| Fayette | Operating funds for small business | My parents started a small office supply business in our town. My dad died in 1997 and mom turned the business over to us 3 kids. We were being quirky with the closing of several businesses etc in and around our community. I ended up buying my brother and sister out since there was not enough business to support three of us. Now I am a woman owned small business owner it still is really rough but I am trying to make ends meet. I feel this money would help my business grow and I would be able to hire several outside salaried to bring in more business, and open other locations. Also it would help with repairs and improvements on my property and greatly improve my operating expenses. This is a business my parents started and I would greatly love to keep it going. | Watson's Office Supply | 3 | 0 to 30 days | \$400,000 |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Fayette | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant money. Building a wireless infrastructure to equip rural residents with the Bandwidth to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV. TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial opportunities that will create countless jobs statewide. This is a small office business (two locations, Fayette and Highland) with currently 5 full time, 1 commission and 1 part time employees at 22,000 to 30,000 annual salaries. Being a small business and having some subcontractor loss to employee spouses in local industry, president of a corp and main principal still contributing in part to carry existing payroll needs. The 75,000 request is to retain and maintain employees for this small business in addition to all other obligations. These monies will avoid some near future layoff or termination decisions over next 12 months in light of current economic forecasting and recent headwinds. Ranchers Restaurants Inc has been a staple in the Fayette county area for thirty years. Ranchers employ 22-24 employees on a regular basis, we have seen a down turn of revenue over the past year and the forecast is more of the same. With this request of said monies jobs for many ranches employees can be retained and created. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Fayette | Job retention and stability | This is a small office business (two locations, Fayette and Highland) with currently 5 full time, 1 commission and 1 part time employees at 22,000 to 30,000 annual salaries. Being a small business and having some subcontractor loss to employee spouses in local industry, president of a corp and main principal still contributing in part to carry existing payroll needs. The 75,000 request is to retain and maintain employees for this small business in addition to all other obligations. With this request of said monies jobs for many ranches employees can be retained and created. | McMahon Insurance & Financial Services, Inc | 5 | 0 to 30 days | \$75,000 |
| Fayette | employee retention and new hire | general contracting in residential home care, local business, private business which includes, office cleaning, landscaping. | ranchers restaurants inc. | 15 | 0 to 30 days | \$150,000 |
| Fayette | general other/personal business | Replacement of Dock, Pier Cap, and Approach Slabs for the North Street Bridge over Paint Creek. Bridge limits are 121.74 ft. | private | 5 | 91 to 180 days | \$200,000 |
| Fayette | ODOT PID: 79444, FAY NORTH STREET BRIDGE | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through the Ohio Department of Transportation. | City of Washington Court House | 30 | 91 to 180 days | \$310,000 |
| Fayette | FAY Capitalized maintenance; PID 86096 | The city of Washington Court House has planned to establish a 5500 foot recreational trail connecting the existing Eymann Park to the new reservoir and YMCA complex on the outskirts of town. They have already contracted with McCarty Associates (architects, engineers, & surveyors) to engineer the design. Approval from the City of Engineers and the EPA has already been granted to build the trail on existing city property along scenic Paint Creek. The city has stockpiled dirt, concrete, and asphalt grindings from various city improvement projects to recycle as a base for this project, but progress has been halted because of recent cuts in the city budget. This season paved and diminished budget will provide a safe corridor for people of all ages to healthily access this developing recreational area, without having to walk or risk the adjacent Route 41. | Ohio Department of Transportation | 1 | 0 to 30 days | \$52,700 |
| Fayette | Eymann Park/City Reservoir Recreational Trail | Project consists of the replacement of filter media in all four (4) gravity filters at the water treatment plant. The existing media has reached its useful life; is no longer in spec, and the turbidity removal is significantly down. This media must be replaced to meet the Ohio EPA recommended turbidity standard from Ohio EPA. Filter effluent turbidities are creeping up and are sometimes above the Ohio EPA recommended standard. Project includes removal and disposal of existing media, and the installation of new media. Construct and install a concrete sedimentation system to reclaim aggregates & hold run off water. Add a dust collection system to existing plant. Purchase new emission controlled trucks to expand our volume of business. | Tri-County Triangle Trail, Inc. | 20 | 0 to 30 days | \$370,319 |
| Fayette | Washington CH Filter Media Replacement | We are a general construction company and developer in a small city. We started a small condominium development approximately five years ago that consisted of 16 units. In the meantime, the mortgage meltdown has pushed the city to raise our cash flow and we are selling five unsold units that have yet to be finished. The interest on the unpaid loan is a considerable amount. Our cash flow and we have received lost money every year since. We are still trying to sell the units. We are looking for some assistance we will be able to hire some subcontractors and buy materials to try and finish the remaining units so they will be marketable. We are truly one of the Main Street companies that has been hurt by Wall Street. We are not looking to get rich quick but want to remain a viable business and not a statistic. | Washington CH- URS Corporation | 3 | 0 to 30 days | \$160,000 |
| Fayette | Ross Co Green Plant | looking to construct a new 5 bay metal exterior fire house with meeting room for department business as well as township meetings, and local setting to include 3 small offices, 1 additional room for communication equipment, concrete floors, automatic one We are seeking funding to construct and operate a 4800 sq. ft. general store. It will consist of a meat market, deli, convenience store, bakery and pizza business as well as a mini golf course and coin game. We expect to employ a minimum of 25 people. Being in the heart of the area of thousands of displaced DHL employees, we feel this will have a positive impact on some of our unemployment problems. | Ross Co. Redi-Mix | 10 | 0 to 30 days | \$3,000,000 |
| Fayette | General Construction business | NEW EQUIPMENT THAT WILL HELP THE SHOP BE MORE COMPETITIVE AND STAY OPEN. Money requested for the expansion of existing Shave Ice Concession Stand including first Stand, rebuilding 2nd Stand, and purchasing existing parking lot where Stand 1 is located for future development, or additional vendors to display items for sale. | KM Properties Ltd. and Marquee Construction Inc. | 15 | 0 to 30 days | \$250,000 |
| Fayette | new fire house | Fayette County Victim Witness Division is the only agency in the county that provides court advocacy and crisis response services to all victims of crime in our County. Last, due to budget cuts, our office lost one employee. This has made it extremely difficult for us to maintain all services that our office provides to all victims. This funding usually provides for one advocate/instructor in common pleas court and another advocate in juvenile court. The loss of the one position has made a tremendous impact on the number of victims served and the amount of individual attention each victim receives. This funding would assist us in being able to hire back that advocate and better serve our victims. | concord-greene volunteer fire department | 15 | 31 to 90 days | \$300,000 |
| Fayette | employee retention and new hire | Municipal Court Advocate provides services to all victims through the City of Washington Municipal Court. Because of funding cuts last year this position went from a full time 40 hour a week position to a part-time position. In addition to the loss of salary benefits we also lost all other monies that supply this position such as office supplies, travel and training expenses. Because of this lack of funding it is more difficult to serve all the victims that were previously served in Municipal Court or provide them with the time and attention that each victim in each case deserves. | ranchers restaurants inc. | 15 | 31 to 90 days | \$150,000 |
| Fayette | UPGRADE | We are seeking funding to construct and operate a 4800 sq. ft. general store. It will consist of a meat market, deli, convenience store, bakery and pizza business as well as a mini golf course and coin game. We expect to employ a minimum of 25 people. Being in the heart of the area of thousands of displaced DHL employees, we feel this will have a positive impact on some of our unemployment problems. | PRINCE MACHINE SHOP INC. | 1 | 0 to 30 days | \$30,000 |
| Fayette | New Building/Expansion | Money requested for the expansion of existing Shave Ice Concession Stand including first Stand, rebuilding 2nd Stand, and purchasing existing parking lot where Stand 1 is located for future development, or additional vendors to display items for sale. | J's Shave Ice | 3 | 31 to 90 days | \$50,000 |
| Fayette | Fayette County Prosecuting Attorney's Victim Witne | Fayette County Victim Witness Division is the only agency in the county that provides court advocacy and crisis response services to all victims of crime in our County. | Fayette | Home Energy Management Demonstration Project with | Juice Technologies LLC would like to undertake a demonstration project with American Electric Power to prove the concept of smart grid and some energy management in and around the Columbus area. This project would encompass 10,000 homes and enable the home owner to monitor and control their energy usage through Plug Smart™ Home energy management devices. Juice Technologies LLC is requesting that AEP be provided to manufacture and install the Plug Smart™ Home energy management systems and the Plug Smart™ Implementation Communicator™ thermostat into the homes of the consumers that sign up for the AEP pilot project. The Plug Smart™ Home will be manufactured in Ohio and provide for additional salaried labor jobs at the contract manufacturing location. This demonstration project will be a proving ground for sales not out of home energy management in Columbus and will help address the need to reduce peak energy loads on the power grid. Retain 2 jobs and create 2 additional jobs at the Fayette County Violation Center. Employees will be responsible for providing supervised visitation/exchange monitoring for 100 children over the grant period. Also employees will provide support groups and parenting classes to 50 caregivers who are temporary to permanent custodians of children. Employees will provide parenting training to non-custodial parents who are working toward family reunification. | Juice Technologies | 8 | 91 to 180 days | \$250,000 |
| Fayette | Fayette County Visitation Center | Retain 2 jobs and create 2 additional jobs at the Fayette County Violation Center. Employees will be responsible for providing supervised visitation/exchange monitoring for 100 children over the grant period. Also employees will provide support groups and parenting classes to 50 caregivers who are temporary to permanent custodians of children. Employees will provide parenting training to non-custodial parents who are working toward family reunification. | Community Action Commission of Fayette County | 4 | 91 to 180 days | \$90,000.00 |

| Franklin | Landfill Leachate Project | Project will recycle for reuse 40,000 gallons / day of dirty leachate water allowing two landfills to become "Zero Discharge" to local sewer systems. Local sewer POTW requires capacity without infrastructure improvement, current water demands from wells and/or city eliminated water will be reused at landfill for methanol production, flame control, dust control and environmental remedial decontamination. Project will run on energy from gas produced at the landfill. Project equipment operates with no air emissions. Provides alternative, environmental solutions to recirculating or discharging leachate to the sewer. YP#XX | Green Solutions Technologies, LLC | 2 | 0 to 30 days | \$9,831,300 |
| Franklin | Recycling Airport De-icing for Waters for Re-use | Project will recycle for re-use all of the de-icing waters generated at Port Columbus International Airport. Airport will go to "Zero Discharge" to the local sewer system freeing up capacity without new infrastructure. Pollution insurance will be lowered. Airport buys less city water. Recycled de-icing water can be used to flush airport toilets, irrigation, snowbank cleaning, plane washing etc. Project equipment operates with no air emissions. Will significantly lower costs to airlines and lower Gate costs for attracting new airlines and jobs. Airport will be able to eliminate sewer discharge costs that are approaching \$1,000,000 annually. Project has approval and endorsement of ODEP/RA. | Green Solution Technologies, LLC | 2 | 0 to 30 days | \$5,000,000 |
| Franklin | McCorkle Boulevard Extension | The project extends McCorkle Boulevard to help revitalize an older and underutilized industrial area within the City of Westerville. The extension serves three critical needs. First it provides access to the last remaining under/developed land zoned for industrial use - allowing it to be subdivided for development. Second it provides truck access to a signalized intersection, providing a safe truck route for the industrial area and relieving traffic from nearby residential neighborhoods. Third, it provides access to upgraded utilities, including broadband connections, which will expand the redevelopment opportunities for the entire industrial area to include research and development. | City of Westerville | 40 | 91 to 180 days | \$1,350,000 |
| Franklin | Center Street Improvements with New Parks | Two parks that have been identified for planning and development are the First Responders Park and Hilliard's Station Park in Old Hilliard. Funds for program design and construction are being provided for below. Design of First Responders Park, Hilliard's Station Park, Heritage Trails Bike path trailhead and associated Center Street Improvements alignment Design in 2008 - \$575,200. These projects are part of a revitalization of the City's Historical Business District. These improvements will provide stimulus for 25 new service industry jobs, 25 retail and at least 50 professional jobs the City and retention of 200 jobs in the Old Hilliard Business District. \$1,425,000 First Responders Park Construction (includes construction admin and inspection cost) - \$1,250,000 Park land acquisition \$200,000. | City of Hilliard | 300 | 31 to 90 days | \$5,000,000 |
| Franklin | Clean Air Project | Stiles & Profiles Autobody plans on acquiring a 6000 square foot facility and equipping it with the state of art equipment. With the larger space and modern equipment, Stiles & Profiles will be able to provide a safer work environment and the capacity the employee more work volume. Therefore, the company plans on adding at least 1-3 workers to the company per year. | Stiles & Profiles Autobody Co., Inc | 3 | 181 days or more | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Franklin | Lehner Road Phase II Resurfacing and Drainage Impr | This project includes the replacement of the deteriorated pavement by milling the existing pavement and installing a 3-inch overlay and a 1-foot berm on each side of Lehner Road on 2,650 feet of pavement. This project is sustainable in that it will have a useful life of 30 years, positively affects area residents who have suffered damage by flooding along this road, and will help to alleviate congestion and cut through traffic in the area. The 28,788 users/month at the Linden Branch Library will be positively impacted by these improvements. Further, this project serves low- to moderate income residents and has been designated a Franklin County CDBG Target Area. This project is Phase II of a two-phase project that was started over 3 years ago. Limited local match availability from the township has caused this project to remain on hold for over 3 years and continues to compromise the health, safety and welfare of area residents. | Clinton Township, Franklin County, Ohio | 100 | 91 to 180 days | \$604,000 |
| Franklin | Repairs & Maintenance for the Santa Maria | Columbus, Ohio is privileged to have the Santa Maria as a unique education venue. She is a full-size, museum-quality historical ship berthed in the Scioto River. The Ship has limited funding over the last 10 years which has left the Columbus town in need of extensive maintenance and repairs. Currently the ship needs caulking, woodwork, roofing and other repairs with an estimated cost of \$150,000. If funding is provided, these repairs can start immediately improving several outcomes. | The Santa Maria | 3 | 0 to 30 days | \$150,000 |
| Franklin | University View Resurfacing and Drainage Improve | This project consists of improvements to two roadways within the Lanks area of the township: Chambers Circle and Stonebrook Road. Chambers Circle serves residents who have low to moderate income. Improvements include milling and overlay of the deteriorated pavement, replacement of deteriorated storm structures and drive curbs, and installation of a new storm system connection to the existing system in the area. This sustainable project would help to reduce hazardous flooding in the area. It is also located in the I-315 Research and Technology Corridor which through these improvements may entice new development in the Henry Station office/research/retail logistics building which has the potential to generate 200-300 jobs. | Clinton Township, Franklin County, Ohio | 100 | 91 to 180 days | \$227,000 |
| Franklin | Westland Town Center Redevelopment | This project will help revitalize Columbus's western gateway through the redevelopment of the former Delphi and Westland Mall sites. The project includes demolition of existing structures, storm water management, various infrastructure and streetscape improvements, and A/E planning and design. Franklin County is proposing 12 water and sewer utility projects to bring homes and businesses into compliance with state and local regulations. | Franklin County Board of Commissioners | 6000 | 0 to 30 days | \$30,000,000 |
| Franklin | Water & Sewer Utilities | Cleveland Heights Phase 3 Sanitary Sewer Improvements (\$970,000) – 150 homes into compliance. Brown Road East Sanitary Sewer Improvements (\$4,170,000) - 244 homes into compliance. Mon-E-Bak Sanitary Sewer Improvements (\$4,160,000) - 240 homes into compliance. Ferris Road Sanitary Sewer Improvements (\$940,000) - 74 homes into compliance. Eureka Park Sanitary Sewer Improvements (\$875,000) - 68 homes into compliance. Kanawha-Rosslyn Sanitary Sewer Improvements (\$1,440,000) - 369 homes into compliance. Stimmel Road Sanitary Sewer Improvements (\$1,450,000) - 18 homes into compliance. Hague Avenue Sanitary Sewer Improvements (\$1,780,000) - 24 homes into compliance. Timberlake Water Treatment Plant Rehabilitation Project (\$2,005,043). Agler Road/Fern Street Sewer Improvement Project (\$140,000) - 25 homes into compliance. Timberlake Wastewater Rehabilitation Project (\$1,129,797). | Franklin County Board of Commissioners | 425 | 31 to 90 days | \$21,239,350 |
| Franklin | Buildings--New Animal Shelter | This project will construct a new facility to meet the mission of the County's Department of Animal Care and Control to provide compassionate care for impounded animals, as well as adoption, education, veterinary and enforcement services to the residents of Franklin County. The current facility is outdated and overcrowded, creating the potential for an unsafe working environment. The site for the new facility was purchased in August 2008, and the project is currently in the design phase. The total cost of the project is estimated to be \$18,000,000. | Franklin County Board of Commissioners | 360 | 31 to 90 days | \$18,000,000 |
| Franklin | Alton Darby/Cosgray Connector | This project consists of constructing a new 5-lane divided roadway through the Jarman property, which will provide an extension of Cosgray Road south of its existing terminus at Scioto Darby Road to realign with Alton Darby Road, north of Heritage Club Drive. The project will include a 4-lane roadway with center median, bike lanes or wide outside lanes for bicycles, multi-use paths along both sides of the street, street lighting, and appropriate traffic controls. Modern roundabouts will be evaluated to determine feasibility. This roadway extension is widely important to the City's north/south arterial infrastructure. The following are private development data associated with this project: over 2,000 new jobs, \$5,200,000 in general site work including drives, utilities and storm sewers, \$30,000,000 in approximately 300,000 sq ft of retail @ \$100/sq ft and building, \$22,400,000 in approximately 195,000 sq ft of office @ \$114/sq ft and building, \$1,000,000 in a common restoration project for the Clover Creek area. | City of Hilliard | 2000 | 91 to 180 days | \$8,120,000 |
| Franklin | Northwest Parkway Extension | tying, new water and sanitary sewer lines. It is to be built in 2 phases. Preliminary design for this project began in 2008. Construction for Phase I is scheduled for 2008 and Phase II in 2010. Cost for construction for Phase I is \$700,000 and Phase II is \$1,610,000 plus 10% for construction inspection services. Design and Right-of-way cost of \$450,800. This project will be an economic stimulus to redevelop portions of the Franklin County Fairgrounds. The project will be a partnership with Novaco Township, The Franklin County Agricultural Society, Franklin County. Potential redevelopment could include an exhibit hall similar in nature to that at the Ohio State Fair, Office and a convention space hotel. This project with its associated redevelopment and convention draw could mean millions in convention dollars to the Hilliard Community and up to 300 new jobs. If funded both phases could be advanced to construction total project length of 2300 linear feet. | City of Hilliard | 600 | 91 to 180 days | \$2,393,440 |
| Franklin | Shovel-Ready Road Projects | Alton & Darby Creek at Renner & Walker (\$2.5 million): Improve existing "T" intersections with turn lanes and traffic signals. Alton & Darby Creek at Roberts (\$2.5 million): Improve existing "T" intersections using a modern roundabout at AADC at Roberts (north); Roberts south) will be realigned with Roberts (north). Alum Creek at Roe (\$800,000): Add turn lanes to west and north legs of intersection. Chatterton at Fleet & Durfee (\$400,000): Add center turn lane on Chatterton between Fleet and Durfee. Clime between Georgosville & Demorest (\$10.5 million): Widen existing 2 lane roadway to 3 lanes. Georgosville between Sulfant and Broad (\$8.0 million): Minor widening and realignment of roadway. Orentangy River at Linworth (\$1.8 million): Improve skewed, 3-legged intersection with a modern roundabout. Reynoldsburg-New Albany at Morse (\$2.5 million): Improve existing signalized intersection with a modern roundabout. | Franklin County Board of Commissioners | 1551 | 31 to 90 days | \$33,000,000 |
| Franklin | Shovel-Ready Bridge Projects | Akire under railroad (\$8.0 million): Replace existing railroad structure over Akire Road just west of Harrisburg Pike due to inadequate vertical and horizontal clearance; widen Akire to 3-lane section from Harrisburg Pike to Creekside Drive. Dodridge over Orentangy (\$6.5 million): Replace deteriorated structure. Dublin-Granville over Sugar Run (\$1.0 million): Replace deteriorated superstructure. Georgosville-Wrightsville over Smith Ditch (\$1.5 million): Replace deteriorated superstructure. Harlem over Sugar Run (\$1.0 million): Replace deteriorated structure. Kuntz over Hellbranch Run (\$500,000): Replace deteriorated structure. Livingston over Big Walnut Creek (\$2.5 million): Replace deteriorated superstructure. Ponkus over Muddy Run (\$500,000): Replace deteriorated culvert. Rothsbaugh over French Run (\$500,000): Replace deteriorated culvert. Scioto Darby Creek over railroad (\$1.0 million): Replace deteriorated superstructure. | Franklin County Board of Commissioners | 1551 | 31 to 90 days | \$33,000,000 |
| Franklin | Mulberry Run Sanitary Sewer Evaluation Study | This project includes preliminary engineering and planning services, as required by the CEQA/DFPD. | City of Grove City | 0 | 91 to 180 days | \$115,000 |
| Franklin | ANT, LTD. | This project includes preliminary engineering and planning services, as required by the CEQA/DFPD. Governor TAN, the City of Columbus and all that it was absolutely essential that we as a Nation implement this Plan ASAP. Being from Ohio I would like to first introduce my plan to Governor Strickland. After he hears the plan I am completely confident that he will want to take the lead and my plan to Washington and introduce it to President Obama. This is an Economic Plan that will create millions of jobs across America. It will have economic benefits that will reach every nation of the this world. It will balance our Foreign Trade and recover our dollars held by so many of our Trade Partners. It will stimulate the World Economy in such a positive way that the United States will be looked at the Country that saved the World from an Economic Catastrophe while reestablishing the US as the number one economic power in the World. This plan may very well be the Silver Bullet we are all looking for. | International Trading Company | 10,000 | 0 to 30 days | \$7,300,000 |

|----------------|--|--|---|----------------|--------------------|---------------------------|
| Franklin | SELLING Ohio | Making Ohio more business friendly, helping jobs fly from leaving Ohio. Selling Ohio to other sectors, lowering taxes of Ohio, you are taxing people out of state. Ohio Was once a proud state people worked hard, but the state took from that work force in taxes, the people need our gov't of Ohio To fall out work from an area we need people coming from new state to pay their fair share, not take from the system, without putting back into system this has to stop, the gas food, housing, medical money to buy cars, good only knows what else, but have raised the bar to high, or are they paying their way, they need to pay their own way. Mills James has partnered with Caterpillar, Inc. for almost 10 years to create personalized e-learning coursework. Due to the decline of this company, Mills James has lost about \$200,000 in annual revenue. To offset this loss, we are looking at moving away from client-specific course work. We have researched vertical markets and identified several organizations that are seeking generic coursework that can be used for other organizations on management topics. These organizations would sell these courses online, and would only be able to pay our group through residuals from the sale of these courses. The investment of this program is a large burden for a small business to handle as well as other organizations. We are seeking financial support to assist with the costs of developing and designing a sales prototype to demo in these vertical markets, marketing efforts, developing or purchasing educational software applications, hiring an instructional designer, training on performance management. The total return for Mills James on this investment is estimated between \$375,000 and \$500,000 per course per year, and could generate 10 new positions for Mills James. | N/A | 200,000 | 181 days or more | \$0 |
| Franklin | E-learning course production | Ohio law has been enacted that will require that any Radiologist who uses an assistant, to increase productivity, must be licensed by the state of Ohio. The Ohio Medical Board will be defining the scope of practice for the Radiologist Assistant (RA) in Ohio and that will require passing the national board examination. Ohio State's Radiology Services Division has an approved educational program to educate RAs and maintain that continuing education. This is a new educational program that has the potential to create jobs and reduce health care costs for the citizens in Ohio. The RA will provide greater access to radiology procedures for patients in rural health care settings. They also allow Radiologists to concentrate on increased efficiency, with reading CT scans and MRI. With the mandate of Ohio license of RAs, funding is needed to initiate this new program and meet the anticipated educational demand. The funds requested requests directly to the OHNS interest in health care professional shortages. Hiring a college instructor, with computer support, facilitates on-line education for training RAs, as well providing continuing education. On-line education will create and maintain RAs working in rural areas, where the need is greatest. | Mills James | 10 | 91 to 180 days | \$200,000 |
| Franklin | The Ohio Radiologist Assistant Initiative | In order for an homeowner to effectively wiretrace or insulate a home for optimization of the heating and cooling systems the homeowner must know where the structure is leaking energy. Our company specializes in heating, cooling, venting and energy conservation of residential and commercial buildings. Our proposal covers the cost to complete a thermal imaging audit for approximately 5000 structures in and around the metropolitan area of Columbus, Ohio. The technology we use is the first state of the art thermal imaging photography that not only provides the customer with a map of where and what to insulate or weatherize. Using this technology the homeowner or building owner will be able to minimize the cost of insulating materials by understanding the specific areas that leak heating and cooling energy. | Ohio State University | 20 | 31 to 90 days | \$200,000 |
| Franklin | Residential/Industrial Thermal Imaging | In order for an homeowner to effectively wiretrace or insulate a home for optimization of the heating and cooling systems the homeowner must know where the structure is leaking energy. Our company specializes in heating, cooling, venting and energy conservation of residential and commercial buildings. Our proposal covers the cost to complete a thermal imaging audit for approximately 5000 structures in and around the metropolitan area of Columbus, Ohio. The technology we use is the first state of the art thermal imaging photography that not only provides the customer with a map of where and what to insulate or weatherize. Using this technology the homeowner or building owner will be able to minimize the cost of insulating materials by understanding the specific areas that leak heating and cooling energy. | Columbus Power Incorporated | 12 | 0 to 30 days | \$1,000,000 |
| Franklin | Dist 6, PID 79942, FRA IR 71 17.56 | Hybrid of wind turbines and solar arrays (size, type, & number TBD) with the hope to reduce our carbon footprint and supply power back to the grid during non-peak periods. | Ohio Department of Transportation | 28.7 | 31 to 90 days | \$1,000,000 |
| Franklin | Public Service Center: Solar/Wind | Hybrid of wind turbines and solar arrays (size, type, & number TBD) with the hope to reduce our carbon footprint and supply power back to the grid during non-peak periods. | City of Upper Arlington | 30 | 181 days or more | \$500,000 |
| Franklin | Dist 6, PID 85891, FRA Alum Creek Dr/Rohr Rd Inter | Franklin County Alum Creek Dr & Rohr Rd intersection improvement. | Ohio Department of Transportation | 31.4 | 31 to 90 days | \$1,093,000 |
| Franklin | Farleigh / Ridgeview waterline | Replacement of approximately 2100 Lb Ft. of aging waterline with known break history. Upsizing from 6" to 8" line to increase the flow in addition to working 14 mile jobs. My sales and one-time Liberty Tax Service Franchise. I have been in business for 15 years. In our first season with Liberty Tax Service and this year we've up another 30%. Our success is based on our grassroots approach to building relationships with our customers, participating in local festivals and events, offering over 100 FREE tax returns to the needy, young and elderly, and respect for our employees and clients. There are many unemployed territories and underperforming stores in the Central Ohio and surrounding areas. If you have a track record, we would like to expand our partnership and take advantage of these opportunities. By doing so, we would be able to create jobs for store managers, tax preparers, and sales processors, we would also create jobs in our "newer" program for sales and tax preparers under-educated individuals who find it difficult to find employment. We would also expand our opportunity for offering tax preparation training for individuals for less than \$50. We are committed to helping turn this concept around and building work-related skills and training. If given this opportunity, we will not fail. Thank you! | City of Upper Arlington | 20 | 181 days or more | \$850,000 |
| Franklin | Liberty Tax Service Franchise Expansion | Replacement of approximately 2100 Lb Ft. of aging waterline with known break history. | Franklin | Municipal Service Center: Wind/Solar | Hybrid of wind turbines and solar arrays (size, type, & number TBD) with the hope to reduce our carbon footprint and supply power back to the grid during non-peak periods. | City of Upper Arlington | 20 | 181 days or more | \$250,000 |
| Franklin | Runway Relocation | Relocates runway 10R02L further to the south. Wider spaced parallel runways at Port Columbus position the airport for long term aviation growth resulting in improved connectivity for the community. | Columbus Regional Airport Authority | 500 | 31 to 90 days | \$1,700,000 |
| Franklin | ViaQuest Rescue Jobs | Due to the banking crisis my bank shut down my line of credit which has created a situation where I cannot pay health claims for my 1,400 employees. The Dept of Labor threatening to shut down my health plan and as a result I will have to shut down my business. I have 400 people out of work. This is a one time need to save my business. If this does not happen not only will 1,400 people be out of work but they will be stuck with substantial healthcare claims on top of losing their jobs. | ViaQuest | 1,400 | 0 to 30 days | \$1,500,000 |
| Franklin | Cassady Avenue Reconstruction | Street reconstruction and miscellaneous waterline work, new curbs and gutters on Cassady Avenue from Broad Street to Main Street, improving 4,710 feet of roadway and waterlines. | City of Bexley | 25 | 31 to 90 days | \$2,000,000 |
| Franklin | Turkey Run Storm Water Detention | This project involves the construction of a large storm water detention basin on the south side of Port Columbus. The project is required to meet DEPA and City of Columbus standards for storm water runoff at Port Columbus. A storm water sewer will also be constructed to carry storm water from areas west of Beaver Rd. to the new detention basin. | Columbus Regional Airport Authority | 75 | 31 to 90 days | \$9,000,000 |
| Franklin | Energy Efficient Airport Shuttle Bus Purchase | This project involves the purchase of 3 Low Emission and 2 Hybrid Electric 14 passenger shuttle buses, ADA and radio dispatch equipment. | Columbus Regional Airport Authority | 10 | 31 to 90 days | \$650,000 |
| Franklin | Healthy Homes Healthy Ohioans | Fund healthy home grants through the Ohio Department of Health to local health departments, nonprofits, hospitals and universities to provide interventions in homes for housing related diseases including asthma, lead poisoning, and unintentional injuries. Services will include outreach and education to prevent and control these costly diseases, home repair, mitigation supplies for occupants, and pest control. Annual care savings of \$2,500 per asthma child, \$225,000 medical and education cost saving per lead poisoned child, targeting 80% of median income that families with lower middle income families. This will save and create jobs in private organizations, create jobs in the community, support local businesses through purchases and subcontractors, provide permanent health care savings and, rebuild housing infrastructure. | Columbus Public Health Department | 100 | 31 to 90 days | \$10,000,000 |
| Franklin | Dist 6, PID 85537, FRA IR 71 19.09 (Phase 2) | Bridge repair | Ohio Department of Transportation | 172.2 | 31 to 90 days | \$6,000,000 |
| Franklin | Dist 6, PID 85419, Camp Chase Railroad Line Rehab | Camp Chase Railroad Line Rehabilitation | Ohio Department of Transportation | 21.5 | 31 to 90 days | \$750,000 |
| Franklin | Dist 6, PID 79942, FRA IR 71 17.56 | Bridge repair | Ohio Department of Transportation | 28.7 | 31 to 90 days | \$1,000,000 |
| Franklin | Dist 6, PID 85891, FRA Alum Creek Dr/Rohr Rd Inter | Franklin County Alum Creek Dr & Rohr Rd intersection improvement. | Ohio Department of Transportation | 31.4 | 31 to 90 days | \$1,093,000 |
| Franklin | Dist 6, PID 81885, PIC/FRA-ALUM CR DR EXT-PHASE 2 | Construct New Road On New Alignment From B3177Alum Creek Drive To Southwest Of Rickenbacker Airport Approx 0.5 Miles East Of Ashville Pike. Proposed Roadway Will Be Classified As An Urban Minor Arterial And Constructed As A Four Lane Divided Road With Turn Lanes As Needed. Project Includes Upgrade Of B-3177Alum Creek Drive Intersection Including Signalization. | Ohio Department of Transportation | 642.4 | 31 to 90 days | \$22,385,000 |
| Franklin | Integrated Drinking Water Vulnerability Assessment | An integrated vulnerability assessment (IVA) of Ohio's drinking water supply network at the local, regional, and state levels. Initial IVA work conducted at the local level in 2003 due to the enactment of the Public Health Security and Bioterrorism Preparedness and Response Act of 2002. Since that time, domestic and international terrorist groups have increasingly targeted water utilities with an intent to cause regional, national, and international disruption. Therefore, it is prudent to reassess existing IVA. SACC proposes to establish two IVA teams to integrate local IVA at the regional level (northwest, northeast, southeast, and central). Using standard Risk Assessment Model (RAM) protocols, SACC proposes to reassess existing local IVA, and if necessary, conduct new local IVA. Following integration at the local/regional level, SACC proposes integration at the state level resulting in a "layered" Ohio drinking water IVA. This "layered" IVA would be a first in the US. Ohio may leverage its resources based on objective profiles, allowing for follow-on job creation in the engineering and construction sectors. This approach is also transferable to other utilities including power and sewer. | Science Applications International Corporation (SA) | 15 | 91 to 180 days | \$2,500,000 |
| Franklin | Cassady Avenue Reconstruction (Revised) | Reconstruction and miscellaneous waterline work, new curbs and gutters on Cassady Avenue from Broad Street to Main Street, improving 4,710 feet of roadway and waterlines. | City of Bexley | 25 | 31 to 90 days | \$2,000,000 |
| Franklin | Port Columbus Area Development Fiber Plan | Fiber and Ethernet services will not only improve the Port Columbus Area Development Partnership's ability to compete with communities in other states offering broadband services as economic development incentives but this new, expanded network throughout Central Ohio, will enhance the economic development goals and fiber network vitality of all Central Ohio communities connected to the CFN and will guarantee long term job creation for our communities. Additionally, there will be 70 engineering, technical, and construction related jobs required to build the network. The cost of this investment will be \$8,100,000. Elements of cost include the labor, engineering, right-of-way, equipment and materials, and separate sub-contractors. Our estimates for job creation throughout the Franklin County area, with the new fiber and Ethernet infrastructure in place, will be over 2,500 jobs per year. Annual salaries would range from \$21,500 to \$100,000 * Education * Law Enforcement / First Responders Interoperability | City of Whitehall | 2500 | 31 to 90 days | \$8,100,000 |
| Franklin | Dist 6, PID 85891, FRA Alum Creek Dr/Rohr Rd Inter | Franklin County Alum Creek Dr & Rohr Rd intersection improvement. | Ohio Department of Transportation | 31.4 | 31 to 90 days | \$1,093,000 |
| Franklin | Dist 6, PID 79942, FRA IR 71 17.56 | Bridge repair | Ohio Department of Transportation | 28.7 | 31 to 90 days | \$1,000,000 |
| Franklin | Cassady Avenue Reconstruction | Reconstruction and miscellaneous waterline work, new curbs and gutters on Cassady Avenue from Broad Street to Main Street, improving 3,400 feet of roadway and waterlines. | City of Bexley | 25 | 31 to 90 days | \$2,000,000 |
| Franklin | College Avenue Reconstruction | Reconstruction of College Avenue from Livingston to Main Street, with new pavement, new curbs and gutters, and upsizing of waterline for 3,400 feet of roadway. | City of Bexley | 21 | 31 to 90 days | \$1,700,000 |
| Franklin | Urban Core ADA Accessibility | Staircase improvements, curb ramps, and traffic signal improvements for better ADA accessibility on corners throughout in the city involving 12 signalized intersections and an undercounted number of total feet of sidewalks. | City of Bexley | 14 | 91 to 180 days | \$1,145,000 |
| Franklin | Increased Materials Manufacturing Capacity for Thi | The proposed project will enhance the development capabilities of SCI to accelerate the development of new transparent conductive oxide materials used in the manufacturing of The Film Photovoltaic Solar Cells and provide critical need capital for the acceleration of manufacturing capacity expansion to turn rapidly turn these developments into products. The proposed project will enhance the development and manufacturing capabilities of SCI to produce transparent conductive oxide materials for manufacture of Thin Film Photovoltaic Solar Cells Panels. SCI has recently received a grant from the State of Ohio's Third Frontier Advanced Energy Program to begin the expansion of SCI's capacity for a specific product design. The requested funds will be used to further accelerate these expansion plans by providing funding for capital equipment, thus allowing the project ahead by 3 years and enabling the hiring of additional engineers and manufacturing personnel well ahead of the current proposed expansion plans. In addition, the funds will be used to expand SCI's research facilities to develop new transparent conductive oxide products for both the thin film solar applications and emerging LED based energy saving lighting products. SCI proposes to work with Ohio state of | SCI Engineered Materials, Inc. | 10 | 0 to 30 days | \$3,000,000 |
| Franklin | Grandview Yard Infrastructure-Railroad Bridge Wide | This request seeks support to replace and rehabilitate the railroad bridge and widen the streets at Goodale Blvd and Third in Columbus. This will catalyze the redevelopment of the Grandview Yard site and surrounding properties, leveraging over \$500 million in private investment. Grandview Yard will be a high-density, mixed-use development, with 1.3 - 2 million sq ft of commercial space, with the potential to lease 5000 new jobs. In addition to these jobs, 800 jobs, nearly 500 construction related jobs will be created each year for the first three years of the development, which is anticipated continue for 10 years or more. The overall infrastructure project includes \$73 million in public roadway and utility improvements throughout the site and on streets surrounding and leading to the development, including the \$21,000,000 requested in this proposal to replace the railroad bridge at Third Ave, widening 4 blocks, lanes to 5 lanes, and to rehabilitate the existing railroad bridge at Goodale Blvd and add a second bridge with 2 additional lanes. | City of Grandview Heights | 500 | 31 to 90 days | \$21,590,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Franklin | New Public North/South Street at Grandview Yard | fully developed, this street, and connecting sidewalk streets, will be about 1.4 or 1.5 million sq. ft. of offices, restaurants, and retail, leveraging \$500 million dollars in private investment and creating 5000-6000 new jobs. In addition, nearly 500 construction-related jobs will be created each year for the first three years of the development, which is anticipated to continue for 10 years or more. Approx. \$73 million is needed for roadway, utility and railroad bridge infrastructure in and around this site. Of that, \$10.8 million is required for the new public north/south street through Grandview Yard. Roadway improvements include: 1) building a new public street to allow access throughout the development, 2) installing streetscapes and lighting 3) creating pedestrian and bicycle access. Utility improvements include: 1) installing a new storm sewer system 2) installing a new waterline and fire hydrants 3) installing a new sanitary sewer 4) installing new electrical, phone, cable and gas | City of Grandview Heights | 500 | 31 to 90 days | \$10,800,000 |
| Franklin | Ohio State Highway Patrol Productivity Improvement | Based on documented results the training will increase the reading efficiency of the participants 300 to 500 percent. The participants will increase not only their reading speed but also their comprehension, concentration, recall and retention on their required on-the-job reading as well as reading for continuing professional education and training. This increase in productivity will result in an on-the-job time saving of at least one hour per day on the average. This increase in productivity will further allow the Ohio State Patrol to continue to provide the desired level of public service in the face of severe economic pressure to reduce cost and head count increases in the future. | Advanced Reading Concepts | 100 | 0 to 30 days | \$40,000 |
| Franklin | South Greener Reconstruction and Realignment, Ph II | This project involves regrading, resurfacing and installing curbs and gutters on the entire 4940 linear foot length of South Greener Avenue linear feet of which are in Phases A and B). The project also involves relocating water and sewer lines and realigning South Greener Avenue north and south ends where it intersects West Broad Street intersection, which is located at the foot of an interstate highway interchange. The development projects and eliminates the existing unsafe intersection, which is located at the foot of an interstate highway interchange. The alignment incorporates a traffic circle, which will facilitate traffic movement and serve as a gateway to an area the City of Grandview is redeveloping in office and retail space in the near future. | Prairie Township | 125 | 91 to 180 days | \$6,366,000 |
| Franklin | CML Ready to Read Corps | This project involves regrading, resurfacing and installing curbs and gutters on the entire 4940 linear foot length of South Greener Avenue linear feet of which are in Phases A and B). The project also involves relocating water and sewer lines and realigning South Greener Avenue north and south ends where it intersects West Broad Street intersection, which is located at the foot of an interstate highway interchange. The development projects and eliminates the existing unsafe intersection, which is located at the foot of an interstate highway interchange. The alignment incorporates a traffic circle, which will facilitate traffic movement and serve as a gateway to an area the City of Grandview is redeveloping in office and retail space in the near future. | Columbus Metropolitan Library | 20 | 91 to 180 days | \$3,400,000 |
| Franklin | Gladys Road Street Improvements | Reconstruction of 2,300 linear feet of street involving regrading, resurfacing, addition of sidewalks and installation of curbs and gutters. This project is in a low to moderate income area. The Ohio Benefit Bank (OBB) is already used by faith-based and community groups across the state to assist Ohioans eligible for tax credits and public benefits. The population served by the OBB includes many displaced workers, who until they lost employment or missed their lowest paying jobs, may not have been previously aware of or eligible for the supports to which the OBB offers access. Most of these clients are completely unfamiliar with the governmental systems that provide these supports, or harbor some antipathy toward such systems, which they associate with "red tape." They are more willing to obtain these supports when they work with coordinators at the faith-based and community groups that sponsor OBB sites. OBB can be modified with additional programming to provide better service to dislocated workers and their families. This project will provide access and direct assistance to dislocated workers to apply for and receive Unemployment Compensation and the Trade Adjustment Assistance and Alternative Trade Adjustment Assistance programs. A project proposal is available. This project can begin by February 27, 2009. | Prairie Township | 100 | 91 to 180 days | \$1,053,500 |
| Franklin | Programming to Better Assist Dislocated Workers | OBB can be modified with additional programming to provide better service to dislocated workers and their families. This project will provide access and direct assistance to dislocated workers to apply for and receive Unemployment Compensation and the Trade Adjustment Assistance and Alternative Trade Adjustment Assistance programs. A project proposal is available. This project can begin by February 27, 2009. | Ohio Association of Second Harvest Foodbanks | 100 | 0 to 30 days | \$1,750,000 |
| Franklin | Reach Out and Read Ohio | Reach Out and Read (ROR) is a national evidence based early literacy program which trains doctors and nurses to advise parents about the importance of reading aloud to their children, along with providing new developmentally appropriate books to children from the ages of 6 months to 5 years old during well child visits. It is anticipated in 2009 that over 134,000 low-income children will receive more than 255,000 new books from Reach Out and Read Ohio. The mission of ROR is to make literacy promotion a standard part of primary care so children will grow up with books and a love of reading. Funding through the State would allow expansion efforts to increase in Appalachia Ohio, helping more children to receive books and more parents to hear from medical care providers why reading is important. | Ohio AAP Foundation | 3 | 0 to 30 days | \$200,000 |
| Franklin | ViaQuest HealthCare Rescue | Due to the banking crisis my bank pulled my line of credit which has not allowed me to fund my employee's health claims. If I do not get relief the Department of Labor is going to shut down my health plan leaving my employees without any insurance and I will be forced to shut down my business which will cost 1,400 jobs. If I get this funding I will be able to fund health claims moving forward and will save jobs. My employees could be out of work and stuck with extensive health claims. I have 1,400 people who serve Ohio's most vulnerable population (people with disabilities) and are in desperate need of help. | ViaQuest | 1,400 | 0 to 30 days | \$1,500,000 |
| Franklin | Downtown Columbus Design Studios Renovation | Phase 2 completion of adaptive reuse of former Byers auto dealership at corner of Broad Street & Cleveland Avenue, downtown Columbus. We have \$2.1 million in charitable contributions raised, need an additional \$650,000 for building completion. The project will yield 100,000 square feet of classrooms and studios for our Fashion Design, Product/Industrial Design programs as well as individual working spaces for 300 undergraduates. This project relates directly and immediately to creative services workforce development. It will be a visible/milestone project in the center city that dovetails with the Mayor's downtown revitalization efforts. Work on this project would commence immediately upon confirmation of funding. Our construction company, ConnaParkway is public barely reading in the wings, as they have experienced the cancellation of nearly \$25 million in projects in the last 120 days. | Columbus College of Art & Design | 200 | 31 to 90 days | \$950,000 |
| Franklin | Kinnear / North Star Detention Basin (property acq) | Survival to two studies, we wish to acquire land at the intersection of North Star and Kinnear Road for storm-water detention basins.) Tributary area served approximately 300 acres with known flooding issues | City of Upper Arlington | 12 | 91 to 180 days | \$1,500,000 |
| Franklin | Sidewalks on school / bus routes | Approximately 900 Lin Ft. of sidewalk installation. Filling gaps in the system. | City of Upper Arlington | 15 | 91 to 180 days | \$500,000 |
| Franklin | Donna/Hillview waterline | Will also add approximately 3000 Lin Ft. of conduit duct-bank for future fiber optic telecom distribution connectivity. Duct-bank under proposed sidewalk. | City of Upper Arlington | 18 | 181 days or more | \$746,000 |
| Franklin | Government Center Energy Conservation Measures | Replacement of approximately 2500 Lin Ft of aging waterline with significant break history. Pipe upsized from 6" to 8" to increase fire flows. | Franklin County Board of Commissioners | 75 | 31 to 90 days | \$27,000,000 |
| Franklin | Plain Township Aquatic Center Solar Pool Heat | Perform energy efficient upgrades and retrofits to the County's downtown building campus, resulting in savings averaging over \$2.4 Million per year over a twenty-year period. Specific measures include: a) Upgrade Lighting b) Upgrade Controls c) Perform Heat Conservation Upgrades; d) Install Building Envelope Improvements; e) Install Photovoltaic Solar Generating System; f) Connect & Clean/Decentralized Chilled Water Piping Loop; g) Upgrade Mechanical Equipment Control Systems; h) Installation of "Green" Roofing Improvements. These improvements will yield Green House Gas Reductions of 4.84 metric tons along with energy savings of \$48 Million over a twenty-year payback period. We began working on this project several months ago and have estimates and we are "shovel ready" to go. Unfortunately, with the economic downturn the township does not feel we can afford to move ahead with this project at this time. However, if there are funds available we feel that this project is a future minded, environmentally friendly and cost effective way to heat our pool for many years to come. If needed, the township can cost share this program to some extent to help the federal government get a bigger bang for their stimulus dollars. Thank you for your help. | Plain Township Ohio | 0 | 31 to 90 days | \$200,000 |
| Franklin | Arlington Ave. | Project consists of Roadway reconstruction with roundabout, storm sewer upgrades, aging waterline replacement, and telecommunications facilities. Approximately 4000 Lin Ft. of improvements in historic district and school zone | City of Upper Arlington | 35 | 181 days or more | \$1,600,000 |
| Franklin | Solar Cooling Development | A joint development project with Ohio State University and another Ohio business to design a packaged solar cooling and heating system that will reduce peak times and overall efficiency of the system. Solar heating is beginning to take root but during the best months of the year, summer, energy is being thrown away. There are a number of thermally activated cooling systems. The project will work to take existing equipment and engineer a package and that handles all needed components. This will dramatically increase the economic viability of solar thermal systems in Ohio and nationwide. | Tippling Point Renewable Energy | 10 | 0 to 30 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Franklin | Low Income Solar Heating | This is funding for a project that will help offset electric heat costs for 3 separate 80 unit low income senior housing projects. Funds saved by energy reductions will be partially used to increase nursing staff that has recently been reduced. | Tipping Point Renewable Energy | 10 | 31 to 90 days | \$300,000 |
| Franklin | System Characterization and Sanitary Sewer Evaluat | This project includes preliminary engineering and planning services, as required by the DEPA DFPO. | City of Whitehall, Ohio | 0 | 181 days or more | \$400,000 |
| Franklin | Systemwide Flow Monitoring Program | This project includes preliminary engineering and planning services, as required by the DEPA DFPO. | City of Whitehall | 0 | 91 to 180 days | \$250,000 |
| Franklin | Systemwide Flow Monitoring Program | This project includes preliminary engineering and planning services, as required by the DEPA DFPO. | City of Belexy, Ohio | 0 | 91 to 180 days | \$150,000 |
| Franklin | Systemwide Sanitary Sewer Evaluation Study | This project includes preliminary engineering and planning services, as required by the DEPA DFPO. | City of Belexy, Ohio | 0 | 91 to 180 days | \$250,000 |
| Franklin | Hamilton Road Central Basin | Headwater flood control basin and stream restoration project in the Big Walnut Creek watershed within the City of Gahanna. | City of Gahanna, Ohio | 0 | 0 to 30 days | \$90,000 |
| Franklin | Clover Groff Run Stream Restoration | Stream restoration for 3800 LF of Clover Groff Run in the Darby Watershed. Also includes stormwater management features for a soccer field project to be built adjacent to the stream. | City of Hilliard, Ohio | 300 | 91 to 180 days | \$750,000 |
| Franklin | Crafton waterline | 1300 Lin Ft. of aging waterline | City of Upper Arlington | 12 | 91 to 180 days | \$400,000 |
| Franklin | 2009 Street Resurfacing | This project is a mill and fill on numerous Township Streets. The existing asphalt will be milled off of 3 inches and 1.5 inches of new asphalt installed. This way there will be enough room left for another resurfacing before it needs to be milled again. We have held off doing this resurfacing due to lack of funding. | Brown Township | 60 | 91 to 180 days | \$100,000 |
| Franklin | Energy Cell and Wind power | Energy Cell - Self Regenerating Electric Motor to use in various industries. Wind Power - Weld fabrication and CNC milling of parts and castings for the wind power industry. | Superior Production LLC | 8 | 0 to 30 days | \$1,000,000 |
| Franklin | Concrete Durability | The project consists of constructing 25 concrete at | Ohio Ready Mixed Concrete Association | 22 | 31 to 90 days | \$117,000 |
| Franklin | TEST ENTRY | 888 | State of Ohio | 888 | 0 to 30 days | \$888 |
| Franklin | Junior Achievement Entrepreneurial Institute | Junior Achievement teaches entrepreneurship to students K-12. We're in the middle of a project to expand our programming and create an entrepreneurial institute for youth. This SEM project includes a partnership with the Columbus City Schools in which JA is taking over and refurbishing an old school. The project creates the following: First, it will create 10 months of construction work. Secondly, the project allows Junior Achievement to hire more staff (permanents). Finally, Junior Achievement's new institute focuses on giving youth (6-12) the skills and business know-how - in high school and later. This program includes a business incubator for high schoolers. The incubator provides 10 to 15 like programs that are now ongoing services for the poor and mentally ill that we continue and not be cut. Example: Nurses that go to clients homes to dispense medication to keep them out of mental hospitals. This project would ensure that we had our patients' medical information when we are treating them. This would allow physicians to have the most effective medical plans for patients with less hassle. This project would also ensure that our patients were getting their goods, medications and not getting the same medication from 2 physicians. Lastly this would start to cut down on health care costs because we would like to see all medical documentation electronically, thus saving paper. | Junior Achievement of Central Ohio | 40+ | 0 to 30 days | \$600,000 |
| Franklin | mental health | | Mental Health | unknown | 181 days or more | unknown |
| Franklin | Implementing Electronic Medical Records | | Specialized Orthopaedics & Sports Medicine | 14 | 91 to 180 days | \$80,000 |
| Franklin | Ohio Benefit Bank | Statewide The Ohio Food and Agricultural Clearance Program purchases shelf stable and agricultural surplus foods for distribution through 12 foodbank & 2000 member charities. Ohio growers and producers are reimbursed for the costs of picking, packing, and delivery of agricultural products that otherwise would not have been harvested but rather molded, powdered, or simply left in the field. In 2008, over 20 million pounds of wheat, various fruits and vegetables and over 3.6 million pounds of eggs, chicken, turkey, sausage, and other shelf stable foods were distributed. These products are "unmarketable" due to either their size, color or grade, that has absolutely no impact on their nutritional value. This program has been called the most effective public-private partnership in the state of Ohio. This program expansion is estimated to create 500 new jobs, provide over 75 m pounds of food to 2 million hungry Ohioans served through foodbanks, food pantries and soup kitchens in all 16 Ohio counties. By increasing the nutritional intake of hungry Ohioans and providing some stability the State of Ohio could experience a reduction health care expenditures. www.ohio.org | Ohio Association of Second Harvest Foodbanks | 600 | 0 to 30 days | \$2,000,000 |
| Franklin | Ohio Food and Agricultural Clearance Program | | Ohio Association of Second Harvest Foodbanks | 500 | 0 to 30 days | \$10,000,000 |
| Franklin | Biomass to Energy | SCHMACK will be construct renewable energy systems ("Systems") that will produce (i) the highest and best form of renewable energy from crops based on the geographic location, (ii) carbon credits, (iii) fertilizer and (iv) EC soil amendments from the processing of organic biomass. We currently have two projects ready to go. An industrial operation in Columbus and an agricultural operation in Wooster. Sustainable, renewable energy projects. These facilities are expandable and renewable through-out Ohio. | Schmack BioEnergy | 74 | 0 to 30 days | \$9,000,000 |
| Franklin | Education at a Crossroads | Technology solutions including computer, network, software and database components. | Protalific, LLC | 50 | 31 to 90 days | \$1,000,000 |
| Franklin | Workforce Wellness Ohio | The goal of this project would be to improve health status of Ohio's workforce by focusing on local health priorities. The project would work through a public-private partnership to provide funds to local health departments to fund on health promotion and prevention priorities identified in each jurisdiction within the following statewide priorities: PREPAREDNESS-COMMUNICABLE DISEASE PREVENTION-TOBACCO PREVENTION-AND/OR RESISTANCE-OBESITY-EARLY CHILDHOOD INTERVENTION-CHRONIC DISEASE PREVENTION-AND/OR INTERVENTION-CANCER AND/OR HEART DISEASE. Each local recipient of funds would identify a local priority based on standardized assessment benchmarks for measurement of progress toward established goals, and quality improvement strategies to be employed. Progress toward established goals would be compiled at the state level to assess effectiveness of the program and impact on health status. The long-term impact of this project would be the cost saving related to health care costs associated with the treatment of communicable diseases, untoward birth outcomes, and the most common chronic diseases in Ohio. | Association of Ohio Health Commissioners | 50 | 0 to 30 days | \$2,000,000 |
| Franklin | Pre Licensing Education | There are an average of 600 Independent Used Car Dealers who go out of business in Ohio every year. More than half of all these small businesses fail because they didn't know what was expected of them in business. We would propose Mandatory Pre-Licensing Education of one to three days which would be conducted by accredited employees of our Association. This type of education would include the amount of business failures within our industry which would provide increased employment and tax revenues in the State of Ohio. | Ohio Independent Automobile Dealers Association | 300 | 31 to 90 days | \$150,000 |
| Franklin | Westside Free Store | The Westside Free Store Ministries (WFSM) serves a community in need in Columbus' west side. Patients donate clothing and small household items and those in need shop for free. The WFSM is an eccumenical, not-for-profit organization, fully volunteer operated except for one 10-hour per week executive director. WFSM partners with ODJFS Working Partners program to create job opportunities for individuals receiving state assistance. Income is generated primarily from church, individual and community organization donations and a limited number of grants. The majority of expenses is in leases and utility costs. Since opening in 2004, WFSM has served thousands of people, many of which are low income, elderly, Spanish-speaking, disabled and children. The Free Store is open three days (two hours) per week, serving a hot meal one day. Federal assistance would allow the operation to expand its hours, expand its range of volunteers, reduce reliance on donations and insure the expansion and long-term availability of resources. People utilize the Free Store to supplement minimum wage income and assist them in redirecting their income to necessities such as rent, utilities and food. | Westside Free Store Ministries | 2 | 91 to 180 days | \$25,000 |
| Franklin | Electronic Health Records in Primary Care Organiza | Health care safety, cost, and quality has never been greater. As health IT initiatives gain momentum, there is increasing appreciation for the progress to which they can: * Improve the coordination of care within the health care delivery system by increased sharing of health information among authorized clinicians, ensuring the standard of care for everyone. * Provide individuals with electronic access to their own health and wellness information, engaging them in opportunities for improving their health and well-being. * Improve the health of the community using aggregated health data for research, public health, emergency preparedness and quality improvement efforts. Locally, the differential adoption among safety-net primary care organizations that serve vulnerable populations may exacerbate health disparities and are less likely to have functional health information technology. The scope of the project is to advance the adoption of health information technology in safety-net primary care organizations (up to 100 practitioners). | Access HealthColumbus | 8 | 91 to 180 days | \$2,000,000 |
| Franklin | CMIS | Acquire and implement new case management system for tracking outcomes and diagnoses of Ohio welfare youth in our care - will better manage utilization of services and governmental funds already being received as well as maintain employment for an intake department and 8 support. | NYAP | 17 | 31 to 90 days | \$350,000 |
| Franklin | GH Renovation | The expected acquisition is the Essex Case Management system which will entail approximately 2000 man hours of implementation and customization for use by the National Youth Advocate Program. | NYAP | 30 | 31 to 90 days | \$500,000 |
| Franklin | Electronic Medical Records Implementation and Educ | Capital improvements to community based centers for temporary shelter and activity/treatment space of youth as a diversion of going or other relevant activity. Funding has been discontinued by the county these funds will allow continued treatment for youth and families and act as an alternative to incarceration. The existing program has demonstrated outcomes with minimal re-offending behavior and continued family involvement. Convert four health care offices (fourteen offices) to electronic medical records. Software and some hardware as specified in our contract. 15,000 patient records per year 2. Secure removal of paper records 3. Training a staff of 50-45 to three to four months 4. Scheduling new clients to his or her caregivers (expect 5 new clients) 5. Follow up satisfaction and success with a post-conversion survey | G and H Management Company | 43 | 31 to 90 days | \$614,221 |
| Franklin | Life Town | This new building will provide a 27,000 square foot education center serving 10,000-15,000 people on an annual basis. Our clients will include special education students, low-income and elderly citizens, adults and businesses from the Greater Columbus metropolitan area. The new program offered will be Life Town, a simulated town that provides the skills training for school age special education students, and the Friendship Circle, providing innovative programming and creative activities for families with special needs children. Additional programming will include a Business Network, kindergarten, day camp, preschool, and community based events. We are currently partners with Columbus City Schools, providing Lifesize curriculum and access for their special needs students. With this new building, we anticipate offering this program to all of the Greater Columbus metropolitan area school districts. There is only one other partner of this type in the county and it is provided by our partner, the Friendship Circle, in Detroit, Michigan. | Schottenstein Chabad House | 110 | 31 to 90 days | \$500,000 |
| Franklin | Dublin Broadband Infrastructure Expansion | The City of Dublin, Ohio, is working to advance technology and create new jobs in the region. The City's plans include a next-generation technology park, Innovation Park, within the Central Ohio Innovation Corridor, which encompasses Cardinal Health, Ashland Inc., and Online Computer Library Center. Innovation Park is a planned 1,300-acre job ready site. The site will be served by other critical infrastructure to include: \$52 million interchange improvements at U.S. 33 and S.R. 161, water and sewer. A new electric substation with redundant power will also be constructed as a joint project between Dublin and American Electric Power. The build-out of the 1,300-acre area is estimated to yield 2,360 permanent high-paying jobs for the region. The City of Dublin has a proven track record of attracting and creating jobs. The City of Dublin's broadband expansion is planned to be built in two phases: the first section is about 1,400-hex of fiber optic cable and the second section is another 1,300-hex. Both projects can be built in the next 90-120 days. Install 248 30-hz vehicles to replace those beyond useful life | City of Dublin | 24 | 91 to 180 days | \$743,624 |
| Franklin | Dist 13, PID 85624, Urban 248 30-ft buses | | Ohio Department of Transportation | 1447 | 31 to 90 days | \$86,800,000 |

| Franklin | REDEMPTION RE-ENTRY CENTER | <p>MISSION STATEMENT</p> <p>The Redemption Reentry Center will provide a comprehensive and collaborative program that will prepare offenders released from or being released from the Ohio criminal justice system to return to the community with the tools necessary to equip them for a successful transition and a sustained return. The holistic approach will provide participants with a greater opportunity for success at the next level in their life.</p> <p>PROGRAM DESCRIPTION</p> <p>The Redemption Reentry Center will offer programs and services to clients based on the results of their Ohio Offender Needs Assessment. The criminogenic needs outlined in that assessment will be the driving force behind the Redemption Reentry Center. Each client will follow a track established by the results of their individual assessment. Addressing each client's criminogenic needs will form the core of the Center's Programs.</p> <p>The Redemption Reentry Center will be comprised of the following:</p> <ul style="list-style-type: none"> — The Rise High Reentry Program (with or without AOD treatment) — The Rise High Reentry Educational Assistance Program (REAP) — The Rise High Career Training and Certification Program (CTAC) <p>Early Childhood Program Windows (\$121,161) - Franklin County MRDD operates an early childhood program in a building that was originally constructed in 1986. The single-pane windows are beginning to fail. We are phasing in over a period of years, the replacement of these windows with Energy Star double-glazed, low-e window systems. The cost to replace all of the windows at one time is \$121,161.</p> <p>Heating/Ventilating/Cooling System (HVAC) Replacement-Program (\$208,837) - The HVAC system supporting the combination Transportation Compound/Early Childhood facility was installed in 1988 and is beginning to fail. We are phasing in the replacement of that equipment over a period of years. The cost to replace all of the HVAC equipment at one time is \$208,837.</p> <p>Heating/Ventilating/Cooling System (HVAC) Replacement-Residential (\$475,209) - 72 residences have been identified as high energy users by Creative Housing. This proposal would replace the furnaces in those residences with new Energy Star-rated units with a minimum 90 per cent efficiency.</p> | rock of faith cdc | 60 | 31 to 90 days | \$3,000,000 |
| Franklin | MRDD Window & HVAC Replacements | <p>Heating/Ventilating/Cooling System (HVAC) Replacement-Residential (\$475,209) - 72 residences have been identified as high energy users by Creative Housing. | Franklin | Coatings R&D effort | <p>Auld Technologies LLC (ATL) is a development/manufacturing firm with annual sales of \$2 MM. Our products include consumer electronics gears Nokia, Motorola, and Microsoft and many other market leaders such as Nike, Kohler, and GE.</p> <p>ATL has developed proprietary process technology for coating cell phone cases preventing scratches, fingerprints and abrasion as well as coating lenses for safety and clarity. ATL is commercializing this technology with the leading cell phone manufacturer. With proper development we can rapidly expand by adapting our technology across many industries including solar panel lenses, benefiting customers and Ohio.</p> <p>ATL will grow our Columbus R&D center through commercializing our coating technologies. We seek funds for four development engineers and related equipment. With these funds, ATL may end 2009 generating revenues at \$1 million per month with further growth in 2010 and beyond.</p> <p>Our manufacturing strategy is to be near our customers, minimizing logistics and improving customer support. To supply domestic customers, we intend to grow our capability in Ohio. This growth results from applying our technologies to specific industries.</p> <p>TIS, Inc. is an unlisted 3rd-party, DBE and MBE (State of Ohio Cert.) Company with an established track record of successfully providing a wide variety of IT-related technology planning, implementation, support and management services and project/program management services to government projects. TIS will work across the major contractors to establish a set of project-wide IT standards (and, where necessary, interface specifications when a common standard is simply not possible) that will allow the project to flow seamlessly in a way that none of the major contractors can do themselves. Instead of having debates between major contract holders that base their operations on competing IT standards, TIS as a neutral 3rd party has the ability to significantly reduce the amount of time needed to fix the set of standards and that will result in the set of standards that is best matched to both the project and participant requirements since it is not based on pre-disposed toward any one of the participants' existing IT standards "stacks." TIS will function as the overall program management organization from an IT perspective. This provides a consistency of implementation across many areas.</p> | Auld Technologies LLC | 25 | 31 to 90 days | \$2,000,000 |

| Franklin | County Bridge Load Ratings | <p>This project will allow Ohio's 88 County Engineers to hire a consulting firm(s) to load rate all of their County bridges in accordance with federal and state requirements. Currently, most of county bridges are load rated by engineering judgment. This was an acceptable load rating methodology until the Minneapolis bridge collapse on 1/36 in August 2007. Now all bridges must be load rated using an extensively detailed analysis. Unfortunately, these load ratings are difficult to perform and expensive, particularly for those bridges where there are no existing plans. Many County Engineers lack the staff and resources to load rate all of their bridges. This has been a serious concern between the County Engineers, ODOT, and FHWA. The load ratings must be completed, and without federal funding assistance it is going to be nearly impossible for Ohio's County Engineers to comply.</p> | County Engineers Association of Ohio | 1750 | 0 to 30 days | \$50,000,000 |
| Franklin | youth community exchange program | <p>Community service projects created by and for youth could help everyone. Our state and local budgets are closing community centers for youth and helping adults. If community centers could remain open the young people and adult volunteers could do service for those who are disabled, the poor underserved, and others in exchange for the community centers with a designated number of hours for "membership." These services could be, but not limited to, painting, weatherstripping, cleaning of yards, parking lots, streets, lawn mowing, shoveling snow etc. A pattern of community service for the young would prevent some crime and create responsibility and connection. Compassion for others is a valuable life lesson. The list of services is practically endless and would be good for everyone! Learning about our neighbors was part of Obama's dream for all of us! Salt storage facility for use by multiple jurisdictions. To provide adequate salt storage for Gahanna, Milton, Towsontown, Jefferson Township, Gahanna City Schools, etc. to insure the safety of vehicular traffic throughout these jurisdictions.</p> | none | 40 | 31 to 90 days | \$100,000 |

| Franklin | Carmen Ventures | <p>Carmen Ventures is a global network of Ohio State Alumni investing together as a network to achieve superior returns and change the landscape of investing in Ohio. A portion of the funds profits are given charitably to the Center for Entrepreneurship in the Fisher College of Business at the Ohio State University. A portion of the funds investments will be directed to alternative energy programs, including AlgaeVentures, based in Marysville, OH.</p> | Carmen Ventures | 300 | 91 to 180 days | \$20,000,000 |
| Franklin | Big Walnut Trail—Little Turtle to Blendon Woods | <p>Description: Construction of a 1 mi. shared use path and bike/ped underpass beneath SR 161 @ Big Walnut Creek, near Little Turtle community. Terminus will be @ Blue Jacket Way on the north and trail connection to Little Turtle (by Metroparks) on the south. Cost: \$1.6 million Right-of-way: Complete Environmental Document: Complete (2008) Permit status: Coops 404 not required City/Franklin City Zoning clearance (Oct/08) ODOT readiness: Final plans approved by ODOT, (Oct. 08) PID/Date: June/2009 Construction Start: July/2009</p> | columbus recreation and parks department | 23 | 91 to 180 days | \$900,000 |
| Franklin | G3 (Governmental Green Goals) | <p>My proposal would create job and put the state government in charge of an state wide green initiative comprised of research, investing and implement green jobs. Specifically, set up wind and solar farms across Ohio, harness that energy and offer it to low income families first, then to the public using a utility company. Above the creation of small companies to set up the farms and on them, and securing small businesses all across Ohio, helping to positively impact small communities and offer financial security. Headquarters for G3 farms would be located in downtown Columbus, increasing jobs and enabling our back yard. Possible joint ventures with universities allowing expanded curriculum (creating teaching positions and supporting jobs) and students the opportunity to get hands on instruction so we have well trained people to carry the green torch. Please seriously consider my proposal. Creating jobs across many sectors of Ohio life and giving the tools necessary to sustain them is a wise and prudent use of funds. Thank you for your time and consideration.</p> | Tax Payer | 5000 | 31 to 90 days | \$1,000,000,000 |

| Franklin | Scioto Trail--Riversedge to Fifth Avenue | Description: Extend the existing shared use path by 0.80 mile, from its current terminus @ Riversedge Office Complex to Fifth Avenue. Connect 9,000 residents to city-wide network. Cost: \$1.1 million Environmental Document Need City of Columbus zoning clearance for a retaining wall. Need ODOT heavy permit for one section of the project near Balala Court. Plan Status: Final Plans submitted by June 1, 2009 Bid Date: September 2009 Construction Start: October 2009 | columbus recreation and parks department | 27 | 91 to 180 days | \$625,000 |
| Franklin | PWHealth | Hire up to 5 non-billable staff and upwards of 45 full time billable staff covering our health care product and staffing business. Right now we are attempting to grow this 2 year old business on a shoe string budget, and would like additional funding to help us expand more quickly. New data tracking and analysis system for law enforcement and national security. Create a extremely condensed, accurate and rapid data access methodology. | Priseworks Corporation | 50 | 0 to 30 days | \$150,000 |
| Franklin | Fast Review | | Sequilla | 30 | 0 to 30 days | \$1,000,000 |
| Franklin | Clover Groff Stream Restoration--Broad Street | The Clover Groff ditch represents one of the worst headwaters of the Big Darby Creek, nationally noted for its exceptional water quality. With low DHEI scores along the 1.6 mile ditch, it is a major impairment source to Hubbard Run, an important tributary to the Darby. By restoring a significant segment of Clover Groff, at within city-owned standards, the project offers a cost-effective restoration of the stream from one unit of this operation would be in the range of \$500.00 per year replacing imports coming into the state. If the unit were to be located in Cleveland, Akron, Toledo and Dayton also then there would be a net gain to the state of 30 jobs and \$3,000,000 in economic product. Goal: This project will restore 0.8 miles of Clover Groff ditch to Warm Water Habitat. Utilizing natural channel design, involving Priority II restoration techniques, the enhanced, protected ditch will be converted back to a functioning stream, with a floodplain, various channels, coarse substrate, and a/natural pool flow character. Partners: Columbus Recreation and Parks Franklin Soil and Water Conservation District Prairie Township Trustees | columbus recreation and parks department | 19 | 91 to 180 days | \$2,075,000 |
| Franklin | Trabue West Central Medical Center | We have a current design ready for 35-40,000 square feet of healthcare facilities in a superior geographic location. The positive impact on the community would be immediate. With 20-40 permanent healthcare worker positions, we will not only create jobs but also provide a high quality of care immediately launch the project. | Brexton Construction, LLC | 55 | 0 to 30 days | \$6,000,000 |
| Franklin | Magnetic trolley & Electri system | Maglev: Overhead trolley system. Capable of fitting and transporting an individual's electric car for long distance with greater safety and speed. | Evdon Corp | 1000 | 31 to 90 days | \$2,500,000 |
| Franklin | Food processing, turning local crops into nutritio | The end result will be the creation of a small business entity that converts locally grown soybeans and other grains into a high quality, nutritious product called tempeh. The market already exists in health food stores and vegetarian restaurants. Currently, all tempeh consumed in Ohio is imported from other states. By producing tempeh locally we can create entry level jobs with the potential of higher wages, reduce shipping costs and greenhouse gasses. I anticipate a business that would serve Franklin and surrounding areas. The plant would create five or more full time jobs. This can then be franchised or cloned at other population centers around the state. The production of tempeh from one unit of this operation would be in the range of \$500.00 per year replacing imports coming into the state. If the unit were to be located in Cleveland, Akron, Toledo and Dayton also then there would be a net gain to the state of 30 jobs and \$3,000,000 in economic product. | Self | 5 | 91 to 180 days | \$35,000 |
| Franklin | Web devlpmnt | Not sure what to add here | Vicorsys LLC | 7 | 181 days or more | \$500,000 |
| Franklin | Natorium Passive Solar Project | Addition of a passive solar heating system to heat the high school/community natatorium to reduce the use of natural gas and the emission of CO2. | Upper Arlington City Schools | 4 | 31 to 90 days | \$200,000 |
| Franklin | Independant Contractor Incubator | Many residents of Columbus center-city communities have marketable skills, especially in the construction and automotive areas, but lack business skills and professional ability to succeed as independent business. Most lack licenses and certifications which if attained would enable them to earn much higher income. The program would provide them with a professional base of operations and basic back-office support. Members of the incubator will have access to a library including local codes and licensing requirements, reduced rate legal accounting, and marketing services, shared office equipment and space. They will have a business address, reliable phone, fax, e-mail and web presence. Funding is needed for a site rental, shared office equipment, and rent for their office space. Our CDC will own the building and insure stability of the new organization. We expect that 100 independent contractors will use the space to increase their income by 50% in one year. | Franklinton Development Association | 100 | 31 to 90 days | \$75,000 |
| Franklin | medical records conversion | Conversion of paper medical records for digital storage and indexing. We propose converting records for non-profit, not-for-profit, and low-cost health care agencies as the State sees fit. This will improve health care for patients and lower costs by ensuring doctors are able to access a patient's records quickly and efficiently. It will help eliminate possible mistakes due to drug interactions, allergic reactions, etc. It will also save or create approximately 10 jobs for conversion technicians. | Iflo Media | 10 | 0 to 30 days | \$150,000 |
| Franklin | Recovery Oriented Systems of Care | This project will reduce healthcare costs among a population known to have a higher incidence of chronic health conditions, people with a history of addiction. Reductions will result as the result of providing intensive services in early recovery including recovery coaching, recovery classes, referral to healthcare services and frequent follow-up. Using a medical model for managing other chronic health conditions, eg, diabetes, hypertension will be prevented, existing health conditions will be treated, and future complications will be minimized, thus reducing healthcare expenses that would otherwise become a public burden. The project will serve males by entering the community from the prison system and will partner with existing re-entry programs to provide an intensive focus on health and wellness. | Ohio Citizen Advocates for Chemical Dependency Pre | 3 | 31 to 90 days | \$300,000 |
| Franklin | Barrington Elementary Learning Center | Addition of a learning center so that the existing learning center can be repurposed as classrooms to handle increased enrollment. | Upper Arlington City Schools | 26 | 31 to 90 days | \$1,275,000 |
| Franklin | Franklinton Food Co-op | People in our low income center city neighborhood, Franklinton, are unhealthy in a large part because the neighborhood does not have a grocery store and is often considered unsafe for outdoor exercise. The FCA and partners will create a food co-op on West Broad Street which will provide access to healthy, locally produced foods at a reasonable cost, educate people about nutrition and preparation of healthy meals, and offer free use of treadmills to use in a healthy and safe environment. The facility will be an outlet for locally produced food, especially that produced on newly formed grass roots "Franklinton Gardens" urban farming initiative. The co-op will increase the general health of residents as well as serve as a community building activity which will increase neighborhood livability and safety. | Franklinton Development Association | 3 | 31 to 90 days | \$80,000 |
| Franklin | Science Lab Reconfiguration | Reconfiguration of classrooms to science labs. Currently, due to increased requirements for science credits, we have many science classes being held in non-science rooms or in horribly outdated science rooms. | Upper Arlington City Schools | 10 | 31 to 90 days | \$500,000 |
| Franklin | Industrial High Performance Computing Center | http://www.ohio.computing.org/center/ - today, the ability to compute is equivalent to the ability to compete and employ. HPC use by these companies results in highly paid jobs. For example, Goodyear estimated that they have substituted \$100M/yr of "bust/loss" jobs with "\$100M of "stimulus/loss" (higher-paid) jobs. These higher-paid jobs, in turn, generate more jobs. Ohio has the ability to build on the existing investment and expertise at the Ohio Supercomputer Center (OSCC). OSCC's industrial partnerships include Aerospace and Aviation, Bioscience and Bioproducts, Motor Vehicle and Parts Manufacturing as well as Polymers and Advanced Materials. | Ohio Supercomputer Center | 2880 | 31 to 90 days | \$60,000,000 |
| Franklin | Industrial High Performance Computing Center | The proposed Industrial HP Center Data Center will provide a shared technology platform, joining industrial, federal and academic partners to create a HPC-driven economy in Ohio, leading to new computation-centered companies, job growth at existing companies and federal laboratories and a technologically prepared workforce. http://www.ohio.computing.org/center/ - today, the ability to compute is equivalent to the ability to compete and employ. HPC use by these companies results in highly paid jobs. For example, Goodyear estimated that they have substituted \$100M/yr of "bust/loss" jobs with "\$100M of "stimulus/loss" (higher-paid) jobs. These higher-paid jobs, in turn, generate more jobs. Ohio has the ability to build on the existing investment and expertise at the Ohio Supercomputer Center (OSCC). OSCC's industrial partnerships include Aerospace and Aviation, Bioscience and Bioproducts, Motor Vehicle and Parts Manufacturing as well as Polymers and Advanced Materials. | Ohio Supercomputer Center | 2880 | 31 to 90 days | \$60,000,000 |
| Franklin | E-Weld Predictor Module for Automotive Manufaturi | Ohio's major vehicle and parts manufacturing industrial base requires welding automation as a means to optimize new designs for production and structural performance, shortening time-to-market for these lighter, safer and fuel efficient car designs. Current simulation tools are either too complex to run efficiently or not accurate enough for the new materials and complex joint geometries. This proposal builds on the nationally recognized E-Weld Predictor, a web-based engineering software tool that integrates Edison Welding Institute's (EWI) welding know-how and computer simulation expertise with the Ohio Supercomputer Center's (OSCC) high performance computing power. E-Weld simplifies the process by which manufacturers can develop and apply welding simulations. OSCC and EWI propose to leverage and extend this unique capability to help Ohio's struggling automakers. New E-Weld modules would be tailored to the new automotive applications and processes critical to accelerate new product designs and development, thereby establishing a unique competitive advantage. | Ohio Supercomputer Center | 192 | 31 to 90 days | \$4,000,000 |
| Franklin | E-Weld Predictor Module for Automotive Manufaturi | Ohio's major vehicle and parts manufacturing industrial base requires welding automation as a means to optimize new designs for production and structural performance, shortening time-to-market for these lighter, safer and fuel efficient car designs. Current simulation tools are either too complex to run efficiently or not accurate enough for the new materials and complex joint geometries. This proposal builds on the nationally recognized E-Weld Predictor, a web-based engineering software tool that integrates Edison Welding Institute's (EWI) welding know-how and computer simulation expertise with the Ohio Supercomputer Center's (OSCC) high performance computing power. E-Weld simplifies the process by which manufacturers can develop and apply welding simulations. OSCC and EWI propose to leverage and extend this unique capability to help Ohio's struggling automakers. New E-Weld modules would be tailored to the new automotive applications and processes critical to accelerate new product designs and development, thereby establishing a unique competitive advantage. | Ohio Supercomputer Center | 192 | 31 to 90 days | \$4,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | HPC Tech Transfer and Economic Development Center | Over the past six decades, the federal government has ranked the development of a variety of high performance computing (HPC) applications as computational science technologies to support federal and scientific priorities. However, these investments have not transferred to the commercial sector to promote innovation, where they could bring immense competitive advantage to U.S. companies. This issue has been recognized by U.S. Senator George Voinovich and U.S. Congressman Tim Ryan through their introduction of companion legislation to promote tech transfer in this area. The proposed center will identify appropriate resources valuable to the Ohio economy and facilitate the transfer of technologies developed for federal projects to enhance and extend the commercial use of computation by Ohio employers. The Ohio Supercomputer Center's extensive relationships with technology organizations within the federal government and Ohio businesses ensure that this Center can commence operations in a very short time frame and has the experience and expertise to fulfill its objectives. | Ohio Supercomputer Center | 720 | 31 to 90 days | \$15,000,000 |

| Franklin | Investing in Conflict Management Training for Pre- | Proposed funding would support conflict management pre-service training for six state universities with colleges of education during FYs 2010-2011. The funding would cover the training costs for two, four-day trainings for each university. It would also provide site lease stipends for faculty that work to arrange the training and to integrate the skills and concepts permanently into existing coursework. Based on the Commissioner's experience with the CRETE Program it has learned that providing a stipend and on-site expertise helps to ensure the sustainability of the curriculum. Why Do Teachers Need Conflict Management Skills? Conflict management skills help resolve teacher retention. Teacher turnover (excluding retirements) costs the state of Ohio \$206,444,011 per year. In Cleveland the annual cost of teacher turnover is \$12,538,670. For many school systems, the cost of replacing a teacher is so high that even a small decrease in the rate of teacher turnover can have a huge financial impact. For example, a school system w | Ohio Commission on Dispute Resolution & Conflict M | 10 | 31 to 90 days | \$250,500 |
| Franklin | Executive Director | Crime Stoppers serve Franklin county and all the surrounding counties. This money would be used to hire an executive director and staff to work with law enforcement media and the community to solve crimes and raise money to become self-sustaining | Central Ohio Crime Stoppers | 4 | 31 to 90 days | \$180,000 |
| Franklin | Make Grandview Safer | This is a request for one additional marked patrol vehicle because due to age we often can not place needed officers on the street because vehicles are in a state of repair. One unmarked police vehicle for our investigator/DARE/Victim Assistance officer. 9 police radars and 2 Lidar laser speed measuring devices to make Grandview streets safer for residents and children walking to and from school Grandview currently has inadequate speed measuring equipment that due to age and electronic upgrades does not permit patrol officers to maintain safe walkways and roadways within our city. In addition, our Detective/DARE officer/Victim Assistance Officer has an aging vehicle that often breaks down causing cancellation of agent projects or investigators due to lack of transportation. This same issue is evident in our marked patrol fleet due to age and vehicle breakage. Over the last 4 years Grandview Heights has lost key employees and businesses causing our revenue stream to significantly dry up causing much needed services to dwindle. The citizens and businesses that remain in Grandview Heights deserve the best we can give them when they con | Grandview Heights Division of Police | 20 | 0 to 30 days | \$70,000 |
| Franklin | Truancy Prevention Through Mediation | Regular school attendance is critical for attaining the skills necessary for high quality jobs in today's competitive 21st century job market. Proposed funding would support the cost of family advocates to serve Ohio school districts currently using mediation to address and prevent student truancy. This proposal suggests that each family advocate would provide a minimum of 20 hours of service per 5-day week. Total funding requested for fiscal years 2010-2011 is \$205,920. Truancy mediators take place in the school and provide a safe, non-threatening, positive opportunity for a family to identify and discuss the issues and concerns impacting student attendance. When an unmet social service need (mental health, medical and dental services, drug and alcohol treatment, food, clothing, transportation, housing) is identified during the mediation, families often need help to link with appropriate government and nonprofit agencies. Family advocates serve this role by helping link the student and family with the needed social service and follow up to ensure that barriers and misunderstandings are eliminated. | Ohio Commission on Dispute Resolution & Conflict M | 10 | 31 to 90 days | \$206,000 |
| Franklin | Central Ohio Headquarters for Ecopreneurship in Re | Use of former mfg site to house new solar energy manufacturing facility, jobs training (re-training) center, incubator for sustainable energy entrepreneurs and not-for-profit green educational organizations, site creation in manufacturing and installation, making renewable energy systems more affordable, providing renewable energy in state to meet Advanced Energy Standards, encouraging renewable energy and energy efficiency educational efforts, and creating a center for renewable energy and green financial partnerships. 30% manufacturing tax credit, 30% investment tax credit, 30% installation tax credit - all could apply. May also qualify for brown-site development and other EPA funding as well as other applicable programs. The headquarters for green entrepreneurship in central Ohio. This is not a research facility - there are many proven technologies that need to be brought to the market and supported in their initial implementations. Successful business models from other states and countries need to be matched with in-state resources for growing Ohio's capacity to expand beyond coal. This could be a cooperative venture with state, county and m | Renewable Concepts & Design | 800 | 0 to 30 days | \$10,000,000 |

| Franklin | Financial Literacy | To implement our financial literacy education program into the Columbus public and surrounding school systems and youth organizations. Our program is currently being used by over 75 organizations (school, after school programs, youth groups) around the United States. Total youth program are over 15,000. Our program has demonstrated significant results in the environment it has been implemented. The web-based program gives kids K-12 a combination of curriculum and practical application opportunities. The program is geared to teach kids how to earn, manage and spend money. Ultimately breaking the cycle of debt and personal financial deficiency in Ohio's youth. This program has many adjacent benefits for the administrators as well including: automated attendance tracking, progress tracking, and the ability to correct desired behaviors. We currently have one Columbus based school and one youth center using our program. We would very much like to host you and show you the program in action and the results it has produced in the past 24 months. | Smart Money for Kids | 10 | 0 to 30 days | \$500,000 |
| Franklin | Abandoned Home Purchases | Several foreclosures in our township have caused homes to become empty and falling apart. Some homeowners do not want to fix up the homes as the Township would like to use money from the government to purchase and fix up the properties. This would allow the neighborhoods to look better and promote healthy living. | Blendon Township | 3 | 31 to 90 days | \$180,000 |

| Franklin | East Johnstown Road Sanitary Sewer - Southern Sect | Provide gravity sewer to area of City of Gahanna currently on septic and aeration systems. | City of Gahanna | 7 | 31 to 90 days | \$300,000 |
| Franklin | Hamilton Road Central Basin Storm Retention Pond | Headwater flood control basin and stream restoration project in the Big Walnut Creek watershed within the City of Gahanna. | City of Gahanna | 7 | 0 to 30 days | \$180,000 |
| Franklin | Havens Corners Storm Sewer Reliever (New Build) | Storm sewer relief pipe to alleviate street, yard, and basement flooding. | City of Gahanna | 12 | 181 days or more | \$1,200,000 |
| Franklin | Ohio Local History Project | Description: This project aims to employ historians, educators and authors in an effort to preserve the local history, folklore and tradition of Ohio with a comprehensive network of websites in an environment integral to a 21st century education system. The websites will integrate Web 2.0 features that will provide a collaborative environment available to anyone interested in learning more about Ohio's past, including teachers, students and researchers. Content will be aligned with State teaching standards and guidelines. Outcome: The first goal of the project is to employ a team of historians, educators and authors that will help provide qualified educational resources. We believe their involvement will result in a product vastly superior to similar websites. Second, we aim for the project to be self-sustainable within three years, so that we can employ people long-term and continue their work. To do this, we will incorporate advertising and a committee, with a goal of doubling every dollar used to fund this project. We will also look at growing the network so that it covers states and territories outside of Ohio, allowing us to increase the number of jobs created from this project. Alternative fuel station for school system, local government, and general public use. | R.Squared Communications | 4 | 181 days or more | \$500,000 |
| Franklin | City of Gahanna Fuel Station (Public/Private - Alt | Alternative fuel station for school system, local government, and general public use. | City of Gahanna | 60 | 0 to 30 days | \$1,000,000 |
| Franklin | Multi-Jurisdictional Police/Fire Training Facility | New LEED Certified facility for multi-jurisdictional police/fire training. | City of Gahanna | 60 | 0 to 30 days | \$1,200,000 |

| Franklin | Reduce Healthcare Cost While Improving Care | State of Ohio Federal Stimulus Initiative Proposal Dear This proposal is for the Ohio Cardiac Thoracic and Vascular Research and Education Foundation establishment and implement ideas, protocols and procedures to reduce healthcare costs and better utilize health care resources in Ohio and to be a model for implementation throughout the country. This Task Force will have three major focuses: 1. Reduction of cost in our health care system. 2. Removal of waste in our health care system. 3. Better utilization of health care resources. 4. Improve patient access to healthcare. The Task Force will develop programs around the following areas: 1. Develop programs to reduce admissions to hospitals. 2. Develop programs to reduce re-admission rates to hospitals. 3. Reduce duplication of services within competing hospitals and within the existing hospital setting. 4. Develop processes/procedures to reduce hospital length of stays. 5. Develop programs to manage intensive care and critical stays within the hospital. 6. Develop programs to reduce the delay in time to transfer patients from the emergency department to the inpatient unit. (i.e. Higher costs settings to lower costs settings) 7. Develop programs to reduce the delay in time to transfer patients from the emergency department to the inpatient unit. (i.e. Higher costs settings to lower costs settings) 8. Develop programs to reduce the delay in time to transfer patients from the emergency department to the inpatient unit. (i.e. Higher costs settings to lower costs settings) 9. Develop programs to reduce the delay in time to transfer patients from the emergency department to the inpatient unit. (i.e. Higher costs settings to lower costs settings) 10. Develop programs to reduce the delay in time to transfer patients from the emergency department to the inpatient unit. | Franklin | Day Treatment Program | This program is a highly integrated mental health and educational program that provides treatment and education to middle and high school youth who otherwise will not graduate due to their behavioral health needs. The program serves 50 youth with a staff of 24 counselors, teachers, and behavioral specialists. This program lacks adequate funding because state and local agencies can exclude the program from mandates due to the program having a not public school charter (not a charter school). 80% of the youth served have documented special education needs, but the youth have been denied | Rosemont Center, Inc. | 18 | 0 to 30 days | \$180,000 |
| Franklin | Brice road resurfacing | The project will resurface the roadway and construct a new 4-foot shoulder on 3000 linear feet of Brice Road from Refugee Road to the village's northern corporate limit. The roadway was last resurfaced in 1993 and is in very poor condition. The new shoulders will improve the safety of all users of the roadway. The average daily traffic on this section of road exceeds 20,000 vehicles per day. The road is classified as an urban collector on the federal and highway systems. Currently the existing pavement is severely deteriorated with many potholes throughout the road. Since the village has very limited tax base (only 70 residences) it is a big stretch to fund this project locally. In the past few years residents of the village have volunteered to purchase asphalt and repair the potholes on their own. But as the pavement ages further these repairs are not enough to keep the road functional and safe for the Village residents, surrounding communities, Police and the local utilities using this road. The Columbus Dispatch Co. should begin to use broader rubber bands to secure the newspapers which are delivered to homes across Franklin in the surrounding counties. This larger rubber bands will require an additional person to help stretch the bands so that they fit over the rolled-up newspaper. | Village of Brice | 15 | 31 to 90 days | \$375,000 |
| Franklin | Broader bands | The project will resurface the roadway and construct a new 4-foot shoulder on 3000 linear feet of Brice Road from Refugee Road to the village's northern corporate limit. | Franklin | Worthington STEM Pathway School | The request is for the establishment and operation of a Worthington STEM Pathway School. The goal of the Worthington STEM Pathway School is to design and implement a STEM-based curriculum program (Science, Technology, Engineering, and Math) that is replicable statewide within the framework of a traditional high school. Student learning will be enhanced, enriched, and reinforced by extending project-based learning one additional day through service learning. Anticipated student outcomes include: 1) increased motivation to take an active role in their learning; 2) increased ability to synthesize information and make informed decisions and predictions as they apply core knowledge from all disciplines to complex design problems; 3) classroom work will become more relevant through problem-based learning and service-learning; 4) more informed choices regarding careers and post-secondary education. Our students will be expected to develop conceptual understanding of the integrated content of science, technology, engineering, and math as well as develop an appreciation for the STEM disciplines by applying concepts of the "real" world using 21st century learning skills. | Worthington Schools | 9 | 31 to 90 days | \$749,736 |
| Franklin | North Airfield Apron/Taxiway Expansion | Project involves the construction of a new taxiway and apron on the north side of Port Columbus to accommodate growth of aviation tenants including Noyes. | Columbus Regional Airport Authority | 50 | 31 to 90 days | \$9,000,000 |
| Franklin | Terminal Green Roof | Project involves the construction of a green roof on the main terminal facility at Port Columbus. Among the many benefits are: improved storm water management; thermal insulation and extended roof life. | Columbus Regional Airport Authority | 30 | 31 to 90 days | \$1,500,000 |
| Franklin | Goodale Boulevard Sanitary Sewer Rehabilitation | This project includes the rehabilitation of more than 2,800 linear feet of various sized sanitary sewer infrastructure. This project is part of the larger "Craneshoe Yard" project, which is expected to create and/or retain more than 5,000 jobs. LifeCare Alliance (LCA) provides meals for older, disabled and chronically ill adults either in their home or at senior community dining centers and restaurants in over twenty locations across central Ohio. The home delivered meals provide nourishing food and conversation to homebound adults 365 days a year. | City of Grandview Heights | 5,000 | 31 to 90 days | \$405,000 |
| Franklin | Lowering Healthcare Costs | The intent of the program is to improve or maintain the health and nutritional status of the target population by reducing the number of central Ohio older and chronically ill adults who experience food insecurity and malnutrition. Through the program, participants will have increased access to healthy food, will eat more nutrient-rich foods, and there will be an increased number of healthier older and chronically ill adults in central Ohio. In addition, clients will gain access to increase socialization, increase health education and resources, and/or delay institutionalization. The services provided by LCA allow clients to remain safely independent in their own homes. With institutionalization costs in Ohio averaging \$65,000/year, the services provided by LCA equate to dramatic cost savings and less time spent in a hospital. | LifeCare Alliance | 250 | 0 to 30 days | \$295,608 |
| Franklin | East Johnstown Road Sanitary Sewer - Northern Sect | Provide gravity sewer to area of City of Gahanna currently on septic and aeration systems. | City of Gahanna | 7 | 31 to 90 days | \$425,000 |

|----------------|--|---|--|----------------|--------------------|---------------------------|
| Franklin | CDC-Residential and Office Flooring Replacement Pr | The removal and replacement of the flooring and carpeting in four (4) 8500 square foot ICF-MR residential buildings while the building remains occupied. Floors are 18 years old Project includes replacement of approximately 40,000 square feet of office carpeting that is also 18 years old in Administration building with most work to be done in evenings to accommodate 24/7 operation. | ODMRDD-Columbus Developmental Center | 40 | 91 to 180 days | \$300,000 |
| Franklin | Law Enforcement Communications and Master Data Man | Upgrade main source software suite to integrate and expand upon the data sharing capabilities of Ohio Law Enforcement Officers. To create "real time" information sharing and communication web network statewide. | Fraternal Order of Police of Ohio | 15 | 0 to 30 days | \$5,000,000 |
| Franklin | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDI's mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, Individual Development Accounts (IDAs), incubators, technical assistance, and access to retail markets. As the U.S. Small Business Administration microleader and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners and entrepreneurs in the region. ECDI provides training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDI is able to serve underserved populations, including low-income individuals, those with little or no credit, or those precluded from paying interest because of religion or race. | Economic and Community Development Institute | 20 | 0 to 30 days | \$150,000 |
| Franklin | Jobs providing community enhancement | Training of potentially 20 to 25 unemployed workers per month, to learn application of decorative concrete coatings and associated skills to start their own business. This project is involved in training and supporting their success in their independent operation. This will also by its nature enhance the residential housing market by bringing improvements to structurally sound but aesthetically concrete surfaces. The processes that we will instruct are typically used in home remodeling and repair. The goals of this project are to put unemployed entrepreneurs in a position to start their own successful business which will enhance the community around them. At this time I am unemployed but possess skills that I would like to pass to others. The funds that I am requesting would be used to lease a training facility, tools, materials and associated training aids to start the program. I have established an LLC with the State of Ohio with this intention. The initial target area for this project is central and southern Ohio. Thank you in advance for your consideration of this program for your allocation of stimulus funds. | Decorative Coatings Academy | 200 | 0 to 30 days | \$25,000 |
| Franklin | CDC Roadway and Sidewalk Replacement | Replacement of failed roadway and storm drains, sidewalks, and parking lots on 92 acre campus. Includes purchase and installation of parking stumps seating of existing asphalt in good repair, and striping of entire campus roadways and parking areas | ODMRDD-Columbus Developmental Center | 20 | 91 to 180 days | \$300,000 |
| Franklin | New Service Garage | Construction of a new 24,000 square foot Bayley Service Center Office, with 45,440 square feet of paved area, and 4,800 square feet of salt, sand, and soil sheds. This will free up the municipal complex site for redevelopment into retail shops and offices, thus creating over 100 new retail/service jobs, and 30 construction jobs at the new Service Garage. | City of Bayley | 130 | 181 days or more | \$3,000,000 |
| Franklin | Community Health Center | LLCHC is a Federally Qualified Health Center look-alike serving 4,000 patients with over 11,000 patient visits per year. We are serving this patient population with only 2,800 square feet and we have already been working on plans to expand into a 15,000 sq. ft. facility. The federal stimulus money will allow us to expand the services we are already providing: primary health care, mental health care, nutritional services, and allow us to care for 16,000 patients users. We will also be able to add dental services. For 208 non-ambulatory children and adults with severe or profound mental retardation, Heinzerling provides full time care, specialized therapy and education. Because the residents' experiences are often limited to the indoors, we wish to build an Outdoor Services Learning Environment (OSE) on Heinzerling's campus to enhance the educational opportunities of these individuals. | Lower Lights Christian Health Center | 21 | 0 to 30 days | \$750,000 |
| Franklin | Heinzerling Foundation Outdoor Sensory Environment | The benefits from the OSE will be numerous. Individuals with limited physical and mental capabilities often lack opportunities to experience, process and interpret sensory input from their environment. The OSE will provide input to these sensory systems via a variety of ways. Fragrance garden, musical instruments, play equipment and water play to help develop motor functions and language skills. These experiences will have subtle, but major impacts on these individuals for enhancing sensory and motor skills along with social responses and learning. Heinzerling's mission is to provide a loving and nurturing environment that enriches the development, health and quality of life of individuals with severe or profound mental retardation. The OSE will serve only to augment that enrichment. | Heinzerling Foundation | 20 | 181 days or more | \$500,000 |
| Franklin | Columbus Home Renewal | 1) purchase foreclosure property in Columbus 2) repair homes 3) rent to tenants displaced by foreclosure 4) sell property to tenants when credit repaired Currently there are 255 homes in Columbus school district priced at \$100k or less that are in some stage of foreclosure. At listed price, these homes are valued at nearly \$10m. The project purchases homes at 80% of listed price. Estimated repair cost is \$35k each. Repaired homes will rent for \$500 to \$1,000 monthly. Tenants repair credit and purchase home for resale value. The project benefits: -homeowners affected by foreclosure -neighborhoods declining from vacant homes -banks eliminate nonperforming asset -banks finance new purchases -reestablish local property tax base Affected jobs: -real estate agents (est. 50) -contractors (est. 100) -material suppliers (est. 20) -project managers (est. 10) | Belluno Homes, LLC | 200 | 0 to 30 days | \$16,000,000 |
| Franklin | Announce Ohio's Funding Opportunities Through Sear | Requested funds would create an after training sessions for Ohio's program officers to post all funding opportunities to a central searchable database. Grants.gov is already an effective tool, and states may participate as funding sponsors with their own searching via Dept of Development, CDNR, etc. Moving toward mandatory use of grants.gov for all Ohio opportunities would save much search time, allow single-source tracking, and would promote a much-needed demonstration of transparent competition and avoid the appearance of "insider information". | University of Toledo | 20 | 0 to 30 days | \$10,000 |
| Franklin | Turning the House of Hope GREEN | A 2-page proposal for this project was endorsed by Ohio's chapter of the Society of Research Administrators. The Victorian House housing 20 men for long-term alcohol and drug treatment. Energy efficient water heaters (5, furnace (4), and windows (6), a Hybrid Van, and computers. Expected Outcome is to reduce total fuel energy consumption. | House of Hope for Alcoholics, Inc. | 5 | 31 to 90 days | \$300,000 |
| Franklin | CDC-Lightning Protection Project | To eliminate sources of repeated lightning strikes causing damage to equipment and frequent outages, CDC is requesting replacement of 400 yards of overhead electrical wiring and 2 pole mounted transformers and 5 pole mounted lightning fixtures with 8 new grounded roadway fixtures adding underground wiring and the rerouting of electrical service between two buildings to eliminate the need for pole-mounted transformers and overhead wiring. | ODMRDD-Columbus Developmental Center | 20 | 91 to 180 days | \$100,000 |
| Franklin | Copley Moving Co. Inc. | Copley Moving Co. Inc. has been in established since 1988. As a rating with B.B. and top of the list on angieList. With this money we could upgrade equipment, obtain a warehouse for storage another truck and equipment, modernize the office and advertising. This could create approximately 10+ new jobs and retain the 10 that we have. | Copley Moving Co. Inc. | 15 | 0 to 30 days | \$200,000 |
| Franklin | Business Retention and Expansion for Ohio Communit | Meaningful economic development requires local community involvement led by local officials. It also requires coherent development strategies based upon a thorough understanding of the local economy. OCA's Local Economic Analysis Programs enable communities to gauge local and regional economic conditions in order to develop these strategies. It is proposed that additional funding support an expanded team of OSU extension personnel to work with as many as 100 qualifying communities in Ohio to achieve the following outcomes: (1) Establishment of an integrated approach to economic development at the local community level; (2) Development of community economic decision-making capacity via hands on educational approaches and research based methods; (3) Overall improvement in community quality of life; (4) Development of an awareness orientation in the community; (5) Improvement of community leaders' response to residents' concerns; (6) Creation of a local basis for retention, expansion, and attraction strategies; and; (7) Engagement of community residents in a discussion of their local economy and the roles they can play in its vitality. The overall impact is to revitalize Ohio's economy. County focused on the manufacturing challenges of new energy technologies | The Ohio State University | 3500 | 31 to 90 days | \$350,000 |
| Franklin | Ohio Advanced Energy Manufacturing Center | Based on a survey of 300+ Ohio manufacturers, the Center developed an approach to assist advanced energy companies to overcome the product development, process engineering and manufacturing technology challenges impeding successful and timely transition to market. The Center will: 1. Provide access to expertise and capital equipment to develop manufacturing solutions 2. Invest in new manufacturing process innovations on a rolling 3- to 5-year time horizon 3. Set up collaborative mechanisms within and across industry sectors to identify and develop new materials and manufacturing technologies that support market competitiveness. 4. Transition these new approaches to engineering education and training curricula to assure a qualified, professional workforce to support new Ohio manufacturing opportunities. 5. Support businesses in entering supply chains for emerging business segments | EWI | 250 | 0 to 30 days | \$6,000,000 |
| Franklin | 22nd Century Communication Capability | Part 1 - Create and provide high speed ethernet network/Internet access for elementary to make use of new equipment and technology direction of district. Installation would involve telcom equipment and telcom circuits from a provider. On-going costs to maintain circuits would be covered by the district and future state funds. Part 2 - Replace all district phone systems ranging in age from 13-20 years in an IP based phone system making use of ethernet telcom circuits. | Worthington Schools | 10 | 91 to 180 days | \$1,200,000 |
| Franklin | Gahanna Lincoln High School Learning Center | This would like to fund a new annex for Gahanna Lincoln High School that will be a mixed-use facility. It will house 50,000 square feet of retail space on the ground floor and another 100,000 square feet on the second and third floors that will be used as student classrooms. The first floor retail space could house a variety of new businesses that would employ 60-80 people, and the college/business incubator on the second and third floors will promote 21st Century teaching and learning concepts. At least 20 educators will be employed in the building and 400 students will attend classes there. This concept is a new one for schools in that it is a private/public partnership in which the state and revenue generated in the retail spaces on the first floor will help to defray the construction and operation costs for the school classrooms on the second and third floors. In summary, this stimulus funding would create jobs in the center of Gahanna and promote a new model for 21st Century learning in a college/business partnership that others will wish to study and replicate. | Gahanna-Jefferson Public Schools | 100 | 181 days or more | \$15,000,000 |
| Franklin | Open a manufacturing facility to produce highly en | A new manufacturing facility to built green wall panels will create new blue and white color jobs. In addition this plant will divert polystyrene waste from local landfills. Homes and commercial building built from this material will reduce energy bills by 50% and save tons to continue absorbing CO2. | rastra | 75 | 31 to 90 days | \$2,000,000 |

|----------------|--|---|-------------------------------------|----------------|--------------------|---------------------------|
| Franklin | Athletic Republic | I would like to start a business that through the use of science, we could train athletes to optimize their athletic potential, prevent injuries, and give them the best advantage to succeed in their sports as well as earn the possibility for scholarships in higher education. My vision is to make this a community project, offering it to a group of people together to enhance our city. I see this not just as an athletic perspective, but also offering help in applying for schools, involvement in the community, mentoring younger children. I feel that this has the potential to branch out into many directions. This also wouldn't just be limited to athletes. It would be for our seniors, the elderly, disabled children, etc. By linking a wide range of people together, the more people, we can reach to work together to invest in our community, also offering services to underprivileged children who may not have the opportunity to interact with someone who went to college and letting them know that it is attainable and there is help for them to apply as well as focusing energy towards a certain goal. This has potential to be city and statewide. Mixed use, mixed income housing complex featuring offices, retail stores and rental housing. A specific number of units will be reserved for veterans, seniors and low income residents. | Athletic Republic | 75 | 181 days or more | \$300,000 |
| Franklin | Mixed Use, Mixed Income Housing Complex with Reser | The upscale complex will feature a health and wellness facility, a technical job training center, a child care facility, restaurants and entertainment venues. Employees in the complex will receive tax credits for hiring veterans, seniors and low income residents. Construction contractors will be encouraged to partner with disadvantaged and minority business enterprises. | Don Lewis & Company | 5000 | 0 to 30 days | \$50,000,000 |
| Franklin | LifeBelt® CPR | LifeBelt® CPR is a new and patented treatment for sudden cardiac arrest that may become as ubiquitous as AEDs and fire extinguishers. Developed with a grant from the National Institutes of Health, the LifeBelt® has the potential to save thousands of lives a year. With funding, we would like to save 5-10 jobs this year and expand to add an additional 20 jobs in year 2013 and up to 50 high paying medical manufacturing jobs by 2015. The US market potential for CPR products for both the professional and layperson is at least as large as the AED market and is easily in excess of \$1 billion. The LifeBelt® is a lightweight, easy-to-use device that incorporates a two-to-one mechanical advantage and a stroke-limiting mechanism to allow rescuers, regardless of their size or physical strength, the ability to perform adequate compressions over an extended period of time. Currently, we are working with the FDA to obtain approval for the device. We also plan to apply for Third Transition Funding via the Regional Commercialization and Entrepreneurship (RCOE) application with the Ohio Department of Development. | Deca-Medics, Inc. | 30 | 0 to 30 days | \$1,500,000 |
| Franklin | TEC Venture Lab | The Venture Lab is a new and patented treatment for sudden cardiac arrest that may become as ubiquitous as AEDs and fire extinguishers. | Franklin | TEC Academy | Commercialization. The TEC Academy is administered by Fisher College in collaboration with a number of other colleges across campus, including Engineering, Medicine, Law, Pharmacy, Food, Agricultural and Environmental Sciences, Arts and Health and Physical Sciences. The focus of the TEC Academy is: - Utilizing the technology in a highly structured research protocol for identifying and developing the commercial potential of the region's leading technologies. - Training the university's leading engineers and scientists (faculty, students and experts) in the principles, strategies and tools of technology commercialization. - Training the world's leading business and law professionals (faculty, students and industry representatives) in the assessment and development of entrepreneurial opportunities. Focused in the region's most promising technologies. - Engaging experienced industry/technology/entrepreneurial leaders to coach the aspiring tech-based entrepreneurs to lead startup efforts, and launching and growing new technology/entrepreneurial ventures in Ohio developed around select regional technologies. | The Ohio State University | 100 | 0 to 30 days | \$500,000 |
| Franklin | Center of Excellence on Traumatic Brain Injury and | Establish a Center of Excellence to provide state of the science information to mental health and substance abuse professionals and programs about how to effectively treat clients who have traumatic brain injury (TBI) as a comorbid condition with a behavioral health problem. Clients with TBI are hard to treat, move slowly to preliminary treatment, and require accommodation during treatment. The challenge of effectively addressing comorbid TBI has been underscored by the needs of service members injured in Iraq and Afghanistan. Experts at Ohio State University, in collaboration with the Ohio National Guard, the Brain Injury Association of Ohio, OCMADS and ODHR are uniquely positioned to create a nationally recognized CoE that would translate scientific evidence into practical techniques for behavioral health professionals. Educational materials and training opportunities would draw resources to Ohio from across the U.S. if not internationally. This project consists of the regional expansion of a center, clinic, streetlights and drainage on Main Street (S 63rd and Third Street). The project encompasses approximately 1400 lineal feet. U.S. 62 is an arterial roadway that bisects the village from the northeast to the southwest. It is heavily used by local and regional truck traffic. The improvements would include the installation of a left turn lane and on-street parking lanes to facilitate the movement of traffic and encourage the economic redevelopment of the old village center. The sidewalk, curb and curb ramp improvements will greatly improve pedestrian access to the adjacent businesses, religious institutions and public buildings. | Ohio State University | 4 | 31 to 90 days | \$200,000 |

| Franklin | KIDS COME FIRST: A Coalition Campaign for Child Ca | KIDS COME FIRST: A Coalition Campaign for Child Care Resources is a capital campaign focused on renovation and expansion of early learning and child care facilities. The campaign includes centers in four of Columbus's most challenged neighborhoods and a learning campus to serve families, early childhood educators and providers in central Ohio with the latest information, skills, and services to help children grow. South Side Learning & Development Centers will build a new center. Columbus Early Learning Centers will build one new facility and renovate two others. Serving low income and at risk children, these centers are long-time anchors of stability in their neighborhoods. They offer full day, full year care and they are accredited and recognized for their high quality. The campaign will also expand the Action for Children facility to create a world-wide early learning campus that will include a best practices lab and expanded classrooms to provide professional development for more early education teachers and providers. Construction will be LEED certified. | KIDS COME FIRST/Action for Children | 500 | 0 to 30 days | \$3,000,000 |

| Franklin | expanding spa salon | I would like to expand the current salon to include a spa with direction to health awareness for the whole body, pressure points of body for health awareness and for body upkeep. Also expand to include services to those with hair/skin diseases, including program for breast cancer awareness and hair care during chemo and other stress.Wigs hardware etc. | shortcutsby Sandy | 8 | 181 days or more | \$800,000 |
| Franklin | Keep Ohioans Working | We wish to improve our current facilities so we can continue to attract and maintain our clients and enable us to employ Ohioans. We are in need of working capital to maintain our employee base throughout our organization by maintaining our facilities to be safe for our clients and employees. We are currently in a position that requires us to cut payroll expenses including jobs and hours. Obviously, this impacts Ohioans and our ability to continue back to the community our business can employ more than 600 Ohioans, however we have had to lay off many and we are now below that number. | Lodging First, LLC | 600 | 0 to 30 days | \$1,000,000 |
| Franklin | how about us that dont get treated right thats hu | As of all like me size to be great for the work program now we have to spend every penny to fight for our workers comp help / loss fingers and in bed like nothing. | home | 1000 | 31 to 90 days | \$10,000 |
| Franklin | Development and Manufacturing of Magnesium Diborid | This project will create a \$50MY annual product revenue business in Ohio, create 6 new jobs initially and grow to 50 plus permanent jobs in Ohio. This project is to expand the MRI magnet system supply chain in Ohio for our Ohio MRI manufacturers, ViewRay and All Tech Medical. This project allows Hyper Tech to develop and manufacture magnesium diboride superconducting MRI magnets for their Ohio companies. This project builds on the previous State of Ohio Third Frontier funding (approximately \$1M) and federal funding (over \$8M) for magnesium diboride superconductor development. It will enable Hyper Tech to produce lower cost MRI's and lower the MRI imaging cost to patients. These low cost, helium free, cryogenic magnet systems will allow ViewRay and All Tech Medical to increase their worldwide market share, and grow their businesses in Ohio. | Hyper Tech Research Inc. | 50 | 0 to 30 days | \$5,000,000 |
| Franklin | Development and Manufacturing of Magnesium Diborid | This project will result in \$100MY annually product revenue, create 6 new jobs initially and grow to 100 permanent jobs in Ohio. This project encompasses an existing project which is Hyper Tech's commercialization of selling magnesium diboride superconductor wire to Siemens, Philips, and GE for next generation MRI systems. They can then sell low cost helium both for MRI systems. This will enable them to keep the cost of health care lower and reduce the cost of MRI scans to patients. The development of magnesium diboride superconductor wire has been funded by the State of Ohio to approximately \$1.0M and the federal government to over \$8M. Hyper Tech is awaiting their response to a proposal submitted to a Third Frontier RCP solicitation, which has Siemens contributing \$2M of cost share with over \$2M coming to Hyper Tech. Magnetic resonance imaging (MRI) currently one of the most valuable medical diagnostic tools used in hospitals and ambulatory hospitals. Making MRI available at a lower cost and insensitive to the impending worldwide helium shortage is a high priority to the medical community. | Hyper Tech Research Inc. | 100 | 0 to 30 days | \$5,000,000 |
| Franklin | Alton & Darby Creek Road at Renner-Walker | Add turn lanes and traffic signals to reduce accidents along this arterial roadway serving the growing west side of Franklin County. | Franklin County Engineer | 36 | 91 to 180 days | \$2,000,000 |
| Franklin | Boost (Build OUR Own Stimulus Team) | Jobs to 40 (or more) new entrepreneurial businesses opened and operating within 8 to 12 months, supporting jobs as well as new retail and office spaces are redeveloped. Hundreds of ongoing jobs created within the new small businesses opened across the state of Ohio, and a boost to the local Ohio economies are located. There are tens of thousands of highly skilled Ohioans who often lost their jobs and will NOT be able to find work at the income level that they had achieved. I am a licensed Broker representing over 275 top quality Franchise Companies that cross all treatment levels and industries. Highly Recognized Franchises include The Clean Team and Servpro as well as some great concepts with not so highly recognized names. In a highly developed process, a campaign to bring together people interested in starting their own business and holding regular seminars, and some involvement from the state in assistance and our guidance in helping to get some of these business a portion of the capital they need to become business owners. A small amount of money that has great track record and Over Time we BOOST (Build Our Own Stimulus Team) for Ohio. | The Franchises Butler | 50 | 0 to 30 days | \$300,000 |
| Franklin | www.hotbatspot.com | Rebranding will provide Columbus with a digital infrastructure. We plan webinars in bars around the city. We partner with high end hotels to put the live feeds in one of their info channels. This will provide business travelers with up to date information on available entertainment. This will encourage more events to be hosted in Columbus, and will have a ripple effect on the surrounding economy. This can be applied to a national level. | HH & A LLC | 10000 | 31 to 90 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | Development and Manufacturing Scale up to Produce | This project will create a \$100Myr plus annual product revenue company in Ohio, create 7 new jobs initially and grow to 100 plus permanent jobs in Ohio. This project is to accelerate an existing project. Hyper Tech is currently working on a Third Frontier Advanced Energy Project for manufacturing that current timeline is for the Smart Grid with R&D-Ohio. This project will accelerate R&D-Ohio and Hyper Tech establishing a manufacturing plant in Ohio. The Smart Grid will efficiently control electrical power distribution on the grid. A SFCL is an essential and enabling component to the grid to mitigate excessive fault currents that can cause damage property and threaten human life, and increase the life of the components in the grid. Expanding today's electrical infrastructure to include renewable energy sources like wind, significantly increases fault currents and jeopardizes the existing aging breakers, buswork and switchgear. A SFCL placed at the electrical stress points blocks the changing current surges from electrical faults. | Hyper Tech Research Inc. | 100 | 0 to 30 days | \$6,000,000 |
| Franklin | Lighting and Obstruction Removal | Rehabilitate Medium Intensity Runway Edge Lights, and remove obstructions to the approach to RWY end 22 | Bolton Field Airport | 10 | 31 to 90 days | \$225,000 |
| Franklin | Franklin County 2009 Resurfacing Program | Routine resurfacing of various federal aid system roadways within unincorporated Franklin County. The work will be in-kind replacement of the existing pavement surface course and will require no new right-of-way. Environmental clearance should be very simple. Essential to new energy savings and energy conservation. The project is a priority for the department, causing an requesting \$2.8 million in funding to support its private investment. | Franklin County Engineer | 36 | 31 to 90 days | \$1,600,000 |
| Franklin | Easton Environmental Stewardship Program | A key component of the program is the addition of 250 KW photovoltaic system to a new 1,000 space LEED certified parking structure that is expected to be under construction later this year. The U.S. Department of Energy has already designated this project a 2009 Solar America Showcase, including the department's strong belief in the project's future influence within the region and national real estate industry. Easton is also planning to implement a full-scale energy efficiency initiative that includes efforts to reduce heat energy loss, introduction of CO2 sensors to manage fresh air ventilation, and the addition of advanced natural ventilation and energy management systems. All green initiatives would be supported by a high profile and well-executed community outreach program in coordination with the DOE. | Enger + Associates, Inc. | 320 | 0 to 30 days | \$2,840,000 |
| Franklin | MMMM (model, mentor, motivate, monitor) | Development of a program to bring teams of well educated, retired citizens together with under performing public school students to model appropriate academic behaviors, mentor students in study habits and specific course material, motivate students academically and monitor progress. The goal is to keep young students (especially those where there is no father present) in school, out of gangs and proud of their education. A secondary goal is to keep retirees involved in their communities and, as a result of this volunteer activity, out of the job market, thus freeing up employment opportunities for younger citizens. | C.W.Ress&Associates | 15 | 0 to 30 days | \$50,000 |
| Franklin | Alum Creek Drive at Rohr Road | Although largely a volunteer program, organizational development, web development and ongoing operating staffs will be required. Alum Creek Drive 400 southbound lanes. Right-of-way to provide dual, westbound to northbound left turn lanes. Add a crossing traffic signal as required. Small right-of-way impacts to two parcels. Environmental clearance would be relatively simple. The project addresses traffic snafus for the new executive facility on Brook Road. | Franklin County Engineer | 18 | 91 to 180 days | \$800,000 |
| Franklin | Kessler Street Reconstruction | Urban street renewal project that involves complete reconstruction of approximately 1250 linear feet of street, gutter and storm sewerage, lighting and sidewalks. Existing street pavement is failing, there is no storm collection system and no curbs, gutters or street lighting in place. Expected outcome of project is improved public safety. | Village of Groveport | 40 | 31 to 90 days | \$950,000 |
| Franklin | Implementation of Electronic Medical Records | In order to advance its ability to care for our state's most vulnerable citizens, Wexner Heritage Village would like to implement an electronic medical records system at Wexner Heritage Village, where it provides skilled nursing and rehabilitative services to aging individuals each year. The project would advance the quality of care received by vulnerable seniors by allowing nurses and aides to communicate electronically, thus eliminating administrative time and advancing the concept of "high touch care" throughout the building. Increasingly, the need for care has moved beyond even the direct health care - and would provide work to contractors through the creation of a wireless infrastructure, the implementation of training plans and sessions, and through hands-on consultation. The project would help the facility, the implementation will increase the speed of data entry, eliminate the need for vast storage to expand the capacity of the medical services program, creating more jobs and further access to critical health care services. The project will enhance the security of personal health records, and enhance the skills of our workforce. | Wexner Heritage Village | 2 | 0 to 30 days | \$300,000 |
| Franklin | Installation of "Green" lighting on WHV Campus | Wexner Heritage Village has already invested in "clean" and "green" cleaning and environmental services materials in an effort to reduce toxicity and improve quality of breathable air in the environment through which we serve the elderly. The next step in the process is to invest in the installation of "green" lighting throughout the campus. The request for economic stimulus dollars is for the cost of installation at Wexner Heritage House, and the dollars would be leveraged to locate local donors or grant-makers willing to invest the remainder so that we could make the change in the other six buildings we operate. Green lighting systems operate issues such as creating energy efficiency, preventing waste and pollution, and creating economic savings in a downturned economy. We expect the project to help us lower our electricity bills, improve the quality of lighting in the environment, decrease pollutants released to the environment, and help to increase worker productivity, all outcomes stressed by vendors and in EPA documents related to the subject. The installation itself will put contractors to work for the duration of the project, as well. | Wexner Heritage Village | 0 | 0 to 30 days | \$100,000 |
| Franklin | Expansion of Rehabilitative Services | With so many seniors staying in their own homes longer, the need for high-quality short-term rehabilitation has grown by leaps and bounds in the last few years, and will continue to grow now that the state is investing more dollars into home and community-based services that allow seniors to remain independent rather than relying so heavily on costly and unnecessary institutional care settings. WHV is requesting half of the cost to build a state-of-the-art rehabilitation center on its campus. (The request would be leveraged to add donor support). The rehabilitation center would offer far more beds than the campus offers now, but would advance the care offered by utilizing innovative therapies and offering care to those needing advanced levels of care that the organization is not currently structured to offer. This would help retain in-demand therapy, nursing, and support jobs, put construction and contracting businesses to work, and meet a growing healthcare need. | Wexner Heritage Village | 10 | 31 to 90 days | \$3,500,000 |
| Franklin | Lesleh Street Reconstruction | Urban street renewal project involving complete reconstruction of approximately 1500 linear feet of street, including curb and gutter sewerage, street lighting and sidewalks. Existing street pavement is failing, there is no storm collection system, curbs, gutters or street lighting in place. Expected outcome of project is improved public safety. | Village of Groveport | 40 | 91 to 180 days | \$1,090,000 |
| Franklin | Groveport Road Sanitary Improvement | Installation of approximately 2200 linear feet of 12-inch sanitary sewer main along a principal arterial route in an incorporated area that does not currently have access to a publicly owned sewer collection system. Adjacent affected properties are on septic systems and other on-site sewage treatment systems. CEPA has declared an environmental concern for this area and, on Aug. 13, 2008, as "Director's Final Findings and Orders" document to control property owners, including a local church and business owner, mandating the correct, as a timely manner, as a publicly owned sanitary sewer collection system. The expected project outcome will be a sewer to address CEPA concerns and enhanced economic development potential of approximately 200 acres of potential industrial/commercial land immediately adjacent to an existing industrial park near Richland/International Airport and several major highways. | Village of Groveport | 870 | 181 days or more | \$1,175,000 |
| Franklin | Mason Run Regional Storm Water Detention Basin Pro | Wetland has worked with the U.S. Army Corps of Engineers as part of a feasibility study of a Mason Run Regional Storm Water Detention Basin project that would benefit more than 400 residential and nearly 50 commercial properties within the City. Storm water inundation associated with Mason and Turkey Run within the City has been causing damage to these properties for several decades. The feasibility study has identified that a Mason Run Regional Storm Water Detention Basin that would divert runoff from the Mason Run watershed would benefit the residents/businesses within the City. The Mason Run Detention Basin would encompass 23 acres and be approx. 8 feet deep. 330,000 yards of earth would be excavated for this project. 1,200 linear feet of water lines would be relocated and the project will incorporate extensive wetland features and planting consistent with wetlands. | The City of Whitehall | 100 | 31 to 90 days | \$8,300,000 |
| Franklin | TECH CORPS | Besides the flood damage potential, there are further economic impacts as well. The project will lower the total number of properties impacted by storm food insurance. Main St and 5th Ave are vital commercial corridors that the current potential for flooding is an embarrassment to redevelopment. TECH CORPS (TC) is a nonprofit organization dedicated to ensuring all K-12 students have equal access to the technology programs, resources and skills to enrich their education and allow them to compete successfully in the global workforce. With this modest investment, TC will do the following: Move TC National headquarters from MA to Columbus, OH. Establish organizational infrastructure needed to offer and support programs in Ohio and nationwide. Complete current program offerings (five directly impacting 400+ K-12 students). Prepare for national rollout of TC programs during next school year. (estimated impact 1400 K-12 students). Develop two new programs specifically designed to support K-12 schools in rural communities. Align programs and develop public/private partnerships that enhance K-12 teaching and learning through the effective use of technology, as well as complement Governor Rickind's and President Obama's initiatives for K-12 education and 21st century workforce development. The investment is small but the return for K-12 students and Ohio and beyond is immense. More information about TECH CORPS can be found at www.techcorp.org and www.techcorpohio.org | TECH CORPS | 5 | 0 to 30 days | \$100,000 |
| Franklin | Alum Creek Drive/1-270/Groveport Road Interchange | Alum Creek Drive/270 Interchange - ODOT PID #83988 FRA-270-49-00 Alum Creek Drive/Groveport Road Interchange - ODOT PID#84502-FRA-CR 122-2-52 | Village of Obetz | 20,000 | 31 to 90 days | \$10,500,000 |
| Franklin | ETA Employment Growth Initiative | Summary Electronic Tracking and Auditing (ETA) is seeking to create between 150 and 250 new jobs in the State of Ohio within the next year. The Company provides tracking and auditing services to businesses and organizations that ship via UPS and FedEx. ETA identifies service failures that are eligible for refunds from UPS/FedEx, and then secures those refunds on behalf of its clients. The company currently serves more than 3000 accounts and is poised for growth. In our troubled economic times, businesses are seeking creative new ways to save on daily operations expenses. ETA's service has broad appeal to businesses and organizations that ship via UPS and FedEx. Given the recent demise of DHL, as well as the abundance of qualified candidates in Ohio, ETA has selected the State as a target region for its employment growth initiative. ETA will recruit, hire and train sales agents that will use Ohio as its home base. The Company will also provide marketing support for the new employees to secure their success with the organization. | Electronic Tracking and Auditing (ETA) | 250 | 0 to 30 days | \$750,000 |
| Franklin | Ohio Dominican University Science Project | Ohio Dominican will construct a new 25,000 sq ft science building and renovate its 22,000 sq ft existing science building to support project-based learning, an approach that engages students in a more meaningful way. The building will meet LEED certification standards or Gold certification if enough affordable points are identified. The existing science building will be renovated, not demolished, to conserve building materials and minimize construction waste. The new facilities also support the University's partnership with the Ohio STEM Learning Network (OSLN), focused on improving student achievement in science and mathematics in Ohio high schools. The University, in a Bankable loan project, is developing replicable methods to "teach the teachers" in the Columbus STEM high schools to use project-based learning strategies to better engage students in effectively learning science and mathematics, using "Sustainability" as the theme. Expected Outcomes: ODLN will share effective ways to "teach the teachers" about project-based learning with other high schools to increase environmental knowledge and improve science achievement across the state; high school and college students will improve science and math achievement, and increase their knowledge systems-wide study of "Wetlands" enters sanitary collection per requirements of the CEPA, who issued a Director's Findings and Orders document on 3/1/08. The DFO contains 5 main requirements: 1) Conduct a systems-wide Sewer System Evaluation Survey; 2) Document & Report Village CDMO program to CEPA; 3) Conduct & complete Sanitary Sewer Overflow reporting & records maintenance; 4) Identify & implement a Public Notification Program; 5) Prepare & implement an SSO Emergency Response Plan. The SSES shall identify hydrologic & hydraulic characteristics that contribute to SSO. Involve flow monitoring & estimate peak flows. Identify sources of infiltration/inflow into the system & estimate benefits of elimination of sources; identify improvement projects and schedules to eliminate deficiencies; identify alternative projects and schedules to minimize sources of excessive I&I into the sewer system. Outcome: Identification of capital projects that will result in a reduction of negative impacts on the environment. | Ohio Dominican University | 150 | 31 to 90 days | \$3,500,000 |
| Franklin | Groveport Systemwide Sanitary Sewer Evaluation Stu | Summary study of Village's enters sanitary collection per requirements of the CEPA, who issued a Director's Findings and Orders document on 3/1/08. The DFO contains 5 main requirements: 1) Conduct a systems-wide Sewer System Evaluation Survey; 2) Document & Report Village CDMO program to CEPA; 3) Conduct & complete Sanitary Sewer Overflow reporting & records maintenance; 4) Identify & implement a Public Notification Program; 5) Prepare & implement an SSO Emergency Response Plan. The SSES shall identify hydrologic & hydraulic characteristics that contribute to SSO. Involve flow monitoring & estimate peak flows. Identify sources of infiltration/inflow into the system & estimate benefits of elimination of sources; identify improvement projects and schedules to eliminate deficiencies; identify alternative projects and schedules to minimize sources of excessive I&I into the sewer system. Outcome: Identification of capital projects that will result in a reduction of negative impacts on the environment. | Village of Groveport | 7500 | 91 to 180 days | \$505,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-----------------------------|----------------|--------------------|---------------------------|
| Franklin | Obetz Downtown Revitalization | The project consists of widening and reconstructing 1650 feet of Groveport Road through downtown Obetz. This work will include the installation of curb and gutter, sidewalks, decorative concrete pavement, landscaping, and a closed drainage system as well as a service road. Lancaster Street, Obetz Avenue, Chillicothe Street, Irwin Avenue, and Victor Avenue will be realigned and reconstructed. Above ground utilities will be buried. The project site is located within an economically depressed, CDBG designated area of the Village. The project will create opportunities for retail and small office development while also improving pedestrian safety along Groveport Road. The majority of retail development within the Village is located in the project area. The project will create temporary construction jobs and spur the development of new facilities that will offer permanent jobs as well. | Village of Obetz | 100 | 0 to 30 days | \$5,000,000 |

