sewer treatment plant for proper treatment. Project would meet all EPA requirements. The project includes completing phase one (1) of a storm drainage improvement project. The primary project component includes the replacement of failing storm drainage ditches along Washington Street with the placement of a new curb and gutter system. Pavement repairs are included within the project scope. | Village of New Richmond | 1 | 91 to 180 days | \$385,000 |
| Clermont | Washington Street Storm Drainage Improvements Phas | Currently, the existing infrastructure is failing. Maintenance efforts have been futile and full replacement is now necessary. The existing storm drainage system is failing and causing increased damage to the roadway. The area traps standing water for periods following a rain event. Specific quantities are as follows: 200 Cubic Yards Surface and base asphalt 1800 Linear Feet Concrete (existing sizes) 13 Catch basins 1650 Linear Feet Type 6 curb | Village of New Richmond | 2 | 91 to 180 days | \$402,000 |
| Clermont | New Richmond Water Tower Painting | The proposed project entails the exterior painting of the Village's 150,000 gallon elevated water tower. The tower serves area residents along with the New Richmond Exempted School District campus. An exterior painting has not occurred for nearly 25 years and is now an immediate concern. | Village of New Richmond | 1 | 0 to 30 days | \$65,000 |
| Clermont | Williamsburg to Batavia Hike Bike trail | Constructs a 15 mile paved bike/hike trail that connects the villages of Williamsburg and Batavia by going through East Fork State Park. The trail would connect the villages to the park's 400 plus campsites. The trail is a part of the village's economic development plans. It is a collaborative effort between local, state, and federal government agencies. | Clermont County Park District | 25 | 181 days or more | \$3,750,000 |
| Clermont | Tealtown Road Park | Creates new park and nature preserve on donated land. Builds universally accessible playground, restroom facilities, picnic shelters, trail system, senior adult exercise trail. Park would serve as demonstration site for rain gardens. Nature Preserve provides stream restoration opportunity and wetland construction location. Park would be located in highly developed area of county. | Clermont County Park District | 10 | 91 to 180 days | \$2,500,000 |
| Clermont | Bethel Water Works Property | Park District purchase the 120 acre Bethel Water Works property to develop it into a new park. Park to include picnic facilities walking and hiking trails, fishing in the properties upland reservoirs. ... offering the Ohio CCW courses, Law enforcement courses, Advanced gun handling training, Child safety training and responsible ownership. The funding would provide for rent or purchase of an acceptable building for the classes. All necessary job training for the staff. Equipment related to the business and salaries for the new employees. | Clermont County Park District | 10 | 91 to 180 days | \$1,500,000 |
| Clermont | Firearms Safety Training Business | This will create three new jobs with the intent to create several more as the business would grow. With all of the issues surrounding firearms in a civil society I believe the most important issue to deal with is the proper training of individuals whom purchase firearms. Thank you for your consideration Jeffrey Neal | 2ndShot Fire Arms Training | 3 | 0 to 30 days | \$400,000 |
| Clermont | Chilo Water Tower | Paint and stabilize historic water tower at Chilo Lock 34 Park. Park is historical site with a museum that tells the story of the lock and dam system on the Ohio River. The property's 15,000 gallon water tower dates back to the 1920's when the US Army Corps of Engineers built Chilo Lock and Dam 34 | Clermont County Park District | 3 | 31 to 90 days | \$40,000 |
| Clermont | Little Miami Oh Scenic River Park Masterplan-Playg | As a portion of our new Park Masterplan (overall project is \$13 million with plans complete and shovel ready), the first phase we would focus on a playground. There is a committee (private, government, organizations, ODNR, Army Corp of Engineers, Little Miami Inc as well as Milford citizens) that has done extensive research including the formation of a 1,000 hands project. The river area/park area currently is not being utilized (we are located ideally inside the 275 loop providing access from urban centers and the Loveland bike trail). This would promote tourism, create jobs in our park department, as well as match private investment. | City of Milford/Milford Miami Township Chamber of | 28 | 0 to 30 days | \$30,000 |
| Clermont | Little Miami Oh Scenic River-Ph II | Part of a #13 million Master Park Plan-Phase II --3 miles of River Walk Construction including acquisition of land, removal of existing property, watershed accommodations ... as required by the US Army Corp of Engineers. This project basically provides a waterfront ready for DEVELOPMENT, tourism as well as a regional draw (similar to a San Antonio River walk system). We have a Main St downtown that has experienced a re-surgence in just the last 2 years (that's right in this economic timeframe) with new restaurants, services, ... we want to expand this to a business district. This area would also allow coordination with the bike trail on the opposing side of the river, while providing a venue for events, fairs , festivals, Plans are "shovel" READY, and at least 7 partner groups are ready to match investment. | City of Milford/Milford Miami Township Chamber of | 35 | 0 to 30 days | \$1,100,300 |
| Clermont | Lila Avenue Streetscape | Lila Avenue (U.S. Route 50) - 1 mile stretch, and a major intersection at 5 points (with S.R. 28, Main St, ...) that contains 8 strip shopping centers constructed 1940's to 1960's, we now have 3 owners who would be willing to match investment \$\$ in renovating space if a streetscape is performed. A previous block grant (10 years prior) along Main St (2 miles further along S.R.) allowed for an upgrade to sidewalks, plantings, aesthetic efforts ... causing property value stabilization; elimination of crime; reduction of retail vacancy..... This is a 5 lane road that would be converted into 4 lanes with a median, affecting traffic quieting, landscaping, gateways, and actual sidewalk crossings, new traffic signalization... plans are preliminary completed with private investment but no local governmental dollars to match. | City of Milford/Milford Miami Township Chamber of | 3 | 31 to 90 days | \$101,400 |
| Clermont | Amelia Olive Branch & SR 125 Intersection | Improve Intersection of SR 125 and Amelia-Olive Branch Road. Project includes constructing an access road to eliminate full movement access locations along SR 125, add left-hand turn lane from North Amelia-Olive Branch onto eastbound SR 125, curb and gutter drainage to be installed along South side of SR 125, and right-hand turn lanes and a left hand turn onto extended Amelia Olive Branch Road. This project will also include a 36 space Park and Ride. | OKI Regional Council of Governments | 50 | 31 to 90 days | \$3,817,094 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Clermont | Merwin Ten Mile Road Resurfacing | Resurfacing and full Depth Repair of Merwin Ten Mile Road. (Locust Corner Road to SR 125) plus associated pavement markings and raised pavement markers- 1.8 Miles | OKI Regional Council of Governments | 20 | 31 to 90 days | \$144,000 |
| Clermont | Nine Mile Tobasco Road Repair | Resurfacing and full Depth Repair of Nine Mile Tobasco Road. (US 52 to SR 125) plus associated pavement markings and raised pavement markers- 3.98 Miles | OKI Regional Council of Governments | 20 | 31 to 90 days | \$318,400 |
| Clermont | Wards Corner Road Repair | Resurfacing and full Depth Repair of Wards Corner Road. (SR 126 to SR 48) plus associated pavement markings and raised pavement markers- 4.22 Miles | OKI Regional Council of Governments | 20 | 31 to 90 days | \$337,600 |
| Clermont | Greater Milford Drug Free Coalition | We are applying on March 20th, 2009 for a Drug Free Coalition Grant for \$320,00 to fund a full-time person, as well as create a youth summit, and other programs to really augment current efforts. This coalition has been meeting the last year and has included every entity in the area from elementary to higher education, healthcare, leadership, governmental, private rehabilitation, faith communities, police and fire departments, as well as interested citizens. This area includes over 75,000 residents. Because of the economic downturn, our 1/2 urban, 1/2 rural community—drug and alcohol use has been exponentially on the rise. Our average citizen commutes 25 minutes outside the area for work, there are NO recreation centers, no service centers ad limited educational outlets; few faith assemblies who employ youth pastors, counselors; the need is overwhelming | City of Milford/Milford Miami Township Chamber of | 12 | 0 to 30 days | \$320,000 |
| Clermont | Clermont Transportation Connection - New Operation | Construct new operation facility for Clermont Transportation Connection | OKI Regional Council of Governments | 25 | 31 to 90 days | \$5,000,000 |
| Clermont | Lila Small Business Incubation Center | had started 57 successful businesses prior (where the "rubber meets the road"). We have worked regionally with the SBDC (Small Business Development Center in Clermont County), Hamilton County Incubation Site, SCORE, and many other entities. From Dept of Commerce, SBA to so many private entities—entrepreneurship is the wave of the future & our way out of this economic downturn. However in working with our large entities, we have found a "gap" in location, timing, technology and size. Based on last year's numbers, our "little" Milford on a part time basis has worked with potential entrepreneurs resulting in 39 business starts (this excludes home based businesses) with only 1 failure. We focus on business planning, credit, marketing, workforce, networking, paperwork..... trying to make it convenient, thorough, and avoidance of failure "potholes". While we have found many individuals to participate, advise, and donate services; the cost of providing curriculum, copies, facilities, utilities, ... to offer a place available for these budding entrepreneurs to be hard sell five foot wide sidewalk on the north and south side of SR 28 for a distance of 0.41 miles. This section of SR 28 is a mix of retail and residential. A new bus route will begin along this section of SR 28 in 2009. The proposed sidewalk will "complete the street" making the street a multi-modal corridor for vehicles, buses and pedestrians. | City of Milford/Milford Miami Township Chamber of | 39 | 0 to 30 days | \$45,000 |
| Clermont | State Route 28 Sidewalk | Milford is the only U.S. city that is the junction of 8 national state, and local trails. We plan a public park in Milford along side the Little Miami River that will affect all of southwestern Ohio citizens. | Miami Township, Clermont County | 25 | 31 to 90 days | \$406,210 |
| Clermont | Junction Trails Park | Our park's theme is in its name, JUNCTION TRAILS PARK, thus drawing outdoor enthusiasts from across our nation by exploiting this trails junction asset. Its design complements Milford's history to 1863, enhances downtown businesses, transforms a blighted area into an environmentally beautiful park, and by stabilizing the banks, solves an ongoing erosion problem while at the same time adds more "scoons" to the Little Miami River. Our park will have "imagery" throughout to draw the people. i.e. a Junction Trails Building to headquarter the trails folk and communicate our goals, a Junction Trails Lake with fountain shooting water 50 feet at it at night, an historic Inn, botanical gardens, information and first aid centers, camping/canoe facilities, and a host of other attractions. This park will use alternative energy to power it, the "green" effect in its structures, a mini DC trolley system to transport its patrons, and create 9000 jobs. | Citizens for a Better Milford | 6000 | 31 to 90 days | \$25,000,000 |
| Clermont | Equipment | financial constraints, i.e. police levy revenue, local government funding, etc. The 11 sworn officers have to buy their own firearms. Funding for such a project will eliminate that personal burden AND put money back into our economy. Additionally, the Amelia Police Department has only 5 radios shared by 11 officers. Wear and tear becomes an issue due to excessive use. Again, due to police levy revenue, reduction of local government funding it is cost prohibitive for us to buy these items. | Amelia Village Police Department | 11 | 31 to 90 days | \$15,000 |
| Clermont | Monroe Township Community Center | Monroe Township has a high count of mobile homes without any protection from severe storms as was noted in the township Hazard Mitigation Plan. By making the building design multi-functional it would allow for a community center, township meeting hall and recreation center. The plan also allows the existing township hall to be used for the township maintenance facility and additional space for the township fire department. Monroe Township currently owns the land, so land cost is not part of this grant request. | BMK Associates, LLC; Surveyors and Engineers | 25 | 31 to 90 days | \$2,375,000 |
| Clermont | Dry Run Road Stabilization Project | Monroe Township, Clermont County, is requesting grant funding for the Dry Run Road (a township road) Stabilization Project. Dry Run Road is bordered by a creek that has, over time, eroded the roadway to a hazardous condition for the general public. The Township Maintenance Department spends more time maintaining this section of road than all other roads in the township combined. The project would include replacement of an undersized culvert with the correct size box culvert; drilled piers along 100 feet of roadway to replace a failing retaining wall; energy dissipation measures in the creek to mitigate erosion and assure continued water quality of the creek which flows to the Ohio River; and repaving 900 feet of the existing roadway. Improvement of Dry Run Road would additionally open 500 acres of land to potential development of residential housing. | BMK Associates, LLC; Surveyors and Engineers | 30 | 31 to 90 days | \$745,000 |
| Clermont | Indain Road Improvement Project | Monroe Township, Clermont County, is requesting grant funding for the Indian Road Improvement Project which is to elevate approx. 950 lin.feet of the township road which is subject to flooding during various times of the year. Indian Road receives back water during times the Ohio River rises. The flood stage is at 50' elevation (by the Meldahl gage) and Indian Road become impassable at 46' elevation. The residents along Indian Road become stranded without fire and ambulance access. The project design calls for approx. 8,000 cu.yds. of fill placement and repaving a 900 foot section to elevate the roadway six feet to two feet above the flood elevation. Fire and ambulance services will maintain access during high water times to the residences, the general public will be better served by a safer roadway, and improvement of Indian Road would open approx. 200 acres of land for residential developments. | BMK Associates, LLC; Surveyors and Engineers | 15 | 0 to 30 days | \$342,700 |
| Clermont | Milford Main Renovation-Education, Training & Art | Milford Main was built in 1910 and still has the cafeteria and auditorium in use. A local investigation spearheaded by the school district has developed a plan for full utilization of this building. Currently, it has some environmental clean-up issues as well as renovation/revitalization. The school district has not deemed the project cost effective to revamp for a primary to high school use because of the size, cost... For the City of Milford, this nearly 100 hundred year old building, holds special meaning and significance. It's location is close to the heart of the city, and citizen groups would support the re-use of the building to save the HISTORIC significance. Estimates, plans, ... are being developed to move forward with use of this building including a community center, performing arts center, higher education outreach/workforce training, as well as allowing private business rental & use. | City of Milford/Milford Miami Township Chamber of | 54 | 31 to 90 days | \$1,600,000 |
| Clermont | Replacement Computers | Replacing present computer equipment with desktop and laptops. We plan on replacing 900 units | West Clermont Local Schools | 1 | 31 to 90 days | \$1,000,000 |
| Clermont | Lila Ave Substation Upgrade | An upgrade priced by Duke Energy to meet requirements of a company that will expand in place, or consolidate at another location. This upgrade will allow our city to retain 54 high dollar positions + part-time as required. | City of Milford/Milford Miami Township Chamber of | 54 | 0 to 30 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Clermont | River's Edge Connectivity & Wetland | The River's Edge area of Milford has a few established retail "big box" stores as well as restaurants, theatre... yet no provision was made for sidewalks, pedestrian walks, signalization, and connectivity to the river... and the adjacent soccer fields (2,000+ families use during the season, increasing the area's population by 25%). Measures need to be taken to ensure that wetlands are maintained while establishing "walkability" of the area, and opening it to "mixed use". If walkable, more dollars will be invested in retail, entertainment... A current T.I.F. is about to expire, with the City's priorities not including renewal. To ensure the continued advancement of this area, this project would provide a foundation for private developers to continue efforts. Population: 132,700 Demographic Profile: White (96.8%), Hispanic or Latino (1.1%), African-American (1.3%), Asian (0.8%), American Indian and Alaska Native (0.2%), Other (0.9) Language other than English spoken at home: 3.1% Income below federal poverty level: 7.8% Percentage of children and adolescents who are overweight or obese: 30% | City of Milford/Milford Miami Township Chamber of | 22 | 31 to 90 days | \$1,100,000 |
| Clermont | Kids Run Clermont County | The Appalachian Regional Commission county designation is "competitive" for FY 2008. Total land area is 458 sq. miles containing 950 farms on 27% of the county acreage. Located 20 miles from downtown Cincinnati, the county has 14 townships, 13 villages, 1 city, and 9 school districts containing over 28,000 students. The lead agency is Ohio State University Extension Clermont County (OSUECC), and project director is Margaret Jenkins, County Director. The key partners include Clermont County General Health District, Planning Department, Park District, Ohio Action for Healthy Kids Zone 6, Family & Children First Council, Senior Districts, Children's Hospital Medical Center, Child Focus, YMCA, Ohio Valley Fruit & Vegetable Growers. | Ohio State University Extension Clermont County | 9 | 31 to 90 days | \$150,000 |
| Clermont | ODMRDD Clermont County Board Generator Project | Standby 750 kw emergency generator to serve the Clermont County Board of Mental Retardation and Developmental Disabilities Campus. | Ohio Department of MRDD | 20 | 91 to 180 days | \$1,000,000 |
| Clermont | Energy Efficient Living | Installation of energy efficient heating and electrical home systems, (HVAC, plumbing, electrical, insulation and appliances), in new homes and upgrading existing homes. Efficiencies are calculated and selected utilizing engineering processes and accomplished through the use of geothermal, infrared imaging, insulation and wind technologies. | H&H Homes | 20 | 31 to 90 days | \$500,000 |
| Clermont | fibromyalgia support | My wife has fibromyalgia and has support from an internet group; however, there needs to be more local education as well as help for those affected including counseling, help with household chores that are outside the everyday such as spring yard cleaning, gutter cleaning etc. We have no government help at all, but the cost is great including Dr.'s and medication. There are many who can't afford these things, there needs to be a known resource for them. We would start with literature, a licensed nurse and a counselor. We couldn't provide medical care, but we could provide a weekly support group and volunteers willing to help. We could also help people understand what is wrong with them and help them learn how to live with it. | Lisa Roark's Fibromyalgia support center | 3 | 31 to 90 days | \$20,000 |
| Clermont | Small Business Telecomputer Systems | This initiative will provide five (5) Clermont County small businesses with the computer equipment and technical resources which will enable employees to use remote access (VPN) to their office computers, so they can work from home, thereby reducing the need for travel and saving energy. Ensuring that all people have access to broadband service, by wiring each home with latest technology ethernet cable and outlet jacks or providing wireless access points as necessary in common areas. | BLUE CHIP DATA | 5 | 31 to 90 days | \$15,000 |
| Clermont | Blackwolf PC's Ohio Broadband Proposal | | Blackwolf PC, LLC | 25 | 0 to 30 days | \$3,000,000 |
| Clermont | Access to Public Water/Sewage | I live 15 minutes from downtown Cincinnati and don't have public water or sewage... We 9 homeowners at our Pierce Township location are told it would take a great deal of legal wrangling and expense for us to have these basic needs, and is unlikely to happen. Apparently if we property owners were "low-income" we would have access provided to us for little or no expense. However, because we're motivated, hard-working, tax-paying citizens that don't typically rely on government for financial help we're excluded. Well, I for one can't afford the 10's of thousands of dollars that I've been quoted to have public water at my home, and I find all of this very disturbing. Again, I live minutes from a major metropolitan area, but it may as well be Afghanistan. How about some money spent in Clermont County (Pierce Township) to see that ALL property owners that desire may have public water and sewage? Thank you. | None | 123456789 | 0 to 30 days | \$123,456,789 |
| Clermont | Fencing Priscilla's kids in. | THE FENCE IS AN IDEAL OPTION TO PROTECT CHILDREN AS THEY PLAY. It needs to be vinyl fence and from splitters. Also, need to redo deck. Remove wood deck and put vinyl deck up. Again to protect the kids from splitters. Also, the wood playset needs replace to protect the children from splitters. They are our future. They don't need to get splinters. The playset need rubber mulch to protect the kids if they fall. The kids will also like a pool. Pool has to have hard cover and alarm to protect from falling in. This is for the kids. Help them play before they have to pay for this stimulus package. Thanks | Priscilla's Playard | 10 | 31 to 90 days | \$220,000 |
| Clermont | Paperless Small Business Office | This initiative will provide up to 3 small businesses the resources and training for creating an energy efficient workflow using technology that results in a paperless office, thereby reducing paper and waste. | BLUE CHIP DATA | 3 | 31 to 90 days | \$9,000 |
| Clermont | WIND ENERGY GEARBOX REBUILD & TEST FACILITY | Design and build a Wind Energy Gearbox Rebuild and Test Facility in the Cincinnati, OH area with Universal Test Stands) capable of load testing Wind Turbine Gearboxes from 50 kW to 1.5 MW, as well as have tooth grinding and heat treating capabilities to meet the latest Wind Industry standards. As of 10/31/2008 there were 25,170 MW of total Wind Power capability in the U. S. The vast majority of individual turbines are under 1.5 MW's in size. Most Wind Turbine Gearboxes have a field life of about seven (7) years at which time they require reconditioning. Original Equipment Manufacturer's (OEM's) typically will not interrupt production lines to accommodate older model reconditioned Wind Turbine Gearboxes. Existing Wind Farms and Power Grids require Gearboxes to be reconditioned and tested quickly. A centrally located state of the art Wind Energy Gearbox Rebuild and Test Facility would fill the need to rebuild and test these Gearboxes in a timely manner. Such a facility could support the reconditioning of hundreds of Wind Turbine Gearboxes per year. | CINCINNATI GEARING SYSTEMS | 50 | 0 to 30 days | \$20,000,000 |
| Clermont | Soccer Complex, Indoor Soccer field. | This would bring much needed work into Ohio, support the Trucking Industry as well as parts manufacturers and distributors. that deal with Select soccer teams, and High School teams, also it would promote Adult league's too. The ages would be all ages, and race, and I would have Soccer camps every day in this complex. Lastly, this complex would be the first indoor soccer field in this area of Clermont County, also this soccer field would create more than 200 jobs, and it would create alot of soccer teams comming in because who wants to play soccer in the bad weather. If given the money, I have a piece of land I know would claim this complex, but I need the money to get it. Do it for the kids because this area in Clermont County is hurting for the kids to learn how to play on a good soccer field. Also, if you have Truf Soccer field that would have less injuries then a wet grass field, and the parents will not have any more worries when their kids leave their houses to play soccer. This complex would have a First Aid Officer on board every day, and it would have food courts that would feed these kids. Another thing this Soccer Complex would promote growth, taxes and recreation opportunities. Thanks. SC | Soccer Complex of America | 200 | 0 to 30 days | \$5,000,000 |
| Clermont | Property Reinvestment Program | With the increased FET on tobacco April 1, 2009 I anticipate my job within the tobacco industry will be eliminated once inventory is conducted on March 31, 2009. If I am fortunate enough to find another job (I'm nearly 50), my new salary will be less than half. To re-engineer our lifestyle we will need to downsize our living standards. To improve our chances of selling our home to supplement living expenses (I have 3 dependents one of which is in a state University) I will need the following improvements made to our home: Repace Driveway - \$10,000 creating 5 - 8 jobs Repaint Exterior - \$5,000 creating 3 - 4 jobs Remodel Master Bath - \$9,000 creating 3 - 5 jobs Remodel Kitchen - \$12,000 creating 6 - 8 jobs Improve exterior Landscaping - \$6,000 creating 5 - 6 jobs All work will begin immediately and all funds not used will be returned within 30 days of completed repair. Thanking you in advance for this assistance. With your approval will will secure no less than | U.S. Citizen | 30 | 0 to 30 days | \$42,000 |

| Clermont | Help seniors stay in their homes | I've live in this house for 30 years but due to an ex-husband who raped my child and the court not only set him free but they let him take bankruptcy and leave me with all the devastation of his behavior-I cannot go on much longer. I've worked two and three jobs, to pay all the marital debt and then when my health started failing I had to quit. I don't have money for heat or for any other would love a new car, mine is 16 years old and still runs. Without help I will be homeless today and on welfare which is not a place I want to go. I almost have a bachelor's degree in history. I would like to finish but don't know if my car can take the run to UC every day. Please Please help any one in government listen to pleas for help and help. Don't do a photo op, or give a speech and take the time to help this citizen. I can tell this is not the right format for this but I am trying every way I can to get someone to listen. Please do not help any more banks and corporate CEO's they are not going to help Interactive multimedia electronic whiteboards and associated rewiring, mounts and mounting materials for 100 classrooms. | Help a senior keep her home | 1 | 31 to 90 days | \$20,000 |
| Clermont | Interactive Smartboards | To improve the impact of classroom learning by utilizing multimedia and multisensory interactive lessons. | Millford Exempted Village Schools | 5 | 31 to 90 days | \$300,000 |
| Clermont | Project Mobile Success | In this day and age of technology students in the public education system demand engaging substantial curriculum that fosters every students potential for growth and success. By equipping every 4th - 12th grader here at Williamsburg with a mobile computing platform it would ensure that every student learned the basic curricula such as reading, writing, math, science, and social studies. By teaching them how to use technology in their daily lives it will ensure that they can productively move their skills to core classes by way of 21st communication methods, models, activities, and lessons. Approximately 850 students would be given a portable device with the appropriate software to target a group of students to succeed by using educational techniques that students in the digital age can understand. With a portable device being in the teachers and in the students hands a good common ground can begin by growing a common relationship that will foster good growth among students. Professional Development across all 4th-12th grade would be restructured appropriately. Teachers | Williamsburg Local Schools | 116 | 31 to 90 days | \$1,110,000 |
| Clermont | GEM | Dear Sir or Madam, Our proposal to stimulate the local economy in Ohio is to develop and improve an existing property located in one of the fastest growing counties in Ohio. This project will create 300-400 jobs, sustained for many years to come. It will require renovating the existing structures in addition to new construction. This is not simply another "row house" development but a unique living environment. This 200+ acre development will attract housing and retail businesses and services. We feel confident that 30 million dollars over the next five years will complete the first phase of development. After which profits from the project will maintain and fuel continued future growth. A summary business plan is available upon request. | SSEnterprise | 300 | 31 to 90 days | \$30,000,000 |
| Clermont | Jim Ahern | Elimination of approximately 70 bank mortgages on single family properties. Said mortgage elimination would avoid potential looming foreclosures and possible displacement of up to 70 families. Additionally, the already stressed banking system would avoid the expense and significant loss of revenue that 70 foreclosures would generate. Neighbor destabilization and property value reductions would also be avoided because 70 homes are not vacant and declining in value from lack of upkeep. Property tax values and revenues would remain consistent instead of declining. Additionally, all 70 families monthly payment would be permanently reduced by 50%. Said reduction would free up significant monies that, in all likelihood, would be reinvested in the local economies. Said plan could be enacted immediately | Delta V Properties | 5 | 0 to 30 days | \$6,413,927 |
| Clermont | HS interior repairs | Treads in High School Auditoria need replaced. They are torn and cause a tripping hazard. Painting and updating of all Utility rooms are needed, including Boiler, Electrical, and storage rooms. | Williamsburg Local School District | 1 | 0 to 30 days | \$9,800 |
| Clermont | High School Exterior Repairs | Roofing work is needed at the High School. We have several leaks and vents have been damaged from sliding snow. Maintenance is needed for door hardware to ensure compliance with National Fire Protection Agency. We need to replace Door locks, hinges, handles, and weather stripping. | Williamsburg Local School District | 10 | 31 to 90 days | \$30,130 |
| Clermont | High School Paving | 45% of the parking and road area needs resurfaced. We need to seal and restripe the entire area The lower road area needs a curtain drain installed because of an underground spring causing damages to the pavement. | Williamsburg Local Schools | 5 | 31 to 90 days | \$34,500 |
| Clermont | Bus Garage renovations | New Gas pumps Upgrades to HVAC System Upgrade new fence | Goshen Local School District | 10 | 181 days or more | \$85,000 |
| Clermont | High School HVAC | Upgrade Garage Doors The lower high school building needs a hot or work on the hvac system. One cmr ice storage tanks leak and need replaced. We need to replace the existing GCM with new UNC panels and Niagara Graphical interface. We need Data Base verification. We need new valves, dampers, and central plant controls. We need to replace the Air handling units and associated heat recovery units, the VAV boxes and unit ventilators. | Williamsburg Local School District | 3 | 91 to 180 days | \$287,500 |
| Clermont | Renovate Historical Log Cabin | Renovate and upgrade to a historical Log Cabin that is located on the District's property. This is would be an educational venue for the kids in the District to obtain an understanding of the history of how people lived in the 1800's. | Goshen Local School District | 10 | 181 days or more | \$150,000 |
| Clermont | Property Maintenance Equipment | We need to add to and to replace our outdoor equipment for land maintenance. Currently, we have two old mowers and are trying to maintain over 50 acres of land with them. We need to buy a tractor with a front loader and a finish mower. We need to replace our old mowers with two new z trak mowers. We need a truck with a snow blade so that we can discontinue our contracted snow removal service that costs a lot. This figure will save us money in the future. | Williamsburg Local School District | 1 | 31 to 90 days | \$81,650 |

| Clermont | Jerrods law updates | We need to update and repair our bleachers at the High/Middle School so that they comply with Jerrod's Law. | Williamsburg Local School District | 1 | 0 to 30 days | \$11,500 |
| Clermont | Cold Jet LLC Support | availability and economic uncertainties, our customers are severely curtailing spending on capital expenditures. We make industrial cleaning equipment that uses blasted dry ice instead of harmful chemicals. Our process uses 'green' technology - dry ice is produced with recycled CO2. We are a market share leader in this industry segment and we manufacture our product in Ohio, though we sell globally. Currently, our primary method of sales is to outright sell the equipment to our customers. In this environment, we need to find new and innovative methods of financing - rent to own, leasing, sharing savings, extended terms etc. Unfortunately, we face the same credit problems as our customers. We have a backlog of customers that can use our product to lower their costs but cannot spend capital money right now. Some employees have already been laid off with more to come if we cannot find a way to increase our sales. We either need help with financing these new methods of sales or in retaining our workforce. We would welcome the opportunity to discuss our sit | Cold Jet LLC | 50 | 0 to 30 days | \$1,000,000 |
| Clermont | Community Recreation Center | This would entail building a Community Recreation Center that would be used by the students of the District during school hours, but then also the community during evening and weekend hours. Goshen Township currently has nothing for kids to do after school hours, and this would benefit the community in many aspects. There are currently more than 50% of the students in the District that qualify for free and reduce lunch. Therefore, there are many families that can not afford joining a facility for their children that would offer various programs to provide health and fitness | Goshen Local School District | 100 | 181 days or more | \$7,000,000 |
| Clermont | Goshen Cafeteria Upgrades | Department: -Add 15 computers to run on-line meal pay system -Obtain a current version of the on-line meal pay software -Install a generator at the central storage building to prevent food loss or spoilage in the event of power outages. -Install new stemers, fryers, freezers, coolers and warmers around the campus. | Goshen Local School District | 10 | 181 days or more | \$101,000 |
| Clermont | Stadium Upgrades | The District would like to upgrade the sound system at the stadium, as well as upgrade parking around the stadium. | Goshen Local School District | 10 | 181 days or more | \$300,000 |
| Clermont | Project Energy Renewal Williamsburg, OH | year and is expected to exceed the 2007-08 school year amount of \$22,804,500. Williamsburg Local Schools would like to create Project Energy Renewal. Project Energy Renewal would consist of commercial grade electrical infrastructure such as a Wind turbine, Solar panel as a primary source of electrical power in conjunction with a battery farm and using our Local Energy Cooperative (Duke Energy) as a secondary source of electrical power. By utilizing a Wind Turbine or Solar Panels the District could decrease it energy bills. With the wattage that could be produced from the Wind Turbines or Solar Panels the district could use what it needed and then pump the remaining stored wattage from the batteries back into the Public power grid from the Local Energy Cooperative. Then the Local Energy Cooperative could discount the residents of Williamsburg's electric bill. This way not only will decrease our Electric bills or almost eliminate them but also give every other resident in Williamsburg a possible discount on their energy bills. Since Williamsburg Local Schools would of course be selling its remaining stored energy and pumping it back into the grid the Goshen Local School District would like to upgrade the HVAC systems throughout the District. These systems would allow the District to have better systems for energy consumption which will save the District dollars in the future. | Williamsburg Local Schools | 20 | 181 days or more | \$4,000,000 |
| Clermont | HVAC Upgrades Throughout the District | 40% of the roof at the Elementary School needs replaced | Goshen Local School District | 10 | 181 days or more | \$150,000 |
| Clermont | Elementary roofing | We need to update our doors to ensure compliance with National Fire Protection Agency. We have damaged ceiling tiles that need replaced. We need a new Dish Washer and Steam Table in our Elementary. The current ones were purchased in 1960. We will be more energy efficient with these repairs and replacements. | Williamsburg Local School District | 2 | 91 to 180 days | \$57,500 |
| Clermont | Elementary interior improvements | We need to repair pavement at the elementary school. The culvert under the parking lot collapsed and we need to replace it. For safety and drainage reasons, these items must be replaced/repaired | Williamsburg Local Schools | 2 | 91 to 180 days | \$40,940 |
| Clermont | Elementary pavement & drainage | We need a new playground at the Elementary. Ours is from the 1060's. We need to replace all three areas. | Williamsburg Local Schools | 3 | 91 to 180 days | \$59,800 |
| Clermont | Elementary playground equipment | Since each of the students in this program learns a career role such as Bridge Design and Engineering, Meteorology, Flight Simulation, Robotics, Fiber Optics, Publishing, Radio Broadcasting and Video Editing. The software and computer systems have become quite outdated. This does not allow the students to be productive in the respective class time (50mins). This class is available to 7th-12th graders within the district to advance their understanding of the Ohio Technology Content Standards. With the updated technology and software being in place it would allow for our students to pursue careers in the technology field of their choice and meet the other expectations of the Ohio Technology Content Standards. By increasing the amount of modules that the students can experience it allows them to be more prepared to choose a career of their choice while helping them decide on a major for their continued education experience. | Williamsburg Local School District | 4 | 91 to 180 days | \$103,500 |
| Clermont | Project Technology Education | We need a van to transport special ed students. Some of our students go quite a far distance from the school. It would be more energy efficient to transport single students in a van rather than a large bus. | Williamsburg Local Schools | 5 | 31 to 90 days | \$40,250 |
| Clermont | Special Ed Van | LCD projectos kits in all classrooms. Rewire TV to connect to LCD projectors. One Printer/Copier/Scanner per wing in each building. Mac Mini computers/media carts to be used by Special Education departments in each building. Document cameras for each classroom. | Goshen Local School District | 5 | 181 days or more | \$200,000 |
| Clermont | Technology Upgrades | These items will allow the District to use technology as an educational tool in the District. We need to update our plumbing in the Elementary School. It is all from the 1960s. We need new urinals, closets, flush valves, and lavatories. These items are old and not efficient. We would save money if we had new water efficient models. | Williamsburg Local Schools | 2 | 91 to 180 days | \$125,000 |
| Clermont | Elementary Plumbing | The District will add two wings to the existing PK-2 building. One wing will be used to add at least two pre-school classrooms and the other wing to house a library. This will allow the District to provide educational programs as well as before and after school programs for the kids in the Goshen Local School District. | Goshen Local School District | 25 | 181 days or more | \$4,000,000 |
| Clermont | Learning Academy & Library Educational Wings | Install Security Cameras near frequently used entrances and exits throughout the District. This is to provide the most safe and secure environment for all of the kids in the District more important to ensure that our network infrastructure can handle properly handle the districts network traffic. By installing the latest wired and wireless network infrastructure we can ensure that our students become more productive in their classes. With the properly Virtualized server hardware and software the Technology Department can ensure that we have the maximum uptime for students to be efficient and teachers to be effective. | Goshen Local School District | 10 | 181 days or more | \$250,000 |
| Clermont | Security System | By replacing 8 servers with virtualized hardware/software and approximately 20 network switches and a Router we can make sure that we allow for future expansion and reliability with the way information flows throughout our district. With the large number of power outages that occur in Williamsburg our battery backups longevity have been exhausted. With the current battery backups only lasting a 2-4% of their estimated runtime. With the power issues known we need to install a generator and extended 35 minute UPS | Williamsburg Local Schools | 10 | 91 to 180 days | \$650,000 |
| Clermont | Project Technology Infrastructure Williamsburg, OH | | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Clermont | Clough Pointe Industrial Building | This is a project that is proposed for a pad ready (Shovel ready) site in Union Township Clermont County. The building is more than 80,000 square feet with approximately 31,000 square feet of Office Space and approximately 39,000 of warehouse, distribution, assembly and development space. Moving this project forward will stimulate additional development because this will be the first phase in the commercial/industrial office park creating the infrastructure to permit the development of future projects. The creation and retention of 50 jobs will be only in the first phase of this development which will encourage other private development in the area. | Cincinnati United Contractors | 50 | 31 to 90 days | \$4,500,000 |
| Clermont | Biofuel Management | This project will allow existing and potential biofuel users to simplify the process of handling the renewable fuels on a daily basis. Cleaner biofuels will allow a more efficient combustion process and therefore produce a more economical BTU output. The products that are currently developed by Corovac Systems, Inc. have been benefiting biofuel users throughout the United States. We are looking to improve the existing products and produce new transfer and cleaning units that are more widely usable throughout the biofuel communities. The most common hesitation with potential biofuel users is the difficulty in managing the fuel itself. These products would greatly reduce the burden and increase the use of biofuel systems. | Corovac Systems, Inc. | 6 | 0 to 30 days | \$70,000 |
| Clermont | Open a consignment shop business | Open a womens and childrens clothing consignment shop. A place where families can bring unwanted gently used clothing and buy/sell it. Good for the economy during this time that working people are struggling and good for the environment as well by reducing the waste that might otherwise end up in a landfill. | Twice New | 4 | 91 to 180 days | \$5,000 |
| Clermont | Thornhill at Milford | Financing through Huntington Bank who received initial bailout funds but bank is now requiring 5 partner/investors to provide impossible collateral to continue. Bank is forcing foreclosure or "take over" resulting in \$1MM loss to investors plus loss of jobs by contractors. Models/and vendors are idle although banks appraisor states project will ultimately be successful when market turns and project is completed. Projections are at over \$1MM profit if allowed to sell/build out. All sales, project management personnel are in place but without financing everyone (investors, potential lenders, creators, builders, community, etc.) will lose. Thornhill LLC will work with other community/government organizations required to protect all parties but financing is critical. This is an opportunity that will add growth to our economy and justifies assistance as it has become victimized by the housing downturn | Thornhill Associates LLC | 100 | 0 to 30 days | \$3,000,000 |
| Clermont | Green industry growth stimulation | Augment current SDVOSB business with additional equipment to enable removal of severely declining Ash trees affected by the Emerald Ash Borer (EAB) in Local, State and Federal Government areas. The company overseeing this project is owned by 2 service disabled veterans and is on the Central Contractor Registry (CCR) as a minority contractor (SDVOSB). Initial funding would be used to purchase specialized equipment to deal with high hazard removals and the transportation of large infested wood. The company is currently certified to perform work around Electrical Power Lines and to transport wood infested with the Emerald Ash Borer. This project would allow the employment of additional personnel and to retain all of our current employees. This company has extensive experience and training in high hazard and low impact removals. This stimulus would improve the habitability of neighborhoods and the economic recovery of the surrounding areas. | Sherdec Tree Service, LLC | 10 | 0 to 30 days | \$350,000 |
| Clermont | Streetscape | Streetscape project to renovate three village blocks which will include new sidewalks, curbs, gutters, street surface and street lighting. This project will revitalize our downtown district and create a completely new atmosphere for our village. The street in front of the Grant Memorial Building is included in this project. This structure was built in 1930 as a memorial. Today it serves as a museum for the village and the Grant family. Collection includes Grant and other local historic memorabilia | Village of Bethel | 20 | 91 to 180 days | \$750,000 |
| Clermont | Foot Bridge Replacement | This project will replace four foot bridges in the Village of Bethel. The foot bridges in question have deteriorated to the point that they are becoming a safety hazard. These foot bridges will be replaced with concrete box culvert foot bridges which are pre-fabricated to allow for a short implementation. The replacement of these bridges will allow for much improved foot travel through the village, which will bring more people into our business district to shop and enjoy what our village has to offer | Village of Bethel | 20 | 91 to 180 days | \$150,000 |
| Clermont | Future Math Teacher Education | Final 3 years for Bachelor of Science Degree Secondary Education at University of Cincinnati. | Erica Steiner Education | 1 | 0 to 30 days | \$28,197 |
| Clermont | Amelia Point | This is a pad ready site that is ready for a 20,000 square foot retail center. The site contains a master plan that demonstrates the ability to immediately develop this structure to continue to provide an economic stimulus to the community and region. | Cincinnati United Contractors | 40 | 91 to 180 days | \$1,600,000 |
| Clermont | Shayler Run Segment C Sewer Replacement Microtunnel | Construction of a sanitary sewer line. The project involves the construction of a sanitary sewer. Also included is approx. 338 feet of 24" and 190 feet of 18" open cut sewer construction is involved. To have appropriate infrastructure in place to accommodate economic development and offer more job opportunities in this fast growing area. This project, in conjunction with the sewer 5-year CIP, will ensure the preservation and promotion of the public health, safety and welfare and improve stream quality by reducing the risk of sewer overflows by relocating an existing trunk sewer that is currently exposed within Shayler Run and at risk of severe damage during heavy rain events. By utilizing microtunneling, the impacts to the surface and stream will be greatly reduced. | Board of County Commissioners, Clermont County, Oh | 100 | 31 to 90 days | \$10,000,000 |
| Clermont | Snow Removal Equipment | This request is for funds to purchase a Meyer C Series Snow Blade and a Swenson Poly Hawk Salt Spreader unit for 2006 GMC Truck - This will allow for a second vehicle to be used for snow removal during winter events. This vehicle will be used to clear secondary streets and alleys while our primary plow focuses on primary streets. | Village of Bethel | 2 | 31 to 90 days | \$12,000 |
| Clermont | Inside renovation of high school | This project would remove all existing asbestos ceilings and replace ceilings with energy efficient ceiling tiles. During the project all lighting fixtures would be replaced with energy efficient fixtures | New Richmond Exempted Village Schools | 25 | 181 days or more | \$2,600,000 |
| Clermont | Cooling tower replacement & Controls update | This project would consist of the replacement of the cooling tower at one of our elementary schools and the updating of all heating and cooling controls in our elementary buildings. The project would provide more energy efficient buildings for our educational community | New Richmond Exempted Village School District | 5 | 31 to 90 days | \$200,432 |
| Clermont | Village Hall Boiler | Replace a very aged and extremely inefficient boiler at New Richmond Village Hall. Proposed model is extremely energy efficient resulting in significant savings. | Village of New Richmond | 1 | 0 to 30 days | \$16,000 |
| Clermont | Clough Pike | Resurfacing and pre-Leveling Clough Pike. (Gleneste Withamsville Road to Amelia Olive Branch Road) plus associated pavement markings and raised pavement markers - 3.33 Miles | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$233,100 |
| Clermont | Beechwood Road | Resurfacing Beechwood Road. (SR 32 to Summerside Road) plus associated pavement markings and raised pavement markers - 1.79 Miles | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$107,400 |
| Clermont | Gleneste Withamsville Road | Resurfacing Gleneste Withamsville Road. (Shayler Road to Old SR74) plus associated pavement markings and raised pavement markers- 2.67 Miles | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$160,200 |
| Clermont | Loveland Miamiville Road | Resurfacing and pre-Leveling Buckwheat Road. (SR 131 to SR 28) plus associated pavement markings and raised pavement markers - 1.83 Miles | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$128,800 |
| Clermont | Loveland Miamiville Road | Resurfacing and pre-Leveling Loveland Miamiville Road. (Wards Corner Road to Price Road-West End) plus associated pavement markings and raised pavement markers - .80 Miles | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$56,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Clermont | Spaulding Elementary Addition of Classrooms | This would classrooms to Spaulding Elementary that currently has 7 Special Education teachers in 2 rooms. This would allow the District to add 12 classrooms, and a gym to help to help with scheduling for the building. This wing would house tutoring and intervention, as well as Occupational Therapy Resurfacing and pre-Leveling TealTown Road. (Old SR74 to Teal Lane) plus associated pavement markings and raised pavement markers - 1.84 Miles | Goshen Local School District | 100 | 31 to 90 days | \$7,000,000 |
| Clermont | TealTown Road | | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$128,800 |
| Clermont | Kiln for Art Room | This would allow the art programs in the buildings to be better prepared for instruction in this program. Resurfacing, full Depth Repair and Pre-Leveling Old SR 74. (SR 32 to SR 32-West End) plus associated pavement markings and raised pavement markers- 1.17 Miles | Goshen Local School District | 1 | 0 to 30 days | \$50,000 |
| Clermont | Old SR 74 | | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$150,000 |
| Clermont | Township Road Culvert Replacement | Replace worn out corrugated culvert pipe with concrete culvert pipe for longevity purposes This project would build a softball, baseball and practice complex for the students of New Richmond This proposal would also provide a place for our local youth teams to play and practice softball, baseball, football, and soccer. Because of the potential loss of the community fields this would benefit our entire community. | Jackson Township, Clermont County | 3 | 0 to 30 days | \$25,000 |
| Clermont | Baseball/Softball Fields | This program would all for 24 classrooms to obtain the "clicker system" do short term assessment with Pro Ohio. This would include a laptop for each room to record the data. With the number of students that are on free and reduced lunch in the District, this would be extremely beneficial to assist with getting kids to come to school. | New Richmond Exempted Village School District | 15 | 31 to 90 days | \$1,100,000 |
| Clermont | Classroom Response System | | Goshen Local School District | 100 | 0 to 30 days | \$480,000 |
| Clermont | RoundBottom Road | Resurfacing and full Depth Repair, Berm Repair and Pre-Leveling Roundbottom Road. (Hamilton City Line to US 50) plus associated pavement markings and raised pavement markers- 4.29 Miles | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$700,000 |
| Clermont | Resurface Township Roads | Re-asphalt worn township road surfaces. | Jackson Township, Clermont County | 10 | 31 to 90 days | \$150,000 |
| Clermont | Widening and Building Gravel Road Berms | Line and widen township asphalt roadways berms with 304 gravel. | Jackson Township, Clermont County | 2 | 31 to 90 days | \$25,000 |
| Clermont | Driveway improvement | The shovel ready job is to pave the access road to my Wilden Woods Kennel. This improvement would eliminate the dirty potholed gravel road. This road is a deterrent to customers as they get their cars dirty traversing it to deliver their pets for boarding. The road is 1700 feet long and 15 feet wide resulting in a cost to asphalt at \$2.50 / sq ft of \$49,000 employing 10 people for 2 weeks. | Wilden Woods Kennel | 10 | 0 to 30 days | \$49,000 |
| Clermont | Community Emergency Shelter | Add addition to existing community center as an emergency shelter during the storm warnings, power outages, and other such related events. Area could be also used as a senior programs center when not being utilized as an emergency shelter. | Jackson Township, Clermont County | 8 | 91 to 180 days | \$175,000 |
| Clermont | Water Line and Drinking Fountain | Add tap and run water line 200 feet to a new drinking fountain located in Marathon Community Park. Park currently has no water available to residents. | Jackson Township, Clermont County | 2 | 31 to 90 days | \$5,000 |
| Clermont | New Park Shelter | Build a new 40X60 shelter building in Marathon Community Park. No shelter currently exists for the use of residents utilizing the park. | Jackson Township, Clermont County | 5 | 31 to 90 days | \$75,000 |
| Clermont | New Township Firehouse | New firehouse to replace currently outdated firehouse with additional offices, meeting rooms. Would also be used as an emergency shelter during power outages | Jackson Township, Clermont County | 25 | 181 days or more | \$1,500,000 |
| Clermont | New Fire Pumper Tanker | Replace township's wrecked and totaled tanker. Need for this unit is great as Jackson Township is a rural township with nearly no roadside hydrants. | Jackson Township, Clermont County | 6 | 0 to 30 days | \$265,000 |
| Clermont | Township Dump Truck & Snow Plow | Replace current 1989 dump truck for service to township residents and to clear snow covered township roads. | Jackson Township, Clermont County | 1 | 31 to 90 days | \$75,000 |
| Clermont | 1174 State Route 28 side walk | To install sidewalks on Meijer drive for retail and residential use. | Moore and Son construction | 4 | 31 to 90 days | \$406,210 |
| Clermont | SOLAR PROJECT | 3 BUILDINGS WE OWN TO BE FITTED WITH "GREEN TECHNOLOGY". THE LATEST IN SOLAR PANELS. WE WOULD LIKE TO BE FIRST IN THE BUSINESS COMMUNITY TO INSTALL SOLAR PANELS. I BELIEVE OTHER BUSINESSES WILL FOLLOW OUR LEAD | ALLENS | 10 | 0 to 30 days | \$450,000 |
| Clermont | Buses | We need new buses. We would like to buy 2 new buses. A couple of our buses are over 15 years old We need to replace them. The cold weather has made it very hard for us to get students to school on time. We cannot afford a mechanic to maintain the buses like we would like. We cannot afford a barn to keep the buses from aging so fast. Our buses are used every day and have lots of wear and tear. We could really use 2 new buses for our district | Williamsburg Local Schools | 2 | 91 to 180 days | \$200,000 |
| Clermont | Amelia | Expand existing facility to better serve the community through expansion of services such as books, audio visual, programming, and technology with the addition of 20 additional public internet computers. The existing facility is structurally sound and will lend itself well to an expansion of this nature. With the amount of library users increasing, especially during times of economic downturns library services help individuals with job searches, GED programs, literacy programs, early childhood development etc. | Clermont County Public Library | 15 | 181 days or more | \$800,000 |
| Clermont | Line Striping and Raised Pavement Markings | The current library is at full capacity and as a result new materials cannot be added unless materials are weeded out. The meeting room has been converted to a children's area making it unusable for meetings or for other purposes. Libraries are in some degree the cornerstones for many communities. We need to strive to provide these types of services to our communities and schools. If we open our children to life by the ocean. In many cases the public library has replaced school libraries. Amelia is no exception to this forcing the schools to rely on the local library | Clermont County Engineers Office | 20 | 31 to 90 days | \$275,000 |
| Clermont | Sign Upgrades for Various Roads - Phase II | Re-striping of various county roads and intersections with associated raised pavement markers | Clermont County Engineers Office | 20 | 31 to 90 days | \$250,000 |
| Clermont | Bridge Load Ratings - Phase III | Upgrade existing traffic signs to current standards | Clermont County Engineers Office | 25 | 31 to 90 days | \$500,000 |
| Clermont | Bridge Load Ratings - Phase II | Perform load ratings on approximately 50 bridges throughout Clermont County | Clermont County Engineers Office | 25 | 31 to 90 days | \$500,000 |
| Clermont | Literacy | Perform load ratings on approximately 50 bridges throughout Clermont County The library is positioned to bridge the early literacy gap with community partnerships involving local pre-schools, schools, teachers and administrators by educating them on the importance of early literacy. Although it might sound like it, early literacy is not teaching your young child how to read. It's about helping your children become aware of and comfortable with books and language. You are getting them ready to learn to read. Parents and caregivers of newborns, toddlers and preschoolers must be aware of the critical role they play as the child's first teacher. | Clermont County Public Library | 10 | 91 to 180 days | \$10,000 |
| Clermont | Clermont Transportation Connection- Support Vehicle | Research shows that children who are read to from an early age have a larger vocabulary, have better language skills when they start school, have a greater interest in books, and enjoy reading activities to a greater extent. The library's involvement in early literacy already includes a vast collection of resources named Ready to Read, and over 100 Literacy Kits. In addition, library staff receives training and are in process of being certified by the Ohio Department of Job and Family Services to be Step Up to 4 | Clermont Transportation Connection | 150 | 31 to 90 days | \$60,000 |
| Clermont | Clermont Transportation Connection | We will purchase 3 new vehicles used in daily administration functions of the Clermont Transportation Connection (Clermont county public transit) | CTC | 150 | 31 to 90 days | \$610,000 |
| Clermont | A.P. Biology Lab Upgrade | Purchase replacement buses. The buses are produced in Elkhart, IN This grant would allow our school to purchase modern, computer-linked probeware and related equipment to modernize our biology lab. With this modernized lab, we would be able to offer Advanced Placement Biology for the first time. We have been in the process of transitioning to the addition of A.P. Biology to our course offerings the past two years. Recently, in three attempts so far our district has been unable to pass a renewal levy. This has left our district in financial dire straits, and unable to invest in the equipment and materials necessary to go ahead with our A.P. Biology offering. Purchase of this equipment would open this opportunity to students into the foreseeable future. This course would allow our students to better compete for acceptance into elite programs of study beyond high school. | Williamsburg Local Schools | 1 | 0 to 30 days | \$10,000 |
| Clermont | Network Equipment Upgrade | Network upgrade to bring building up to Cat5e standard and network equipment upgrade of network devices to offer streaming video and online opportunities for Vocational student | U S Grant JVSD | 10 | 181 days or more | \$400,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Clermont | Camp Allyn Pool Project | Project: cover existing outdoor pool with a 5200-sq. ft. all-season building with solar heat using Leed certified green technology construction. Retro-fit four existing classroom and program buildings on the grounds with geothermal heating using green technology. Camp Allyn is a 47-acre campus housing programs for children and adults with disabilities, including an alternative education program for elementary, middle and high school students with severe autism, extended school year programs in the summer for elementary and high school students with disabilities and year-round 2-star rated preschool. Adapted aquatics in the pool is a critical part of the education programs, providing proven therapeutic benefits for those with autism & physical disabilities. Adapted Aquatics is part of students' education plans. During winter, students currently must travel 30 minutes to a different pool. This provides on-site Adapted Aquatics year-round. Camp Allyn is one of two program sites for Stepping Stones Center | Stepping Stones Center for Handicapped | 100 | 0 to 30 days | \$1,040,000 |
| Clermont | Mount St. and Spring St. Sewer Petition Project | Township, just next to the Village of Bethel. Property owners petitioned for sewer service and, without other source funding, would have special sewer assessments levied against their properties creating a major hardship in this area where there is 58.3% low to moderate income (LMI). Expanded public sewer system infrastructure will replace individual failing on-site septic systems (under jurisdiction of Clermont County General Health District) and will eliminate a potential health nuisance. The project should support stabilization of the neighborhood by public sewer installation and connection thereto, allowing the Health District to not have to condemn properties for contributing to a possible health nuisance. Grant funding assistance would eliminate the need for special sewer assessments against these properties, allowing the 39 property owners to be in a position to continue paying their mortgages, taxes and other assessments rather than losing their homes due to condemnation or foreclosure. | Board of County Commissioners, Clermont County, Oh | 100 | 31 to 90 days | \$1,044,400 |
| Clermont | Greenhouse & Walking Trail | This would allow the District to construct a greenhouse to be used by the science classes in the District. Also, a walking trail would be installed that would be installed along a small creek and woods in the back of the high school. This would be a very positive program for the District's high school science classes. | Goshen Local School District | 25 | 31 to 90 days | \$350,000 |
| Clermont | Fine Arts System | The District would like to build a Fine arts center that includes a 500 seat theater for performances. This would include a choral music classroom to separate from the general music classroom. This building would allow the District to offer new programs to help the students' strengths in other education areas. | Goshen Local School District | 100 | 31 to 90 days | \$2,000,000 |
| Clermont | Curbs and Gutters | The curbs and gutters in the Village of Bethel are in bad need or renovation. The curbs are cracked and pushed out of alignment and the street gutters are not draining properly due to all the repaving of the streets over the years. The renovation of the curbs and gutters will result in safer travel due to improved storm water run-off and will create a much improved aesthetic appearance for our main street. | Village of Bethel | 20 | 91 to 180 days | \$400,000 |
| Clermont | Tile Stairwells and Lockers | Tile the stairwells and lockers rooms for sanitation and safety of the kids at the Goshen Middle School. The Marr/Cook Elementary also needs some tile on the steps to the stage. Again, to provide safety for the students in the building. | Goshen Local School District | 10 | 0 to 30 days | \$20,000 |
| Clermont | Building Roof and Window Replacement | Replace existing roof of school district building and a total building window replacement | U S Grant JVSJ | 14 | 91 to 180 days | \$1,176,670 |
| Clermont | Shelter House & Top soil | This shelter would be built near the playground to aid in different programs that would be taught outside for the students. The District would also like to add some top soil to the Spaulding building to aid in the growth of the lawn around the Shelter. The Shelter would also be a nice asset for the Goshen Community since there is no park in the Township at the present time. | Goshen Local School District | 10 | 0 to 30 days | \$30,000 |
| Clermont | Classroom Furniture | The District needs new risers at all of the buildings. Also, the elementary school is in need of some new desk and chairs. This is will replace the old furniture and add for the growth in enrollment | Goshen Local School District | 10 | 0 to 30 days | \$40,000 |
| Clermont | Orton Gillingham Program | The Orton Gillingham Program would be used for all of the special education teachers in the District. This would cover the training and materials for the teachers for all the buildings in the District. With Goshen Schools having over 18% of the students being Special Ed, this is a very important program for the District. | Goshen Local School District | 5 | 0 to 30 days | \$40,000 |
| Clermont | Solar Power Conversion | Install solar panel energy system to be used to power our facility. The system will be used as a display model for potential customers and training for our employees on the installation/maintenance of a solar energy system. We recently installed new energy efficient lights/ballast for our warehouse for the same reasons. This work would provide jobs immediately and provide a new area of expertise for the future. | Trebor Electrical Contractors, Inc. | 5 | 31 to 90 days | \$150,000 |
| Clermont | City Hall LEED Certification | The existing City Hall was built in 1973. No plumbing or mechanical fixtures have ever been replaced. The systems need replaced now. It is our goal as a City to set the standard for our residents, in environmental and energy stewardship. By retrofitting our existing City Hall to a Silver if not Gold LEED standard of certification by: natural daylighting, geothermal heating & air conditioning, low flow fixtures, added insulation, non toxic cleaners | City of Loveland | 25 | 0 to 30 days | \$1,000,000 |
| Clermont | Old High School Repairs | We need repairs on our old high school. The second story needs a new roof, gutters, fascia, and metal coping. We need to repair or replace all units. We must install an elevator to bring it up to code. All entry doors are from 1960 and must be replaced. Our HVAC is an old steam heat unit. We need to replace it to hot water heat. We need to update all plumbing and restore our paving. We would like a new playground as ours is very old. A lot of these repairs will help the school in the future by reducing energy costs. | Williamsburg Local Schools | 1 | 91 to 180 days | \$870,000 |
| Clermont | Pedestrian and Bicycle Bridge | Construct a pedestrian/bicycle bridge to connect the Little Miami Scenic Trail with downtown Milford. The bridge would permit safe travel to and from the Little Miami Trail into the downtown area and help stimulate activity in the downtown businesses | City of Milford | 50 | 31 to 90 days | \$1,300,000 |
| Clermont | State Route 28 side walk | To install side walk's for retail and residential use on st rt 28 and Meijer drive. | Moore and Son Excavating LLC | 25 | 31 to 90 days | \$406,210 |
| Clermont | Williamsburg to Batavia hike and bike trail | To build a hike and bike trail from Williamsburg to batavia. | Moore and Son Excavating LLC | 30 | 181 days or more | \$2,500,000 |
| Clermont | Veterans Homeland Transition Project with PTSD Scr | Stress Disorder) and career consulting, has developed tools and procedures that enable us to accurately assess veterans' credentials, define an appropriate career path for them, place them at appropriate jobs after training, and then track their professional and skills development progress. With over 3.5 million dollars in investments and over 200 years of combined experience, we have created a proven system helps young veterans with adjustment issues, due to PTSD, as they plan and develop their careers and educational pathways. Our career counselors identify "personal preferences" for performing tasks or learning skills so that counseling style can be adapted to accommodate different personality of each veteran. For a total cost of around \$3,000 per individual, our professional psychologists will provide an initial PTSD screening and career counseling along with post-screening validation, interview, and follow on psychological treatment. We will then help these veterans find an appropriate job, and monitor their progress. The system is slated to become self-sustaining. | DigiLore, Inc. | 6000 | 0 to 30 days | \$1,500,000 |
| Clermont | Matthew Kennedy | New job creation. A sustainable venture effecting many small growers and producers. Sustain has developed a "game changing" business model based on the idea that we must alter the way we grow, produce, market and buy the food we eat. Sustain is the only national CPG brand that exclusively sources local products. Sustain provides consumers and retailers with an alternative to food produced in large, centralized factories and shipped vast distances (food miles) to the retail shelf. Sustain products are sourced from a sustainable distance of about 300 miles or less. Management will scale Sustain nationally by creating multiple 300-mile food webs across the United States. The first web is operating in the Ohio Valley area. | Sustain Brand | 5 | 0 to 30 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Clermont | Cops Grant | additional police officer to work with existing cooperative police efforts on local, county, and federal levels. Goshen Township will contribute a local officer to an existing collaborative effort with neighboring township and county agencies including the drug enforcement agency to combat a significant increase in drug crimes, overdose fatalities, and other offenses that occur a result of drug trafficking and abuse. | Goshen Township Police Department | 4 | 0 to 30 days | \$894,000 |
| Clermont | Recreation Facility | This recreation facility will provide a state of the art, high quality, climate-controlled green building that will be based on a family atmosphere for fun, recreation, exercise, and athletic advancement. The facility shall serve the community with sports programs for all ages, needs, and levels of educational play. | McLelland Properties, LLC | 35 | 31 to 90 days | \$1,290,774 |
| Clermont | Bus Barn | We don't have a bus barn. We would like to build a bus barn on existing school property. We could then hire a bus mechanic. A school bus mechanic takes very good care of the fleet. We just use an independent contractor and they don't do much preventative maintenance. Our costs are very high for the contractor. We need a bus barn and all the tools that a mechanic would need like lifts. Thank you. | Wilmington Local School District | 2 | 91 to 180 days | \$150,000 |
| Clermont | Edwilla LS Elimination and Audubon LS Improvements | Project consists of the elimination of the existing sanitary sewer lift station on Edwilla Drive and the construction of approximately 1,012 feet of gravity sewer from Edwilla Drive to Cardinal Drive, in order to redirect the flow. The existing Audubon Lift Station will be eliminated and the construction of a new Audubon Lift Station and approximately 191 feet of 6 inch sewer force main will be added, just east of Bluebird Lane. The project is located in Union Township. This is a total infrastructure replacement to allow for continued economic development and retain existing jobs in the area. A school is located in the area which sewer service currently comes into the Edwilla LS, which is being eliminated, and will be rerouted through the new Audubon LS to more effectively and safely transport wastewater to the treatment plant. These lift stations being eliminated and improved were built in the 1970's. | Clermont County, Ohio Board of County Commissioner | 72 | 31 to 90 days | \$520,000 |
| Clermont | Fire House Bolier Replacement | Project entails the replacement of an aged and in-efficient boiler at the New Richmond Fire Station. The current boiler is original to the building, installed with the fire house construction in 1963. Due to limited funds, the New Richmond Fire/EMS Department can not afford to replace the boiler. A new efficient model would offer long term cost savings to the department and the community as a whole | New Richmond Fire Department | 1 | 0 to 30 days | \$12,000 |
| Clermont | Innovative Wastewater Treatment at Cincinnati Natu | sustainable energy and sound environmental stewardship by replacing our current Wastewater Infrastructure. Currently CNC's wastewater is managed by a mixture of on-site systems (e.g., small package plant and Household Sewage Treatment Systems). We propose to construct a primary treatment interceptor tank at each major source, constructed wetlands with recirculation, recirculating sand filter, mechanical filtration equipment, disinfection system, storage tank, associated pumps, and controls for non-potable building reuse (toilets &/or cooling equipment). This project will be an example to the surrounding community regarding sustainable land use applications to help protect our freshwater resources. We will be collaborating with the Clermont County Board of Commissioners, Clermont Office of Environmental Quality, Clermont Soil and Water Conservation District, Little Miami River Partnership, and the East Fork Watershed Collaborative to raise awareness about the effectiveness of Constructed Wetlands for Sanitary Treatment. Following cost Road then east along St. Joseph Drive in Batavia Township, Clermont County, Ohio. Property owners petitioned for public sewer service and this would mean infrastructure improvements with replacement of failing private on-site systems under the jurisdiction of the Clermont County General Health district and could avoid a potential health nuisance. The project would serve 28 properties, two of which are classified as commercial with (1) a nursery landscaping business currently closed and the reopening, via a potential lease contingent upon public sewer being installed and connected allowing restrooms to be built, creating or recreating approximately 25 jobs and (2) an auto recycling/auto parts state of the art business retaining approximately 70 jobs with possibility of expansion increasing that number and bringing laid off jobs back. This would process through the WPCLF program and/or the Rural Development Program as a Rural Water and Waste Disposal project. Grant requested. | Cincinnati Nature Center | 20 | 0 to 30 days | \$400,000 |
| Clermont | Benton Road and St. Joseph Drive Sewer Petition Pr | My wife currently cleans homes, and we would like to expand this by cleaning carpets also, which would allow me to employ 2 people to work that business. We have several years in this industry, and have customers that have said if we had a carpet cleaning unit we could have there business. | Clermont County, Ohio Board of County Commissioner | 165 | 31 to 90 days | \$540,000 |
| Clermont | Carpet Cleaning Service | based technologies that will allow local and state first responders to hazardous situations (e.g. bomb threat, hostage situation, hazardous spill) to have access to affordable new technologies that can aid in dangerous situations and deploying necessary equipment without putting human lives at risk. First Response Robotics has 2 years of research and development invested in the current Hazardous Environment Robot Observer (HERO) project. The robots are extremely mobile with capabilities that include the ability to navigate difficult terrain and start climbing. The robots are customized depending on the needs of the agency and environment where they will be used. Both the Environmental Protection Agency (EPA) and the Federal Bureau of Investigation (FBI) have purchased these robots for use in unique and challenging circumstances. The next stage of development for this product is to increase its utility by refining the design of its mechanical arm. The impact of the project will offer the addition of 4 new skilled employees with mechanical, electrical | For profit Business | 2 | 0 to 30 days | \$40,000 |
| Clermont | Robot | Name of "O,BANNON": Installation of approximately 37,540 LF of sanitary sewers, manholes, laterals, (2) lift stations, and other incidentals along SR 28, SR 132, Slumpy Lane, Goshen Road, Cozadale Drive, Angelwood Drive, Bryant Lane, and Shiloh Road to serve properties in Goshen Township. A total of 376 properties will benefit from this sewer project with 355 planned connections and it is an assessment project resulting in the individual property owners paying the majority of the costs with an average property assessment of approximately \$16,000. Assistance in the form of a Grant would greatly relieve the burden on these property owners during these difficult times. This project will also ensure the preservation and promotion of the public health and welfare and improve stream quality by deactivating failing septic systems, avoiding a potential health nuisance. The project is currently under construction. This is considered a rural area by, and should be processed through, the Rural Development Program. | First Response Robotics, LLC. | 4 | 0 to 30 days | \$400,000 |
| Clermont | O'Bannon Unsewered-SR 28 Sewer *Replaces O'Bannon* | This project will stabilize approximately 500 linear feet of O'Bannon Creek which has rapidly eroded over recent years, contributing to sedimentation and siltation, and degradation of habitat in both O'Bannon Creek and the Little Miami River. O'Bannon Creek is a major tributary stream of the Little Miami River, a designated state and national scenic river and Exceptional Warmwater Habitat (Ohio EPA). The project site is located adjacent to O'Bannon Meadows subdivision in Goshen Township, approx. 5 mi. upstream from it's confluence with the Little Miami River. The project site is known as Wolliver Preserve and is owned by Little Miami Inc., a local river protection organization, and thus permanently protected. The project will include regrading the streambank to a stable slope, adding toe protection, and revegetation of the slope | Clermont County, Ohio Board of County Commissioner | 176 | 0 to 30 days | \$6,000,000 |
| Clermont | Wolliver Preserve Streambank Restoration Project | Installation of approximately 4,350 feet of 16" water transmission main cross country to connect the existing 16" water main on Teatown Road to the existing 16" water main on Sugar Camp Road - located in Union and Miami Townships. This project will increase transportation and distribution of safe drinking water and fire protection throughout two highly developing areas. WSRLA Program. | Clermont Soil & Water Conservation District | 2 | 91 to 180 days | \$70,000 |
| Clermont | Teatown Rd./Sugar Camp Rd. Water Transmission Mai | | Clermont County, Ohio Board of County Commissioner | 75 | 31 to 90 days | \$741,922 |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Clermont | Stonelick-Williams Corner Water Transmission Main | Waterworks System infrastructure improvement involving the installation of approximately 24,000 feet of 24" water transmission main along Stonelick-Williams Corner Road from SR 132 to US 50 in Stonelick Township. This represents placement of the proper infrastructure to support economic development of an underdeveloped area. There are two churches and many residential-agricultural properties in the immediate area that will benefit from the increased capacity with possible further development and transmission of safe drinking water. WRSIA Program. | Clermont County, Ohio Board of County Commissioner | 65 | 31 to 90 days | \$2,350,000 |
| Clermont | Williamsburg low-head dam removal | Village of Williamsburg (Clermont County). Research conducted by the Midwest Biodiversity Institute (2007) shows that removal of the Williamsburg dam will result in immediate improvements in water quality, habitat, and biodiversity. Immediate improvements will occur along the approximate 1 mile stretch and will enhance connectivity upstream, improving impaired stream segments in the upper watershed. The East Fork Little Miami is currently listed as an impaired waterway by Ohio EPA and is in non-attainment of its Exceptional Warmwater aquatic life use designation. This project will take a step forward in removing the river from Ohio EPA's impaired waterways listing, as we expect to see significant reductions in phosphorus and nitrogen levels. The Village of Williamsburg is interested in removing the dam to eliminate a public safety hazard and to improve the local environment by addressing non-point source pollution. Clermont Soil & Water Conservation District has been working with the Village of Williamsburg to find funding for this project. | Clermont Soil & Water Conservation District | 10 | 181 days or more | \$150,000 |
| Clermont | Williamsburg Low-head Dam Removal | Village of Williamsburg (Clermont County). | Clermont | GlenEste-Withansville Road to Old SR 74 Water Main | Project consists of the installation of approximately 10,356 feet of 16" water main, along GlenEste-Withansville Road and Old SR 74 from Aicholtz Road to Schoolhouse Road to replace existing 10" and 8" cast iron water main, which does not meet current County standards and is experiencing frequent breaks, that was installed in 1954. The replacement water main will be made of suitable material to reduce the maintenance requirement and water main breaks. This represents a Waterworks System infrastructure replacement, along with a higher capacity main for safe transport of water, that will increase support of economic development and increased job opportunities in this fast growing community. There is a high school, a nursing home, churches, apartment/condo complexes, and almost 60 retail or business located in this service area and this water main improvement will support retention of jobs possibly in the thousands. WRSIA Program | Clermont County, Ohio Board of County Commissioner | 140 | 31 to 90 days | \$2,600,000 |
| Clermont | Indian Lookout Trunk Sewer Line | plant) and reroute the sewage to the Wards Corner Wastewater Treatment Plant (larger, more regional, higher capacity treatment plant with improvements currently being completed.) The project includes the installation of 1920 LF of 8" diameter gravity sewer, 11 manholes, a lift station with initially one 350 gpm pump, and 1127 LF of 8" diameter sewer force main. Lift station construction also includes approximately 500 feet of 12' wide gravel access, turn-around, screening fence and landscaping. Also included in the project is the decommissioning and demolition of the existing Indian Lookout WWTP. This is infrastructure replacement to retain existing development and jobs, looking toward increased economic development and job opportunities in what could be a highly developing area. It is located in Miami Township. There are several tracts surrounding this project when, once the project is completed, would be served by sewer allowing substantial residential (or other) development creating more construction jobs in the future. WPCLF Program | Clermont County, Ohio Board of County Commissioner | 69 | 31 to 90 days | \$850,000 |
| Clermont | SR 133 Water Main Replacement | original Village of Felicity water system as a feeder main from the wellfield to the Village. A new 8 inch feeder main was installed several years ago and the original 6 inch main has been used as a service line for customers along SR 133. It is in poor condition and must be replaced. The first phase of the project has just been awarded a grant from OPWC. This request is for the balance of the funds required to perform the work. | Village of Felicity BPA | 6 | 31 to 90 days | \$550,000 |
| Clermont | Electricity usage reduction technology service | reduction in residential electricity usage and a resulting 10% reduction in electricity bills for the average household in Ohio. The average household electric bill is \$88 per month. This results in a \$8.80 per month savings per household. 50% of this savings will be collected monthly to pay for the technology and services. The jobs created are for individuals to install the outlets and provide supporting services. With over 4.4 million households in Ohio the project is expected to take approximately 5 years. The project is expected to reach breakeven in 26 months and then become self sustaining. | PowerLite | 1724 | 0 to 30 days | \$11,738,240 |
| Clermont | HVAC renovation high school | The smart technology outlets provide two basic functions: 1. stop all electricity consumption through an outlet due to modern electronics; and 2. provide adaptive modes to stop or start electricity flow based on household behavior. | Milford Exempted Village Schools | 10 | 0 to 30 days | \$500,000 |
| Clermont | Save Our Junior High Sports | The jobs created are: 1. assessments of household usage patterns; 2. installation of the outlets; and 3. service/support for the consumers. | SOS | 10 | 91 to 180 days | \$250,000 |
| Clermont | The Safe Lawn | GroundsQuest is proposing an Organic Fertilization Program for care of community lawns, as well encourage use at local golf courses. The organic program will be an integrated lawn/grounds program that will use a minimal amount of material and be free from all pesticides, yet effective. I am the owner of GroundsQuest and I used to work in the golf course industry that required me to spray lethal chemicals daily for about 15 years which caused me major health issues. It bothers me that they still use these chemicals that effect the employees but more so, the innocent golfers. I am on a mission to promote a healthy alternative for homeowners and then hopefully promote the use of this healthy alternative for golf course use. It will be a healthy alternative that will not harm us, our children, our pets or the innocent animals trying to live in this harmful environment. The Safe Lawn is the Best Lawn. | GroundsQuest | 2 | 0 to 30 days | \$20,000 |
| Clermont | Goshen Township Service Center | Project involves the acquisition of 5.6 acres to establish a satellite fire & EMS station, a new road maintenance yard and salt barn, and public work meeting facility. Property acquisition includes 3,320 square feet of existing office and warehouse space to accommodate a life squad unit and a fire rescue engine. An additional 400 square feet of common area/office space will be made part of this proposed station. A new 4,800 square foot facility would be built to accommodate four (4) separate maintenance bays: major overhaul; lube rack; general maintenance; and a wash bay. The facility would also include a breakroom area, restrooms, a sign shop and an indoor storage area. Outside facilities would include: a 1,000 gallon above-ground fuel station; and a 1,900 ton salt barn. | Goshen Township | 10 | 91 to 180 days | \$1,238,100 |
| Clermont | Goshen Commerce Park Drive | Acquisition of a 50' of right-of-way and the construction of 3,000 linear feet of a 24' wide roadway connecting to Ohio State Route 28 offering access to as many as thirty-five 1.2 acre industrially zoned land parcels. Underground utilities including an 8" sanitary sewer line, water service, telephone and high speed data service have been installed and are available to these potential sites. | Goshen Township | 35 | 91 to 180 days | \$865,200 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------------------|----------------|--------------------|---------------------------|
| Clermont | Main Street Streetscape & Broadway Trail Improve | Main Street Streetscape: This project calls for the demolition of four (4) residential structures, the installation of four gaslight street lamps, the installation of two (2) benches, and 1000 linear feet of rolled curb and gutter, a brick paver sidewalk feature, and signaled crosswalk features. Broadway Street Nature Trail: A neighborhood oriented park facility utilizing 700 linear feet of an abandoned section of the Wooster to Chillicothe Turnpike - a horse and wagon toll road circa 1815 connecting Cincinnati with the then capital of Ohio. Project includes construction of a 10' wide non-motorized walking and hiking path connecting the historic footprint of Goshen Township with township park property, a stream viewing area, and entrance gate facilities standards that both attract and secure trail and meet the architectural design standard created for the neighborhood. This streetscape and nature trail improvement along with the clearing of the blight will support the mixed landuse redevelopment of the historic footprint of Goshen and stimulate the creation of 15 new employment opportunities. | Goshen Township | 10 | 181 days or more | \$162,600 |
| Clermont | Goshen Boulevard Streetscape | boulevard construction that will physically tie together the pedestrian oriented civic venue planned for the four acre site owned by the Goshen Board of Education located on the west side of Goshen Road and the planned mixed land use redevelopment of a fourteen block area on the east side of the street. An estimated 30 new employment opportunities will be generated by this infrastructure improvement. By widening an existing two-lane county roadway, this first 1,000 foot long section will contain a 12' wide heavily landscaped median with striped and signaled crosswalks, rolled curb and gutters; and sidewalks. Phases Two and Three of the Goshen Boulevard infrastructure project will enhance mixed land use redevelopment of Goshen's historic footprint that has fallen in disrepair whose blighting effect needs to be corrected. These future phases will enhance pedestrian connectivity to the Goshen Township Government Center, its planned recreational opportunities and the Goshen Board of Education centralized school campus containing four buildings K-12 | Goshen Township | 30 | 31 to 90 days | \$1,395,000 |
| Clermont | New Richmond Emergency Services Center | operations center for the Village of New Richmond. The new building would be located outside of the floodplain and would include all emergency equipment. The project would allow the village to handle all emergency operations during flooding which is common to the village due to our location along the Ohio River and other emergencies situations. The proposed project site will be located within the high growth area of the Village of New Richmond and near to the New Richmond School campus including its 1800 students. The existing station will continue to be utilized to serve residents in the core area and the U.S. 52 corridor portions of the village. | New Richmond Fire & EMS Department | 3 | 181 days or more | \$5,000,000 |
| Clermont | Police Cruiser | Proposed project would allow for the purchase of a new outfitted Police Cruiser. The Village's current financial situation does not permit for the purchase of a much needed Police Cruiser. The small department is suffering from a significant drop in funding from the local Power Plant following deregulation while crime and crime prevention has not decreased. The cruiser would be purchased via the State of Ohio Cooperative Purchasing Program allowing for quick delivery and utilization of the vehicle. The proposed cost is an estimate based upon cruiser purchase and full outfitting. | New Richmond Police Department | 1 | 0 to 30 days | \$38,000 |
| Clermont | Micro-hydro power | Install combination of micro-hydro power generation, wind generation, and solar generation with concurrent storage facility. This project can produce enough energy to completely eliminate residential electricity usage in our catchment area. | Red Roan Renewable Power Association | 3 | 0 to 30 days | \$60,000 |
| Clermont | Renovation of Main School | Renovate abandoned school to serve the Milford City Community with a Community Center. The Center would serve the entire community. Activities would be planned to serve all age groups. The building is in good condition with facilities for food service, classroom and office space, a gym, stage and auditorium. The renovation would be needed to provide handicapped accessibility, updated asbestos abatement, some remodeling of spaces, and updating of heating system and providing air conditioning to parts of the building. The building is in the center of town and parts of the building are over one hundred years old. There is much sentiment in support of preserving this building because it once served as the k-12 school for the entire community. It is a beautiful structure that is structurally sound and its architecture complements this historic city in a very positive way. There is currently no community center in the city of Milford | Milford Exempted Village Schools | 100 | 91 to 180 days | \$2,000,000 |
| Clermont | Community Center - Convert a School | structure is very solid, and the architecture complements the historic city of Milford. There is a need in this city for a community center. The building has ample space for offices, classrooms, cafeteria/food service, a gym, a stage and an auditorium. This building is revered by the local community because many went to school in this building when it served the district as a k-12 building. It is in good condition. It needs to be made handicapped accessible so that it can serve all ages and all populations. It needs some remodeling and updating of its heating system and some areas need air conditioning. There will be some need for updating the asbestos abatement and other minor safety issues. The community is in great need of a community center. This building is in the heart of town and easily accessible by car or foot to the entire population. Regular programming can be provided by volunteer groups, the city and the schools in a cooperative venture that will generate jobs, activities and community spirit that can be funded through local sources | Milford Exempted Village Schools | 100 | 91 to 180 days | \$2,000,000 |
| Clermont | Energy Efficiency | Add heat pump system to a large section of our Junior High School to replace ancient and inefficient heating system and provide air conditioning to allow for more use of our building for educational purposes not only during the hot months but in the summer time for both school and community use | Milford Exempted Village Schools | 45150 | 31 to 90 days | \$500,000 |
| Clermont | School facility replacement | West Clermont Schools needs to replace aging school buildings, athletic complexes, maintenance buildings, and bus compounds with facilities that will enable us to provide real world, twenty-first century skills for our students. This money would fund the replacement of six elementary schools, two middle schools, two high schools, a maintenance facility, sports complex, and bus compound. | West Clermont Local School District | 530 | 181 days or more | \$195,000,000 |
| Clermont | School cafeteria upgrade | Currently, local voters have approved the construction of our two oldest elementary schools at a cost of \$30,000,000.00 Upgrades to cafeteria would be the replacement of old and inefficient stand alone refrigerators and freezers with a commercial grade, energy efficient walk in refrigerator, freezer unit. This would decrease our overall energy consumption. An upgrade to the cafeteria dishwashing equipment would allow the children to use reusable eating utensils and trays. This would make our operation a better example for the 470 students as well as an overall cost savings to our cafeteria program. The overall outcome would be a decrease in energy use, a decrease in waste material, and an increase in a positive example to the students. | St. Veronica School | 3 | 0 to 30 days | \$75,000 |
| Clermont | Risk Solutions | Our community wishes to see opportunities with new financial investments. Recent US EPA Diesel Emissions Reduction. We have just laid-off 10% of our workers and plan on additional cuts. If you can provide this infusion of resource we can: 1) Save many jobs; 2) Help Ohio become more energy efficient; 3) Develop methodology for Ohio to use as a model for cleaner air at a reduced cost for everyone. Our New Product Development Diesel Emissions Reduction Methodology can save Ohio \$50,000,000 (environmental costs (i.e. - air pollution, etc) and health care costs) over the next decade. | Risk Solutions LLC | 200 | 0 to 30 days | \$1,000,000 |
| Clermont | Miami Transport Inc. | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Clermont | Loveland City Schools, Cummins Bridgeway, Clean Fu | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by installing 48 cab heaters and 25 diesel oxidation catalysts. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 6 | 0 to 30 days | \$121,000 |
| Clermont | Auxier Gas Inc, a Clean Fuels Ohio Partner | Retrofitting fleet vehicles with a propane injection system to increase the mileage range and cleanup the emissions of diesel/gasoline combustion engines | Clean Fuels Ohio | 5 | 0 to 30 days | \$100,000 |
| Clermont | Fresnel Solar Concentrators | Stewart Filmscreen manufactures fresnel lenses for the projection screen business. I have the basis for manufacturing fresnels at a low volume rate up to 15 feet by 15 feet. The fresnels would concentrate the suns light to a collector and generate electricity. The original target market is for residential homes. My current residential dealer base should be able to sell the systems into homes. We have additional markets under consideration also. | Stewart Filmscreen Corporation | 30 | 181 days or more | \$3,000,000 |
| Clermont | Irrigation | 2.5 acres of drip irrigation system for the nursery holding area. | Cincinnati pine, inc. | 3 | 31 to 90 days | \$12,800 |
| Clermont | Wireless Laptop Labs | Instead of updating five stand alone computers in every classroom that were purchased through SchoolNet funds in Ohio many years ago. Provide wireless laptop carts in each of our 8 schools. Thirty laptop carts could be purchased for the 8 buildings so that technology could impact learning each and every day. The district would purchase carts during the first year of the grant and subsequent years instead of using funds to replace old technology. Part time aides would be hired in each building to help train teachers and assist students in the use of the carts each day in their classrooms. In future years, the district would continue to employ aides to help with other technology assists in the classroom so that the teaching/learning process is impacted in a positive way. The learning of both staff and students has to be continuous about both technology implementation and its enhancement of the learning process. | Milford Exempted Village Schools | 10 | 0 to 30 days | \$400,000 |
| Clermont | School and Community Based Services | Batavia continues to see significant changes in their community with businesses closing and residents losing their jobs. When Ford Motor Company closed, over 1,700 people lost their jobs. The current economic crisis is further complicating these matters, raising new concerns for this already at-risk community. As one might expect, these issues extend into the schools, as children and families deal with stress and anxieties. | Beech Acres Parenting Center | 7 | 0 to 30 days | \$150,000 |
| Clermont | Pattison Lodge HVAC Upgrade | The Clermont County Park District would like to upgrade the existing HVAC system at Pattison Lodge to one that is more energy efficient. The aging system is not very energy efficient and is expensive to operate. Over 20,000 citizens a year use Pattison Lodge as place to hold weddings, family reunions, business meetings, parties and educational programs. Savings on energy will help the Park District to operate within its budget while continuing to offer the community a wide variety of programs and facilities in natural settings. Funds would pay for the system design and installation | Clermont County Park District | 2 | 31 to 90 days | \$50,000 |
| Clermont | 60 acre economic development | located within 500 feet of a county facility. The county is reluctant to take on infrastructure deficiencies due to problems Village systems. Solution: Reline sewage lines to eliminate inflow and infiltration. Allowing EPA approval of collection system. Eliminating need for village resources to manage system. Emission levels to pass to the county enhancing their system. The current village sewer plant is located on 60 acres of prime development land. The elimination of the plant would provide for development and jobs, aiding the local economy. The relining of the primary lines within the village would allow the county to take over the entire project without objecting to the age of the system in place. Therefore to develop 60 acres of land in the CENTER of the county seat it would be necessary to eliminate the village sewer plant. The addition of this grant should allow the Village of Batavia to proceed. | VAOB | 5050 | 0 to 30 days | \$300,000 |
| Clermont | Smart Car for Police Department | To purchase a smart car for the police department to use for such purposes as driving to court appearances, for the SRD to use when traveling to schools and for various other duties. This would keep one full size police vehicle off the streets when in use and would dramatically decrease fuel expenses when in use. Our current police vehicles get in the neighborhood of 13 mpg and the smart car would attain miles per gallon in the neighborhood of 40 miles per gallon | Village of Bethel | 20 | 0 to 30 days | \$20,000 |
| Clermont | Utilities vehicles | To purchase two (2) Kubota RTV 1100 utility vehicles to implement into our Public Works Department. These vehicles would replace full size trucks for day to day work and would cut our daily gasoline usage dramatically. Our trucks are getting 15mpg at best and the kubota vehicles would get 40 to 50 mpg. | Village of Bethel | 20 | 0 to 30 days | \$40,000 |
| Clermont | Emergency Generator | In addition, these vehicles would provide additional capabilities such as snow removal assistance to purchase a backup generator which will provide use during power outages in the police department and municipal center, and to allow for an emergency shelter to be run in the adjacent community center. | Village of Bethel | 10 | 31 to 90 days | 25,000.00 |
| Clinton | Utilization of Wilmington Area Residents to Provid | of the Wilmington airport, many talented people have been forced to find employment elsewhere during a time of limited opportunities. We would like to create a Managed Services team in Wilmington who would provide affordable technology assistance to businesses throughout the state of Ohio. This would not only create jobs in Wilmington, but provide valuable and affordable assistance to small and medium businesses when budgets are limited. Since our focus is helping businesses reduce costs, inefficiencies and risk, we see an opportunity to create value during this difficult time. Our goal would be to employ 50 or more people within 12-18 months of launching this initiative and creating new payroll of more than \$3M annually. Staff would be working from office space within Wilmington and our goal would be to continue expansion of the workforce within that area since it is midway between the Columbus and Cincinnati markets. These would be full time positions with Master generator for the City of Wilmington | Assurance Group, Inc. | 50 | 31 to 90 days | \$2,500,000 |
| Clinton | Dist 8, PID 85843, CLI Master generator | | Ohio Department of Transportation | 1 | 31 to 90 days | \$37,000 |
| Clinton | Dist 8, PID 85844, CLI 2 computers and laptop | 2 computers and laptop for the City of Wilmington | Ohio Department of Transportation | 1 | 31 to 90 days | \$5,500 |
| Clinton | Development of Addition to Jefferson Township Ceme | Develop 6.59 additional Acres for a crowded community cemetery. Land has been purchased, cleared, leveled and seeded with local funds and labor. A Master Plan has been drawn by a licensed Engineer which specifies installing 30 lin.ft. of 15" storm sewers, 90 lin.ft. of 12" double wall storm sewers. Construction of 1230 lin. ft. of 16" asphalt paved access roads designed with a stone base. Three entrance culverts, each 30' x 12". Also install 5700 lin.ft. of 4" tile for lateral drainage. Construct 2 brick posts at each of the two entrances on Valley St. to match original postof the adjacent old cemetery. On Jonesboro Rd, 2 posts will require I-beam reinforcement & footers to support 2-15' iron gates. Seeded land will be divided into 5 Sections and plotted to provide 2400 burial spaces, each marked by iron pins. Will create work for approximately 25 persons during the summer and up to 10 on a more permanent basis. This project will provide income to an area with few employment opportunities and will also be a source of pride to the whole community | Jefferson Township Cemeteries Association | 25 | 0 to 30 days | \$156,000 |

| Clinton | Clinton-Massie Community Center | Clinton-Massie is proposing the creation of a Community Center in space soon to be available in our vacated elementary school. Renovations are needed to the 70,000 sq. ft. 1980 era building to accommodate the groups who have expressed interest in securing space in the building. Groups such as Head Start, the YMCA, Clinton County Sheriff's Office, and Clinton Memorial Hospital (Health Center) - Clinton-Massie is a rural district with no large towns or urban centers nearby. The school has traditionally been the community hub for all residents. We are hoping to bring resources, through this collaborative project, to our residents in a consolidated location. We feel this project touches all of the areas in the project box above. Security (Sheriff), Healthcare (Health Center), Education (Headstart), Poverty (Headstart), Energy (Solar Power) and Infrastructure (renovations) and could be a model across Ohio for utilization of the stimulus dollars. | Clinton-Massie Local School District | 30 | 31 to 90 days | \$650,000 |
| Clinton | Dist 8, PID 75696, CLI SR 380 0.00 | Minor Rehabilitation - Pavement Grnd Sys | Ohio Department of Transportation | 64.8 | 31 to 90 days | \$2,257,000 |
| Clinton | Dist 8, PID 25372, CLI SR 124/350 0.03/14.21 | Minor Rehabilitation of IR 75. Grind and pave, some joint repair | Ohio Department of Transportation | 66.1 | 31 to 90 days | \$2,303,306 |
| Clinton | Dist 8, PID 75696, CLI SR 380 0.00 | Minor Rehabilitation - Pavement Grnd Sys | Ohio Department of Transportation | 64.8 | 31 to 90 days | \$2,257,000 |
| Clinton | Dist 8, PID 78125, CLI SR 72 0.00 | Minor rehab. on SR 72 from the Highland Co. line to Greene Co. line | Ohio Department of Transportation | 80.4 | 31 to 90 days | \$2,800,000 |
| Clinton | Dist 8, PID 75696, CLI SR 380 0.00 | Minor Rehabilitation - Pavement Grnd Sys | Ohio Department of Transportation | 64.8 | 31 to 90 days | \$2,257,000 |
| Clinton | Antioch Road Reconstruction | Reconstruction, widening and resurfacing of roadway to improve safety on 8.58 miles of Major collector which provides access to the Wilmington Airpark for employees from our County as well as Highland and Adams County. | Clinton County Engineers Office | 20 | 181 days or more | \$2,400,000 |
| Clinton | Airborne Road Reconstruction | Reconstruction and resurfacing of 3.41 miles of a Major Collector roadway which is the primary access to the Wilmington Airpark (DHL/Airborne Express) | Clinton County Engineers Office | 20 | 31 to 90 days | \$770,000 |
| Clinton | Heartbeat | continue their support of Main Street Wilmington, a local economic revitalization program. We provide assistance to current businesses, encourage entrepreneurship and recruit new/expanding businesses. \$100,000 - Provide a 1:1 match for start-up costs of new businesses and for current business expansions. The expected outcome is to fill the 35 vacant spaces in Downtown Wilmington with businesses creating over 100 new jobs. | Main Street Wilmington | 100 | 0 to 30 days | \$250,000 |
| Clinton | Kettering Science Center Expansion and Renovation | Wilmington College plans to expand and renovate its 50 year old Kettering Science Hall. The plan calls for adding 14 new, modern laboratories for our STEM programs (agriculture, biology, chemistry, etc.), four greenhouses for our agriculture program, and additional classrooms, offices and conference rooms. The expansion doubles the size of the existing facility. The College has designed and will build the renovation and addition with a focus on energy efficiency and environmental stewardship, seeking a Silver LEED Certification level. The new laboratory addition will be 32,200 square feet, the renovation will be 34,100 square feet. Total project cost is \$18.50 million, with \$3 million already raised. We anticipate that approximately 23 trades, totaling 175 workers, will be needed to complete the project in 1.5 - 2 years. | Wilmington College | 205 | 91 to 180 days | \$16 |
| Clinton | Building "Green Machines", training, support, and | Given the challenging economic climate in Wilmington and the region related to DHL's departure, this project would represent a huge positive boost to the local economy and provide benefits to the College, the community, and the state as well. Several STEM partnerships with county schools will be in place to manufacture our "Green Machines". This equipment is used in green spaces project to polish concrete. Polished concrete qualifies for LEED credits. Our intentions are to build the machines, train customers, and sell franchises to clients wanting to start their own small business. We project that we can employ 75 people in assembly, 10 in sales, 10 in personnel and human resources and 5 in training. We have been in business since 1998 | Bump and Grind Concrete Grinding and Polishing | 100 | 91 to 180 days | \$10,000,000 |
| Clinton | Professional wrestling Shows | Wrestling trainers. These trainees would be from economically challenged backgrounds and those who have had some criminal backgrounds. By training them we would be rechanneling their lives into an area where they could utilize physical and mental skills in a positive manner and be recognized for their efforts by working in front of a live crowd. We would each them the necessary skills of particular holds, wrestling persona, microphone communication. We would need to obtain a building for training and shows as we have currently been using my garage for training and this unheated. We have been successful in training some with troubled backgrounds previously. We also will assist with bookings after training has been completed. This would definitely offer an alternative for younger people, male and female, as an alternative to criminal or mischevious activities. We would be available to anyone outside of Clinton County, Ohio. All persons seeking training must be 18 years of age or older or a parent or legal guardian must sign for them. | Ultimate Impact Wrestling | 30 | 0 to 30 days | \$200,000 |
| Clinton | Weatherize Clinton County | Weatherize 10,000 home in Clinton County by scaling up Ohio Home Weatherization Assistance Program--under the administration of the Clinton County Regional Planning Commission--to provide immediate economic stimulus to Clinton County. The total economic impact of the program is projected at \$71,907,659. The program will serve as a pilot for the use of a large scale weatherization program for targeting stimulus to economic distressed areas. To meet this goal, the program will expand upon current HWAP requirements for eligibility to target services specifically towards displaced works and maximize the scope and impact of the program. | Energize Clinton County | 1,300 | 0 to 30 days | \$30,000,000 |
| Clinton | Blanchester Save-A-Lot | This project is underway and will be completed at the end of February, 2009. Blanchester Food, Inc. purchased this empty building in downtown Blanchester, Ohio. Bldg. had previously housed an IGA grocery which was an anchor store in the downtown and closed in November due to general downturn of economic conditions. This project has been embraced by the Blanchester City Government as crucial in maintaining employment for 20 to 25 people and maintaining the downtown business area. This area has been devastated by the DHL closing and any employment provided is critical to the health of the town. Stimulus money will be used to continue improvement of structure and interior upgrades, purchase of additional equipment and inventory and payroll for the new employees. The project will also provide power to an individual house, and or homes. This in turn could develop into an electrical co-op for the areas of Farmers Station and Martinsville, Ohio. | Carl's Market, Inc., dba Blanchester Ohio Save-A-L | 20 | 0 to 30 days | \$400,000 |
| Clinton | Farmers Station (Clelland Rd.) Energy Program | The initial cost to start the project could be \$25,000.00 with the final cost reaching close to \$100,000.00 plus depending on the size and number of solar/windmills needed to supply electricity to individual houses in the area. | Farmers Station Electric Co-op | 7 | 91 to 180 days | \$100,000 |

|----------------|---|---|--|----------------|--------------------|---------------------------|
| Clinton | Ohio Jobs: Wilmington Airpark Regeneration | Cielo Azul Ventures, LLC, composed of leading business and aviation executives, seeks grant funding in the amount of \$45,000,000.00 to capitalize and base a new international long-haul cargo freight airline, with thousands of new, well-paying jobs, at the Wilmington Airpark in Clinton County, Ohio. Impact: Within less than sixty days from funding this investment Clinton County immediately will realize thousands of direct and indirect jobs. Cielo Azul's management team is prepared and actively seeking to enter the cargo sector and has direct, and unequalled expertise to acquire, build, and run a major commercial air activity over the very long term. Longer term opportunities for employment will span flight crew, maintenance, cargo handling, research, security, instruction, and administration. Indirect opportunities will exist in construction, health care, and 'green tech/environmental sciences'-- ALL OHIO-BASED jobs. We are experienced, able, and eager to present this opportunity to the State of Ohio. | Cielo Azul Ventures, LLC | 1200 | 0 to 30 days | \$45,000,000 |
| Clinton | Farmers Road Reconstruction | Reconstruction, widening and resurfacing of roadway to improve safety on 4.298 miles of major collector which provides access east to the Wilmington Airpark. | Clinton County Engineers Office | 20 | 181 days or more | \$340,000 |
| Clinton | Center Road Intersection Improvement | Improvement of Intersection of Center Road with Nelson Avenue to improve sight distance and safety. | Clinton County Engineers Office | 15 | 181 days or more | \$350,000 |
| Clinton | Ogden Road Intersection Improvement | Improvement of the Intersection of Ogden and Halpin Roads to increase sight distance and safety. Recently closed deal with a local food chain to package carryout crackers, funding would be used to purchase additional packaging equipment to increase production capacity. 2-4 jobs will be created/retained. | Clinton County Engineers Office | 15 | 181 days or more | \$200,000 |
| Clinton | Skyline Chili Expansion | Proposal of two parallel and complimentary projects. | Windy Acres Candy & Nut, Inc | 3 | 91 to 180 days | \$150,000 |
| Clinton | Ohio Schools Energy Database | 1) Rapidly create a database of Ohio school's energy consumption profiles and building characteristics to be used as a baseline and screen to assist school districts identify justified energy projects. Capital projects including renewable energy suited for ESCO's or stimulus funding will be quickly identified. 2) Energy training to be conducted for "Energy Leaders" of school districts; state-wide to identify preferred low cost energy conservation measures and to implement project-based STEM curriculum designed to involve students in the measurement of the energy audit. Benefits: - Allows Ohio schools to identify energy projects and track progress - Creates "green" jobs in every Ohio school district by identifying projects for local contractors - Development of the database and curriculum will create 15 good jobs in Wilmington, OH, head led by the - Participation inspires students to pursue STEM careers by using school as "energy lab" | Facility Energy Consultants, LLC | 15 | 31 to 90 days | \$3,400,000 |
| Clinton | Murphy Theatre Renovation | The renovation work, especially related to structural and HVAC work will allow the facility to serve as a community shelter and center during emergencies-- in 2008 alone Clinton County was impacted by a hurricane and major snow storms and has no facility large enough to accommodate these needs. We are working with the architectural firm of McGill Smith Punshon (MSP) and HGC Construction to complete a full assessment of the facility. They include but are not limited to: § Tuck pointing and stabilizing all exterior brick, on the façade, walls and chimneys. Replacing windows as needed. § Replacing all roofing, downspouts and storm water drains, which would include removal and replacement of concrete entrance areas and pads surrounding the theatre. § Restoration of all interior fixtures, decorative plaster, lighting, plumbing, electrical and seating aspects of the theater, and tenant areas. § Reevaluation and installation of complete new high efficiency HVAC system. § Upgrading of all stage fixtures, apparatus, lighting and sound components to current state of | Murphy Theatre | 25 | 31 to 90 days | \$5,500,000 |
| Clinton | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDI's mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, Individual Development Accounts (IDAs), microloans, technical assistance, and access to retail markets. As the only U.S. Small Business Administration microlender and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI's Microenterprise Loan Fund fills a gap in the credit industry by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDI is able to serve unbankable populations, including low-income individuals, those with little or no credit, or those precluded from paying interest because of religious beliefs | Economic and Community Development Institute | 20 | 31 to 90 days | \$150,000 |
| Clinton | Blanchester Electric Distribution System Upgrades | The Blanchester Electric Distribution System Upgrades Project involves upgrades to the existing electric distribution system that are required for the village to continue to be able to serve existing customers. | Village of Blanchester | 250 | 91 to 180 days | \$1,000,000 |
| Clinton | Blanchester WTP Improvements Project | The Blanchester WTP Improvements Project involves improvements to the existing water treatment plant to address capacity issues and the disinfection-by-products rule. | Village of Blanchester | 250 | 91 to 180 days | \$1,000,000 |
| Clinton | Blanchester Phase 1 Sewer Improvements | The Blanchester Phase 1 Sewer Improvements Project involves improvements to the village's existing sewer system. The improvements are required to adequately serve existing customers and potential growth. | Village of Blanchester | 250 | 91 to 180 days | \$1,000,000 |
| Clinton | Blanchester Phase 11 WWTP Improvements | The Blanchester Phase 11 WWTP Improvements Project involves improvements to the village's existing wastewater treatment plant to allow the village to meet EPA requirements. | Village of Blanchester | 250 | 91 to 180 days | \$1,000,000 |