| Franklin | Ohio Dominican University Science Project | Ohio Dominican University will construct a new 25,000 sq ft science building and renovate its 22,000 sq ft existing science building in order to support project-based learning, an approach that engages students in the study of science and mathematics and simulates workplace projects. The buildings will meet Project-based learning requirements for flexible classrooms, labs that allow both research and seminar style learning. Space for faculty and students to informally explore issues, and labs where group research initiatives can occur and simulations reinforce research skills. In a Batelle-funded project, the University is developing project-based learning modules based on the theme of sustainability in order to "teach the teachers" in the Ohio STEM Learning Network (OSLN) how to use Project-based learning strategies to engage their students in the study of science and math. Expected Outcomes: Students at the college and high school levels will increase their knowledge about energy sustainability. OSLN will disseminate project-based learning strategies to high schools across the state to improve science and math achievement. The University will have new and expanded LEED-certified science buildings that support project-based learning strategies to engage | Ohio Dominican University | 150 | 31 to 90 days | \$3,500,000 |
| Franklin | The Village at Latham Park | The Village at Latham Park is a new development proposed in the City of Hilliard, Ohio. The project will include the construction of 360 new independent-lot residential units (approximately 30 acres) as well as new office and retail development on approx. 17 acres. The project will include many new construction related jobs as well as permanent jobs once the project is built. This new development will include roadway improvements including a new traffic signal installation as well as a modification to an existing traffic signal and a number of utility improvements including: 2700 Linear feet of new 16" water main 2000 linear feet of new 12" sanitary sewer line 1500 linear feet of new 15" sanitary sewer line 12500 linear feet of new 18" and 20" sanitary sewer line Approx. 2000 linear feet of stream restoration of a tributary to Darby Creek Inlet Quality storm water filters that include approx. 3 acres of water storage area Approx. 3100 linear feet of new roadway that will provide service to the retail and business district. This can be a pilot development that will track the amount of new jobs and retained jobs if stimulus money can be secured for this project. | MIC Holdings, LLC | 1100 | 0 to 30 days | \$7,000,000 |
| Franklin | BRT - Three Floor Build Out | The Biomedical Research Tower Build Out project would complete the build out of the 4th, 5th and 6th floors of the Biomedical Research Tower. Approximately 90,000 gross square feet of additional office space would be constructed over the next 12 months. OSLN estimates that the project would employ 110 full-time construction workers for a period of 12 months, an additional 100 full-time consultants (design/construction management) will be employed for roughly 24 months. In the long term, the project will provide space to hire 42 new faculty members and 400 new support personnel. The project includes \$24.4M for construction and \$8.6M for architectural fees, engineering and equipment. Ohio offers auto suppliers are partnering with custom creating innovative auto technology providers in the United Partnership for Advanced Automotive Architecture, an integrated approach to allow Ohio's auto industry to relate to compete in national and global markets. | The Ohio State University | 564 | 91 to 180 days | \$33,000,000 |
| Franklin | Ohio Partnership for Advanced Automotive Architect | For new fuel efficiency, automakers must trim vehicle mass up to 33%. Additional components are constantly being added to the vehicle for improved vehicle emissions. Even fuel efficient devices like hybrid batteries add up to 400 lbs to the car. Plus, increases in vehicle safety standards drive increases in the size of structural components to resist higher crash loads. E101 and 80+ automotive OEMs, suppliers, and materials producers add impact materials and manufacturing technology hurdles to new safer, fuel efficient designs. To create automotive architectures which reduce weight and meets safety rules, automakers will use more light weight materials, requiring new designs. These materials also require new techniques for forming, joining and computational engineering to produce new modules at a viable price point. | EWI | 2000 | 0 to 30 days | \$4,000,000 |
| Franklin | Cunz Hall Renovation | The newly created College of Public Health has significant and legitimate space needs. Renovation of Cunz Hall reconciles nearly all of the college's present office and work needs within this 68,000 sq ft building. It also includes reconfiguring the exterior of the building for energy efficiency and compatibility with surrounding structures, upgrading building systems for energy efficiency and ADA accessibility. This comprehensive renovation will employ a large range of construction trades as well as professional architectural and engineering consultants during the design and construction processes. Ohio Dominican University will construct a 25,000 sq ft science building and renovate its existing 22,000 sq ft science building in order to transform undergraduate science learning using project-based learning, an approach that engages students and simulates workplace projects. This approach requires flexible classrooms, labs that allow research and seminar style learning; space for faculty and students to informally explore issues, labs where group research initiatives can occur and simulations reinforce research skills. The new facilities support the University's partnership with the Ohio STEM Learning Network (OSLN) focused on improving science and mathematics education and student achievement in Ohio high schools. Ohio Dominican is funded by Batelle to develop replicable methods to "teach the teachers" in the Columbus OSLN high schools (Metro School and Linden-McKinley The 12th grade school) to use project-based learning strategies to better engage students in effectively learning science and mathematics. Expected Outcomes: Expanded and renovated science facilities will support effective ways to learn science in college. OSLN will share effective ways to teach teachers about project-based learning to improve science achievement in high schools. This project will replace or upgrade building control systems and components in order to bring all major buildings up to current design standards. The controls are for building heating and cooling/mechanical systems. The project will also add or upgrade remote monitoring and troubleshooting capabilities. This project will cover approximately 60 buildings as well as employ mechanical trades as well as professional engineer consultants during the design and construction processes. | The Ohio State University | 80 | 0 to 30 days | \$24,340,000 |
| Franklin | Ohio Dominican University Science Project | Ohio Dominican University will construct a 25,000 sq ft science building and renovate its existing 22,000 sq ft science building in order to transform undergraduate science learning using project-based learning, an approach that engages students and simulates workplace projects. This approach requires flexible classrooms, labs that allow research and seminar style learning; space for faculty and students to informally explore issues, labs where group research initiatives can occur and simulations reinforce research skills. | Franklin | Building Automation | This project will replace or upgrade building control systems and components in order to bring all major buildings up to current design standards. The controls are for building heating and cooling/mechanical systems. The project will also add or upgrade remote monitoring and troubleshooting capabilities. This project will cover approximately 60 buildings as well as employ mechanical trades as well as professional engineer consultants during the design and construction processes. | The Ohio State University | 32 | 31 to 90 days | \$10,500,000 |
| Franklin | English Language Learner Support | This project would develop bilingual educators to support the growing number of English Language learners within the Dublin School District. A long-range approach would be utilized. The first to provide an opportunity for 2 current bilingual aides to exit past roles and go to school part-time over 4 years to complete their teaching licenses and become employed as a teacher. These new aides would be hired to complete their studies. The second would recruit bilingual community members interested in becoming licensed educators and support their transition into the classroom through Ohio's alternative educator license program. | Dublin City Schools | 6 | 91 to 180 days | \$511,803 |
| Franklin | Building Metering | This project will install utility meters for unmonitored buildings to improve monitoring and energy management activities. | The Ohio State University | 3 | 31 to 90 days | \$300,000 |
| Franklin | Ohio Dominican University Science Project | Ohio Dominican University seeks to transform the undergraduate science learning environment using project-based learning, an approach that engages students and simulates workplace projects. The University will construct a 25,000 sq ft science building and renovate its existing 22,000 sq ft science building, both designed to support project-based learning, with classrooms that provide flexible seating arrangements for individual/group work, labs that allow research and seminar style learning; space for faculty and students to explore issues, where group research initiatives can occur and simulations reinforce research skills. The new science buildings support a project funded by Batelle to develop replicable methods to "teach the teachers" in the Columbus Ohio STEM Learning Network (OSLN) high schools (Metro School and Linden-McKinley The 12th grade school) how to use project-based learning strategies to better engage students in effectively learning science and mathematics. Expected Outcomes: Students will develop a deeper understanding of science and math, develop critical thinking skills, and practice workforce skills such as working in interdisciplinary teams to solve authentic problems. OSLN will share effective ways to "teach the teachers" about project-based learning to improve science achievement in high schools. This project will replace or upgrade building control systems and components in order to bring all major buildings up to current design standards. The controls are for building heating and cooling/mechanical systems. The project will also add or upgrade remote monitoring and troubleshooting capabilities. | Franklin | STEM Technology Specialists | This project would transform grade 6, 7 and 8 education at all four Dublin middle schools. STEM Technology Specialists would be hired to work with staff over 2 years to develop integrated math, science, technology and engineering lessons. Staff would undergo professional development and technology training. Educators would work with STEM specialists during the summer and school year to develop new curriculum. New technologies would be embedded into the lessons as an instructional tool. Community members in STEM fields would serve in a community mentorship capacity to guide STEM lessons in authentic applications. | Dublin City Schools | 4 | 0 to 30 days | \$514,758 |
| Franklin | Whitehall Police Station Addition & Renovation Pro | The Whitehall Division of Police is in drastic need of a new police facility. The police building that serves the citizens of Whitehall, Ohio is substandard, out of code, and has been in plan for this project since 2003 but has not been implemented due to a lack of funding. The building is 39 years old and has not undergone any significant renovations. The facility does not meet ADA guidelines for emergency or public areas. The facility is poured concrete and concrete block and is not readily adaptable to 21st century technology. Admin, staff and investigation work from areas that were originally closets and are so small that office files must be stored in hallways. There is no elevator in the building that would permit employees to access the lower level without using the stairs, there is no woman's locker room or shower facility, and the mechanical (boiler, air handler, generator, plumbing and electric) are nearly 40 years old and must be replaced. The proposed new facility is 27,507 square feet and would be LEEDS Certified. The renovation would enable the men and women of the Division of Police to more effectively serve the community. | The City of Whitehall | 150 | 0 to 30 days | \$6,750,000 |
| Franklin | Country Club Village Curb & Gutter Project | Replacing curb and gutter on ten streets in Whitehall. This project will include improving the drainage along these streets, improve the drivability of the streets and bring handicap ramps up to the latest ADA standards. | The City of Whitehall | 15 | 0 to 30 days | \$1,000,000 |
| Franklin | Analog to Digital Converter Box Outreach Program | The purpose of the following projects is to better prepare Ohioans for the DTV transition on June 12, 2009. First, the State will establish a Train the Trainer program to train representatives from various volunteer organizations on how to train others in the installation of a converter box and related equipment. The Train the Trainer program will be conducted at various geographic locations throughout the state with the assistance of the Ohio Broadcasters Association. Second, the State will establish a program to provide assistance to Ohio's more vulnerable communities in applying for a converter box coupon. Third, the State will provide assistance to Ohio's more vulnerable communities in redeeming their converter box coupons and providing them with a list of volunteers or organizations that will help with the installation. | Ohio Department of Commerce | Unknown | 0 to 30 days | \$500,000 |
| Franklin | Citywide Resurfacing Project | This project will correct the deteriorated sidewalks on nine city streets. Approximately 37,000 square yards will be resurfaced. | The City of Whitehall | 15 | 0 to 30 days | \$400,000 |
| Franklin | Citywide Curb and Gutter Project | This project will install new replacement curb and gutter on ten streets including ADA ramps. This project will improve the drainage along these streets, improve the drivability of the streets and bring handicap ramps up to the latest ADA standards. The total project includes 50,000 linear feet. | The City of Whitehall | 15 | 0 to 30 days | \$1,250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Franklin | ADS-B airport surface motion tracker | Improve airport runway safety by creating a device that increases air traffic control's awareness of surface vehicle movement. These vehicles would include baggage trucks, fuel trucks, and all other motorized vehicles, other than airplanes, that must use the runway and taxiway areas of the airport. This device would utilize ADS-B which is part of the FAA's next generation air traffic control system. | Pinpoint Dynamics, LLC | 25 | 0 to 30 days | \$500,000 |
| Franklin | Company inefficiency Analysis Saves Jobs and Money | Through company inefficiency analysis companies streamline and cut-backs can be determined in categories other than personnel. As well, as companies seek to sustain and/or expand, working capital can be obtained through streamlines and cut-backs in lieu of accumulating additional debt. | Central Ohio Minority Business Association | 250 | 0 to 30 days | \$125,000 |
| Franklin | Capacity Building for Construction Contractors | Existing construction companies will be targeted to develop a level of sustainability that will prepare them to work on the upcoming infrastructure projects. The non-profit agency will work in collaboration with State and private sector financing and bonding programs/agencies. In addition, they will collaborate with an international construction company to provide training. Business management training will be provided through an existing 30 year program. The program will provide on-going business assistance and financial management. | Central Ohio Minority Business Association | 150 | 31 to 90 days | \$500,000 |
| Franklin | City-Wide Fiber Optic Phase 2, Segment 1, Commerci | Extend existing fiber optic infrastructure throughout existing commercial district. This will provide approximately 160 acres of commercially zoned land with high bandwidth data capacity. As a result, we are confident we can leverage this infrastructure to attract and retain multiple industries including information technology, finance, corporate headquarters, professional services, transportation, warehousing and manufacturing. The installation of this infrastructure will lead to the creation and retention of 2000 high-paying, foundational jobs for our community. | City of Gahanna | 2000 | 31 to 90 days | \$210,000 |
| Franklin | City-Wide Fiber Optic Phase 2, Segment 2, Morse Rd | Extend existing fiber optic infrastructure along northern existing commercial district. This will provide approximately 33 acres of commercially zoned land with high bandwidth data capacity. As a result, we are confident we can leverage this infrastructure to attract and retain primary healthcare, medical and technology jobs. The installation of this infrastructure will lead to the creation and retention of 400 high-paying, foundational jobs for our community. | City of Gahanna | 400 | 31 to 90 days | \$317,000 |
| Franklin | Purchase of five Peterbilt Hybrid-Electric Trucks | Unemployment and the rising cost of food make it difficult for Ohio families to put nutritious food on the table. As a time when requests for emergency food are 20% higher than last year, Mid-Ohio Foodbank's (MOF) critical role in the community is growing. MOF is working harder and digging deeper to expand partnerships that will increase the amount of available food to hungry Ohioans. | Mid-Ohio Foodbank | 25 | 0 to 30 days | \$750,000 |
| Franklin | REVISION TO PREVIOUSLY SUBMITTED: Gahanna West Si | MODIFIED DESCRIPTION: Provide gravity sewer to area of City of Gahanna currently on septic and aeration systems. This area has been targeted by Franklin County Board of Health as needing sanitary sewer to protect the health, safety, and welfare of the citizens in this area. | City of Gahanna | 7 | 0 to 30 days | \$200,000 |
| Franklin | REVISION TO PREVIOUSLY SUBMITTED: Gahanna West Si | MODIFIED DESCRIPTION: Provide gravity sewer to area of City of Gahanna currently on septic and aeration systems. This area has been targeted by Franklin County Board of Health as needing sanitary sewer to protect the health, safety, and welfare of citizens in this area. | City of Gahanna | 7 | 31 to 90 days | \$450,000 |
| Franklin | Big Walnut Trail | 2.5 miles of trail section to complete regional trail connecting three communities. Trails and connectivity has been a priority for citizens in past 5 years. Trails attract commuters and jobs, increase property values and increase physical activity. | City of Gahanna, Department of Parks & Recreation | 15 | 0 to 30 days | \$3,000,000 |
| Franklin | REVISION TO PREVIOUSLY SUBMITTED: Price Road Sani | MODIFIED DESCRIPTION: Provide gravity sewer to area of City of Gahanna currently on septic and aeration systems. This area has been targeted by Franklin County Board of Health as needing sanitary sewer to protect the health, safety, and welfare of citizens in this area. | City of Gahanna | 7 | 91 to 180 days | \$750,000 |
| Franklin | REVISION TO PREVIOUSLY SUBMITTED: East Johnstown | MODIFIED DESCRIPTION: Provide gravity sewer to area of City of Gahanna currently on septic and aeration systems. This area has been targeted by Franklin County Board of Health as needing sanitary sewer to protect the health, safety, and welfare of citizens in this area. | City of Gahanna | 7 | 31 to 90 days | \$425,000 |
| Franklin | Gahanna Golf Course Clubhouse | Provide ADA accessibility to the course; improve safety by separating maintenance function; provide efficient, sustainable structure. | City of Gahanna, Department of Parks & Recreation | 60 | 31 to 90 days | \$1,500,000 |
| Franklin | Equipment/Components of Phase I Renovations of new | In September 2008, construction started on Phase I Renovations of an existing warehouse that will, later this year, replace Mid-Ohio Foodbank's (MOF) current food distribution facility. The facility offers three times the space of our current location and dramatically increases our operating efficiency. The current Foodbank site lacks both efficiency and adequate square footage. District of green features within the new facility qualify us to pursue LEED Leadership in Energy and Environmental Design (LEED) certification and include water and energy efficiency, sustainable materials, green cleaning and maintenance products, and recycling standards. The certification also requires that construction materials like structural steel are produced here in the United States and that equipment is purchased through local vendors and distributors. Equipment includes: energy-efficient heaters and coolers, steel racking for food storage, emergency generator, wireless inventory management technology, natural gas-powered forklifts. | Mid-Ohio Foodbank | 150 | 0 to 30 days | \$3,725,000 |
| Franklin | REVISION TO PREVIOUSLY SUBMITTED: East Johnstown | REVISSED DESCRIPTION: Provide gravity sewer to area of City of Gahanna currently on septic and aeration systems. This area has been targeted by Franklin County Board of Health as needing sanitary sewer to protect the health, safety, and welfare of citizens in this area. | City of Gahanna | 7 | 31 to 90 days | \$300,000 |
| Franklin | Obetz Wellness Center and Emergency Shelter | The facility has a number of therapeutic and wellness enhancing elements. The 108,844 square foot facility contains an indoor, multi-use, turf athletic field for year round exercise use, multi-use hard court surfaces, an exercise facility, multi-purpose rooms which can be used for instructional purposes as well as meeting space, an exam room, and a physical therapy center. The facility can accommodate 1920 individuals and can be used as an emergency shelter. The wellness center will fill a void that exists in southeast Franklin County. Quality healthcare space is not available within the Obetz community and in the southeast area is limited. Creating a municipally owned wellness center will allow the Village to attract healthcare professionals to the area. The Village will also control the programming of the facility and will be able to offer free wellness classes to residents of the Village. | Village of Obetz | 45 | 31 to 90 days | \$11,000,000 |
| Franklin | Park Restrooms | Presently the Village has a health task force that provides outreach services to the community. This task force as well as the Village's Parks and Recreation Master Plan has identified the need for a community wellness facility. Build three restroom buildings in parks improving sanitation, health and safety and ADA accessibility. | City of Gahanna, Department of Parks & Recreation | 12 | 31 to 90 days | \$600,000 |
| Franklin | REVISION TO PREVIOUSLY SUBMITTED: City of Gahanna | MODIFIED DESCRIPTION: Alternative fuel station for Gahanna/Jefferson school system, City of Gahanna, Millin Township, Jefferson Township, and general public use. This station would offer alternative fuel options. We are currently in communication with the Solid Waste Authority of Central Ohio to consider siting at this new fuel site, compressed natural gas created from the Franklin County Landfill. | City of Gahanna | 60 | 0 to 30 days | \$1,000,000 |
| Franklin | Hannah Maintenance Satellite Structure | Provide maintenance depot for east side parks improving efficiency and reducing traffic and emissions. | City of Gahanna, Department of Parks & Recreation | 12 | 31 to 90 days | \$150,000 |
| Franklin | Phase II Renovations at 3960 Brookham Drive facili | In September 2008, construction started on Phase I Renovations of an existing warehouse that will, later this year, replace Mid-Ohio Foodbank's (MOF) current food distribution facility. The facility offers three times the space of our current location and dramatically increases our operating efficiency. The current Foodbank site lacks both efficiency and adequate square footage. District of green features within the new facility qualify us to pursue LEED Leadership in Energy and Environmental Design (LEED) certification and include water and energy efficiency, sustainable materials, green cleaning and maintenance products, and recycling standards. The certification also requires that construction materials like structural steel are produced here in the United States and that equipment is purchased through local vendors and distributors. | Mid-Ohio Foodbank | 100 | 0 to 30 days | \$525,000 |
| Franklin | expanding spa salon | With additional funding, our current construction plans could be revised to include Phase II. Continuing construction keeps Rusdell, the General Contractors, as well as the twenty-one other sub-contracting firms, on-site and working. I made application once and put an extra zip on the amount so I am readmitting my request. I want to expand my current salon to include a spa with a direction to health awareness for the body, including pressure points for health awareness and body upkeep. Also to include services for those with handicaps and disease, including a program for breast cancer survivors for hair care during and after chemo, including a wig and headscarf during the illness. I actually a sis for better health with hair care. Its been a dream of mine, hopefully with the stimulus I can do this. thank you. | shortcutsby Sandy | 8 | 181 days or more | \$80,000 |
| Franklin | ODMRDD Developmental Center Sidewalk Renovation | Replace COMRDD Developmental Center sidewalks and curbs. | Ohio Department of MRDD | 42 | 91 to 180 days | \$227,000 |
| Franklin | REVISION TO PREVIOUSLY SUBMITTED: Multi-Jurisdic | REVISSED DESCRIPTION: New LEED Certified facility for multi-jurisdictional police/fire training. This state-of-the-art range and law enforcement training facility would include partnering with local universities and trade schools. It would create jobs in the construction industry, further education, and public service. It would also create revenues in the form of housing training and retail to organizations such as the Ohio National Guard and other reserve components. Combine that with meeting space for the public to service in an outreach capacity. This facility would fill a serious need for a first-responder training facility, which is void in Central Ohio. | City of Gahanna | 105 | 91 to 180 days | \$12,000,000 |
| Franklin | Central Ohio Hospitals' Health Information Network | PROJECT DESCRIPTION: To establish a networked, electronic health info system among 28 hospitals in Central Ohio (15+ counties). EXPECTED OUTCOME: (1) Emergency departments (EDs) rapidly access patient medical info across hospital systems. (2) This sharing of info promotes continuity of patient care for patients who self-present to or are taken by EMS to EDs different than the hospital they presented to previously. (3) Cases where the patient cannot provide a medical history, a history in the system aids treatment at the current ED. (3) The system promotes cost-savings & reduces inefficient redundancies in medical procedures. For example, a patient who presents to Hospital A yesterday & receives an X-ray lab test, & then who presents to Hospital B today, may not need to have that test repeated if Hospital B had access to Hospital A's medical info. (4) The system helps identify patients with conditions for referral to community mental health agencies, i.e. "drug seeker" who present to multiple EDs perpetually seeking narcotics. (5) The system assists in patient discharge planning by providing medical info to hospital-affiliated clinics, rehab services, & physician practices. | Central Ohio Trauma System | 57 | 31 to 90 days | \$5,000,000 |
| Franklin | Hanstein Addition Watermain improvements, Phases I | Installation of new water distribution system within a residential neighborhood (approximately 2,275 lineal feet), replacing aged and deteriorated undersized 4 & 6 inch water mains with new, larger, 8-inch mains. Expected outcome will be a more reliable water delivery for domestic and fire use, due to larger water mains with less incident of watermain breakage. Pressures will be more consistent and flows will be better maintained, improving public safety. | Village of Groveport | 50 | 91 to 180 days | \$530,000 |
| Franklin | Elm Street, Center Street and West Street Watermai | Installation of new water distribution system within a residential neighborhood (approximately 3,200 lineal feet), replacing aged and deteriorated undersized 4 & 6 inch water mains with new, larger, 8-inch mains. Expected outcome will be a more reliable water delivery for domestic and fire use, due to larger water mains with less incident of watermain breakage. Pressures will be more consistent and flows will be better maintained, improving public safety. | Village of Groveport | 50 | 181 days or more | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | Laser Paint Stripping (LPS) for Infrastructure Rep | Must (or should) be transported to an approved disposal site. To avoid creating new waste streams during metal cleaning the Air Force, Navy, NASA, and others have investigated laser paint stripping (LPS). Studies showed LPS effectively removing all types of paint without producing additional waste or damaging metal surfaces, but implementation was prevented by the complexity and cost of lasers. That situation has changed through a new laser is small, powerful, efficient, portable, and continually decreasing in price. The idea is right to re-evaluate LPS as an environmental and economic solution for paint removal. This includes engineering to design and optimize the laser system, and test and analyze against current paint removal practices and costs. EWI has recently deployed fiber lasers for concrete drilling and pipe welding. EWI has a laser and has used it for other paint stripping applications. This capability, background, and expertise will assure a successful LPS demonstration for bridge repair. | EWI | 150 | 31 to 90 days | \$2,000,000 |
| Franklin | Central Hamilton Multi-family | Construction of 180 affordable housing multi-family residential units with renewable energy application for electricity and/or heat (possibly solar thermal or geothermal). The site would include public park space, bike/walking paths and include improvements to the Gahanna storm water drainage system. The request is for grant and loan money to finance construction of the housing units and purchase of renewable energy equipment applications. About 50 jobs would be retained through the Stonehenge Company. The remaining job creation would be temporary, and include construction for a period of approximately 18 months. | The Stonehenge Company | 350 | 91 to 180 days | \$5,000,000 |
| Franklin | Gahanna Jefferson School Project | Construction of Gahanna Jefferson school annex to include mixed-use (retail and office) as well as a "green" business incubator. The building will use renewable energy applications such as electricity and heat. The business incubator would involve a collaboration with the Gahanna Jefferson Schools, the City of Gahanna, and other regional partners. The incubator would focus on alternative energy start-ups and provide internships and training opportunities for students. About 50 jobs would be retained through the Stonehenge Company. The remaining job creation would be temporary, and include construction for a period of approximately 18 months. The request is for grant and loan money to finance construction of the housing units and purchase of renewable energy equipment applications. About 50 jobs would be retained through the Stonehenge Company. The remaining job creation would be temporary, and include construction for a period of approximately 18 months. | The Stonehenge Company | 350 | 31 to 90 days | \$10,000,000 |
| Franklin | Westland Town Center Redevelopment--Revised Propos | This project will help revitalize Columbus's western gateway through the redevelopment of the former Delphi and Westland Mall sites. The project includes demolition of existing structures, storm water management, various infrastructure and streetscape improvements, and AVE planning and design. | Franklin County Board of Commissioners | 600 | 91 to 180 days | \$30,000,000 |
| Franklin | Government Center Energy Conservation Measures--Re | Perform energy efficient upgrades and retrofit to the County's downtown building campus, resulting in savings equivalent over \$2.4 Million per year over a twenty-year period. Specific measures include: a) Upgrade Lighting and Lighting Controls, b) Perform Water Conservation Upgrades, c) Install Building Envelope Improvements, d) Install Photovoltaic Solar Generating System, e) Connect & Control/Controlized Chilled Water Piping Loop, f) Upgrade Mechanical Equipment Control Systems, g) Installation of "Green" Roofing Improvements. These improvements will yield Green House Gas Reductions of 4,845 metric tons along with energy savings of \$48 Million over a twenty-year period. | Franklin County Board of Commissioners | 540 | 31 to 90 days | \$27,000,000 |
| Franklin | Gahanna Jefferson School Project | Construction of Gahanna Jefferson school annex to include mixed-use (retail and office) as well as a "green" business incubator. The building will use renewable energy applications such as electricity and heat. The business incubator would involve a collaboration with the Gahanna Jefferson Schools, the City of Gahanna, and other regional partners. The incubator would focus on alternative energy start-ups and provide internships and training opportunities for students. About 50 jobs would be retained through the Stonehenge Company. The remaining job creation would be temporary, and include construction for a period of approximately 18 months. The request is for grant and loan money to finance construction of the housing units and purchase of renewable energy equipment applications. About 50 jobs would be retained through the Stonehenge Company. The remaining job creation would be temporary, and include construction for a period of approximately 18 months. | The Stonehenge Company | 350 | 31 to 90 days | \$10,000,000 |
| Franklin | HVAC Installation | Installation of HVAC system in Medical Products distribution center to enhance work place conditions and improve energy efficiency. | Cardinal Health | 4 | 91 to 180 days | \$893,511 |
| Franklin | Water System Improvements to provide connective to | Water system improvements involving the adjacent public water supply system. The project would include the construction of an 8" Water-Cast Iron pipe and availability of funding, will decommission an aging water production facility and make certain capital improvements to receive water supply for approximately 1200 residential customers under a new contractual arrangement, from the existing supply operated by a CEPA certified community. The expected cost will be a new water customer that provides water to the community at a reasonable cost for community residents. | Village of Groveport | 500 | 181 days or more | \$1,000,000 |
| Franklin | Central Hamilton Affordabe Multi-family Housing | Construction of 180 affordable housing multi-family residential units with renewable energy application for electricity and/or heat (possibly solar thermal or geothermal). The site would include public park space, bike/walking paths and include improvements to the Gahanna storm water drainage system. The request is for grant and loan money to finance construction of the housing units and purchase of renewable energy equipment applications. About 50 jobs would be retained through the Stonehenge Company. The remaining job creation would be temporary, and include construction for a period of approximately 18 months. | The Stonehenge Company | 350 | 31 to 90 days | \$12,000,000 |
| Franklin | Utilizing Innovative Healthcare Technology to Help | New technology is emerging that will allow seniors to remain as independent as possible for as long as possible. Imagine a world in which a sensor is placed on a pill bottle, a bed, or a refrigerator door, sending a signal to a monitoring station so that concerned family members know if an elderly person has skipped a meal, if a medicine release is not out of bed, or if an important medication was forgotten. This technology does exist, and is among the most innovative health care. Seniors want to remain in their own home environments for as long as possible, and these solutions can allow them to do that. In fact, we have a use for such technology right now in our two subsidized senior apartment buildings. Our goal is to utilize technology to help these seniors remain independent in their apartments longer, thus reducing the need to access institutional care in the nursing home. This reduces the burden on an already-taxed Medicaid system, while also investing in solutions that allow seniors access to home-based services, a goal that is being implemented by the state as we speak. The stimulus request would be leveraged for other community support. | Wexner Heritage Village | 2 | 31 to 90 days | \$100,000 |
| Franklin | CAH Generator Upgrade | Repair and upgrade the generator for the Findlay pharmaceutical distribution center. Having functional generators is necessary to establish an uninterrupted power supply for the pharmaceutical distribution center since a stores life-saving pharmaceuticals which many require special handling such as refrigerated and such drugs would spoil. In addition, power supply is necessary at all times since such medications are delivered in a timely manner to pharmacies and hospitals. | Cardinal Health | 4 | 91 to 180 days | \$75,000 |
| Franklin | ODOT PID: 79031, FRA-Scioto Hilltop Connector | This \$5.5M project builds a bikedrop bridge and bikeway connectivity to the Hilltop community of Columbus' west side. Project starts @ McKinley Ave., crosses the Scioto River, and connects to the existing Scioto Trail. Plan Status: Plans complete, submitted to ODOT. Scheduled to sell by ODOT in April/09. Project was developed under ODOT major FDP process. All right-of-way is state property. Project opens access to thousands of west side residents to the regional trail and bikeway network. | columbus recreation and parks department | 29 | 31 to 90 days | \$420,000 |
| Franklin | CAH Cool Room | Building a brand new "cool" room that will store pharmaceuticals with very specific temperature control needs that are not met in a refrigerated section of the pharmaceutical distribution center. | Cardinal Health | 4 | 31 to 90 days | \$150,000 |
| Franklin | Ohio Advanced Electric Automobile Center | Electric automobiles provide the nearest term opportunity to significantly reduce the amount of crude oil imported into the USA. Although the need is critical to immediately increase research and development of electric automobile technology, the major automobile companies simply are not currently financially able to increase or even maintain extensive in-house research on advanced electric automobiles. This proposal is a plan to establish an organization to coordinate and promote unique advanced electric automobile design with the many advances that various universities and companies in Ohio have made. This project would create a center for design and prototyping and would include following Green State University the advance oil-cooled AC induction motors, EBO Group (a Third Frontier Grantee working with the BGSU technology for hybrid vehicles), The University of Akron (for their advanced nickel-zinc battery technology and battery control technology), the Ohio State University Center for Automotive Research (for their electric automobile experience, they hold the world speed record), and the Ohio University (for their battery laboratory). | New Not-For-Profit | 250 | 0 to 30 days | \$25,000,000 |
| Franklin | New Albany Plain Local School School Facility Need | New grade 5-8 school facility, 102,000 sq. ft. to house 800 students at a cost of approx. \$25,000,000. Expansion of the grade K-1 school facility, 30,000 sq. ft. to house 200 students at a cost of approx. \$10,000,000. | New Albany-Plain Local School District | 175 | 31 to 90 days | \$50,000,000 |
| Franklin | ODMRDD Developmental Center Floor Replacement | New middle/high school school building, 60,000 sq. ft. to house up to 15 middle and high school classrooms at a cost of approx. \$15,000,000. Replace worn flooring at two ODMRDD Developmental Centers. | Ohio Department of MRDD | 26 | 91 to 180 days | \$500,000 |
| Franklin | Tech Center East | Extending Tech Center Drive east, connecting Science Blvd and Taylor Station Road, would provide the essential infrastructure needed to make 100 acres of land accessible and ready for smart office commercial development. The City of Gahanna has already contributed significant capital investment to improve this area by re-surfacing boulevard and constructing natural habitat. Through the extension of Tech Center East, the roadway will help bring to market several ready to build sites that provide significant job creation opportunities within the multi-jurisdictional Port Columbus Area Development Partnership Zone. | City of Gahanna | 819 | 91 to 180 days | \$1,782,000 |
| Franklin | CAH Foam Suppression | Enhancing the fire safety and quality of medical products of the Oetzi medical product distribution center which housed certain chemicals. Should a chemical fire start current water sprinkler system may not suppress a chemical fire but foam sprinkler system would be better suited to any extinguish such fire. | Cardinal Health | 4 | 31 to 90 days | \$225,938 |
| Franklin | Advanced Energy Worker | This program expands an existing award winning apprenticeship program in the electrical trades to include on the job training and related college instruction in renewable energy generation, transmission and utilization. Focusing on the installation and maintenance of solar photo-voltaic and wind generated systems that are the keystones of the emerging green economy. The program of study will have a certificate from an Ohio Community College as well as NABCEP and NIAATC national certifications for completers. This program of study provides a perfect capture experience for both journey-level incumbent and new hire apprentices who are currently being hired and are currently making significant contributions to Ohio's infrastructure. This project will allow workers the green skills required to remain productive and move Ohio to the forefront of the new green economy. The program will include a comprehensive bicycle parking facility program. The purpose of the Mode Shift Program will be to organize, promote, and run - with numerous partners including the City of Columbus, Central Ohio Transit Authority, and Capital Area Council - an annual spring event to encourage employees to get out of their cars and to make bicycling, walking, and busing a part of their everyday routines for getting to work, to school, to shopping, to restaurants, to entertainment, to sporting events, and everything else. | The ElectricalTrades Center | 400 | 0 to 30 days | \$400,000 |
| Franklin | Bicycle Mode Shift | The effect of the annual spring event will be carried on throughout the year by means of a year around Commuter Challenge among institutions, businesses, as well as public and private organizations to encourage mode shift throughout the year. Goal of Ride Facilities program would consist of consulting, and selling, businesses to develop and install appropriate bicycle parking and other facilities to overcome barriers to choosing bicycling as a primary form of transportation. The Transit Authority and Capital Area Council are currently reviewing a project to build a 120 acre site accessible to highly populated commercial development to a 6-lane section. Modern roundabouts will be built at the intersection of Clark State and Johnstown/US 62 from its existing 2-lane configuration to a 6-lane section. Modern roundabouts will be built at the intersection of Clark State and the entrance to the County MRDD facility. | Central Ohio Bicycle Coalition (dba "Consider Biki | 3 | 0 to 30 days | \$500,000 |
| Franklin | Hamilton Rd. Central | Extending Tech Center Drive west, by crossing over I-275 with a new bridge and connecting to Hamilton Rd., would provide three primary opportunities: 1) Direct vehicular connection between Gahanna's industrial district and Hamilton Road within the multi-jurisdictional Port Columbus Area Development Partnership Zone and the I-270 interchange. This connection will provide 260 acres of land with greater accessibility to airport based industrial development; 2) Essential infrastructure required to make a 120 acre site accessible to highly populated commercial development; and 3) Capacity relief at the highly congested intersection on northern Hamilton Road. ODOT requires the completion of the I-270 Ramp Modifications project before this project can begin. If this requirement is waived and the projects can be constructed concurrently the site name to start would be 90 to 181 days. | City of Gahanna | 633 | 181 days or more | \$11,798,000 |
| Franklin | Tech Center West | Extending Tech Center Drive west, by crossing over I-275 with a new bridge and connecting to Hamilton Rd., would provide three primary opportunities: 1) Direct vehicular connection between Gahanna's industrial district and Hamilton Road within the multi-jurisdictional Port Columbus Area Development Partnership Zone and the I-270 interchange. |----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | Ralph Regula School of Computational Science Summe | This need will only grow as businesses seek cost-effective ways to compete. To build a pipeline of workers with critical computational skills, the Ralph Regula School of Computational Science conducts Summer Institute (SI), a two-week camp for gifted high school students. Objectives of the 20-year SI program include: • Stimulate interest in HPC through hands-on programming and visualization. • Build interpersonal/team skills through small-groups projects, teams apply scientific methods to solve complex problems, such as bird flu or research forecasts. • Develop presentation skills, and • Encourage pursuit of education/careers in computation. Industry partners engage SI students through on-site tours and mentorship regarding careers in science, engineering, computer science and technology. Industry partners who have partially sponsored the programs in the past include: IBM, SGI, and Ohio Department of Education Gifted Program | Ralph Regula School of Computational Science | 150 | 31 to 90 days | \$500,000 |
| Franklin | Ralph Regula School of Computational Science K-12 | Key Ohio industries rely on computational science to maintain profitability (http://www.msc.org/factsheet04). The Ralph Regula School of Computational Science builds a pipeline of talent for these industries through its K-12 programs that focus on science, technology, education and math (STEM) careers. Cost estimate is a total for 5 years. Summer Institute is a two-week residential program for gifted high school freshmen and sophomores. The Young Women Summer Institute helps girls in Grades 6-7 develop interests in STEM. Both programs train K-12 teachers to apply technology and project-based learning in classrooms. Expected outcomes of these programs include: Stimulate interest in STEM, Build interpersonal/team skills, Develop presentation skills, Encourage pursuit of education/careers in STEM, Extend reach into more classrooms throughout Ohio via teacher training Industry partners engage in these programs through on-site tours, speakers and mentorship. Past industry partner: Procter & Gamble, IBM, Battelle, Ohio Department of Education Gifted Program, American Electric Power, Ingram White Castle, Columbus Foundation, Women's Fund of Ohio Key Ohio industries rely on computational science to maintain profitability (http://www.msc.org/factsheet04). The Ralph Regula School of Computational Science builds a pipeline of talent for these industries through its K-12 programs that focus on science, technology, education and math (STEM) careers. Cost estimate is a total for 5 years. | Ralph Regula School of Computational Science | 300 | 31 to 90 days | \$750,000 |
| Franklin | Ralph Regula School of Computational Science K-12 | Summer Institute is a two-week residential program for gifted high school freshmen and sophomores. | Franklin | Ralph Regula School of Computational Science Young | Before they reach high school. Nine years ago, we implemented the Young Women's Summer Institute (YWIS), a week-long camp for Ohio middle school girls, to counter this trend and build future workers. Cost estimate is a total for 5 years. Outcomes include: Increased interest in science, math, and technology careers, Increased knowledge of watershed quality issues. Students learn the scientific method, biology and chemistry, computer modeling, statistics, and presentation skills. Students gather field and historic data to evaluate the quality of their study watersheds. Teacher training. Selected K-12 teachers gain expertise for similar projects in their classrooms. Past industry partners include: Procter & Gamble, Battelle, Ingram White Castle and American Electric Power. | Ralph Regula School of Computational Science | 150 | 31 to 90 days | \$500,000 |
| Franklin | Ohio Personal Public Health Record | Longitudinal studies show success: 88% took more non-required science and/or math classes. Over 91% planned to take advanced placement classes in math or science before attending college. Two-thirds intended to pursue a career in science or math. To unify all disparate data sets at ODH into a single functional, portable, scalable and interoperable data source, thereby providing secure access to the ODH information. This project responds to many components of the stimulus, especially the office of the national coordinator for health information technology beginning on page 148 line 19 continuing through page 150 line 18. Patient Advantages: Facilitates referrals for a single mapping and transmission pathway for electronic messaging from RHIO's Health Information Exchanges, facilities such as hospitals, laboratories, physician offices, vendors, etc. Interacts data exchanges. Facilitates access to ODH to contribute valuable Public Health data to health care providers in a timely fashion such as new born screening, Immunization history/information, contribute information for decision support. Provides ability to improve the overall quality of ODH data by combining and taking the "best" data available on each individual, i.e. Master Person Index. Enables new data analyses including co-morbidity. Advances ODH's compliance with HITECH. Enhances ODH data sharing to local health departments. Integration with Ohio NHV Centers. Before they reach high school. Nine years ago, we implemented the Young Women's Summer Institute (YWIS), a week-long camp for Ohio middle school girls, to counter this trend and build future workers. Cost estimate is a total for 5 years. | Ohio Dept of Health | 6 | 31 to 90 days | \$960,000 |

| Franklin | Health IT Collaborative | DOO's Lee Fisher is known for using the statement, "we are going to enable government to function at the speed of business", do that here. A Health Information initiative well-executed will also facilitate job growth. In consideration of the approx \$20 billion allocated for Health IT in the federal stimulus ARRA, this is the ideal time to roll out next gen health IT. Many of the plan's objectives are dependent on gathering dependable baseline data that currently is not centralized, digitized and limited in access due to privacy issues. In consideration of Ohio's track record with the private information of state employees and veterans, there will need to be dramatic change before state residents will trust the state with personal health data. RE plan draft: | www.jodyzurainin.com | 250 | 31 to 90 days | \$500,000 |
| Franklin | Victory From Foreclosure Gardens | Program based to benefit from foreclosed homes, turn from blight into bright. Create victory gardens specializing in herbs and other vegetables or surround land on foreclosed or struggling homes. Food grown will support food banks, restaurants and sold at local farmers markets. Sustainable and organic farming techniques will be used and educated to the employees. There will be a three prong benefit to this idea: 1) Banks will share revenue from gardens and keep people in their homes. 2) Local trade will develop bringing additional tax funding to the community 3) jobs will be created. We will not eat dead homes on foreclosed and abandoned property, we will just use the available land around the home. An additional distribution service will be created to sell food gathered in the gardens. | SGEI-Sustainable Green Energy Ideas | 100 | 0 to 30 days | \$3,000,000 |
| Franklin | New Geothermal Not-For-Profit | Geothermal energy used to air-condition and heat buildings reduces the use of electricity, as well as fossil fuels. This project is to create an organization that will hasten the adaptation of geothermal heating and cooling in both commercial and residential buildings. Through the new not-for-profit organization the goals will be achieved by: 1) working with geothermal equipment mfg's and HVAC vendors to educate sales people and technicians, 2) communication about, and promotion of, geothermal HVAC systems via media, organizations and legislators, 3) promoting the use of geothermal as part of the electric utilities alternative energy portfolio, 4) contracting with universities for R&D to improve as well as reduce risk, and installation costs of geothermal equipment, 5) providing grants for geothermal installations and 6) Ohio supply chain assistance for geothermal manufacturers. Specific areas that offer suitable locations to install geothermal energy will be pursued as soon as this project starts. Collaborators in this project will include universities, geothermal equipment mfg's, EMTEC, utilities, HVAC vendors and trade associations. | New Not-For-Profit TBA | 200 | 0 to 30 days | \$20,000,000 |
| Franklin | Instrument for Implementing Governor Strickland's | In Governor Ted Strickland's 2006 State of the State Address, dated January 28, 2009 he detailed in his Educational Reform and Funding Plan titled "Reforming Ohio's Education for the 21st Century". In short, the Governor's plan reduces statewide property mills from 23 to 20, then "find a way to allow school districts to get revenue growth beyond the State's mandate of 20 mils". The Governor's plan shifts more responsibility for school funding from the State to local districts. Thus, within a short timeframe school districts have to establish an effective system of funding that accounts for local resources. | Alumni Connection.com | 25 | 0 to 30 days | \$1,375,000 |
| Franklin | Stabilizing Neighborhood via Ongoing Support Venue | There are 700 school districts in the State of Ohio, all of which will benefit from our advanced technology that facilitates instantaneous communications which unite alumni, community, students, faculty, administration, non-profit organizations, student groups, athletic & arts programs, and all other schools associations. This interactive forum provides the solution for schools to build an ongoing support venue that connects, builds, and strengthens relationships within their community. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|------------------|--------------------|---------------------------|
| Franklin | Back to Work at Identity Group | I believe more than anything else, our country needs to create jobs. Identity Group would like to put 8 people to work as commissioned salespeople. Historically, our industry grows in times of financial stress. We firm has the opportunity but no means to financially help new hires get started. It takes 4-6 months to get a book of business going...we're asking for Stimulus money to put 8 individuals who need jobs back to work. Within that timeframe, Identity Group will train, motivate, supervise and enjoy watching them succeed. The Stimulus money will function exactly as our Government expected - our 8 hires will receive an income of roughly \$17,500 over a six-month timeframe. Our business will benefit from the added salesforce efforts and, at the end of six months, our team will be trained, will have added taxable sales to the economy, and will be able to stand on their own beyond Stimulus. Ohio wins, our community wins, its formerly out-of-work people win, and my firm will grow. | IDENTITY GROUP, LLC | 8 | 0 to 30 days | \$144,000 |
| Franklin | Smart Grid and Solar Power for Public Power Utiliti | Install smart grid energy management appliances and solar panels at 20 end-user locations in Westerville, Ohio. A pilot project is currently underway for seven end-user locations. The purpose of the project is to optimize solar generation by storing the energy and utilizing it during the period of the day when power supply costs are the highest. The customer and the utility can remedy customer complaints at the end-user location via a web portal. Significant savings will be realized by the utility through peak shifting and load reduction, translating into savings to the consumer through lower retail electric rates. | City of Westerville | 25 | 0 to 30 days | \$1,000,000 |
| Franklin | Energy Education for Westerville Schools | Provide energy education in the Westerville School District for three years. The program would provide valuable energy and environment related educational curricula to K-12 students that is consistent to Ohio Academic Standards. The program would include, but not be limited to, professional development for educators, in-home energy efficiency kits, and community and school energy fairs and activities. This program will exceed programming currently funded by the City of Westerville Electric Division. | City of Westerville | 2 | 0 to 30 days | \$100,000 |
| Franklin | restaurant and catring | My wife and I are looking to open a restaurant. We plan to open in the inner city section of Columbus, Ohio. This would be a big help for several low income families including my wife and I who both unfortunately were part of the many who lost our job due to the company we both worked for closing down. We have extensive and are both very hardworking individuals that will make a great addition to the inner city business community. We will be able to live and earn money under employed back and bolster the neighborhood. We foresee a start of between 30 and 45 full and partime positions. I really believe it is time for us to look outside the box for real players who can make a difference to get our economy back on track. The vision required for growth lies right before your eyes in people like me. Help us to make a positive difference. | tlc grill and catering | 35 | 31 to 90 days | \$100,000 |
| Franklin | West Main Street over Alum Creek | Replace existing deteriorated structure with a completely new structure. Add wide sidewalks both sides. | Franklin County Engineer | 48 | 181 days or more | \$5,200,000 |
| Franklin | Alkire Road under Railroad | PD 76255 - Replace the low, narrow railroad structure over Alkire Road just west of Harbort Pkwy with a completely new structure. Widen Alkire Road to a 2-lane section between Crestlake Drive and Harbort Pkwy. | Franklin County Engineer | 108 | 181 days or more | \$6,400,000 |
| Franklin | Chatterton Road - Fleet to Dunloe | Add a center turn lane on Chatterton Road between Fleet and Dunloe. | Franklin County Engineer | 9 | 91 to 180 days | \$400,000 |
| Franklin | Help through jobs, trees, and food | Raise money for central Ohio Food Banks, by going door to door, and offering to provide a 112 to 2 foot tall Colorado Blue Spruce planting gift for a contribution of \$ 30 per tree. There would be an initial goal of 10 weeks of 10 people, 2 volunteers a 1 hour to plant the trees. There would be a 20% commission for food banks efforts to be split equally. This is primarily a mid April to mid November period for planting trees for students or new graduates, with most work being done in late afternoon and evening except on weekends. 60% of the trees will be planted in a residential backyards to various organizations for food or food and shelter to needy people in central Ohio. The remainder of funds go to FoodFairs and Linking courses. About 5% of each gift will be used to replace inventory and cover shipping costs. The remainder of funds raised will be used to administer the program, covering the remaining expense of database creation. This request would be a start although a low interest loan would be considered. It is my goal to plant 20,000 trees per year, raising \$ 300,000.00 for food banks and volunteers creating \$ 120,000 income for the banks. Thank you. | Save A Smile Foundation | 45 | 0 to 30 days | \$10,000 |
| Franklin | Clime Road - Georgeville to Demorest | PD 75498 - Widen Clime Road between Georgeville Road and Demorest Road from a 2-lane section to a 4-lane section, add bicycle lanes, sidewalks and street lights. | Franklin County Engineer | 90 | 181 days or more | \$8,000,000 |
| Franklin | White Road at McDowell | Add center left turn lane on White Road at McDowell. Install a new traffic signal. Install street lights. | Franklin County Engineer | 18 | 91 to 180 days | \$800,000 |
| Franklin | Travonna Coffee House | The Travonna Coffee House (Coffee House) is seeking \$115,000 for the launch and operation of a one-of-a-kind coffee house in Columbus, Ohio. The Coffee House will be located in an area district of the Short North area on North High Street in Columbus, Ohio. The Coffee House has ample space for parking on the street as well as close by public parking lots. Located at the intersection of two centrally located streets (4th and High), the Coffee House will operate in a vibrant and colorful area with a sizable and stable base of potential customers. The Coffee House is ideally positioned to become a valuable resource in a community with a strong demand for the urban sophistication and quality products and jobs (5 to start) that the Coffee House will bring to the area. The company's founder has developed a phased business expansion plan that includes the future addition of roasting its own coffee beans and starting a coffee profit generated exclusively through the initial location one projection to be \$100,400 within the first 12 months. As the business grows, the management plans to reinvest profits to fund the expansion of the Coffee House. PD 82032 - Replace the deteriorated structure carrying Dodge Road over the Oentangy River with a completely new structure. Add wide sidewalks to both sides of the bridge. | Travonna Coffee Corp. | 5 | 31 to 90 days | \$115,000 |
| Franklin | Dodridge Road over the Oentangy River | Franklin County Engineer | 72 | 181 days or more | \$5,200,000 | |
| Franklin | Reynoldsburg-New Albany Road at Morse Road | Franklin County Engineer | 27 | 181 days or more | \$2,000,000 | |
| Franklin | Scioto Darby Creek over Railroad | Franklin County Engineer | 18 | 31 to 90 days | \$800,000 | |
| Franklin | Conservation Jobs for Ohio | Creation of a seasonal workforce similar in concept to the Civilian Conservation Corps that focuses on job training through completion of projects in public lands operated by the Ohio Department of Natural Resources. Projects such as habitat restoration, recreational trail improvement and facility renovation are among the potential focus. Funds would be provided for employee wages, cost of supervision, training, transportation and equipment and supplies needed to complete projects. | ODNR-Parks & Recreation | 300 | 31 to 90 days | \$6,254,024 |
| Franklin | Grove City Bike Trail | This project will provide bike path connectivity between the businesses and residences within Grove City's Historic Town Center through the construction of nearly 11,000 linear feet of paved multi-use trail. | City of Grove City | 30 | 91 to 180 days | \$750,000 |
| Franklin | Domestic Violence/Batterer's Intervention | In Ohio, domestic violence offenders recidivate at a rate of 42.3% (2004), which is higher than adult offenders in general at 38.2% (2005) and even less offenders who return to prison at a rate of 39.3% (2005). It is critical that effective programming be available for domestic violence offenders for the safety of their families, our communities and ultimately help reduce these offenders to return to prison, costing society more. We are proposing to strengthen our current batterer program to enhance our capacity to meet the high demand of those offenders who will otherwise not receive any programming related to their offense behavior while in prison. By more effectively assessing offenders and identifying their specific needs and providing support to community partners, Ohio will have the seamless continuum of care that research indicates is the most effective manner to intervene with domestic violence offenders and enhance the safety of victims. | Ohio Department of Rehabilitation and Correction | 17 | 0 to 30 days | \$1,100,000 |
| Franklin | Enforcement Unit | Expand Central Office Enforcement Unit to increase assistance to local law enforcement in searches, seizures, and other criminal activity involving DRG employees, and/or supervised inmates, and security threat group gang members. | Ohio Department of Rehabilitation and Correction | 7 | 31 to 90 days | \$600,000 |
| Franklin | Ohio investor Power Purchase Agreement | The proposal is for an organization that can help finance renewable energy projects with investor money from within Ohio. The dramatic growth in the solar industry in California and New Jersey has been driven to a large extent by Power Purchase Agreements (PPAs). These allow organizations to receive the benefits of solar power without any upfront costs. An opportunity exists to create a PPA fund in Ohio with Ohio investors. The initial fund would be targeted at solar hot water and solar heating projects. This is best for two reasons, the ROI is much better and the overall capital costs are lower. Solar generates substantially more clean energy at a lower cost structure and this opportunity allows investor to participate. This fund would be open to any contractor who brings a project that meets the return on investment required by the fund and the investors. The benefit of having an Ohio fund is to build broader the knowledge and investment in renewable energy into other sectors. The investors will have a reason to promote renewable energy throughout the business community and the businesses will be able to engage in renewable energy projects without the capital expense. | Tippling Point Renewable Energy | 40 | 31 to 90 days | \$100,000 |
| Franklin | Hull Solar Columbus | The project is to construct a 1 MW solar project, which will be directly connected to the utility's distribution system and energy will be sold to the utility. The project will use Ohio labor for construction and all ongoing maintenance, accounting, and billing jobs will also be Ohio based. The Ohio based ownership ensures that all future business income tax, employment taxes, etc., will remain in Ohio for the life of the project which will exceed 30 years. This will be the largest solar project to date in the State of Ohio. The site has been identified, the systems have been designed, and the supplier is lined up. The interconnection with the utility distribution level and comply with interconnection with O.U.C. 4901.1-22-02, and therefore, will not require PAM approval, thus expediting the project. Funding is critical to ensure that the energy produced can be competitively priced and allow an encouraged full cooperation by Ohio's investor owned utilities to engage in discussions to purchase the REC's, as part of their obligation under Ohio Senate Bill 221. | Hull & Associates, Inc. | 50 | 31 to 90 days | \$10,000,000 |
| Franklin | Windsor Park-Town Center Bike Path | Through the construction of 3,600 linear feet of bike path, this project will provide bicycle and pedestrian access from the West Grove Subdivision to the Town Center. | City of Grove City | 30 | 91 to 180 days | \$570,000 |
| Franklin | Enforcement Unit | Provide funding for continuation of the Department's Enforcement Unit, which combines institution and parole investigative resources to combat illegal drug and security threat group/gang activity within the Ohio Department of Rehabilitation and Correction. | Ohio Department of Rehabilitation and Correction | 15 | 91 to 180 days | \$1,400,000 |
| Franklin | Apprenticeship Program | Funds would be used to expand the current number of 60 apprentices being served under the grant. These apprentices receive a year of apprenticeship with incarceration, mentoring in the last six months of incarceration and for nine months post release by outside community organizations who would determine and also provide for the specific living needs of the inmates upon release. The program and all activities would be evaluated by the community organizations so that an appropriate apprenticeship can be found for the offender to complete in the community and thus become a contributing member of society. This money will train additional people to meet additional needs. | Ohio Department of Rehabilitation and Correction | 0 | 0 to 30 days | \$530,000 |
| Franklin | Community Corrections Project Evaluation | Point ongoing evaluation of DRG funded community correction programs and Adult Parole Authority supervision activities to ensure recidivism is being reduced and other objectives accomplished. | Ohio Department of Rehabilitation and Correction | 3 | 31 to 90 days | \$500,000 |
| Franklin | Videoconferencing Healthcare Network | To enhance professional development and manage a qualified workforce, we propose creation of a videoconferencing network (equipment, installation, maintenance, and support) among Ohio's 54 Alcohol, Drug Addition and Mental Health (ADMAMH) Boards which serve all 88 counties. With videoconferencing, the front line and supervisory staff of Ohio's prevention, treatment, and recovery services agencies and county boards will have the ability to access continuing education for enhanced professional skills and improved outcomes for consumers of services. The addition of videoconferencing would also benefit all of the ADMAMH board's partners. As the entities responsible for coordination of care in a county or grouping of counties, ADMAMH board partners include local law enforcement and courts; Family and Children First Councils; school districts; social service agencies in areas such as housing, employment, and domestic violence; and more depending on the service area. It is estimated that at minimum 5,000 jobs would be sustained annually by making these educational opportunities available at low or no cost, and thereby reducing time spent in court by consumers. | Ohio Association of County Behavioral Health Autho | 200 | 31 to 90 days | \$2,000,000 |
| Franklin | Harriet Addition, Roadway Reconstruction | The proposed improvements include the reconstruction of 3,830 total Linear Feet of roadway in the Harriet Addition, residential neighborhood. The average width of the improvements is 27' wide for the entire lengths of roadways scheduled for reconstruction. Reconstruction shall consist of base reconstruction and resurfacing of existing roadways. | Madison Township, Franklin County | 17 | 31 to 90 days | \$170,600 |
| Franklin | Equipping the Next Generation | This project would employ 100 adults between the ages of 55-75 with knowledge of knitting, crocheting, quilting, sewing, cooking or some other craft, to teach middle school aged students these particular skills. This would give the youth basic skills which seem to be coming to extinction in our society. All supplies would be supplied and compensation would be given to the instructors and the craft. No charges would be required, just basic skills which can be passed down to the younger generation. | Seniors for Service | 100 | 181 days or more | \$1,000,000 |
| Franklin | Keep One / Add One from Stimulus | In this award is granted, I will allow the Police Department to re-assign one currently employed full-time police officer and add an additional full-time police officer. | Madison Township Police Department | 2 | 31 to 90 days | \$450,000 |
| Franklin | Online School Assessment | Online Assessment Tool for Schools (Teachers, Parents, Administration, etc.) to evaluate current infrastructure related to technology, skills, career paths, etc. | Train-Ease, Inc. | 100 | 31 to 90 days | \$250,000 |
| Franklin | Apron, T/W Expansion, Drainage | In addition, an Online Assessment Tool will be available to assess student's 'style' and better prepare them for the workforce. | Port Columbus International Airport | 160 | 91 to 180 days | \$9,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Franklin | Rehab R/W, Install Signage | Rehabilitate Runway SR28, replace aerial guidance signs. | Rickenbacker International Airport | 90 | 31 to 90 days | \$5,487,000 |
| Franklin | Rickenbacker West Infrastructure Improvements | Widening, reconstructing and improving approximately 3,700 feet of Shook Rd, addition of turn lanes, installation of water line from SR 317 to Park Rd, extension of sanitary lines, intersection and signalization upgrades including addition and modification of turn lanes, signalization and other traffic controls at the following intersections: SR 317 and Shook Rd, Alum Creek and Stage Dr., Alum Creek and Rohr Rd., and Shook Rd and Stage Dr. Final costs include the relocation of electric lines and real estate acquisitions for the public work. All work is located close to Rickenbacker Airport. | The Pizzuti Companies | 8,963 | 31 to 90 days | \$9,000,000 |
| Franklin | Obetz Water Distribution System Upgrade | Loop the water distribution system from Williams Road to Klineville Drive in order to provide higher pressure, more volume, eliminate dead ends, and decrease the number of customers without water service during a main break. The project also includes the relocation of a meter pit on Redmill Road, adjacent to land owned by the Hamilton Local School District, and the expansion of water to a sanitary lift station in order to improve the maintenance of the facility. | Village of Obetz | 18 | 0 to 30 days | \$345,000 |
| Franklin | Brice Rd. Streetscape and Reconstruction | This project will reconstruct the pavement, sidewalks, and stormwater on Brice Rd. from US 40 to Livingston Ave. It will also install underground parking lots for utility wires and landscape improvements throughout the corridor to provide an attractive and neighborhood-ready street development. | CITY OF REYNOLDSBURG | 300 | 181 days or more | \$6,000,000 |
| Franklin | Primrose School of Polaris | In the fall of 2007 we began the process to expand our organization to a second location. A market was identified in the Polaris area of Westerville, OH. The new facility would create approx. 35 jobs and provide resources for 183 children. A lending package is provided by the franchise company, Primrose School Franchising. The total cost of the project has been estimated at approx. \$3.2 million to purchase land, build the facility, and provide for start-up and franchise fees. The proceeds of this request would be used to provide for the required cash injection into a SBA-guaranteed loan similar to that utilized to establish the current organization. The requested funds would enable us to move forward with the project, creating additional jobs and providing much needed quality childcare in the area. We appreciate your consideration. | Caldwell Bank Group dba Primrose School of Dublin | 35 | 181 days or more | \$350,000 |
| Franklin | Internet Crimes Against Children Computer Investig | Computer and Forensic examinations regarding crimes against children focusing on offenders trafficking in pornography/images of children ages 0-13 via the internet through peer-to-peer, video games, and other internet methods. Investigations are completed in compliance and cooperation with Internet Crimes Against Children best practices. Utilization of ESOC computer program. | Upper Arlington Police Division | 1 | 0 to 30 days | \$45,000 |
| Franklin | NCT Ventures Fund | NCT Ventures promotes innovation & entrepreneurship in OH by investing in early-stage technology companies. In this process we create sustainable 21st century jobs by capitalizing on our experience & working in collaboration with Columbus Partnership, 3rd Frontier, TechColumbus Columbus Chamber & OSU Central OH further from a lack of venture investment, as compared to Cleveland & Cincinnati in '07 & '08 \$50M of capital was deployed in Central OH in early-stage companies. These companies are to grow they will need roughly \$350M of additional follow-on capital. Further experience shows that distribution of 3rd Frontier venture grants is an efficient use of stimulus dollars. \$1 of investment in early-stage programs, leverages \$46 of co-investment with a \$EM grant we can have co-investment of \$30M & create 175 new jobs. We can help fill the venture void & have a track record to prove it. Most recently investing \$5.4M & creating 65 new jobs. Our current Fund-onward deploying \$20M & creating 200 jobs, which yielded over \$400M of follow-on investment. NCT has a track record of generating superior returns of 80% IRR & 3.4x multiple of capital for its investors & will do the same for OH. | NCT Ventures, LLC | 25 | 31 to 90 days | \$5,000,000 |

| Franklin | Comprehensive Treatment of Obesity | This is a unique treatment of obesity focusing on the "why" as well as the "how" to be more fit. Best practice mental health counseling is coupled with practical nutrition and fitness breaks to assist individuals in recognizing and overcoming their personal barriers to healthy weight. Issues such as trauma, depression, social isolation and self-destructive behaviors are among those barriers that will be successfully overcome. The program will provide a therapeutic social learning environment where participants will be guided to plan and risk new behaviors while learning and practicing nutrition and fitness, building a life that does not center on food. This intense program will assist 50 individuals in achieving and sustaining a 5 point decrease in Body Mass Index in the first year. 75 people each year following year one would be assisted. | Catholic Social Services | 2 | 31 to 90 days | \$70,000 |
| Franklin | ACT Team | Create specialized ACT case management team with wrap-around services and housing for severely mentally ill offenders in Columbus. | Ohio Department of Rehabilitation and Correction | 7 | 91 to 180 days | \$750,000 |
| Franklin | Reentry Wrap-Around Services | Create Adult Parole Reentrywrap-around services to coordinate community assessments, case planning and community linkages. Ensure offender has transition aid and is well prepared 90 to 90 days prior to release. | Ohio Department of Rehabilitation and Correction | 16 | 91 to 180 days | \$1,200,000 |
| Franklin | Jail and Prison Diversion Programs | Enhance existing CCA jail and prison diversion programs with particular focus on mental health, sex offender, and substance abuse programming. Higher risk offenders would be monitored with GPS. | Ohio Department of Rehabilitation and Correction | 0 | 91 to 180 days | \$3,000,000 |
| Franklin | ADD Prison and Community Continuity of Care | Create a prison Therapeutic Community with community linkages to CATS halfway house for step-down treatment and the Cleveland Transition Center for reentry and stabilization services. | Ohio Department of Rehabilitation and Correction | 5 | 91 to 180 days | \$2,500,000 |
| Franklin | Technology | Automate the newly created universal Ohio Risk and Needs Assessment Tool and fully integrate the tool into the DRC Department Tracking Systems (DOTS). | Ohio Department of Rehabilitation and Correction | 0 | 91 to 180 days | \$700,000 |
| Franklin | Reentry Courts | Provide funding to local Common Pleas Courts to increase the number of Reentry Courts in Ohio. | Ohio Department of Rehabilitation and Correction | 0 | 91 to 180 days | \$1,000,000 |
| Franklin | MARCS Radios | This is requesting funding for the replacement of 3000 handheld MARCS radios and base equipment. Equipment was purchased in 1999 and has not been upgraded or replaced since that date. These radios will no longer be serviceable after 2011 because of their age. | Ohio Department of Rehabilitation and Correction | 0 | 0 to 30 days | \$5,000,000 |
| Franklin | Westchester Clubhouse | Energy efficient building standards utilizing all green building technology to replace temporary trailer facility at a Public Golf course in Canal Winchester, Ohio. | Davidson Phillips Inc. | 20 | 0 to 30 days | \$965,000 |
| Franklin | Health Information Automation | Records facilitating real time access to critical health information. The anticipated benefits include: reduction in lost/invested information; enhanced time management as search and retrieval routines are reduced; solid utilization in document storage and distribution areas; centralized document repository; batch scanning; increased worker efficiency; improved response to public records request; customer service impact. In each of the areas, scanned files need to be stored in a manner that they can be identified and attached to other documentation and referenced as part of their respective systems and databases. Future documentation submitted into a file queue can be drop into the system, and information received by mail or other paper-based documents can be scanned into the electronic system and attached to the records within their respective databases. | Ohio Department of Health | 18 | 31 to 90 days | \$425,000 |
| Franklin | GREEN LAWN ABBEY RENOVATION | This project is an renovation to create lawn ready, a natural meadow need reseed, maintenance, and weeder treatment to primary greens, using "green" practices. The Abbey will be renovated and re-opened to meet a growing need for funerary options for the "Baby Boomer" population. The meadow will offer crypts, columbaria, and provide much needed green space in an urban setting. This project furthers environmental priorities by lessening the need for farmland by expanding cemetaries, solar panels will be installed and power used for self-sufficiency and to sell. The project will generate jobs through the employment of craftsmen, construction companies, and architects. On going, this project will rarely require sales and marketing personnel, security, building and grounds maintenance. Stimulus dollars will be used to clean and repair the exterior granite, stone up foundation, repair ceilings, replace electrical system, make the building ADA compliant, install solar panels, remove asbestos-level furnace and create with energy efficiency heating system, project oversight and management. | GREEN LAWN ABBEY PRESERVATION ASSN | 12 | 31 to 90 days | \$349,000 |
| Franklin | Blacklick Estates Ph. 8 - Roadway Improvements | The proposed improvements include the reconstruction of 4485 total Linear Feet of roadway in the Blacklick Estates Subdivision, Phase 8. The average width of the improvements is 20' wide for the entire lengths of roadways scheduled for reconstruction. Reconstruction shall consist of base reconstruction, Accessible Ramps per the Americans with Disabilities Act requirements, associated sidewalk repairs, and associated curb and gutter repairs. This roadway is within a residential neighborhood and is showing signs of major deterioration. The existing pavement dates back to the original construction of the subdivision in the 1950's. Other than normal maintenance operations, the pavement has not undergone replacement or major repairs during the lifetime of the development, which is approximately 40 to 50 years. | Madison Township, Franklin County | 17 | 31 to 90 days | \$364,000 |
| Franklin | Marwick Addition - Roadway Reconstruction | The proposed improvements include the reconstruction of 8885 total Linear Feet of roadway in the Marwick Addition, residential neighborhood. The average width of the improvements is 16' wide for the entire lengths of roadways scheduled for reconstruction. Reconstruction shall consist of base reconstruction and resurfacing of existing roadways. These roadways are within a residential neighborhood and are showing signs of major deterioration. The existing pavement dates back to the original construction of the subdivision in the 1950's and 1960's. Other than normal maintenance operations, the pavement has not undergone replacement during the lifetime of the development, which is approximately 50 to 60 years. | Madison Township, Franklin County | 17 | 31 to 90 days | \$385,000 |
| Franklin | Rental/Transitional Property Program | Distressed & Redressed Properties' rental program will acquire, rehabilitate and provide affordable rental housing to low income residents of our community. In addition to meeting handicap accessibility needs, Distressed & Redressed Properties' transitional program will provide temporary housing to individuals being domestic violence. For FY 2009, we plan to purchase 10 single family homes to rehabilitate and rent to low income families or Section 8 participants. For FY 2010, we plan to purchase 5 multi-family units to rehabilitate and rent to low income families or Section 8 participants. In FY 2011, we plan to purchase 2 long term care facilities for emergency housing for domestic violence victims and 10 single family homes for the sole purpose of transitional housing for domestic violence victims. Each year we will assist current home owners with minor home repairs to ensure their homes are livable. | Distressed & Redressed Properties | 25 | 0 to 30 days | \$826,600 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Franklin | The Webinar Experience (WE) Project | To address the demand for high-quality professional development, the proposed technology services on Laramie Court (1) focus on projects to facilitate a professional development experience for 250 K-12 educators throughout Central and Southern Ohio focusing on technology integration techniques contained on 21st Century Skills. Details of the current WE Project may be found at www.fscso.org/pdf/WE_project. Through this stimulus grant, ITSCD would like to turn the current project to three phases: Phase 1: K-12 educators will receive professional development to bring innovative strategies into the classroom utilizing 21st century skills which enhance teaching and learning. Phase 2: Educators participating in phase 1 of the project will create a public portfolio of 21st century skills used in the classroom. This will demonstrate student use and participation in the project as well as provide valuable resource for teachers by teachers. Phase 3: A professional development plan, including materials and support, will be used by participating educators to train others in their school district. | Instructional Technology Services of Central Ohio, | 256 | 0 to 30 days | \$250,000 |
| Franklin | Home Ownership | Money to pay for home. | Home Owner | 2 | 31 to 90 days | \$17,000 |
| Franklin | Schirtzinger Road Rehab Project | Schirtzinger Road is a township road that serves as the primary entrance and exit for residents of the Ridgewood subdivision and a connector between Davidson and Dublin Roads. The roadway has been a chronic problem for many years. The pavement and shoulder need constant attention and the drainage in the area contributes to the problems. | Norwich Township | 12 | 91 to 180 days | \$650,000 |
| Franklin | Pearl Street Rehabilitation | Under the direct supervision of the Franklin County Engineer's Office, this proposed project would help alleviate the roadway and pavement problems, address stormwater management issues, and improve the safety of motorists. The file of the roadway would be extended for at least 10 years with the improvements included in this project. | City of Columbus | 45 | 91 to 180 days | \$500,000 |
| Franklin | FRA-62D-1.21 PD 17831 (Rich Street Bridge Part 1 | Permanent rehabilitation of 4 City blocks (243 S Y on 1200 center line feet) of ultra urban brick street rehabilitation. Re-construct existing brick street while preserving historic attributes of the area. | City of Columbus | 35,180 | 181 days or more | \$4,707,021 |
| Franklin | Sylvan Ave over Dry Run | To build a new bridge over the Soto River to connect Rich Street on the east to Town Street on the west. The new bridge is 588 feet long and 90 feet wide. Project also includes West Bank from Town Street to Rich Street, and Second Street from Rich Street to Mount Street. West Bank Park is 550.05 feet in length and Second Street is 734.02 feet in length, and includes a 20' waterline running the entire length. | City of Columbus | 32 | 181 days or more | \$354,000 |
| Franklin | Operation Safewalks - Smoky Row Rd.-Hard Rd. to Sm | Replacement of a deteriorated culvert. The new culvert will have a span of 32 feet, and will be 84 feet long. 1,000 LF of Sidewalks both sides. This project will provide access to 18 COFA stops and children will have safer routes to 2 schools within 1 mile. | City of Columbus | 38 | 181 days or more | \$660,000 |
| Franklin | Financial Rehabilitation and Counseling | Create non-for-profit organization to provide financial education, practical tools, and counseling to unemployed and underemployed Ohioans. Program participants would agree to on-going sessions and monitoring of their implementation of recommended actions. Efforts would be coordinated with job placement agencies, job training programs, and sociopsychological counseling services. Expected immediate outcomes: 5 full-time staff; 5 part-time staff; and interim positions that would transition to part or full-time as demand services grow. Engage established network of financial and legal professional for "one stop" work to construct pathways for participants having common issues using materials preapproved by the non-for-profit organization. Partner with local government and other established organizations to identify needs so that efforts can be coordinated and complementary. | Wellness Financial LLC | 10 | 0 to 30 days | \$750,000 |
| Franklin | Operation Safewalks - Valleyview-Hague to Wilson | Long term outcomes: Become financially stable through traditional government grants, limited fees for services, and donations from private individuals and charitable foundations. Be the model for expansion to multiple locations within Ohio. Potential to export the model nationally. 7,800 LF of Sidewalks both sides. This project will provide access to 1 COFA stop and children will have safer routes to 1 school. | City of Columbus | 38 | 181 days or more | \$500,000 |
| Franklin | New ACE Hardware Store and expansion of current bu | The project consists of construction of a 2,000 sq. ft. building that houses a new ACE Hardware Store serving Columbus East Side. The Total Project Cost includes predevelopment, construction, and franchise fees to ACE Hardware. I own necessary real estate on East Main Street. I have been working with ACE Hardware for two years in connection with this project. My business and personal credit is strong enough to obtain a business loan for the purpose of obtaining an ACE Hardware Franchise. I am requesting assistance with the construction and development costs associated with building construction. The opening for ACE Hardware will create 11 new jobs. In addition, the new building enables me to upgrade my AmeriFast HVAC business and create 5 additional jobs. Currently, I have 8 employees working for AmeriFast. I am working closely with area neighborhood groups. AmeriFast has been located on Main Street since 1989. | AmeriFast | 24 | 91 to 180 days | \$250,000 |
| Franklin | Operation Safewalks - Livingston Ave.-Bairdsford | 1,200 LF of sidewalks both sides. This project will provide access to 6 COFA stops and children will have safer routes to 2 schools. | City of Columbus | 35 | 181 days or more | \$285,000 |
| Franklin | Operation Safewalks - Southgate-Parsons to High | 1,300 LF of Sidewalks both sides. This project will provide access to 4 COFA stops and children will have safer routes to 1 school. | City of Columbus | 35 | 181 days or more | \$350,000 |
| Franklin | Fairwood Avenue Improvements | Project consists of: 0.56 miles of complete full depth road reconstruction of Fairwood Avenue from Vikings Road to Koshak Road; 1.12 miles of sidewalk; 1.1 miles of curb and gutter; About 3,200 LF vertical drainage storm sewer; 26 ADA curb ramps; 24 storm manholes; 26 signs. To purchase inventory to keep up with demand from a thriving retail business that in all opinions is a recession proof. Meaning demand is still strong even through downturns exists in other retail sectors. Your return on investment would be \$2500 per month in addition to a lot of a growing employees paying city, state and federal taxes through increased wages. Also, since this is retail, State of Ohio and localities will gain sales tax revenue. Also, after the initial stimulus dollars are spent, the new jobs created will continue through the business being a dynamic income, tax and revenue creator. The inventory will be replenished monthly through sales and the need for Federal Dollars will no longer be needed. This is a win to save or create 8 jobs. This business also is dynamic (meaning I have many stimulating offers other than just job creation and tax generating) because more from sales are drawn into Ohio from all 50 states and worldwide including, Greece, Turkey, Australia, New Zealand, Belgium etc. I can show data to prove the claim. I will also show all receipts to show all of the money will be used to purchase inventory. Some from Ohio sales. | Sunrays Creations Needlearts | 2 | 0 to 30 days | \$5,000 |
| Franklin | John Glenn Ave - Roadway Improvements | The roadway will be widened from two to three lanes. 34, 472 square feet of sidewalk with 50 compliant ADA ramps and street lighting to improve pedestrian and roadway safety. New 18 inch sewer and 50 storm manholes will improve drainage. Additional right-of-way will be purchased along roadway and at intersections from thirteen (13) parcels. The drainage work coordinates with a wider system of storm improvements in the area. The construction of the additional lane will improve traffic safety, the construction and wider sidewalk and 50 compliant ADA ramps will improve safety for pedestrians. | City of Columbus | 3,605 | 181 days or more | \$5,200,000 |
| Franklin | COIC Sanitary Sewer Extension, Phase 1 | This is the installation of 1000 linear feet of 12 inch and 3300 linear feet of 21 inch sanitary sewer pipe to provide service to a currently unserved area. | City of Dublin | 12 | 31 to 90 days | \$690,000 |
| Franklin | COIC Sanitary Sewer Extension Phase 2 | This project will install 2000 linear feet of 18 inch sanitary sewer to provide service to a currently unserved area. | City of Dublin | 12 | 31 to 90 days | \$332,000 |
| Franklin | Community Support Network for Healthy Relationship | Increase middle and high school students' skills in conflict resolution and problem solving behaviors; reduce dating violence. Create a community support network parents, peers and center staff to reinforce healthy relationship messages. As research indicates many adolescents become victims or perpetrators of violence in their early dating experiences. Once relationship violence has occurred, there is a high likelihood that it will recur again. Conditions: *10% of students report being the victim of physical violence. Activities: * Workshops, parent education and staff training Outcomes: Increased teen awareness on healthy dating relationship Decrease youth reporting being the "victim". Impact: Public awareness and develop awareness in priority communities about teen dating violence Collaborations with the neighborhood recreation centers, settlement houses, social services agencies to begin the crucial conversations of healthy dating relationships, thereby stopping the cycle of violence. | Jewish Family Services | 6 | 31 to 90 days | \$166,000 |
| Franklin | Sanitary Sewer Lining for 2010 | This project will provide a cured in place pipe for 8400 phase feet of existing 36 inch concrete sanitary trunk sewer which has deteriorated and serves approximately 65% of the City's residential area. Our program by design incorporates working with families impacted by family violence include: a) Public awareness b) Dispelling myths c) Identifying resources d) Provide prevention programs especially for youth, teens and young women e) Educator training for professional interventions on cultural and religious factors to reduce impediment f) Educating religious leaders about domestic violence Goals: 1. Increase awareness and prevention of family violence in the Jewish community 2. Increase general community awareness/collaboration of cultural issues 3. Outreach, education, advocacy, case management to the community, victims, families, families. 4. For victims, families and friends that are experiencing family violence the program provides: Safety planning, Case management, intervention, education, advocacy, linkage and referral services, interpretation and translation as needed. | City of Dublin | 15 | 181 days or more | \$850,000 |
| Franklin | Healthy Relationships Healthy Families | Distressed & Redressed Properties' rental program will acquire, rehabilitate and provide affordable rental housing to low income residents of our community. In addition to meeting handicapped accessibility needs, Distressed & Redressed Properties' transitional program will provide temporary housing to individuals facing domestic violence. For FY 2009, we plan to purchase 10 single family homes to rehabilitate and rent to low income families or Section 8 participants. For FY 2010, we plan to purchase 5 multi-family units to rehabilitate and rent to low income families or Section 8 participants. In FY 2011, we plan to purchase 2 long term care facilities for emergency housing for domestic violence victims and 10 single family homes for the sole purpose of transitional housing for domestic violence victims. Each year we will assist current home owners with minor home repairs to ensure their homes are livable. | Jewish Family Services | 2 | 0 to 30 days | \$160,000 |
| Franklin | Rental/Transitional Property Program | Distressed & Redressed Properties' rental program will acquire, rehabilitate and provide affordable rental housing to low income residents of our community. In addition to meeting handicapped accessibility needs, Distressed & Redressed Properties' transitional program will provide temporary housing to individuals facing domestic violence. For FY 2009, we plan to purchase 10 single family homes to rehabilitate and rent to low income families or Section 8 participants. For FY 2010, we plan to purchase 5 multi-family units to rehabilitate and rent to low income families or Section 8 participants. In FY 2011, we plan to purchase 2 long term care facilities for emergency housing for domestic violence victims and 10 single family homes for the sole purpose of transitional housing for domestic violence victims. Each year we will assist current home owners with minor home repairs to ensure their homes are livable. | Distressed & Redressed Properties | 25 | 181 days or more | \$1,200,000 |
| Franklin | Rental/Transitional Property Program | Distressed & Redressed Properties' rental program will acquire, rehabilitate and provide affordable rental housing to low income residents of our community. In addition to meeting handicapped accessibility needs, Distressed & Redressed Properties' transitional program will provide temporary housing to individuals facing domestic violence. For FY 2009, we plan to purchase 10 single family homes to rehabilitate and rent to low income families or Section 8 participants. For FY 2010, we plan to purchase 5 multi-family units to rehabilitate and rent to low income families or Section 8 participants. In FY 2011, we plan to purchase 2 long term care facilities for emergency housing for domestic violence victims and 10 single family homes for the sole purpose of transitional housing for domestic violence victims. Each year we will assist current home owners with minor home repairs to ensure their homes are livable. | Distressed & Redressed Properties | 25 | 91 to 180 days | \$1,120,000 |
| Franklin | Parsons/Livingston Avenue Improvement and Streets | This project will provide a roadway with signalized left turn lanes, increase sidewalk to eight (8) feet, provide medians for pedestrian refuge, street lighting for safety, signals at key intersection point, improve drainage, provide for five (5) bicycle lanes and provide green space. Over 750,000 sq ft of parking will be built at the new research facility supported by these infrastructure improvements will create 2,500 jobs over 10 years. The existing roadway is a curbed, 4 lane roadway in a mixed-use neighborhood with park access. The roadway is used by residential, pedestrian, bicycle, commercial and hospital traffic. The sidewalks are deteriorating, unsafe crossings exist for pedestrians, with no overcrossings are installed/uncontrolled, the roadway surface is deteriorating/deteriorating in critical condition. Due to growing demand for expansion & emergency care along with critical & research demands, Nationwide Children's Hospital is expanding their facilities. The existing road infrastructure is inadequate to handle the additional capacity from the growing demand for resident & emergency care along with critical & research. | City of Columbus | 328 | 181 days or more | \$25,000,000 |
| Franklin | Maryhaven--Behavioral Healthcare Expansion | In order to expand behavioral healthcare to low income and uninsured patients in Central Ohio, we request \$2,438,167 by July 1, 2009 to expand our healthcare facility at 1791 Alan Creek Drive, Columbus. These funds would rede the existing debt to Franklin County, thus allowing 1,256 additional patients to receive residential health care over an 8-year period. This is an additional 730 bed days of service per year. | Maryhaven | 8 | 0 to 30 days | \$2,439,167 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Franklin | North Eureka & Eureka Ave over Dry Run | 1,300 LF of new sidewalk, 1,000 LF of combination curb and gutter, Returbish 3 street lights including 3 new poles and 540 LF of overhead wire, Rehabilitation bridge culvert. | City of Columbus | 33 | 0 to 30 days | \$630,000 |
| Franklin | Entrepreneurial Discovery | The Association proposes to provide training to equip participants with the resources and skills to operate a home-based business. Participants will be engaged in a process that will assess their abilities to operate a small business; introduce them to industries where they can find entrepreneurial success with low startup costs; provide training and technical support to effectively and correctly set-up a home-based business. The Street Council will provide certification provided by nationally certified business analyst and educators, community area small business owners, mentorship relationships from local area corporate and government agencies. Businesses with less than 500 workers employ 54 percent of the private work force, generate 52 percent of all sales volume and are responsible for 50 percent of private production. Small businesses also provide for a majority of new jobs. Home-based businesses employ people in addition to the owner. Full-time employment, including the owner, numbers 5.6 million people. Part-time or contract income is provided for an additional 8.4 million people. During economic downturns, small business creation increases. | Central Ohio Minority Business Association | 120 | 0 to 30 days | \$75,000 |
| Franklin | Minnesota Avenue - Joyce Avenue to Parkwood | Minnesota Avenue is a residential street, 127' ft long, serving 38 homes. It has no sidewalks, no drainage facilities and has a past history of drainage problems. This project will rectify these deficiencies by reconstructing the roadway with curb & gutter, sidewalks (2454 linear feet) with ADA compliant curb ramps (23), and provide drainage facilities. This project also plants 38 new trees. | City of Columbus | 58 | 0 to 30 days | \$1,200,000 |
| Franklin | Henderson Road from SR 315 to N. High Street | The project length is just under 3,000 feet. The purpose is to replace deteriorated pavement, sidewalk, curbs, and curb ramps; to install new lighting, water main with services, and storm sewers; to replace signals at N. High Street and Observatory Blvd.; to repair the deteriorated deck of the bridge over the Chenango River and to widen the bike/walk path on the bridge. | City of Columbus | 844 | 0 to 30 days | \$5,426,269 |
| Franklin | Maryhaven Weatherization and Energy Efficiency | Maryhaven requests \$987,300 for weatherization and rehabilitation for energy efficiency of its main hospital at 1791 Alum Creek Drive, Columbus and the four houses at 150-112 New Bixby Road, Columbus that are the site of the women's residential treatment program. The funds will be utilized for modern, energy-efficient HVAC units, insulation, replacement roof, new heat pumps, HVAC control system, cooling tower, electric back up generators. The main hospital contains 90 patient beds and provides outpatient services to over 2,000 persons. The four houses of the women's program are home to 29 women in recovery from addictive illness, and their children. | Maryhaven | 0 | 0 to 30 days | \$987,300 |
| Franklin | WAD Bikeway | The WAD Bikeway will run through a low-to-moderate income area in NE Columbus, providing an alternative mode of transportation for area residents. Funding is being requested for Phase One of the project. The first phase will convert 6.3 miles of railroad right-of-way to bikeway. Right-of-way must be purchased and then cleaned and paved. Rail bed is in excellent condition and all train-crossing structures are intact. Six at-grade crossings must be engineered and built. The second phase will be the purchase of 2.7 miles of right-of-way from Norfolk Southern Railroad for connection to the future Columbus downtown Bikeway Connector. | Westerville to Arena District Bikeway Association | 10 | 91 to 180 days | \$3,000,000 |
| Franklin | High St. Downtown Brick Crosswalks | Repair 540 square yards of deteriorated crosswalks, 5 surker manholes and construct 40 compliant ADA curb ramps. Seal 13,287 linear feet of concrete sidewalks and flagpole curbs. | City of Columbus | 30,038 | 0 to 30 days | \$1,500,000 |
| Franklin | FRA-23-5-68 PID 82813 (South High Street Obetz Rd | Resurface 88,846 square yards of pavement, repair curb and gutters, and perform partial depth pavement repairs. | City of Columbus | 119 | 0 to 30 days | \$264,080 |
| Franklin | North Eureka & Eureka Ave over Dry Run | 1,300 LF of new sidewalk, 1,000 LF of combination curb and gutter, Returbish 3 street lights including 3 new poles and 540 LF of overhead wire, Rehabilitation bridge culvert. | City of Columbus | 33 | 0 to 30 days | \$630,000 |
| Franklin | SWACO Landfill Leachate Treatment Project | The SWACO Landfill Leachate Treatment project involves recycling for re-use the leachate collected from solid waste landfills. This project involves the application of a unique, innovative and newly developed technology to clean-up water from a landfill. This technology was designed to address a regional landfill leachate treatment facility. The proprietary technology, developed in Columbus, Ohio, has been designed to address a regional landfill leachate treatment facility in multiple central Ohio counties. The reason this technology is important to the State of Ohio for a number of reasons: 1 - It protects the waters of the State of Ohio from leachate and waters originating from landfills. 2 - It is a new technology which greatly reduces the state of Ohio's solid waste treatment costs. 3 - It is a new technology that provides the opportunity for the expansion of the states technological and manufacturing base. 4 - It is a technology optimized for use with renewable energy sources, especially those found at large regional landfills. | Solid Waste Authority of Central Ohio | 2 | 31 to 90 days | \$9,931,300 |
| Franklin | Women's Treatment Center Infrastructure Improve | Maryhaven requests \$126,000 to improve the infrastructure of the campus of our Women's Residential Program at 100-112 New Bixby Road. The funds would be used for: replacement of flooring in 4 buildings; painting; replacement of lockers; replacement of worn asphalt driveway; and replacement of a van. Over the course of a year, the program is home to over 100 women in recovery from addictive illnesses, and their children, eligible for Temporary Assistance for Needy Families (TANF) support. Based on prior success, 2,370 youth would benefit in one of 40 programs delivered by 33 different agencies. | Maryhaven | 0 | 0 to 30 days | \$126,000 |
| Franklin | Summer Youth Program | The Franklin County Department of Jobs and Family Services discontinued funding for this valuable program in 2008. The closing of several Columbus recreation centers intensifies the need for summer alternatives for youth. Federal stimulus funds will allow UNICO to meet a tremendous community need while retaining/generating hundreds of summer jobs. Program participation spans all 42 zip codes in Franklin County. Outcomes and activities include reading, math, science, history, computer literacy and activities that promote self-esteem, life skills, leadership abilities, conflict resolution and goal setting. | United Way of Central Ohio | 400 | 0 to 30 days | \$2,234,000 |
| Franklin | Alkire & Holt - Intersection Improvement | Youth to be served: aged 6-12 (86%), 14% aged 13-15. A small percentage youth (ages16-17) also participated. Fifty-one percent of participants will be male (1,200) and 49% are female (1,170). | City of Columbus | 41 | 0 to 30 days | \$600,000 |
| Franklin | Lockbourne Rd Improvement - from SR 104 to Grovepo | This project is designed to provide left-turn lanes in all directions to ease traffic congestion. The work will cover almost 1,600 feet along Holt Road. New traffic signal system will be provided with pedestrian access to the poles. The project length is just under 2,700 linear feet. The purpose is to widen Lockbourne from two to three lanes, including extra width for bike paths, install new curbs, new storm and sanitary drainage systems, new lighting, and new sidewalks (a minimum of one mile's worth). None of these features presently exist. | City of Columbus | 2,394 | 31 to 90 days | \$5,900,000 |
| Franklin | Livingston at Lockbourne | This project widens the intersection of Livingston at Lockbourne to provide left turn lanes to ease congestion and constructs 8 ADA compliant curb ramps. | City of Columbus | 252 | 31 to 90 days | \$600,000 |
| Franklin | Williams Road Underpass from Grovoport Road to Loc | 1,600 linear feet roadway work, widening of the existing roadway. This project will increase the vertical clearance from 13'-2" to 14'-6" on Williams Road at the railroad bridge located between Lockbourne Road and Grovoport Road and will install a new storm system and pump station to relieve flooding at this underpass. | City of Columbus | 315 | 31 to 90 days | \$1,300,000 |
| Franklin | Resurfacing | This project repairs and resurfaces 31 streets (65.0 Lane Miles) at various locations throughout the City of Columbus along the Federal Aid Route and constructs 560 ADA curb ramps along those streets. The work consists of milling the existing pavement, overlaying with new asphalt concrete, minor curb replacement, and replacing curb and sidewalks associated with existing ADA wheelchair ramps. Where warranted, the plans also call for areas of full depth pavement repair. | City of Columbus | 3,040 | 31 to 90 days | \$8,288,618 |
| Franklin | Emerald Parkway | This project will widen Emerald Parkway between Rings Road and Tuttle Parkway by adding 1 travel lane in each direction to ease congestion. This project will also construct 5986 linear feet of sidewalks on the east side of Emerald Parkway, 5986 linear feet of multi-use trail on the west side and 38 ADA compliant curb ramps. | City of Columbus | 965 | 31 to 90 days | \$2,500,000 |
| Franklin | Hilltop Connector | This project includes adding bikeway facilities in three locations in the City of Columbus for a total of 2.8 miles. 2.2 miles include new striping, pavement markings and signage. 0.7 miles will include construction of additional pavement for bike lanes and shared lanes. | City of Columbus | 28 | 91 to 180 days | \$542,000 |
| Franklin | Preparing to extract fuel from oil shale in CO, UT | Jerry Book, Director of Oil Shale Research at Colorado School of Mines finds "no show steppers." Here are the unique features that brought him to that conclusion: <ul style="list-style-type: none"> • Has a small impact on the landscape. • Has no moving parts in the extraction process. • Uses no water from the environment. • Bathes the entire process in Nitrogen - a fire suppressant. • Has no exhaust except in some configurations. • Nitrogen gas. • Leaves the ash in the ground taking only the fuels and water. • Separates the fuel fractions in the extraction process. • Represents a totally thermal driven movement starting with Liquid Nitrogen at -195oC being exposed at fuel evaporating maximum temperature and ends over so near Liquid Nitrogen temperature. | Fuel Harvest, Inc. | 75 | 0 to 30 days | \$150,000 |
| Franklin | River South Roadways Phase II | Conversion from one-way to two-way traffic along 0.64 miles of roadway, including new sidewalk, landscaping, storm sewer, water line, street lighting, traffic signal and other necessary traffic control devices. Additional widening and resurfacing of 0.11 miles including signal and traffic control improvements. This project will upgrade aging utilities, improve the roadway for vehicles, motor scooters and bicycles, and add amenities. | City of Columbus | 25,175 | 91 to 180 days | \$19,000,000 |
| Franklin | FRA-40-8-59 PID 79357 (West Broad Street Hague Av | This project is an ODOT Urban Planning Project and will resurface 1.96 miles on West Broad Street from Hague Av to Central Av. This project will also update and construct new ADA ramps along said corridor. | City of Columbus | 40 | 91 to 180 days | \$871,000 |
| Franklin | FRA-16-4-320 PID 79360 (East Broad Street, Bexley | This project is an ODOT Urban Planning Project and will resurface 1.03 miles on East Broad Street from the Bexley Corp. to the Winhall corp. This project will also update and construct new ADA ramps along said corridor. | City of Columbus | 183 | 181 days or more | \$400,000 |
| Franklin | Karl Road - from SR 161 to Schrock Road | The project length is about 5,500 feet. Replace the existing pavement and add left-turn lanes. Replace existing curbs, gutters, sidewalks, curb ramps, and curb ramps, and install new lighting where none presently exists. The project will replace and widen 11,000 linear feet of sidewalk. | City of Columbus | 420 | 181 days or more | \$3,000,000 |
| Franklin | Hudson at McGuffey | Hudson at McGuffey is a light-rail intersection which is by design a cross hazard. This project redesigns the intersection to improve safety and reduce crashes. It will construct 8 ADA curb ramps. | City of Columbus | 90 | 181 days or more | \$600,000 |
| Franklin | High Street - Flint Road to the Delaware County li | This Project will widen High Street from five to seven lanes (three lanes each direction plus center turn lane) to ease congestion, improve drainage, add 4,300 feet of sidewalk on the east side of a 300-foot-long multi-lane trail on the east side and construct 38 ADA curb ramps. North High Street - Flint Road to the Delaware County line is a major arterial roadway and point of entry into Columbus. This section is 4,300 ft long and serves over 45,000 vehicles a day. It has a history of severe congestion and lacks pedestrian facilities. | City of Columbus | 2,396 | 181 days or more | \$6,400,000 |
| Franklin | Universal Road Improvements - Fairwood Avenue to P | Universal Road is a 2,200-ft long roadway that serves more than 9 major industries in the south end of Columbus (including Crane Plastics Biting, Inc., Mahan, Aco Industries, Ezyo Mazza). This roadway is in an advanced state of deterioration and lacks pedestrian facilities. The project reconstructs Universal Road to an industrial concrete pavement and constructs sidewalks (4,400 linear feet) and curb ramps (8). | City of Columbus | 48 | 181 days or more | \$1,500,000 |
| Franklin | Worthington-Galena @ Lazelle | The purpose is to add a traffic signal, as well as left turn lanes at two of the three approaches to the intersection, and a right turning 'drop' lane at the third. About 1,500 linear feet of sidewalk will be added within the project limits - none exists at the present. | City of Columbus | 400 | 181 days or more | \$1,000,000 |
| Franklin | Deshler Avenue Sidewalks | The Deshler Avenue Sidewalks project will construct 13,156 linear feet of sidewalks and 143 curb ramps along a street that currently has no sidewalks and serves 2 schools and numerous residences. | City of Columbus | 43 | 181 days or more | \$1,000,000 |
| Franklin | North Hague Avenue-Bikeway Facility | This project will provide a north-south bikeway connection between two arterial roadways, consisting of a total 2.8 miles of new bikeways. The south section will consist of a shared signed route for a distance of 0.5 miles. The north section will consist of bike lanes with required road widening for a distance of 2.3 miles. | City of Columbus | 40 | 181 days or more | \$533,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Franklin | Riverview Drive - Olentangy River Road to West Ter | Riverview Drive is a 2.580 long residential street serving over 60 homes and apartment buildings. It has no sidewalks, no drainage facilities and has a past history of drainage problems. This project will rectify these deficiencies by reconstructing the roadway with curb & gutter, sidewalks (5-100' linear length) with ADA-compliant (12) and provide drainage facilities. | City of Columbus | 68 | 181 days or more | \$2,700,000 |
| Franklin | I-670 Streetscape Improvements | This project will provide aesthetic enhancements in the area along Park and Clockside Avenue bounded by the I-670 Cor. The proposed enhancements are contained in the final report prepared by the Spring-Sandusky Interchange (SSI) Design Task Force. The City of Columbus entered into a Memorandum of Agreement (MOA) with local historic neighborhoods for the purpose of developing and implementing a plan to mitigate the impact of the Spring-Sandusky Interchange, and of the MOA required that the concrete caps and northeast corner of Park and Clockside be addressed in a more aesthetic way. This project addresses the commitment to the neighborhood by providing historic facade features such as benches, tables and iron gates providing green landscape elements such as trees and shrubs in the area. | City of Columbus | 113 | 91 to 180 days | \$250,000 |
| Franklin | ReBranding Business Modernization | We are a Branding and Rebranding Group founded out of The Ohio State University, we are looking to be a resource to existing businesses and start ups providing them with Branding and Corporate Identity education as well as the practical side of developing a face for the company. In this economy where there is a tight strain on the business sector, it's imperative to get companies at the forefront of technology, so that other businesses are run off by new businesses with a better digital presence. Money will be used to lease initial office space, supply several Apple Computers, as well as first salaries of the individuals we will need to run the business as is starting. The goal would be to new hire a business away, to develop a system of paying clients to support our budget, while also filling our gaps in assisting companies. Practical digital development, comprised with brand education, with classes given every other week free of charge. | The Rebranding Company | 5 | 0 to 30 days | \$100,000 |
| Franklin | Voice for e3tv in any language | January 1990 Denise DuBois representing Ear Three Systems Manufacturing Company was the first presenter of a digital television system to the FCC's Search Committee for the new US Television Broadcast Standard. This was the HDTV and not the DTV which is being effort this month, February 2009, here in the USA. Because e3tv's resolution was higher by a factor of 8 than any other television display and camera product, e3tv was eliminated from the group effort. Presently the voice sound lags the image sequence so lipreading and hearing don't coordinate in HDTV or DTV programs. Also, there is no language translation sound substitutes, i.e. if you wanted to view a Chinese program and wanted to hear what was said in English, you can't. This project will develop a digital voice system for television which can sync with the image and which will offer the option of translation into major languages used around the world. In 1982 DuBois discovered a speech presentation code and patented it. The TactiEar which presents the speech on the written program words in Spanish, plain and boldface. Deaf children learned the code rapidly. NEF-BIRB Phase I grant was received. NEF continued a new restaurant concept that will employ 100 people in downtown Columbus. The concept will be a great place to play a large role in the community. Would open a second one to employ more people. The concept will have a theme of the local food and will be located in the financial district. Will also donate food to local homeless shelters. Community based, adult-supervised transitional living program. This program will provide runaway and homeless youth with a viable alternative to involvement with law enforcement, child welfare, mental health and juvenile justice systems by offering safe and secure shelter, mental and supportive services for up to 18 months. Services provided include, but are not limited to, life and interpersonal skills training, career and job skill counseling, mental health counseling and medical care. This program serves 40 homeless youth, ages 16-24, in Franklin County, Ohio each year. | e3 Enterprises Ip | 50 | 31 to 90 days | \$1,000,000 |
| Franklin | Market Watch Cafe | The primary objectives include self-sufficiency through employment and education, to obtain and retain permanent housing, and to live independently. Specifically, 80% of youth will remain in permanent housing for one year, 75% of participants will obtain a source of income or increase their current income from intake to discharge, and 85% of participants will meet 75% or more of the life skill objectives they identify in their Individualized Service Plan. | Market Watch Cafe LLC | 100 | 31 to 90 days | \$400,000 |
| Franklin | Transitional Living for Teens and Young Adults | This project upgrades current technologies to VOIP P2S mandated technologies. Now MARCS operates on 90's era technology and is nearing capacity. The original design was for 8,500 radios, ES CADS and 1,500 MCT's. Now we support 26,000 radios, 78 CADS and 2,000 MCT's. This necessary technology will be required to support beyond 2012. The new technologies are non-provisionary, more robust and support voice and data communications. Ohio gains greater performance without bandwidth expansion and allows the opportunity for multiple vendors to supply subscriber equipment thus, supporting hundreds of Ohio jobs. A recent award of \$75 million for the state purchase, allowed MARCS the opportunity to begin the statewide upgrade. This required \$65M investment allows seamless transition of the final 2 phases and saves thousands of dollars with no loss of interoperability. NOTE: This new NY state system price tag is at \$28 for infrastructure and \$700M in subscriber equipment and is incomplete. This investment is a locally wise investment that effectively leverages past grant funding. Dear Sir/Madam, I am creating a new startup consulting company to work on data conversion projects and Health IT projects to improve movement of patient data as proposed by the Obama Administration. I have 17 years experience working as a consultant in the IT field for various IT Consulting companies. Some info on my experience and my work are on my website http://www.geocities.com/SiliconValley/Peak55907/index.html . I also have a profile on linkedin at www.linkedin.com/in/vugenestecia | Huckleberry House, Inc. | 5 | 0 to 30 days | \$200,000 |
| Franklin | MARCS Infrastructure Upgrade | Please let me know if you need any additional details about my project. I would be happy to respond to any question and help the State Agencies to start work on Health IT projects. I have worked before for a State of Ohio Agencies - BWC and ODJFS for Orogen Project and SCOTT project as a consultant for Compuserve Corp. Thank you, Frans Eugene Stoica IT Consultant www.linkedin.com/in/vugenestecia | Multi-Agency Radio Communication System (MARCS) | 45 | 31 to 90 days | \$65,000,000 |
| Franklin | Data Admin and support - Consulting computer servi | Set up tracking and monitoring of all major State projects. Train all contractor leaders, managers and supervisors in Goal Achievement Process and use of behavioral science to manage project performance and project employee performance. Set up technical and behavioral indicators for each major project. Diagnose project readiness and behavioral indicators monthly and report efficiency goal attainment to each project leader. Give corrective feedback where needed. Submit high level report to State officials. Goal Achievement Process involves a discipline process of each major project identifying barriers to successful and putting actions in place to remove. The process identifies key performance behaviors and sets up a formal tracking and feedback process of success. This project consists of approximately 6,750 feet of new waterlines to replace 1940's era 2' or 4" deteriorating cast and ductile iron waterlines. The project will include new fire hydrants and water service lines to this residential area. The project is expected to yield increased water pressure for domestic use and fire protection as well as decrease the high number of water main breaks in this area. With stimulus money to saturate the Hispanic community with marketing and advertisement on why insurance is a need for their lives also to help develop a matrix for places where they can get help to learn english as a second language. | New Startup - Stoica Consulting | 10 | 0 to 30 days | \$100,000 |
| Franklin | Performance Assurance | In order for me to grow my business and become a go to figure in the eyes of the Hispanic community I am seeking a market entry in major US markets. I am seeking a Director, Education and Lifestyle Support Program, a capacity building program, will provide access to community-based diabetes prevention and detection programs and affordable diabetes education and lifestyle support programs to help low-income and uninsured citizens reduce their risk for diabetes and its complications, and learn to live well with the challenge of diabetes. We would like to retain a number of positions to help us accomplish the outcomes highlighted below: ••16,000 individuals will receive blood glucose screenings at 425 locations. ••Over 400 volunteers will be recruited. ••1,000 individuals will attend educational programs, receive case management services or receive referral services to help them better manage their diabetes. ••200 individuals will receive fitness education. ••20 health education programs will be offered. ••100 children and parents will receive education to assist with a reduction in childhood obesity through nutrition/fitness programming. We are seeking a new market to serve in new training centers or new computer systems industry. We are looking for a market in major US markets. Performance Materials (Duxin), Modcell Fiber Glass Composites (Auburn), MAI Industrial Automation (Cincinnati) and the National Composite Center (Dayton). Together, these comprise employ more than 2,000 high-wage workers in Ohio in jobs concerning high-tech composite materials applied to wind energy and other markets. On behalf of the above firms, Ashland Performance Materials submits a proposal that believes will create 200 new green jobs for the State of Ohio over 3 years and preserve another 50 current jobs at risk. The proposal aims to make Ohio a major manufacturing venue for the latest technology in self-reinforced fiber fabric composites - especially carbon fiber. These fibers are used in reinforced composites materials including blades, nacelles and towers. These blades must also be manufactured cost effectively, in high quality and with high quality. Ohio companies have the knowledge, capacity and infrastructure to design and supply these products. | Boniface Edward Consulting LLC | 1500 | 31 to 90 days | \$700,000 |
| Franklin | Tank Town Waterline Replacement | This project consists of approximately 6,750 feet of new waterlines to replace 1940's era 2' or 4" deteriorating cast and ductile iron waterlines. The project will include new fire hydrants and water service lines to this residential area. The project is expected to yield increased water pressure for domestic use and fire protection as well as decrease the high number of water main breaks in this area. | Franklin | ADVANCED WIND ENERGY JOBS GROWTH PROPOSAL | Based practices and legislative mandates: 1) Monitoring and transparently communicating student progress on mastery of grade level content 2) Identification and tracking a tiered system of interventions 3) Creation of academic student data from individual student to state level 4) Creation of comprehensive student profiles that inform the design of relevant and engaging instruction and assessments that foster the development of content knowledge and 21st century skills 5) Providing accommodations and modifications for student assessments 6) Providing support for improved classroom instruction through access to high quality resources The implementation of F.I.T. in Ohio would yield the following expected outcomes: 1) Accelerated student learning due to more appropriate instruction informed by multiple assessment measures 2) Clarified learning targets for students 3) Higher quality instruction based upon researched and proven practices The Get Connected project will educate clients with severe mental illnesses about their overall health and how to access health care. Clients will attend a series of 10 weekly classes. These will address many of the health issues that impact the people who suffer with serious mental illness in the public system are dying 25 years earlier than the general population. The 15-hour modules will be based on topics relevant to this population and the underlying causes of earlier death. Some of the topics include diet, nutrition, exercise, smoking cessation, medication management and how to find a primary care physician. The intent of the program is that clients will link with appropriate health or wellness services. This may include connecting with a primary care doctor or clinic to establish an ongoing relationship or contacting a health organization that will help them with at least one behavioral change through regular exercise, eating a healthier diet, managing stress, and other activities that will improve their overall health. The intent is to motivate clients to have a healthier lifestyle and prevent premature death. The goal is to integrate physical and mental healthcare. | Ashland Performance Materials | 250 | 31 to 90 days | \$2,500,000 |
| Franklin | Formative Instruction Technologies (F.I.T.) | The implementation of F.I.T. in Ohio would yield the following expected outcomes: 1) Accelerated student learning due to more appropriate instruction informed by multiple assessment measures 2) Clarified learning targets for students 3) Higher quality instruction based upon researched and proven practices The Get Connected project will educate clients with severe mental illnesses about their overall health and how to access health care. |----------------|--|---|--|----------------|--------------------|---------------------------|
| Franklin | Achievement Reading | Identify and target needs based school districts to provide, free of charge, during and after school reading classes designed to bring non readers up to grade level. Utilizing software and research based published materials to help those readers that have not benefited from current school provided programs or services. Our program has taken non readers from across the country, from school age to adult, including readers that had been ignored or dismissed as disabled, and successfully brought them to read at their appropriate age level. Outcomes will be measured via pre and post test evaluations to ensure success. The goal of this program will be to report 100% success rate for all students enrolled. | Achievement Learning Technology, LLC | 300 | 0 to 30 days | \$25,000,000 |
| Franklin | MedyutyEMR | Estimated costs are based on projected participation of 300 school districts. Estimated costs also include materials, and a minimum of one full time qualified educator to act as trainer and coach/teacher for each district. Meduty is an established electronic medical record software company with physician users in 30 states. President Obama has mandated the use of electronic medical records in the stimulus but BUT the software used must be certified. This project will allow software engineers to be used in order to meet certification mandates, and set up support staff to be ramped up in an effort to meet the demands of thousands of thousands of US physicians migrating to an electronic medical record. | Medyuty, Inc. | 30 | 0 to 30 days | \$3,000,000 |
| Franklin | 21st Century Skills Lab | To create a 21st skills lab that can be utilized by students and teachers across a 19 county region in North Central and Southern OH. The skills lab will be used to help prepare students for the job market utilizing 21st Century Skills. This lab would provide 30 classrooms, 1 SMART Board, 1 Interactive Video Conferencing unit, as well as a wide array of technology products, including iPods, Digital Microscopes, Digital Cameras, Digital Camcorders, LCD Projector and other equipment to enhance our necessary 21st Century skills. This lab would be open to educators as well to provide professional development opportunities to enhance their 21st Century Skills. | Instructional Technology Services of Central OH | 0 | 31 to 90 days | \$120,000 |
| Franklin | New Albany Fiber Network | The Village of New Albany, Ohio is looking for funding to light, manage, and deliver fiber broadband services to businesses, schools, Village buildings, and medical hospitals along a central and fiber network built in 2007 - 08. The central and fiber network was constructed through an agreement with a local power company who was constructing a fiber network of their own. The network is unusable without significant investment in "core network" optical equipment and additional equipment located along strategic portions of the network. Funds will also be used for installation of equipment. An investment of \$1,500,000 is required to complete the project and work could begin immediately upon funding approval. Between 900 and 1,425 new jobs will be created through the implementation of this plan from new business that has agreed to relocate if the fiber assets are in place and activated. | Village of New Albany | 1,350 | 0 to 30 days | \$1,300,000 |
| Franklin | Electronic Medical Record | Develop an electronic medical record system and connect to billing software for a streamlined process that provides greater access to information, and more accurate diagnostic and treatment interventions. | Youth Advocate Services | 2 | 0 to 30 days | \$125,000 |
| Franklin | Thermal Imaging and Level 1 Thermography Certification | To help acquire a new thermal imager and Level 1 Certification. This should create/sustain 3 positions. We plan on using the thermal imager to conduct energy audits and perform roofing and building envelope inspections. Routine inspections should increase the total life cycle of roof systems and other building components. Energy audits will be conducted in order to find ways in cost energy consumption. We have a program to expand services to other cities, i.e. and that families who are in need of specialized interventions. The goal would be to address emerging social and emotional issues to prepare children for learning and to stabilize family functioning through counseling, case management, and intensive home based interventions. | CTL Engineering | 3 | 31 to 90 days | \$13,000 |
| Franklin | Early Childhood Mental Health | | Youth Advocate Services | 2 | 0 to 30 days | \$125,000 |
| Franklin | Industrial Acceleration | The Ohio Manufacturing Extension Partnership (OHMEP) is requesting \$100,000,000 from the Federal Stimulus Initiative for the acceleration of expansion of manufacturing capacity in Ohio for growth through new products, sales, and processes. A minimum expenditure of the creation of over 2000 jobs over the next 2 years due to the acceleration of manufacturing for new products and technologies being developed. Edison Incubators, or identified by the OHMEP program. Currently, identify new companies that have been identified in being Ohio Edison Program incubators throughout the state that are ready or near ready to launch new products, technologies, and processes. These technology clusters. More companies will be added. | Ohio Department of Development | 2500 | 31 to 90 days | \$100,000,000 |
| Franklin | We Believe in Kids! Ohio Avenue Center Capital Cam | Directions For Youth & Families' (DFYF) Ohio Avenue Youth Center provides at-risk Columbus youth with a variety of after-school programming designed to help them develop into strong, confident, self-sufficient adults. The Center is located in a low-income, high-crime area of Columbus and the Mayor has targeted for an anti-gang, anti-violence initiative that seeks to provide positive alternatives for youth who have few other options available to them. DFYF has undertaken a capital campaign to purchase and renovate this building; federal stimulus funds would help us reach our goal. The project's short-term outcome will be the employment of 50 workers over a 7-month period to complete the renovations needed to enhance space used by youth. Work will also bring the building into compliance with ADA requirements; replace the antiquated, energy inefficient HVAC system; replace the windows, doors, and roof; upgrade the electrical system and bathrooms; and install a fire sprinkler system. The project's long-term outcome is to reduce juvenile crime by providing youth with constructive alternatives to delinquent behavior and help them grow into the leaders of tomorrow. | Directions For Youth & Families | 50 | 31 to 90 days | \$350,000 |
| Franklin | NPP | Implement an evidence-based practice, "Nurturing Parenting Program" to educate children and their families on parenting strategies through curriculum based instruction sessions in order to create family stability. The program will be developed by educators (teachers, curriculum staff, and school leaders) during regional trainings led by assessment experts. Resulting items will be reliability-tested and normalized to ensure validity prior to use. | Youth Advocate Services | 1 | 31 to 90 days | \$75,000 |
| Franklin | D3A2 Standards-Based Assessment Item Bank Project | The creation of nearly 17,000 items will ensure that at least 3-6 questions are created for each of Ohio's grade level indicators (GLI's) for grades K-12. Classroom teachers will have the flexible indicator options from multiple grades within a stand to develop standards-based assessments that include GLI's from multiple grade levels to better inform interventions and differentiated instruction. Expected outcomes: 1) Creation of up to 17,000 calibrated test items aligned to Ohio academic content standards. 2) 220 educators trained in best practices of test item creation, alignment, and calibration. 3) Establishment of professional learning communities that encourage school districts to work collaboratively into the future to develop additional items. | Management Council of the Ohio Education Network | 15 | 31 to 90 days | \$1,200,000 |
| Franklin | Patrol Officer Hirings | This money would be used to hire one street officer to fill one of two street positions that have been held vacant for 6 months or more to date. The amount covers salary and benefits and training. The second street officer was submitted in a previous proposal. The amount covers the cost of training and equipment for the new hire. The Ohio Department of Education's (ODE) customers - students, teachers, school districts, researchers and regional technology centers by providing access to relevant information about student performance. D3A2 is a cooperative effort which is being developed and governed by numerous stakeholder groups throughout Ohio. Expected outcomes: | Upper Arlington Police Division | 1 | 0 to 30 days | \$80,000 |
| Franklin | D3A2 Statewide Longitudinal Data System Project | 1) Expansion of Ohio's statewide LDS to include data derived from locally authored formative, summative, and end of course assessments, as well as other aligned data sources determined to be of value to school districts in Ohio. 2) Development of business intelligence that enables States, districts, schools, and teachers to make data-driven decisions to improve student learning and facilitate research to increase student achievement and state achievement gaps. 3) Provision of training for Ohio technology integrators, school improvement leaders, and educators in data-driven methods of instruction. | Management Council of the Ohio Education Network | 20 | 0 to 30 days | \$1,750,000 |
| Franklin | D3A2 Classroom Assessment Module Project | The D3A2 CAM Project is focused on the creation of a formative assessment tool for use in Ohio's schools. The CAM provides a cost-effective way of helping Ohio school districts and schools meet the need for balanced assessment tools. When combined with D3A2's Longitudinal Data System, the CAM can aggregate and disaggregate student performance data and produce actionable intelligence about the effectiveness of teaching interventions. D3A2 is a cooperative effort which is being developed and governed by numerous stakeholder groups throughout Ohio. Expected outcomes: 1) Deployment of a well-based formative assessment tool capable of being easily utilized by all teachers in the state of Ohio (Fall 2009). 2) Establishment of an operational team capable of providing end-user support and training on a statewide level utilizing the resources of Ohio's regional technology centers. 3) Development of professional development for teachers delivered by Ohio's regional technology centers focused on catalyzing use of the CAM. 4) Creation of professional learning communities hosted by school districts and state support teams that permit educators to explore "assessment | Management Council of the Ohio Education Network | 15 | 0 to 30 days | \$2,500,000 |
| Franklin | Alcohol and other drug prevention services | The request for this funding is to take us back to our allocation level that was originally identified to be received by the ADAMH Board. As a result of the \$100,000 reduction, we had to let off one staff person and there is the potential of laying off another within the next future. We provide alcohol, tobacco and other drug prevention services through after school programs, summer day camps, resource center, mentoring and pre-scholarship children of alcoholics/parents groups. Each year we serve approximately 200 youth and several thousand adults through the use of our resource center. With the closing of the City of Columbus Recreation Centers, this could potentially increase the need for our services. In fact, one of our programs was housed at Helton Recreation Center and as a result of this center closing, we had to move our program to a location where there is a probability that many of our youth will not be able to attend. As part of all of our programs, with the exception of the resource center, our goal is to increase the developmental assets and protective factors in our youth as well as reduce the risk factors that are often associated with alcohol and drug use. | Prevention Council of Central Ohio | 2 | 0 to 30 days | \$190,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Franklin | Westerville Fiber network | <p>of the City. As indicated below this project will create immediate jobs related to the project, but will be a long term investment for Central Ohio which will enhance long term job creation. Therefore, we respectfully request the Administration to fund this project on for consideration for federal stimulus funding. The cost of this investment is estimated to be \$3.25 million.</p> <p>The primary customers of the proposed fiber expansion would be:</p> <ul style="list-style-type: none"> Public Utility Migration to "Smart Services" The Westerville City Schools Local Hospitals and Medical Centers Oltenberg College Municipal Public Safety and Disaster Communication Capabilities Enterprise and small to medium commercial users within the City Municipal operations through the establishment of a Community Data Center <p>Westerville has been in contact with at least two companies that will bring 200 jobs each. Fiber and Ethernet availability will attract and retain as many as 500 technical and medical related jobs. Fiber, pushed through existing conduit, will cost \$400,000.</p> <p>Years of education, entrepreneurial training & accreditation, service providers, who introduce or succeed assume name resources in the development and refinement of the employment package entitled, "Bob Gets The Job."</p> <p>The employment package provides the job seeker with proven trade secrets cultivated over years of experience. Individuals are taught how to identify personal skills & abilities, develop career goals, match them to the local job market, obtain hidden job leads, write marketable resumes & cover letters, take proactive steps before, during, & after an interview that result in job offers.</p> <p>Our plan also includes a work stimulus component that could prove invaluable to people that can be very hard to place into employment under normal conditions and almost impossible in these trying economic times.</p> <p>With the ever-increasing number of displaced workers now joining the ranks of the unemployed, it is inevitable that less functional workers will get left in the wasteland. This plan stimulates both groups of unemployed workers to get off of public assistance programs and back to work!</p> | City of Westerville, oh | 800 | 31 to 90 days | \$3,250,000 |
| Franklin | Bob Gets The Job | <p>The employment package provides the job seeker with proven trade secrets cultivated over years of experience. Individuals are taught how to identify personal skills & abilities, develop career goals, match them to the local job market, obtain hidden job leads, write marketable resumes & cover letters, take proactive steps before, during, & after an interview that result in job offers.</p> <p>Our plan also includes a work stimulus component that could prove invaluable to people that can be very hard to place into employment under normal conditions and almost impossible in these trying economic times.</p> <p>With the ever-increasing number of displaced workers now joining the ranks of the unemployed, it is inevitable that less functional workers will get left in the wasteland. This plan stimulates both groups of unemployed workers to get off of public assistance programs and back to work!</p> | National Diabetes Resource Center | 75 | 0 to 30 days | \$500,000 |
| Franklin | Screen Printing Facility for Medical Components | <p>Purchase of an existing screen printing business in Columbus, Ohio which is permanently closing in May, 2009. Funding will be used to acquire existing business assets and contracts and retain 10 experienced employees that are about to be permanently laid off. This facility manufactures high-tech membrane switches, electronic components and accessories for the medical industry anywhere in the world. This system is built upon a fundamental premise, that for every \$1 of cost incurred to fulfil any order, the true value-added investment that the system makes is at least 10 times that amount. That is, the value added ratio for this system is 10:1. This system is built upon a fundamental premise, that for every \$1 of cost incurred to fulfil any order, the true value-added investment that the system makes is at least 10 times that amount. That is, the value added ratio for this system is 10:1.</p> <p>Value Added Time to Make the Order/Total Time that the Order took before Shipment is at most 5%-10%. With customer orders phoned in and bills & any opportunity to get government rebated money, what does this mean to small and medium-sized manufacturers (jobbers and distributors) or their suppliers to OEM's? That they cannot lose to survive this recession! 80%-90% of their total investment of capital in machinery, materials, energy, labor, overhead, IT infrastructure, etc) is being wasted on non-value adding activities. As Toyota's "The Way of the Zen" is relevant to as much as much (autos). Having identified the Seven Types of Wastes (Overproduction, Transportation, Inventory, Scrap/Rework, Operator Travel and Downtime/Waiting), Toyota has promoted ingenuity in the extreme by instituting the 5S employee and small and medium-sized manufacturers (jobbers and distributors) or their suppliers to OEM's need to recognize that the employees are the most valuable asset of the organization.</p> <p>This request is for funding to repair the deteriorating steel beams and concrete slabs on the lower level of the Ohio Statehouse Parking Garage. The steel support beams that the HVAC ductwork benefit the lower level is deteriorating in spaces causing the concrete beams and concrete slabs. This funding would allow for the replacement of two beams and portions of the concrete slabs covering the area of the application of waterproof concrete sealant.</p> | White Electronic Designs | 30 | 0 to 30 days | \$1,500,000 |
| Franklin | Enabling Cost Reduction and Growth of Small and Me | <p>This request is for funding to repair the deteriorating steel beams and concrete slabs on the lower level of the Ohio Statehouse Parking Garage. | Franklin | InSide/Out: Building Community Around Youth | <p>InSide/Out prepares Ohio Department of Youth Services incarcerated youth for successful transition from institutionalization back to the community for youthful offenders.</p> <p>The program participants from the ODYS Mexican and Scots Village facilities. ArtSafe is providing its proven arts-based programming inside the institutions to youth who will be released to Franklin County. Upon release ArtSafe works with these young people in their communities—the "out" portion of the InSide/Out program—engaging them in arts programming at the Regional Parade Office. ArtSafe is partnering with the Regional Parade Office and Aliva both located in Employment Zone neighborhoods with high poverty and crime rates.</p> <p>Outcomes include: 80% reduction in recidivism, job readiness training and employment opportunities.</p> | Art for a Child's Safe America | 30 | 0 to 30 days | \$143,000 |
| Franklin | Township Complex | <p>Complex consisting of offices for Fire, Police, and Road Departments, also a meeting hall and senior center.</p> | Clinton Twp. Fire Department | 20 | 181 days or more | \$2,500,000 |
| Franklin | PowerworX Greene Initiative | <p>This is a long term project that puts PowerworX Clean Power units at electrical panels in both homes and businesses... these units reduce the amount of power drawn from the utility by storing it (capacitor), otherwise lost electricity (watts) caused by inductive motors. This is done thru Power Factor Correction. Thus saving from 8% to 20% on monthly electric bills. In addition, the units serve as a whole house energy management system. Protecting equipment such as TV's, computers, motors, DVD'S, security systems, stereos, etc. in the event of a power surge, lightning strike, utility voltage spike, or static electricity. In addition to the benefits above, motors will run about 10% cooler which will increase their life expectancy.</p> <p>The unit also is a Electrical Noise Filtration device that filters noises in appliances, fluorescent lamps, TV's, motors and other equipment.</p> <p>This is a new GREENE market which 6 months ago we decided to enter. We are currently selling the units but are needing capital to both Market and Sell the product.</p> <p>Our 25 yr company has gone from 25 to 8 employees in the last 12 months. With this capital we can put those people back to work this year.</p> | Walls-Carroll Inc. | 25 | 0 to 30 days | \$150,000 |
| Franklin | Youth GIFT : After School and Summer Program | <p>ArtSafe after school and summer program artists use arts projects to engage elementary and middle school youth in team building, collaboration, problem-solving, and constructive communication as they create personal and public art projects. In addition to workshops led by staff artists, the children also learn from guest artists which have included an African drum and dance team, quilters, a male weaver from Ghana, and locally featured poets and storytellers. The children visit cultural institutions such as the King Area Complex and Columbus Museum of Art. They attend performances, learn about opera, and explore their own neighborhoods through the lens of a community arts project.</p> <p>Outcomes include: increased school attendance critical thinking and problem solving skills design and creation of individual works of art team work and consensus building skills creation of a collaborative art project positive means of self-expression</p> | Art for a Child's Safe America | 14 | 0 to 30 days | \$118,000 |
| Franklin | "Art in the House" after school program | <p>Art in the House provides economically challenged Columbus neighborhoods with free arts education and performance/exhibition opportunities. Activities for K-6 children led by highly skilled artists. We have programming in 4 Columbus Neighborhood Settlements facilities and wish to expand to 2 additional Settlement Houses. We currently serve 662 youth and estimate an increase of 200 participants.</p> <p>Program activities take place both at the primary sites and at arts organizations around Columbus. This activity allows GCAC to fill a crucial gap in arts education – the organization of many independent programs into an accessible, comprehensive network of opportunities for residents, especially K-6 students during out-of-school time. Locating the programs in Settlement Houses allows the facilities to expand their offerings to the community, and raises advantageous neighborhood networks and relationships. Evaluation shows children benefit from the consistency that this type of program provides. Former youth participants in our programs have succeeded in ways they never believed possible, through job opportunities, college scholarships, 8 national exposure.</p> | Greater Columbus Arts Council | 19 | 91 to 180 days | \$85,000 |
| Franklin | Solar Hybrid Inverter System with High Efficiency | <p>The program will be to develop a new and adapt existing technology into a renewable hybrid reactor/ inverter for use in the commercial solar market. In addition develop and integrate a high efficiency photovoltaic converter. At present we are manufacturing a self funded prototype for THE Millenium who value our workmanship and reliability. We are using our core existing technology, however, we are importing additional technologies which we integrate in Columbus prior to exporting. We want to have 100% Ohio content that will compete with the rest of the world. We have the market channel and buy in customer, but would seek for consideration of some state investment.</p> <p>This is a new GREENE market which 6 months ago we decided to enter. We are currently selling the units but are needing capital to both Market and Sell the product.</p> <p>Our 25 yr company has gone from 25 to 8 employees in the last 12 months. With this capital we can put those people back to work this year.</p> | AMETEK Solidstate Controls Inc. | 60 | 0 to 30 days | \$1,000,000 |
| Franklin | TRANSIT ARTS teen program - youth employment | <p>TRANSIT ARTS provides opportunities for youth ages 13-18 in targeted neighborhoods to work with master and professional teaching artists. In 2008, 367 youth were reached. Approximately 97 youth participated in more than 30 public performances and exhibitions. Feedback has been extremely positive from program participants. [TRANSIT ARTS] made the team how to make positive choices, I used to be a gang banger and did everything bad, so coming here really kept me on track. [TRANSIT ARTS] makes me feel like I am a person, that I am equal, and this is the first time I have felt like this."</p> | Greater Columbus Arts Council | 75 | 31 to 90 days | \$138,200 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Franklin | Job for minorities -Hispanics | We are a minority owned company registered with the state. We provide bilingual employment services to immigrants and minority groups. We currently have more than 1000 documented/undocumented aliens without jobs. Our company can provide services to all those that can live in the blighted areas of this stimulus package. We have people from africa, latinamerica, europe, american citizens that are all unemployed. We also want current Ohio legislators bilingual employment newspaper "Empires & Employment" this vehicle assist companies in spreading the word about opportunities in the workplace. We are schedule to launch Ohio first job board for minorities. We need assistance so we can provide jobs by communicating our services to companies as well as creating vehicles in place for minorities to include minorities in their hiring initiatives. | Emploes & Employment | 200 | 31 to 90 days | \$150,000 |
| Franklin | SR665/Buckeye Parkway Intersection Improvements | This project will widen approximately 1,000 linear feet of roadway to incorporate a turn lane and add a traffic signal to this high-traffic intersection. | City of Grove City | 30 | 181 days or more | \$400,000 |
| Franklin | Seeds Road Widening (Meadows Drive to Enterprise P | This project includes the widening and resurfacing of approximately 1,800 linear feet of roadway that serves as an access point from I-71 and SR 665 to a region that is currently used for manufacturing and light manufacturing/industrial uses. This improvement is needed to improve accessibility to this area for large tractor trailers. | City of Grove City | 30 | 181 days or more | \$584,000 |
| Franklin | Yearling Road Reconstruction, Phase 3 | This project is a portion of the full length reconstruction of approximately 2,400 linear feet of Yearling Road, a major north-south thoroughfare, from Broad Street (SR 16) to Mayflower Boulevard. Also included in this project are street lighting, storm sewer, ADA compliant sidewalk, and traffic signal improvements. | City of Whitehall | 100 | 181 days or more | \$2,500,000 |
| Franklin | Downtown Infrastructure Improvements | This project will replace the aged and deteriorated waterline and roadway infrastructure within the City's Town Center. This project is a companion project with the Lumbarlay Road development project, which will add office and retail spaces to the downtown Grove City area. The Eastgate neighborhood is in need of a major overhaul of its infrastructure. The last time the neighborhood was paved in 1968. The curbs and sidewalks are in need of repair as they are cracking from age. In addition, the street lighting system was installed during the same period as the street and curbs were constructed. Since street lamps were installed over 40 years ago, the street trees have grown considerably and the amount of percentage of light reaching pedestrians at the street level has decreased. This has caused residents to have concerns for their safety. Pedestrian scale lighting is needed to replace the outdated underground system instead of removing the trees which will negatively impact the environment. | City of Grove City | 70 | 181 days or more | \$1,000,000 |
| Franklin | Eastgate Streetlight and Road Project | This project includes the construction of a Single Point Urban Interchange, replacing the narrow rural diamond configuration currently in place. SR665 will be widened as it passes through the interchange, with the new roadway varying from sixty to ninety feet in width to accommodate four through lanes and three turn lanes. A single signalized intersection will control all traffic through the interchange. | Eastgate Garden Civic Association | 100 | 91 to 180 days | \$3,000,000 |
| Franklin | I-71/SR665 Interchange Improvements | WE INSTALL UNDERGROUND PIPE FOR AEP. IN THE PAST YEAR DUE TO LAPSE IN WORK WE HAVE FALLEN BEHIND ON EQUIPMENT PAYMENTS AND NEED TO REPAIR AND REPLACE SOME OF OUR EQUIPMENT. IF AEP GETS THEIR INCREASE WE WILL NEED TO BUY TRAILERS AND TRUCKS. WE WILL BE ADDING 10 NEW EMPLOYEES WITH THE UNION WORK WE ARE DOING. | City of Grove City | 2,580 | 91 to 180 days | \$5,000,000 |
| Franklin | GENERAL | This proposal is an initial funding request for the development and testing of a fluid powered gravity driven electric generator. The generator consists of a series of vertical drop collects energy from falling a non-potable fluid to power itself and provide additional electric power available to the public grid. Assuming the Hydro Drop Generator (HDC) is successfully proven. All assembly manufacturing would occur in Ohio. | RHINO PREWIRE INC | 10 | 0 to 30 days | \$250,000 |
| Franklin | Hydro Drop Generator | As a green energy initiative this proposal has the potential of providing additional supplemental electric energy to homes, schools and business for use or sale regardless of weather conditions. Large scale utility versions could be developed for synergy use in public and private water systems where the collection of energy is even greater and more efficient. No wind or sun, just the use of gravity and the energy of falling water. | none | 5 | 31 to 90 days | \$500,000 |
| Franklin | 100 Jefferson Avenue | The Jefferson Center for Learning and the Arts (JCLA) is a leading resource for organizations and professionals in the not for profit sector. JCLA provides below market rate office space for organizations in a dozen carefully preserved historic buildings on Jefferson Avenue, 100 Jefferson Avenue, the last historic building on the block, and has been purchased for restoration. Once rehabilitated, the space will be offered to non profit organizations at below market rates. Our current portfolio of benefits to the participating organizations. We offer shared conference space and office equipment, and our block-wide events, picnic tables for summer lunches, and public gallery spaces foster collegial relationships amongst our tenants. As importantly, when not for profits can save money on overhead costs they have more to allocate to the programs and services that directly impact individuals and local communities, increasing direct program and service delivery. The center currently houses 27 organizations from social services to the arts. There are a growing number of vacant houses and businesses due to the high foreclosure rate in Ohio. There is a need to monitor the vacant properties and a company to work with the local government and banking/mortgage institutions to secure the vacant properties. The project would be to secure the property through a variety of means, perform routine maintenance, restore, make repairs as needed, a weekly monitoring of the property to verify the property is secure and arrange for snow removal and lawn maintenance. The projected outcomes are vacant properties are properly maintained to assure the property is not damaged due to neglect which protects the value of the properties and the housing market of the local community. A key point as the federal, state and local governments have a vested interest in these vacant properties as a share holder. Proper attention will help to maintain the value of these properties for resale and the real estate value of the neighborhood. In addition we could purchase commercial properties in small towns restore and rent the office space to new small businesses. Small business is the backbone to our economy. This project includes preliminary engineering and planning services, as required by the DEPA DFFO. | The Jefferson Center for Learning and the Arts | 3 | 0 to 30 days | \$250,000 |
| Franklin | Secure and rehabilitate vacant properties | This submission updates the number of jobs to be created by this project. | Kitkat Secure It | 50 | 0 to 30 days | \$5,000,000 |