| Clinton | Building Boiler Upgrades | This project will update old inadequate boilers and HVAC controls in our school system. 8 Boilers and controls in our three elementary buildings will be replaced with high efficiency to reduce energy and operation costs. This will put HVAC personnel, electricians, pipe fitters, engineers, and architects to work on a year project and greatly reduce energy consumptions in our District | Wilmington City Schools | 0 | 91 to 180 days | \$1,500,000 |
| Clinton | Improve T/W Safety Area, Drainage Improvements | Improve Taxiway Safety Area, Improve Drainage | Clinton Field | 10 | 31 to 90 days | \$375,000 |
| Clinton | Medical Information Exchange for Electronic Health | Creation and Implementation of a Statewide Medical Information Exchange Network to facilitate secure, online transfer of electronic records between physicians, labs, hospitals, care providers, pharmacies and insurance companies for faster and cheaper medical processing cost. The proposed network and system will work in accordance with the specifications outlined in the American Recovery & Reinvestment Act 2009 to deliver long term cost savings to all parties involved in the Health Care industry. We propose to create approximately 300 Hi-Tech Ohio jobs across several employment levels, including document scanning technicians, computer programmers, web designers, network engineers, IT and call center support, sales, marketing and network administration staff. We are open to locating our offices in hard hit Ohio counties and localities (e.g. WILMINGTON, OHIO) to boost employment in these areas. | MedAseek, Inc. | 300 | 31 to 90 days | \$2,500,000 |
| Clinton | Commercialization of affordable downwind turbine | We will use technology previously tested by The Wind Turbine Company, which is an innovative 2 blade downwind design. The design is 30% lighter than traditional designs and therefore lower cost. The tower is a simpler construction and installation logistics more straightforward. Previous testing was government funded and ran at the national wind turbine test facility. We will engineer for manufacturing, build prototypes and develop production capability. We plan to do this at the DRI facility in Wilmington, and hire displaced workers. Also Duke Energy are familiar with this project, and have the installation and hook up to grid. | Micropower LLC/ G&C Engineering Consultants | 500 | 0 to 30 days | \$15,000,000 |
| Clinton | MonoMobile Demonstration Track | Micropower projections are 20 initially, ramping up to 500 in year 4 technology. This is an electric car that travels to local destinations like a regular automobile, but then attaches to a track for long-distance trips. While drivers relax, work or even sleep, the vehicle is automatically guided along the track to its destination and the batteries are recharged. IT SOLVES THE BATTERY PROBLEM FOR ELECTRIC CARS. It is 300% more fuel efficient than automobiles, is complete free from oil and would reduce global warming gases by 70%. There is more information available at www.monomobile.com. This project has the enthusiastic support of the Mayor of Wilmington, the Clinton County Commissioners and several Congressmen. The partners that are participating include the US Air Force Institute of Technology at Wright-Patterson AFB, Wright State University and the National Composite Center. There are also a number of companies in the Wilmington, Dayton and Cincinnati area that are participating | MonoMobile Corporation | 100 | 31 to 90 days | 2.8 million |
| Clinton | Wastewater Pump Station Renovations | The Village has 4 wastewater system pump stations which are required to convey wastewater to the WWTP. Two(2) of the 4 were renovated during the previous 5 years. The remaining two(2) 10 HP pump stations have reached the end of their useful life & must be renovated. The Village does not have the funds to successfully complete this project. Failure of these pump stations can result in flooded basements & discharges to a tributary to the Little Miami River, with potential OEPA enforcement action. Installation of emergency generators/Pumps will also increase reliability. The pump stations are located @ Circle Dr & Linkhart St. I am a small business owner with 3 employees. I employ 4 workers. My convenience store is in critical need of a new store front (windows and doors). I do not have the funds to replace the very old doors and windows on the building and am waisting a great deal of energy. My current electric bill for heat and air is putting a huge dent in profits, hence job security for my employees. I would appreciate any help I could receive to replace these I have a small business in Blanchester. I have a bank loan on the real-estate. The parking lot is becoming a hazard and there is a major drainage problem. I'm looking to get my drainage issue solved and the lot re-paved, along with new energy efficient doors and front glass. This will save a lot of energy in the long run. | Village of New Vienna | 5 | 31 to 90 days | \$350,000 |
| Clinton | energy upgrade | I have a small business in Blanchester. I have a bank loan on the real-estate. The parking lot is becoming a hazard and there is a major drainage problem. I'm looking to get my drainage issue solved and the lot re-paved, along with new energy efficient doors and front glass. This will save a lot of energy in the long run. | convenience store | 3 | 0 to 30 days | \$15,000 |
| Clinton | Major State Route Intersection | I have a small business in Blanchester. I have a bank loan on the real-estate. The parking lot is becoming a hazard and there is a major drainage problem. I'm looking to get my drainage issue solved and the lot re-paved, along with new energy efficient doors and front glass. This will save a lot of energy in the long run. | convenience store | 5 | 0 to 30 days | \$50,000 |
| Clinton | Steps to Success College Readiness Education Centre | The steps to success college readiness education center is a project that has grown out of the effort of a local church and their outreach to the community to help prepare children ages K-12 for college readiness in communities where the percentage of children attending college has been historically low. The program has been well supported by the community through a local non-profit organization and has been successful in supporting children through their educational challenges and on to college. | City of Wilmington, Ohio | 22 | 91 to 180 days | \$1,200,000 |
| Clinton | Life Science Bio-Tech Incubator near Wilmington Co | This project is the reconstruction of an older building, Kettering Hall, that is currently located on the campus of Wilmington College. If funded, the City would acquire the property to create a Life Science Bio-Tech incubator. The building would be certified at the Silver LEED Certification level. The building would contain 14 new life science laboratories (32,000 s.f.), four greenhouses, and a renovation of existing construction of 34,100 s.f. for office space, conference rooms and other business incubator amenities. The City would use one of the local COCs to manage the property. | City of Wilmington | 198 | 91 to 180 days | \$15,000,000 |
| Clinton | Urban Paving Project - Main, Locust curb and gutter | This project will repair two of our most used streets in the City. In addition to the semi-truck traffic on these two streets, the City also experiences 800-1200 stone trucks per day travelling through town from the stone quarries to the east to the interstate (I-71). One fully loaded stone truck places as much stress on pavement as 9600 cars or the equivalent of 7.5 million cars per day on Wilmington streets. * 80,000 lb max legal load, AASHTO statistic | City of Wilmington | 20 | 91 to 180 days | \$3,399,558 |
| Clinton | Green infrastructure - Energy efficiency improve | The City has recently completed a study with Honeywell Corporation detailing many ways in which energy savings can be achieved. The study indicated a guaranteed savings at today's rates of approximately \$100,000 per year, making the payback period a little over ten years. The City would like to implement this program to make the city building and other city facilities highly energy efficient. | City of Wilmington | 21 | 31 to 90 days | \$884,931 |
| Clinton | Green infrastructure - Methane to Electricity proj | The City has been working with an engineering firm to develop a strategy for using methane gas generated by the City's landfill to generate electricity both for City use and to sell back to the local power company. The City is one of the few in the State of its size to own a landfill and the methane gas generating capacity of the landfill is now ready for use to generate electricity. | City of Wilmington | 6 | 91 to 180 days | \$222,750 |
| Clinton | Curb, gutter S.R. 68 & Kentucky Ave (incl'g paving | This paving project would improve another of the City's most heavily used streets by car and truck traffic, S.R. 68. The project would be for long-overdue curb and gutter replacement on S.R. 68 and additionally paving on Kentucky Ave. | City of Wilmington | 22 | 91 to 180 days | \$880,119 |
| Clinton | Nelson Avenue curb, gutter, storm system, and pavi | Nelson Avenue is a connector secondary street but it is one of the most used by heavy vehicle because our City Schools bus depot and our City landfill entrance are located on this street. This project would include paving, curb and gutter, and the installation of an improved stormwater collection and drainage system for this street. | City of Wilmington | 12 | 91 to 180 days | \$1,369,183 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Clinton | Green infrastructure - HWAP weatherization program | research and created a plan for creating "green collar" jobs in Clinton County. They have proposed to local governments that a tremendous number of jobs would be created if an HWAP weatherization program could be extended to the maximum number of households that are eligible. Using an income eligibility guideline of 200% of poverty, we estimate that there are approximately 1600 homes or units that could be weatherized in Clinton County, Ohio. Ramping up HWAP in our county would help to provide the economic stimulus as well as energy savings to help our most impoverished citizens. | City of Wilmington, Ohio | 416 | 181 days or more | \$8,000,000 |
| Clinton | Green infrastructure - Sugartree Street Corridor P | The Sugartree Corridor Project is intended to revitalize a corridor that connects Wilmington College to downtown Wilmington. The project includes a pedestrian/bike trail to connect the college to the downtown and points beyond via Douglas Street, Sugartree street, and to the city trail system. It will also restore a stream area that runs to the south of Sugartree to make this area an attraction for adjacent businesses, e.g. a local riverwalk. The entertainment and other establishments on Sugartree could use the restored corridor as a focal point (decks overlooking the area, a pedestrian access area rather than the neglected and unattractive area that it is now. A conceptual plan for the corridor has already been created by a professional design & planning firm. Goal: To get your medical history and decisions in the hands of the physician treating you...anytime anywhere. Why? It takes the mystery out of diagnoses and treatment decisions speeding treatment, preventing redundant tests, and preventing medical errors, the 8th largest killer in the USA. Who should enroll? Anyone. With active, working lives of families, knowing that when medical emergencies arise you can have peace of mind for your children, yourself, your spouse, your parents and siblings. How it works: MedUPS stores your provided medical information in a secure facility that is staffed 24/7. Medical information is available to the physician treating you 24/7, anytime and anywhere in the world. Forms are standard for adults and for children/teens so once a physician has seen them, they know where to look for the answers they seek. Physician and staff: The more you know, the better your care and the less chance of medical error. | City of Wilmington, Ohio | 20 | 181 days or more | \$598,500 |
| Clinton | Patient Information Available to Physicians Treati | Why? It takes the mystery out of diagnoses and treatment decisions speeding treatment, preventing redundant tests, and preventing medical errors, the 8th largest killer in the USA. Who should enroll? Anyone. With active, working lives of families, knowing that when medical emergencies arise you can have peace of mind for your children, yourself, your spouse, your parents and siblings. How it works: MedUPS stores your provided medical information in a secure facility that is staffed 24/7. Medical information is available to the physician treating you 24/7, anytime and anywhere in the world. Forms are standard for adults and for children/teens so once a physician has seen them, they know where to look for the answers they seek. Physician and staff: The more you know, the better your care and the less chance of medical error. | Medical Urgency Preparation Service Ip | 47 | 0 to 30 days | \$500,000 |
| Clinton | Construction of a public recreation/wellness cente | This project is the construction of a public recreation/wellness facility or possibly the reconstruction of an existing building in the City of Wilmington. The area has long needed a new public recreation facility that would include space available for lease for medical rehabilitation. Such a facility is needed in a rural area such as ours and would also serve not only Clinton neighboring counties. | City of Wilmington | 45 | 181 days or more | \$3,750,000 |
| Clinton | Police range site development and shelter construc | Police range site development and shelter construction. The City of Wilmington Police Department needs to move its range from its current location. This will necessitate the developing a new range including a shelter house for storage of some equipment and for protection of officers in inclement weather. The City has a site available but the site needs development. | City of Wilmington | 10 | 91 to 180 days | \$37,500 |
| Clinton | Water distribution system improvement - Wilmington | Water distribution system improvement. The City waterline to and through the Wilmington Airpark is in need of improvement. This is one of two important water distribution improvement projects for the City of Wilmington. | City of Wilmington | 15 | 181 days or more | \$1,708,155 |
| Clinton | Water distribution system improvement - older sect | Water distribution system improvement. The City waterlines in some of the older sections of the City are in need of improvement. This is one of two important water distribution improvement projects for the City of Wilmington. | City of Wilmington | 30 | 181 days or more | \$1,504,506 |
| Clinton | Feasibility Study for Reuse of the Wilmington Airp | This is a feasibility study regarding reuses of the Wilmington Airpark. The Economic Task Force for the DHL Hub at the Wilmington Airpark has completed an RFI (Request for Information) process and have received several excellent submissions. A feasibility study would be the next step toward redevelopment. A subsidiary of DHL currently owns the facility | City of Wilmington, Ohio | 5 | 91 to 180 days | \$500,000 |
| Clinton | Water line and trail development between Wilmingto | Waterline project and associated trail/service road for a waterline between the City of Wilmington water treatment facility and the Village of Sabina. | City of Wilmington | 25 | 181 days or more | \$4,000,000 |
| Clinton | Water line development between Wilmington and New | Water line project between the City of Wilmington and the Village of New Vienna. | City of Wilmington | 15 | 181 days or more | \$3,500,000 |
| Clinton | Sanitary sewer and stormwater improvement - S.R. 7 | This project is a sanitary sewer and stormwater collection system improvement to the line in the vicinity of the S.R. 73 lift station (east) and to the lift station | City of Wilmington | 20 | 91 to 180 days | \$465,750 |
| Clinton | Roof repair on Fire Station #2, Rombach Ave. | The life of the roof on Fire Station #2 is over and it is leaking badly. It needs to be replaced | City of Wilmington | 39 | 31 to 90 days | \$93,750 |
| Clinton | City Comprehensive Land Use Planning Study | The City would like to complete an update of its comprehensive land use plan. This plan will further land use planning for the City of Wilmington, including industrial and commercial development | City of Wilmington | 1 | 91 to 180 days | \$85,000 |
| Clinton | Prairie Avenue curb, gutter, sidewalk | This is a curb, gutter and sidewalk installation project for Prairie Avenue. Prairie Avenue is an important connector street between several residential neighborhoods and a commercial area. This project replaces or repairs all of the sidewalks, curb and gutter in the H-1 zone, the City's Historic Commercial district. This project will require engineering of certain sections of the sidewalk prior to replacement due to underground infrastructure. | City of Wilmington | 8 | 91 to 180 days | \$136,867 |
| Clinton | Downtown Historic District curb, gutter, and sidew | This project will require engineering of certain sections of the sidewalk prior to replacement due to underground infrastructure. | City of Wilmington | 15 | 181 days or more | \$1,179,375 |
| Clinton | Rail spur development at the Wilmington Air park - | Rail spur development to connect the CSX line to the north of the Wilmington Air park with the Air park property making the Air park intermodal. | City of Wilmington | 50 | 181 days or more | \$6,000,000 |
| Clinton | Green infrastructure - Completion of Citywide Trai | The City has been working for several years to establish a circular trail system around the City so that all neighborhoods can be connected into a "circle freeway" for alternative transportation. The City has 4 miles of paved trails now and another 10 miles will complete the circle. Spurs would connect to Southern State Community College and the Wilmington Air park property. Many people who work at Wilmington College and the Air park travel by foot or bicycle. Trails create economic activity and also add value to nearby real properties (see several studies at www.americantrails.org). Trails, like road, create economic value, jobs and economic activity indirectly rather than directly. The completion of this Citywide trail system would connect key community properties and commercial areas with all residential neighborhoods. 1) 1,312 lineal feet of 8" water line 2) new flow metering manhole, concrete pad and oxidation ditch 3) clarifier equipment at the Wastewater Treatment Plant 4) sanitary sewer point repairs, lining and replacement 5) sanitary manhole rehabilitation | City of Wilmington | 15 | 181 days or more | \$2,625,000 |
| Clinton | North Howard Street Waterline, School Pump Station | Installation of a sidewalk extending from Holmes Elementary School on the west along Truesdell St. to the intersection with Randolph St. Requires a pedestrian bridge. Will connect three neighborhoods to an elementary school by means of a sidewalk thus enabling children in adjacent neighborhoods to walk to school. | URS Corporation | 10 | 91 to 180 days | \$855,000 |
| Clinton | Sidewalk construction to Highland Addition, to Tim | Installation of a sidewalk extending from Holmes Elementary School on the west along Truesdell St. to the intersection with Randolph St. Requires a pedestrian bridge. Will connect three neighborhoods to an elementary school by means of a sidewalk thus enabling children in adjacent neighborhoods to walk to school. | City of Wilmington | 10 | 181 days or more | \$75,000 |
| Clinton | Port Clinton Java | Blanchester/Wilmington/Clinton Co., Ohio. "Port City Java" is a Wilmington, NC based coffee/restaurant. If the establishment of a franchise is not possible, we have the skills (though not the finances, due to current economic conditions) necessary to build and operate a successful, community oriented cafe. Beginning a new franchise from the ground up will cost \$210,315 - \$413,920. This includes all construction, equipment, furniture, training expenses, startup funds, etc. If we must open a single location, non franchise, the startup costs may be slightly greater, but so will the contribution into the local economy. Depending on the funding, total space should be 1500-2000 sq ft, with appropriate local contractors and furnishers employed (depending upon lease/build P's). With one location, store employment will be 5 full time (1 general manager, 2 asst gm, 2 full time non-exempt), 6 regular part time and 4 seasonal part time, for a total of 15 jobs. Due to the 2008-9 closing of ABX hub & cutbacks at Showa (a major Honda supplier), this venture would be very apprici | Port City Java | 12 | 31 to 90 days | \$400,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Clinton | Semi-Truck Repair Shop for diesel engines | To open a Semi Truck Repair Shop to repair and maintain semi trucks. In the area, there is not currently any where to take a truck for repair other than the truck stops which are several miles away. This would create several jobs, office manager, 2-3 mechanics and janitorial position. In the future, would like to get a wrecker to bring the trucks to the shop and possible having a car wash to wash the semi trucks, which would create 3-4 more jobs. We have had a trucking business for over 5 years, we are familiar with the needs of such a business opportunity. | Fralely Trucking LLC | 6 | 31 to 90 days | \$400,000 |
| Clinton | Open Hands Consignment & Clothing Shop | A non-profit store modeled on Goodwill that will sell gently used, donated clothing and housewares and serve as a consignment shop for local artists and crafters. | The Wilmington United Methodist Church | 6 | 0 to 30 days | \$6,000 |
| Clinton | Upgrade Property | Rewire and replumb property to meet State codes for an extended-stay license. Upgrade property with kitchenettes, replace 8 rooms with permanent structure, replace roof where necessary, add laundry facilities for general public, improve septic system as needed. | The West Inn | 0 | 0 to 30 days | \$250,000 |
| Clinton | Open Hands Latchkey Care | With the closing of DHL and the Wilmington Air Park, people in Wilmington must leave the county to find work in surrounding areas. But they can't sell their homes so they have to continue living here. Having to leave early in the morning and commute to a job outside the county and then commute back in the evening means that there is a critical need for child care. | Wilmington United Methodist Church | 12 | 31 to 90 days | \$30,000 |
| Clinton | Open New Business | Open Hands Latchkey Care will provide before and after school supervised, safe sanctuary care, as well as tutoring and structured recreation for children in grades 1-6. | All Things Natural | 10 | 31 to 90 days | \$250,000 |
| Clinton | Improvements to personal property | We expect employ one part time manager and eleven part time child supervisors. | Bill Bahl Home Repair | 3 | 91 to 180 days | \$80,000 |
| Clinton | retraining - LPN schooling at laurel osks in wilm | I am a Reiki II practitioner who would like to open a new center for natural healing practitioners. would like to have a wide range of healing offers to the public. All natural and organic products, teach Reiki and practice Reiki and other natural healing. I would need money for building and expenses for a year to get it off the ground. | self | 1 | 31 to 90 days | \$10,000 |
| Clinton | Necessary Home Improvements | update current home to make it energy efficient and improve value was layed off from long term job in december 08 need to go to nursing school to get a secure employment to support self and two children and get off unemployment. county is out of funding for retraining. | Matthew G. and Laura A. Arledge | 5 | 0 to 30 days | \$50,000 |
| Clinton | Nelson Rd Sewer | state, and country. I was employed by CitiGroup until terminated on February 9, 2009. My husband and I struggle to pay our bills; we do not spend unwisely and manage our finances to the best of our ability. My job loss puts us in a position where we may have to default on revolving debts and installment loans. We are also expecting the delivery of our first child on Thursday, March 5, 2009. We were able to refinance our home and our monthly payment. Declining property values in Wilmington, Ohio, prevented us from getting the extra money we needed to payoff an existing home equity loan. We are asking for \$50,000 to pay off this loan balance and provide additional money for home improvements. Specific improvements include insulating our basement, planting trees on our property, and building retaining walls to prevent soil erosion. We would employ 1 local business and 2 local individuals to complete these improvements. These improvements would decrease our monthly debt by helping to increase energy efficiency and stimulate the local economy. | Dixon Development Company LLC | 80 | 91 to 180 days | \$80,000 |
| Clinton | Integrated Green Technologies | This project would construct 1,200 feet of new sewer line to update an existing commercial property and bring the adjacent private access road to City standards for dedication. This property was annexed from Clinton county to the City of Wilmington to obtain sewer access and retire current sewer system. The facility currently houses offices for the Clinton Memorial Hospital (CHM), and several unrelated companies engaged in light manufacturing and warehousing. Due to the layout of the facility, and unique aspects of the sewer tie in, the cost is significant. Due to the economic issues surrounding Wilmington and the issues surrounding the possible private ownership of CHM, this infrastructure update would enhance continuity of tenancy and increase private development potential for adjacent land. The highly leverage nature of this facility and the current local economic conditions and forecast make private funding nearly impossible at this time. Thank You for your consideration. | Integrated Green Technologies | 85 | 0 to 30 days | \$25,000,000 |
| Clinton | BabyLand | This project is shovel ready, meaning we have already invested \$1.5MM over 6 years. The dollars we are requesting will vary greatly depending on the package put together. We propose to rehab an existing building into a LEED structure. We will recycle plastic, including grocery bags, to create a high quality, marketable recycled resin. We will also use that resin to manufacture reusable plastic pallets with proprietary value-added features and a pricing plan that yields tremendous ROI. We will leave a near-zero carbon footprint, co-generate power, reduce landfill waste stream, and create jobs and tax revenues. After 2 years of operation, we will venture into our next 2 industrial products using the same Lean, energy and environmentally conscious technologies, and expand our workforce to about 200. This will be the flagship plant for our expansion nationwide. We are currently negotiating with Oklahoma and Washington state with a great deal of interest. However, with the corporate headquarters in Cincinnati, we would rather keep the business in Ohio. | BabyLand | 50 | 0 to 30 days | \$925,000 |
| Clinton | Children's Recreation Center | 24,000 (estimated) square foot indoor and outdoor learning and hands on activity center for children. Improve the lives of clinton county children by providing a safe and positive environment that fosters creativity, safety and fitness through free play, stranger and fire safety courses, craft activities, gardening, nutrition and fitness classes for babies, toddlers and the young child. | Children's Recreation Center | 25 | 0 to 30 days | \$231,250 |
| Clinton | Radio Shop | 7,000 (estimated) square foot indoor and outdoor learning and hands on activity center for children. Improve the lives of children in Clinton County through classes and free play. This will provide a safe place for children to play and be entertained. Courses will focus on education and safety issues such as cooking classes for healthy eating, fire and stranger skills, life skills, fitness, and cooperation. | | 10 | 0 to 30 days | \$20,000 |
| Clinton | Health Food Restaurant | I am an employee at ABX currently, and I know that I am at risk of being laid off from work at any time. I've been working at ABX for about 9 years. When I am laid off I am very interested in starting radio shop, but don't have the start up money to do so. If I could secure funds I would open a radio shop up and sell and repair all types of radios. I currently hold a ham radio license and am familiar with the way radios work. I am also able to repair them and teach others how to use them. This will help clinton county by providing jobs, as well as improving the lives of hams out there in the county and local surrounding areas. Lastly it will help my family because I haven't been able to find a replacement job in this area because work is extremely hard to find. I enjoy working and am devastated by the ABX situation, that is well known in the news. I do have hope for Wilmington's future because of the possibilities for small family businesses. I believe that America needs more small family businesses! Thank you for your consideration. | Health Food Restaurant | 50 | 0 to 30 days | \$800,000 |

|----------------|--|---|-------------------------------------|----------------|--------------------|---------------------------|
| Clinton | After Hours Childcare | A low-income childcare home-based center that will address the needs of employees who can only find employment in the evening hours and/or weekend hours. The childcare center will be provided at a cost that is mandated by 4 C (§2.25 hour per child). This will provide the needed low cost childcare needs that the community has. Many childcare facilities exist, but still there are waiting lists and not all the children that need care are able to have it currently. I am a student at Southern state community college and my spouse works at ABX airport in which he expects to be laid off at any time. I am a stay at home mom of a 2 year old girl and a full time college student with a whole year left of school before I finish my degree in business. Our family lives paycheck to paycheck, and there are no jobs in this area. I've applied to 30 jobs, and none are hiring, but I keep applying and hoping...but no luck yet. I got the idea to start a home based childcare center from 4 C's information. They are sponsored through american red cross and my spouse and I have started the process to become childcare providers. All we need is the start up money for childcare supplies. | After Hours Childcare | 5 | 0 to 30 days | \$6,000 |
| Clinton | Community Bridges | 7 unit emergency housing / homeless housing unit/ low income housing. We are a non-profit organization that assists the community affected by ABX, and surrounding areas. We offer services such as free employment childcare, diapers and toiletries, food, etc. We do not currently offer housing, but would like to expand to offer emergency shelter, low income shelter, etc. Our goal is to bridge the gap between a persons needs and what they actually receive from social services, etc. Example: A low income mother who is on food stamps, can't afford diapers for her newborn. We provide diapers for her if she requests them from our non-profit organization. | Community Bridges | 20 | 0 to 30 days | \$140,000 |
| Clinton | Community Bridges | 7 unit emergency housing / homeless housing unit/ low income housing. | Clinton | CU Capitalized Maintenance; PID 86118 | 2009 Capitalized Maintenance. This is a rural transit project whose funding is through ODOT. The Sugar Tree Street Corridor project is intended to revitalize a corridor that connects Wilmington College to downtown Wilmington (approximately 1.2 mile). The project includes a pedestrian/bike trail to connect the college to the downtown and points beyond via Douglas Street, Grant and Sugar Tree Streets. | Ohio Department of Transportation | 4 | 0 to 30 days | \$161,892 |
| Clinton | Sugartree Street Corridor Project | Funding requested to provide working opportunities to install energy efficiency upgrades to overnight cottages and lodge rooms at State Parks in southwestern Ohio. Funding would address needs at Cowan Lake, Huston Woods, Shawnee, and other State Parks. Energy efficiency projects would include installation of energy efficient windows, doors, water heaters, lighting, natural lighting, insulation, roofing and HVAC. This project is for water, sewer, roadway, high-speed communications and improved railroad crossing infrastructure for a "Job Ready Site" on S.R. 68 South, Wilmington, OH. The City has developed a detailed conceptual plan for a research & technology research center on this 50+ acre property. The site was submitted in 2007 for as a Job Ready Site. The City has identified all of the ash trees in the City's right-of-way areas and on other City property that should be removed pursuant to best practices for managing the Emerald Ash Borer infestation in Ohio. The approximate cost of removal and replanting is \$50,000. | City of Wilmington | 20 | 181 days or more | \$598,500 |
| Clinton | Ohio State Parks Cottage Winterization Program | building storage and livestock barns; perimeter fencing; livestock pasture fencing; water conservation mechanics; refrigerator truck for transporting produce to farmer's market; hiring four helpers during the season; two year round upgrade tractor; seed & fertilizer for 2009; | ODNR - Parks & Recreation | 200 | 31 to 90 days | \$4,500,000 |
| Clinton | Research & Technology Center - infrastructure for | Installation of Wind turbines on small farm to provide/supplement energy source (currently all electric). Additionally, the installation of solar collectors for building heating. | City of Wilmington | 30 | 181 days or more | \$2,812,500 |
| Clinton | Green project - Ash tree removal due to EAB and re | THE WASTEWATER TREATMENT PLANT FLOW EQUALIZATION BASIN FACILITY PROJECT IS THE FIRST OF SEVERAL PHASES OF IMPROVEMENTS NEEDED TO ADDRESS EXISTING INADEQUACIES IN THE WASTEWATER CONVEYANCE AND TREATMENT SYSTEM SERVING THE VILLAGE OF BLANCHESTER. THE PHASE 1 PROJECT PROVIDES ADDITIONAL PUMPING CAPACITY TO DELIVER THE WET WEATHER WASTEWATER FLOW TO THE WASTEWATER TREATMENT PLANT AND A FLOW EQUALIZATION BASIN interested in owning and operating a new Subway franchise. A great location is already chosen. Franchises are 85% successful! | City of Wilmington | 5 | 91 to 180 days | \$37,500 |
| Clinton | Bethel Ln Farm Modernization | Subway has healthier food than most other fast food restaurants. It helps people on the road have a healthy viable option. The location of this Subway will be off of a highway with an exit sign for convenience, as well as suit the needs of location where a restaurant is very much needed in our chosen location. There are only 2 gas stations here, and about 7 miles away from any other restaurant. It is an excellent location for a Subway. | Bethel Ln Farms | 6 | 31 to 90 days | \$200,000 |
| Clinton | Capturing and Using Wind Energy | Water Distribution upgrade. This project will replace 23,685 linear feet of 4-inch cast iron water main that was installed sometime in the early 1900s with 23,685 linear feet of new 8-inch water main. Also, 100 fire hydrants and 95 valves and valve boxes, and approximately 500 service taps to existing customers. This project is needed because of the age and deterioration of the water main and to improve the water quality and fire protection in this area. | Bethel Ln Farms | 4 | 31 to 90 days | \$85,000 |
| Clinton | WASTEWATER TREATMENT PLANT PUMP STATION AND FLOW E | Water distribution system improvement. 22,000 linear feet of new 8-inch and 17,400 linear feet of new 12-inch waterline to replace deteriorated cast iron water main to and in the Wilmington Airport. Also, 125 fire hydrants and 90 valves and valve boxes. The waterline to and through the Wilmington Airport is in need of improvement. This is one of two important water distribution improvement projects for the City of Wilmington. | VILLAGE OF BLANCHESTER | 65 | 0 to 30 days | \$1,759,717 |
| Clinton | Subway | This project would complete our District's roofing plan. The scope to complete the project are as follows: 1. Replace the remainder of the Shingle Roofs at Roger O. Borna Middle School (Cym Roof was completed last summer) - \$220,000. 2. Holmes Elementary - replace the remaining large roof area - \$320,000. 3. Denver Elementary - replace the remaining roof areas - \$345,000. Total project cost - \$ 885,000 | Subway | 20 | 0 to 30 days | \$220,000 |
| Clinton | Water distribution system improvement - older sect | | City of Wilmington Water Department | 30 | 181 days or more | \$1,504,506 |
| Clinton | Water distribution system improvement - Wilmington | | City of Wilmington Water Department | 15 | 181 days or more | \$1,708,155 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Clinton | Water Main Replacement | Replacement of entire water mains and service saddles that are in very bad condition, and installation of more fire hydrants. Approximately 3.5 miles of water mains that was installed in the early 1950's. We are losing approximately half of the water that we are being billed for and are only collecting just enough to cover a portion of the bill. We need this so we can get our Village back to where we can make money for future projects and to keep from going further in debt | Village of Clarksville | 6 | 91 to 180 days | \$600,000 |
| Clinton | Updates and Renovations | Insulation for small business, ceiling repairs, update bathroom facilities, update and correct flooring issues. Construct an outdoor patio addition with the possible addition of a small storage facility adjacent to the existing building. Upgrade and purchase some new kitchen and cooking appliances. Update entry doors to be more accessible for handicap and wheelchair. This will create jobs for those working on the projects and possible add 3 to 6 more positions for the added growth of the business. We currently attract customers primarily from Clinton and Warren County but would like to offer more options that would bring people from other counties. Examples are, corn hole tournaments, dart tournaments, car and bike shows and many more thoughts and ideas. Clinton County and Clarksville could really use a place to go to eat and just plain have fun. This is a fairly new adventure for me, I just got the business loan in September and have had a ton of support. The better I can make the business the better for all of the community. | Friends Backyard Grill | 10 | 0 to 30 days | \$60,000 |
| Clinton | Replacement windows & doors | Replacement of 75 windows and 3 doors in a historic hote | General Denver Hotel | 6 | 31 to 90 days | \$350,000 |
| Clinton | Phase 3 Sewer Main Construction | The project involves sewer main improvements in the Village of Blanchester | Blanchester Village | 0 | 91 to 180 days | \$3,284,000 |
| Clinton | Wastewater Treatment Plant Design | The project involves the design of wastewater treatment plant improvements | Blanchester Village | 0 | 31 to 90 days | \$400,000 |
| Clinton | Water Treatment Plant Planning | The project involves the completion of a water master plan for the Blanchester Water System | Blanchester Village | 0 | 0 to 30 days | \$84,980 |
| Clinton | Water Treatment Plant Design | The project involves the design of a new water treatment plant | Blanchester Village | 0 | 31 to 90 days | \$400,000 |
| Clinton | Phase 2 Water Main Improvements | The Blanchester Downtown Water Main Replacement PH 2 Project involves the replacement of 900 LF of water main on SR 123, 1,150 LF of water main on SR 28, 1,900 LF of water main on SR 139, 1,050 LF of water main on Middleboro Road, and 700 LF of water main on Main Street | Blanchester Village | 0 | 31 to 90 days | \$318,088 |
| Clinton | Phase 1 Water Main Improvements | The Blanchester Downtown Water Main Replacement PH 1 Project involves the replacement of the existing 4" water main on Main Street (SR 28) and the existing 8" water main on Midway Street | Blanchester Village | 0 | 31 to 90 days | \$378,401 |
| Clinton | Expansion project 131 | We would restructure our company so that we could improve and expand our current operations. We would update our outdated equipment and warehousing facilities. We would build more office space. The restructuring would keep the jobs of our 15 employees and give us the opportunity to add at least 15 more. We would add positions in all departments including customer service, sales, and operations. The 15 additional jobs created would be fulltime and it would also create | Elite Moving & Storage | 30 | 31 to 90 days | \$109,000 |

| Clinton | Hopewell JOG | is to help young people, particularly those who have significant challenges to success, earn a high school diploma or GED and provide work-based learning experiences that will lead to a career with advancement opportunities or to enroll in a post-secondary institution that leads to a credential or degree resulting in an opportunity to pursue a rewarding career. Our programs are a collaboration of JOG programming with local WIA's, school systems, community colleges and business and industry. We are affiliated with a national organization Jobs for America's Graduates. They provide access to curriculum and a data management system. The primary focus of the curriculum is employability. We would like to be able sustain our program in Clinton County which has been hit extremely hard with the closing of DHL. Other counties served include Highland and Fayette. Our at-risk students are in desperate need of additional resources to help them become employable in a very distressed | Hopewell Jobs for Ohio's Graduates (JOG) | 3 | 0 to 30 days | \$50,000 |
| Clinton | Kensington Park - Renewable Energy Farm | Rocky Fork Lake, we could also immediately transmute the project into a alternative, clean and renewable energy project, encompassing wind and solar energy. With excellent wind conditions, our 120 acres would be ideal for a wind turbine farm, with 4 or more 1.5 MW turbines. We could also place solar panels, either instead of, or in addition to the turbines. This would provide a clean and renewable energy source, as well as a massive economic profit center for Clinton County and Clarksville. We would provide quite a few high paying jobs for the local residents. Both jobs and economic influx are much needed in this area, which as recently been devastated by the closing of DHL. With roads already in place, we are ready to turn dirt on this, pending a feasibility study, which could be done very quickly. We are very excited about an opportunity to bring the FIRST clean, renewable alternative energy farm to the Clinton county area. Thank you in advance for your kind consideration. | Kensington Financial Group | 30 | 0 to 30 days | \$25,000,000 |
| Clinton | Fire Station Renovation | SRWWW JUNT fire district 2 desires to renovate current station. The building was designed for a second floor. The steel floor is already in place to add either a concrete or wood floor. Cost efficiency by adding to and making energy efficient modifications to our current station is far more economically sound than building an entire new station. The area is 45' by 75'. All first floor walls are load bearing walls. The area would be utilized by area fire and EMS personnel for fire and EMS training. An | SRWW Joint Fire District 2 | 30 | 0 to 30 days | \$200,000 |
| Clinton | Renovation Of Alumni Field | Our Athletic Facility was built during the Great Depression and is no longer safe for students or community concrete is crumbling in the stands and no part of the stadium is handicap accessible. Because of the DHL pull out the District and community has no way to pay for the repairs. This project would satisfy an important need as well as create jobs in a devastated area | Wilmington City Schools | 300 | 181 days or more | \$3,683,700 |
| Clinton | Blanchester Parks and Recreation concession stand | We are trying to fund a new concession stand and handicap accessible restroom facility. Our existing facilities are not ADA compliant, and is also more than 40 years old. We have sent the project out for bid and put it on hold because of the projected cost of 240,000 (as December 2008). This facility will be located at our ballpark which is utilized by two handicapped childrens teams, knothole baseball, girls fastpitch, adult teams, and our entire pee-wee football organization. There is also a playground and a walking trail at this park, that is used by the entire community. We are currently using port-a-lets for our restrooms. This new facility will bring our park into the 21st century and give us something to be proud of. | Village of Blanchester Parks and Recreation Depart | 25 | 0 to 30 days | \$250,000 |
| Clinton | TFI, Cummins Bridgeway, Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies on 25 trucks. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 10 | 0 to 30 days | \$250,000 |
| Clinton | HVAC | Replace fifty year old HVAC unit with modern, energy efficient unit that uses updated EPA approved coolant. | Wilmington Public Library | 17 | 0 to 30 days | \$75,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Clinton | PSWI Growth Project | <p>Production Solutions of Wilmington, Incorporated is an established small business located in Wilmington, Ohio. We provide our customers with turnkey manufacturing solutions that allow them to utilize their current equipment to manufacture new products.</p> <p>In order to widen our customer base we would like to hire 3 Application Engineers, 3-5 Field Service Engineers, 1 Design Engineer and 1 Office administrator.</p> <p>These skilled positions would be permanent, full time positions paying in the range of \$50,000 to \$75,000 per year. The positions would be filled from the southwest and central Ohio regions.</p> <p>PSWI would also be leasing a facility, with plans to buy or build a facility at a later time, to allow us to complete initial turnkey runoffs prior to customer delivery.</p> <p>Hiring to fill these positions and the leasing of the facility would begin as soon as funds are available.</p> <p>This project would allow us to jump start a growth process that would ultimately lead to 2 to 3 times as many Ohio based jobs being created and furthering Ohio's reputation as a leader in manufacturing technology.</p> | Production Solutions of Wilmington, Inc. | 10 | 0 to 30 days | \$3,200,000 |
| Clinton | Smart grid/ renewable energy technologies developm | <p>Proposed is a renewable energy and smart grid technologies complex.</p> <p>A complex that provides the platforms that are needed to allow the multitudes of emerging technologies to communicate with all the several different types of smart grid providers and their networks.</p> <p>This complex will allow business from all areas of commerce a place to test and perform valuable R and D on products ranging from new smart grid and renewable energy products to consumer based products and smart home components.</p> <p>This complex will also allow for the adoption of standards for smart grid and home plug technologies, once adopted the smart grid or seamless grid not a grid that is managed by several independent grids.</p> <p>The complex will also allow other electrical grid operators to gather data via online RSE feeds and site visitation through the system to make an informed decision as to what type of smart grid system that best suits the system and budget.</p> | UtiliGroup Inc | 400 | 0 to 30 days | \$3,000,000 |
| Clinton | Clinton County Job Creation | <p>Mac Printing Company, Inc., a privately held corporation in the State of Ohio, is seeking the following business plan for consideration of funds that may come available at the discretion of the Governor.</p> <p>Mac Printing Company, Inc., currently operating as a small commercial printer in Clinton and Highland counties wishes to expand its current operation to include a business mixture Web Printing and Publishing.</p> <p>Mac Printing proposes to lease space in the City of Wilmington, Ohio. The company will install high-speed color web and direct mail equipment at this facility. The equipment will produce circulars, community magazines, school newspapers, real estate magazines and local business store to home direct mail advertising/marketing for ten Southern Ohio counties.</p> <p>The board of Mac Printing Company, Inc. forecast that in the next two to five years local community newspapers will cease to exist, leaving a void for southern Ohio businesses to effectively reach their customers. The new web-based division will generate two to ten million in annual sales, and one to three million in payroll in approximately two to five years from completion, by hiring displaced Ohio</p> | Mac Printing Company, Inc. | 25 | 91 to 180 days | \$7,500,000 |
| Clinton | Housing to Work Bridge | <p>The Housing to Work Bridge Project is targeted primarily for the citizens of Clinton & Warren Counties who have been adversely affected by the loss of employment opportunities in the local area i.e. DHL closing in Wilmington. The project will provide temporary (6 to 24 month) grants and loans for Rental Assistance and Down Payment Assistance for qualifying individuals. This will allow the individuals to continue to look for employment without the additional stress of losing their living situations. In addition, wrap around mental health services will be offered to the recipients as needed through the local mental health center administering the project funds.</p> | Mental Health Recovery Center of Warren/Clinton Co | 5 | 0 to 30 days | \$100,000.00 |
| Clinton | Youth/Family Advocate | <p>20% increase in clientele. The program will provide crisis intervention and court advocacy to victims of domestic and stalking violence. Prevention education regarding family violence will also be a key component of the proposal. In 2008, the agency had to cease its jail-based Life Skills program which focused on reducing the rate of recidivism for offenders, by providing key skills to aid in a better transition from jail to community. We anticipate that if funded over 200 additional victims of domestic and stalking violence will be assisted. 1,000 youth and adults will receive prevention education regarding family violence and healthy relationship skills, and 45 inmates will receive education on transition and community resources. The program objectives will be met by hiring one full-time and one part-time advocate for the agency's Clinton County office. The advocates will provide advocacy (legal, medical, emergency) to victims of domestic and stalking violence, a jail-based program to reduce the rate of recidivism and prevention education on family violence.</p> | Highland County Domestic Violence Task Force dba A | 2 | 0 to 30 days | \$75,000.00 |
| Columbiana | Phase VI Water Line Improvement Project | <p>Phase VI water line project will extend a high pressure 12" water main from Wilson Street to Beeson Mill Road at the East corporation limit. This water line will provide additional flow and pressure to the industrial facilities located at the Columbiana County port authority Complex on Cherry Street. This improvement will also provide the village with the opportunity to rebuild the existing water distribution system in the Southeast quadrant of the Village. This project will also provide better fire protection by increasing the water volume to the Southside of town. It will also provide adequate resources for future commercial / industrial expansion which will create more jobs to stimulate the economy. This project will provide a better fire protection / water volume and will also provide the means of creating more jobs to stimulate the economy which Leetonia and Columbiana County can use. Please consider this project request to stimulate the economy in this area.</p> | Village of Leetonia | 10 | 31 to 90 days | \$682,963 |
| Columbiana | Water Treatment Plant Upgrades | <p>The Village has recently completed a secondary water line project to the community with a water line project to the City of Salem. The completion of the water line has allowed the Village to temporarily discontinue the use of the existing water treatment facilities to address the upgrades necessary to account for elevated levels of iron from their source wells and increases in daily demand. This water treatment plant upgrade is necessary to assure that the Village has adequate primary and secondary sources of potable water for Leetonia's water customers. Water is the main ingredient to survive in the future.</p> | Village of Leetonia | 12 | 31 to 90 days | \$589,224 |
| Columbiana | East Clark St water line replacement | <p>To replace 3,700 ft of 8 inch water line and associated valves and hydrants. Line was installed in the early 1900's and has lead services.</p> | City of East Palestine | 10 | 91 to 180 days | \$340,560 |
| Columbiana | West Clark Street waterline replacement | <p>To replace 3,600 ft of 8 inch watermain, and associated hydrants and valves. Water line is an early 1900's installation and has lead services to homes.</p> | City of East Palestine | 12 | 181 days or more | \$335,450 |
| Columbiana | Martin Street rehabilitation Project | <p>Planing, subsurface repair and resurfacing of 9,100 of street on the federal Aid System. The street services numerous commercial and industrial concerns and this repair project will help retain 349 jobs. ODOT has committed \$750,000 to the project. East Palestine is seeking matching funds.</p> | City of East Palestine | 349 | 181 days or more | \$420,000 |
| Columbiana | Water treatment plant 10 inch main | <p>To extend a 10 inch water main for 1000 ft. This will relieve a constriction in the distribution of water pumped out of the water treatment plant. This work has been necessary since 1993 but the City has lacked funds to accomplish the work.</p> | City of East Palestine | 4 | 91 to 180 days | \$63,000 |
| Columbiana | Park Dr bridge replacement | <p>Replacement of an insufficient bridge over Leslie Run Creek. The bridge is circa 1940 with severely cracked and eroded abutments and deck. The bridge is the only access to the City's wastewater treatment plant and City Park. The bridge project has qualified for ODOT's Municipal bridge program but ODOT funding hasn't yet been determined.</p> | City of East Palestine | 6 | 181 days or more | \$200,000 |
| Columbiana | North Sumner St bridge replacement | <p>To replace the existing 40 ft bridge over Sulfur Creek with a pre-cast box culvert. Some minor utility re-routing will be necessary. The existing bridge is 100 years old and the deck has severe concrete loss underneath the surface. Weight limits have been reduced for about 30 years.</p> | City of East Palestine | 6 | 91 to 180 days | \$125,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Columbiana | Benton Alley Bridge replacement | To replace 40 ft. two lane bridge over Sulfur Creek on Benton Alley. The bridge is insufficient, has had a reduced load limit for 30 years due to deck deterioration. The replacement will be a pre-cast box culvert. Failure of this bridge could cause catastrophic flooding in the downtown business district | City of East Palestine | 12 | 181 days or more | \$125,000 |
| Columbiana | West Martin St one lane bridge replacement | Replace a one lane bridge with a two lane bridge. The one lane bridge is over 50 years old and is inadequate for the volume of traffic using the street. A waterline will need to be relocated but otherwise this is not a complex project and can be accomplished by use of a precast box culvert | City of East Palestine | 4 | 91 to 180 days | \$75,000 |
| Columbiana | West Main St waterline extension | Extend an 8 inch water main for 600 ft to connect the West Main St water line to the Hamilton Rc booster pump. This will ensure adequate flows for firefighting in a new housing development located west of Hamilton Rd. | City of East Palestine | 3 | 91 to 180 days | \$45,000 |
| Columbiana | Replace transit water main on Moore Lane | To replace a 60 year old water main constructed of asbestos-concrete pipe (transite). The water main has been failing for 10 years. Approximately 1000 ft of pipe will be replaced | City of East Palestine | 4 | 181 days or more | \$50,600 |
| Columbiana | Police Department Emergency Generator | To replace the circa 1967 generator with a modern generator adequate to power the 911 Center and the Police Fire and EMS station that shares space with the 911 Center. Generator will be natural gas powered. | City of East Palestine | 1 | 31 to 90 days | \$34,000 |
| Columbiana | Wind Energy Utilization | to the American Spirit Initiative (ASI) in economically distressed East Liverpool, Ohio. The American Spirit Initiative is a collection of private, public and non-profit organizations joining forces to empower individuals and restore economic and social stability in the Upper Ohio Valley. These partners include employers, social service organizations, faith-based organizations, and education providers. Stimulus funds would be used to institute a green energy model for 6 downtown properties. Specifically, rooftop wind generators would be installed to supplement much of the energy requirements for the properties. Short-term economic impact would be seen through the creation of jobs to convert the properties to wind power. Long-term economic impact would be realized through savings on utility costs. The overall reduction in consumption of fossil fuel generated power could be as high as \$1,150,000 annually. East Liverpool is seen as a viable area for wind power due to the wind patterns associated with the Ohio River Valley | Soaring Eagle LLC | 25 | 0 to 30 days | \$1,800,000 |
| Columbiana | Police Officer hiring | To hire two full time police officers. The City has been unable to hire officers since 2009 and the police department is chronically understaffed. The lack of officers jeopardizes public safety | City of East Palestine | 2 | 31 to 90 days | \$160,000 |
| Columbiana | Brookdale venue water tower | To construct an elevated water storage tank at the north City limits. This tank would provide drinking water to portions of Unity Township that do not have good drinking water. It will also allow for economic expansion of the Brookdale Avenue to State Route 14 corridor. This project has been dormant since 1987 due to lack of funds. | City of East Palestine | 12 | 181 days or more | \$750,000 |
| Columbiana | Route 14 water line | 9,240 ft extension of municipal water lines north along Market Street to SR 14, west on SR 14 to Hunston Rd. This makes a loop of municipal water lines and opens SR 14 to commercial or industrial development. | City of East Palestine | 24 | 181 days or more | \$584,430 |
| Columbiana | SR 14 sanitary sewer | To extend municipal sanitary sewer lines 9,240 ft along Market St onto SR14, then west on SR14 to a junction at Hunston Rd. This project will entail construction of a lift station. The project will open SR 14 to industrial and commercial development and will eliminate deficient septic tanks at existing homes and businesses. Project has been planned since 1967 but never funded | City of East Palestine | 24 | 181 days or more | \$770,876 |
| Columbiana | Stadium storm sewer and culvert | This will entail construction of 1000 ft of storm sewer pipeline which will discharge directly into Valley Run Creek. It will also involve enlargement of a culvert on West Clark Street at Valley Run to handle the increased flows. This project will relieve overflows of a storm sewer line presently routed through residential areas. | City of East Palestine | 12 | 181 days or more | \$150,000 |
| Columbiana | sanitary sewer rehabilitation | rehabilitation of sanitary sewer lines and manholes in 8 areas of the municipality. The rehabilitation is to correct undersized lines, sagging lines and deteriorated manholes. The rehabilitation will reduce sewage backups and reduce inflow and infiltration of rain water and groundwater into the system. | City of East Palestine | 12 | 181 days or more | \$714,780 |
| Columbiana | Dist 11, PID 85716, COL Repeater, radios, portable | Purchase 1 motorola repeater, 25 motorola mobile radios, 4 motorola display portables, and 2 motorola control stations with antenna for the CAA of Columbiana County | Ohio Department of Transportation | 1 | 31 to 90 days | \$65,043 |
| Columbiana | Dist 11, PID 85717, COL GPS software application | Purchase GPS software application for CAA of Columbiana County | Ohio Department of Transportation | 1 | 31 to 90 days | \$27,506 |
| Columbiana | Dist 11, PID 85718, COL Garage rehab/renovation | Garage rehabilitation/renovation for the CAA of Columbiana County | Ohio Department of Transportation | 1 | 31 to 90 days | \$60,000 |
| Columbiana | Dist 11, PID 85719, COL Purchase 6 LTNs | Purchase 6 light transit vehicles with a narrow body for the CAA of Columbiana County | Ohio Department of Transportation | 1 | 31 to 90 days | \$270,000 |
| Columbiana | Elevated Water Tank Restoration | This project will include repairs and re-coating of the Village elevated water tower. Repairs will include new venting, ladder, improvements, new safety equipment, rebuilding of deterioration and re-coating of the tank. Preservation of this tank is vital to the operation of the Village water distribution system. The water tower enables the public water distribution system to maintain the proper water pressure, to insure the proper fire protection to the tax payers of Leetonia and the surrounding area. This project will put some of the peoples money back into a project that they will directly benefit from. Tax money coming back to the tax payer, what a GREAT thought | Village of Leetonia | 10 | 31 to 90 days | \$166,600 |
| Columbiana | Crestview Road Sanitary Sewer Extension | Eliminate current septic systems that are next to the ball park, which area youth groups use for sports. Add sewer line for residents of the village that are currently on septic systems that are failing. | New Waterford Village | 15 | 0 to 30 days | \$217,425 |
| Columbiana | Crestview Road Water Line Extension | Replace two inch water line which has numerous breaks, also one section has had a one inch line put into old two inch line to repair it. Also add fire hydrants in this area for the safety of the residents that have none at this time. | New Waterford Village | 15 | 0 to 30 days | \$256,705 |
| Columbiana | State Route 46 Sanitary Sewer Extension | Extend sanitary sewer line to end of village. Eliminate malfunctioning septic systems that are failing and also allow for the development of a five acre site within the village | New Waterford Village | 10 | 0 to 30 days | \$157,871 |
| Columbiana | fire department project | hanover volunteer fire department is badly in need of a new grass and fire rescue truck. our current vehicle is a 1975 chevy and is badly in need of repairs. the cost to repair is far above what the truck is worth. this unit will carry fire beaters, 6 indian tanks, axes, shovels, chain saws and cribbing used to stabilize a vehicle or farm equipment. this new unit will be heavier with a utility bed that has tool boxes to keep our equipment and room for skid unit and indian tanks. we will use the raidos, siren lights, and scene lights that we have on the old truck. this will make the new unit mifa compliant. hanover township volunteer fire department is a rural agricultural area with four major highways and heavy truck traffic, one railroad in our area. in our township st rt 30 has the highest accident and fatality in col county, this new unit will be suitable for off road travel as we have a large farm base. this unit will carry 250 gal of water, plus 1 foam tank. thank you for considering our need | hanover township volunteer fire association | 0 | 0 to 30 days | \$39,500 |
| Columbiana | Fleming House Windows | Replace existing aluminum windows with Superior Single Hung Vinyl Energy Starr Compliant windows with low E Argon Gas Glazing. This includes 13 double hung units and 27 single units | Family Recovery Center | 50 | 31 to 90 days | \$17,000 |
| Columbiana | Resident Student Dormitory | distressed East Liverpool, Ohio. ASA is designed as a superior alternative to our underperforming local public schools. In an effort to improve the educational environment for our students and revitalize the downtown area, In Jan. 2009 ASA began the process of moving from the suburbs to a new location in formerly vacant downtown properties. The new location also falls within a designated hub zone, and the increased traffic generated by the school will help to spur future economic development downtown. Funding through the stimulus plan would be used to construct dormitory facilities for students who would benefit from attending the school, but who live outside of the radius of a daily commute. This facility will afford young people from a broader geographic region the opportunity to attend the academy. The project will also bring another functioning building online in downtown East Liverpool creating short-term construction jobs and long-term employment opportunities related to staffing the dorm and caring for the students | American Spirit Academy | 100 | 0 to 30 days | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Columbiana | Primary Clarifier & Oxidation Tower Improvements | The existing wastewater treatment plant has to comply with an NPDES Permit. Part of this compliance is the performance of the primary clarifier and oxidation tower. Both of these unit process equipment are in bad shape and need upgrading. These improvements are a must for their compliance with their NPDES Permit. | Village of Wellsville | 15 | 31 to 90 days | \$350,000 |
| Columbiana | Collection Sytame Improvements | the existing sanitary sewer collection was built at the beginning of 1900. It is in need of much repair. this project will raise and fix the majority of the manholes in this existing system. In order to maintain their pump station, they need to purchase a portable stand-by generator for servicing these pump stations when they are without power. | Village of Wellsville | 20 | 31 to 90 days | \$270,000 |
| Columbiana | sludge Dewatering Equipment and Building | the existing wastewater treatment plant has to get ride of the sludge that is generated from its treatment. This can either be by liquid or by solids. the cost to get ride of liquid sludge is very expensive. therefore, the treatment plant needs to have a means to dewater its sludge so that it can get ride of it as a solid. this would save the village a min. of \$100,000 annually. These improvements need to be installed in a building so that this process can be accomplished year around | Village of Wellsville | 20 | 91 to 180 days | \$350,000 |
| Columbiana | Affordable Staff Housing | distressed East Liverpool, Ohio. ASA is designed as a superior alternative to our underperforming local public schools. In an effort to improve the educational environment for our students and revitalize the downtown area, In Jan. 2009 ASA began the process of moving from the suburbs to a new location in formerly vacant downtown properties. The new location also falls within a designated federal hub zone, and the increased traffic generated by the school will help to spur future economic development. Funding through the stimulus plan would be used to create affordable housing in the hub zone for ASA faculty & staff. As ASA expands, it is estimated that the need for affordable staff housing will increase. The new downtown location has plenty of available vacant commercial properties, but very limited available residential property. What residential space is available is generally of sub-standard quality. This project would be to convert currently unutilized or underutilized commercial space into affordable and attractive housing for ASA employees and staff | American Spirit Academy | 50 | 0 to 30 days | \$2,500,000 |
| Columbiana | Economic Development Opportunity Expansion | Liverpool Ohio Federal Hub Zone. Newtec was created to utilize Information Technology (IT) employment needs as the catalyst to spur economic development and lift individuals out of the cycle of generational poverty, using a holistic approach to employment, education, mentoring and support. New concepts will be blended with proven models such as the nationally recognized "Bridges out of Poverty" program. NewTec offers graduates of training programs like NewLife Technical Institute and local colleges apprenticeship opportunities where they are teamed with seasoned professionals to provide outsourced services to other organizations in the U.S. as an alternative to offshore outsourcing. The apprenticeship program has been recognized by the Ohio Apprenticeship Council as a model for other IT organizations. In order to expand the apprenticeship program as well as increase the overall capacity of NewTec, stimulus funds will be used to renovate a vacant building in downtown East Liverpool to house the entire program. The increased traffic generated will also benefit | Newbold Technologies | 100 | 0 to 30 days | \$4,000,000 |
| Columbiana | The Family and Community Resource Center-FCRC | Resource Center which will connect 1,000 families and community members to non-duplicate services, while providing community educational outreach programming. Partnered with Ohio PIRC to bring the PUI program to area, which will enable 30 parents presence in the schools. Collaborating with local service provider on fund raising. Disseminating state department's program on "surviving job loss" at a Save Our Homes foreclosure outreach event. 30 or more Veterans and their families in need of support group run by competent facilitator. Home base therapy for 100 persons- elderly, those not able to leave their home or have small children, who do not qualified for services. Community garden project at Center to include 30 alternative school students, and any community member may participate in the project (up to 20). Produce can be sold due to Center location and monies reinvested into the program. | The Family and Community Resource Center | 14 | 31 to 90 days | \$100,000 |
| Columbiana | Curriculum and Staff Development | distressed East Liverpool, Ohio. ASA is designed as a superior alternative to our underperforming local public schools. In an effort to improve the educational environment for our students and revitalize the downtown area, In Jan. 2009 ASA began the process of moving from the suburbs to a new location in formerly vacant downtown properties. The new location also falls within a designated hub zone, and the increased traffic generated by the school will help to spur future economic development downtown. Funding through the stimulus plan would be indirectly used to help the workforce become better prepared and adaptable to the employer's needs. As in any service industry it is critical for schools to maintain a constant education process for the entire organization. In education it involves collecting and looking at student data, reviewing what has or has not worked, collaboration between colleagues, and reviewing the curriculum to keep the teachers and curriculum current and meaningful. The stimulus resources would allow professional involvement to assure quality | American Spirit Academy | 40 | 0 to 30 days | \$250,000 |
| Columbiana | Student Entrepreneurial Program | distressed East Liverpool, Ohio. ASA is designed as a superior alternative to our underperforming local public schools. In an effort to improve the educational environment for our students and revitalize the downtown area, In Jan. 2009 ASA began the process of moving from the suburbs to a new location in formerly vacant downtown properties. The new location also falls within a designated hub zone, and the increased traffic generated by the school will help to spur future economic development downtown. Funding through the stimulus plan would be used to help create an incubator entrepreneurial program for students that would provide them a mentor supported entrepreneurial environment. The downtown area of East Liverpool would become the incubator site. This program will develop the future employers and community leadership that will play major role in revitalizing Ohio. Presently the downtown area has endless empty store fronts that will be renovated into entrepreneurial classrooms where students are mentored by Ohio's leaders in business | American Spirit Academy | 50 | 0 to 30 days | \$500,000 |
| Columbiana | Teacher Academy | distressed East Liverpool, Ohio. ASA is designed as a superior alternative to our underperforming local public schools. In an effort to improve the educational environment for our students and revitalize the downtown area, In Jan. 2009 ASA began the process of moving from the suburbs to a new location in formerly vacant downtown properties. The new location also falls within a designated hub zone, and the increased traffic generated by the school will help to spur future economic development downtown. Funding through the stimulus plan would be used to help to create a teacher academy designed to mentor new teachers in their first and second years of apprenticeship in the field. Designed with support from the local teacher training colleges and universities, the academy would be an extension of their training support during their first two years in the field. The academy would provide a laboratory setting that would provide a safe setting for instructional methodology to be mastered supervised by experts in the field | American Spirit Academy | 60 | 0 to 30 days | \$950,000 |
| Columbiana | Social Services Mall | purposes. Foundation priorities have focused on programs and initiatives for youth and for economic development; especially reviving hope and dignity for the people in Mr. Newbold's home town in the Appalachian community of East Liverpool Ohio. Stimulus money is requested to renovate an vacant or underutilized commercial property in downtown East Liverpool for the purpose of creating space for a "social service and support mall". The intent would be to provide efficient, attractive and affordable space to various public, private and non-profit social service programs in a location that is conveniently located in the heart of the economically distressed downtown area. Potential service providers include; drug and alcohol recovery, support groups, civic groups, and other similar services. Not only will the facility improve access for individuals seeking services, it will also bring another building back into full and productive use. It is also expected that nearby businesses will be positively impacted by the increased traffic downtown. | Laus Deo Foundation | 50 | 0 to 30 days | \$750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|-------------------------------------|----------------|--------------------|---------------------------|
| Columbiana | Walk way bridge, sidewalks | Ohio, Knox Township. This project would assist four local business in Knox Township, and would benefit many local families including the safety of school aged children who commute to the local playground, mobile library, and store. This program would also benefit many adults who currently use the streets for exercising, this would be a much safer way for these individuals to keep their programs in tact preventing obesity, and showing others in the area that being fit is a psychological gain to every day stress. At present many locals who want to enjoy a fit lifestyle have to travel 12 miles to local High School to be proactive in their daily needs. If sidewalks are replaced, and the foot bridge is repaired this would be a win-win situation for all Knox Township residents, gaining a healthy lifestyle that eludes many residents in Knox Township, and Columbiana County. If this type of project is initiated, and works, this would be an awesome role model for other small villages in Columbiana County, and Ohio to emulate, and build greater programs to keep Ohio from becoming a state of obsolete mechanical systems, lighting, and interior finishes. Currently this building houses all of the village offices and community hall. We need to update to make this ADA compliant so our seniors can use it for meetings. | Knox Township Trustee | 25 | 31 to 90 days | \$12,000 |
| Columbiana | Interior renovation of community building | | New Waterford Village | 5 | 0 to 30 days | \$226,000 |
| Columbiana | NewLife East Liverpool Expansion | This project will enable NewLife Technical Institute (NewLife), a 501(c)(3) post-secondary technical school, to expand to a larger facility, which will provide more courses, classrooms, and classroom space to NewLife students. NewLife offers Information Technology and Medical Transcription training programs in the Northeastern Ohio area, focusing on disadvantaged, at-risk youth, as well non-traditional students looking for a stable career. NewLife takes a holistic approach in educating their students, offering programs in a value-based context providing motivation, care, and encouragement to each of their students. Character & Values training is an integral part of the curriculum at NewLife. Companies repeatedly express the main obstacle in employment is not finding employees with skills, but finding skilled employees with the character & values that make a good worker. This project will be for the purchase, and renovation, of a building in East Liverpool, Ohio; this building will double the number of potential students NewLife can serve. NewLife currently has no space in downtown East Liverpool, and expansion is not possible at the current location. | NewLife Technical Institute | 50 | 0 to 30 days | \$4,000,000 |
| Columbiana | New Roof for Village Hall | Install complete new metal roof and metal exterior walls on village hall which houses all village offices. | New Waterford Village | 6 | 0 to 30 days | \$93,895 |
| Columbiana | Affordable Hub Zone Housing | to the American Spirit Initiative (ASI) in economically distressed East Liverpool, Ohio. The American Spirit Initiative is a collection of private, public and non-profit organizations joining forces to empower individuals and restore economic and social stability in the Upper Ohio Valley. These partners include employers, social service organizations, faith-based organizations, and education providers. As part of ASI's larger mission to revitalize the faltering downtown area, stimulus funds would be used to turn vacant, or underutilized commercial properties into efficient, attractive and affordable residential units. As economic development continues downtown, the availability of housing for downtown workers will fall short of projected demand. Although there is ample retail and commercial space available downtown, there is a scarcity of decent residential space. Since East Liverpool is designated as a Federal Hub Zone, the availability of housing for employees of downtown businesses and organizations also becomes important for access to other funding streams and programs. | Soaring Eagle, LLC | 55 | 0 to 30 days | \$4,500,000 |
| Columbiana | Steam Bank Stabilization | We would like to reduce sedimentation and erosion in the Little Beaver Creek Watershed to protect and restore habitat and water quality. Initially, we would complete stream surveys on the most impaired portions of the waterway to determine the extent of the problem and which areas are most in need, creating a part-time job. We would then hire contractors to conduct streambank restoration projects on the portions of the creek deemed to be most in need. This is expected to create the equivalent of approximately four (4) full-time positions over the period of several months to a year. | Little Beaver Creek Land Foundation | 5 | 31 to 90 days | \$50,000 |
| Columbiana | Encouraging Downtown Retail Job Development | Soaring Eagle LLC is a property management company founded to support the programming related to the American Spirit Initiative (ASI) in economically distressed East Liverpool, Ohio. The American Spirit Initiative is a collection of private, public and non-profit organizations joining forces to empower individuals and restore economic and social stability in the Upper Ohio Valley. These partners include employers, social service organizations, faith-based organizations, and education providers. As part of ASI's larger mission to revitalize the faltering downtown area, stimulus funds would be used to create jobs by attracting retailers downtown by making attractive and affordable retail space available. Funds would be used to renovate vacant commercial properties in the downtown Federal Hub Zone to bring them up to current building standards and make them available to retailers wishing to relocate or establish new businesses downtown. Safety, energy efficiency, cost-effectiveness and aesthetic appeal will all be addressed through the planned renovations. | Soaring Eagle LLC | 60 | 0 to 30 days | \$2,500,000 |
| Columbiana | East Liverpool Business Incubator | This project will enable NewLife Technical Institute (NewLife), a 501(c)(3) post-secondary technical school, to facilitate a business incubator in East Liverpool, Ohio. The business incubator will serve to encourage entrepreneurial business people in the East Liverpool area to stay in Columbiana County, hire local, and expand the commerce and employment opportunities of the region. East Liverpool -- and surrounding areas in Columbiana, Mahoning and Jefferson counties -- have been struck much harder economically than the rest of the country. East Liverpool served as a blue collar hub for labor employment in the steel, pottery, and railroad industries until the end of the last century. In 1970, manufacturing comprised 53.4% of Columbiana County jobs; in 2006, that number dwindled to 15.1%. Now that domestic labor careers are dwindling because of exported jobs to countries like China and Russia, areas similar to East Liverpool are suffering. | NewLife Technical Institute | 120 | 0 to 30 days | \$1,700,000 |
| Columbiana | Dist 11, PID 84267, COL SR 154 10.92 | According to the Ohio Department of Job and Family services, in December of 2008, Columbiana County had an unemployment rate of 8.9%, which was 21% higher than the Ohio average of 7.3% due to Replace Box Beam Bridge With Steel Beam Superstructure | Ohio Department of Transportation | 25 | 31 to 90 days | \$650,000 |
| Columbiana | Wheatthill Reservoir Roof | The City drinking water reservoir currently has a flexible membrane roof which the EPA has identified as posing "severe health and safety concerns". This project would replace the membrane roof with a permanent solid roof system. The EPA has repeatedly ordered the City to perform this work but the City has lacked funds to comply. | City of East Palestine | 12 | 91 to 180 days | \$500,000 |
| Columbiana | Dist 11, PID 85366, COL Wellsville Docks, Phase 3 | Extension of the overhead bridge crane | Ohio Department of Transportation | 57.4 | 31 to 90 days | \$2,000,000 |
| Columbiana | Operation safety | County though it has seen these increases has not seen an increase in the number of commissioned law enforcement officers. Columbiana County sits in close proximity, within a half hour drive, to Pittsburgh, PA and even closer to Youngstown, OH. According to staffing levels received from OCIS we have found that counties in Ohio with similar population levels to protect have twice as many deputies and some have as much as two-thirds more sworn staff. The goal of this project is to hire three new deputies to assist us with maintaining order throughout Columbiana County. Columbiana County is only requesting three new hires as we believe we will be able to maintain those positions after the assistance subsides. The new employees would allow us to assign another Detective to assist with the numerous felony cases, which are unsolved. Most of these cases are not solve because of the lack of manpower at the Sheriff's Office. The addition of these deputies would greatly enhance the safety of not only the community but also the deputies of Columbiana County. | Columbiana County Sheriff's Office | 3 | 0 to 30 days | \$176,500 |
| Columbiana | Howell Road Booster Pump | Project to move water system booster pump from present location under the road to an above ground location on the right of way. This project is EPA mandated but the City has lacked the funds to comply. | City of East Palestine | 3 | 91 to 180 days | \$166,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|------------------------------------|----------------|--------------------|---------------------------|
| Columbiana | City of East Liverpool Proposed Street Improvement | Of the 34 streets, two are repairs to state highways passing through the City of East Liverpool. The remaining 32 streets are located in residential areas of East Liverpool. Proposed work will include but not be limited to milling existing pavement, replacing with a 1 1/4" asphalt leveling course followed with a 1 3/4" asphalt surface course. | City of East Liverpool | 15 | 91 to 180 days | \$4,251,000 |
| Columbiana | Supervised Visitation | Provision of in-county supervised visitation for parent(s) or family members and children that provides an opportunity for reunification of children with families: * Reducing out-of-home placement costs to the county; * Building stronger relationships between children & family member(s) * Reduce expense of families accessing supervised visitation (accessibility of in county service; reduce transportation expenses; sliding fee scale = affordability) OUTCOMES: * Reunification of children with family member = 40% (Estimate) * Build positive relationship with family members = 75% (Estimate) * Establish collaborative delivery of service among at least 8 county agencies/systems * Establish sliding fee scale that allows families to utilize supervised visitation * Reduce permanent custody rate of applicable children/families NOTE: There is currently NO supervised visitation services in the county for those children not in General System Resurfacing | WCA of Salem, Ohio | 10 | 31 to 90 days | \$75,000 |
| Columbiana | Dist 11, PID 84162, COL SR 45 22.040 | General System Resurfacing | Ohio Department of Transportation | 61.8 | 31 to 90 days | \$2,154,300 |
| Columbiana | Dist 11, PID 85366, COL Wellsville Docks, Phase 3 | Extension of the overhead bridge crane | Ohio Department of Transportation | 57.4 | 31 to 90 days | \$2,000,000 |
| Columbiana | Dist 11, PID 84267, COL SR 154 10.92 | Replace Box Beam Bridge With Steel Beam Superstructure | Ohio Department of Transportation | 25 | 31 to 90 days | \$650,000 |
| Columbiana | OBC Wellsville Intermodal Facility | Completion of overhead bridge crane (over) to extend over rail spur. Already built on Ohio river and over truck access road. Construction of conveyor from captive barge inland from previously constructed river cells that support OBC. Expands capabilities at Ohio's largest inland port located at northernmost point of Ohio River in U.S. Provides all water international access to Ports of New Orleans and Mobile. | Columbiana County Port Authority | 55 | 0 to 30 days | \$5,700,000 |
| Columbiana | Rural Broadband Connectivity | Construction of last mile broadband fiber connectivity to two hospitals and local government offices and completion of network operations center. Project will service Columbiana, Mahoning and Jefferson Counties. A 260 mile fiber optic network and operations center have already been constructed locally at a cost of \$13.5 million. | Columbiana County Port Authority | 130 | 0 to 30 days | \$1,700,000 |
| Columbiana | Dist 11, PID 85679, COL Wellsville Docks, Phase 4 | Phase 4 involves the conveyor and captive barge. Phase 1 & 2 complete | Ohio Department of Transportation | 106.2 | 31 to 90 days | \$3,700,000 |
| Columbiana | Electric Grid Upgrade - Leetonia Trade Park | Tapping into stepdown and extension of First Energy transmission line 5,145 ft. to Leetonia Trade Park. Due to deregulation in Ohio, First Energy will not provide electric upgrade unless transmission division is paid. Upgrade will provide adequate power to permit Trade Park to build out as secure data storage and disaster recovery center, creating hundreds of new jobs | Columbiana County Port Authority | 300 | 91 to 180 days | \$3,000,000 |
| Columbiana | Port Facilities - Energy Efficiency Upgrade | Port Authority will retrofit about 1,000,000 square feet of industrial space for energy conservation and efficiency. | Columbiana County Port Authority | 25 | 0 to 30 days | \$375,000 |
| Columbiana | Operation Safe Schools | Columbiana County is plagued with a sharp increase in drug related and violent crimes. The Columbiana County Common Pleas court has seen a steady increase in these types of cases over the past several years. This problem is also affecting our schools with in the county. Our goal is to place a school resource officer into each of the schools, which fall into our jurisdiction at least on a part time basis. This will increase the safety of our students. When school is not in session during the summer and breaks the deputies will be working the road to assist in the safety of the general public and of our other deputies. The three deputies would allow us to cover the five schools that are in our jurisdiction at least 2 days a week rotating the deputies schedules between schools. | Columbiana County Sheriff's Office | 3 | 0 to 30 days | \$176,500 |
| Columbiana | Salineville Waterline Project | Phase 3 involves a new waterline to be installed through the Village of Salineville. The orders set forth by Ohio Environmental Protection Agency. The waterline will begin at the Buckeye Water District Treatment Plant and extend to the Village of Salineville. This project has been engineered and has a permit to install from OEPA. This project has a shortfall of \$3,000,000.00. The Village of Salineville is 61.7% LMI (Low to Moderate Income) and cannot entertain any loans for this project. This project could be put out for bid and awarded within 30-60 days after funding has been obtained. | Buckeye Water District | 50 | 31 to 90 days | \$3,000,000 |
| Columbiana | Operation Solve Crime | Columbiana County is plagued with a sharp increase in drug related and violent crimes. The Columbiana County Prosecutors Office reports that there has been a steady increase in felony crimes in the recent years. Columbiana County is geographically located close to Pittsburgh, PA and Youngstown, OH. Columbiana County Sheriff's Office has a large backlog of homicide cases, sexual offenders and child offenders. The increase in the number of detectives would greatly assist the Columbiana County Sheriff's Office in solving those crimes and therefore better protecting the public. Columbiana County Sheriff's Office is under staffed by 50-60% according to statistics provided by the Buckeye State Sheriff's Association and the Ohio Criminal Justice Services. 1 | Columbiana County Sheriff's Office | 3 | 0 to 30 days | \$176,500 |
| Columbiana | Little Beaver Creek Greenway Trail High St. Connec | Enhancement funds in the amount of \$460,000 for an additional 1.46 miles of transportation corridor. The 20% required match is \$92,000 and additional funding is needed in the amount of \$68,473 for the final engineering of this project. The engineering could begin as early as 30 days once the bids are received with construction bids going out once engineering is completed. The Park District currently has 10 miles completed with this project adding 1.46 miles of the 100 mile Great Ohio Lake-to-River Greenway project with 65% completion. This is a transportation corridor construction project connecting the Village of Leetonia to the Village of Washingtonville that will eliminate dangerous intersections and driveway entrances that cause safety issues for walkers and cyclists. Once completed will provide access to restaurants, schools, libraries and various small businesses in both villages and will offer low income families a no cost option for outdoor activities close to home, as well as provide beneficial health and social benefits | Columbiana County Park District | 20 | 31 to 90 days | \$160,473 |
| Columbiana | Dist 11, PID 85366, COL Wellsville Docks, Phase 3 | Phase 3 involves a Bridge Crane extension that would make the crane system fully multi-modal (barge, truck and rail) Phase 1 & 2 complete. | Ohio Department of Transportation | 57.4 | 31 to 90 days | \$2,000,000 |
| Columbiana | Affordable Housing for Students in Poverty | school, to incorporate the Bridges out of Poverty program into our existing training programs. This will help to prepare those living in generational poverty demonstrate IT aptitude with the skills and training necessary to successfully enter the world of work in the growing IT field. Evidenced based curriculum and training developed by Aha!Process, Inc. will be used to assist community members and employers work with those in poverty understand their needs. Bridges Out of Poverty will be provided to all community partners under the auspices of the grant. Further, all students enrolled in the NewLife will participate in Getting Ahead in a Just Gettin' By World - a curriculum designed to assist those living in poverty successfully break free from the habits and issues common to those in poverty. The Circles mentoring and support program will provide assistance to those completing the Getting Ahead programming throughout their IT training and into employment in the world of work. This project will also include funding for a Circles Coordinator for the Circles Program. | Newlife Technical Institute | 110 | 0 to 30 days | \$66,816 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Columbiana | School Renovation Project | distressed river town of East Liverpool. ASA is designed as a superior alternative to our underperforming local public schools. The ASA middle school and elementary programs are currently located in a deteriorating old public school building in the outlying community of Glenmoor. In an effort to improve the educational environment for our students and revitalize the downtown area, ASA has begun the process of moving to a new location in formerly vacant downtown properties. The location also falls within a designated hub zone, and the increased traffic generated by the school will help to spur future development. The High School program was moved into completely renovated space downtown in January 09, and plans are to move the rest of the school to a second vacant building across the street. Not only will the new location provide more space, it will also be more efficient to heat and cool. The High School phase of the move was completed using 100% donated funds. Funding through the stimulus plan would be used to complete the building renovation | American Spirit Academy | 55 | 0 to 30 days | \$1,750,000 |
| Columbiana | Physical Education, Athletics & Performing Arts Fa | economically distressed river town of East Liverpool. ASA is designed as a superior alternative to our underperforming local public schools. In an effort to improve the educational environment for our students and revitalize the downtown area. In Jan. 2009 ASA began the process of moving from the suburbs to a new location in formerly vacant downtown properties. The new location also falls within a designated hub zone, and the increased traffic generated by the school will help to spur future development. Currently all ASA High School classes are located downtown. By the end of the 2009-2010 school year, the remaining ASA students will be transitioned into the downtown campus. Funding through the stimulus plan would be used to complete the construction of a state-of-the-art, multi-purpose facility to house our physical education, athletics and performing arts programs. This highly flexible building could be made available to other civic and community groups outside of regular school hours and functions. As such, it would be an asset not only for the school, but also to school located in East Liverpool, to build a dormitory for student housing. East Liverpool is located in an economically distressed area of Ohio. This area has a high poverty rate, as well as a high percentage of at-risk youth. NewLife offers contemporary training in high-demand fields, which targets individuals that would not typically pursue post-secondary education. We have found that at-risk students with an aptitude for IT are successful in our programs both academically as well as in the working world. However, addressing and remedying personal issues requires access to remove themselves from their environments; a dormitory would enable them to do this. A dormitory would also allow students from other Ohio counties to attend NewLife. | American Spirit Academy | 150 | 0 to 30 days | \$15,000,000 |
| Columbiana | Affordable Housing for At-Risk Students | NewLife takes a holistic approach in educating their students. NewLife programs are offered in a value-based context that embraces the person as a whole, providing motivation, care, and encouragement. Character & Values training is an integral part of the curriculum at NewLife. Compared Ohio Seniors to Sophomores Entry Adapters Grant. The collaborative efforts of the CCECSC, Kent State University Salem and East Liverpool campuses have provided 73 seniors the opportunity to earn a full year credit of college while earning dual credit for high school graduation. In fall semester we have provided over \$200,000 of TAG courses, texts, and student services, including a Learning Community Seminar to support the transition from High School to college successfully. Our enrollment for Spring semester has grown by 20%, as has the number of transferable courses offered. The S2S program includes 3 districts in neighboring Mahoning county, and 11 districts in Columbiana County in partnership with the CCECSC and Kent State University campuses, pooling resources in a collaborative effort to make college a reality in an area where only 8.6% of residents hold a Bachelors degree or higher. It allows students one full year of college for free, provides a more rigorous curriculum for students, and gives students the opportunity for success at the college level | NewLife Technical Institute | 35 | 0 to 30 days | \$5,000,000 |
| Columbiana | S2S project | The East Lincoln Way project includes the first mandated storm and sanitary sewer separation project needed to be completed in 2008 to maintain the compliance schedule included in our NPDES permit. This project was not started in 2008 due to lack of funding. This project is shovel ready. This project includes: *Full depth pavement removal with flexible pavement replacement *Curb removal with new curb and gutter installation *New drainage system installed including catch basins, manholes, and conduit *Installation of a new waterline and appurtenances including new services *Installation of a new sanitary sewer system including service laterals *Sidewalk removal with new sidewalk replacement *Curb ramp installation *Decorative street lighting including all electrical work and conduit *Landscaping including new tree planting With the new waterline and sanitary sewer system in place, this will create new service laterals where new services could be attached. | Columbiana County Educational Service Center | 10 | 0 to 30 days | \$150,000 |
| Columbiana | Technology Enhancement | distressed East Liverpool, Ohio. ASA is designed as a superior alternative to our underperforming local public schools. In an effort to improve the educational environment for our students and revitalize the downtown area, in Jan. 2009 ASA began the process of moving from the suburbs to a new location in formerly vacant downtown properties. The new location also falls within a designated hub zone, and the increased traffic generated by the school will help to spur future economic development downtown. Funding through the stimulus plan would be used to provide state-of-the-art SmartBoard technology in every classroom in the new facility and provide a laptop computer to every ASA student. Using technology to mediate instruction has been shown to improve student achievement, attention, attitude, and motivation. Other benefits include; increased enjoyment, greater opportunities for collaboration improved personal and social skills, the ability to cope with more complex concepts, accommodation for different learning styles (tactile, visual, etc.), Blacktop one street. 16 mile x 1/2 mile wide. Blacktop eight streets 1.71 miles x 1/8 mile wide. Blacktop seven streets 2.91 miles x 20' wide. | American Spirit Academy | 20 | 0 to 30 days | \$698,600 |
| Columbiana | Street Paving | Safety for the residents of the Village. | New Waterford Village | 15 | 0 to 30 days | \$494,287 |
| Columbiana | Replace sewer line in Village Park | Sewer line has areas of fractured tiles. This line overflows during heavy rains and it runs along the creek in the Village. Stop overflow and elimate waste into the creek | New Waterford Village | 10 | 0 to 30 days | \$62,000 |
| Columbiana | Replace sewer line Pinewood Dr. | Replace line which has several broken tiles in it. Stop sewer line plugs in homes and apartment complex. | New Waterford Village | 8 | 0 to 30 days | \$9,401 |
| Columbiana | Replace sewer line Pinewood Dr. | Replace line which has several broken tiles in it. Stop sewer line plugs in homes and apartment complex. | New Waterford Village | 8 | 0 to 30 days | \$9,401 |
| Columbiana | Front street water tower rehabilitation | Sand blasting, interior and exterior painting. Install vent and a manway access point. New roof access hatch. Installation of overflow pipe and flapper/ screen. Installation of anti climb ladder gate. Site cleanup. | New Waterford Village | 6 | 0 to 30 days | \$70,000 |
| Columbiana | Replace Existing Sidewalks | Replace 23660 sq. ft. of 4" sidewalk and 8690 sq. ft. of 5" sidewalk. Also remove 12 trees and stumps. | New Waterford Village | 10 | 0 to 30 days | \$183,000 |
| Columbiana | East Lincoln Way Project | The East Lincoln Way project includes the first mandated storm and sanitary sewer separation project needed to be completed in 2008 to maintain the compliance schedule included in our NPDES permit. This project was not started in 2008 due to lack of funding. This project is shovel ready. This project includes: *Full depth pavement removal with flexible pavement replacement *Curb removal with new curb and gutter installation *New drainage system installed including catch basins, manholes, and conduit *Installation of a new waterline and appurtenances including new services *Installation of a new sanitary sewer system including service laterals *Sidewalk removal with new sidewalk replacement *Curb ramp installation *Decorative street lighting including all electrical work and conduit *Landscaping including new tree planting With the new waterline and sanitary sewer system in place, this will create new service laterals where new services could be attached. | Village of Lisbon | 60 | 0 to 30 days | \$2,630,419 |
| Columbiana | Street Garage | This project beautification and enhancement will attract new residence as well as new businesses in the Village of Lisbon in 2009, lost their street garage, during the 2009 year flood. This devastating flood went through both Columbiana and Mahoning Counties. Since the flood, the Village has been renting a garage from the county. With the help of the stimulus package, a new street garage could be a reality. This will ultimately save the Village \$12,000 per year. | Village of Lisbon | 30 | 0 to 30 days | \$550,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Columbiana | Paving Project: E Washington/5 Vine to Rt 45 | East Washington / South Vine to Route 45 Milling existing asphalt Apply a liquid tack to ensure proper adhesion Place and compact a 1" leveling course of 448-1asphalt Place and compact 1 1/2" of #448-1 top asphalt West High Street / Market to Market | Village of Lisbon | 10 | 0 to 30 days | \$59,455 |
| Columbiana | Paving Project: West High Street | Grind butt joints Apply a liquid tack to ensure proper adhesion Place and compact 1 3/4" of #448-1 top asphalt East High Street / Princeton to Market | Village of Lisbon | 10 | 0 to 30 days | \$32,009 |
| Columbiana | Paving Project: East High Street | Grind butt joints Apply a liquid tack to ensure proper adhesion Place and compact 1 3/4" of #448-1 top asphalt North Jefferson / East Chestnut to Elm | Village of Lisbon | 10 | 0 to 30 days | \$44,762 |
| Columbiana | Paving Project: North Jefferson | Grind butt joints Apply a liquid tack to ensure proper adhesion Place and compact 1 3/4" of #448-1 top asphalt | Village of Lisbon | 10 | 0 to 30 days | \$32,521 |
| Columbiana | Columbia Drive | McGuffey Drive (designated light industrial) and State Route 170 (five lanes) the highest traffic count road in our county. The construction of Columbia Drive will open up access to 100+ acres for economic development creating 200 jobs. This project is shovel ready; ready to go as all engineering plans are complete. The township is a subgrantee of a 629 Roadwork Grant for Phase I (approximately half the roadway), which is going to bid Spring 2009. Phase II will be completed upon receipt of additional funding. | St. Clair Township | 200 | 0 to 30 days | \$1,500,000 |
| Columbiana | Youth Tobacco Cessation | Reduce and educate students in grades 5-8 on risks of tobacco use. Provide schools with evidence based tobacco cessation programs for at risk students. Create sustainability of program through staff training at each school and development of proven anti tobacco campaigns in the grades 5 through 8. Director of program is certified as Towards No Tobacco (TNT) instructor. Work with schools to assist in Tobacco Free Schools initiative. Columbiana County Health Department formerly provided this service to schools in county. This project would include multiple county schools | Columbiana County Health Department | 10 | 0 to 30 days | \$150,000 |
| Columbiana | safe places | To provide a safe place for our children to go to school the indoor air is part of their health and with all the merca and staff infection going around we need to act now there is a product that the government used after 911 that i could get put in the school and keep our children safe also kills the avin bird flu vir.thank you | air,water,food and you | 15 | 31 to 90 days | \$300,000 |
| Columbiana | Columbiana County Repair Replacement & Resurfacing | Project consists of sub-base repairs, guardrail replacement and resurfacing on 26 miles of county roadway. The project mileage and cost can be increased or decreased to match available funding limits. | Columbiana County | 20 | 0 to 30 days | \$7,500,000 |
| Columbiana | Columbiana County Bridge Program 2009 | Specifications are 95% complete and the project could go to bid within two weeks of approval Project consists of completely removing and replacing four bridges with new structures and doing major rehabilitation work on one bridge by replacing the deck superstructure | Columbiana County Engineering | 15 | 31 to 90 days | \$1,500,000 |
| Columbiana | Glenmoor Sewer Project Phase 1 & 2 | The Glenmoor/Lacort/substation area has been placed under findings and orders from the Ohio EPA The project involves installing sanitary sewer services and 3 lift stations to 440 residential and business properties within the project area. Without this project many of those business may be required to close down due to lack of area for on site septic systems | Columbiana County Water & Sewer | 50 | 0 to 30 days | \$2,000,000 |
| Columbiana | Multi County School evidence based tobacco cessati | Project involves installing sanitary sewer services and 3 lift stations to 440 residential and business properties within the project area. Without this project many of those business may be required to close down due to lack of area for on site septic systems Project involves installing sanitary sewer services and 3 lift stations to 440 residential and business properties within the project area. Without this project many of those business may be required to close down due to lack of area for on site septic systems Project involves installing sanitary sewer services and 3 lift stations to 440 residential and business properties within the project area. Without this project many of those business may be required to close down due to lack of area for on site septic systems | Columbiana County Health Department | 10 | 0 to 30 days | \$100,000 |
| Columbiana | County Home Road Sewer Project | Project will provide sanitary sewer service and a package treatment plant that will serve the Columbiana County Jail, Multi-County Juvenile Detention Center, the MRDD Robert Bycroft School and Sheltered Workshop. These entities have been ordered by the Ohio EPA to cease operations of their individual treatment systems. The is more economical to provide one new larger system rather than 3 new individual system | Columbiana County Water & Sewer | 25 | 31 to 90 days | \$750,000 |
| Columbiana | Advanced Productivity Real Time Pay System | With lower incomes to buy these products. Currently workers are unaware in any Incentive Systems to Date what there real time cycle to cycle incentive Pay is. This system allows the manufacturing worker to see the Target rate and as they go over it in real time each cycle it Displays not only there payrate but their week to date paycheck, 100% of Rate = \$10.00 and hour 4 times rate is \$40.00 hour. We have had people making this much an hour. Herein Lies the IMMEDIATE HELP to the RECOVERY of Manufacturing 400%. Efficiency improvements dramatically reduce cost and this allows for a lower selling price and more affordable products that more people can afford to buy. This ADVANCED PRODUCTIVITY REAL TIME PAY SYSTEM, is currently being developed on a limited income has proved itself in that Our Company a Customer of JP MORGAN BANK that was in financial disperity last year was told that we were only one of 2 companies in 17 years that turned a near Bankruptcy Company around. This ADVANCED PRODUCTIVITY REAL TIME PAY SYSTEM could help save | HUMTOWN PATTERN CO DBA HUMTOWN PRODUCTS | 220 | 0 to 30 days | \$5,000,000 |
| Columbiana | Gulford Lake Sewer Slip Lining | Project consists of slip lining the existing sewer lines located along Gulford Lake. This would eliminate an existing I & I problem located along the shore line. This would also help protect this ODNR lake. | Columbiana County Water & Sewer | 5 | 31 to 90 days | \$250,000 |
| Columbiana | Hanover/Kensington Sewer Engineering Project | Project would finalize the sanitary sewer design for the hanover/Kensington area. This area has been placed under Ohio EPA findings and orders to install a sanitary sewer system which will also require the construction of a new treatment plant | Columbiana County Water & Sewer | 15 | 31 to 90 days | \$150,000 |
| Columbiana | New County Building/housing DIFS/Veterans/BOE | Construction Authority Board of Commissioners have completed the purchase of the land for the purpose of constructing a new facility in which to house the DIFS, Veterans, BOE. Currently these departments are enduring housing related health issues as well as significant overcrowding. Funding issues have prevented the board from being able to take action to correct these housing issues. The board plans to build a 50,000 square foot building on two floors intended to house the county programs. | Local government | 170 | 31 to 90 days | \$5,000,000 |
| Columbiana | Salt storage building | A 40x60x14 salt storage building at the Knox Township garage. Unlike other construction projects, this facility will be the first of it's kind for the Township, and is desperately needed. The construction will involve a reinforced concrete slab, vinyl siding, and 30 year shingles. If funded this project will address and eliminate a potential environmental hazard, and allow the Township to serve its citizen's and residents in a more cost effective, efficient manner. This will also make the purchasing power greater at a time when salt prices throughout the state have skyrocketed. All building materials will be purchased from local business in Knox Township, and both sub contractors reside in Knox Township. Overall this funding would stimulate five local business, in Knox Township. Become a cost effective project for the local government (Knox Township Trustees), and be a proactive initiative for the winter season with an effective product to use in ice, and snow control, therefore keeping the traveling motorist that use Knox Township roads safe. | Knox Township Trustee | 25 | 31 to 90 days | \$65,346 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Columbiana | Bridge replacement, road repaving | permit safe two way traffic. Repave eight miles of roads that are with-in complex rural communities, to provide a safe transportation to those residents. These four bridges are all close to becoming 100 years old, and I give our forefathers great respect in their initial construction. But by today's standards, these four bridges need replaced to continue a safe passage way for traveling motorists, local business, West Branch Students, and many agriculture families that travel the roads of Knox Township. In order to be competitive. Knox Township has 25 % to 30% of their residents still clinging to the roots of their forefathers in an agriculture setting, and transportation has become a major player in their daily needs. With out two lane bridges these farmers must rerout their suppliers, and themselves, which causes costly down time, that computes to loss of wages. The roads that need repaved are in dire need, and this would enhance the local economy as local business would be able to have greater accessibility from customers, and local residents would also benefit. Construction = grow expand a building and build a new building and remodel showroom. we would be helping the construction trades in our area and helping us to compete in the market place we are hopeful of creating some new jobs as we see a increase in business. | Knox Township Trustee | 100 | 31 to 90 days | \$625,000 |
| Columbiana | Saving our workers job's | thank you Scott Bowyer President Bowyer L & M Hardware | Bowyer L & M hardware Inc. | 10 | 0 to 30 days | \$500,000 |
| Columbiana | Grandstand | Replace existing grandstand (100 plus years old) with a newer and larger facility. Our county fair is 164 years old, and the grandstand is an important focal point of the fair every year where visitors enjoy daily entertainment. The current structure is full of safety concerns and needs replaced. We need to update and build a new grandstand is critical to the future of our fair; and we are facing the lack of financial resources needed due to the economical challenged state of our county. This project will help improve our aging fairgrounds for future generations to enjoy. | Columbiana County Fair | 30 | 0 to 30 days | \$1,000,000 |
| Columbiana | Residential Housing | Threshold Residential Services, Inc. is committed to providing quality residential services and vocational services to individuals with developmental disabilities in Columbiana County. Threshold's Open Door Workshop serves those in need with the provision of vocational development through day programming. Day programming accomodates up to 34 individuals at Threshold's workshop with a host of supportive and enrichment services, including leisure skills, vocational skills development, and socialization. Threshold's goals include providing continued support and training for the 31 clients at the workshop's day programming, and providing the building renovations at the workshop to enhance learning and training. | Threshold Residential Services, Inc. | 10 | 91 to 180 days | \$150,000 |
| Columbiana | YouthBuild Columbiana County | YouthBuild Columbiana County is a unique program that assists at risk young adults ages 18-22. The program provides one-on-one educational instruction so that students can earn their high school diploma. They spend 50% of their time in education related activities and the remainder of their 40 hour work week receiving instruction in the construction trades. The nine month program results in a high school diploma or GED as well as a preapprenticeship certificate (PACT). Students learn construction skills through classroom as well as hands on activities that benefit the community through the creation and rehabilitation of housing for low to moderate income residents or with projects that benefit the community at large. YouthBuild's staff endeavors to instill leadership skills and citizenship responsibility in the youth involved in the program. Students are paid minimum wage for time spent on construction-related activities. YouthBuild's goals include increasing class size to 40 students. | The Way Station, Inc. | 10 | 91 to 180 days | \$200,000 |
| Columbiana | Columbia Drive Roadway | Project includes construction of a new full depth, flexible pavement roadway, traffic signal modifications, installation of drainage facilities including the construction of a detention basin, installation of sanitary sewer and waterline facilities, wetlands mitigation, and the construction of turning lanes along McGuffey Drive. The completion of this project will provide access for the development of approximately 130 acres of industrial/commercial property. | St. Clair Township Trustees | 200 | 0 to 30 days | \$1,957,439 |
| Columbiana | East Pershing Street Extension - Phase II | Project includes construction of a new full depth, flexible pavement roadway, traffic signal modifications, installation of drainage facilities including the construction of a detention basin, installation of sanitary sewer and waterline facilities, wetlands mitigation, and the construction of turning lanes along McGuffey Drive. The completion of this project will provide access for the development of approximately 130 acres of industrial/commercial property. | City of Salem | 80 | 31 to 90 days | \$900,000 |
| Columbiana | City of Salem Street Improvement Program | Project includes re-surfacing of approximately 11,000 lineal feet of existing City streets that are in a deteriorated condition. Improving street conditions is important to maintain retail/office jobs and entice customers to frequent these establishments | City of Salem | 25 | 31 to 90 days | \$500,000 |
| Columbiana | Historic Camp McKinley Project | For Historic Camp McKinley Project Sandy Beaver District Boy Scouts of America Lisbon, Ohio Columbiana County This project involves the improvements and repairs needed to be done to Historic Camp McKinley to continue to provide quality programming through the Boy Scouts of America to the young boys of Sandy Beaver District and Buckeye Council, Canton Ohio. Such improvements and repairs would include as follows: Building an adjoining addition to the kitchen to make storage area for cooking supplies a walk in freezer and dairy cooler. Installation of a furnace for heating the entire dining hall, two convection ovens, two warmers. An automatic meat slicer, microwave with a defrost. Two commercial steamers. One large commercial mixer and various kitchen tools and tables. Installation of new water filter in kitchen, installation of a new dishwasher in new addition. Remodeling of mens and womens restrooms in dining hall. Construction of two 20ft. x 40ft. Cub craft shelters with one end enclosed using steel doors and tir | Sandy Beaver District, Boy Scouts of America | 50 | 91 to 180 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------------------|----------------|--------------------|---------------------------|
| Columbiana | Pump lines and Forced main Relocation | Relocate 1200' of 20" water line. Relocate 1200' of 12" water line. Relocate 1200' of 8" sewer forced main. These lines traverse an industrial site, and are 20' deep. All have broken on past occasions. Repairs are difficult and, due to the depth, dangerous. These lines would be relocated to a more convenient spot, and at a reasonable depth to facilitate future maintenance. These two water lines are the main pump lines delivering water to the entire community. Their reliability and reparability are essential for the safety of the community. | City of East Liverpool | 20 | 31 to 90 days | \$1,500,000 |
| Columbiana | East Liverpool WWTP Upgrade Modifications | These upgrades would expand the treatment capacity of the WWTP, and would allow for additional flows to the WWTP from Columbiana County. The County has been ordered to install sanitary sewers in certain areas. These sewers are designed, and they are currently arranging funding. There are four phases the county project. Additional treatment capacity is needed for the later phases. | City of East Liverpool | 20 | 181 days or more | \$5,866,665 |
| Columbiana | Hanoverton to Minerva Stream Cleaning Project | The Columbiana County One Stop office received a grant from the State of Ohio for stream cleaning in 2005/2006. This program created approximately 20 labor jobs for unemployed individuals. These individual worked along area streams to clean brush, trees and debris from the streams and stream banks to help alleviate flooding problems. The program was very beneficial to several areas of the County. This project would create the same program to place unemployed works into a program to clean brush, trees and debris from the Sandy and Beaver canal and also Sandy Creek from Hanoverton to Minerva. | Columbiana County | 20 | 31 to 90 days | \$1,500,000 |
| Columbiana | Stoy Street Water Line | The proposed Stoy Street water line will make available several additional home sites on the south side of the Village. In addition, the new water line will improve water flow and circulation in the areas of Stoy, Anglemyer, Spruce and Lisbon Streets | Village of Leetonia | 4 | 0 to 30 days | \$45,000 |
| Columbiana | SR 172 & Murray Road Intersection | The Ohio Department of Transportation has conducted a preliminary engineering study of this intersection and determined that a sight distance problem occurs to the east of Murray Road. The ODOT design manuals specify that the intersection site distance should be 500 feet; however, the intersection site distance at this intersection is only 180. This creates a severe problem for vehicles leaving from Murray Road and heading west on SR 172, often causing them to unknowingly pull out in front of on coming traffic. This project would relocate the intersection to the east and solve the site distance problem. It was noted that most resident vehicles turn east onto SR 172 proceed approximately 500 feet east and then do a U-turn into a driveway to then go west on SR 172 | Hanover Township | 10 | 181 days or more | \$350,000 |
| Columbiana | Lincoln Avenue Sewer Separation | Project is the separation of a combination sewer and would include 1,575 lineal feet of storm sewer and 12 catch basins. Project is on a compliance schedule list with the Ohio EPA. Failure to separate the combination sewer may result in fines against the Village or a moratorium on new sewer connections, either of which will present difficulties for the Village to attract new businesses | Village of Lisbon | 5 | 91 to 180 days | \$255,607 |
| Columbiana | Green, Cedar & Chestnut Streets Combination Sewer | Project is the separation of a combination sewer and would include 1,540 lineal feet of sanitary sewer and 550 lineal feet of storm sewer. Project is on a compliance schedule list with the Ohio EPA. Failure to separate the combination sewer may result in fines against the Village or a moratorium on new sewer connections, either of which will present difficulties for the Village to attract new businesses. | Village of Lisbon | 5 | 91 to 180 days | \$199,540 |
| Columbiana | Equalization Basin Addition @ WWTP | The existing waste water treatment facility includes a 100,000 gallon flow equalization basin for storage of wet weather flows that exceed the hydraulic capacity of the extended aeration components. Frequently these wet weather flows also exceed the capacity of the existing flow equalization basin. During such events, an overflow from the flow equalization basin transfers untreated waste water to a chlorine contact tank for disinfection prior to blending of the waste water with the treated effluent from the plant. An increase of the current flow equalization basin capacity to 250,000 gallons by construction of an adjacent basin will eliminate the overflows and discharge of unfuly treated waste water from this plant. Efficient waste water treatment facilities are important to attracting and retaining industry in the Village. | Village of Leetonia | 4 | 91 to 180 days | \$425,000 |
| Columbiana | Grit Chamber Replacement @ Waste Water Treatment P | The existing waste water treatment plant headworks are currently outdated chain and bucket type grit collection facilities that require frequent repair and replacement of worn and expensive parts. Retrofit of the existing headworks is necessary to eliminate these facilities and replace them with a modern grit removal process which will eliminate the recurring repair and replacement problem and, at the same time, drastically improve the grit removal efficiency, resulting in longer life expectancy and reduced maintenance on the downstream treatment facilities. Efficient waste water treatment facilities are important to attracting and retaining industry in the Village. | Village of Leetonia | 4 | 91 to 180 days | \$350,000 |
| Columbiana | South Side Fire Station | The Village does not currently have any fire station facilities on the southside of the heavily traveled Norfolk Southern Railway that divides the community. All the street crossings of the railroad are at grade crossings, except for the State Route 344 bridge crossing at the west end of the Village. When a train blocks the street crossings at the time of a fire call, response times are greatly increased by using the State Route 344 bridge crossing. The construction of the Southside Fire Station would allow equipment and firefighters to respond much quicker to fire calls on the southside of the Village. Much of the land available for development in the Village is located on the south side of the Village, having adequate fire fighting facilities is important to attracting and retaining business and industry. | Village of Leetonia | 2 | 181 days or more | \$320,000 |
| Columbiana | Renovation of Walnut Street | Walnut Street is the main thoroughfare North and South from the central business district of Leetonia north to the Village of Washingtonville and State Route 14. Much of Walnut Street is an old concrete street that is badly deteriorated. The renovation project will include asphalt overlays with paving fabric to provide a high quality surface with long life expectancy. The maintenance of this route through the Village is vital to the economic health of the community. | Village of Leetonia | 5 | 91 to 180 days | \$360,000 |
| Columbiana | North Market Street Sewer Separation | Project is the separation of a combination sewer and would include 2,340 lineal feet of storm sewer and 28 catch basins. Project is on a compliance schedule list with the Ohio EPA. Failure to separate the combination sewer may result in fines against the Village or a moratorium on new sewer connections, either of which will present difficulties for the Village to attract new businesses | Village of Lisbon | 5 | 91 to 180 days | \$377,292 |
| Columbiana | Public Safety Needs | Hoping to increase the manpower of our Police force by adding two Officers. Our community and the crime rate are growing at a faster rate than this agency. | ST. Clair Township Police Department | 2 | 31 to 90 days | \$480,000 |
| Columbiana | Reconstruction of High Street | The existing section of High Street between Oak Street and Pine Street is in need of reconstruction and drainage improvements. This section of street is on a steep grade and is in need of stabilization repairs. | Village of Leetonia | 0 | 91 to 180 days | \$90,000 |
| Columbiana | Renovation of Main Street | Main Street is the only east-west route through the Village on the north side of the railroad tracks. Main Street intersects the central business district of the Village and is an important route for commerce and for safety forces. The area of renovation is an area of old brick street with poor drainage. The project will include drainage improvements and asphalt overlay with paving fabric for long life expectancy. | Village of Leetonia | 5 | 91 to 180 days | \$250,000 |
| Columbiana | Equipment Upgrade | Desire is to upgrade our fleet of marked patrol cars by adding two new units | ST. Clair Township Police Department | 13 | 31 to 90 days | \$54,000 |
| Columbiana | Walnut Street Sanitary Lift Station | Project includes replacement of an outdated sanitary sewer lift station that is undersized and has no emergency back-up capability. Land owner adjacent to the existing lift station would like to expand his business, but cannot do so because of lack of adequate sewage capacity | Village of Washingtonville | 10 | 91 to 180 days | \$170,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Columbiana | Radio System Upgrade | Hoping to upgrade our outdated radio system to the state used MARCS system, multiagency radio communication system. | ST. Clair Township Police Department | 13 | 91 to 180 days | \$92,500 |
| Columbiana | Waste Water Treatment Plant Emergency Generator | Project includes installing an emergency generator at the Waste Water Treatment Plant (WWTP) to have the ability to operate the WWTP during times of power outages. In the past 5 months the Village has had complete power outages due to natural causes that have interrupted power for more than 24 hours. These outages cause many operational problems with the WWTP in attempts to avoid sewage overflows. Having the ability to operate the WWTP during power outages would greatly improve the health and safety conditions for the residents of the Village | Village of Washingtonville | 2 | 31 to 90 days | \$101,434 |
| Columbiana | East End Water Booster Station | Project includes a water booster station to increase water pressure for customers along State Route 14 at the east end of the Village. These customers currently suffer from extremely low water pressure and no fire protection, construction of this station would remedy these issues. Additional customers have requested service, but taps have not been made due to low pressure | Village of Washingtonville | 10 | 31 to 90 days | \$203,610 |
| Columbiana | Equalization Basin @ Waste Water Treatment Plant | Project includes installation of an equalization basin at the waste water treatment plant (WWTP) to manage inflow and infiltration problems in the system during wet weather. The Ohio EPA has been requesting the Village to address the inflow/infiltration problems. The addition of an equalization basin would allow the WWTP to store additional flows during rain events for later treatment, thereby avoiding sewage overflows. | Village of Washingtonville | 0 | 91 to 180 days | \$815,000 |
| Columbiana | TOWNSHIP SALT STORAGE BUILDING | ADDITIONAL SALT STORAGE 30'X40'X14' JOINING TO PRESENT STRUCTURE FOR THE STORAGE OF SALT. THE ADDITIONAL STORAGE WILL HELP CONTAIN SALT RUN OFF INTO NEIGHBORING CREEK/STREAM. | BUTLER TOWNSHIP | 6 | 31 to 90 days | \$50,000 |
| Columbiana | S.R. 45 Waterline Replacement Project | Wellsville. It is the only pipe bringing water into the Village. It broke 3 times over the past year, each time rendering the entire Village without water for an extended period. The project will consist of a 5,100 LF 16-inch waterline starting at Hibbits Mill Rd and running east to S.R. 45. The line will continue along S.R. 45 to Lisbon St., where an additional 3,600 LF of 12-inch pipe will be replaced. A separate project which BWD would like to include is the installation of a new 5,300 LF, 12-inch waterline extension along Campground Rd to create a loop. This loop would not only improve the water quality, but it would also create a redundant line to prevent the complete loss of service in the future if the S.R. 45 waterline is under repair. The total project budget of \$1,741,595 includes: \$1,132,175 for construction activities + 10% contingency on the Hibbits Mill Rd to S.R. 45-Lisbon St. waterline replacement + \$491,920 for construction activities +10% contingency on the Campground Rd loop | Buckeye Water District | 0 | 31 to 90 days | \$1,741,595 |
| Columbiana | The Family and Community Resource Center | community across the life span, including veteran's support group. Full-time number so access can be gained by all community members and families within the county. Provide educational outreach programs such as surviving job loss, special education, veteran's needs, etc. Partnered with the Ohio PIRC to sponsor the PUI program for a collaboration between parents and schools to increase student test scores. Goal is academic achievement through increase parental involvement. Collaborate with other organizations and agencies in our community with fund raisers, programing and projects, which will enhance the quality of life in our poverty stricken community. Provide home base therapy for those individuals who lack transportation or are home bound as with the elderly populations. Location will allow for the community garden project with the help of students from the alternative school located at Juvenile Court. Produce from garden can be sold or taken to banquet kitchens for community use, monies generated can be applied towards the program or another depending on the | The Family and Community Resource Center | 13 | 0 to 30 days | \$200,000 |
| Columbiana | Drop out prevention | Salem district had a significantly low rate of 83.2% last year. There is strong interest in drop out prevention in the county. The program is based on the Check & Connect model. It provides ongoing, comprehensive, coordinated and personalized attention for at-risk students. Resiliency research suggests that an important factor for student success is the presence of an adult to fuel motivation and important life skills. Referrals will come from the guidance dept. and wellness teams. Students who display risk indicators including weak grades in core subjects, poor attendance, and little involvement in school will be targeted. A monitor will facilitate by building relationships with students and closely monitoring attendance and performance. Intervention will occur at the first sign of trouble by helping students overcome obstacles and teaching them how to solve problems. These will include meeting with teachers to identify problems and encourage success. Demonstrated outcomes include: decrease in truancy and dropout rates and increase in credits and in school completion | Family Recovery Center | 5 | 91 to 180 days | \$220,633 |
| Columbiana | Overlay and Extend R/W, Reconstruct Aprons, Expand | Overlay and Extend Runway 7, Reconstruct and Expand Apron | Columbiana County Airport | 70 | 31 to 90 days | \$4,224,700 |
| Columbiana | East Pershing Street extension-Phase Two | safety corridor for Salem traffic to travel to the commercial end of Salem. Traffic is now contained on only one road which is heavily travelled, causing safety concerns. The completion of East Pershing Street will also open up a new commercial corridor for much needed jobs in the Salem area. We are shovel ready and could start as soon as April 1, 2009 providing instant construction jobs for stimulus in the economy. Thank you for your consideration. Mayor Jerry L. Wolford Salem, Ohio | City of Salem, OH | 50 plus | 31 to 90 days | \$995,000 |
| Columbiana | Lepper Library Addition and Renovation | The project involves adding approximately 8000 square feet of floor space to the 4300 square feet of public service floor space that the library currently has. Also, new shelving, furnishings, and additional computer stations will be added. The library's ability to provide quality service to the people of Lisbon has been limited due to a lack of room and especially from the inability to expand technologically. By undertaking this addition and renovation, the library will be better able to meet the needs of the citizens who depend on it and will be able to expand service to the previously handicapped. | Lepper Public Library | 15 | 31 to 90 days | \$2,800,000 |
| Columbiana | Industrial Park Sewage Pumping Station | This project consists of installing wastewater service lines as well as a sewage pumping station from State Route 62 bypass to State Route 165 (approximately 9,500 ft.) in order to promote the development of an industrial park in the area. The addition of these services to the industrial park would encourage more businesses to locate in the Salem area creating jobs and stimulating the local economy. | Salem Utilities Commission | 200 | 31 to 90 days | \$2,170,000 |
| Columbiana | Healthy Choices | conditions. Obesity. Obesity rates among youth and adults have risen. Community wide campaigns are necessary to raise awareness at all levels of the importance of healthy eating, food selection and physical activity. Our program reaches out to the community through schools, community activity centers, libraries and workplaces. We will raise awareness of health risks including diabetes, heart disease and hypertension. We will provide programs and provide resources that give people the knowledge necessary for making healthy eating choices. Programs will connect healthy eating themes into existing programs for example a summer reading program. We will match needs with community agencies including cooking healthy food on a budget and eating locally. We will work with local libraries to create and maintain healthy eating resources and databases. Another awareness tool will be newsletters at schools and agencies, payroll stuffers and grocery store handouts. We will share and promote resources that encourage citizens to eat healthy and become | Family Recovery Center | 7 | 91 to 180 days | \$295,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Columbiana | Wastewater Collection and Treatment Improvements | This project consists of installing a second 1.5 million gallon flow equalization basin, new 24- and 30-inch trunk sewers along Snyder Road from S. Lincoln Ave. to Newgarden Ave. and a number of sanitary sewer separation and rehabilitation projects in the Southeast section of the city. This project would protect the Little Beaver Creek from exposure to raw sewage, reduce equalization basin overflows at the wastewater treatment plant, protect residents from exposure to raw sewage that occurs during basement flooding and allow the city to comply with OEPA directives. | Salem Utilities Commission | 50 | 31 to 90 days | \$3,383,250 |
| Columbiana | Alternative Water Transmission Line | This project consists of installing three 24" water lines throughout the City of Salem and replace Roosevelt Area Water Tank II. This project would allow the city to provide its customer base with better water service | Salem Utilities Commission | 100 | 31 to 90 days | \$5,915,767 |
| Columbiana | water systems @ Col. Co. Fairgrounds | Extend new waterlines thru-out upper fairgrounds area, 2500 ft. of main with services points at various locations. This project consists of the extension or the extension or east versing st. to outcner ko. ano the reconstruction of Butcher Rd. to Cunningham Rd. | Col. Co. Agricultural Society | 25 | 0 to 30 days | \$50,000 |
| Columbiana | East Pershing Street Extension Phase II | The extension of East Pershing will provide an improved rear access to several retail shops and alleviate safety issues with the current ingress to the surrounding retail shops. | Salem Utilities Commission | 50 | 31 to 90 days | \$750,000 |
| Columbiana | water systems @ EDI-C & Robert Bycroft School | Extend water service lines from Furnace Rd. to Robert Bycroft School (SR 172) & Workshop (County Home Rd.). 1.75 miles of waterline. Tap-in fees, associated construction Needs to provide water service to these locations. | Col. Co. Board of Developmental Disabilities | 25 | 181 days or more | \$1,000,000 |
| Columbiana | Township Garage and Administration Building | This project consists of the construction of a new township garage/administration building to better protect township equipment and house administrative employees and township offices. Construction of this building would save the township money spent on equipment repairs and maintenance. This saved money could then be put to use on other needed township projects. Additionally, the building would serve as a community center that could be used for community events as well as in the case of an emergency. | Madison Township Trustees | 20 | 31 to 90 days | \$50,000 |
| Columbiana | Wellsville Flood Protection Rehabilitation | Replace two high voltage substations and one operational control panel that are an immediate safety hazard to the operators. Disposal of hazardous material in transformers. In 1942 a flood protection works had been constructed by the Army Corps of Engineers and remanded to the City of Wellsville. This is of a concrete wall 16 feet high, two pump stations, leys, and a series of valves and gates. The system is now 67 years old which had a life expectancy of 50 years. All of the parts are original and some need to be replaced. Along with protecting our citizens and their assets the system will also protect part of Baard Industries, Ohio River Clean Fuels plant and transportation and storage of raw and finished products from flood waters. | Wellsville Flood Protection Works | 1,000 | 0 to 30 days | \$850,000 |
| Columbiana | Township Road Reconstruction Project | adding guardrails to these roads, installing two water/sewer lines, installing drainage pipe, replacing 8 box culverts along township roads, widening 6 roads from one lane to two and repairing or replacing a number of one lane township bridges. Improving the condition of these roads should help increase the desire for businesses to develop and reside within Madison Township's boundaries. Additionally, the paving would increase safety for township residents who regularly travel these dirt roads. | Madison Township Trustees | 50 | 31 to 90 days | \$500,000 |
| Columbiana | Salt Shed | This project consists of the installation of a salt shed in the vicinity of the township garage This would allow the township to store more salt than they currently can and better protect the salt from inclement weather. This will, in turn, allow the township to provide better road treatment services for township residents and businesses. | Madison Township Trustees | 10 | 31 to 90 days | \$30,000 |
| Columbiana | Refurbishing Wellsville Sewer System | This project consists of replacing/replacing approximately 20 miles of sewer lines in the village of Wellsville. The Wellsville sewer system is over 100 years old and is in desperate need of being repaired/replaced. The dilapidated nature of the current system has caused many residents and business to flee the area. As such, replacement of the sewer system would encourage economic growth. | Village of Wellsville | 100 | 0 to 30 days | \$4,000,000 |
| Columbiana | Wellsville Paving Project | Wellsville has 20 miles of roads on which the original surface has worn down to the base. This project would consist of repaving these roads. As with the sewer system, the condition of the roads has added to the struggles that many businesses in this area face. New roads would encourage people to come to the Wellsville area to conduct business and would thus stimulate the local economy. | Village of Wellsville | 100 | 0 to 30 days | \$3,500,000 |
| Columbiana | Wellsville Sidewalk Repair/Replacement | This project consists of repairing/replacing approximately 20 miles of sidewalks in the village of Wellsville. Over the years, the sidewalks of Wellsville have disintegrated to the level of the street. Replacement of these sidewalks would address a variety of safety issues faced by the residents of the area as well as address the concerns of many downtown businesses. | Village of Wellsville | 100 | 0 to 30 days | \$3,000,000 |
| Columbiana | Demolition of Condemned Buildings | This project consists of tearing down 12 buildings in the downtown business district and residential area and turning these lots into public parking. This project will include demolishing the buildings, removing any potential asbestos and adding new drainage and paving. This project would address a serious safety concern posed by these abandoned buildings while simultaneously addressing an issue of parking faced by the village. These additional parking spaces would allow for more consumers to visit the businesses located in the downtown area. | Village of Wellsville | 100 | 31 to 90 days | \$2,680,000 |
| Columbiana | Single Bay Building to House Fire Engine | This projects cost estimate includes purchase of land, high output well, septic, heat and erecting building with insulation. | Middleton Township Trustees | 20 | 31 to 90 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---------------------------------|----------------|--------------------|---------------------------|
| Columbiana | Public Water and Sewer Project | Knox Township does not have any water or sewer, other than conventional backyard wells and septic systems. This project would involve the installation/upgrade of these vital services. The installation of these services would help create substantial economic growth for this struggling region of Columbiana County. A water plant, owned by the City of Sebring, sits in the middle of Knox Township. This plant could be refurbished and enlarged to provide water to Knox Township as well as the surrounding cities of Sebring and Beloit. This project could also potentially encompass the larger region of Butler, Hanover, and West Townships. Like Knox, these townships have no facilities of this nature and construction of such a facility would promote a larger economic surge and increased positive development. | Knox Township Trustees | 200 | 91 to 180 days | \$5,000,000 |
| Columbiana | Bridge and Culvert Project | Project consists of replacing/refurbishing up to 52 bridges and/or culverts in Knox Township. Knox Township is home to 52 bridges and culverts many of which were built in the early 1900's. While these structures have withstood the test of time, their size has often hampered economic growth. Expanding these one lane bridges to two lanes and increasing their maximum tonnage would give local businesses, residents and agriculture a better opportunity to thrive. | Knox Township Trustees | 40 | 31 to 90 days | \$200,000 |
| Columbiana | Demolition of Condemned Buildings | This project consists of the demolition of a condemned open building at 10733 Rochester Road, East Rochester, Ohio which is an attractive nuisance for neighborhood children. Additionally the site would be made available for future development post demolition | West Township Trustees | 20 | 31 to 90 days | \$13,850 |
| Columbiana | Little Beaver Creek Greenway Trail High Street Con | This project consists of the construction of 1.46 miles of surface transportation on the former Erie Lackawanna Railroad bed between High Street in the Village of Leetonia and a terminus of Bertelme Alley in the Village of Washingtonville. The construction will address proper drainage with culverts, blacktop surface instead of the current soil and old railroad bed ballast, the installation of barriers to keep motorized vehicles off the trail and the elimination of three intersections. This construction, once completed, will provide the approximately 100,000 users per year of the Little Beaver Creek Greenway Trail a safe transportation link between the Villages of Leetonia and Washingtonville. The completion of this project would further enhance economic development that relies on recreational and ecotourism in an area of relatively high unemployment and lower incomes. The availability of another 1.46 miles of transportation corridor will offer low-income families a no-cost option for outdoor activities close to home, as well as provide substantial health and social benefits. | Columbiana County Park District | 50 | 91 to 180 days | \$160,473 |
| Columbiana | ADA Restrooms/Waterline Project | Existing restrooms to make them available and accessible to disabled citizens and to meet the ADA and Department of Health standards. The fair currently has no facilities on the grounds that meet the criteria of the ADA. Replacing the water line system on the midway would enable the fair to provide concessionaries and restrooms with the water service needed to operate. Currently, the fair is confronted with a situation where constant leaks occur due to the antiquated nature of the current water line. This could lead to potential environmental and public health problems. Replacing or refurbishing the existing restrooms would solve a similar problem with the added benefit of making the fair more accessible to disabled citizens. | Columbiana County Fair | 100 | 31 to 90 days | \$200,000 |
| Columbiana | Gaurd Rail Instalation | This project consists of the installation of a gaurd rail at the intersection of Bayard Road and Sandy Springs Road and along the hillside on Buffalo Road. Currently this section of road presents a significant hazard to motor vehicles and requires a gaurd rail to improve public safety | West Township Trustees | 15 | 31 to 90 days | \$5,000 |
| Columbiana | Winona Road Widening | This project consists of widening and resurfacing Winona Rd. from the intersection of Knox School Rd (County Road #403) to the intersection of Twelfth Street (County Road #708). This portion of Winona Rd. is currently one lane. Widening this road would have two significant impacts on the community. First and foremost, the one lane portion of this road is a significant problem when school transportation and emergency vehicles travel it. Additionally, this area includes a few prime parcels of land that could be developed for either residential or industrial use. Currently, it is difficult to attract either business or residential development because of the transportation considerations. | Knox Township Trustees | 20 | 31 to 90 days | \$404,000 |
| Columbiana | Salt Shed | This project consists of constructing a shed to protect the road salt mixture used on county roads prior to application. The benefit of improved driving conditions on the county roads during winter weather would encourage travel and commerce in the area during the winter months | West Township Trustees | 10 | 31 to 90 days | \$30,000 |
| Columbiana | Blacktop Township Roads | This project consists of blacktopping three (3) miles of township roads that are in desperate need of repair. | Middleton Township Trustees | 25 | 31 to 90 days | \$400,000 |
| Columbiana | Administration and Maintenance Building Generator | This project consists of purchasing a new generator for the township administration and maintenance building so that it can become a short term disaster site in the case of an emergency | West Township Trustees | 5 | 0 to 30 days | \$13,850 |
| Columbiana | Culvert Pipe Replacement | This project consists of replacing various size large diameter culvert pipes on several township roads in order to decrease damage to the roads during heavy rainfall | Middleton Township Trustees | 5 | 31 to 90 days | \$10,000 |
| Columbiana | Tap-in Fees | The funds would cover tap in fees for approximately 45 residents to a proposed water line in one section of the township. | Middleton Township Trustees | 50 | 181 days or more | \$146,250 |
| Columbiana | Echo Dell Road Project | This project consists of widening approximately 6/10 of a mile of Echo Dell Road where it passes through Beaver Creek State Park. | Middleton Township Trustees | 25 | 31 to 90 days | \$350,000 |
| Columbiana | City Lake Restoration | Seven acre municipal lake has been silted by runoff soil over the past 30 years. The lake's recreational uses are extremely limited by the silt. In 2002/2003/2004 the Army Corps of Engineers Pittsburgh office conducted preliminary engineering and then surveying, environmental and archeological studies for a project to dredge the lake and restore appropriate wetlands at the west end of the lake. The project would create recreational opportunities and the project would also enhance flood control for East Palestine because it would increase holding capacity of the lake. Project also included a hydrologic study of the dam at the lake's east end. The project was put on hold when resources were diverted to the Iraq war. | City of East Palestine | 10 | 181 days or more | \$950,000 |
| Columbiana | Truck Replacement | This project consists of the replacement of one 2-1/2 ton dump truck and one 1 ton dump truck in order to better meet the needs of the residents of Middleton Township | Middleton Township Trustees | 5 | 0 to 30 days | \$150,000 |
| Columbiana | Salt and Ash Storage Shed | New salt and ash storage structure should be divided to hold salt, ash and a mixture of salt and ash with a roof to protect materials from rain and or snow. | Middleton Township Trustees | 5 | 31 to 90 days | \$50,000 |
| Columbiana | Day Road Culvert Project | This project consists of the replacement of an 8 foot diameter culvert | Wayne Township Trustees | 15 | 31 to 90 days | \$70,000 |
| Columbiana | Storage and Maintenance Garage Project | This project consists of the construction of a new garage facility for the maintenance and storage of township equipment. | Wayne Township Trustees | 5 | 31 to 90 days | \$209,440 |
| Columbiana | Backhoe Loader | This project consists of the purchase of a new loader backhoe. Currently the township is using the county loader backhoe which severely limits the amount of work that is able to be done | Wayne Township Trustees | 5 | 0 to 30 days | \$105,571 |
| Columbiana | Front Street Water Tower | This project consists of painting of the entire tank of the water tower to ensure its integrity, as well as lowering the overflow pipe and installing a proper screen and splash pad for the overflow pipe. Additionally the fence around the tank is in need of maintenance and the ladder on the tank is in need of modification to ensure security. | Village of New Waterford | 50 | 31 to 90 days | \$70,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-----------------------------|----------------|--------------------|---------------------------|
| Columbiana | Water/Sewer Line Project | This project will consist of replacing the existing sewer lines throughout the village (several hundred feet) with six inch plastic pipe. | Village of New Waterford | 50 | 31 to 90 days | \$694,466 |
| Columbiana | Community Building Restoration | This project will consist of making the community building bathrooms handicap accessible, replacing the roof, and adding siding to the exterior of the building. | Village of New Waterford | 20 | 31 to 90 days | \$321,895 |
| Columbiana | Sidewalk Restoration | This project consists of replacing approximately 23,660 square feet of 4' sidewalks and 8690 square feet of 5' sidewalks throughout New Waterford. | Village of New Waterford | 50 | 31 to 90 days | \$183,000 |
| Columbiana | Village Street Paving | This project will consist of paving approximately 8 miles of village streets that are currently chipped and sealed. | Village of New Waterford | 50 | 31 to 90 days | \$494,287 |
| Columbiana | Equipment Storage Building | This project consists of the construction of a building to store township equipment in. | Elkrum Township Trustees | 20 | 31 to 90 days | \$46,500 |
| Columbiana | State Route 14 Drainage Project | The building is necessary to provide safeguard and timely access to township equipment in order to provide continued service to township residence. The rising cost of oil based products prevents the township from constructing the needed storage building. | Fairfield Township Trustees | 10 | 31 to 90 days | \$200,000 |
| Columbiana | Roberts Road Culvert Project | This project will consist of constructing 1500' of 24" smooth interior pipe, excavating 3000' of drainage ditch, and cleaning out debris along Mill Creek below Old SR 14 and SR 14. | Fairfield Township Trustees | 5 | 31 to 90 days | \$40,000 |
| Columbiana | Crestview Road Pavement Project | This project would consist of replacing the existing 18" steel culvert with a four foot diameter dual wall plastic culvert. | Fairfield Township Trustees | 100 | 31 to 90 days | \$265,000 |
| Columbiana | Street Rehabilitation Projects | The current culvert is not sufficient to accommodate the water flow in heavy rains. Replacing the culvert would reduce road flooding in the area. | City of East Palestine | 100 | 0 to 30 days | \$420,000 |
| Columbiana | Generation System | This project consists of paving a 2.1 mile section of Crestview road between State Route 7 and Fairfield School Road. Additionally, a .15 mile section of the road with concrete curbs and gutters with have to be milled. | Center Township Trustees | 5-6 | 0 to 30 days | \$10,000 |
| Columbiana | Bridge Rehabilitation Project | Crestview Local Schools are located on this section of Crestview Road and for this reason there is a heavy amount of traffic in the area and heavy wear on the road that requires maintenance. | City of East Palestine | 100 | 0 to 30 days | \$240,000 |
| Columbiana | Salt Storage Building | This project consists of planing and resurfacing portions of Brookdale Avenue, West Martin Street, East Martin Street and Pleasant Drive. | Center Township Trustees | 25 | 31 to 90 days | \$47,842 |
| Columbiana | Grant Street Sewer Line | A generator system at the Township garage would allow us to continue services to the public in emergency situations. We have restrooms and shower facilities and a generator would allow us to act as an emergency shelter to the public if needed. | Center Township Trustees | 15 | 91 to 180 days | \$200,000 |
| Columbiana | Road Base | Project consists of replacing four bridges in the East Palestine Area. | Center Township Trustees | 30 | 91 to 180 days | \$115,000 |
| Columbiana | Water Distribution Systems Improvements | ash and grit for snow and ice removal operations. At this time we do not have a storage building. In the winter months the materials freeze and it makes snow and ice operations difficult to near impossible, which in turn effects the safety of motorists that travel the Township roads. It also affects the ability of emergency personnel (i.e. police, fire, ambulance) to respond to emergency situations and affects local schools, utility companies and the public as well. We also have concerns of environmental safety due to the materials laying on bare ground. | Center Township Trustees | 30 | 91 to 180 days | \$5,000,000 |
| Columbiana | Stuebenville Pike Road Slip | At a local level, it would provide dry materials to put on Township roads for better safety for the motoring public that travel the Township roads. A larger storage facility to store more salt, ash and grit for emergency weather conditions. It would also provide more materials on hand to assist other agencies if there was a salt shortage or if they ran out of salt. At the state and national level, it would allow us to better treat roads to serve fire, police and safety vehicles as well as school buses and the extend sewer line from State Route 49 to Grant Street at the city limits of Lisbon. Project would require approximately 2700 feet of line plus nine manholes. | Center Township Trustees | 6 | 91 to 180 days | \$3,750,000 |
| Columbiana | Bluff Street Road Slip | This is a very poor area. Most of the septic systems are failing and causing health problems. Surface water drainage has been installed. A sewer line would greatly improve health concerns to the area and help economic development to this area as well. | Center Township Trustees | 10 | 0 to 30 days | \$4,500 |
| Columbiana | Grant Street Guardrail | purchase ten thousand tons of asphalt grindings to be used as a road base for the reclaiming of Lisbon Dunggannon Road. The roadway has deteriorated to the point where it needs new base materials put in place. | Center Township Trustees | 200 | 0 to 30 days | \$754,600 |
| Columbiana | Public Safety Improvements | Restore the base and top coat to a safe condition to the motoring public. Anticipated little or no maintenance condition to a high volume road for a period of ten years or more. | Center Township Trustees | 30 | 91 to 180 days | \$5,000,000 |
| Columbiana | Waste Water Plant Improvements | This project consists of installing an emergency generator, powered by natural gas, at the police/fire station. The present generator is a 1967 unit that has been deemed unfit for further use. | Center Township Trustees | 30 | 91 to 180 days | \$3,750,000 |
| Columbiana | Storm Sewer System Upgrades | Installation of the generator will ensure that E-911, police, fire and EMS services are maintained in the event of a power failure. | Center Township Trustees | 6 | 91 to 180 days | \$3,750,000 |
| Columbiana | Water System Expansion | This project consists of installing a permanent roof over the water reservoir, installing a booster pump on Howell Road, extending a 10" water main 100 feet north from the water treatment plant to W. Main St., extending the W. Main St. water main through the railroad underpass for 600ft to meet the W. Martin water main, and replacing 1500 feet of transit water main beginning at East North Ave. and proceeding north to the Moore Ln. water tank. | Center Township Trustees | 50 | 0 to 30 days | \$99,000 |
| Columbiana | Sanitary Sewer System Expansion | To repair a 2000 foot road slip. Full depth repair, benching of hillside and repaving of roadway. | Center Township Trustees | 50 | 91 to 180 days | \$147,000 |
| Columbiana | Water System Expansion | To repair a 1500 foot road slip. Full depth repair, benching of hillside and repaving of roadway. | Center Township Trustees | 160 | 91 to 180 days | \$1,334,430 |
| Columbiana | Sanitary Sewer System Expansion | Installation of guardrail and drainage. | Center Township Trustees | 50 | 91 to 180 days | \$770,876 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Columbiana | Sewer Rehabilitation Projects | This project consists of replacing 1,835' of 8" pipe from Anna St. to Pleasant to E. Taggart as well as replacing 9 manholes, replacing 2,000' of 8" pipe from James St. to Sebring to E. Martin as well as replacing 6 manholes, replacing 1,360' of 8" pipe from Pearl Alley to Pleasant and from Pearl Alley to west of Washington as well as replacing 7 manholes, replacing 1,300' of 8" pipe from S. Market St. to near French as well as replacing 5 manholes, replacing 600' of 8" pipe and 3 manholes along West High Street behind East Palestine High School, replacing 663' of 8" pipe and 2 manholes along Oak St. to near the cemetery, replacing 300' of 8" pipe and 2 manholes near Anna St. to French, and replacing 200' of 8" pipe and 2 manholes along Vine St. | City of East Palestine | 160 | 91 to 180 days | \$715,380 |
| Columbiana | Clark Street Water Rehabilitation Project | This project consists of replacing 7,300' of 8" pipe of 8" pipe, 22 hydrants and watch valves and 22 main valves along Clark St. | City of East Palestine | 40 | 91 to 180 days | \$676,010 |
| Columbiana | Case 580 Super M Series 3 [Backhoe] | This project consists of the purchase of a Case 580 Super M Series 3 backhoe in order to greatly increase the amount of work the Township is able to accomplish. | Washington Township Trustees | 5 | 0 to 30 days | \$63,423 |
| Columbiana | Administrative/ Police Department Building | This project is the construction of a building to house the police department and the township's administrative offices. | Liverpool Township Trustees | 20 | 31 to 90 days | \$100,000 |
| Columbiana | Salt Storage Garage | This project consists are the construction of a new facility to house and protect road materials | Liverpool Township Trustees | 5 | 31 to 90 days | \$40,000 |
| Columbiana | Street Department Funds | The funds requested will be used for much needed maintenance on street department vehicles. The maintenance required includes new tires and a new exhaust system for a one ton truck | Village of Rogers | 5 | 0 to 30 days | \$910 |
| Columbiana | Police Department Funds | These funds will be used to provide much needed equipment for the police department. Some of the equipment needed includes: a new radio, a police cruiser light bar, and new uniforms | Village of Rogers | 5 | 0 to 30 days | \$2,555 |
| Columbiana | Village Hall Renovation | The renovation will include: a new faucet for the kitchen sink, new sinks and faucets for the bathrooms, new toilets, water line maintenance, a new exterior door, fire exit signs, and new paint and primer. | Village of Rogers | 5 | 0 to 30 days | \$1,945 |
| Columbiana | Municipal pool liner | To install a fiberglass liner in the municipal swimming pool. The pool was constructed in the depression era and currently loses 11,000 gallons of water per day through leaking drains and seams in the concrete. The liner will eliminate the water loss and subsequently, the need to replace the replacement water. | City of East Palestine | 3 | 181 days or more | \$115,000 |
| Columbiana | Ballfields restoration | To construct 1,980 ft of curb, with inlets and drains, for the purpose of diverting storm water from the baseball and softball fields at the City Park. Associated with this project would be the placement of 2,000 cu yds of fill in the outfield area of the baseball field in order to raise the field, which has sunken in the 70 years since the field was built. | City of East Palestine | 3 | 91 to 180 days | \$105,000 |
| Columbiana | Water Plant Replacement Project | Replacement of the existing Water Plant with a new plant New plant will be a 3 million gallon/day plant. Existing plant is 1 million gallon/day. | City of Columbiana | 60 | 31 to 90 days | \$12,235,000 |
| Columbiana | North-Side Water Line Project | 7,500 linear feet of 12" new water line. | City of Columbiana | 30 | 0 to 30 days | \$650,000 |
| Columbiana | South Side Fire Station | 4,614 square foot Fire Station | City of Columbiana | 25 | 0 to 30 days | \$940,000 |
| Columbiana | City Street Improvements | Project consists of milling the pavement and resurfacing on 34 high priority city streets | City of East Liverpool | 300 | 31 to 90 days | \$3,620,000 |
| Columbiana | ELPD COMPUTER REPLACEMENT | THE EAST LIVERPOOL POLICE DEPARTMENT WISHES TO REPLACE, IMPROVE, AND UPGRADE ITS CURRENT COMPUTER SYSTEM BY PURCHING 8 LAP TOP COMPUTERS AND STANDS FOR MOBILE DATA TERMINALS FOR PATROL CARS, AND 10 DESK TOP COMPUTERS FOR DEPARTMENT REPORTING AND DISPATCHING. THIS NEW SYSTEM WOULD PROVIDE UP TO DATE DATA FROM STATE COMPUTER SYSTEMS SUCH AS LEADS, BMV AND OHLEG AS INVESTIGATIVE TOOLS. THE EAST LIVERPOOL POLICE DEPARTMENT THROUGH ITS PARTICIPATION IN THE OLLEISN PROGRAM, COULD GREATLY ENHANCE ITS QUALITY AND QUANTITY OF INFORMATION SUBMITTED. DISPATCH WOULD BE GREATLY IMPROVED AND ENHANCE AND IMPROVE ITS OPERATIONS AS NOT ONLY A COUNTY 911 DISPATCH BUT MULTI-JURISDICTIONAL AGENCY DISPATCH WITHIN COLUMBIANA COUNTY | EAST LIVERPOOL POLICE DEPARTMENT | 2 | 31 to 90 days | \$30,000 |
| Columbiana | Main Street "Downtown Renovation" Project | Main Street Renovation New Sidewalks, curbs, storm sewers, paving, street lights. | City of Columbiana | 50 | 31 to 90 days | \$1,900,000 |
| Columbiana | Waste Water Treatment Plant Upgrade | Project includes waste water treatment plant upgrade to comply with Ohio EPA Findings for Phosphorus Removal. | City of Salem - Utilities Department | 10 | 181 days or more | \$14,000,000 |
| Columbiana | Alternate 20" Water Supply Main | South of the corporate limits of the City of Salem and the water storage facilities at Stewart Road. The only supply line to the water storage facilities is a 20" prestressed concrete water line that was put into service in 1953; this line has a capacity to carry 6 million gallons (mgd) of water per day. The existing prestressed concrete line requires special equipment and crews to repair line breaks. The line recently has suffered a couple line breaks, these breaks leave the City vulnerable to long outages of water supply. To provide a reliable source of water to the City, the Utilities Department has decided to explore replacement of the current one line supply system and develop a two line supply with an alternate 20" ductile iron water line on a different route. Both lines would carry water to the storage facilities at the same time, with near equal capacity of 6 mgd, the advantage would be that in the event of a line break or service on one line the other line could continue to supply water to the City and its approximately 32,000 customers. | City of Salem - Utilities Department | 10 | 181 days or more | \$5,173,000 |
| Columbiana | 1.5 Million Gallon Equalization Basin @ WWTP | Project includes an additional 1.5 million gallon equalization basin at the Salem City Waste Water Treatment Plant. Additional equalization basin will prevent sanitary sewer overflows. | City of Salem - Utilities Department | 5 | 181 days or more | \$1,918,000 |
| Columbiana | Recovery Center | estimated 1,000 adults will go through the 10 step recovery process with their peer mentors. Center will target veteran's who have returned from war by providing a support group for them and their family members. Family support is a key element to success in the recovery process. The center's location is on a working farm in the lower end of county, which is the most needed. Attendees will be evaluated with skill assessments, a plan will be provided with specific goals and objectives based upon that individual's needs. Local resources will be accessed to assist in accomplishing the goals of the plan. Work plan will be put in place, doing chores on the farm, getting a job, taking the GED, college attendance, something which offers realistic future goals for that individual upon completion of the program, which could take from 30-90 days. Individual could return to site and "give back" to others in the role of peer mentor, group facilitator, or out reach volunteer. Upon completion of a BCI, could begin a teen NA/AA support group. | The Family and Community Resource Center | 12 | 31 to 90 days | \$500,000 |
| Columbiana | Roosevelt Avenue Water Tank II | The project is a 500,000 gallon elevated tank on Roosevelt Avenue next to and at the same elevation of the existing 300,000 gallon elevated tank on Roosevelt Avenue. The east end service area not only serves Salem, but the Village of Washingtonville (100,000 gal./day) and the Village of Leetonia (200,000 gal./day) from this service area. To meet these demands the proposed project would place an additional 500,000 gallons of storage at a usable elevation for a total of 800,000 gallons for system service. The east end service area also includes large retail stores, such as Wal-Mart and Home Depot, according to ISO Guidelines the service area should provide 3,500 gallons per minute of fire flow with a duration of 3 hours to protect these buildings. Currently the existing 300,000 gallon elevated tank would provide only 1.4 hours of fire flow duration; by adding the additional 500,000 gallons of elevated water storage the fire flow duration would be increased to 3.8 hours, exceeding ISO Guidelines. | City of Salem - Utilities Department | 10 | 0 to 30 days | \$742,368 |
| Columbiana | WIND POWER ENERGY FOR FARM | INSTALL A 10-15 KW WIND POWER GENERATOR TO POWER FARM. ALSO ERECT A SMALL BUILDING TO STORE COMPONENTS & BATTERY BACK UP POWER. ALSO HOOK IN TO POWER GRID TO BE ABLE TO SELL EXTRA POWER BACK TO FIRST ENERGY. | COPE FAMILY FARMS | 0 | 31 to 90 days | \$65,000 |
| Columbiana | Snyder Road Sanitary Trunk Sewer | PROJECT INCLUDES A GRAVITY SEWER LINE TO REPLACE AN AGING SANITARY SEWER LIFT STATION THAT IS UNDERGOING DUE TO INDUSTRY EXPANSION. THE FORCE MAIN FOR THE EXISTING LIFT STATION HAS RECENTLY EXPERIENCED A BREAKAGE, THIS FORCE MAIN PASSES UNDER A STREAM AND THE NORFOLK SOUTHERN RAILROAD. BREAKAGES HAVE THE POTENTIAL FOR MAJOR STREAM POLLUTION, DISRUPTION TO THE RAILROAD AND TO THE INDUSTRY USING THE SEWAGE SYSTEM. PROJECT WILL SERVE TO RETAIN FRESH MEAT PROCESSING PLANT IN THE CITY OF SALEM AND ITS CURRENT JOBS. | City of Salem - Utilities Department | 450 | 181 days or more | \$1,804,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Columbiana | Southeast District Sanitary Sewer Inflow-Infiltrat | Project includes replacement of deteriorated sanitary sewers that are the cause of sanitary sewer inflow and infiltration causing overflows and excessive sewage treatment during rain and snow melt events. | City of Salem - Utilities Department | 4 | 181 days or more | \$789,000 |
| Columbiana | ELPD OFFICERS | TO HIRE TWO POLICE OFFICERS FOR THE CITY OF EAST LIVERPOOL. THE DEPARTMENT HAS AN AUTHORIZED STRENGTH OF 31 OFFICERS BUT CURRENT HAS ONLY 19 OFFICERS BECAUSE OF BUDGET CONSIDERATIONS. | EAST LIVERPOOL POLICE DEPARTMENT | 2 | 31 to 90 days | \$375,000 |
| Columbiana | Tech-Belt Region Bridges from Poverty to IT Jobs | school, to incorporate the Bridges out of Poverty program into our existing training programs. This will help to prepare those living in generational poverty with demonstrated IT aptitude with the skills and training necessary to successfully enter the world of work in the growing IT field. Evidence based curriculum and training developed by Aha!Process, Inc. will be used to assist community members and employers work with those in poverty understand their needs. Bridges Out of Poverty will be provided to all community partners under the auspices of the grant. Further, all students enrolled in the NewLife will participate in Getting Ahead in a Just Gettin' By World - a curriculum designed to assist those living in poverty successfully break free from the habits and issues common to those in poverty. The Circles mentoring and support program will provide assistance to those completing the Getting Ahead programming throughout their IT training and into employment in the world of work. | NewLife Technical Institute | 111 | 0 to 30 days | \$66,816 |
| Columbiana | ELPD MARCS RADIO SYSTEM | RADIO SYSTEM FOR USE BY THE EAST LIVERPOOL POLICE DEPARTMENT. ELPD IS A 911 PSAP AND PROVIDES MULTI-JURISDICTIONAL DISPATCHING SERVICES AND CURRENTLY OPERATING ON A RADIO SYSTEM THAT IS 18 YEARS OLD. BECAUSE COLUMBIANA IS MOSTLY RURAL AND REDUCED POLICE SERVICES FOR ALL LAW ENFORCEMENT WITHIN COLUMBIANA COUNTY, AGENCY'S AFTEN ARE REQUIRED TO PROVIDE ASSISTANCE TO ONE ANOTHER BUT ARE UNABLE TO DIRECTLY COMMUNICATE WITH EACH OTHER AS THE SHERIFF DEPT CURRENTLY USES THE MARCS SYSTEM AND THE DESIRE IS TO IMPROVE LAW ENFORCEMENT EFFORTS | EAST LIVERPOOL POLICE DEPARTMENT | 2 | 31 to 90 days | \$100,000 |
| Columbiana | ELPD CAMERA PROJECT | PURCHASE 7 PALM LANE LAW ENFORCEMENT BUILDING SANITARIAS FOR USE BY THE POLICE DEPARTMENT TO REPLACE AN AGED AND WORN OUT SYSTEM. THIS WOULD ENHANCE THE QUALITY OF ARREST BY PROVIDING BETTER EVIDENCE AND OFFICER SAFETY IN THE FIELD AS WELL AS SECURITY OF BOTH ARESTEE AND OFFICER AS WELL AS A MAJOR UPGRADE TO BUILDING SECURITY AND SAFETY. | EAST LIVERPOOL POLICE DEPARTMENT | 2 | 0 to 30 days | \$30,000 |
| Columbiana | West Side Sanitary Sewer | New Sanitary Sewer Lift Station, including 1000 feet of force main, 1000 feet of sanitary sewer line, 6 manholes. This would eliminate two lift stations, one with a confined space problem. Also opens up an area in the City for future development and job creation | City of Columbiana | 50 | 91 to 180 days | \$670,493 |
| Columbiana | State Route 14/7 Intersection widening project | Widening and installing turning lanes and updating the signals. | City of Columbiana | 30 | 91 to 180 days | \$1,513,127 |
| Columbiana | South Main Street Water Line Project | Consists of replacing water lines that were originally installed in teh 1930's | City of Columbiana | 30 | 31 to 90 days | \$435,750 |
| Columbiana | S.R. 14 Sewer Line Extension | Consists of extending the Sanitary Sewer lines to serve 150 acres for a future Industrial Park. | City of Columbiana | 50 | 91 to 180 days | \$1,241,025 |
| Columbiana | Industrial Park II | Eliminates two old existing Lift Stations. Increase human safety by removing a deteriorating confined space. | City of Columbiana | 300 | 181 days or more | \$4,170,025 |
| Columbiana | Columbiana County Educational Service Center refurb | Develop an additional Industrial Park, create permanent jobs Installation of streets, storm sewers, water lines, sewer lines, electric and gas. The Columbiana County Educational Service Center (CCESC) serves children from ages 3 - 22 who reside in each of the eleven school districts in Columbiana, as well as to students who attend the Robert Bycroft School for Mental Retardation/Developmental Disabilities. Our goal is to provide quality education through cooperative services. | Columbiana County Educational Service Center | 4 | 91 to 180 days | \$275,000 |
| Columbiana | Green at the CCESC | Over the past few years, the CCESC has grown to an organization that not only provides services to students in Columbiana County, but has expanded to serve those out of county as well. Last year, the CCESC Improvement Council implemented a Recycling and Environment Program, where staff members were encouraged to recycle. A Community Recycling Drop-Off Collection Center was also established on the grounds, providing residents of Columbiana County the opportunity to drop-off their recyclables in a more secure and handy environment. Later in the year, the Council was awarded a grant to plant flowers and plants, thus improving our environment. Both of these projects are models to the students and residents of Columbiana County, Ohio. The CCESC would like to enhance and expand upon our current emphasis of environmental education and energy conservation. With the monies, we would like to install wind turbines, energy efficient windows and solar panels to help reduce our energy costs and reduce the energy impact on the Earth. If possible, we would like to share and/or sell the additional energy that is generated to the neighbor agencies that are located within the business complex that we share. Within the complex, there is a community dental clinic, Head Start Program and VHC Building. We would like to become the model for other educational service centers within the State of Ohio. We would like to generate jobs that serve will be as a stimulus to create jobs for the future. | Columbiana County Educational Service Center | 10 | 91 to 180 days | \$250,000 |
| Columbiana | Salem/Perry Crime Watch | Salem/Perry Crime Watch was begun in 2008 in Salem and Perry Township. In the past year they have grown into an organization of over 130 members. They need to have their own office and office equipment to better serve Salem and Perrt Township. A grant of \$5,000 would provide the needed money to get them established. The Salem Police Department supports them and the crime rate in 2008 was down considerably, showing the benefit of crime watch in Salem. Mayor Jerry Wolford Salem, Oh | City of Salem, Ohio | UNKNOWN | 0 to 30 days | \$5,000 |
| Columbiana | East Lincoln Highway Project | Project consists of the complete reconstruction of East Lincoln Way in the Village of Lisbon as well as additional drainage improvements for out letting of the storm sewers and installation of new sidewalks. Construction Drawings are complete, all necessary Ohio EPA permits have been obtained, and environmental documentation is complete. When finalized, this project would help the Village of Lisbon and Columbiana County as a whole retain and create jobs as Lisbon is the County seat and East Lincoln Way is its main thoroughfare. | Village of Lisbon | 50 | 0 to 30 days | \$2,630,420 |
| Columbiana | State Route 45 Water Tower Project | THIS PROJECT WILL CONSIST OF THE CONSTRUCTION OF NEW WATER TOWER. The new water tower will increase water pressure for the entire northern section of Lisbon, including the Industrial Park which suffers from low water pressure. The tower would also affect an area that has been approved as the future site of the new Columbiana County Job and Family Service Building. | Village of Lisbon | 50 | 31 to 90 days | \$1,200,000 |
| Columbiana | Saltwell Road Booster Pump Project | The project consists of the construction of a new booster pump to increase water pressure in the Saltwell Road area. The new pump will increase the water pressure to an area that suffers from low water pressure which includes the Columbiana County Municipal Building and the Post Office. | Village of Lisbon | 20 | 0 to 30 days | \$260,000 |
| Columbiana | EPA Mandated Storm and Sewer Separation Project | The EPA has mandated that the Village of Lisbon complete eight sewer and sanitation separation projects on a yearly basis between 2008 and 2016. By completing the mandated projects, the Village of Lisbon will ensure that they receive no fines from the EPA for violating their compliance schedule and that there will be no limitations places on the number of new sewer connections allowed in the village. If no new connections can be made the Village will lose all ability to expand its economic capacity in order to create new jobs. | Village of Lisbon | 100 | 0 to 30 days | \$1,859,076 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------|----------------|--------------------|---------------------------|
| Columbiana | Street Garage Replacement | The Village of Lisbon has their street garage being heavily flooded in 2009 and requires the construction of a new one. The Village of Lisbon has been renting a garage from the county since the loss of their street garage, construction of a new garage will not only save the village money, but will also free up space for the county. | Village of Lisbon | 20 | 31 to 90 days | \$550,000 |
| Columbiana | South Side Fire Station | This project consists of constructing a new fire station on the south side of the heavily traveled Norfolk County Railway that divides the community. When a train blocks the street crossings, response times to locations across the tracks are greatly increased by use of the only available bridge crossing (State Route 344). The construction of the Southside Fire Station would allow equipment and firefighters to respond much quicker to fire calls on the south side of the Village. | Village of Leetonia | 20 | 31 to 90 days | \$329,450 |
| Columbiana | Walnut Street Renovation | will include asphalt overlays with paving fabric to provide a high quality surface with long life expectancy. Walnut Street is the main thoroughfare North and South from the central business district of Leetonia north to the Village of Washingtonville and State Route 14. The maintenance of this route through the Village is vital to the economic health of the community. | Village of Leetonia | 50 | 31 to 90 days | \$373,593 |
| Columbiana | Main Street Renovation | The renovation will be of an area of street that is old brick and has poor drainage. The Project will include drainage improvements and asphalt overlay with paving fabric for long life expectancy. Main Street is the only east-west route through the Village on the north side of the railroad tracks and intersects the central business district of the Village and is an important route for commerce and for safety forces. | Village of Leetonia | 50 | 31 to 90 days | \$256,578 |
| Columbiana | High Street Reconstruction | The existing section of High Street between Oak Street and Pine Street is in need of reconstruction and drainage improvements. This section of street is on a steep grade and in need of stabilization repairs. | Village of Leetonia | 50 | 31 to 90 days | \$92,641 |
| Columbiana | Township Garage Generator | This project consists of installing a generation system to operate the Township garage and municipal building in time of weather related power outages in order to maintain services to the public and provide a shelter in emergency situations. | Center Township Trustees | 6 | 0 to 30 days | \$10,000 |
| Columbiana | Salt Storage Building | This project consists of building a facility to store salt, ash, and grit for snow and ice removal operations in the Township. | Center Township Trustees | 25 | 31 to 90 days | \$47,842 |
| Columbiana | Sewer Line Extension | This project consists of extending a sewer line approximately 2700 feet from State Route 45 to Grant Street at the city limits of Lisbon. The project would include the installation of approximately nine new manholes. | Center Township Trustees | 15 | 31 to 90 days | \$200,000 |
| Columbiana | Lisbon Dunganon Road Refurbishing | This project consists of the purchase of ten thousand tons of asphalt grindings to be used as a road base for the reclaiming of Lisbon Dunganon Road. The road has deteriorated to the point where it needs new base materials put in place. | Center Township Trustees | 30 | 31 to 90 days | \$115,000 |
| Columbiana | Road Slip Repair | This project consists of repairing a 2000 foot road slip. It would be a full depth repair that includes the benching of a hillside and repaving the roadway. | Center Township Trustees | 30 | 31 to 90 days | \$5,000,000 |
| Columbiana | Road Slip Repair II | This project would consist of the repair of a 1500 foot road slip. It would be a full depth repair including the benching of a hillside, repaving the roadway, and the installation of a new guardrail and drainage system. | Center Township Trustees | 6 | 31 to 90 days | \$3,750,000 |
| Columbiana | Guardrail Upgrade | This project consists of replacing the post and guardrail on Grant Street which has deteriorated to the point where it cannot be repaired. | Center Township Trustees | 10 | 31 to 90 days | \$4,500 |
| Columbiana | Phase VI Water Line Improvement | est corporation limit. This water line will provide additional flow and pressure to industrial facilities located at the Columbiana County Port Authority Complex on Cherry Street. This improvement will also provide the Village the opportunity to rebuild the existing water distribution system in the southeast quadrant of the Village and will provide adequate water resources for the Village to grow eastward toward State Route 11 with commercial/industrial expansion. | Village of Leetonia | 50 | 31 to 90 days | \$682,963 |
| Columbiana | Elevated Water Tank Restoration | This project includes the repairs and recasting of the village elevated water tower. Repairs include new venting, ladder, improvements, new safety equipment, rebuilding of deterioration and recasting of the tank. Preservation of this tank is vital to the operation of the Village water distribution system. | Village of Leetonia | 100 | 31 to 90 days | \$166,600 |
| Columbiana | Stoy Street Water Line | This project consists of the construction of new stoy street water line The new water line will make available several additional home sites on the south side of the Village. The new water line will also improve water flow and circulation in the areas of Stoy, Anglemyer, Spruce, and Lisbon Streets. | Village of Leetonia | 100 | 31 to 90 days | \$49,527 |
| Columbiana | Grit Chamber Replacement at Waste Water Treatment | This project consists of replacing the existing grit chamber during a wastewater treatment plant removal process. The modern grit removal process will eliminate the current expensive repair and removal problem of the outdated headworks while at the same time drastically improving the efficiency of the grit removal system, resulting in longer life expectancy and reduced maintenance on the downstream treatment facilities. Efficient waste water treatment facilities are important to attracting and retaining industry in the Village. | Village of Leetonia | 100 | 31 to 90 days | \$377,300 |
| Columbiana | Equalization Basin Addition at Waste Water Treatme | This project consists of increasing the flow equalization basin for the waste water treatment facility from 100,000 gallons to 250,000 gallons through the construction of an adjacent basin. Increasing the flow equalization basin's capacity to 250,000 gallons will eliminate the overflows and discharge of incompletely treated waste water from the plant that frequently occur when wet water flows exceed the capacity of the existing basin. | Village of Leetonia | 100 | 31 to 90 days | \$447,100 |
| Columbiana | Water Plant Replacement | This project is in the final engineering phase which is scheduled to be completed by March 31st 2009. The project would be ready to bid in May 2009 or earlier if financing became available immediately. The City of Columbiana currently has an outdated Water Plant that is inefficient and possibly hazardous. This project would allow the city to provide more of its residents with fresh water. | City of Columbiana | 200 | 91 to 180 days | \$12,235,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Columbiana | North Side Water Line | The engineering is complete on this project which would replace the water line on the north side of the city. The current line is old and possibly hazardous. This would allow the city to provide more residents with fresh water. | City of Columbiana | 50 | 0 to 30 days | \$650,000 |
| Columbiana | Arrowhead Sanitary Sewer Lift Station | The engineering is complete on this project The project consists of the extension of sewer service to more residents. | City of Columbiana | 100 | 0 to 30 days | \$1,456,307 |
| Columbiana | South Side Fire Station | Construction of a new fire station. The architectural plans are complete. The City of Columbiana is separated by the Norfolk and Southern Railroad. The existing fire station sits on the North side of the tracks. This often prevents the fire department from responding to fires on the South Side of town as quickly as they would like to. Construction of a new fire station on the South side of the tracks would allow the Columbiana Fire Department to better serve the community by reaching scenes where there are needed more quickly. | City of Columbiana | 20 | 31 to 90 days | \$940,000 |
| Columbiana | Downtown Renovation Project | Includes new curbs, sidewalks, water lines, underground electric and paving for the Downtown area of Columbiana. Would stimulate the economic growth of the downtown area. | City of Columbiana | 100 | 91 to 180 days | \$2,500,000 |
| Columbiana | West End Sewer Project | Project consists of installing sewer lines, water lines and a lift station in the West End of the City. Plans and specifications on this project are complete. This project will provide the extension of sewer service to more residents. | City of Columbiana | 100 | 31 to 90 days | \$1,200,000 |
| Columbiana | State Route 14/7 Intersection Widening | Includes the construction of turning lanes and upgrading the traffic lights for the intersection. Preliminary engineering and safety study are complete. Would ease the flow of traffic for this heavily traveled intersection, bringing more people to the Columbiana area. | City of Columbiana | 50 | 31 to 90 days | \$1,513,127 |
| Columbiana | South Main Street Water Line | Project consists of replacing water lines that were originally installed in the 1930's. These water lines are on S. Main Street, Woodland Avenue, and Hyland Court. These water lines lie in some of the most heavily populated areas of the City and would therefore allow the city to provide houses and businesses with a better water supply. | City of Columbiana | 100 | 91 to 180 days | \$435,750 |
| Columbiana | State Route 14 Sewer Line Extension | Project consists of extending the sanitary sewer lines to serve 150+ acres for a future industrial park. This would also eliminate two existing sewer lift stations that serve the existing industrial park. The extension of these sanitary sewer lines to the future industrial park would stimulate the economy by encouraging businesses to relocate to Columbiana. | City of Columbiana | 50 | 91 to 180 days | \$1,241,025 |
| Columbiana | Industrial Park II Project | Project consists of installing streets, storm sewers, water lines and sewer lines in the area of a future industrial park. Establishing this industrial park would bring businesses and jobs to the Columbiana area. | City of Columbiana | 200 | 91 to 180 days | \$4,170,025 |
| Columbiana | City Hall Replacement | The existing City Hall was originally built in the 1930's and was last upgraded in 1978. The City changed from a village to a city after the 2000 census and has continued to see an increase in population. As such, the workplace for the employees is very limited and there is absolutely no room for expansion. A new City Hall would allow the City to properly staff the various services offered by the city, allowing the city to provide better services to its citizens and to continue to grow at its current rate. | City of Columbiana | 40 | 91 to 180 days | \$4,800,000 |
| Columbiana | Completion of U.S. Route 30 (Columbiana County) | Route 30 to Ohio limited access Route 11. Completion would create a direct from limited access from Chicago, IL to Pittsburgh, PA via Route 11 (Lake Erie to Ohio River Highway) to Route 7 in East Liverpool, to Route 22 in Steubenville, to Pittsburgh, PA & airport via Route 60. This section of highway is the missing link. New Clean air Board Energy Plant in Wellsville will generate heavy truck traffic. East Liverpool is the second largest port facilities in Ohio and largest on the Ohio River and the central Ohio market needs to open to trucking and other vehicular traffic. ODOT has done much of the engineering studies for the project and narrowed the route to two, then received public input the best choice. The project was shelved several years ago for lack of funding by TRAC. | Tri-State 1st Banc Inc. | 5,000 | 91 to 180 days | \$5,000,000 |
| Columbiana | Cope's Arena | I am proposing that once the engineering work is done with federal assistance that the cost of construction would be borne by bonding to be repaid by tolls, consistent with Governor's This project will build a Equine Training Facility that will create at least 50 jobs. The Columbiana County Educational Service Center (CCEC), located in rural Appalachian Lisbon, Ohio, serves children from ages 3 – 22 who reside in each of the eleven school districts in Columbiana, as well as to students who attend the Robert Bycroft School for Mental Retardation and Developmental Disabilities. Our goal is to provide quality education through cooperative services. | Cope Family Farms | 50 | 181 days or more | \$350,000 |
| Columbiana | Transportation Department Vehicle replacement & pu | Through our Transition Program, students ages 18 to 22 receive life skills programming, including community-based work sites that support the transition from school to the community upon graduation. The CCEC would like to purchase four new school buses. These new vehicles will be state-of-the-art, with reduced emissions in compliance with EPA regulations, and will be equipped with such features as two-way and CB radios, tinted windows and white roofs to reduce inside temperatures, low profile wheels to provide a flat floor for easier wheelchair hookup, and sound-absorbed roof to lower the level of noise that is typical to a school bus. | Columbiana County Educational Service Center | 2 | 181 days or more | \$340,000 |
| Columbiana | Street Repair | We will need 11 catch basins, 715 feet of pipe and the labor to install along streets in our village. The repairs will need to be done to reroute the water off of the streets to avoid ice collecting in the winter and excess water laying in the streets. | Village of Summitville | 0 | 31 to 90 days | \$20,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Columbiana | Museum of Ceramics Elevator for ADA | This important regional museum, located in a former post office building, does not have legally required access between exhibit floors as mandated by the Americans with Disability Act Accessibility Guidelines for physically handicapped persons. The project will install an elevator to create proper access and satisfy the requirements of the Americans with Disabilities Act. The specific work involves constructing a shaftway, installing the elevator cabinet, providing adequate electricity to the device, and making the final connections to the controls. Construction is expected to take three months and will employ carpenters, painters, electricians, and mechanics. | Ohio Historical Society | 5 | 91 to 180 days | \$100,000 |
| Columbiana | workshop expansion | Expand our current workshop space to allow centralization of services provided to our adult consumers, additional 15,000 to 20,000 sq. ft. | Columbiana Co. Board of Developmental Disabilities | 30 | 91 to 180 days | \$1,500,000 |
| Columbiana | Wind and Energy Farms | OHIO WIND & SOLAR ENERGY INC. HAS PLANNED TO LEASE USABLE UNUSED LAND OF OHIO HIGHWAY DIVISION ALONG ROUTE #7 FROM WELLSVILLE TO PORTSMOUTH. 1ST ENERGY INC. WILL PURCHASE ALL ENERGY PRODUCED FOR THE NEXT 30 YEARS. WE WILL ADD A NUMBER OF FARMS AS OUR STOCK IS SOLD TO PRIVATE INVESTORS. ADDITIONAL MARKETING WILL BE TO INDUSTRIAL AND COMMERCIAL FIRMS. WE HAVE THE SUPPORT OF THE COLUMBIANA PORT AUTHORITY, KENT STATE UNIVERSITY BUSINESS DEVELOPMENT AND THE VILLAGE OF WELLSVILLE. THANK YOU | Ohio Wind & Solar Energy Inc. | 52 | 0 to 30 days | \$4,900,000 |
| Columbiana | Ohio River Clean Fuels, LLC | Infrastructure preparations for a 53,000 barrel per day Coal/Biomass to Liquids facility in Wellsville, Ohio. Construction Employment: ranging 1500-3000 union scale jobs over five years. Permanent Employment: 400-450. | Columbiana County Port Authority | 450 | 31 to 90 days | \$10,000,000 |
| Columbiana | Senior Nutrition | We currently serve Longregate and home delivered meals to approximately 225 home bound seniors in rural Columbiana County. We have a waiting list of 60 seniors in need of home delivered meals and we will recruit 60 seniors in seven underserved townships in the county. At current funding levels our waiting list continues to grow and we are not able to enroll new customers as current customers come off of the program. Our funding has decreased approximately \$10,000 per year for the last three years. We will need to purchase a meal delivery truck to deliver meals, four conversion ovens to replace worn out equipment and to have enough oven space to heat the additional meals, one cooler and one chest freezer to handle the additional meals. We will also need to purchase similar supplies such as carts, utensils and other kitchen and truck supplies. We will need to hire a delivery driver creating at least one new job. We have twelve employees in the Senior Nutrition program which we will retain. We will also increase the number of hours worked for at least one part-time employee. | Community Action Agency of Columbiana County, Inc. | 1 | 0 to 30 days | \$180,000 |
| Columbiana | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Columbiana | Early Care and Education | Expand early care and education services provided at three existing locations for children birth - 13 years old, structural additions to buildings to accommodate 100 additional children - Open a new center in Wellsville to accommodate new businesses and provide quality Preschool Programs to assist the school district in improving their Achievement scores; provide educational programming for over 100 children - Maintain 50 existing jobs and create 50 new jobs - Expansion will allow us to service an additional 200 children in the county through existing partnerships with ODE and ODPS. All of our centers are Step Up To Quality Star rated centers and our Lisbon center is the only center in Columbiana County to hold a National Accreditation through NAEYC. This project will not only create educational opportunities for our children but will create and retain jobs in three of the largest communities in the county. These educational services are desperately needed to help local school districts improve their academic achievement. Early education opportunities lead to future success and success in life. This project means we are needed to continue to build a strong educational and learning community. | Cherished Children's ECDC, LLC | 100 | 0 to 30 days | \$750,000 |
| Columbiana | Technology to enhance communications | Funding will be used to purchase technology that will enhance communications. The technology will positively affect more than 15,600 students within our county. | Columbiana County Educational Service Center | 5 | 91 to 180 days | \$33,927 |
| Columbiana | Recycling Refractory Material | manufacture product (recycled) that is completely new. Storage also needs to be expanded. We recycle refractory material, ceramics and abrasives for a variety of industries, steel being the most prominent. We literally save thousands of tons of materials from being landfilled every year. We work with our customers to use 'waste' materials in new ways and now we are being asked to make products we cannot with our current equipment. This type of recycling is going to grow exponentially in the years to come as industry learns to reuse what is recyclable, saving millions of dollars in material purchase, and landfill cost. If we can re-start our project (last year we spent \$250,000 to begin this project we can hire 10 people immediately and another 5 within 12 months. We have current customers across the U.S. and overseas, clamoring for more material than we can produce with antiquated equipment. We have new customers asking us to produce new materials for them. Please visit our website at www.mrcrog.com for details on our products. | Steel Valley Firebrick, Recycling and Recovery, db | 20 | 0 to 30 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Columbiana | Sustainable Opportunity Development Center | Salem's Sustainable Opportunity Development Center will be the focal point of enterprise, entrepreneurial, and economic development activity for Salem, Ohio and the surrounding area. It will be responsible for instituting educational programs, development of an entrepreneurial environment, development of new business growth, and ensure that our rural community is connected to the larger economic development resources in the bigger cities in Ohio. Programs will include local incubation efforts, and individual training programs for workforce. The Center will provide for the identification of new business opportunity and the connections needed to local/regional business entrepreneurial services, (and partnerships) in order to propel these new businesses and jobs into our area. Expected outcome is a defined and focused full-time effort towards economic and enterprise development with hopes of bringing new jobs and growth to our local economy. | Salem Area Chamber of Commerce | 200 | 31 to 90 days | \$100,000 |
| Columbiana | CR 400 Georgetown Road Reconstruction | CR 400 Georgetown Road is a major rural collector that needs subgrade stabilization, drainage repairs and pavement. | Columbiana County | 20 | 0 to 30 days | \$3,500,000 |
| Columbiana | CR 425 East Liverpool Road Reconstruction | CR 425 East Liverpool Road is a major rural collector with a urban collector segment. The project involves concrete joint repair, subgrade repairs, paving and guardrail replacement. | Columbiana County | 20 | 0 to 30 days | \$1,300,000 |
| Columbiana | Knox School Road Reconstruction CR403-1.96 | Project consists of reconstruction of CR 403 which is a rural major collector. A new alignment will be constructed which will remove this section of road from an existing swamp. New wetlands will be created as part of the project. | Columbiana County | 20 | 91 to 180 days | \$500,000 |
| Columbiana | CR 430 Calcutta-Smith Ferry Road Drainage | CR 430 Calcutta Smith Ferry Road is a major rural collector. This project would install catch basins and buried drainage along a one mile section of this roadway | Columbiana County | 20 | 0 to 30 days | \$200,000 |
| Columbiana | Railroad Grade Crossing US 30 Minerva | Replace the badly deteriorated railroad grade crossing on US 30 and install new 12" LED flasher lights. US 30 is a very busy highway with heavy truck traffic. Excess weight trucks are frequently routed over this crossing. The present rubber surface has failed. The project would install a new concrete surface and replace the small 8" bulb flashers with ne high-intensity 12" LED flashers. Motorist safety will be improved by the surface upgrade and the new warning lights | Ohi-Rail Corporation | 6 | 31 to 90 days | \$112,000 |
| Columbiana | Appalachian Cottage Industries (A.C.I.) | by high poverty, poor levels of education, and lack of opportunity. The project will be in three phases First an internet store will be established to market authentic "Made in Appalachia" goods, quality assured by an expert jury. The on-line store will be managed by three employees from an office already established through the generosity of the Columbiana County Port Authority. A Director, under an Advisory Board, will be responsible for grants, P. R., and overall leadership. An Office Clerk will manage the office itself and serve as IT person for the store. Finally, an Office Coordinator will work directly with the artisans to provide education in money management, marketing, time management and record keeping. Members will be trained and encouraged to develop as independent businesses. We expect to recruit 100 artist entrepreneurs. After start-up, A.C.I. will support itself by dues and a percentage of sales paid by members. When the e-store is self-supporting, phases two & three will start and include catalogues for trade shows & a micro-loan program. | Alliance for Better Living in East Liverpool (A.B. | 103 | 0 to 30 days | \$70,000 |
| Columbiana | Railroad Grade Crossing Darlington Road Negley | Replace the deteriorated railroad grade crossing on Darlington Road in Negley. The present crossing surface has failed and the new crossing will replace all the crossing timbers. A railroad track switch located at the grade crossing will be rehabilitated and returned to use adding extra track capacity | Youngstown & Southeastern Railroad | 6 | 31 to 90 days | \$92,000 |
| Columbiana | Railroad Grade Crossing SR 517 East Fairfield | Replace the deteriorated and sunken railroad grade crossing at SR 517 near East Fairfield. The crossing surface has sunken and the project will raise the surface and replace the crossing with a new concrete surface. | Youngstown & Southeastern Railroad | 6 | 31 to 90 days | \$78,000 |
| Columbiana | Columbiana Distance Learning | Columbiana County ESC is requesting funds to provide five of our high schools with videoconferencing systems for the 2009-2010 school year. We plan to purchase Polycom systems for approximately \$7,000 per unit and an additional \$13,000 will go toward the technical support for the project for the year. These five high schools are planning to use the systems to receive Chinese foreign language. Due to budget cuts and the decrease student enrollment the school districts cannot afford to hire a teacher at each district. Using videoconferencing they would be able to share the cost for the teacher and provide their districts with Chinese as well as other courses. Columbiana ESC began providing videoconferencing to our schools 13 years ago and now those schools that received equipment in the first years need to be upgraded. | Columbiana County Educational Service Center | 2 | 91 to 180 days | \$47,000 |
| Columbiana | East Liverpool Area YMCA Indoor Sports Complex | The East Liverpool Area YMCA Indoor Sports Complex, would create jobs and opportunities for the people in this appalacian town. For the past 5 years the YMCA & Kent State Univ. have been working on revitalizing this neighborhood. Adding an addition to the current YMCA facility would greatly improve this neighborhood and town. The indoor sports complex will include a field where hundreds of youth and adults will be able to play indoor soccer, volleyball, flag football, tennis, field hockey, and lacrosse to name a few. Seating area for spectators will also be needed. Our climate controlled track would guarantee year round usage, for running and walking during our long cold winters and hot humid summers. An intergenerational multi media room where wireless computers will be made available for personal use and for classes. Multi purpose room will serve multiple functions, cardio-vascular studio, meeting room, and computer action games. Full service kitchen is needed to prepare lunches for after school snacks. Larger parking area is needed and improvements made to the current sidewalk and curbs. Architectural | East Liverpool Area YMCA | 55 | 31 to 90 days | \$2,000,000 |
| Columbiana | COL Capitalized maintenance | 2009 Capitalized Maintenance) This is a rural transit project whose funding flows through the Ohio Department of Transportation. | The Ohio Department of Transportation | 2 | 0 to 30 days | \$112,251 |
| Columbiana | Water Pump Lines and Sewer forced main relocation. | Total length for both 1200'. Relocate 10" forced sanitary sewer main. Total length 1200'. Both All three lines traverse an industrial site, and are 20' deep. All have broken, and cause great expense and a danger to our employees when making repairs due to the depth. The water lines transport all water produced at our WTP to the distribution system. We desperately need to undertake this project. | City of east Liverpool, Ohio, Water and Sewer Dept | 12 | 31 to 90 days | \$1,500,000 |
| Columbiana | Completion of State Route 45 city By-Pass to State | This project would complete the much needed State Route 45-62 Bypass around the Southern end of salem,Ohio.It would connect up with State Route 344 which connects State Route 11, the primary North - South corridor for Eastern Ohio.It would also provide a much needed overpass over the Norfolk-Southern railroad tracks which blocks fire and safety vehicles to the Southern part of the Salem community many times a day.With the Southern part of the Salem-Perry Township community building up, this is a safety issue that has needed addressed for many years The By-pass completion would also help companies located in the industrial section of Salem to access State Routes 344 and 11 without the need to travel through city streets, making the industrial area more attractive to new business locations and current business expansions. I hope that this project is given upmost consideration. Mayor Jerry Wolford,Salem,OH | City of Salem,Ohio | 200 jobs | 181 days or more | \$7,475,000 |
| Columbiana | New Elevated Water Storage Tank - North Side Water | The existing water service area is now serviced by a ground level stannoppe that provides inadequate water pressures (25-40 psi). The new elevated storage tank (250,000 gallons capacity) will increase the water pressures by 30 psi (55-70 psi). The new tank serves approximately one third of the Village's population (1000) and commercial/institutional water customers. Tank provides water supply for normal water use and supply for fire protection purposes | Village of Lisbon | 25 | 181 days or more | \$1,375,000 |