| Franklin | Fiberoptic Loop Construction | Construct a 33 mile fiber optic telecommunications loop throughout the southern portion of Franklin County to support business development and expansion within this region. | City of Grove City | 3,000 | 181 days or more | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Franklin | Coworking Communities | Sandbox Communities, LLC is currently creating a coworking community in the downtown Columbus area and is looking to create additional coworking spaces throughout central Ohio. What is coworking? Coworking is an emerging trend and a new way to work. Typically, work-at-home professionals and entrepreneurs in the start-up mode are forced to work at home in relative isolation due to lack of capital, typically working out of their home or at a local coffee shop with little or no resources. This approach while cost effective, often stales the growth of the start-up both creatively and functionally. Coworking spaces create some semblance of work independently in a collaborative and open community, have a professional office environment, access to expertise and ideas, and networks that working from home cannot provide. Sandbox Communities will offer full-time, part time, and daily membership rates, and large, bright open spaces will be carefully designed to inspire creativity, collaboration, and most importantly, success. Dedicated workspaces, meeting spaces, internet, video conferencing give just a few of the many benefits for entrepreneurs who are members of Sandbox. The state will offer free energy assessments for commercial buildings including office buildings, warehouses, manufacturing facilities, and retail space. It is expected that many of the buildings currently in occupied are inefficient. I operate a company that offers energy audits and recommendations for energy efficient upgrades. Many of the buildings that my company audits can quickly save money by simply implementing the cost and no cost upgrades. In addition, a complete revitalization of certain buildings is an attractive investment for many companies. However, many of the companies are not aware that they can generate such great returns by simply upgrading or upgrading to new higher efficient equipment. The installation and upgrade stimulates the economy by employing engineers, electricians, HVAC contractors and product manufacturers. The investment and increase in efficiency also helps the companies bottom line which has the added bonus of fewer operating costs which will help retain employees and make our facilities competitive for years to come. However, companies are reluctant to make the investment in a complete audit until the economy in the stages it is in. Specific training is needed for sworn law enforcement officers who are assigned to Ohio's schools in a position called School Resource Officer (SRO). Creating and maintaining a safe school environment is the primary goal of every SRO and specific training for that challenge is crucial. Identifying and dealing with drug and gang activity, on cyber and face to face bullying, electronic device crimes, delinquent theft and absenteeism, identifying and utilizing a school building safety survey and safety plan, public speaking, acclimation into school techniques and Ohio school law that SROs must follow is essential. Law enforcement can create add jobs for SRO's in schools if training is provided at no charge to the agency. The Ohio School Resource Officers Association (OSROA) has developed a 5-day course that covers the specific training SROs need before beginning their assignment in a school. Thirty six four SRO's go on each each year. Both Custom and Process evaluations are used to evaluate the program. The OSROA has successfully planned and conducted nine SRO Basic Trainings in its history. The OSROA is requesting funds to assist in continuing to offer these trainings. | Sandbox Communities, LLC | 200 | 91 to 180 days | \$500,000 |
| Franklin | Energy Efficient Assessments | The Teaching & Learning Collaborative is a non-profit organization whose mission is to provide high-quality, innovative professional development and support to preK-12 teachers in mathematics, science, and technology. TLC works at a variety of levels, from the classroom to the state level, to ensure that all students have access to a quality education in science and mathematics. TLC plans to develop a series of professional development opportunities nationwide high-quality STEM activities for K-12 teachers. By developing national professional development opportunities for educators and utilizing emerging technologies, TLC can provide unlimited professional development possibilities. These programs will allow for year-long professional development which would allow K-12 teachers and university faculty to provide teachers and students with challenges utilizing these 21st Century skills. TLC would provide the infrastructure needed to develop, train and facilitate teachers in high needs areas of Central Ohio and possibly statewide, impacting teachers and students at the K-12 level. Information about all of our programs can be found at our website: teachingandlearning.org | Evolved Energy Solutions | 10 | 31 to 90 days | \$200,000 |
| Franklin | Training for School Resource Officers | This project will be to direct right funds into locally owned businesses by shopping and buying from local businesses whenever possible. To accomplish this I will hire 1 employee and the 2 of us will travel around Ohio buying from local small businesses and local products whenever possible. I will do my own time to this program, but will pay 1 employee to assist. We will bring on our own truck and will not use purchased from there, and who. This will provide media coverage and sales opportunities for these companies. The money we do use we will do so only from what was purchased to Ohio based charities. It is important to understand that 100% of these funds will be reflected into Ohio's economy by either purchase or payroll of the employee. As we do through Ohio we will not only locally owned businesses but also purchase from small business owners. This is our chance to stimulate our economy with things that will go to use for a good cause. The Teaching & Learning Collaborative is a non-profit organization whose mission is to provide high-quality, innovative professional development and support to preK-12 teachers in mathematics, science, and technology. TLC works at a variety of levels, from the classroom to the state level, to ensure that all students have access to a quality education in science and mathematics. With these funds, TLC will provide a platform for ongoing professional development by offering content K-3 IMPACT Improving Mathematical Practices and Classroom Teaching program to emphasize high quality mathematical practices and the integration and development of STEM Education at elementary level. Funds would be used to support building based professional development at the area around Ohio. Evaluation results from past programs have shown tremendous gains in teacher content knowledge as well as in the teaching of mathematics at the K-3 level. Currently, we have 502 teachers participating statewide in the IMPACT programs representing 203 Ohio school districts. Additional information about TLC programs can be found at our website: teachingandlearning.org | Ohio School Resource Officers Association | 300 | 0 to 30 days | \$75,000 |
| Franklin | STEM Education Professional Development | Overport Madison's science scores have been consistently below state testing standards. We want to create take home science kits for grades 4-10. We think the collaboration between the school and home will make a difference. Kits will be created that meet each grade level's standards for science. They will be reusable kits. Grades 7 new kits. Budget: 7 teachers @ \$80,000 (salary & benefits) 7 laptops @ \$500 = \$600,000 science kits (50 per school per grade level includes recycling) @ \$50 = \$47,500 10 lockable storage lockers @ \$100 = \$11,400 cost: \$624,000. Staff, students, and parents will be surveyed as to effectiveness of program. 7 teachers will be responsible for kits, assisting classroom teachers with science lessons and experiments, collecting data and answering questions from staff, students and parents. | Teaching & Learning Collaborative | 8 | 91 to 180 days | \$300,000 |
| Franklin | Direct Injection of Funds | This project will be to direct right funds into locally owned businesses by shopping and buying from local businesses whenever possible. I will do my own time to this program, but will pay 1 employee to assist. We will bring on our own truck and will not use purchased from there, and who. This will provide media coverage and sales opportunities for these companies. The money we do use we will do so only from what was purchased to Ohio based charities. It is important to understand that 100% of these funds will be reflected into Ohio's economy by either purchase or payroll of the employee. As we do through Ohio we will not only locally owned businesses but also purchase from small business owners. This is our chance to stimulate our economy with things that will go to use for a good cause. The Teaching & Learning Collaborative is a non-profit organization whose mission is to provide high-quality, innovative professional development and support to preK-12 teachers in mathematics, science, and technology. TLC works at a variety of levels, from the classroom to the state level, to ensure that all students have access to a quality education in science and mathematics. With these funds, TLC will provide a platform for ongoing professional development by offering content K-3 IMPACT Improving Mathematical Practices and Classroom Teaching program to emphasize high quality mathematical practices and the integration and development of STEM Education at elementary level. Funds would be used to support building based professional development at the area around Ohio. Evaluation results from past programs have shown tremendous gains in teacher content knowledge as well as in the teaching of mathematics at the K-3 level. Currently, we have 502 teachers participating statewide in the IMPACT programs representing 203 Ohio school districts. Additional information about TLC programs can be found at our website: teachingandlearning.org | Self Employed | 1 | 0 to 30 days | \$500,000 |
| Franklin | IMPACT | Overport Madison's science scores have been consistently below state testing standards. We want to create take home science kits for grades 4-10. We think the collaboration between the school and home will make a difference. Kits will be created that meet each grade level's standards for science. They will be reusable kits. Grades 7 new kits. Budget: 7 teachers @ \$80,000 (salary & benefits) 7 laptops @ \$500 = \$600,000 science kits (50 per school per grade level includes recycling) @ \$50 = \$47,500 10 lockable storage lockers @ \$100 = \$11,400 cost: \$624,000. Staff, students, and parents will be surveyed as to effectiveness of program. 7 teachers will be responsible for kits, assisting classroom teachers with science lessons and experiments, collecting data and answering questions from staff, students and parents. | Teaching & Learning Collaborative | 20 | 31 to 90 days | \$250,000 |
| Franklin | Science - Take It Home | We currently have 6 half-day units. We want to expand to 12 full-time units. By purchasing a stand-alone commercial building for the preschool, it will alleviate overcrowding in our elementary buildings. Creates 29 jobs. Budget: \$-Salary/Benefits Administration: \$90,000 (SAB) Special Education: \$40,000 (SAB) Special Education: \$80,000 (SAB) 12 preschool teachers \$60,000 per teacher (SAB) 12 aides @ \$15,000 per hr @ 7 hrs/day @ 180 days = \$15,475 times 12 = \$225,640 @) additional food \$75,000 misc. cost: \$50,000 program equipment: \$20,000 equip @ \$6,000 = \$120,000 12 smart board units @ \$2000 = \$24,000 copier: \$10,000 money: \$50,000 Building: \$70,000 for a total of \$2,372,440 | Groveport Madison Local School District | 7 | 31 to 90 days | \$624,500 |
| Franklin | Preschool Expansion | Provide free e-waste recycling services to all levels of local government in Ohio. Support and training will be provided to local governments on how to run an e-waste drive or how to run an e-waste collection center. TechDisposal employees will travel to Columbus to collaborate on processing. This program will keep 26 million pounds of e-waste out of Ohio's landfills in the first two years. This program will also create 120 jobs in the Columbus area. | Groveport Madison Local School District | 29 | 31 to 90 days | \$2,372,440 |
| Franklin | E-waste Recycling for Underserved Communities | Overport Madison High School Career Academy will serve over 1800 from Central Ohio in grades 9-12. Overport is a suburban district that serves an ethnically diverse group of economically challenged students. We will partner with Basille, The Post Foundation, The Ohio State University and Metro High School. Students will be assigned to smaller learning communities. Each student will be given a faculty advisor. Each student will complete 2 capstone projects each year. This has the opportunity to replace the STEM education funding that has been eliminated. The fiscal responsibility for 38 faculty allocations, \$2500 per year, per teacher will offset additional studies. Travel costs for ILC professional development \$100,000 (salaries), \$7000 \$20,000 for accessories/Researcher \$100,000 (salaries/benefits) secretary \$40,000 (salary/benefits) additional teachers (English/Math/Social Science Studies) @ \$80,000 (salary/benefits) - \$20,000 for 5 years for Professional Development (\$10,000) Total: \$740,000 | TechDisposal | 120 | 31 to 90 days | \$3,000,000 |
| Franklin | Smaller Learning Communities | To Create an additional 15 miles of sound barrier on I-70 west bound outside 270. | Groveport Madison Local School District | 10 | 31 to 90 days | \$780,500 |
| Franklin | Freeway Noise Barrier 70 west bound outside of 270 | Sage-N-Cedar is our culturally tailored name for a curriculum who the developers call the Strengthening Families Project or SFFP. SFFP is a widely recognized "best practices" life skills training program designed to increase resilience and reduce risk factors for behavioral, emotional, academic and social problems in children 6-12 years of age. SFFP has three life skills courses: Parenting Skills, Children's Life Skills, and Family Life Skills - are taught together in over a period of fourteen weeks. The curriculum builds protective factors by improving family relationships, parenting skills, and improving children's social and life skills. SFFP was originally developed at the University of Utah by Dr. Karen L. Kutner for high-risk children of substance abusers, but has since been widely used both with general populations and with stressed but non-abusing parents. SFFP has been adapted for many diverse ethnic populations, however at NACCIO we implemented the original version and modify it to an needed basis to allow for the introduction of AIAN values. In multiple replications with diverse ethnic groups SFFP has been found to be effective in reducing risk factors and increasing protective and resilience factors. Two van employees, two service vehicles and required equipment, one year of on-the-job training and formal training programs (through ALMA) for employees. Franklin is a historic low-income center-city community. The extremely low property values are caused in part by very poor parkland accessibility. The only large park was essentially cut off from the bulk of the community by construction of SR 315. It became isolated and unusable. We propose to create a small grassy park in the center of where people live - miles of nearly half of all neighborhood residents. Lucas Park will be built on 34 residential lots which will be cleaned and combined with open space already created by the school district for the historic Ansonville Elementary school rehabilitation project. Most houses to be moved/relocated are substantial rental units, some are single. All homes will be replaced except in the neighborhood. The Lucas park will connect the school to burgeoning West Broad Street (SR 60) restaurant/commercial area essentially connecting one strong community route with a strong commercial node so that they may support each other. The park will raise property values in every direction and will draw private investment back to the community. Partners will include Mount Carmel Hospital, The City of Columbus, Franklin County, and ODOT. | Freeway barrier suggestion | 100 | 0 to 30 days | \$30,000 |

| Franklin | Security Training and Expansion | The County Engineers Association of Ohio would use the recovery funding to fund guardrail and pavement marking projects submitted by Ohio's 88 County Engineers. FRHW has proven that spring roadways greatly increase safety on the roadways and reduce sun off the road type crashes. Installing guardrail greatly reduces the severity of crashes when vehicles do run off the road. There are still many county roadways that lack pavement markings or have pavement marking that have worn away. There are still numerous areas along county roadways that have no guardrail where there should be guardrail. Although \$10 million won't completely eliminate the problem, it will go far to help counties improve the safety of their roadways. | General Safe & Lock Co., Inc. | 4 | 0 to 30 days | \$120,000 |
| Franklin | Lucas Park | The County Engineers Association of Ohio would use the recovery funding to fund safety data collection projects submitted by Ohio's 88 County Engineers. Data collected would include traffic counts, the numbering and marking of main roads, guardrail inventories, pavement marking inventories, sign inventories, roadside hazard inventories, no passing zones studies, curve speed studies, speed zone studies, traffic signal warrants, and traffic studies. All of these tools will help County Engineers identify their safety issues so that they can be remediated. The expected outcome is safer county roadways for the traveling public. | Franklinton Development Association | 5 | 31 to 90 days | \$600,000 |
| Franklin | County Road Resurfacing Project | The County Engineers Association of Ohio would use the recovery funding to fund safety data collection projects submitted by Ohio's 88 County Engineers. Data collected would include traffic counts, the numbering and marking of main roads, guardrail inventories, pavement marking inventories, sign inventories, roadside hazard inventories, no passing zones studies, curve speed studies, speed zone studies, traffic signal warrants, and traffic studies. All of these tools will help County Engineers identify their safety issues so that they can be remediated. The expected outcome is safer county roadways for the traveling public. | County Engineers Association of Ohio | 700 | 31 to 90 days | \$20,000,000 |
| Franklin | Eureka Road grade crossing rebuild | Reconstruction of railroad grade crossing surface, and upgrading of signals to include LED flashers and gates. This project would include 36 linear feet of full depth concrete crossing surface, which would improve the surface of Eureka Avenue over the crossing. | Camp Chase Railroad | 30 | 91 to 180 days | \$300,000 |
| Franklin | County Guardrail, Striping Program | The County Engineers Association of Ohio would use the recovery funding to fund safety data collection projects submitted by Ohio's 88 County Engineers. Data collected would include traffic counts, the numbering and marking of main roads, guardrail inventories, pavement marking inventories, sign inventories, roadside hazard inventories, no passing zones studies, curve speed studies, speed zone studies, traffic signal warrants, and traffic studies. All of these tools will help County Engineers identify their safety issues so that they can be remediated. The expected outcome is safer county roadways for the traveling public. | County Engineers Association of Ohio | 350 | 31 to 90 days | \$10,000,000 |
| Franklin | County Safety Data Project | Native American youth are scattered and isolated throughout the Central Ohio area. NACCIO would like to create a peer support group to bring our youth together to share and learn from each other. We would also provide cultural education and activities to increase self esteem and identity as Native youth. We would provide a mechanism for the youth to learn to sing and dance since within the proud heritage of this country the curriculum "Sons and Daughters of Tradition" would be used to teach positive communication skills and personal development. These funds would be used for the expansion of our business into the field of installation of solar panels, and/or wind turbines on new and existing property in the Central Ohio area. This will in turn save 5 jobs and hopefully create at least 2 more white promising cleaner energy solutions. This money will be used for electrical training for 3 employees (est. 40K per employee), 3 service vehicles & tools (est. 60K per van), inventory (est. est. 50K) and inspection, insurance and consulting fees (est. 25K). | County Engineers Association of Ohio | 350 | 31 to 90 days | \$10,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | Traffic Signal Monitoring and Control | The project will install a Traffic Monitoring System Central Computer with 10 closed circuit television monitors in the Public Service Department Maintenance Building. On-street master controllers for four (4) closed loop traffic signal systems have previously been installed, but with no provision for central monitoring and/or control. Most of the 21 traffic signal installations (flagpole-wide, including those on US-60, SR-161 and SR-956, have not been interconnected due to lack of funding. If funded, this project will "tie together" the various components of these closed loop traffic signal systems and the local intersection monitoring and control systems. One (1) closed loop traffic signal system will be installed in a future phase of the project. The Village engineering staff would prepare plans and specifications for submission to ODOT within 90 days. | Village of New Albany, Ohio Department of Public S | 11 | 0 to 30 days | \$1,978,290 |
| Franklin | INFOhio SchoolRooms - Delivering an Innovative Lea | SchoolRooms is a PreK-12 multimedia online discovery portal from SimDynamo designed in collaboration with Ohio educators & library media specialists. It fosters interdisciplinary exploration by combining educator-selected, curriculum standards-based content with student-friendly software. Content primarily consists of 171 Rooms with more than 1,700 Web page views & links to more than 22,000 student-selected Web sites. In addition, SchoolRooms delivers approximately 3 million bytes of Web site indexed to links in the 71 Rooms. SchoolRooms also provides federated searching of selected INFOhio Core Collection resources, local online catalogs & third party multimedia content empowering students to spend less time searching for information and more time using it. | INFOhio The Information Network for Ohio Schools | 12.5 | 31 to 90 days | \$7,692,300 |
| Franklin | Loan modifications | We are a loan modification company which offers refunds and is at the mercy of the lenders. Its not possible to get in touch with the volume of customers that are in need. Cash flow is very difficult as the homeowners obviously do not have the money and the current turn time on a modification can be 60 days at a minimum to 6 months, which is not uncommon. | Freedom Equity Savings | 75 | 0 to 30 days | \$500,000 |
| Franklin | INFOhio: Online Learning Tools for All PreK-12 Stu | Equip and continue equitable access to the INFOhio Core Collection of Electronic Resources for all Ohio PreK-12 students in Ohio at a cost of \$2.50 per student per year. This is a three-year proposal. All Ohio schools will have unlimited access to a statewide collection of electronic resources that support the teaching of state academic content standards and the needs of differentiated instruction. Cost includes resource subscription fees, curriculum integration, statewide awareness campaign, and eight positions (regional librarians, technical support, and program manager). Professional development and training would include 21st Century Learning Skills which would be provided through coordination efforts to higher education and the workforce. Costs also include a federated search tool for comprehensive searching of the resources. INFOhio will continue to coordinate efforts with Librarians Connect Ohio (LCO), partner with OCLC, and the State Library of Ohio to consolidate and expand resources to Ohio's PreK-12 community. Additional state-level subscriptions will allow schools to focus local electronic resources on their unique needs, find new content. | INFOhio The Information Network for Ohio Schools | 8 | 31 to 90 days | \$15,485,400 |
| Franklin | CMSS Traffic Signal Monitoring and Coordination | This project will upgrade and replace traffic signal installations (poles, signal and pedestrian heads, detectors, and cameras) on Green Street (US-60) (10 signal installations to 2.7 miles) and on Broad Street (SR-16) (8 signal installations in 1.32 miles) that have reached their expected service life and have become a maintenance concern, and will develop intersection traffic signal timing patterns for the intersection coordination efforts in implementation with the City of Columbus Metropolitan Traffic Signal System, a long-term goal of the project. While the existing traffic signal controllers have been replaced in recent years, the traffic signal poles, traffic signal heads, pedestrian signal heads, intersection wiring, and vehicle detectors must be replaced for effective and safe traffic signal operation. Surveys will show gaps in interconnect with individual intersection service drops has recently been installed as part of the Columbus Metropolitan Signal System, but without the hardware upgrades and development of appropriate timing patterns, the advantages of signal coordination will be diminished. | Department of Public Service City of Whitehall, Oh | 13 | 181 days or more | \$5,365,940 |
| Franklin | INFOhio Completing the Infrastructure: Adding All | Complete automation of remaining Ohio PreK-12 libraries affecting 650,000 students, joining them with the 1.2 million Ohio students already benefiting from INFOhio library automation. Project costs are not included, conversion, licensing & equipment costs. Additionally, the project includes implementing Library of Congress cataloging standards, School Interoperability Framework (SIF) integration, & Web 2.0 technologies supporting 21st Century Learning & Media Literacy Skills. These technologies will benefit all newly and currently automated INFOhio libraries providing equitable and standard library services for all of our Ohio children. | INFOhio The Information Network for Ohio Schools | 15 | 91 to 180 days | \$15,300,000 |
| Franklin | New Employees | Costs include additional staff to coordinate statewide efforts to align school library resources to academic content standards, training & support, and a dedicated cataloger. Cost is \$2.83 per Ohio PreK-12 student per year. This proposal is for 3 years. | Bekon Sales Associates | 3 | 31 to 90 days | \$250,000 |
| Franklin | INFOhio Preparing Digital Learners with Media-on-D | I would like to hire 2-3 new employees to maximize the coverage of my company. We are a sales agency and need to be in a face to face conversation with customers on a regular basis. We also work with the architectural community to promote our products. More employees means more consistent coverage greater sales of our products. This will generate more revenue for Ohio. | INFOhio The Information Network for Ohio Schools | 4 | 31 to 90 days | \$5,148,000 |
| Franklin | Energy Efficiency Initiative for Commercial Buildi | The DVC will continue to provide equitable access to thousands of high-quality, on-demand video content while encouraging the use & development of 21st century learning skills. INFOhio's DVC enhances the education process for all of Ohio's students, teachers & staff, providing resources for distance learning, professional development & training videos, for only \$0.95 per student per year. Statewide acquisition of these resources will provide substantial savings when compared to individual subscriptions by school districts. This proposal will create four additional full time staff positions. | Evolved Energy Solutions | 10000 | 0 to 30 days | \$15,000,000 |
| Franklin | Ohio Historical Center Collections Storage Facilit | State funding should cover 100% of the cost for commercial building owner/tenants to have a detailed energy and water audit performed (roughly \$5000-\$10000 per audit). Small local companies are capable of the task and would require additional help to handle increased demand, creating the jobs and retaining assets. In addition, the commercial building owner/tenant agrees to pursue defined energy/water conservation measures. The State should cover a percentage of the project cost (25-50%) up to \$250,000. This work can also be performed by Ohio businesses and would benefit a variety of contractors, designers, product suppliers/distributors and transportation of goods. This would also spur job growth, and would benefit multiple businesses and workers in addition to reducing electricity, fuel and water consumption. In general, this is an expansion of the Commercial Buildings Tax Deduction renewed by Congress last fall and of 2008. The benefits should be increased and designed to encompass a larger project scope. The state of Ohio should legislate that Ohio's portion of the money is targeted to benefit Ohio companies and businesses. | Ohio Historical Society | 110 | 0 to 30 days | \$14,300,000 |
| Franklin | Village of Harrisburg - New Water Distribution Sys | This project will construct an urgently-needed facility to house the vast array of priceless objects related to the history of the State of Ohio. The objects are currently stored in warehouses with inadequate space conditioning, limited curatorial laboratory space and no expansion capacity for continually growing need for storage as new history is created. Many priceless and historically significant artifacts currently are warehoused in facilities that are subject to damage or destruction in the event of a train derailment at the adjacent train track. | Village of Harrisburg- M-E Companies, Inc. | 40 | 181 days or more | \$1,500,000 |
| Franklin | Ohio Community Health Center Data Repository and E | The State of Ohio has appropriated funds for project planning, but additional funding is required for constructing and equipping the 61,000 square foot building. The project will provide nearly 40,000 square feet of storage area, 1,000 square feet of archival storage, necessary packing, loading and shipping areas, conservation laboratories, and almost 4,000 square feet devoted to public access and object display. | Ohio Association of Community Health Centers | 15 | 31 to 90 days | \$1,500,000 |
| Franklin | Ohio Historical Center Compact Library Shelving | Construction is expected to take eighteen months and will employ workers from various trades including heavy equipment operators, steelworkers, plumbers, electricians, laborers and sheet metal fitters. | Ohio Historical Society | 8 | 31 to 90 days | \$442,000 |
| Franklin | Sport complex & community center | The purpose of this project is to build an Ohio Community Health Center Data Repository and Exchange. Ohio's Community Health Centers currently provide care to over 420,000 patients (3 million visits) in 2008 representing an individual's ability to pay. Health Centers have added over 100,000 patients in the last 3 years and nearly all were under 200% of the federal poverty limit. With expected growth, Community Health Centers will be the healthcare home to over 1 million Ohioans by 2020. As a whole, Ohio's Community Health Centers are the largest safety-net provider of care in the state of Ohio. These health centers need to be connected so that patient population data (chronic diseases, demographics etc.) can be shared with the state and other partners, operational benchmarking standards can be created for all health centers, health centers can better integrate into local systems of care and information exchanges can be formed. | The Anchor Companies | 50 | 31 to 90 days | \$800,000 |
| Franklin | Medical Device Incubator | opportunity for the records of the State of Ohio, including the State Archives. The continuing stream of records will soon fill the available conventional shelving space. | Opticon Medical | 37 | 0 to 30 days | \$844,000 |
| Franklin | Water and sewer improvements | The purchase and installation of compact shelving will greatly improve the storage efficiency in the facility. It will replace the existing conventional shelving occupying 8,000 square feet with compact storage to contain the same amount of stored materials in an area of only 4,300 square feet. The compact shelving will provide approximately 26,200 total feet of shelving space--nearly doubling the current storage capacity of the facility. This more efficient storage in the existing space allows the space to service our organizational mission for a longer time period before additional space is required. | MANNS Mobile Homes | 5 | 0 to 30 days | \$1,600,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | "Development Village" low cost retail/office space | The development stage, including construction of the building, is the most important part of the project. The building will be built by an Ohio based contractor with electrical, network/plumbing and all infrastructure being built by Ohio based companies creating a wealth of construction jobs and technology jobs. The building will house both restaurant outlets as well as offices for small businesses that need the space and location to conduct business (consulting, technology (software services)) There will also be space reserved for non-profit entities including those that are started with grants from the federal stimulus package. The building will be designed to be eco-friendly in construction and operation. Recycled materials, solar panels, and filtered rain water/snow will all be used in some capacity. | MI Technologies LLC | 5000 | 181 days or more | \$4,500,000 |
| Franklin | Removing closed structure due to high energy cost | Reopening three old guest room buildings. Reopen existing restaurant and have account to sell. Use the money to pay taxes and demolition for three old buildings. Build 75 rooms mid cost hotel using 2.5 ac. of land. Remaining 1.5 AC est. to be sold to fund the project. First we have to pay current lender before we can sell the restaurant. We have obtained the approval from the township and county for the split lot. Current lender is unable to approve our request for selling of the restaurant. The hotel not in operation as of February of 2008. High energy and water lower cost and is not economical to remodel old fab. building to meet today's market. safety and ADA equipment. The current structure was built in 1963/64. Total lot size 4.875AC. | Wahasagar, Inc. | 15 | 181 days or more | \$2,000,000 |
| Franklin | Section 8 Home Ownership Program | This project would be administered by already existing government agencies... Allow Section 8 rent payments to be used to pay for the purchase of a house, owner occupant only. Section 8 payments would go directly to the bank or agency holding the mortgage. | "Concerned Citizen" | 2000 | 31 to 90 days | \$2,000,000 |
| Franklin | The Olive Orchard Expansion | This program might not be suitable for everyone, but certain select people could be chosen by their social agency for admission to the program. There is a research and development program in place to explore and develop alternative forms of energy using solar, clean burning olive oil. This project would be funded through the expansion of The Olive Orchard, a woman-owned small Ohio business that sells the highest-quality olive oil and olive products and accessories. The expansion would necessarily create an increasing number of jobs each year as the business grows. Filling positions such as sales representatives, sales associates and owners of part-time, seasonal jobs. The Olive Orchard is committed to the environmentally friendly idea of "reduce, reuse and recycle." Just a few examples: Shipping containers are reused wherever possible, empty olive jars are converted into olive oil candles, and every order includes tips for reusing each component of the program, from the gift boxes to the empty bottles and jars. Expansion of The Olive Orchard also will ripple outward in the form of increased orders to local and regional suppliers, which in turn will stimulate growth of their suppliers, and in the very spirit of the federal stimulus initiative. Thank you for considering the Olive Orchard. | The Olive Orchard | 30 | 0 to 30 days | \$57,500 |
| Franklin | OSU Public Safety Facility Project | This proposal is for construction of a new public safety facility on the OSU main campus. The facility will house the Police, Police Academy, security office, emergency management, and parking, environmental health services in a unified location. The project will require extensive collaboration with the City of Columbus and surrounding communities. If approved the project is expected to create construction jobs in the short term and longer term public safety positions. | The Ohio State University Police Division | 100 | 181 days or more | \$5,000,000 |
| Franklin | I need a hand, not a handout. | I am looking to get some needed assistance in finishing my bachelor's degree. After two years of studying through courses at Ohio State, I was diagnosed with Multiple Sclerosis almost immediately prior to returning for my third year. The diagnosis in September of 2006. I continued myself to attend class that fall, not realizing how much the diagnosis had actually affected me. I was unable to receive and was unable to make any academic progress for that entire year, failing and dropping more classes than I completed. My plan was to return home and take a few months off so that I could gather myself mentally, get my finances straight and return to school with a new-found ambition. Sadly, that day is yet to come. | Individual | 0 | 91 to 180 days | \$150,000 |
| Franklin | Renovating an existing building into a child care | I currently find myself with over \$55,000 in debt due to student loans in default and the thought of adding to that total sickens and terrifies me. The money that I am requesting is to pay off my current loans and give me the money needed to finish my education. My attitude after being diagnosed with Multiple Sclerosis has changed and I feel that I am ready to make a comeback. Please keep in mind that I am not looking for a handout, my building has 5075 sq. ft. It was formerly a Roadhouse Grill. The inside will need to be renovated to meet the requirements for a day care center. Major parts of the renovation will be removal of walls and equipment from the inside of the building. Second part would be to build walls, update floor and ceiling, install windows, and to make the building energy-efficient and eco-friendly. | Enchanted Child Care | 30 | 91 to 180 days | \$240,000 |
| Franklin | Municipal & Social Services Complex / Streets & Ro | The expected outcome is to be one of the best child care centers/facility and services in Central Ohio. During the renovation period, it is expected to put 30 people to work. Once the day care is running, 15 to 20 people will have a job. Furthermore, a once emptied building will become a home to happy children. | Village of Urbancrest | 30 | 31 to 90 days | \$550,000 |
| Franklin | Prevention based Wellness Benefit | Municipal and social services complex, street roads and alley development. YourQuest Personal Health Solutions was developed by Health-care professionals to create a fun and easy to use Health and Wellness program. It is designed for those that want to learn about, and become self-advocates in their lifestyle choices and to help others do the same. Our mission statement is: LIVE BETTER TO SERVE BETTER YourQuest has taken the guesswork out of creating a Wellness program by using current best-practices that reduce administration time and costs. The YourQuest program is an innovative, turn-key web management tool that is a complete guide to Health and Wellness. We integrate Personal Well-Being, Workplace or Community Wellness, Healthcare providers and the selection of Health and Safety insurance products that reinforce healthy habits while saving money using a Prevention based Wellness Benefit. Using a simple four step process, we teach users how to manage their lifestyle habits in core modular areas. Self-advocates reduce preventable chronic diseases such as heart disease, diabetes, asthma, cancer and dementia caused by unhealthy lifestyle habits. Ongoing engagement is encouraged with Team interaction/competition using health challenges and incentives that offer incentive rewards for one. | YourQuest Personal Health Solutions | 15 | 0 to 30 days | \$100,000 |
| Franklin | Radio Communications Digital Upgrade | The OSU Public Safety Radio System is nearing the end of its service life and needs replacement. This proposal is seeking funds to allow replacement of the trunked radio system designed and equipped to support multiple simulcast transmitter sites and populated with two transmitter sites. This project will include a replacement dispatch console system and microwave radio link for sites and radio system management and alarm sub-system. These improvements will secure service to Columbus main campus and regional campuses. The OSU radio system services as the backbone for Columbus, Franklin county and suburban systems. This project will help to reduce crime, create jobs, provide healthy food and nutrition for needy community residents. The Linden area in Columbus Ohio has a high juvenile incarceration rate. The need to offer alternative programming that can educate youth about community sustainability, alternative solar energy, agricultural development can help reduce recidivism. Currently we are working with the Franklin County Juvenile Restoration Program/community service initiative. Utilizing youth to perform various tasks & soil cultivation, weeding, seeding, mulching, plant irrigation, composting etc. Large vacant lots in the community can become food production sites, solar energy test sites, educational green spaces, reduce expenses in the community, increase produce yields, increase social awareness while providing healthy goods for community residents. Some of the produce can be sold to local grocery stores, open farmers market, donate to local food pantry's etc. This project can produce 25-40 new jobs in the community. We plan to collaborate with local churches, social service agencies, juvenile court system, local public school system, OSU, and local grocery stores. | The Ohio State University Police Division | 25 | 181 days or more | \$3,500,000 |
| Franklin | Reducing Crime Through Urban Farming | Composite electric vehicle. The prototype is all ready under construction at my facility. It is a 4 seat, two door, all composite structure, very strong aerodynamic lightweight vehicle. Starting state of the art electronic controls and lightweight LED light systems, the vehicle will achieve an estimated 150 miles per charge and with an on-board generator can get an estimated 200 mpg, with a range of 900 miles per tank. The vehicle performance will be unmatched with an estimated 0-60mph in 3.5 seconds and electronically limited top speed of 150mph. The structure utilizes 6-2 fiberglass set in an epoxy matrix for unparalleled strength and rigidity. The drive train incorporates current vehicle technology that is proven reliable. If you have any questions feel free to call me at the listed number above. The do door replacement of the front end of the short north and homebases. Two off my employees are about to loose their house also can bid on city work thru Rick Rossard head of sidewalk and Transportation, just want to get people back to work and off unemployment. The bids on my own and never asked the government for help/Now I need badly. Trying to stop the ripple effect. The small companies are what made America. | New Harvest Community Arts Center | 35 | 31 to 90 days | \$500,000 |
| Franklin | Orion Electric Sports Car | Install solar collectors to heat two large indoor pools and supplement hot water systems in locker rooms. Install photovoltaic arrays at Justice Center and Service Center to generate a portion of the facilities' electricity needs from renewable sources. INFOhio, in close partnership with the State Library of Ohio, offers Ohio teachers & student's access to a highly efficient & effective statewide resource sharing network (SVRS). Participation is only for the cost of delivery, which for PV is \$200.00 per drop-off/pick-up location. Because of this fee, many schools are unable to participate & unable to obtain access to the more than one million volumes of material available to be shared in this state. Proposal will provide statewide delivery to schools administered with INFOhio allowing teachers & students access to materials that are already available. The current costs listed are for approx. 3000 buildings & does not reflect what might be possible economies if scale that can be negotiated with a delivery vendor for a statewide proposal. Proposal would also allow for participation in a multi-state collaborative to pursue open-source software. | Lightning Motor Car | 25 | 0 to 30 days | \$250,000 |
| Franklin | Concrete contracting to the public us post office, | Increasing the number of schools configured to use the SVRS will create jobs for INFOhio & presumably the vendor chosen for delivery; currently US Cargo. Cost is \$1.70 per Ohio PreK-12 student per year. This proposal is for 3 years. | a Spagno&Sons/creative concrete llc | 10 | 0 to 30 days | \$60,000 |
| Franklin | Dublin Community Recreation Center Solar Thermal P | | City of Dublin | 5 | 91 to 180 days | \$100,000 |
| Franklin | Photovoltaic Energy for Dublin Justice and Service | | City of Dublin | 12 | 181 days or more | \$150,000 |
| Franklin | INFOhio Connecting Ohio Schools & Public Libraries | Proposed would also allow for participation in a multi-state collaborative to pursue open-source software. Increasing the number of schools configured to use the SVRS will create jobs for INFOhio & presumably the vendor chosen for delivery; currently US Cargo. Cost is \$1.70 per Ohio PreK-12 student per year. This proposal is for 3 years. | INFOhio The Information Network for Ohio Schools | 7 | 31 to 90 days | \$9,165,000 |

| Franklin | Lane Road Branch Library Improvements | Renovations of 10,000 square foot branch library and 3,000 square foot addition to a library built in 1974. Includes replacement of non-compliant ADA elevator; replacement of inefficient heating, cooling & spring new ADA restrooms on main floor; addition of dedicated "teen" areas; expansion of children's area and programs; adds patron computers and workstations; quiet study rooms; quiet reading areas; drive thru drop-off and pick-up station; aging and replacement and the addition across the entrance to the front door; built-in bookshelves; better pedestrian traffic; and to emphasize the "community friendly" atmosphere of the neighborhood. Additional book stacks will enlarge the collection and a re-organized circulation desk and work areas will enhance branch offerings. ADA parking lot will be reconstructed and re-aligned to provide additional ADA parking and to facilitate the drive thru windows. | Upper Arlington Public Library | 80 | 91 to 180 days | \$2,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Franklin | Public Library Construction | 64 public libraries responded. Funds requested range from \$100,000 to \$1,000,000. The SLB oversees the Federal Library Services and Technology Act. Between 1964 and 1996 this program also included a construction piece. As part of the program, the SLB has developed a competitive grant program that focuses on areas of high need and poverty. Because of its history working with public libraries and federal grant programs, the SLB is uniquely qualified to oversee the use of federal Recovery Act funds for libraries. Upon the awarding of funds and depending upon the amount of funds received, the SLB would issue a subgrantee application form to show-ready public libraries. The SLB has a quality proposal selection process in place that would allow selection of projects to be completed quickly and efficiently. The long-term impact will be the improvement of public library facilities leading to the enrichment of the essential services and programs they provide to their communities. | State Library of Ohio | 1000 | 31 to 90 days | \$404,449,436 |
| Franklin | Main Library Capital Improvements | Renovations of 57,200 square foot library, and 36,000 square foot expansion of a library building built in 1957. Includes replacement of non-compliant ADA elevators; replacement of inefficient heating, cooling, lighting systems; new ADA restrooms on the main floor; addition of dedicated "quiet" area; expansion of children's area and programs; adds pattern computers and workstations; quiet study and reading rooms; drive-thru drop-off and pick-up stations; roof replacement; addition enhances "community friendly" atmosphere and encourages pedestrian traffic. Additional book stacks enlarges the collection size, and a re-arranged circulation desk and work area enhances staff efficiency. Programs designed for today and 20 years into the future. | Upper Arlington Public Library | 130 | 91 to 180 days | \$22,500,000 |
| Franklin | Home Heat Micro Energy Project | This project is based on the idea that by using simple mechanical devices and batteries, heat through a resistance element can be produced to assist a home heating system. Here in Ohio we need heat in homes about 7 months out of the year. Most energy projects are macro in nature, this would be micro or household. The product would consist of windmill to provide energy to a generator and then batteries and also to pump fluid to a raised storage tank. When the winds die down the raised fluid would then be used to turn a generator to provide current. Photovoltaic cells positioned on the mill's tower would provide current too. The cells would be positioned for efficiency. (Further expansion involving integration with a ground source would utilize the system for cooling.) The money would be used by Thorndyke for salaries and to work with agencies and universities to build a prototype and provide market justification. Note: the 25 job figure is for 3 full time staff, the other figures would be used for engineering, fabrication and marketing from vendors. If early language and literacy specialists. This network works across the entire early childhood education community and is aligned to existing K-12 literacy initiatives. This network currently serves public, school and mixed market based early childhood programs. It provides comprehensive professional development in early literacy including comprehensive mentoring/coaching of early childhood teachers within their settings. This approach demonstrated the potential to increase local capacity for ongoing program and child outcome improvement. It would be used to provide support for new full-day kindergarten programs to meet their setting. The expansion would prioritize its focus on areas of the state which ODE has identified as having the greatest need for school readiness, including urban centers and SE Ohio. | Thorndyke Enterprises Ltd. | 25 | 0 to 30 days | \$350,000 |
| Franklin | Early Literacy Network | Outcomes: The current project impacts approximately \$47,000 children ages 3-5 annually and this network would at least double that impact as we move forward to expand the project to the new location. Developing markets for recycling materials collected for recycling, but do to economic downturn, the materials will be returned to the landfill. As an established leader and innovator in recycling, we have the expertise to develop these markets that can be replicated throughout the country. We would hire and employ several unemployed, but experienced environmentalists with the ability to research and develop these new and alternative markets, permitting our existing sales team to work with each in assuring the steady movement of scrap/waste material away from landfills. | Center for Special Needs Populations/ECC-net/OSU | 50 | 0 to 30 days | \$1,600,000 |
| Franklin | Development of alternative means of recycling duri | Description: Build park and trail connector between new Town St. bridge and Main Street bridge on former Health Dept. site. Includes walks, parking, lighting, special event area. This will complete the Scioto Mile development plan. Cost: \$2 million Funding Needed: \$2 million Status: Plans developed. Construction can be programmed in with Town Street bridge in 2010. | Grossman Environmental Recycling, Inc. | 6 | 0 to 30 days | \$225,000 |
| Franklin | Scioto Mile--Westbank Park | Redevelop a 3 acre underutilized historic (1872) theater maintenance and storage facility site, currently occupying one block from historic Franklin Park in Columbus. Rehabilitate over 45,000 s.f. in beautiful but rapidly deteriorating historic buildings, add 20,000 s.f. in new construction. Renovate to include retail marketplace (dressed backoffice/casual and low cost monthly rental of permanent booth and/or display case) and for specialty items produced by Ohio craftspersons, artisans, clothing designers, and artists. Add housing and production space for artists/artisans/designers. Locate architectural salvage company, and pair with deconstruction company (green building/demolition technical) within warehouses with deconstruction and warehouse jobs for low income/under-employed workers in Columbus's HUD-designated Employment Zone (area that met federal criteria for "persistent poverty, unemployment, and social distress." Grow Ohio's creative community, to stop brain-drain of Columbus College of Art and Design (CCAD) graduates to New York and Los Angeles. This project will focus on providing workers' start or greater skills with subject areas: mathematics, literacy and sciences to improve students' academic achievement with a major focus on improving mandated state testing scores for A1-6B students. | columbus recreation and parks department | 88 | 181 days or more | \$2,050,000 |
| Franklin | Franklin Park Marketplace | One aspect of the project will be integration of technology (SmartBoards, Digital Projectors, laptops) into the classroom for teachers to help students improve their understanding of academic content and benchmarks set forth by the state. In today's environment, students are actively involved in a digital world; however, teachers have a fear of this new digital environment. This portion of the project will educate teachers on how to use the technology as an instructional tool. A second aspect will be improvement in general teacher understanding of various components of mandated statewide testing, such as, question development, item analysis, scoring breakdowns. This project will give the teacher more confidence when developing classroom intervention strategies for a multiple range of students, particularly A1-6B students. | Columbus Compact Corporation | 65 | 31 to 90 days | \$750,000 |
| Franklin | Improving Teachers to Improve Achievement | City-wide removal of ash boiler potential trees and storm damaged trees, including stump removal, and replanting of street trees in affected areas. Start of Work: March/09 through July/10 | McCann Educational Seminars | 10 | 0 to 30 days | \$250,000 |
| Franklin | Urban Forestry--Storm damaged/Hazard Abatement Re | Construct walking paths loops within 10 high priority city parks located in identified at-risk neighborhoods. Average of 1 mile or less. To encourage healthy lifestyles and wellness benefits. Provide increased access to walking facilities to address high public interest and demand. Recapitalize a business and real estate loan fund administered by the Compact. Original funding was provided by US HUD under federal Empowerment Zone program. Columbus, Cincinnati, and Huntington/Northern were 3 of the 15 Empowerment Zone designees. Program, which was to deliver \$100M to each designee over 10 years, was defunded by Congress in FY 2005. Columbus seeks to recapitalize its revolving loan fund, which makes loans to start-up and expanding businesses in Columbus's most distressed neighborhoods, and to real estate projects in need of gap financing. Loan fund developed and operated to provide capital to hard-to-finance central city projects, targeted low-income, low-credit-comparable sales, high site assembly costs, environmental remediation, high equity requirements, etc. Program creates local jobs in Columbus's most distressed neighborhoods, such as the new Sears-Aldi grocery store on E. Main Street. Compact has bonded \$4M through this program, with current 2.8M in loans outstanding. New capital infusion allows Compact (a US Treasury-certified CDFI) to execute its financial investment strategies in the Columbus Empowerment Zone. Hire 45 seasonal part time employees for job training and development within city parkslands and natural areas. Includes equipment training, forestry, grounds maintenance, ecological management practices. To provide quality job training and to create safe, well-maintained park spaces for the use and enjoyment to hundreds of thousands of residents and visitors. | columbus recreation and parks department | 98 | 0 to 30 days | \$1,324,000 |
| Franklin | Walking Path Fitness Loops | The Miss Black Ohio Pageant of Achievement, INC. In the past, we've solely relied on individual contributions, however, this year we are asking for a small monetary donation in support of the Miss Black Ohio Pageant of Achievement. This will afford us the privilege to serve central Ohio through advancing our mentoring programs, enhancing scholarship awareness, creating skilled workers and establishing educational goals. | columbus recreation and parks department | 53 | 91 to 180 days | \$976,000 |
| Franklin | Community Development Loan Fund | Produce free cultural and community event that attracts estimated 400,000 attendees. 96% of 2008 attendees surveyed stated they would attend 2009 event. Festival features jazz artists on three stages and 22 rib-burners from around the country. Additional economic impact: vendor food and product purchases, visitor spending (hotel, parking, gas, restaurant/entertainment, shopping, etc.) Planning and capital funding in place. Event in 20th year, however local city funds to support event management staff (COPD) and safety services staff (CPD and CPD) endangers continuation of event without transitional funding. Event Dates: July 24-26, 2009 Replaces old inefficient windows with new high energy efficiency within a reservable shelters. Shelters used heavily by public, and reduction of energy costs will provide long term environmental and financial benefits. | columbus recreation and parks department | 33 | 91 to 180 days | \$326,000 |
| Franklin | Parks and Conservation Job Training Program | Provide resources to women and girls to increase the number of women-owned companies in Central Ohio Governments, and to the Public: "Taming our curriculum is "The Dynamics of Management Optimization - The Science of Optimization". | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | Internet2 Preparing Students for College & Careers | Internet2 is the foremost U.S. advanced networking consortium. It empowers institutions and innovators from primary and secondary schools, colleges and universities, libraries, and museums to collaborate in using new technologies, applications and content quickly and effectively. Through ODE, EOCEEN, and ODENet, Internet2 was made available to Ohio's Pre-K-12 community for the first time for the 2008/09 school year. Schools on the I2 Network, which all currently have access to Internet2, are just beginning to recognize the value of Internet2 opportunities. Including: Mgaconference, Inc., NABA's Digital Learning Network, The JASON Project, Manhattan School of Music, Vanoculter Center for Science Outreach and much more. Internet2 is a valuable tool for distance learning education and promotes peer collaboration, critical thinking skills and problem solving skills. Unfortunately, budget issues threaten funding for Internet2 and the associated awareness campaign. This proposal would use stimulus funds to continue the project for the next three years. When considering Ohio's Pre-K-12 student population, the cost of this project is just \$0.10 per student per year. Additional existing stone and wrought iron gates and columns that were installed in 1870 in Goodale Park. Plans are complete, and community has fund raised towards project goals. Replace existing substandard match surfacing with rubberized surfacing within 25 city parks. Includes equipment safety updates and access improvements for children. | INFOhio The Information Network for Ohio Schools | 1 | 0 to 30 days | \$561,000 |
| Franklin | Historic Restoration—Goodale Park | | columbus recreation and parks department | 21 | 31 to 90 days | \$168,000 |
| Franklin | Playground Safety Improvements | | columbus recreation and parks department | 31 | 91 to 180 days | \$1,145,000 |
| Franklin | Historic Restoration—Griggs Park Amphitheater | The Griggs Amphitheater is a landmark structure in Griggs Park constructed in the 1930s of local cut limestone. It was the site of summer concerts, outdoor theater, and children's daycamp activities, until structural issues closed it for public use in 2007. The project will restore the amphitheater to public use by cleaning the stone, disassembling and reconstruction of the murel with new mortar and tuck pointing of the stage and columns. | columbus recreation and parks department | 18 | 91 to 180 days | \$91,000 |
| Franklin | Responding to an Active Shooter - Education Progra | This grant seeks to acquire the videos "Shots Fired" to acquire university affiliates and secondary school students that attend school at The Ohio State University with methods used to survive during an active shooter situation. | The Ohio State University Police Division | 0 | 31 to 90 days | \$15,660 |
| Franklin | Shaggy Dogs Growth | This grant seeks to acquire the videos "Shots Fired" to acquire university affiliates and secondary school students that attend school at The Ohio State University with methods used to survive during an active shooter situation. This expand my established pet grooming shop into the vacant space next to mine. Basically to knock down a wall and expand to the store next to mine. This would create 4-5 new positions at my place of employment. I would be able to serve the public by taking in more pets to be groomed and retail products. | Shaggy Dogs Pet Grooming LLC. | 5 | 0 to 30 days | \$100,000 |
| Franklin | Regional Campus AED Project | This project was originally submitted through the Rural Access to Emergency Medical Devices Grant through the US Department of Health and Human Services and a funding determination has not been made. If funded, this project will provide automated external defibrillator access at OSU Regional Campuses in Marion, Ohio and Wooster, Ohio, as well as outlying research facilities supported by our Wooster campus. | The Ohio State University Police Division | 0 | 91 to 180 days | \$93,660 |
| Franklin | Ohio Historical Center Water Line Replacement | This project will make infrastructure improvements to the plumbing system of the Ohio Historical Center, the headquarters of the Ohio Historical Society, completed in 1970. The water lines are at the end of their life cycle. Additionally, the galvanized main water line has significant leaks and rust on the I2 Network, which all currently have access to Internet2, are just beginning to recognize the value of Internet2 opportunities. Including: Mgaconference, Inc., NABA's Digital Learning Network, The JASON Project, Manhattan School of Music, Vanoculter Center for Science Outreach and much more. Internet2 is a valuable tool for distance learning education and promotes peer collaboration, critical thinking skills and problem solving skills. To accomplish this project, plumbers will replace over half of the water lines in the building. Crews will install new piping, clean out main drain and remove the deteriorated galvanized piping. Work will occur at night to avoid conflicting with daily operations. Construction is expected to take three months and will employ plumbers, welders, mechanics, and laborers. | Ohio Historical Society | 6 | 31 to 90 days | \$484,000 |
| Franklin | Taking Care of Central Ohio Women | Offer classes at local business to support women wellness. Classes offered would include exercise, nutrition, self defense, nutrition on site, offer meal planning, mammograms, career coaching, stop smoking classes, CPR certification, cancer screenings, etc. The program would offer education and support on issues impacting women to improve the health and well-being of our female community. The programs would be designed for women at all ages from teenagers to seniors. Women take care of everyone else first. It is time we take care of the women in our community. This program will do just that in a non-threatening and inviting environment. This preventative approach will also provide education assistance to employees interested in receiving their personal training certificate. Currently we offer this to our employees but have to discontinue due to the current economic situation. | Lifestyles For Ladies Only, LLC | 50 | 0 to 30 days | \$300,000 |
| Franklin | Teen Hangout Facility | Since the youth of Canal Winchester have no safe place to hang out and are causing trouble for local businesses we propose to purchase a local building and renovate it to create a safe place for teens to come hang out after school. Since they will be able to see city games, get their hair with styling, get help with the skills and have a mentor. | Grace Bible Church | 12 | 0 to 30 days | \$650,000 |
| Franklin | Columbus Green Machines | VIABILITY: COM will have four distinct revenue streams: sales of hybrid, electric, and alternative fuel vehicles; service of these vehicles; conversion of diesel vehicles to biodiesel and gasoline vehicles to ethanol for businesses and individuals; and sales of fuel that is refined on location from commercial waste oil and vegetable matter. USE OF FUNDS: Down payment for small garage and lot, (potential site already selected), purchase service and fuel refinement equipment, hire and train staff, supply an initial inventory of vehicles and parts, install solar panels for power needs, and promote the business through traditional and new media streams. EXPECTED OUTCOMES: Create 10-20 jobs, create high school and college internship programs, reduce tons of carbon emissions, attract other eco-friendly businesses and residents to Columbus and Ohio. | Columbus Green Machines | 10 | 31 to 90 days | \$500,000 |
| Franklin | New Officer Employment Program | This proposal is for the start up costs to enable The Ohio State University Department of Public Safety Police Division to hire 6 new officers. The positions will be allocated to specific programs and functions not currently covered. These are: Regional campus officer at Mansfield, Lima and Newark, an investigation liaison officer at OSU Med Center, an officer assigned to threat mitigation & digitality protection and an additional time prevention officer. | The Ohio State University Police Division | 6 | 0 to 30 days | \$1,225,000 |
| Franklin | C.H.A.M.P.I.O.N.S. | TO PURCHASE A FACILITY: EDUCATIONAL MATERIALS, COMPUTERS, ETC. IT WILL BE USED TO EDUCATE URBAN YOUTH ON HOW TO TAKE PRIDE IN THEIR COMMUNITY AND WILL ALSO PROVIDE THEM WITH A PLATFORM TO DISCUSS THE ISSUES IN THEIR COMMUNITY. DURING THIS PROCESS WE AT CHAMPIONS WILL PROVIDE THE BASIC RESOURCES AND SUPPORT TO INDIVIDUALS IN NEED. OUR FOCUS IS TO TAKE OUR NEIGHBORHOODS BACK FROM THE NEGATIVE INFLUENCES THAT HAVE The intent of this program is to double the current number of instructors, provide the needed equipment, and revitalize a desperately needed program for our community. Rape Aggression Defense courses can't be taught, fees of charge, to provide services in our community with self-defense skills. | WOMEN OF VIRTUE | 30+ | 91 to 180 days | \$537,000 |
| Franklin | Rape Aggression Defense Expansion Program | | The Ohio State University Police Division | 0 | 0 to 30 days | \$13,880 |
| Franklin | Morse Road Transfer Station Environmental Reconst | Morse Road Transfer Station Environmental Reconstruction Project: This facility is one of three transfer facilities operated by SWACO, a regional government agency. It accepts garbage, primarily from the City of Columbus residential collection fleet, and transfers it to SWACO's Franklin County Transfer Landfill. This important part of the community's infrastructure makes it possible for the City of Columbus to collect its residential garbage daily. This facility services garbage collection vehicles in Northeast Columbus, a rapidly growing area, and is located in direct proximity to the Hop Creek Water Plant "rear well" system. However, the transfer facility is nearly thirty-three years old, and is in dire need of replacement. It is an essential piece of infrastructure for Franklin County, the City of Columbus and SWACO. SWACO proposes to reconstruct the existing facility with an enlarged, regional transfer facility capable of servicing the needs of Columbus, Waterville, New Albany, Galena, and Southwestern Delaware County. Additionally, this project will make possible environmental upgrades that will allow for greater recycling, and permit the possible use of renewable compressed natural gas derived from SWACO's Landfill. This project will also safeguard the Hop Creekman | Solid Waste Authority of Central Ohio | 20 | 91 to 180 days | \$11,000,000 |
| Franklin | Resubmission: Systemwide Sanitary Sewer Evaluation | Systemwide study of Village's entire sanitary collection per requirements of the OEPA, who issued a Director's Findings and Orders document on 8/11/09. The DFO contains 5 main requirements: 1) Conduct a systemwide Sewer System Evaluation Survey; 2) Document & report Village's CDMO program to OEPA; 3) Conduct & complete Sanitary Sewer Overflow reporting & records maintenance; 4) Identify & implement a Public Notification Program; 5) Prepare & implement an SSO Emergency Response Plan. The SSES shall: Identify hydraulic & structural deficiencies that cause contribute to SSO; include flow monitoring & estimate peak flows; identify sources of infiltration/inflow into the system; estimate benefits of elimination of sources; identify improvement projects and schedule to eliminate deficiencies; identify alternative projects and schedule to minimize sources of excessive I&I into the sewer system. Outcome: Identification of capital projects that will result in a reduction of negative impacts on the environment. | Village of Groveport | 30 | 0 to 30 days | \$505,000 |
| Franklin | 3C Passenger Rail Service Construction | This is a resubmission of a project, which updates the number of jobs to be created. Funding will be used for capital infrastructure, equipment purchases, station improvements, and other costs needed to implement start-up, conventional speed passenger rail service in the Cleveland-Columbus-Cincinnati corridor. Interstate 71/Ohio State Route 665 Interchange Hough Road Reconstruction: The Franklin County Sanitary Landfill, a regional landfill facility, environmentally sound and operated, and existing parts of six counties, is located on Ohio State Route 665. It is situated primarily by utilizing Interstate 71 south of Grove City, Ohio. The 71/US-665 interchange not only serves as the gateway to this vital piece of regional infrastructure, but also serves a growing commercial and residential corridor. The U.S. Department of Transportation and the Ohio Department of Transportation have recognized the importance of upgrading the interchange. However, they have been unable to secure the funding for the entire project. SWACO faces daily obstacles in maintaining unimpeded access to the regional facility. Further as an adjacent property owner, SWACO faces the prospect of a significant property assessment for construction of the project. SWACO is requesting funds for a portion of the project, the Hough Road extension, which will greatly improve some of the access constraints found in utilizing SWACO's regional landfill facility. Construction of this portion to the facility is ongoing. The project will also include: | Ohio Rail Development Commission | 6992 | 181 days or more | \$250,000,000 |
| Franklin | Interstate 71/Ohio State Route 665 Interchange Hau | | Solid Waste Authority of Central Ohio | 15 | 31 to 90 days | \$4,000,000 |
| Franklin | Spend the interest next year! | For the money it is savings account generating 1-2% interest. Next year we will have between \$80 and \$100 million to spend on anything we like. And the year after that we have another \$80-\$100 million to spend. Guess what, we will have that money every year to spend above and beyond our normal revenue. \$160 million could pay for 4000 jobs making \$48k per year. Obviously the state would collect income tax revenue from these jobs which could be added to the pot to generate more interest. Too many people have won the lottery and fled for bankruptcy within 5 years - please Ohio, sit on the money for one year and then start funding projects. We will be spending the guaranteed money we have instead of money we hope to receive. | Ohio Resident | 4000 | 181 days or more | \$8,000,000,000 |
| Franklin | Young Road Widening Project- | Young Road Widening Project: In 2008 SWACO completed construction of a Green Energy Centre, which utilizes technology to create clean compressed natural gas from landfill gas. A significantly larger project is currently undergoing final design by a private entity. The combined effect of both of these projects would be to create 3,000,000 gallons equivalent of renewable natural gas each year. In order to fully utilize this renewable fuel for commercial and private vehicles, SWACO needs to upgrade the intersection of Young Road and State Route 665. The upgrade will increase the vehicular throughput of the intersection, and allow to accept large trucks including semi-trucks and fuel distribution trucks. This project would make it possible to create a regional, renewable compressed natural gas fueling facility, as well as serve to further develop the green infrastructure/renewable fuel availability in central Ohio. This will allow for a reduction in carbon emissions and an improvement in regional air quality. This project can be completed by May 2010. | Solid Waste Authority of Central Ohio | 3 | 31 to 90 days | \$2,500,000 |
| Franklin | Renewable Compressed Natural Gas Vehicle Purchase | Renewable Compressed Natural Gas Vehicle Purchase and Refill: SWACO wishes to help local businesses in its regional take advantage of renewable natural gas produced at SWACO's landfill, and derived from landfill gas. Because of its investment in technologies to create landfill gas, a contributor to green house gas emissions, SWACO and its private partner will be able to produce renewable compressed natural gas for use by municipal fleets in the region. The renewable natural gas project will produce approximately 3,000,000 gallons equivalent of renewable compressed natural gas each year, all of it derived from garbage delivered to the SWACO landfill. In order to improve air quality within the district and to our growth of alternative fuel vehicles SWACO wishes to help cover the City of Columbus Public Safety Division Fleet from diesel to natural gas derived from the landfill. The program would also help purchase or convert the light and heavy duty trucks owned by SWACO and other cities and townships in the region. These purchases and refills can begin upon receipt of funds. | Solid Waste Authority of Central Ohio | 4 | 0 to 30 days | \$4,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | In the Works | Temporary employment agency targeting hard to place workers, particularly homeless individuals, persons with prison history, those with poor job history. Job placement of approximately 100 persons as a living wage. Needed life skills supports, training and linkage to stable and long-term employment. Barriers to employment will be eliminated except to comply with law. Transportation to job site provided if van can be secured. Have been approached by one industry needing workers to erect displays at large commercial stores. Will need to develop contracts with employers. | Columbus Coalition for the Homeless | 100 | 31 to 90 days | \$50,000 |
| Franklin | Screen Printing Business | Because it is not for profit, organization, will not exploit labor pool. Creates a screen printing business that creates job opportunities as well as school internships for youth wanting to learn a trade or gain work experience/technical credit. | Everett Enterprises | 4.5 | 91 to 180 days | \$500,000 |
| Franklin | Critical Incident Response Service | This program represents an innovative project that will keep law enforcement current in their knowledge of the personal after-effects of stress associated with working with unique and serious crimes. By virtue of the high-risk profession of law enforcement, officers and their families may at some time become victims of stress and psychological trauma. The most significant of all recognized risk factors for the development of post-traumatic stress or Critical Incident Stress is the direct, or indirect, exposure to a highly traumatic event. There are three well-described potential causes for these risks: law enforcement officers are at risk for all three levels of incidents. The CIRS Program is a statewide law enforcement based program that provides Critical Incident Stress Management (CISM) services to law enforcement persons - including both rural/urban departments and volunteer-paid officers. It has been described that the short and long term effects of stress are perhaps the single most health risks to members of this occupation. | Fraternité Of Police Of Ohio | 2 | 0 to 30 days | \$130,000 |
| Franklin | Lighting and obstruction removal | lighting and obstruction removal | Columbus Regional Airport Authority | 4 | 91 to 180 days | \$225,000 |
| Franklin | Georgesville Road - Sullivant to Broad | Add additional lane and adjust lane alignment on Georgesville between Sullivant and Broad. Add sidewalks. Add street lights. | Franklin County Engineer | 72 | 181 days or more | \$6,400,000 |
| Franklin | Platinum Group Metal Refining | Arlington PMR is limited scale refining and recycling facility is seeking funding to become a large scale refinery and recycler. Our goal is to become the largest refiner in Ohio. We have the technical capabilities to do Platinum Group metals and other precious and semi-precious metals. We can reclaim metals used for industrial and alternative energy systems. We will also offer high quality alloys to support our business. To achieve our goal of adding value and wealth to Ohio we seek funding to help grow and establish this business. | Arlington PMR | 10 | 0 to 30 days | \$280,000 |
| Franklin | Crime Scene Team Expansion Project | This project will expand the existing Ohio State University Police Division Crime Scene Team from ten members to twelve and would purchase additional vehicles for use to store and transport equipment. | The Ohio State University Police Division | 0 | 0 to 30 days | \$62,000 |
| Franklin | Urban Neighborhood Advocacy | The Grotto Church Event Space and Urban Neighborhood Advocacy Center is designed to provide charities of all types a venue to raise and solicit fundraising dollars, while at the same time promoting the urban renewal effort in Columbus, OH highlighted by our grant from Michael B. Coleman. Our intention is to try to keep gross margins below 10% and to reinvest any profits not earmarked for charity to the Urban Neighborhood Advocacy programs. (programs will be highlighted in later proposals or by request) | The Grotto Event Space and Urban Neighborhood Adv | 5 | 31 to 90 days | \$275,000 |
| Franklin | Central College Road over Big Walnut Creek | The ultimate goal is to create a model for how mid west cities can beautify, monetize and effectively utilize existing urban centers, buildings, and its residents to create a better way of life for current and future generations. There will be an emphasis on the inner city neighborhoods. | Franklin County Engineer | 16 | 91 to 180 days | \$960,000 |
| Franklin | Video Evidence Program | Replace the existing, deteriorated deck on this bridge. Minor abutment and pier work will also be included. | The Ohio State University Police Division | 0 | 0 to 30 days | \$85,000 |
| Franklin | Podcast, Television Documentary Series | This program seeks to place in-car video recording equipment, along with the required storage devices, in our police cars for the purpose of enhancing the investigation of motor vehicle crimes, and assisting with the investigation of citizen complaints. There is uncertainty and confusion surrounding the Stimulus Initiative. People are apprehensive about where and how their tax dollars are being spent. Ohioans are too busy making ends meet to really know and understand if this money has made any real difference. IN Line Productions proposes a series of VIDEO PODCASTS and TV specials to document, inform and entertain Ohioans on the status of their tax dollars at work in rebuilding the state and the country. We are uniquely positioned as a video and multimedia production boutique to travel the state as a narrator's voice to document uplifting stories, video tape meetings and record present moments in the state of Ohio's return to prosperity. Each story will be posted on iTunes and other online video aggregators and available to all Ohioans and American's with online access. In addition, we will package a series of 30 minute docu-reality shows that will be available to all Ohio television outlets free of charge. | IN Line Productions Inc. | 10 | 0 to 30 days | \$150,000 |
| Franklin | Refining of Indium from Manufacturing and Electron | Indium is a critical metal for the manufacturing of LCD screens, solar cells, CPU chips, and optical sensors. Indium Tin Oxide (ITO) is an important indium compound that is extensively utilized in the spinning and semiconductor fabrication industries. Currently, ITO is recovered by regnigriding the alloy and then treating the resulting solids or other waste items. At present the US indium recycling industry handles ITO by regnigriding. Recovery of the indium metal from ITO and indium solder and mounting layers is being conducted in Korea. Arlington is now capable of ITO processing. Arlington PMR processes to offer indium metal recovery as both a service and as a direct metal supplier to industry. Direct recovery of high purity electronic grade indium will be a unique capability for an Ohio company, and perhaps nationally. To support this effort, Arlington is expanding financial resources to expand its current limited capacity to recycle indium to commercial scale. By expanding our industrial capacity and capability, Ohio based manufacturing jobs will be created. Manufacturers of solar cells will also have a vendor to reclaim their indium scrap. There exists an urgent need to develop a wind turbine which is capable of opening up currently uneconomical tracts of land to electricity generation by means of wind power. | Arlington PMR LLC. | 10 | 0 to 30 days | \$280,000 |
| Franklin | Wind Turbine For Moderate-To-Low Wind Velocity Fie | Hall Technologies Inc has a novel wind turbine design which is intended to exploit lower average wind velocities and extract useful amounts of energy therefrom. A prototype design must first be constructed, instrumented, tested, and proven in a laboratory wind tunnel before a quarter scale or half scale prototype is built. We are initially seeking research grant monies to demonstrate the technology through the proof-of-concept stage. Sincerely, Herb Hall | Hall Technologies Inc | 100 | 0 to 30 days | \$480,000 |
| Franklin | Portable and Mobile Radio digital upgrade | This project is to purchase approximately 1700 digital compatible portable and mobile radios. A communications system upgrade is underway due to impending requirements of the FCC. Replacing funds can be leveraged with additional dollars to replace current analog radios with fully digital radios on the university system. Advantages to digital radio technology are reliability, signal strength and clarity and improved area coverage. This also will give OSU Public Safety users greater interoperability within the state and region. | The Ohio State University Department of Public Saf | 50 | 181 days or more | \$3,000,000 |
| Franklin | Georgesville-Wrightsville Road over Smith Ditch | Replace the existing, deteriorated deck on the bridge. | Franklin County Engineer | 27 | 91 to 180 days | \$1,200,000 |
| Franklin | Revision to Previously Submitted-Morse Road Transfe | Morse Road Transfer Station Environmental Reconstruction Project. This facility is one of three transfer facilities operated by BWACO, a regional government agency. It accepts garbage, primarily from the City of Columbus residential collection fleet, and transfers it to BWACO's Franklin County Sanitary Landfill. This important part of the community's infrastructure makes it possible for the City of Columbus to collect its residential garbage daily. This facility services garbage collection vehicles in Northwest Columbus, a rapidly growing area, and is located in direct proximity to the Hot Creekman Water Park "water wall" system. However, the transfer facility is nearly 40 years old, and is in dire need of replacement. It is an essential piece of infrastructure for Franklin County, the City of Columbus and BWACO. BWACO proposes to replace the existing facility with an enhanced, regional transfer facility capable of servicing the needs of Columbus, Westerville, New Albany, Galena, and south/eastern Delaware County. Additionally, this project will make possible environmental upgrades that will allow for greater recycling, and permit the possible use of renewable natural gas derived from BWACO's Landfill. This project will also safeguard the Hop Creekman. | Solid Waste Authority of Central Ohio | 20 | 91 to 180 days | \$11,000,000 |
| Franklin | Kunz Road over Hellbranch Run | Full replacement of the existing, deteriorated bridge. | Franklin County Engineer | 9 | 181 days or more | \$400,000 |
| Franklin | Revision to Previously Submitted-Interstate 71/Ohio | The Franklin County Sanitary Landfill, a regional landfill facility, governmentally owned and operated, and serving parts of six counties, is located on Ohio SR 666. It is situated primarily by I-71 south of Grove City, Ohio. The I-71/SR 666 interchange not only serves as the gateway to this vital piece of regional infrastructure, but also serves a growing commercial and residential corridor. The U.S. Department of Transportation and the Ohio Department of Transportation have recognized the importance of upgrading the interchange. However, they have been unable to provide the funds necessary for the entire project. BWACO has daily operations in maintaining access to this regional facility. BWACO has the prospect of a property assessment for construction of the project. BWACO is requesting funds for a portion of the project, the Haggin Road extension, which will greatly improve some of the access corridors found in utilizing BWACO's regional landfill facility. Construction of this portion of the project will also serve to facilitate the remainder of the interchange upgrade. The project will also facilitate the growth of other public and private development. | Solid Waste Authority of Central Ohio | 15 | 31 to 90 days | \$4,000,000 |
| Franklin | Ohio State Housing | This is a 486 bed student housing project situated directly across the street from the new Ohio State Medical Office Facility at the corner of Third Ave and Chetangy River Road. This land is under contract and zoned. The building plans are being completed with construction to start this summer and completion ready for student occupancy in fall of 2010. | Virginia Homes, Ltd. | 200 | 91 to 180 days | \$22,611,700 |
| Franklin | Revision to Previously Submitted-Young Road Widening | Revised Project - Young Road Widening Project - In 2008 BWACO completed construction of a Green Energy Centre, which utilizes technology to create clean compressed natural gas from landfill gas. A significantly larger project is currently undergoing final design by a private entity. The combined effort of both of these projects would be to create 1,000,000 gallons equivalent of renewable natural gas each year. In order to fully utilize this renewable fuel for commercial and private vehicles, BWACO needs to upgrade the intersection of Young Road and State Route 666. The upgrade will increase fuel with vehicular throughput of the intersection, and allow for to access large trucks including semi-trucks and fuel distribution trucks. This project would make it possible to create a regional, renewable compressed natural gas fueling facility, as well as serve to further develop the green infrastructure/renewable fuel availability in central Ohio. This will allow for a reduction in carbon emissions and an improvement in regional air quality. This project can be completed by May 2010. | Solid Waste Authority of Central Ohio | 3 | 31 to 90 days | \$2,500,000 |
| Franklin | Community Crime Awareness | The targeted populations to be served by this funding are the urban, African American, newcomer, GLBT, and women's communities, as well as other progressive-minded readers, listeners, and viewers. This program will provide direct, targeted, timely, relevant information and outreach to these communities who are threatened by those "mainstream" or "bankable" media, and will focus specifically on crime prevention, community alerts, domestic violence prevention, hate crimes prevention, public safety, self-defense, crime-of-the-week alerts, and crime and violence statistics directly affecting these communities. The program will heighten awareness and provide in those communities and educate community members so that they do not become victims. Finally, the program will assist local law enforcement in reporting crimes, and identifying and capturing suspected perpetrators. Funds will provide a weekly full page or corner in Outlook Weekly as well as online and email coverage. | Outlook Media Inc | 2 | 0 to 30 days | \$55,950 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Franklin | Green Earth Awareness | The targeted populations to be served by this funding are the urban, African American, newcomer, LGBT, and women's communities, as well as other progressive-minded readers, listeners, and viewers. This program will provide direct, targeted, timely, relevant information and outreach to these communities who are otherwise overlooked and underserved by more "mainstream" or blanket media, and will focus on environmental health issues and trends such as food choices for personal and planetary well-being; innovative green products, ideas and solutions; personal finance with a green conscience; alternative fuel vehicles; green travel trends and destinations; resource-conscious consumer products and services; resources for eco-awareness and action; and answers to environmental questions. The program will highlight awareness and educate community members. Finally, the program will assist in energy conservation, increased recycling, and enhanced green living trends and habits. This funding would provide a weekly full page in Outlook Weekly, as well as online and email content and updates for one year. | Outlook Media Inc | 2 | 0 to 30 days | \$55,950 |
| Franklin | Community Health and Wellness | The targeted populations to be served by this funding are the urban, African American, newcomer, LGBT, and women's communities, as well as other progressive-minded readers, listeners, and viewers. This program will provide direct, targeted, timely, relevant information and outreach to these communities who are otherwise overlooked and underserved by more "mainstream" or blanket outreach. This program will focus on health and wellness issues, including smoking, obesity, stroke prevention, heart disease, sexual health, behavioral and mental health, self-esteem, substance abuse prevention, and other healthcare issues and concerns specific to the communities we serve. This funding would provide a full page weekly content in Outlook Weekly, as well as online and email updates for one year. The Ohio to Erie Trail spans the state of Ohio from Cincinnati to Cleveland following lands formerly owned by railroads and canals. When complete, this trail will connect four of Ohio's metropolitan cities, a dozen large towns and numerous small villages - all done on easily accessible, paved trails, that are completely separated from highways and automobiles. | Outlook Media Inc | 2 | 0 to 30 days | \$55,950 |
| Franklin | Ohio to Erie Trail, Camp Chase segment, Phase 1 | The Camp Chase Trail, the Central Ohio segment, is a joint project with the Franklin County Engineer, Columbus and Franklin County Metro Park and City of Columbus Recreation and Parks, to construct 11 miles of a shared use trail with rail system. The Camp Chase Trail will be constructed on the existing Camp Chase Railroad through easements obtained by Metro Parks. Phase One is from Wilson Road in Madison County to Knopp Road in Franklin County, a total of 6.6 miles. | Columbus and Franklin County Metro Parks | 15 | 91 to 180 days | \$1,000,000 |
| Franklin | Helping the Uninsured | 1.5 million Ohioans are uninsured. 1) the number of programs and insurance plans available is vast; 2)many conditions are complex / difficult to navigate. Solution: Online Ohio Health Plan Comparison Connector http://www.ohiohealthfinder.com • Improve accessibility to affordable plans, increase carrier pricing/underwriting competitiveness via increased visibility of plan designs/costs/benefits. No-fee telephony benefit consulting • Licensed agents perform a Needs/Situational Analysis (insurability/affordability) to find best solution. Expand call center help lines equitably from 9:00-5:00pm to 10:00-9:00pm. Awareness & Free Info Sessions • Drive awareness via Facebook/Twitter/YouTube/Google ads & live-virtual info sessions to educate & guide Ohioans. Spiralight Group helped 6,000 Ohioans in 2008 research their health insurance options through an online comparison connector http://www.ohiohealthfinder.com & call center staff who offered benefits consultants to help Ohioans explore their health benefit options. SCHP, Medicare, Medicaid, COBRA, group/individual health insurance. The Ohio to Erie Trail spans the state of Ohio from Cincinnati to Cleveland following lands formerly owned by railroads and canals. When complete, this trail will connect four of Ohio's metropolitan cities, a dozen large towns and numerous small villages - all done on easily accessible, paved trails, that are completely separated from highways and automobiles. | Spiralight Group Inc | 60 | 0 to 30 days | \$2,500,000 |
| Franklin | Ohio to Erie Trail, Camp Chase segment, Phase 2 | The Camp Chase Trail, the Central Ohio segment, is a joint project with the Franklin County Engineer, Columbus and Franklin County Metro Park and City of Columbus, Recreation and Parks, to construct 11 miles of a shared use trail with rail-system. The Camp Chase Trail will be constructed on the existing Camp Chase Railroad through easement obtained by Metro Parks. Phase Two is from Knopp Road to Galloway Road a total of 2.4 miles. | Columbus and Franklin County Metro Parks | 15 | 181 days or more | \$2,000,000 |
| Franklin | MSW Autoclave Processing | Estech developed MSW-Autoclaving and invested over \$20 million (partially financed) in a successful full scale prototype. Revisions/improvements use clean cellulose fiber extracted from the autoclave to produce steam and electricity. The system essentially replaces sanitary landfills (and thus is an infrastructure project too), while creating marketable green energy and recovering metals and plastics for reuse. Testing of components has been completed at various scales. It is ripe to scale up to full scale and build it at a central Ohio site. Design/construct can begin immediately and will create about 30 high quality jobs through the next year. The Camp Chase Trail will be constructed on the existing Camp Chase Railroad through easement obtained by Metro Parks. Phase Two is from Knopp Road to Galloway Road a total of 2.4 miles. Program provides good and secure jobs, infrastructure improvements, and green energy. External funding for the "first-of" is essential because of the current economic climate. | Estech USA LLC | 54 | 0 to 30 days | \$35,000,000 |
| Franklin | Employ Ohio Project - MYSMARTPAC Inc | MYSMARTPAC is a company that is headquartered in Columbus OH, but has outsourced assembly facility outside of OHIO. The Company will like to move its assembly facility in house to Columbus Ohio closer to its HQ. With this moves comes the need to set up an assembly plant here in Columbus which will employ up to 60 Ohio workers. The jobs will be NEW jobs in OHIO, which will generate tax revenue to the city and state while providing job opportunities for Ohio citizens. ABOUT MYSMARTPAC INC MySmartPac Corp manufactures innovative collection of disposable personal care products designed and packaged for people on-the-go. Our products simplify travel by providing carry-on ready, disposable, beautifully designed and conveniently packaged high quality personal care products for the discerning traveler. We also manufacture emergency kits for different life styles like Hunting, Fishing, Skate boarding, and Camping to name a few. www.mysmartpac.com 1 614 923 8620 | mysmartpac Inc | 60 | 0 to 30 days | \$2,500,000 |
| Franklin | Two-Way Radio Communications System | Purchase of statewide trunked two-way landmobile digital radios. System used to enhance "emergency response" to natural disasters, energy security and rural electric grid reliability. Would include 650 mobile radios, 212 portable radios and 34 control stations. Counties (77) included in this program are Adams, Allen, Ashland, Athens, Auglaize, Belmont, Brown, Butler, Carroll, Champaign, Clark, Clermont, Clinton, Columbus, Coshocton, Crawford, Darke, Deane, Delaware, Erie, Fairfield, Fayette, Franklin, Fulton, Gallia, Hamilton, Hancock, Hamilton, Hardin, Harrison, Henry, Highland, Holmes, Huron, Jackson, Jefferson, Knox, Larimer, Licking, Logan, Lucas, Madison, Marion, Mercer, Miami, Meigs, Monroe, Montgomery, Morgan, Morrow, Muskingum, Noble, Paulding, Perry, Pickaway, Pike, Plebe, Putnam, Richland, Ross, Sandusky, Scioto, Seneca, Shelby, Stark, Tuscarawas, Union, Van Wert, Vinton, Washington, Wayne, Williams, Wood, Wyandot. | Ohio Rural Electric Cooperatives | 1 | 91 to 180 days | \$3,400,000 |
| Franklin | Wellness Management and Recovery | This project would support the expansion of a transformational therapeutic intervention for youth and transitional youth on holistic wellness and education. The project is based on a psychoeducational curriculum that promotes greater awareness and understanding of holistic health, setting goals for wellness, and developing skills that support empowerment and self-direction for achieving goals. This project is an extension of an empirically supported program developed for adults with psychiatric and co-occurring health and substance use disorders. Outcomes include the number of community service agencies implementing the project, number of persons who complete the program, and measurable changes in wellness behaviors, empowerment, and quality of life. Outcome measures will also include cost-effectiveness of the program for youth identified as high risk for future health problems (i.e. family history, substance abuse, poverty, etc.). The purpose of this project is to help renovate neighborhoods in Columbus where homes are in need or repair. It will help in 2 areas: 1) help improve areas where there have been reduced home values due to neglected homes 2) help put people to work by hiring those in need to help do the work 3) will provide affordable housing to individuals when finished. The funds will be utilized to help purchase homes in the City of Columbus neighborhoods that need repair and to also hire out of work/stuggling individuals in those neighborhoods to help renovate and remodel the homes. The funds will be used as seed money to get the program going but it will eventually be able to grow on its own success and from investment from others. | Southeast, Inc. | 3.5 | 0 to 30 days | \$400,000 |
| Franklin | Columbus Neighborhood Collaboration | The funds are needed as lending has become increasingly harder and by using the stimulus money added closing costs, lender financing costs, etc. can be eliminated/reduced and that savings can be passed on to the buyer/center after rehabilitation. In this current economy where people are losing their homes and unable to obtain loans through banks this program will help to increase affordable living while also creating jobs. The purpose is to help renovate neighborhoods in Columbus where homes are in need or repair. It will help in 2 areas: 1) help improve areas where there have been reduced home values due to neglected homes 2) help put people to work by hiring those in need to help do the work 3) will provide affordable housing to individuals when finished. | RC Realty Investments | 100 | 31 to 90 days | \$500,000 |
| Franklin | Character Based Environmental education programs | We presently have one such show touring with limited impact and success due to the economy. With a stimulus grant we believe we can sign on a very recognizable character as the spokesperson for this program. That momentum would fuel sponsorship allowing this message to be carried to a variety of audiences at no cost to the show. We anticipate, based on the total shows needed, we would employ multiple performing crews as well as many back-end support personnel. The Mascot Organization is an Ohio based company that has been in business for 6 years. We are a growing small business that contracts mascot jobs to costume performers all over the country. We service a number of mascot programs for a variety of well known entertainment and retail companies worldwide. For additional information please visit www.mascot.org or call us at 1-877-9-MASCOT | The Mascot Organization LLC | 100 | 0 to 30 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-------------------------------------|----------------|--------------------|---------------------------|
| Franklin | Art School for Children | With many after school programs and summer activities/camps for children being cancelled due to budget constraints I intend to open an art studio for children of all ages. To support children in the arts and children with special needs in the arts. I would also have a traveling teacher to go into communities that need programs such as this but are not available. Children will learn to work with all mediums of art with the goal of developing self-confidence, self-esteem and strength in working on a project from start to finish. I have seen how these programs can be tremendously beneficial for the children as one to one instruction in their homes. Children I have been an instructor and it has had outstanding results. The arts are something that our children must have positive access to as it will enrich the children's lives. | none | 3 | 91 to 180 days | \$20,000 |
| Franklin | Railroad Crossing Safety Improvements and Wayside | The City of Worthington has 3 at-grade railroad crossings within close proximity to each other and on busy roads (Wilson Bridge, Worthington, Salina, and Shrock Roads). This project proposes to install constant warning system and wayside horn technology that would improve the safety of each of these at-grade crossings. The City contracted for a safety analysis by a qualified engineering firm and has submitted a study to the Ohio Rail Development Commission. The City has already completed the wayside horn design. In addition to enhancing safety, the project is expected to reduce noise pollution from train transits in many adjacent residential neighborhoods. | City of Worthington | 15 | 181 days or more | \$950,000 |
| Franklin | AirPlay Park New Business Start-up | new jobs, habitat improvement, and tax revenue generation in Northland redevelopment district in Columbus. AirPlay Park is an established LLC in Ohio having difficulty getting its SCORE/SBA built business plan underwritten by local banks due to lightning credit. AirPlay Park would utilize an existing 40,000 square foot facility vacant for 7 years and create a family entertainment complex. Supporters have been sourced and general management can be ready to begin in a very few months should funding become available to reach a higher equity investment and thus get loan approved through traditional lenders. We anticipate this family-friendly destination will draw patrons from surrounding suburbs to an area struggling to remain a vibrant retail district in Northeast Columbus. | AirPlay Park, LLC | 30 | 91 to 180 days | \$450,000 |
| Franklin | Davis Estates Waterline Improvement | This project would replace an aging 1940's waterline in Worthington that is prone to breakages. It would provide new water service to approximately 90 homes on 5 residential streets and eliminate environmental impacts that currently result from frequent water line breaks. Design will be completed by mid March. Construction of this project could begin in July of 2009 and be completed by May 2010. | City of Worthington | 12 | 31 to 90 days | \$350,000 |
| Franklin | Weatherization and Improving Energy Efficiency of | Perform energy and performance evaluations of residential properties and make improvements to these homes based on test results. Improvements will reduce energy requirements for each home and help those that are struggling to pay bills by reducing energy costs. Selection of homes for improvements would be based on energy and performance evaluations. | Nicholson Builders Inc. | 15 | 0 to 30 days | \$1,500,000 |
| Franklin | Federal Highway Renewal | Replacement of 1.25 miles of state highway located on the I-71/70 interchange exchange proximity to major services to an intercity freight terminal. Service company will develop strategic measures to improve visualization during laparoscopic operations. The company has recently entered the market with the Fluobard system, the first device ever developed that keeps the surgical lens clean during laparoscopic surgery. Product launch has been very successful, and the system is selling quite well. Technical, market, price, and regulatory risk have been removed. | Hurt's Trucking & Demolition | 15 | 0 to 30 days | \$500,000 |
| Franklin | Developing Medical devices that improve surgical v | The company will now develop additional products that fill out and augment the Fluobard line of devices. Specifically, the Fluobard concept can now be applied to other types of endoscopic surgery, including robotic surgery. Specifically, funds will be used to expand engineering resources, and then most importantly, expand the sales operation in order that our Ohio venture has a national footprint. The company expects to add 20 jobs over the next two years, including the recruitment of well-paid executive and professional talent to the region. | Minimally Invasive Devices | 30 | 0 to 30 days | \$1,000,000 |
| Franklin | Mascots in Motion | Our proposal will create jobs for educators and entertainers by producing touring costume character based shows to tour the state of Ohio. Our purpose is to teach family audiences how to implement a healthy life style through good nutrition and physical activity. We previously had two shows like this with limited impact and success due to the lack of private sector funds to continue those shows. With a stimulus grant we believe we can sign up very recognizable characters as the spokes characters for this program. That momentum would help establish retail sponsorship allowing the message to be carried to a variety of audiences at little or no cost to the show. The expenses, based on the total shows needed, we would employ multiple performing crews as well as many back-end support personnel. | The Mascot Organization LLC | 50 | 0 to 30 days | \$150,000 |
| Franklin | Somali youth project | The Mascot Organization is an Ohio based company that has been in business for 6 years. We are a growing small business that contracts mascot jobs to costume performers all over the country. We service a number of mascot programs for a variety of well known entertainment and retail companies worldwide. For additional information please visit www.mascot.org or call us at 1-877-MASCOT. In recent years, especially recent months, the priority of the Columbus Somali community has been their troubled teens. A significant percentage of Somali youth are very vulnerable targets for involvement in a host of delinquent activities, and some. In many areas that at risk youth are becoming instruments of terror, "hijacker" so to speak from promoting youths in America, to serve as pawns for the Islamic insurgency in Somalia. The Columbus Somali community is arising in unity to confront any such developments here. This vulnerability among Somali youth stems from a complex combination of factors. A large percentage of Somali youth transplanted to America arrive directly from refugee camps barely out of education. Regardless, they are placed in school systems at the grade level corresponding to their age. They find themselves surrounded by educated American peers while identifying suffering in their registers, the total lack of academic and language proficiency. At home, adults also lack scholastic and English literacy and are therefore unable to assist with schoolwork. Add severe cultural clashes, and you have an inevitable formula for disaster. Eventually the shared struggles of these Somali youth turn to anger and that anger is unjustly distributed. Misconstrued | Horn of Africa community center inc | 15 | 0 to 30 days | \$875,440 |
| Franklin | "Get conVerteD" | "Get ConVerteD" is a statewide outreach initiative that will educate and provide groups as well as one on one assistance to Ohio's most vulnerable populations on how to install the digital converter box and relevant information pertaining to the Analog to Digital conversion. The target group includes but is not limited to people with disabilities, elderly, minorities, refugees, low-income, and rural populations. Outcomes Approximately 80 jobs will be created 1.5 million Ohio residents will be targeted 750,000 coupons will be disseminated in places with high visibility and concentration of 10,000 to manufacturing facility on existing land in Channah, OH. To include 2 recirculating automotive spray booths that will reduce natural gas usage by \$10k per year. Booths will reduce VOC emissions by allowing us to switch to "water based" refinishing materials for the vehicles we paint. Will add 4 full time jobs to our existing staff of 15. | The Tekreation Center, LLC | 100 | 0 to 30 days | \$2,500,000 |
| Franklin | Automotive Refinish Building | The purchase and installation of "2nd" spray-boom insulation in 2 existing auto-body repair buildings at this location. Both the block walls and the metal roof are of older construction and do not have any insulation. Closed cell 2nd spray-boom insulation can be applied to the upper interior surfaces and insulate the building envelope. This will stop air leaks and reduce heat loss. Natural gas requirements will decrease. 3 businessmen currently work in these buildings. 1 additional business will be added with the utility cost savings. | A-1 Body & Frame | 4 | 0 to 30 days | \$600,000 |
| Franklin | Bodyshop Insulation Project | The renovation of the first four offices (1200sq) and the addition of a second story for additional administration and employee offices (1200sq). The additional office space would allow for the hiring of 2 additional full time Estimators. The renovation would allow for the application of "2nd Closed Cell" spray foam insulation to all interior wall cavities and the second story roof structure. Energy costs for the combined 2400sq with the spray foam insulation will be less than the costs for the current 1200sq offices. The renovation will also allow businesses in Body & Frame to remain competitive and attractive in a very difficult market. | A-1 Body & Frame | 4 | 0 to 30 days | \$600,000 |
| Franklin | Main Office Renovation | Cluster-Based Planning is an emerging best practice (developed in Ohio by Synthesis, Inc.) that identifies subgroups of mental health clients who share common strengths, problems, and life histories. Different clusters of clients need different types and intensities of services focused on different outcomes, and requiring different financial & other resources. The CCMH has designated Synthesis and its partner, the Ohio Council of Behavioral Healthcare Providers as the Cluster-Based Planning Coordinating Center of Excellence. Synthesis is currently working to identify cluster-specific service packages to be used for statewide Utilization Management of Medicaid funds for behavioral health care. The Stimulus funds would support the development of software for use by mental health agencies across the state. <u>The software would enable agencies to match clients in specific clusters to recommended service packages, and to monitor the utilization of services, outcomes, and costs.</u> | Synthesis, Inc. | 7 | 31 to 90 days | \$750,000 |
| Franklin | Cluster-Based Utilization Management of Mental Hea | To develop and bring to consumer market a cost effective bio degradable plastic bag. Develop central administrative office and infrastructure for successful Automotive Business. Refine and develop technology currently being used to further scale our business. Create at least 5 managerial jobs and 10 administrative positions. Build out and finish Sava tools and integrate COP currently being used in one seamless application to manage an administrative business. Establish multiple stores throughout Columbus area. An additional 10 jobs will be created as our expansion continues over the next two years. We plan to also expand to Dayton, Ohio, Cleveland and Toledo over the next 5 yrs. The funds will be used to hire developers, hire management and administrative staff, purchase equipment and train staff. We currently have a successful business providing transportation to people in need who are unable to purchase vehicles. We have over 250 people in the Grove City area participating in our plan. We have done this as a customer friendly way and have with current market conditions face a steadily expanding market for our service. We provide free credit counseling also with our services. We will create jobs in technology, procurement, financial decisioning and sales. | Industrialbags.com | 4 | 31 to 90 days | \$375,000 |
| Franklin | AutoQuick Central Admin | I am looking for a way to buy out my current business, so I will be able to remain open and maintain steady employment for my current employees and the possibility to expand more positions. I am currently employing people that were previously unemployed and/or on public assistance. I want to continue to provide an opportunity for these people to be gainfully employed and help them to pursue an education and further their lives. With help from the stimulus plan I would be able to not only keep these people employed I will also be able to set up some sort of education assistance. The main outcome would be keeping these people employed. Partnership currently pays a monthly fee to a non-profit organization for the use of 1960 square foot in a building that was constructed in 1963 in the Historic Register). The police department is a twenty-four hour, 350 day a year agency that serves the residents of the unincorporated area of Sharon Township. The Township wants to either purchase a building that can be remodeled to fit its needs, or build a new building. It has been determined that a minimum of 1,000 square feet will meet needs. proper space for office staff, meet most from the public use (including ADA compliant facility), employee use, and use by subcontractors while being processed. Also includes private office space to conduct field visits of victims or witnesses. This includes victims of domestic violence, sexually related crimes and juvenile victims. The area would include a safe area to properly obtain suspect while processing paperwork. | AutoQuick Inc. | 20 | 0 to 30 days | \$1,000,000 |
| Franklin | Capri Cleaners | I would like you to consider a program to give compact fluorescent light bulbs (CFLs) to every Ohio household. These light bulbs are approximately five times as energy efficient as standard incandescent bulbs and have a much longer replacement lifetime. Replacing incandescent bulbs with CFLs can reduce electric bills by around 12% (approximately \$140 per year on average). There are approximately 4.5 million households in Ohio. If each household is given a voucher for 8 light bulbs, at a cost of \$2 per light bulb (the average sale price for a CFL), then the cost of the program is approximately \$72,000,000. While this is certainly a large amount of money, it is less than 1% of Ohio's estimated stimulus package. If the government wished to recoup this money, a 1% state tax on residential electricity usage for 20 months would more than cover the cost of this program, while the energy savings would still lead to reduced electric bills for most people. As part of an economic stimulus plan, this program would increase manufacturing. Ohio families will have a little extra spending money each month. This program will help ease the transition to the US Energy Independence and Security Act. | Capri Cleaners | 15 | 0 to 30 days | \$500,000 |

| Franklin | Housing Development | Relocating old houses and making them energy efficient and selling to lower income families. This will help to create and retain jobs, make housing more energy efficient while providing great homes to lower income families who are not able to afford new/retail/habitat. | DaVinci Progressive | 20 | 31 to 90 days | \$6,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|------------------------------------|----------------|--------------------|---------------------------|
| Franklin | Energy Housing Efficiency | To provide energy efficient appliances/features to the elderly and lower income people. This will help to create/retain jobs while making homes more energy efficient. Goal: Assist to reduce or renewable energy generation sources to increase cool measures some parents, solar water heaters, and more turbine equipment suitable for neighborhood application (i.e. low profile). The project is not only meant to benefit the two homes directly impacted but to spur a movement to retrofit and update homes in the immediate area and serve as a model for energy responsibility. | DaVinci Progressive | 15 | 0 to 30 days | \$6,000,000 |
| Franklin | Green Neighborhoods | The use of geothermal heating/cooling and electric appliances will benefit from the addition of the renewable energy sources, and when they do not supply sufficient power for the entire home, local business will benefit from the electric usage. AEP being headquartered in Ohio will be the provider of electricity when renewable sources fall short due to low solar output, or wind speeds. During times of high energy production at the home, energy will be sold back to AEP and help to supply the local grid. | Michael Keller Homes | 12 | 0 to 30 days | \$50,000 |
| Franklin | Tree transplanting expansion | Purchase existing tree nursery Digger equipment: truck for existing tree spade, excavator, and bobcat. | Richard Tree Transplanting Service | 3 | 31 to 90 days | \$250,000 |
| Franklin | Inner City Community Music Education Program | Transportation and musical equipment to continue our program to bring instrumental music lessons, such as piano, guitar and violin, to inner city youth who would otherwise never be able to afford it. The program travels all over Columbus and need both transportation and musical instruments to provide these children, who cannot provide one for themselves. | Inner City Community Music Centers | 1 | 0 to 30 days | \$10,000 |
| Franklin | Utility Coordination for cheaper utility users | D&D Utility Consultants work with the Developers to coordinate all the utilities for the best price available. We bring competition from the different utilities to give the final users of electricity, phone, water, cable etc. the best price. This company was developed by two retired AEP utility employees, I having more than 50 years experience combined, who partnered to bring their experience and utility know how to benefit the end users. We are asking for this stimulus dollars to help with the marketing and sales of our services. We would use the dollars to hire 5 sales representatives to promote our business. This years economy has slowed our efforts substantially and the stimulus dollars would allow us to hopefully recover from the slump. | D&D Utility Consultants, LLC | 5 | 31 to 90 days | \$200,000 |
| Franklin | green sign | Convert existing design/production business into a provider of energy efficient alternatives for other small business's. Would expand existing facility to allow for manufacture and distribution of products. Potentially add 4 full time employees on a permanent long term basis. | Merymar Enterprises Ltd. | 4 | 31 to 90 days | \$850,000 |
| Franklin | updating equ | Update equ for work in and about columbus ohio. Road work milling the old roads and resurfacing them. Fix pot holes, sewer lines on numerous streets. We are a small family firm of forty years and with the cost fuel and all other things we find we need help for the first time to remain going. thank you Jerrl Fluharty | Trucking | 20 | 31 to 90 days | \$50,000 |
| Franklin | BWL'S House of Hope | BWL plans to purchase and renovate 2 large houses to provide a program that includes temporary housing, education, training, and job placement, as well as connecting individuals to needed rehabilitation services. Our society has been plagued with drug and alcohol abuse for many years, as well as homelessness, which has led many in our society to a path of homelessness, loss of jobs or the skills and a lack of knowledge to become self-sufficient for recovery. Our plan is to offer those individuals an opportunity, time and guidance to become independent, positive and productive part of society. Our target population will be those individuals who are making a transition into society due to some major life events. We will offer temporary housing, training which will include learning life skills, such as maintaining and budgeting money, writing proper resumes, personal dress and hygiene for the job world. Our organization will provide a 12 step program for drug or alcohol addiction. We plan to purchase 2 houses, one will house females and one will house males. Both houses will be supervised and maintained by responsible employees. Qualified employees will plan and employment trainings and classes. | BLW'S House of Hope | 20 | 0 to 30 days | \$300,000 |
| Franklin | Columbus Think Tank | * Identify residences that can be rented, leased or leased with the option to buy for military and/or handicapped families * Identify residences that can be permanent foster homes * Hire disabled veterans to assist in business operations * Rank these properties * Assist military or handicapped or foster families in obtaining financing, loans or grants for purchase of said properties * Identify potential military, handicapped and foster families that could benefit from these properties * Purchase software to identify said properties * Working capital for business operations * Create funding library and sources * Respond to RFPs for military, handicapped & foster individuals * Handle accountability issues with families are permanently situated in new residences * Create stakeholder organization by developing working relationship with community leaders from military, handicapped & foster agencies | Performance Strategy Associates | 20 | 0 to 30 days | \$500,000 |
| Franklin | Ohio State Parks Recovery | In the early 1980s the Civil Conservation Corp in conjunction with the Ohio Department of Natural Resources, Division of Parks and Recreation created the Ohio State Park System. Since that time very little expansion or renovation has occurred (even some closings and corrections have occurred). With the down turn in our state and national economies, families are being forced to downsize their family vacations and travel plans. Thus giving us the opportunity to expand and most importantly renovate the existing park facilities and infrastructure. Giving the state the opportunity to put money into its own natural resources. This would allow the parks to provide better services, stimulate the economy, both in additional employment and revenue and thus setting the course for the next 30 years OSPR because of job turnover and rapid employment growth. (Source: Bureau of L.S.) Some of the fastest growing occupations in the Nation, such as personal and home care aides, are out of reach of the youth. | US Citizen | 500 | 31 to 90 days | \$12,500,000 |
| Franklin | Expanding Rec Centers to assist the elderly by the | However, million of them around the nation, in Ohio have very little avenues for personal growth beyond jobs averaging low earnings due to the number of part-time and low-paying jobs. We believe that these young men and women would devote voluntarily their time to provide care to the elderly, the poor, to serve and enrich their communities. The program is aimed at giving a safe, supportive environment to the youth to spend their time after school or on weekends. The assistance consists of individual and family services, community food and services, other relief services, and child day care services. In return, the youth get a membership for services provided at the recreational centers, with planned activities such as field trips, tutors to assist with homework, games and sports. This program will create 3,000 jobs in Franklin county. | Community Service for Youth - Ohio | 3,000 | 31 to 90 days | \$2,500,000 |
| Franklin | Survival funds | * Rehire 16 former employees * Add 15 additional full-time employees * Purchase leased building outright * Pay off SBA loans * Expand operations * Increase marketing * Purchase delivery vehicles * Working capital * Other education benefits * Offer healthcare benefits * Expand to meet growing market demands * Maintain cooler & refrigeration * Purchase signs for storefront * Purchase softgoods & handspools * Offer design classes * Visible creation & maintenance * Expand - E-Commerce capabilities * Convert physical facilities, adding air conditioning * Hire operations manager * Hire full-time accountant * Get business records in order * Pay creditors * Stay in business | LR2SS | 21 | 0 to 30 days | \$560,000 |
| Franklin | Police Station Modernization | The Clinton Township Police currently occupy a building that was constructed in the 1960's. This building is jointly shared with the Township Road Department. The Police department has no available resources to modernize or add onto existing structure to support the modern policing arena. Technology and use of space have become critical issues in dealing with the local crime trends and areas of suspicion. The police property room has needed expansion for years. The lack of facility security with the police station and its personnel critically needs assistance the township cannot fund from current revenue. The township police have had to ask voters for several levies to keep the current level of police protection without adding additional officers for the last decade. The Police Department would use these funds for construction and security features for a new station to be better equipped and promote a safe environment for the officers and public they serve. Their skills in creative writing, illustrating and proofreading by collaboratively creating a book. They will then learn the modern process of publishing a book including printing, binding and registering the work. The result of their work will be a short run printing of a hardback book that will be organized with the US Library of Congress and the Oversea Library. The book will be available for wholesale distribution to commercial retail sellers. | Clinton Township Police | 15 | 31 to 90 days | \$1,500,000 |
| Franklin | Educate Cub Scouts in Creative Writing & Book Publ | The stimulus funds provided will stimulate the local economy through purchases of supplies. All funds will be spent in Ohio. The final product will generate retail sales providing further economic activity. This project is currently underway with a completion date of June 30, 2009. These funds will insure a higher quality product without the need of relying on economically strapped parents for donations. This project is designed to teach the children the importance of good writing and instill in them an entrepreneurial spirit essential to future economic development. | Glass Onion Publications | 0.5 | 0 to 30 days | \$1,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | Presentation Training | The project is to exploit a yet unpublished book with training seminars, videos and a sales force that guides people in the "right" way to use PowerPoint or other presentation software. The courseware provides knowledge and skill regarding how an audience relates to a screen, and how a presenter can optimize a visual presentation. (It is not a "how to" on any given software file.) The book is currently available in pre-publication form. To preview a copy please email steve@advent.com. The project would benefit educators of all levels, and could become a textbook for use in a business schools, in vocational, community college and universities. The training seminars to be developed would be beneficial to business persons who either deliver or prepare media for presentations. | Advent Media, Inc. | 5 | 0 to 30 days | \$500,000 |
| Franklin | convert our home to solar power | would like to convert our home to solar power. We would like to be independent, and only rely on the sun to power our home | self | 5 | 0 to 30 days | \$25,000 |
| Franklin | New Ohio V.O.C. Code Regulations, Painting of Cons | We are a small manufacturing firm operating in Columbus, OH. We provide services such as Factory Finishing (Automated Machine Applied Coatings) of building materials that would be used in infrastructure projects, road construction projects, and any other building related projects as a subcontractor. We have laid off employees due to the downturn in the construction/building market, and look to purchase additional equipment and make capital expenditures within our facility. This would enable us to expand our operations and hire additional personnel. We have been approached by a new defunct manufacturer who has offered us equipment for sale that would meet our needs. The equipment would yield better efficiencies, higher production capabilities and reduction of emissions/VOC's as now required by the State of Ohio V.O.C. regulations. It will also allow us to maintain a competitive position in the marketplace. | Precision Applied Coatings Enterprises, Ltd. | 6 | 0 to 30 days | \$250,000 |
| Franklin | Job Creation through expansion | This project would fund the creation of new jobs in the construction sector through expansion of the number of concurrent projects. Funds would be used for advertising dollars in the local market, and the addition of estimating, and project management employees. This relation will generate enough additional projects to require the hiring of eight new full time installation technicians. Project revenue, not stimulus funds, would pay for the technicians. Stimulus revenue would be used for the advertising dollars and infrastructure improvements needed over two years to create and sustain the additional employment positions created. After the initial period passes that was created by the stimulus, the business's ongoing project revenues would continue to maintain those positions as well as providing the internal funding needed to sustain continued growth. | Banyan Builders, LLC | 11 | 0 to 30 days | \$250,000 |
| Franklin | Low Income Intergenerational Housing for Grandfami | According to the 2000 U.S. Census 32,340 Ohio households with children, the grandparent is the primary caregiver; 51 percent of these grandparents have annual household income below \$30,000, 20% have an annual household income of less than \$16,000 and 89 percent of grandparents raising grandchildren have never participated in a grandparent support group. The 2000 census reveals that the 42211 zip code has the two the highest concentration of grandparents caring for grandchildren living in the county. There are approximately 1000 grandparents caring for grandchildren in 42211 zip code and 700 plus living in the 42212. Madear's Kinship Village (Madear's) is a nonprofit organization with a vision of building a housing cooperative that is comprised of 4-6 affordable, accessible and high performance energy efficient homes for low and middle-income grandparents 60+ years old with grandchildren. Madear's housing development would involve a housing strategy that strives for net-zero energy, net-zero carbon, and net-zero water by blending solar design with rainwater harvesting, and solar hot water collectors to supply hot water and heat for the homes. The Clinton Township Police Department is in need of additional full time or multiple part-time officers to assist in the day to day crime fighting effort of an inner city high crime area. Clinton Township is unique in the fact that its surrounded by the high crime Columbus and has budget issues that are declining from property and personal property tax issues. The township does not collect income taxes. Funds additional monies to support the police effort to combat major inner city crime trends. Clinton Township in the past year has issued over 29 search warrants resulting in numerous drug and weapons charges and arrested repeat felony offenders. Clinton Township has received an FBI urban crime reports as a high crime area but does not get the tax dollars the big city police departments get to combat criminal activity. Officers of Clinton Township repeatedly are dealing with suspects in possession of high capacity firearms, narcotics, and prior felony convictions who would take over the area if not for police intervention. Additional funding to add officers would be a critical 4-5 year plan that would assist in fighting street level violent crime while setting officer safety. | Madear's Kinship Village | 100 | 31 to 90 days | \$1,500,000 |
| Franklin | Patrol officer enhancement | Clinton Township Police Department is seeking assistance in obtaining 2 police cruisers and safety equipment required for the upfitting and operation of the cruisers on a daily basis. Clinton Township Police rely on property taxes levied against the citizens. In recent years taxpayers have been asked to support and add additional levies to keep the department as well as with no additional man power or services. The fact that property taxes are declining and levies to not receive income tax dollars the police department is in need of finding outside of property tax dollars. The police department could raise cruisers to provide safe equipment to officers who respond to critical calls for help from the citizens of Clinton Township. The cost associated with this request would provide for 2 marked police cars upfitted with emergency equipment and technology that is not optional to a police agency anymore but required. Due to projections and declining budgets it is getting more difficult to fund equipment requirements. Our front line officers need these critical tools to patrol, respond to emergency calls, and fight crime that is not declining. We are acquiring the assets of the former Colorado Rotor Manufacturing Company and moving the manufacturing and assembly operation to Ohio. The company has been recognized as having produced one of the finest quality, environmentally beneficial, energy efficient, and FRA approved passenger railcars in the world. | Clinton Township Police | 2 | 31 to 90 days | \$550,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Franklin | Legal Services for American Economic Recovery | <p>JOBS CREATED: 9 directly funded / 50 - 150 created or saved through new businesses and increased capacity.</p> <p>ECONOMIC BENEFIT: Increase in tax base, job creation, increased capacity of a needed community resource (i.e. a nonprofit law firm for the small business and economic development community).</p> <p>The Community Economic Development Law Group ("CED Law Group") is a nonprofit law firm which believes that improving access to quality legal services is a key strategy in building sustainable local economies through community and economic development activities.</p> <p>CED Law Group seeks to bolster and expand its collaborations with local nonprofit organizations in Central Ohio to support and promote American Recovery and Reinvestment Act of 2009 activities by providing quality legal services to subcontractors, small businesses, and individuals who are actively engaged, planning, or attempting to be engaged in American economic recovery.</p> <p>CED Law Group will provide advice and counsel, direct representation, referrals, dissemination of relevant written materials on legal issues, and collaborations with other nonprofit organizations in providing training and educational programming.</p> | C.E.D. Law Group | 159 | 0 to 30 days | \$115,000 |
| Franklin | Matching SBIR Funds | <p>We have recently been awarded a Federal SBIR grant from the National Institute of Health to prevent coronavirus donor tissue from reaching transplant patients. Specifically directed contract. This project will take place in central Ohio and directly support the Central Ohio Lions Eye Bank, a not-for-profit entity located in Columbus. We believe that the federal stimulus package funds should be used as a matching source of funds in conjunction with the federal funds already allocated with the specific provision that they be used in the Central Ohio area. Using the match or funds method, the issue can save on the vetting process by using the scientific review already conducted by the NIH. This save can then be assured that the project is worth while without having to undertake the expense of vetting the project directly.</p> | Gen Optimization LLC | 6 | 91 to 180 days | \$1,000,000 |
| Franklin | WHITE ROAD RENOVATION - PHASE 2 | <p>RENOVATION & REPLACEMENT TO MAJOR EAST-WEST THROUGHFARE IN GROVE CITY, OHIO.</p> <p>IMPROVE TRAFFIC, WIDEN ROAD, ADD TURN LANES, PEDESTRIAN IMPROVEMENTS AND SAFETY FEATURES TO IMPROVE A SUBSTANDARD RURAL ROAD FOR SUBURBAN TRAFFIC DEMANDS.</p> <p>PROJECT COULD POTENTIALLY BE CO-FUNDED WITH OPWIC FUNDS, THUS REDUCING THE TOTAL REQUEST FOR FEDERAL FUNDS.</p> | JACKSON TOWNSHIP - (FRANKLIN COUNTY) | 100 | 181 days or more | \$4,200,000 |
| Franklin | School for Energy-Efficient Technicians | <p>Propose a partnership between the City of Columbus (Housing Authority) and the BeeGreen school. Qualified unemployed men and women would undergo a one week introductory course introducing them to the principles of energy efficiency in buildings. Subsequently, they would be assigned to "host" - capacity planning, energy auditing, energy auditing, insulation, general construction, green roofing, training, AC during which they each would be assigned a mentor with whom they would complete an apprenticeship.</p> <p>Students would be recruited from that attendance, given lunch, and housed in a dormitory. The City Housing Authority would provide housing for the school which would benefit by reassigning and rehabilitating such homes would be made available to low income individuals, with preference given to BeeGreen given preference. Mentors would agree to provide teaching services, in addition to local consultants.</p> | BeeGreen, LTD | 120 | 91 to 180 days | \$1,000,000 |
| Franklin | HHC Playground | <p>Helping Hands Center is a school for children with Autism Spectrum Disorders. Currently our playground is not effective for the children. The grounds would include equipment appropriate for children aged 2-12. Equipment would be used for recess as well as during the day. The grounds would be overseen by occupational and physical therapists. Helping Hands Center is located in the University District. The playground would allow community after 5:00pm daily. As part of the program, "tag" would be provided for the children. The playground would be used for community use. Helping Hands Center will contact with a local company to build the playground thus creating or retaining jobs in Ohio. With the help of these funds we will be able to make this upgrade.</p> | Helping Hands Center for Special Needs | 4 | 31 to 90 days | \$30,000 |
| Franklin | Reconfiguration of existing Space | <p>Helping Hands Center for Special Needs is a non-profit school and therapy center for children with developmental disabilities. Currently we have classroom spaces that need renovation in order to service more clients. After renovation the space will be used to expand our services in Occupational Therapy, Physical Therapy, Music Therapy and Speech Therapy. Our estimate includes funds for equipment for these areas as well. We anticipate being able to add 25 students each serving 20-30 clients per week.</p> | Helping Hands Center for Special Needs | 7 | 31 to 90 days | \$15,000 |
| Franklin | Healthcare Training Classes | <p>Pugh Nursing Enterprises, LLC provides First Aid, CPR, Home Health Aide and Delegated Nursing Classes for health care workers in Central Ohio. The agency hopes to increase marketing, class size and hire Registered Nurses to teach the classes.</p> | Pugh Nursing Enterprises, LLC | 250 | 0 to 30 days | \$50,000 |
| Franklin | Huber Ridge Clarifier | <p>Install clarifier at the Huber Ridge Wastewater Treatment Plant. Enable the treatment plant to meet NPDES Permit requirements.</p> | Ohio American Water Company | 35 | 31 to 90 days | \$1,800,000 |
| Franklin | Sue's sub shop reopening project | <p>Initial creation of 10 jobs, and through franchising possible hundreds. This is to re-open the Famous original Sue's Sub Shop, it closed due to the age, illness and death of both Denny and Sue Harzard and the allergies of their daughter Teri Sue Harzard Bowsham. The secret recipe dressing as well as the possession of Teri Bowsham's 1st hand recipe and experience shop manager, have her permission to set forth this proposal. We intend to open a again full staffed to provide jobs to both disabled and older workers Age 50+.</p> | Original Sue's Sub Shop proposal Committee | 10 | 0 to 30 days | \$1,000,000 |
| Franklin | Blacklick Aerolator | <p>Replace aged aerolators at the water treatment plant with new aerolators, used to remove iron, manganese and sulphur dioxide from well water.</p> | Ohio American Water Company | 25 | 31 to 90 days | \$1,800,000 |
| Franklin | School Safety Improvement Project | <p>South-Western City Schools is the sixth largest district in the State of Ohio serving 21,000 students in a 127 square mile section of Franklin County. We employ over 2700 employees.</p> <p>After completing a comprehensive Safety and Security Assessment of the South-Western City Schools, we have identified areas that expose the students and staff to health and safety risks, as well as areas that leave the district vulnerable to financial loss due to weak security measures.</p> <p>We plan to correct all violations to Jansd's Law from improper chemical storage to unsafe playground equipment. We will control entry to our buildings by securing all entrances and utilizing access control systems for staff, students, and visitors. We will protect our property assets by adding security cameras, fencing, and improved lighting.</p> | South-Western City Schools | 15 | 91 to 180 days | \$2,700,000 |
| Franklin | Ohio Economic Stimulus Oversight/Review Independent | <p>Receiving funds would fall in the scope of our work. This plan maintains government transparency in that we are not attached in any way to any government (other than savings) so we are not vested as most agencies receiving dollars would be and at charge for overseeing their own programs.</p> <p>Proposal: Serves as a separate, independent, organization to provide oversight and review and accountability management of recipients of federal stimulus dollars.</p> <p>We will generate employment opportunities pairing a seasoned/experienced economic/accounting/analyst professional in a supervisory capacity with a college graduate (new) with limited experience in training and knowledge transfer capacity. (Similar to a co-op apprentice/practical program)</p> <p>We serve as an independent review body outside of government without building the necessary bureaucracy that comes with government oversight entities. So the service is out sources to non-vested parties.</p> <p>The overall cost saving is passed to our group.</p> | Financial & Accounting Professionals LLC | 38 | 0 to 30 days | \$2,800,000 |
| Franklin | Blacklick Creek Floodplain Restoration | <p>The Blacklick Creek floodplain restoration project includes planting native tree species, removal of invasive species and improved storm water functions of Blacklick Creek. This project will improve riparian habitat and water quality to 100 acres of floodplain.</p> | Columbus and Franklin County Metro Parks | 20 | 31 to 90 days | \$140,000 |
| Franklin | Central Ohio Baby RHIO | <p>Build a system for sharing birth data that improves emergency infant health care and hospitality, save lives. Link Central Ohio's major hospitals with Children's Hospital to allow for better health care when an infant is sent to, or arrives at, Children's. The information to be shared would include relevant medical record data.</p> <p>By choosing the right infrastructure partner, we would have the ability to develop a full RHIO with unlimited links in a multi-directional mode. Primary subsequent links could include Pediatricians and OB's. This would allow the system to grow by establishing and maintaining a complete RHIO as a child grows, and by expanding a woman's RHIO from OB visits to include Gynecological information.</p> <p>After non-technical RHIO issues are worked out, later phases of the RHIO could include the sharing of data back from Children's, between the other hospitals, and the addition of adult practices and data such as cardiovascular and oncology.</p> | Strategic Thinking Industries | 4 | 0 to 30 days | \$400,000 |
| Franklin | Green IT initiatives | <p>Scaling and improving efficient heating and power utilization through monitoring and managing resources that use energy (Battery backups, HVAC, Generators, computers, lights, etc).</p> <p>Repair and improvements to domestic violence shelter kitchen, dining area, children's playroom, living room, children's bathroom and adult bathroom per report prepared by structural engineer in June 2008.</p> <p>The building is approximately 100 years old and houses up to 34 individuals at one time. Report recommendations were developed to increase peak efficiency, improve existing spaces, handle the wear and tear of serving 275 families a year and be cost effective in terms of ongoing maintenance.</p> | Wills Enterprises, LLC | 5 | 31 to 90 days | \$250,000 |
| Franklin | CHOICES Domestic Violence Shelter Improvements | <p>Repair and improvements to domestic violence shelter kitchen, dining area, children's playroom, living room, children's bathroom and adult bathroom per report prepared by structural engineer in June 2008.</p> <p>The building is approximately 100 years old and houses up to 34 individuals at one time. Report recommendations were developed to increase peak efficiency, improve existing spaces, handle the wear and tear of serving 275 families a year and be cost effective in terms of ongoing maintenance.</p> | CHOICES, Eliminating Domestic Violence | 20 | 31 to 90 days | \$175,000 |
| Franklin | McCorkle Boulevard Extension (revised) | <p>The construction of the McCorkle Boulevard extensions serves three critical needs in furthering economic development efforts in the City of Westerville. First, it provides access to the last remaining piece of undeveloped land zoned for industrial use in the City of Westerville. Second, it provides truck access to a centralized distribution, providing a safe truck route for the industrial area and reducing traffic from surrounding residential streets. Finally, the extension provides access to upgraded utilities, including broadband connections which will expand the redevelopment opportunities for the area to include research and development.</p> | City of Westerville | 40 | 91 to 180 days | \$1,350,000 |
| Franklin | Schrock Road Bikeway Underpass | <p>The bikeway provides a local transit alternative as it is a component of the Ohio Erie Trail - a statewide and regional trail system. Multi-use path facilities reduce energy consumption and address state and local health issues. Planned improvements will reduce the frequency of path closures due to high water and all deposits associated with Alum Creek, thereby improving trail safety and reduce trail maintenance costs.</p> <p>Only 4% of the energy in a full bus tank is lost as heat during propulsion. This means an average mile per gallon of approximately 6 which is very poor in light of the cost of filling the bus fleet annually for service. Through there are clean diesel programs through the EPA for instance, they are yet to embrace simpler and efficient solutions such as our new AutoTonic transmission which uses the electro-mechanical technology rather than the expensive hydraulic based systems.</p> | City of Westerville | 4 | 181 days or more | \$64,000 |
| Franklin | Economical Hybrid School Buses | <p>Nearly 17,000 school buses transport over 60% of Ohio students daily according to DOE which raises the need to improve the emission safety of the vehicles with durable low cost hybrid solutions. Working in partnership with the existing engine and transmission manufacturers, these buses can be quickly retrofitted with hybrid transmissions to increase efficiency by at least 30% and reduce the state gasoline budget for these fleet.</p> <p>We are also talking about new easy to train green jobs in the process which can be expanded to outer states.</p> | ToChi Technologies Inc | 8 | 0 to 30 days | \$550,000 |
| Franklin | Breathing Association Clean Energy Improvement Pro | <p>The Breathing Association, a 101 year old health agency, provides lung health programs and medical model HEAP services to low income persons in central Ohio. We propose to replace our leaking, age 19 year old, 10,400 sqft roof with a Rubber EPDM Bar Anchor system and install 25 KW worth of solar modules to generate \$5,000 KW or 2% of our annual electric use (\$800,000) monthly. We own the all electric office building. The potential energy savings would be used toward our lung health programs including our state funded free lung health clinic for low income clients. An Ohio based solar design expert indicated we have optimum solar conditions with no shading issues and a suitable roof for panel installation. A Columbus "Green Spot" we know that clean air is essential to our clients and practice green behaviors. We would serve as a model project in central Ohio for use of green technologies. The number of jobs created or retained by this project would be related to roofing and solar technology firms and is currently unknown to us.</p> | The Breathing Association | 20 | 31 to 90 days | \$400,000 |

| Franklin | Multi-purpose building | Our autism spectrum classroom ages 18 months through eight years old. We also house intermediate program classes classrooms consisting of 40% children with autism spectrum disorders and 60% children who are typically developing. Unlike other schools that offer students with disabilities limited interaction with peers who do not have disabilities, Oakstone provides a school environment where students with autism learn and socialize throughout the school day with typical peers. Oakstone Academy is dedicated to academic excellence for all of its students. The U.S. Department of Education has supported Oakstone's work through a Model Demonstrator grant and a Professional Development in Autism grant. The school currently occupies three buildings: preschool, elementary and middle/high school and serves 375 students with nearly 400 on the waiting list. The demand for our program continues to grow with the explosion of children diagnosed with autism. With the opening of our middle and high school building in 2007, we were able to take many children off of our multi-year waiting list. However, with the influx of incoming 6th grad | Oakstone Academy | 150 | 31 to 90 days | \$1,500,000 |
| Franklin | Second Opportunity for Success | A serving six nine year urban area age 10-17, the OCS program seen, in its six year, was able to locate reentrants who were unable to find work by the referral of the majority of the program participants into the OCS program. In a 9 month period, program staff was able to serve 49 first time offenders through a combination of workshops, home-school visits, community service projects and parent engagement sessions. While the pilot program model proved promising, this grant opportunity allows program staff to enhance the current model by incorporating evidence based practices and best practice models in the area of OAC education. The enhanced model will continue to utilize the strategies that proved to be successful: regular and consistent engagement with court personnel and the juvenile justice system, youth-oriented programming (classroom workshops, community service projects, home visits, etc.), school/home visits. In addition, the program will enhance these offerings by incorporating best practices from King County, WA, Cook, IL, and Rock County, WI. | Columbus Urban League | 4 | 0 to 30 days | \$150,000 |
| Franklin | After-School Program | The CUL AfterSchool responds to the High School graduation priority consideration of: 7 Programs that provide clear, compelling local data documenting the need for proposed services 7 Programs that target and serve academically underrepresented and/or diverse populations The CUL AfterSchool program does this by utilizing district level data to determine where to provide services. For instance, Program Staff utilize Ohio Department of Education data to determine building level proficiency scores in both Reading and Math and the Ohio Link Student data regarding Adequate Yearly Progress. By utilizing this data Program staff can ensure that they are targeting the most academically underrepresented schools and students. Furthermore, the CUL AfterSchool program targets poor and African-American students. The students served by the CUL AfterSchool program are primarily African-American and reside in the 43203 zip code. The students primarily attend Beatty Park Elementary School, Trent Elementary School, Changam Middle School and Clearbrook Middle School. Within this area African-Americans account for 87% of the residents of the neighborhood. Children 5-14 represent almost 20% of the population in the area. Nearly one percent of Skills curriculum which is an evidence base curriculum chosen by the Ohio Tobacco Prevention Foundation. The applicant (Columbus Urban League) has over 10 years of Life Skills curricula experience. The APLAT project will work with 3 Columbus City high schools by providing the following activities to 300 youth: • Life Skills training • Establishing APLAT leadership team • Establishing and/or monitoring Tobacco-Free School Campus Policy • Collect 1000 smoke free pledges The APLAT project believes that the African American Church, with proper programming, can serve as a foundation for tobacco prevention and intervention as well as a place of education for students, tobacco cessation and other drug. Our expertise with faith-based and non-traditional tobacco control programs will provide the following activities to schools: • Prevention classes to high school aged youth in faith based or non-faith based settings • Establishment of 3 Faith APLAT leadership teams • 2 to more years. The target is generally between the ages of 16 and 44. The targets are generally either employed or not employed. The typical GED student starts the program with academic levels much lower than needed to pass the GED. The CUL will recruit tutors and volunteers from professional/volunteer banks in order to strengthen the tutoring program. Experiential knowledge and resources will be sought to provide GED students with general access to academic and employment opportunities. In addition, we will strengthen the individual GED instructional model with the provision of more learning resources and support services. Tutors will be recruited in the areas of reading, math and science. CUL will provide cultural activities and incentives for GED students as they achieve individual milestones. Each milestone will be documented in the GED student's individual education plan. These activities will include: • Field trips • Speakers Resources sponsor the consequences of not providing these opportunities. Proposal - a resource that provides funding opportunities that enables Ohio students to learn and work in Ohio. Graduates often leave when they don't market their new skills. Employers will have to test to learn where there are qualified employees. This is a competitive marketplace for Ohio and contributes to a downward spiral. The purpose of this grant is to provide a central Web site that serves as a State sponsored clearinghouse for information on how to finance a college education in Ohio. Its purpose is also to work towards a debt relief package, enacted by the Ohio Legislature, that would provide an incentive to live and work in Ohio after graduation. Preliminary survey results indicate that high school guidance counselors like the idea. Ensuring that students have ample higher education and career opportunities in Ohio would help to reverse the trend. College grads earn more during their careers - over \$200k - and would contribute 44% more in taxes. In automotive sales of tools and heavy eqp. Tool repair heavy eqp repair and training facility for technicians. | Columbus Urban League | 5 | 0 to 30 days | \$50,000 |

| Franklin | Victims o Crime | The highest concentration of violent crimes continue to occur within Central Ohio's urban minority communities. The Columbus Urban League Minority Community Victim Assistance Program (MCAVAP) has provided victim assistance and advocacy in Columbus and Franklin County for the past 14 years. These services continue to be critical to the community that the Columbus Urban League has served for nearly 90 years. The CUL Minority Community Victim Assistance Program is therefore applying for continuation funding for the following reasons: 1. To continue to enhance and expand the scope of services and rights for victims of violent crime in the minority communities of Columbus and Franklin County. To ensure that the primary target population, which is African American, is treated with dignity and compassion, is heard at sentencing and parole hearings, and receives restitution from convicted offenders as provided by the criminal justice system. 2. To advocate for the rights of African American victims, to have full participation in the Criminal Justice System process by assuring that offenders are punished for the crime committed and sentences are appropriate. 3. To provide technical assistance regarding to law enforcement, the criminal justice system, and victim's rights groups. This is a change in opportunity to continue to serve and create new outreach opportunities with our law firms and law firms across the main justice system. This step in new areas means that our business model is leading to longer periods and spending more on maintenance cost. This after sale market is over 257 million vehicles being in United States and exceeds 12 million in Ohio. With most auto manufacturers on the brink of closure, our business model focuses the selling of fresh hybrid transmissions through these established networks where customers can upgrade or change their faulty (automatic) transmissions for the AutoTonic and benefit from higher fuel efficiency without replacing the whole vehicle. It will take over 50 batteries at 25 installations a day or 1,250 units a week to reach 60,000 units a year which only amounts to just 5% of the Ohio market. This new business will grow solely on the merits of the technology and since the transmission will be manufactured in Ohio from existing facilities, this new sustainable business model will not only retain current employees in these dealerships but encourage new employment. Aur program issue The Urban Crime Prevention Initiative (UCPI) is a multi-phase project that proposes to enhance the tools and skills of community crime prevention advocates to better reach of underserved populations in Franklin County, specifically the Near East and North sides of the City of Columbus. Phase 1 The first phase of the project proposes local crime prevention training in the targeted communities of the Near East and North sides. In order to address the issues described, the Columbus Urban League entered into a partnership with the Ohio Office of Crime Control (OCC), the City of Columbus and multiple local and state organizations and institutions. The crime prevention training will use a best practice model supported by OJJDP and a prototype developed by the Florida Attorney's General's Office in conjunction with the Florida Consortium of Urban Leagues. The project uses an Advisory Board also for sustainability and growth. This broad-based Advisory Board includes representatives of underserved communities. | Columbus Urban League | 2 | 0 to 30 days | \$50,000 |

| Franklin | Read and Rise Summer Camp | Camp Read and Rise Literacy Program will serve 50 Columbus City School System elementary and middle school students in grades 3-8 with an emphasis on science education. Methodology: Camp Read and Rise will center on the evidence-based, five block framework for literacy instruction. This framework includes guided reading, writing, word skills, self-selected reading, and community reading and conversation via science. In addition, Camp Read and Rise is not a science literacy program that is confined to a classroom. Children will be immersed in the wondrous world of science as they use creative and critical thinking skills to learn science through non-traditional approaches through planning, blowing, shrinks, collecting water samples, studying wildlife and species identification, drama, games, field trips, and environmental hands-on projects. Program Design: The Columbus Urban League will implement the Read and Rise Literacy Camp that aligns with the Columbus City Schools' reading and science standards and methods for a period of six weeks beginning June 18 and concluding August 1. Camp Read & Rise Literacy Program focuses on increasing reading, science skills and enhancing student experiences individual and small group settings. Youth will participate in Ohio's Division of Prevention, Bureau of Infectious Disease and Control (BIDPC) is currently funded by Centers for Disease Control and Prevention (CDC) for STD/Prevention Services including counseling and testing and intervention to prevent transmission of disease. This funding will come to OCU through a supplement to the current funding CDC is the only entity that provides funding for STD prevention by the CDC. Fleet tracking of actual fuel emissions for diesel fuel tank managers. Web-based easy-to-use reports designed for those needs. Leading edge technology. Efficient wireless reports. Reduced fuel and emissions with cost analysis. Detailed driving, maintenance, engine hour and credit. Detailed accurate reports. KnewRoad Solutions proposes producing nonpartisan apportionment software for the State of Ohio. The state can use and lease this tangible as utility software to other states for the 2011 redistricting process and beyond. This tangible creates 20 high-tech jobs immediately, payroll \$300,000; 100 more jobs and OJT training for unemployed, veterans, youths within 12 months; payroll 1.4 million; and 300 more jobs within 24 months; payroll of 18 million recovered by state in lease/service fees. This software uses an intelligence inference engine to develop a multidimensional mapping system that accords with Constitutional mandates. Inputs focus on shared communities, including natural resources. Additional inputs are developed through surveys, focus groups, public comment. Because of its unique diversity of cultural, economic, and resources, Ohio is well-positioned to incubate this technology. This tangible promises quantifiable energy by aligning community interdependent resources with the political map. Our collaborators will include OCU, Cleveland FC, CDC, OCU, Central Bank, Miami, St. U. of Akron, BGSU, NCR, Battelle, AT&T, and IBM. Marketing request to assist in replacing design restrictions that were destroyed in Aluminum Extrusion Mill bankruptcy. The company faces major continuation in getting material to operate, bad debts has made it difficult to replace all production line necessary at one time. The working capital will enable the company to continue and assist to add at least 20 jobs. The company has been able to maintain current staff and remain current with taxes and suppliers. Economical conditions did not allow us to replace the necessary design leading to operate in an efficient manner at the time of Golden Extrusions closing that occur and demolishing all our dies. The funds would enable the company to replace the dies and operate at maximum and continue the quality product which we had established our client base and built our reputation. The company has been in business since May 1959 and does approximately one million annually in wholesale manufacture dollars. Our service area is all of Ohio. We have served the state well and any consideration will be appreciated. | Columbus Urban League | 15 | 0 to 30 days | \$75,000 |
| Franklin | STD Prevention Supplemental Funding | Camp Read and Rise Literacy Program will serve 50 Columbus City School System elementary and middle school students in grades 3-8 with an emphasis on science education. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Franklin | Automobile-Unit Mass Transit Model (Auto-unit) | Develop a 112 scale model of a new type of transportation system. The unit of cargo of this system will be a car and its occupants. The system will carry this unit under system control between any two stations in the system. Cars will be carried on rubber cars which ride on elevated rubber rails. The rails will be inclined to provide low resistance on the cargo when in high speed travel and resistive-roller-ride runs. The motive power for this system will be electric motors. Expected benefits of this system are increased energy efficiency, reduced congestion, reduced pollution, increased travel speed and improved safety. The goal for the proposed model is to prove the concept in a system consisting of two joined loops containing one merge junction and one divide junction. Control for this model would be provided by a human operator using radio-control. | Business Yet To Be Started | 3 | 0 to 30 days | \$105,000 |
| Franklin | Ohio State Park Water & Wastewater Infrastructure | Funding is requested to provide needed improvements to drinking water and wastewater systems that support facilities of the Ohio State Parks. Funding would address needs at Lake Hops, Purdoner, Mosquito Lake, Van Buren and other State Parks. Funding would also support needed rehabilitation of elevated water storage tanks at elevated locations. All projects identified could be completed by the end of 2012. | OONR-Parks & Recreation | 50 | 31 to 90 days | \$3,750,000 |
| Franklin | County Road Resurfacing Project Part 2 | The County Engineers Association of Ohio would use the recovery funding to fund resurfacing projects submitted by Ohio's 89 County Engineers. It is estimated to cost \$20 million annually to maintain Ohio's 29,088 miles of County Roads on a 10-year resurfacing schedule. Because adequate funding is not currently available to maintain this schedule, many counties are forced to use a 15 to 20-year resurfacing schedule. By the time roadway health this point, they are almost completely deteriorated and can be unsafe for the traveling public. \$27 million over the \$20 million already requested by the County Engineers Association of Ohio would allow for the resurfacing of another 250 miles of county roadways. | County Engineers Association of Ohio | 700 | 31 to 90 days | \$20,000,000 |
| Franklin | HUD Neighborhood Stabilization Program | As a result of the recently created HUD NISP funding our Company is in a unique position to assist City and County government as well as numerous non profits. We believe, given new capital infusion, we can provide capacity to rehabilitate 500 homes over the programs time frame. We have been working with Job and Family Services to begin hiring and training of unemployed and disadvantaged citizens who live within the programs designated target areas. Our largest challenge, given limited ability to obtain larger lines of credit, will be sufficient cash flow to sustain operations and payroll. Without the additional funding we may not be able to carry through with the hiring of people in the targeted areas. The projects are "almost ready" and Market Ready has had discussions with all affected government entities to begin their projects immediately upon receipt of their funding. | Market Ready Real Estate Services, Inc. | 25 | 31 to 90 days | \$450,000 |
| Franklin | Health Access at Columbus Settlement Houses | Health Access at Columbus Settlement Houses provides wellness/prevention programs, linkage/referrals and prescription assistance to residents of seven underserved neighborhoods served by the settlement houses within the Columbus Federation of Settlements. Collectively 30,000 low-income individuals are served through Neighborhood Support and Development services provided through these sites. | Columbus Federation of Settlements Inc | 7 | 31 to 90 days | \$84,000 |
| Franklin | FPRC Window Replacement | At the Franklin Pre-Release Center, replace windows in the dorms throughout the institution. Windows have deteriorated due to age. All windows are original to the institution opening back in 1987. More efficient windows would save significant energy costs. | Ohio Department of Rehabilitation and Correction | 35 | 181 days or more | \$290,665 |
| Franklin | Low Income Community Pharmacy | The new long health clinic has dedicated, opened, licensed space designated specifically for a pharmacy, but no pharmacist. The Recovery project would match grant funds for start-up costs for a pharmacist to provide the prescriptions for very low income patients referred by our Home Energy Assistance Program. In addition, the clinic would include a pharmacist. The Medical Access Project included a pharmacy as a vital aspect of meeting the needs of low-income persons at a "one-stop" location. This retail community pharmacy would help close the gap for some residents without prescription services. Start-up funds will be used to leverage other funds and to support the pharmacy staff and services. To help raise funds for free medications, the pharmacy will sell prescription drugs to insured clients in the community. All pharmacy income will be used to support the free prescription program. In year two, it is expected the pharmacy will become self-sustaining through the sale of prescriptions to insured individuals. With a part time pharmacist, the clinic will provide 800 to 1000 free prescriptions to low-income patients. \$25,000 requested from FPRC. | The Breathing Association | 5 | 31 to 90 days | \$25,000 |
| Franklin | Eastside Nursery Restoration | Portions of the property within the floodplain of Little Walnut and Big Run contain hydric soils, making them unsuitable for wetland restoration. Big Run, an intermittent stream channel discharging through the site towards the Little Walnut, presents an opportunity for stream restoration to address significant channel instability and sediment quality issues. The project would include: 1) revegetation with native species; 2) installation of riparian habitat structures; 3) installation of bank stabilization structures; 4) installation of bank stabilization structures; 5) installation of bank stabilization structures. The benefits of the project include reduced soil erosion, improved surface and subsurface water quality, improved aquatic habitat and riparian habitat. Planting of native trees and shrubs species along the channel banks and throughout the floodplain buffer will complete the restoration process. | Columbus and Franklin County Metro Parks | 30 | 181 days or more | \$2,500,000 |
| Franklin | Innovative environmental sampling/collection techn | The new technology is the application of innovative environmental sampling collection of water and soil samples in order to efficiently and effectively quantify suspected contaminants at Brownfields sites across Ohio. The technologies include both sampling methods (direct push) and mobile laboratory services. Sabertooth Environmental, LLC specializes in environmental sample collection and analysis. Stimulus money is being requested to aid in the development of our mobile laboratory to supplement our sample collection and analysis. This new way of sampling and analysis will allow each sample and record pertinent features of each sample (i.e. location, time, etc.). This new way of sampling and analysis will allow for site characterization to approximately 30% and to apply the data to the site at approximately 30%. | Sabertooth Environmental, LLC | 15 | 0 to 30 days | \$85,000 |
| Franklin | Basic Needs Assistance at Columbus Settlement House | Basic Needs Assistance at Columbus Settlement Houses provides intranet/retail services, direct support in times of crisis, food, clothing and other assistance to residents of seven Columbus neighborhoods that are home to 61% of the city's total population living at or below the federal poverty line. Neighborhoods served include south, near east, near north, Linden, Westland Park and Franklin. Neighborhood Support programs in the seven settlements serve approximately 30,000 individuals each year. | Columbus Federation of Settlements Inc | 84 | 0 to 30 days | \$140,000 |
| Franklin | Regional Transportation Plan | This project will provide a long-term transportation plan for the central Ohio region. The plan will identify critical transportation investments necessary to restore the economic vitality and quality of life within the region. In addition, the plan will reduce air pollution and energy consumption, and reinforce more efficient development patterns. | Central Ohio Transit Authority | unknown | 31 to 90 days | \$10,000,000 |
| Franklin | Non-Revolve Vehicle Purchases | COTA is expanding our fleet/road bus service at a rate of just under 10% annually. To accommodate this service expansion, the agency requires non-revenue vehicles (6) (automobiles) for supervisors, bus truck unit for vehicles (1) maintenance, and bus service (2) to support the bus expansion. | Central Ohio Transit Authority | 5 | 91 to 180 days | \$600,000 |
| Franklin | Street Improvement Program | Rehabilitation of all Village streets (2.5 miles). Includes complete replacement of curbs and gutters, painting and repaving of all streets, reconstruction of deteriorating drainage structures and associated grading of drainage and drive apron work. Community Health Workers to help uninsured and underserved Ohioans locate medical prevention and treatment resources. | Village of Riverlea | 48 | 31 to 90 days | \$1,800,000 |
| Franklin | Grassroots Health Corp | Project Purpose: To improve the health and medical outcomes of these Ohioans by assigning a Grassroots Health Team to each of five Ohio counties with the highest proportion of adults lacking health insurance and high rates of underserved populations. As part of the overall project purpose, the Grassroots Health Teams will work in their respective counties to: <ul style="list-style-type: none"> Identify health gaps in prevention, screening and treatment among residents in the community. Identify prevention and treatment resources in the community. Refer residents to prevention and treatment resources. Provide instruction and navigation related to resources. Provide assistance to individuals with chronic disease management, including: heart disease, cancer, diabetes, obesity. Educate individuals and the community about wellness and disease prevention. Relate to members of the community both culturally and professionally. Use a "holistic" approach to serving individuals. | Ohio Department of Health | 51.5 | 91 to 180 days | \$3,272,533 |
| Franklin | UPDATED Columbus City Center Redevelopment and Riv | Federal stimulus dollars are needed to support such shovel-ready projects as Columbus Commons, a community-friendly project on the site of the former City Center mall in downtown Columbus. The mall will be leveled to provide a clean and green space that will initially serve as recreational space and eventually attract private investment to create a mixed-use, mixed-use neighborhood. Phase 1, which will begin in spring 2009 and open to fall 2010, will prepare the site for redevelopment and create a mix-use park. The lease phases include 400 residential units, 450,000 sq ft of office, and 70,000 sq ft of retail space. This will create 1,500 construction jobs and an estimated 2,000 permanent jobs. Over time, private investment is expected to exceed \$100 million and will greatly surpass the initial stimulus investment. Other "ready-to-go" projects in the emerging RiverSouth District include the First Street conversion to two-way, demolition of the Town Street Bridge, construction of the 8th Street Bridge and investment in Third Street Park to create a gateway connector. Together, these projects will create thousands of jobs and support strong investment already underway downtown. | Capitol South Community Urban Redevelopment Corpor | 2000 | 31 to 90 days | \$32,000,000 |
| Franklin | Work Force Development at Columbus Settlement Hous | Work Force Development at Columbus Settlements provides job training, GED assistance, job placement, microenterprise and business development programs, as well as neighborhood advocacy for access to and creation of jobs. Settlement houses together address the needs of seven Columbus neighborhoods that are home to 61% of the city's total population living at or below the federal poverty line. Neighborhoods served include south, near east, near north, Linden, Westland Park and Franklin. Neighborhood Support programs at the seven settlements serve approximately 30,000 individuals each year. | Columbus Federation of Settlements Inc | 458 | 0 to 30 days | \$190,000 |
| Franklin | NewCo Printing | WEDC put this division up for sale last year but has not negotiated with potential buyers. They have recently distributed WARN letters that they will be closing the facility by 7-1-09. The business has been profitable but getting new business has been difficult due to the impending sale. As a result of the sale, this is a semiconductor business of graphic, construction and other specialty lines that makes products for use in the appliance, medical, automotive and consumer electronics industries. We have active programs to develop new technologies and expand business in these markets. There is a chance to purchase the assets and operate in the existing facility for 12 months, but cash flow is a problem due to WEDC retaining the receivables. A new facility has been identified that will permit more efficient operation and reduce overhead. The 25 jobs would allow the business and the current employees and new business will permit the expansion of the work force to the low level and beyond. Customers are being given a chance for a last time buy, but if we cannot firm up plans for a new operation, they will leave. | WEDC - Interface Electronics Division | 25 | 0 to 30 days | \$1,000,000 |
| Franklin | Beautify our community | Replace patio fencing with 300 linear feet of new synthetic material. The out come will be a beautification that will bring a sense of community. Summer Youth Education at Columbus Settlement Houses provides approximately 1000 inner-city youth with day camp and overnight camp experiences throughout the summer of each month. Programs include art, physical education, cultural education, outdoor recreation, social/communications skill building, nature/science/technology exploration and a variety of educational opportunities. In addition to children being served, the program creates over 70 summer jobs for neighborhood adults and working parents with a safe, beneficial place where children can be supervised, allowing them to continue working. Neighborhoods served include south, near east, near north, Linden, Westland Park and Franklin. | Hidden Acres Condominium Association | 50 | 181 days or more | \$60 |
| Franklin | Summer Youth Education at Columbus Settlement Hous | The cardiovascular health program currently funds 24 courses in Ohio through the Preventive Health and Health Services Block Grant. This program has been successful in establishing policies, environmental and systems changes at the local level in schools, workplaces, communities and health care settings. The program strives to prevent chronic disease through education, evidence-based approaches to address risk factors such as tobacco use, diet and physical activity. These funds will be used to increase the number of courses served to 44. Five regional liaisons would work with the Healthy Ohio projects, an evaluation, and staff at the local level. Tools such as Chronic Disease Self Management and Ounce of Prevention would be utilized to build infrastructure to prevent chronic disease. | Columbus Federation of Settlements Inc | 70 | 0 to 30 days | \$140,000 |
| Franklin | Healthy Ohio Primary Prevention Projects | Propose to build a structure which delivers over 90% of its heating needs from a combination of active-earth-shallow geothermal and passive-solar sources. Mathematical models predict that the proposed structure should achieve these results, but a proof-of-concept structure is required to demonstrate actual results. By active-earth-shallow, I mean an above-ground structure which benefits from the effect of earth-sheltering by actively circulating a fluid (generally water) through the earth and/or the walls of the structure. Designing the structure in such a manner creates two complex thermal envelopes, one within the other. It is possible to deliver and evenly distribute geothermal energy to the cavity between the two. In this way, the temperature of the exterior of the inner envelope can be maintained at approximately 53 degrees Fahrenheit with very little expenditure of energy and passive solar design principles can be employed to capture and store most of the energy required to maintain the inside of the structure at 68 degrees. I will build an active-earth-shallow, passive-solar structure of approximately 900 square feet to demonstrate actual thermal performance. Neighbors in a crime infested area want to supplement local police presence with hired staff to wander streets and provide resource information to homeless and youth, emergency police contacts when witnessing crime and coordinate local Block Watches to encourage citizen patrol, watch and cleanup. | Ohio Department of Health | 23 | 31 to 90 days | \$2,593,000 |
| Franklin | Active-Earth-Sheltered / Passive-Solar Test Struct | Propose to build a structure which delivers over 90% of its heating needs from a combination of active-earth-shallow geothermal and passive-solar sources. Mathematical models predict that the proposed structure should achieve these results, but a proof-of-concept structure is required to demonstrate actual results. By active-earth-shallow, I mean an above-ground structure which benefits from the effect of earth-sheltering by actively circulating a fluid (generally water) through the earth and/or the walls of the structure. Designing the structure in such a manner creates two complex thermal envelopes, one within the other. It is possible to deliver and evenly distribute geothermal energy to the cavity between the two. In this way, the temperature of the exterior of the inner envelope can be maintained at approximately 53 degrees Fahrenheit with very little expenditure of energy and passive solar design principles can be employed to capture and store most of the energy required to maintain the inside of the structure at 68 degrees. I will build an active-earth-shallow, passive-solar structure of approximately 900 square feet to demonstrate actual thermal performance. Neighbors in a crime infested area want to supplement local police presence with hired staff to wander streets and provide resource information to homeless and youth, emergency police contacts when witnessing crime and coordinate local Block Watches to encourage citizen patrol, watch and cleanup. | Company yet to be formed | 3 | 0 to 30 days | \$87,000 |
| Franklin | Neighborhood Safety Patrol | Propose to build a structure which delivers over 90% of its heating needs from a combination of active-earth-shallow geothermal and passive-solar sources. Mathematical models predict that the proposed structure should achieve these results, but a proof-of-concept structure is required to demonstrate actual results. By active-earth-shallow, I mean an above-ground structure which benefits from the effect of earth-sheltering by actively circulating a fluid (generally water) through the earth and/or the walls of the structure. Designing the structure in such a manner creates two complex thermal envelopes, one within the other. It is possible to deliver and evenly distribute geothermal energy to the cavity between the two. In this way, the temperature of the exterior of the inner envelope can be maintained at approximately 53 degrees Fahrenheit with very little expenditure of energy and passive solar design principles can be employed to capture and store most of the energy required to maintain the inside of the structure at 68 degrees. I will build an active-earth-shallow, passive-solar structure of approximately 900 square feet to demonstrate actual thermal performance. Neighbors in a crime infested area want to supplement local police presence with hired staff to wander streets and provide resource information to homeless and youth, emergency police contacts when witnessing crime and coordinate local Block Watches to encourage citizen patrol, watch and cleanup. | First English Lutheran church | 4 | 31 to 90 days | \$65,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Franklin | Southside Community Health Center | The City of Columbus must build a new neighborhood health center in order to meet the growing needs of its south side community. Location of this health center on Parsons Avenue at the old Schottmans site and will contribute to economic revitalization efforts in this depressed and ethnographically diverse area. The project is an important component of the City's Parsons Avenue Vision Plan. The health center that served this area was deteriorating due to structural and water penetration issues and had to be torn down in September of 2006. Due to a lack of funding, it has yet to be replaced although a new site has been identified. The center would be part of a new mixed-use redevelopment project on Parsons Avenue. | City of Columbus Ohio | 400 | 91 to 180 days | \$9,100,000 |
| Franklin | CNG Vehicle Replacement | The City of Columbus would like to replace select current vehicles with lower emission CNG vehicles. CNG vehicles emit far less nitrogen oxide than vehicles fueled with gasoline or diesel, which is expected to have a positive impact on ozone levels in Central Ohio (currently a non-attainment area). The City also expects ongoing cost savings with these units due to the lower cost of CNG as a regular or diesel fuel. Vehicles selected for CNG replacement include those that have the most contact with the public and are primarily driven in neighborhoods, such as refuse trucks, utility trucks and Transportation (road and street lighting repair) vehicles. | City of Columbus Ohio | 100 | 91 to 180 days | \$73,523,100 |
| Franklin | Water Distribution Improvements | This project will include a new booster station which will help to maintain water pressure to a large portion of the district. New water lines are also part of this project. 12,000 feet of 12" mains. The continued supply of water helps to maintain the economic stability of the area served by the District. | Jefferson Water and Sewer District | 50 | 31 to 90 days | \$750,000 |
| Franklin | Greenlawn Avenue - Building Demolition and Environ | The City of Columbus must remove asbestos and demolish four deteriorated and very energy inefficient buildings on Greenlawn Avenue. These buildings are also in need of code driven and other repairs the cost of which is well beyond the value of the buildings. Demolition of these buildings will be followed by environmental remediation of the site in preparation for redevelopment. | City of Columbus Ohio | 140 | 91 to 180 days | \$2,800,000 |
| Franklin | SR 315 South Bound Ramp Widening at Grandview Yard | Widen exit ramp from 2 lanes to 3 lanes per ODOT specifications. | City of Grandview Heights Ohio | 500 | 31 to 90 days | \$1,661,171 |
| Franklin | Police Dive Team Facility | The Division of Police is in need of a centralized storage area for its Dive Team equipment in order to efficiently operate. The equipment is currently housed in various, temporary locations and not in adequate proximity to bodies of water. | City of Columbus Ohio | 50 | 31 to 90 days | \$1,000,000 |
| Franklin | State Forest Facility Heating System Renovations | Funds will be used to install wood-burner boiler heating systems to replace fuel oil systems at a total of six state forest facilities. Conversions have been successfully completed at two sites and design for a third is currently underway. Wood provides a reliable, renewable alternative to fuel oil. Because of insufficient funds, this project is currently deferred. It has been designed, permitted, bid, and only requires a Notice To Proceed. The Division of Fire is in need of a station to cover the needs of a rapidly growing community on the east side of Columbus. The fire station was assigned LEED Silver. | Ohio Department of Natural Resources | 10 | 91 to 180 days | \$300,000 |
| Franklin | Fire Station #35 - 711 Waggoner Rd. | Because of insufficient funds, this project is currently deferred. It has been designed, permitted, bid, and only requires a Notice To Proceed. The Division of Fire is in need of a station to cover the needs of a rapidly growing community on the east side of Columbus. The fire station was assigned LEED Silver. | City of Columbus Ohio | 150 | 0 to 30 days | \$5,500,000 |
| Franklin | Police Shooting Range - Renovation | The Division of Police must replace its current shooting range equipment and perform related building renovations for Police operational and safety needs. The existing equipment is obsolete and will require specialized service life. Conceptual design is complete. | City of Columbus Ohio | 95 | 31 to 90 days | \$2,050,000 |
| Franklin | Traffic Signal Retiming | Congestion along our busy streets and highways is a leading cause of not only energy waste but a leading cause of increased air and noise pollution, time delay and frustration among commuters. It is estimated that poor traffic signal timing accounts for 5-15% of all traffic delay, or about 500 million vehicle-hours of delay, on major roadways alone. According to a recent study by the National Transportation Operations Coalition, the Nation currently has an overall D rating for traffic signal operations along our street and highways. Currently, signal retiming operations are requested by the public agencies because of higher priority items. A funding source needs to be set up for the City of Columbus to signal timing and maintenance for any agency that maintains signals. Studies have shown that a 40:1 benefit-to-cost ratio can be realized by implementing mandatory signal retiming. All municipalities every three years and to take signal retiming into consideration. Traffic signals are delayed, even if traffic flows through different municipalities. Each of these components is relatively low cost when compared to the benefits and easily implemented through existing mechanisms. | Bright Street, LLC | 200 | 0 to 30 days | \$25,000,000 |
| Franklin | Police Property Room and Crime Lab | The project is 20% designed. It entails an exhaustive renovation of a 169,000 square foot abandoned warehouse into a police property storage, the crime lab, crime scene search unit, ballistic testing, DNA storage, and various other Divisions of Police. The Division of Fire Operations. The Division of Police property room and crime lab are currently inadequate and undermanned. The Division of Fire is in need of larger warehouse space including secure storage for medical equipment. The design will include LEED certification. The design will be an abandoned factory in an economically depressed area of Columbus. | City of Columbus Ohio | 300 | 0 to 30 days | \$26,000,000 |
| Franklin | HSTS Revolving Loan Program (City Link-Deposit Pro | Previously nominated for funding through WPCFLP The Columbus Health Department has identified various neighborhoods throughout Columbus with a potential ground water pollution hazard due to the number, age, and type of individual sewerage systems currently in use. The Department of Public Utilities, Division of Sewerage and Drainage (DSDS) has undertaken projects in the identified areas to provide centralized sewers. The projects are completed through an assessment process. This allows for the cost of the construction of the sewer to be placed on the property taxes. The resident is responsible for permits, fees and high contractor cost to connect their home to the public sanitary sewer. The Direct Loan/Link Deposit program would assist residents with the non-assessable fees. | Columbus Department of Public Utilities | 10 | 0 to 30 days | \$750,000 |
| Franklin | Sustainable Growth | This activity is to develop the references, tools, policy, and expertise necessary for local governments to adopt sustainable land use and development policies. This work will build support for sustainable growth by clearly defining the economic and environmental benefits, including progress toward long term air quality attainment. This is an implementation of recommendations outlined in Regional Connections, a 2-year visioning process. That project resulted in the adoption of strategies to reduce land consumption and guiding principles for deciding where to concentrate commercial and economic resources on the local and regional levels. | Mid-Ohio Regional Planning Commission | 25 | 31 to 90 days | \$900,000 |
| Franklin | Olentangy Main Trunk Sewer Rehab - CIP# 650725.01 | Project Nominated for WPCFLP Funding This project will clean and/or rehabilitate large diameter sewers in the Olentangy River Sewerage deemed to be high priority due to the social, environmental and financial costs associated with potential failures. This project will assess the need for the cleaning/repairs to maintain level of service and practice these recommendations based on risk probability analysis. | Columbus Department of Public Utilities | 96 | 181 days or more | \$5,750,000 |
| Franklin | Clintonville Private Source /I/ Sanitary Sewer | To install approx 100 private sewer lateral according to plan specs | Columbus Department of Public Utilities | 21 | 91 to 180 days | \$1,250,000 |
| Franklin | Groveport Madison LSD Transportation | This project would replace an existing aged school bus fleet with the latest energy efficient alternative energy school buses available. 4000 newer level of sanitary sewer line, pipe, and finish grading for 30-acre new neighborhood development in high growth (20-1%) diverse community within the 1270 outfall of Columbus. Completion of infrastructure will allow site to be developed with grocery, retail, office, and residential development. | Groveport Madison Local Schools | 70 | 31 to 90 days | \$8,800,000 |
| Franklin | Williston Town Center | To install a corrosion protection lining to a main subtrunk sewer line over 112 years | Agler Cassidy LADC, LLC | 150 | 31 to 90 days | \$900,000 |
| Franklin | Big Walnut Aug Rickenbacker Interceptor-Corrosion | To install a corrosion protection lining to a main subtrunk sewer line over 112 years | Columbus Department of Public Utilities | 443 | 91 to 180 days | \$10,000,000 |
| Franklin | Cycling instructor training seminar | Sponsorship of seminar to train new bicycle instructors for the League of American Bicyclists Biked program. Seminar will be taught in Columbus, but students are not required to be Columbus or Ohio residents. The purpose of the Biked program is to teach safe cycling practices to children and adults. The need for Biked instructors is growing with the proliferation of Bike Routes to Biked programs in central Ohio, and the increase in adults using bicycles for transportation. | League of American Bicyclists | 15 | 31 to 90 days | \$4,500 |
| Franklin | Arlington Ave. (*resubmittal*) | Project consists of roadway reconstruction including a roundabout, storm sewer upgrades, aging waterline replacement, and telecommunications facilities. Approximately 4000 Lin Ft. of improvements in historic district and school zone | City of Upper Arlington | 35 | 181 days or more | \$1,600,000 |
| Franklin | Sanitary Sewer Rehab- River South District Ph 2 | Project Previously Nominated for WPCFLP funding To construct and rehabilitate the sanitary sewer system for the River South Development | Columbus Department of Public Utilities | 50 | 91 to 180 days | \$3,000,000 |
| Franklin | ODNR, Division of Parks COPS | This project would fund the hiring and equipping of 20 full time park officers for a period of two years. These commissioned officers would be assigned to provide for the safety and security of the citizens of Ohio and the visitors to Ohio's State Parks. It is the intention of our agency to absorb these twenty positions after the two year grant period. This would be possible as a result of vacancies created by attrition. The Division of Parks and Recreation is heavily reliant on funding from the general revenue fund and has received substantial cuts over the past few years. These cuts have resulted in a reduction of park officers thereby affecting the Division's ability to provide safety and security to park visitors and park facilities. Park Officers are responsible for the law enforcement of 74 state parks with over 174,000 acres located in 65 of Ohio's 88 counties. Park officers are responsible for 9 resort lodges, 218 cottages, 87 Campgrounds, 45 marinas, 86 swimming beaches, 36 visitor centers, 463 picnic areas, 1,167 miles of trails, and 1,844 miles of roadways. Ohio State Parks have an annual visitation of over 53 million visitor occasions each year. | ODNR, Division of Parks and Recreation | 20 | 91 to 180 days | \$2,548,800 |
| Franklin | 2009 Annual Lining Contract | To rehabilitate the sanitary infrastructure within Columbus that includes miles of older sewer that have outlived their useful service life | Columbus Department of Public Utilities | 35 | 91 to 180 days | \$2,100,000 |
| Franklin | Lockbourne Road Assessment Sewer | The Lockbourne Road Sanitary Sewer has been identified by the Columbus Health Department as a potential ground water pollution hazard | Columbus Department of Public Utilities | 17 | 31 to 90 days | \$1,000,000 |
| Franklin | Norfolk Southern Grade Crossing Improvements on La | This project is for improvements to grade crossings on Norfolk Southern's Lake Division in western Ohio. This request is made in order to improve the safety of the crossing for the public and extend the life of the crossings. This estimate includes about 174 new full depth rubber guard crossing barriers at 48 feet in length. This may be subject to change and more information may be provided at a later date. I am not exactly sure about ramping down the county or zip code as the project will be spread out. Thank you. | Norfolk Southern Corporation | 50 | 91 to 180 days | \$8,961,000 |
| Franklin | Southerly Waste Water Plant, Sludge Thickening Imp | Project Previously Nominated for WPCFLP funding To replace existing aging units at the end of their useful life and address capacity limitations of existing sludge thickening processes at the Southerly Wastewater Treatment Plant | Columbus Department of Public Utilities | 17 | 91 to 180 days | \$1,150,000 |
| Franklin | Chestnut /Naghten Street Combined Sewer Rehabilitt | Project Previously Nominated for WPCFLP funding To rehabilitate and construct the Chestnut and Naghten combined sewer system | Columbus Department of Public Utilities | 111 | 91 to 180 days | \$6,800,000 |
| Franklin | Southerly Waste Water Treatment Plant Headworks Ph | Project Previously Nominated for WPCFLP funding To construct a new headworks facility including expanded pumping, screening, grit-removal functions and decommissioning of the existing headworks facility | Columbus Department of Public Utilities | 50 | 91 to 180 days | \$3,452,000 |
| Franklin | Southerly Waste Water Treatment Support Facilities | Project Previously Nominated for WPCFLP funding This project will provide necessary support facilities for wastewater plant maintenance | Columbus Department of Public Utilities | 157 | 91 to 180 days | \$9,708,000 |
| Franklin | OSIS Downtown Odor Control North | To perform odor sampling and ventilation testing through Downtown Riverfront Development Area | Columbus Department of Public Utilities | 18 | 91 to 180 days | \$1,100,000 |
| Franklin | Jackson Pike Waste Water Plant Headworks Ph2B | Project Previously Nominated for WPCFLP funding To make improvements to the Jackson Pike Wastewater Treatment Plant's headworks thereby improving hydraulic efficiency and reducing the potential for overflows. | Columbus Department of Public Utilities | 132 | 91 to 180 days | \$13,501,000 |
| Franklin | Downtown Columbus Design Studios Renovation REVISE | Phase 2 (completion) of the adaptive reuse of the historic Byers auto dealership at the corner of Broad Street & Cleveland Avenue in downtown Columbus. We have \$2.1 million in charitable contributions raised and need an additional \$950,000 for building completion. The project will add 100,000 square feet of classrooms and studios for our Fashion Design and Product/Industrial Design programs, as well as individual working spaces for 360 undergraduates. This project relates directly and immediately to creative services workforce development. It is also a highly visible milestone project in the center city that dovetails with the Mayor's downtown revitalization efforts. Work on this project continues immediately upon completion of funding. Our construction company, Conna/Kokosing is quite literally working in the wings, as they have experienced the cancellation of nearly \$25 million in projects in the last 120 days. PLEASE NOTE: this submission is a revision of an earlier submission made 2/12/09, to correct the project's "subprogram" category. | Columbus College of Art & Design | 200 | 31 to 90 days | \$950,000 |
| Franklin | OSIS Downtown Odor Control South | To perform odor sampling and ventilation testing through Downtown Riverfront Development Area including construction management services | Columbus Department of Public Utilities | 55 | 91 to 180 days | \$5,125,000 |
| Franklin | Jackson Pike Waste Water Plant Digester Cover Reha | Project Previously Nominated for WPCFLP funding To replace the air and gas membranes, along with the controls, for the Digester covers on five of the six existing anaerobic digesters. | Columbus Department of Public Utilities | 63 | 91 to 180 days | \$3,780,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Franklin | Jackson Pike Waste Water Plant Digest Gas Handling | This project will reduce the reliance upon fossil fuels by improving the utilization of biogas generated by municipal sewage sludge. To rehabilitate the digest gas delivery system by upgrading the digest gas booster pumps, replacing gas piping and venting for an existing anaerobic digester. New digesters will better utilize fuel for sludge incinerators and plant boilers. | Columbus Department of Public Utilities | 33 | 91 to 180 days | \$2,000,000 |
| Franklin | San Pump Stations Instrument and Flow Verification | Conduct a hydraulic pumping capacity investigation of all City of Columbus DOB maintained pump stations. | Columbus Department of Public Utilities | 50 | 91 to 180 days | \$3,000,000 |
| Franklin | Wildlife Resource Monitoring at Wind Energy Sites | Funding would be used to purchase equipment and hire personnel to create a field-based wind energy/wildlife resource monitoring team that will work under an existing wind energy specific budget. Primary activity of the group would be to review scientific and regulatory areas of high wind energy development potential, including near and off-shore Lake Erie habitats, in order to provide science-based recommendations to wind energy developers, the Ohio Power Siting Board, and others involved in environmental reviews for these projects. Goal of the team would be to determine those areas with high wind energy potential which also have a low risk for negative wildlife resource impacts. This group would also perform post-construction monitoring to collect better data on the actual impacts of such installations. | Ohio Department of Natural Resources | 4 | 31 to 90 days | \$1,000,000 |
| Franklin | Scioto Main/West Side Relief Rehab | To clean and televise 8.738 L.F. built in 1935 and 8.495 built in 1965 known as the West Side Relief Sewer and Scioto Main Trunk areas | Columbus Department of Public Utilities | 58 | 91 to 180 days | \$3,500,000 |
| Franklin | Restoration | Fix the 75,000 dollars to fix up an old house. Doing this will help countless jobs. We'll need a plumber, roofer, and other laborers, which would need tools and supplies from tool shops, which would stimulate the economy and keep businesses running. Also, we'll need a dumpster and a few new appliances to replace very old ones, which would need professionals to install it. Also we'll need inspectors, and many other people. By doing this, you not only fix up the house, which would help us affordance and fix up our family house, and help the value of surrounding houses, but also it would be supplying many people with jobs and greatly stimulating the economy. | N/A | 1,000,000 | 0 to 30 days | \$75,000 |
| Franklin | Morse Crossing Rehabilitation & Streetscape Improv | Construction and related expenditures of 7,900 linear feet of arterial roadway rehabilitation including paving planning/overlay, handicap ramp upgrades, arterial base patching, select concrete curb & median replacement, pavement markings and updated regulatory signage along with non-traditional work improvements and hedge & brick paver installation along the roadway. The construction of this roadway project would create and/or retain 60 jobs. | Easton Association, Inc. | 60 | 91 to 180 days | \$2,947,000 |
| Franklin | Idlewild Drive Sanitary Stormwater Improvement | To construct a new storm sewer from the outlet of an existing 27" storm sewer, to improve the existing roadside ditches along Idlewild Dr., Manor Dr., Astor Ave., Roseawn Ave., Taylor Rd. and Mount St. | Columbus Department of Public Utilities | 96 | 91 to 180 days | \$5,750,000 |
| Franklin | Stelzer Road Rehabilitation & Streetscape Improvem | Construction and related expenditures of 5,880 linear feet of arterial roadway rehabilitation including paving planning/overlay, handicap ramp upgrades, arterial base patching, select concrete curb & median replacement, pavement markings and updated regulatory signage along with non-traditional work improvements at select intersections. The construction of this roadway project would create and/or retain 65 jobs. | Easton Association, Inc. | 55 | 91 to 180 days | \$2,225,750 |
| Franklin | FULTON/Mount Noble Sewer Rehab | Project Previously Nominated for WPCPLF. To relieve sewers built between 1887 and 1883 to enhance capacity and restore structural integrity | Columbus Department of Public Utilities | 59 | 91 to 180 days | \$3,534,000 |
| Franklin | Watershed Impervious Surface Pollution Reduction - | This project provides for engineering design of impervious surface pollution reduction improvements to the road and parking areas serving water supply reservoirs serving the central Ohio area. The intent is to convert these areas to natural vegetation and possibly install water retention basins to reduce impervious road runoff pollution into the water supply reservoirs. | Columbus Department of Public Utilities | 9 | 91 to 180 days | \$700,000 |
| Franklin | Easton Town Center Parking Garage | Construction and related expenditures of multi-level parking garage located within the Easton Town Center to provide additional parking for the other expansion of the Town Center Retail, Restaurant, Office and Residential Components. The construction of this project would create and/or retain 100 jobs. This will permit development which will lead to approximately 1,000 jobs to be created and/or retained because of this project. | MORSO Holding Co | 100 | 91 to 180 days | \$15,000,000 |
| Franklin | Lockbourne Road Drainage Improvements | To construct adequate storm sewers to alleviate flooding along Lockbourne Road and leader sewers. | Columbus Department of Public Utilities | 42 | 31 to 90 days | \$2,500,000 |
| Franklin | Stelzer Road, Easton Way & Interstate 270 Ramp Imp | Construction and related expenditures of a turn lane on Stelzer Road, widening of Easton Way and a ramp to Interstate 270 to aid in the development of the 1 million square foot office complex located south of Morse Crossing and West of Stelzer Road. The construction of this roadway project would create and/or retain 80 jobs. This will permit development which will lead to approximately 4,000 jobs to be created or retained because of this project, the Easton Square Place Roadway and Sanitary Sewer Improvements. | MORSO Holding Co | 80 | 91 to 180 days | \$6,000,000 |
| Franklin | O'Shaughnessy Hydroelectrical Generation Upgrade P | The O'Shaughnessy Hydroelectrical Generation Upgrade Project includes the refurbishment of electric power generating turbines at the hydro-power station. Such refurbishment and other elements of the project will increase from current levels the availability of clean renewable electric power for operation of the City's drinking water plants and the city's electric utility customers. | Columbus Department of Public Utilities | 8 | 91 to 180 days | \$500,000 |
| Franklin | Fountain Square Complex Energy Conservation Improv | Funds will be used to complete various building exterior improvements on a total of seven buildings at the CORN central office complex in Columbus. Work will include new membrane roofs with increased roof deck insulation, replacement of single pane exterior windows, installation of double door "walk in" styles and other minor improvements to make the buildings more weather resistant and energy efficient. Eight of the ten buildings at Fountain Square were originally constructed as a commercial development in the late 1960's and most have not had even minimal upgrades since being purchased by the Department in the 1980's. A recent energy audit of the complex indicated that these basic improvements would have a significant impact on energy consumption, and recommended that these be completed prior to mechanical systems upgrades. Construction on one building is currently underway, and a consultant is under contract to complete design work for the remaining buildings once construction funding becomes available. | Ohio Department of Natural Resources | 115 | 91 to 180 days | \$5,000,000 |
| Franklin | Medical Health Monitor Device and Storage System | This project will allow WHITE ENTERPRISES to purchase and implement an electronic health monitoring device and record system (software, hardware, and necessary infrastructure) designed to replace the existing in-office paper based record management systems and miscellaneous hardware currently deployed to support the daily operations. Once completed, WHITE ENTERPRISES will be able to collect the data/information from the monitoring device necessary to perform the analysis needed to improve patient safety and reduce the need for doctor office visit. By using this new electronic system to streamline workflow WHITE ENTERPRISES will be able to improve the quality of care offered while reducing the overall cost of providing these services WHITE ENTERPRISES | White Enterprises | 10 | 0 to 30 days | \$250,000 |
| Franklin | Berliner Park Sewer Improvements | Project Previously Nominated for WPCPLF To make construction improvements to the existing Berliner Park sanitary sewer | Columbus Department of Public Utilities | 33 | 91 to 180 days | \$2,000,000 |
| Franklin | Southard/Fornoff Area Sanitary Stormwater Improve | Construction to existing stormwater area located between Lovley Dr and Frontot to mitigate frequent street flooding. | Columbus Department of Public Utilities | 25 | 91 to 180 days | \$1,500,000 |
| Franklin | Easton Square Place Roadway | Construction and related expenditures of 3,500 linear feet of arterial roadway including storm sewer, water main, sidewalks, street lighting, traffic signalization, storm water basin improvements, electric and communication duct bank to service a proposed 1 million square foot office complex. The construction of this roadway project would create and/or retain 150 jobs. This will permit development which will lead to approximately 4,000 jobs to be created or retained because of this project, the Easton Square Place Sanitary Sewer and Stelzer Road, Easton Way & Interstate 270 improvements. | MORSO Holding Co | 150 | 91 to 180 days | \$6,900,000 |
| Franklin | Alum Creek Intercepting Sewer/Franklin Main Design | Project Previously Nominated for WPCPLF. Via a structural and hydraulic analysis, raising the weir modification will reduce collection system operations at the Wastewater Treatment Plants. It will also increase hydraulic efficiency thereby reducing the potential for overflows to rivers and streams. | Columbus Department of Public Utilities | 25 | 91 to 180 days | \$1,500,000 |
| Franklin | Easton Square Place Sanitary Sewer | Construction and related expenditures of 5,500 linear feet of new sewer line to service a proposed 1 million square foot office complex and ability to serve existing residential structures and churches currently on septic systems. The construction of this sewer line would create and/or retain 30 jobs. This will permit development which will lead to approximately 4,000 jobs to be created or retained because of this project, the Easton Square Place Roadway and Stelzer Road, Easton Way & Interstate 270 improvements. Project to be nominated for WSRLA Funding | MORSO Holding Co | 30 | 31 to 90 days | \$1,250,000 |
| Franklin | Dublin Road Water Plant New Low Service Pumps - CI | To install two new low service pumps, replacing pumps with continuous service since 1989 at the Dublin Road Water Plant serving the west and southeast portions of the Division of Water's service area. | Columbus Department of Public Utilities | 42 | 181 days or more | \$2,500,000 |
| Franklin | Charleston Avenue Sanitary Stormwater Improvement | To mitigate flooding problems along Charleston Ave | Columbus Department of Public Utilities | 17 | 91 to 180 days | \$1,000,000 |
| Franklin | Parsons Avenue Water Plant Automation Upgrade - CI | To implement an upgrade of hardware and software automated control systems at the Parsons Ave. Water Plant | Columbus Department of Public Utilities | 25 | 181 days or more | \$1,500,000 |
| Franklin | CSO Regulator Sluice Gate Modifications | Project Previously Nominated for WPCPLF. The hydraulic modeling the sluice gate settings will be adjusted to increase treatment capacity during wet weather to reduce the frequency and volume of combined sewer overflows at each regulator | Columbus Department of Public Utilities | 58 | 91 to 180 days | \$3,500,000 |
| Franklin | Chatterton Rd. Water Main Improvements - CIP# 6904 | Project Nominated for WSRLA Funding - LGAN# F330553-01 Project consists of constructing a 24-inch and 36-inch water main, connecting lateral lines as needed, along Chatterton Road, between New-Buley Road and Gender Road. The purpose of this project is to close a loop for a 24-inch water main, reinforce the transmission route to the Hines storage tank, and reduce discharge pressures at the Parsons Avenue Water Plant. This project consists of approximately 11,600 linear feet of water main. | Columbus Department of Public Utilities | 66 | 181 days or more | \$4,500,000 |
| Franklin | Central Ohio Freight Trend Study | A study of freight trends in central Ohio in conjunction with the Columbus Regional Logistics Council to support the central Ohio freight community | Mid-Ohio Regional Planning Commission | 5 | 31 to 90 days | \$200,000 |
| Franklin | Dublin Rd. 12" Water Main Improvement - CIP# 69046 | Project Nominated for WSRLA Funding Project consists of constructing a 12-inch water main along Dublin Road between Cardigan Avenue and Grandview Avenue. The purpose of this project is to eliminate hazardous street lines by installing a 12-inch water main and transferring service taps. This project consists of approximately 5,800 linear feet of water main. | Columbus Department of Public Utilities | 33 | 181 days or more | \$2,700,000 |
| Franklin | Dublin Rd. 36" Water Main - CIP# 690449 | Project Nominated for WSRLA Funding - LGAN# F330552-01 The project provides for the construction of approximately 17,000 L.F. of 36-inch water transmission main on Dublin Road from the proposed Sluice Basin Station to Stone Creek Court. The purpose of the project is to improve flow and pressure in the Hebron District. | Columbus Department of Public Utilities | 133 | 181 days or more | \$8,000,000 |
| Franklin | Petzinger Road Sanitary Storm Improvement | Project Previously Nominated for WPCPLF funding To construct storm system improvements along Petzinger Road to alleviate localized street and yard flooding | Columbus Department of Public Utilities | 18 | 91 to 180 days | \$1,100,000 |
| Franklin | Lazelle Road Storage Tank - CIP# 690424 | Project Nominated for WSRLA Funding - LGAN# F330541-01 The project consists of constructing a 2 million gallon (MG) hydrocollar water tank, including a mixing system. The tank will be located on an existing park site owned by the City of Columbus. This project will provide additional domestic and fire flow to the immediate service area. | Columbus Department of Public Utilities | 75 | 181 days or more | \$4,500,000 |
| Franklin | ST-28 Williams Road Pump Station | To construct a new storm sewer and pump station at the existing Williams Road underpass to provide an outlet for stormwater that collects at the underpass. | Columbus Department of Public Utilities | 42 | 91 to 180 days | \$2,500,000 |
| Franklin | Parsons Avenue Water Plant Sludge Disposal - CIP# | Project to be nominated for WSRLA Funding This project will provide for the physical removal of sludge from lagoons at Parsons Ave Water Plant | Columbus Department of Public Utilities | 116 | 181 days or more | \$7,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Franklin | Center Street & Parks | This project provides for development of new parks in the City of Hilliard. These will be public private partnerships. It will be necessary to secure private and other funds for the projects to advance to construction. Two parks that have been identified for planning and development are the First Responders Park and Hilliard's Station Park in Old Hilliard. Funds for program design and construction are being provided for below: Design of First Responders Park, Hilliard's Station Park, Heritage Trails Bike path trailhead and associated Center Street Improvements alignment study in 2008 - 2025, 2008. These projects are part of a revitalization of the City's Historical Business District. These improvements will provide stimulus for 25 new service industry jobs, 25 retail and at least 50 professional jobs the City. Will also provide economic revitalization to the existing small business with this historical Business District. | City of Hilliard | 100 | 31 to 90 days | \$5,000,000 |
| Franklin | Mound St/Harrisburg Pike 24-inch Water Main - CIP# | Project Nominated for WSRLA Funding - LOAN# FS30538-01 Project will construct a 24-inch water main along Mound Street from Yale to Harrisburg Pike, then along Harrisburg Pike to Frank Road. An 8-inch water main will also be constructed along Harrisburg Pike from Cline Rd. to Eakin Rd. The purpose of the project is to improve flow and water quality and replace water mains that require repeated regular maintenance/repair. Services will be transferred from an existing 8-inch main to an existing 16-inch main from Cline Rd. to Big Run Rd. The existing 8-inch main will be abandoned. | Columbus Department of Public Utilities | 75 | 0 to 30 days | \$4,500,000 |
| Franklin | Main St. Water Main Cleaning & Lining - CIP# 69040 | Project Nominated for WSRLA Funding Project provides for general rehabilitation 10,400 LF of 24" water main in Main Street. The water main will be mechanically cleaned and a cement mortar lining will be applied to the interior of the pipe. The purpose of the project is to improve flow and water quality conditions as well as extend the useful life of the main. The project is planned on Main Street from Parsons Avenue to Alum Creek Drive. | Columbus Department of Public Utilities | 25 | 91 to 180 days | \$2,300,000 |
| Franklin | Long St. Water Line Cleaning & Lining - CIP# 69036 | Project Nominated for WSRLA Funding Project provides for general rehabilitation 8,000 LF of 24" water main in Long Street. The water main will be mechanically cleaned and a cement mortar lining will be applied to the interior of the pipe. The purpose of the project is to improve flow and water quality conditions as well as extend the useful life of the main. The project is planned on Long Street from Fourth Street to Governors Plaza / Charnipoff Avenue. | Columbus Department of Public Utilities | 17 | 91 to 180 days | \$1,000,000 |
| Franklin | Hap Creeman Water Plant Lagoon #2 Embankments Impr | Project Nominated for WSRLA Funding - LOAN# FS30537-01 Project will provide for the rehabilitation of a filling embankment and the addition of internal baffle embankments in Lagoon No. 2 at the Hap Creeman Water Plant. These improvements, along with the sludge removal under a previous contract, will allow the lagoon to be put back in service. This will provide additional storage to the existing embankment due to the pumping capabilities and allow maintenance/shutdown of the pumping equipment. The internal baffles will provide improved dewatering of the sludge and will significantly increase the useful storage of the lagoon. External embankment repair along Walnut Creek will ensure public health and safety by preventing limonite sludge from entering Walnut Creek if there was an embankment failure. | Columbus Department of Public Utilities | 75 | 0 to 30 days | \$4,500,000 |
| Franklin | Doherty Rd. Water Line Improvements | Project Nominated for WSRLA Funding Project provides for the construction of approximately 4,000 LF of 12" water transmission main on Doherty Road from Jackson Road to the Dayton Southern Railroad to Farker Road. The purpose of the project is to improve flow and pressure in the adjacent subdivision. Beginning in 2010. | Columbus Department of Public Utilities | 20 | 181 days or more | \$1,700,000 |
| Franklin | Canyon Drive Area Water Line Improvements | Project Nominated for WSRLA Funding Project provides for general rehabilitation of the area water distribution system and includes construction of new 24" water main, abandoning existing water mains, and transferring water services in the Canyon Drive area. The purpose of the project is to improve flow and water quality, minimize smaller mains which are a source of regular maintenance and poor fire flow, and replace water mains that require repeated regular maintenance. Proposed water mains are planned for Foster Street, Lenoape Drive, Canyon Drive, and North Street. Abandonment of mains and transferring of services only are planned for Clearmont Road. Routine resurfacing of approximately 90 lane miles of various federal-aid system roadways within the CIP# areas of Franklin County, Delaware County, Fairfield County and Logan County. The work will be an in-kind replacement of the existing pavement surface course and will require no new right-of-way. Environmental clearance should be very simple. | Columbus Department of Public Utilities | 51 | 181 days or more | \$3,120,000 |
| Franklin | MORPC Area Resurfacing Program | Routine resurfacing of approximately 90 lane miles of various federal-aid system roadways within the CIP# areas of Franklin County, Delaware County, Fairfield County and Logan County. The work will be an in-kind replacement of the existing pavement surface course and will require no new right-of-way. Environmental clearance should be very simple. | Franklin County Engineer | 150 | 91 to 180 days | \$6,000,000 |
| Franklin | Alton-Darby 12-inch Water Line | Project Nominated for WSRLA Funding The purpose of the project is to install a 12-inch water line for improved flow and water quality. The project includes construction of a new 12-inch water main along Alton-Darby Creek Road, from Rothchester Dr. north to connection point at terminus of existing 12-inch water main. | Columbus Department of Public Utilities | 6 | 91 to 180 days | \$410,000 |
| Franklin | River South Phase 2 | Project Nominated for WSRLA Funding Project provides for general rehabilitation of the area water distribution system and includes construction of new water mains, abandoning existing water mains, and transferring water services in the River South Area in downtown Columbus. The purpose of the project is to improve stability, flow, and water quality. Proposed water mains are planned for First Street, Rich Street, and Main Street. All of the mains are extremely old and need to be replaced. This project is a joint venture with City of Columbus Division of Sewage and Drainage, City of Columbus Transportation Division. | Columbus Department of Public Utilities | 42 | 91 to 180 days | \$2,500,000 |
| Franklin | Supplemental Playing SFY2010 | This activity supplements MORPC planning activities to provide better support to delivery projects through the ODOT PDP, clean up crash data, select traffic counts, purchase aerial photography and data services. | Mid-Ohio Regional Planning Commission | 10 | 91 to 180 days | \$350,000 |
| Franklin | 2nd Street Area Water Main Improvements | Project Nominated for WSRLA Funding The project provides for general rehabilitation of the area distribution system and includes construction of a new 20-inch water main, abandoning an existing water main, and transferring water services along Second Street in downtown Columbus. The purpose of the project is to improve stability, flow, and water quality. This project is a joint venture with City of Columbus Division of Sewage and Drainage, City of Columbus Transportation Division, and Ohio Department of Transportation. | Columbus Department of Public Utilities | 17 | 181 days or more | \$1,200,000 |
| Franklin | Building Improvements | New windows and added insulation to Township buildings to reduce energy costs. Includes including: Pleasant and Sumner and Family Services. The Corner Avenue United Methodist Church and the Capital District of the United Methodist Church have been in negotiations with the CRC for CRC to take over ownership of the building in order to CRC to return for renting space to the congregation to continue holding worship services on Sundays. CRC is in need of additional space for not only our Youth Services but also our Senior and Family Services programs. The senior primarily low-income and people living in poverty to meet basic needs. The space renovations would allow the Youth program to function safely and make it feasible for CRC to take responsibility for the entire building. This is a "Win-Win" for the church membership, the non-profit agency and voluntary for the neighbors we serve. | Perry Township/Franklin County | 4 | 31 to 90 days | \$50,000 |
| Franklin | CRC and Como Church Project | Provisionary design work has been done by the Assoc Associates architectural firm and contractor costs estimated by the RE-Construction Company. The area a Settlement House bounded by 107th, Memorial Highway of UNCCC. Approx. 4000 linear ft. of pavement, storm sewer, sidewalk and curb reconstruction to Commerco, Denney, Miller, Williams, and Plum streets to alleviate property flooding and standing water. Relocation of water lines to allow reconstruction. Construct a path to connect to proposed path coming in from the north east side of the village. To be nominated for WSRLA Funding | Clintonville-Beechwood Community Resources Center | 20 | 0 to 30 days | \$178,000 |
| Franklin | Lockbourne street and sewer reconstruction | To be nominated for WSRLA Funding To construct sufficient new well lines in southern Franklin County and/or Northern Pickaway County to produce an additional 15 million gallons/day safe water supply to the Parsons Avenue Water Plant serving the south and southeast portion of the Columbus Department of Public Utilities service area. | Village of Lockbourne Ohio | 45 | 91 to 180 days | \$2,600,000 |
| Franklin | South Wellfield Expansion - CIP# 690359 | To be nominated for WSRLA Funding To construct sufficient new well lines in southern Franklin County and/or Northern Pickaway County to produce an additional 15 million gallons/day safe water supply to the Parsons Avenue Water Plant serving the south and southeast portion of the Columbus Department of Public Utilities service area. | Columbus Department of Public Utilities | 170 | 91 to 180 days | \$10,200,000 |
| Franklin | Electronic Waste Value Processing | Recovery, reuse, or recycle of metals to enhance recovery of components and transportation and handling equipment involved, sorting of the components, and then shipping the sorted materials to overseas processors. This process flow does not recover a significant portion of the value from the specialty metals contained in the scrap. Ohio jobs and sales can be created to begin this value by recycling these metals in Ohio. Arlington PMR is an Ohio based small business specializing in precious and semi-precious metal recycling and recovery. Currently the company has limited capacity to address this area, but would be able to expand into this area with financial assistance creating technology and specialty jobs in Ohio. Arlington PMR proposes to offer specialty metal recovery as both a service and to become a direct metal supplier to industry. Direct E-Waste recovery of high purity metals will be a unique capability for an Ohio Company. E-Waste recyclers in Ohio will have an in-state resource further increasing the economic impact. There will be no pollution impact as all metals will be reclaimed for sale. | Arlington PMR LLC | 10 | 0 to 30 days | \$300,000 |
| Franklin | Gibbard Ave. Area Water Main Improvements | The project provides for general rehabilitation of the area distribution system and includes construction of new water mains, abandoning existing water mains, and transferring water services. The purpose of the project is to improve flow and water quality and replace water mains that require repeated regular maintenance. This project consists of six project sites: 1. Construct a 6-inch water main in Washington Ave from Second Ave to Starr Ave. Transfer existing taps and abandon the existing 1-inch water main. 2. Construct a 6-inch water main, including fire hydrants, in North St from Gibbard Ave to the 16-inch water main in Fifth Ave. Transfer existing taps and abandon the 1 1/2-inch water main. 3. Transfer all existing taps from the 2-inch water main to the 12-inch water main in Gray St between Starr Ave and Gibbard Ave. Abandon the 2-inch water main. 4. Construct a 2-inch water main in Lower St from Gibbard Ave to the most northerly tap. Abandon the 1 1/2-inch water main. 5. Construct a 6-inch water main in Fair Ave from Linwood Ave to Latta Ave. Then south in Latta Ave to the alley south of Kutchins Place. | Columbus Department of Public Utilities | 17 | 91 to 180 days | \$1,200,000 |
| Franklin | Group 3 Water Line Improvements | Project Previously Nominated for WSRLA Funding - LOAN# FS30540-01 Project provides for general rehabilitation of the area distribution system and includes construction of new water mains, abandoning existing water mains, and transferring water services in the Franklin Area. The purpose of the project is to improve flow and water quality and replace water mains that require repeated regular maintenance. This project consists of thirteen locations in the Franklin Area. New mains or water service transfers will be constructed in Sulphur Ave., Floral Ave., Soule Ave., Soule Ave., River Street, Eakin Rd., Rosemont Ave., Shady Ln., Forest Dr., Humphrey Ave., Columbian St., Vaughn St., Mound St., and Davis Ave. | Columbus Department of Public Utilities | 46 | 91 to 180 days | \$3,300,000 |
| Franklin | CNG Fueling Stations | Up to 8 CNG stations are to be constructed throughout the city in strategic locations thereby serving various city agencies and possibly other municipalities. Stations would be either a combination of mix of both "low fill" and fast fill depending upon location and operational need. | City of Columbus Ohio | 150 | 31 to 90 days | \$13,500,000 |
| Franklin | Statewide Priority Roadway Improvements | Funding will be used to complete priority roadway, parking area, culvert and bridge repair at ODOT facilities across the state, with the primary focus on State Parks. ODOT is responsible for over 1,200 lane miles of roadways and over 200 bridge structures with spans over 60 feet. Many of these facilities have exceeded their design life and require significant repair or reconstruction, and funding currently provided through the MCE with ODOT (\$5,000,000 per year) is insufficient to address the current backlog of projects. | Ohio Department of Natural Resources | 200 | 181 days or more | \$15,000,000 |
| Franklin | Police Vehicle Impound and Parking Violations Bure | The Division of Police is in need of a new vehicle impound facility. The two proposed buildings are 24,000 square feet and will house the City of Columbus Division of Police, Parking Violations Bureau, and will include secure evidence storage. The lot will accommodate 3,400 vehicles. The buildings are designed to be LEED-certified wall. It is designed, permitted and ready for bid solicitation. | City of Columbus Ohio | 180 | 0 to 30 days | \$13,200,000 |
| Franklin | City Hall - Plumbing Retrofit | The City of Columbus must retrofit heating and domestic hot water piping, vents, and sanitary drains at the historic City Hall facility. This plumbing a original to City Hall, built circa 1930. It is corroded, leaking, and the insulation is inadequate. | City of Columbus Ohio | 70 | 31 to 90 days | \$950,000 |
| Franklin | Hap Creeman Water Plant (HCWP) Raw Water Line | Project to be nominated for WSRLA Funding To construct an 18-inch direct raw water line from Houser Dam to Hap Creeman Water Plant, approx 3 miles, via gravity flow saving annually in pumping costs and to protect the water coming into the water plant from potential contamination from hazardous spills from roadway. | Columbus Department of Public Utilities | 233 | 181 days or more | \$28,000,000 |
| Franklin | City Hall - Lighting Retrofit | The City of Columbus must retrofit energy efficient high usage lighting with contemporary energy efficient lighting at the historic City Hall facility. Design has already been completed for that portion of this project that will reuse and retrofit original historic lighting fixtures with high efficiency components. | City of Columbus Ohio | 16 | 31 to 90 days | \$440,000 |
| Franklin | City Hall - Window Replacement | City Hall, built circa 1930, is a four-story building with windows on the entire exterior including an internal court yard. Many of these windows are original and extremely inefficient. All windows must be replaced with double-pane units. The design of these units must be consistent with the buildings historic architecture. | City of Columbus Ohio | 102 | 91 to 180 days | \$5,100,000 |
| Franklin | ODMRDD Developmental Center sidewalk Renovation | Remove and replace ODMRDD Developmental Center sidewalk and curb. | Moore and Son Excavating LLC | 40 | 91 to 180 days | \$227,000 |
| Franklin | City Hall - HVAC Retrofit | The historic City Hall facility is in need of a more efficient and effective HVAC system. The existing systems do not meet current codes or ASHRAE standards. This project, which will retain the historic integrity of the structure, will allow for the eventual restoration of City Hall. | City of Columbus Ohio | 120 | 0 to 30 days | \$7,400,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Franklin | Sanitary Sewer Rehabilitation Program per EPA Find | Engineering and other professional services required to satisfy the OEPA Director's Final Findings and Orders signed February 11, 2009. These orders require completion of sanitary sewer overflow, emergency response plan, and Village wide SSES. | Village of Riverlea | 10 | 31 to 90 days | \$200,000 |
| Franklin | Advanced Hydrometallurgy Recovery Services | Hydrometallurgy is the science of extracting the contents of metals and minerals found in aqueous effluents and waste water. The metals and some are concentrated, leached and then extracted from the solution to produce pure metals that can be sold as a premium and for a profit. Most metals can be reclaimed by hydrometallurgy. Arlington PMR has the technical capabilities and a limited capacity for hydrometallurgy operations based in Columbus Ohio, and we are looking to expand our operations. Arlington's goal is to become the largest refinery in the state of Ohio for all types of metal recycling. These recycling streams include electronic, precision and semiprecious metals, solar panels, manufacturing scrap, and on-site Brownfield decontamination. | Arlington PMR LLC | 10 | 0 to 30 days | \$500,000 |
| Franklin | Brown Rd. Area Watre Line Improvements | Arlington PMR proposes to offer hydrometallurgy recovery as both a service and to become a direct metal supplier to industry. Direct recovery of high purity metals will be a unique capability for an Ohio Company. To support this effort, Arlington PMR is requesting financial resources to expand its operation. By expanding our industrial capacity and capability, Ohio based specialty and technical manufacturing jobs will be created. | Columbus Department of Public Utilities | 75 | 91 to 180 days | \$5,100,000 |
| Franklin | North Market - Ventilation Systems | Project Previously Nominated for WSRLA Funding) Project provides for general rehabilitation of the area distribution system and includes construction of new water mains, abandoning existing water mains, and transferring water services in the Brown Road area. The purpose of the project is to improve flow and water quality and replace water mains that require regular repairs. The project consists of five locations around Brown Rd., Jackson Rd., Belmont Avenue, Hopkins Avenue, and Little Avenue. | City of Columbus Ohio | 100 | 91 to 180 days | \$3,600,000 |
| Franklin | Household Travel Survey | Because of insufficient funds, this project is currently deferred. This project is 50% designed. The market is a key component of the city's cultural fabric and an economic driver in the Short North/Venue District. The facility is located steps from the Greater Columbus Convention Center. The facility is in need of this ventilation retrofit because of poor air quality, code issues, odors, and inefficient energy usage. | Mid-Ohio Regional Planning Commission | 25 | 91 to 180 days | \$1,000,000 |
| Franklin | Mount Vernon Water Main Improvement | To collect the data necessary on current travel patterns and trip characteristics to update Central Ohio's regional travel demand models and apply that data in re-calibrating the model chain. | Columbus Department of Public Utilities | 17 | 91 to 180 days | \$1,150,000 |
| Franklin | 240 Parsons Av. - Renovation of South Dorm | Project Previously Nominated for WSRLA Funding) The project provides for general rehabilitation of the area distribution system and includes construction of new water mains, abandoning existing water mains, and transferring water services in the Mt. Vernon Avenue area. | City of Columbus Ohio | 400 | 181 days or more | \$20,000,000 |
| Franklin | 120 West Gay Street (former Central Safety Building | The Department of Health is located in the historic structure that once housed the Ohio School for the Blind. At the time of the project, the insufficient funds existed to renovate the entire structure. Therefore, there is a need to complete the renovation by renovating rooms 3, 4, and 5 and the entire South Dorm building. These additional floors and building, upon renovation, will be used for the use of the series complex for the provision of public health services and programs. The design will utilize LEED criteria and include energy efficient lighting, HVAC systems and plumbing. | City of Columbus Ohio | 473 | 31 to 90 days | \$26,000,000 |
| Franklin | Dublin Ave Substation - CIP# 670608 | Because of insufficient funds, this project is currently deferred. It has been 90% designed and is ready for permitting and public bid solicitation. | Columbus Department of Public Utilities | 24 | 31 to 90 days | \$2,176,422 |
| Franklin | Medicaid Recovery | The City of Columbus is in need of reparation and renovation of this 1909 building, which was formerly the Division of Police Headquarters. This building is a key component of the City's historic main campus and is located on the historic City Hall. Renovation and restoration of the facility is a key element for revitalization within the City's core downtown district. | HCS, Inc. | 15 | 31 to 90 days | \$675,000 |
| Franklin | Inventory reinvestment | Spoke studies have determined that the City needs office space for the co-location of the City agencies from three separate buildings for purposes of operational efficiency. Two of these facilities are beyond their useful life, one is structurally unsound and all have outdated inefficient building systems. Once vacated, the buildings and/or sites will be redeveloped. | Associations Conventions Trade shows Inc. | 19 | 0 to 30 days | \$500,000 |
| Franklin | Stroke Telemedicine Program | To upgrade and replace telemedicine capex, cables, trucks and other equipment in order to compete with out of state contractors. With this we can help Columbus drive in more and keep current Teleworkers and events in Ohio. The recent train down in business has put us in the position of other states equipment or hiring of people, we have decided to keep our workers as long as we can and we are at a point where we will lose customers and events unless we upgrade equipment. We hope to not only maintain our current work staff but also make it bigger if we can get funding. | Ohio Dept of Health | 8 | 31 to 90 days | \$600,000 |
| Franklin | Statewide Orphan Oil and Gas Well Plugging | Expand the scope of currently funded hub-and-spoke stroke telemedicine systems in two underserved regions of Ohio (12 NW counties, 19 SE counties) to additional hospitals in high-need counties in SW and NE Ohio that have EMS stroke transport times greater than 40 minutes and limited or no hospital capacity to receive stroke patients. A stroke telemedicine network consists of a Joint Commission certified Primary Stroke Center (hub) linked via the internet to a number of smaller hospitals (spokes) located some distance away in rural counties. The hub provides neurological evaluation and treatment consultation to smaller rural spoke hospitals that lack capacity to receive the full range of services to treat acute stroke patients. Establishing telemedicine systems for the rapid identification, triage and treatment of stroke victims in these underserved areas would greatly improve patient outcomes and reduce disability and death from stroke. Stroke is the 4th leading cause of death in Ohio and the leading cause of permanent disability in adults. Once established, these networks have the capacity to be used for other high critical diagnoses such as acute heart attack. | Ohio Department of Natural Resources | 75 | 91 to 180 days | \$7,000,000 |
| Franklin | FRA-CR3-14.06 - Hilliard-Rome Road | Funding will be used to properly seal a total of 479 abandoned or unwell and gas wells located in 62 different counties throughout the state. Sites have already been identified and are located on both public and private property. Improperly abandoned wells are a safety hazard and an issue contamination of adjacent soils and surfac/subsurface water supplies through oil, gas and brine leaking from the well. State funding for this program has been significantly reduced due to cutbacks in ODF expenditures. | City of Columbus | 3,000 | 181 days or more | \$18,025,000 |
| Franklin | Improved Solar Cells | The roadway will increase from twenty-four feet to sixty feet, traffic lanes will increase from two to five, traffic signals will be provided to improve and provide safe left turn movements, 12, 672 L.F of sidewalk and 52 ADA compliant curb ramps along with bike lanes on both sides of roadway, various sizes of storm sewer, ranging from 12" to 48" will be constructed. Existing roadway conditions include a former utility roadway with pavement extended and re-ripped in an effort to extend capacity as much as possible. The existing roadway varies in width and is a major north/south arterial used by both residential and commercial traffic. Numerous collector and local road intersections provide access to Hilliard-Rome Road, the majority of access is uncontrolled. No sidewalks or bike lanes exist, although roadway is used by pedestrians and bicyclists. Drainage problems are also an issue. This project is intended to improve roadway conditions, reduce congestion, provide proper drainage and increase safety along the roadway. | Arlington PMR LLC | 10 | 0 to 30 days | \$300,000 |
| Franklin | West Broad St. Underpass | In specialty metals and their applications. Arlington proposes to apply their capabilities to develop a retrofit and OEM optical filter to modify the economic light characteristics to the solar cell operates more efficiently, thus producing more energy per square foot of installed solar panels. Current solar cell enhancement technology uses very expensive Europium metal and has not been commercialized. Arlington proposes to create new jobs by applying its expertise in Indium, a metal 10 times less expensive, to enhance solar cell efficiency. | Camp Chase Railroad | 1100 | 91 to 180 days | \$200,000 |
| Franklin | Prep Academy Daycare Centers | Ohio will benefit from this by creating good paying specialty manufacturing jobs and producing solar cell panels that develop commercially useful power outputs in Ohio's often limited solar potential. This will assist Ohio in becoming a more technology advance manufacturing state and a leader in solar panel research and production. | Brexton Construction, LLC | 100 | 91 to 180 days | \$10,500,000 |
| Franklin | Hybrid School Concept | Real and history residents to an existing railroad bridge carrying the Camp Chase Railroad over US-40 (West Broad St.) in Columbus. This bridge is in need of some steel repairs, and some fairly extensive masonry repairs to improve the safety and appearance of this bridge on a heavily traveled highway which is considered a western gateway to Columbus. | Groveport Madison Schools | 10 | 91 to 180 days | \$875,000 |
| Franklin | water conservation network | throughout Central Ohio, there is a need for quality childcare. Our team has two successful locations and is looking for capital to expand their quality program. The education program in their system offers great value to our community. Upon completion of the expansion (24-36 months) these funds would be re-paid when the package would be re-financed. This project would create hundreds of construction jobs and 100+ permanent positions. | to be formed or be a division of existing plumbing c | 100 | 31 to 90 days | \$1,000,000 |
| Franklin | ACLead | A Hybrid School concept utilizes the best features of a traditional bricks and mortar school with the unique attributes of an online educational experience. The Groveport Madison Schools and the Electronic Classroom of Tomorrow (ECOT) propose to team together to produce a hybrid school concept for students in grades 6 - 12. This program departs from a conventional school day, and yet, does not use the "traditional" model of a full-time at-school learning experience. But rather, this educational model takes the best attributes of each school type and blends them into a unique educational experience. | ACLeads | 4 | 0 to 30 days | \$80,000 |
| Franklin | The Clearinghouse | retrofit existing old water saving plumbing fixtures such as toilets, urinals, showerheads, faucets, etc. with new water saving ones in any residential, com- mercial, office, governmental building. A "water audit" of any building can be performed which will show a payback in water and sewer bill savings which can pay for itself in a little as 6 months to three years. This retrofit, if the money spent on the water audit and installation labor will be paid back in water bill savings and the a.p.a. might also like less sewage in our rivers, too. This company will generate lots of tax dollars for my favorite city, Columbus, and my favorite state, Ohio, and the good old U.S.A. | The Bridge of Gahanna, Inc. | 50 | 181 days or more | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Franklin | Wifone Project | Wireless voice over IP designed for high QOS and 99.999 performance, utilizing the latest in energy efficient and high speed wireless networking equipment. Designed for large wireless and corporate buildings. Our focus is on reducing material needed for installation and reduction of energy needs by the latest hardware and wireless technologies available. Engineering, testing, design and marketing of our one of kind system will save companies money and reduce the material needed to accomplish the same service with legacy systems. This system will also be optimized to take advantage of the providers broadband services and will be positioned to take advantage of what will be a huge market potential. Our plans are to focus on offering the best service in this category. We already have in hand a considerable amount of our personal money on the VOP infrastructure to accomplish this but need additional funding to build out the wireless service offering. With the higher 99.911 throughput the time is right for this product. We plan to expand nationally once we refine our model in the Columbus Ohio marketplace. Our trial will be technical in nature. | MyWorkPlaceOnline | 8 | 0 to 30 days | \$100,000 |
| Franklin | Crime Victims Pro Bono Attorney Recruitment Progra | Domestic violence or sexual assault or have children who are victims of domestic violence, sexual assault or other forms of child abuse. In nearly every victim's right case that is reported to the Clinic the victims have suffered extreme violence to the point that they have either moved forward with divorce proceedings pro se or desire to move forward with divorce proceedings but cannot afford an attorney. Many crime victims are economically disadvantaged. In the majority of these cases crime victims do not have adequate resources to hire an attorney. Domestic relations and custody cases typically move at a much faster pace than criminal cases. Since some victims do not have resources to counsel the divorce and custody case progress without the Domestic Relations court being informed of the pending criminal investigation. The result can be devastating and dangerous. | The Justice League | 2 | 0 to 30 days | \$112,560 |
| Franklin | Victims Rights Policies & Procedures Initiative of | Hearing notification to victims of crime there have not been any standardized procedures developed. The majority of criminal justice agencies throughout Ohio have not adopted victims' rights policies and procedures. It is the desire of The Justice League to revise the Model Victims Rights Policy & Procedures initiative of Ohio, a project started by The Justice League 2 years ago to create Model Victims Rights Policies & Procedures based upon minimum standards as required by law for law enforcement, prosecutor and the courts. Participants of the initiative included: Action Ohio Coalition for Battered Women, Capital University Legal Clinic, Judge Carrie E. Gladden, Licking County Sheriff's Office, MADD Ohio, Ohio CASAGAL Association, Ohio Coalition on Sexual Assault, Ohio Department of Rehabilitation & Correction, Ohio Network of Children's Advocacy Centers, Ohio Victim Witness Association, Parents Of Molested Children, Summit County Prosecutor's Office. The Honorable Sherri Bevan Walsh, Ohio Office of the Attorney General, Justice League | The Justice League | 1 | 0 to 30 days | \$60,000 |
| Franklin | Ohio Justice Assistance Initiative | While most confirmed violators of crime victim rights violations do not reflect intentional malfeasance on the part of law enforcement, prosecutors or courts, they clearly show a lack of education which results in their unknowingly denying crime victims their constitutional and statutory rights. The Justice League wishes to provide victim rights training to law enforcement, prosecutors, courts, and victims' advocates throughout Ohio. The goal of the training is to provide reform training, assist justice officials and advocates in understanding their constitutional and constitutional responsibilities to crime victims, and to ensure the consistent application of crime victims' rights laws throughout Ohio. | The Justice League | 3 | 0 to 30 days | \$158,000 |
| Franklin | Ohio Crime Victims Rights Legal Clinic | Victims of violent crime meet and require legal representation to enforce and protect their constitutional and statutory rights. They act as attorneys and offenders meet and require legal representation to enforce and protect their legal rights. The Ohio Crime Victims Rights Clinic provides free legal representation to victims of violent crime throughout Ohio to ensure their constitutional and statutory rights are enforced and protected and provide legal representation to crime victims' advocates with their crime victims' advocates. The Ohio Crime Victims Rights Legal Clinic is a support system to the criminal justice community, advocates, and the victims' advocates from their service. Ohio Crime Victims Rights Legal Clinic provide pro bono legal assistance to over 400 victims of crime in the state of Ohio. The Ohio Crime Victims Rights Legal Clinic is the only available resource in the state of Ohio for victims of crime to receive free legal assistance. The Ohio Crime Victims Rights Legal Clinic is critical that crime victims have access to free legal assistance for the enforcement of their constitutional and statutory rights. | The Justice League | 7 | 0 to 30 days | \$259,500 |
| Franklin | Tuition Re-imbursement | I think that current students attending college should be repaid for some part of their student loans that they had to take out or money that they had to pay out of pocket. It is basically an extension of grants, but the student would be able to spend the money on anything and not be required to stimulate the economy because most of the money students earn goes towards tuition and we have none left to buy things. | DeVry | Thousands | 0 to 30 days | \$5,000,000 |
| Franklin | Housing stimulus | We will purchase bank owned properties (single family homes) make needed repairs, then lease-purchase property to tenant owners. We allow 3 years for tenant to purchase home, applying part of rent to down payment at closing. This time allows tenant to repair credit, and establish a positive history with us. Each property mortgage will paid by stimulus funds and held by us. Financially distressed tenants will be offered bank financing, requiring them to increase surrounding property values, providing sales, desirable homes, providing jobs for title company, inspectors, realtor and other types, and honestly giving 15 families the opportunity to become homeowners. Thank you for your consideration. Sincerely, Robert Tomaszky | Loft Realty Solutions LLC | 20 | 31 to 90 days | \$750,000 |
| Franklin | Save Columbus City Center Mall for Job Retraining | Convert the City of Columbus Vacant City Center Mall to a Jobs Retraining and Reentry Institute (JRI). Convert the former storefronts into classrooms. Hire teachers to retrain our workforce. Hire consultants to work with the business community to determine what is best for employment needs now and future. This location is perfect for such a function. Please do not let the developers tear down this building for the time being. We need this building for JRI and for emergency shelter purposes. Any planned development for this site (other than for JRI) should be postponed due to our economic emergency. JRI will bring more people downtown and spur economic development. COFA transit system serves this site very well. Funds necessary to repair COFA. They can no longer afford to drive. Please save Columbus City Center from demolition for the time being - at least until we get this financial and employment emergency behind us. | none | 10000 | 0 to 30 days | \$2,000,000 |
| Franklin | Franklin Park Conservatory Community Garden and Pl | The Community Garden and Plant Study Committee in Columbus, Ohio's Sustainable Environment Zone will support various educational initiatives at the Conservatory, including environmental education for adults and children, job training for employment in Ohio's green economy, STEM education for children, and nutrition education. The complex will consist of a 4-acre Community Garden Campus and adjacent Plant Study and Production Facility. The Campus will support the Conservatory's community gardening outreach program that annually helps start 10-15 gardens in low-income areas. Courses held on the campus and in the Plant Study building will help individuals/organizations start and sustain community gardens that provide a green environment in inner city neighborhoods and food deserts. The complex will also provide resources (space, education) to support Ohio's green industry and its employees. In addition, the new facilities will be the site of environmental and STEM education initiatives that help prepare middle and high school students for college. Annually the new facilities will help educate more than 1,000 people and impact thousands in the area's worst neighborhoods. | Franklin Park Conservatory Joint Recreation Distri | 35 | 0 to 30 days | \$3,850,000 |
| Franklin | Ohio College Access Initiative | This project will allow the Ohio College Access Network (OCAN) to continue providing a framework of support to college access professionals by offering professional development and technical assistance to expand innovative college access delivery methods, advocating for college access opportunities for more Ohioans and providing funding opportunities to expand the network and build the capacity and self-sustainability for existing college access organizations. OCAN's member organizations work directly with economically disadvantaged students and their families to help them prepare for, enroll in, pay for and complete education beyond high school with half of the requested funding being distributed to the local college access organizations in representative Ohio districts with the remaining half being distributed to the state. OCAN and its membership will provide college access services to help over 200,000 Ohioans. OCAN members save the toughest category of students and students by helping individuals from disadvantaged backgrounds gain the resources needed to enroll, pay for and complete education beyond the high school level. | Ohio College Access Network | 40 | 0 to 30 days | \$2,000,000 |
| Franklin | Standardized Information System for Ohio Public Hea | The Ohio Department of Health (ODH) assesses public health nursing services through 130 local health districts (LHD). The LHDs nurse provide services in many settings, including well clinics, family planning, immunizations clinics, children with special health care needs programs, early intervention services and WIC programs. Currently there is no standard assessment, taxonomy or documentation for LHDs or ODH to consistently evaluate or the clinical data to quality improvement and best practice initiatives. Financial, staffing and administrative data. ODH and LHDs will adopt a uniform documentation system across all programs and departments using a system such as Omaha, which is becoming the national standard for nursing documentation. ODH and LHD systems and program needs will be assessed and the system implemented, including training over 500 nurses. LHD Directors of Nursing are currently collaborating to utilize this system statewide within five years. This project will reduce system redundancies and costs, enhance patient care and provide outcomes measures for LHD nursing practices and assist practicing resources and access to services for the citizens of Ohio. | Ohio Dept of Health | 9 | 31 to 90 days | \$2,800,000 |
| Franklin | Main Campus AED Project | This project will provide 18 automated external defibrillators to Department of Public Safety Employees on the main campus of The Ohio State University in Columbus, Ohio. The Public Division officers are currently equipped with these devices but the units have surpassed their life expectancies as stated by the manufacturer. | The Ohio State University Police Division | 0 | 0 to 30 days | \$260,000 |
| Franklin | Ready, Set, Grow | Children's Hunger Alliance would like to expand its outreach efforts to family child care providers throughout Ohio to help them access USDA Child Nutrition programs and improve the quality of their care. There will be a special emphasis on providers in immigrant populations, which is significant because Ohio is home to numerous immigrant communities. For example, Columbus, Ohio has the second largest Somali population in the United States. The agency will assist child care providers in developing not only healthier and safer homes, but also the children in their care by providing them with educational material and training that will help prepare children for school. These materials must be written in order to account for cultural differences. "Ready, Set, Grow" will bring more federal reimbursement dollars back to Ohio, create more jobs, increase access to affordable child care and improve the health and school readiness of Ohio's youngest citizens. | Children's Hunger Alliance | 100 | 31 to 90 days | \$350,000 |
| Franklin | Scholarships | HFC respectfully requests stimulus money to be used to offset the cost of services to families affected by the downturn in the economy. While our clients from Franklin County receive some assistance from MRDD or Medicaid Waivers our clients from other counties receive little or no support. The stimulus money will be used to lower or eliminate the out of pocket expense to the families. The families in most need of assistance are those with pre-school age children. Early intervention is very important to the educational success of children with Autism. Our goal is that through early intervention our clients will be able to return to their home school district for grade school and no longer need to use the resources of MRDD and Medicaid. | Helping Hands Center | 10 | 0 to 30 days | \$100,000 |
| Franklin | Job Guild | It'd like to make a sort of "Job Guild". It's sort of like a temp-agency, but a bit different. Basically people send in requests and how much they're willing to pay, and we send someone out to do it. Though it sounds like a temp agency, the jobs could be a one-time thing only, and temp agencies usually do part-timers or seasonal things. The jobs could be anything from mowing someone's yard, to taking an old restaurant apart weekly, or something else. 25% of the money offered will be given to the guild. While it seems like a profit organization, all money gained will go towards running the guild, and that's it. I'd need money to build a building, a computer and internet for background checks, furniture, and stuff like that. It'd give people who can't get jobs a way to make some easy money while they look for jobs. | N/A | 1,000 | 0 to 30 days | \$200,000 |
| Franklin | Metal restoration, Powder Coating | To grow an existing business that prides itself on applying environmentally friendly VOC free industrial coatings. Our powder coating process eliminates the solvent based paint, and does not release any VOC's or solvent chemicals into the atmosphere. We would like to grow our facility to a company that can handle the work load of larger company's need and replace current solvent/VOC painted items that destroy the OZONE, and been known to cause cancer with non-polluting powder coating services. Doing this creates up to 20 jobs in the central Ohio area of Franklin county and surrounding areas. We are a small family owned and operated business that wants to have a positive impact on our community by restoring metal items (which takes less energy than manufacturing new) with a process that has a proven considerably less impact on the environment. | Streetwerkz llc | 20 | 181 days or more | \$2,500,000 |
| Franklin | SMALL BUSINESS INVENTORY/PAYROLL RECOVERY | PURCHASE INVENTORY FOR MY BUSINESS AND PAYROLL FUNDS NEEDED. I HAVE BEEN IN BUSINESS FOR ALMOST 10 YEARS AND THIS MONEY WOULD ALLOW ME TO GET THE BUSINESS THROUGH THE SLOW ECONOMIC PERIOD THAT THE COUNTRY IS GOING THROUGH. I WOULD ALSO LIKE TO BE ABLE TO HIRE TWO EMPLOYEES. I KNOW I AM A SMALL BUSINESS BUT THIS IS MY LIFE AND I HOPE I AM CONSIDERED A SMALL BUSINESS. MY BUSINESS IS ON MY HOME AND I WOULD LIKE TO BE ABLE TO OPEN OTHER BUSINESSES IN THE FUTURE AND EMPLOY 10 TO 20 OTHER EMPLOYEES. I FEEL CONFIDENT THAT THIS MONEY WOULD BE TREMENDOUS HELP TO THROUGH THE CONTINUED SUCCESS OF MY BUSINESS FOR ANOTHER 13 YEARS. THANK YOU FOR YOUR CONSIDERATION. SINCERELY, JUDY WILLIAMS | JUDY'S AS GOOD AS NEW SHOP | 1 | 0 to 30 days | \$18,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Franklin | Fire Fighters | Funds to hire and train 78 Columbus Fire Fighters. Twenty-eight of these fire fighters would be used to staff a new fire station and replace approximately 50 other fire fighters that have retired in 2008/2009. Fire Fighters would staff stations to respond to fire emergencies as well as respond to medical emergencies in the City of Columbus. Approximately 28 of the fire fighters would staff a new fire station to be constructed on the east side of the city. Fire Fighters also provide fire prevention training in neighborhoods, attend community events, and help inspect buildings throughout the community to ensure compliance with the code. | City of Columbus Public Safety Department | 78 | 31 to 90 days | \$5,850,000 |
| Franklin | Hazardous Duty Vests | Purchase bullet proof vests for use by Columbus Fire Fighters when operating in areas during crime events. Fire Fighters are some times called to active crime scenes involving police where guns may be present and in use by criminals. Fire Fighters may be responding as paramedics or in the process of providing emergency medical services to police officers, crime victims, or to crime suspects. Bullet proof vests are currently carried on fire apparatus for such events. However, these vests are over ten years old and lose their effectiveness over time. Also, more modern and protective vests are now on the market and available. These new vests will ensure better protection for fire fighters at aforementioned events. | City of Columbus Public Safety Department | 6 | 31 to 90 days | \$250,000 |
| Franklin | Police Investigative Facility | Construct a facility for the Columbus Police Investigative Unit (Narcotics). Columbus Police currently lease space for this unit. The current facility is outdated and lacks security for what is largely an undercover parking unit. The current facility lacks enclosed vehicle parking, has limited communications and technology available, a limited briefing room, and poorly lit and office space. Police has used the current facility for a number of years but since the building was not specifically designed for Police work, it lacks critical office space requirements. A new facility would not only replace an old structure but enable the design of a building with proper security for a unit that investigates crime using undercover enforcement where equipment and personnel need to be concealed as much as possible from the general public view in order to be effective once deployed. | City of Columbus Public Safety Department | 150 | 181 days or more | \$4,500,000 |
| Franklin | Making campus energy efficient | The college just completed a data-driven energy efficiency plan pursuant to HB 251. The projects, when implemented, will reduce energy consumption per square foot by 24%, and gas emissions of a like amount. With an estimated payback period of 7.2 years, the college will reap operating savings resulting from reduced energy consumption of approximately \$846,000 in today's dollars. The plan calls for an array of work in college buildings, including lighting retrofits, upgrading laboratory hoods, and mechanical system upgrades. | Columbus State Community College | 10 | 181 days or more | \$2,000,000 |
| Franklin | SWAT Command Vehicle | The City of Columbus, Division of Police, has a need to replace a SWAT Command Vehicle. A SWAT Command Vehicle is used by Police to handle communications during serious crime events or during hostage situations. The current vehicle is twenty years old and has not been updated with modern communications equipment in several years. Current vehicles have become an integral part of communications for serious and prolonged crime events permitting on scene coordination of various safety units as well as communications with other law enforcement agencies. The current vehicle was purchased before the advent of homeland security issues and is inadequate for many important potential events in an urban setting. | City of Columbus Public Safety Department | 25 | 31 to 90 days | \$500,000 |
| Franklin | School Feedback Systems | School Feedback Systems is a computer based web resident system for real time collecting, quantifying, and reporting on ways to improve the school learning environment and the community's level of engagement. A K-12 program offers curriculum methodologies that use the information PFS helps identify and build the most effective. The software is based on consumer demand analysis and feedback and uses sophisticated and analyzing algorithms. Developed by the founders of PFS over 30 years of combined experience with Multiple Fortune 500 Companies. Schools are in a similar position to most companies in the mid 1980s when the modern consumer affairs movement started. PFS is helping the faculty and business techniques developed by companies like Nabisco, Kraft, Johnson and Johnson, etc. Schools can use the information PFS provides to identify areas needing improvement for creating a productive learning environment and community engagement in the school. Companies used customer information to develop new products and services. | The Healthy Workplace, Ltd. | 17 | 0 to 30 days | \$100,000 |
| Franklin | Communications Facility | Construct a new Support Services facility to house communications functions for the Public Safety Department, the City of Columbus. The Division of Support Services is under the Columbus Department of Public Safety. Support Services handles dispatching, communications for the Police, Safety Department, including Police and Fire operations. This includes all dispatches, radio, 800 numbers, and all homeland security communications vehicles. The current facility for Support Services is over 50 years old and does not meet the current functions of the Division. Work space for installation of communications equipment is limited and the Division has run out of storage space. Repair facilities cannot accommodate the newer vehicles so repairs must sometimes be made outdoors. Important communications equipment is stored outside even during inclement weather. Constructing a new facility will replace an old, inefficient facility that sits on prime real estate for future development. Real estate is available to construct a new facility on land that is adjacent to other city operations. Consolidating Support Services to city owned land will improve operational efficiency. | City of Columbus Public Safety Department | 150 | 181 days or more | \$8,000,000 |
| Franklin | Tornado Sirens | Upgrade tornado sirens in the City of Columbus and Franklin County. Columbus works in conjunction with Franklin County to upgrade the emergency management system by providing funds to replace old tornado sirens as well as install new ones in areas where coverage is lacking. The city has provided nearly \$400,000 to the County over the past two years to upgrade approximately twenty sirens. There remain areas of the city that lack sufficient coverage. Columbus is a geographic area that experiences violent storms. Increasing siren coverage will protect citizens and potentially decrease loss of life in a major weather or homeland security event. | City of Columbus Public Safety Department | 6 | 31 to 90 days | \$1,000,000 |
| Franklin | Neighborhood Security Cameras | Conduct a neighborhood safety camera pilot project in a high crime area of the city. The use of cameras have been used in other urban areas to deter crime and as a means to a more multiplier in crime prevention. This particular proposal would be to purchase and install cameras in a neighborhood as a pilot to review the crime prevention potential and to assist law enforcement in crime fighting efforts. | City of Columbus Public Safety Department | 10 | 91 to 180 days | \$1,250,000 |
| Franklin | Fire Operations Center | Prior to use of cameras a consultant would be hired to not only design the most effective system but to help with issues pertaining to privacy rights. The consultant would help determine the best camera system and provide recommendations on installation. The remaining portion of the project would fund the purchase and installation of the cameras. The Columbus Division of Fire will construct a Special Operations Center Fire Station to house the bomb unit, canine unit, hazmat team, and executive team equipment. The facility will be the equivalent size of a modern fire station with dorm facilities to accommodate twenty four operations. The current units released herein are an outgrowth of other city needs and also due to homeland security issues. Most of these units are presently housed in separate existing facilities that are either inadequate in space or were not designed to have extra units in the fire facilities. Placing these units in existing facilities has decreased opportunities for training as well as forced the units into cramped quarters with ongoing fire operations. | City of Columbus Public Safety Department | 150 | 91 to 180 days | \$5,500,000 |
| Franklin | Academic Enrichment | Construction of a new facility will create over 100 permanent jobs as well as house approximately 20 fire fighters in permanent jobs. Also constructing this facility will enable the closure of at least one old fire station that is currently being used to store equipment. A modern facility will be LEED certified and decrease utility costs as well as provide an opportunity to place equipment into a modern "green" facility. This is a work preparation program that provides Adult Basic Education and CTE preparation. Many students are TANF eligible and enroll to upgrade their skills before seeking employment. | Columbus State Community College | 300 | 0 to 30 days | \$230,000 |
| Franklin | English as a Second Language for Refugees and Immi | This program offers English as a Second Language to refugees and immigrants. It is a work preparation program that can include contextualized literacy, for example language instruction tailored to a healthcare setting. | Columbus State Community College | 400 | 0 to 30 days | \$230,000 |
| Franklin | Youth and Adult Automotive Training Center | The program has always been grant-funded. This program trains 25 workers per cycle. It is targeted to individuals who need more support to complete an automotive training program. Students receive technical and skills training, academic support and mentoring, and are placed in paid cooperative work experiences. They graduate with college credit and are encouraged to complete an associate's degree. | Columbus State Community College | 25 | 0 to 30 days | \$200,000 |
| Franklin | Fuel Tank Updating/Replacement | The program has always been grant-funded. In order to further comply with BLUSTR (Bureau of Underground Storage Tank Regulation) and EPA regulations, several City of Columbus underground storage tanks need to be either upgraded or replaced. Many of the tanks are extremely old and have never been upgraded or replaced since they were installed. The five oldest tanks (ranging from 15 to 22 years old) were selected for this project. 5 tanks = \$150,000 for upgrade or replacement = \$750,000 | City of Columbus Ohio | 5 | 181 days or more | \$750,000 |
| Franklin | CNG Vehicle Storage - Building Upgrades | In order for CNG vehicles to be stored and/or fueled indoors, certain modifications must be made to the storage facility to ensure adequate ventilation. These modifications would need to be made to 7 of the City of Columbus's vehicle storage facilities in order to store registered CNG vehicles. The facilities and associated costs of upgrades are below: • Refuel storage sites - 2 sites at \$150,000 each = \$300,000 • Utilities storage sites - 3 sites at \$150,000 each = \$450,000 • Transportation storage sites - 2 sites at \$150,000 each = \$300,000 | City of Columbus Ohio | 25 | 91 to 180 days | \$1,050,000 |
| Franklin | One Stop Career Services | Provide services for the adult and dislocated workers as prescribed the Workforce Investment Act. Offers career counseling, skill assessment, skill building services, individual counseling, retention assistance, and reading, writing, and math literacy as well as GED preparation. The Center for Workforce Development at Columbus State Community College has years of experience in offering this program with successful outcomes. The program has always been grant-funded. | Columbus State Community College | 600 | 0 to 30 days | \$215,000 |
| Franklin | Company expansion and employee addition | Existing mortgage lending company wanting to expand at present location to accommodate additional staff to assist potential borrowers with applications. We need to lease additional office space, furnish office with furniture and computers, etc. We are HUD approved with full Direct Endorsement/permissions and have many inquiries during these difficult times. We would like to add additional staff to assist borrowers by adding an additional 20-22 employees. We have so many requests for help that we need to not have the staff. Oxford Lending Group is one of the largest mortgage companies in the state of Ohio. We have reached the state and are to be added those in need. | Oxford Lending Group, LLC | 20-22 | 0 to 30 days | \$200,000 |
| Franklin | AMP-Ohio Efficiency Smart Power Plant | AMP-Ohio (enhance power and services provider to 81 Ohio municipal electric systems) and Vermont Energy Investment Corp. (nationally recognized energy efficiency provider) are offering an Efficiency Vermont for more than a decade) are pursuing a turnkey partnership. The Efficiency Smart Power Plant (ESPP) will deliver robust energy efficiency services to municipal electric systems and is part of a strategy to ensure municipal electric customers have a sustainable and diverse supply of lower cost electricity. The ESPP aligns with the State's goals. The ESPP would bring VEIC's successful implementation experience to Ohio. The partners propose a contractual subscription approach for AMP-Ohio members to build the ESPP, which would deliver energy savings paid the three-year funding periods. Services would span residential, commercial and industrial new construction and existing facilities. Beyond the benefits to participating customers, the ESPP would support subcontractors, trade allies, vendors and retailers, and provide a launch pad for VEIC to serve others. The ESPP is estimated to create 100 new direct long-term jobs in Ohio. AMP-Ohio proposes the State contribute \$3 million for energy and training levels of \$15 million from 2009 | American Municipal Power - Ohio, Inc. | 189 | 91 to 180 days | \$18,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Franklin | Hybrid Vehicle Purchases - Public Utilities and Tr | In order to reduce vehicle emissions, improve air quality, reduce reliance on foreign oil and reduce the City's fuel budget, the City of Columbus is seeking to purchase a fleet of select hybrid vehicles. These vehicles are a combination of medium and heavy duty trucks. A small quantity of passenger vans in hybrids would also be purchased as test vehicles for meter readers, mail clerks and as pool administrative vehicles. The type and quantity of hybrids to be purchased are below: Utility trucks: • Hybrid Bucket trucks - 15 vehicles @ \$250,000/unit = \$3,750,000 • Hybrid Derrick digger trucks - 3 vehicles @ \$450,000/unit = \$1,350,000 Transportation trucks: • Hybrid Bucket trucks - 15 vehicles @ \$250,000/unit = \$3,750,000 • Hybrid Platform trucks - 3 vehicles @ \$200,000/unit = \$600,000 PHEV Passenger sedans: • 12 vehicles @ \$46,000/unit = \$552,000 | City of Columbus Ohio | 25 | 31 to 90 days | \$9,900,000 |
| Franklin | Fire - Relocation of Laundry and Bottled Breathing | Both functions are located at facilities slated for demolition due to age and condition. Operational efficiencies are possible as well. Both can be located at current Fire Training Academy if additional renovations are completed. | City of Columbus Ohio | 48 | 91 to 180 days | \$300,000 |
| Franklin | Mobile Health Care services, screenings & wellness | ProActive HealthCare is an Ohio Corporation. We are an alliance of skilled professional workers that will be composed of advanced practice nurses, family nurse practitioners, registered nurses, oncographers, a dietitian, and other health care workers who offer primary care. The structure of the medical health care delivery system continues to undergo profound change, while the objective remains the maintenance of high quality health care at a reasonable cost. Managed care has become managed cost. Beyond cost savings, studies suggest that the programs we are proposing will help prevent costly complications by encouraging early, appropriate intervention. "Patients Don't Just Get Health Care - They Produce It". The funding we are requesting will allow us to purchase and/or lease the necessary mobile units, all the various medical equipment, and begin hiring the necessary personnel to staff these units, along with the working capital necessary for this operation. Thank you for your consideration of this matter. Because of insufficient funds, this project is currently deferred. Conceptual design is complete. | ProActive HealthCare, Inc. | 15 | 31 to 90 days | \$1,500,000 |
| Franklin | Fire Facilities - Asphalt and Concrete Renovations | The Division of Fire is in need of pavement restoration at 34 facilities. | City of Columbus Ohio | 50 | 31 to 90 days | \$700,000 |
| Franklin | Intelligent Urbanization | mesh network. This initiative will provide the IP foundation for inter-operability among first responders across all disciplines, including fire, health, and outside emergency agencies. Local medical and educational facilities and IP based devices will be able to interconnect through the data delivery infrastructure. This initiative will reduce CO2 emissions as the City's carbon footprint continues to grow. The mesh network will provide Wi-Fi access to the underserved in our community and allow IP applications for public safety surveillance to be deployed. 1. Public Safety Neighborhood Camera 2. Facility Infrastructure: City owned property monitoring 3. Secure data transmission for CPD 4. Temporary camera placements for individual emergency situations 5. Critical infrastructure electronic monitoring 6. Homeland Security Monitoring (border sensors) | City of Columbus, Department of Technology | 100,000 | 31 to 90 days | \$37,900,000 |
| Franklin | Fire Station - Security Systems | Because of insufficient funds, this project is currently deferred. Design is largely complete and ready for permit review. A security assessment report submitted in 2008 identified the need for a centralized security system for City of Columbus fire stations and other Division of Fire facilities. | City of Columbus Ohio | 40 | 91 to 180 days | \$1,500,000 |
| Franklin | Fire Station - Emergency Generators | Emergency back-up power for operational and emergency management needs at 1585 Morse Road and 3638 Parsons Avenue. AMP Ohio (volunteer power and services provider) in Ohio municipal electric systems and Vermont Energy Investment Corp. (nationally recognized energy efficiency provider that has effectively administered/developed Efficiency Vermont for more than a decade) are pursuing a similar partnership. The Efficiency SmartPower Plant ESPPP will deliver robust energy efficiency services to municipal electric systems and is part of a strategy to ensure municipal electric customers have a sustainable and diverse supply of power into the future. The ESPPP aligns with the State's goals. The ESPPP would bring VEC's successful implementation experience to Ohio. The partners propose a contractual subscription proposal for AMP Ohio members to host the ESPPP, which would deliver energy savings post the three-year launch phase. Services would span residential, commercial and industrial new construction and existing facilities. Beyond the benefits to participating customers, the ESPPP would support subcontractors, trade allies, vendors and resales, and provide a launch pad for VEC's to serve others. The ESPPP is estimated to create 169 new direct long-term jobs in Ohio. AMP Ohio proposes the State contribute \$3 million for start-up and matching funds of \$15 million from 2009 | City of Columbus Ohio | 15 | 31 to 90 days | \$305,000 |
| Franklin | AMP-Ohio Efficiency Smart Power Plant | AMP Ohio (volunteer power and services provider) in Ohio municipal electric systems and Vermont Energy Investment Corp. (nationally recognized energy efficiency provider that has effectively administered/developed Efficiency Vermont for more than a decade) are pursuing a similar partnership. The Efficiency SmartPower Plant ESPPP will deliver robust energy efficiency services to municipal electric systems and is part of a strategy to ensure municipal electric customers have a sustainable and diverse supply of power into the future. The ESPPP aligns with the State's goals. The ESPPP would bring VEC's successful implementation experience to Ohio. The partners propose a contractual subscription proposal for AMP Ohio members to host the ESPPP, which would deliver energy savings post the three-year launch phase. Services would span residential, commercial and industrial new construction and existing facilities. Beyond the benefits to participating customers, the ESPPP would support subcontractors, trade allies, vendors and resales, and provide a launch pad for VEC's to serve others. The ESPPP is estimated to create 169 new direct long-term jobs in Ohio. AMP Ohio proposes the State contribute \$3 million for start-up and matching funds of \$15 million from 2009 | American Municipal Power – Ohio, Inc. | 189 | 91 to 180 days | \$18,000,000 |
| Franklin | Fire Station - Lighting Retrofit | Lighting in 28 Fire Stations is highly inefficient. Project involves installation of contemporary energy efficient lighting. | City of Columbus Ohio | 140 | 91 to 180 days | \$2,100,000 |
| Franklin | Fire Station - Retrofits of Water Piping | 26 Fire Stations require retrofits of piping for both domestic water and heating purposes. | City of Columbus Ohio | 148 | 91 to 180 days | \$2,900,000 |
| Franklin | Fire Station - Heating and Cooling Replacement | Energy Retrofits of inefficient HVAC systems at 33 Fire Stations. Our intent is to program participants who obtain and maintain employment at a wage that moves them toward self-sufficiency. Participants will obtain and maintain employment at a wage that moves them toward self-sufficiency. Program participants will create long term Individual Employment Plans to ensure movement toward the identified self-sufficiency wage, range \$8.36 per hour to \$27.81 per hour, depending on family size. | City of Columbus Ohio | 105 | 91 to 180 days | \$2,500,000 |
| Franklin | Assistance to Ohio Workers Hurt by the Economic Do | Our intent is to program participants who obtain and maintain employment at a wage that moves them toward self-sufficiency. Additionally, 60% of employed individuals will maintain employment for a minimum of three months and 40% will maintain employment for a minimum of six months. Program participants will create long term Individual Employment Plans to ensure movement toward the identified self-sufficiency wage, range \$8.36 per hour to \$27.81 per hour, depending on family size. | Jewish Family Services | 0 | 0 to 30 days | \$320,000 |
| Franklin | Fire Station - Window Replacement | Windows in 22 Fire Stations will be replaced with energy efficient replacements. Because of insufficient funds, this project is currently deferred. Design is partially completed. | City of Columbus Ohio | 40 | 91 to 180 days | \$1,900,000 |
| Franklin | Police Munitions Bunker Facility | The Division of Police must replace its current munitions bunker because of improper humidity control, lack of mitigation of fire or explosions, and security concerns. This bunker must be replaced with a secure and effective facility in order to support Police operations and safety. | City of Columbus Ohio | 35 | 91 to 180 days | \$700,000 |