| Columbiana | E-Cab | Using proprietary motor technology developed by the Electric Vehicle Institute at Bowling Green State University, Johnson Motor Group will build and bring to the market place a mass transit solution in the form of E-Cab. Unlike conventional taxi cabs that run on fossil fuels this vehicle will possess an all electric drive. A complementary off grid charging station will be designed and developed as part of the system, giving the vehicles the ability to recharge without restriction. This project will begin the electrification of our mass transit system while at the same time bringing to the market place an effective charging station that can be used by the public. Industry analysts all agree that this kind of infrastructure must be present in order to garner public acceptance of the electric vehicle. This project will begin that necessary process. | Johnson Motor Group LLC | 2500 | 0 to 30 days | \$5,000,000 |
| Columbiana | Saltwell Road Water Booster Station Replacement/Re | The existing water booster station has reached its useful life (over 30 years old) and needs to be replaced. New booster station is proposed to be relocated to improve water pressures and water distribution. Provides water service for approximately one third of the Village's population (1000) and commercial/institutional water customers. Will also improve the water demand for fire protection (fire services, revenue, maintenance, line, water, pumping, etc. see attached site visit, see attached notes for details). East through the main route of Salem, State Route 14. The paving would continue East through downtown Salem which has great need of paving due to the large amount of truck traffic through Salem. It would end at N. Lincoln (State Route 62 North). It would continue North on State Route 62 to the Salem city limits. From there, ODOT plans to repave State Route 62 North to the Columbiana-Mahoning county line. This request would connect the Western approach to Salem which is being paved this year with the Northern approach to Salem, thus completing the entire needed paving of State Route 62 through the city of Salem | Village of Lisbon | 8 | 91 to 180 days | \$270,000 |
| Columbiana | Repaving of State Route 14 through Salem and State | MOBILE HOME PARK DESPERATELY NEEDS A COMPLETE RENOVATION OF PARKS WELL WATER DRINKING SYSTEM. INCLUDES PUMPS, HOLDING TANKS, CHLORINATION TANKS, ELECTRICAL COMPONENTS AND UNDERGROUND WATER LINE REPLACEMENT. WATER LINES BREAK QUOTE OFTEN DUE TO A VARIETY OF REASONS, WHICH IN TURN PUT EXTRA WORK LOAD ON OTHER COMPONENTS. The East Liverpool City Health District is a non-profit, local governmental agency with a primary focus of prevention, health promotion and providing health education services to the community regarding public health. There are many noted health disparities among our residents. The Federal Stimulus money will be used to fund an exciting and necessary Health Wellness & Prevention Program. Mobilizing community partnerships and working collaboratively to identify and solve health problems for the City of East Liverpool residents and those residing in the southern region of Columbiana County. Program Objectives/Outcomes: 1) Partner with local physicians, optometrists, dentists and other healthcare professionals to provide screenings, physician support and professional services 2) Inform, educate and empower people about health issues 3) Promote and encourage health behavior 4) Refer people to needed personal health services Program Interventions: Exams: well-baby, eye, hearing, vision, dental, sports physicals Screenings: STD, HIV, Cholesterol, BP, BMI, Blood Iron/uric acid | City of Salem, OH | 20-25 jobs | 91 to 180 days | \$753,650 |