| Franklin | 2077 Parkwood Avenue Buildings - Demolition and En | The City of Columbus must remove asbestos and demolish three neglected buildings on the 2077 Parkwood Avenue site. This is a City owned site. These buildings are highly deteriorated and in need of code driven and other repairs well beyond the value of the buildings. Demolition of these buildings will be followed by testing and environmental remediation of the site. The City of Columbus must retrofit the building at 757 Carolyn Avenue, approximately 100,000 square feet, with energy efficient lighting, HVAC systems and digital controls, high efficiency window systems. These funds will also be used to restore insulation and to slick the buildings exterior. This building has been identified as one of the most energy inefficient in Columbus' portfolio. | City of Columbus Ohio | 25 | 31 to 90 days | \$440,000 |
| Franklin | I-71 Complex (757 Carolyn Avenue) - Energy Retrofit | The City of Columbus must retrofit the building at 757 Carolyn Avenue, approximately 100,000 square feet, with energy efficient lighting, HVAC systems and digital controls, high efficiency window systems. These funds will also be used to restore insulation and to slick the buildings exterior. This building has been identified as one of the most energy inefficient in Columbus' portfolio. | City of Columbus Ohio | 170 | 91 to 180 days | \$4,500,000 |
| Franklin | Convert Columbus City Center Mall to Entrepreneur | Instead of demolishing the Columbus City Center Mall, convert it to an institute/academy supporting entrepreneur development for Ohio and throughout the USA. Small business is our greatest employer. Let's bolster small business with this academy. Project involves replacement of energy inefficient lighting at this vintage 1950's building. Building's energy inefficient lighting, cooling towers, hot water heating systems, and direct digital controls are very inefficient and have exceeded their expected service lives. Also domestic hot water systems and pumps are obsolete and parts are generally not available. | none | 100,000 | 31 to 90 days | \$1,000,000 |
| Franklin | Beacon Building (50 West Gay St.) - Renovation of | The Division of Police is in need of insulation and related work to improve energy efficiency and effectiveness of air handling. Infrared scanning and other data clearly demonstrate the need. This is 216,000 square foot, 20th century facility that is heavily used by the citizens of Columbus. | City of Columbus | 95 | 91 to 180 days | \$3,530,000 |
| Franklin | Central Safety Building - Insulation Retrofit | The Division of Police is in need of insulation and related work to improve energy efficiency and effectiveness of air handling. Infrared scanning and other data clearly demonstrate the need. This is 216,000 square foot, 20th century facility that is heavily used by the citizens of Columbus. | City of Columbus Ohio | 44 | 91 to 180 days | \$1,200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Franklin | Better Buildings on The Hilltop | To improve the energy efficiency and useful life of 9 existing residential buildings. A full energy audit will be conducted, and suggested improvements will be completed. These improvements will likely include energy star rated windows, highly-effective cellulose insulation in exterior walls and attic, or fiberglass exterior and thermal barrier, low-voltage exterior lighting and energy saving will be applied. These efforts will result in an estimated energy savings of around \$1000 per unit, per year. If all expected improvements are executed, this effort will result in contracts to qualified contractors for each of the 9 buildings, produce energy-saving benefits, and provide for significant neighborhood improvement. The buildings are clustered within 3 miles of each other, and four of them are on the same block. More details regarding the timeline and cost breakdown can be provided as required. The energy audit will be the first step used to draft a report outlining the work to be performed. | Panzer Enterprises | 0 | 0 to 30 days | \$145,000 |
| Franklin | Central Safety Building HVAC Retrofit | The Division of Police Central Safety Building is in need of retrofit of air conditioning chillers, cooling towers, and hot water heating systems. This equipment has exceeded its expected service life and is a very inefficient. Air conditioning and domestic hot water pumps are obsolete and parts are unavailable. This facility is operated 24 hours a day, 365 days a year and is heavily used by the citizens of Columbus. | City of Columbus Ohio | 34 | 91 to 180 days | \$1,900,000 |
| Franklin | Central Police & Beacon Building (50 W. Gay) - Ext | Central Safety and 50 West Gay facilities house many current city employees. Extentors are in need of back painting and sealing to protect facilities from water penetration and energy loss. Exterior sealing and masonry repairs will greatly improve the energy efficiency of these buildings. | City of Columbus Ohio | 35 | 31 to 90 days | \$660,000 |
| Franklin | Jerry Hammond Center (1111 East Broad St.) - Light | Lighting in certain parts of this facility is highly inefficient. Project involves installation of contemporary energy efficient lighting which will complete work conducted in many parts of this facility a few years ago. | City of Columbus Ohio | 16 | 31 to 90 days | \$440,000 |
| Franklin | Jerry Hammond Center (1111 East Broad St.) - HVAC | Current HVAC was installed circa 1960. System is inefficient and retrofit is necessary to improve air quality. Funding to be used to retrofit air conditioning chillers, cooling towers, hot water heating systems and direct digital controls. Many parts and systems are hard to find or are obsolete. Because of insufficient funds, this project is currently deferred. Studies have determined that the highly energy inefficient HVAC system must be replaced. This will also improve interior air quality. Conceptual design is complete. | City of Columbus Ohio | 46 | 91 to 180 days | \$2,800,000 |
| Franklin | 1393 East Broad St. - HVAC Retrofit | The HVAC system is largely original to the building which was built in 1975. This building is designated for use by non-profit organizations and community groups. | City of Columbus Ohio | 35 | 91 to 180 days | \$1,800,000 |
| Franklin | Police Building for Community | Mifflin Township Police Department is currently based in approximately 900 sq. feet of building space that serves a population of 14 police officers and a citizen base of approximately 4,800 residents. The police function in a space that used to be a fire bay in the existing fire department. The funding would promote a modern, safe, and ADA functioning facility to allow better operations of police personnel and improve the quality of police community services. The request would facilitate the basic need of offices and an entry way to better serve the community. The request requires 247 police assistance in a community that is located in the heart of Columbus but receives no funding from outside sources for police operations. | Mifflin Township Police | 20 | 31 to 90 days | \$1,500,000 |
| Franklin | Parent, School and Child Partnerships | Our program will target and serve an underserved/underrepresented and/or diverse population. Research shows that children from these families come to school ill prepared as demonstrated by delays in cognitive and language development, poor reading skills and other age appropriate behaviors. Parents benefit when they are being educated on the importance of their role in their child's education. The program strives to help parents achieve better educational outcomes for their children by addressing such issues as the importance of reading at home, cognitive stimulation, established routines, understanding child development, and the role of education and early literacy. Dr. Joyce Epstein of Johns Hopkins advocates in order for children to be successful in school parents must be involved with their education. Teaching parents to create partnership helps their children to succeed in school and later in life. She continues by indicating that parents should receive support to establish home environments to support their children as students. Activities in this program will align with the research needed to increase academic success. Because of insufficient funds, this project is currently deferred. It has been studied and determined that high efficiency window systems are needed. Conceptual design is complete. | Jewish Family Services | 4 | 31 to 90 days | \$229,000 |
| Franklin | 1393 East Broad St. - Window Replacement | The windows are original to the building which was built in 1975. This building is designated for use by non-profit organizations and community groups. | City of Columbus Ohio | 35 | 31 to 90 days | \$920,000 |
| Franklin | Home Purchase Money Second Mortgages | We are going to lend this money to new home buyers on purchase money second mortgage loans. We plan on making money (profit) and paying you back this money. This money will be utilized to lend where all banks have stopped lending to people with the best credit. I hope you understand that banks are not lending to the best clients in America under any circumstances. Banks are not lending they are de-lending. We have a portfolio of current loans and want add to that portfolio and lend funds to all people buying homes all over the State of Ohio. | Equitable Mortgage Corporation | 23 | 0 to 30 days | \$10,000,000 |
| Franklin | 109 North Front Street - Demolition and Asbestos A | In order to carry out central City campus planning, the City must remove asbestos and demolish an existing low rise downtown building approximately 100,000 square feet. This building is energy inefficient and in need numerous repairs, many of which are code driven, the cost of which are well beyond the value of the building. Once the building, which is within the downtown core, is demolished the site will be redeveloped. | City of Columbus Ohio | 35 | 91 to 180 days | \$600,000 |
| Franklin | State Park Elevated Water Storage Tank Rehabilitat | Project includes rehabilitation of existing elevated water storage tanks at Hueston Woods, Harrison Lake and Indian Lake State Parks. These storage systems serve the public drinking water needs of popular recreation destinations. Work would include improving cathodic protection, sanding of tank interiors and painting of exteriors. | ODNR-Parks & Recreation | 15 | 31 to 90 days | \$550,000 |
| Franklin | Municipal Courts Bldg. - Window Retrofit | The windows are original to the building which was built in the mid to late 1970's. They are highly inefficient and allow water penetration into this 200,000 square foot facility. This building is open to the public and contains county and municipal courtrooms, holding cells, the Municipal Clerk's Office, the City Prosecutor's Offices and all related court functions. | City of Columbus Ohio | 45 | 91 to 180 days | \$7,100,000 |
| Franklin | Fleet Replacement | The Mifflin Township Police Department is in critical need of replacing a fleet of 4 marked police cruisers to operate with effective police response. Mifflin Township Police currently operate cruisers with an average of 80,000 miles and currently lack funding for this basic law enforcement need. Mifflin Township Police has the responsibility of the unincorporated areas of the township that sees little funding and low property tax revenues. The last time voters added mileage to the tax base was over 10-12 years ago. This relies on donations a maximum of \$100,000 per year that keep funding levels with no additional funds for promoting buying or adding equipment. The assistance of funding Mifflin Township Police would be able to operate safe equipment to respond to emergencies and assist adjoining jurisdictions for mutual calls. The funding would be for 4 police cruisers and related safety equipment. | Mifflin Township Police | 2 | 31 to 90 days | \$120,000 |
| Franklin | Electronic Waste Recycling | Possibility is a self-funded 501(c)(3) corporation that develops employment opportunities for people with disabilities. We will develop 30 full-time positions for people with disabilities over a 3-year period with an electronic waste recycling service offering businesses: Free pickup and recycling of e-waste items All materials safely recycled back into the manufacturing stream Guaranteed 100 percent no-landfill policy All hard drives are data wiped or are core (Certificates available for a nominal fee) Security of all devices and sensitive information is assured Documentation provided for charitable donation tax credit. | Possitivity | 30 | 0 to 30 days | \$250,000 |
| Franklin | Municipal Court Bldg. - Security System Renovation | Internal public safety personnel and security consultants have identified the need for numerous improvements in security for the Municipal Courts Building, including surveillance cameras, card access, panic switches, and other features. This building is open to the public and contains county and municipal courtrooms, holding cells, the Municipal Clerk's office, the City Prosecutor's office, and all related court functions. | City of Columbus Ohio | 65 | 31 to 90 days | \$1,000,000 |
| Franklin | SWWTP Multiple Hearth Incinerator #4 Rehabilitatio | Project nominated for WPCFL funding This project will provide needed rehabilitation of incinerator No. 4. The scope of work consists of hearth restoration, venturi ductwork replacement, replacement of a section of the circular ductwork, replacement of an expansion joint in the exhaust ductwork, replacement of a plate on the roof of the incinerator and all failed refractory replacement. | Columbus Department of Public Utilities | 12 | 91 to 180 days | \$925,000 |
| Franklin | JPWWTP Incinerator Hydraulic Scrubber Conversion - | Project to be nominated for WPCFL funding This project will retrofit the existing biosolids incineration scrubber system from an air-abating compressed air system to a completely hydraulic-scrubbing system. This system will provide enhanced scrubber performance, substantial energy savings and maintenance savings by removing the energy-consuming and problematic air compressors from the system. The scrubber equipment upgrade is being performed by the equipment's manufacturer, Envirocon, and they are the sole source of the equipment. | Columbus Department of Public Utilities | 8 | 0 to 30 days | \$500,000 |
| Franklin | SMOC Materials Storage Addition - CIP# 650510.32 | Project to be nominated for WPCFL Funding This project consists of providing an approximately 3,000 square foot Material Storage Building at the City's Sewer Maintenance Operations Center (SMOC). Typical material to be stored is rock salt, cold patch asphalt, sand and topsoil for sewer repair. | Columbus Department of Public Utilities | 8 | 0 to 30 days | \$500,000 |
| Franklin | Taxpayer Relief | Out wasting our money and give it back to us if you really want to stimulate the economy | Taxpayer Fairness Association | 10,000,000 | 0 to 30 days | \$5,000,000,000 |

| Franklin | Ethnic Community Job Procurement Grant | with acculturation and guiding them toward self-sufficiency. H.A.N.D. employs individuals that are TANF eligible as assessed by the 200% of poverty level. H.A.N.D. & Somali Link Newspaper will increase publication and distribution of a monthly newspaper to a weekly newspaper to provide employment and training to African immigrants and other Americans. This newspaper will meet the need of more timely news, provide information about free services or classes, provide greater assistance with the immigration naturalization process for the African/Somali Communities in Franklin County/Columbus, Ohio. Outcomes: 1) 70 new jobs will be developed or persons hired into 2) 45 people will have some on-the-job training to maintain a job in this field and/or ESL to help them acquire employment 3) Expect 70% will attain self-sufficiency by 1 year 4) Expect 50% will be able to be removed from TANF within 1 year 5) Distribution of newspaper into 3 major cities 6) Maintain free news service to indigent population Transfer the ability of rural and independent Hospitals and Healthcare Providers to be totally electronic regarding technology and patient records within 3 years. | Helping Africans in New Directions/Somali Link New | 72 | 0 to 30 days | \$1,801,106 |
| Franklin | Hospital and Provider Health Information Technology | A Child is Missing is requesting funding to train those law enforcement agencies in Ohio that are unaware that our Alert Program is available to them at no cost. By implementing this Alert Program in their agency, law enforcement saves significant funds and resources in searching the missing. | Ohio Hospital Association | 50 | 0 to 30 days | \$1,500,000 |
| Franklin | A Child is Missing Alert Program | The A Child is Missing Alert Program frees up law enforcement agency dollars. Rather than purchasing expensive equipment, financing its maintenance and routine updates, and further burdening E-911 personnel with learning its use, A Child is Missing provides a cost-free turnkey alternative. A simple phone call from law enforcement activates our Alert Program with experienced Recovery Specialists engaging the community to assist police in their search for the missing. This program, when used immediately, may avert a more expensive search which can include door-to-door searches, K-9 units, bloodhounds, helicopters, dive teams, search and rescue teams, etc.... | A Child is Missing Alert Program | 1000 | 0 to 30 days | \$35,000 |
| Franklin | Energy Efficiency Intelligence/Education | Questline provides intelligence, education and utility-specific information to Commercial & Industrial customers as well as Residents of our jurisdiction. Questline is a one-of-a-kind Ohio small business offering a turnkey, utility-tailored suite of products, including an eNewsletter, Ask an Expert hotline, and various interactive tools and calculators. Questline has solutions for varied markets, including residential, buildings green, and managed accounts. It is our belief that citizens of Ohio are responsible and have a desire to become more Energy Efficient, but simply don't have the tools and knowledge to do so. Questline provides these tools and the information for citizens/customers to make wise and informed decisions regarding Energy and Energy Efficiency. The outcome of our project is simple: Provide intelligence/information to our citizens so they can make informed smart decisions regarding Energy and Energy Efficiency. Thank you and have a great day. Cory Strunk cstrunk@questline.com www.questline.com | Questline (Tech Resources, Inc.) | 40 | 31 to 90 days | \$4,000,000 |
| Franklin | Village of Harrisburg - Wastewater Collection Syst | The Village of Harrisburg is under EPA mandate to construct a public sanitary collection system. The project design is 100% complete and is ready to advertise and begin construction. The sewer system will be regionalized and connect to Franklin County's Duesenberg treatment facility. Project components include: 10,425 LF of 8' gravity sewer 10,500 LF of 8' sanitary forcemain 160 manhole connects 47 manholes 1 pump station | M-E Companies, Inc. | 25 | 0 to 30 days | \$1,500,000 |
| Franklin | Campus Revitalization | Legacy was founded as a non-profit organization to provide financial support for other non-profit organizations, so that they may better focus on the purpose of their organization without the consequences of financial hardship. Using the practice of acquisition and management of investment properties, Legacy will direct the proceeds from such properties to non-profit organizations that have demonstrated financial need and support to sustain their organizational purpose. Primary funding goes to: • Alleviate new and existing financial needs in church organizations • Development and construction of new churches • Funding of missions and active missionaries • Faith-based educational programs Legacy welcomes proposals for financial assistance, under a per-need basis, and awards financial contributions to strengthen the capacity of eligible organizations and churches. Mission Statement: The heart of Legacy is to enable the dreams and visions of non-profit organizations and churches, through funding from real estate investment properties. Legacy Family Services was begun when non-profits were distressed or in need of immediate help, or those who have the skills, time, energy and special populations - grandparents caring for grandchildren and teen mothers. The intent of our program is to assist families in raising cooperative, responsible children with non-violent methods. Our expected Results, parents/caregivers strengthen their behaviors and/or family functioning which supports their child's growth and development. In turn, strong families are the backbone of communities where all children can thrive. Through parent education activities parents/caregivers will understand their primary role is to provide sustenance, stimulation, support, structure and supervision. When parents/caregivers become skilled in these areas children thrive at school, home and in the community. The end result will increase the positive interaction between parents/caregivers and child and promote parents/caregivers confidence to be the child's first teacher. The outcome: the child will meet the Ohio Department of Education standards for Kindergarten Readiness. | Sharing Legacy | 5 | 0 to 30 days | \$50,000 |
| Franklin | Parenting to promote Kindergarten Readiness | Start a used bicycle shop in Columbus servicing the Ohio State University Campus Area and greater Franklin County. Bikes will be purchased ideally from police auctions to build stock and replacement parts. Bikes will be taken in, refurbished and sold at a price that meets the needs of both the college student and the working family. Funds will be needed for startup costs including incorporation, inventory, storage space, and a store front. If needed as a success, then plans include expansion to use a warehouse for repair and refurbishing of damaged bicycles. Distribution will include a combination of local marketing, internet sales, and sales at the beginning of semesters and quaters at local colleges. | Jewish Family Services | 4 | 31 to 90 days | \$281,000 |
| Franklin | Pedal Free | Stimulus Proposal Columbus Public Health Health Information Technology February 23, 2009 Health Information Technology CPH would utilize HT funds in three areas: Hardware- The purchase of tablet PCs for our field staff conducting food and water inspections, communicable disease investigations, emergency epidemiology operations, and home visits in maternal child health (MCH), and Tuberculosis programs. One-time purchase of approximately \$275,000. Software- The purchase of wireless technology and related broadband communication to enable field staff to access and update system applications in real-time. Approximately \$76,000 per year. Technology Coordinator- CPH would act as a liaison with other regional medical providers to help foster the development of a Central Ohio Regional Health Information Organization (RHIO). Annual personnel cost of \$110,000. | Reputable Used Bikes | 10 | 0 to 30 days | \$15,000 |
| Franklin | Health Information Technology | Public Health Workforce Training Stimulus funding is allocated to train and educate public health professionals who are responsible for keeping Americans healthy. A major gap in Central Ohio is adequate clinical sites to provide community-based experiences for students. As the largest public health department in the area, the demand from educational institutions for clinical placements with expert public health preceptors greatly exceeds capacity. Preceptors are critical for medical, nursing and health students needing this important training and to prepare them to provide much needed care within the community. During 2008 we served 26 schools and institutions representing 16 different disciplines, and over 20,000 contact hours. The 2008 requests greatly exceeded our ability to meet the community demand and in 2009 we anticipate a greater imbalance. Columbus Public Health is proposing to provide expert professionals to offer direct clinical oversight and coordination for students and health professionals pursuing training in public health. These staff will be involved in CPH clinical services to assure a high quality experience and avoid | City of Columbus - Columbus Public Health | 1 | 0 to 30 days | \$516,000 |

| Franklin | Healthy Children, Healthy Child Care Environments | <p>Healthy Children, Healthy Child Care Environments</p> <p>This proposal is to implement the Healthy Children/Healthy Environments [HCHHE] community-based initiative in day care centers in Columbus. Day care centers are vital for working parents and modeling behaviors and practices that form a healthy foundation for the child. CPHH has piloted a successful program "Healthy Children/Healthy Weights" designed to prevent childhood obesity, our number one health problem. It includes staff nutrition/physical activity training, a toolkit, on-site technical assistance, parent educational materials and outreach training and 5 physical activity equipment. The program is evidence-based using best practices and evaluated. In 2008, 34 day care centers completed 500 and 5 ends 6/09.</p> <p>A healthy child care environment is also essential. We have had multiple disease outbreaks and child care centers are often a key factor. Site visits revealed significant deficits in infection prevention practices and on-site expert support is needed. If children are excluded causing family hardship and family spread is common. We will merge the healthy weights and a healthy environment program to assure safer and healthier child care environments.</p> | City of Columbus- Columbus Public Health | 12 | 0 to 30 days | \$850,000 |
| Franklin | Education- Accounting | <p>I would like to study Accounting Program. I am working as a Data Collection Technician at USFPA. I have an opportunity to retain and further serve the company by studying accounting. I do own the house at the above address and have been responsible in making the payments. I had refinanced my mortgage recently and it was shocking to learn the diminished home value. I had lost my investment in the tough market and am thankful for the help extended by you. I have wife and two kids and believe that I should be able to help and support my family from additional income from other companies if my studies. I will have to take some more additional classes to get into the programs. I already took couple of classes like English 101 & Biology from Columbus State Community College. I hope you favorably consider my request.</p> | USPS | 1 | 0 to 30 days | \$2,500 |
| Franklin | Comics For The Class Room - An Earthshield Green P | <p>The Earthshield Green (ESG) project will make available Earthshield Green Eco-Super Heroes Comic Books for Classroom Program with supporting educational material and training on "How To Get Green." The training is designed for teachers, environmental based organizations and communities to enhance their efforts in stimulating interest and participation in renewable resources, recycling, waste management and care for the environment. Our goal is to provide educational training and material to each of 52 Ohio's Solid Waste Districts, 34 Keep Ohio Beautiful Affiliates so they in turn can provide Earthshield Green Environmental Educational Program (material to Ohio's 720 School Districts.</p> | Earthshield Green | 15 | 0 to 30 days | \$300,000 |
| Franklin | Renewable Energy Ready | <p>Researching into the use of solar cells, hydroelectric power, wind turbines, geothermal energy, etc. The use of renewable energy sources is becoming more popular and we are looking for innovative programs and incentives to encourage their use. We will also research the renewable technologies themselves and how those costs could be supplemented by the incentive programs. At this point, the most economical and environmentally beneficial solutions will be identified.</p> <p>The funding will be used to establish our company (i.e. website, market research, and research and development). Our ultimate goal is to have an Ohio-based company that will provide a means to retain Ohio workers in these new, exciting and in-demand energy fields. We will work with our knowledge of incentive programs and a skilled staff we will be able to provide an even more cost effective way to help Ohio's renewable energy systems.</p> | Ohio Green Group | 7 | 0 to 30 days | \$184,675 |
| Franklin | TriStar | <p>The establishment of a hometown airline, TriStar, to be based in Columbus providing scheduled non-stop service to 50 targeted markets which currently lack non-stop service. This service is also available to Youngstown. TriStar currently lacks non-stop service because passenger demand cannot support an aircraft of 130 seat seats. However, based on the analysis conducted by Port Columbus, current passenger demand in these targeted markets can fully support a 90 seat aircraft. Based on a detailed route analysis conducted by TriStar, TriStar will break-even at 40% load factor and realize a \$100 million gross margin annually with a 75% factor. As a result, TriStar was issued a proposal with significant financial incentives from Embraer, the only aircraft that can accommodate 90 passengers with a range of 2400 miles. TriStar met with the Ohio Department of Transportation, Columbus Regional Airport, Youngstown Regional Airport, and Columbus Chambers and received extremely favorable responses. TriStar has the necessary highly qualified personnel based in Ohio to implement service within a year of receipt of funding.</p> | TriStar Airlines | 2500 | 0 to 30 days | \$25,000,000 |
| Franklin | Dump Truck Hauling Infrastructure | <p>Highways and Bridges in the State of Ohio. Hauling of all types of aggregate including asphalt. Also a material supplier.</p> | LGT Enterprises, LLC | 3 | 31 to 90 days | \$1,000,000 |
| Franklin | ARC-Adkins Remodeling Company | <p>LGT Enterprises is a woman owned service-disabled veteran company with DBE and EDGE certifications from the State of Ohio. LGT is looking to create jobs with the ability to obtain more equipment to help stimulate the economy. In addition, LGT has a pending application for the BA certification through the SBA.</p> | Construction | 20 | 0 to 30 days | \$80,000 |
| Franklin | MRDD Case Management Program Lighting Replacement | <p>This would create a business that could hire up to 20 employees. We could help homeowners repair damaged property do minor repairs or restore older homes to like new. This could also help businesses such as Lowe's, Home Depot etc. empty from being products needed to complete these jobs. Homeowners need repairs or would like to fix up their property but they don't know how or who to contact. This money would be used to start a business that could really help homeowners and also of construction workers!</p> | Franklin County Board of Commissioners | 4 | 91 to 180 days | \$215,000 |
| Franklin | Facilities update | <p>The Case Management Program is responsible for overseeing the health and safety of over 7,000 individuals. The program will relocate from its current four locations into one building in the center of the community and due to the extent the property has become under the weather. These funds will be used directly for updating the property by hiring local contractor to perform all work. The grant should be enough to employ 10-15 people one year and other renovations should be able to get back on track of building back memberships and hiring new employees to perform new duties. This would total another 10-15 full time employees.</p> | Moose Lodge #11 | 10 | 91 to 180 days | \$800,000 |
| Franklin | Parking Lot Project | <p>Excavation/Underlayment, Curb, Drainage, Sidewalks, Lighting, Asphalt Paving, New Concrete Curbs, Lawn/Landscaping</p> | Grandview Heights Public Library | 20 | 31 to 90 days | \$51,000 |
| Franklin | Eye and Vision Care for the Underserved | <p>This project will cover the initial startup costs and two-year operational costs for a 12,000 square foot optometry clinic in a multidisciplinary outpatient facility near a medically underserved community. The patients will receive high quality patient care services. The optometry clinic will be staffed by two (2) faculty members from The Ohio State University College of Optometry who will serve as clinical preceptors for students (i.e. O-FTs) who will provide direct patient services. Medical and dental services will also be available in the multidisciplinary facility. In addition to training in a multidisciplinary setting, our student clinicians will gain important interpersonal experiences that will reinforce prior educational learnings.</p> | The Ohio State University College of Optometry | 4 | 91 to 180 days | \$1,550,000 |
| Franklin | Food Stamp Fraud Investigation | <p>The Federal Stimulus Package increases the amount of food stamp benefits available. Proposals being legislated include raising taxes on items most often involved in food stamp fraud (alcohol, cigarettes, etc.). With the increase in food stamp money available, food stamp fraud will increase. This project would allow the Ohio Investigative Unit to hire 15 additional agents for the sole purpose of investigative food stamp fraud, which would increase proportionately the amount of food stamp fraud investigation money the division gets from the federal government (matched). The Ohio Investigative Unit is the only law enforcement agency in the State of Ohio that can possess food stamps in the course of an investigation. Agents conduct covert investigations, often posing as food stamp recipients or using confidential informants dedicated to buy fraudulent purchases from merchants. Many of these investigations have turned into large organized crime investigations with profits being passed to the middle east, financing terrorist organizations. The hiring of 15 additional agents would bring the manpower allotted to these types of investigations up to 3 more agents than 2 years ago.</p> | ODPS- Ohio Investigative Unit | 15 | 91 to 180 days | \$1,185,000 |
| Franklin | Focus on Ohio's Future | <p>Implement a communications campaign to (1) support initiatives to create and maintain retail jobs in Ohio; (2) educate the public, governmental entities and private sector industries regarding the importance of Ohio's retail industry to our state's economic recovery; (3) promote economic development initiatives that support Ohio's retail industry; and (4) educate consumers and law enforcement about the new organized retail crime tax, which will help stop theft, keep product costs low for consumers and decrease dangerously adulterated and tampered products sold on the internet.</p> | Focus on Ohio's Future | 35 | 31 to 90 days | \$1,000,000 |
| Franklin | Rickenbacker Parkway Widening | <p>The effort will directly help maintain at least 35 jobs in the retail and communications field involved in preparing and distributing materials such as brochures, displays and point-of-purchase materials and preparing, placing and running print, radio and television commercials on Ohio's broadcast, cable, radio and newspaper outlets. Typical jobs positively impacted by the project include state youth manufacturers, printers, media outlet sales and production personnel, advertising production personnel, including media buyers and planners, copywriters, graphic design.</p> | Columbus Regional Airport Authority | 60 | 91 to 180 days | \$8,000,000 |
| Franklin | Griswold Building Window | <p>Project is the addition of 2 lanes to Rickenbacker Parkway at Rickenbacker International Airport and Global Logistics Park, including truck to train intermodal facility.</p> | YWCA | 15 | 0 to 30 days | \$560,000 |
| Franklin | Juvenile Justice Communication | <p>The Griswold building is home to 102 women residents who, in many cases, would otherwise be homeless. In addition to these residences, it houses the administrative offices of the YWCA in Columbus, a large Health & Fitness Facility, and conference facilities for community events and advocacy organizations. Improved window technology will allow more efficient interior climate utilization through increased control in exterior seasons.</p> <p>Work with juvenile justice courts to expand statewide juvenile justice communication through the purchase of equipment such as video-conferencing technology</p> | Ohio Department of Youth Services | 2 | 31 to 90 days | \$1,000,000 |
| Franklin | Small Construction Businessman Plan | <p>My plan is to clear the way to bring new business to my small construction company by eliminating debt that has been steadily building since the economy has taken a hit for the worse. I am doing every thing I can just to keep my company afloat and ensure that workers get paid on time. While I want to be paid by those I contract with. Approx. 10-15 yrs ago, my business was ripe this size unit until the market took a dive and I had to let go 10 workers due to lack of work. Now here we are again, only now I have 5 workers and business has slowed down again. This nation was built on small business and I hope that you will take this into consideration when you review my request for a \$120,000 grant. This grant would help give my construction company and make us more competitive with the bigger companies. I would be able to hire more workers.</p> | R&D Interiors, LLC | 4 | 0 to 30 days | \$120,000 |
| Franklin | Hepatitis Prevention Supplemental Funding | <p>Healthcare Prevention is currently funded by CDC. Supplemental funding coming to Ohio through this grant from the stimulus funds will require a budget revision to the current funding.</p> <p>Use of limited federal stimulus funds to provide services, recovery to our businesses, our vocational rehabilitation, ensuring people in obtaining the role of active participants in their own wellness.</p> | Ohio Department of Health | 2 | 31 to 90 days | \$200,000 |
| Franklin | Wellness Management and Recovery for Persons with | <p>This project is to offer educational support groups facilitated by a professional and a peer mentor to high risk adults with serious mental disability. COVA's proposed Wellness Management and Recovery (WMR) model was developed by the US Office of Substance Abuse and Mental Health Services Administration (SAMHSA) and is coordinated by the Wellness Management & Recovery Coordinating Center of Excellence (WMR-COE), a statewide entity that seeks to improve clinical quality by accelerating the adoption of best mental health practices in Ohio's mental health system. COVA was part of the State of Ohio Department of Mental Health's pilot WMR program.</p> <p>COVA's WMR program will help 120 people with mental illness annually gain and retain employment and improve wellness, an investment in help that will have public resources.</p> | Center for Vocational Alternatives for Mental Health | 100 | 0 to 30 days | \$83,219 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | BRAD 2 | A new electronic health records system will: <ul style="list-style-type: none"> maintain the employment of professionals providing needed mental/behavioral health services to children and families (35). improve care, customer and efficiency reduce staff turnover rates due to reduction of burdensome paperwork meet the federal mandates for EHR by 2014 improve coordination of care provide potential clinical housing and support for smaller behavioral health providers so that they may be compliant with the 2014 federal mandates. | The Buckeye Ranch | 35 | 91 to 180 days | \$565,000 |
| Franklin | TB Prevention Supplemental Funding | TB Prevention is currently funded by a grant from the CDC. This funding will come to Ohio as a supplement to this grant and will require the program to submit a budget revision to receive this funding. | Ohio Department of Health | 3 | 31 to 90 days | \$200,000 |
| Franklin | HIV Prevention Supplemental funding | HIV Prevention is currently funded by a grant from the Centers for Disease Control and Prevention. This funding is expected to come as a supplement to that grant and will require the HIV Prevention Program to do a budget revision. | Ohio Department of Health | 3 | 31 to 90 days | \$300,000 |
| Franklin | Safer Tap Water for All | Provide activated carbon filtration for all potable water sources in the USA including all of Ohio. Groundwater and surface water sources have become contaminated with agricultural chemicals (i.e. herbicides, a multitude of industrial chemicals, and Mercury from coal-burning power plants. So many children are born with chronic diseases because of environmental exposure. Let us do what we can to maximize the health and safety of future generations. Studies have indicated that Ohio's tap water is significantly contaminated. Let's reduce Mental Retardation and other health issues by eliminating as many environmental factors as we can. Clean-up our tap water will reduce healthcare expenses in the long-run. | none | 5000 | 181 days or more | \$100,000,000 |
| Franklin | Novel Coating for Solar Cell and Liquid Crystal Di | Solar cells and LCD displays require a clear conductive coating to function. Clear conductive coatings are currently produced by sputtering ITO onto glass. The final product is produced by lithography and etching processes. A more efficient method of producing clear conductive coatings in a circuit pattern is to screen print the desired circuit pattern using a clear conductive ink. Both Korea and Japan are conducting research in this area for commercial applications. Arlington PMR has a developmental prototype for a U.S. sourced ITO conductive ink with the potential to replace ITO sputtering. | Arlington PMR LLC | 15 | 0 to 30 days | \$750,000 |
| Franklin | Manufacturing of Solar Cell Wafers | Arlington PMR is requesting funds to both continue and speed up the development of printable clear conductive inks and coatings. Potential uses include solar cells, flat panel displays, and heated windows. Extension of this product technology to architectural windows is probable. The market for ITO coated glass is estimated to be + \$1 Bly and is growing rapidly. This, only a 10% penetration of this market would create a \$100 M market for Ohio based product immediately create 8 job technology Ohio jobs and if successful, 20 or more. | Arlington PMR LLC | 10 | 0 to 30 days | \$200,000 |
| Franklin | Tri-State survival program | Alternative energy from solar cells is an important part of the future energy security for the U.S. The availability of the solar cells remains a critical component to the overall plan to use solar energy for electrical generation. Arlington PMR is a small Ohio based business that specializes in specialty metals and their assemblies. Arlington proposes to apply their capabilities to expand their operation into coating single crystalline silicon creating the base solar cell wafer. The wafer is the basic component for solar cells. Arlington has the technical capabilities, a facility, and production line for this application. We are seeking funding to expand our Ohio based operation. Arlington proposes to create 10 employment opportunities by applying our expertise in specialty metals to enhance solar cell production and availability. This energy generating safety manufacturing and technical employment in Ohio. This will assist Ohio in becoming a more technology advanced and energy producing state and a hub for solar panel research and production. | Tri-State Gift Association | 100 | 31 to 90 days | \$2,000,000 |
| Franklin | Creation of Women's Wellness Center in Columbus, | We are a non-profit organization in Columbus comprised of for-profit companies selling to the gift trade in the surrounding states. We bring 900,700 buyers to our mall every month which impacts the local economies of hotels, restaurants, shopping, and related areas. Our organization is currently operating 300,000 sq ft of retail space, over \$30,000,000 in revenue, and 100 employees. We are currently in need of space pertaining to our businesses. With the economy in the state it is in, our membership has declined because so many of our retail clients have been forced to close. Admittedly, the "retail" was sliced into too many pieces and the old adage, "the market will survive" is true. Unfortunately, without our business, these energy retailers that used to come to Columbus will be forced to go to other gift malls such as Atlanta, Chicago and Dallas. This stimulus request is to keep us moving to a better economy which I believe will come in the latter half of 2010 so we can rebuild our business and relations on our "gift" in the state of the market. | Women's Wellness Center | 15 | 31 to 90 days | \$2,080,000 |
| Franklin | Consolidated Communications System and Portable Ra | As the previous owner of a Wellness Center in California, I would like to create something similar for women in Columbus, Ohio. This center would be focused on health research to healthcare, with services to enhance the wellness of mind, body and spirit. These services would mostly be complementary and alternative to traditional medicines offered in hospitals. In addition to a fitness center (including Pilates & Yoga & strength-training, there would also be Life Coaching available (I am a Degree & Certified Life Coach), Marriage and Family Therapy, Massage and Physical Therapy, Cranial-Sacral Therapy, Acupuncture, etc. There would also be evening and weekend topics from "Fascia & Nutrition" to "Improved Communications in Relationships" to "Achieving Life Balance" to "Finding Your Passion" (in Career with) to general Motivational Speaking (ie. reaching your dreams) & various other Educational Topics benefiting individuals and their communities. I would also like to offer a resource center for women going through big life transitions (divorce, death of loved one, loss of job, recovery from illness & provide things like a "Career Coach" etc. | The Ohio State University Department of Public Saf | 25 | 91 to 180 days | \$13,750,000 |
| Franklin | Professional Voiceover Training Workshops | The OSU Public Safety radio system is nearing the end of its service life and must be replaced. System parts are no longer supported by the manufacturer. This proposal seeks for replacement of the current radio system designed and equipped to support multiple structural firefighter sites. Included are replacement of the dispatch console system, microphone radio kits, system management and alarm subsystems. With this is the planned replacement of approximately 1700 portable radios for digital compatibility. The university has committed funds for funding as required by FCC mandates. The goal is to leverage existing funds with stimulus dollars. This will allow replacement of analog radios with fully digital radios on the university system. The advantages to digital radio technology are reliability, signal strength and clarity and improved coverage area. These improvements will secure access to the Columbus campus and OSU regional campuses. This will also give OSU Public Safety greater interoperability within the state and region. Finally, the OSU system serves as a back up to the City of Columbus, Franklin County and area suburbs. | FlpSyd Voices | 200 | 0 to 30 days | \$25,000 |
| Franklin | BWARI Part 2 Lockbourne Intermodal Subtrunk (LIS) | FlpSyd Voice (FSV) is a for-profit business that records, trains and monitors voice talent of all ages for commercial or non-commercial broadcast projects. FSV would like to conduct bi-monthly voiceover workshops throughout the Columbus community and the state to encourage those interested in pursuing a career as a professional voiceover talent. In addition, professional voiceover training serves as an impetus for increasing the need and desire to need FSV maintain a web site and home recording studio services which will be used for training and business marketing purposes. Funding would greatly increase FSV's viability in the audio recording marketplace and position FSV as the only female, minority-owned professional voiceover business in Ohio. | Columbus Department of Public Utilities | 367 | 181 days or more | \$69,000,000 |
| Franklin | ARCHES (Attic Re-insulation to Create Home Energy | Project nominated for WPCLF funding CIPR 650481.02 - The LIS project involves construction of approximately 10,300 linear feet of 12 foot diameter sewer tunnel and approximately 7,700 linear feet of 5 foot diameter sanitary sewer. The 12 foot diameter portion of the project will be installed using tunneling methods and will be connected to Street 2 of the existing Big Water Augmentation Risk-reducer Interceptor (BWARI) along Rowe Road in Franklin County. The sewer tunnel will be designed to store wastewater during wet weather events. This project will reduce overflows and bypasses at Columbus Southside WWTP and will have a beneficial impact on water quality in the Solon River. The Lockbourne Intermodal Subtrunk (LIS) will also provide wastewater service to a 10,000 acre tributary area which includes the Intermodal Facility. The new Intermodal Facility at Risk-reducer Interceptor will allow Central Ohio to expand shipping capabilities and will result in economic opportunities and job creation. The LIS will result in the elimination of 60 pump stations serving the Village of Lockbourne and the area around the existing Intermodal Facility. ARCHES (Attic Re-insulation to Create Home Energy Savings) is a show-ready program sponsored by BP that reduces monthly energy bills for low-income Ohio homeowners, creates Ohio jobs, and conserves energy by insulating attics. According to 2007 Metroscap & Co. study, improved building insulation represents the single most cost-efficient greenhouse gas abatement measure available with calculated economic benefits far exceeding associated costs. Addressing attic improvements before more expensive, longer payback improvements such as windows and HVAC) accelerates energy bill savings for low-income Ohioans who need it most. In each home, the need is quickly diagnosed and documented, proper installation is easily validated and energy savings is immediate. | Installed Building Products | 75 | 0 to 30 days | \$15,400,000 |
| Franklin | Reentry Wrap-Around Services | BP, an Ohio-based company located in major Ohio cities, has available equipment and a scalable infrastructure to hire, effectively train and provide immediate work for Ohio job-seekers. | Ohio Department of Youth Services | 6 | 31 to 90 days | \$2,000,000 |
| Franklin | Community Juvenile Justice Programming | ARCHES is set to improve attics at a rate of 2000 homes per year per metro area at an average cost of approx. \$825/home (depending on attic size) plus an administrative and testing cost of approx. \$275/home. | Ohio Department of Youth Services | 12 | 0 to 30 days | \$2,000,000 |
| Franklin | Partnerships for Success | Increased local equity services for youth on parole | Ohio Department of Youth Services | 0 | 31 to 90 days | \$1,500,000 |
| Franklin | Residential Alternatives | Expand RECLAIM Ohio programming and divert additional youth by focusing on the following three priorities: urban counties who commit the bulk of offenders to DYS (the six largest counties provide almost 60% of admissions to DYS), target programs providing community interventions for many offenders, and target best practices and state diversion interventions. | Ohio Department of Youth Services | 3 | 0 to 30 days | \$945,825 |
| Franklin | Community Correction Facilities | County partners will mobilize to focus their efforts on identifying the risks affecting children and youth, and mobilize to focus their efforts on the protection assets necessary to successfully move youth into productive adult lives, and mobilize to use a set of shared guiding principles that include the use of data to inform decision-making. | Ohio Department of Youth Services | 6 | 0 to 30 days | \$2,632,627 |
| Franklin | Disproportionate Minority Contact | Expand community residential alternatives to DYS facilities by adding 15 beds for residential alternatives | Ohio Department of Youth Services | 0 | 31 to 90 days | \$1,500,000 |
| Franklin | Behavioral Health and Juvenile Justice | Expand community residential alternatives to DYS facilities by adding 37 beds to existing Community Corrections Facilities | Ohio Department of Youth Services | 50 | 31 to 90 days | \$4,000,000 |
| Franklin | Weatherization upgrades for Supportive Housing | Funding for 14 largest counties to continue efforts towards addressing disproportionate minority contact issues within the juvenile justice system | NAMI Ohio Mental Health Housing Leadership Institu | 525 | 91 to 180 days | \$3,120,000 |
| Franklin | State Government takes the lead | Expand Behavioral Health Juvenile Justice programming to 86% of the state and reach an additional 700 youth | State of Ohio | 500 | 0 to 30 days | \$22,500,000 |
| Franklin | Metroscap - Reveal America's Beautiful Cities Part | Approximately 280 buildings in Columbus, the affected HVAC systems will cost over \$500,000. Some mercury based medication cannot sense temperature extremes and die. Approximately 80% of A/C operation are African-American, and this project will benefit minority family-owned businesses. We will foster collaboration with the National Alliance on Mental Illness, along with the Ohio Department of Mental Health, and with the Ohio Adult Care Facilities Association. All contractors used will be Ohio residents and Ohio taxpayers. Many products used will be manufactured in Ohio. This project will also leverage other construction upgrades and additons. Expected outcomes: in 100% of the residences with HVAC upgrades, the residences will be heated and cooled to prevent dangerous temperature extremes for clients taking psychotropic medications. In addition, 100% of residences upgraded will experience significant energy conservation and savings up to 30%. The people need the State Government to take the lead by not laying 500 more people off and in turn, allowing the recession to level off and even if they, for our economy by steadily recover. Over 1 just doesn't make sense to feed into the unemployment and somewhat affect has to go to stop and who better to take the lead than State Government? Stimulus money has been awarded in order to save our economy which in turn means to keep people working so in turn they have money to put into our small businesses, restaurant owners, and countless other economic entities. It makes no sense to lay off 500 people within a department that protects its citizens by capturing and locking up the worst of the worst. Do we really want our criminals walking the streets...right beside your children...your grandchildren? We need to save these 500 jobs within the Ohio Department of Rehabilitation & Corrections. We need protection and we need the State of Ohio to take the lead and feed us with confidence and stabilization. | Metroscap, Ltd. | 25 | 0 to 30 days | \$5,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Franklin | Hospitality Green Program | We operate a collection of hotels that vary in age, style and size all of which were built without energy efficient standards. We want to retrofit the hotels with new technology and equipment to help save costs. We have one application we are ready to move on for one particular hotel that will save over \$62,000 in electric costs for a one-year period and countless thousands of power. We feel that using this in the entire portfolio will not only reduce energy but costs can be contained which will help save money for payroll and we can keep at least 500 people employed. I would offer to buy the recently purchased property by the City of Columbus, on Parsons Ave., bounded by Bortman Ave and Irvin Ave. In the South End of Columbus for approximately \$15.5 million. | Lodging First, LLC | 500 | 31 to 90 days | \$250,000 |
| Franklin | OX - Bavarian Convention Center | On the Property I would build a Seven Story Hotel/Motel Mini-Convention Center with a Bavarian appearance to give an Old World feel to it. Also to reflect and recognize the contributions made by the many German, Polish, Hungarian, and others of European Descent. The to expand the Bavarian Mini-Convention Center for the South End of Columbus. | State Citizen | 250,000 | 181 days or more | \$175,000,000 |
| Franklin | Composite Repair Control System | This will be needed for the OX (Ohio Railroad) Transportation Center adjacent to the Future Convention Center. This is the ideal location for one of the main stations to be built. To accommodate the many passengers that will travel on the railroad between the Five Main areas of the State of Ohio: Toledo, Cleveland, the Columbus, Cincinnati, and Marietta. This is just a rough proposal. Thank you | Jet Solutions LLC | 4 | 0 to 30 days | \$650,000 |
| Franklin | Project Energy | Develop a more efficient and flexible Composite Repair Control System. This system could be used in the manufacture, maintenance, and repair of Wind Turbine blades as well as other applications listed below. Currently available systems use older, less-efficient technology and lack the flexibility that is needed for many current and future composite repair applications. Composites are an advancing technology with new applications being developed. The repair control technology needs to advance in order to have a greater benefit on the overall efficiency gain. This system could also be used for the repair and manufacture of composites used in private, commercial, and military aircraft; private and military aircraft; military vehicles; and future composite applications as they are developed. There are thousands of these older, less-efficient, less-flexible systems in use every year. The cost savings opportunities are significant. | Environmental Renovators LLC | 30 | 0 to 30 days | \$500,000 |
| Franklin | Hire employees / buy new equipment / Building impr | 100 of the funds would be used to expand on an already established Lead Abatement/Rahab business. The other 200 would be to start a new energy section of the company for individual homes and a large energy station (i.e. wind and solar) at centralized locations. This project will not only create jobs in my company but I surely would create jobs for the power company. Another hope is to buy the government owned power plant in Cleveland to provide electric for the lower income bracket who's right now getting their electric paid for by the government. I would like to see the cost of spending on the government level. | Woof N Suds | 5 | 31 to 90 days | \$175,000 |
| Franklin | Solar Water Heating | To expand and extend the days and hours of operation by employing 3 to 5 employees. Repair and make improvements on existing site. Purchase new equipment with the investment of newer equipment. Training of employees, and with this we will employ 1000 persons annually and will provide our service to better serve the community. | National Church Residences | 2 | 31 to 90 days | \$2,200,000 |
| Franklin | Weatherization | High grade to supplement water heating at 43 properties across Ohio. Savings is expected to be - \$400,000 in energy and reductions to carbon emissions as well. | National Church Residences | 3 | 31 to 90 days | \$3,500,000 |
| Franklin | Media to enable green development of farm based Ma | Weatherization for 63 properties and 4000 units. Initiative is expected to save - \$660,000 annually in energy costs in carbon emissions. NanoDynamics (ND), formerly MetaMateria Partners is a privately held 8 yr old, Columbus company that has developed a high surface area, open cell, media for biological filtration in farm based aquaculture. The media has the ability to both physically adsorb ammonia and nitrate respectively under laboratory trials with as little as 5 minute retention times. The biomass filter substrate can be used in greenhouses for both conventional ponds and hydroponic applications. ND has earned numerous federal & state research contracts, and works effectively with public and private organizations developing novel technology and creating higher salary jobs. This funding would be used to accelerate commercialization, and application specific product qualification of the high surface area media. Funding will create up to 4 jobs within 60 days and additional 20-30 manufacturing jobs in 2-3 years based on current market projections. We are seeking \$460,000 dollars in funding to leverage investor and outside third party private funding. The architecture center of the Ohio State University will be solicited to aid the scale up evaluation an actual farm based environment. | NanoDynamics Inc (formerly MetaMateria Partners) | 30 | 0 to 30 days | \$450,000 |
| Franklin | Highly effective Soil & Groundwater remediation of | NanoDynamics (ND), formerly MetaMateria Partners is a privately held 8 yr old, Columbus company that has developed a highly porous, open cell, porous like media for use in the remediation of waterfields. This media can be tailored to shape, porosity and composition (organic, bio, bio-fabricated modification, microbial inoculation, etc) to enhance natural attenuation of contaminated soil and groundwater. Placement of the media will be via hydraulic fracturing or injection. This technique is particularly attractive for groundwater at overfield sites as no digging or removal of soil is necessary and the ground water remains in the ground. ND has earned numerous federal & state research contracts, and works effectively with public and private organizations, developing novel technology and creating higher salary jobs. This funding will accelerate commercialization, research and manufacturing of the media and is expected to create up to 12 jobs within 60 days and additional 30-60 manufacturing jobs in 2-3 years (current market projections). We are seeking \$600,000 dollars in funding to leverage investor and outside third party private funding to commercialize the technology. | NanoDynamics Inc (formerly MetaMateria Partners) | 50 | 0 to 30 days | \$600,000 |
| Franklin | Application Development – Biolatis media for POE s | NanoDynamics (ND), formerly MetaMateria Partners is a privately held 8 yr old, Columbus company, has developed a family of novel engineered porous highly effective media. This Biolatis media will create optimal cost effective, low maintenance, water treatment systems. Biolatis' unique pore structure serves as an ideal host for beneficial bacteria. This media has been proven to be a superior media for biological water treatment in aquaculture applications, providing highly effective nutrient control. It can be enhanced with nano-specific microorganisms to directly inhibit pathogen growth. This funding would be used to complete the application development & product qualification processes of POE possible water & waste water treatment systems focused on rural & underdeveloped community needs. ND works effectively with public and private organizations developing novel technology and creating research jobs. We are seeking \$750K dollars in funding to leverage private funding and state, state and federal funds in excess of \$1 million that will create up to 6 jobs within 60 days & additional 20-30 manufacturing and engineering jobs in 2-3 years based on current market projections. | NanoDynamics Inc (formerly MetaMateria Partners) | 40 | 0 to 30 days | \$750,000 |
| Franklin | Property Energy Audits | Energy audits at 63 properties across Ohio. The energy audits will provide costs, savings, and payback for initiatives that can be considered at each property to reduce energy consumption and spend, reduce greenhouse gas emissions, and increase employment. | National Church Residences | 1 | 31 to 90 days | \$157,500 |
| Franklin | HVAC Control | 14 properties with 1000 units. Savings are expected to be - \$10,000 annually. | National Church Residences | 1 | 31 to 90 days | \$1,000,000 |
| Franklin | Helping Kids Prepare for Life | Communities in Schools' dedicated and experienced staff work across the district in Columbus City, Whitehall City and Westerville City Schools and is an integral part of strategic efforts to improve academic success and graduation rates. Communities in Schools is finding solutions for the students who need help by developing strategies focused on addressing identified community issues: 1. Low graduation and high dropout rates 2. School violence and behavior 3. The increasing immigrant population 4. Student mobility between schools 5. Increasing healthy lifestyles for children The CICS develops relationships with the school personnel and community organizations and remove any barriers that might occur in the partnership so that children receive the support they need to succeed. Measurable Objectives: (1) Provide direct services to 40 schools (2) improve attendance, grades and behavior for 70% of the targeted students (3) Link families to community resources and facilitate the linking of at | Communities in Schools | 50 | 31 to 90 days | \$3,250,000 |
| Franklin | Advanced Water Management Solution | 1) fill gaps in understanding and make better use of the data they collect linking operational systems with business intelligence with advanced analytics. 2) capture, maintain, and analyze large amounts of data effectively to prevent, investigate and respond to threats to water availability, quality, and security concerns across natural and man-made infrastructure. 3) enable unified, intelligent communications infrastructure capable of speedily and accurately routing the right information to right stakeholders. 4) improve collaboration and information exchange across multiple agencies handling both strategic planning and emergency response. Water Information Utilities: Smart Metering, Asset Management Smart Levees/Flood Control, Clean Water Management, Water Energy Management, Water Contamination/Security Management, Stormwater Management/Sewer Overflow, Water Loss/Leakage Management, Wastewater Management, Litigation Management, Emergency Prediction/Response. | IBM Corporation | 100 | 31 to 90 days | \$4,000,000 |
| Franklin | Modular Transit Case Development | Transit cases are widely used to protect valuable, fragile technology equipment. Transit cases are necessary to transport equipment safely for demonstrating new technology and field deployment. Government entities and service providers are major users of transit cases, as well as expanding technology companies. Current transit case technology falls short of the ideal in terms of efficiency of packaging and transport, waste of use, cost and level of protection. The Alexander Peircey Co., Inc., founded in 1986, has been involved in new transit case design for 18 years. New designs have been developed that potentially could establish a market share that would necessitate the employment of hundreds of workers. However, inadequate funding current exists for rapid development of this technology. Stimulus funding will jump-start the development and greatly improve the likelihood of this new technology's successful employment of substantial numbers of workers. | Alexander-Peircey Co., Inc. | 200 | 0 to 30 days | \$150,000 |
| Franklin | Nursing Temporary Agency | Nursing/home care goal is to provide Central Ohio hospitals with competent nurses to fill positions on a shift by shift basis to meet hospital staffing needs. It will also engage in mobilizing competent nurses to handle the home health needs of the growing population with a view to delivering safe, effective and competent care. The growing health needs of our society today made it necessary to source for the human capital needed to fill out the projected shortages that will eventually overwhelm our society if necessary steps are not taken to correct it in a timely manner. The senior dining and wellness centers as a place for older adults to enjoy socialization, educational programming, health and wellness services, and three or more choices of meals. Clients need to be transported from area nursing home facilities to participate in programs and services offered by LifeCare Alliance. This facility offers seniors access to a combined wellness and dining center that offers health and recreation activities for older adults, health screenings, and an exercise/community area. Transportation is another critical need necessary for the success of the dining center program. Without affordable and reliable transportation services, clients cannot participate in the programs offered at this location. The health and wellness services will directly contribute to an individual's ability to remain safe and independent in their own homes, where they want to be, thereby avoiding premature institutionalization in nursing home. Nursing home costs in Ohio now average more than \$65,000 per person per year. Often these clients do not have any type of insurance or income, so the burden of paying for their care falls on taxpayer. | Nursing Temporary Agency | 10 | 91 to 180 days | \$50,000 |
| Franklin | Meals-on-Wheels Distribution Center and Senior Din | Transportation is another critical need necessary for the success of the dining center program. | Franklin | Funding of Sewage Treatment Systems in Ohio | The Ohio Department of Health is requesting \$20 million dollars from the Clean Water State Revolving Fund with ARRA to assist communities with the repair or replacement of failing sewage systems in rural areas not served by public sewers. The project proposes a combined approach of low interest direct loans and cost share grants distributed through local government entities to homeowners with failing sewage systems. The proposed level of funding could assist up to 3,000 system owners with system repairs and replacements statewide. The project provides work for local average contractors (\$700 per week) and increases sales 15-20% for system manufacturers distributing products in Ohio. The Association of Ohio Health Commissioners supports this proposal to protect the health of Ohio citizens and improve water quality. | Ohio Department of Health | 500 | 91 to 180 days | \$20,000,000 |
| Franklin | community gardens | To whom it may concern: many ohio persons and families will be unable to maintain their homes in the coming months. We as community gardeners controlled a viable alternative housing community targeted for low income housing that is comfortable and inexpensive. It is at least these displaced families will be best served with what we are offering. A smooth transition from an unaffordable obligation, to another home is essential for the up and coming crisis. The land we have offers needs and utilities. Each home can be set quickly and at a very low cost. We already are serving several persons, we have room for more. | community gardens | 7 | 91 to 180 days | \$890,000 |
| Franklin | PROMOTORAS DE SALUD/LAY HEALTH ADVISORS | Program reduces health disparities amongst uninsured immigrants through Health Lay Advisors who are bilingual and serve as interpreters, health educators, provide follow-up services, home visits and assist clinic staff address the health concerns of non-English speaking patients. Funds requested would be for 20 additional lay health advisors at a cost of \$400,000, to be assigned to public and community health centers to ensure limited English proficient patients receive quality health care services. Cost also includes PT coordinators, PT Director, PT support and continuing services at a cost of \$45,000.00. Total project cost \$800,040.00. Promotoras de Salud/Lay Health Advisors are recognized nationally as the best approach to provide quality access to immigrant communities. The coalition, the largest and oldest Latino agency in Columbus, provides POS services through contracts. Having access to language services ensures compliance with Title VI of the Civil Rights Act of 1964. Promotoras are better alternative to interpreters at a much lower cost, providing a far better care. Immigrant's health needs are not well served without the language and cultural context. | Ohio Hispanic Coalition | 30 | 0 to 30 days | \$591,040 |
| Franklin | 738 bryden rd conversion (original columbus school) | Historic Columbus School for Girls (near Lincoln District) to be converted from vacant, run-down boarding house to 77 purpose condos reserved for near original exterior. Some interest from nearby Childrens Hospital for possible Ronald McDonald House housing. Project will employ at least 100 subs and craftsmen for approximately 18 months and greatly add needed show place to entrance to the city to help continue revitalization of this neighborhood. | bryndon homes,inc | 100 | 31 to 90 days | \$500,000 |
| Franklin | Expand technology to Urban Community Centers | To install proper wiring and set up computer terminals in urban community youth and senior centers. This would provide electronic access to the internet for business transactions and online learning. | City of Columbus | 30 | 31 to 90 days | \$25,000 |
| Franklin | Kingsdale - Public Infrastructure | Upgrade and/or relocation of public utilities for the Kingsdale Shopping Center Redevelopment. Infrastructure includes, however, is not limited to: electricity, sanitary sewers, storm sewers, overhead and underground electric lines, and telecommunication facilities. | City of Upper Arlington | 800 | 91 to 180 days | \$750,000 |
| Franklin | Sewer System Evaluation Study - OEPA Director's Or | Evaluation of Sanitary Sewer Districts Pursuant to the OEPA Director's Findings and Orders | City of Upper Arlington | 10 | 91 to 180 days | \$500,000 |
| Franklin | K-12 Education Data Support Grant Program | The focus of the program is to provide 75-100 school districts in the state with grants to purchase data management software used for internal organizational management or student achievement and performance monitoring. The funds requested would be used to allow our company to provide districts a 50% match on district investment in any of our Ohio created data management products. These funds would also be used to purchase the additional data management software necessary to operate our programs. The sales of these programs through this program would be used to expand our sales, technical support, and development staff with newly trained Ohio based jobs. These new jobs would allow our company to expand our product offerings while focusing on need technologies that allow our current products to effectively interchange data with existing State systems. We expect that these systems will dramatically enhance the way districts manage their data in the short and long terms and allow staff to truly focus on Student Performance. These sales will provide our small business with dramatic new growth opportunities in this market. This Program WPCIF Stormwater Systems Improvement project on the east side of Columbus, implements a stormwater management system to mitigate structure, yard, street, and ditch flooding in the Idlewild Subdivision, and includes design of a riparian stormwater wetland detention facility adding a five flow channel wetland complex to the farmstead. The project includes channel improvements that incorporate natural stream features while providing sufficient capacity needed for a stable stream environment which allows for healthy stream development. The restored and newly created wetlands are configured with an upper bar that treats stormwater from a 20-acre commercial development immediately upstream. The outlet structure for the upper bar wetland is designed to retain the first flush stormwater volume for the required 24 hours to permit settlement of suspended grit from the upstream commercial development. The lower bar wetland basin maintains the existing stream channel and provides for flows above bankfull conditions and provides water quality treatment. Project provides erosion, sedimentation, dust control, creates 3 acres high category wetlands, promote biodiversity, and dispose of the property. | DataWerks Limited LLC | 4 | 31 to 90 days | \$425,000 |

| Franklin | Home Savers | We negotiate with the home owner to allow them to stay in the property with us financing the loan at prime + X amount. We may also keep rent the property for them. We will hold all paper on the loans and sell them when the economy gets better. Our program is designed to allow people who would otherwise loose their home, to buy the Home at the new re-valuated price or rent the home. The homeowner will have to be employed and be able to make the loan or rent payment. We will meet with each homeowner on an individual basis to allow them to know exactly what is happening. Banks refuse to work with individual homeowners who have defaulted on the loans causing foreclosure. With us buying a LARGE quantity of some and allowing the bank to dispose of large amount of fore loans we successfully pay the banking system, the real estate system, employes people and allow homeowners to keep their homes. This is a WIN WIN WIN program. We will start immediately with the down money and our second money. | Home Investments | 25 | 91 to 180 days | \$50,000,000 |
| Franklin | Bringing the money back home | USTEK Inc. currently manufactures products in Columbus and sells throughout the country. The cost to finance the inventory has escalated. We are paying nearly \$50,000 per year in interest and \$40,000 per year in fees to a company in Michigan. These high costs have meant that we had to lay off 1 person and our salaries by 50% for remaining personnel. Another layoff is pending. If we could borrow that money within Ohio at a reasonable rate then we could re-hire the staff, grow the business, and add an estimated 2 to 3 additional people. The employees would be off the dole and paying taxes. | USTEK Inc. | 5 | 0 to 30 days | \$450,000 |
| Franklin | Employee Kiosk Development Project | A consortium of Information Technology Centers (ITCs) are currently funding the development of an on-line employee kiosk system. This system is designed to permit employees to view information in their personnel file and payroll system, as well as track state-mandated professional development offerings and requirements for employees. This system is being financially supported by 13 ITCs and is available for use by more than 600 Ohio K-12 public school districts. We are seeking funding to accelerate the development of this software system so that the efficiencies that can be achieved through this software system are made available to school employees and school districts in a more timely manner. | Technology Solutions Group - MCOECN | 4 | 0 to 30 days | \$500,000 |

| Franklin | children's games | Educational games of everyday life experiences such as grocery shopping, clothes shopping and other educational items to expand business with the child. I received with children in mind including books expanding my employee database to 50 or more employees over 2 years. These are family game boards, play money, game cards, game pieces, that help children understand parents everyday task and games that help 6-8 year olds understand childrens everyday task. The stimulus money will help create these items needed to bring the game together which is all the needed pieces which will create business for other companies backing the game money from another company. This will benefit our city and state in education. | everyday games | 3 | 31 to 90 days | \$20,000 |
| Franklin | Preschool Scholarships & Equal Opportunities for A | Preschool Scholarships & Equal Opportunities for All Children is a project that will provide long-term educational scholarships for preschool children from Columbus, Hilliard, Powell, Dublin, Upper Arlington and nearby counties. Children who receive the scholarships will be given the opportunity to study in a high quality early childhood program that teaches reading, writing, mathematics, science, social skills and autonomy, and all the core knowledge skills needed to prepare them for success in kindergarten and higher levels of learning. They will receive education from a preschool that uses the Core Knowledge Preschool Program. There is a criteria to be followed in selecting applicants eligible for the scholarship, for example, low-income families, parents who have lost their jobs, special needs children, etc. If funding were granted for this program, many young children will have equal opportunities to high quality preschool education, more teaching jobs will be created, and the future of our children will be brighter. | Meadows Academy | 12 | 0 to 30 days | \$100,000 |
| Franklin | Coordinate community outreach programs | We are going to create a position called "Community Outreach Coordinator." This person will be an employee of HomeWatch CareGivers and will identify individuals with disabilities living in the community who are not being adequately cared for by various programs available to them. As one of central Ohio's premier homecare providers of individuals with disabilities, we are aware of many community programs in which individuals with disabilities can benefit. All too often, many of these individuals are unaware of these opportunities and programs, missing from job opportunities with ARC to the location of help centers. A "Community Outreach Coordinator" employed by HomeWatch CareGivers could assist these people in getting the help they need and deserve. | HomeWatch CareGivers | 30 | 0 to 30 days | \$50,000 |
| Franklin | Poison Prevention | Ohio has experienced a rapid and alarming increase in unintentional drug/misadventure poisonings, particularly among men aged 35-54. From 1999 to 2007 Ohio's unintentional poisoning rate has increased more than 300%. The Ohio Injury Prevention Program is developing recommendations for further action but there are no funds available to implement them. The funding would support an ODH program consultant, an injury researcher and 3 grants to local agencies. The local agencies would implement innovative pilot projects to address this issue at the community level including coalition building, implementing policy and behavior change strategies, increasing capacity to address the issue and ultimately reducing the unintentional injury death rates in Ohio from 11.7 per 100,000 by 2012. The program consultant would also conduct a statewide social marketing campaign. The funding would work to improve local poisoning data collection, link existing data sources, and conduct a feasibility study on a statewide poisoning death review system for Ohio. | Ohio Department of Health | 5 | 91 to 180 days | \$400,000 |
| Franklin | Falls Prevention | To establish a program within the Office of Healthy Ohio to address the burden of fall-related injury among older adults. Falls are the leading cause of injury among older Ohioans. Fall-related injury death rates have increased 70% from 1999 to 2006 in Ohio and are expected to continue to rise as Ohio's population ages. This program would partner with other ODH programs, local health departments, EMS providers, hospitals and the Department of Aging to increase the social safety falls prevention programs especially in rural and underserved areas where there are disproportionately high fall related injury rates. The funding would support an ODH program consultant and 3 grants to local agencies to do falls prevention. The local grants would implement evidence-based practices related to resident management, environmental modification and education and modify existing programs to reduce the overwhelming number of fall-related injury among older Ohioans. A statewide awareness campaign, resources are needed to implement the plan. Ohio Department of Health (ODH) would establish an infrastructure at the state level through inter-agency partnerships and subcommittees for each of the identified Obesity Plan values. | Ohio Department of Health | 6 | 91 to 180 days | \$300,000 |
| Franklin | Implementation of the Ohio Obesity Plan | ODH and other state agencies would implement the use of policies & environmental system changes. Preventing obesity requires a broad based, multi-year approach, consistent leadership & a commitment from all stakeholders at all levels in Ohio to be successful. A Health Impact assessment tool will be developed for use by all partnering organizations as part of the work plan. These plans will need oversight at the ODH, providing leadership, setting policies & programs, sharing evidence-based approaches, monitoring progress & evaluating all activities. Capacity to conduct surveillance & evaluation & development of a data system are imperative to monitor policy systems development changes. This requires 13 positions at the state level, a coordinator, epidemiologist, research/evaluator, & 10 regional liaisons. Liaisons working throughout the state will | Ohio Department of Health | 13 | 91 to 180 days | \$709,500 |
| Franklin | Training and Implementation of An Ounce of Prevent | The Ounce of Prevention is a nutrition training course was developed through a partnership with the Ohio Department of Health, National University of Public Health, Nationwide Children's Hospital, American Dairy Association Midwest and the Ohio Dietetic Association. This toolkit is for physicians and other healthcare providers and provides evidence-based nutrition and physical activity messages to teach general caregivers how to prevent childhood obesity beginning at birth. It was piloted in 2007 with physicians across Ohio where the evaluation results showed an increase in nutrition and physical activity information and an increase in BMI for children and adolescents. These activities are critical to preventing childhood obesity. The first 6 year toolkit has been implemented in Ohio but needs further resources to continue training, monitoring, and evaluation. Additionally, a second Ounce of Prevention toolkit for 7 - 18 year olds is near completion. This toolkit needs funding for printing and implementation also. The stimulus funding would provide two trainers and an evaluator at the Ohio Dept of Health to train healthcare providers in | Ohio Department of Health | 2 | 91 to 180 days | \$200,000 |
| Franklin | Diabetes Media Campaign | People are NOT aware of the burden and dangers of diabetes. We need a strong media campaign that is powerful and repetitive during prime-time hours on TV. This would be costly to produce, but may save millions in the long-run. | Ohio Department of Health | 0 | 91 to 180 days | \$200,000 |
| Franklin | Diabetes Education Center | Develop a diabetes education center as a pilot program where persons with diabetes can get intensive education with evidence-based programs. The center could be piloted in central Ohio so we could monitor and maintain standards of care. This would be modeled after cardiac-rehab program. | Ohio Department of Health | 1 | 91 to 180 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | OTIS - Ohio Talent Management System | Creation of an Enterprise-wide Talent Management System for Ohio (OTIS) that would connect all Agencies as a central source for Employee Training records, Performance Management, Developmental Planning, and online training/ resources. In addition, operational/requirement learning Courseware will be created and disseminated via OTIS to include Compliance Training (Harassment, Diversity & Inclusion, HPEAA, etc.) along with other departmentally-specific content. | Train-Ease, Inc. | 25-50 | 0 to 30 days | \$2,500,000 |
| Franklin | Ohio Diabetes Quality of Care Project | The "CDQM" we work with statewide provides or oversees measure practices in Ohio via more rigorous or representative metrics/coverage electronic Management System (CDQM) to monitor care for patients with diabetes. The initial project would include pilot sites in three regions of the State. The sites will include the two Allowing Forces 4 Quality (AF4Q) sites in Cincinnati and Cleveland. The program will follow in line with those two programs that include ongoing diabetes care messaging to employers, primary care providers, establish a region wide public reporting of selected primary care practices quality - related outcomes and create a Projected Diabetes Registry across all sites. Pilot sites selected will include Federal Qualified Health Centers that have or are presently in the Diabetes Collaborative and target high risk populations which include African Americans, Hispanics and Appalachians. | Ohio Department of Health | 2 | 91 to 180 days | \$200,000 |
| Franklin | Advanced Reading and Study Skills Workshop | Involving reading and study skills training to people going back to school to earn a new vocation or to get a degree. The reading rate of the average person will increase 2 to 5 times. There will be marked improvement in the areas of accuracy, retention and concentration. I have conducted classes for several state and federal agencies including OH EPA, OH Rehabilitation Services Commission, US EPA, NASA, US S&D, VA Dept. of Education and the Dept. of Transportation. Companies I have trained include Rubbermaid, Bataste and American Electric Power. | Edison Training Center | 3 | 0 to 30 days | \$64,500 |
| Franklin | Ohio Learns to Read | I have been in this business almost 18 years with a proven track record. Additional information, references contacts and results from classes are readily available on request. Cost is based on 300 enrollments state wide at \$215.00 each. Project cost does not include net profit or my salary. I pay all travel expenses and provide all training materials, supplies and training locations. Our program includes the funding of five new learning centers for the benefit of children in Ohio that have dyslexia. This underfunded program can help many children in Ohio, but we have to have the resources to get started. Once we do, we will raise more funds on our own sufficient after that salary. | Columbus Learning Center for Dyslexia | 60 | 181 days or more | \$5,000,000 |
| Franklin | Making Work Pay | By teaching children in Ohio to overcome their dyslexia, 20% or more have it now, we turn the lowly student into a productive citizen. One who contributes to society and pays taxes! | Excel Staffing Services | 100 | 0 to 30 days | \$100,000 |
| Franklin | Orientation to Trades and Apprenticeship Program (| We are looking to put 5 new learning centers in 5 different Ohio counties. Delaware, Fayette, Knox, Licking and Monroe. With the money provided we can do this to get the schools off the ground and then we are self sufficient after that. | Columbus State Community College | 85 | 0 to 30 days | \$181,700 |
| Franklin | Train-the Trainer for Cognitive Behavioral Units | This program is worth every penny given and will actually payback to Ohio for many years to come. | Ohio Department of Youth Services | 0 | 181 days or more | \$98,000 |
| Franklin | Orientation to Trades and Apprenticeship Program (| Students must be enrolled in grades 9-12. Employment in the trades requires a high school diploma, so the program promotes the goal of OTAF youth serves a maximum of 60 youth in the school year and 25 youth in the summer. | Columbus State Community College | 60 | 0 to 30 days | \$293,025 |
| Franklin | Helping Carol | The program provides basic labs in electricity, mechanical principles, carpentry including the use of handpower tools, introduction to blueprint reading, spray application and repair, painting and application techniques, plumbing, sensor flooring and vinyl flooring installation. The Students participate in safety training, a Drugs in the Workplace workshop, and a Workplace Ethics seminar. | Helping Carol | 1 | 31 to 90 days | \$50,000 |
| Franklin | Neighborhood Investment Plan | Students earn "OTAF bucks" for attendance, arriving on time, test grades, attitude, work ethic, and other factors. "OTAF bucks" buy work gloves, safety glasses, and hand tools. Students must have an 80% attendance rate to graduate from the program. Upon graduation, each receives a tool box and portable electric drill. With perfect attendance, the student receives a pair of work boots. | CRS Inc. (Credit Repair Service) | 60 | 31 to 90 days | \$1,500,000 |
| Franklin | 219, 221 Midland Ave. | Train staff of DTIS to become certified trainers of the cognitive-behavioral units developed by the University of Cincinnati. This is a three phase project consisting of an initial three day training, followed by a two-day site visit, and ending with a five-day follow-up training. Program is viable in as little as 10 years in age of staff. | Cedar Investments | 1 | 0 to 30 days | \$20,000 |
| Franklin | Ohio Real Estate Marketing Enrichment | This program provides basic hands-on labs and instruction to train students in: introduction to blueprinting, construction measurement, residential construction, carpentry including the use of handpower tools, plumbing, telecommunications, electricity, spray application and repair, siding, welding, brick masonry, thermodynamics and fluid-dynamics. Sustainability training (28 hours) meets the ever changing demands in the construction industry. Participants have the opportunity to earn an OSHA 10-hour safety credential which is widely recognized by the trades leading to potential employment opportunities. | FHEUSA Incorporated | 50 | 0 to 30 days | \$200,000 |
| Franklin | Student Loan Help | Students also participate in practice interviewing sessions, create professional resumes, and develop employment/work ethic skills. Six hours of applied math curriculum is provided each week due to the rigid acceptance requirements of apprenticeship programs. | Self | 0 | 0 to 30 days | \$20,000 |
| Franklin | Usborne Books in Columbus, OH | Carol will be able to pay student loan debt and with that debt once paid, Carol will be able to each year after collect her individual income tax given her the opportunity to participate in the experience of work and reward Carol will be able to pay off all outstanding Columbus Gas bills and outstanding AEP bills, Carol would be able to perhaps by a car to get around in and Carol will be able to get a better job. Carol is an AARP BEFCOP enrollee unable to leave her job area for work opportunities. Carol will be allowed to work in an urban setting with the dignity of having a job. | Usborne Books and More | 2 | 0 to 30 days | \$5,000 |
| Franklin | CareerBuilder.com application | Carol will be able to purchase the dream of starting her own business as Social Security advocate. Carol will then hire 2 persons to assist in business therefore creating 3 jobs. | Ohio Department of Rehabilitation and Correction | 2,000 | 91 to 180 days | \$2,000,000 |
| Franklin | Clean Earth | During the year 2009, CRS Inc. will become a full-time enterprise. We will buy up homes in distressed areas for the purpose of rehabilitation purposes for families that are in need of quality housing during 2009 and each year thereafter. 2 homes per month will be purchased and renovated. This will allow for two houses per month to be kept in rental property for Lower Income Families to reside in, while the second unit is sold or leased out to another Low Income Family in need of a Quality residence. To continue to beautify the area by cleaning up unwanted homes in the area and make them livable to a family in need. | N/A | 20 | 0 to 30 days | \$1,000,000 |
| Franklin | exercise and wellness programs for youth and adult | Ready to this strategy over a seven-year period will yield a portfolio of 85 units each returning an annual asset appreciation of 5%. Also during this seven-year period, we will seek to renovate an apartment complex or build if necessary for tenants to reside in. | The Aerobic Studio | 2 | 31 to 90 days | \$30,000 |
| Franklin | Statewide Low Head Dam Removal | ***** Note: The money is self Generating, from sales of Other properties to be fixed up***** | Ohio Department of Natural Resources | 15 | 181 days or more | \$250,000 |
| Franklin | State Forest Area Dam Improvements | We own a duplex that has both depreciated rapidly and accrued some much needed repairs. If we get the aid requested, we will be able to avoid foreclosure, provide work for local contractors, and contribute to revitalizing the community by eliminating a dangerous eyesore. We will also be renting the property to provide housing to 2 families, at a price that they can afford, far below that which other landlords charge. This aid will be able and continue to benefit several entities. | Ohio Department of Natural Resources | 20 | 181 days or more | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Franklin | Patient-centered medical home collaborative | Dedicated funding and staff would promote and advance the patient-centered medical home in Ohio. Entry would serve as a portal for connecting patient-centered medical home clinics throughout the state, would allow pilots to share ideas, best practices, etc. Entry could function as a learning collaborative, provide technical assistance through TransformED and potentially become the counterpart to the national patient-centered primary care collaborative in DC. Would seek to involve Ohio Coalition of Primary Care Physicians in all activities. Set-up would follow Ohio Academy of Family Physicians Foundation model by having free clinics around the state organize into the Ohio Association of Free Clinics. Private grant money will also be sought to support federal stimulus dollars received. Desired outcome would be to ensure that every Ohioan has a patient-centered medical home defined as an ongoing relationship and care provided by a primary care physician and that physician's practice support team. Primary care results in improved health outcomes, decreased costs, reduced care disparities. Whites & Emergent specialists in preventing, cleaning, repairing, and maintaining abandoned and foreclosed homes. We offer a team of professionals experienced in working with realtors, banks, and individual investors with the goal of quickly getting the property back on the market. Our services are also available in a subcontractor capacity. We service all of Central Ohio. We provide affordable rates, a reliable crew, and a service second to none. Our foreclosure cleanout and maintenance services include: <ul style="list-style-type: none"> 7 trash & debris removal 7 property inspections 7 roof & attic removal 7 broom outs and white glove cleaning 7 landscape maintenance 7 all drywall repair and replacement 7 window/screen replacement 7 cabinet/mirror repairs 7 follow-up maintenance 7 sanitation 7 environmentally safe cleaning products Our cleanouts include attention to the following areas of your property: <ul style="list-style-type: none"> 7 appliances (including refrigerators, ovens, and stove tops) 7 ceiling fans 7 cabinets and cabinet hardware 7 light fixtures and switch plates 7 replacement of doors, door knobs, and door hinges 7 full-time foreclosure prevention coordinator to manage the Save the Dream foreclosure prevention program. | Ohio Academy of Family Physicians | 2 | 31 to 90 days | \$250,000 |

| Franklin | Property Water Conservation | Improving water conservation at 24 properties across Ohio. Initiative would involve retrofitting existing toilets with new flushing mechanisms, low flow shower heads and sink aerators. Payback will be < 2 years | National Church Residences | 3 | 31 to 90 days | \$300,000 |
| Franklin | MDIP | MDIP is a one of the major projects that we at Group 8 are looking to developed. MDIP stands for the Mobile Development Initiative Program. We would like to explore the development of mobile device software to for students of high education that at Ohio State, Cincinnati, etc. We personal think that mobile device communication is grow at a pace where it is going to over take the PC in terms of a way to access the internet and communications. University's are lacking behind large corporations like Apple, MSN, Yahoo etc. They want to do some of the things that those cutting edge corporations are doing, but don't have the resources. We would like to handle the management and developing of custom mobile application for the Universities. I know personally at OSU there are many opportunities to help develop more efficient ways to communicate for students, faculty, staff or anyone associated with the University. | Group 8 LLC | 10 | 181 days or more | \$250,000 |
| Franklin | MARCS Broadband Support | MARCS provides voice and data service to public safety and first responders in Ohio. The current infrastructure is near end of service, some towers are in need of upgrades and current T-1 capacity is at maximum. The Broadband Ohio Initiative has incorporated the use of MARCS bandwidth into the planned rollout of the Broadband Ohio Initiative. In support of this initiative it will be necessary for MARCS to increase the capacity of their infrastructure in some areas of the state. MARCS will require replacement of UPS units, tower service upgrades, and bolting of security at affected sites and shelters. In addition, real estate currently leased will need to be purchased. Funds are necessary for payment of the purchase of property or which the tower structure and shelter are located. In the event purchase is not feasible, awarded funds would go toward lease agreements between MARCS and the licensee to pay their annual license fee or MARCS land lease fee. | Multi-Agency Radio Communication System (MARCS) | 200 | 0 | \$686,675 |
| Franklin | kathys way of helping | Buying a restaurant and supplies, creating a few jobs, getting 3 or 4 delivery trucks. My plan is to build this restaurant into helping elderly people that need assistance the ones that can't walk or see or hear. The ones that can't walk have meals delivered to them. I think stores or people can supply fan air conditioners and blankets when needed. If needed there can be some beds in the back for someone, someone that has been abused and there children. I don't know the amount of money it would take for this dream. I just want to help people. The Gaddis Foundation for K.I.D.S. offers the Jump Start U 4 College program at risk low to moderate income youth residing in economically deprived communities in grades 9 - 12. We are targeting 150 youth. Our program is designed to empower students (and families) who are in an academic, social and economic distressed situation. Our goal is to prevent involvement in the criminal justice system by providing mentoring, hands on experiences and expert advice to ensure the successful matriculation through grades 7 - 12 that will position them to navigate the college selection and admissions process. We assist students in finding the college that best fits their abilities, interests, and aspirations. We guide students as they map their college journey. Early awareness to the importance of college is essential. Students often feel that their grades and extra curricular activities in grades 7 - 10 are not as important. Consequently students erroneously believe that as long as work hard beginning their junior year they should be able to enter college upon graduation. We work to provide students with the knowledge and skills to discover and pursue their purpose early so that by the time the graduate they are more focused on their future resulting in productive lives. | kathys way of helping | 0 | 31 to 90 days | \$200,000 |

| Franklin | Smartboard Technology | Our district is just beginning to purchase interactive whiteboard technology. There is a lot of interest and not enough funds. We will purchase 500 smartboards enough for all regular, special education, and special area classes. Cost: 500 @ \$3500 (smartboard/processor/stand)=\$1,750,000 <ul style="list-style-type: none"> 7 partition positions to mount Smartboards (\$20,000) and one supervisor of partners @ \$25,000 + \$145,000. Coordinator position (inventory) having manufacturing experience 10 building smartboard technicians (\$90,000 salary & benefits - 10 building smartboard techs @ \$80,000 salary & benefits) = \$800,000 - \$100,000 for training 500 teachers (\$82000). Total \$2,985,000 We currently have just a few roll about Smartboards in our school buildings. They are in great demand. There is definitely an interest and need for Smartboards in every classroom. | Groveport Madison Local School District | 18 | 31 to 90 days | \$2,985,000 |
| Franklin | City of Dublin, Clean Fuels Ohio Partner | One fast fill station with medium capacity compressor, small backup, dispenser, card reader, and storage, sized for 10 refuse trucks, other service vehicles, and some private vehicles. | Clean Fuels Ohio | 10 | 0 to 30 days | \$350,000 |
| Franklin | Electrification of Air Conditioning for transit bu | As hot states buses are affected to idle for extensive periods to cool them down before they can be put into service. In reaction that leads to 3500 gallons of diesel consumed each day. This can be eliminated by operating electrical air conditioning instead of an engine driven pump. This also has application for hybrid buses where significant improvement in efficiency can be gained by optimizing the air conditioning rather than running the pump at engine speed. It will allow for modulation of the pump to 1/4 run at the most efficient speed for the cooling requirements at the time instead of running at the maximum speed. This project will design the drive electronics for this cooling system, and integrate the electronics with the air-conditioning system on a transit bus. "Solar" is a supplier to the bus market and has very close ties to the major bus manufacturers in North America. | Vanner Inc. | 100 | 0 to 30 days | \$800,000 |
| Franklin | Boulevard Homes | The Boulevard Homes project will be comprised of 40 new construction or rehabilitated single family homes located on scattered sites within the City of Columbus. The 3 and 4 bedroom homes will be made available through a lease purchase program to individuals and families in need of affordable housing. | The NRP Group LLC | 20 | 91 to 180 days | \$1,000,000 |
| Franklin | City of Columbus (Morse Rd), Clean Fuels Ohio Part | One fast fill station with high capacity compressor, small backup, dispenser, card reader, and storage, sized for 25 refuse vehicles plus some other service and private vehicles, estimated cost. | Clean Fuels Ohio | 10 | 0 to 30 days | \$350,000 |
| Franklin | City of Columbus (Dublin Rd), Clean Fuels Ohio Par | City and County would jointly use for assorted public service vehicles, \$150,000 available in existing federal grant for site development, additional \$600,000 for station equipment including storage, compressor, dispenser, card reader. | Clean Fuels Ohio | 10 | 0 to 30 days | \$325,000 |
| Franklin | Franklinton Senior | The Franklinton Senior project is a 4-building smartboard comprised of 32 units located within the City of Columbus. The 1 and 2 bedroom units will be made available for seniors needing affordable housing. | The NRP Group LLC | 20 | 91 to 180 days | \$1,000,000 |
| Franklin | City of Columbus, Groves Road, Clean Fuels Ohio Pa | One fast fill station with high capacity compressor, small backup, dispenser, card reader, and storage, sized for 25 refuse vehicles plus some other service and private vehicles, estimated cost. | Clean Fuels Ohio | 10 | 0 to 30 days | \$350,000 |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | "You're Hired" Youth One Stop Employment and Train | For 6 years Catalyst Learning has been the lead agency of the largest Out-of-School WA Youth program in Cuyahoga County. Our program the "You're Hired" Youth One Stop Employment and Training Unit is a collaborative effort of agencies (Catalyst Learning and 2 local nonprofit agencies) and has provided academic remediation, real-life life skills, relevant preparation for work, pertinent referrals to occupational training, necessary supportive services, meaningful follow-up to over 700 young adults. Client success is due to the personal relationship developed between staff and clients starting with informed recruitment (IT recruit), assist in individualized plans, client choice programming and relevant follow-up. Program has built on research based positive youth strategies. We propose to open a similar program in Columbus to address the academic, training and employment needs of the young citizens in Franklin County. We already have one local non-profit agency willing to partner in our endeavor. Occupational training opportunities will be sought through local community colleges and trainers. A partnership with local One Stop will be developed. | Catapult Learning | 115 | 31 to 90 days | \$920,000 |
| Franklin | Statewide Clinical Trials Network for Underserved | Ohio is nationally ranked for performance of clinical trials yet underserved populations (minorities and rural populations) remain outside the current system. Participation in clinical trials becomes even more important as new medicines are developed with greater personalization requiring knowledge of the potential for both adverse and beneficial effects. BioOhio proposes to work with diverse populations, including the National Medical Association IMPACT program the national EDICT program and Ohio's medical research centers as well as the Ohio Hospital Association (OHA) to develop and implement a statewide clinical trials network. The creation of the Network would create 500 additional medical profession jobs and serve more than 1 million underserved Ohioans. | BioOhio (formally, the Edison BioTechnology Center | 500 | 91 to 180 days | \$1,500,000 |
| Franklin | Police Radios | The ability of the Perry Township Police Department to communicate with any of these agencies is possible, but only when utilizing two-way communication technology that is capable of permitting communication with surrounding agencies on different frequencies. This technology is possible through the use of 800 MHz mobile and portable radios, such as the Motorola XTL5000 Mobile 10-35 Watt and XTS 500 portable radios. In 2004 Perry Township Police Department was forced to closed our communication center and contract with the City of Worthington for all communication needs as a cost saving measure. As in most government agencies with these hard economic times cost cutting measures must be taken. Recently we were informed by Worthington Police Department that they will be collaborating with the City of Dublin and Delaware County in a regional communication center. We are requesting funding for a new communication center for Perry Township Police Department. | Perry Township Police Department | 22 | 0 to 30 days | \$75,000 |
| Franklin | Creation of the "Medical Device Innovation Center | Ohio has a nation leading, world class clinical medicine capability as evidenced by national awards for Ohio's hospitals and medical centers. This helps a high level of skill of the medical practitioners across the state. These physicians regularly see the need to innovate devices, medical supplies and other health care products to improve patient outcomes, but there are few outlets for their concepts and creative solutions. BioOhio proposes to create a combination physical and virtual center to address those needs creating jobs, improving patient outcomes and lowering health care costs. MEDICO would be owned and operated by the state and provide professional services in management, engineering, product design and prototyping, etc. MEDICO would identify and recruit a state-wide institutional review board (IRB), recruit qualified Directors of operations and executive leaders. The Center would work with interested ESRs across the State, all BioOhio affiliates and provide development and prototyping experts like Battelle. The physical and virtual aspects of the Center would start in parallel. The first change would be to go solar PV roof tiles. | BioOhio (formally, the Edison BioTechnology Center | 2,000 | 31 to 90 days | \$3,000,000 |
| Franklin | The Millington Modern Sustainable Permaculture Com | The solar improvement would generate income when excess power is sold to AEP to pay off bank investment. Any additional income would be reinvested in additional energy efficient measures for entire community which would have a cumulative effect on energy savings that would be paid back to the energy company. These projects do not need to be linear per se; they can be parallel in these types of upgrades with government programs. Affiliates/Upgrades include: Convert to solar thermal Upgrade Windows Exterior Wall Foam Sheathing LED Lighting Programmable Thermostats Programmable covers Air purification Water purification Rain runoff capture, water purification and rain gardens/cistern units Composting stations Food not waste (Replace lawn with indigenous and edible garden/forage) | The Millington Condominiums Association | 30 | 31 to 90 days | \$3,000,000 |
| Franklin | Converting Automotive and other Declining Industry | The medical products industry continues to grow globally and will for decades to come. Ohio companies, that supply fine machined products to the automotive industry, have proven that they can successfully convert to supplying the medical products industry (example, Lexis Medical). The goal of the program would be to identify those current suppliers to declining industries who have the fundamental capability (facility and workforce) to convert, and work with them through MEDICO to achieve that goal. BioOhio would administer the project and would collaborate with TechSource and MAGEET to identify qualified companies anywhere in Ohio. BioOhio would identify market opportunities for near term and long term growth opportunities for participating companies and results with TechSource and MAGEET to create a program and training for near term and long term growth opportunities for those markets. BioOhio would also engage the Ohio Board of Regents and the Ohio Department of Development in the employee retraining process. BioOhio would work with existing State device and medical supply companies (Ethicon, InVivoCare, etc) to qualify converted suppliers for their businesses to "bootstrap" on the impact. | BioOhio (formally, the Edison BioTechnology Center | 1,000 | 0 to 30 days | \$1,000,000 |
| Franklin | Compact Residential Wind Energy Device Research | We are requesting funding for a 6-month research and development project to design a prototype wind energy capture device to be used on residential dwellings. The device differs from traditional windmill designs as it is compact and cylindrical in shape. The idea is to develop an efficient energy generator that would appeal to residential home owners allowing them to reduce their carbon footprint based on energy costs. Most home owners are not willing or not able (due to zoning, neighborhood code restrictions, etc) to erect traditional fan-shaped windmill on their property. Our envisioned design is a small device that would be most likely to be able successful we plan on creating an Ohio based manufacturing and installation company creating hi-tech jobs and training workers in our state in new in-demanding skills. This project may result in 100s of future jobs for Ohioans. | Ohio Energy Works | 3 | 0 to 30 days | \$160,000 |
| Franklin | Sanitary Sewer Connection | The project includes the decommission of an existing wastewater treatment plant (estimated cost of \$15,000), the installation of 350 feet of sanitary sewer line and the installation of 186 feet of sanitary sewer main line extension for the connection to the City of Columbus Sanitary Sewer System (estimated cost of \$60,000). The installation would also involve the annexation of the property and an increase in the City Taxes (estimated cost of \$5,000 plus applicable taxes). Funds would be used to help offset the costs associated with the annexation and taxes of the project as well as cover the costs associated with the installation of the sewer lines and the decommissioning of the current treatment plant. The project would save approximately 10 jobs for the company that may have been lost due to the increase in taxes, as well as create local jobs for the installation of the sanitary sewer lines and decommissioning of the wastewater treatment plant. This project will also benefit the receiving waters by removing a permitted effluent into the stream and treating the wastewater with the best management practices per the City of Columbus Sanitary Sewer Treatment Plant. | CTL Engineering, Inc. | 20 | 31 to 90 days | \$80,000 |
| Franklin | Mentoring (broad spectrum) | As to keep the program effective, so I stopped. Boys are not excluded for future projects; girls were the focal point at that time. My focuses were as follows: Attitude, Respect, Communication Fitting, Crime, Bully and the Victim, Drugs, Alcohol, Education, Smoking, Sex, Outspying. I created the mission statement: "Young ladies being receptive to change in a positive manner, communicating openly, working together, respecting each other and creating the need to be stretched." This program was geared toward females, but can be altered toward males or co-ed. I attended the governors meeting for African American Male Graduation Rate all-day seminar. Participated in the Ohio Reads Program 2007-2008, now the program has been abolished. I still have a relationship with the student, because mentors are forever. Children need to be nourished. No matter what background they come from. Most carry a burden of defiance, because they know no other way. Love, education (books & common sense), attitudes so many barriers, I will have guess speakers based on the topic, progression awards, and interactive communication (poetry, skills, short- | Hand-N-Hand | 4 | 91 to 180 days | \$10,000 |
| Franklin | Comprehensive Bioscience Workforce and Education C | This has been estimated that there are several thousand open high paying bioscience jobs in Ohio at any given time and bioscience companies are regularly announcing expansions requiring additional trained workers (Battelle, Eurland, etc.). The state needs a comprehensive, industry-driven, sector specific workforce and education strategy in the biosciences to complement existing programs of the OSOR and CCOO. North Carolina has developed an excellent comprehensive bioscience model that has successfully added thousands of jobs and billions of dollars to that state's economy. The Ohio Center would be managed by BioOhio and have physical and virtual elements. The Center would work closely with both industry and the OSOR and CCOO in Ohio as well as nationally with PHRMA and BIO. The Center would develop curricula, certification programs for industry specific jobs, and educational materials at all levels. The Center would do industry and school outreach including the acquisition and management of a "Bio Bus" - a mobile learning lab made in Columbus, Ohio. A comprehensive strategy embodied by the Center would help fill more than 4,000 high paying bioscience jobs annually in Ohio. Biosciences which also sets the stage for efficiency improvement from the hybrid drive train. | BioOhio (formally, the Edison BioTechnology Center | 10,000 | 0 to 30 days | \$16,000,000 |
| Franklin | vehicle accessory electrification | Accessories are often engine driven which adds to pollution and fuel consumption. The greater use of hybrid vehicles is making electrical energy more available on vehicles and provides infrastructure for electrification of the work related accessories as well as primary engine functions such as engine cooling, power steering, etc. Work trucks require power for aerial lift devices, saws, drills, ventilation fans, computers and other electronics. Hybridized loads often require thermal storage or auxiliary engine driven compressors which can be replaced with electrical devices providing a much cleaner, more efficient solution. This project will deliver an auxiliary electrical generation system which can be charged from the traction engine or the grid, and power the vehicle work loads electrically. This is a market Vanner currently serves with older technology which is limited in market penetration. This project expands the market significantly. | Vanner Inc. | 300 | 0 to 30 days | \$900,000 |
| Franklin | Chatter Buddies; A preschool program to build the | In keeping with Gov. Strickland's vision for Ohio's educational P-16 system, Kids Love to Learn (K.L.T.L.) will revolutionize 21st Century learning technology for preschool by: Teaching the No. 1 skill that determines reading success or reading failure Delivering educational and engaging content directly to Ohio's 130,000 children who begin kindergarten not prepared to succeed as learners Using Columbus-based affiliates, CCB and WCBU, K.L.T.L.'s foundational literacy content will be based on PBS or Cartoon Ohio households | Kids Love to Learn, Inc. | 75,000 | 0 to 30 days | \$1,279,000 |
| Franklin | Retraining Ohio workers for the Medical Device and | Dispos from the Ohio Class of 2007 cost the State \$10.6 billion; 1:5 high school graduates cannot read their own diploma; middle class children begin kindergarten with a 20,000 word vocabulary; lower income children with only 5,000 words. This is an evidence based program. Preliminary research on K.L.T.L.'s curriculum, demonstrated a two grade increase in targeted pre-literacy skills for 3 and 4 year olds. The design, development and manufacture of medical devices and other health products requires similar skills to those exhibited by skilled workers in the automotive and aerospace industries. Displaced workers can be retrained to fill open jobs in Ohio's growing medical device and health products industry. The project will have elements, on the job training and education center based training. The first goal would be to retrain workers with companies willing to retrain workers at their sites of business and provide resources to the company and the worker to allow on the job training to occur at the fastest pace possible. This could employ workers and increase company growth equity. Companies would be required to hire workers completing training and would be subsidized to cover the costs of in-house training. The second goal would be to retrain workers to identify more generic device industry needs, match educational resources and accelerate their integration. BioOhio would lead the effort to identify target companies and administer the in-company program. BioOhio would work with OSOR and CCOO to develop and implement the educational training program. | BioOhio (formally, the Edison BioTechnology Center | 1,000 | 0 to 30 days | \$1,750,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | Firmgreen-SWACO Green Energy Center | 1.5 miles of natural gas pipeline extension from nearby Columbia Gas pipeline junction to the waste-to-energy facility at Grove City Landfill. The pipeline is strategic to deliver renewable high-BTU methane produced from the landfill gas to interested CNG fleets around Columbus and the State of Ohio. The pipeline construction will generate additional jobs but more importantly lead to many more CNG infrastructure development jobs to construct CNG dispensing stations and operate them. The CNG efforts offer many other benefits: - provide low cost vehicle fuel to the community - reduce emissions in the community - increase CNG infrastructure which further promotes use of this cleaner fuel | Firmgreen Fuels of Ohio, LLC | 8 | 31 to 90 days | \$3,000,000 |
| Franklin | Health Care | Establish new applicants who will be trained to become certified nurse assistants. Teaching and learning the basic nursing and care that will include CPR and first aid, vital signs and personal care for home health care clients. Operate an adult day care services to enhanced elderly living in high crime areas giving them education to promote a more healthy living. Established non-profit community organization will create 2 new professional green jobs, and strengthen the work force into about 100 other jobs A green business certification program will be developed for Central Ohio, including needed education & training. This will allow businesses to reduce costs and add a green element to existing messages and will allow the region to attract or prospective new employees and workers that Central Ohio is a green place to live and work, thereby attracting new sources of economic growth. The project will develop certification criteria, validation procedures, and educational materials to aid businesses in achieving certification. Implementation of green practices will strengthen businesses through conservation, efficiency and alternative techniques. Projects will lead to savings in energy, water, and raw materials, and create jobs implementing conservation and efficiency measures. In 2 years the program will be self-supporting through fees paid by participating businesses. The project will be carried out in collaboration with Ohio State where MBA students studying green business practices will perform some of the work as class projects. The Workshop will create 10 new green jobs in Central Ohio for low-kill individuals by expanding the highly successful Waste Not Center (www.wastenotcenter.org) operated by the Central Ohio Sustainability Alliance. The Center receives donations from businesses of materials and supplies destined for disposal and arranges their use in educational and other non-profit purposes. This project will expand the scope of the Center's services by developing a low-level manufacturing capability to use donated supplies and materials as components to make higher-valued items. The work would be performed by low-skilled people in cooperation with community work force development programs. Art teachers who are members of the Waste Not Center would be consulted for project ideas. One example would be to use donated fabric to make shopping bags. Funds are needed to acquire space and equipment for the Workshop and to seek out an expanded and consistent flow of materials and supplies into the Center. The goal will be for the Workshop to be self-supporting in 2 years through funds provided by the businesses whose discarded materials are accepted by the Workshop. This is a Fitness and Wellness Center. With 1 on 1 training and coaching. Health and Nutritional products. Fitness equipment, sales, building and retail of used equipment. Teaching and training new employees. The center will provide labor and materials necessary to update old and inefficient lighting systems in 2 non-profit adult day care centers in Franklin County. Approximately 625 fixtures would receive upgrade retrofit, most with "super" efficient electronic ballasts and T-8 lamps. A recent professional analysis of the lighting systems in these two buildings indicates the proposed project would produce energy savings to 40% and an overall payback in 1.1 years. | Affectionate Care, L.L.C. | 30 | 31 to 90 days | \$130,000 |
| Franklin | Promotion of Green Business Practices in Central O | Established non-profit community organization will create 2 new professional green jobs, and strengthen the work force into about 100 other jobs A green business certification program will be developed for Central Ohio, including needed education & training. | Franklin | College of Optometry Facility Improvement | The Ohio State University College of Optometry is regarded as a leader in optometric education in the United States. It is the oldest university-based program in the nation and one of the first to grant the Doctor of Optometry degree. The OSU College of Optometry is one of only twenty colleges in the nation and the only such college of optometry in Ohio. The majority of the College's program is housed in an aging, deteriorating facility. The current facility cannot accommodate state-of-the-art health care technology, and therefore does not provide an environment for either optimal clinical training or optimal patient care. A recently conducted architectural feasibility study provides an excellent platform for assessing the health profession's professional training and patient care services. Juice Technologies LLC would like to set up Ohio based manufacturing of programmable communicating thermostats to service the utility industry in the deployment of smart grid and home energy management. The manufacturing assembly line will be installed at an existing contract manufacturer in Ohio and is expected to produce in excess of 500,000 per year for the next 10 years to support the smart meter rollout in the US. The assembly line would include electronics assembly and test equipment, plastic injection molds, solder stations and fixtures. The new assembly line would require hiring a full time staff for two shifts, approximately 22 people as well as a line supervisor and a design engineer. Juice Technologies LLC would like to undertake a demonstration project with American Electric Power to prove the concept of community energy storage in and around the Columbus area. This project would demonstrate the ability to store excess electricity for power outages and to back feed the power grid during peak power demands. Each system would cover 5-6 homes and would be either pad mounted or pole mounted similar to a transformer. Juice Technologies LLC is requesting that funding be provided to manufacture and install the CES which will include the Plug Storage Home energy management systems, power electronics and either a lithium ion or nickel metal hydride battery. The Plug Storage Home will be manufactured in Ohio and provide for additional skilled labor jobs at the contract manufacturing location. The power electronics and CES installation will also be Ohio based. This demonstration project will consist of 3 units for field validation and test verification. Once successfully demonstrated the CES concept can be shared with other electric companies and cooperatives for mass deployment in the state of Ohio. Convert/replace 28 buses to propane fuel and establish a refueling station to service said buses with public access. | The Ohio State University College of Optometry | 155 | 181 days or more | \$65,273,000 |

| Franklin | Smith Electric Vehicles, Clean Fuels Ohio Partner | Place 150 medium duty dedicated, plug in electric drive vehicles in strategic fleets around Ohio. This will include a public outreach component as well as media events. There is also a major field study research opportunities with the Ohio State University. North Central Mental Health Services stress to promote wellness and recovery for persons with serious and persistent mental disabilities by ensuring integration into community activities. For inclusion, it is necessary to arrange and provide transportation. To do this, North Central utilizes a small fleet of aging vehicles that are costly to maintain and very fuel inefficient. North Central proposes to replace these vehicles with ones that are more fuel efficient, smaller and environmentally friendly. This will support the U.S. automobile industry, improve safety and enhance the environment. | Clean Fuels Ohio | 10 | 31 to 90 days | \$15,000,000 |
| Franklin | Community Access and Integration | Convert/replace 28 buses to propane fuel and establish a refueling station to service said buses with public access. | North Central Mental Health Services, Inc. | 5 | 0 to 30 days | \$210,000 |
| Franklin | Fowler House/Norwich House Group Home Replacement | North Central Mental Health Services, a comprehensive community mental health center, proposes rebuilding 2 existing residential treatment centers that serve adults who suffer from severe and persistent mental illness and co-occurring disorders. These facilities, built 100 years ago, serve to restore and rehabilitate 21 people at a time. These people graduate to independent living arrangements at the completion of treatment. The buildings are antiquated, require extensive maintenance and are energy inefficient. New group homes will maximize necessary services and continue to provide community options to psychiatric facilities. | North Central Mental Health Services, Inc. | 50 | 91 to 180 days | \$2,000,000 |
| Franklin | Regional CASA/GAL Volunteer Recruitment | To hire five regional part-time persons to recruit individuals to serve as volunteer Court Appointed Special Advocate/Caretaker of team (CASA/GAL) volunteers who serve abused and neglected children in the court system. This project will create jobs and save dollars spent on foster care. Research shows that CASA/GAL services save funds because children with a CASA/GAL volunteer stay in foster care for less time than children without a CASA/GAL volunteer and are less likely to subsequently reenter the foster care system. Funds will also support regional volunteer recruitment activities and development and dissemination of recruitment materials. Project involves replacement of energy inefficient lighting at this stage 1950s building. Building air conditioning chiller, cooling towers, hot water heating systems, and direct digital controls are very inefficient and have exceeded their expected service lives. Also domestic hot water systems and pumps are obsolete and parts are generally not available. | Ohio CASA/GAL Association | 5 | 31 to 90 days | \$180,000 |
| Franklin | Beacon Building (50 West Gay St.) - Renovation of | Project involves replacement of energy inefficient lighting at this stage 1950s building. Building air conditioning chiller, cooling towers, hot water heating systems, and direct digital controls are very inefficient and have exceeded their expected service lives. Also domestic hot water systems and pumps are obsolete and parts are generally not available. | City of Columbus Ohio | 95 | 91 to 180 days | \$3,530,000 |
| Franklin | Juice Technologies LLC Production Test and Validat | Juice Technologies LLC is a start up company committed to developing and manufacturing green technology through intelligent energy management devices. Juice will be setting up a production and validation center at the Center for Automotive Research at The Ohio State University for the production support of their electric vehicle smart charging and home energy management devices. The test and validation center will allow for the Ohio based manufacturing of the products to create jobs. The equipment required support these products includes high end data acquisition systems, load centers, calibrated electrical standards, thermal chamber, vibration tables, tensile strength tester, thermal imaging equipment, optical computer calipers, micrometers, gauges and fixtures. This center will allow the validation of product design as well as support on-going industry requirements for continuous testing and statistical process control. Juice is committed to utilizing Ohio based suppliers for the purchase, installation and validation of the equipment. | Juice Technologies | 8 | 31 to 90 days | \$250,000 |
| Franklin | Plug-in Hybrid Infrastructure in the City of Colum | BottomLine Resource Technologies (BRT) is working in partnership with American Electric Power and the city of Columbus on a large scale plug-in hybrid and electric vehicle (PEV) deployment as an integral part of Mayor Michael Coleman's desire to make Columbus cleaner and greener. BRT in partnership with Ohio based Juice Technologies LLC has been selected to specify and install infrastructure for PEVs such as buses, utility maintenance fleets and personal PEVs for the city and general public. The scope of the project includes: investigation of charging equipment electrical parameters across the intercampuswide area; Design and deployment of supplemental charging stations; Changes in inherently politically contentious work on non-utility grid sources; Battery recycling/charge/disposal issues and the potential role of used batteries for "home grown" campus and the city's utility energy storage devices & Reverse vehicle-to-grid charging either as a back-up power for home/commercial or as a mobile ESD network when area wide utility peak demand assistance is needed. | Juice Technologies | 3 | 91 to 180 days | \$50,000 |
| Franklin | Glass Company, Clean Fuels Ohio Partner | Convert/replace 28 buses to propane fuel and establish a refueling station to service said buses with public access. | Clean Fuels Ohio | 10 | 31 to 90 days | \$1,000,000 |
| Franklin | Green Airfields | This is a Ohio demonstration project. The idea is to use the large areas in airfields that are now unproductive for the construction of large arrays of solar panels to power airport systems including the airfield lighting which would be tapered to the solar application i.e. LED type lighting and DC powered circuits. Excess power could be sold to the electrical distribution system. This area is secure and the electrical infrastructure for handling large amounts of electrical power is in place. Demonstration project would determine viability of solution for application at Ohio airports. Demonstration project would likely be conducted at a small county or general aviation airfield (eg Bottom Airport who is willing to participate in the demonstration project). | ADB Airfield Solutions | 15 | 181 days or more | \$1,275,000 |
| Franklin | Utility Company, Clean Fuels Ohio Partner | Convert/replace 28 buses to propane fuel and establish a refueling station to service said buses with public access. | Clean Fuels Ohio | 10 | 31 to 90 days | \$1,000,000 |
| Franklin | Stanley Steemer International (Dublin, OH), Clean | 10 electric vans. | Clean Fuels Ohio | 10 | 31 to 90 days | \$700,000 |
| Franklin | Ohio Propane Collaborative, Clean Fuels Ohio Partn | Develop public and private partnerships beginning in Central Ohio to develop propane infrastructure and fleet projects for on and off road vehicles (To have applications for fleets including airport and hospitals (as a cleaner burning domestic fuel is better suited to serve an at-risk population). | Clean Fuels Ohio | 10 | 0 to 30 days | \$22,500 |
| Franklin | Ohio Electric Drive Initiative, Clean Fuels Ohio P | Cultivate state wide partnerships to identify 10 partners to introduce at least 150 dedicated medium duty trucks. To include the opportunity for The Ohio State University Center for Automotive Research (CAR) to capture real world data concerning the use of electric vehicle and battery life. | Clean Fuels Ohio | 10 | 0 to 30 days | \$22,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | Ohio Clean Natural Gas Consortium, Clean Fuels Ohi | Set up 18-24 CHD Stations. Convert as many of 1800 Consortium member vehicles as possible to Clean Natural Gas. | Clean Fuels Ohio | 10 | 0 to 30 days | \$22,500 |
| Franklin | Managing Your Money | Managing Your Money (MYM) is a technological incentives-based program that teaches adults with cognitive disabilities financial responsibility. This online money management program will help participants become financially responsible by allowing them to pay all of their household bills online using simple picture icons and/or logos that organize their finances and protect their privacy. Initially, the program will only address bill-paying, but once that program is set up, the program will be extended to include other areas of responsibility. All participants will have the option of using The Responsibility Game (TRG), receiving points for each bill-paying transaction and trading these points for prizes that include coupons for area restaurants, grocery products, event tickets, and other items. Money is needed to develop the software, purchase incentives, and to maintain the program. | Flow Theater | 15 | 181 days or more | \$1,500,000 |
| Franklin | Workforce Reentry | The Workforce Reentry program will offer adult male and female ex-offenders in Franklin County a full array of reintegration services to help them successfully return to the community including job readiness, employment training, support and mentoring. The goal will be to provide 330 ex-offender per year case management services and/or the them to drug and alcohol treatment, mental health care, physical and dental care, housing, transportation, legal services and other supportive services to assure the returning prisoner maintains community connections critical to their ability to remain out of the criminal justice system. Services may also include residential care as needed to ensure the ex-offender has a safe, stable living situation until an alternative can be secured. Similar programs will be established in Cuyahoga and Hamilton counties to address the high number of ex-offenders returning to these communities from the Ohio correctional system. Prison overcrowding has been identified as a critical issue for the state. | Alvis House | 672 | 31 to 90 days | \$2,000,000 |
| Franklin | Summer Day Camps and After School Programs | The Prevention Council of Central Ohio provides summer day camp and after school programs on the west and south sides of Columbus. The programs provided give youth a place to be safe after school and during the summer. We provide alcohol, tobacco and other drug prevention services in these programs, as well as teach life skills, communication skills, social competencies, conflict resolution, etc. Reentry, Columbus closed many of the recreation centers. As a result, it is likely that we could see an increase in requests for our services. With the current economic environment, we have experienced cuts that will equal almost \$300,000 by the end of the year. United Way has cut all of our funding and the ADAMH Board of Franklin County has reduced our allocation by approximately 1/3. This is detrimental to our programs and there is great need for our services. With this funding, we will be able to continue to provide our services and help protect the youth in Columbus. In addition to these programs, we also offer a mentoring program and have a community health resource center (partnering with Columbus Public Health) and provides invaluable services to youth and the community. | Prevention Council of Central Ohio | 3 | 0 to 30 days | \$300,000 |
| Franklin | BioBus | Many states and organizations around the nation operate "Bio-buses" built and equipped by CBS Inc., in Canton, Ohio. Surprisingly, Ohio is not one of these. This project will rectify this situation and provide a much needed resource to help promote and gain interest among future workforce for Ohio's expanding bioscience industry and provide a unique educational resource. The Bio-Bus will have a fully equipped mobile teaching laboratory to supplement coursework especially in less equipped inner city and rural schools. The bus will help expose Ohio schoolchildren, students and displaced workers to jobs in bioscience and related fields. Employees will be given to rural and inner city schools and communities which have a strong manufacturing and health care base. The Bio-Bus will be central to BioOhio's outreach activities targeted at raising interest in bioscience industry sectors, such as bio-manufacturing which is currently experiencing shortage of trained workforce. BioBuses have been equipped to provide training ranging from basic biology to advanced genomics and biotech. The bus could be made unique by running it on bio-add to its public impact. | BioOhio (formerly the Edison Biotechnology Center) | 50 | 31 to 90 days | \$750,000 |
| Franklin | MECC Director / Battalion Chief | Mass computers, three central Ohio fire departments formed the Metropolitan Emergency Communication Consortium (MECC) in 2004. In 2003 AFD, agencies opened Fire/EMS based communications centers in Ohio. The Consortium has grown into an organization, with a membership encompassing but not limited to, three fire departments and unincorporated territories, and a city fire department, all together with a total population exceeding 131,000. | Plain Township Fire Department | 1 | 31 to 90 days | \$323,955 |
| Franklin | Project Self Help | Ohio passed legislation to remove personal property tax from the tax applicable by 2015 as part of a tax restructuring. The removal of personal property tax represents a combined loss of 1.1 million dollars annually for the fire township agencies. The MECC has been administratively managed by sharing different aspects and duties between the participating fire departments. The MECC Center was developed as a pilot which this is a more efficient means of management. The Center has a critical need for funding to cover the cost of the program with available funds and can not move forward. | Higher Life Christian Center | 15 | 91 to 180 days | \$275,000 |
| Franklin | PIC 2009 | Self-Help is a community outreach program that is designed to serve the following population: 1. Homeless individuals, at risk youth and individuals currently living in a homeless shelter. Transitional housing is a housing unit that is designed to assist a target population (i.e. ex-offenders, homeless or addicts. This is not a halfway house, but not limited to its form. The purpose of this program is to assist ex-offenders to make a successful transition from prison to society. | BigThumb LLC | 25 | 0 to 30 days | \$910,968,000 |
| Franklin | PDG Domus Mfg green affordable housing and green | The PIC 2009 software application will provide Behavioral and Mental Health Agencies a more efficient and succinct way of collecting patient health care information (PHI). The PIC 2009 software and systems solution will incorporate a history and experience reaching back two years of collecting PHI data from multiple health care institutions' HIS systems or primary data collections systems and processing this PHI data securely and accurately through to government and commercial carriers. State agencies and both government and commercial financial carriers receive PHI data in the form of specific reporting or in the form of 837 file exports and 835 file imports for claim receipt acknowledgment and quick and accurate claim adjudication. Document Imaging system and Biometric Thumb readers will also be incorporated for a more secure system. | PDG Domus Mfg LLC | 300 | 31 to 90 days | \$4,500,000 |
| Franklin | Electric Vehicle Development and Support Center | BigThumb, LLC firmly believes that PIC 2009 will provide a data flow and business process environment that will encourage input from both providers, administrators, software developers, and staff which will result in constant improvements, refinements, and adaptability for a health care community whose scope of care is ever changing. | System7, Inc. | 15 | 0 to 30 days | \$10,000,000 |
| Franklin | Educational Opportunities For Students | We seek DOE energy goals under the "Build America" program. High Performance Home obtains the following: 38% insulation rating 100% recyclable materials Energy & Star - a rating GEPA Energy costs: \$100/mo. Meets LEEDS Category 5 hurricane rated California earthquake rated Snow Load rated 380 lbs./sq. ft. Insect, fungus and bacteria-resistant Fire rated Class 1) PATH Builder Partner 1.5 to 3 days to erect Laminated Lumber - duplicate the look of any material: stone, wood, brick, stucco and more Greenhouse less than 1/10 of the weight and V/C's Our operation will create the following benefits: Employ 300 people 1 to 3 years at year-round. No layoffs Green Collar technical employment Training at all levels, employees have opportunity for advancement Wages from \$12.00-\$25.00 + benefits Wealth building programs to develop employee's retirement and net worth Each plant generates \$50 to \$75 million in sales | Groveport Madison Local School District | 8 | 31 to 90 days | \$1,140,500 |
| Franklin | IT Consulting | Create Electric Vehicle Development and Support Center. Build new or lease existing facility with showroom, conference and training room, 5 vehicle service bays, four offices, restroom facilities, customer waiting and education room and storage area. Staff with office manager, receptionist, two senior electrical engineers, five service technicians and custodian. | Pillar Technology | 25 | 181 days or more | \$2,250,000 |
| Franklin | Greening CTL's Corporate Office | The goal of this company would be to accelerate the integration of electric vehicles into everyday American life. By creating a resource to address the maintenance needs and continued improvement of electric vehicle technology, this would become a viable option for the average consumer. This resource could also become a technology hub for automakers in the continued development of electric vehicle technology. numbers of school-aged students who display behavioral problems (truancy, bullying, threatening other students/staff, and disrupting class). We would work with 3 types of students: Those who: expelled for attendance issues, dropped out, severely under-credited. We have 4 grade opportunity to register, classroom, earn credits and advance a grade level, earn a GED, and enter employment. Our School Board will provide 4 modules. We will run 2 sessions: morning and afternoon. Students can opt to attend either both sessions. Friday afternoon session is for intervention. Our student ratio: 15:1. Approximately 200 students. Needs: Novel software \$100,000 and Studydrive.com \$12,000 Staff: Program Manager, Dean of Students, Counselor, Technology teacher, English, Math, Science and Social Studies. (salary & benefits) \$750,000 Leases for staff & students: \$180,000 Privacy study course: \$40,000 Task chairs: \$10,000 Printers for each classroom/office: \$300 | CTL Engineering, Inc. | 8 | 0 to 30 days | \$495,600 |
| Franklin | Energy Efficient Lighting | Attached you will find information on the services and solutions provided by Pillar Technology. We are working with IT organizations looking for innovative ways to cut IT costs and time of development by 30%. For the past 12 years, Pillar Technology has been specializing in agile development, providing workshops, training, mentoring and coaching services. Solutions: 1. Agile Development 2. Speed to Value - (S2V) Business Intelligence 3. Service Oriented Architecture 4. IT Outsourcing 5. Mobile Application Development - Custom Software Development Services: 1. Custom Software Development 2. IT Transformation - Making IT more Agile 3. Testing Strategies 4. Quality Assurance 5. Customer Relationship Management | Alvis House | 1 | 31 to 90 days | \$55,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | Emergency Generator | Purchase and install two standby emergency generators. These would provide electric power in the event of an emergency to Alvis House's emergency correction treatment center for inmates offenders and Alvis House's central office & monitoring facility in Columbus, Ohio. Having the emergency generators would enable us to provide uninterrupted safety and security services within Alvis House programs in Columbus, Ohio. | Alvis House | 2 | 31 to 90 days | \$82,000 |
| Franklin | Chiller Replacement Project | Replacement of a 60-Ton chiller that serves the 1800 Building of Heinzelring Foundation in Columbus, Ohio. The foundation serves severe and profoundly non-ambulatory mentally retarded individuals for the state of Ohio. | Heinzelring Foundation | 8 | 31 to 90 days | \$55,000 |
| Franklin | Sewer Project Mandated by the U.S. Environmental P | EPA has mandated that the Village of Hansburg install a sewer system. This project will impact approximately 161 residents within the surrounding area. The project will run through Darbydale and go through Darbydale, approximately 20-30 mile stretch. Each resident is required to tap into this sewer line, costing every resident approximately \$100 on every invoice. In addition to their regular wastewater bill they receive. Any amount granted would help reduce any out of pocket expenses that level cost the residents. | The Village of Harrisburg | 100 | 31 to 90 days | \$500,000 |
| Franklin | Business Growth | I would like an additional 3 full time employees to expand my business. I would be able to hire 1 admin, 1 technician, and 1 sales person. With these positions hired OX IT will give me the ability to continue to hire more employees. | OX IT Tech Services, LLC | 3 | 0 to 30 days | \$65,000 |
| Franklin | Nurse Training in Rural Ohio | Ohio's commitment to training health care professionals extends throughout the state. We partner with Ohio's community colleges via distance education technology to increase the numbers of advanced practice nurses in rural and Appalachian Ohio. Congressional Districts 14, 12, 18. These nurses remain in their respective localities and are helping to improve the health status of the residents of their counties by offering education for health risks, health teaching, and promoting healthy lifestyles. Access to such services contributes toward the achievement of the Healthy People 2010 goal to increase the quality and years of a healthy life for all Americans. The Ohio State University based graduate nurses, along with those who remain in the Columbus area, help eliminate health disparities the second goal of Healthy People 2010 by providing health services to underserved populations (Asian, Hispanic and Somali) via home family practice settings and mobile-managed clinics throughout the state. Stimulus funding will be used to update the distance learning equipment and to provide scholarships to support students seeking education to advance the delivery of quality health for the citizens of rural and central Ohio. | Onebein College | 105 | 91 to 180 days | \$100,000 |
| Franklin | METRO STEM Early College High School Project | We will expand the Metro Early College STEM School to 16 school districts to provide students with early college credit in their junior and senior years. The credit opportunity with The Ohio State University will be combined with internships or relevant business or corporate placements. The curriculum will focus on life sciences/math and engineering/design and engineering/natural sciences/innovation in health and Life Sciences and appreciation and diversity. Due to no funding stream that can subsidize this program, we need a bridge to allow us to find investors who will contribute beyond the school districts, Ohio State University and Battelle Research Institute. | Educational Council | 35 | 0 to 30 days | \$1,732,160 |
| Franklin | Rural K-12 Connectivity to Columbus Resources | Purchase, Installation and Lighting of additional fiber line within the Columbus Metropolitan area as well as Metropolitan Serving Areas North and South of Columbus generally along Interstate 71 for connecting Ethernet aggregation Points-of-Presence serving rural areas through independent Fiber Networks collective efforts with Rural Broadband Network Providers. The primary purpose is to cost-effectively connect the K-12 School Districts and Information Technology Centers that IFN's Broadband Network Providers serve back to State Educational Resources in Columbus such as those provided through ETech, CHAIBUS, OPI, The Ohio State University and others located in Ohio's capital. | Independents Fiber Network, LLC | 20 | 181 days or more | \$3,600,000 |
| Franklin | Zer-Energy Commercial Buildings | In addition to the Educational Service benefits of this network it will also lead to Economic Development opportunities in these primary markets by Ohio Businesses and Ohio Entrepreneurs. | | | | |
| Franklin | Zer-Energy Commercial Buildings | Designing and testing pilot, zero-energy, steelglass commercial building utilizing Euro-American Glazing Company (see www.Euro-American.com) proprietary double-skin facades and building integrated photovoltaic (BIPV) units. Phase 1 - (90 days, \$75,000.00) - develop conceptual design and energy model of such building. Phase 2 - (180 days, \$200,000.00) - independent verification of observed results using the BIPV building's prototype modules (in cooperation with local University and/or architectural/engineering company). Phase 3 - (90 days, \$100,000.00) - construction and field testing of energy performance of buildings' "3D" modular structures (in cooperation with local University and/or architectural/engineering company). | Euro-American Glazing Company | 50 | 181 days or more | \$250,000 |
| Franklin | Energy-Efficient Buildings | Designing and manufacturing super energy-efficient, modular, single-family homes utilizing Euro-American Glazing Company (see www.Euro-American.com) proprietary double-skin facades and building integrated photovoltaic (BIPV) units. Phase 1 - (90 days, \$75,000.00) - develop conceptual design and energy model of such home. Phase 2 - (180 days, \$200,000.00) - independent verification of observed results using the BIPV building's prototype modules (in partnership with local University and/or architectural/engineering company). Phase 3 - (90 days, \$100,000.00) - construction and field testing of energy performance of a model home (in partnership with local University and/or architectural/engineering company). | Euro-American Glazing Company | 15 | 181 days or more | \$150,000 |
| Franklin | "Training for new Careers" | The business will train students in the skills of inspecting residential and commercial properties for pest control business. Also Giss Line Warranty certifications. They will get immediate employment. Many opportunities for this career will materialize as the real estate business picks up again. There are usually 50 to 100 homes and businesses to be serviced in a week. | GIDDY-UP GO Termite & Pest Control Inc. | 15 | 0 to 30 days | \$300,000 |
| Franklin | Home Assistance Program | These patients can eventually branch into their own businesses. The Home Assistance Project will: - Create 100 jobs in Columbus, Ohio directly or indirectly - Provide temporary support to 1000 senior homeowners - Provide linkage between 5 banks and 2000 home buyers - Educate 600 first time home buyers - Help 5 banks work with Somali clients - Make grant money available for wind, solar power to customers who have South Central Power as their power suppliers. | Somali Community Access Network - SomaliCAN | 158 | 31 to 90 days | \$56,000 |
| Franklin | Wind Power | http://www.ohio.state.us/od/ohae/ELFG/ohae.htm#NCFCA_09-02 | Self | 0 | 91 to 180 days | \$6,000 |
| Franklin | Do it all bio diesel | establishment of a lot over bio diesel, used diesel cars, bio conversions, bio diesel, manufacture education, and specialized his repair and his repair education. | Bio Diesel do it all | 10 | 0 to 30 days | \$50,000 |
| Franklin | Resource Modeling to Evaluate Role of Customer-Sit | Tools used to examine the physical potential of customer-sited energy efficiency, demand response and alternative energy projects to be efficiently integrated into the supply/demand model. The focus of this work will be on applying these tools – such as Power World or related products – to Ohio's electric service areas to identify customer site opportunities to address supply adequacy, real-time reliability and portfolio objectives. | Industrial Energy Users-Ohio | 2 | 91 to 180 days | \$300,000 |
| Franklin | Facility Assessments and M&V | The focus of this project is to provide commercial and industrial customers in Ohio with resources to conduct facility assessments required to identify and initiate early customer-sited energy efficiency, demand reduction and alternative energy projects. The work will also include efforts to identify resources to measure/validate performance. The output of this work will be and input into the larger effort to encourage reliance on customer-sited capabilities to meet Ohio's (SB 221) portfolio requirements. | Industrial Energy Users-Ohio | 6 | 91 to 180 days | \$300,000 |
| Franklin | Backup for Self-Generators | The evolution of regional wholesale electric markets has produced short term (real time and day ahead) supply and pricing options that can be used by retail customers with self-generation to meet their back-up and supplemental power needs in ways that "typical" EDU demand and reservation charges that have historically made the economics of self-generation less favorable. The focus of this work will be to use Ohio's CREB and not-for-profit status to help Ohio commercial and industrial customers navigate to these wholesale options to meet their back-up and supplemental power needs in ways that economically complement their self-generation capabilities. | Industrial Energy Users-Ohio | 3 | 91 to 180 days | \$150,000 |
| Franklin | Customer-Sited Projects - Routine Building | EDU Ohio is working with commercial and industrial customers located in Ohio to develop procedures to enable customer-sited energy efficiency, alternative energy and demand reduction capabilities to be integrated into the demand/supply portfolio requirements (established by recent revisions to the Ohio Revised Code). The focus of this work is on strategies that will reduce the energy intensity of businesses in Ohio so that they can be more competitive in their individual sectors and globally. This particular activity will involve work on protocols and procedures established by regional transmission organizations (MISO and PJM), by the PJMCO and by individual EDUs to coordinate the performance that is required because these parties to maximize the opportunity for customer-sited capabilities to function within an integrated portfolio approach. Ultimately, this work is being undertaken to build the routines that individual customers can use to bring their customer-sited capabilities through their individual governance process with an acceptable business case and "subsidy" justification. | Industrial Energy Users-Ohio | 3 | 31 to 90 days | \$150,000 |
| Franklin | Student TECH CORPS; Student Power for Ohio Schools | This project provides 500 Ohio middle schools the opportunity to participate in an exciting program that lays a foundation for lifelong technology literacy, provides students with a suite of valuable technology and workforce skills they can employ in their schools and eventually take into the workplace, and gives children excited about technology an all in address and diversity! Student TECH CORPS delivers core technology training and certification to middle school students, and then harnesses their knowledge to power a Student Run Help Desk to provide valuable technical support in their school building. New research suggests overworked and understaffed School District IT departments are spending 70% of their time reacting to technical problems leaving only 30% to focus on teacher training and integration. Student TECH CORPS tackles this issue head on and as a result of this project 12,500 students will receive a hands-on entrée into IT. 500 schools benefit from tech-literate students who provide valuable tech support to their teachers and students and Ohio, has a cost-effective way to enhance investment in schools' technology. | TECH CORPS Ohio | 10 | 0 to 30 days | \$3,562,500 |
| Franklin | Solar Pilot Plant | Construction of a pilot plant to take advanced solar panels from laboratory scale to full scale production. Once pilot plant is operational several energy projects will extend this new technology will provide private funds to expand the pilot plant to full scale production. | Sugico Mok Energy Corporation | 43000 | 0 to 30 days | \$85,000,000 |
| Franklin | Core Financial Group | The economic downturn has caused severe unemployment in the financial services industry. The smaller investment firms that maintained a traditional brokerage are doing well despite the market conditions. Core Financial Group's "CFG" goal is to expand a small brokerage firm by hiring quality advisors and maintain a profitable firm. The top ten professionals at CFG have over 100 years of experience. Now is the time to support the financial services industry, stimulate the economy, help to decrease unemployment and build for the future. Everything is in place to move forward with the regulatory bodies except for the investment capital. The two million dollars we seek will help achieve the goals of the stimulus package. We will take over Investment Services Inc. an under-performing and obsolete broker-dealer and a Registered Investment firm based in Ohio and regulated by FINRA and the SEC. CFG is looking to attract assets under management of \$3 billion within five years and the 200 people. CFG will use the funds to increase Ohio's employment and add corporate and be before the 1970s of crisis. Ohio was a global leader in greenhouse food production. Peru Hollow Farms (PHF) goal is to revive and reinvent Ohio's recognized leadership in the greenhouse food production industry. PHF will build a system of year-round food production combining greenhouse technologies with renewable energy. Located in urban neighborhoods, PHF will create jobs, revitalize neighborhoods, supply safe food, and keep dollars in Ohio's economy. | Core Financial Group | 200 | 0 to 30 days | \$2,000,000 |
| Franklin | MetroGrowers | Starting with one greenhouse growing lettuce, PHF will create 12 full-time jobs and 10 temp jobs within the first 90 days with estimated net revenue of \$450k annually. In the following two years, PHF will expand to 12 greenhouses with 144 full-time employees and 30-50 temp jobs with an estimated net profit of \$8M annually. | Peru Hollow Farms | 22 | 31 to 90 days | \$1,300,000 |
| Franklin | Biotech Jobs Creation | Ohioans spend in excess of \$800 million each year on lettuce. Franklin Co. alone spends \$80 million. It would take 114 greenhouses and 1400 employees to meet the current annual demand for lettuce in Franklin Co. Potential for further expansion and job development is strong. | | | | |
| Franklin | Increasing Biofuel Availability for Ohioans, a job | Customer 3rd Frontier technology investment in central Ohio has been limited to returns to investors rather than on job creation. ABT, a 2 year old research R&D service company located in Columbus, is seeking funds to immediately expand its marketing and sales program. This expansion will result in at least 18 white collar jobs for BS and MS degree lab researchers in year one and up to 28 positions over 3 years. While most other startups will create jobs only for the duration of their grant, ABT will be creating long-term employment opportunities and tax revenues within the city of Columbus with salaries at \$60,000 and above. | Applied Biomolecular Technologies, Inc. | 28 | 0 to 30 days | \$500,000 |
| Franklin | Increasing Biofuel Availability for Ohioans, a job | Increasing Biofuel Availability for Ohioans, a joint project of the Ohio Petroleum Marketers & Convenience Store Association and Clean Fuels Ohio with specific focus on the Ohio Dept. of Development's Alternative Fuel Transportation Grant Program (AFTGP). By the end of 2008 this collaborative effort will identify and enroll up to 15 projects to make E85 and/or B20 available for sale at retail locations across Ohio. Outreach efforts will focus on Ohio's small business independent retailers as well as other independent fuel retailers. This unique collaborative effort will ensure compliance with AFTGP requirements and will also allow for optimal utilization of AFTGP funding. This programmatic partner wishes to begin immediate deployment of US EPA Smartway Technologies. This deployment will make the fleet most fuel efficient as well as reduce emissions. | Ohio Petroleum Marketers & Convenience Store Assoc | 75 | 0 to 30 days | \$30,000 |

This deployment will make the fleet more fuel efficient as well as reduce emissions by utilizing anti-idling technologies. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Franklin | Equine Science Center Community Arena | With private and College funds, a unique \$4.982 million facility will focus on sustainable environmental practices as a model for equine facilities in other settings and transform a former brownfield site, improving the economic development of Waverly approximately 2 miles from campus. The center will allow the Equine Science program to prepare future professionals in equine science, veterinary science, and equine business administration within the growing \$100 billion American equine industry. Indoor and outdoor riding arenas, pastures, classrooms, a riding trail and living space for full-time equine center caretakers are included. We will employ innovative strategies for materials and construction. Onsite feed storage programs, and promote equine interests within the community. Purchase of 2-3 properties considered losses by financial institutions (those which are in need of major repair/renovation), which will then be remediated by myself and crew up to us. Renovated property will then be appraised and each finished project will then be privately sold (under flexible buy-sell mortgage contract) to LOW-INCOME, LARGE-SCALE BUYERS. The intent of the buy/sell is to provide a home, source of credit, and confidence to struggling, hard-working families. Loans will be BASIC, of the formula: Home Retail Value (HRV) / 240 = 360 monthly payments. All created 24 mi. recycling movie with products (T-Dolls) created by my company. Have to buy equipment to begin shooting. Will submit to federal and local governments for sale. T-Dolls will be the next horses to tight pollution. The work will be done year, or year, depending on residential placement such as Group Home and Foster Care in order to help with placement, assessed, and trained on a vocation that matches their strengths. Supported Employment is offered to assure that an individual has a job. | Otterbein College | 60 | 31 to 90 days | \$1,000,000 |

| Franklin | Ohioans Choice Energy Demand Management | The purpose of the Ohioans Choice Energy Demand Management Program is to put the power to reduce electricity consumption into the hands of Ohioans using pre-existing technology as well as prepare them for the SmartGrid power technologies to come. Essentially it allows Ohioans to sign-up to a program which will allow them their electricity consumption to be monitored and managed during the day and night. Funding would be used to create a pilot project within a municipal area, purchase, and then install the necessary hardware. Funding would also be used to raise awareness and educate citizens on the program. The program would be implemented at a municipal level for communities participating in this program. This Community Carbon Credit feature would allow cities, villages, and counties to raise money to fund programs by reducing energy consumption through its citizens participating in the Ohioans Choice Energy Management Program. | Dewesale | 50 | 31 to 90 days | \$10,000,000 |
| Franklin | Central Ohio Fund of Funds | The funds requested will be used to attract an additional \$80,000,000 in investment from Central Ohio sources to create a \$100,000,000 "fund of funds". Through a market based process, the \$100 million dollars will be placed in several venture capital funds for investment into young Central Ohio such companies. Over the past few years, TechColumbus and Central Ohio have helped create 2,100 jobs by investing \$10 million in early stage investment in new and young tech companies in Central Ohio. These young companies are struggling to obtain additional investment in the current environment. The Central Ohio Fund of Funds will provide significant and immediate dollars to help these companies continue to develop so they can emerge post-recession as robust players in their markets and growing employers in the region. TechColumbus has been leading a regional discussion around the creation of a \$100 million Fund of Funds and believes that regional support exists for the remaining \$80 million. provided federal stimulus funds are available to seed the fund. The Fund of Funds will also stem "brain drain" by creating opportunities for existing workers and recent graduates. | TechColumbus | 400 | 31 to 90 days | \$20,000,000 |
| Franklin | AP23 Sports Complex | AP23 Sports Complex (AP23SC) will be an smaller sports facility geared toward youth ages 8-19 who participate in travel basketball, volleyball, soccer, lacrosse, track and field and softball programs. The facility will host national tournaments in the aforementioned sports which, therefore, have not been able to be brought to Columbus due to the lack of a facility with the capacity to contain them. "Letters of Intent to Host" have been received with national tournament organizers for boys and girls Amateur Athletic Union (AAU) boys and girls basketball, girls' volleyball and local track clubs. The AP23SC will redevelop the former Major Superstore located at 775 Georgetowne Rd Columbus, OH. 43228 which is a 225,000 square foot facility being vacant for some time. Approximately 100 seasonal and permanent jobs will be created by a minority entrepreneur. Naming rights sponsorship is under negotiation with an international sponsor/manufacturer. | AP23 Sports Complex | 100 | 31 to 90 days | \$1,410,000 |
| Franklin | ContractorID.com National Coverage | ContractorID.com is a staffing panel. ContractorID.com is to provide a direct, fast, reliable forum for contractors to get exposure to organizations of all sizes needing their services, and for some organizations to tap into the fast growing market of Contractors (due in part to the current economic conditions and the massive availability of talented resources who are out of jobs/contractors) without incurring the cost of an intermediary. ContractorID gives contractors the ability to post their credentials, availability and rate to all interested organizations. This is an avenue for all existing and aspiring contractors to have the ability to get maximum exposure with low risk. It also allows the contractors to market themselves privately without making losing a potential investment for reasons relating to poor reputation and/or protection of their charge by a representing agency. Additional funding for this project will be to leverage the current successes and make the panel a nationally recognizable resource by 1) inventing a wide-reaching marketing and awareness campaign, and 2) investing in product development to enhance services offerings. NEP will use innovative energy solutions & leverage other private capital to acquire Electric Distribution Systems & invest in energy efficiency programs to lower the property's energy consumption. NEP will analyze individual building characteristics, requirements, benchmark existing Main Family Findings & detail opportunities for each property. We will provide a turn-key, turnkey summary listing individual energy efficiency/investability initiatives & their respective CPE, RPE, & IPE. Property investments and exposure to reduce energy consumption as much as 15% of existing base load. Analysis would include a comprehensive review of the building envelope (insulation, windows, etc.), mechanical optimization, controls, lighting, energy monitoring, funding alternatives, financing, and more. NEP will offer a turn-key, turnkey summary listing individual energy efficient technologies, estimate jobs & reduce demand on the electric grid Capital recovery period for Ohio is 11 years when taking into account 20 to 25 years when taking into account regas & base load. NEP provides innovative energy management solutions for 20k+ customers. We will bring these capabilities & benefits to more Ohioans by expanding AMI capabilities capture near real time consumption, demand, voltage & current information. Implementation of an AMI system will yield energy savings of up to 20% for customers. Collaborators include GE, Google & Battelle. We can enable energy smart customers by offering real choice programs which allow them to decide how much electricity to use. We will manage resources through AMI, a two-way communication network & meter data management system to move energy consumption away from periods of high demand to lesser times on the electric grid. We can achieve operational savings like receiving on/off peak data in near real-time. AMI offers the potential for NEP to convert the meter from a simple measuring device to an integrated system comprised of hardware, software & people that can be used to better manage electricity. Effective implementation will increase utilization of energy efficient technologies, estimate jobs & reduce demand on the electric grid Capital recovery period for Ohio is 11 years when taking into account 1 double stack connection oven @ \$6,000.00 1 double conversion oven @ \$11,727.78 1 convector pizza oven @ \$12,791.00 1 combi oven @ \$13,364.30 11 warming cabinets @ \$4,386.27 1 medium mixer @ \$2,083.73 2 3-door reach-in refrigerators @ \$3,746.44 13 3-door reach-in refrigerators @ \$5,215.77 5 3-door reach-in freezer @ \$4,689.16 9 3-door reach-in freezer @ \$6,485.28 8 chest freezers @ \$367.51 | ContractorID, LLC | 3 | 0 to 30 days | \$575,000 |

| Franklin | C-top SA | CTAP has been in existence since 1997, serving the community and its victims of sexual assault. This grant would result in the creation of one or two new jobs for a Criminal Social Worker or Counselor who would specialize in the treatment of victims of crime without regard to age, gender, race, ethnicity. This means that over one hundred more underserved survivors of sexual assault could receive individual and group counseling, advocacy and outreach, all in charge to the survivor or their family. With treatment, victims of sexual assault and rape can return to a normal or higher level of functioning with an equal chance for a good, productive life as a contributing member of our community. Without it, they would continue to suffer the social, psychological and physical consequences of the crime that was perpetrated on them and our community could lose the potential contributions of this individual. | Mount Carmel Crime and Trauma Assistance Program | 2 | 0 to 30 days | \$55,500 |
| Franklin | C-top Kids | CTAP has been in existence since 1997, serving this community and to crime victims. This grant would result in the creation of one or two new jobs for a Criminal Social Worker or Counselor who would specialize in the treatment of juvenile victims of abuse, neglect, or domestic violence without regard to age, gender, race, ethnicity. This means that over one hundred more underserved victims could receive individual and/or group counseling, advocacy and outreach, all in charge to the victim or the victim's family. With treatment, young people can recover from the traumatic symptoms of abuse, neglect, and domestic violence with an equal chance for a good, productive life as a contributing member of our community. Without it, they would continue to suffer the social, psychological and physical consequences of the crime perpetrated on them, and may themselves become perpetrators of abuse or crime. | Mount Carmel Crime and Trauma Assistance Program | 2 | 0 to 30 days | \$55,500 |

| Franklin | C-Tap | CTAP has been in existence since 1997, serving this community and to crime victims. This grant would result in the creation of one or two new jobs for a Criminal Social Worker or Clinical Counselor who would specialize in the treatment of victims of crime without regard to age, gender, race, ethnicity. This means that our overburdened victims of crime would receive individual and group counseling, advocacy and outreach, at no charge to the victim. With treatment, victims can return to a normal or higher level of functioning with an equal chance for good, productive life. Without it, they and the communities in which they live, would continue to suffer the social, psychological and physical consequences of the crimes perpetrated on them. | Mount Carmel Crime and Trauma Assistance Program | 2 | 0 to 30 days | \$55,500 |
| Franklin | Coupon Program with Utility Bill Screening | "Coupons" program: consumers use to access incentive dollars. Consumers Screened into 3 groups based on a utility bill review similar to OED's Electric Partnership Program. Coupons used to pay contractor for the improvements in insulation, air sealing, high efficiency HVAC systems, and appliances. Coupons issued on sliding scale based on potential energy savings. Coupons are used to pay contractors. State would redeem coupons. Group 1 - low energy intensity, coupons for a prescriptive list of high efficiency appliances, etc. Best candidates for renewable energy systems program. Group 2 - moderate energy intensity range, would require a simplified energy audit. Group 3 - highest energy intensity, requires a detailed audit. Audits meet Home Energy Rating System standards. HERS is used for IRS tax credit, Energy Star, DOE 2008 Challenge programs. Contractors certified by State through BPI, HVAC processes. Outcomes, Quick program roll out and ramp-up. Transparency using existing QA processes. Accountability | Adena Energy and Environmental Consulting | 2400 | 31 to 90 days | \$0 |
| Franklin | Wind-Energy Datacenters | Datacenters are buildings that house 100-10K computer servers. Their energy footprint is increasing--now at an estimated cost of \$2.7B annually. This project will build datacenters that use only wind energy. The key idea is to use novel computer software that can automatically shift between datacenters as wind patterns change. The business impact of this project could lead to investments in wind energy state of Ohio. Phase 1 of this project will be conducted at OSU and will focus on a practical implementation of the software. Phase 1 will create a Ohio jobs (research, 1 system admin) costing ~\$400K. Wind and focus on a practical implementation of the software. Phase 2 will involve the construction of 3 small datacenters that are powered only by wind energy. This grant will fund equipment (800 computers, cooling systems, battery, and an 1 MW wind turbine) for these datacenters. This grant will also fund salaries, and contracts for cleaning and construction. The remaining 100% of the project will be funded by supply land or use pre-existing wind farms. Equipment can be purchased from Ohio suppliers. Phase 3 includes an education component for Phase 3 for advanced datacenter management. Continues to enjoy this status. | The Ohio State University | 40 | 31 to 90 days | \$1,800,000 |
| Franklin | Hiring To Grow | Tower Mortgage Corp. would use the Stimulus Funds to hire additional residential and commercial loan originators, loan processors, sales manager, additional support personnel as well as complete office renovation, update computer and telephone systems. This will allow Tower Mortgage Corporation, a family-owned company, and Physician Loans, to continue to provide equitable and unique lending services to clients in nearly all states. Presently we have mortgage broker offices in Colorado, Georgia, and San Antonio, Florida. With the infusion of Stimulus Funds we would be able to add more branch offices and serve regions in the 420 state regions presently served. Although we are licensed to provide Conventional, FHA, VA, Rural Development and Commercial Loans, our unique Physician Loan Program has provided physicians and dentists (practicing physicians as well as newly graduated, first year residents) residential loans as soon as they graduate from medical school and has been a growing program since it's inception. Through our Physician Loans Program we are proud of the fact that we have helped thousands of doctors and their families achieve their dreams. | Tower Mortgage Corporation | 100 | 0 to 30 days | \$1,000,000 |
| Franklin | Multi-Family Renewable Energy | NEP seeks a grant to help ease credit constraints for renewable energy investors that will allow us to acquire & install solar panels on multi-family housing units, providing a clean energy alternative for a portion of the property energy consumption. Install 5,000 solar PV panels on multiple multi-family unit roofing systems. This would lower the peak demand generation capacity requirements and would save significant kWh for the properties annually. Project would acquire solar panels from only OH based solar manufacturers & installation would be performed by the company, thereby creating new jobs. Solar technology would be connected to a net metering device allowing energy to be pushed back to the grid during times when production exceeded demand. NEP would also provide education on environmental data based on renewable energy production & consumption to the property & consumers. Collaborators include Sunright Corp and NEP. This investment would create \$1.5M private sector dollars. NEP will help OH achieve its mission of raising efficiency standards & lowering greenhouse gas emissions through a regional partnership. | Nationwide Energy Partners, Ltd. | 30 | 31 to 90 days | \$3,000,000 |
| Franklin | Heat Pipe De-humidification | STRS Ohio's headquarters in Columbus operates an HVAC system that requires summer operation of both chillers and boiler to heat to efficiently control indoor air humidity. New & green Heat-pipe technology makes the use of additional energy unnecessary by recycling heat from the return air stream to re-heat the over-cooled & dehumidified air with no additional moving parts or energy use. By reducing indoor humidity the sensible temperature can be raised by up to 5 degrees without occupant discomfort, reducing the energy used for cooling up to 30%. | State Teachers Retirement System of Ohio | 4 | 31 to 90 days | \$410,000 |
| Franklin | Ice storage / off peak cooling | STRS Ohio's headquarters in Columbus was pre-engineered and built with power monitors, automation systems and connection piping to add future off peak cooling / ice storage equipment. With funding STRS could install ice storage tanks at the existing HVAC cooling plant immediately by installing ice storage. STRS would reduce electric demand costs and the load on the electric grid during periods of peak cooling, increasing power availability for other industrial and commercial users, optimizing the area's existing power infrastructure. STRS Ohio is a public pension plan serving 460,000 active and retired Ohio public educators and provides pension and health care benefits to the 128,500 retirees. STRS Ohio is governed and operated under direction of the State of Ohio and registered as a 501(c3). Concomitant with the general economic down turn regarding the Pension Fund's value, the local electric utility has announced a substantial rate increase. Heat pipe dehumidification would help offset this increase. By reducing operating costs, STRS would re-direct the savings directly to the pension and health care funds and add to the security of active and retired public educators. | State Teachers Retirement System of Ohio | 4 | 0 to 30 days | \$550,000 |
| Franklin | Green Roof System | The Central Ohio Area Agency on Aging currently occupies two buildings in the central city of Columbus and has 160 employees delivering services to low income older adults in the eight county central Ohio area. COAAA is proposing to use Green roofing technology on the six story main building and energy efficient roofing technology on the annex. COAAA would replace the existing rubber roof system to be planted with green roofing on both buildings and new modular tray green roofing system on the 174 East Long Street building. Modular tray system to be planted with native specific plants. | Central Ohio Area Agency on Aging | 15 | 181 days or more | \$440,000 |
| Franklin | HVAC Energy Efficiency | 174 East Long St is a six story building in downtown Columbus and is HQ for the Central Ohio Area Agency on Aging. COAAA is an eight county regional agency providing home care services to low income older adults to prevent premature nursing home placement. We propose to replace our existing heating and cooling system with a new energy efficient hot water system. This would involve replacing the existing boilers, pumps and piping throughout the system. Adding additional VAV boxes, ductwork and controls. We would also replace an existing boiler and convert to VAV. The last updates on the HVAC system occurred in '92 and '87 and involved updates to the ductwork on floors 1-5. Boilers are 30+ years old and south have been replaced. | Central Ohio Area Agency on Aging | 10 | 181 days or more | \$750,000 |
| Franklin | Columbus Urban League Goes Green | The headquarters of the Columbus Urban League (CUL) is a 22,000 sq. ft. facility in the King-Lincoln district of Columbus. CUL, in existence since 1916, is the State's largest civil rights organization. Our headquarters was built in 1984 and would serve as a prime candidate for an energy efficient retrofit in an urban setting. An energy efficient retrofit of our facility would lead to: 1) reduced energy usage 2) reduced energy cost 3) increased services for our clients with the cost savings from reduced energy consumption. One example of an energy retrofit would be converting our flat roof into a rooftop garden. | Columbus Urban League | 10 | 31 to 90 days | \$600,000 |
| Franklin | Technology in Ohio | The Columbus Urban League has a proven track record of efficiently implementing a multi-million dollar federal grant within three months, as evidenced by our implementation of the federally funded Head Start grant in the spring of 2007. Therefore, we are more than capable of moving forward with a "shovel ready" project as proposed in this correspondence. Gynia Technology is a newly formed IT consulting firm created to assist with finding unemployed IT workers here in Ohio as a new opportunity. We have access to over 100 jobs throughout Ohio and other parts of the US. We can provide job training and re-certification for those IT skilled workers. This project would require the creation of a program management center (PMC) to act as an architecture of the state not energy efficiency (EE) and related investments. The primary goal: | Gynia Technology | 50 | 181 days or more | \$50,000 |
| Franklin | Coordinate and measure state-wide energy efficient | 1. Ensure proper coordination and communication occurs across the various state programs. The client advocate will assist the state to ensure, track and measure use of funds towards stated objectives. 2. Utilizing existing resources within the state, the PMO office will build a database and dashboard system to capture information related to EE projects for reports and comparisons in categories against a standard benchmark. The intelligence system will assist the state with fact-based decisions on which programs are meeting expectations and which programs need more attention to maximize return. With a state terms schedule already in place, Attevo will act as the PMO, design and build the database and related dashboards using existing infrastructure and assist the state in measuring energy efficiency projects. This program lasts for two years. | Attevo, Inc. | 3 | 31 to 90 days | \$475,000 |
| Franklin | Project to hire more staff and to serve more rural | We are wanting to expand in our new office in Marietta, Ohio, West Virginia area. Ohio. The people in this community have very little to none access to health care. We are planning to open nursing services, home health care, home care, physical therapy, speech therapy, occupational therapy. We are in need of vans to access the very remote rural areas of these communities. And to get the patients to hospitals when the care is critical. This endeavor will provide jobs for the skilled as well as the unskilled work and providing training for them in this community. We plan to hire at least 100 workers in this depressed area in the near future. | City Medical Nursing Services | 50 | 0 to 30 days | \$300,000 |
| Franklin | Enterprise Facilitation Pilot Project for Urban DI | This Pilot Project is to help Near Eastside Columbus recover economically. Developed by Dr. Ernesto Strohl & The Strohl Institute & successfully applied in Kansas, Oregon, Michigan, Texas & elsewhere, the model produces an 80% success rate compared to our national 20% non-business maintenance rate. At full-time Enterprise Facilitator (Business coach) to trained to 11 Counties in the community, draw from a geographic commitment level of entrepreneurs & business owners wanting help 2) Drive committed clients free, confidential, one-on-one support using The Strategy Management to build sustainable & help start or reestablish a business. Critical success factors 3) Measure & track performance 4) Advisory Board committed to the community & drawn from business, law, finance & other sectors to network and tap resources. To measure effectiveness in Ohio, we propose two high-employment urban & rural sites already having Project Champions & a population a Facilitator can impact without being over-extended. Training, salary/benefits cost per case: \$185,000 to \$1,200,000 per yr. To encourage local ownership, the community will cover office space, travel, equipment & related costs. | Grohio Association | 75 | 91 to 180 days | \$225,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------------|----------------|--------------------|---------------------------|
| Franklin | Mobile office resource | Mobile office resource allows physicians to more efficiently provide care and decreases healthcare costs. Stage 2 of this project will result in the creation of a unique compilation of data (clinical, billing, utilization, financial) that is not available to the physician today. This information will be extremely valuable to private and public entities that are trying to determine ways to improve outcomes and decrease healthcare expenses. It will take further research to quantify the financial impact of providing this technology to the physicians. However, the community impact will be immediate and robust. We anticipate by 2013 we will be able to create 100 new, high paying jobs. Further growth to 10,000 customers will result in 350 new jobs. In addition, this endeavour will be national within the next few years and as a result will be pulling millions of dollars (at \$10,000.00 by 2013) from outside of Ohio. The Ohio Department of Public Safety is requesting funds to improve the energy efficiency at Highway Patrol facilities. The following is the breakdown of the total cost: \$2.3 million for the Ironton Patrol Post (LEED - silver certified) first LEED patrol post in state of Ohio \$60k Energy efficiency study for the OSP Academy, patrol posts, and state-owned driver's examination stations. \$2.4 million for Energy efficiency upgrades and repairs for state patrol owned facilities. | The Rubicon Group | 150 | 31 to 90 days | \$350,000 |
| Franklin | ODPS - Highway Patrol Facilities | The Ohio Department of Public Safety is requesting funds for the replacement of an existing out dated 100 ton Chiller plant for a 45,000 square foot Office building. Annual payback is 3.3 years. \$2.3 million for the Ironton Patrol Post (LEED - silver certified) first LEED patrol post in state of Ohio \$60k Energy efficiency study for the OSP Academy, patrol posts, and state-owned driver's examination stations. \$2.4 million for Energy efficiency upgrades and repairs for state patrol owned facilities. | Ohio Department of Public Safety | 100 | 31 to 90 days | \$4,760,000 |
| Franklin | ODPS - Centre School Chiller Plant Replacement | The Ohio Department of Public Safety is requesting funds for the replacement of an existing out dated 100 ton Chiller plant for a 45,000 square foot Office building. Annual payback is 3.3 years. | Ohio Department of Public Safety | 25 | 0 to 30 days | \$180,000 |
| Franklin | ODPS Shipley Building Facility | The Ohio Department of Public Safety is requesting funds to make energy efficiency improvements to our Shipley Building Facility. The breakdown of the total cost is as follows: \$240,000 for installation of occupancy sensors and lighting controls for daylight harvesting in a 360,000 square foot Office building. Potential annual payback is 3.5 years. \$900,000 for the installation of solar panel arrays and power distribution with storage systems on Three (3) Facilities to supplement electrical needs and reduce peak demand. The Facilities have ideal roof conditions to capitalize on solar panel implementation. Projected annual payback 9 years. | Ohio Department of Public Safety | 18 | 31 to 90 days | \$1,140,000 |
| Franklin | ODPS Alum Creek Facility | The Ohio Department of Public Safety is requesting funds to make energy efficiency improvements to our Alum Creek Facility. The breakdown of the total cost is as follows: \$75,000 to replace existing lamps with more efficient fixture and reconfigure lighting layout in a records storage area. Annual payback 4.2 years. \$80,000 for a window replacement project with more efficient windows. Existing windows are double-pane, non-insulated glass. Annual payback 5.4 years. | Department of Public Safety | 3 | 0 to 30 days | \$155,000 |
| Franklin | ODPS Retrofit EOC/JDF for Energy Efficiency | The Ohio Department of Public Safety (ODPS) is requesting funds to retrofit the Emergency Operation Center / Joint Dispatch Facility (EOC/JDF) for energy efficiency. The following is a breakdown of the total project cost: \$150k to replace 3 boilers with an "on-demand" boiler system. The Johnson Controls, this could save Ohio EMA and our tenant agencies approx. \$20k a year. \$170k to conduct an energy study to determine where heat and cool air are escaping. The building is 14 years old and we regularly receive complaints from occupants near windows about "freezing temps" during the winter and sweltering conditions in the summer. \$114k to retrofit the building in response to the energy study \$126k to retrofit 8 bedrooms with motion sensors for lights, automatic water, soap and paper dispensers. | Department of Public Safety | 100 | 0 to 30 days | \$400,000 |
| Franklin | Junior Staff: Cultivating Tomorrow's Club Professi | The Boys & Girls Clubs of Columbus is seeking funds to revive its Junior Staff program - a practical program that assists teens in exploring a career in youth or human services, particularly Boys & Girls Club work. Program participants receive a stipend in exchange for providing program support to trained Boys & Girls Club staff. Boys & Girls Club staff ensure that Junior Staff participants receive the training and hands-on experience necessary to pursue a career in the youth services field. BOCC's Clubhouses are located in the Franklin and Milo-Grogan neighborhoods, Columbus neighborhoods that are plagued by high rates of poverty, crime and unemployment. Junior Staff gives youth from these neighborhoods an opportunity to earn money while also training them for a career in community service. BOCC will hire fourteen (14) Junior Staff members each quarter with the program lasting a total of four quarters (12 months). The Junior Staff program will be coordinated by one (1) Boys & Girls Club staff member who will have the opportunity to take on additional employment hours. | Boys & Girls Clubs of Columbus, Inc. | 15 | 0 to 30 days | \$75,000 |
| Franklin | Environmental Reclaim | Cardinal Environmental Reclaim (CER) is seeking \$1.5 Million to build an E-waste Destruction/Smelting facility in the City of Columbus to handle the growing E-waste in the State of Ohio. CER will shred E-waste for the State, Counties, Cities and even businesses in the State at NO CHARGE. Once the end product is sold, CER will return 10% of the profit back to the State of Ohio. The automated system will feature a 160 - 200HP Shredder, which has the capacity to shred up to 6 ton of material per hour. The system will be designed to process electronic waste, shredding and separating the components (ferrous metal, copper, aluminum, other precious metals, and plastics). The addition of the shredding system will allow CER to be one of the premier, full-service, electronic waste processors in the State of Ohio. CER has a unique process that evaluates in-coming equipment, re-displays working equipment, extracts parts that can be reused and recycles remaining products and components. The new processing line will include sophisticated shredders to grind equipment into pieces smaller than two inches. From there, a series of separators and magnets that will separate the different metals and plastics for recycling. | Cardinal Environmental Reclaim | 25 | 91 to 180 days | \$1,500,000 |
| Franklin | Defining Achieving Purpose (DAP) | Defining Achieving Purpose (DAP) will offer 350 impoverished young African American males ages 18-29 subsidized on-the-job training in high growth green job occupations. DAP participants will learn workplace competency & participate in 300 hours of occupational skills training during this 14-week cycle. The training cycle will be followed by job placement assistance & retention coaching for no less than 6 months following placement in an unsubsidized job. The work-based approach builds a public-private partnership affording these job seekers access to new industries, on-the-job training, and greater prospects for unsubsidized jobs in a green industry and subsequently economic stability. The DAP program seeks to impact disaffected youth by far too many young black men. Education and economic achievements are rising for African Americans in general. However, not for young African American men. AFAM are more likely to drop out of school, less likely to attend college, more likely to be incarcerated and less likely to be employed than any other race or gender. In recent years, terms such as crisis, at-risk, marginal and endangered, are used to describe their plight. | Columbus Urban League | 125 | 31 to 90 days | \$650,000 |
| Franklin | Care and rehabilitation for older adults | We have a day Center for older adults. They are seniors that are unable to care for themselves. They either have no family or their family has poverty level incomes and have to work. We have meals for them during the day and activity to stimulate their motor skills. We are in need of additional funds to keep going, and to hire more staff. We do receive a small amount from the state, however it does not cover the staff and needs we have to properly care for the seniors. We need to hire a social worker, physical therapist and occupational therapist and additional care staff but have no funds. We fear we will have to lay off staff, but if we could get some of this stimulus money, we can hire more staff and train care staff to work with the seniors. | Buckeye Adult Daycare, LLC | 15 | 0 to 30 days | \$100,000 |
| Franklin | TAKE ANOTHER LOOK - RE ENTRY PROGRAM | We are proposing a re-entry program for ex-offenders. Our work will start in the prisons. We will identify and recruit candidates for the program. The Life Coach will start working with individuals while they are still in prison. This way when they are released everything will be in place. A place to live, a support group and most importantly job training. The ex-offenders will be able to enroll in TEACH TEC and earn a nationally recognized certification in industries where they will be able to gain employment, like, construction, HVAC and/or become entrepreneurs and start a small business. | TEACH TEC | 100 | 31 to 90 days | \$100,000 |
| Franklin | CALL CENTER | Call Centers are big business and Central Ohio has a track record for successful ones. The call center we are proposing not only puts individuals in employment and assists them in becoming self-sufficient. It is a holistic program. Recruiting will be from the neediest populations. The individuals will undergo barrier removal, soft skills training and a customized call center training to individuals who successfully complete the program will move directly into one of 70 call center representative positions. Individuals are also assigned a Life Coach to keep them on track. | TEACH TEC | 90 | 31 to 90 days | \$100,000 |
| Franklin | Employment expansion opportunity | This will allow the expansion of our small dealership. Allowing us to bring in new product lines and training facility for mechanics, salesman, service writers, parts repair, and most leading specialties. This will also bring us the needed staff and new support for our ventures in high efficiency vehicles, and our new ventures in alternative energy vehicles such as electric cars and scooters. We will also need to train a number of specialists in the care and servicing of these new ultra low carbon foot print vehicles. Through our expansion we will open over 20 new positions that will all need to be trained in our training program as well as the manufacturers ongoing training in this new field. | The Speed Factory LLC | 20 | 31 to 90 days | \$250,000 |
| Franklin | Aging Disability Resource Center | The Central Ohio Area Agency on Aging serves an eight county region of central Ohio and currently provides benefits to older adults 60 plus and low-income adults in need of community based housing and services. Our proposal includes the addition of a elevator and connecting structure to make our facilities accessible to individuals with disabilities as we move toward the establishment of an Aging Disability Resource Center for the Central Ohio Area. The Resource Center would provide information, referral and services to older and disabled adults in the eight county Central Ohio area. Services are provided to enable adults to remain in the community and avoid institutionalization. Central Ohio does not currently have an Independent Living Council. | Central Ohio Area Agency on Aging | 25 | 181 days or more | \$650,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Franklin | Caring for Special Needs Children | We started this project because of the great need for care for the special needs children not yet old enough to be a part of the MRDD programs in our community. As a Marjorie educator and my experience of 20 years as a foster parent of special needs children, I felt I could help feel this need. We have begun a daycare program for these children. We will train young people to care for these special children. With this training, they can also have a base for other nursing education. The need for this program is overwhelming, so that mothers can go to work. Some of the training will actually go to the mothers so that they can have jobs. Please consider this project as we have put so much of our own funds into this program and wish to see it go forth for this community. | Care and Tenderness | 20 | 0 to 30 days | \$100,000 |
| Franklin | Employment for marketing and sales program | Hiring and training of five new employees for a minimum of three years to market and sell telecommunications services on a nationwide basis. | Intelligent Voice Solutions, LLC | 5 | 0 to 30 days | \$250,000 |
| Franklin | Cristo Rey High School - Columbus | A proven high school model in which low income students attend classes four days per week and work at a prestigious firm the fifth day. Income from this employment pays for their education, and leads to very high college attendance and employment rates after high school. Currently there are 19 Cristo Rey schools around the country. This specific effort is focused on starting one in Columbus, Ohio. From: Robert Gaskean LICDC, L.S.W. CEO CANCDTX Training Initiatives Re: Domestic Violence and Substance Abuse Awareness Project (Stimulus Proposal) | Cristo Rey High School - Columbus | 100 | 0 to 30 days | \$100,000 |
| Franklin | CAN/CDTX | Dear Sir, Madam Overview CAN programs and CDTX are pleased to announce a proposal to provide domestic violence awareness and substance abuse education to high school students. One only has to watch the evening news broadcast or read the front pages of any newspaper to notice the current trends of domestic violence and the effects of substance abuse on an increasingly youthful population. Beyond the high profile of media recognition the statistics surrounding domestic violence and substance abuse are staggering, and the effects are far reaching. Current trends suggest that the incidence of domestic violence and frequency of substance abuse are pronounced. An estimated 25% of women will experience some form of assault by an intimate partner in their lifetime. Additionally 10% of the population is likely to become an abuser of some form of substance. The pictures of domestic violence and substance abuse are complicated with suggestions that leave one under the impression that the statistics are mere trivia. The pictures of domestic violence and substance abuse are complicated with suggestions that leave one under the impression that the statistics are mere trivia. The plant material will reduce surface temperatures on building roofs and has been demonstrated to reduce heating and cooling costs 25%. This will result in a substantial cost savings. Using less energy to heat and cool buildings also reduces the need for generating capacity, helping the environment by reducing greenhouse gas and other power plant emissions. The plant material also reduces greenhouse gases and eliminates reflected heat. Jobs will be created for plant producers and green roof installers. | Christian Accountability Network and Chemical Depe | 6 | 0 to 30 days | \$1,956,000 |
| Franklin | Green Roof | Some additional benefits are extended roof tiles, sound insulation, and reduced urban heat effect. Demonstrating the savings and benefits on several government buildings will encourage implementing this under-utilized green roof technology on additional government and private buildings which would result in additional green energy jobs for Ohioans. | RIGA Group LLC | 30 | 0 to 30 days | \$2,100,000 |
| Franklin | UACityFibernet | The City of Upper Arlington will be partnering with Columbus FiberNet and the local city school district to create the City wide Fiber Network. Upper Arlington is planning the construction of a city-wide fiber network and a municipal wireless network in order to become more energy efficient, help the police and fire departments do their work more effectively, and provide more services to residents in public areas such as parks and within local government buildings. Network Applications: • Interconnecting City Buildings for voice, data, and video applications. • wireless automated meter reading (Future partnering with local utility companies) • public safety (police and fire) • wireless video surveillance in public parks • Innovation of Wi-Fi use for locating Missing Person or animal • Free Wi-Fi access to residents in certain outdoor locations The City is planning to install 20 miles of fiber to create the citywide Wi-Fi network. The City will need to select a vendor to design and build the Wi-Fi mesh network. | City of Upper Arlington | 50 | 91 to 180 days | \$2,500,260 |
| Franklin | Residence Hall Sprinkler Systems | Over 1100 students in 8 residence halls get only two of them have installed sprinkler systems. Sprinkler systems are proven to save lives and protect property. With a high concentration of student population it is imperative that all possible systems be employed to provide protection as required by NFPA 72 and the Ohio Building Code. Our current high voltage electric system is just at two major points by the city of Westerville Electric Department. The electric cabling is 40 years old. All major transformers and switches in the system have been replaced since 2002 with the exception of two relatively new buildings, the library and the Pava Athletic Center. The high voltage cabling has not been replaced. Funding would be used to replace our electric high voltage feeders. | Otterbein College | 15 | 181 days or more | \$2,500,000 |
| Franklin | High Voltage Infrastructure | Otterbein College has a central heating plant scheme for distribution of heating on Campus. The central plant philosophy allows for redundancy at the location rather than requiring it at each building and reduces the need for smaller heating plants at each building. Our unique system produces High Temperature Hot Water as opposed to steam technology, which tends to waste energy and water. HTW are used to produce heating water, domestic hot water, and steam for cooking and other processes requiring steam. Our central heating plant is the 10th in its campus operations. The plant, built in 1971, and a 2-mile network of utility tunnels are aging. Recent efficiency upgrades eliminated our need for our HTW generators during the cooling season thereby reducing and eliminating natural gas consumption in the months that do not require heating. To complete our project we propose to remove two 600 horse power boilers and replace them with a 700 horse power, a 600 horse power, and a 200 horse power boiler. This will allow for staging of boilers to meet low load, normal to peak load, and peak load conditions. Otterbein College operates 66 buildings, yet only 5 have fuel or renovated buildings use standard VFD (variable frequency drive) technology. To maximize the 100% capacity laboratory exhaust hood system, which removes conditioned air whenever a hood sash is closed, the new Science facility needs the VFD enhancement that was not available at the time of construction. EE fans include combined VFD drives and VAV boxes for the shovel-ready Science Building project, and a new VAV system for the Library. Otterbein will integrate environmental controls in at least 5 buildings used heavily by the general public. Annual operational investments have not been adequate to complete the otherwise-driven HVAC system for proper efficiency. An engineering firm will be hired to recommend plant improvements, or outside contractor will replace fluorescent ballasts with electronic ballasts. To support the goal of installing reliable technology to reduce energy use costs, the entire community of students, faculty and staff are committed to participate in energy saving. Stimulus funds will ensure that all utilities are monitored and maintain base line usage. Monitoring will signal high use facilities for improvements to decrease energy use. | Otterbein College | 30 | 31 to 90 days | \$300,000 |
| Franklin | Central Heating Plant renovation | Otterbein College maintains a vehicle fleet of 40 booking and service vehicles. The average age of the fleet is 8 years with 17 vehicles over 10 model years old, and fuel cost is the major portion of vehicle operation. Hybrid vehicles, now available as SUV's, pickups, and sedans, are shown to significantly reduce fuel consumption. Many of our service vehicles operate within a 2 mile perimeter, which equates to city driving. City driving is where hybrid vehicle performance is most economical. In addition, we seek to replace our gas golf carts with electric units. Otterbein requests stimulus funding to replace our aging fleet of 5 pickups and 13 vehicles with similar models available as hybrids, and to replace 2 golf carts with electric units. Reliable hybrids will reduce fuel consumption and contribute to the College's commitment to energy efficiency and a green environment. | Otterbein College | 30 | 181 days or more | \$3,500,000 |
| Franklin | Energy Efficient Retrofits: VFD, HVAC and Metering | Public libraries are the centers of the community and library use in OH is the highest in the nation. Libraries are reporting increases in visits, circulation and answering of questions, requests for assistance from job seekers, etc. Individuals are turning to public libraries for assistance in many areas, including filing unemployment, basic computer instruction, searching the internet for job opportunities and applying for jobs online. To assist libraries to meet these needs the State Library of Ohio requests \$19 M to be distributed in the following manner: \$6 M to be distributed to all public libraries on a formula basis (for local needs, e.g. to purchase additional public access computers, train volunteers to assist in computer training) \$3M for statewide subscriptions to online information resources and databases, available to Ohio's 11.5 M residents - to support educational, business and employment assistance \$2M for training and educational programs coordinated by the State Library in partnership with other agencies. \$6 M for competitive grants to public libraries for delivering services to unemployed/displaced workers, to be weighted by level of unemployment. | Otterbein College | 35 | 31 to 90 days | \$1,095,000 |
| Franklin | Energy Efficient Transportation: Hybrid and Electr | Public libraries are the centers of the community and library use in OH is the highest in the nation. Libraries are reporting increases in visits, circulation and answering of questions, requests for assistance from job seekers, etc. Individuals are turning to public libraries for assistance in many areas, including filing unemployment, basic computer instruction, searching the internet for job opportunities and applying for jobs online. | Franklin | Public Library support to Dislocated Workers | Stellar Computer Systems currently runs a consulting business, advertising revenue generating web sites for popular media outlets, and is striving to compete with other competitive software packages. This stimulus request will: Stimulate 80% job completion increase by multiplying the workforce by 3. Provide much needed advertising revenue for new business acquisition. Upon successful acquisition of new business, even additional personnel hiring will be required. Targeting retraining in a software firm of 1 to 2 dozen IT personnel within 2 years. Additional growth numbers from them will need to be evaluated afterwards. Allow for new servers & hardware for software hosting & development process for critical jobs. With the given resources from stimulus money, existing profitable projects will be expanded and new software packages will be produced. Stellar Computer Systems took a 50% profitability decrease in 2008 from economic hardship and has not been capable of increasing personnel despite the project workload needs of multiple positions. This grant would be greatly appreciated and much needed. Thank You. | State Library of Ohio | 50 | 0 to 30 days | \$19,000,000 |
| Franklin | Public Library Support to the Un/Under-Employed | To start an Early Childhood program serving ages 2.5 - 10 with a goal of teaching younger children reading and math skills. I presently own a SES educational program and collaborate with public school districts to help bring up students that need extra support. I would like to expand on the business to teach younger children how to read and help prepare them for the entrance of a school setting. I presently work with at risk students in failing school districts. My passion is to help children achieve academic success. The expected outcome is to have an educational center in Franklin or one of the surrounding counties to help teach children at an earlier age. Replace four existing 19 year old chillers at Main Library. These chillers use dated technology and R-22 refrigerant. These would be replaced with four high efficiency water cooled chillers resulting in a more energy efficient, environmentally friendly HVAC system. | State Library of Ohio | 50 | 0 to 30 days | \$19,000,000 |
| Franklin | Revitalization of Stellar Computer Systems | Stellar Computer Systems currently runs a consulting business, advertising revenue generating web sites for popular media outlets, and is striving to compete with other competitive software packages. This stimulus request will: Stimulate 80% job completion increase by multiplying the workforce by 3. Provide much needed advertising revenue for new business acquisition. Upon successful acquisition of new business, even additional personnel hiring will be required. Targeting retraining in a software firm of 1 to 2 dozen IT personnel within 2 years. Additional growth numbers from them will need to be evaluated afterwards. Allow for new servers & hardware for software hosting & development process for critical jobs. | Franklin | Replacement of chillers for Main Library | Replace four existing 19 year old chillers at Main Library. These chillers use dated technology and R-22 refrigerant. These would be replaced with four high efficiency water cooled chillers resulting in a more energy efficient, environmentally friendly HVAC system. | Columbus Metropolitan Library | 15 | 0 to 30 days | \$1,320,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Franklin | Teacher Incentive Program | Our district wants to enrich academic experiences and support innovative approaches and creative ideas. Our plan has 4 parts: 1. Compensation of Excellence. We will use the ODE building grade care Start & progress whose building grade care plan. Effective start will receive a \$5000 annual. Excellent status receives \$10,000. Excellent with Distinction status receives \$15,000. \$4,000,000. 2. Summer Teacher Academy. All staff has a chance to participate in 4-day classes on core subjects. Lead teachers will be paid to teach the classes. Teachers/Principals will be paid to attend. This professional development will offer differentiated leadership roles for our teacher leaders \$1,200,000. 3. Near Teacher Budgets. We would give a stipend for staff members who study with a new teacher. A teacher who has changed grade level or changed building. New teachers also receive a stipend \$500,000. 4. Mini-grant Program. Teachers/Principals can apply for mini-grants. \$600,000. Grants need to meet one of the following goals: increase student achievement, support ODE standards/benchmarks, improve technology, increase parental involvement. Evaluations based on completion of project. \$6,300,000. | Groveport Madison Local School District | 90 | 0 to 30 days | \$6,300,000 |
| Franklin | Energy efficiency retrofit | Upgrade heating, ventilation & air conditioning systems in building built in 1935, located in historical district of Worthington, which houses approx. 20 employees of several employers. Replace inefficient windows, retrofit, within historical guidelines, front door to maximize energy efficiency. Hope to achieve significant long-term energy savings while providing jobs for manufacturing and installation firms. | Insurance Partners Group | 10 | 31 to 90 days | \$25,000 |
| Franklin | Defining Acheiving Purpose (DAP) | Defining Acheiving Purpose (DAP) will offer 250 impoverished young African American Males ages 18-29 subsidized on the job training in high growth green job occupations. DAP participants will learn workplace competency & participate in 300 hours of occupational skills training during 16-week cycles. The training cycle will be followed by job placement assistance & retention coaching for no less than 6 months following placement in an unsubsidized job. This work-based approach builds a public-private partnership affording these job seekers access to new industries, on-the-job training, and greater prospects green industry jobs and subsequent economic stability. The DAP program seeks to improve the employment and economic disparities experienced by young black men. Currently education and economic achievements are rising for African Americans in general. However, not for young African American men. They are more likely to drop out of school, less likely to attend college, more likely to be incarcerated and less likely to be employed than any other race or gender. In recent years, terms such as crisis, at risk, and endangered, are used to describe these young African American men. | Columbus Urban League | 175 | 31 to 90 days | \$450,000 |

| Franklin | Tigerpoly energy efficient lighting | Replace high intensity mercury lights in automobile part manufacturing plant with energy efficient T5 fluorescent lamps. 96 lights are needed. \$175 per light purchase and installation and disposal. | Tigerpoly Mfg Inc | 3 | 31 to 90 days | \$16,800 |
| Franklin | Eco-Power Fitness | The overall project is focused on developing the first truly eco-friendly fitness center which will ultimately continue into the development of a full center nationwide. Our funding applications requests specifically on the use of green materials and alternative energy sources for the building. Our plan calls for the redevelopment of an existing underutilized building, adding solar, wind and other alternative energy sources. The building is being retrofitted with advanced energy efficiency strategies. Ultimately, this will become a public learning resource for energy efficiency and alternative energy. We will specifically be focused on creating approximately 20 new jobs within the first 6 months of construction. The energy consumption of the building by 90%. Our application will be used funding which will leverage significant private investment. | Eco-Power Fitness LLC | 30 | 0 to 30 days | \$125,000 |
| Franklin | Art Programming for Institutional Youth | Programming targeting troubled youth through the arts to give youth the tools to learn how to deal with anger and deal with stress. | Ohio Department of Youth Services | 0 | 31 to 90 days | \$25,000 |
| Franklin | Pauls | I am a small business owner. The restaurant I own has been in the area for 25 years, I worked there for 8 years. The last owner could not keep the business. I bought it from him in order to save my business but I have not had for 6 months. I need some help keeping it open. My equipment is breaking and I am getting ready just to pay for it. I am in a land mark in the area. The Governor even comes in. We need help through this tough time and I know we can and will be helped. We just need help significant savings potential, for which OHIO promotes energy conservation, energy efficiency. | CC Gregory Enterprises | 23 | 0 to 30 days | \$50,000 |
| Franklin | Congregational Energy Efficiency Program | With funding and the Ohio Council of Churches network, we can reach 10,000 congregations and 6 million Ohioans. Underpinning all programs are education and training, quantifiable results, accessibility, and affordability for all. OHPL provides energy audits and efficiency improvements through a revolving loan fund. Results are quantified by EPA Energy Star. Energy savings are reinvested in low-income communities. Our education programs also promote energy savings at community and household levels. We partner with Green Energy Ohio for training, rebates, research, and capacity building. | Ohio Interfaith Power and Light | 260 | 0 to 30 days | \$5,300,000 |
| Franklin | Statewide Digital/Data Audiolog System | This grant would boost OHPL's revolving loan fund and associated education programs, sparing multiple benefits: - \$500 loan to 10,000 Ohio congregations for energy audits - Loans for energy saving improvements in 10,000 buildings - 200 sustained green collar jobs - 1 From 1000 assesses and auditors (pay is recycled to fund) Recording of voice transmissions is a legal mandate for public safety agencies providing liability/protection and simplified timeline reconstruction of critical events. The current MARCS logging recorder equipment consists of a segregated design with very limited storage (88 frequencies). It will no longer be supported beyond 2015. Consolidation of mission critical recording resources will eliminate redundancy, reduce costs through shared services, and provide a single secure database for evidence gathering, storage, retrieval and restoration of criticals. Inflexible and obsolete storage systems, secure remote operation, built-in security and rapid retrieval of wanted calls. The current recording needs of Ohio is 1100 frequencies. With the increased capacity provided by new/improved technologies, crime and public safety agencies all over Ohio will be able to effectively prosecute crimes with this technology. Leveraging grant funding into a single source will allow any MARCS subscriber the benefit of secure digital recordings which can be retrieved from anywhere in the state, reducing costs to all users. NACI Replacement (\$45M) | Multi-Agency Radio Communication System | 75 | 31 to 90 days | \$1,000,000 |
| Franklin | MARCS Core Equipment Replacement | The current MARCS central core equipment was installed in 1999. Ten years later, this equipment has reached end of life and end of support and operation in critical need of replacement. NACI units receive all the voice alarms at the sites and send them to MARCS Network Operations section. This is a critical need for public safety information systems support because all 30,000 voice radios, 74 CADS and 1,800 mobile data terminal's rely on immediate location of these same radios critical public safety communications are affected. This equipment is the regular link leading to the heart of MARCS. If severed, the consequences are fatal. Site Upgrades to Voice Data There are 205 MARCS tower sites providing mobile voice and data coverage throughout Ohio. Local & regional law enforcement response teams utilize portable radios to respond and protect citizens. Propagation studies show statewide portable radio in street coverage will be increased by 75% or better by upgrading the 41 sites only sites to voice and data sites. The upgrade costs \$15,000 per site (BIMU total). Leveraging NACI money for infrastructure already in place is fiscally responsible. MARCS is a lifesaver in public safety and professional communications. Effective, reliable multi-agency/multi-jurisdictional communications must be in place before responders can act upon foreign/domestic threats. MARCS provides statewide 24/7 technical support through the "First Response Communications Technical Support Team". Tools currently available are unable to fulfill our ever growing commitment to support first responders technologies have changed. Purchase of a 700/800MHz mobile tower site with cache radios and dual/dual battery packs will immediately improve law enforcement response communication capabilities by 15-20%. Cache radios deployable in minutes provide instant multi-jurisdictional interoperability. During mass responses, the additional voice & data traffic may cause additional stress on the local tower. Deployment of a mobile tower site provides additional frequencies for voice & data traffic precisely where it is needed eliminating this stress. The proposed mobile site can be staged & operational within 15 minutes of arrival on site. Ohio's response to past events such as the Lusitania & Cincinnati Flood would have greatly benefited from these technologies. | Multi-Agency Radio Communication System | 150 | 31 to 90 days | \$1,110,000 |
| Franklin | MARCS First Response Technical Support Project | The current MARCS central core equipment was installed in 1999. | Franklin | State and Local Mobile Data Initiative | The ability to leverage grant funding is of utmost priority for Ohio. Ohio MARCS has 200+ voice & data tower sites already in operation providing the opportunity for Ohio to leverage ARRA funds by operating multi-jurisdictional/multi-agency mobile data services to local public safety responders. Instant access & the ability to transfer/clear data bases, photos, LEADS/NCIC records, APIS/SPS capabilities, GPS, alert dispatching, etc. is mandatory for first responders to effectively fight the ever growing & highly sophisticated criminal activities in Ohio. Ohio has successfully fought terrorist cells in recent years. However, drug traffickers organizations are over one dozen Ohio counties, as well as international gang activities & human trafficking (now a \$4B+ operation). 2007 drug confiscations consisted of billions of dollars in pharmaceutical & illicit drugs. Funding for multi-agency/multi-jurisdictional software projects will save local agency investment in infrastructure & licenses, resulting in minimal expense of end user equipment & a shared subscription cost. A 501(c)(3) organization, the Ohio Business Week (OBW) Foundation gives Ohio high school students an innovative and exciting hands-on entrepreneurship experience that is unmatched in the traditional classroom setting. Since 1989, OBW has helped more than 5,400 students reach their full potential by providing a forum to work side-by-side with business professionals to translate textbook economic theories into real world business practices. 252 students representing 88 Ohio counties and 115 high schools participated in OBW 2008. 60 percent of participants received financial aid. Of these students, more than 30 percent qualified for free and reduced lunch programs at school. During OBW students participate in a series of personal and professional activities: intensive workshops designed to engage students in effective financial literacy, business communications and persuasion. The goals and outcomes of OBW clearly align with Ohio's Academic Content Standards. By emphasizing such skills as critical thinking, problem solving, effective communication and economic literacy, OBW nurtures the same personal and professional qualities essential for success in high school and beyond. | Multi-Agency Radio Communication System | 120 | 31 to 90 days | \$863,000 |

| Franklin | Vocation Rehabilitation & Job Placement for specia | COVA, the Center of Vocational Alternatives, proposes providing full-service functions of Vocational Rehabilitation Counselors within its offices. COVA specializes in serving persons with mental illnesses, the largest disability group in the state. ORSC has diminished capacity at this time, and COVA has filled this outsourced function for ORSC through Pathways 1 & 4 jobs programs. COVA's teams provide assessments, career planning, job placement and follow along services to participants. We request funding for 2 counselors who can serve about 175 Ohioans annually. Our job retention rates for participants in follow along programs is 100%. COVA has been a provider for ORSC for 27 years. COVA currently serves clients in Franklin, Delaware, Morrow and Fairfield counties, and is able to expand to serve the other counties in central Ohio. | COVA-Center of Vocational Alternatives | 70 | 0 to 30 days | \$650,000 |
| Franklin | Employment Network - Returning disabled Ohioans to | Job creation figure of 70 is annual for length of program. to return to work. COVA, Center of Vocational Alternatives, is a provider of Work Incentive Planning and Assistance (WIPA) for SSA, a provider of vocational rehab and job placement services for ORSC and a certified Employment Network site for SSA's Ticket to Work. COVA serves persons of all disabilities through WIPA and has specialty trained teams to meet the mental rehab & job placement needs of persons with mental illnesses - the largest disability group in Ohio. Changes in payments for EN programs make it possible for community-based providers to better serve the needs of the disabled who want to return to work but the 9+ month lag in federal reimbursement for services creates a need for bridge funding to start, enroll disabled participants, assess their skills, create a career plan and market a participant to employers. COVA proposes to serve 30 persons in the first year, then approximately 50 persons annually. Job Creation estimate of 50 is an annual figure for intended ongoing program. | COVA-Center of Vocational Alternatives | 50 | 0 to 30 days | \$550,000 |

| Franklin | Legal Aid Homelessness Prevention Project | <p>Focuses on risk or homelessness, mental health, substance abuse, domestic violence, employment, school success & academic achievement, and family health & stability.</p> <p>The Ohio legal aid program submits this joint inquiry for homelessness prevention funding. Legal aid is uniquely positioned to prevent homelessness through legal representation, community education & other advocacy. We have the necessary legal expertise, poverty law experience & local relationships.</p> <p>We will develop an assessment tool to identify & target clients with legal issues that threaten a loss of housing and assist them on these issues, e.g. eviction prevention, unsafe housing conditions, domestic violence, displaced children/youth & urban/rural housing development.</p> <p>The statewide legal aid support center will coordinate the project and distribute funds to local offices, whose staff will provide legal assistance, advocacy to protect & expand affordable housing for at risk Ohioans. With funding, we could begin a statewide homelessness prevention effort within 4 months, and prevent homelessness for hundreds of Ohioans.</p> | Ohio State Legal Services Association (OSLSA) | 50 | 91 to 180 days | \$5,000,000 |
| Franklin | Meals-on-Wheels Distribution Center | The stimulus funds would complete this project and create 20 new jobs, as well as retain 250 existing employees for LifeCare Alliance's meal distribution facility. The facility will allow for production of 20,000 meals using the same one shift operation. Currently we serve more than 14,000 meals 365 days a year, through our programs, especially those at this facility - Meals-on-Wheels, Project OpenHand Columbus, Goodies-to-Go, a Senior Dining Center, and Community Wellness Center. In the next several years, the numbers of residents age 60 and over will increase to 13% of the population in Franklin County (Ohio Dept. of Dev., Strategic Research, 2007). LifeCare Alliance expects to increase the number of clients served to over 18,000 a year by 2015. Population projections put client service numbers on track to serve 18,000 clients a year by 2014. The health & nutrition services provided through the Meals-on-Wheels distribution facility and LifeCare Alliance contribute to an individual's ability to remain safe and independent in their own homes, thereby avoiding premature institutionalization in a nursing home, and saving taxpayers \$55,000 per year. | LifeCare Alliance | 270 | 0 to 30 days | \$3,000,000 |
| Franklin | Expansion of Meals-on-Wheels and job creation proj | LifeCare Alliance would use stimulus funds for the retention of the existing 250 employees and create 10 new jobs to expand LifeCare Alliance's Meals-on-Wheels program. The Meals-on-Wheels program provides round-trip food to a daily visit to homebound, older, disabled, and chronically ill adults 365 days a year either in their home or at senior community dining centers and restaurants in over twenty locations across central Ohio. Meal options include hot, cold, frozen, diet, kosher, vegetarian, and mechanical soft. The MOW program serves as many as 8,000 meals per day, including meals for kids in day care and after school programs. In 2008, LifeCare Alliance delivered 953,919 meals in Franklin and Madison counties and the needs continue to grow. Eighty-one percent (81%) of the Meals-on-Wheels clients are over the age of 65 and 78% have incomes less than \$20,000 annually. The health and nutrition services provided through the Meals-on-Wheels program contributes to an individual's ability to remain safe and independent in their own homes, thereby avoiding premature institutionalization in a nursing home, and saving taxpayers \$55,000 per year. | LifeCare Alliance | 260 | 0 to 30 days | \$2,000,000 |
| Franklin | Help-at-Home Project | LifeCare Alliance would use stimulus funds for the retention of the existing 250 employees and create 15 new jobs to expand LifeCare Alliance's Help-at-Home project. The project provides homebound and home health aide services to assist our clients with daily living activities, bathing, bed preparation, and basic household chores. The staff works with a network of community contacts to assure appropriate client services are coordinated. In addition, Help-at-Home coordinates home repair projects for clients in need of safety and health related repairs such as electrical or plumbing issues, installing grab bars and railings, repairing floors and roofs. In 2008, the project provided 36,540 hours of homebound and/or home health aide services to 651 clients. In addition, 84 homes were repaired. Eighty-four percent of the Help-at-Home clients are over the age of 65 and 84% have incomes less than \$20,000 annually. The health and nutrition services provided through the Help-at-Home project contributes to an individual's ability to remain safe and independent in their own homes, thereby avoiding premature institutionalization in a nursing home, and saving taxpayers \$55,000 per year. | LifeCare Alliance | 265 | 0 to 30 days | \$750,000 |
| Franklin | Visiting Nurse Association | LifeCare Alliance would use stimulus funds for the retention of the existing 250 employees and create 5 new jobs to expand LifeCare Alliance's Visiting Nurse Association program. This program is a Medicare/Medicaid certified service that provides skilled care in the home by visiting patients receiving medical, nursing, therapy, surgery or managing chronic health conditions after being discharged from the hospital. Clients benefit from the ongoing care, coordination and physical therapists, dietitians, pharmacist and medical social workers. The program conducted over 9,000 visits to 2,500 clients in 2008. Sixty-two percent of the clients are over the age of 65, and 89% have incomes less than \$20,000 annually. The health and nutrition services provided through the Visiting Nurse Association program contributes to an individual's ability to remain safe and independent in their own homes, thereby avoiding premature institutionalization in a nursing home, and saving taxpayers \$55,000 per year. | LifeCare Alliance | 255 | 0 to 30 days | \$750,000 |
| Franklin | The Trades Center of Central Ohio | Energy south of 20-year-old, 40,000 square foot electrical trade education center with original equipment. Results of lighting and mechanical systems to implement more efficiency and educate future craftsmen on latest innovation in building construction, maintenance and equipment. Replace 2 outdated water chilling units that provide chilled water to our plant. We make plastic automotive parts for OEMs. The chillers provide cooling for the molds used to make the parts and make them faster. | Energent Solutions | 10 | 31 to 90 days | \$275,000 |
| Franklin | Tigerpoly | The new chillers would be more energy efficient, would not need as many repairs. \$130,000 for each chilling system includes equipment and installation. | Tigerpoly Mfg Inc | 1 | 31 to 90 days | \$260,000 |
| Franklin | Global Domestic Commission | One job would be retained based on lower energy cost and reduced repair cost but the improvement to productivity would probably be much higher. | Global Domestic Commission | 100 | 91 to 180 days | \$125,000 |
| Franklin | Columbus Recovery Project | Our mission is to provide education for low income students about agriculture, science, and sociology. They will be given the opportunity and the resources needed to use that knowledge to advance underdeveloped communities in these subjects, and help them improve their environment and agriculture resulting in less poverty. We will educate them in the areas of agriculture, farming, composting, recycling and conservation. This will provide encouragement for their communities and an ecologically friendly environment. | Solutions for Homeowners, LLC. | 12 | 31 to 90 days | \$1,500,000 |
| Franklin | Stimulus Proposal for Mass Processing of Scrap Ttr | <p>For sale & Rehab 25 bank owned properties each year in low/mid-range price areas. Homes will be rehabbed by replacing or upgrading major mechanical systems and cosmetic finishes to insure a maintenance free of a home as possible for the first 10 years of ownership. Homes will be sold on a leaseback to buy, allowing homebuyers the opportunity to repair their credit and save for their down payment, or rented depending on market conditions.</p> <p>The benefits: On the front end, lending institutions that invested in Central Ohio in the past will be helped to reduce or eliminate Toxic Mortgages from their balance sheets. In the middle we will be creating jobs and providing much needed work for the trades and local small business companies including realtors, title companies, mortgage brokers, appraisers, home inspectors, suppliers, and property managers. All of whom in turn purchase other local goods and services. On the back end we will be providing affordable quality homes for the many families displaced by the Mortgage Meltdown. Neighborhoods will be revitalized eliminating blighted and vacant homes, reducing crime and vandalism, while stabilizing property values.</p> | O'Donnell Consulting Engineers | 100 | 0 to 30 days | \$8,300,000 |
| Franklin | Outreach Mobile Coach | This proposal may be categorized in the Energy & Environment, Workforce Investment Act. This proposed project solves the serious environmental problem of one million tons per year, creates jobs for 100 workers, and produces 100,000 lbs of wood and other useful products which save resources including wood and steel. It is proposed by a well established 25 year-old mechanical engineering firm and is based on proven technology. The process is repeatable to treat all available scrap tires generated in Ohio. | Mount Carmel Community Outreach | 21 | 31 to 90 days | \$200,000 |
| Franklin | Miscanthus Variety Evaluations for Ohio Renewable | Mount Carmel Community Outreach Mobile Coach has been delivering free medical services to the underserved and uninsured in Columbus since 1985. Our mission is to provide services for those in the community who are not receiving adequate healthcare due to a variety of barriers annually serving ~10,000. These barriers include joblessness, insurance, language and transportation. Often these persons find a visit to a Family Emergency Room is their only option for non-acute healthcare. Our services at each mobile clinic site include: 90 assessment of health education, treatment by a physician as needed, school and work physicals, immunizations for children and referral for on-going care from a family physician. As more and more immigrants and refugee families have made their homes in Columbus, we have established clinic sites in areas accessible to these families. The goal of the Medical Mobile Coach is to locate pockets of underserved people and partner with local organizations to provide for their immediate medical needs on site and also link these people with a medical home. The benefits of this service is providing needed medical care to people unable to pay for it and prevent them from utilizing the emergency department as a primary care provider. | Ohio Seed Improvement Association | 8 | 0 to 30 days | \$32,880 |
| Franklin | Miscanthus Variety Evaluations for Ohio Renewable | Miscanthus species are perennial grasses that hold great potential as a new renewable energy crop for combustion to generate heat and electricity. Research on Miscanthus species has been conducted in Europe, with little known research or evaluations conducted in Ohio or in the eastern corridor. In addition, this alternative crop has potential to be grown on marginal lands and soils which characterize the Appalachia region and other areas of Ohio. Small demonstration plot plantings of Miscanthus cultivars will be planted at the OSU facility. Growth and adaptation patterns of the cultivars will be monitored as well as invasive tendencies and biomass yields. Invasive species evaluations will be conducted in conjunction with a United States Department of Agriculture Natural Resources Conservation Service, researcher, from the East Lansing, Michigan office. Important variety comparison data will be collected regarding yield and winter hardy types. These perennial plots will also function as a learning lab for the Ohio Seed Industry, industrial and small and student interns from OSU. | Ohio Seed Improvement Association | 8 | 0 to 30 days | \$32,880 |

| Franklin | Computer Aided Dispatching (CAD) System | <p>The City of Columbus is in the process of replacing an antiquated computer aided dispatching (CAD) system that enables emergency medical response personnel to locate addresses. The current system is many years old and subject to numerous breakdowns.</p> <p>Pregnancy Care Connection (PCC) is a centralized scheduling system for prenatal care appointments for women who have Medicaid or are uninsured. The Council on Healthy Mothers and Babies (CHMAB) created this program in August 2003 in collaboration with five major hospital systems and has evolved to include scheduling for 17 different sites across Franklin County. By providing one number to call, women have easier access to prenatal care and are able to obtain a OB appointment sooner at a healthcare site most convenient for them. In its first 4 and a half years, PCC has successfully helped over 12,000 (unpublished) women obtain a prenatal care appointment. However, during these challenging times, both Medicaid enrollment and rates are on the decline in Franklin County. After serving an average of 2,200 per year, PCC's utilization is up 14% in the first six months (Aug-Feb) compared to the same time last year. Unfortunately, the City of Columbus faces that increased staffing and operational costs were recently eliminated. CHMAB is a crossroads where PCC program expansion is needed to meet the demand of pregnant women calling for an appointment.</p> | City of Columbus Public Safety Department | 12 | 31 to 90 days | \$7,000,000 |

| Franklin | Expediting Cases Involving Teen Offenders | Alumni Connection shall create and support the infrastructure for every Ohio law enforcement agency to inquire high school student's profiles. This includes current pictures, e-mail address, IP address, home address, telephone, mobile and other contact information. Unlike all other social sites, where teens create fictitious profiles which are impossible to identify the source, our program obtains real data for every Ohio teen. In addition, our program shall track every Ohio teen's fictitious accounts on other internet sites like MySpace, Facebook, YouTube and countless others, so law enforcement can place "real identity" on anonymous profiles with all other sites operate. The value of this infrastructure is immeasurable for Ohio's law enforcement agencies. From one's office, an investigating officer will be able to search thousands of teen profiles from their community and all neighboring communities. This tool allows for cases involving teen crime resolved expeditiously. | Alumni Connection.com | 27 | 0 to 30 days | \$3,850,000 |
| Franklin | Reinvestment and rescue of hospitality industry | Ohio's smoking ban has put many family owned hospitality businesses out of business. Private clubs have closed as well. A non-profit group composed of liquor permit holder associations (OLBA and BLPA) to oversee distribution of funds to save not only the businesses that have already closed and continue to fail, but the jobs that have been lost and continue to be lost. If the State of Ohio can pass a law that costs the state more money than it collects, a law that places Ohio's small businesses in jeopardy and potentially eliminates the economic spiral downward in Ohio, then Ohio can bail out those hurt by its law. (a law, by the way, that was passed by the legislature to harm the hospitality industry, remember?). The city of Columbus has faced a major influx of primary and secondary Somali immigrants. Majority of them are young people who have no housing management in place before their arrival. The local shelter board does not have the capacity to house them. In addition, there is a disproportionately higher rate of eviction in the Somali community. These people face multiple barriers including language issues and financial difficulty. The Somali Community Association of Ohio will provide housing support to these underserved families who do not have access to other resources. The Somali Community Association serves 250 people on a daily basis and has been in operation since 1996. The agency provides services throughout the State of Ohio. The project will benefit the most vulnerable families in the state. | Create new organization | 2500 | 181 days or more | \$10,000,000,000 |
| Franklin | Low Income Housing Support | Kids Come First: A Coalition Campaign for Child Care Kids Come First: A Coalition Campaign for Child Care Resources is a capital campaign for renovation and expansion of early care and education facilities. It includes child care centers in four of Columbus's most challenged neighborhoods and a learning campus to serve central Ohio's early childhood workforce and families. South Side Learning & Development Center will build a new center, Columbus Early Learning Centers will build one new center and renovate two others, and Action for Children will expand its facility to include a best practices lab and additional classroom space. Construction will be LEED certified. A Columbus Area Chamber of Commerce analysis shows that the centers will create 831 jobs. The campaign will produce 259 construction and construction support jobs. The Coalition, which employs 163 non-individuals, is committed to expanding programs and services to meet growing demand. The new centers and expanded facilities will create 60 new jobs. Action for Children provides training for 9,000 early childhood professionals annually and there is a waiting list. The facility expansion will allow it to train 10,000 early childhood professionals each year. Kids Come First: A Coalition Campaign for Child Care Resources is a capital campaign for renovation and expansion of early care and education facilities. The campaign includes child care centers in four of Columbus's most challenged neighborhoods and a learning campus to serve central Ohio's early childhood workforce and families. South Side Learning & Development Center will build a new center, Columbus Early Learning Centers will build one new center and renovate two others. Saving low income and at risk children, the centers are long-time anchors of stability in their neighborhoods. Accredited and recognized for their high quality, they provide full day, full year care. Action for Children will expand its facility to include a best practices lab and larger classroom space for professional development, which will allow the agency to accommodate a waiting list of early childhood professionals seeking required training for licensing and quality initiatives. Construction will be LEED certified. Kids Come First: A Coalition Campaign for Child Care Resources is a capital campaign for renovation and expansion of early care and education facilities. The campaign includes child care centers in four of Columbus's most challenged neighborhoods and a learning campus to provide services and the early childhood workforce in central Ohio with educational resources necessary for children's healthy development and school readiness. South Side Learning & Development Center will build a new center, Columbus Early Learning Centers will build one new center and renovate two others, creating increased capacity for children. Long-time anchors of stability in their neighborhoods, the centers will provide full day, full year care and are accredited and recognized for their high quality. Action for Children is the source for free or low-cost training for the region's diverse early childhood workforce, providing classes to support licensing requirements, career development, and participation in quality initiatives. | Franklin | Switchgrass Variety Evaluations For Renewable Biom | Biological utilization for renewable bio-energy is an emerging research and demonstration activity in many states. However, there is only limited new variety and seed production in Ohio. With respect to energy production, switchgrass as a crop sequesters carbon, therefore reducing atmospheric carbon-dioxide content. When compared to low grade coal, burning switchgrass for energy results in less harmful atmospheric emissions, such as various sulfur and nitrogen oxide pollutants associated with power plant coal combustion. This crop has potential for on-firing cool power plants and is adapted to marginal lands. Small demonstration plot plantings of the switchgrass cultivars will be installed at the OSU office. Growth, adaptation patterns and phenotypic traits of these cultivars will be monitored. These demonstration plots will also function as a learning lab for the Ohio Seed Industry, OSU student interns and potential energy firm end users of a renewable cellulosic biomass crop. Technology is not only a tool but also a discipline to be taught and learned. Part of our educational goal should be to prepare students to be successful citizens in a changing landscape that will increasingly depend on technological solutions to problem solving. We must teach students to meet the challenges in the everyday life of an information and technologically driven global community. Our such department can no longer be a pass and both department that is separate and only called in for repairs. The department must be involved in curriculum planning. The driving question should be "How can our department support the educational process?" We will begin with 2 new positions: technology support team leader and educational technology team leader. Every elementary, middle, and high school will have a wireless laptop lab (30 computers). The high school's lab will have 100 wireless laptops. Each classroom will have 2-3 computers. A technology specialist and an educational technology specialist will be housed in each of our 10 buildings. We currently have 17 staff. We will add 16. Salary and benefits for 20 staff members: \$1,670,000. Wireless laptop computers: \$3.5M. LifeCare Alliance would use stimulus funds for the creation of 5 new jobs to serve the medically indigent and underserved by providing mammograms and cancer screenings. LifeCare Alliance's Columbus Cancer Clinic program currently serves clients living in 30 Ohio counties. This project would purchase and staff a mobile cancer and mammography screening bus that would service clients that do not travel to offices. Butler, Coshocton, Cuyahoga, Delaware, Fairfield, Fayette, Franklin, Greene, Hancock, Highland, Hocking, Knox, Licking, Logan, Madison, Marion, Montgomery, Morrow, Muskingum, Pickaway, Perry, Franklin, Ross, Coshocton, Union and Columbus counties. In 2008, LifeCare Alliance provided cancer screenings and/or mammograms to 2,817 clients, 45% of which had household incomes below \$20,000 annually and an additional 22% of which had annual household incomes between \$20,000 and \$40,000. LifeCare Alliance will create a minimum of 20 new jobs by providing Meals on Wheels and/or home care support to the underserved and medically indigent people who have active cancer or HIV/AIDS. This project allows LifeCare Alliance to deliver meals to homebound/chronically ill clients 365 days a year and provide home care support. Home care support provides individuals living with active cancer medical supplies/equipment, medication, transportation to/from cancer-related medical appointments, and financial assistance for daily necessities such as housing and/or utilities. This project assists residents in Champlain, Clark, Delaware, Fairfield, Fayette, Franklin, Hancock, Hocking, Knox, Licking, Madison, Morrow, Perry, Pickaway, Ross, and Union counties. In 2008, LifeCare Alliance provided home care support services to 880 clients who were living with active cancer, 85% of which have an annual household income of less than \$20,000. In 2008, LifeCare Alliance also provided meals and food to 300 clients who are living with HIV/AIDS, 98% of which have an annual household income of less than \$20,000. Construction of 5,000 +/- square center wing to replace outdated, noncompliant modular classrooms located in urban low-income neighborhood in northeast Columbus. Project will entail green sustainable construction utilizing state of the art energy efficient building components and mechanical systems. Accredited daycare center serves children from ages 18 mos. to 12 from primarily low-income, federally subsidized families. Modular units are more than 15 years old and in need of replacement. Building addition will consist of 75 student classrooms, 10 classrooms and in-door play area, as well as expanded office and reception space. Improvements to be made to existing structure to increase energy efficiency as well. To provide energy efficient, sustainable improvements to existing shopping center in urban low-income neighborhood in Columbus, Ohio. Energy Efficient improvements are set of overall renovation project of 46,000 +/- facility. Total project costs include acquisition of space and existing supermarket. This funding would cover energy efficiency improvements, including installation of solar voltaic panels, insulation improvements, replacement of building mechanical systems with energy efficient equipment, including HVAC, electric and plumbing. As a result of improvements, a total of 64 new jobs to be created as vacant, below-standard commercial spaces are returned to full use and leaseability. 16 existing jobs to be retained under new management. Project sponsor is a nonprofit community development corporation spearheading redevelopment in the Mock Road community in northeast Columbus. | Ohio Seed Improvement Association | 8 | 31 to 90 days | \$28,960 |

|----------------|--|---|--|----------------|--------------------|---------------------------|
| Franklin | Homeless Grant Application | The McKinney-Vento Act broadened the definition of homelessness. Our district's homeless policy has been modified to reflect these changes. NECAE training states there are 5 principles for educators: 1. Do not stigmatize children in homeless situations. 2. Make schools a safe haven. 3. Think of the needs of the whole child. 4. Work with paraprofessionals to develop concrete goals and programs. 5. Reach out to the community. We anticipate 350 homeless students for the school year 2009-2010. We would like an additional counselor (\$85,000 salary & benefits). This will act as a school-friendly liaison and work with the district's homeless liaison. We will provide tutoring (\$20,000) furnish backpacks and supplies (\$10,000). We will assist with emergency purchases (\$10,000) pay school fees, extra-curricular fees, sports uniforms(\$2,000). We will also provide before and after school homework (district's extended day program - \$200,000). We will purchase an extended van for transportation and purchase bus passes or bus fares when necessary \$50,000. We also want to have professional development for our guidance counselors and secretaries \$5000. | Groveport Madison Local School District | 15 | 0 to 30 days | \$590,000 |
| Franklin | Product Support for Recycling, EE products | Supply products to support American Recovery and Reinvestment Act projects such as a. recycling containers b. electrical energy efficient items like ballast/tubul c. water conservation plumbing parts like toilets, valves, d. janitorial green items like Green Seal products, beam soap dispensers, e. ecologically friendly paper products f. mending systems for buildings g. Biodegradable liners. Smart McKinny Business (MBE), Edge and DBE certified company with State of Ohio contracts for electrical, plumbing, hardware, janitorial, safety and other products. | Direct Resource Inc.com | 1 | 181 days or more | \$500,000 |
| Franklin | Otterbein Lake Footbridge Project | Otterbein College and the City of Westerville seek funding to construct a permanent pedestrian bridge over Alum Creek to serve Westerville residents, the Oberlin community, and Cleveland Avenue businesses. This bridge will ensure that the new bike path through the park continues to function during the construction of a replacement bridge in Spring 2010 by Franklin County. A bridge placed south of and parallel to Main Street will provide the main pedestrian/bike connection to the Collegeview campus and Cleveland Avenue businesses during construction after the roadway bridge is replaced, the pedestrian bridge will offer safer passageway to students, residents, and cyclists. | Otterbein College | 40 | 181 days or more | \$1,000,000 |
| Franklin | Solar and Wind Energy Installation Project | Ohio EPA is interested in installing solar panels and a wind turbine on the roof of the Laramie Government Building. We plan to work with the building owner which will ultimately be the City of Columbus to complete this installation. As the State's Environmental Protection Agency this fits into our mission and will be a excellent opportunity to lead by example. | Ohio EPA | 20 | 31 to 90 days | \$300,000 |
| Franklin | Community Mental Health Center | Currently, my partner has a successful center in New Orleans, LA. We are a 5 day a week day program that offers a safe environment for people in the community who are suffering from psychiatric disturbances, such as: depression, bipolar disorder, or schizophrenia. Our program was created to serve as a prevention measure to prevent people from ending up homeless and in a mental hospital. It is also used as a step down, so when clients come out of the hospital, they have treatment center on an outpatient basis. We also offer services for locating housing (group homes, sober living, etc.) and assist with finding employment for clients. We also offer participation of services to and from the program. We offer individual, family, and group therapy sessions as well as medication management. The treatment team consists of psychiatrists, registered nurses, Therapists, and mental health techs. Currently, we have a waiting list of 100+ clients. Our 2009-2010 budget includes including much, much more than if you are already in the system. We are currently in the process of securing a new location with assistance from prevention and treatment is cost effective and critical to reducing legal system recidivism, welfare dependency, and long term cost to the criminal justice system. If new resources become available for Comdrug we propose the following: Expanded Services: Matter-expanding prevention services to teens - reducing dating violence. Women in Transition-increase the number eligible participants for program, Which helps addicted women recover, and assist with linkage and advocacy for healthcare, education and employment. Outpatient Counseling Services-increase the accepted number of referrals from the courts and Family and Children Services. Veterans Treatment Services-increase the number of vets seen in dual diagnosis outpatient treatment. Youth to Youth-expend prevention services to teens reducing the use of tobacco, alcohol, and other drugs. Partnership Opportunities include: Franklin County Courts, Columbus Health Department, Center for Child and Family Advocacy, Safe and Drug Free Schools Consortium. | Ohio Health and Wellness Center | 15 | 181 days or more | \$200,000 |
| Franklin | Statewide Advocacy Organization (Ohio) | NCATS is in need of Executive Director, as well as other key support staff. It requests to lead practices surrounding independent living programs. NCATS Board is very well trained in a number of peer-related groups and recovery issues which are always examined for outcomes as each group session is offered an anonymous survey to determine what the group members thought of the day. The survey and get client input so the cases can be re-evaluated to be the best that it can possibly be. Some of the many training courses are: NWRAP, Peer Support Specialist Training, Bridges, Advances Directives, ACT Certification, NAMI's Peer-to-Peer, in Our Own Voice, Speaker's Bureau, Suicide Prevention, Veterans PTSD and Trauma, etc. This is to train our Board, Board COATS, etc. We are currently in the process of securing a new location with assistance from prevention and treatment is cost effective and critical to reducing legal system recidivism, welfare dependency, and long term cost to the criminal justice system. If new resources become available for Comdrug we propose the following: Expanded Services: Matter-expanding prevention services to teens - reducing dating violence. | Franklin | Ventures | Ventures is a new pilot program to provide literacy, workforce readiness, and basic computing skills to out-of-school Somali youth here in Franklin County. The program is VWA funded by a performance based contract with our local WIA board and the ESC of Central Ohio is working with two partners highly respected in the large Somali community which has settled here: Asha Culture Center and the Somali Community Association. With small infrastructure improvements to the site (e.g. bathrooms made fully handicap accessible) we can assure that all persons from the community will be able to utilize the workforce and other training provided at a site which is in the center of the Somali community. | Educational Service Center of Central Ohio | 5 | 0 to 30 days | \$25,000 |
| Franklin | Project KEY | Following OUPDF guidelines by numerous County and city stakeholders, including the County Prosecutor, Juvenile Court, Children Services, MICA, Dept. Public Safety, Columbus Police, and many others, the ESC of Central Ohio entered into a performance based contract with the County Dept. of Job and Family Services to offer the program beginning in Nov. 2007. Foundation funding and in-kind contributions from the school district allow for rigorous evaluation of the program. In its first 6 months, KEY enrolled 100 students at 6 participating schools. The program involves a morning letter from the county Prosecutor, mediation with parents, community family based, an incentives program, which includes addressing attendance, monitor student attendance and provide linkage to community resources to help families overcome non-academic barriers to attendance. We are seeking to expand the program to include the additional 100 students who need to be served. KEY is an 8:30-10:30 AM program that runs for an hour and a half daily one day per week. The program is currently in its first 6 months. The total project cost we have is approximately \$1.1M. Through family investors we have already acquired \$350,000.00 and are ready to move forward in the near future. The community and the residents would greatly benefit from the rehabbing of these properties and after renovation it would generate larger property taxes for the state. | Educational Service Center of Central Ohio | 6 | 31 to 90 days | \$150,000 |
| Franklin | 1407-15 N 4th St Rehabilitation | Because of the lower income area the properties are currently in, lower rents will have to be charged for several years until more buildings in the area gets redeveloped. For this primary reason it no longer makes sense to attempt this project conventionally. After rehab the properties will have a total of thirty-four, two-bedroom units. Vacancy rates and turnover rates we expect to be high for the first four years. We expect after eight months of renovation and pre-letting, we will have approximately 50% average vacancy for four years. At an initial rent level of \$500 we will hope to gross \$8,500.00 a month. | Empire Real Estate Management Company | 4 | 0 to 30 days | \$750,000 |
| Franklin | Equal Justice Foundation Homelessness Prevention I | For almost 14 years the Equal Justice Foundation has represented low-income and disadvantaged persons who would not otherwise have access to the legal system. Over the last 10 years we have focused our efforts on representing homeowners who were victims of predatory lending, unfair and deceptive debt collection practices, and unlawful lending practices: the most common and devastating effect of these actions in Ohio is foreclosures. We have successfully worked to save the homes of hundreds of Ohio homeowners through litigation, mediation, education, and outreach and have actively participated in Save the Dream program. In order to continue saving homes for Ohio's citizens and to reach our goals, including to: (1) identify legal issues affecting homeowners; (2) develop model litigation addressing systematic and individual issues impacting homeowners; (3) develop outreach and education programs to empower homeowners and prevent the devastating effects of foreclosure; and (4) increase representation for low and moderate income homeowners, EJP seeks funding to retain our current attorney, hire additional staff, and pay for costs of outreach and education materials and litigation costs. | Equal Justice Foundation | 8 | 0 to 30 days | \$563,000 |
| Franklin | A Jump Start to Energy Efficiency and Conservation | State University is requesting stimulus funds to jump-start an already planned, but significantly underfunded building energy audit and campus energy efficiency improvement program which will eventually increase the energy efficiency of 900 ODSI buildings (32 million gross square feet) by 20%. The requested funds will enable the hiring of consultants for 2 years to perform energy audits, design building energy system retrofits and increase the quality of maintenance and operation of all energy systems. This work will leverage an initial \$3,400,000 in identified energy system repairs and retrofits, providing work for dozens of installers as well as business for manufacturers and their supply chains. The intent is to focus first on high payback projects and to use the resulting avoided annual energy costs to build a self-supporting revolving fund to finance the balance of the long-term energy program. Total Requester: \$4,664,000 Consulting Engineers: \$ 664,000 Design Consultants: \$ 600,000 Retrofits: \$ 3,400,000 | The Ohio State University | 65 | 31 to 90 days | \$4,664,000 |
| Franklin | Sponsorship program designed to make individuals w | A3 would like to create a venue for special needs children to obtain communication devices at an early age so that they can become self-sufficient by adulthood. Many special need family units are unable to become viable in the community because they do not have the resources and education to handle a special needs child full time. Communication more and more of our children are spoken with autism or cerebral palsy. However, if treated early and assisted with communication devices these children can become self-sufficient adults and many of our families will not have to rely on public assistance. A3 will maintain a staff that effectively solicits charitable contributions through sponsorship revenues and community participation to get these devices into the homes of those that need them most, thus creating a long-term cost saving effect for our federal, state and local government. | Autism Awareness Association "A3" | 12 | 31 to 90 days | \$500,000 |
| Franklin | Telecom Infrastructure in Rural Ohio | The building of telecommunications infrastructure in 14 rural communities that either have no competitive broadband facilities, or none at all. This project would create 15 jobs in Franklin County, and 50 jobs in various other counties. The jobs would be \$25/hour wage, full-time with healthcare benefits, etc. | Communications Options, Inc. | 65 | 91 to 180 days | \$3,500,000 |
| Franklin | Chabad House | From start, it would take about two years to complete the implementation of these broadband facilities in all of these counties. This new building will provide a 27,000 square foot education center serving 10,000-15,000 people on an annual basis. Our clients will include special education students, pre-school and school-age children, adults and businesses from the Greater Columbus metropolitan area. Two key programs offered will be LifeTown, a simulated town that provides life skills training for school-age special education students, and the Friendship Circle - providing innovative programming and creative activities for families with special needs children. Additional programming will include a Business Network, adult education classes, Day camp, Preschool, and community based services. We currently partners with Columbus Public Schools, providing a lifetime curriculum and access for their 700+ special needs students. With this new building, we anticipate offering this program to all of the Greater Columbus metropolitan area school districts and serving more than 1,000 students. There is only one other program of this type in the country and it is provided by our partner, the Friendship Circle, in Dassel, Michigan. | Schottenstein Chabad House | 80 | 31 to 90 days | \$2,000,000 |

| Franklin | Land Fill Gas (LFG) Capture and Reuse | This project proposes to design, fabricate and install a small commercial demonstration Pressure Swing Adsorption (PSA) facility within the landfill located in Gallena, OH. It will collect the landfill gas (LFG), upgrade it and transport the methane to an adjacent Columbus Gas pipeline. Some gas may be used by a local business offsetting conventional natural gas purchases. The PSA technology has been developed & patented by a 17 year old Dublin Ohio small business and has been commercially used in other commercial applications. Once the demonstration operation is successful we will establish a new Business Unit or spin-off company in Dublin which will aggressively license the technology (expect \$ 100-200 Mill of royalty revenue/year) and the business will sell ~ 200 LFG capture systems over 10 years. (\$ 3.7 million each) to the over 3000 USA landfills. The new Dublin business will generate ~ 175-200 Billion SCF/year of methane at these landfills. \$ 1.2 Billion in equipment revenue and eliminate 150-200 Million TPA of greenhouse gas generation (CO2 equivalents). If funded this LFG project will create 4,000 - 10,000 man years of jobs, mostly in Ohio, over the 10 year project. | Centennial Associates LLC | 400 | 31 to 90 days | \$2,000,000 |