| Columbiana | Lake Tomahawk Water Line Extension | The Lake Tomahawk water line extension is 17,478 linear feet of water line that will extend to Lake Tomahawk subdivision who has a limited supply of water. Lake Tomahawk subdivision receives all of its water from the lake and it is treated through an existing treatment facility that is currently outdated. During periods of little or no rainfall, the turbidity of the water is very high and at times a water advisory is instituted because of the low levels of the lake. This water line extension will also benefit the Village of Rodgers. At the present time the village residents receive their water from wells which have tested positive for bacteria. Rodgers is a depressed area with 61.7% of the families have low to Moderate income levels. Income. Provide a stand-by generator for our water treatment plant. Currently, we have no power in the event of a power outage. Several years ago, we upgraded our electrical switchgear so that a stand-by generator could be installed. We have not yet been able to fund the purchase and installation of a generator. In the event of an extended power outage, we are unable to run the WTP, and so are completely vulnerable in the event of an extended transition of our electrical supply to American Electric Power. A generator would allow the WTP to operate normally in the event of a power outage. Install 1,650 feet of storm sewer. Flood prevention Replace City Hall. Includes space for Police, EMS and possibly Fire Storm Sewer Maintenance. Storm Sewer Line Maintenance. Install tertiary filtration at the wastewater treatment plant. Addresses a human health risk. Reduce wet weather overflows. | Buckeye Water District | 10 | 0 to 30 days | \$1,500,000 |

| Columbiana | Waste Water Treatment Plant Updates Required by EP | waste water treatment plant per EPA. We are new owners purchasing this campground and Mobile Home park. The EPA is also requiring us to plumb lines to the septic system for 88 campsites. As new owners of the park our funds are depleted and we do not have the money to do the upgrades they are requiring with deadlines. The business opened the mid 1970's and provides jobs for several people. The current sewer treatment plants not only handles the septic for the campground but also a small mobile home park as well. The sewer treatment plant empties into a pond which drains in the waters of Ohio. The plant is old and really needs to be updated. The \$65,000 will hopefully update the system but the plumbing for the 88 will require additional funds in excess of \$140,000. The current campsites have holding tanks for septic and they are being emptied by a septic company weekly as needed. All of these financial requirements put on us by the EPA are putting us in a position for failure with the business. The mobile home tenants are also counting on us to provide | Paradise Lake Park Campground | 15 | 31 to 90 days | \$0 |

| Columbiana | Road Widening | There are 6 roads within Madison Township that need widened from one lane to two lanes for the safety of travelers. | Madison Township | 20 | 31 to 90 days | \$350,000 |
| Columbiana | Box Culverts | Box Culverts need replaced on 7 different roads throughout Madison Township | Madison Township | 20 | 31 to 90 days | \$450,000 |
| Columbiana | Drainage Pipe | 640 feet of new drainage pipe for use throughout township road | Madison Township | 10 | 0 to 30 days | \$25,000 |
| Columbiana | Guardrails | 10 miles worth of new guardrails for township roads | Madison Township | 20 | 31 to 90 days | \$1,584,000 |
| Columbiana | Blacktop | 25 miles of dirt roads exist in Madison Township. Improving condition of these roads should help increase the desire for businesses to develop and reside within Madison Township's boundaries | Madison Township | 30 | 0 to 30 days | \$1,000,000 |
| Columbiana | Water Lines | 6 miles of new water lines to provide safe drinking water for township residents | Madison Township | 40 | 0 to 30 days | \$950,400 |
| Columbiana | Sewer Lines | 2 miles of sewer lines provided for township residents, businesses and school | Madison Township | 40 | 0 to 30 days | \$528,000 |
| Columbiana | Water Lines | 5 miles of new water lines to supply good drinking water to township residents | Madison Township | 40 | 0 to 30 days | \$950,400 |
| Columbiana | Metz Road/Fairfield Avenue Sanitary Sewer | 2,250 lineal feet of 15" trunk sanitary sewer. Elimates one lift station, therefore saving energy cost (electric and natural gas). | City of Columbiana | 25 | 31 to 90 days | \$281,340 |
| Columbiana | Sales Growth | Two new hires in a sales position to create larger sales, more revenue, hire office help, internal accounting, & shipping position. | LeeCo Equipment & Services | 5 | 0 to 30 days | \$250,000 |
| Columbiana | Salem District Office Renovations | The project involves remodelling of an existing Division of Mineral Resources district office facility in order to convert underutilized space into staff offices, improve accessibility to the public, and to construct a garage to house a mine safety/rescue vehicle that would be dispatched from this location. Design of the office renovations is nearly complete and permits are currently being secured; bidding for construction could be initiated within the next 60-90 days | Ohio Department of Natural Resources | 15 | 91 to 180 days | \$400,000 |
| Columbiana | Baccalaureate in Sustainable Technologies | Technologies. The curriculum will be designed to leverage existing offerings in novel combination with new courses to address preparation of a 21st century workforce conversant with the needs of new energy technologies such as solar, wind and clean coal. Proposed is the hire of a Program Director at \$54 - \$70K, and addition of two faculty, one tenure track at \$44K, and one non-tenure track at \$38K, all positions plus 33% fringe, to be supported over three years leading to the program reaching self-sustainability. Such a course of study is expected to be vital in Columbiana County where unemployment is now reported to be 12.8% and the only major employer slated to open in the near future is a coal to liquid facility. Other industries in the area expected to benefit include a major hazardous waste incinerator, and coal and nuclear electric generating facilities. Furthermore, the workforce will be positioned to take advantage of alternative energy technologies encouraging the locating of new plants in our region. Campus will provide office space, IT, PR and clerical | Kent State University East Liverpool Campus | 3 | 31 to 90 days | \$606,480 |
| Columbiana | Colian's Stone Pit/Landscape Supplies | My husband and I own our own Landscape Supply Business. Weather in Ohio only permits seasonal jobs. We have had no income for 6 months. We are behind on our inventory payments that support our business. We would like to apply for assistance to "catch up" with our debt, including the home mortgage, which obviously we were unable to pay and utilities. We're so far behind that we're afraid of losing our business if we can't start out free and clear of this debt. The economy is the reason we're behind because people were unable to buy product in 2008 and we're worried about it being worse in 2009. | Colian's Stone Pit | 3 | 0 to 30 days | \$25,000 |
| Columbiana | debt reorganization | Capital investment in inventory and supplies to expand service areas, which would create employment opportunities within our company. Also to help us to pay down high interest loans we incurred in trying to make our payroll during tough economic period | Clearly The Best bottled water/A1 Beverages | 10 | 31 to 90 days | \$45,000 |
| Columbiana | Columbiana Technology Initiative | useful in all three of the current buildings within our school system. At the elementary building, the initiative will provide for a technology consultant that will work with the 16 core teachers in the building to help both staff and students integrate technology. The tech consultant will work side by side in the regular classroom as well as accompany teachers to the computer labs to assist staff on appropriate uses of technology. At the middle school level and high school level, teachers will each have a smart board to use in their classrooms. We need 6 more smart boards to complete the project. Each building will have an electronic student response system. Turning Technologies is located in Youngstown, Ohio and will provide these systems at a discounted rate. These systems will allow teachers to more accurately assess students and provide a differentiated instruction to the students as a result. At the high school, two classes will institute a pilot technology program involving a 1:1 solution using laptops and also a 1:1 solution using ipod touches. Training will be provided | Columbiana Exempted Village Schools | 4 | 0 to 30 days | \$126,300 |
| Columbiana | Wellsville development | New construction of retail grocery facility in Wellsville proper. We currently own the land we will construct upon, and convert the existing facility into some other revenue producing enterprise. We are credit worthy with over 50 years experience in the business. Thank you TPGjr | Close out City, Inc. | 75 | 31 to 90 days | \$1,500,000 |
| Columbiana | Ward Athletic Complex Renovation | The Ward Athletic Complex located on our school property is not handicapped accessible. The stands and the restroom facilities are in dire need of renovation to make them ADA compliant and safe for our community. The complex is used by school sponsored athletic teams as well as community child programs. The drawings for the renovation have been completed and the plan can be implemented immediately after the bid process takes place, probably within 30 days. The project will create jobs for our maintenance staff, concrete workers, athletic equipment sales company, electrical, plumbing and construction contractors. Improvements have been made to the surfaces used but further renovations could not be accomplished due to lack of financial resources. Maintenance on new facilities will save taxpayer costs in the future. | Columbiana Exempted Village Schools | 10 | 31 to 90 days | \$200,000 |
| Columbiana | Ohio Valley Technology Council | Western Pennsylvania, and Northern W. Virginia. OVTC's mission is to promote understanding, acceptance, and implementation of technology services in the Appalachian Upper Ohio River Valley. Since its inception, OVTC has hosted monthly meetings that provide opportunities for networking and project planning. One driving principle is that through collaboration, businesses and institutions can save money by sharing resources and expertise. OVTC also hosts quarterly luncheons featuring prominent speakers involved in growing the area's technology infrastructure. Monthly OVTC workshops provide demonstrations and discussions of software, hardware, and practical business and personal technology solutions. As OVTC has grown, it has become apparent that owning equipment and establishing an operations facility would help the organization train or retrain area residents for a technology-based economy. As part of the "Rust Belt," our area is filled with displaced workers desperately trying to get a foothold in the information economy. With a fully functional com | Ohio Valley Technology Council | 1000 | 31 to 90 days | \$95,000 |
| Columbiana | Salt Shed | 30' x 40' x 20' high Salt Shed. This would provide jobs to local contractors, excavators, lumber and cement yards, delivery drivers, salesmen, engineers and inspectors. This would also help to protect the salt supply from diminishing due to the elements of the weather. Therefore a Salt shed would help the township to save the taxpayers money in these hard economic times as well as create jobs for local and non local residents with the trickle down effect. Lastly a salt shed would help to keep the contaminants of Sodium Chloride from unnecessarily diluting into the ground | Madison Township | 40 | 0 to 30 days | \$55,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|------------------------------------|----------------|--------------------|---------------------------|
| Coshocton | Pearl Valley Cheese/Fresno Sewer | First, it will relieve the Coshocton County Commissioners of OEPA director's findings and orders to provide sanitary sewer to the hamlet of Fresno serving 47 households. Second, it provides for a treatment system and municipal sewer service to Pearl Valley Cheese which OEPA is close to ordering an alternative form of waste treatment threatening 30 existing, full-time jobs. Finally, the project allows the village of West Lafayette to increase capacity of its wastewater treatment plant to accommodate Fresno and Pearl Valley Cheese waste while also planning for growth at its 200+ acre industrial park. | Coshocton Port Authority | 35 | 31 to 90 days | \$7,300,000 |
| Coshocton | Coshocton County Criminal Justice Center | The present criminal justice facility was designed for 17 inmates but averages 68 inmates on any given day. It is anticipated that the facility will be forced to close in the near future idling several sheriff's department employees and causing the county to transport prisoners to other counties thus reducing efficiencies and road patrols. A new facility preserves 12-15 jail related positions and would create six new jobs | Coshocton Port Authority | 21 | 91 to 180 days | \$16,800,000 |
| Coshocton | Three Rivers Sanitary Sewer Improvement | The project involves construction of 2,000 linear feet of sanitary sewer to an unserved area which includes a 200-acre potential industrial park on the U.S. 36 Columbus - Pittsburgh corridor near Coshocton. It also would provide service to the recently opened Three River Fire District's main fire station | Coshocton Port Authority | 100 | 0 to 30 days | \$134,500 |
| Coshocton | Chip and Seal | chip and seal - 5 miles, 14 feet wide | Monroe Township - Coshocton County | 14 | 31 to 90 days | \$75,000 |
| Coshocton | Dist 5, PID 25049, MUS/COS SR 16 11.70/00.00 | Resurfacing with related work Mill 2" and fill 1-3/4" inter and 1-1/2" surface; joint repairs necessary | Ohio Department of Transportation | 78.3 | 31 to 90 days | \$2,729,159 |
| Coshocton | Fire Station/Emergency Shelter | construct holding/interview rooms in the police station. This project would address three critical needs for the 3500+ residents of Village of West Lafayette and surrounding areas. Currently, the Village has fire equipment in three different buildings, this project would allow all the equipment to be stored in a single building which would improve the fire department's response time to fire. Improved response time will reduce property damage and reduce injuries. The second critical need is for an emergency shelter for the 2300 residents of the Village. There have been two major power outages in the last 6 months one of which lasted for several days. The Village does not have a single emergency shelter with electrical power. The new fire station would have emergency power and could be used as a shelter. A small kitchen and bathroom facilities would be provided as part of the project. The third and last need is the police department does not have holding or interview rooms for criminal suspects. These rooms would improve the police departments investigations | Village of West Lafayette | 5 | 91 to 180 days | \$625,000 |
| Coshocton | Fire Station/Emergency Shelter | construct holding/interview rooms in the police station. This project would address three critical needs for the 3500+ residents of the Village of West Lafayette and surrounding areas. Currently, the Village has fire equipment in three different buildings, this project would allow all the equipment to be stored in a single building which would improve the fire department's response time to fire. Improved response time will reduce property damage and reduce injuries. The second critical need is for an emergency shelter for the 2300 residents of the Village. There have been two major power outages in the last 6 months one of which lasted for several days. The Village does not have a single emergency shelter with electrical power. The new fire station would have emergency power and could be used as a shelter. A small kitchen and bathroom facilities would be provided as part of the project. The third and last need is the police department does not have holding or interview rooms for criminal suspects. These rooms would improve the police departments investigations | Village of West Lafayette | 5 | 91 to 180 days | \$625,000 |
| Coshocton | Radiology Equipment Upgrade/Replacement | Replace of nuclear camera machine, upgrade MRI machine, upgrade to digital mammography machine, upgrade of CT machine, and replacement of ultrasound equipment. These equipment upgrades will improve the image quality available and will assist our new radiologist group to perform more invasive procedures here locally that in the past the patient would've had to have done at a facility out of our area. The availability of such equipment will assist us in our ability to recruit and retain radiologists and other primary care and specialist physicians to our rural area. | Coshocton County Memorial Hospital | 18 | 0 to 30 days | \$1,200,000 |
| Coshocton | Warsaw Physician Clinic | Replace current mobile home physician clinic in the warsaw community. This project is to construct a new permanent physician clinic in this community. The new clinic will help us better serve the citizens of this community and assist us in recruiting and retaining primary physicians in this rural community. | Coshocton County Memorial Hospital | 10 | 0 to 30 days | \$162,500 |
| Coshocton | Health Information Systems Project | This project also provide must need construction jobs for the Coshocton area community Our current clinical and administrative is being sunset and the entire system must be replaced. Included in this project will be total infrastructure upgrade for our hospital campus and physician owned clinics that include multiple locations. As part of this project our hospital will include implementation of a total electronic medical record and computerized physician ordering entry systems. This implementation would assist us with improvement in our quality and cost of care | Coshocton County Memorial Hospital | 630 | 31 to 90 days | \$4,800,000 |
| Coshocton | BR COS-CR501-B2 (JAC) | SFN 1631381 Construct 54' span, 24' wide Pre-stressed concrete beam bridge Existing Bridge Condition CA-4P SR-34.2 | Coshocton County Engineer | 6 | 31 to 90 days | \$150,000 |
| Coshocton | Broadband Fiber and Wireless Infrastructure | Coshocton County is seeking broadband infrastructure funding to accomplish several of its crucial broadband development goals. Through One Community, a fiber connection is proposed to run near the city of Coshocton. We have an opportunity to accomplish several critical community and county broadband accessibility goals by connecting to the fiber service. The need for broadband services is crucial element for successful business operations in our county and we have been unsuccessful in attracting small to medium businesses to outlying areas of the county. Additionally, our hospital, school system buildings, and a potential key Economic Development business park does not have access to high-quality fiber resources. Besides the 10-15 engineers, techs, and construction workers used to build the network, broadband access throughout Coshocton County is estimated to attract at least 10-15 new employers per year averaging 3-10 employees each for a total of 30 - 150 new jobs per year. Additionally, high-quality broadband access will allow home-based businesses to operate that would allow 50-75 new workers | Coshocton County | 310 | 0 to 30 days | \$966,000 |
| Coshocton | BR-COS-CR17-B7 (BED) | SFN 1632795 Construct 45' span, 24' wide, pre-stressed concrete beam bridge. Existing Bridge Condition CA-4P SR-41.7 | Coshocton County Engineer | 6 | 31 to 90 days | \$124,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Coshocton | BR-COS-CR436-B3 (WAS) | Just Build Bridge Replacement Construct 26' span, 24' wide pre-stressed concrete beam bridge Existing Bridge Condition GA-4P SR-43.4 | Coshocton County Engineer | 6 | 31 to 90 days | \$72,000 |
| Coshocton | BR-COS-CR297-B2 (VIR) | Just Build Bridge Replacement Construct 29' span, 24' wide pre-stressed concrete box beam bridge Existing Bridge Conditions GA-4A SR-44.7 | Coshocton County Engineer | 6 | 31 to 90 days | \$80,000 |
| Coshocton | BR-COS-TR88-B2 (CRA) | Just Build Bridge Replacement Construct 33' span, 24' wide pre-stressed concrete box beam bridge Existing Bridge Condition GA-5P SR-25.3 | Coshocton County Engineer | 6 | 31 to 90 days | \$91,000 |
| Coshocton | BR-COS-TR4-B10 (PIK) | Just Build Bridge Replacement - SFN 16-12426 Construct 49' span, 24' wide pre-stressed concrete box beam bridge Existing Bridge Condition GA-4A SR-31.5 | Coshocton County Engineer | 6 | 31 to 90 days | \$135,000 |
| Coshocton | BR-COS-TR220-B2 (MLK) | Just Build Bridge Replacement - SFN16-12329 Construct 36' span, 24' wide pre-stressed concrete box beam bridge Existing Bridge Condition GA-5P SR-32.6 | Coshocton County Engineer | 6 | 31 to 90 days | \$100,000 |
| Coshocton | BR-COS-TR373-B8 (NEW) | Just Build Bridge Replacement - SFN 16-11047 Construct 36' span, 24' wide pre-stressed concrete box beam bridge Existing Bridge Condition GA-4P SR-33.7 | Coshocton County Engineer | 6 | 31 to 90 days | \$100,000 |
| Coshocton | Dist 5, PID 25049, MUS/COS SR 16 11.70/00.00 | Resurfacing with related work Mill 2" and fill 1-3/4" inter and 1-1/2" surface, joint repair as necessary | Ohio Department of Transportation | 78.3 | 31 to 90 days | \$2,729,159 |
| Coshocton | BR-COS-CR410-B7 (LIN) | Just Build Bridge Replacement - SFN 16-12481 Construct 32' span, 24' wide pre-stressed concrete box beam bridge Existing Bridge Condition GA-5P SR-34.8 | Coshocton County Engineer | 6 | 31 to 90 days | \$88,000 |
| Coshocton | BR-COS-TR89-B2 (CRA) | Just Build Bridge Replacement - SFN 16-11741 Construct 33' span, 24' wide pre-stressed concrete box beam bridge Existing Bridge Condition GA-5P SR-35.3 | Coshocton County Engineer | 6 | 31 to 90 days | \$91,000 |
| Coshocton | Energy Efficiency Project | Upgrading our boilers which supply heat and hot water throughout the building by adding economizers and heat recovery controls to improve efficiencies. Installation of state of the art temperature control systems to reduce energy consumption and improve comfort. Complete lighting upgrades to reduce energy consumption and improve working environments | Coshocton County Memorial Hospital | 0 | 0 to 30 days | \$270,000 |
| Coshocton | Pleasant Valley Water Treatment Plant | The project will fund the installation of a wastewater treatment plant and elevated water storage tank for approx. 120 residences and an industrial area. Potable water will encourage growth and job retention and creation in the area. | Board of Coshocton County Commissioners | 40 | 181 days or more | \$2,000,000 |
| Coshocton | Fresno and Pearl Sanitary Sewer and Force Main | The project will fund the installation of a sanitary sewer line to the industrial area at Fresno and provide sanitary sewer service to the Pearl Cheese Company. Fresno is under ODEPA Findings and Orders while the Cheese Factory is under ODEPA Mandates to limit effluent land application. The project will allow job retention and growth at the cheese factory and create approximately 10 - 15 construction jobs. Without grants the residential rates for the 47 residents of Fresno will be \$150 + per month. Phase I of the project is approved by the ODEPA and could be offered for public bidding immediately. | Board of Coshocton County Commissioners | 40 | 31 to 90 days | \$3,592,834 |
| Coshocton | Village of Warsaw Waterline Extension to River Vie | Install 2 1/2 miles of waterline and a 250,000 gallon concrete storage tank to relieve the River View Local Exempted Jr. High and High School of its deteriorating system providing safe, sanitary water as well as adequate water pressure for fire protection. | Ohio Regional Development Corp. | 50 | 91 to 180 days | \$250,000 |
| Coshocton | North Corridor Water System | The project will fund the installation of a wastewater treatment plant and elevated water storage tank for approx. 40 residences, school facility, airport, commercial, industrial and recreational area. Potable water will encourage further growth and job retention and creation in the area | Board of Coshocton County Commissioners | 40 | 181 days or more | \$2,000,000 |
| Coshocton | Wastewater Treatment Plant Improvements | The Village of West Lafayette needs to perform an expansion on their treatment plant in order to accommodate the waste from Fresno, Pearl Valley Cheese Factory as well as providing capacity for the proposed West Lafayette Industrial Park. Improvements are also needed to meet the proposed ODEPA phosphorous regulations. Components of the projects are: conversion of the equalization basin to a nitrification basin, UV disinfection chamber, sludge storage building improvements, new effluent meter, etc. | Village of West Lafayette | 10 | 91 to 180 days | \$500,000 |
| Coshocton | RS-COS-CR6- (10.54 miles) | Resurface CR 6 from Muskingum County Line to SR 16. Minor Collector | Coshocton County Engineer | 15 | 31 to 90 days | \$1,454,000 |
| Coshocton | RS-COS-CR19- (4.92 miles) | Last Resurfaced 1999, 2000, 2001 Resurface CR 19 from TR22 to SR 60- 4.92 miles Minor Collector | Coshocton County Engineer | 15 | 31 to 90 days | \$593,000 |
| Coshocton | RS-COS-CR24 - (10.00 miles) | Last resurfaced 1996 Resurface CR 24 from SR 60 to SR 83 - 10.00 miles Minor Collector | Coshocton County Engineer | 15 | 31 to 90 days | \$1,263,000 |
| Coshocton | RS-COS-CR271- (0.71 miles) | Last resurfaced 1998, 2001, 2002 Resurface CR 271 from SR 83 to Coshocton City Limits - 0.71 miles Major Collector | Coshocton County Engineer | 15 | 31 to 90 days | \$107,000 |
| Coshocton | RS-COS-CR425- (2.84 miles) | Last Resurfaced 1998 Resurface CR 425 from CR 10 to SR 93- 2.84 miles Minor Collector | Coshocton County Engineer | 15 | 31 to 90 days | \$326,000 |

| Coshocton | RS-COS-CR4 - (8.54 miles) | Last resurfaced - 2000 Resurface CR 4 from CR 436 to SR 541 - 8.54 miles Local Road | Coshocton County Engineer | 15 | 31 to 90 days | \$1,027,000 |
| Coshocton | RS-COS-CR5 - (0.30 miles) | Last resurfaced 1993, 1994 Resurface CR 5 from CR 151 to SR 93 -0.30 miles Minor Collector | Coshocton County Engineer | 15 | 31 to 90 days | \$40,000 |
| Coshocton | RS-COS-CR151 - (1.93 miles) | Last resurfaced 1997 Resurface CR 151 from CR 5 to SR 751 - 1.93 miles Minor Collector | Coshocton County Engineer | 15 | 31 to 90 days | \$223,000 |
| Coshocton | RS-COS-CR343 - (3.87 miles) | Last resurfaced - 1995 Resurface CR 343 from CR 25 to CR 19 - 3.87 miles Minor Collector | Coshocton County Engineer | 15 | 31 to 90 days | \$466,000 |
| Coshocton | RS-COS-CR343 - (3.87 miles) | Last resurfaced 1994, 1998, 1999 | Coshocton County Engineer | 15 | 31 to 90 days | \$466,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Coshocton | Airport Runway Extension | Airport Runway is now 4,099 feet. We want to extend to 5,000 feet in order to facilitate corporate business aircraft and to attract new business for our county. Most business aircraft needs 5,000 feet to land. Total project is \$900,000.00 and we have donations from foundations and other sources of \$250,000.00. All that is needed is the other \$650,000.00. This will give us a very important tool for our economic development and infrastructure program. Outcome will allow more aircraft to land and give our county officials another very valuable tool to attract new businesses to our county. Engineering has been completed for the entire project. | Coshocton Richard Downing Airport | 5 | 31 to 90 days | \$650,000 |
| Coshocton | Papermill Road industrial park site readiness | The proposed sewer line extension and expansion of Papermill Road provides service to the existing Ohio Central Rail headquarters, a limestone supplier to American Electric Power in nearby Conesville, the anticipated Coshocton County Criminal Justice Center, and location of the Green Steel Corporation | Coshocton Port Authority | 72 | 91 to 180 days | \$615,000 |
| Coshocton | Washington Heights Assisted Living Facility | Ohio Central Rail will retain all 20 positions with the possibility of adding 5 full-time positions. Green Steel will create 40 full-time jobs initially with pay ranges of \$12.00- \$16.00 an hour. Washington Heights will be a 60 unit assisted Living Facility, equipped with all amenities of direct care facility, in the economically depressed area of Coshocton County, this facility will have a significant impact of job opportunities. | ADR and Associates | 350 | 31 to 90 days | \$2,500,000 |
| Coshocton | Industrial Park Access Road | Install 1560 linear feet of storm sewer and associated catch basins to the proposed West Lafayette Industrial Park. The storm sewer would start at the corner of Oak Street & Main Street to the corner of Johnson Street & Main Street. After the storm sewer is installed the existing village street will be resurfaced to handle the additional truck traffic to the proposed 200 acre Industrial Park | Village of West Lafayette | 5 | 91 to 180 days | \$375,000 |
| Coshocton | Cruiser Project | response time to secure incident scenes and save lives. This office has felt the unfortunate affects of major budget crunch for the past two years. We currently utilize a total of (30) thirty vehicles, both special purpose and cruisers, in our day to day patrolling of Coshocton County. This equates to high mileage vehicles with a high down time for maintenance repairs and making these vehicles unreliable. The cruisers that we currently have on patrol are averaging 150,000 miles. The vehicles are on patrol and relied upon to respond to incidents daily. The need for replacement vehicles is evident however with replacement vehicles comes the need for appropriate replacement vehicles to respond anywhere within the county. Therefore this office proposes funds to be allocated for the purchase of (8) eight SUV's and related equipment and supplies for installation into the SUV's. fully equipped and ready for Homeland Security deployment. These vehicles would be equipped with Bio-terrorism suites, masks, winches and Mobile Data Terminals. | Coshocton County Sheriff's Office | 1 | 31 to 90 days | \$224,000 |
| Coshocton | Modile Data Terminals Project | population of 36,112 and a patrol area of 572 square miles including the City of Coshocton. This office is somewhat unique as we contract with the City of Coshocton to provide Law Enforcement to the citizens of the City. This contract between the City and this Office has been in existence since 1981. However, much of the coverage area is very rural and rugged due to mining projects over the last one hundred years. The need for better and more reliable communications equipment is evident, as without communications you are not able to be informed or be able to inform the appropriate response teams. This office has applied for numerous grants for the purchase of Mobile Data Terminals (MDT's) without success. The MDT's would allow our patrol unit to view mapping diagrams of factories and other locations during a vital situation. Some other viable advantages would be the capability of having instant access to chemical and bio-terrorist data bases, silent dispatching, photo | Coshocton County Sheriff's Office | 0 | 91 to 180 days | \$266,205 |
| Coshocton | Employee ReCall Project | population of 36,112 and a patrol area of 572 square miles including the City of Coshocton. This office is somewhat unique as we contract with the City of Coshocton to provide Law Enforcement to the citizens of the City. This contract between the City and this Office has been in existence since 1981. However, our community has suffered some severe setbacks with three of our largest factories either closing or laying off. They were Pretty Products, J/J Shaw Barton and The Longaberger Basket factory. These three were vital to the stability of Coshocton County and now we are losing Government revenues through income tax, property tax - do to foreclosures and sales tax just to name a few. In 2001 we employed 65 people and today only employ 59. Our staff is decreasing while the work load increases by way of mandates to the increased crime. The request is for six employees over a three year time frame. We are hopeful for our community in making a recovery within that time. | Coshocton County Sheriff's Office | 6 | 31 to 90 days | \$975,000 |
| Coshocton | HILL STREET/HIGH STREET WATERLINE CONNECTOR PROJEC | INSTALL A 6" WATERLINE BETWEEN TWO MAJOR STREETS IN HISTORIC ROSCOE VILLAGE WHICH IS PART OF THE CITY OF COSHOCTON. THIS LINE IS CRITICAL TO FINISH THE LOOP IN THE SYSTEM SO AS TO PROVIDE BETTER WATER QUALITY AND INSURE ADEQUATE FIRE PROTECTION FOR THE NORTHWEST SIDE OF THE CITY | CITY OF COSHOCTON | 5 | 31 to 90 days | \$31,120 |
| Coshocton | SHERIDAN ROAD/KENSINGTON ROAD WATERLINE UPGRADE PR | INSTALL A LARGER(8") WATERLINE BETWEEN TWO MAJOR STREETS IN THE CITY OF COSHOCTON. THIS LINE IS CRITICAL TO INCREASE THE CAPACITY OF WATER TO BE DELIVERED TO A CRITICAL AREA AND INSURE ADEQUATE FIRE PROTECTION FOR THE SOUTHEAST SIDE OF THE CITY | CITY OF COSHOCTON | 5 | 31 to 90 days | \$197,950 |
| Coshocton | Extend runway and taxiway | Extend runway and taxiway. | Coshocton County Regional Airport Authority | 7 | 31 to 90 days | \$400,000 |
| Coshocton | WATER STREET STORM SEWER RELIEF PROJECT | IMPROVE THE STORM DRAINAGE SYSTEM IN THE COMMERCIAL AREA OF THE CITY. THIS PROJECT IS NECESSARY TO UPGRADE THE DRAINAGE IN THE SOUTH SECOND STREET AREA. THIS STREET IS BEING UPGRADED AS A MAJOR PROJECT THIS SUMMER UNDER THE SMALL CITIES FEDERAL/STATE PROGRAM AT THE COST OF ABOUT \$1 MILLION. BETTER DRAINAGE WILL PROTECT THIS STREET FROM FLOODING AND PRESERVE THE CONDITION OF THE STREET ONCE IT IS REPAVED | CITY OF COSHOCTON | 5 | 31 to 90 days | \$32,375 |
| Coshocton | PINE STREET STORM SEWER PROJECT | IMPROVE THE STORM DRAINAGE SYSTEM IN THIS AREA OF THE CITY. THIS PROJECT IS NECESSARY TO UPGRADE THE DRAINAGE IN THE PINE STREET AND SOUTH LAWN AVENUE AREA. MAJOR FLOODING TAKES PLACE NEAR AN ELEMENTARY SCHOOL CAUSING LOTS OF TRAFFIC PROBLEMS. THE SANITARY DRAINAGE SYSTEM IN THIS AREA OF THE CITY BACKS SEWAGE INTO HOMES AND BUSINESSES WHENEVER THERE IS EXCESSIVE PRECIPITATION DUE TO SOME BOTTLENECKS IN THE SANITARY SYSTEM. THIS RELIEF LINE WILL PROVIDE A FIX TO THIS PROBLEM. | CITY OF COSHOCTON | 5 | 31 to 90 days | \$110,487 |
| Coshocton | BUENA VISTA DRIVE STORM SEWER PROJECT | THE STORM DRAINAGE SYSTEM IN THIS AREA OF THE CITY NEEDS TO HAVE AN ADDITIONAL 12" STORM DRAIN ADDED DUE TO EXCESSIVE SPRING WATER FLOODING OF THE STREET. THIS IS REALLY A PUBLIC SAFETY PROBLEM ESPECIALLY IN THE WINTER MONTHS AS THE WATER FREEZES CAUSING VEHICLE ACCIDENTS IN THE AREA. | CITY OF COSHOCTON | 5 | 31 to 90 days | \$18,020 |
| Coshocton | HILL STREET CURBING & STORM SEWER IMPROVEMENT PROJ | THE STORM DRAINAGE SYSTEM IN THIS AREA OF THE CITY NEEDS TO HAVE ADDITIONAL CURBING AND CATCH BASINS ADDED TO CORRECT EXCESSIVE FLOODING OF HISTORIC ROSCOE VILLAGE. BOTH COMMERCIAL AND RESIDENTIAL PROPERTIES HAVE LONG SUFFERED FLOODING IN THIS AREA DUE TO INADEQUATE STORM DRAINAGE. | CITY OF COSHOCTON | 8 | 91 to 180 days | \$403,700 |
| Coshocton | WATER WELL FIELD REDEVELOPMENT | THE CITY OF COSHOCTON NEEDS TO REDEVELOP THEIR 9 WATER WELLS IN ORDER TO MAINTAIN ADEQUATE WATER SUPPLIES FOR THE CITY OF COSHOCTON AND THOSE PARTS OF COSHOCTON COUNTY SERVED BY THE CITY'S WATER SYSTEM. ADDITIONALLY, THESE WELLS ARE CRITICAL TO THE COSHOCTON CITY FIRE DEPARTMENT, THE ONLY 24 HOUR STAFFED FIRE DEPARTMENT IN A CITY OF 11,500 AND A COUNTY OF 35,000 RESIDENTS. | CITY OF COSHOCTON | 15 | 31 to 90 days | \$270,000 |
| Coshocton | West Lafayette industrial park | Through a public/private partnership, the Coshocton Port Authority has placed a high priority on developing this 205 acre site known as the West Lafayette industrial park. Already serviced with village water, sewer, electric, gas and broadband, this proposal allows for an access road to be constructed into the site along with a 20,000 and 50,000 square foot building pads. The proposal allows for water and sewer, already on site, to be extended to each building pad. | Coshocton Port Authority | 750 | 91 to 180 days | \$489,100 |

Located within 8 minutes of I-77 and one mile from the four lane U.S. 36, the site is in a designated enterprise zone and soon to be Joint Economic Development District.