| Franklin | Coworking Communities | Sandbox Communities, LLC is currently creating a coworking community in the downtown Columbus area and is looking to create additional coworking spaces throughout central Ohio. What is coworking? Coworking is an emerging trend and a new way to work. Typically, work-at-home professionals and entrepreneurs in the start-up mode are forced to work at home in relative isolation due to lack of capital, typically working out their home or at a local coffee shop with little to no resources. This approach while cost effective, often slows the growth of the start-ups both creatively and functionally. Coworking allows those same entrepreneurs to work independently in a collaborative and open community, have a professional office environment, create networking opportunities and a place to expertise and ideas, and networks that working from home cannot provide. Sandbox Communities will offer full-time, part-time, and daily membership rates, and large, bright open spaces will be carefully designed to inspire creativity, camaraderie, and most importantly, success. Dedicated workspaces, meeting spaces, phone, video conferencing and a plethora of the many benefits for entrepreneurs who are members of Sandbox. Developing new software to allow all Ohio Ohio and Central Task Forces to input and access case information across the state, enhancing their ability to identify criminals and criminal patterns, and solve crimes. | Sandbox Communities | 1000 | 91 to 180 days | \$750,000 |
| Franklin | Task Force Information Sharing System (TFIS) | | Ohio Task Force Commanders Association | 2 | 31 to 90 days | \$200,000.00 |
| Franklin | Chemical free water treatment for cooling towers | Install and service proven chemical free water treatment equipment on cooling tower systems. Garris LEED points. ISO- 9000 certified. | Chardon Laboratories, Inc | 100 | 0 to 30 days | \$2,445,000.00 |
| Franklin | On-line RN/BSN and Master's Programs | Mount Carmel College of Nursing will develop its current RNBSN and Master's Programs on line. Placing these programs on line will allow the college to make these programs available to RNs throughout the USA who want to improve their professional opportunities by becoming masters or masters prepared registered nurses. This masters prepared nurses will be prepared to enter many facility positions with a much desired level of education more registered nurses and alleviate a documents national nursing shortage. | Mount Carmel College of Nursing | 250 | 91 to 180 days | \$75,000.00 |
| Franklin | Hydrogen Safety Sensor Manufacturing Facility | NextTech Materials proposes to establish a sensor manufacturing facility for an advanced hydrogen safety sensor. This sensor products. Hydrogen is an integral part of many 21st-century advanced energy strategies. Whether the product of photovoltaic cells, wind-powered electrolysis, or the end-product of local information, or the fuel for distributed stationary or automotive fuel cells, hydrogen is a clean, lightweight, regenerable, non-polluting energy carrier. To make hydrogen storage and delivery infrastructure a reality, the safe and affordable hydrogen safety sensors must be available. Many sensor technologies have been identified for detecting hydrogen in a safe environment, but they are too slow to respond, too slow to recover, or too expensive for widespread adoption. NextTech's hydrogen safety sensor overcomes these shortcomings and is poised to take a leadership position in this emerging market. The proposed facility will be capable of meeting the market demand for hydrogen sensors, and support other sensors currently under development at NextTech. | NextTech Materials | 40 | 31 to 90 days | \$2,000,000.00 |
| Franklin | Military Purpose Solid Oxide Fuel Cell Power Gen | Demand for electrical power by the U.S. military increases each year as enhanced communication and warfighting capabilities are implemented. However, it is increasingly difficult to consider larger, heavier or more expensive power systems to accommodate these new mission capabilities. Solid oxide fuel cells (SOFCs) offer a promising option to meet this growing demand. SOFCs have potential to provide quiet power at high specific power density while operating on an auto-oxidizing military logistic fuels (JP-8). Multiple branches of the military has been evaluating SOFC technology for mission critical applications such as battery chargers, vehicle auxiliary power for silent watch, tent city combined heat and power, and primary power for unmanned air, land and sea vehicles. Successful development and deployment of SOFC power systems will enhance warfighting capabilities for all military branches. In this project, two Ohio-based fuel developers, NextTech Materials and Battelle, will collaborate on the development of military power generators. This project leverages the enabling SOFC stack developments of NextTech and the system integration expertise of Battelle. The project | NextTech Materials, Ltd | 50 | 31 to 90 days | \$7,000,000.00 |
| Franklin | 5-MW Solid Oxide Fuel Cell Manufacturing Plant for | NextTech Materials proposes to collaborate with The Ohio State University, Hooking Technical College and other Ohio-based manufacturers in a commercialization project aimed at manufacturing planar Solid Oxide Fuel Cells (SOFCs) and testing of stacks made using the manufactured cells. The project team also includes a committed end user, a Fortune Global 500 company. During the project, NextTech will procure and install equipment for an SOFC manufacturing facility designed for production of 5-MW capacity of low cost, high quality ceramic fuel cells. This facility will produce large area cells for large (100-100) stationary power systems, and small area cells for the military, small aircraft, and other transportation markets. Ohio State will contribute stack modeling aimed at improving mechanical robustness and normal cycling capability. An SOFC testing facility will be established at the Hooking College Energy Institute to support long-term testing of stacks made at NextTech. | NextTech Materials, Ltd | 20 | 31 to 90 days | \$5,000,000.00 |
| Franklin | High Powered Air and Gas heaters for Solid Oxide F | Several important key players in the development of SOFC have made tremendous progress in building prototypes. MHI is keeping pace with these developments by designing, researching, and developing the specialized heating systems for their catalytic and anode heating requirements. As a result, MHI has become one top suppliers and product developers for the SOFC technical community. MHI is developing funding to subsidize the purchase of high powered heaters for OEM companies developing and manufacturing large SOFC. The subsidy will allow OEM developers to purchase MHI customized pre-heaters at a reduced cost. Ohio has over 100 companies and universities working on the development of fuel cells, and the number is growing. MHI anticipates there will be an increased demand of AirHeater™ systems for industrial and commercial installations within the next 2-5 years. This growth will require an investment in the expansion of MHI's manufacturing facilities as well as additional skilled labor to address our needs for standard and custom solutions. | Micropyretics Heaters International, Inc. | 10 | 31 to 90 days | \$750,000.00 |
| Franklin | Low Pressure Hydrogen Storage Utilizing Agglomerat | For over 47 years Howard Industries, Inc. has been providing contract service to the chemical and catalyst trades. Our services include but are not limited to: catalyst formulation and manufacturing, materials blending, particle size reduction, surface treatments and high temperature operations. By developing a collaborative effort and working closely with The Chemical Engineering and Materials Science at The Ohio State University, Howard Industries will be able to utilize its pilot and semi-works facility in conjunction with the OSU Graduate Student program. | Victory Farms | 3 | 31 to 90 days | \$165,000.00 |
| Franklin | Urban ScoutReach | In Franklin County youth under age 18 accounts for the following crimes: *39% of all motor vehicle thefts *15.2% of all burglary's *26% of all weapons crimes *24.6% of all stolen property (FB) Two thirds of these individuals are African American youth. (CRP) The safety of our local communities is impacted. Many of the youth who do not receive positive alternatives during their adolescence run the risk of being admitted to correctional facilities. Scouting makes a difference: The Urban ScoutReach program in Columbus, Ohio addresses this need by providing important adult mentoring and character building programs for at risk minority youth that reside in the inner city of Columbus. Currently there are 900 at-risk youth participating in the Urban ScoutReach program. Outcomes: The Urban Scoutreach program will provide 80% of all participants with the following Developmental Assets: *Drug and alcohol resistance skills *Supportive adult relationships *Family bonding activities *Positive character and values *Community service learning | Simon Kenton Council, Boy Scouts of America | 4 | 31 to 90 days | \$50,000.00 |
| Franklin | Substance Recovery Program for Women with Chemical | The project includes a new facility for outpatient treatment focused on AOD recovery as related to women with both substance abuse/addiction diagnosis and legal issues/ FCCS involvement. The project would include hiring 20 new Licensed Professional Counselors/Licensed Independent Social Workers who specialize in addiction counseling as well as other staff for OED/informal education, life skills training, case management, transportation, and crisis personnel. The project is aimed at promoting higher quality of life for women who have been in the legal systems, building prepost-secondary educational opportunities. The goal is to promote family reunification, as well as continued care that assists clients beyond their initial recovery as a long term outpatient support system. | Counseling, Ltd | 20 | 0 to 30 days | \$9,100,000.00 |
| Franklin | An Advanced Energy Database of Expertise, Programs | The University Clean Energy Alliance of Ohio (UCEAO) seeks funding for collection of information to populate a comprehensive database of information on advanced energy research in Ohio. The database will include faculty expertise in energy research, curricula and degree programs focused on alternative energy, facilities and equipment used in energy research, and institutes with a programmatic focus on energy policy and technology. This database will assist in the attraction and retention of talented students, and will enhance the ability to grow and expand energy-related businesses. The Ohio Department of Development has shown a strong interest in the project. UCEAO is also engaged in discussions with Ohio Board of Regents on a partnership whereby the database would be hosted by OEDOR and would serve as a template for similar information for other disciplines. Each UCEAO member university is committed to the project, and will be responsible for collecting, posting and updating complete and accurate information in a timely manner. The ability to dedicate resources to that effort will facilitate and expedite completion of the project. | University Clean Energy Alliance of Ohio | 15 | 0 to 30 days | \$375,000.00 |
| Franklin | Champion Inner City Youth Program | Help students pass the Ohio Graduation Test (OGT) to complete graduation requirements needed in order to obtain a job. Provide students a safe haven in troubled neighborhoods that have recently been impacted by major reductions in recreational centers budgets. The Champion Inner City Youth Program will recruit instructors and volunteers from professional organizations. Experiential knowledge and resources will be sought to provide students with greater access to academic learning and career opportunities. Instructors will be recruited in the areas of reading, math, science, computer technology and basic job skills. These classes will give participants the pre-occupational skills needed for their career interests. Participants will be required to complete weekly hands on training projects. The Champion Inner City Youth Program will provide incentives for students as they achieve individual milestones. Each milestone will be documented in the student's individual career plan in | The Champion Inner City Youth Program | 8 | 0 to 30 days | \$375,000.00 |
| Franklin | Quality Management Software Development | CallCopy is one of the fastest growing companies in the call recording / quality monitoring industry. Our momentum is fueled by successful installations and satisfied clients. As the range of industries we serve continues to expand, our solution suite will grow accordingly. We are always evaluating new technologies that will provide greater efficiencies to the users and administrators of our systems, and our business development team is finely tuned to the ebbs and flows of the markets we serve. Our goal is not to provide software - our goal is to deliver solutions. We believe the changes are taking place faster than we can keep up without additional funding. Our 2 biggest competitors (both listed companies) have or working on the following items for their system: Speech Analysis, Call Accounting, Workforce Management, and Call documentation. We believe this will create numerous of jobs right here in Columbus, OH. | CallCopy, Inc. | 35 | 91 to 180 days | \$250,000.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Franklin | Employment and Training Assistance for the Spouses | When members of the Ohio National Guard are deployed to active duty, their active service pay is often significantly less than what they are paid in their civilian jobs. This often forces spouses - primarily women - into the workforce without the skills to obtain jobs that offer family sustaining wages. As a result, the service of Guard members to Ohio and their nation often requires additional family sacrifices. We provide training that helps veterans improve their employability. While we currently work in partnership with the Ohio National Guard to provide employment and training assistance for Guard members, there are no programs - or funding for programs - that support military spouses. We offer to provide training that will improve the employability of military spouses so that they can adequately provide for their families. We also will act as brokers with employers to help them feel comfortable with hiring military spouses. | AMVETS Career Center | 50 | 31 to 90 days | \$50,000.00 |
| Franklin | Employment and Training Assistance for Older Veteran | About 15% of the Ohio workforce consists of military veterans. With the downturn in the economy, this has resulted in thousands of veterans over the age of 40 who have lost their jobs. While there are some federal programs that provide retraining assistance for veterans, the sheer number of unemployed veterans has outstripped the available funding. As a result, veterans who formerly served their country are facing additional family sacrifices during this recession - unable to feed their families or pay their bills. We are "veterans helping veterans" who provide training that helps veterans improve their employability. We also help veterans obtain civilian licenses and certifications that document skills they learned in the military or on previous jobs. When needed, we provide the "gap filling" training to ensure the employability of veterans. We also act as brokers with employers to help them feel comfortable with hiring veterans. Our work often is done in partnership with other programs, such as US Department of Labor grants to the state of Ohio. | AMVETS Career Center | 75 | 31 to 90 days | \$100,000.00 |
| Franklin | Employment and Training Assistance for Returning M | When members of the Ohio Army or Air National Guard return from deployments, they often find that the job they left behind no longer exists - because of the economy or because the employer filled the position. For jobs that were legally filled by employers, Guard members have access to USERRA legal action, but that process can take years. In the meantime, they have bills to pay and families to feed. We work with the Ohio National Guard to provide training that helps members improve their employability. We help them obtain civilian licenses and certifications that document skills they learned in the military. We also act as brokers with employers to help them feel comfortable with hiring Guard members. While we work in partnership with the Ohio National Guard, the services we provide are not paid for by the Ohio National Guard can provide current needs of unemployed members of the Ohio National Guard have outstripped the available federal and private sector funding. Because of their military service, veterans usually have less seniority than other employees of civilian companies. As a result, their services their nation often requires additional family sacrifices during economic down turns. | AMVETS Career Center | 150 | 31 to 90 days | \$75,000.00 |
| Franklin | Employment and Training Assistance for Veterans wh | We provide training that helps veterans improve their employability. We also help veterans obtain civilian licenses and certifications that document skills they learned in the military. When needed, we provide the "gap filling" training to ensure the employability of veterans. We also act as brokers with employers to help them feel comfortable with hiring veterans. Our work often is done in partnership with other programs, such as US Department of Labor grants to the state of Ohio. However, the current need of unemployed veterans has outstripped the available federal and private sector funding. | AMVETS Career Center | 150 | 31 to 90 days | \$90,000.00 |
| Franklin | Employment and Training Assistance for Newly Separ | Recently separated veterans (less than one year) as a category, have unemployment rates that are significantly higher than reported unemployment rates. This is caused partly by the "language gap" between military and civilian terminology and partly by the fact that many veterans do not have the civilian skills employers need. We provide training that helps veterans translate their military experience into terms employers understand. We also help veterans obtain civilian licenses and certifications that document skills they learned in the military. When needed, we provide the "gap filling" training to ensure the employability of new veterans. We also act as brokers with employers to help them feel comfortable with hiring veterans. | AMVETS Career Center | 250 | 31 to 90 days | \$75,000.00 |
| Franklin | Drug Court | We are want to expand the drug court to serve more clients and need to hire a part-time (at least 20 hours per week) case management specialist to provide services and linkages to our target population. We currently have one fulltime Coordinator and another staff member available for only 12 hours per week. Programmed veterans understand due to lack of "hands on" work. We want to provide to the field using drug screens and breathalyzers randomly at least 1 per week per participant with a cap of 50 participants. Additionally, we want to coordinate public job and housing fairs for our participants in the community with employers willing to hire non-traditional workers willing to hire to ex-offenders. We have excellent treatment providers in Franklin Co. but our needs remain in the area of case management services. As the regional planning unit for Franklin County, according to ORC Section 5502.02, OHS&J will be administering the above funding to local recipients who apply for and need the guidelines of the solicitation. Our office will be administering the funding in accordance with the VAWA guidelines per form by the VAWA Reauthorization Act of 2000. The Office on Violence Against Women and the Office of Criminal Justice Services. The VAWA funding will be provided to units of local government or non-profit, victim service providers for the purpose of promoting a coordinated, multi-agency approach to enhance services and advocacy to victims, improve the criminal justice system's response, and promote effective law enforcement, prosecution, and judicial strategies to address domestic violence, dating violence, sexual assault, and stalking. Please note the number of jobs that will be created or retained is currently at 0. The applicants applying under OHS&J's open, competitive solicitation will be required to submit an application on this website where they will report their job as it relates to their individual programs. | Franklin County Common Pleas Court | 4 | 0 to 30 days | \$50,000.00 |
| Franklin | Violence Against Women initiatives Throughout Fran | As the regional planning unit for Franklin County, according to ORC Section 5502.02, OHS&J will be administering the above funding to local recipients who apply for and need the guidelines of the solicitation. Our office will be administering the funding in accordance with the VAWA guidelines per form by the VAWA Reauthorization Act of 2000. The Office on Violence Against Women and the Office of Criminal Justice Services. The VAWA funding will be provided to units of local government or non-profit, victim service providers for the purpose of promoting a coordinated, multi-agency approach to enhance services and advocacy to victims, improve the criminal justice system's response, and promote effective law enforcement, prosecution, and judicial strategies to address domestic violence, dating violence, sexual assault, and stalking. Please note the number of jobs that will be created or retained is currently at 0. The applicants applying under OHS&J's open, competitive solicitation will be required to submit an application on this website where they will report their job as it relates to their individual programs. | Franklin County Office of Homeland Security & Just | 0 | 0 to 30 days | \$586,165.20 |
| Franklin | Central Ohio gridSMART Initiative | AEP Ohio proposes to initiate Phase 1 of a multi-year smart grid initiative (gridSMART) in communities in the Central Ohio area. This initiative will be substantially completed between 2009 and 2011 and will include more than 100,000 customers at a cost of approximately \$100,000,000. Of this amount approximately 50% (\$50,000,000) will be received by AEP Ohio per an order issued on 3/15/09 by the Public Utilities Commission of Ohio. The gridSMART initiative will include the installation of advanced metering and Home Area Network (HAN) technology that together will allow customers to receive and respond to real time price signals in order to control their overall energy usage. It will also include Distribution Automation (DA) which will allow improved service reliability. The gridSMART initiative which ultimately could cost \$1 billion could include 1.5 million customers in the next 10 years, will provide many benefits to Ohioans. These benefits include energy conservation and the associated savings and improvements to the environment, improved reliability, job retention and job creation. AEP Ohio will be seeking \$54,500,000 from the U.S. DOE. | American Electric Ohio (AEP Ohio) | 500 | 0 to 30 days | \$54,500,000.00 |
| Franklin | Rehab Columbus Now | This proposal is to create housing options for low income renters in the inner city of Columbus the funds will be used to create housing, including renovating abandoned apartment buildings that are currently havens for drug dealers and vagrants. This grant will produce outcomes that will provide housing for 100 families. The renovations of the housing marketplace are deep and broad. The crisis touches affluent areas, not just middle- or low-income neighborhoods. It reaches across property lines from those who took out the high-rate, high-risk loans to those whose mortgages have been paid off for years. Renters are just as vulnerable as those who signed the promissory note at the bank. | Recoverlove INC | 100 | 0 to 30 days | \$2,000,000.00 |
| Franklin | Homeless Project | This proposal is for providing housing two meals a day for homeless men the goal is to provide services for 100 homeless men. The cost to society of caring for some is huge. There are chronically homeless men who are studied over a five-year period. Collectively they spent 15,000 nights in jail, were arrested 837 times a year, underwent jail bookings 433 times, and made 155 ambulance calls. This cost taxpayers \$2.6 million. Eight of the 30 men were moved to apartments for 18 months. The costs decreased 57 percent. | Recoverlove INC | 20 | 0 to 30 days | \$500,000.00 |
| Franklin | Homework Help Centers | The mission of the Columbus Metropolitan Library is to promote reading and guide learning in the pursuit of information, knowledge and wisdom. The vision of the Columbus Metropolitan Library is a thriving community where wisdom prevails. The Homework Help Centers at the Columbus Metropolitan Library are one of our key programs and services that will help ensure our vision becomes a reality. | Columbus Metropolitan Library | 12 | 31 to 90 days | \$160,000.00 |
| Franklin | Main Library Remodeling | We currently have Homework Help Centers in 15 of our locations. We are working toward adding Homework Help Center in the remaining 6 locations. This request would fund 3 of the 6 remaining centers we hope to build. The mission of the Columbus Metropolitan Library is to promote reading and guide learning in the pursuit of information, knowledge and wisdom. The vision of the Columbus Metropolitan Library is a thriving community where wisdom prevails. The Main Library, our flagship facility, is central to the delivery of our mission and the achievement of our vision for the community. Funding of this project would support infrastructure, efficiencies and service enhancements to the community. | Columbus Metropolitan Library | 10 | 91 to 180 days | \$1,300,000.00 |

| Franklin | Women's Resource Center | We would like seed money to establish a Women's Resource Center in Columbus, Ohio. The center would be dedicated to providing services to women that are designed to uplift & empower them in their relationships with themselves, with their loved ones, & within their communities. The services offered would focus on a balanced approach to life, holistic (mind/body/spirit) wellness, supplemental education/training, & career/therapy/relationship resources. Some examples are: career/success coaching, career closure, relationship coaching, individual/personal coaching, fitness/yoga/health coaching & instruction, financial/business support, women's leadership, personal worth/empowerment/identity/boundaries, improved communication skills, etc.). motivational speakers, stress reduction & support (acupuncture, cranial-sacral therapy, guided visualization/meditation, yoga, anger/trauma/trauma), & a general community resource/center for women's needs - as the needs/complexities of women are very unique and are not adequately addressed or represented in the area. Sealing bypasses (cracks, gaps, holes), especially around doors, windows, pipes that penetrate the attic ceiling, and other areas with high potential for heat loss, using caulk, foam sealant, weather-stripping, window film, door sweeps, electrical receptacle gaskets, and so on to reduce infiltration. Protecting pipes from condensation and freezing Installing boiling drains, foundation waterproofing membranes, interior perimeter drains, sump pump, gutters, downspout extensions, downward sloping grading, and other techniques to protect a building from both surface water and ground water. Providing proper ventilation in unconditioned spaces to protect a building from the effects of condensation. See Ventilation issues in houses Installing roofing, building wrap, siding, flashing, gables or solar tubes and making sure they are in good condition on an existing building. Sealing treatment in walls, floors, and ceilings, exterior doors and pipes, around water heaters, and near the foundation and Installing storm doors and storm windows. Replacing old drafty doors with tightly sealing, foam-core doors. | Women's Resource Center for Wellness & Empowerment | 25 | 31 to 90 days | \$208,000.00 |
| Franklin | Energy Saving Ohio | This proposal is to provide 30 three bedroom affordable housing units in Columbus Ohio. The need for affordable housing is a serious and growing concern that has to be addressed with a concerted effort through local and federal funding. If we are to provide families with homes the best place to act today and invest for the future is in the city of Columbus. One of the greatest challenges in building strong cities is the 21st Century City to build stronger, safer neighborhoods. These neighborhoods are the lifeblood of our cities, where families live, work and play, and a top priority in maintaining the quality of life to increase housing availability and address the need for affordable housing. In this proposal we offer a real plan for and additional 30 three bedroom housing units for families in Columbus. The additional housing units will all come from existing brownfield, distressed and/or abandoned properties | Recoverlove INC | 50 | 0 to 30 days | \$2,000,000.00 |
| Franklin | New Life half way house | We envision a substance abuse program that is based on spiritual foundations and targeted at persons who might otherwise be sent to prison for drug related crimes. The program would consist of a three phase approach that would create responsible, crime free and drug free societal re-integration. The program will promote productive and success oriented behavior providing a reality based response to the sensationalized myths of street life and drug culture. The logic behind this treatment concept stems from the fact that it is more cost effective for the state of Ohio to treat addicted individuals than it is to incarcerate them. | Recoverlove INC | 15 | 0 to 30 days | \$500,000.00 |
| Franklin | Housing for Columbus Ohio families | This proposal is to provide 30 three bedroom affordable housing units in Columbus Ohio. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--------------------------------|----------------|--------------------|---------------------------|
| Franklin | Kokosing Project | This project would restore and retain 3.3 jobs and would reduce PM 2.5 and NOx emissions in the non-attainment counties of Hamilton, Franklin and Cuyahoga by re-powering Tier0 and Tier1 Catalyst construction equipment with certified Tier3, Tier2 or Tier1 upgrade engines. In total, this project would remove 1,488.8 tons of PM 2.5 and 16,532.0 tons of NOx in a five year period. Over the next five years, the average cost per ton of PM 2.5 removed from our air will be \$1548.47, and the average cost per ton of NOx removed from our air will be \$92.55. | Ohio CAT | 3.3 | 0 to 30 days | \$1,125,000.00 |
| Franklin | TBI Network | The TBI Network at Ohio State University has been serving persons with substance abuse and TBI for almost 20 years. A new supported employment program has proven effective and could serve 50 individuals per year, but is in jeopardy due to cuts in funding for both vocational rehabilitation and alcohol and other drug services. This program has proven effective for hard to treat populations including those with psychiatric problems, criminal justice involvement and veterans. Expected outcomes is to obtain sobriety and employment for an individual with co-occurring substance abuse and traumatic brain injury. | TBI Network | 2 | 0 to 30 days | \$98,000.00 |
| Franklin | Energy Recovery from Laundromat Driers | The effluent from the driers in a laundromat (or hotel or hospital) is hot and moist, and is therefore full of energy. Part of this energy can be recovered by passing the hot air through a heat exchanger that pre-warms the incoming air. Preliminary heat exchanger designs have been developed that either require manual cleaning to remove the accumulated lint, or are self-cleaning. Both types were designed such that they would be easy to build as prototypes. No modifications to the drier itself are needed. The project would be done in two stages. In stage one, both self-cleaning and manually cleaned single drier prototypes would be built and tested under controlled conditions in our labs. The better unit would then be adapted to serve a laundromat and installed at a local establishment where it would be field tested. Suitable reports would be written at the end of the project. | BEA Ltd. | 2 | 181 days or more | \$115,000.00 |
| Franklin | The Empowerment Project | The Empowerment Project will provide training, mentoring and guidance to 200 at risk youth and will focus on participants becoming successful small business owners. This program will serve to empower participants to achieve economic self sufficiency. It is expected that this program will reduce the number who would otherwise become reliant on social services for their livelihoods and will serve to increase livelihood for the City of Columbus. Participants will learn business skills such as: strategic planning, marketing, sales, operations, financing, management, etc. It is estimated that graduates will collectively earn \$4 million dollars a year in income. In addition to the 200 participants who will become local small business owners, it is estimated that 50% of these entrepreneurs will employ an additional 1-4 employees within the first 5 years of business, or approximately 200 employees. | LUC Enterprises LLC | 400 | 181 days or more | \$325,000.00 |
| Franklin | co-occurring psychiatric and substance use disorder | The outcome that will result as this program is implemented will be the creation of 200 jobs and the ability to serve 100 clients. The goal of this proposal is to provide treatment for persons who have a severe mental disability as well as a diagnosis of substance abuse and/or dependence. The program will adopt major characteristics of proven mental health and substance abuse treatment methods and pair them with characteristics with components of integrated treatment including: Motivational enhancement Readiness to change approaches Counseling/Support Long-term and comprehensive interventions | Diffinies Group Home | 200 | 0 to 30 days | \$2,000,000.00 |
| Franklin | women who are victims of violence | This proposal will create 20 jobs and serve 200 women the focus will be on women who are victims of violence by domestic violence issues. The primary goal of this proposal is to enhance the quality and availability of treatment for those who are victims of violence and women who suffer with the disease of addiction. There are many positive and beneficial outcomes that this initiative will inevitably produce including: 1. Safer lives 2. LESS CRIME 3. LESS PRISON CROWDING 4. FEWER BROKEN FAMILIES 5. LESS WELFARE & SOCIAL SERVICES 6. ABILITY TO TREAT MORE PEOPLE EFFECTIVELY 7. CREATING PRODUCTIVE MEMBERS OF SOCIETY | Columbus Area INC | 20 | 0 to 30 days | \$1,500,000.00 |
| Franklin | Art that works | This proposal will create 20 jobs and serve 200 clients in the first year of operation through the use of art therapy. Art therapy integrates the focus of human development, visual art (drawing, painting, sculpture, and other art forms), and the creative process with models of counseling and psychotherapy. Art therapy is used with children, adolescents, adults, older adults, groups, and families to assess and treat the following: anxiety, depression, and other mental and emotional problems and disorders; substance abuse and other addictions; family and marital issues; abuse and domestic violence; social and emotional difficulties related to stability and illness; trauma and loss; physical, cognitive, and neurological problems; and psychosocial difficulties related to medical illness. Art therapy programs are found in a number of settings including hospitals, clinics, public and community agencies, wellness centers, educational institutions, businesses, and private practices. | Recoverlove INC | 20 | 0 to 30 days | \$750,000.00 |
| Franklin | Federation for the Academic and Athletic Developme | The project requires the building of an athletic and academic facility to better prepare youth and young adults for college and beyond. The program will also address issues within the adult population in attempt to bring about a resolution. The facility of persons who work during after school hours contribute significantly to delinquency and academic underachievement of students who require additional assistance to achieve good to excellent grades. This problem especially affects minority populations which is the target of this project. The goal of this project is: 1. Mentoring program for youth and young adult athletes 2. Reduction in identity, drug use and violence 3. Academic and athletic preparation of youth and young adults for college and beyond 4. Preparation of youth to transition into leadership positions in their respective communities The inability of youth to achieve academically leads to crime and violence. However, the influence of sports has elevated many to become productive citizens. This facility will serve approximately 1000 youth and young adult males and females ages 5-19 offering an environment designed to meet academic needs and athletic aspirations. | Tri-Village Soccer Association | 70 | 181 days or more | \$5,000,000.00 |
| Franklin | To stimulate the academic success of franklin Coun | PREPS TO SCHOLARS, established 2009, is a 501(c)3 non-profit student/athlete educational tutoring and mentoring facility that is a realization of James L. McGuire, now the Executive Director of the organization. The goal of PREPS TO SCHOLARS is to help and educate some student/athletes that are not currently reaching full academic potential in the classroom. The vision of McGuire has been embraced by the communities and school districts in the region. Students will focus on academic achievement, Ohio Graduation Test (OGT) requirements, college entrance exams, and NCAA eligibility regulations to gain admission to secondary educational institutions. Students will also gain skills in time management, leadership, and work ethic while participating in PREPS TO SCHOLARS. PREPS TO SCHOLARS will help and develop each participant's skills to take on the collegiate adventure and succeed. The PREPS TO SCHOLARS curriculum is driven by post-secondary enrollment options and requirements set forth by the NCAA. | Preps to Scholars | 10 | 0 to 30 days | 150,000 |

| Franklin | Purchase of Equipment and Consultant Fee For NIBRS | Perry Township is a Police Department that serves areas between five major metropolitan areas: Columbus, Dublin, Worthington, Upper Arlington and Delaware County. The sole financial support for Perry Township is limited to levies. As a township, growth is either stagnant and improvements to the department have been lacking. Smaller grant funds have been funneled into a larger network that we can no longer access. As our continued use of the LEOT CIBRS reporting software continues, and the LEOT CIBRS reporting software becomes more enhanced with additional features, our officers continue to have more arrests. The use of a Car Digital Video Camera would serve to additionally document all officers CIBRS based offense reports. One such example would be the documentation of an O.V.I. arrest and the subsequent Field Sobriety Tests. Perry Township however does not possess an internal person to provide installation for the In-Car Camera and Perry Township does not have an internal person to provide server support in the event of a catastrophic failure to the server, which provides access to the LEOT CIBRS software and also houses the Database for our CIBRS reports. | Perry Township Police | 24 | 0 to 30 days | 12,800.00 |
| Franklin | Mobile HealthCare, Wellness & Testing | As stated previously this is a mobile wellness, health care and comprehensive testing program designed for senior communities, assisted living facilities, group homes, nursing homes, senior groups/centers, etc. The mobile vans will take the testing machinery to where it is needed to serve the population. The number of vans capable of being built from one unit is being set to only 1200 vans. Additional data is available on request. The governor says that he wants a program to lower health care costs and this is exactly the reason this particular program was developed. Please go to the original request you said would not fit into your programs for additional information and descriptions. This is just as needed in our community as every one of the other programs you are going to fund. Based on our governors comments re health care, you really do need to reconsider this request more favorably. Thank you. | ProActive HealthCare, Inc. | 15 | 91 to 180 days | 1,500,000 |
| Franklin | MR/DD Community Enrichment | MR/DD (Mental Retardation and Developmental Disability) individuals. Your donation would have a direct impact on these individuals' lives in ways that are indescribable. We would like to provide enrichment opportunities for adult MR/DD Day Habilitation consumers with Hearts of Hope Institute. Many adult MR/DD individuals are being deprived of these opportunities because of a lack of transportation. In order to accomplish this goal, we would need to purchase handicap accessible vans (2) meeting our accommodation goal of 10 MR/DD consumers per event. These opportunities will provide educational activities that will improve skill & motor building, exposure to the community, reduce positive behaviors and improve health conditions. We have a plan that can be executed easily but only barrier is the lack of funding. The only expenses we have accounted for in this request would be direct costs for the purchase and use of the vehicles. The funds will afford Hearts of Hope Institute the opportunity to reach further into the community. | Hearts of Hope Institute | 4 | 0 to 30 days | 65,000 |

| Fulton | Proper Tree Care | We are a convenient online source to connect residential, commercial, municipal, and utility consumers with professional tree expert companies in their service areas. We provide the consumer who does not know who to turn to for their tree care needs the name of those companies in their area. We provide the tree care companies names of individuals and/or projects who require their services of whom they may not otherwise be aware. Funds will be added to promote tree care and increase work for local companies. We work with companies who stress services to provide health and maintenance of trees, but will provide removal if necessary. Outcome: by connecting consumers with proper tree care companies we can save trees which are an integral part of our environment. We will be creating sustainable, long-term income by connecting consumers with local companies who promote ongoing maintenance of the consumer's trees within their landscapes. This will provide us only current business opportunities but opportunities for many years to come. | TreeEstimate.com | 50 | 0 to 30 days | \$250,000 |
| Fulton | Connecting Businesses and Individuals to grow Loca | www.TheFingertipList.com is an online locally local free directory (based on areas within counties) for the purpose of connecting local businesses with consumers. We provide an opportunity for full-time professionals, part-time workers, stay-at-home parents, or displaced workers to start their own business or offer a service and network locally through their local community. We provide opportunities for local economies to grow and develop by making people aware of the services and products available locally. We provide an opportunity for consumers and business people alike to connect via forums, networking opportunities. Outcome: increase of sales, local community growth, increase tax revenues both locally and statewide, encouragement of entrepreneurial spirit and a reduction in business closings. Networking, education, community involvement, job opportunities. | TheFingertipList.com | 1,000 | 0 to 30 days | \$1,200,000 |

| Fulton | Replacement windows | Replacement of 20 windows in a building built in 1973 to increase energy efficiency and decrease heating and cooling costs. Program provides services for individuals 0-2 and adult and their families with developmental disabilities. 7 windows measure 32" x 63 1/2" 22 windows measure 41" x 63 3/4" Local contractor(s) would be used for this project thus retaining jobs locally for those are contracted for the project. | Fulton County Board of Developmental Disabilities | 1 | 31 to 90 days | \$30,250 |
| Fulton | WPD Patrol Car Request | This project is the replacement of three patrol cars. Currently the Wauaseon Police Department consists of 14 full time, 4 part-time, and 10 auxiliary officers. In 2008, the police department operated over 141,000 miles. We currently have a fleet of 12 marked and 3 unmarked cars. We currently have three patrol cars with over 140,000 miles and three more that have over 120,000 miles. The cost to maintain these aging vehicles is becoming cost prohibitive. However, the cost to replace these vehicles is not an option at this time. This project will replace our three oldest vehicles and allow two of the older vehicles to be used on a limited basis. This project will not necessarily create or retain jobs but will help with the economy, the quality and our equipment needs. Without this funding this is a good buy/hood that several of these cars will be forced into retirement this year without being able to be replaced. This will cause additional miles being added on the remaining vehicles at a greater rate. | Wauaseon Police Department | 0 | 31 to 90 days | \$68,000 |

| Fulton | Township Road 11-2 Drainage Improvement | This project consists of upgrading an existing 8" clay tile drainage system that was put in 80 years plus ago on Royaltown Township Road 11-2. The drainage area runs from US 20 south along Top Road 11-2 approximately 4000 ft. This drainage area being overhauled also has a large wetlands to the East of the new houses along Top Road 11-2. We have experienced recent flooding of the residence houses and yards as well as losses of crops in fields because the old clay tile drainage is not functioning properly. This is area has sugar sand that infiltrates the tile easily and reduces the drainage capacity as well as causes back pressure and breaks down the tile. Thus our proposed plan is to install 4000' of 12" solid plastic tile and solve the drainage issue. We will also have to buy 500' of 6" pipe because we have a few spots in right of way that will make it impossible to install the new drainage system in the right of way. This is very important so we can keep our residences houses and fields from receiving flood damage. | Royaltown Township | 5 | 31 to 90 days | \$440,000 |
| Fulton | Archbold-Pettisville-Wauaseon Waterline Connection | The proposed project consists of 18,400 linear feet of 12" waterline. The proposed waterline project will interconnect our residents and provide a safe drinking water supply to three communities and school districts (Archbold, Pettisville and Wauaseon) in the event of emergency such as fire, drought and other future demands. | Fulton County Commissioners | 10 | 181 days or more | \$1,500,000 |
| Fulton | Sewer Separation Village Wide | The Sewer Separation Project - Village Wide was developed as required by the Village of Fayette's current NPDES permit for its sewerage system. The goal of the LTCV was to eliminate discharges from the Village's combined sewer overflows that would cause or contribute to violations of local water body quality standards. Nearly 1.5 million has been spent on previous separation project on previous separation, handling has run out for additional projects. Since the LTR for the Village is \$28,000 with nearly 40% of the residents rent and not owning homes, it is unrealistic to assume any financial feasibility on behalf of the residents. | Village of Fayette | 0 | 91 to 180 days | \$4,250,000 |
| Fulton | Swanton Wastewater Treatment Plant Improvements | Construction of additional ditch to improve treatment capacity of wastewater treatment plant to meet OH EPA Ammonia effluent mandates. The project will remove ammonia and treat more wet weather flow which will reduce combined sewer overflows into area waterways. | Village Of Swanton | 100 | 31 to 90 days | \$2,400,000 |
| Fulton | Linden & Cleveland Street Water Main Replacement | Installation of 965 linear feet of 8" water main and necessary appurtenances to replace a failing 4" asbestos cement water main. This project will consist of a new kitchen and flooring installation. It will comply with state and federal regulations. The project will provide employment jobs and opportunities. This is a family owned business. We have suffered a \$150,000 decrease in revenue due to the economy and the SMOKING BAN. We are one mile from the Michigan line. This project will give patrons other reasons to patron the business also create jobs and following in the downtown area of Fayette. We live in a poor local community that has population of 1200 people. The downtown is very vital for our business and future. | Village of Lyons | 10 | 31 to 90 days | \$134,843 |
| Fulton | business expansion | | mel's place | 6 | 31 to 90 days | \$50,000 |
| Fulton | Lyons Park ADA Accessible Restrooms | The construction of a 28'x32' ADA accessible restroom building with foundation and slab and necessary plumbing fixtures, electrical work, paint and miscellaneous trades. There are currently no ADA accessible restrooms at the park. Consists of 1,320 linear feet of 30" diameter plastic pipe along with necessary hoes and connectors to replace the existing 12" glazed tile from the 1940's. | Village of Lyons | 10 | 31 to 90 days | \$131,875 |
| Fulton | Storm Tile Outlet Replacement- Phase I | | Village of Lyons | 10 | 91 to 180 days | \$45,000 |
| Fulton | Elevated Water Tower Replacement | Consist of constructing a new 200,000 gallon elevated water tower to replace the existing 100,000 gallon tank constructed in 1948. | Village of Lyons | 10 | 91 to 180 days | \$750,000 |
| Fulton | building project | This project will be the building of a truck maintenance garage for the existing equipment. The company has been maintaining the equipment outside and on the ground. The truck located in a area that deals with snow, rain, and sunshine. The weather conditions make it difficult to frequently maintenance the fleet in order to comply with federal and state regulations. This will open opportunities for new jobs and company growth. Without a building we are stalled for company growth. With the economy changing we must also change. That means different equipment and new safety compliance for new business. This also will guarantee the disposal of hazardous materials that emergency contract will create. | DDATT Trucking | 6 | 31 to 90 days | \$40,000 |
| Fulton | Synthetic Lubrication | To help educate the public on the efficient advantages of synthetic oil and lubrication environmentally. Funding would also be for inventory of Amsoil products. It would also include ecologically friendly and all natural fertilizers for produce, farming and lawn applications. | Amsoil Dealer of NW Ohio | 2 | 0 to 30 days | \$15,000 |
| Fulton | WWTP Improvements | The project involves the replacement of yard hydrants, slum feed pump recirculation pumps, chlorine feed room piping revisions, sludge transfer pumps, SBR influent valve repairs, miscellaneous concrete repairs, and SBR Programmable Logic Controller. | Village of Delta | 10 | 91 to 180 days | \$250,000 |
| Fulton | Painting Jobs and Equipment | Project coating 5-7 jobs in my industry which is painting. This would include but not be only limited to funds to be used for equipment and job production. This would be used for school construction and other infrastructure projects. | B & P Painting | 7 | 31 to 90 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Fulton | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant money. Building a wireless infrastructure to equip rural residents with the Bandwidth to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial operation that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Fulton | Replacement of the Wilson Street Bridge over Bad C | The alternate the Village of Delta would like to pursue is replacement of the current structure with a temporary road during construction. The bridge has no mechanism to pay for replacement. | Village of Delta | 10 | 91 to 180 days | \$400,000 |
| Fulton | S. Lincoln Street Improvements (Phase II) | Street reconstruction of S. Lincoln Street from Union Street to E. Mechanic Street and South Street east of S. Lincoln Street. Project consists of new asphalt pavement with concrete curb and gutters (approximately 1,600 linear feet). New catch basins and storm sewer laterals to collect runoff from the street and terraces. New waterline construction to replace deteriorating and undersized water mains. Minor sanitary sewer repairs as needed. | Village of Archbold | 10 | 0 to 30 days | \$750,000 |
| Fulton | Archbold/Pettisville- Fulton County/NW Ohio Wind C | Archbold and Pettisville Schools along with NW State Community College (Fulton/NW Wind Consortium) are conducting a first of its kind Agriculture renewable energy project in NW Ohio. The prototype project which will involve the installation of two utility scale wind turbines will prove to be the first high school/college partnership of its kind for Ohio's 12 Public Schools. In addition to providing hands on educational opportunities for high school and college students in the areas of energy conservation and renewable energy use, the project will also provide an evidence based model that can be replicated by other schools across the state to assist with alternative energy education and energy efficiency efforts. The project is expected to place Ohio students in line with international students in understanding alternative energy sources throughout the world. In addition to the educational impact, the project is expected to reduce energy costs by as much as 60% between the two selected school districts. Other area school districts have already asked to join the consortium and the interest in the project is growing among area schools and legislators. | Archbold Area Local Schools/NW Ohio Wind Consortium | 0 | 91 to 180 days | \$6,100,000 |
| Fulton | Nolan Parkway Extension | New street construction to extend Nolan Parkway approximately 3000 feet west from the existing end at the Archbold Industrial Park to County Road 24. The street will consist of a 24 feet wide asphalt pavement with ODOT Type 2 curb and gutters. New storm sewers, sanitary sewers and utilities will be constructed along the extension. This project will support the new Northwest Ohio Education Services Center with 200 employees as well as provide an additional outlet for employees at existing facilities in the Archbold Industrial Park. | Village of Archbold | 200 | 0 to 30 days | \$1,565,000 |
| Fulton | W. Holland Street Resurfacing (Ruihley Park) | Resurfacing of W. Holland Street between Ruihley Park and County Road 24. This project will include a 1.5 inch mill and 1/2" catch basin and curb repairs as needed. | Village of Archbold | 15 | 0 to 30 days | \$126,000 |
| Fulton | S. Defiance Street & W. Barre Road Signalization I | Replace existing wire loop vehicle detection with Inrix Video Detection 4 camera system. | Village of Archbold | 4 | 0 to 30 days | \$25,000 |
| Fulton | Lafayette Street Resurfacing | Resurface approximately 2200 linear feet of 24 feet wide pavement. Pothole crack repairs as necessary with fabric reinforced repair crack control system placed over the final surface course. Catch basin and curb repairs as necessary. | Village of Archbold | 15 | 0 to 30 days | \$170,000 |
| Fulton | Lafayette Street Extension | New street construction to extend Lafayette Street approximately 2800 linear feet west to County Road 24. This project will consist of a 24 feet wide asphalt pavement with ODOT Type 2 curb and gutters. New storm sewers, sanitary sewers and utilities will be constructed along the street extension. This project will support the Memorial Park, Archbold High School, Archbold Middle School and Elementary School facilities, Archbold High School's Athletic complex, and the newly constructed Archbold Evangelical Church. | Village of Archbold | 10 | 181 days or more | \$1,427,000 |
| Fulton | Lyons Fire Department Station Expansion | Expansion of current fire station in Lyons to provide additional vehicle bay and heated workstation area. Also add geothermal heating system to full facility and emergency generator system (natural gas) large enough to power station during severe weather and crisis. Would allow facility to house community members and become a county Red Cross shelter in event that disaster struck this community. Project is designed (TD Group) and VERY ready to commence. | Lyons Fire Department | 18 | 0 to 30 days | \$764,000 |
| Fulton | WTP Pilot Study of Anion Resins | This project would consist of pilot testing anion resins and evaluating new advanced treatment technologies that would provide reduction of low molecular weight organics to aid in meeting the Stage 2 DGBP Rule. | Village of Archbold | 1 | 31 to 90 days | \$35,000 |
| Fulton | WTP Clarifier Painting | This project would consist of sand blasting two clarifiers and painting both units. Lead based paint was found in the existing coating system requiring abatement. | Village of Archbold | 2 | 0 to 30 days | \$120,000 |
| Fulton | Frey Road Waterline Improvements | This project would consist of extending the present waterline on the east side of Frey Road (County Road 54) from Snyder Street (State Route 2) south approximately 1,400 linear feet to the North-Southern Railroad. This would allow the area to be looped and help maintain the water supply to the Archbold Hospital in the event of a major water break in the area. | Village of Archbold | 10 | 31 to 90 days | \$93,000 |
| Fulton | WTP SCADA System Upgrade | This project would consist of replacing the old Modicon system at the Village of Archbold's Water Treatment Plant with an updated system to monitor remote locations and most of the Plant equipment. The present system's memory is being used to its maximum capacity and major replacement parts are no longer available. The new system would be redundant to a controller above and below all of the Plant's operation. The upgrade would also include an auto dialer. | Village of Archbold | 1 | 31 to 90 days | \$200,000 |
| Fulton | WWTP Outfall Bypass Pump | This project would install a permanent bypass pump that the pump would be the pump located at the Village of Archbold's Wastewater Treatment Plant to maintain plant operation during high water events in the receiving stream to reduce plant overflow potential. | Village of Archbold | 2 | 91 to 180 days | \$75,000 |
| Fulton | Emergency Food and Shelter | Our county has experienced many plant closings and general job loss. The additional funds are needed to keep residents in their homes and to provide food for their families. Thousands of residents would receive assistance with the additional funds in the program. | United Way of Fulton County | 0 | 0 to 30 days | \$20,000 |
| Fulton | WWTP Diffused Air System for Overflow Retention Ba | This project would install a diffused air system to maintain aerobic conditions in the Village of Archbold's Wastewater Treatment Plant's overflow retention basin. Work to include design, cleaning, & reshaping the retention basin as needed. | Village of Archbold | 2 | 91 to 180 days | \$100,000 |
| Fulton | Brush Creek Sanitary Sewer & Manhole Rehabilitation | Approximately 2200 linear feet of sanitary sewer main that parallels Brush Creek and one of its tributaries has been identified as a source of I&I. This project would replace or install a liner in the existing sewer and replace or rehabilitate manholes as necessary for I&I reduction. | Village of Archbold | 8 | 91 to 180 days | \$181,500 |
| Fulton | WWTP Biosolids Lagoons No. 4 & 5 | Construction of two (2) new Biosolids Lagoons for the Village of Archbold's Wastewater Treatment Plant. This is the last phase of the WWTP's BSM improvement project. | Village of Archbold | 6 | 0 to 30 days | \$127,705 |
| Fulton | S. Defiance Street (SR 66) Resurfacing | Resurfacing of S. Defiance Street (SR 66) within the Village of Archbold from the Brush Creek Bridge north to W. Barre Road (CR Cl). This section of State Highway was reconstructed in 1993 by the Village of Archbold with 100% local funding. Funding is requested to mill and surface this section of highway with a heavy duty intermediate and surface layer of asphalt to reduce rutting due to the volume of truck traffic on this route. | Village of Archbold | 15 | 91 to 180 days | \$325,000 |
| Fulton | State Route 66 (S. Defiance Street) Resurfacing | Resurfacing of State Route 66 (S. Defiance Street) within the Village of Archbold from County Road C (W. Barre Road) north to the North-Southern Railway. This section of roadway was reconstructed by ODOT in the early 1960's and has received overlays since then resulting in the loss of curb reveal. Current surface conditions are poor and the curbs are deteriorated. The Village of Archbold made a request to ODOT to consider resurfacing in 2008 with no success and has again made request in 2009. The Village of Archbold desires that ODOT program this section of roadway for resurfacing and is willing to participate in the project for curb restoration. If ODOT will not proceed with resurfacing, the Village of Archbold requests that funding be considered for the local agency to proceed as the Project Sponsor. | Village of Archbold | 15 | 31 to 90 days | \$240,000 |
| Fulton | Royalton Township Fire Department | Construction of a new stand alone 120' x 70' steel building system fire station facility. It is designed to have 4 vehicle bays with 3 feed from both sides. It will have male and female restrooms and showers, with a small kitchen, large multipurpose room for training, meetings and community crisis use. The facility will be heated and cooled with a geothermal HVAC system and have an emergency generator (natural gas) to allow the station to fully function during a crisis. It will also be available to provide community short-term housing during a natural disaster or severe environmental circumstances. The land is owned, the design completed, and we are only a building permit and bids away from proceeding. | Royalton Township Fire Department | 25 | 31 to 90 days | \$688,476 |
| Fulton | WTP Sand Filter Rehabilitation | This project would consist of rehabilitating four (4) existing sand filters with new support gravel, sand and anthracite. The present filters are over twenty five years old and are developing mud balls. Rehabilitating the filters would help the Water Treatment Plant to continue to meet Ohio EPA turbidity requirements. | Village of Archbold | 2 | 91 to 180 days | \$150,000 |
| Fulton | New .5MG Elevated Tank | This project would consist of erecting a new .5MG elevated water tank at the northeast corner of E. Lutz Road (County Road D) and Clydes Way (County Road 22). The elevated tank would provide additional finished water storage and would help alleviate pressure problems in the Pettisville area. | Village of Archbold | 6 | 181 days or more | \$1,500,000 |
| Fulton | Street Repaving | Village wide street repair and repaving through a process of using SAM (stress absorbing membrane interlayer), micro surfacing and asphalt for a total of 88,921 square yards. Project can begin immediately pending weather conditions. | Village of Fayette | 20 | 31 to 90 days | \$750,000 |
| Fulton | Swanton Wastewater Treatment Plant Improvements | Construction of oxidation ditch to improve treatment capacity of wastewater treatment plant to meet OH EPA ammonia effluent mandates. The project will remove ammonia and treat those not water flow which will reduce combined sewer overflows into area waterways. 8100 Linear Feet of 12" water Main to Dairy Farm. | Village of Swanton | 100 | 31 to 90 days | \$2,400,000 |
| Fulton | Dairy Farm | Approximately 3 miles of 12" water main. Looping two systems into one. | Swan Creek Water District | 21 | 31 to 90 days | \$430,000 |
| Fulton | Road 3 Extension | 8100 linear feet of water main to a dairy farm. | Swan Creek Water District | 60 | 31 to 90 days | \$1,121,739 |
| Fulton | Dairy Farm Phase 6 | 12 miles prox. of 12" water main. Servicing 471 proe.edu. | Swan Creek Water District | 15 | 31 to 90 days | \$430,000 |
| Fulton | MDT/Office Update | These mobile data terminals (MDT) with NCRIS programs, three docking station for office, one main frame terminal with the ability to handle records searching and storage, base coding terminal, high speed internet, the office tool kit, and the proposed software to keep all this important information safe. The MDT will make work the most efficient safer and more efficient. They will be able to gather more correct information sooner than is done now. MDTs will alert officers of high-risk person while on traffic stops. Officers will be able to look up information in the patrol vehicles rather than returning to the office. The docking stations will allow officers to plug the MDT when it is needed in the office and work eight from the MDT. The main frame will tie all the MDTs together when it comes to user office information and the law officers will be keeping program. | Fayette Police Department | 223 | 91 to 180 days | \$4,700,000 |
| Fulton | Ecogate Dust Collection System Saving Project | Ecogate Dust Collection system is a system with the use of blast gases at the dust collection points and a VFD driving the Dust collector fan. The VFD varies the fan speed to match the dust loading for dust collection. Ecogate has data confirming that their systems average a 60% energy savings cost. We can document savings on 84 dust systems we currently have of 65% energy savings. Total annual kWh load of these collectors is 68,832,828 kWh @ 10 cents per kWh = \$6,883,282.82. Ecogate savings @ 65% is \$4,474,133.53 annually. This would also reduce the amount of carbon. Based on 1.58 carbon per kWh. A reduction in 12,841,914 kWh annually would also reduce carbon output by 19,262,871 pounds annually. | Sauder Woodworking Co | 2500 | 31 to 90 days | \$2,068,000 |
| Fulton | LTCP: Phase 1 - Existing Facility Improvements | The Long Term Control Plan: Phase 1 - Existing Facility Improvements includes improvements to the main pumping station and force main (concrete), flow meter, check valves, air release (replacement) and turbidity lagoons (valve replacements, flow meters, rock slope protection). A probable cost for these improvements is \$173,500. In addition to this amount, the Village also intends on utilizing the \$88,500 cost of the development of the LTCP, including flow monitoring, into this Phase 1 - Existing Facility Improvement Project. | Village of Fayette | 15 | 31 to 90 days | \$272,000 |
| Fulton | Northwest Lift Station and Force Main | The Northwest Lift Station and Force Main Project involves running a sewer line (1,000 linear feet) and installing a lift station on West Industrial Parkway to allow for economic and residential activity. Fayette is an economically distressed area with a LMI of \$53,000. Nearly 40% of the residents do not own homes and rent, making it unrealistic to assume any financial feasibility on behalf of the residents. An increase in the cost of living in Fayette would result in a decrease of renters. | Village of Fayette | 25 | 91 to 180 days | \$349,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Fulton | Eagle Street Water Main Extension | The Eagle Street Water Main Extension Project involves creating a loop of the Village's water supply to promote a more consistent level of distribution throughout the system. The extension runs from Gamble Road (next to Fayette School) and runs directly north to Eagle Street, which is a direct line to the water tower. | Village of Fayette | 25 | 91 to 180 days | \$414,000 |
| Fulton | West Industrial Parkway Project | This project includes installing a sewer line with a lift station and updating a water main in the unopened street in the right-of-way on Fulton Street to accommodate three residences and allow for industrial growth. A duplex grinder station will be installed at the west end of the Fulton Street right-of-way, connected by approximately 100 ft of a sewer line to a manhole by Gordon Street. A water line (approximately 100 ft) will also be installed in the right-of-way on Fulton Street. Three residences currently utilize an antiquated and collapsing sewer line. The closest connection is on Gosham, utilizing the Fulton Street right-of-way. The current water line is an old irrigation line never intended for public use. | Village of Fayette | 10 | 31 to 90 days | \$111,000 |
| Fulton | Wastewater Treatment Plant - UPDATED REVISION | This project involves the installation of a package treatment plant as required in the Long Term Control Plan. | Village of Fayette | 50 | 91 to 180 days | \$4,000,000 |
| Fulton | Sewer Separation Village Wide - UPDATED REVISION | The Sewer Separation Project - Village Wide UPDATED REVISION was developed for the LTCP as required by the Village of Fayette's current NPDES permit for its sewerage system. The goal of the LTCP is to eliminate discharges from the Village's combined sewer lines that would cause or contribute to violations of local water body quality standards. Nearly 1.5 million has been spent on previous separation projects, unfortunately, local funding has run out for additional projects. Since the LHM for the Village is \$28,000 with nearly 40% of the residents renting and not owning homes, it is unrealistic to assume any financial feasibility on behalf of the residents. The ability of a community to survive among unstable economic times is like the ability of an ash tree to survive the infestation of the Emerald Ash Borer. Without human intervention, the ash trees would be able to survive. Our community isn't able to remove and replace our damaged and dead trees without Federal aid from the stimulus package. Our community is over 40% rental properties which creates a "nomad" population with a LHM of \$28,000. Renters tend to stay for a short time and then move to a neighboring town. This creates neighborhoods of transient homes, coupled with the lack of responsibility on behalf of the Village to maintain Village owned trees, the appearance of our community is appealing to some, but hurting to those who reside locally. Due to budget constraints, no tree budget was cut three years ago and has not been funded since. The hazardous tree inventory list, completed in 2001, was utilized until no funding was available. The project would remove 75 trees at a cost of \$500.00 each (\$37,500.00) and replace these 75 trees at a cost of \$300.00 each (\$22,500.00) for a total of \$60,000.00. Help us make our community "greener" again. | Village of Fayette | 50 | 91 to 180 days | \$4,250,000 |
| Fulton | Urban Forestry Proposal | Onboard Hydrogen - Oxygen production in a closed loop system, which will continually recycle waste product thereby creating reactants. Expanded customer. Next generation production system with 0 emissions, and no moving parts. Expected working life of twenty five plus years. The Village of Fayette needs to safeguard its water supply by securing the Village's well fields. This project includes installing 800ft of a 72" high 2x 8 gauge galvanized chain link fabric fence with three secured gate openings. Since Fayette has an MMH of \$28,000, the amount requested is the total of \$15,261.00. | Village of Fayette | 5 | 0 to 30 days | \$55,000 |
| Fulton | Renewable Energy Source For Transportation. | Expanded customer. Next generation production system with 0 emissions, and no moving parts. Expected working life of twenty five plus years. The Village of Fayette needs to safeguard its water supply by securing the Village's well fields. This project includes installing 800ft of a 72" high 2x 8 gauge galvanized chain link fabric fence with three secured gate openings. Since Fayette has an MMH of \$28,000, the amount requested is the total of \$15,261.00. | Freedom Fuel Cells. | 35 | 0 to 30 days | \$1,500,000 |
| Fulton | Security Fence at Well Field | This programmatic partner wishes to help develop propane fueling infrastructure and distribution for fleets across Ohio. The project consists of installing high efficiency T8 fluorescent lighting in our facility (to replace current inefficient lighting) and to modernize heating system with gas infrared heaters in work activity areas (to replace inefficient air intake units currently in place). The estimate would be significant savings in energy and cost savings that will help this Ohio company negotiate these issues and allow us to compete nationally for decades to come. We are currently working on this project with the Ohio Department of Development/Ohio Energy Office. | Village of Fayette | 5 | 0 to 30 days | \$15,261 |
| Fulton | Bakers Propane Inc., a Clean Fuels Ohio Partner | This programmatic partner wishes to help develop propane fueling infrastructure and distribution for fleets across Ohio. The project consists of installing high efficiency T8 fluorescent lighting in our facility (to replace current inefficient lighting) and to modernize heating system with gas infrared heaters in work activity areas (to replace inefficient air intake units currently in place). The estimate would be significant savings in energy and cost savings that will help this Ohio company negotiate these issues and allow us to compete nationally for decades to come. We are currently working on this project with the Ohio Department of Development/Ohio Energy Office. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Fulton | Energy Conservation, Efficiency and Retrofit Proje | The vehicle mobile and portable communications radios currently in use by the Delta Police Department are six to six years old and their being in use nearly 24 hours a day, 07 days a week the radios are beginning develop reliability concerns which could result in officer safety issues. And with the continual advancement in communications technology these radios are becoming out dated. Any potential grant monies would be used to upgrade the department's communications radios to provide for better officer safety and to improve the service provided to the citizens of the community. | Archbold Furniture Co. | 38 | 0 to 30 days | \$50,000 |
| Fulton | Communications Upgrade | The vehicle mobile and portable communications radios currently in use by the Delta Police Department are six to six years old and their being in use nearly 24 hours a day, 07 days a week the radios are beginning develop reliability concerns which could result in officer safety issues. And with the continual advancement in communications technology these radios are becoming out dated. Any potential grant monies would be used to upgrade the department's communications radios to provide for better officer safety and to improve the service provided to the citizens of the community. | Delta Police Department | 9 | 31 to 90 days | \$13,000 |
| Fulton | Fayette School Wind Turbine Project | Installation of 250w wind turbine on school site. District has a OOD Grant of \$300,000.00 in hand. \$500,000.00 in project funding can be leveraged with stimulus funds. Project to shovel ready. The estimated output would provide 30% to 50% of electrical needs of the school district. This project would bring a demonstration unit to Northeast Ohio and act in attracting wind power production. Collaboration will take place with the University of Toledo in sharing research data along with science and vocational agriculture classes at Fayette. The district has 400 students K-12, with over 40% Free and Reduced Lunch participation. An Ohio Turbine east is within 10 miles to allow visitation to the site. This project would restore and install 2 (two) and would reduce PM 2.5 and NOx emissions in the non-attainment county/courties of Fulton by re-powering Tier 0 and Tier 1 Caterpillar construction equipment with certified Tier 3 engines. | Fayette Local Schools | 5 | 0 to 30 days | \$250,000 |
| Fulton | MILLER BROTHERS FLEET | In total, this project would remove 11.4 tons of PM 2.5 and 210.1 tons of NOx in a five year period. Over the next five years, the average cost per ton of PM 2.5 removed from our air will be \$113,899 and the average per ton of NOx removed from our air will be \$6,189. This work will begin within one week of funding. | OHIO CAT | 2.6 | 0 to 30 days | \$975,000.00 |
| Gallia | Mercerville Area Central Sanitary Sewer | This project will provide a central sanitary sewer and wastewater treatment facility in the Mercerville area. The Gallia County Local School District houses an elementary school and a high school in the area. In cooperation with the Gallia County Commissioners, the opportunity exists to use the resources available to both utilities and allow for a more regional solution that will benefit the whole community. In addition, there are 5 businesses in the area that will benefit from the facility. | Gallia County Commissioners | 50 | 31 to 90 days | \$913,000 |
| Gallia | Ohio Township Fire Substation Project | This project will construct a fire station in Ohio Township, eliminating problems with response times for the fire department's service area of Guyan and Ohio Township. One to the volunteer nature of the fire department, no jobs will be created or retained. However, safety of citizens will be enhanced. | Gallia County Commissioners | 0 | 31 to 90 days | \$128,000 |
| Gallia | Kanauga/Addison Sanitary Improvement Project | This project will provide functional and operable wastewater treatment facilities for the Kanauga/Addison area. The project will construct a gravity collection system and connect the system into a regional sanitary system for treatment. Some funding has been allocated through USDA, OPWC, and ARIC. However, the county will be responsible for \$2,187,000 and top hats will be \$720,000. In light of the current economic situation, the top hats will be a burden on citizens and businesses, as well as our county budget. | Gallia County Commissioners | 75 | 0 to 30 days | \$2,907,000 |
| Gallia | Telehealth for Home Care | Holzer's Home Care provides skilled nursing, physical therapy, occupational therapy, speech therapy and home health aides from base offices in Gallipolis, Jackson and Pomeroy. Holzer Home Care patients are low-income elderly being treated for one or more chronic conditions, 74% insured by Medicare coverage. Telehealth assistive units placed in patients' homes will empower those coping with chronic diseases to take an active role in their treatment. The electronic units guide patients through taking their medications, collecting their vital signs, identifying new or changing symptoms, and managing their pain. Home telehealth assistive programs have been shown to dramatically increase medication compliance while decreasing ER visits and hospitalizations because troubling trends can be caught early. Data collected from home health monitoring units can also be integrated into the patients' electronic medical records, ensuring continuity of care regardless of geographic location. | Reid Consulting Group for Holzer Health Systems | 4 | 91 to 180 days | \$192,482 |
| Gallia | Gallia-Meigs Regional Airport Fuel Farm Project | This project will provide for the construction of a new fuel system and will enhance the safety and efficiency of the airport. The current fuel program is old and in very poor condition. The fuel farm is located close to the runway and does not provide sufficient room for aircraft parking or movement. The use of fuel helps balance the airport budget. Without the fuel system, the airport would lose corporate aviation customers as they would be forced to other airports when needing fuel. This lack of sales would impair the airport budget and may cause closure of the airport. Through small, the Gallia-Meigs region will benefit from the construction of a new fuel system, as traffic will continue to the airport. Fuel sales will continue, and jobs will be retained. In addition, a fully functioning airport is one asset Gallia County has to attract new businesses. This activity will boost the local economy and will have a positive impact to the region. Currently, the department needs all the hospital's laundry needs and provides free linen service to all emergency medical companies that deliver patients to the ER. | Gallia County Commissioners | 5 | 0 to 30 days | \$350,000 |
| Gallia | Internal Laundry Operation Renovation | Faced with rising costs and decreasing reimbursements, Holzer does not have the capital required to replace aging laundry equipment increasingly prone to breakdowns. The threat of outsourcing looms. This project has 3 components that will save Gallia County jobs and infrastructure. (1) A water reclamation system with carbon filtration will cut water usage by 75%, reduce energy consumption by 2.5 billion BTU per year, and decrease the burden on the Gallipolis sewer system. (2) Installation of an Ozone Solution system cuts cost and pollutants because Ozone washes best in cold water and reverts back to oxygen in 20 minutes, leaving no waste. (3) New washers and dryers will improve reliability and be more energy efficient. | Reid Consulting Group for Holzer Medical Center -- | 28 | 31 to 90 days | \$742,050 |
| Gallia | Green Township Sanitary Sewer and Wastewater Treat | This project will provide functional and operable wastewater conveyance and treatment facilities through the year 2028 and beyond. The project will construct a gravity collection system and MBR WWTP. There is a new high school and elementary school, as well as several businesses in the proposed service area. Approximately 100 jobs will be maintained and possibly create 3-5. Gallia County would like to pursue the project of constructing a new jail facility. At this time, funds for the design phase are not available. The next step recommended by the architect was the Phase I design package. This package includes the following: an analysis, architecture program, functional program, design program, utility analysis and floor plan. This step would employ approximately 10 individuals. The new jail facility of which would employ approximately 10 individuals. The Gallia-Meigs Regional airport's existing runway surface pavement's reaching its useful life and is in need of a normal maintenance overlay. The overlay will restore the useful life of the pavement and will enhance the safety and efficiency of the airport. Though small, the airport is vital to the local economy. An activity boosts the local economy. Without a properly functioning airport, 5 jobs will be lost, as well as jobs that may be hindered by the lack of an airport. | Gallia County Commissioners | 100 | 181 days or more | \$13,530,450 |
| Gallia | Gallia County Jail | The next step recommended by the architect was the Phase I design package. This package includes the following: an analysis, architecture program, functional program, design program, utility analysis and floor plan. This step would employ approximately 10 individuals. The new jail facility of which would employ approximately 10 individuals. | Gallia County Commissioners | 10 | 31 to 90 days | \$185,000 |
| Gallia | Gallia-Meigs Regional Airport Runway 5-23 Friction | The Gallia-Meigs Regional airport's existing runway surface pavement's reaching its useful life and is in need of a normal maintenance overlay. The overlay will restore the useful life of the pavement and will enhance the safety and efficiency of the airport. Though small, the airport is vital to the local economy. An activity boosts the local economy. Without a properly functioning airport, 5 jobs will be lost, as well as jobs that may be hindered by the lack of an airport. | Gallia County Commissioners | 5 | 91 to 180 days | \$635,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------------------|----------------|--------------------|---------------------------|
| Gallia | Gallia-Meigs Regional Airport Runway 5-23 RSA Grad | This project will regulate and make necessary improvements to the RSA to meet FAA standards and will enhance the safety and efficiency of the airport. Currently, the RSA has 10 runway 5-23 taxi depressions and a small drainage ditch that is located within the RSA. Therefore, there is a need for drainage improvements within the RSA. | Gallia County Commissioners | 5 | 181 days or more | \$320,000 |
| Gallia | Gallia-Meigs Runway 5-23 Extension, Parallel Taxiway | This project will provide for the extension of the runway of the Gallia-Meigs Airport. The runway extension will enhance the safety and efficiency of the airport and boost the local economy by allowing better transportation access and economic development opportunities. Currently, aircraft requiring a longer runway need to divert 50 miles away to an airport with sufficient runway length. | Gallia County Commissioners | 5 | 181 days or more | \$2,940,000 |
| Gallia | Improving the Smart Grid in Rural Southern Ohio | Because the flow of electricity has been deemed a national priority, we have begun to protect our substations by installing an acoustic perimeter fence alarm system in four substations and need to install in 14 additional subs. The SCADA system for substation control is desperately needed by our electrical distribution cooperative to control and maintain services. This system is a key part of the Smart Grid and will fully integrate into our installed business applications. This will allow instantaneous redirection of electricity from one substation to another, particularly in times of emergency or storms. As a result our delivery of electricity will be efficient and highly reliable to the citizens in the priority area. | Buckeye Rural Electric Cooperative | 65 | 31 to 90 days | \$3,043,002 |
| Gallia | Third Sewage Oxidation Ditch | This project will ensure that the Village of Rio Grande Wastewater Treatment Plant continues to meet the NPDES Permit requirements as the Village grows. This project will consist of constructing a new oxidation ditch with an internal clarifier, replacing the existing chlorine chamber with new chamber, purchasing a sludge press and constructing a sludge storage area for the .38 mgd option and constructing a new aerated sludge holding tank), as well as yard piping, grading, and electrical work. | Village of Rio Grande | 3 | 181 days or more | \$2,332,000 |
| Gallia | Linwood Drive Sewer Development Project | Currently, the Village of Rio Grande has a 6 inch sewer line and needs to upgrade it to an 8 inch line under Linwood Drive. The new 8 inch sewer line will run north to south along Linwood Drive and Central Street to allow for proper service lateral connections for the existing residences in the area. It will take about 45 to 60 days to complete this project. Due to the concern regarding the age and condition of the existing sewer lines, this is a necessary project. Additionally, the Village is getting a new elementary school, which expects to be open by the fall of 2010. The school will increase the flow in the existing 8 inch sewer line which will exceed its original design capacity and require the existing sewer line to be updated to adequately accept all flows. | Village of Rio Grande | 0 | 0 to 30 days | \$188,700 |
| Gallia | Village of Rio Grande Paving Project | The Village of Rio Grande is getting a new elementary school. The trucks and other heavy equipment that will be traveling Lake Drive, which is the road on which the new Rio Grande Elementary School is going to be built, will be destroying the pavement on that road. The Village has several residences on Lake Drive and the Village cannot afford for Lake Drive to be torn up because in addition to the many residences that run along Lake Drive, there will also be school buses and parents bringing their children to school. The road needs to be widened when it is paved because the road is barely wide enough for two cars to pass, let alone two school buses. The project represents a safety issue that is paramount to the Village. By having a road that is wide enough and paved well will protect not only the Rio Grande residents and children, but will also protect all that live outside the Village using our roads, especially when they bring their children to school. | Village of Rio Grande | 0 | 181 days or more | \$35,000 |
| Gallia | Cherry Ridge Access Road | The Village of Rio Grande is getting a new elementary school in the Village. Currently, the buses and cars that will be traveling to the school which is located on Lake Drive, have one way to get in and one way to get out. At this time, Lake Drive is not a heavily traveled road, but once the school is open, which will be in the fall of 2010, the traffic on the road will increase dramatically. Cherry Ridge Access Road is located behind the school to be constructed Rio Grande Elementary School. Due to the increased traffic flow, the Village is getting an additional form of egress for the school traffic would be a great safety project. It will streamline the traffic flow on Lake Drive, which is a perfect scenario would be to use the school. As an in the proposed Cherry Ridge Access Road would be the one way get out of the school. In other words, the road would continue to be 2 lanes road, but during the school day, traffic would have one direction of flow, which would increase the safety of everyone in the area, especially the students. | Village of Rio Grande | 0 | 181 days or more | \$100,000 |
| Gallia | Municipal Vehicle Shelter Addition | This project would consist of adding 2 bays to the current municipal vehicle shelter. These bays were built for the purpose of storing an aging truck, police cruisers, and maintenance/service vehicles. There is not currently enough room to house all of these municipal vehicles. The addition would be approximately 30 feet by 60 feet. Materials for this project will be purchased locally to keep local contractors in business. | Village of Rio Grande | 0 | 31 to 90 days | \$65,000 |
| Gallia | Green Township Sewer | This project will install 3,700 L.F. of sanitary sewer to serve 410 dwellings that have failing systems. The project area is under ODEP, Findings & Orders. | Gallia County Commissioners | 10 | 91 to 180 days | \$1,750,000 |
| Gallia | Mercerville Sanitary Sewer | This project will install 4,300 L.F. of sanitary sewer to serve 40 homes and two schools. The project will replace failing WWTPs and septic systems in the project area. | Gallia County Commissioners | 10 | 91 to 180 days | \$500,000 |
| Gallia | Storm Sewer Project | Installation of 430 L.F. of storm sewer to address flooding issues and provide adequate drainage to reduce flooding. | Village of Virton | 4 | 91 to 180 days | \$100,000 |
| Gallia | URG Office Technology Project | Displaced workers need training in other career fields, which will—in all likelihood—require a knowledge and understanding of computers and software. With new computers and updated software, Rio Grande will offer displaced workers training in up-to-date computer skills that they can obtain employment. 40 desktop computers and related software are needed to replace outdated equipment (purchased in 2000-2003) in two classrooms. The students trained with the upgraded equipment will be qualified to work in offices of today and tomorrow. | University of Rio Grande | 0 | 0 to 30 days | \$35,000 |
| Gallia | URG McKenzie & Kidd Lab Project | The University of Rio Grande expects expansion in nursing and healthcare education programs to require an increase of internet bandwidth to 200Mbps and the Southern Ohio Healthcare Network. To best provide adequate network support for videoconferencing and the transmission of high-resolution graphics and medical imaging, \$25,000/year is needed for additional bandwidth and network hosting from the Ohio Supercomputing Center. In addition, Rio Grande expects to replace computer lab equipment in the McKenzie Nursing & Kidd HealthScience building for computer science, statistics, GIS mapping, environmental science, and graphics use. | University of Rio Grande | 0 | 0 to 30 days | \$70,500 |
| Gallia | URG Plant Maintenance Lab Project | There is a continuing need for trained maintenance technicians in the service area. The plant maintenance laboratory serves three programs and needs updating. Much of the equipment is outdated and breakdown. With an updated and expanded lab, more training can be done in general maintenance for local manufacturing companies. Thus, employees can remain at the top of their skill and knowledge levels and companies can maintain production. Even with the down turn in the economy, a great need for trained maintenance technicians continues. With upgraded facilities, students can be trained on the same types of components they will encounter in industrial settings. | University of Rio Grande | 0 | 0 to 30 days | \$51,348 |
| Gallia | URG Director of Small Business Development & Entre | Utilizing the skills of faculty at the Evans School of Business and students in the MBA in Entrepreneurship, the Director of Small Business Development & Entrepreneurship will act as a consultation/assistant to assist local residents with small business development training. Areas of assistance include: business plans, small business counseling, marketing, management planning, accounting, legal planning, financial preparation and projections. The creation of this position will assist local entrepreneurs in development and implementation of business that will create jobs in southeastern Ohio. It will serve as a large segment of recently displaced workers by helping them create their own self-employment opportunities. There is a need for qualified professional knowledge. In order to provide state-of-the-art training to students in this career field, upgraded equipment is needed. Equipment such as a shared modality ultrasound system is needed to train students to use 3D and 4D ultrasound applications. In addition, equipment such as an arterial physical system, ECG monitors, and others are required to upgrade the current training lab. In order for students to be competitive in growing health services careers, they must be trained on the equipment that is used in modern medical labs. | University of Rio Grande | 1 | 31 to 90 days | \$80,000 |
| Gallia | URG Diagnostic Medical Sonography Project | There is a shortage of trained pharmacy assistants in Ohio and nationwide. Rio Grande seeks to offer training that is accredited by the American Health Systems Association. Pharmacy technicians in Ohio must pass the National Pharmacy Technician Examination. The required equipment will enhance Rio Grande's ability to prepare students for successful testing and placement into this career field. | University of Rio Grande | 0 | 0 to 30 days | \$19,375 |
| Gallia | URG Medical Lab Technician Project | There is a shortage of medical lab technicians (MLT) in the region and state. Many current MLTs will soon be retiring. Area clinics and hospitals have requested Rio Grande to train students to meet this job demand. Within 30 years approximately 20 new MLTs will be needed. In addition, several area plants are closing and MLT jobs offer displaced workers opportunities for new careers. Rio Grande needs to update campus lab facilities to accommodate the students. Technology is constantly changing and current lab facilities are outdated. Digital imaging capabilities are advancing rapidly in area clinical sites. The current textbooks are antiquated or replaced by digital imaging CDs. The radiologic technology students need daily access to computers for both the classroom and labs to meet the requirements of learning how to access, view, and manipulate images on the computer. A concept that is hard to master by looking at a flat textbook. The classroom needs laptops with high-end graphics and larger screens for better viewing of the digital images. 16 classroom/lab laptop computers with 15 inch screens are needed. | University of Rio Grande | 20 | 0 to 30 days | \$150,000 |
| Gallia | URG Radiologic Technology Project | There is a shortage of nurses throughout the state. Nursing careers offer employment opportunities for many displaced workers. Rio Grande seeks to upgrade its nursing lab to prepare students to become future RNs and BSNs. The School of Nursing requires upgraded equipment and training materials to provide state-of-the-art training. | University of Rio Grande | 0 | 0 to 30 days | \$41,175 |
| Gallia | URG Manufacturing Technology Lab Project | In order to meet the needs of the 21st century workforce, Rio Grande must upgrade lab equipment to meet the training needs of the surrounding business. State-of-the-art equipment will give students the most modern manufacturing facility requirements and will serve as an incentive to attract high-tech manufacturers to the area. | University of Rio Grande | 0 | 0 to 30 days | \$37,000 |
| Gallia | URG Training Educators & Professionals to Build Te | This project will help build teacher capacity and employment in Ohio schools in the high-need and hard-to-staff subject areas Life Science and Physical Science. The project will be to train middle school science teachers who would like to teach high school. Additionally, it is also for anyone with a four-year science degree who would like a provisional license to teach high school. The project is designing and implementing an alternative preparation program that will allow teachers and mid-career professionals to continue working in their current jobs throughout the program. This project includes coursework and field experiences that can be flexibly offered. | University of Rio Grande | 20 | 0 to 30 days | \$350,000 |
| Gallia | URG Master of Arts in Creativity and Innovation | This program will be provided to assist professionals seeking additional education to advance or maintain their jobs or to assist unemployed or displaced workers to prepare for work. The program will be offered in hybrid format with face-to-face communication provided via students' computers. Flexible schedules will enable students to proceed or convenient times. There will involve a combination of traditional and innovative development of ideas into practical strategies. Areas include technology, creative arts, sports, and integrated studies. | University of Rio Grande | 6 | 31 to 90 days | \$984,720 |
| Gallia | URG Adult Degree Programs | The program will develop and support the following completed programs: The program leading a Bachelor of Technical Studies (BTS) program for individuals with an associate degree; Bachelor of Arts in Integrated Studies (BAIS) program to develop thinking and reasoning skills; and Bachelor of Science in Business for individuals with some college, seeking careers in business) will be provided on a hybrid course basis. The coursework will include face-to-face contacts supplemented by interactive video through computers. Also, coursework will be downloaded to students' computers, as well. | University of Rio Grande | 6 | 31 to 90 days | \$2,700,300 |
| Gallia | URG Electronics/Industrial Automation | There is a continuing need for training individuals in electronics and industrial automation. Much of the equipment used in the electronics/industrial automation lab is old and outdated. In order to prepare students for area employers' jobs needs, much of the current equipment must be replaced or upgraded. Equipment needed includes computers, programmable controller systems and software, flux hand tool multimeters and test lead kits, and a Fluke ACDC 337 clamp meter test lead kit. | University of Rio Grande | 0 | 0 to 30 days | \$70,500 |
| Gallia | URG Student Tutor Support | Many college students are academically underprepared for college level coursework, especially displaced workers who have been out of school for many years. Critical, persistent attention must be provided to these students if they are to succeed. Workforce Solutions, many area colleges and drop-out. Rio Grande's tutor training program is nationally certified by the College Reading and Learning Association. However, funding is needed to support these student tutors. The treatment instructional budget cannot support student tutoring training. | University of Rio Grande | 6 | 0 to 30 days | \$20,000 |
| Gallia | URG College Readiness | Many students enter college underprepared for college level instruction, especially in the areas of math, science, and reading. These students can be assisted through testing and remedial coursework offered by professional counselors or tutors. Funding is needed to purchase testing materials, support workshops, transport high school students to testing sites, and professional assistance. | University of Rio Grande | 2 | 31 to 90 days | \$40,000 |
| Gallia | Gallia County Maintenance Complex | The project will provide for a new maintenance facility for the inside storage and maintenance of roadway equipment and materials. The facility will hold equipment that will maintain 455 miles of roads of which 31,435 people would be affected. The existing structure is deficient and even with continued maintenance, the building continues to deteriorate. | Office of the Gallia County Engineer | 132 | 181 days or more | \$7,200,000 |
| Gallia | Gallia County System Wide Highway Safety | The project will include the purchase and installation of safety signage and guardrail for the improvement of public safety throughout the entire 455 miles in the Gallia County Highway system. The 31,435 people living on rural Appalachian roadways need the basics of better access and safety to schools and hospitals. These road improvements will enhance the economic improvements for the region. | Office of the Gallia County Engineer | 58 | 0 to 30 days | \$3,025,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Gallia | Gallia County Green Space Management | The Gallia County Green Space Management project will provide for the purchase of new tractors with mowers and a brush cutter tractor that meets emission standards. The removal of weeds along roadways will provide a safer environment for the traveling public and emergency personnel and possibly reduce injury to motorists. The 31,435 residents living on 455 miles of rural Appalachian roadways need the basics of having better access and improved safety to schools and hospitals. These road improvements will enhance the economic improvements for the region. | Office of the Gallia County Engineer | 6 | 0 to 30 days | \$194,627 |
| Gallia | Gallia County Maintenance Equipment | The Gallia County Maintenance Equipment project will provide the purchase of new trucks and rubber road accumulators. The purchase of the equipment will allow the County Highway Department to provide better services on County roads and reduce maintenance costs and down time. The residents living on rural Appalachian roadways need the basics of better safety and access to schools and hospitals. These road improvements will enhance economic improvements for the region. | Office of the Gallia County Engineer | 14 | 0 to 30 days | \$830,000 |
| Gallia | Gallia County Information Management System | The Gallia County Information Management System would provide for completion of the existing Gallia County Geographic Information System (GIS) and provide the necessary hardware to access public information via the internet. Gallia County currently uses and maintains several servers of data in the existing GIS for Emergency Medical Services and Police Protection. Gallia County needs to digitize its maps. The completion of this digitizing process and the capability to provide multiple layers of geographic information to the public through the internet would make Gallia County more marketable to expanding businesses searching for information. | Office of the Gallia County Engineer | 9 | 0 to 30 days | \$200,000 |
| Gallia | Gallia County Deficient Bridge Replacement Program | The Gallia County Deficient Bridge Replacement Program will replace approximately 21 deficient structures that have a general appraisal of 4 or less. The Gallia County Deficient Bridge Replacement Program will greatly improve the safety of the traveling public on County and Township roadways by providing two lane structures designed to comply with legal loading. The 31,435 residents living on rural Appalachian roadways need the basics of having better access to schools and hospitals. These road improvements will enhance economic improvements for the region. | Office of the Gallia County Engineer | 188 | 181 days or more | \$10,420,000 |
| Gallia | Gallia County Bridge Replacement Program | The Gallia County Bridge Replacement Program will replace 43 deficient structures that have a legal load limit less than one hundred percent. The Gallia County Bridge Replacement Program will greatly improve the safety of the traveling public on County and Township roadways by providing two lane structures designed to comply with legal loading. The 31,435 residents living on rural Appalachian roadways need the basics of having better access to schools and hospitals. These road improvements will enhance economic improvements for the region. | Office of the Gallia County Engineer | 257 | 181 days or more | \$21,247,058 |
| Gallia | Gallia County Deficient Culvert Replacement Program | The Gallia County Deficient Culvert Replacement Program will replace all deficient culverts on the county roadway system. Any culvert structures that need replacement due to roadway, excessive corrosion, etc. will be replaced. The replacement of these deficient culverts will allow Gallia County to plan resurfacing projects and provide safer roadways that are two lanes wide. The 31,435 residents living on rural Appalachian roadways need the basics of having better access to schools and hospitals. These road improvements will enhance economic improvement opportunities for the region. | Office of the Gallia County Engineer | 31 | 181 days or more | \$2,800,000 |
| Gallia | Appalachian Economic Development Highway Improvement | The Appalachian Economic Development Highway Improvements will provide pavement to gravel roads within the County. This upgrade will provide a safer driving environment for the traveling public, emergency personnel and improve safety and access to economic opportunity. The 3,100 residents living on rural Appalachian roadways need the basics of having better access to schools and hospitals. These road improvements will even help with economic opportunities for the region. | Office of the Gallia County Engineer | 39 | 0 to 30 days | \$7,410,000 |
| Gallia | Gallia County Flood Risk Mitigation Program | The Gallia County Flood Risk Mitigation Program will raise sections of roadways and bridges that flood frequently to help increase access for the traveling public and emergency personnel. Due to the large amount of flooding in the region to heavy rains and backward from the Ohio River, flooding roadways and bridges have caused a hazard for years. The County does not have money available to fund this type of flooding. We have funding set up for this type of problem in the state. The 16,435 residents and their children throughout Gallia County have been in a hazardous situation for years and need some help. | Office of the Gallia County Engineer | 29 | 181 days or more | \$2,058,823 |
| Gallia | Gallia County Maintenance Equipment Facility | The Gallia County Maintenance Equipment Facility project will provide the construction of an equipment building to store County maintenance equipment to protect and maintain from the elements of weather. The 31,435 residents of Gallia County will benefit from an equipment building to store County Highway equipment that protect and maintain equipment from the elements of weather and prevent the County from having to buy new equipment. | Office of the Gallia County Engineer | 7 | 0 to 30 days | \$281,723 |
| Gallia | Gallia County Salt Storage Facility | The Gallia County Salt Storage Facility project will provide the construction of an 800 ton capacity salt shed. The County Highway Department to store more salt for use during snow emergencies. The 31,435 residents of Gallia County will benefit from this, as the project will provide safe and environmentally sound storage of road deicing materials by having sheltered protection from weather events and preventing salt from entering the surrounding environment. | Office of the Gallia County Engineer | 14 | 0 to 30 days | \$426,000 |
| Gallia | Gallia County Adamsville Bridge Replacement | The Adamsville Bridge carries Farmview Road (County Road 71) over Raccoon Creek. It is located approximately one mile east of Rio Grande and this structure is immediately adjacent to the grounds of Bob Evans Farms. The annual Bob Evans Farm Festival is an event of significant economic importance to Gallia County. The structure is a vital link in the county roadway system connecting portions of Adams National Forest. The 1,120 residents living on rural Appalachian roadways need the basics of having better safety and access to schools and hospitals. These road improvements will enhance economic improvements for the region. | Office of the Gallia County Engineer | 14 | 181 days or more | \$882,000 |
| Gallia | Gallia County Patriot Bridge Replacement | The Patriot Bridge carries Patriot Road (C.R. 40) over Sandfork Creek. The warm camberback truss is currently rated at 45% due to deterioration of superstructure connectors and section loss of exterior stringers and floor beams. Patriot Road is a vital connection between State Route 141 and State Route 775. The 1,143 residents living on rural Appalachian roadways need the basics of better safety and access to schools and hospitals. These road improvements will enhance economic improvements for the region. | Office of the Gallia County Engineer | 14 | 181 days or more | \$1,058,000 |
| Gallia | Gallia County Symmes Creek Truss Bridge Replacement | The Symmes Creek Truss Bridge carries Symmes Creek (C.R. 56) over Symmes Creek. The warm camberback truss bridge is currently rated 40% due to deterioration of the sandstone abutment. The structure is a vital link in the county roadway system connecting portions of Adams National Forest. The 1,120 residents living on rural Appalachian roadways need the basics of having better safety and access to schools and hospitals. These road improvements will enhance economic improvements for the region. | Office of the Gallia County Engineer | 14 | 181 days or more | \$1,882,000 |
| Gallia | Gallia County Wiseman Bridge Replacement | The Wiseman Road Truss Bridge carries Wiseman Road (T.R. 752) over Symmes Creek. The warm camberback truss bridge is currently rated at 25% due to deterioration of the superstructure and the footing system. This structure is functionally obsolete and structurally deficient and is in desperate need to be replaced with a new structure. The safety of the 4,635 traveling taxpayers is why this structure is needed to be replaced. Due to the cost of the structure, the county currently does not have the money to replace it. | Office of the Gallia County Engineer | 14 | 181 days or more | \$1,470,500 |
| Gallia | Gallia County Deficient Pavement Replacement Program | The Gallia County Deficient Pavement Replacement Program Phase I will provide pavement to 20 miles of deficient roads, when roadways, street signs, and street lighting. This upgrade will provide a safer driving environment for the traveling public and emergency personnel. This upgrade will decrease the time and maintenance needed for said roads. The combination of deficient roadways and lack of funding in the Appalachian region of Ohio, Ohio roadways deteriorated steadily over the years. The 15,217 residents in Gallia County live in the County, and even the region would benefit by the revitalization of the roadway system, which improves economic growth in the region. | Office of the Gallia County Engineer | 31 | 0 to 30 days | \$4,824,000 |
| Gallia | Gallia County Deficient Pavement Replacement Program | The Gallia County Deficient Pavement Replacement Program Phase II will provide pavement to 50 miles of deficient roads, when roadways, street signs, and street lighting. This upgrade will provide a safer driving environment for the traveling public and emergency personnel. This upgrade will decrease the time and maintenance needed for said roads. The 23,578 taxpayers in the Appalachian region of Gallia County live in many different roads. The deficient roads are due to a lack of funding and an aging system. | Office of the Gallia County Engineer | 43 | 0 to 30 days | \$12,117,000 |
| Gallia | Gallia L.E.A.D.S. After School Program | The Gallia L.E.A.D.S. After School Program will provide a safe harbor for the children, but also provides unlimited cultural and educational opportunities not available during a regular school day. 175 part-time employees are needed to operate the programs. Many employees have shared how important this income is to their families. Dollars earned are spent in the local area. Through a unique partnership with the Gallia-Intero Educational Service Center, efforts are ongoing to identify grant opportunities and other potential stakeholders to continue the after school programs. The school district has gone from Academic Watch to Excellent and recognizes the important contribution that after school programs have made to this endeavor. Not only does the after school programs serve as a safe harbor for the children, but also provides unlimited cultural and educational opportunities not available during a regular school day. 175 part-time employees are needed to operate the programs. Many employees have shared how important this income is to their families. Dollars earned are spent in the local area. | Gallia-Vinton Educational Service Center | 120 | 0 to 30 days | \$375,000 |
| Gallia | Gallia County Safe School Roads Program | The Gallia County Safe School Roads Program will widen Centenary Road and Hannan Truss Road. This widening will provide a safer driving environment for school buses and the traveling public. This upgrade will also decrease the time and maintenance needed for said roads. This project provides safety to all children in school buses. The 31,435 residents living on rural Appalachian roadways need the basics of better access to schools and hospitals. These road improvements will enhance economic improvements for the region. | Office of the Gallia County Engineer | 64 | 181 days or more | \$6,470,000 |
| Gallia | Gallia County - County Wide Paving Program | The Gallia County - County Wide Paving Program will provide pavement and widening to all County roads within the County. This upgrade will provide a safer driving environment for the traveling public, school transportation, emergency personnel and improve safety and access to economic opportunity. Due to funding levels, the 455 miles of rural roads in Gallia County have not been maintained. This is being rural and in the Appalachian Region of Ohio, does not help the funding issue. By funding this project, the 31,435 residents in Gallia County will benefit, as would businesses, which helps the economic growth of the region. | Office of the Gallia County Engineer | 98 | 0 to 30 days | \$104,117,000 |
| Gallia | Gallia County Appalachian Secondary Road Improvement | The Appalachian Secondary Road Improvements Program will provide pavement to all gravel roads within the County. This upgrade will provide a safer driving environment for the traveling public, emergency personnel and improve safety and access to economic opportunity. The 31,435 residents living on rural Appalachian roadways need the basics of having better access to schools and hospitals. These road improvements will enhance economic improvements for the region. | Office of the Gallia County Engineer | 46 | 0 to 30 days | \$30,400 |
| Gallia | Gallipolis Regional Outerbelt | The Gallipolis Regional Outerbelt Program will alleviate traffic congestion in the County near the Gallipolis area by allowing traffic traveling north and south on State Route 7 to bypass the City of Gallipolis. This will provide easier access to the U.S. 58. Many businesses in the City of Gallipolis along Eastern Avenue (the main route through Gallipolis) have been losing revenue due to traffic congestion. The City of Gallipolis is in the Appalachian Region of Ohio. This project provides for the economic growth for the city by increasing highway capacity. This project and has been introduced to TRAC without success several times over the last 60 years. | Office of the Gallia County Engineer | 214 | 181 days or more | \$52,900,000 |
| Gallia | Emergency Generator | Vinton Village needs an emergency backup generator to meet current CEPA regulations as the village's wastewater treatment plant to keep the plant operating during power outages. This generator will also be used to provide emergency power to the Vinton Village Town Hall and Vinton Fire Department for use as an emergency shelter during a state of disaster. | Vinton Village | 10 | 0 to 30 days | \$75,000 |
| Gallia | Community Development Activities | Develop and assist in the implementation of specific strategies for meeting the human service and community development needs of the community to spur economic development. This will include working with local business and industry to improve communication among the business community, the Gallia County Department of Job and Family Services and with the County Commissioners. Assist public and private organizations to coordinate community development activities in an efficient, non-duplicative way. Create innovative workforce development activities for low income adults and youth such as resume preparation, interview skills, communication/leadership, conflict management, entrepreneurship/character, and attitude/motivation. Provide transportation services to low income families to help them obtain and/or maintain employment when no other form of transportation is available. Low income is defined as families living at or below 200% of the federal poverty level. Services shall consist of providing roundtrip transportation for: 1) non-emergency medical appointments; 2) emergency medical services; 3) individual case of employment; 4) training courses; 5) other transportation needs to assist individuals in obtaining/maintaining employment. Roundtrip is defined as "from consumer's residence to scheduled destination and back to residence". Transportation will be provided within Gallia County only unless funding allows for out of county travel as well. | Gallia County Department of Job and Family Service | 100 | 0 to 30 days | \$160,000 |
| Gallia | Transportation Assurance Program | Provide transportation services to low income families to help them obtain and/or maintain employment when no other form of transportation is available. Low income is defined as families living at or below 200% of the federal poverty level. Services shall consist of providing roundtrip transportation for: 1) non-emergency medical appointments; 2) emergency medical services; 3) individual case of employment; 4) training courses; 5) other transportation needs to assist individuals in obtaining/maintaining employment. Roundtrip is defined as "from consumer's residence to scheduled destination and back to residence". Transportation will be provided within Gallia County only unless funding allows for out of county travel as well. | Gallia County Department of Job and Family Service | 100 | 0 to 30 days | \$200,000 |
| Gallia | Youth Development Camping Program | To assist families in providing their children with the benefits that come from Summer camping. This project will allow us to continue to send up to 100 Gallia County children (living under 200% of the federal poverty level) to attend a 4-6 summer camp at the Elizabeth C. Evans Outdoor Education Center, Caney Cave 4-H center. English youth participants will participate in educational summer camping activities designed to improve essential life skills, develop leadership and citizenship skills, and develop skills related to workforce development. In addition this project will provide additional funds to develop additional programs which include: leadership, entrepreneurship, and financial literacy. This project will develop knowledge and practices to improve health and nutrition, communication skills, parenting and child care and manage interpersonal relationships like friendships, student/teacher, child/parent, etc. and financial well being. Participants will also develop age-appropriate leadership abilities and become aware of citizenship responsibilities. Participants will learn to set and achieve short and long term goals related to the above. | Gallia County Department of Job and Family Service | 5 | 91 to 180 days | \$26,928 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Gallia | After School Youth Development | Low income eligible youth participants will participate in educational classes and activities designed to improve essential life skills, develop leadership and citizenship skills, and develop skills related to workforce development. Curriculum is designed to meet age appropriate Health, Science, and Math prerequisites set by the State Board of Education. The following curricula will be used as part of After School/ School Enrichment programs: Healthy Rocks from Mississippi State University, Acres of Adventure from The Ohio State University Extension, Jump into Food and Fitness from Michigan State University Extension and Real Money, Real World created by The Ohio State University Extension. In addition individual programs may include: Super Sitters, Chick Embroidery, Weather Together, Go Plants, Rockets Away, Charter Counts, Flirty Science and special teacher requested topics. All curricula have been through the National Extension Review for standards and content. In that these curricula were developed and owned by the different Universities the Gallia County Department of Job and Family Service will have non-exclusive rights to use these training materials. | Gallia County Department of Job and Family Service | 4 | 91 to 180 days | \$67,500 |
| Gallia | Healthy Family Education Program | Eligible participants (Adults under 200% of the federal poverty level) will have the opportunity to participate in educational classes covering healthy family topics including but not limited to: effective family budgeting, nutrition, physical fitness and health, food safety, healthy family communication, and parenting skills. Provide resources and assistance that will increase and individual's employability potential addressing family deficiencies, communication and employment skills. | Gallia County Department of Job and Family Service | 2 | 0 to 30 days | \$24,500 |
| Gallia | Employer Subsidy Program | The purpose of this program is to provide low income individuals an opportunity to obtain new or better employment or move up the ladder in current employment to become self-sufficient and provide employees an incentive to hire participants who are in need of benefits and services to overcome barriers to such employment success. Employers participating in the program shall receive a subsidy for a specific period of time to assist in the cost of hiring or promoting and providing training to the participant. The subsidized job position may be full or part time. "Full time" and "part time" as defined by the employer. Participants in a subsidized job shall be considered regular, permanent employees of the employer. Support services necessary to assist the participant in obtaining or maintaining employment with the employer will be provided. This will encourage employers to build career ladders to enable participants to move into higher skilled and higher paying positions that will lead them toward self-sufficiency as well as improve the local economy. | Gallia County Department of Job and Family Service | 100 | 31 to 90 days | \$200,000 |
| Gallia | Vehicle Purchase Assistance Program | With limited affordable transportation systems in Gallia County, a reliable vehicle can be a critical factor in getting and keeping a job and moving up the career ladder toward financial independence. Lack of access to a vehicle or transportation system causes serious difficulties for parents who juggle work, errands, and transporting children to after school activities, child care and other activities. In addition, low-income workers often have no bank accounts, poor credit ratings, or no history of obtaining loans which results, on average, in low-income workers paying more than other households to purchase and maintain a comparable vehicle. The Vehicle Purchasing Assistance Program (VPAP) will help low-income assistant group overcome these barriers by providing down payment assistance when purchasing a vehicle. Such assistance should assist the adult assistance group member in gaining and/or retaining employment. VPAP is limited to twenty (20) percent of the total purchasing price. Vehicles purchased have to be considered a late model fuel efficient vehicle. Individuals must have available income to make payments which will require budgeting, etc., as part of program. | Gallia County Department of Job and Family Service | 100 | 0 to 30 days | \$150,000 |
| Gallia | Youth Development Camping Program | To assist families in providing their children with the benefits that come from Summer camping. This project will allow us to continue to send up to 500 Gallia County children (being under 200% of the federal poverty level) to attend 4-H summer camp at the Elizabeth L. Evans Outdoor Education Center / Carvers Cave 4-H camp. Eligible youth participants will participate in educational summer camping activities designed to improve essential life skills, develop leadership and citizenship skills, and develop skills related to workforce development. In addition, this project will provide additional funds to develop educational programs which would benefit all campers. Through activity and instruction, the participants will develop knowledge and practical skills in important areas including: health and nutrition, communication and management, problem-solving, leadership (like friendships, student/teacher, child/parent, etc.) and financial well being. Participants will also develop age-appropriate life skills and become aware of citizenship responsibilities. Participants will learn to set and achieve short and long term goals, develop leadership and citizenship skills, and develop skills related to workforce development. Curriculum is designed to meet age appropriate Health, Science, and Math prerequisites set by the State Board of Education. The following curricula will be used as part of After School/ School Enrichment programs: Healthy Rocks from Mississippi State University, Acres of Adventure from The Ohio State University Extension, Jump into Food and Fitness from Michigan State University Extension and Real Money, Real World created by The Ohio State University Extension. In addition individual programs may include: Super Sitters, Chick Embroidery, Weather Together, Go Plants, Rockets Away, Charter Counts, Flirty Science and special teacher requested topics. All curricula have been through the National Extension Review for standards and content. In that these curricula were developed and owned by the different Universities the Gallia County Department of Job and Family Service will have non-exclusive rights to use these training materials. | Gallia County Department of Job and Family Service | 5 | 91 to 180 days | \$26,928 |
| Gallia | After School Youth Development | Low income eligible youth participants will participate in educational classes and activities designed to improve essential life skills, develop leadership and citizenship skills, and develop skills related to workforce development. Curriculum is designed to meet age appropriate Health, Science, and Math prerequisites set by the State Board of Education. The following curricula will be used as part of After School/ School Enrichment programs: Healthy Rocks from Mississippi State University, Acres of Adventure from The Ohio State University Extension, Jump into Food and Fitness from Michigan State University Extension and Real Money, Real World created by The Ohio State University Extension. In addition individual programs may include: Super Sitters, Chick Embroidery, Weather Together, Go Plants, Rockets Away, Charter Counts, Flirty Science and special teacher requested topics. All curricula have been through the National Extension Review for standards and content. In that these curricula were developed and owned by the different Universities the Gallia County Department of Job and Family Service will have non-exclusive rights to use these training materials. | Gallia County Department of Job and Family Service | 4 | 91 to 180 days | \$67,500 |
| Gallia | Ohio Township Fire Substation Project | The project consists of new construction of a fire sub station for Ohio Township - Ohio Township receives fire service from the District 2 Fire Department. The main fire station is located in Ohio Township and the response times and are not optimal for hazardous businesses in Ohio Township and southern Dayton Township. Creation of a fire sub station in Ohio Township will allow quicker response times and save property as well as lives. The \$11.000 Gal Co. District 2 response times average over 20 minutes just to arrive on site. With the completion of this project it is estimated response times will be cut in half. | Ohio Township Trustees | 10 | 0 to 30 days | \$43,000 |
| Gallia | Gallia County GIS Parcel Conversion | The purpose of this project is to initiate the process of creating a digital parcel layer for the whole of Gallia County in order to increase the efficiency of the auditor and engineer and make the information more available to the public. The auditor's database will be included with the digital parcels so that users have the ability to see information about a parcel, such as zoning, acreage, owner name, and deed information with the click of a mouse. Users will also have the ability to query the database for certain attributes and show the parcels that fit the criteria on a map. | Voivovich School for Leadership and Public Affairs | 50 | 0 to 30 days | \$140,000 |
| Gallia | OSU Extension Healthy Family Education Program | The Gallia County Map Digitization Project will meet the Governor's Office of Appalachia goal of developing community assets by making a portion of the county's maps more available to the public and more user friendly. This will decrease the cost of maintenance for the county and allow users to access maps from their home computer. This is a joint project county-wide that will benefit county agencies and residents. TANF eligible participants will have the opportunity to participate in educational classes covering healthy family topics including but not limited to: effective family budgeting, nutrition, physical fitness and health, food safety, healthy family communication, and parenting skills. Provide resources and assistance that will increase and individual's employability potential addressing family deficiencies, communication and employment skills. | The Ohio State University Extension | 1 | 0 to 30 days | \$24,500 |
| Gallia | OSU Extension Youth Development Camping TANF Progr | Participants will develop realistic, proactive goals to manage the family's food dollar and strategically budget funds to sustain the family for an entire month. Participants will establish short, intermediate and long term financial goals. Participants will gain knowledge in food safety, nutrition, and healthy living, as well as family communication skills and parenting skills. The current increases and expected increases in food and energy costs have affected the family budget and forced increases in camping cost. Cost increases have forced families to eliminate activities for their children in order to meet the family needs. Many Gallia County families have more than one child of camp age and can not afford to send them all to summer camp. With funding, it is possible to send TANF eligible children to 4-H Summer Camp at the Elizabeth L. Evans Outdoor Education Center/ Carvers Cave 4-H camp. The youth participants will participate in educational summer camping activities designed to improve essential life skills, develop leadership and citizenship skills, and develop skills related to workforce development. In addition, this project will provide additional funds to develop educational programs which would benefit all campers. In 2008, 539 campers attended overnight camps and 62 attended day camp. This is a 20% increase in overnight camp and 18% increase in day camp from the 2007 camper numbers. With the continued additional funding, we could increase these numbers again and provide 4-H camping to all the eligible Gallia County children. | The Ohio State University Extension, Gallia County | 11 | 91 to 180 days | \$14,102 |
| Gallia | OSU Extension Youth Development School Enrichment/ | TANF eligible youth participants will participate in educational classes and activities designed to improve essential life skills, develop leadership and citizenship skills, and develop skills related to workforce development. Curriculum is designed to meet age appropriate Health, Science, and Math prerequisites set by the State Board of Education. The following curricula will be used as part of After School/ School Enrichment programs: Healthy Rocks from Mississippi State University, Acres of Adventure from The Ohio State University Extension, and Jump into Food and Fitness from Michigan State University Extension. In addition individual programs may include: Super Sitters, Chick Embroidery, Weather Together, Go Plants, Rockets Away, Charter Counts, Flirty Science and special teacher requested topics. All curricula have been through the National Extension Review for standards and content. | The Ohio State University Extension, Gallia County | 1 | 91 to 180 days | \$36,898 |
| Gallia | OSU Extension Community Development Programming | In order to achieve community development goals that will ultimately prevent citizens from entering the public assistance rolls, the Ohio State University Extension, Gallia County will deliver programs targeted to the needs of Gallia County residents. The programming included, but is not limited to the following: develop and assist in the implementation of specific strategies for meeting human service and community development needs of the community; assist public and private organizations to coordinate community development activities in an efficient, non-duplicative way; work closely with the County Commissioners to support Community Development endeavors; develop workforce development activities for adults and youth which would include TANF eligible individuals, and work collaboratively with the Gallia County DJP's Director to target the needs of low-income families. | The Ohio State University Extension, Gallia County | 1 | 0 to 30 days | \$24,500 |
| Gallia | GAHS Athletic Complex | Increasing educational opportunities by providing state, handicap accessible facilities for the youth of our community. | GAHS Athletic Boosters | 100 | 31 to 90 days | \$5,000,000 |
| Gallia | Gallipolis CIPP Project (Cure in Place Pipe) | Sanitary sewer distribution lines, main and lateral, rehabilitation project using a cured in place pipe procedure for sealing 17,586 linear feet of 8", 10", 12", 18" and 21" pipe at 13 locations. In addition, we would rehabilitate 64 manholes. The significant part of the project is to lower inflow and infiltration from overloading our wastewater treatment plant. Our wastewater plant discharges into the Ohio River. The separation of storm water and sewer water will allow us to treat our sewage much more efficiently by providing substantial inflow and infiltration from ground water into into the City's sanitary sewer system. Our wastewater plant is used at 1.4 million gallons per day. During late and floodcity events plant receives 5.5 million gallons per day. We must reduce the groundwater and infiltration to storm sewers. This project would reduce our 11 to 1,025,000 gallons in a major rain event. | City of Gallipolis | 25 | 31 to 90 days | \$2,965,532 |
| Gallia | Gallipolis Farm Road Phase II | Construction of a flood mitigation alternate route to SR 7 is a two-phase project. SR 7 currently travels through Gallipolis on Second Avenue and Spicarno Street, where truck drivers must negotiate a right angle turn followed by another right-angle turn as SR 7 resumes on First Avenue. First Avenue runs next to the Ohio River and often floods. The new Farm Road/SR7 alternate will utilize an existing right-of-way through the Spicarno Street intersection to Mill Creek Road, and then follow that road to an existing railroad bed. Farm Road will follow the railroad bed to OHN Street Mall, where it will meet up with the completed Phase I. | City of Gallipolis | 35 | 181 days or more | \$8,962,000 |
| Gallia | Spruce Street Water Line and Sewer Improvements | The project involves the installation of 4.84 LF of 8" water line, 5.298 LF of 8" sanitary sewer pipe and associated fire hydrants, siphon, sump, service line, manholes, road and driveway repair. This project will replace an existing water fire line with a lengthy extension from an adjoining residential area. The present line is reduced to 1' diameter and inadequate to service even existing homes. The existing water line can provide no fire protection service. The new line will provide water pressure and flow which will allow us to install fire hydrants. There is presently no collection system for sewage and all houses have septic tanks. The condition and effectiveness of these septic tanks leads to a polluted area located next to the Chickashaugh Creek waterway. This project will provide an immediate cure for the pollution which exists. Already one developer would like to build forty (40) houses in this service area, and will proceed as soon as sufficient water and sewer service is available. | City of Gallipolis | 16 | 31 to 90 days | \$486,023 |
| Gallia | Gallipolis Police and Fire Departments Communicati | The Gallipolis PD has one radio capable of communicating on MARCS, which has realized 99.7% aggregate voice coverage in Ohio. This allows Gallipolis to maintain interoperability with other agencies in the region. The local sheriff's office is discussing purchasing exclusively to MARCS while the OSHP has already switched and been on the system several years. This would have the GPD the ability to communicate with other agencies without the ability to communicate directly with the local agencies. This would be a cost effective system along with interoperability with 23,000 other units. With this system, the GPD would be able to communicate with local units and meet the statewide interoperability federal mandate. (\$50,000 cost) The City would create a city wide trunked radio communication system allowing instantaneous voice and data exchange between the GPD and OSHP as well as code enforcement, street water & sewer departments. Funds would provide handheld radios for officers and firefighters as well as mobile radios and data terminals for each cruiser and fire truck. Funds would be mostly used for new equipment. (\$100,000 cost) | City of Gallipolis | 4 | 31 to 90 days | \$150,000 |
| Gallia | Crown City Wastewater System Improvements | Funds would be used to install a completely new wastewater collection system and treatment facility for Village of Crown City, OH. The system includes approximately 33,000 LF of sanitary sewer pipe, one pumping station and a 50,000 gallon per day wastewater treatment plant. We have a struggling Marina & RV Service/boat Carport. We want to close on the Ohio River We hope to increase boating & fishing interest on the Ohio River & Boost our local economy by putting in a 2.53 Marina with a Club House & Fishing Pavilion. We are looking to do 30 year investment Campground. We have already had our master survey done along the river bank & are working with a local engineer & Army Corp of engineer to complete the Marina Project. We currently have had to cut back to 3 employees in order to survive this dry economic. Owners of the business have not taken pay from this business in 3 yrs We feel that the Marina & Campground will be a viable asset to the community in Gallia County, I intend to double our Employees in the first year. This work will be done by local Contractors in Gallia County. The benefit of boating & fishing will benefit all as well as service stations & grocery stores We will bring people in from all over our state as well as other states. Due to the increased sales by OE for their boats supply the rising interest in making it difficult to pay our mortgage and payroll The Boating situation has made it difficult to close deals, help | URS Corporation | 10 | 31 to 90 days | \$4,000,000 |
| Gallia | Marina & Rv | Funds would be used to install a completely new wastewater collection system and treatment facility for Village of Crown City, OH. The system includes approximately 33,000 LF of sanitary sewer pipe, one pumping station and a 50,000 gallon per day wastewater treatment plant. We have a struggling Marina & RV Service/boat Carport. We want to close on the Ohio River We hope to increase boating & fishing interest on the Ohio River & Boost our local economy by putting in a 2.53 Marina with a Club House & Fishing Pavilion. We are looking to do 30 year investment Campground. We have already had our master survey done along the river bank & are working with a local engineer & Army Corp of engineer to complete the Marina Project. We currently have had to cut back to 3 employees in order to survive this dry economic. Owners of the business have not taken pay from this business in 3 yrs We feel that the Marina & Campground will be a viable asset to the community in Gallia County, I intend to double our Employees in the first year. This work will be done by local Contractors in Gallia County. Due to the increased sales by OE for their boats supply the rising interest in making it difficult to pay our mortgage and payroll The Boating situation has made it difficult to close deals, help | Twin Rivers Marina L.L.C. | 12 | | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Gallia | paving secondary road | Blacktopping depressed and highly traveled gravel roads to better serve residents transportation needs as well as increase falling property values. This project will also facilitate a healthier and safer environment by improving road safety and dust issues. | ohio township trustees | 26 | 31 to 90 days | \$329,472 |
| Gallia | Max Eno Road Repair | Replace drain pipes that are currently collapsed due to the age of the pipes (rusted out). Repair slip on side of the road by creek which will retain and divert rainwater runoff (replace existing pipe to collapsed pipe lining water across the road during erosion, etc.). | Morgan Towship | 2 | 0 to 30 days | \$165,000 |
| Gallia | Spruce Street Water Line and Sewer Improvements | The project involves the replacement of the existing water line on Spruce Street and extension of sewer service to Spruce Street. The existing water line is undersized and will be replaced with a larger water line that will provide fire protection to the area. The Spruce Street area does not currently have sewer service from Gallipolis and relies on existing on-site systems. A new sewer line will be constructed to provide sewer service to the area. | Gallipolis City | 0 | 31 to 90 days | \$449,999 |
| Gallia | Gallia County Fiber Repair / Upgrade + Establishme | Replace old/weak poles & tracing as necessary. Clear the right-of-way of vegetation. Extend GCFN 2 miles into the Gallia County Industrial Park. Upgrade carrier interconnections at Network Access Points (NAPs). GCFN, originally an ANET funded educational video network, was recently transferred to the Gallia County Commissioners for Broadband operation in Gallia County. NAPs along the GCFN include Buckeye Rural Electric Coop, Rio Grande Community College and Buckeye JHS. JHS GCFN has carrier fiber interconnections in Rio Grande, AT&T (QOS) and Time Warner Cable. Horizon Telecom, third Internet Service Provider (ISP) is nearby in Jackson, offering a potential third interconnection. Horizon Clinic has offered access to their fiber network extending from the Industrial Park to a WV Clinic location. This project provides multiple ISP redundancy to the GCFN. The GCFN offers the GCFN and the Wireless Coverage of the Rural Expanse initiatives a critical fiber infrastructure with connections to primary tower sites and an industrial park currently without internet access. | gallia county commissioners | 1000 | 31 to 90 days | \$1,045,326 |
| Gallia | Evans Industrial Park - Network Infrastructure Con | ICDIP off ST RT 850 in Gallia County, Ohio. The new communications central system would not include the floor or premise entrances which would be the expense of the tenant once building locations are determined. This project provides the physical infrastructure to complement the proposed Gallia County Fiber Network expansion into the GCFP with access into the Regional Network Access Point (NAP) facility to be located at the Park. The goal of the Southern Ohio Health Care Network initiative, to provide World-Class Connectivity for Industrial Parks is only realized when the fiber optic internet connection actually reaches the tenant's building. The GCFP, when interconnected to the Gallia County Fiber Network expansion would provide multiple Internet Service Provider interconnects and redundant electrical power distribution from both AEP and Buckeye Rural Electric Coop. The NAP building structure, plus the associated power equipment & network electronics are being submitted under a separate project proposal. | gallia county commissioners | 1000 | 31 to 90 days | \$40,000 |
| Gallia | Wireless Coverage of the Rural Expanse + New Prima | systems and network equipment. A new tower structure is proposed for the Primary Tower Site as fiber optic access to Internet Service Providers is critical to high-bandwidth backhaul of network neutral broadband traffic. The Gallia County Fiber Network has fiber optic access to multiple carriers and potential interconnections with the Southern Ohio Healthcare Network and its service providers. The equipping of thirteen Secondary Tower Sites on State of Ohio MARCS tower assets and other tower locations will also be estimated for backhaul infrastructure using the proposed locations as outlined by the Connect Ohio Wireless Assessment of Gallia County prepared by the Ohio State Wireless business Analyst of Connect Ohio. The Gallia County Wireless Assessment Plan Implementation also includes the network access points (NAP) tower and broadband network access to the residential locations. This project is in keeping with the goals of Congressman Zack Space's Connecting Appalachia goals for Wireless Coverage of the Rural Expanse. | gallia county commissioners | 1000 | 31 to 90 days | \$1,789,419 |
| Gallia | Vinton Wastewater Treatment Plant Improvements | The Village of Vinton needs to complete improvements to their wastewater treatment plant to optimize the plant's reduced costs of operation. The Village of Vinton has a Median Household Income of \$25,417 and a Low-to-Moderate Income level. Undertaking this project without assistance from Stimulus Package funds will place a hardship on residents of the community. | Vinton, Village of | 10 | 31 to 90 days | \$50,000 |
| Gallia | Crown City Wastewater System | Project Outcome: Optimization of the WWTP The Village of Vinton will gladly provide additional information to support this request for Stimulus Package funds. The Village of Crown City is located in Gallia County, Ohio. The Village has a MH of \$25,000 and a LM level of 55.5%. The village is currently sewer-served and has falling on-site wastewater treatment systems throughout the village. Untreated or partially treated waste water is pooling in yards, roadside ditches, and flows into a local creek and the Ohio River. There is an existing health hazard and pollution of the environment. Ohio EPA has met several times with village representatives to assist them to construct a waste water collection and treatment system. The village has completed planning for the system, but has delayed moving forward with construction due to financial concerns and the lack of grant funding for the project. Project Outcome: 67' house connection lines - 6,056 ft 4" PVC pipe - 21,736 ft 4" PVC pipe - 11,000 ft Clearances - 12 ea Manholes - 63 Wyes - 248 Sewer Tanks - 33 ea Package treatment plant - 1 Lift - 6 ea The Village of Crown City will gladly supply any additional information needed to support this request for Stimulus Funds. | Crown City, Village of | 35 | 91 to 180 days | \$3,500,000 |
| Gallia | SR 850 Sanitary Sewer Project | The project will provide sanitary sewer to the interchange of SR 850 and US 35 in Gallia County. This area currently has a proposed 700 acre development that is expected to develop commercial lots for businesses and commercial applications. There is available water but sanitary sewer service in this area is proving an obstacle for potential tenants. | Stantec Consulting Services, Inc. | 10 | 91 to 180 days | \$850,000 |
| Gallia | Williams Ridge Water Line Extension Project | 23,500 lineal feet of 4" PVC water line, valves, flush hydrants, meter settings and appurtenances to provide potable water service to 23 households and one department store. The water hauler will be a 10" diameter pipe with 10" diameter drop off to dig wells are used with water supplies contaminated by acid mine drainage and/or -col contamination from livestock operations. The cost of hauling water hauled in many cases exceeds \$100/month/household excluding any distribution equipment needed to maintain the stored water free of pathogenic organisms. | Gallia County Rural Water Association, Inc. | 10 | 0 to 30 days | \$396,325 |
| Gallia | JB-Nets Rural Gallia County Broadband Connectivity | Updated Version of previous submission. Wireless broadband infrastructure capacity would be increased and high speed wireless service would be extended to 85-90% of Gallia County by erecting 17 addition towers to link Gallia County's population centers, a | JB-Nets, LLC (Broadband Wireless ISP) | 5 | 0 to 30 days | \$1,012,230 |
| Gallia | Appalachian Government Facility Energy Efficiency | Appalachian Government Facility Energy Efficiency Program will reduce the amount of energy usage, reduce fossil fuel emissions, and improve energy efficiency in transportation and buildings by retrofitting the buildings with efficient heating/cooling units, improving insulation of structures, using energy efficient lighting, and replacing snow and ice removal vehicles with lower fossil fuel emission vehicles. | The Office of the Gallia County Engineer | 35 | 0 to 30 days | \$811,000 |
| Gallia | Gallia County Diesel Emissions Reduction Program | The Gallia County Diesel Emissions Reduction Program is part of the Gallia County Engineer's Green Initiative, which includes purchasing new pump trucks to replace existing vehicles in order to reduce the diesel emissions. This project shows for the replacement of 8 emission lowering pump trucks. | The Office of the Gallia County Engineer | 50 | 0 to 30 days | \$625,000 |
| Gallia | HMC Wellness and Rehabilitation Therapy Project | Provide the community and the hospital with a center promoting community wellness and a full scope of therapy services for acute rehabilitation and treatment. The 25-30,000 square foot center will include a full cardiovascular rehabilitation area with treadmills, stair climbers and exercise bikes. It will also include strength training equipment and an indoor walking/jogging track for community and therapy use as well as a full scope of services related to independent physical therapy, occupational therapy and speech therapy. An 8-lane lap swimming pool for special conditioning and exercise is planned. In addition, a specialized pool (8' x 30') for arthritis therapy groups will be provided as well as a childcare center for parents with children using the center (2 hr limit). A multi-purpose activity center and education rooms for various classes for but not limited to healthy lifestyles, good nutrition, parenting, CPR and baby-sitting classes is planned. Will be center like this within a 45-mile area. | Holzer Medical Center | 15 | 181 days or more | \$6,000,000 |
| Gallia | Technology Grant | Computer systems for for High School, Junior High and Elementary buildings. Cost system for high school. News room equipment for each building to do broadcast journalism. Many states have implemented a 1 to 1 ratio of computer to students. We would like the opportunity to be one of the first in Ohio to do the same. We were fortunate to start our new building process 2 years ago and used all of our funds to get these school projects going. Since that time the state funding issues have caused great financial hardship on our districts as well as the OSFC changing rates mid stream and no longer covering a lot of the technology equipment they did 3 years ago leaving our district to try and find funds to equip these new buildings. | Gallipolis City Schools | 6 | 31 to 90 days | \$700,000 |
| Gallia | Agricultural Education Science & Exposition Center | The Agricultural Education Science and Exposition Center of Gallia County is an approximately 30,000 square foot building to be constructed on the Gallia County Junior Fairgrounds. The building will allow the fair to provide a safe year round facility to better serve the community and surrounding area as a place of youth education, community events, meetings, receptions, banquets, business/industrial events, shows, meetings, youth related equine and educational activities, flea markets and farmers markets. The current fair facilities is located on a flood plain and floods as many as 6 times in a year, causing the fear of safety, loss of life and/or property. The new building would be constructed on a site that is nearly 100% ready to build and is out of the flood plain. It is estimated that the project will add 3 full-time jobs and part-time jobs plus several temporary construction jobs. The increase in retail income and the attraction of additional business and visitors will result in income of approximately \$50,000-\$100,000 and an economic impact of \$500,000 annually. Expansion of public library services areas for increased community service and programming. Estimated additional square footage - 2,500. We recognize that in economic downturn, citizens turn to their public libraries for increased services. We have implemented monthly programs such as family movie nights, author visits and family programming. This funding will allow us to expand into our public library areas and provide additional meeting room space. | Gallia County Agricultural Society | 5 | 91 to 180 days | \$2,100,000 |
| Gallia | Public Library expansion | The emergence of green (RE) technologies necessitates a green collar workforce that is trained in basic mechanical systems, energy efficiency (EE), and renewable energy (RE) technologies. Green Energy Ohio has already trained higher level EE and RE training projects in rural Southeast Ohio. Providing trained secondary and post secondary students in the hands-on skills necessary to build, install, and maintain renewable energy systems, green buildings and EE manufacturing will strengthen the local labor force and increase labor assets for economic growth and development. We seek to close the skill gap in advanced manufacturing and alternative energy construction that already exist in rural Southeast Ohio. The "train globally act locally" philosophy must begin at rural, career technical institutions for continued growth and advancement of green technologies. Our request is for the purchase and integration of green technologies into existing curricula and instructional practices. Funds will be utilized for training equipment such as PLCs, CNC machines, robotic controls, mechanical systems/pneumatics/hydraulics systems, solar technologies, lasers, geothermal applications, and the construction of real-life laboratory modules that incorporate EE and RE technologies. | Gallia County District Library (Bossard Memorial) | 3 | 181 days or more | \$600,000 |
| Gallia | Green Collar Technology Education | County EMS personnel presently operate from one location that serves 30,841 residents covering 469 square miles. The one Gallipolis location serves 10,147 residents in northern Gallia County and southern townships in Jackson County. The construction of a green technology emergency medical station on the campus of Gallia-Jackson-Vinton JVS will solve multiple issues as they new call with response time, and will serve over 10,147 residents in northern Gallia County and southern townships in Jackson County. The construction and continued operation of the green station will also provide a working training facility and clinical laboratories for EMT students, fire responders, firefighters, and green technology students. JVS secondary and post-secondary students in multiple disciplines will participate in selected phases of the construction to provide additional training opportunities. This project involves partnerships, cost savings, green technology construction and training, multi-func- | Gallia-Jackson-Vinton JVS | 26 | 0 to 30 days | \$355,000 |