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|-------------------------------------|----------------|--------------------|---------------------------|
| Coshocton | Tuscarawas Township Sanitary Sewer Extension | Tuscarawas Township plans to extend sanitary sewer service to property owned by Coshocton County Port Authority that is ready for industrial and business development. In conjunction with this extension, the township also plans to extend sanitary sewer service to two residential areas of the township that are currently served by failing on-lot systems. Wastewater will be conveyed to the City of Coshocton's wastewater treatment plant. Specific improvements include 12,035 linear feet of 8-inch sanitary sewer lines, 4,694 linear feet of 12-inch sanitary sewer lines, 3,296 linear feet of 18-inch sanitary sewer lines, 65 manholes, and 235 service connections. At least 150 jobs are expected to be created/retained by this project. | W.E. Quicksall and Associates, Inc. | 150 | 181 days or more | \$3,009,000 |
| Coshocton | Justice Center Bunk Project | Coshocton County is a rural community located 72 miles northeast of Columbus, Ohio with a population of 36,112 and a patrol area of 572 square miles including the City of Coshocton. This office is somewhat unique as we contract with the City of Coshocton to provide Law Enforcement to the citizens of the City. This contract between the City and this Office has been in existence since 1981. However, the City does not help fund any of the Justice Center's operations. The result is an overcrowded jail and lack of funds from the County, creating a need to install more bunks for inmates. We currently have a recreational room that we can turn into a dorm style housing area. This would allow us a more secure facility as the bunks would be bolted down instead of the inmates sleeping on cots, that can be used as weapons or the inmates sleeping on the floor. | Coshocton County Sheriff's Office | 0 | 0 to 30 days | \$15,000 |
| Coshocton | SHERIFF CRUISER | THE CITY OF COSHOCTON CONTRACTS WITH THE COSHOCTON COUNTY SHERIFF'S OFFICE TO PROVIDE POLICE PROTECTION FOR THE CITY. THIS YEAR'S CONTRACT DOES NOT ALLOW FOR A CRUISER TO BE PURCHASED. FOR THE SAFETY OF THE CITY'S 11,500 RESIDENTS WE NEED TO MAINTAIN OUR CRUISERS AND SIMPLY CANNOT BECAUSE OF BUDGET CUTS THIS YEAR. | CITY OF COSHOCTON | 1 | 31 to 90 days | \$22,775 |
| Coshocton | HIGH PRESSURE BREATHING AIR COMPRESSOR | THE CITY OF COSHOCTON'S FIRE DEPARTMENT GREATLY NEEDS A HIGH PRESSURE BREATHING APPARATUS TO BE PURCHASED THIS YEAR BUT ARE RESTRICTED BY BUDGETARY PROBLEMS. THIS APPARATUS IS NEEDED TO PROVIDED SAFETY FOR OUR 16 FIREFIGHTERS AS THEY PROTECT THE CITY'S 11,500 RESIDENTS DURING ANY FIRE EMERGENCY. | CITY OF COSHOCTON | 16 | 31 to 90 days | \$51,962 |
| Coshocton | CITY CRIME AND PUBLIC SAFETY PERSONNEL | THE CITY OF COSHOCTON CONTRACTS WITH THE COSHOCTON COUNTY SHERIFF'S OFFICE FOR POLICE PROTECTION. BECAUSE OF BUDGETARY PROBLEMS 4 DEPUTIES WILL NOT BE FUNDED THIS YEAR, A 25% REDUCTION. PROTECTION FOR THE CITY'S 11,500 RESIDENTS WILL BE GREATLY COMPROMISED BECAUSE OF THIS REDUCTION. | CITY OF COSHOCTON | 4 | 31 to 90 days | \$220,000 |
| Coshocton | West Lafayette industrial park amended request | Through a public/private partnership, the Coshocton Port Authority has placed high priority on developing this 205 acre site known as the West Lafayette industrial park. Coshocton County is likely the only county in Appalachian Ohio without a legitimate, competitive business park and has lost thousands of manufacturing jobs in recent years. Already serviced with village water and sewer, electric, gas, and broadband, this proposal allows for an access road to be constructed into the site along with a 20,000 square foot and a 90,000 square foot building pad(s). The proposal also allows for water and sewer, already on site, to be extended to each building pad. The proposal calls for replacement and improvements to a drainage system running through the property. Located within 8 minutes of I-77 and one mile from the four lane U.S. 36 (Columbus - Pittsburgh corridor), the site is in a designated enterprise zone. | Coshocton Port Authority | 750 | 91 to 180 days | \$789,100 |
| Coshocton | Ohio 541 waterline extension project | The construction of approximately 19,000 linear feet of water lines will allow an estimated 154 households to gain access to safe, clean, public drinking water. These households presently do not have access to public drinking water. | Coshocton Port Authority | 25 | 91 to 180 days | \$2,200,000 |
| Coshocton | Royalty Enterprises, Coshocton, Ohio, Clean Fuels O | Existing station, higher capacity compressor needed to meet demand | Clean Fuels Ohio | 35 | 0 to 30 days | \$50,000 |
| Coshocton | Airport Fencing for Homeland Security | Fence around the airport for security and Homeland Security | Coshocton Richard Downing Airport | 5 | 31 to 90 days | \$480,000 |
| Coshocton | Security System for Airport | Security Camera System for Airport Terminal building and premises, ramp areas, aircraft hangars and runway and runway perimeter. | Coshocton Richard Downing Airport | 5 | 31 to 90 days | \$30,000 |
| Coshocton | TR 220 Road Maintenance | Level road and pave | Crawford Township | 15 | 91 to 180 days | \$114,000 |
| Coshocton | CASSINGHAM HOLLOW SANITARY SEWER EXTENSION | THE CASSINGHAM HOLLOW AREA SITS AT THE SOUTH END OF THE CITY AND CURRENTLY IS NOT CONNECTED TO THE CITY SANITARY SEWER SYSTEM. WHILE SEWER WAS PROMISED TO THE RESIDENTS YEARS AGO THE CITY HAS NEVER HAD THE FUNDS TO FULLFL THE PROMISE. WE HOPE STIMULUS MONEY WILL BE AVAILABLE TO PROVIDE SEWER TO THESE RESIDENTS | CITY OF COSHOCTON | 6 | 181 days or more | \$1,400,000 |
| Coshocton | Jackson Twp. Company 8 Project | This project would involve additional construction on our existing fire house in Jackson Township, Coshocton County. We provide fire protection for more than 2,000 residents inside our township and mutual aid for the 21 other townships in the county as well as surrounding counties. Our goal is to build additional space onto the fire house so we can actually have a dispatch office, better facilities to provide maintenance to our vehicles, storage room and to also have the space to allow volunteers to man the station more often and more efficiently. We believe this project will not only retain construction jobs in our area but will also allow us to offer our county and many surrounding counties a better, more efficient fire department and staff. We expect to see growth and improvements within our township and county as a result of this project and hope that you can offer us some support. | Jackson Township Fire Department | 15 | 31 to 90 days | \$150,000 |
| Coshocton | Buena Vista Drive Storm Sewer Project | Storm drainage in this area needs additional 12" storm drain, due to excessive spring water flooding. Public safety problem, especially during winter freezes. | City of Coshocton | 5 | 31 to 90 days | \$18,020 |
| Coshocton | 12th Street Sanitary Sewer Relief Project | Sanitary drainage system in this area backs sewage into homes and businesses whenever there is excessive precipitation, due to bottlenecks in system | City of Coshocton | 5 | 31 to 90 days | \$110,487 |
| Coshocton | Hill St Curbing & Storm Sewer Improvement | Storm drainage in this area needs additional curbing and catch basins added to correct excessive flooding of Historic Roscoe Village. Both commercial and residential properties suffer flooding, due to inadequate storm drainage. | City of Coshocton | 8 | 91 to 180 days | \$403,700 |
| Coshocton | Township material storage building | Perry Township proposed to build a new material storage facility to replace an existing facility that only holds about 10% of the goods needing stored. The materials stored include gravel, cylinders, etc. | Perry Township Trustees | 5 | 0 to 30 days | \$65,000 |
| Coshocton | Repaving | The township proposes to repave two miles of Township Road 184, a portion of Township Road 380, and a portion of Township Road 382 which is heavily travelled due to the location of Perry Chapel Church. | Perry Township Trustees | 10 | 31 to 90 days | \$150,000 |
| Coshocton | Beulah Campground WWTP Expansion | The Beulah Campgrounds would like to complete an expansion project to its WWTP that would bring it into EPA compliance. | Ohio Regional Development Corp. | 0 | 31 to 90 days | \$150,000 |
| Coshocton | Pavement | The project involves paving all 24 miles of the Perry Township road system in Coshocton County. The township does not have sufficient funds to undertake such a project but it is needed due to the increases in Amish and tourism related traffic and businesses. | Perry Township Trustees | 10 | 31 to 90 days | \$720,000 |
| Coshocton | Water Treatment Plant Improvements | waste water disposal system serves our nursing facility, our corporate office and our camping program. Due to changes in regulatory requirements two years ago, the EPA notified us that we were out of compliance with regulations for our water and distribution. This past spring an engineering firm made recommendations on next steps to return our water system to compliance. After meeting with the EPA and our executive team, it was determined the most realistic solution based on many factors including cost and our usage of 16,000 gallons of water a day is to pursue rebuilding the surface water treatment. The existing surface water treatment plant needs extensive renovations. We have already started with some of the necessary steps to move this forward by investing over \$300,000 of improvements. The water treatment upgrades are essential for the continuation of the operation serving over 500 campers each summer, 58 residents year-round, 156 employees and 12 staff that lives on site. Without these upgrades, we will not be able to provide water for hygiene purp | Echoing Hills Village, Inc. | 156 | 0 to 30 days | \$120,000 |
| Coshocton | SOUTH SECOND STREET PAVING | THE CITY OF COSHOCTON HAS A SMALL CITIES GRANT TO REPAIR A MAJOR NORTH-SOUTH ARTERY THROUGH THE MAIN COMMERCIAL/INDUSTRIAL AREA OF THE CITY. THE CITY NEEDS \$244,319 TO COMPLETE THE PROJECT. WE DO NOT HAVE THESE FUNDS. THIS PROJECT IS CRITICAL TO THE LIFE OF THE CITY. | CITY OF COSHOCTON | 10 | 31 to 90 days | \$244,319 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Coshocton | Head Start/Early Childhood Center | programming that strengthens children ages 3 to 5 and their families, as well as a day care division that serves many parents who are in the workforce or furthering their education. Proposed is renovation of a former nursing home into classrooms that will allow for expansion of services. Expected outcomes include, but are not limited to: a model Early Childhood Center for preschool education in the 21st Century; the capacity to increase the number of families served in our Appalachian Ohio community by at least 25%; the ability to expand into center- and home-based Early Head Start for children birth to 2 years of age; a state-of-the-art facility for student-teaching practicums through three area colleges; operating a facility that is more energy efficient; and creating opportunities that impact health, education, and community through multiple existing and new public-private partnerships. This project could create 40 to 50 construction jobs and retain or create 70 to 80 positions within Head Start, touching up to 400 children | Coshocton County Head Start | 125 | 91 to 180 days | \$1,890,000 |
| Coshocton | RETENTION OF CITY FIREFIGHTERS | BECAUSE OF BUDGETARY CONSTRAINTS THE CITY OF COSHOCTON MAY LOSE UP TO 4 FULLTIME FIREFIGHTERS WHICH WOULD JEOPARDIZE MINIMUM STAFFING NEEDS. Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. | CITY OF COSHOCTON | 4 | 0 to 30 days | \$220,000 |
| Coshocton | Wireless Broadband for Rural Application | Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Coshocton | Windswept Acres Energy Co. | Purchase and install wind powered generator systems for individuals and businesses to become self sufficient off grid power generation | Daryl Timm General Contractor | 4 | 0 to 30 days | \$75,000 |
| Coshocton | Locker Replacement to improve conditions of school | -Cost new storage systems for junior high opening. (300 openings) -Cost includes tear out of old, assembly of new with built-in locks. -Expected outcome will enable new jobs for small business located in Richfield, Ohio and will also enable students to have more security within our 30+ year old building. -Infrastructure funds are limited in our district due to budget constraints | River View Junior High School | 10 | 91 to 180 days | \$55,000 |

| Coshocton | Kno-Ho-Co-Ashland Emergency Services | organization providing essential social services to the four rural Ohio counties of Knox, Holmes, Coshocton, and Ashland for 44 years. The Emergency Services program provides homelessness prevention activities including rental assistance to keep families in their homes, motel vouchers to the homeless, and utility assistance to those facing disconnection. We propose to use the requested stimulus funding to provide rental assistance to those facing eviction keeping over 250 families from becoming homeless. Like most of the nation our region has seen factory closings and the highest unemployment rate in recent history. The goal of this program is to keep families in their housing during these turbulent times. Many families are 2 - 3 months behind on their rent with nowhere to go. Our program projects to pay up to 3 months past due rent with a maximum benefit of \$400. This would make the difference between sleeping in their own bed or sleeping in the streets. We've operated this program for years and need has increased dramatically. We are not able to serve all the | Kno-Ho-Co-Ashland Community Action Commission | 0 | 0 to 30 days | \$100,000 |
| Coshocton | Coshocton and Tuscarawas County Railroad Crossing | This project is for railroad crossing upgrades On the Columbus and Ohio River Rail Road. This project will allow for the rehabilitation of 9 road crossing surfaces and 2 warning devices. This will increase the public safety of these crossings and the safe passage of trains. These crossings are located in the Coshocton area. | Ohio central Railroad | 50 | 31 to 90 days | \$1,288,000 |
| Coshocton | Project Freedom | State of the art drug and alcohol intervention and rehab. On site facility for 3 to 30 day rehab. On going professional experienced care and intervention. daily weekly inter vision programs. Adult and juvy facilities with programs. Freedom to work, educate, think, play, and live again | Freedom | 50 | 31 to 90 days | \$3,500,000 |
| Coshocton | Interactive Classrooms | student with an education that will develop the 21st century learning skills embraced by the Ohio Evidence Based 21st Century Learning Model. One goal is to establish interactive classrooms where students are engaged in learning through the use of smart boards and student response systems. Research indicates that these Smart technology tools increase student engagement and productivity from 85% to 98% in the classroom and boost learner motivation and knowledge retention. The \$345,000 would help us create integrated k-12 classrooms with smart board and student response system technology throughout the district. We would purchase smart boards and student response systems, employing workers for system installation and continued support. The resulting interactive, student engaged classrooms will help us provide an on-going learning environment in which we can instill in our students the skills conducive to responsible citizenship and prepare them to successfully further their education or become contributing members of an educated workforce. | Ridgewood Local Schools | 4 | 0 to 30 days | \$345,000 |
| Coshocton | Camp Abatement/Upgrade | Upgrade all ranch plumbing electrical housing food storage area and preparation, bath houses canteen, lake and water treatment environment area, theater water way | Boys Scouts Of America | 100 | 0 to 30 days | \$1,500,000 |
| Coshocton | Personal Security for Coshocton County | online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rescue operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our devices. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can set location boundaries and trigger notifications when exceeded. For personal safety a panic button can issue an alarm with location information to multiple chosen phone numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self powered units that continuously mo | Nuleaf Ohio Limited | 2 | 31 to 90 days | \$73,080 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Coshocton | Wireless Broadband for Ashland County | and underserved areas while employing hundreds in high paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network in Delaware to surrounding counties for people stuck in the digital abyss. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the funds awarded to the providers of cable and dsl, the underserved areas still exist today. Now this the time to try something different. Rural America needs access today not the failed promises of the past. Our unique process for deployment utilizes the most cost effective wireless model available. Each dollar spent produces the most coverage per mile of any existing provider which allows low access fees and universal participation even among the low incomers and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident by our existing network, the most advanced and cost effective. TRAFFIC SIGNALS AT ZU CITY INTERSECTIONS WITH L&H RAILS. INSTALL NEW SIGNAL HEADS AT 11 INTERSECTIONS. CHANGE 2 TRAFFIC SIGNALS AT SCHOOL INTERSECTIONS FROM MECHANICALLY CONTROLLED TO COMPUTER CONTROLLED. THIS WILL BE A GREAT IMPROVEMENT FOR BOTH MOTORISTS AND PEDESTRIANS WHILE SAVING ABOUT \$12,000 WORTH OF ELECTRICITY PER YEAR. | NexGenAccess | 19 | 0 to 30 days | \$1,900,000 |

| Coshocton | resort vacation /recreational area | build a recreational area and expand the existing aquatic farming enterprise. Using local labor construct a resort cabin area and supporting infrastructure and expand water acres to aid in the production of food fish. The hiring of 5 - 10 permanent employees to operate the facility. | nickel valley farms | 10 | 0 to 30 days | \$500,000 |
| Coshocton | off grid home | build new earth sheltered home. solar and wind powered off grid home. I am disabled and on ss disability,when wife retires in 5 yrs.,we will not be able to keep our home, will be paying for home 7 yrs after retirement. I'd like to see more people do this.I already own this property in coshocton county. I have 10 acres to build home on side of hill, will use super insulated metal roof for rain water harvesting,solar electric (have most of solar panels and balance of system). also using solar hot water heaters,would like to raise some chickens for eggs and food and garden for our food. my home in alkon,oh has lost so much value,that even when we sell there won't be much left after payoff loan, we can't depend on it. the new home will be our primary residence.we will be doing most of the work our selves,with our kids helping. thanks | my family | 0 | 31 to 90 days | \$40,000 |
| Coshocton | Cattle Ranch/Animal Refuge | cattle (Bull & Cows.) Buy feed and necessities to care for animals & cattle. Cover vet bills & payroll for ranch hands to care for animals for first 2 years. Hold workshops for kids to learn to care for animals and cattle. Cattle will be sold to fund business. Rescued animals will be adopted out for minimal costs. Land is already owned, 2 water wells, spring water & pond on land. Electric & Natural gas well is available for lighting & heating on property. Also perfect location for wind-generated electric, which overflow can be introduced to the "grid." This will be a family owned business that will hire outside help. Good possibility of expanding to other adjacent locations over time & adding jobs. This is a start-up company with an excellent potential for growth. Thank you for your time and consideration. | D.R. Homestead | 3 | 0 to 30 days | \$150,000 |
| Coshocton | NEIGHBORHOOD SIDEWALK REPAIRS | THE CITY OF COSHOCTON HAS MANY NEIGHBORHOODS NEAR SCHOOLS AND THE DOWNTOWN AREA WHICH HAVE SIDEWALKS IN NEED OF REPAIR. THE CITY HAS A DIFFICULT TIME GETTING THE HOMEOWNER TO MAKE THESE REPAIRS. THUS, THE CITY NEEDS TO MAKE THE REPAIRS AND ASSESS THE HOMEOWNER. CHILDREN, WALKERS AND THE HANDICAPPED WILL ALL BENEFIT FROM THIS PROACTIVE REPAIR PROGRAM. | THE CITY OF COSHOCTON | 10 | 31 to 90 days | \$175,000 |
| Coshocton | Coshocton Senior Center | programs and services to enhance the lives of our senior citizen population. In addition to providing senior services, this location is also designated as a county-wide emergency evacuation site. We propose to use stimulus funding to purchase a generator in order to sustain services and provide a county evacuation site during times of emergency. We've witnessed over the past several years times of crisis and emergency, due to weather and other conditions, when families were without power and resources for days sometimes up to a week at a time. The purchase of a generator would allow us to fulfill our mission of providing shelter and other supportive services to county residents during times of crisis. | Kno-Ho-Co-Ashland | 0 | 0 to 30 days | \$33,267 |
| Coshocton | Solar Water Heating | Promote and install solar water heating systems for residential, commercial and industrial applications. The primary focus being hot water usage with limited application for supplemental heating. The business would be based in Coshocton county and would initially serve a 4 to 5 county area with promotion and expansion into the entire state within 12 months. Widespread usage of solar water heating systems would significantly impact energy consumption. | McVenco LLC | 20 | 31 to 90 days | \$175,000 |
| Coshocton | D & H Trucking Inc, a Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Coshocton | Mast Trucking Inc, a Clean Fuels Ohio Partner | This programmatic partner wishes to install 6 auxiliary power units and anti-idling devices on their tractor trailers. These upgrades will decrease their fleet's petroleum use and reduce vehicle emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Coshocton | Columbiana Pre K-8 facility | Columbiana Schools are in desperate need of a new facility to house Pre-kindergarten through 8th grade. Our current buildings have qualified for OSFC's Exceptional Needs Program but the district is above the 75% rank making us ineligible to participate. We have a site plan established and the land available. This project could be started as soon as the bid process can begin. Because the facilities would have state of the art efficient energy systems, teachers' jobs will be saved because of the savings in energy costs. The project would also create construction jobs for local contractors. The local economy would also be stimulated through income taxes and increase in business downtown | Columbiana Exempted Village Schools | 300 | 91 to 180 days | \$15,000,000 |
| Coshocton | Keep the Coshocton County Alternative School in op | Our Alternative School is a school located in Coshocton County for students who have either been suspended or expelled from one of the local schools in our county. Students attending our school are required to attend our program instead of being put out on the street where in most cases they would get into even more trouble. We have been in operation for 8 years and have served over 1350 students during that time period. The At-Risk young people who attend our school are not bad kids, they are just young people who have made some really bad choices. We are at a crossroads in regards to our school. If we are not able to secure the funds necessary to keep our school open next year, not only will suspended and expelled students be put out of school and placed on the street, but 6 tax-paying adults in our community will lose their jobs. I realize that this grant is for technology, and we certainly could update our computers and other technology, but keeping our school open for these deserving young people is even more important | Coshocton County Alternative School | 6 | 0 to 30 days | \$125,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---------------------------------------|---|--|----------------|--------------------|---------------------------|
| Coshocton | River View Jr High SMARTBoard Project | to take on a project to add 17 SMART Boards in the Junior High. As concerned parents and educators we feel it is imperative that we keep up with technology in the classroom and to equip our teachers with the best tools we can provide for them. Increasing operating costs and failed levies have made it very difficult for the budget to keep up with the demands of technology. Since new construction (with integrated technology) does not appear to be feasible for our district in the near future, our only choice is to improve our existing technology infrastructure. By wisely investing in SMART Boards we can optimize student learning and teacher productivity. Donations from local businesses along with proceeds from a recent community auction have raised \$15k of the \$42k needed to complete this project. SMART Boards in classrooms will give students access to technology not otherwise available in a rural economically challenged county. Thank you for your consideration in partnering with us in an effort to make our students' future a brighter one | River View Jr High P.S.S.T (Parents Supporting Stu | 0 | 31 to 90 days | \$27,000 |
| Coshocton | Communication System | Implementing Smart Grid by installing a SCADA communication system in each of our eleven substations. This will better serve our consumers by having more usage information readily available. We will also upgrade our existing smart meter system to support vital new technology | The Frontier Power Company | 6 | 0 to 30 days | \$4,000,000 |
| Coshocton | JVS Substation Upgrade | Upgrade of equipment in the substation that serves our local airport. (Richard Downing Airport) a local vocational school, (Coshocton County Career Center) and a school for the developmental/mentally handicapped. (Hopewell School) | The Frontier Power Company | 6 | 0 to 30 days | \$750,000 |
| Coshocton | Added officers | Wanting to add officers to the department We are working one officer a shift with no dispatch. We have no SRO officer for the schools. We have three schools in our Village. Elementary - Middle - and High School. Any help would be greatly appreciated. | West Lafayette Police Department | 3 | 91 to 180 days | \$500,000 |
| Coshocton | MorningStar Birth Center | service both English and Amish homebirth communities in central and southeast Ohio. The project would include a CNM and medical nursing staff to provide patient care in a home-like setting, but with a collaborative effort with a physician and the local medical community. This would provide a safe alternative to homebirth and continuity of medical/prenatal care for Coshocton and several surrounding counties. An average of 75-100births/year bring with it consumers that will spend money on service-related items like restaurants, gas, and hotels. Also, they would provide a number of nursing/aide and secretarial jobs that would start out as part-time, but eventually would increase in hours/benefits as business grows. Midwifery care can greatly reduce the need for interventions, and thereby the overall cost of giving birth providing a choice to women who want to be more involved in the decisions that affect their care and that of their children. | MorningStar Birth Center | 20 | 31 to 90 days | \$450,000.00 |
| Coshocton | OCJS/JAG Grant | Coshocton County Juvenile Court has been recognized over the years as having very innovative and progressive programs for a small rural appalalhan county. The Court works very hard to provide services on a preventive and educational side, thus reducing incidents of delinquent behavior. The first position created would basically re-instate a program that was eliminated with budget cuts at the local Job & Family Services Agency. The Teen-Unit Coordinator would work with local families that are having unruly related behaviors from their minor children. Referral source would be parents, schools, law enforcement officers, agency workers and probation staff. Family cooperation would be required and referrals to other agencies would be made after a 30 day initial assessment of the family need. The second position would be for a Mediator-Crisis Intervention worker. This would be a new position and would allow for the agencies listed above to make referrals to settle disputes before an act becomes a criminal offense. Also existing cases with the Court that are in crisis could access the program to settle differences before out of home placement or other intervention is required | Coshocton County Juvenile Court | 2 | 0 to 30 days | 100,000 |
| Crawford | dawsett sub change over | convert 4kv to 12 kv at sub and do all existing work on the distribution lines to make more efficient | city of galion electric division | 10 | 91 to 180 days | \$2,000,000,000 |
| Crawford | Long Term Control Plan | This is the estimated amount of monies our consulting engineers have used to bring the City of Bucyrus in compliance with the USEPA mandates for our Long Term Control Plan. Of course this cannot be done in two or three years but if there would be some type of funding established to allow us to draw as needed for the construction process, is what we would be interested in | City of Bucyrus | 50 | 181 days or more | \$70,000,000 |
| Crawford | Waste Water Treatment Plant Digester | Our WWTP was upgraded to treat 3.4 million gallons per day but at the time the money was not available for the additional digester that is necessary to support the 3.4 mgd. This is the estimated amount needed for design, construction services, and construction. | City of Bucyrus | 10 | 91 to 180 days | \$1,100,000 |
| Crawford | Dist 3, PID 85720, CRA Purchase 2 CVs | Purchase 2 converted vans for the Crawford County Council on Aging | Ohio Department of Transportation | 1 | 31 to 90 days | \$70,000 |
| Crawford | Dist 3, PID 85721, CRA Purchase 1 MMV | Purchase 1 modified minivan for the Crawford County Council on Aging | Ohio Department of Transportation | 2 | 31 to 90 days | \$33,000 |
| Crawford | Water Plant Replacement | Our water treatment plant is owned and operated by the City of Bucyrus, OH and has been deemed by it's consulting engineers to have reached the end of it's effective life. The original facility was built in 1949 and has begun to exhibit marked structural deterioration in several key areas. In addition, much of the plant's equipment has fallen into obsolescence. While some discussion has revolved around a mere rehabilitation of the existing plant, obviating against this approach is the fact that the WTP lies in a residential neighborhood within the 100 year floodplain of the Sandusky River. Major flooding in 1959 and 1987 compromised the building with several inches of flood water that damaged the alum tanks and pump equipment. During the flood of 2007 we had to sandbag the plant to prevent damage to the equipment. We feel it would be more beneficial and cost effective in the long term to build on City property closer to our reservoirs just outside our City limits | City of Bucyrus | 50 | 181 days or more | \$20,000,000 |
| Crawford | SAFER waiver - hire firefighters | Our current manpower billet allows for 23 firefighters. We are currently at 14. We are only asking for what we feel we can afford after the grant program expires. | City of Bucyrus | 2 | 0 to 30 days | \$140,000 |
| Crawford | Pork Production Facility | purchase 1 modified minivan for the Crawford County Council on Aging | Miller Pork Family Farm | 12 | 91 to 180 days | \$675,000 |
| Crawford | Xy Cattle Selection | Semen separation sexing for large animal production of, including but not limited to: dairy cattle, beef cattle, rodeo bulls, and white tail deer. Production will reach the entire United States, export to European Union, China, South America and Japan. Many other markets yet to be secured. Creation of very specialized technical jobs to operate and maintain the new emerging technology. Creation of new markets world wide. Jobs would be created for Disadvantage individuals as well. Expected outcome of the new technology will produce better growth efficiency of cattle, higher quality meat, increase genetic standards by using only the best quality genetics for cattle and milk production. Rodeo bulls would increase quality of bulls for family centered entertainment. White tail deer would create and expand the sport and recreational tourism industry in several areas of Ohio. Environmental impact would improve conservation efforts. This is not genetic modification. Simply put separation of male and female sperm. | xy genetic selection | 25 | 0 to 30 days | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------------|----------------|--------------------|---------------------------|
| Crawford | Maple Heights Phase 2 | Phase 1 has been done getting the main trunk line line the next phase is the smaller storm lines. This project will relieve flooding in the Maple Heights area, the area continually has flooded basements and property damage. This project will also help get infiltration out of the city's sanitary. We are under EPA mandate to remove I&I out of our wastewater system | City of Galion | 12 | 0 to 30 days | \$600,000 |
| Crawford | Sewer Line replacement Portland Way North | Sewer line replacement Portland Way North - This project is need to improve the infrastructure under an new road widening project slated for 2010 by ODOT. We are currently having problems with collapsing lines under the present roadway and we are afraid if we don't look at replacing the present sewer line the new roadway could be affected. | City of Galion | 20 | 181 days or more | \$723,244 |
| Crawford | City of Galion Influent Upgrade | City of Galion Influent Upgrade - application has been submitted to OWDA (DEFA) and approved we are now in the process of qualifying engineer for the project. This project will replace outdated and worn out equipment that was installed in 1988. It will create jobs as far as equipment building and installing. We will rebuild Screw pumps, put in new screening in the front of the plant, New flow metering, and Gas scrubber for green energy using digester gas to heat digester | City of Galion | 50 | 181 days or more | \$2,600,000 |
| Crawford | Rt. 61 Job Ready Site Improvements | Route 61 Job Ready Site Improvements - This project will create jobs in the future by expanding our infrastructure to a area now vacant without utilities. The design has been completed by a local engineer and we are just waiting for funding on this project. The area is off a newly built highway (ST Rt. 30) and has great potential for growth. | City of Galion | 100 | 31 to 90 days | \$6,500,000 |
| Crawford | Inflow & Infiltration reduction | Inflow and Infiltration reduction - We are under a EPA mandate to reduce our inflow into the Waste water Plant. We estimate approximately \$30,000.00 a year for engineering and another \$50,000 yearly for repairs on the Storm sewer system. We also are requesting homeowner aid some of our residents are elderly or low income and we would like assistance money to help them pay for removing sump pumps from the system. Approximately \$20,000.00 yearly. We estimate this to be a five year project one mini system a year. | City of Galion | 30 | 0 to 30 days | \$500,000 |
| Crawford | East Charles Street Sewer Improvements | East Charles Street Sewer Improvements - This project will improve sewer infrastructure to an area of town that has failing private septic system that are discharging to the Oletangy River. It will install new sewers and a lift station. | City of Galion | 30 | 31 to 90 days | \$1,200,000 |
| Crawford | Emergency Overflow Powers Reservoir | Emergency Overflow Powers Reservoir - This project has already been engineered by surges & pipe engineer and is ready to go. This project will install an emergency overflow on Powers Reservoir. Ohio Dept. of Resources has noted this need in their last several inspections and wants it done. | City of Galion | 12 | 91 to 180 days | \$80,000 |
| Crawford | Electrical upgrades reservoir pump houses | As of now the reservoir has no emergency overflow which limits the storage of water in the reservoir, we have to keep the water level in the reservoir below the recommended capacity of the reservoir. | City of Galion | 6 | 91 to 180 days | \$200,000 |
| Crawford | Water Line Replacement | This project would upgrade aging motor control centers at the pump houses for the reservoirs. The current motor controls are outdated and failing. | City of Bucyrus | 6 | 91 to 180 days | \$625,000 |
| Crawford | Dewatering Press Ferric Sludge Water treatment | Replace approximately 8000 feet of old waterlines in certain parts of the city that have had somewhere between 80 and 100 breaks in them over the past 8 years. These are major lines that not only provide service to our citizens but also to businesses and industry within our city | City of Galion | 30 | 91 to 180 days | \$3,500,000 |
| Crawford | North End Storm Sewer | This project will include a press building, Plate press and related equipment to press the water treatment sludge at the water treatment plant. This project has not been designed yet and will require EPA approval. | City of Bucyrus | 12 | 91 to 180 days | \$950,000 |
| Crawford | Downtown renovation project | The sludge now is sent to the wastewater plant via a sewer and it causes a lot of problems at wastewater. (Takes up needed space in our digesters.) and also causes solids problems in the plant. This project would install storm sewer system from the north end of our City that continually floods and would separate the storm water from our sanitary sewer. This is an on-going effort to comply with the USEPA on fulfilling our obligation to their mandates to work towards a long term control plan. | City of Bucyrus | 25 | 31 to 90 days | \$2,000,000 |
| Crawford | Dist 3, PID 25667, CRA SR 0004 10.88 | We are in the process of final approval of a Small Cities Grant to rebuild our main street with ODOT and Federal Monies. This includes widening the street, rebuilding the base of the street, installing storm sewer, water lines, traffic signals, nostalgic street lights and resurfacing. This is to support our downtown businesses and hope to bring in new business and industries to our community by displaying that we are an aggressive small town willing to invest in our community. | Ohio Department of Transportation | 75.1 | 31 to 90 days | \$2,617,662 |
| Crawford | Portland Way North Bridge Replacement | 2-lane resurfacing | City of Galion | 30 | 31 to 90 days | \$750,000 |
| Crawford | Dist 3, PID 25667, CRA SR 0004 10.88 | The City of Galion was recently awarded FY2012 Small Cities money through the Ohio Department of Transportation for a much-needed road widening project (ID 83138) of approximately 2,900 feet of State Routes 598/61/309. Within this 2,900 feet of roadway is the subject two-lane, 55 year old bridge. Besides having some structural issues, this bridge is not of sufficient size to convey water during storm events and upstream properties routinely experience extensive flooding, and the sidewalks will likely have to be placed on the outside of the current railings. | Ohio Department of Transportation | 75.1 | 31 to 90 days | \$2,617,662 |
| Crawford | Dist 3, PID 25667, CRA SR 0004 10.88 | The current structural improvements contemplated as part of the overall road widening project, is to begin in approximately three years, but we have already done extensive planning and design work for the bridge portion of the project and anticipate the ability to begin construction of the bridge (assuming funding is found) within approximately 30-90 days. | Ohio Department of Transportation | 75.1 | 31 to 90 days | \$2,617,662 |
| Crawford | Help Is On the Way! | The estimated cost for replacing the bridge is \$750,000 which would greatly enhance the overall road widening project as well as the safety and convenience of those many citizens who travel this st | Galion Public Library | 100 | 0 to 30 days | \$2,000 |
| Crawford | Heise Park Picnic Pavillion | The Gallon Public Library has a service area with There is currently only one, small shelter at Heise Park. This is the biggest and most-used in the City's park system. The City is in need of a larger, covered, enclosed shelter so the park can be used year-round. | City of Galion | 15 | 31 to 90 days | \$400,000 |
| Crawford | South Park Restroom Renovation | The City of Galion is proposing to purchase and install a pre-fabricated restroom at our South Park. This restroom would replace the current cement block structure that is badly in need of repair/replacement. | City of Galion | 5 | 31 to 90 days | \$65,000 |
| Crawford | East Park Restroom Renovation | The City of Galion is proposing to purchase and install a pre-fabricated restroom at our East Park. This restroom would replace the current cement block structure that is badly in need of repair/replacement. | City of Galion | 5 | 31 to 90 days | \$65,000 |
| Crawford | Heise Park Restroom Renovation | The City of Galion is proposing to purchase and install a pre-fabricated restroom at our Heise Park. This restroom would replace the current cement block structure that is badly in need of repair/replacement. | City of Galion | 5 | 31 to 90 days | \$65,000 |
| Crawford | Cobey Park Spillway and Footbridge | The existing bridge/spillway area on the west side of the Cobey Park pond needs replaced. A bridge is also needed on the west end where the ground is low and water collects making the trail very muddy and impassable to users of the park. | City of Galion | 15 | 31 to 90 days | \$200,000 |
| Crawford | CRA-CR31-2.64 Bridge Replacement | Replacement of an existing concrete beam bridge with a single span concrete prestressed beam bridge on reinforced concrete abutments on Spore-Bradywine Rd. (CR31) in Holmes Township. | Crawford County Engineer's Office | 10 | 181 days or more | \$132,000 |
| Crawford | CRA-CR330-14.24 Repaving Project | This project will include pavement planning and resurfacing with 2" of asphalt concrete for 2.04 miles of County Road 330 (Lincoln Highway) | Crawford County Engineer's Office | 8 | 181 days or more | \$100,000 |
| Crawford | New Fire Station | Construct new Fire Station, current station was built in 1939 and the department has outgrown the current facility. We have our equipment in three different locations. We need to centralize our equipment have back up power source. | City of Galion Fire Department | 25 | 91 to 180 days | \$4,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Crawford | Wireless Broadband Internet Service | This Wireless Broadband Internet Service offering would target potential customers who are unserved and under served rural areas who do not have access to Broadband Internet Services. The funds would be used to purchase and install Wireless Broadband Radio equipment in the Bucyrus (Crawford County) area on either an existing or a new tower depending on the best coverage area obtainable. The funds would also be used to provide customer premise radio equipment in order to provide the radio link between the customer and the base station radios. The service would be provided in the 700 Mhz licensed wireless radio band. NKTelco Inc. already owns the 700 Mhz license for Crawford and surrounding counties. Unlike other radio services, the 700 frequency is not strictly "line of sight". Thus, NKTelco Inc. will be able to provide service to customers who were previously not able to obtain Broadband service. Approximately 50 to 75 new customers could initially be provided service with the \$85,000 stimulus funds. A total buildout, serving in excess of 350 customers would be possible utilizing the estimated \$225,000 in total project cost estimates. | NKTelco Inc. | 2 | 91 to 180 days | \$85,000 |
| Crawford | quasi-cops | hiring of 4 police officers to supplement this department that is currently short 3 officers but at this level is still below onl & FBI recommendations. there should be staffing of 24-25 officers instead of the current 19. this would allow this department to be pro active in dealing with increased crime/violence instead of reactionary. also would allow the placement of school resource officer, expand foot/bike patrol, neighborhood watch programs, drug interdiction. | bucyrus ohio police dept | 4 | 31 to 90 days | \$240,000 |
| Crawford | City of Gallion Street Maintenance Garage Renovatio | The current maintenance bay containing our hydraulic lift is small and there is not sufficient room to work on all of our equipment. This proposed project would expand the southwest corner of our existing building by constructing a 25-foot by 55-foot maintenance bay. We would then be able to work on any vehicle in the City's fleet. | City of Gallion | 10 | 31 to 90 days | \$50,000 |
| Crawford | City of Gallion Municipal Airport Facilities Upgrad | GALLION MUNICIPAL AIRPORT FACILITIES UPGRADE Activities would involve basic pavement maintenance; MIREL, REIL, and VASI repair/replacement. In addition to these activities, additional work would be included in order to upgrade airside facilities to meet FAA standards for A-1 (small airplanes exclusively) requirements and to expand the apron terminal area to the west. Additional airside maintenance and improvement projects would be performed including: removal of obstructions near the approach end of runway 5 in order to eliminate the displaced threshold; runway safety area grading; and the replacement of parallel taxiway lights. A full-length parallel taxiway would be constructed by extending the existing 2000-foot taxiway an additional 1505 feet. Other activities would include the acquisition of snow removal equipment; minor airfield drainage improvements; installation of a rigid pavement dedicated helicopter landing pad; removal of the westernmost hangar; construction of 2 new 10-unit T-hangars; construction of 2 new corporate to build a steel structure building and supplies that normally set outside, prone to vandalism and theft. the electric utility is a municipal electric that has aging structures and not much money. | City of Gallion | 50 | 91 to 180 days | \$3,540,000 |
| Crawford | building of steel structure building | | city of gallion electric division | 10 | 0 to 30 days | \$500,000 |
| Crawford | CRA-TR93-0.75 Bridge Rehab. | This project involves the rehabilitation of a prestressed box beam bridge by improving the substructure, replacing the superstructure, including the guardrail, and minimal approach work. | Crawford County Engineer's Office | 4 | 181 days or more | \$25,250 |
| Crawford | City of Gallion Railroad Station, Additional RR Spu | The City of Gallion will likely be the North Central Ohio location for a passenger stop between Cleveland and Columbus by the proposed Columbus - Dayton - Cincinnati (3-C) Corridor in the Ohio Hub plan. We are seeking funding for construction of a passenger rail station, additional rail spur, land acquisition, and construction of a commuter parking area. | City of Gallion | 100 | 91 to 180 days | \$15,000,000 |
| Crawford | Bibich Cr/Patterson St/Thoman St sanitary sewer p | This project is to install sanitary sewer within the city. The project will eliminate most septic systems within the city and will keep the city within compliance of its NPDES permit. The project will effect approximately 100 homes. | City of Crestline | 15 | 31 to 90 days | \$500,000 |
| Crawford | County line road water line project | This project is for a waterline replacement. The new waterline will be larger than the current one, and will increase volume to this area of the city. Also, the current line is very old, and constantly breaks when weather patterns change. | City of Crestline | 15 | 0 to 30 days | \$315,500 |
| Crawford | Colby Road waterline project | This project will replace an existing smaller waterline with a larger waterline that constantly breaks when weather patterns change. The new line will larger, thereby supplying more volume to this area of the City. | City of Crestline | 15 | 0 to 30 days | \$300,000 |
| Crawford | Tiro Water Distribution System and Transmission Li | The water quality and quantity of these wells are terrible. Fire-fighting capabilities are nil. The City of Shelby has agreed to sell Tiro water should they be able to construct a waterline to convey the water to Tiro. The funding request is for the transmission line to Tiro, storage tank and water distribution system within the Village. Right now, the residents of Tiro (a low-to-moderate income village) have to have their water hauled into town and have to go to Shelby to do their laundry. Drinking water is purchased by the 5-gallon container. Well water quality is suspect as the wells are also on the same lot that also contains a septic system. The funds will allow construction of the system. | Village of Tiro | 15 | 91 to 180 days | \$500,000 |
| Crawford | Pioneer BioTech laboratory | Funding is for laboratory and laboratory equipment for a new agriculture/medical biotech program for high school students. The program will begin September 2009, as a satellite program through Pioneer Career and Technology Center. The program will begin in all 6 high schools in Crawford County, as follows: 9th grade: Biotech career exploration (science elective) 10th grade: Biotech Principles 11th grade: Biotech Research 12th grade: Student's choice from Two strands - Ag/biotech or Medical/biotech. Program will be Tech prep, much of it will be dual enrollment for college credit, and fully articulated with a number of post-secondary institutions. Students will benefit through fulfilling careers in bioscience. This region of Ohio will benefit in an ability to attract additional Biotech companies to our area...diversifying our current dependence on traditional agriculture and manufacturing sectors. | Crawford County Economic Development Partnership, | 250 | 91 to 180 days | \$250,000 |
| Crawford | Gallion East Business Park | additional jobs to the county by offering direct-highway accessible shovel-ready sites. We request assistance for the installation of infrastructure, except water, for a 600 acre parcel located on 4-lane US Route 30 at State Route 61 and SR 309 for the purpose of economic development, job creation. Infrastructure needs include sanitary sewer & lift stations (and/or a possible green-technology package plant), storm water system, electric capacity (municipal electric), natural gas and communications. The City of Gallion has already installed water mains. The 600 acre site has direct highway access to 4-Lane (interstate quality) route 30, connecting directly with I-71 and I-75 and has been of interest to several end-users but lacks needed infrastructure. The development is planned for approximately 25% commercial/retail and 75% industrial/distribution/office. Most of the engineering is complete. The project can go to bid in approximately 30 to 45 days once funding is in place. | Crawford County Economic Development Partnership, | 1,000 | 31 to 90 days | \$6,000,000 |
| Crawford | Chiswick - Laughbaum Sanitary Upgrade | This is a shovel ready project that will replace failing septic systems for ten homes in the City of Gallion. These ten homes discharge to a small stream in the Cheswick and Laughbaum area. The EPA deemed through findings & orders, that all septic systems discharging to the stream be removed. This a great burden on the city and property owners to finance. We are hoping for a grant or an interest free loan to help keep the waterways of Ohio clean | City of Gallion, Ohio | 20 | 31 to 90 days | \$160,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|-----------------------------------|----------------|--------------------|---------------------------|
| Crawford | Family Parking Lot Extension | Old National Guard Building and land surrounding to be repaired and Painted with Interior to be divided for sheltering. Add EMS storage and Parking lot created for Mental Retardation/Developmental Disability Program New windows, Puck and point building , Paining Interior Walls , new parking lot construction, Heaters for building | Crawford County Board of Mrdd | 9 | 91 to 180 days | \$85,500 |
| Crawford | Redesign Fairway School | Redesign entrance for Fairway School to allow for security for children in attendance. Wall will be moved and security systems installed in addition a concrete ramp which is deteriorating will be replaced. | Crawford County Board of Mrdd | 12 | 91 to 180 days | \$77,000 |
| Crawford | Bus Drop off and Parking | Waycraft is a not for profit sheltered workshop for the Crawford county Board of Mental retardation and Developmental Disabilities . The sheltered workshop is in need of repairing and upgrading the drop off and pickup area for clients and replacement of the current parking area | Waycraft Industry Inc. | 5 | 0 to 30 days | \$120,000 |
| Crawford | Dawsett Substation Upgrade | To upgrade and change over voltage from 4KV to 7KV Makes more efficient and longer distance circuits and better serves industry more reliable and less maintenance | City of Gallion | 10 | 0 to 30 days | \$2,000,000 |
| Crawford | Park Rd. CSO/Lift Station | The City has a dry well sewer pump station, with an overflow before the pump station. The City would like to redesign the pump station to a wet well pump station, and be able to eliminate the CSO thereby coming into compliance with the EPA | City of Crestline | 5 | 0 to 30 days | \$15,000 |
| Crawford | Electronic Health Record Implementation - Gallion H | Electronic Health Record Implementation will improve patient care, reduce the costs of clinical operations, and lead to revenue cycle gains for the organization. Improvement in patient quality outcomes will result from reductions of medication errors, access to care and more effective ordering of radiology and laboratory procedures. The expected outcome will be the successful implementation of said technology allowing Gallion Community Hospital to remain viable which is critical to this area as it is one of the largest employers in Crawford County, Ohio. It will add additional clinical and information technology staff to the hospital, require the use of outside implementation consultants, and increase need for local broadband and dedicated connectivity. The ability for an electronic health record to improve the care quality, safety, and efficiency can no longer be questioned. This initiative is providing better healthcare and retaining a viable employer in Crawford County, Ohio. | Gallion Community Hospital | 480 | 0 to 30 days | \$1,249,170 |
| Crawford | Westmoor Area Sanitary Sewer Project | the project will serve approximately 250 homes with a sanitary sewer consisting of 27,400 feet of mainline sewer, 6500 feet of lateral pipe and 107 manholes, two lift stations and 540 feet of force main. This area outside the City of Gallion is under EPA mandate to address the problems with the existing individual on lot systems that are failing. The sewer system will NOT be a package plant but will connect and be processed through the City of Gallion's wastewater treatment facility. The estimated assessment cost to each of the homeowners is approximately \$18,000. The financial burden on the homeowners can be reduced by stimulus funding for the project | Crawford County Commissioners | 25 | 31 to 90 days | \$4,000,000 |
| Crawford | Physician Clinic Electronic Health Record Expansion | Gallion Community Hospital is currently implementing electronic health records within physician practices. The objective of this project is to expand the implementation of this system by improving the existing system and by expanding it to other physicians and healthcare related facilities local to Crawford County for the purposes of providing improved patient care to the residents of Crawford County, Ohio. Currently the systems is "closed" to only hospital employed physicians but additional funds would allow for the expansion of clinical information to local nursing homes, non-hospital employed physicians, home health agencies, etc. Additionally, funds will be used to expand the use of technology through the purchase of point of care systems that will automatically feed clinical data into the existing electronic health record system. | Gallion Community Hospital | 126 | 0 to 30 days | \$216,756 |
| Crawford | Northeast Water Project | This project is designed for the construction of approximately 2.1 miles of water main to serve customers in Sulphur Springs, Tiro and part of Auburn, Liberty, Whetstone and Sandusky Townships. More specifically 28,400 l.f. of 8" water main, 65,900 l.f. of 6" water main and 18,200 l.f. of 4" water main. This project was ready to go but due to the cost was put on indefinite hold because of cost. The Village of Tiro is still desperately seeking ways to obtain water due to their low supply and need to haul water. | Crawford County Commissioners | 25 | 91 to 180 days | \$2,500,000 |
| Crawford | North Robinson Water Tower | The water tower for the waterline that serves approximately 186 customers including a high school and a k-8 school is in need of repair, painting and maintenance. There is currently not enough funds to complete this necessary project. | Crawford County Commissioners | 5 | 91 to 180 days | \$150,000 |
| Crawford | Cranberry Meadows Assisted Living | To be constructed in the village of New Washington, a 30 Unit Senior Living Center with a mix of assisted living and independent units, along with a medical clinic. Stimulus monies to be applied for infrastructure and facility construction. Presently, the senior population within the New Washington area has no available senior housing option. If seniors need specialized care they need to relocate from the community. This facility will allow them to remain in the community to be with family and friends. It also will create approx. 20 jobs along with generating potential revenue for other local businesses. ie; the local printer, the meat market, the local landscaper, etc.. Also, on this acreage additional housing will be developed thereby creating additional jobs and local revenues. It will improve the communities tax base. The Senior Living Center will be the key to driving this project | Cranberry Meadows Senior Housing | 20 | 91 to 180 days | \$1,500,000 |
| Crawford | Linlare Water Treatment Facility | The sewer treatment facility was installed by a private developer to serve approximately 50 homes. The facility has since been turned over to the county and is in need of various upgrades and replacements. Water infiltration also needs to be addressed for this plan | Crawford County Commissioners | 10 | 181 days or more | \$400,000 |
| Crawford | Morton Sewer Treatment Facility | The wastewater treatment facility is in need of repair. It is a small plant built by a developer that the county now owns. It is in need of repair including sandfilters and addressing infiltration | Crawford County Commissioners | 10 | 181 days or more | \$125,000 |
| Crawford | Fab Lab Crawford County | Fab labs provide widespread access to modern means for invention. They began as an outreach project from MIT's Center for Bits and Atoms (CBA). CBA assembled millions of dollars in machines for research in digital fabrication, ultimately aiming at developing programmable molecular assemblers that will be able to make almost anything. Fab labs fall between these extremes, comprising roughly fifty thousand dollars in equipment and materials that can be used today to do what will be possible with tomorrow's personal fabricators. Fab labs have spread from inner-city Boston to rural India, from South Africa to the North of Norway. Activities in fab labs range from technological empowerment to peer-to-peer project-based technical training to local problem-solving to small scale high-tech business incubation to grass-roots research. Projects being developed and produced in fab labs include solar and wind-powered turbines, 3D-printed computers and wireless data networks, analytical instrumentation for agriculture and healthcare, custom housing, and rapid prototyping of rapid-prototyping methods. | American Red Cross | 20 | 31 to 90 days | \$75,000 |
| Crawford | Stockholm Junior Water Prize | Fab labs have spread from inner-city Boston to rural India, from South Africa to the North of Norway. Activities in fab labs range from technological empowerment to peer-to-peer project-based technical training to local problem-solving to small scale high-tech business incubation to grass-roots research. Projects being developed and produced in fab labs include solar and wind-powered turbines, 3D-printed computers and wireless data networks, analytical instrumentation for agriculture and healthcare, custom housing, and rapid prototyping of rapid-prototyping methods. The objective of this effort would be to plan, develop and submit projects worthy of consideration by the Junior Stockholm Water Prize Committee. It will encourage students to pursue education and careers related to preservation of one of our most important finite resources. Further, the initiative will serve as a catalyst for research, development, and entrepreneurial activity. Ultimately it can result in new "green jobs" and investment for the entire Crawford County community. | American Red Cross | 5 | 31 to 90 days | \$24,000 |
| Crawford | Crossroads Fiber Optics upgrade | In order to provide the high speed communications/data transmission needed by today's business community we must update the communications infrastructure at Crossroads Industrial Center in Bucyrus. This is an absolute necessity to preserve the jobs in place as well as attract approximately 1,000 additional jobs through sale of remaining acreage. Required is the installation of approximately 8,000 feet of fiber optic cable for the purpose of voice and data transmission. | Crawford County Development Board | 1,000 | 0 to 30 days | \$80,000 |
| Crawford | Crossroads Topography Correction | Topography of a 16 acre lot in the highly successful Crossroads Industrial Center in Bucyrus makes the site unusable. The mounded lot will be leveled by removing the bulk of the mounding and topsoil on the 16+ acres site allowing for the construction of an industrial property that is expected to employ roughly 250. Cost of the soil removal and topography reshaping is estimated at \$60,000.00 | Crawford County Development Board | 250 | 0 to 30 days | \$60,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Crawford | Bio Diesel/Soybean Extrusion | Construct a new soybean extrusion plant that will produce 25,000 tons of bean meal/yr to be used in our swine and cattle operation. Due to closing of Bunge at Marion, Oh, local soybean processing has ceased effective Jan of 2009. The soybean oil will be processed in Bio Diesel fuel. This project has the potential to create 8 new high tech jobs. This will be in addition to our current workforce of 100+ employees. With the high unemployment rate Crawford County is experiencing, this will be a significant contribution to the local economy. | Hor Livestock Company | 8 | 91 to 180 days | \$500,000 |
| Crawford | solar powered recycling center | currently operating a full scale 250,000 sq. ft. indoor recycling center looking to convert existing electric to solar powered roof units. Current kw usage is 90,000kw of electric monthly, estimate on solar roof unit from Dove Tail solar systems approx. 3.5 mil | innovative recycling | 10 | 0 to 30 days | \$3,200,000 |
| Crawford | Mansfield Castings Energy Savings Project | are encouraging to the foundry industry. However, American Foundries have struggled to survive against foreign competition in recent years and many have closed. Mansfield Castings, an aluminum foundry, has survived and is encouraged that new business will result from the stimulus package. However, the company must invest \$400,000 in a new aluminum furnace in order to survive and grow as a result of the new American opportunity and the company doesn't have the needed capital. Help with the purchase of the new furnace will result in the creation and retention of more than 60 jobs. The new furnace, due to technology improvements, will use up to 70% less natural gas than the company's existing furnace resulting in competitive savings to the company and a major reduction in carbon loading. The company can document that it does not have the capital or borrowing capacity to absorb the entire cost of this critical piece of equipment that will create and preserve jobs, make the company more competitive, lesson natural gas consumption and reduce the company's carbon fo | Crawford County Economic Dev. Partnership | 60 | 0 to 30 days | \$300,000 |
| Crawford | Project HOPE (Homes, Opportunity, Personnel,Employ | The idea would be to help families struggling with debt. It would be used to pay house payments, utility payments, and food. It could not be used for car or credit card payments. This would help the well-being of people who find themselves in a situation that they never thought they would be in. | Crestline Area United Way | 0 | 0 to 30 days | \$30,000 |
| Crawford | college Education | I want to go back to college to finish my degree but after getting paid there is nothing left to put toward my education. I know that the only way I will be able to get a better job is by getting my degree. I had been attending North Central State College but ran out of money and asking because have always done everything that a good citizen is suppose to do, pay my taxes, pay my bills on time, make sure my house payments are paid so I don't go into foreclosure. Yet I never able to get any help for anything. I know that I am only one person but I needed to request this to better myself. Thank you for your consideration. Angie Houseburg | Angela Houseburg | 1 | 31 to 90 days | \$20,000 |
| Crawford | Green Cleaning/LEED Certification | To develop a green cleaning program and help clean and maintain homes, schools, hospitals, hotels, offices and other facilities. Protecting the built environment has a profound impact on our natural environment, economy, health and productivity and help obtain LEED certification. Their LEED (Leadership in Energy and Environmental Design) building certification includes cleaning requirements and standards that are being adopted by public- and private-sector organizations that are committed to environmental stewardship. These funds will be used for education and training, equipment, supplies and a possible 10 new jobs. Thank you. | The Clean Co. Home and Office LLC. | 10 | 31 to 90 days | \$150,000 |
| Crawford | Job retraining for new industry | Gov. Strickland has proposed a film tax incentive to bring new industry to Ohio. We'd like to begin training workers to build our state's own infrastructure. We would retrain and train laid off and skilled workers to adapt to film, television, and multimedia (web) special effects - mold making, sculpting, prosthetic application, hair and make-up, conceptual design, prop & set building. These newly re-focused skills also cross over into other professions: dental technicians, museums, special event exhibits, Halloween attractions. It would also involve building a school which would employ construction workers, web and networking techs, teachers, etc | Precinct 13 Entertainment, Inc. | 100 | 31 to 90 days | \$1,750,000 |
| Crawford | Energy Efficiency for Existing Business | Convert an existing building and business to more energy efficient solar and wind technology new business to stimulate the economies in Crawford and Mahoning Counties. I have discovered the Patent for the business and need start up money and continued operation procedures for the rest of year. Can pay back loan and rehire and hire several employees. Stable Company that has been hit hard by the Heavy Truck and Automotive business, turning to the furniture line for more stable businesses. | Precinct 13 Entertainment, Inc. | 20 | 0 to 30 days | \$200,000 |
| Crawford | slip seat | needed electrical and structural improvements to the historic station theater, currently renovated and used for various educational and theatrical productions by the Galion Community Theater. Improvements/upgrades are required of the electrical system and lighting (internal and the external neon light marquee), as well as structural repairs and remodeling of several areas of this grand old structure. | Ohio Foam Corporation | 35 | 31 to 90 days | \$1,000,000 |
| Crawford | Improvements to Galion Community Theater Facility | Needed structural improvements to our 1904 Andrew Carnegie Library. Our historic library is in need of a new roof and windows to replace the existing ones which have passed their useful life. The same holds true to our HVAC system—the heating elements of the boiler are on their last leg and the air conditioning is not energy efficient by any means. The windows are in dire need for replacement and the electrical system and the lighting throughout this facility are in need of upgrade to accommodate computers, audio-visual equipment and other requirements to enhance customer service. | City of Galion | 5 | 31 to 90 days | \$400,000 |
| Crawford | New Roof on Library | the National Register of Historic Places, is in need of repair and renovation. This railroad station was built and dedicated in 1900. It was used as the CCC&St. L division headquarters and at one time, trains would stop here up to 32 trains a day. It is as it was also a "whistle stop" for several campaigning presidential candidates who gave speeches from her platforms, including Al Smith in 1929, Franklin Roosevelt in 1932 and Dwight D. Eisenhower and Richard Nixon in 1952. This building should be preserved. | City of Galion | 17 | 91 to 180 days | \$400,000 |
| Crawford | Renovate the Big Four Railroad Depot | Wind Mill and Solar maintenance and Repair Company. Centralized company with community culture driven workforce to service all of Ohio's new renewable energy equipment, with emphasis on windmill and solar panels. A newly trained and innovative workforce would be trained thru local JVS programs in emphasis of local needs. Other professional training will take place via CCD, trained drivers, Mechanical and electrical/Industrial Engineers, welders, auto mechanics, and innovative thinkers that will be providing solutions to problems yet to be resolved. 24 hour maintenance will be needed to help Ohio clean energy grid. Your help in securing funding will be an integral part of Ohio's future. 2009 Capitalized Maintenance: This is a rural transit project whose funding flows through the Ohio Department of Transportation. | Miller Wind and Solar | 45 | 91 to 180 days | \$85,000 |
| Crawford | Ohio Wind and Solar Maintenance | sewer project for 400 homes in polk township, mandated by the epa. |----------------|--|---|--|----------------|--------------------|---------------------------|
| Crawford | New Washington Public Water system | system. This past December (2008) a variety of state, federal and local agencies partnered in preparation for the pending loss of all public water for this community of 900 people. Unexpected late minute rains allowed the village to pump water into its reservoir from a local ditch. But the relief is temporary. The watershed is not adequate to supply the village's needs. The village MUST have a new water supply. The village of Attica, 7 miles away in Seneca County, has recently constructed a new water supply and treatment plant. Construction of 7 miles of water line along with booster pumps, etc. from Attica to New Washington will cost approximately \$2 million. This is believed to be the most cost effective way to remedy the situation. The only jobs created are likely to be construction jobs but in the interest of public health and safety, New Washington MUST find a new supply of water and must do so immediately before the residents and businesses are left without safe water and without adequate fire protection. Additionally, substantial job retention will result from revitalization of a 5,500 sq. ft. building which will serve as the starting point for re-opening the commercial business viability of the southern shopping district in the community. | Crawford County Economic Development Partnership | 20 | 91 to 180 days | \$1,500,000 |

The project would include the cost of laptop computers, mobil connectivity and electronic entry. The agency - Community Counseling Services, Inc., -- serves over 5,000 individuals a year providing outpatient mental health and substance abuse treatment services. The agency is the only one located in this rural area and links with schools, child welfare, courts, medical, law enforcement and other community partners. This project will decrease staff time spent on records and increase direct contact with clients and families. | Crawford Marion ADAMH Board | 5 | 0 to 30 days | \$99,210 |
| Crawford | Personal Security for Crawford County | online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rescue operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our devices. Our GPS trackers, location data can be sent to mobile phones or motion detectors can send alarm notifications to help prevent vehicle theft. Geo-fencing functions can set up boundaries and trigger notifications when exceeded. For personal safety a panic button can issue an alarm with location information to multiple chosen phone numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self powered units that continuously monitor and develop ways to harness electrical magnetic fields and gravity and to employ this energy as an alternative electrical and power source. | Nuleaf Ohio Limited | 2 | 31 to 90 days | \$94,500 |

| Cuyahoga | 2009 SEWER REHABILITATION AND REPAIR | THE REPAIR OF BROKEN SEWER MAINS AND LATERALS IN THE RIGHT-OF-WAY, ALONG WITH IN-SITU LINING OF CRACKED AND DETERIORATED SEWER MAINS. THE PROJECT WILL REDUCE I/I IN THE SANITARY SEWER SYSTEM, RESULTING IN REDUCTION OF SEPARATE SANITARY SEWER OVERFLOWS AND LOWER WET WEATHER FLOWS AT THE TREATMENT FACILITY. | CITY OF LYNDBURST | 20 | 31 to 90 days | \$525,000 |
| Cuyahoga | Springvale Golf Course and Ballroom Parking Lot Im | Complete rehabilitation of the existing parking lot at the City owned facility at 5871 Caterbury Road | City of North Olmsted | 18 | 31 to 90 days | \$35,000 |
| Cuyahoga | North Olmsted City Hall and City Service Center Pa | Complete rehabilitation of the existing parking lot including concrete curb at North Olmsted City Hall and Service Center located at 5200 Dover Center Road | City of North Olmsted | 8 | 31 to 90 days | \$88,000 |
| Cuyahoga | Root Road Cul-De-Sac Addition | Installation of a City-standard cul-de-sac at the end of the existing street that will bring the street up to current City standards and provide the proper surface for school buses, garbage trucks, fire trucks and general traffic to completely and safely make the directional turn | City of North Olmsted | 12 | 0 to 30 days | \$90,000 |
| Cuyahoga | Sidewalk Replacement Program | Replacement of various sections of concrete sidewalk throughout locations in the City | City of North Olmsted | 19 | 31 to 90 days | \$200,000 |
| Cuyahoga | ADA Updates to All City Buildings and Facilities | Based upon a study already performed, all City Buildings and Facilities will be updated to the current Americans with Disabilities Act standards. | City of North Olmsted | 16 | 31 to 90 days | \$196,000 |
| Cuyahoga | North Porter Road Water Main Replacement | Replacement of an existing 8" ductile iron water main that has experienced many failures throughout the past 8 years. The project limits are from Lorain Road to the City of Westlake corporation line, approximately 6,510 L.F. | City of North Olmsted | 47 | 31 to 90 days | \$493,600 |
| Cuyahoga | Monticello Boulevard Rehabilitation | Monticello Boulevard is designated as a major urban arterial street. The scope of this project involves the resurfacing of Monticello Blvd. and the update to current ADA standards of 100 curb ramps from Belvoir Rd to Mayfield Rd. in the city of Cleveland Heights. The project pavement is approximately 15,500 feet (2.9 miles) in length and 50 feet wide. The estimated average daily traffic is 16,750 vehicles per day. A primary is located along Monticello Blvd. as well as being a part of the NOACA Bicycle Route. The deteriorated condition of the pavement and gutters contribute to unsafe conditions to school children, pedestrians, bicyclists and the motoring public. | City of Cleveland Heights | 15 | 31 to 90 days | \$3,853,000 |
| Cuyahoga | Coulumbia Road / Lorain Road Intersection Improvem | Reconstruction of the northwest turning radius of the intersection that will provide a safer and more efficient flow of traffic. The current intersection experiences truck traffic that cannot properly maneuver the turn while remaining on the pavement | City of North Olmsted | 18 | 31 to 90 days | \$187,500 |
| Cuyahoga | Drinking Water Distribution System to Avon Lake Wa | Convert municipal water supply from the City of Cleveland Water Department to Avon Lake Water. A study has already been performed in conjunction with the City of Westlake | City of North Olmsted | 1722 | 181 days or more | \$18,127,500 |
| Cuyahoga | Police Station Improvements | Rehabilitation and addition to the existing City of North Olmsted Police Station | City of North Olmsted | 95 | 181 days or more | \$1,000,000 |
| Cuyahoga | Detention/Retention Basins at Lebern and Dover Bas | Installation of a new underground detention system (equalization basin) and the addition of capacity to an existing equalization basin in order to assist two pump station operations for sanitary sewerage for more efficiency and realistic approach to reducing inflow and infiltration into the existing sanitary sewer system, the City will put full effort into this Project getting more work done in a shorter period of time, hence, coming up with the solution to the ongoing problem of too much rain water being introduced into the existing sanitary sewer system. | City of North Olmsted | 24 | 31 to 90 days | \$250,000 |
| Cuyahoga | Inflow and Infiltration Detection, Reduction, and | Storm infrastructure restoration and upgrades throughout the City. | City of North Olmsted | 18 | 31 to 90 days | \$1,250,000 |
| Cuyahoga | Sanitary Sewer / Manhole Rehabilitation Project | Sanitary infrastructure restoration and upgrades throughout the City. | City of North Olmsted | 18 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Storm Sewer / Manhole Rehabilitation Project | Storm infrastructure restoration and upgrades throughout the City that will assist in eliminating flooding. | City of North Olmsted | 18 | 31 to 90 days | \$1,000,000 |
| Cuyahoga | Emergency Services Communications | This will enable us to continue emergency radio service for the three communities it currently serves: Brooklyn Hts., Cuyahoga Hts., and Valley View, consisting of police and fire depts. Currently, we operate most channels in the 155 Mhz range. We will need to comply with the change by year end 2012. This does not include the more than \$50,000.00 each community must spend to update mobile and portable radios for each community | Cuyahoga Heights Police Department | 10 | 181 days or more | \$200,000 |
| Cuyahoga | Glenview Rd and Bonnieview Rd Water Main Improve | 24" - 8" gate valves 2 - 12" cutting in valves 2 - 8" cutting in valves 14 - 6" hydrant assemblies 72 - 1" water connections 500 sq yds of pavement replacement Drive apron repair and various other incidental work | Village of Mayfield- Stephen Hovancek and Associates, Inc. | 25 | 31 to 90 days | \$600,000 |

|----------------|--|---|---|----------------|--------------------|---------------------------|
| Cuyahoga | LENSC 2009 Capital Improvement Project | LENSC occupies approximately 2.35 acres of space, which is leased from the Cleveland Metroparks. The actual facility is one story building that consists of exhibit space, classroom space, office space and veterinary exam space. The building is approximately 22,500 square feet. The project consists of renovating existing space, as well as adding new space to the existing building. One project outcome will be the certification of the facility of a LEED building. State funds are expected to be applied toward qualified expenses of both the renovation and new construction. This project will enable a greater number of individuals to participate in our daily programs, classes and experiences. Additionally, this project will enable Center to maximize its space without expanding the physical footprint of the building, a goal consistent with the Center's desire to restrict its impact on the environment and natural events. The project includes removal of asphalt wearing courses, base pavement repair and resurfacing of the pavements on Parkside Drive, Orchard Grove Avenue, Meadowbrook Avenue, and Delibank Drive. Also included will be the repair of concrete curbs, installation of ADA accessible curb ramps at the replacement of concrete drive aprons. | Lake Erie Nature & Science Center | 77 | 91 to 180 days | \$400,000 |
| Cuyahoga | Parkside Drive Neighborhood Pavement Repair/Resurf | In 2008 a storm sewer outfall on Outlook Avenue was sampled by the Cuyahoga County Board of Health and high levels of Fecal Coliform were detected. While source tracking has begun through the County Sanitary Engineering Division, additional engineering studies will be necessary to determine the source of the discharge and develop solutions for the elimination of the discharge | City of Brooklyn | 15 | 0 to 30 days | \$462,000 |
| Cuyahoga | Outlook Avenue Storm Sewer Outfall Study | In accordance with Ohio NPDES General Permit # OHQ000002, MS4 mapping requirements have been expanded requiring the City's Storm System Map to include additional information including catch basins, pipes, manholes, ditches, and public and private storm water facilities. This project will begin research and mapping in 2009 with a goal for completion in early 2013. | City of Brooklyn | 5 | 0 to 30 days | \$50,000 |
| Cuyahoga | NPDES Phase II MS4 Storm System Mapping | In accordance with Ohio NPDES General Permit # OHQ000002, MS4 mapping requirements have been expanded requiring the City's Storm System Map to include additional information including catch basins, pipes, manholes, ditches, and public and private storm water facilities. This project will begin research and mapping in 2009 with a goal for completion in early 2013. | City of Brooklyn | 10 | 0 to 30 days | \$100,000 |
| Cuyahoga | Fusion Liquid Concepts | FC creates products for the billion dollar a year food & beverage industries and currently sources out production for its clients and the out-of-state manufacturers. We are looking to expand the company, produce our products in-house and bring production to Ohio, specifically to Cleveland. | Fusion Liquid Concepts LLC | 100 | 0 to 30 days | \$500,000 |
| Cuyahoga | Miscanthus Gigantus Propagation & Harvest | Propagating, planting and harvesting miscanthus giganteus for the purposes of producing renewable energy source. Project will establish methods for growing and the infrastructure necessary to harvest, ship and utilize the product for energy. Initially the infrastructure will support NE Ohio and will expand going forward. | Conceptual Energy LLC | 10 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | North East Ohio Nurse Assistant Training (NEO-NAT) | Skills training to individuals seeking comprehensive employment training. Based on experience delivering this program, we anticipate an 85% completion rate for enrollees, and an 80% placement rate of program graduates. As the lead agency of a partnership with Berea Children's Home and Family Services, the Red Cross requests to continue to provide the opportunity for 500 participants to obtain nurse assistant/home health aide employment training, case management and other lifeskills training. NEO-NAT will be available to individuals residing in a six county region consisting of Ashabula, Cuyahoga, Lorain, Mahoning, Stark and Summit counties. The program warrants continued state funding due to the programs demonstrated success and potential for future success. NEO-NAT was initially funded in May 2006, with a TANF Demonstration Grant from the Ohio Department of Job and Family Services. The original award was \$1,498,349 for 12 months. The project received a two-year funding allocation of \$2,063,000 in the Ohio's FY2008/2009 Biennial Budget. | American Red Cross of Greater Cleveland | 500 | 181 days or more | \$1,931,695 |
| Cuyahoga | Basic Needs: Food, Clothing, Shelter & Advocacy | WSCC serves approximately 150 to 175 individuals each day. Our community's poor and homeless persons, regardless of their religious affiliation. The hospitality extended by staff and volunteers includes a warm welcome, food, clothing, shelter, companionship, compassion, and help with problems small and large. All services are provided free of charge with the help of over 400 volunteers. Over the years the needs of our clients and the gaps in the Cleveland market necessitated the creation of additional services. Telephone access, showers, a mailing address, stress management, counseling, resume writing services, legal services, literacy training and more grew out of our mission of hospitality. | West Side Catholic Center | 0 | 0 to 30 days | \$100,000 |
| Cuyahoga | Maple Heights Police Department | Funds are needed for three officers to be added to the Maple Heights Police Department. The number provided includes one year's salary and equipment. This additional manpower would be used to meet the increasing demands for service in our community. Anything we receive would be welcomed and our first priority would be to bring our personnel back to strength, after having been depleted the last several years. We are looking at some pretty tough financial times ahead, so any help from the stimulus package would benefit our department and the community. | City of Maple Heights | 3 | 0 to 30 days | \$200,000 |
| Cuyahoga | Lithium Ion Fuel Cell Technology- FMI | cell battery packs used in the Chevy Volt plug-in hybrid electric vehicle. Other applications are the nickel and metal hydride battery systems selected by Toyota for use in their hybrid electric vehicles and the ultracapacitor power storage cell. FMI has developed proprietary manufacturing technology for producing electrical pin-type connectors for high heat, high vibration vehicle applications resulting in superior conductivity, reduced weight, and increased energy efficiency. FMI products can also be utilized in solar and wind power generation systems, and energy delivery applications. The continued development of these technologies including design, tooling, testing, and production will require capital expenditures for machine tools and inspection equipment, and will result in the creation of new jobs in the areas of engineering & design, tool & die, quality assurance, and production. FMI is an innovative, solution oriented company committed to contribute to the changing energy demands as our society transitions from reliance on fossil fuels to the green technology of the future. | Fulton Manufacturing Industries, L.L.C. | 25 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Gordon Square Arts District | for economic development. It is a unique collaboration of three nonprofits — Cleveland Public Theatre, the Detroit Shoreway Community Development Organization and Near West Theatre — in a \$30 million capital campaign to revitalize Cleveland's West Side. This project involves the installation of energy-efficient roofs on the three buildings to be constructed/renovated and installation of a geothermal heating system. All three buildings will be LEED certified. Economic Impact: (1) 25 new businesses have located in the GSAD since 2006; (2) GSAD construction activity will create 2,054 jobs and a total economic output of \$258 million in Cuyahoga County from 2008 through 2010. That investment will create a minimum of 369 permanent jobs and stimulate increased job opportunity for years to come; (3) GSAD will leverage more than \$500 million of real estate and economic development activity in the Detroit Shoreway neighborhood. Renovation of the Capitol Theatre (the initiative's economic engine) and the streetscape has begun with anticipated completion by fall 2009 | Gordon Square Arts District | 2423 | 0 to 30 days | \$1,500,000 |
| Cuyahoga | Facility generator | northeast care center opens a new 147,000 sq ft facility in North Royalton Ohio. The clients physical needs have become more complex throughout the years. A generator is needed for the facility (complex) in case of a loss of electricity so that the residents' health and safety is protected. The complex may also serve as evacuation site for other nearby group homes. | NCC Solutions Db:Northeast Care Center | ? | 31 to 90 days | \$140,000 |
| Cuyahoga | JACKSON VALLEY PUMP STATION FORCE MAIN | 3,000 LF OF NEW SANITARY FORCE MAIN THAT IS BEING PLACED TO SUPPLY A WASTEWATER TREATMENT PLANT AND ITS EFFLUENT TO THE CHAGRIN RIVER WATERSHED, AND PUMP THE FLOWS TO A REGIONAL TREATMENT FACILITY. EXPECTED OUTCOME IS THE IMPROVEMENT OF WATER QUALITY OF THE CHAGRIN RIVER | VILAGE OF MORELAND HILLS | 24 | 0 to 30 days | \$216,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |

| Cuyahoga | WOODLAND GLEN/QUAIL HOLLOW PUMP STA. FORCE MAIN | 19,000 LF OF FORCE MAIN THAT WILL BE USED TO ELIMINATE TWO WASTEWATER TREATMENT PLANTS AND TURN THEM INTO PUMP STATIONS. THIS WILL ELIMINATE TWO DISCHARGE POINTS OF EFFLUENT TO THE CHAGRIN RIVER AND IMPROVE THE CHAGRIN RIVER WATER QUALITY | MORELAND HILLS | 24 | 91 to 180 days | \$616,000 |
| Cuyahoga | JACKSON VALLEY/WOODLAND GLEN/QUAIL HOLLOW WWTP ABA | THIS PROJECT INVOLVES THE DEMOLITION/MODIFICATION OF THREE WASTEWATER TREATMENT PLANTS AND CONVERSION OF THEM INTO PUMP STATIONS, TO PUMP APPROXIMATELY 0.5 MGD OF FLOW INTO THE NORTHEAST OHIO REGIONAL SEWER DISTRICT FACILITIES. ONE OUTCOME WILL BE THE REMOVAL OF NUTRIENTS/POLLUTANTS FROM THE CHAGRIN RIVER. | VILLAGE OF MORELAND HILLS | 50 | 91 to 180 days | \$1,875,000 |
| Cuyahoga | EDGEFILED RD. CULVERT REPLACEMENT | REPLACE A SECTION OF THE EUCLID CREEK BOX CULVERT IN THE EDGEFIELD RD. RIGHT OF WAY THAT IS STRUCTURALLY DETERIORATED. OUTCOME IS THE RESTORATION OF A SAFE STRUCTURAL OF A 70 YEAR OLD CULVERT. | CITY OF LYNDHURST | 24 | 31 to 90 days | \$100,000 |
| Cuyahoga | Simplicity Health Plans | Simplicity Health Plans is a unique company. We are known as a "transaction integrator" because we specialize in the integration of Health Savings Account (HSA) financial transactions between your HSA account, your employer, and your healthcare providers. Our internet based, real-time data transactional software surpasses the capabilities of any current paper or electronic payment method. Very simply, our job is to: 1. Help the employee and the employer lower healthcare costs. Employees and their family members become more responsible when it comes to their healthcare. 2. Keep you as healthy as possible through the use of our Simplicity member nurses and health coaches. In addition, utilizing the "real-time" information, Simplicity is able to quickly access the scope of your health needs and is better prepared to assist in your rapid return to health. 3. Eliminate fraud and excessive expenses in the healthcare system by using electronic transactions. 4. Help the employee and the employee's family get the best pricing for their medical bills through the use of our Simplicity provider network. | Quickpaynet Ltd. dba Simplicity Health Plans | 20 | 0 to 30 days | \$2,000,000 |
| Cuyahoga | Cuyahoga County Foreclosure Prevention Program | communities in Northeast Ohio. Foreclosures have an impact on the family losing their home and on the community. The most recent data available places Ohio among the top states in the rates of foreclosures. In 2008, Cuyahoga County experienced approximately 15,000 foreclosed properties. What had originally been a problem in the City of Cleveland now threatens the surrounding suburbs, such as Lakewood, Cleveland Heights, and Euclid. The City of Cleveland has issued \$15 million of revenue bonds in order to assist in the razing of its properties. National estimates place the costs of each foreclosure at \$34,000 per property, which entails the maintenance of the property, tax loss, and additional public services for vacant and abandoned properties. The object of this program is to have consumers contact the 211, First Call for Help, phone line, where contacts are given referrals to the five housing counseling agencies that work with homeowners. Housing counseling assists over 1,500 homeowners from losing their homes to foreclosure. | Cuyahoga County Foreclosure Prevention Program | 400 | 0 to 30 days | \$1,000,000 |
| Cuyahoga | Scholars Program | The Scholars Program is a collaborative between the school districts, students, parents, non-profits, for profits and community organizations. The program assists students in grades 10-12 with developing and improving skills in the following areas: passing the OGT/ACT, personal development, human interaction, communication, health lifestyles, financial literacy, college readiness, goal setting, planning, self-esteem, personal safety, career development, and conflict resolution. The 10 month program is in it's second successful year in Cleveland. Students receive paid summer internships with area corporations that allow the students to receive hands on experience in careers they express an interest in, as well as a pay check. The program seeks to expand to all major Ohio metropolitan areas over the next couple years | Rehab and Rebuild Foundation | 4000 | 31 to 90 days | \$4,500,000 |
| Cuyahoga | Rapid deployment Home energy savings | Install energy saving items in existing homes. Items limited to rapid payback, typically one year or less. This makes each project affordable, efficient regarding resources used and enables us to serve many homeowners - hence maximizing energy savings with respect to funds and efforts expended. Installation time goal is 1-2 man-days / home. Homeowners provided audit report with list of additional items to consider in future with payback period expected - (at various electric and natl gas prices). This yields a "roadmap" for future upgrades. All tax related paperwork provided where applicable. Typical items targeted for "rapid deployment" are: - Smart thermostats - Faucet & showerhead aerators / low flow fixtures - Energy efficient lighting (fluorescent, LED, etc to replace incandescent - Motion Sensor & Programmable timer lighting including "vampire power controls & system use monitors - Furnace / AC filter replacements/retrofits and /or electrostatic air cleaners | Disconnect, LLC | 7 | 31 to 90 days | \$350,000 |
| Cuyahoga | Joe Hill Clothing | outlets. Joe Hill Clothing will create the first and only independent retail store offering exclusively union made in America clothing. The business structure and retail operation will be innovative, fresh, and progressive. This business structure will lend itself for duplication that would allow business revenue to flow into Ohio from other states. I have developed a 5 year business plan and I am serious about my commitment to this project and its benefits to Ohio and to American workers. | Sheet Metal Workers International Association | 9 | 31 to 90 days | \$90,000 |
| Cuyahoga | TRADES EDUCATION | TRADES EDUCATION PROGRAM TO TEACH WARD 7 RESIDENTS AND OTHERS THROUGHOUT THE CLEVELAND AREA THE SKILLS TO HELP REBUILD AND REHAB THE 700 EMPTY HOUSES WITH SKILLED AND DISLOCATED WORKERS TO TRAIN YOUTH AND LAID OFF RESIDENTS AND OTHERS IN THE GREATER CLEVELAND AREA. GIVE THEM A SKILL FOR LIFE IN THE TRADES. | BTC/TRAINING AND RESOURCE CENTER | 100 | 31 to 90 days | \$950,000 |
| Cuyahoga | Newcomer Family Support Center | The Newcomer Family Assistance provides family stabilization and job development for 300 individuals and their families. The project assists those who are hardest to reach and have the lowest level of skills. | Asian Services In Action, Inc. | 150 | 0 to 30 days | \$200,000 |
| Cuyahoga | Asian American Youth Against Tobacco | Asian American Youth Against Tobacco is a leadership and advocacy project. The program will provide work to 20 people and will help to reduce health care costs to Ohioans through health promotion and education. | Asian Services In Action, Inc. | 20 | 0 to 30 days | \$212,000 |

| Cuyahoga | Strongsville Police Department | Funds needed to hire two new police officers within the City of Strongsville This project is the improvement of the deficient intersection of Granger Road and Transportation Blvd within the City of Garfield Heights. Included in this project is: | City of Strongsville | 2 | 0 to 30 days | \$101,610 |
| Cuyahoga | Granger Rd/Transportation Blvd Intersection Improv | 3,186 Feet of Storm Sewer 12,724 Square Yards of Concrete Pavement 1739 Cubic Yards of Asphalt 3 New Signals Updated Lighting The widening of this critical intersection will provide opportunity for the redevelopment of 76 acres of commercially zoned property. There has been significant interest to develop this property, however the needed improvements to this intersection have proved cost prohibitive. The improvement of this intersection will make the area more appealing to developers, as that is one improvement that will not be needed. The improvement plans for the intersection have been substantially completed, and are ready to generate, FDA-cleared and clinically tested Niris™ Imaging System. The Niris system utilizes optical coherence tomography (OCT) to provide real-time, two-dimensional, cross-sectional visualization of tissue microstructure. Imalux has shown the viability of OCT as a clinically relevant point-of-care imaging tool in a wide variety of medical applications[1-32]. Through clinical studies, users identified five necessary design improvements: 1) Survey large areas of tissue quickly; 2) View tissue through small apertures; 3) Expand field of view; 4) Improve image analysis software and 5) Offer a low cost OCT for cost sensitive markets. The specific applications will include: • Assessment and rapid diagnosis of microstructural changes associated with cancerous and pre-cancerous lesions (i.e., cervical cancer, bladder cancer and oral cancer); • Assessment of the completeness of surgical resections for the above; • Identification and monitoring of inflammatory diseases (i.e., inflammatory bowel diseases and gingivitis). • Construct a new 13,575 Sq. Ft. 24 hour/24 bed jail facility along with all associated appurtenances • Construct a 16,926 Sq. Ft. addition that will more than double the existing area dedicated to the operational functions of the Police Department. • Construct a new 3,333 Sq. Ft. (five) lane tactical firing range for police officer training and certification. • Construct a new 8,510 Sq. Ft. parking/storage facility for storage of Tactical Equipment, Police Sweet Vehicles, Homeland Security Mobile Base Station and Anti- terrorism/Hazmat response vehicles. • Construction project also includes a complete technological upgrade for all equipment associated with the Police Dispatch, Fire Dispatch, 911 Call Center, Video Surveillance, Video Arrainment and Computer Equipment. • Includes the installation of a electrical generation plant for 100% emergency back-up power generation for the police facility. This project was vital for maintaining and expanding safety services of the Police Department for the residents of the City of Strongsville. Many of the discretionary services currently available would Replace Concrete Ramps At Ir-480 And W. 130Th | City of Garfield Heights | 200 | 91 to 180 days | \$6,200,000 |

| Cuyahoga | Laurel Creek Restoration | | Cuyahoga County Board of Health | 12 | 91 to 180 days | \$472,000 |
| Cuyahoga | Dist 12, PID 84483, CUY IR 480 10.36 Ramps | | Ohio Department of Transportation | 12 | 31 to 90 days | \$300,000 |
| Cuyahoga | Dist 12, PID 25482, CUY SR 252 00.05 | Construct A Grade Separation At Columbia Road (Sr-252) And The Csx Railroadcompany Tracks In The City Of Olmsted Falls. | Ohio Department of Transportation | 239.7 | 31 to 90 days | \$8,353,680 |
| Cuyahoga | Wood Creek Restoration | Restoration of 2,630 linear feet of Wood Creek. This project could also potentially fall under the Federal Stimulus Program for Energy & Environment/Habitat Restoration. | Cuyahoga County Board of Health | 12 | 91 to 180 days | \$560,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Smith/Hummel Sewer | Install a 54" = 3800 ft sanitary sewer on Smith Road and a 36" = 2600 ft sanitary sewer on Hummel Road, includes modifications to Fry Road pump station and the storage chamber on Smith Road. | City of Brook Park | 15 | 31 to 90 days | \$2,865,700 |
| Cuyahoga | Little Cuyahoga Restoration | Restoration of 14,000 linear feet of the Little Cuyahoga. This project could also potentially fall under the Federal Stimulus Program for Energy & Environment/Habitat Restoration. | Cuyahoga County Board of Health | 12 | 91 to 180 days | \$2,100,000 |
| Cuyahoga | Foltz Parkway Extension Phase II | Extension of new 40' wide concrete industrial roadway from its current terminus just south of Drake Road, approximately 3,000 feet to Boston Road. Project includes grading, storm sewers, sanitary sewers, watermain, and appurtenances. | City of Strongsville | 50 | 91 to 180 days | \$4,000,000 |
| Cuyahoga | Deer Lick Run Restoration | Restoration of 1,300 linear feet of Deer Lick Run. This project could also potentially fall under the Federal Stimulus Program for Energy & Environment/Habitat Restoration. | Cuyahoga County Board of Health | 12 | 91 to 180 days | \$250,000 |
| Cuyahoga | Concrete Roadway Rehabilitation Program | Howe Road- Royalton to Shurmer \$1,000,000 Jonathan Drive- \$500,000 Penny Pines- \$200,000 North Redrock-\$300,000 South Redrock-\$300,000 Foltz Parkway- \$400,000 | City of Strongsville | 50 | 31 to 90 days | \$2,700,000 |
| Cuyahoga | Dist 12, PID 85531, CUY IR 090 15.24 Phase 1,2&3 | CUY IR 090 15.24 Phase 1,2&3 Innerbelt Bridge | Ohio Department of Transportation | 10,475.50 | 91 to 180 days | \$365,000,000 |
| Cuyahoga | Restoration of an Unnamed Tributary in Streetsboro | Restoration of 1,000 linear feet of an unnamed tributary in Streetsboro, Ohio. This project could also potentially fall under the Federal Stimulus Program for Energy & Environment/Habitat Restoration. | Cuyahoga County Board of Health | 12 | 91 to 180 days | \$250,000 |
| Cuyahoga | West 130th-Royalton Road Intersection | Removal of existing narrow asphalt pavement and installation of new concrete pavement | City of Strongsville | 50 | 91 to 180 days | \$450,000 |
| Cuyahoga | Restoration of an Unnamed Tributary in Aurora, Ohio | Restoration of 1,000 linear feet of an unnamed tributary in Aurora, Ohio. This project could also potentially fall under the Federal Stimulus Program for Energy & Environment/Habitat Restoration. | Cuyahoga County Board of Health | 12 | 91 to 180 days | \$250,000 |
| Cuyahoga | Webster/Blazey Sanitary Sewer Project | Installation of new sanitary sewers in the Webster Road, Blazey Trail, Janette Drive, and Hill Drive area | City of Strongsville | 30 | 91 to 180 days | \$1,850,000 |
| Cuyahoga | Drake Road Sanitary Sewer Project | Installation of new sanitary sewers in Drake Road between Greenbriar Drive and West 130th | City of Strongsville | 30 | 181 days or more | \$2,000,000 |
| Cuyahoga | Prospect Road Storm Sewer Replacement | Removal of existing, under capacity storm sewer in Prospect Road between Westwood Drive and Albion Road. | City of Strongsville | 30 | 91 to 180 days | \$1,000,000 |
| Cuyahoga | Westwood Drive Box Culvert Replacement | Removal and replacement of an existing, deteriorated, and unsafe box culvert on Westwood Drive | City of Strongsville | 50 | 91 to 180 days | \$150,000 |
| Cuyahoga | Dist 12, PID 85424, Cleveland Commercial RR Rehab | Cleveland RR Rehabilitation of the following culverts: Westwood#2- \$50,000 Howe Road #2- \$80,000 Howe Road #1- \$400,000 Shurmer Road Culvert #6- \$50,000 Prospect Road Culvert #9- \$200,000 (city share) | Ohio Department of Transportation | 23 | 31 to 90 days | \$800,000 |
| Cuyahoga | Culvert Rehabilitation Program | Westwood#2- \$50,000 Howe Road #2- \$80,000 Howe Road #1- \$400,000 Shurmer Road Culvert #6- \$50,000 Prospect Road Culvert #9- \$200,000 (city share) | City of Strongsville | 50 | 91 to 180 days | \$780,000 |
| Cuyahoga | SSO Elimination, Rehabilitation, Water Line and Pa | Sanitary sewer overflow elimination, storm sewer replacement, pavement replacement | City of Euclid | 11 | 31 to 90 days | \$1,172,000 |
| Cuyahoga | Citywide Pavement Rehabilitation | This project consists of the full depth rehabilitation of twenty local streets (total of 23.4 lane miles) including drainage and berm work. | City of Strongsville | 85 | 31 to 90 days | \$11,930,000 |
| Cuyahoga | Eastland Road Covered Bridge Rehabilitation & Rest | The rehabilitation and restoration of an existing covered bridge on Eastland Road that crosses the west branch of the Rocky River. The bridge is to be restored and improved to full legal height to facilitate safe travel for legally sized vehicles. | City of Strongsville | 35 | 91 to 180 days | \$149,819 |
| Cuyahoga | Pvment Equipment Acquisition | The acquisition of the following pavement rehabilitation equipment (two tandem axle dump body trucks, one self propelled paver, and one self propelled pavement milling machine) to enable the City of Strongsville's Service Department to maintain street pavement | City of Strongsville | 30 | 31 to 90 days | \$900,000 |
| Cuyahoga | Dist 12, PID 77331, D12 ITS TRAC | District 12 Its - Freeway Management System (Mot). This is to fund the semi-annual resurfacing road resurfacing program within the city. This program can be ready for bid in less than 30 days. Included in this program is: | Ohio Department of Transportation | 756 | 31 to 90 days | \$26,340,000 |
| Cuyahoga | Road Program | 5000 Cubic Yards of Asphalt 2000 Feet of Concrete Curb 500 Square Yards of Concrete Walk | City of Garfield Heights | 50 | 31 to 90 days | \$1,500,000 |
| Cuyahoga | E. 214th St. - Sewer, Water Line, Pavement Replace | Replacement of 2350' of sanitary sewer, 2400' of storm sewer, 2400' of water line, 6800 sq. ft. of pavement | City of Euclid | 16 | 0 to 30 days | \$2,556,000 |
| Cuyahoga | Dille Road and E. 204th Street Sewer, Water Line, | Replace 2600' of sanitary sewer, 3200' of storm sewer, 6900 sq. ft. of pavement, eliminate cross connections of sewers. | City of Euclid | 9 | 0 to 30 days | \$1,900,000 |
| Cuyahoga | East 248th Street and Shoreview Avenue Sewer, Wate | Replace 1900' of sanitary sewer, 2900' of storm sewer, 1900' of water line, install new storm outfall to Lake Erie and 5100 sq. ft. of pavement | City of Euclid | 21 | 0 to 30 days | \$2,633,600 |
| Cuyahoga | East 190th, East 191st, East 193rd, East 194th, an | 2900' of water line replacement, 2700' of sanitary sewer replacement, 2850' of storm sewer replacement, 7400 sq. ft. of pavement replacement | City of Euclid | 31 | 31 to 90 days | \$3,132,000 |
| Cuyahoga | SSO Elimination on Crystal Ave., East 220th St., C | Sanitary sewer overflow elimination and combined sewer elimination. | City of Euclid | 27 | 91 to 180 days | \$2,732,000 |
| Cuyahoga | SSO Elimination | Elimination of 14 sanitary sewer overflows. | City of Euclid | 340 | 91 to 180 days | \$28,000,000 |
| Cuyahoga | Dist 12, PID 85424, Cleveland Commercial RR Rehab | Cleveland Commercial RR Line Rehabilitation | Ohio Department of Transportation | 23 | 31 to 90 days | \$800,000 |
| Cuyahoga | Dist 12, PID 84483, CUY IR 480 10.36 Ramps | Replace Concrete Ramps At Ir-480 And W. 130th | Ohio Department of Transportation | 12 | 31 to 90 days | \$300,000 |
| Cuyahoga | Dist 12, PID 25482, CUY SR 252 00.05 | Construct A Grade Separation At Columbia Road (Sr-252) And The Csx Railroadcompany Tracks In The City Of Olmsted Falls. | Ohio Department of Transportation | 239.7 | 31 to 90 days | \$8,353,680 |
| Cuyahoga | Dist 12, PID 77331, D12 ITS TRAC | District 12 Its - Freeway Management System (Mot). | Ohio Department of Transportation | 756 | 31 to 90 days | \$26,340,000 |
| Cuyahoga | Economic Development and Empowerment Plan | A Comprehensive Collaboration of non-profit and for profit organizations focused on workforce development, business development, wealth accumulation/Individual Development Account, and housing. Initiative targets individuals in underserved communities and who are unemployed or underemployed. Participants will receive referrals for substance abuse and psychological assistance. Participants will have ability to secure jobs, start small businesses, save money to: finance college, purchase a new home, refinance an existing home, and they will also be able to secure housing in the process. | Rehab and Rebuild Foundation | 1000 | 31 to 90 days | \$6,000,000 |
| Cuyahoga | Insulation in the external walls and new windows f | External insulation for 327 buildings for 600 residential units. These units are used by people in middle and low income status | Brooklyn Acres Mutual Homes Inc.UDU | 20 | 181 days or more | \$0 |
| Cuyahoga | Warrensville/Van Aken Transit-Oriented Development | The project consists of 4 components: reconfiguration of unsafe 6-way intersection to standard 4 way intersection; 0.4 mi. extension of GCRTA Blue Line rapid transit tracks; new, end-of-the-line intermodal station; and redevelopment/revitalization of Shaker Heights' primary commercial district. Private development in conjunction with the mass transit and roadway work is projected to yield the following economic benefits: \$300-500 million(M) of new investment within the 50-acre district; \$10-12 M increase in annual city property and income tax; \$5-10 M in new annual State of Ohio income tax; preserve approx. 3,000 existing office and retail jobs; create 1,000-1,500 new permanent office and retail jobs; add 500-600 new housing units. Positive environmental impacts will include: added capacity and efficiency of existing rapid transit; improved air quality by reducing automobile trips and increasing transit ridership; reduced air pollution by decreasing traffic congestion and cutting idling time at the intersection by over 50%; and improved access to jobs in downtown Cleveland and the eastern suburbs | City of Shaker Heights | 4500 | 31 to 90 days | \$50,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Snow Rd./Engle Rd. Realignment | configuration. Design Parameters: 1. Single 4-lane roadway for Engle 2. Non signalized, yield control roundabout type intersection 3. 35 mph design speed, except for roundabout 4. Merges Snow Rd east ramp and Snow Rd west ramp into a single, 4-lane road. New 4-lane roadway intersects existing Snow Rd traffic west of bridge at re-designed signalized intersection near Ford/Fast Park and Snow Rd east ramp. 5. Snow Rd. turnaround eliminated 6. Portions of Ford Dr eliminated | City of Brook Park | 40 | 181 days or more | \$7,500,000 |
| Cuyahoga | Funding Lighting Retrofits | Funds would be used as grants or loans for businesses in need of updating outdated and inefficient commercial light fixtures. Lighting retrofits can lower a companies electrical energy use by as much as 70%, with a typical payback schedule of less than 3 years. The requested amount of funds is merely a number to reflect the large scale of need, but any amount towards these projects would be beneficial. In many cases, the energy saved is enough to repay any type of financing. Perhaps these programs could provide funds for smaller and larger companies, or extremely favorable loan terms that would encourage more people to update their lighting and therefore reduce energy demand and environmental impact. If the government alone were to retrofit just their own properties, the energy and environmental impact would be very large. I would also love to see the involvement of energy providers, perhaps managing the project loans and billing for any loan payments. My company evaluates customers current lighting designs, performs an Energy Savings Analysis, and Construct A Grade Separation At Columbia Road (Sr-252) And The Csx Railroadcompany Tracks in the City Of Olmsted Falls. | Vanguard Industrial Products | 100 | 0 to 30 days | \$5,000,000 |
| Cuyahoga | Dist 12, PID 25482, CUY SR 252 00.05 | | Ohio Department of Transportation | 239.7 | 31 to 90 days | \$8,353,680 |
| Cuyahoga | Timber Trail Detention Basin Expansion/Renovation | Existing storm water retention basin is located at intersection of two stream corridors within a ravine valley. Basin is tributary to 220-acre area of mostly residential development. Homes have experienced repeated flooding during recent rains. New basin would remove sediment and increase capacity. Will include permanent sediment control feature, micro-pool and flow bay to be monitored by City. Basin is upstream of Cuyahoga Valley National Park land. New basin will provide location for sediment removal to reduce amount of sediment and pollutants entering National Park wetlands | City of Brecksville | 8 | 31 to 90 days | \$250,000 |
| Cuyahoga | Wiese Road Retaining Wall Improvement | Two roadside retaining walls are failing. One is 150' long, the other 650'. Sections have rotational or sliding failure, shear failure, soil piping through joints, large distress fractures. Walls are too close to a winding, steep roadway which is several hundred feet away from Riverview Rd., which borders Cuyahoga Valley National Park. Should the wall fail, it would fall across the road, causing total blockage. Vehicles, pedestrians, bicyclists are endangered, as well as homes in the area that would be affected by a landslide. Improvement includes rehabilitation of shorter wall and removal and replacement of longer wall. New wall will be further away from roadway, allowing sight distance consistent with industry standards. | City of Brecksville | 10 | 91 to 180 days | \$1,600,000 |
| Cuyahoga | Glen Forest Culvert Replacement | Replace 380 ft of existing culvert, which has current capacity of handling only a 5-year rain event, with a larger culvert capable of handling 100-yr rain event. Culvert transfers flow from a 300 acre drainage area. Insufficient size of existing culvert has been the cause of repeated flooding to residential homes and streets for many years. | City of Brecksville | 8 | 31 to 90 days | \$400,000 |
| Cuyahoga | Fitzwater Road Improvements | REHABILITATION OF EXISTING ASPHALT SURFACE, REPAIRING OF CURBWAY TO ALLOW PROPER DRAINAGE FOR PEDESTRIANS AND BICYCLISTS, INSTALLATION OF STORM SEWER SYSTEM AND WATER QUALITY TREATMENT FEATURES. Road connects to Riverview Road, which borders the Cuyahoga Valley National Park. Improved roadway will provide safer access for vehicles, pedestrians and bicyclists. Improved drainage will transport water more effectively off roadway. Water quality features will reduce sediment and pollutants in storm water being carried in streams that discharge into the Cuyahoga River within the National Park. | City of Brecksville | 22 | 31 to 90 days | \$1,400,000 |
| Cuyahoga | Old Royalton Storm Sewer Replacement | Existing storm sewer is failing. This is a tributary to 43.5 acres including a mix of residential development and Brecksville/Broadview Hts. High School complex. Replacement will help alleviate localized flooding of residential homes and roadway which has occurred during heavy rains. Length of sewer is 1080 lf and includes 3x3 box culvert. | City of Brecksville | 8 | 31 to 90 days | \$210,000 |
| Cuyahoga | Highland Drive/Oakes Road Water Line Cleaning/Reli | Clean and line 11,200 feet of water line, replace 4" fire hydrants with 6", and valves. Project is needed to provide smoother flow of water to homes and larger volume to meet needs of fire fighters. | City of Brecksville | 10 | 181 days or more | \$1,200,000 |
| Cuyahoga | Snowville Rd Sanitary Sewer & Pump Station | REHABILITATION OF EXISTING SANITARY SEWER, REPAIRING OF CURBWAY TO ALLOW PROPER DRAINAGE FOR PEDESTRIANS AND BICYCLISTS, INSTALLATION OF STORM SEWER SYSTEM AND WATER QUALITY TREATMENT FEATURES. It would be more cost effective to eliminate the treatment plant and pump sewage to an existing sanitary sewer main. Cuyahoga County, through Ohio EPA, funded replacement of one of the two pump stations necessary, plus a portion of the force main. The project cost listed here is in addition to the work already done. | City of Brecksville | 15 | 31 to 90 days | \$2,500,000 |
| Cuyahoga | Pickeworks Storm Sewer Replacement | Storm sewer crossing a parking lot is failing and needs to be replaced. Sewer is tributary to 275 acre drainage corridor consisting of residential homes, condominiums and natural wooded areas. A significant portion of the sewer has failed in multiple locations and significantly more areas are prone to failure since large portions of sewer bottom have decayed. Continued failures could cause significant upstream flooding and affect access to commercial business with 20 employees. Requires replacement of 190' of 78" diameter reinforced concrete pipe and accompanying appurtenances. | City of Brecksville | 35 | 31 to 90 days | \$300,000 |
| Cuyahoga | Cuyahoga River Bank Stabilization | Purpose of project is to protect Vaughn Rd. from erosion that is occurring along the bank of the adjacent Cuyahoga River. This poses a serious threat to the future stability of the roadway and the public that traverses it. Project will also reduce amount of sediment loading in the river due to the erosion. Includes 219 ft of bioengineering bank stabilization along north bank, including log-toe protection, log anchor point structures, ledge stone bank protection, toe stones, live branch layering, seeding and mulching. Road provides access to Cuyahoga Valley National Park Towpath Trail, Cuyahoga Valley Scenic Railway, Cleveland Metroparks, Boston Mills and Brandywine Ski & Waterpark areas, which have over 700 employees. Vaughn Rd. is now frequently closed because of severe flooding. When closed, access to the recreation areas is severely limited and requires lengthy detours. Project has been reviewed & approved by Army Corps of Engineers | City of Brecksville | 750 | 0 to 30 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|------------------------------------|----------------|--------------------|---------------------------|
| Cuyahoga | Analytical Instrumentation - Milk Components | We need to complete CE/UL/FDA compliance testing for our milk analyzer in order to allow it to be sold into neonatal hospital units. This will provide a market opportunity for our business that would allow us to expand or retain our manufacturing and service business with approximately 10 people. Additional funds will be used to develop a next generation instrument to test milk (dairy and human). This is a new application for currently available technology. Our partner R&D firm is in the Cleveland area tied to the NASA-Glen research facility. This new design will be transformational for the milk analysis market. Expected benefit would be an additional 30 to 40 jobs over the course of worldwide market penetration. Metron Instruments engineers, manufactures and sells mid-infrared instrumentation to measure components in milk including fat, protein, lactose and solids. All of our employees are in the Cleveland area. Our design and research contractors are also in the Cleveland area. The compliance work including testing is with a contractor based in Mentor, Ohio. The test facility is located in Middlefield, Ohio. | Metron Instruments, Inc. | 10 | 0 to 30 days | \$400,000 |
| Cuyahoga | Bradenton Blvd. Sanitary Sewer Project | sanitary sewer construction for EPA mandated septic tank abandonment order. Project fully designed, OEPA approved, and ready to advertise upon notification of funding | City of Parma | 50 | 0 to 30 days | \$1,430,000 |