| Geauga | DOWNTOWN SANITARY PUMP STATION | CURRENT PUMPING STATION IS AT CAPACITY AND RESTRICTS SANITARY SEWER FLOW TO WASTEWATER PLANT. NEED TO REPLACE THE EXISTING PUMP STATION WITH A LARGER PUMP STATION THAT CAN HANDLE THE VOLUME OF SANITARY SEWER FLOW. | VILLAGE OF MIDDLEFIELD | 0 | 181 days or more | \$2,000,000 |
| Geauga | GEA - Washington Street Signal | Traffic Signal Upgrade at the intersection of Washington Street and Snyder Road in Geauga County. The existing signal is old technology. Washington Street used to be a federal highway. | Geauga County Engineer's Office | 10 | 31 to 90 days | \$40,000 |
| Geauga | GEA - Auburn Road (L & M) | Asphalt Resurfacing of about 2.68 miles of county roadway in 2010 in Newbury and Munson Townships in Geauga County. This office has requested CEAD federal highway funds for this project, but this project could not be added to the CEAD list due to a shortage of funds statewide. | Geauga County Engineer's Office | 10 | 181 days or more | \$600,000 |
| Geauga | GEA - Auburn Road (I & J) | Asphalt Resurfacing of about 1.87 miles of county roadway in Newbury Township in Geauga County. This office has requested CEAD federal highway funds for this project. In the past, this project could not be added to the CEAD list due to a shortage of funds statewide. | Geauga County Engineer's Office | 10 | 31 to 90 days | \$400,000 |
| Geauga | GEA - Washington Street (A & B) | Asphalt Resurfacing of about 2.19 miles of county roadway in Russel Township and South Russel Village in Geauga County. This project is approved for federal highway funds by NADCA in FY2010. This county roadway used to be a federal highway. | Geauga County Engineer's Office | 10 | 31 to 90 days | \$530,000 |
| Geauga | GEA - Wilson Mills Road (A - C) | Asphalt Resurfacing of about 2.74 miles of county roadway in Chester Township in Geauga County. This project is approved for federal highway funds by NADCA in FY2010. | Geauga County Engineer's Office | 10 | 31 to 90 days | \$600,000 |
| Geauga | GEA - Wilson Mills Road (D - F) | Asphalt Resurfacing of about 2.29 miles of county roadway in Chester Township in Geauga County. This project is approved for federal highway funds by NADCA in FY2011. | Geauga County Engineer's Office | 10 | 31 to 90 days | \$540,000 |
| Geauga | GEA - Nauvoo Road (A) | Total Asphalt Resurfacing project of about 1.44 miles of county roadway in Middlefield Township in Geauga County. This project is currently approved for OPWC funding in the amount of \$400,000.00 and is ready to bid. | Geauga County Engineer's Office | 10 | 31 to 90 days | \$490,000 |
| Geauga | GEA - PM4 - VAR | The application of replacement pavement centerline markings to various county roadways in Geauga County. This project is currently approved for CEAD funding in the amount of not to exceed \$150,000.00 and is ready to bid. The total project cost is estimated to be \$200,000.00. | Geauga County Engineer's Office | 3 | 31 to 90 days | \$70,000 |
| Geauga | GEA - PM5 - VAR | The application of replacement pavement centerline markings to various county roadways in Geauga County. This project is currently approved for CEAD funding in the amount of not to exceed \$150,000.00 and is ready to bid. The total project cost is estimated to be \$200,000.00. | Geauga County Engineer's Office | 3 | 181 days or more | \$70,000 |
| Geauga | GEA - Wilson Mills Road (G-L) | Asphalt Resurfacing of about 4.50 miles of county roadway in 2010 in Munson and Chadron Townships in Geauga County. This office has requested CEAD federal highway funds for this project, but this project could not be added to the CEAD list due to a shortage of funds statewide. | Geauga County Engineer's Office | 10 | 181 days or more | \$800,000 |
| Geauga | GEA - Auburn Road (N & O) | Asphalt Resurfacing of about 1.85 miles of county roadway in 2010 in Munson Township in Geauga County. This office has requested CEAD federal highway funds for this project, but this project could not be added to the CEAD list due to a shortage of funds statewide. | Geauga County Engineer's Office | 10 | 181 days or more | \$500,000 |
| Geauga | GEA - Hemlock Road (Y&Z) | Asphalt Resurfacing of about 1.12 miles of county roadway in Russel Township and South Russel Village in Geauga County. This project is approved for federal highway funds by NADCA. | Geauga County Engineer's Office | 10 | 31 to 90 days | \$60,000 |
| Geauga | GEA - GR2 - VAR | Replace outdated guardrail along various county highways in Geauga County. This project is approved for federal highway funds by NADCA. Please contact my email address on all the projects I submitted earlier this morning. I had a typo. | Geauga County Engineer's Office | 7 | 31 to 90 days | \$390,000 |
| Geauga | PLEASE CORRECT MY EMAIL | Sorry about that. Also, think that all the projects would be considered in an existing program (FEDERAL HIGHWAY FUNDING) and not a new program. I was not sure of your definition and called a couple of my submissions "new". | Geauga County Engineer's Office | 0 | 0 to 30 days | \$0 |
| Geauga | Parking Lot Repaving | Repaving of the driveways and parking lot at the Montebarn Center in Chesterland. The total area is 245,000 square feet. This was on our agenda to do with our federal dollars, but we have taken a \$45,000 loss in state funds already. | Geauga County Board of MRDD | 30 | 91 to 180 days | \$600,000 |
| Geauga | Transportation Facility | Seize and hold the line on the Stimulus Package. We are looking to build a 10,000 square foot transportation facility to service the vehicles of both the Geauga County Board of MRDD and the West Geauga Local School District. This job is part of a collaborative effort that would put around 50 construction workers to work and free up funds to hire another 2-10 employees employed for the two agencies. | Geauga County Board of MRDD | 60 | 91 to 180 days | \$2,000,000 |
| Geauga | Rural Broadband Geauga County | Several townships in rural Geauga County do not have broadband connectivity. There are three industrial parks within this area that do not have connectivity as well. Connectivity will allow expansion in the Industrial Parks and will thereby create more jobs. AT&T is the provider for the area. They will not provide access due to the rural circumstances. We have a mapping of the area affected that can be sent separately if desired. Thank you. Revised process are being sought. | Geauga County Community & Economic Development | 100 - 400 | 31 to 90 days | \$200,000 |
| Geauga | Weston Troy Industrial Park - | Phase I Road 1,332 lf Sewer 1,322 lf (on-site) Water 1,322 lf (on-site) Phase II Road 1,125 lf Sewer 1,125 lf (on-site) Water 1,125 lf (on-site) Storm/Fire pond 12 acres The developer for this park is Mark Horton of Weston Development Co. LLC. The site area is 107 acres The total under roof will be 794,121 sf This project will include the construction of a 35,000 square foot mental health center providing enhanced access to behavioral health services for northeast Ohio residents. Construction will be completed in 18 to 24 months. A detailed needs analysis and design plan for the project has already been completed by the Board. This planning document will dramatically reduce the time necessary to begin the construction phase. The Board has access to land and matching acres are available. The facility will significantly reduce current operating costs by combining up to 5 scattered sites under one roof, while providing clients and families easier access to multiple mental health and substance abuse services in a central location. Savings will be realized to the economy through the hiring of additional permanent health care workers. Planning and construction will immediately provide jobs for up to 100 construction workers, engineers, and architects. The facility, when completed will house up to 70 employees and serve approximately 6,000 Lake, Cuyahoga, Trumbull, Ashland, Portage, & Geauga County residents in the first year of operation. | Geauga County Community & Economic Development | 1,000 | 91 to 180 days | \$1,100,000 |
| Geauga | Multiple Building Roof Projects | Multiple Building Roof Replacements - District A complete study has been submitted by a roofing consultant. The stimulus funding is to replace or repair primary and secondary areas that are in need of immediate work. | West Geauga local Schools | 100 | 181 days or more | \$6,000,000 |
| Geauga | Middlefield Bog Wetlands - Wetland Protection and | Program WPCFL DEPA DEFA approved the project for WRRSP funding in 2009, however, sponsorship was not secured and the project had to be removed from the final 2009 WRRSP Project Priority List. WRRC currently has the project under contract and will transfer the property to Geauga Park District. This is a green infrastructure project focused on preservation and restoration of wetlands and streams. The project protects Akron's water supply. | Western Reserve Land Conservancy | 3 | 91 to 180 days | \$1,000,000 |
| Geauga | Orchard Hills - Stream and Wetland Restoration | Planning and Design Completed -- Prepared to Implement -- Contract Secured with Landowner, funding would complete project. | Western Reserve Land Conservancy | 5 | 91 to 180 days | \$350,000 |
| Geauga | Chagrin Falls Park Sewer | Planning and Design Completed -- Prepared to Implement Restoration Activities. This replacement sewer line serves a low income mobility community. Typically the cost to upgrade the sewer lines is passed to the users. This would be onerous to the LHM residents of the Chagrin Falls Park Community of 250 residents. | Geauga County | 3 | 91 to 180 days | \$750,000 |
| Geauga | Geauga Enhanced Access Project | The entire project is 30,700 lf of sewer line replaced. This project will include the construction of a 35,000 square foot mental health center providing enhanced access to behavioral health services for northeast Ohio residents. Construction will be completed in 18 to 24 months. A detailed needs analysis and design plan for the project has already been completed by the Board. This planning document will dramatically reduce the time necessary to begin the construction phase. The Board has access to land and matching acres are available. The facility will significantly reduce current operating costs by combining up to 5 scattered sites under one roof, while providing clients and families easier access to multiple mental health and substance abuse services in a central location. Savings will be realized to the economy through the hiring of additional permanent health care workers. Planning and construction will immediately provide jobs for up to 100 construction workers, engineers, and architects. | Geauga | Counseling Services for Homeless Victims of Domestic | These programs target individuals who are homeless as a result of domestic violence. Services provided include: diagnostic assessment, individualized counseling, advocacy and peer support management. Under the supervision of a licensed professional, clients develop an individualized service plan consisting of goals aimed at developing independent, violence-free lives. They are educated about the signs, dynamics and effects of the abuse on themselves and their children, taught coping skills, added in the healing process and instructed on healthy relationship building. Expected outcomes include meeting the physical, emotional and psychological needs of domestic violence victims who are homeless due to their situation, and providing them critical resources necessary to stabilize their living situation and create and maintain independent, healthy homes. Freed from the power and control of an abusive partner, former victims are then able to be productive citizens in the workforce, and so good role models for their children and contribute positively to the community and society in general. | Womensafe, Inc. | 3 | 0 to 30 days | \$47,872 |
| Geauga | Geauga County Broadband Expansion Project | Extension of OneCommunity fiber optic infrastructure from Concord Township to downtown Chardon, the site of Geauga County offices, Chardon Historical schools, the Geauga Public Library and a thriving downtown area. Funds would be used to build a fiber infrastructure and create a "head end" for high speed broadband infrastructure, linking Geauga and Lake County stakeholders to expand education, arts, civic and economic development potential. At present, the project would be led by the Chardon Community Foundation. | ThetaSquared, LLC | 50 | 91 to 180 days | \$250,000 |
| Geauga | Construct Parallel T/W | Construct Parallel Taxiway. | Geauga County Airport | 15 | 31 to 90 days | \$800,000 |

|----------------|---|--|---|----------------|--------------------------------|---------------------------|
| Geauga | Emerald Rose | The Emerald Rose project is an innovative development in rural Geauga County that will provide housing for 18 mental health residents seeking intensive and progressive support services. The address is 4690 Nash Road, Troy Township, Ohio 44022. The project is a multi-building facility located in a rural setting that will offer residents a campus environment ideal for intervention treatments such as agriculture and art therapy. The site will be developed with a service road, parking lot and waste treatment facility using an Active Aeration system. The goal is to expand on the plan to include a greenhouse and Phase II housing development. The project has been awarded an allocation of HUD 2011 Capital Advance funds. Additional funds will be needed to provide for the development to create the campus environment needed. We propose to secure \$467,000 from the Cleveland Foundation, \$500,000 from the Federal Home Loan Bank AHP Program, \$750,000 in HDGF Grant funds from OHCF for a Permanent Supportive Housing. It is a \$3,000,000 project. | Famicos Foundation | 6 | 91 to 180 days | \$1,000,000 |
| Geauga | Geauga Early Childhood Project | Collaboration between Geauga ESC and Cardinal Local Schools on the re-posting of an elementary school bldg, renovation of that bldg, and hiring or reassigning personnel to create high quality, research based instruction and support for the children and their families. Up to 10 kindergarten children will have access to full-day/whole-day kindergarten. 15 families with low income children will have access to high quality, OOE based program at title or non-title (ELI) program. 8 preschoolers with disabilities will have centralized preschool services (OOE). 10 preschool children from the community will attend (attend). Up to 1 kindergarten aged children with autism spectrum disorders will have high quality research based programming and services (district of residence support). 4 teachers, one school social worker, 8-10 ed asst., speech pathologist, occupational therapist, one school nurse, will retain their positions or need to be hired to provide services. 1 custodian, 1 bldg clerical asst., 1 cafeteria worker, additional time for bus drivers will be required. 1 full time administrator. This project will also incorporate an architect and various bldg trades asst. | Geauga County Educational Service Center | 17 | 31 to 90 days | \$750,000 |
| Geauga | Cement Stabilization and Hard Surfacing of TR118 P | Two miles of gravelled roads to be paved completely the 4 mile road and connecting it to county and state highways. Health issues for severe dust complications will be eliminated. Property Values will be stabilized. | Huntsburg Township Board of Trustees | 20 | 91 to 180 days | \$640,000 |
| Geauga | Cement Stabilization & Hard Surfacing of 16 miles | 16 Miles of gravelled roads will be hard surfaced. Connecting many township roads to state and county roads. This will eliminate severe dust conditions that create health problems. Property values will be stabilized. | Huntsburg Township Board of Trustees | 150 | 91 to 180 days | \$4,000,000 |
| Geauga | Hard Surfacing of Bundysburg Road | Hard surface a section of a multi-lane and multi-lane gravel road. This project will connect to two state roads and eliminate severe dust conditions that affect health of the Amish Community. The Amish have no electricity and must leave their windows open. Large industrial businesses use this road with heavy trucks. | Huntsburg Township Board of Trustees | 20 | 0 to 30 days | \$200,000 |
| Geauga | Government Office Addition | This project will provide township offices for the fiscal officer and zoning departments as well as upgrade the gym facility to handicap accessibility. New HVAC to existing and additional structure. The gym is used by local organizations for youth and adult recreational programs. The addition of government offices will allow for accessibility to local government services and resources. | Huntsburg Township Board of Trustees | 10 | 91 to 180 days | \$120,000 |
| Geauga | Develop Telemedicine Network | To Develop network for Telemedicine services. | Community Health Centers of Ohio | 30 | 0 to 30 days | \$450,000 |
| Geauga | Modular classroom addition to our Elementary school | We are adding a 10 classroom modular addition to Burton Elementary School. We also want to build a gym on the site. The modular building also has two bathrooms and an office space. The other elementary building in our district will be closed and those students will be housed at Burton Elementary which is why we need an additional classroom space. We need an additional gym to host physical education classes. Our current gym also serves as a cafeteria for lunch. The additional 150 students will make it difficult to host physical education classes. Our elementary building is a K-4 building. | Berkshire Local Schools | 20 | 31 to 90 days | \$2,000,000 |
| Geauga | Walk-in Showers | Replace a total of 20 bath tubs in low income housing trailer units (both family and elderly/disabled) units with walk-in shower stalls. Walk-in showers with grab bars. Currently, units have tubs. Expected outcome is to provide safety and accessibility for elderly and disabled residents. | Geauga Metropolitan Housing Authority | 10 | 31 to 90 days | \$120,000 |
| Geauga | Range Hoods | In an effort to reduce significant heat loss and subsequent utility consumption in low income housing units, we need to install range hoods with recirculated range hoods. Desirable outcome includes less utility expense for the low income tenants and the public housing authority. | Geauga Metropolitan Housing Authority | 5 | 0 to 30 days | \$9,675 |
| Geauga | Energy Star Air Conditioners | Replace 127 inefficient air conditioning wall units at two public housing elderly / disabled sites. Utilize Energy Star product to increase efficiency and decrease utility costs. | Geauga Metropolitan Housing Authority | 5 | 31 to 90 days | \$63,500 |
| Geauga | Electric range wiring | Install 87 load centers and wiring for 87 electric ranges at two public housing family sites. Preferred outcome includes increasing the safety of residents, reducing a loss expense, energy expense, and producing an economy of scale factor with ALL of our sites for electric ranges and replacement parts. | Geauga Metropolitan Housing Authority | 10 | 31 to 90 days | \$69,600 |
| Geauga | BERKSHIRE WWTP ENLARGEMENT | EXIST: SEWAGE PLANT ENLARGEMENT Final development of a comprehensive MHR/MSRP management system so that it can be deployed in a SaaS model. This will be made available to non-profit and for-profit medical institutions with accessibility issues on the internet with patients being able to access their own information via smartphone. | WESTERN RESERVE CONSULTANTS INC Professional Technology Services, Inc. | 45 10 | 91 to 180 days 0 to 30 days | \$260,000 \$950,000 |
| Geauga | Health Management Infrastructure development | We have developed a 1.8 meter wind turbine blade for small wind driven turbines. Funds are needed to develop electrical generator, start up manufacturing cost and marketing. | Multi-Wing America Inc | 20 | 181 days or more | \$1,000,000 |
| Geauga | Winddynamic Small Wind Generators | I would like to cleanup storm damaged trees, brush and branches, and use the wood for heating the house. | Dale Kramer (Storm cleanup) | 3 | 0 to 30 days | \$10,000 |
| Geauga | Storm Cleanup | I am 25 yrs old and I would like to purchase a foreclosed house that is in disrepair. I would like to have the house torn down and have a new house built on the land. This should put a few people to work on construction. Please help me get a head start on building a better future for myself. | Chris Miller | 2 | 0 to 30 days | \$200,000 |
| Geauga | Housing | Transition to energy-efficient self-sustaining data center for hosting of educational and non-profit systems. | Professional Technology Services, Inc. | 2 | 0 to 30 days | \$220,000 |
| Geauga | Green data center | The money I requested is for 20 new windows, a new roof, and to blow in more insulation. This would bring down my heating bill and also improve the value of our house. Also this would make our neighborhood keep up the appeal that I deserve. | warm our house | 5 | 0 to 30 days | \$35,000 |
| Geauga | warm our home | Expand the existing wastewater treatment facilities from 275,000 GPD to a 400,000 GPD Facility using membrane bioreaction technology (MBR) process. The expected outcome will be to increase the hydraulic capacity of the plant to accommodate inflow problems. | Village of Burton | 2 | 181 days or more | \$6,320,000 |
| Geauga | WWTP Expansion | This is a resubmission. The only change is the Timeframe To Start. | West Geauga Local Schools | 100 | 31 to 90 days | \$6,000,000 |
| Geauga | Multiple Building Roof projects | More than half of all homeless women and children are attempting to escape from domestic violence. The funds requested would serve as a required match for Ohio Department of Development (ODOOD) monies received by WomenSafe and allocated to eligible residents of our emergency domestic violence shelter. Nearly five percent of WomenSafe's residents are eligible for ODOOD assistance, because their incomes are 35% below the median income. Assisting them in finding housing and helping them overcome the initial economic barriers they face are critical in reestablishing healthy homes, finding gainful employment, and stopping the familiar cycle of domestic violence from passing on to the next generation. Without financial assistance, domestic violence victims are unable to establish independent, violence-free homes, and either remain homeless or are forced to return to the abusive relationship. | WomenSafe, Inc. | 100 | 0 to 30 days | \$32,095 |
| Geauga | Direct Housing Assistance for Homeless Victims of | I work in the Auto business and due to the tragedy of hurricane Katrina, I support my daughter and two infant grandchildren who were left homeless. My daughter is unable to work due to many health issues due to the hurricane. Her soon to be ex-husband is a dead beat Daddy. It will take at least \$500.00 to put my house in order to raise additional family and work in a business that my sister has dropped to receive monthly wages. I need help ASAP. Thank You, Donald Chitareas | BO's Katrina Refugee Shelter | 3 | 0 to 30 days | \$45,000 |
| Geauga | Katrina Shelter | Purchase of vacant, unbuildable three acre lot for the purpose of turning the lot into a soccer/recreation field for neighborhood youths. Purchase of necessary equipment for maintenance of recreation field. Planting of greenery/landscaping for aesthetic improvement of the general subdivision. | Charles H. King, Attorney | 12 | 31 to 90 days | \$165,000 |
| Geauga | Auburn Springs Block Renewal | Charbon Township: Resurface Auburn Road from Mentor Road to GeaugaLake County Line | NOACA | 13 | 91 to 180 days | \$600,000 |
| Geauga | Auburn Road (Sections S-U) | Provide Partnership Facilitation Services to governmental agencies willing to share services to reduce costs and to promote regional approaches to addressing governmental projects. | Point-Forward Consulting, LLC, a Strait-Enterpr | 1 | 31 to 90 days | \$20,000 |
| Geauga | Public Partnership Facilitation Services | The purpose will be to prepare the agencies for working together on the newly created partnership. Community services multi building facility for child and adult day care, youth education programs, women's assistance, men's leadership, temporary emergency housing, homeless prevention and life skills training, health and wellness facility, entrepreneurship center for community and school functions, mediation facility and community food bank/clothing services in a "green" environment. Helping needy help themselves and giving back at same time. | SOS LLC | 950 | 0 to 30 days | \$12,000,000 |
| Geauga | Relationship Center | This project provides for repaving the entire length of Wilson Mills Road within the City of Chardon, approximately 4.900 lineal feet. | City of Chardon | 35 | 31 to 90 days | \$458,900 |
| Geauga | WILSON MILLS ROAD REPAVING | The subject improvement includes two major components. First, it includes the widening and realignment of Park Avenue at its intersection with Wilson Mills Road to increase intersection capacities, bring the intersection angle in conformance with current design standards, and to provide for the future extension of Park Avenue. Second, the improvement includes correcting sight distance issues at the intersection by recontouring and re-profiling approximately 1,000 feet of Wilson Mills Road, about 500 feet each side of Park Avenue. Supplemental items will be improvements to the storm drainage system, new pedestrian facilities, sidewalks, and intersection signage. The funds will be used to increase intersection capacities and bring the intersection angle into conformance with current design standards at the intersection of Park Avenue and Wilson Mills Road. Additionally, the funds will be used to correct sight distance issues by re-profiling approximately 1,000 feet. | City of Chardon | 35 | 31 to 90 days | \$1,606,900 |
| Geauga | PARK AVENUE REALIGNMENT AND SIGHT DISTANCE IMPROVE | This project provides for asphalt resurfacing of ten (10) local streets, approximately 14,080 lineal feet. | City of Chardon | 20 | 91 to 180 days | \$1,022,100 |
| Geauga | LOCAL STREET REPAVING-CHARDON | Help feed and provide shelter and keep utilities on for an additional 20 families. These individuals are able to pay their bills more regularly and have more stability with respect to utility payments. This helps prevent medical costs for individuals with vision loss are 27% to 47% higher than those with normal vision due to increased risk of falling, depression, social isolation, and ultimately a greater tendency to be disabled and enter nursing home care. | United Way Services of Geauga County | 2 | 0 to 30 days | \$20,000 |
| Geauga | Emergency Food and Shelter Program | EnVISION Independence is a 6-week program operated by Cleveland Sight Center designed to provide seniors who are losing their vision with the skills necessary to maximize their independence. The program consists of group counseling, led by a licensed social worker, to help seniors deal with the devastation of losing their vision. It also includes extensive vision rehabilitation, which teaches the techniques necessary for seniors to safely maintain independence in their homes. Topics covered include mobility skills, safe cooking and cleaning skills, among other day-to-day tasks. All components of the program are delivered by certified rehabilitation specialists. Funding will allow the agency to begin the program in Geauga County, Ohio. It would also allow us to create a new program in Strongsville, Ohio that would serve seniors in Cuyahoga and Medina Counties. | Cleveland Society for the Blind, dba Cleveland Sig | 2 | 31 to 90 days | \$250,000 |
| Geauga | EnVision Independence | South Russell, Bainbridge Township: Resurfacing Washington Street from the Chagrin Falls Village East Corporation Line to SR 306 (Chillicothe Road) PID No. 82568 STIP ID #2938 | NOACA | 13 | 31 to 90 days | \$600,000 |
| Geauga | Washington Street (A&B) | | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Geauga | Wilson Mills Road (A-C) | Chesler Township: Resurfacing Wilson Mills Road from County Line Road (TR 93) to SR 306 (Chillicothe Road) PID No. 85567 | NOACA | 13 | 31 to 90 days | \$600,000 |
| Geauga | Wilson Mills Road (D-F) | Chesler Township: Resurfacing Wilson Mills Road from SR 306 (Chillicothe Road) to Heath Road (at Chesler/Murson Township Line) PID No. 85699 | NOACA | 17 | 31 to 90 days | \$750,000 |
| Geauga | Ambulance Purchase | Purchase of a 2009 ambulance from an Ohio ambulance manufacturer in order to provide for the health and safety of the residents of Russell Township, Geauga County, Ohio and neighboring communities that have mutual assistance with Russell Township. | Russell Township Fire Department | 5 | 91 to 180 days | \$180,000 |
| Geauga | Washington St. (C&F) | Purchasing an ambulance from an Ohio ambulance manufacturer will help to keep jobs in Ohio! Bairbridge Twp., Auburn Twp.: Resurface Washington St. (C&F) from SR-306 (Chillicothe Rd.) to Murn Rd. | Northeast Ohio Ambulance Coordinating Agency (NOACA) | 13 | 91 to 180 days | \$600,000 |
| Geauga | WILSON MILLS SANITARY SEWER PROJECT | The Ohio Environmental Protection Agency (OEPA) has required the City to install sanitary sewers on parts of Wilson Mills Road in order to eliminate individual septic systems in these areas. This project provides for the installation of a sanitary sewer along ~1,500 linear feet of Wilson Mills Road. This line is a portion of the Southwest Sanitary Sewer in the City of Chardon. This project will improve groundwater quality with the elimination of failing septic systems. The project has been awarded and is ready to proceed immediately. Potential Program: Ohio's Water Pollution Control Loan Fund (WPCFLF). | City of Chardon | 35 | 0 to 30 days | \$579,740 |
| Geauga | Public Safety Radios | Replace all of our outdated - analog mobile and portable public safety radios in our fire trucks and ambulances. These radios are compatible with the Ohio communications plan and incorporate interoperability with Ohio marcs radio systems and with the Geauga County interoperable radio system. Radio purchase would be prioritized with Ohio vendors under the Ohio cooperative purchasing group in order to save money in Ohio. | Russell Township Fire Department | 6 | 91 to 180 days | \$167,000 |
| Geauga | Put the young minds to work for the Green future o | Ohio (8 local governments) should fund a Science fair competition that encourage students to work on local businesses that has potential of creating sustainable green technologies that can create lasting green jobs (and have potential to export the technology to other counties). Fund a web site where businesses can submit their entry and be connected to these students. Once local winner is chosen they can advance to regional then state. The finalist should be given X amount of stimulus fund to help their project to completion with hope that it will generate a new Green industry in Ohio with sustainable growth. Cable TV network interested in sponsoring this event and host an American 1500 style of elimination to choose the winner and produce a documentary of the process for case studies in the future. Immediate outcome: accelerated teaching of green ideology to our students, local & regional economy boost, increase tax revenues and a new sustainable green industry for the state that creates jobs and generates incomes. | N/A | 1068 | 91 to 180 days | \$5,500,000 |
| Geauga | Restaurant remodeling and Employment | Run a small business owner in Chardon, Ohio. My company is family owned and operated and we are trying to make it. Our restaurant is a very family friendly atmosphere and we all have a great time when we are there. We are asking for assistance with funding to do some operational repairs on equipment and to the actual building itself. We also need to hire more staff, but right now we just do not have the money needed to do this. We are financially really hurting right now. We are barely making it. I am not able to retire from my full time job as a nurse for the past 30 years because we need my paycheck to pay the bills. We have tapped into our own personal savings to pay the business bills for the past 2 years and those funds are almost gone. If we do not receive some help, we may be forced to close our doors and add to the unemployment problem we have in Ohio. Currently we have 10 employees and their families who rely on us every day and we do not want to let them down. Our hope is to receive some help so that we can hire some more staff to work for an organization like ours. We really could use any dollar amount that would be available to us. Thank you. | Hilltopper Bar and Grille | 8 | 0 to 30 days | \$100,000 |
| Geauga | Maple Hill Sewer Project | Extend a new sewer line the length of Maple Hill Drive. The sewer has been requested by a vote of the residents of Maple Hill. These community meetings have been held to discuss the timeline, expected costs, engineering issues, etc. This sewer line would replace the individual septic systems presently being used by each individual home. With the connection of this sewer line to our present system, almost 50% of the village will be on our sewer system. An additional pumping station will be built to accommodate the new users. This is a project that has been thoroughly discussed and planned. We are presently at the planning stage. Aerial photography will be performed during March 2009 to document the topography of the Maple Hill project. | South Russell Village Council | 4 | 91 to 180 days | \$1,000,000 |
| Geauga | DOWNING DRIVE SANITARY SEWER REPLACEMENT AND PHASE | This project provides for the replacement of ~2,100 linear feet of sanitary sewer which is about 70 years old and in critical condition. Additionally, the project will provide for the installation of ~1,140 linear feet of storm sewer which date back to the 1940's and is not sufficient to handle the entire drainage area. As a part of this project, portions of Downing Drive will also be replaced. Potential Program: Ohio's Water Pollution Control Loan Fund (WPCFLF). It is anticipated that the construction contract will be awarded the summer of 2009. | City of Chardon | 35 | 31 to 90 days | \$834,300 |
| Geauga | SOUTH STREET SIDEWALKS, STORM SEWER & SANITARY SEW | This sidewalk gap closure will connect both a well populated residential development and a commercial development to the Geauga Park District's Maple Highlands Trail and to Chardon Square, which offers County Library, Park Elementary School, City and County Offices, Geauga Judo, Tae Kwon Do & Arts Center, and many dining/shopping opportunities. Additionally, this project addresses safety issues by providing the local cross-country teams an alternate to running alongside State Route 44. The City of Chardon is working diligently towards becoming more pedestrian friendly. Planning is currently underway to create a School Travel Plan through the Safe Routes to School Program and an Ohio's Pedestrian & Bike Plan through an NOACA Transportation for Livable Communities planning grant. | City of Chardon | 30 | 31 to 90 days | \$634,300 |
| Geauga | MAPLE AVENUE WATER MAIN REPLACEMENT AND PAVEMENT R | Maple Avenue is a north-south local street located in the northeast quadrant of the City of Chardon. Beginning at North Hamden Street (SR 550), Maple Avenue runs northward approximately 3,900 feet to Carfield Drive. Water Mains - The water main portion of this project includes, in general, the replacement of existing 4", 6", and 8" water mains with a new 12" water main and includes the replacement of valves, hydrants, and service connections from the new main to the public Right-of-Way line. The water mains in Maple Avenue vary in age ranging from approximately 20 years old to 80 years old. These water mains reach from North Hamden Street to Carfield Drive, range in condition from critical to good and will be replaced with approximately 3,400 linear feet of 12" ductile iron water main, new fire hydrants, valves, and service connections. Pavement - The paving portion of this project includes a basic mill and fill type paving with the goal of extending the service life of the pavement to future date with a more comprehensive repair/reconstruction project on later phase. | City of Chardon | 35 | 91 to 180 days | \$1,120,500 |
| Geauga | FIFTH AVENUE / CENTER STREET INTERSECTION REALIGNM | This project provides for the realignment and widening of approximately 570 feet of Fifth Avenue east of Center Street (SR 44), including widening to 3-lanes, curbing, storm sewers and sidewalks, relocation of watermain and augmentation of existing traffic signals. The project will increase intersection capacities and bring the intersection angle into conformance with current design standards. Additionally, the project includes the widening of approximately 550 feet of Center Street (SR 44) south of the Fifth Avenue / Center Street (SR 44) intersection including grading, drainage, pavement and utility improvements as necessary along said highways. The widening portion of the project will allow for improved traffic flow on Center Street. | City of Chardon | 35 | 31 to 90 days | \$449,060 |
| Geauga | medical research subject selection | Project explores feasibility and develops prototype of an automated, telephone interactive voice response and internet based system for the recruitment of research subjects for clinic/hospital based medical research studies. Currently, each medical research study utilizing human subjects individually recruits participants who must be screened for medical, personal, demographic conditions/trials matching study needs. The process is expensive, time consuming and requires expertise not within the core skills of the researchers. The stimulus request will result in creating & maintaining a data base pool of potential study participants matching a broad variety of study needs and/or automatically select (or reject) potential subjects based on study needs. Ultimately, the system saves healthcare research dollars by eliminating and/or reducing individual study expenditures to advertise for, pre-screen, and select study participants. The feasibility portion of the stimulus request quantifies these costs. The request results in creation of 3 jobs with their typical impact upon Ohio local, county, state economies. ultimately, it results in an Ohio develop | md services, llc | 3 | 0 to 30 days | \$250,000 |

|----------------|--|---|---|----------------|--------------------|---------------------------|
| Geauga | Public Drinking Water Project | <p>Project Description:</p> <ol style="list-style-type: none"> Bring an aged water system up to EPA standards. The current system relies on an underground pressure tank that is over 50 years old and several well contractors predict that it will not last much longer. Upgrade the water system to effectively remove secondary contaminants. This water treatment system will require the installation of a septic for wastewater disposal. Install flush hydrants on the water distribution system to remove sediments that settle in the cast iron distribution pipes. <p>Expected Outcomes</p> <ol style="list-style-type: none"> Meet EPA standards for a community water system. Prevent major disruptions in drinking water currently supplied to 32 homes due to the failure of the aged pressure tank. Substantially improve the quality of the water so that it becomes desirable for drinking and no longer causes staining of laundry and plumbing fixtures. | Manchester Farms Homeowners Association | 14 | 0 to 30 days | \$150,000 |
| Geauga | Community CPR/AED Program | <p>Train and educate residents in CPR and the use of AED's in Community facilities where large populations meet or congregate. Training would include churches, clubs, homeowners associations and pools. Township officials from public safety.</p> <p>This plan would also include purchasing and placement of AED's in key locations where there are larger congregations of people in the Township such as Township vehicles, church, meeting halls, banquet halls and community recreation areas.</p> <p>Develop Ohio FIRST Wind Powered School Campus where the utility scale wind turbine will provide 100% of the school campus needs. This will provide a truly unique educational opportunity that meets any program in the U.S. The educational plan includes student participation & leadership opportunities in the following areas: construction design & installation; data collection methodologies; data analysis & display; data archiving & retrieval; energy source environmental impacts; energy source design & efficiency; siting criteria; public policy & outreach; marketing methods for attracting industry; web site design; biophysics interaction & use; and innovative age based methods for communicating the above messages. Opportunities are available with CNCR & US Fish & Wildlife partnerships developed for creating a research station. Similar in concept to those already in existence typically with universities, it will allow continuous monitoring of environmental factors such as bird migration patterns, bird & bat mortality impact, as well as other factors relevant to renewable energy project siting. Locating this at a high school campus dramatically alters the educational landscape.</p> | Russell Township Fire Department | 1 | 31 to 90 days | \$31,000 |
| Geauga | Wind Energy for Schools | <p>We propose to employ a study to address the issues of the Amish thoroughfares and alternative transportation issues within Burton Township, Geauga County, Ohio. This study will address the following items:</p> <ol style="list-style-type: none"> Identify the major issues of integration problems of Amish transportation into the mainstream of the existing transportation system. Identify and evaluate the existing transportation network including existing motor routes, horse and buggy routes and foot traffic routes within the township, both dedicated routes and simply utilized routes. Quantify their effectiveness to transport persons and commodities to the end locations of home, school, work and shopping. List recommendations for future dedicated public roadway improvement projects to improve the safety for alternate traffic types as well as conventional motor vehicles. Identify any potential bypass route for the alternate traffic to reduce its reliance on existing public transportation routes. Conduct an LMI study of the indigenous Amish community and populations within Burton Township. This study will be completed using acceptable USDA methods and will be suitable for the end use. <p>Replace our old, outdated and obsolete Electrocardiogram/Defibrillators. We currently have 3 EKG/Defibrillators in our fire station. We have 2 ambulances and Paramedic first response vehicle that need replaced.</p> | Phillips Electric | 10 | 0 to 30 days | \$600,000 |

| Geauga | Fire Protection Water System Improvement | <p>Continuing a program of installing "Dry Hydrants" into strategic lakes and ponds in the community to provide firefighting water throughout Russell Township.</p> <p>This project would also include the repair of 8 current hydrants that need repair and upgrade.</p> <p>Local Ohio labor can be utilized for the installation and repair of these hydrants.</p> <p>Installation of three activated, emergency vehicle traffic signal controls at our traffic light controlled intersections.</p> <p>This system will allow fire, ems and police vehicles to control the traffic signal and intersection for safe travel through the intersection during emergency responses.</p> | Russell Township Fire Department | 6 | 31 to 90 days | \$68,000 |
| Geauga | Emergency Vehicle Traffic Signal Control | <p>This system will allow fire, ems and police vehicles to control the traffic signal and intersection for safe travel through the intersection during emergency responses.</p> <p>Ohio vendors would be utilized for installation and acquisition to maintain jobs in Ohio.</p> | Russell Township Fire Department | 6 | 91 to 180 days | \$100,000 |
| Geauga | Emergency Community Shelter | <p>Enhance our present Russell Township Community Hall to have a generator, cots and a stock of meals ready to eat for emergency food and shelter.</p> <p>This emergency shelter is currently utilized in cases of local emergencies in our community to include flooding, wind, ice, haz mat, incidents as well as other natural and man-made disasters.</p> | Russell Township Fire Department | 4 | 0 to 30 days | \$10,500 |
| Geauga | Classroom Technology Enhancement | <p>Enhance our present classroom capabilities to include smartboard technology and integrated audiovisual systems.</p> <p>The purchase and installation of smart boards as well as system controllers for utilization of current powerpoint projection and sound systems in our classroom.</p> <p>Ohio vendors would be utilized to maintain jobs in Ohio.</p> | Russell Township Fire Department | 2 | 0 to 30 days | \$7,000 |
| Geauga | GEA - Washington Street Signal | <p>Traffic Signal Upgrade at the intersection of Washington Street and Snyder Road in Geauga County. The existing signal is old technology. Washington Street used to be classified as a federal highway. This project is currently being programmed with NOACA and ODOT.</p> | Geauga County Engineer's Office | 10 | 31 to 90 days | \$40,000 |
| Geauga | Township Employee Health and Wellness Program | <p>Replace our worn-out and outdated weight training and exercise equipment while offering physicals and wellness assessments for all of our personnel.</p> <p>Ohio Health care jobs would be maintained for the physicals and health care assessments while the weight training equipment would be purchased from Ohio vendors and/or manufacturers and keeping Ohio jobs.</p> | Russell Township Fire Department | 4 | 91 to 180 days | \$52,000 |
| Geauga | GEA - Auburn Road (L & M) | <p>Asphalt Resurfacing of about 2.68 miles of county roadway in 2010 in Newbury and Munson Townships in Geauga County. This office has requested CEAD federal highway funds for this project, but this project could not be added to the CEAD list due to a shortage of funds statewide.</p> | Geauga County Engineer's Office | 10 | 181 days or more | \$600,000 |
| Geauga | GEA - Auburn Road (I & J) | <p>Asphalt Resurfacing of about 1.87 miles of county roadway in Newbury Township in Geauga County. This office had requested CEAD federal highway funds for this project. In the past, this project could not be added to the CEAD list due to a shortage of funds statewide. The county is now requesting NOACA ARRA funds.</p> | Geauga County Engineer's Office | 10 | 31 to 90 days | \$450,000 |
| Geauga | GEA - Washington Street (A & B) | <p>Asphalt Resurfacing of about 2.19 miles of county roadway in Russell Township and South Russell Village in Geauga County. This project is approved for federal highway funds by NOACA in FY2010. This county roadway used to be a federal highway. PID B5568</p> | Geauga County Engineer's Office | 10 | 31 to 90 days | \$530,000 |
| Geauga | GEA - Wilson Mills Road (A - C) | <p>Asphalt Resurfacing of about 2.74 miles of county roadway in Chester Township in Geauga County. This project is approved for federal highway funds by NOACA in FY2010. PID B2667</p> | Geauga County Engineer's Office | 10 | 31 to 90 days | \$600,000 |
| Geauga | GEA - Wilson Mills Road (D - F) | <p>Asphalt Resurfacing of about 2.29 miles of county roadway in Chester Township in Geauga County. This project is approved for federal highway funds by NOACA in FY2011. PID B9699</p> | Geauga County Engineer's Office | 10 | 31 to 90 days | \$540,000 |
| Geauga | GEA - Nauvoo Road (A) | <p>Total Asphalt Reconstruction project of about 1.44 miles of county roadway in Middlefield Township in Geauga County. This project is currently approved for OPWC funding in the amount of \$400,000.00 and is ready to bid.</p> <p>This project has been submitted to ODOT and NOACA for programming. Plans are complete.</p> | Geauga County Engineer's Office | 15 | 31 to 90 days | \$490,000 |
| Geauga | GEA - PM4 - VAR | <p>The application of replacement pavement centerline markings to various county roadways in Geauga County. This project is currently approved for CEAD funding in the amount of not to exceed \$150,000.00 and is ready to bid. The total project cost is estimated to be \$200,000.00. PID B2654. This request is not for federal funds matching federal funds. This request for more funds than the \$150,000.00 program manager cap.</p> | Geauga County Engineer's Office | 3 | 31 to 90 days | \$70,000 |
| Geauga | GEA - PM5 - VAR | <p>The application of replacement pavement centerline markings in 2010 to various county roadways in Geauga County. This project is currently approved for CEAD funding in the amount of not to exceed \$150,000.00 and is ready to bid. The total project cost is estimated to be \$200,000.00. PID B2656. This request is not for federal funds matching federal funds. This request for more funds than the \$150,000.00 program manager cap.</p> | Geauga County Engineer's Office | 3 | 181 days or more | \$70,000 |
| Geauga | GEA - Auburn Road (N & O) | <p>Asphalt Resurfacing of about 1.85 miles of county roadway in 2010 in Munson Township in Geauga County. This office has requested CEAD federal highway funds for this project, but this project could not be added to the CEAD list due to a shortage of funds statewide.</p> | Geauga County Engineer's Office | 10 | 181 days or more | \$500,000 |
| Geauga | GEA - GR2 - VAR | <p>Replace outdated guardrail along various county highways in Geauga County. This project is approved for federal highway funds by the CEAD however due to the programming cap, the grant is \$90,000.00 short of funding the project at 100%. PID B6568</p> | Geauga County Engineer's Office | 7 | 31 to 90 days | \$90,000 |
| Geauga | GEA - Wilson Mills Road (G-L) | <p>Asphalt Resurfacing of about 4.50 miles of county roadway in 2010 in Munson and Chanton Townships in Geauga County. This office has requested CEAD federal highway funds for this project, but this project could not be added to the CEAD list due to a shortage of funds statewide.</p> | Geauga County Engineer's Office | 10 | 181 days or more | \$800,000 |
| Geauga | Greenhouse to provide chemical free plants for hea | <p>Construction of a sustainable greenhouse to grow chemical-free flowering and green plants to place in medical and healthcare facilities. As the population ages more healthcare and assisted living spaces will require plant programs to enhance interiors and improve the air quality within them.</p> <p>By providing plants that are free of chemicals and toxins have been proven to promote improved health and well being of patients.</p> | Exotic Plantworks, Inc. | 18 | 31 to 90 days | \$355,000 |
| Geauga | GEA Capitalized maintenance ; PID 86097 | <p>Asphalt Capitalized Maintenance. This is a rural travel project whose flow through the Ohio Department of Transportation.</p> | Ohio Department of Transportation | 1 | 0 to 30 days | \$88,078 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Geauga | Ravenwood Electronic Medical Records | This project includes the installation of new hardware and software needed to bring up paperless electronic medical records for Ravenwood Mental Health Center. Hardware purchases would include a server, scanner and workstations for clinicians. Software would include a records platform and document management system. The cost of training for this project is also included. | Ravenwood Mental Health Center | 4 | 181 days or more | \$175,000 |
| Geauga | Construct New Hangars | Construction of 2 new 7-hangar buildings to house 18 airplanes. This project would allow an additional 18 airplanes to be based at Geauga County Airport. In the short term, it would mean or cause approximately 15 jobs, and in the long term, it would create approximately a 25% increase in local economic impact which would equate to approximately \$1,250,000.00 per year. | Geauga County Airport | 18 | 31 to 90 days | \$700,000 |
| Geauga | Waste to Energy Project | Digestible solid and rural waste to gas, electrolytic, compost facility. Algae aquaculture for carbon sequestration. Commercialization and franchise of optimized unit materials and infrastructure. Manufacture and distribution of novel photobioreactor system. | Energetix LLC | 4000 | 31 to 90 days | \$900,000 |
| Geauga | Burton Volunteer Fire Station | Project is to construct a new fire station facility to house the existing Burton Volunteer Fire Department, including equipment, staff and training facilities. This new station will replace current building that is too small, outdated, in dire need of repair and is not ADA accessible and not suitable for mixed gender usage by staff personnel. This project addresses safety issues by providing the local area county teams an alternative to eliminate the current traffic issues and also locate the facility in an area better suited to provide the quickest response to the higher density subdivisions in the area. | North Coast Consulting Group LLC | 45 | 0 to 30 days | \$4,453,619 |
| Geauga | SOUTH STREET SIDEWALKS, STORM SEWER & SANITARY SEW | This project provides for the installation of 6,300 sq. ft. of concrete sidewalk, installation of storm sewers, enclosures of drainage along the proposed sidewalk, extension of a culvert crossing South Street, and installation of 8" sanitary sewer. This sidewalk gap closure will connect with a well populated residential development and a commercial development to the Geauga Park District's Maple Highlands Trail and to the Chardon Square which offers a County Library, Park Elementary School, City and County Offices, Geauga Livin' Theatre Guild & Arts Center, and many shopping opportunities. Additionally, this project addresses safety issues by providing the local area county teams an alternative to turning alongside State Route 44. The City of Chardon is working diligently towards becoming more pedestrian friendly. Planning is currently underway to create a School Transit Plan through the Safe Routes to School Program and a Citywide Pedestrian & Bike Plan through a NCHACTA Transportation to Livable Communities planning grant. | City of Chardon | 30 | 31 to 90 days | \$634,300 |
| Geauga | LOCAL STREET REPAVING-CHARDON | This project provides for asphalt resurfacing of an 1100' long street, approximately 14,000' road feet. | City of Chardon | 20 | 91 to 180 days | \$1,022,100 |
| Geauga | Geauga County Youth Employment Program | Catholic Charities Community Services of Geauga County will provide Youth Employment Services to youth ages 16-24. The program will provide job readiness training and job placement services to youth. The goals of the service will be: 1. 80% of the applicants will attain job readiness skills (complete a job application, resume and 1 job interview). 2. 80% of the participants will obtain successful employment. The program will increase employability skills of youth who are experiencing barriers to employment. These barriers may include school dropout, substance abuse, mental health, skill deficits, childcare, etc. The program will teach job skills, provide job readiness training and job placement. Program staff will also work with the youth in providing job coaching to increase job retention. Youth will be actively recruited through high schools, the criminal justice system, colleges and universities. Following the assessment of strengths and barriers, an employability plan will be developed with each youth. Caseworker services will ensure that youth are placed in the program work environment to help them have a successful and sustaining employment experience. | Catholic Charities Community Services of Geauga Co | 22 | 31 to 90 days | \$212,426 |
| Geauga | Punderson Water State Park WTP& WWTP Rehabilitation | Project will rehabilitate the WWTP serving the state park Lodge and campground as well as improve the public drinking water systems at the state park. This project is focused on making improvements that will help with compliance issues in both water and wastewater systems. This park is an important outdoor recreation for the community. | ODNR-Parks & Recreation | 20 | 31 to 90 days | \$500,000 |
| Geauga | DOWNING DRIVE SANITARY SEWER REPLACEMENT AND PHASE | This project provides for the replacement of ~2,100 linear feet of sanitary sewer which is about 70 years old and is critical to the community. Additionally, the project will provide for the installation of ~1,500 linear feet of storm sewer which dates back to the 1920s and is insufficient to handle the entire drainage area. As a part of this project, portions of Downing Drive will also be repaved. Potential Program: Ohio Water Pollution Control Loan Fund (WPCFLF). It is anticipated that the construction contract will be awarded the summer of 2009. | City of Chardon | 35 | 31 to 90 days | \$834,300 |
| Geauga | WILSON MILLS SANITARY SEWER PROJECT | The Ohio Environmental Protection Agency (OEPA) has required the City to install sanitary sewers along Wilson Mills Road in order to eliminate individual septic systems in these areas. This project provides for the installation of a sanitary sewer along ~1,500 linear feet of Wilson Mills Road. This line is a portion of the Southwest Sanitary Sewer in the City of Chardon. This project will improve groundwater quality with the elimination of failing septic systems. Potential Program: Ohio Water Pollution Control Loan Fund (WPCFLF). | City of Chardon | 35 | 0 to 30 days | \$579,740 |
| Geauga | Energy Education | Energy Education is a comprehensive staff, student and community education program designed to systematically change the programmatic thinking of a large educational institution in the way consumers use and conserve energy before, during and after occupied times. One staff member will be hired, trained and supported to provide evidence based strategies and continuous educational expertise in retaining and helping to establish long term behavioral changes in using and conserving energy. Pilot program has been underway that electrical consumption of 7 school buildings has been reduced by 21% in a 6 month time period. This data supports the program's ability to sustain that when stimulus funding is exhausted funds will be used to hire an established nationally recognized third party program designed to "train the trainer" and provide requisite materials, energy monitoring hardware and software, diagnostic tools, etc.) to measure utility consumption/usage, and other misc. items used in large, small group and individual instruction relative to the efficiency of all energy production/use. | Chardon Local Schools | 2 | 0 to 30 days | \$150,000 |
| Geauga | Howell Field Improvement Project | This project will provide improvements to the current Howell Field facility. The scope of the project will involve the installation of new drainage, an artificial turf surface, new lights and upgrades to the adjacent grass recreation facilities. The stadium surface may be used for 20 to 30 events per year depending on the weather conditions. When the improvements are completed it will be capable of withstanding the use by over 100 events or activities per year. The school's physical education programs, athletic programs along with several community athletic and recreational activities, will use the improved facility. The construction will involve the use of recycled materials in the artificial surface and the installation of soil for the improvements of the grounds around the school's campus. The completed project will provide the school and their communities with a safe facility that will help enhance the health and well being of its residents. Uniform full depth pavement repair. Place a 2" intermediate course of asphalt. Place a 1.25" surface course of asphalt. Back-up new pavement with Limestone shoulders. | Wolverine Gridiron Club | 25 | 31 to 90 days | \$950,000 |
| Geauga | Lucky Bell Lane | 1.17 miles of township road. | Auburn Township Board of Trustees | 35 | 31 to 90 days | \$310,000 |
| Geauga | Infirmity Creek WWTP Replacement | Replacement of a failing and overcapacity of an 80,000 gpd wastewater treatment plant with a 140,000 gpd plant. This facility is on the Ohio EPA list to replace. | Geauga County Department of Water Resources | 25 | 91 to 180 days | \$3,100,000 |
| Geauga | Lindsey Lane | Total Reconstruction of two closed Cui-de-sac roads. | Auburn Township Board of Trustees | 35 | 31 to 90 days | \$365,000 |
| Geauga | Asphalt Maintenance Seal Rejuvenating Treatment | Cement Stabilize and Repave 0.60 miles of township roads. | Auburn Township Board of Trustees | 35 | 31 to 90 days | \$98,884 |
| Geauga | Russell Township Dome Salt Storage Building | This expansion will extend the 8th of the roadway by preventing water saturation. Russell Township is interested in installing a Dome Salt Storage Building on the existing Township Road Department property. The plan is for a 6 foot dome on a 6 foot wall. This dome will increase the capacity for salt storage by the Township. The dome will alleviate serious concerns with salt supply shortages. The dome will be an efficient and responsible manner. The dome is designed by Ohio architects and engineers. The plans are approved by the Construction Compliance Department of the State of Ohio. The dome will be built by a local Ohio construction company. | Board of Trustees | 35 | 31 to 90 days | \$150,000 |
| Geauga | Crack Seal of Various Township Roads | Asphalt patching and Crack Sealing 43,563 linear feet of township roads. | Auburn Township Board of Trustees | 65 | 31 to 90 days | \$200,000 |
| Geauga | Russell Township Road Paving Project | Russell Township has an immediate plan to resurface and cement stabilize four miles of various roads in the 2009 construction season. Russell Township has undertaken a large-scale project to resurface and cement stabilize most of the Township roads. Most of the Township roads are currently chipped and sealed, and the quality of the road surfaces has been declining steadily for years. A program of identifying, prioritizing, improving and maintaining the roads has begun. As more roads are resurfaced and cement stabilized the cost of maintaining the roads will decrease and property values will increase. | Board of Trustees | 50 | 31 to 90 days | \$750,000 |
| Geauga | Chip Seal of Various Township Roads | 111,022 Miles of single chip seal of Bituminous Material and #67 Limestone and #8 Limestone. | Auburn Township Trustees | 35 | 31 to 90 days | \$330,000 |
| Geauga | Russell Township New Wastewater Sewer Project | This new wastewater sewer project will improve water quality to the Chagrin River Watershed which is known as a high quality water resource. This project is located directly between the main branch of the Chagrin River and Silver Creek, in western Geauga County. The project will restore existing septic systems and eliminate old holding tanks in the center of Russell Township. Quantities identified include: 6 each precast concrete manholes 577 LF 10" PVC SDR 26 gravity san sewer 309 LF 8" PVC SDR 26 gravity san sewer 181 LF 8" PVC SDR 26 gravity san sewer 120 LF Box w casing 10" PVC 12.4 LF 8" Box w casing Premium backfill, Pavement Reconstruction, Driveways, Grading & Sealing | Russell Township Board of Trustees | 50 | 31 to 90 days | \$298,000 |
| Geauga | Observatory Park seismograph | Geauga Park District has begun development of Observatory Park in Marilla Township, a 1,000+ acre park which will be open to the public and highlight astronomy and earth & atmospheric sciences. To further public education on the geology of the area and Ohio's seismic activity, a seismograph will be installed at the park and tied into the Ohio seismic network. | Geauga Park District | 1 | 181 days or more | \$6,000 |
| Geauga | Maple Hill Drive Sewer Extension | Installation of 2,500 feet of gravity sewer, pump station, and 4,200 feet of forcemain to provide sewer service to 41 residences. Most of the 41 properties currently have 30 to 40 year old septic tanks that either are failing or will fail within the next few years. The Geauga County Health Department statistics during point-to-scale inspections show that septic tanks in this age range have a 90% failing rate. This project will eliminate these old septic systems and put the treatment of this sewer waste from these homes under the control of the County sanitary sewer district at our HBMOD (membrane treatment) McFarland wastewater treatment plant. | Geauga County Department of Water Resources | 14 | 31 to 90 days | \$780,000 |
| Geauga | Wintergreen Wastewater Treatment Plant Replacement | Replacement of a 40 year old wastewater treatment plant in a fully developed subdivision. The current plant is in poor condition and is badly in need of replacement. The deterioration of this plant will require its replacement within the next few years to avoid serious health and safety issues that would occur if the plant fails. | Geauga County Department of Water Resources | 8 | 0 to 30 days | \$600,000 |
| Geauga | Troy Oaks WWTP Replacement | The Troy Oaks WWTP currently services two of Geauga County's biggest industrial users and a mobile home park. The existing 60,000 gpd total flow WWTP was originally built in 1974 and is well beyond its life span. Daily flows exceed the design flow. It is getting more and more difficult for the plant operator to meet treatment plant EPA permit effluent requirements and violations are becoming more frequent. This is crucial since the WWTP discharges into Lake Reservoir which is Aurora's water supply. | Geauga County Department of Water Resources | 1,000 | 91 to 180 days | \$1,000,000 |
| Geauga | Opalocka Wastewater Treatment Plant Improvements | Upgrade of an existing 45 year old wastewater treatment plant. The project consists of the addition of an 80,000 gallon digester, replacing the abandoned flocculation building, replacing the 20 year old blowers with new more efficient equipment, and replacing the existing filter system with a 200,000 gpd hydrocyclic filtration system. This upgrade will make the plant more efficient and permit additional flows to the plant. | Geauga County Department of Water Resources | 10 | 91 to 180 days | \$420,000 |
| Geauga | Thompson Sewer Project | NEED of Ohio EPA and Geauga Health Department has placed constructing sewers in the area on the top of their list. Septic tank failures and overflow in the Districts have been documented for 20 years in this area and is not being solved. After a safety survey the USDA has classified this low income area as poverty level. We have tentatively received grant money from USDA but the unit assessment/charges are still over \$12,000. The project has been placed on hold until we find another source of funding because this would put the local retail out of business and for some residents in jeopardy. | Geauga County Department of Water Resources | 25 | 91 to 180 days | \$700,000 |
| Geauga | McFarland Creek Sewer District I & I Rehab | Sanitization of Sewer lines to reduce storm water intrusion into the system to increase our ability to stay in compliance on the Clean Water Act | Geauga County Department of Water Resources | 15 | 31 to 90 days | \$1,200,000 |
| Geauga | 223 Center St Garage soil contamination Removal | Removal of contaminated soil from a 2 acre commercially zoned site. | Geauga County Department of Water Resources | 20 | 31 to 90 days | \$500,000 |
| Geauga | Water Infiltration Project | 2000 linear feet of new or re-lined sewer line to eliminate the inflow of surface water into sanitary wastewater water lines in a 100 unit manufactured home community. In addition to the people employed to complete the project, this project will have a direct benefit on the local environment. Engineering studies have already been conducted and the project is awaiting funding. | Terrace Glen Estates | 10 | 0 to 30 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Geauga | Rural & Historic Area Building Revitalization | Improve building infrastructure & energy/water efficiency in Rural Middlefield Twp, and Historic Willoughby OH. Middlefield OH: Improve, upgrade and update neighborhood center in the heart of downtown rural middlefield/oh. Including structural improvement to building, general construction and upgrades, and implementation of HVAC, lighting and water efficiency to reduce consumption. (25,000 of budget) Willoughby OH: Improve a neighborhood retail/service building near the historic downtown. Look at green building initiatives and updates to, and implementation of HVAC, lighting and water efficiency to reduce consumption. (18,000 of budget) | MARBRAN PROPERTIES LLC | 5 | 0 to 30 days | \$200,000 |
| Geauga | Green Remodeling and Renovation Consulting | Home Consulting Solutions hopes to help homeowners manage the transition to newer green building materials. We will accomplish this by becoming LEED certified as a company and assisting the homeowner with the selection of new green materials for their home, as well as new ways to maximize their home energy efficiency. This will result in safer and more energy efficient homes. I am a female, sole proprietor of a retail baby store. I specialize in organic and eco-friendly products and have partnered with St. Jude Children's Research Hospital to donate 10% of my profits to them. In the current economic environment, my business has dropped so drastically that I can no longer afford to purchase new products and simultaneously pay my overhead. This is an issue that has forced me to pump more of my household expense money into the business, thus jeopardizing my mortgage. Also, before starting my business, the retail space that I just had been vacant for most of a year. Therefore, I see my business as very essential not only to myself and my charity, but also to the local economy, and it would be ashamed to close my doors without first trying to do all that I can to revitalize it. Please don't stand idly by and watch the birth/death of "Main Street America." Sincerely, Judy Grczynski | Home Consulting Solutions, LLC. | 10 | 0 to 30 days | \$200,000 |
| Geauga | Fezziwigs | | Fezziwigs, Baby Gifts and Gear | 2 | 0 to 30 days | \$25,000 |
| Geauga | repair low income homes | provide low cost repairs and upgrades to low income residents of geauga and surrounding areas, including painting, electrical, plumbing, flooring, general repairs | | 12 | 31 to 90 days | \$500,000 |
| Geauga | Mopars and Muscle Cars | Start a business working on cars: Restoring classic cars, modify newer cars, and repair damaged or unreliable cars. Make instructional videos for the diy 1800 car engine workers, electrical, welders, painters, bodywork, sanders, general maintenance, classic cars, vintage, Volkswagen, health care, auto ins, and PRIDE. Making cars out of steel, will put our steelworkers back in business. Only American made products will be used. Mopars and Muscle Cars are what started American's fascination with cars. To get the economy going, we need to bring back that fascination of Mopars and Muscle Cars. My motto says I AM... LET'S BUILD AMERICAN AND PUT AMERICANS BACK TO WORK! | Mary Kramer | 50 | 91 to 180 days | \$3,000,000 |
| Geauga | Heritage House - Community Center | Our Committee (charbonheritage.org), along with City Council, has initiated this \$400,000.00 Capital Campaign, of which \$100,000.00 has been pledged. Our goal is to protect our rich heritage as home to Ohio's maple syrup industry. We plan to initially preserve our historic log cabin landmark since 1900, or our nationally registered historic town square, as a LEEDS certified environmentally friendly and energy efficient project, to better serve the future of this community. As the heart of the maple syrup industry, our City has been the county seat of government since 1810. Our intent, while preserving yesterday, is an efficiency plan for the future. This Campaign is initiating a re-vitalizing plan to bring this distinctively rural community well prosper and continue to support local entrepreneurial interests. We have received local, county and community support for our mission to provide a central resource, in the heart of Chardon, that preserves our past while providing for economic growth, beautification and cultural activities. | City of Chardon Ad Hoc Heritage Committee | 10 | 0 to 30 days | \$300,000 |
| Geauga | energy conservation | Install new energy efficient furnace, new roof on dwelling, possible solar panels for energy capture. This project will provide jobs for local jobs and repair local jobs in our community. I would like to see local trades persons would like to make my dwelling energy efficient. My home looks to all Americans, to set an example for future generations. This project will take a vacant 3/4 acre rural residential lot and transform it into an apple orchard and pond. This orchard will utilize sound environmental principles. | The Bakers | 2 | 31 to 90 days | \$15,000 |
| Geauga | Apple Orchard and Pond Creation | This extremely low-cost initiative will provide at least one full week of employment for a local economic stimulus that has been extremely hard hit by the current economic crisis. The entire balance of this project cost will go to support other local businesses including a nursery, a building products supplier, a gravel supplier and landscape product provider. A percentage of the apples grown here will be donated to local schools. | Parrish Orchards (to be created) | 5 | 0 to 30 days | \$20,000 |
| Geauga | The Wells Rehab Pavillion | New construction - 29 bed rehabilitation pavillion, serving residents of Cuyahoga and Geauga Counties. to provide low interest loan funds to 100 County homeowners to purchase and install alternative energy equipment for personal use. | Montefiore | 40 | 91 to 180 days | \$500,000 |
| Geauga | Geauga HELP | This equipment includes, wind power, solar panels, and geothermal equipment. The estimated cost to homeowner is the difference between the grants available through the Ohio Department of Development and 10% of the homeowner's equity. These loan funds will be secured by LICD's and the loans will be repayable over 3 years at 1% interest. This fund will be administered by this office and will be similar to other existing loan programs currently in effect. The funds will be paid back into the Home Energy Loan Program (HELP) and repair funds will continue to be lent out into the future. The homeowner's savings on energy bills will be equal to or less than what their current energy monthly energy bill. This program could be expanded to include loan financing for energy star appliances as well. | Geauga County Community & Economic Dev. | 50 | 31 to 90 days | \$1,000,000 |
| Geauga | Disabled Housing Program | These funds would supplement existing grant dollars to reduce and enhance the environmental impact of a new housing project for individuals with severe mental illness. Federal, state, and local match dollars have already been secured to build a 10 unit apartment complex providing placement, safe, and affordable independent living arrangements for individuals with mental disabilities. This new requirement is being met by providing funding for geo-thermal heating and cooling and solar energy, lowering operating costs for years to come and significantly reducing the carbon footprint of the building. In addition, it will also enhance features to meet and exceed current LEED standards. All plans are currently being designed, and the site has been secured with all other funding in place. This opportunity comes at a perfect time to introduce these components. Building will begin in the fall of 2009 with completion expected in late winter 2010. | Geauga County Board of Mental Health and Recovery | 125 | 0 to 30 days | \$450,000 |
| Geauga | Lighting Upgrade | Lighting upgrade for 1,373,000 sq ft of manufacturing and warehouse space by replacing metal halide, mercury vapor, T12 fluorescent and incandescent lighting with LED, T-5 and T-8's coupled with motion detectors to reduce lighting of over 85,037, 217 KWHR per year for 40% to 34,334,886 KWHR per year. Additional benefits would be the reductions in Greenhouse Gas emissions. For example, just by replacing 74 Metal Halide fixtures @ 480 with 6-Lamp T8 new fixtures at one of the facilities we would see the following annual reductions: CO2: 365,403 lbs SO2: 1,886 lbs NOx: 750 lbs | Myers Industries | 1265 | 31 to 90 days | \$1,471,223 |
| Geauga | Thompson ECOMachine Program | This project spans 10 locations all in Ohio. Our manufacturing facilities are in Middlefield, Wadsworth, Fostoria, Jefferson and Sandusky Ohio, all of sewage delivered by 5,000 ft of sewer lines and 100 ft of force main. The ECOMachine is a tank based system housing a constructed wetlands with aquatic cells inside a greenhouse. The system has an anaerobic pre-treatment component, fine equalization, and aerobic tanks followed by a polishing step utilizing ecologically friendly beds of a constructed wetland. This ecotechnology create a robust ecosystem between plants microbial species and distinct treatment zones. All major groups of life are represented from algae, fungi, bacteria, protozoa, zooplankton to plants, insects and fishes. Higher plants, shrubs and trees are grown on adjustable bargass racks suspended within the system. This ECOMachine System will be attached to Ledgenom High School. A two full-time instructors will be hired in the maintenance of the system as well as in fundamentals of ecotechnology fundamentals. | Geauga County CED | 200 | 91 to 180 days | \$3,000,000 |
| Geauga | Intwine Energy Management | Participating students in the one year program will receive certification as ecotechnology practitioners. Ledgenom is a small rural 66% LM community established by urgent market demand for low cost, high performance, standards based smart grid management solutions along with recent advances in semiconductor and web services technologies, there is an immediate market opportunity to develop and deploy integrated energy management solutions. Providing funding to Intwine will result in an immediate collaborative between university researchers (CWRU), semiconductor manufacturers (Motorola, Zand), network equipment manufacturers (Cisco Systems), industry standards committees (IEEE, IUPUI), and utility equipment providers (Actara Technologies) to bring to market a cost-effective integrated product suite for home area networking and related management tools for the smart grid environment. The founders of Intwine have a strong working relationship proven by successfully building, and continuing to lead, one of the largest and most respected sales representative firms in the semiconductor industry, Victory Sales. By leveraging strong executive relationships throughout the industry, Intwine is working with well-established components and is in the integration and market release stage. Funding will create skilled jobs in the present there are plenty of LED lights on the market but none have dimming capabilities using microprocessors and sensors (used for adjustment, efficacy, etc.) We are currently finalizing our prototype for demonstration purpose, once completed, money will be needed for tooling and start up. Our goal is to manufacture and distribute this product in the USA. MADE IN USA. Our construction company would like to create a sub-division in Russell Township for residents that are aging and would wish to downsize, but remain in the community. This sub-division will be made using the latest environmentally friendly supplies and technologies and will thus be green zones. This project will benefit the economy and environment of Geauga County. Training and implementation of ISO 9001:2008. Expected outcome will be 3rd party ISO registration in order to sustain existing and attract new customers. | Intwine Innovations, LLC | 25 | 0 to 30 days | \$1,000,000 |
| Geauga | Dimmable LED Lighting (DLL) | | N.C. Electronics | 10 | 0 to 30 days | \$100,000 |
| Geauga | Environmentally Friendly Sub-Division | | McMillon Construction | 55 | 31 to 90 days | \$1,000,000 |
| Geauga | ISO 9001:2008 Implementation Plan | | Solon Manufacturing Company | 42 | 31 to 90 days | \$40,000.00 |
| Geauga | Install Variable Frequency Drives | Motors account for 90% of the Burton, Ohio Operations electric consumption and total costs due to their inherent inefficiencies. This project includes replacement of across-the-line constant speed motors with variable frequency drive technologies on process pumps and blowers to reduce energy consumption. Variable frequency drives will provide the ability to allow production mixer motor speeds to match the compounding process need as opposed to running at full speed regardless of the process demand factor. | Excel Polymers LLC | 1 | 31 to 90 days | 41,447.00 |
| Geauga | Plant Lighting Replacement | Replace existing metal halide fixtures with more energy efficient, lower costs lighting technology in the manufacturing and warehouse buildings of Burton, Ohio Operations. The facility size is approximately 300,000 square feet. The lighting upgrade will create skilled jobs in the present there are plenty of LED lights on the market but none have dimming capabilities using microprocessors and sensors (used for adjustment, efficacy, etc.) We are currently finalizing our prototype for demonstration purpose, once completed, money will be needed for tooling and start up. Our goal is to manufacture and distribute this product in the USA. MADE IN USA. Our construction company would like to create a sub-division in Russell Township for residents that are aging and would wish to downsize, but remain in the community. This sub-division will be made using the latest environmentally friendly supplies and technologies and will thus be green zones. This project will benefit the economy and environment of Geauga County. Training and implementation of ISO 9001:2008. Expected outcome will be 3rd party ISO registration in order to sustain existing and attract new customers. | Excel Polymers LLC | 3 | 31 to 90 days | 103,853.00 |
| Geauga | Supplemental Process Water | Re-circulate the water that is cooled as a result of our existing heat exchanger/water tower to reduce the energy consumption required by the refrigeration compressors to keep the manufacturing process with chilled water. | Excel Polymers LLC | 4 | 31 to 90 days | 137,663.00 |
| Geauga | Supplemental Building Heat | Install process heat derived from the particulate collection systems on each production line as supplemental building heat further reducing energy consumption to heat the Burton, Ohio manufacturing facility. | Excel Polymers LLC | 6 | 91 to 180 days | 258,497.00 |
| Geauga | F305 Litter Mixer Installation | Replace existing barbed mixer that has reached the end of its useful life utilizing new synchronous technology to ultimately defragment Excel Polymers quality and capabilities from domestic and foreign competition. Savings would be generated primarily from better throughput and more efficient energy consumption. Failure to upgrade the technology will negatively impact Excel Polymers value proposition in the Burton Ohio Operation through the life of the mixer. | Excel Polymers LLC | 40 | 0 to 30 days | 825,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Greene | Greene County Career Center | Complete retrofit of school buildings systems, roof, windows, doors, finishes, site landscape and other replacement items using green technologies and alternative energy sources. The project will be a LEED Certified project and will include Vocational School Education Programs for the students and faculty. The final project will expand the facility and academic programs of the Joint Vocational and Adult Education Community. The redesigned facility will allow expansion for existing educational programs and addition of new programs. The green facility will be used to showcase green/educational opportunities for other K-12 schools in the Greene County. The final project will reduce the energy consumption of the facility by 40-50%. | ted donnell architect | 3 | 91 to 180 days | \$8,000,000 |
| Greene | Ford Road-Contract A Improvements | Contract A, which entails regulatory improvements for post-aeration, infrastructure rehabilitation at the plant discharge headwall, and regulatory/operational improvements at the Sludge Processing Facility, has been estimated at \$1.6 million. This total includes all construction and equipment costs as well as construction administration and project inspection services. A loan request in this amount has been submitted and preliminarily approved through the Ohio Water Development Authority's Water Pollution Control Loan fund (WPCLF). Break of the primary 20-inch main. The 20-inch redundant main would span over 13,000 LF. | City of Xenia | 50 | 31 to 90 days | \$1,800,000 |
| Greene | 20-Inch Redundant Water Main Installation | The City of Xenia's Water Treatment Plant is located in Xenia Township, approximately one mile north of the north corporation limits. In addition to it servicing its own customers, the plant also serves properties outside its corporation limits within Xenia Township and Wilberforce. The current public water conveyance system from the plant to the distribution system(s) is achieved through a primary 20-inch ductile iron transmission main with a secondary "back up" (ie. redundant) 14-inch cast iron main. Unfortunately, as the case with most old cast iron mains, they are prone to breaks. Existing demands on the system have proven that if there is a break in the 14-inch main, the primary 20-inch main alone can adequately service the system(s). However, what is of a grave concern to the City Engineering and Maintenance Departments is the potential for a break in the 20-inch primary main. More specifically, can we trust that a smaller and u | City of Xenia, Ohio | 1000 | 31 to 90 days | \$1,400,000 |
| Greene | City of Xenia WWTP - Little Miami River Restoratio | Restoration of approximately 1,000 feet of the Little Miami River on City of Xenia property near the WWTP outlet. Very small volume at a constant temperature. This will facilitate solar hot water and space heating by allowing users to store collected solar heat for times when the sun is not shining. | City of Xenia, Ohio | 10 | 0 to 30 days | \$650,000 |
| Greene | Heat Battery | There are a number of advantages to the system: 1. Heat storage is very compact (up to 20kwh in 9 cubic feet) 2. Heat storage in this device is isothermal (all stored at the same temperature). The temperature is a "good" temperature - suitable for hot water or radiant house heating, but cool enough to be non-hazardous. 3. Storage material is VERY CHEAP 4. Storage material is totally NON-TOXIC (it's edible) 5. The technique is 100% efficient. There is ZERO conversion loss. When electric energy is converted to chemical energy in a battery, there is loss to heat. This technique IN HEAT...there is no loss. The prototype is ready for inspection, and undergoing extensive testing, at this time. Given proper capital, we would expect to be in production in 90 days | LaserLinc, Inc. | 25 | 0 to 30 days | \$1,000,000 |
| Greene | Autonomous Power Monitoring | The project will build, demonstrate and initiate production of power line mounted sensors to measure the electric current properties on power transmission lines between the substation and the consumer. The unit is powered by energy harvested from the field around the line and communicates current measures through RF or wireless links, creating a solution that is small in size, light in weight, and designed to meet the electric industry requirements for installation and easy to maintain. Real-time current sensing enables proactive instead of reactive management of distribution circuits, thereby increasing grid efficiency and reliability, allowing utilities to not only know the operational status of their medium voltage circuits, but also know and monitor in real-time the amount of energy flowing through at any given point on the circuit. This will provide the capability to implement various "smart-grid" concepts, where the ability to monitor, communicate with, and control the electric power grid are intended to improve the reliability of the system, control costs and to reduce the requirements of the overall grid and the need for new production sources. | Defense Research Associates, Inc. | 100 | 0 to 30 days | \$3,000,000 |
| Greene | Four Oaks Central Air | Convert older school buildings from window air conditioning units to central air conditioning. Building houses Head Start unit, county pre-school classes and MRCO winter/summer classrooms. | Greene Co Board of Mental Retardation/DD | 2 | 0 to 30 days | \$200,000 |
| Greene | Teradata Technology Expansion | The Teradata Technology expansion would include installing a new Teradata Data Warehouse in an already existing lab space. This would entail purchase of equipment, installation, decommission of old equipment, systems administration, and maintenance. The goal of the new data warehouse is to create a testing environment for Teradata experts that will foster innovation and efficiency in the data warehousing technologies. This would include competition for the small business operator (The Coffing Corporation) to provide clients such as federal, state, local government and private industry with innovative solutions thereby creating more economic growth in the Dayton region. The original equipment manufacturer (Teradata) is also a large corporate employer based in Ohio benefiting doubling the benefits of dollars spent. Ecological stream restoration of approximately 2,300 feet of Indian Run in Greene County, Ohio. | The Coffing Corporation | 3 | 31 to 90 days | \$3,200,000 |
| Greene | Indian Riffle Stream Restoration | This project could also fall under the Energy and Environment, Habitat Restoration Federal Stimulus Program. | Green County Park District | 10 | 0 to 30 days | \$700,000 |
| Greene | Little Beaver Creek Restoration | Ecological restoration of Little Beaver Creek and adjacent riparian corridor within Onekadee Reserve Park in Greene County, Ohio. | Green County Park District | 10 | 0 to 30 days | \$2,000,000 |
| Greene | Dist 8, PID 24957, GRE US 35 0.00 | Rehab US 35 at the US 351-675 interchange | Ohio Department of Transportation | 169.3 | 31 to 90 days | \$5,900,000 |
| Greene | Dist 8, PID 24956, GRE IR 675 14.88 | Rehab 1475 from IR 235 to the Clark County Line | Ohio Department of Transportation | 155 | 31 to 90 days | \$5,400,000 |
| Greene | Warner Middle School and Xenia High School Renovat | Xenia Schools qualify for the state school facilities program this year. The request would supplement the current comprehensive plan by renovating buildings not included in the building program. Specifically, the request is to renovate the following areas at Warner Middle School: heating, roofing, ventilation system, electrical system, plumbing, security and structure at Warner Middle School and to renovate the Bob Hope Auditorium at Xenia High School in the Ohio School Facilities project, the requested areas are not included. | Xenia Community Schools | 300 | 181 days or more | \$8,000,000 |
| Greene | North Fork Massie Creek Restoration | Restoration of approximately 5,000 feet of North Fork Massie Creek in Greene County, Ohio. | Greene County Sanitary Engineering Department | 10 | 31 to 90 days | \$1,500,000 |
| Greene | SCWRRF - Little Miami River Restoration | Restoration of approximately 200 feet of the Little Miami River near the Sugarbrook Water Resource Reclamation Facility outlet in Greene County, Ohio. | Greene County Sanitary Engineering Department | 10 | 31 to 90 days | \$250,000 |
| Greene | Service Center Relocation | This project could also fall under the Energy and Environment, Habitat Restoration Federal Stimulus Program. 100 automobiles. It provides daily ride/pick for 5113 students for 14 private districts and 14, soon 16 public schools, thus it is a Regional Operation. Service demands have outgrown the original 1952-1957 facility due to student enrollment and regional needs. The project could renovate a closed car dealership or build new using local construction labor. It eliminates Environmental & Health Hazards from exhaust and traffic congestion of 240 vehicles commutes to a 600 student elementary school and residential neighborhood. The school district has been verified in writing Safety and Traffic Congestion concerns. The elementary school severely lacks space (space recommended by the Ohio School Facility Commission); the project resolves this by vacating the Service Center to become a school and community park. The Service Center is between one of the largest High Schools in Ohio, the largest private elementary school, a busy four way stop, and a downtown artery. This it creates normal traffic flow. It took the school district three attempts to barely pass an academic building program. Despite the need for Service Center relocation it was stop | Beavercreek City School District | 75 | 31 to 90 days | \$4,500,000 |
| Greene | Collaborative Nano-Bio laboratory | 40,000 sq ft of configurable laboratory space to be used by the US Air Force, State universities, corporations, private universities and foreign researchers. Laboratory to be used to further the science of nano technology and spin off commercial products. Laboratory to be located adjacent to Wright Patterson AFB. No Air Force funding available to construct building. Laboratory will be operated by a 501(c)(3) organization that is in the process of being established. Blending private and public research interests furthers National Security interests and provides products for commercial consumption. | The Greentree Group | 250 | 31 to 90 days | \$10,000,000 |
| Greene | GRE - Beavercreek Signals | Creation of a closed loop system of interconnected traffic signals on Dayton-Xenia Rd. between Research Park Drive and Beaver Valley Rd. and on N. Farrell Rd. between Jonathan Drive and Lantz Rd. including placement of fiber optic cable for better communications and new updated traffic controllers and control control system. | City of Beavercreek | 7 | 31 to 90 days | \$1,200,000 |
| Greene | GRE 142 - 00.36 (Dayton- Xenia Rd.) | Reconstruction and Widening of Dayton-Xenia Rd. from Wiltonova Drive to East Lynn Drive with widening on Grange Hall Rd to accommodate turn lanes and new traffic signal. | City of Beavercreek | 26 | 0 to 30 days | \$4,585,000 |
| Greene | Fairwood Drive Intersection Improvement | Widening of the intersection of Fairwood Drive with N. Farrell Rd. for improved safety by adding a left turn lane on N. Farrell Rd. Addition of a traffic signal at the intersection. | City of Beavercreek | 3 | 31 to 90 days | \$551,000 |
| Greene | Latent heating for home use | Proof of concept. Construct system of supplementing residential home heating with the use of eutectic salts as a thermal mass. The estimated home heating savings is 30% reduction from energy usage. | None | 1 | 31 to 90 days | \$70,000 |
| Greene | Beavercreek Schools Preschool | The Beavercreek City School District is growing by more than an additional student each day. We are desperately in need of a new preschool for our youngsters with immediate enrollment status. More than 20% of our students are affected with the military, and because Wright Patterson Air Force Base has a large children's hospital, it makes sense that many young people with military ties who have a variety of health impairments will be attending our school district. Our goal is to construct a 250 student preschool for students with developmental delays. The cost of the building would be \$7,500,000. Our preschool program would encourage children to learn and grow by providing a foundation of developmentally appropriate experiences where all children can succeed in a safe and nurturing environment. Our preschool will provide inclusive settings that recognize children's varied abilities, interests, needs, and learning styles. We believe that children learn best through meaningful play. Our play based, child-centered program would reflect the integration of physical, cognitive, social, emotional, language, self-help, and aesthetic input for the total development of the child. | Beavercreek City Schools | 40 | 0 to 30 days | \$7,500,000 |
| Greene | Dayton-Xenia Rd. Corridor Study | Hire a consultant to create a downtown Beavercreek revitalization plan. | City of Beavercreek | 5 | 181 days or more | \$40,000 |
| Greene | Bikeway and/or Walkway between Hibiscus Way and Sp | Construct an 8' wide asphalt pedestrian/bikeway through a City owned woodland preserve to connect an existing residential neighborhood with a future development. Total estimated length is 647.00 feet. | City of Beavercreek | 5 | 181 days or more | \$64,762 |
| Greene | Bikelanes on Grange Hall Rd. | Construct on street bike lanes on both sides of Grange Hall Road, between Dayton-Xenia Road and Pentagon Blvd. Total length of the project is 15,422.5 ft or 2.94 miles. | City of Beavercreek | 10 | 181 days or more | \$468,526 |
| Greene | Park Overlook Extension | Construction of the trail portion of Park Overlook Drive from Grange Hall Road to Hibiscus Way. The extension will be approximately 1,567 feet long. | City of Beavercreek | 500 | 181 days or more | \$587,100 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Greene | Miami Valley Research Park Water Main | Install a 12" water main on Research Park Blvd. from Grange Hall Road to Shakerown Road. Total proposed length is 2,284.76 linear feet. Construct the roadway network within the Mission Point Development to spur office and retail development. The roadway extension will be 128.4 feet near, and include 2 bridges. | City of Beavercreek | 500 | 181 days or more | \$509,933 |
| Greene | Mission Point Roadway Network | Construction of a 300 space parking garage near the intersection of Hibiscus Way and Pentagon Blvd. to help allow the increase in student density at the school community college. | City of Beavercreek | 500 | 181 days or more | \$585,020 |
| Greene | College Park - Clark State University Parking Gara | Federal stimulus funds will save existing jobs and create 21 new technology jobs for Ohio-based business Docuzon. These funds will generate revenues that will result in the creation of 25 additional technology jobs. Docuzon, founded in 2007, has invested approximately \$1M in investment. Presently, Docuzon is being severely impacted due to the economic downturn. The will enable Docuzon to build our staff and reach new customers. This project will benefit American businesses by providing them a secure and compliant infrastructure to electronically transmit consumer processed information. Docuzon will be able to transmit 1.3 trillion proprietary documents a year for digital signature using a patented encryption delivery process that fulfills all legal and industry regulatory statutes and assures non-repudiation. The Electronic signature transactions eliminate costly printing requirements. Docuzon's solution meets all legal and industry regulatory statutes for information security. Working closely with OODD, this would position Ohio as the home of this highly demanded information technology solution, and eventually create hundreds of well paying jobs in Ohio. | City of Beavercreek | 50 | 181 days or more | \$5,100,000 |
| Greene | Securing Electronic Consumer Information (Secure) | Currents of Cal. Glenn Highway between Styke Drive and National Rd. is in poor condition, making traveling in the late summer and late spring more difficult. Additionally, the school must eventually install air conditioning to comply with Janet's Law. The project is for completion of final engineering plans for construction of three (3) interchanges on U.S. Route 35, in order to eliminate the final five (5) at grade interchanges on U.S. Route 35 between Dayton, Ohio and Charleston West Virginia. The project also addresses a high-accident corridor and one of the largest congestion points in the Miami Valley. | Docuzon, LLC | 46 | 0 to 30 days | \$2,100,000 |
| Greene | Air Conditioning | Widening and reconstruction of Kemp Rd. between Oxbow Drive and N. Fairfield Rd. to create a center left turn lane and pedestrian/bicycle facilities in order to reduce congestion in the area. | Xenia Christian School | 2 | 31 to 90 days | \$210,000 |
| Greene | U.S. 35 Interchange Project - Final Engineering | Replacement of a deteriorated bridge structure on Grange Hall Rd. over the Little Beaver Creek immediately north of Patterson Rd. | City of Beavercreek | 25 | 31 to 90 days | \$10,000,000 |
| Greene | Kemp Rd. Widening Project | Resurfacing of Cal. Glenn Highway between Styke Drive and National Rd. Renovation and expansion of existing building to provide adequate facilities for operation of municipal government to meet current building codes and space requirements. | City of Beavercreek | 20 | 181 days or more | \$6,000,000 |
| Greene | Grange Hall Rd. Bridge Project | Construction of a new municipal recreation center | City of Beavercreek | 16 | 181 days or more | \$5,000,000 |
| Greene | Col. Glenn Highway Resurfacing Project | Believe in every teacher having a tablet pc with wireless internet throughout the school building. These tablet pc's allow teachers to be more productive in the classroom by creating interactive, engaging activities on the computer and internet. Students will be learning in the 21st century and have the ability to learn how they grew up by funding this project initiative. Moreover, teachers can access student work, assignments, quizzes, and activities from school on the tablet pc to give immediate feedback and increase test scores. Teachers will also be more easily accessible by other professionals, parents, and students. Furthermore, teachers will be more productive in professional development meetings. This project will need to include: 90 Tablet PCs, 60 Projectors, Wiring the building with a secure wireless connection access point and internet. | City of Beavercreek | 4 | 91 to 180 days | \$400,000 |
| Greene | City Hall Renovation | Rehabilitation and Upgrade of existing traffic signal system by the expansion of fiber optic cable and traffic controller replacement on N. Fairfield Rd. from Lane Rd. to 475' and on Patagonia Blvd./New Campus/Trabon Rd. from Royal Gateway to Little Lane. | City of Beavercreek | 20 | 181 days or more | \$1,200,000 |
| Greene | Community Recreation Center | Development and Facilitation of the "1st Ohio Cannonball Run for Alternative Energy Vehicles". The event is a 60 mile cross country race for energy vehicles that would drive county roads from Xenia to Columbus, Ohio. The purpose of the event would be to attract attention, encourage research and development and production of alternative energy vehicles. The goal of this promotional event is to get the attention of medium businesses who sponsor or enter a car or motorcycle, to consider environmentally responsible technology as a benefit to thousands of jobs in Ohio and the auto industry in general. Some alternative energy powered vehicles will be on display at both the start and finish lines for the general public to observe and receive information on. | City of Beavercreek | 7 | 181 days or more | \$1,200,000 |
| Greene | PC Tablet Initiative | Rehabilitation and Upgrade of existing traffic signal system by the expansion of fiber optic cable and traffic controller replacement on N. Fairfield Rd. from Lane Rd. to 475' and on Patagonia Blvd./New Campus/Trabon Rd. from Royal Gateway to Little Lane. | Fairborn City Schools | 10 | 31 to 90 days | \$200,000 |
| Greene | N. Fairfield Rd. Signals Project | The Coffing Corporation proposes funds for research and development for software, trademarked CommonCensus. Fully developing the capability to quickly analyze and view a client's systems, architecture, and business processes is essential in recommending and executing "best fit" solutions. This R&D effort will produce improvements in a software package that will drive revenue for Coffing, a local, small business in Ohio. Given that 100% of Coffing's clients are currently based in Ohio, the stimulus dollars will be recycled throughout the local economy having a great impact. Also, Coffing plans to hire, and repair if possible, the analysis and engineering staff to complete this research and development from the local economy. If successful, this innovation will continue to drive business for Coffing and create revenue and work for many more people in the Dayton region. In short, through economic development, innovation drives growth, revenue, and most importantly jobs. Electronic destination signs for 20 buses for the Greene County Transit Board | City of Beavercreek | 10 | 31 to 90 days | \$200,000 |
| Greene | 1st Ohio Cannonball Run for Alternative Energy Veh | Electronic fareboxes for the Greene County Transit Board | Innovative Technology Consulting, LLC | 2500 | 0 to 30 days | \$2,500,000 |
| Greene | Dist 8, PID 85986, GRE 5 modified minivans | Backup power generators for the Greene County Transit Board | Ohio Department of Transportation | 3 | 31 to 90 days | \$175,000 |
| Greene | Dist 8, PID 86003, GRE GCTB office/garage expansio | Maintenance equipment for the Greene County Transit Board | Ohio Department of Transportation | 10 | 91 to 180 days | \$500,000 |
| Greene | Dist 8, PID 86004, GRE GCTB cap cost of contractin | Bus washer for the Greene County Transit Board | Ohio Department of Transportation | 12 | 181 days or more | \$598,000 |

| Greene | Dist 8, PID 85983, GRE GCTB destination signs | Supervisor van for the Greene County Transit Board | Ohio Department of Transportation | 1 | 91 to 180 days | \$100,000 |
| Greene | Dist 8, PID 85985, GRE GCTB electronic fareboxes | Safety/security cameras for the Greene County Transit Board | Ohio Department of Transportation | 3 | 91 to 180 days | \$150,000 |
| Greene | Dist 8, PID 85988, GRE GCTB backup power generator | Phone system upgrade for the Greene County Transit Board | Ohio Department of Transportation | 1 | 91 to 180 days | \$67,000 |
| Greene | Dist 8, PID 85989, GRE GCTB maintenance equipment | Greene CATS agency vehicle for the Greene County Transit Board | Ohio Department of Transportation | 1 | 91 to 180 days | \$23,000 |
| Greene | Dist 8, PID 85990, GRE GCTB bus washer | Security cameras for vehicles for the Greene County Transit Board | Ohio Department of Transportation | 2 | 91 to 180 days | \$120,000 |
| Greene | Dist 8, PID 85991, GRE GCTB service truck | GPS/mobile data terminals for buses for the Greene County Transit Board | Ohio Department of Transportation | 1 | 91 to 180 days | \$25,000 |
| Greene | Dist 8, PID 85992, GRE GCTB supervisor van | Rehabilitation of deteriorated concrete in the walls, sidewalk and conduits of a Class I flood protection dam. | Ohio Department of Transportation | 1 | 91 to 180 days | \$35,000 |
| Greene | Dist 8, PID 85994, GRE GCTB safety/security camera | Bus radio system for the Greene County Transit Board | Ohio Department of Transportation | 1 | 91 to 180 days | \$70,000 |
| Greene | Dist 8, PID 85995, GRE GCTB phone system upgrade | Scheduling/dispatching software upgrades for the Greene County Transit Board | Ohio Department of Transportation | 2 | 91 to 180 days | \$100,000 |
| Greene | Dist 8, PID 85996, GRE GCTB agency vehicle | Conversion of surplus buses to mobile healthcare facility for sale to non-profit organizations. The utilizing of high-tech aerospace sensors will provide health and wellness screening not currently available to low income or senior citizens at an affordable cost. | Ohio Department of Transportation | 1 | 91 to 180 days | \$20,000 |
| Greene | Dist 8, PID 85998, GRE GCTB security cameras | Project would dedicate four officers to work full time community de-confliction areas. These areas of high crime/high call volumes have already been identified and officers would work with community members in the areas to eradicate problems and make the areas safe. This would be done by strict enforcement of quality of life issues and zero tolerance for drug activities. | Ohio Department of Transportation | 3 | 91 to 180 days | \$150,000 |
| Greene | Dist 8, PID 85999, GRE GCTB GPS data terminals | Purchase of 14 - 800 portable radios. Greene county central communications uses the 800 radio system. We currently use a VHF highband system locally. Through Homeland Security / EM grants, we have received 800 radios for our dispatch center and cars in 2003 and 2005. We also received 4 - 800 portables in 2005. We have applied to our county EMA in 2007 and 2008 for funding to purchase the extra portables to allow assigning each officer a 800 portable radio. Both years we were turned down. Our request is for funding to purchase the additional portable radios. This request would allow our officers to have 800 radio access while away from our vehicles. | Ohio Department of Transportation | 1 | 91 to 180 days | \$20,000 |
| Greene | Huffman Dam Concrete Rehabilitation | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDI's mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, individual Development Accounts (IDAs), mentoring, technical assistance, and access to retail markets. As the only U.S. Small Business Administration microloaner and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI's Microenterprise Loan Fund fills a gap in the credit industry by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDI is able to serve underserved populations, include low-income individuals, those with little or no credit, or those precluded from buying interest because of religious beliefs. | Ohio Department of Transportation | 10 | 0 to 30 days | \$1,000,000 |
| Greene | Dist 8, PID 86000, GRE GCTB bus radio system | Microcenterprise Development Program | Economic and Community Development Institute | 20 | 31 to 90 days | \$150,000 |
| Greene | Dist 8, PID 86002, GRE GCTB scheduling software | Marketplace enhancements. This is a second phase of the improvements. Phase I is being funded through a grant obtained from the Miami Valley Regional Planning Commission's (MVRPC) Transportation Enhancement Funds (TE). The infrastructure improvements include rehabilitating existing roadways, new curbs and sidewalks, construction of landscaped medians, installation of improved storm drainage, decorative street lights, pedestrian signage and the relocation of energized electric panels to underground vaults. Other aesthetic enhancements include the placement of pedestrian and cycling amenities, such as decorative benches, ornamental trees, trash receptacles, pedestrian lighting and bicycle racks, to name a few. The traffic flow through the area will become more defined with curb-to-curb parking at all the intersections and new ADA compliant handicap ramps making this portion of roadway safer for cars and pedestrians. The enhancements will increase pedestrian and bicycle traffic thereby providing an increase in the business activity for the local merchants. The project enhancements will be a benefit to the entire Fairborn population. | Ohio Department of Transportation | 2 | 91 to 180 days | \$100,000 |
| Greene | Bioscreen | Southwest Drive. Phase I begins at Southwest Drive and goes west for 2,400 linear feet and terminates just past the Pine Pointe Intersection. The City's Thoroughfare Plan classifies this roadway as a minor arterial road that should have a 9' right of way and a 60 foot pavement width. The right-of-way is already in the required width and the road widening will expand the pavement to the needed full lanes (two each way with center turn lane). In addition to the roadway widening, curbs and gutters will be installed along with new storm sewer and water main. Pavement markings, striping and traffic signage will also be erected. | DEP Solutions | 10 | 0 to 30 days | \$1,000,000 |
| Greene | Community De-Confliction | Dayton-Yellow Springs Road Improvement Project - P | Fairborn Police Department | 4 | 31 to 90 days | \$300,000 |
| Greene | 800 Portable Radio Project | Dayton-Yellow Springs Road Improvement Project - P | Bellbrook Police Department | 0 | 0 to 30 days | \$44,100 |
| Greene | Microcenterprise Development Program | Dayton-Yellow Springs Road Improvement Project - P | City of Fairborn | 20 | 91 to 180 days | \$1,125,000 |
| Greene | Downtown Fairborn Streetscape | Dayton-Yellow Springs Road Improvement Project - P | City of Fairborn | 30 | 31 to 90 days | \$989,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Greene | Maple Avenue Bridge Rehabilitation | The City of Fairborn needs to make repairs to the Maple Avenue bridge that crosses over the Erie Lackawanna & Pennsylvania Central Railroad. This bridge is located on Maple Avenue which is an arterial roadway running through the middle of Fairborn and has an average daily traffic count of 11,843 vehicles. This bridge is a 4-span continuous steel beam bridge with reinforced abutments and piers. The bridge has been inspected and was found to be in need of the following repairs: 1) The sidewalk is in need of repair or replacement due to concrete spalling and exposed reinforcing. 2) Curbs on each side of bridge in need of replacement due to rotted post. 3) The caps need repaired due to delimiting and spalling concrete. 4) Beams are showing excessive rotation and should be either reset and/or refurbished. 5) Fencing used for vertical protection is damaged and needs replacement. 6) The approach asphalt pavement has extensive cracking and is in need of repair. This bridge has been in need of repair for many years. Continued neglect could result in total replacement of the bridge in the near future. As part of a \$275M development by Steiner + Associates with the City of Beaverwood and Greene County, the developers of the Greene Town Center have established a comprehensive long term Sustainability and Energy Program, the early stages of which have been implemented. In an effort to complete this program beginning in 2009, approximately \$1.0M in funding is requested for the completion of two remaining initiatives. The first is the installation of 20,000 square feet of green roof on a single story building that anchors the public park and is visible by the surrounding office and apartment tenants. This installation will improve water quality and storm water management in the area. The second component will be the installation of a hybrid renewable energy program that combines an 85 KW photovoltaic system with three 50 KW wind turbines. The complete hybrid program will total a 235 KW system and will offset 275,000 KWH of power each year. The Greene Town Center Sustainability and Energy Program will also be supported by a visible community outreach program teaching visitors about sustainable initiatives and green technologies. | City of Fairborn | 0 | 91 to 180 days | \$250,000 |
| Greene | The Greene Town Center Sustainability Program | In an effort to complete this program beginning in 2009, approximately \$1.0M in funding is requested for the completion of two remaining initiatives. The first is the installation of 20,000 square feet of green roof on a single story building that anchors the public park and is visible by the surrounding office and apartment tenants. This installation will improve water quality and storm water management in the area. The second component will be the installation of a hybrid renewable energy program that combines an 85 KW photovoltaic system with three 50 KW wind turbines. The complete hybrid program will total a 235 KW system and will offset 275,000 KWH of power each year. The Greene Town Center Sustainability and Energy Program will also be supported by a visible community outreach program teaching visitors about sustainable initiatives and green technologies. | Steiner + Associates, Inc. | 40 | 31 to 90 days | \$1,950,000 |
| Greene | Relocate T/W | Relocate Trolley | Greene County - Lewis A. Jackson Airport | 20 | 91 to 180 days | \$1,023,120 |
| Greene | Recycling of Military Aircraft Landing Gear Axles | Project Description: Testing, demonstration, and marketing of an environmentally responsible manufacturing process that processes recycled military aircraft for reuse rather than scrapping them. This is the pinnacle of recycling strategy and would benefit Ohio by creating many new jobs and saving millions of tax dollars for our national defense budget. Drivers are Executive Order EO 13423 and the Clean Water Act. | Innovative Technology Consulting, LLC | 1,000 | 0 to 30 days | \$2,200,000 |
| Greene | UV Cure Touch-up Pen Processing Industry for Milit | Project Description: This project is a feasibility study, demonstration, and marketing of a new environmentally friendly paint touch-up process that can be manufactured in Ohio. This product can apply the latest environmentally friendly UV Cure paints with environmental and performance inhibitors. This product benefits Ohio by creating manufacturing jobs, benefits the environment by eliminating chrome plating, a toxic material used in the military aircraft industry, and avoids costly paint touch-up processes used currently by both military and commercial aircraft manufacturers. Drivers are Executive Order EO 13423 and the Clean Air Act. Ohio can be a leader in this new environmentally responsible industry. | Innovative Technology Consulting, LLC | 500 | 0 to 30 days | \$1,500,000 |
| Greene | Catalytic Aftertreatment for diesel operated vehic | Project Description: Evaluation and marketing of a new, environmentally friendly catalytic after treatment product that is designed to be installed in the lab to reduce diesel emissions up to 30%. This project represents a great milestone for Ohio to partner with a National Laboratory, OakRidge National Laboratory, Ohio small businesses, and numerous national trucking and diesel vehicle and diesel equipment manufacturers. This effort is aligned with Executive Order EOP3423 and the Clean Air Act. The goal of the project is to eliminate greenhouse gas emissions, reduce diesel emissions by up to 30%. | Innovative Technology Consulting, LLC | 1,000 | 0 to 30 days | \$1,200,000 |
| Greene | F-22 Aircraft Portable Shelter | Project Description: A prototype field evaluation and production operation verification for an environmentally responsible portable humidity controlled shelter with dimensions large enough to house an F-22 (70x70x30). The humidity controlled shelter would be tested on an F-22 aircraft exposed to a high-humidity environment similar to Greene or other high humidity environments where the F-22 will be deployed. Drivers are Executive Order EOP3423. Following evaluation and production operation verification, the shelter can be manufactured in Ohio and create many jobs. The construction of this building located in Greene County, Ohio will address issues with our ability to provide adequate election opportunities for our citizens and enable Greene County to meet mandated voting requirements. | Innovative Technology Consulting, LLC | 500 | 0 to 30 days | \$1,375,000 |
| Greene | Board of Elections Building | The construction of this building located in Greene County, Ohio will address issues with our ability to provide adequate election opportunities for our citizens and enable Greene County to meet mandated voting requirements. | Greene County Board of Commissioners | 10 | 31 to 90 days | \$4,000,000 |
| Greene | Carnegie Library | The Carnegie Library is a classic building located in Downtown Xenia that has sat empty for several years, with much interest from locals to utilize the facility. With funding we would restore and renovate the interior and exterior of the building while providing a central location for meeting purposes and promoting economic development. Intersection at Alpha Road, Statehouse Rd and Orchard Ln, and to build parallel roads. | Greene County Board of Commissioners | 10 | 0 to 30 days | \$400,000 |
| Greene | US 35 Interchanges | As identified in the Access Ohio Plan, US 35 is a main transportation "macro corridor" within the state. Through the years, some segments of the road have been upgraded to freeway standards while other segments have remained two or four lanes with interchanges. As a result of this "top of effect" of going from freeway standards to non-freeway standards, an inconsistent driving experience with major congestion and safety concerns has resulted. Safety concerns & economic development on the driving forces behind the upgrading of the US 35 Highway corridor. It connects with Interstate Highways I-64, I-70, I-71, I-75 and I-77 in West Virginia, providing new business & employment opportunities along its corridor. Businesses in southern Ohio depend on US 35 for access to markets in Midland in the Southeast. The section of US 35 that has seen the most significant increase in traffic & urban development is the 28 miles of roadway within Greene County. | Greene County Board of Commissioners | 100 | 91 to 180 days | \$8,000,000 |
| Greene | S-PAC I & II | Project Description: This project would provide a new industry to Ohio that centers around an environmentally responsible process using sputtered aluminum to plate the interior and exterior surfaces of military landing gear components for corrosion prevention. Current processes require an EPA-17 hazardous material (cadmium) which is a known carcinogen. The technology for sputtered aluminum is available for interior surface treatment and this project would test a prototype and develop a production system that performs both interior and exterior surface treatment which can replace the old cadmium replate process. The military buys cadmium treatment in the tens of millions of dollars each year for aircraft landing gear components. An environmentally responsible surface treatment industry can be brought to Ohio via this project. | Innovative Technology Consulting, LLC | 1200 | 0 to 30 days | \$3,200,000 |
| Greene | State Route 444 | The purpose of this project is to widen and improve Dayton Dr., Kaufman & Central Aves as well as constructing roadways and improvements connecting several gates from Wright Patterson Air Force Base. SR Rt 444 divides Kirtland Ave & Aves A & C, which has 5 Entry Control Points (ECP). Currently, the gates do not meet current ATFP standards and limit development opportunities for Aves A & C and Kirtland Ave. With this relocation project we would reduce active ECP's from 5 to 3 and with the separation of Kirtland from Aves A & C will present Force Protection Vulnerability. This project would impact the community and surrounding areas by eliminating congestion and allow for optimal use of federal property and would protect thousands of citizens, both on-site and military. | Greene County Board of Commissioners | 2000 | 91 to 180 days | \$3,000,000 |
| Greene | Clyo Road Extension Project | This is a collaborative project between Sugar Creek Township, Greene County Commissioners, the Greene County Engineer and the City of Centerville. The project extends an existing stubbed street designed as a thoroughfare for the improvement of public safety in the area. Response times to residents in the northern portion of the township should be reduced by up to 10 minutes during peak traffic times. The completion of the roadway will allow and promote the development of commercial property in the corridor which will provide for new jobs. The current environment seems that the properties will most likely develop as office/retail providing hundreds of employment opportunities. The project is designed, right-of-way are acquired and we are ready to go to bid soon approval and construct the roadway. | Sugarcreek Township | 200 | 0 to 30 days | \$1,500,000 |
| Greene | Ohio Environmental Venture Capital Partnership (OE | Project Description: The Ohio Environmental and Alternative Venture Capital Partnership (OEAEV) is an invigorating new program that will create thousands of technical and manufacturing jobs in Ohio. The OEAEV Program promotes technology investment of environmental and alternative energy products and processes through an incentive strategy with various industries, universities, and private and national laboratories. OEAEV develops and facilitates venture capital partnerships between universities who are seeking scientific patents for novel environmentally responsible, intellectual property and industry who sees investment potential in new, marketable products and processes. | Innovative Technology Consulting, LLC | 2500 | 0 to 30 days | \$10,500,000 |
| Greene | Ohio Hydrogen Infrastructure Objective (OHIO) | Project Description: OHIO Hydrogen Infrastructure Objective (OHIO) will collect data on current hydrogen suppliers and hydrogen fill stations and whole vehicle battery (WV) production and recycling center operations in the State of Ohio. OHIO will evaluate the current state hydrogen and WV resources, will identify companies that have capability to grow and support the hydrogen and WV infrastructure, will project the infrastructure costs and infrastructure cost savings among the states, ten largest fuel cell centers and adjoining suburbs over the next 30 years, and will promote the hydrogen and WV infrastructure in general through educational materials, seminars, and special events. | Innovative Technology Consulting, LLC | 1500 | 0 to 30 days | \$1,750,000 |
| Greene | Xenia COPs Hiring | The Xenia Police Division was forced to make cutbacks in 2003 and the police division manning was reduced from 48 to 45 sworn positions since 2003. Effective this month, March 2009 we will be filling a fourth position opened due to a retirement. We are proposing that we will have to pay off two additional positions by the end of the year bring our total shortage to six officers. We intend to apply for COPs funding to retain the two retired layoffs and fill the position opened due to a retirement. | City of Xenia | 3 | 91 to 180 days | \$240,000 |
| Greene | Wright Cycle Park Development | This is a neighborhood park located in a new residential neighborhood in the City of Xenia. The City of Xenia developed a master plan for the development of this park with the support of the residents. This park has a pond component and the banks of the pond need shoring. An aeration system is also needed to address algae problems. Improvements that need to be completed include: installation of three picnic shelters, walking paths around the pond, electric lines for park lighting system, picnic tables, benches, trash receptacles and water planning. | City of Xenia | 5 | 91 to 180 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Greene | Shawnee Park Emergency Retaining Wall Repair | Shawnee Park is the premier park of the City of Xenia. One of the components of this park is a pond which serves as the drainage for the Shawnee Park and Shawnee Creek tributaries serving several neighborhoods in Xenia. In addition, the pond offers recreation opportunities for fishing on a year long basis and boating on special occasions. Next to the pond is Shawnee Park Pavilion which is also one of the major attractions of the park. The pond is lined with concrete walls. The southeast section of the concrete wall, approximately 700 linear feet has been evaluated as failing structurally. This requires an emergency repair requiring the installation of sheet piling, a cost that is beyond what the current General Capital Budget allows. If the wall is not repaired, the damage would be greater as it could impact the integrity of the foundation of the picturesque park pavilion and the walkways around it. The project will also involve the replacement of storm sewer pipes emptying into the pond. The City's financial resources cannot accommodate this large renovation expenditure without outside funding. This project is for the construction of a hauling facility for the City of Beaver Creek Municipal Maintenance Facility. Construction of the hauling facility not only provides for more efficient distribution and tracking of fuel usage for day-to-day operations of Public Service and Public Safety personnel, but provides a needed resource facility, powered by backup generator, for emergency response by fire departments and providers for accident response. | City of Xenia | 5 | 91 to 180 days | \$275,000 |
| Greene | Beaver Creek Municipal Maintenance Facility Fueling | Application of Liquid Nitrogen into surface procedures from Willbros Fire and Major the control during and group operations. Fire Department Application from water and foam to Liquid Nitrogen, Fixed Fire Control, train capture, unvented ordinance safe removal, venturi capture with LN non-lethal weaponry, food and area flow control, spill recovery on water. Also to reduce the threat of global warming, Liquid Nitrogen could move control starting with the New Stratellite, Perry County Ohio fire, fixed gas capture with greenhouse CO2 use, and to increase domestic fuel production. Fuel harvesting from oil shale, coal, peat, and landfill seams and Methane hydrate deposits - here a DOE-SBIR pending as well as the DOE-NEARPA (BA048-07). These are coordinated efforts with underserved machine shops and a major boiler located in Xenia that will carry much of the Fixed Fire Control - replacing water sprinkler systems - as well as the stack gas capture of pollutants and CO2 and water for greenhouse use. These white papers were requested by the Obama transition team and were submitted December 22-31, 2008 and are under active consideration. We will be busy. | City of Beaver Creek | 3 | 31 to 90 days | \$500,000 |
| Greene | DHS Liquid Nitrogen Projects | Patent application 11825,522 with international application PCT US2009/08504 cover a range of non-nitrogen chemical reactions and their application. Among them is generating hydrogen fuel from water and Calcium metal, recovering pure Calcium metal by reduction, and a neat time Koss Spin Hydrogen engine for light autos. The make as you drive or use fuel cells for hydrogen fuel allows an emergency fuel source if the process tank tanks or if one prefers 100% produce as you drive heating. The equipment to handle the hydrogen production, the engine, and the Calcium purifier will be developed. The Calcium purifier can be an income source for independent power generating homes and businesses when their excess power from wind or solar can recover Calcium at \$0.05 per kilowatt rather than selling it back to the power company at the going price of \$0.05. | Air Wars Defense Ip | 150 | 0 to 30 days | \$500,000 |
| Greene | Develop Hydrogen fuel system - cars, engine, CA pu | This clean fuel system for vehicles exhausts only water. And that can be captured and used for drinking, sold as distilled-quality for industrial uses and steam iron. The Calcium needed is costly presently, but with the power purifiers, should be popular with alternative power groups and/or produce sufficient Calcium. | Air Wars Defense Ip | 35 | 31 to 90 days | \$500,000 |
| Greene | A real-time biological contaminant detector to pro | The goal of this initiative is to develop an effective, real-time detector that can prevent food contamination from E. coli and Salmonella. Government and industry to protect domestic and reliable food supply from extended and unrelieved contamination. It will consist of a real-time generic sensor platform that can detect any biological agent, and a command control unit that will identify location, and the contamination strategies. To our knowledge this is the first real-time detector that not only detects in real-time, but also isolates the contamination and relays information necessary to limit continued contagion. The State of Ohio will be the recipient of all the jobs and revenue associated with this venture. Once the technology is developed and tested, UES and Elapago in business partner will utilize the technology to create a detector and begin manufacturing both the sensors and the command control units. In the interim, we formally invite the State of Ohio to purchase that will install and monitor these systems for our customers. | UES, Inc. | 150 | 0 to 30 days | \$4,500,000 |
| Greene | Spring Hill Park Redevelopment Project | This is a neighborhood park located in a low/moderate income neighborhood in Xenia. In 2007, the City of Xenia commissioned a park redevelopment plan to update this park which had outdated equipment and electrical buildings. The plan called for the installation of various park equipments, installation of a walking path around a multi-purpose field and restroom stations. | City of Xenia | 5 | 91 to 180 days | \$100,000 |
| Greene | Greene County - Beaver Creek Signals - PID# 78495 | North Fairfield Road from Jonathan Drive to Lantz Road and Dayton Xenia Road from Research Park Drive to Beaver Valley Road Traffic Signal Upgrade and Intersection | MVRPC (on behalf of the City of Beaver Creek) | 31 | 91 to 180 days | \$123,000 |
| Greene | Twenty First Century Energy Vertical Axis Wind Tur | Energy and commercial vertical axis wind turbine (VAWT) systems optimized for the open wind in order to exploit the need for low-cost and efficient distributed electric power generation. VAWT will use advanced technologies and estimate 70 % composite, and will be optimized (4 to 18 m/s) for Class I and II low-speed wind conditions such as those prevailing in most of Ohio and about half of the U.S. TFC Energy's technology will address a primary segment of the marketplace that not suited for the larger utility scale Horizontal Axis Wind Turbines (HAWT) that operate efficiently only in high-speed wind locations. TFC Energy is expected to strengthen and maintain existing jobs and create 250 new high tech jobs in Ohio to support the design, construction, manufacturing and customer support of these turbines. TFC Energy's technology is expected to reduce the energy cost of power generation. Based on the size and configuration of a building, geographic location, wind speed & consistency, & power requirements for each site, customers will have a choice of three basic size ranges for the VAWT system: 10kW, 40 kW or 100kW. Expected revenue estimates: 2 years \$3M, 3 years \$12M and 5 years \$12M. | Twenty First Century Energy, LLC (TFC Energy) | 90 | 0 to 30 days | \$2,500,000 |
| Greene | Kauffman Lift Station Construction | Project is currently under design with construction anticipated for late 2009. The proposed station will replace an older facility that has significant structural and operational problems. In addition, the new station will incorporate the pumping technology which will improve system efficiency and reduce energy costs. | City of Fairborn | 10 | 181 days or more | \$750,000 |
| Greene | Sanitary Sewer Lining | Lining sewers with a cured in place process allows for the repair and renewal of older or problematic pipes without having to excavate. The technique also addresses rising pipe capacity and reduces the amount of sewage to be treated by decreasing infiltration of ground and storm water. Target areas have already been identified and engineering can be performed in-house on a very quick timeline. | City of Fairborn | 5 | 91 to 180 days | \$100,000 |
| Greene | Raw Water Line and Water Treatment Plant Upgrades | The Mad River Wild Field is the primary source of water to over 32,000 residents and all businesses of the City of Fairborn as well as a Greene County commercial center located outside of the city limits. Currently there is only one water main to convey this water from the well field to the Water Treatment Plant. It runs below the Mad River before going 2 miles to the plant. In 2008, the city experienced a leak on this important line which emphasized the vulnerability of our current situation. Had the repair not been completed within a very limited timeframe, our customers may have been without water and our system compromised due to depressurization. | City of Fairborn | 20 | 181 days or more | \$2,100,000 |
| Greene | Rona Village Boosted Pressure System | Besides providing redundancy, the new pipeline will allow for a greater conveyance capacity which will support a new wellfield that was recently completed. When coupled with a planned upgrade to the Water Treatment Plant, our output capabilities will be increased to over 6 million gallons per day providing the ability to sustain current and continued growth of the city. Additionally, the improvements help assure that we can continue to serve as a backup resource to Wright State University and Greene County both of which. | City of Fairborn | 10 | 91 to 180 days | \$540,000 |
| Greene | WTP Capacity Improvements | Project involves improvements to the Water Treatment Plant to allow plant to treat full capacity of filters. Improvements include increased effluent piping size, new lower restriction flow meters, additional chlorine storage space and feed equipment, additional booster pump stations, OSHA compliance safety improvements and operational improvements. This will improve the ability to meet future residential and commercial growth. The Sheriff's Office staff needs to be reduced by 12 employees to reduce expenses and meet operational funding. We would need to reduce by another 8 to cover unemployment expenses. We have asked some to reduce their current salary and work hours as a cost savings. This amount should allow this agency to return to normal without reductions. This would be at today's economic conditions and would change if the conditions get worse. | City of Fairborn | 10 | 181 days or more | \$750,000 |
| Greene | Layoff Prevention | | Greene County | 20 | 31 to 90 days | \$600,000 |
| Greene | Smart Tooling Infrastructure | Cornerstone Research Group Inc. (CRG) is currently in the process of scaling up production capabilities for Smart Mandrels™, a low-cost mandrel system used for fabrication of complex composite parts with application to aerospace, alternative energy, automotive, and various other markets. To facilitate the fabrication and use of large-scale mandrel systems, CRG requires additional infrastructure including large ovens, gantries, fork trucks, and more. Securing this infrastructure would allow CRG to service a larger market segment that is currently showing interest in the Smart Mandrel™ technology. CRG proposes to use grant funding to put in place the necessary elements to secure manufacturing contracts from companies already showing interest as well as additional funding for larger scale composite parts building on an already rapidly growing customer base. CRG has an exemplary performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group, Inc. | 5 | 0 to 30 days | \$700,000 |
| Greene | Smart Tooling for Wind Blades | Cornerstone Research Group Inc. (CRG) has developed a revolutionary scaling technology, Smart Mandrels™, capable of reducing fabrication time and cost for fabrication of complex geometry and tapered components. CRG has demonstrated successful implementation of the technology into the aerospace market segment; however, acceptance with other industries has been slow. CRG has identified wind blades as a market segment that could gain substantially from use of Smart Mandrel™ technology; however, without a demonstration article, CRG has had a difficult time communicating benefits to original equipment manufacturers (OEM). CRG proposes to use grant funds to purchase necessary tools and equipment that would allow for evaluation of Smart Mandrels™ in the fabrication of scaled wind turbine blades. Cost benefit models would be produced based on real-world data collected during the product evaluation by comparison with published cost models from Sandia National Labs. CRG has an exemplary performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group, Inc. | 5 | 0 to 30 days | \$250,000 |
| Greene | Health Management for Civil Infrastructure | Cornerstone Research Group Inc. (CRG) has developed Reflow Structures, high performance composite systems capable of identifying damage and healing autonomously while in service. Reflow Structures were primarily developed for composite aircraft skins, allowing aerost to control health status in flight and to a problem areas, heat without interruption of service. CRG has identified alternative applications for this technology, including health management for bridges and other civil infrastructure. According to a 2008 report, more than 25% of the bridges in Ohio were deficient. This technology, if integrated in new bridges, would allow for real-time monitoring for structural damage, and if found, heat itself to restore above 90% of original mechanical performance. The combination of health monitoring and healing would significantly increase bridge life. CRG has an exemplary performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group, Inc. | 4 | 0 to 30 days | \$500,000 |
| Greene | Wright State University HB7 Project | Campus wide energy improvements and renewable energy opportunities thru House HB 7. | Energy Systems Group | 200 | 31 to 90 days | \$10,000,000 |
| Greene | HAWTHORN / BAYMONT INN AND SUITES-FAIRBORN, OHIO | HOTEL RE-FINANCE FUNDS REQUIRED TO RE-FINANCE A PREVIOUSLY FAILING PROPERTY TO A CURRENTLY IMPROVED PROPERTY OF REVENUES INCREASE 18.0% IN 2008. THIS WAS ACCOMPLISHED BY NEW LEADERSHIP FINANCIAL CASH INJECTION, AND A MANAGEMENT TEAM THAT ALLOWED THEM TO SUPPORT DEBT IN THE ABOVE REFERENCED AMOUNT. | Premier Hotel Group LLC | 15 | 31 to 90 days | \$2,200,000 |
| Greene | Kauffman Avenue Lift Station Replacement | 1) Replace existing Wastewater lift station (1,400 gpm) at new location 2) Construct 25' linear feet of 18-inch storm main 3) Construct 70' linear feet of 6" storm main 4) Construct 180' linear feet of 18-inch sewer 5) Construct 80' linear feet of 12-inch sewer | URS Corporation | 10 | 91 to 180 days | \$800,000 |
| Greene | Washington Street Water Line Replacement | Construct 6,000 linear feet of 8-inch waterline and 500 linear feet of 6-inch waterline which will include installation of 20-4" valves and 12 tie partitions. | Village of Jamestown- URS Corporation | 10 | 91 to 180 days | \$919,000 |
| Greene | East Miami Valley Drive Extension | Extension of Miami Valley Drive, East from Wilmington Pike to Clio Road extension which is to be completed by Greene County within the next | City of Centerville | 500 | 31 to 90 days | \$3,250,000 |
| Greene | Feedwire Road Improvements | Road widening and improvements for 2,500 linear feet of Feedwire Road from Wilmington Pike to the east Centerville Corporation line. Improvements to include public road widening, public sidewalks, and storm sewer system. | City of Centerville | 335 | 31 to 90 days | \$3,350,000 |
| Greene | Valley Rd Resurfacing | Resurface 1.73 miles of urban collector or with a 4" leveling course and 1" inch course. To protect pavement structure, reduce rate of pavement deterioration, correct surface deficiencies and improve ride quality. | Beaver Creek Township | 75 | 31 to 90 days | \$185,880 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Greene | Emergency City Wide Water Standby Generator | The Village does not have standby power at its' water treatment plant. If there is a power outage the entire Village would be without water and they are on a septic system. This impacts 350 people, many elderly and retired. The LMI for the Village is over 60% and they can not afford a generator themselves. Even matching a local share grant is too much which eliminates their ability to use matching fund grants. | Bowersville | 6 | 31 to 90 days | \$75,000 |
| Greene | Emergency City Wide Water Standby Generator | Receipt of the generator will give the Village residents great peace of mind and security. The Village does not have standby power at its' water treatment plant. If there is a power outage the entire Village would be without water and they are on a septic system. This impacts 350 people, many elderly and retired. The LMI for the Village is over 60% and they can not afford a generator themselves. Even matching a local share grant is too much which eliminates their ability to use matching fund grants. | Bowersville | 6 | 31 to 90 days | \$75,000 |
| Greene | Hobson Freedom Park - Development | Receipt of the generator will give the Village residents great peace of mind and security. Construction of one concession stand, restrooms, water/sanitary systems, irrigation (for 14 soccer fields), walking path, ADA accessible playground, shelter, picnic development, landscaping and paved parking. | Greene County Recreation, Parks and Cultural Arts | 4 | 31 to 90 days | \$1,180,000 |
| Greene | Twin Towers Park Equestrian Center Renovation | Construction of a 28 stall barn/shed, water complex, grandstand, parking lot, restrooms and 10 cross country jumps, large show arena. Contractors will be needed for construction and staff will be needed to maintain this site. These improvements will draw equine related show events and visitors to the area. This in turn brings in revenue to the local economy of the region. Twin Towers Equestrian Center is the only public equestrian facility in a 125 mile radius and attracts visitors from a five state area. | Greene County Recreation, Parks and Cultural Arts | 4 | 31 to 90 days | \$382,000 |
| Greene | Frank Seaman Park Ball Diamond Complex Fencing | Labor and materials to install 1,500 feet of ball diamond outfield fencing and 200 feet of rail fencing to separate the ball diamond complex from the parking lot. This 1970's era park is heavily utilized by the areas youth and and Jameson Little League. These improvements will help to attract state, national, youth and adult baseball tournaments to the area. Funding of this project will provide 8 jobs to the area from contractors to install fencing. Visitors attending the tournaments will help the local economy from expenses to hotels, etc. | Greene County Recreation, Parks and Cultural Arts | 8 | 31 to 90 days | \$37,500 |
| Greene | Karohl Park Barn Preservation | Preservation of an 1880's barn, construction of a 5-acre dog park, restrooms and shelter, Karohl Park, a 29-acre site, was given to Greene County Parks through a 10-year lease and a one-year easement to the City of Beavercreek. The development, construction and preservation of the barn will allow for large scale programs focused on the 1800's agrarian lifestyle, farm/agricultural history. Construction and preservation efforts will require the skills of several contractors. Maintenance and programming staff will be utilized to conduct the large scale programs. | Greene County Recreation, Parks and Cultural Arts | 4 | 31 to 90 days | \$700,000 |
| Greene | Wind Power Research Center for Greene and Clark Co | Project Description: Construction of the first Ohio Wind Power Research Center (OWPRC) in Greene and Clark Counties. The project will collect and evaluate wind-to-electric power conversion that has a renewable source of supplemental electric power to the grid. Wind power is essentially zero cost after the infrastructure is in place, however before planning the infrastructure, more data is needed to determine electrical power potential. | Innovative Technology Consulting, LLC | 1,000 | 0 to 30 days | \$5,500,000 |
| Greene | Xenia Fun Center Revitalization Project | The project that I am proposing is to put a multi function Entertainment facility in downtown Xenia, Ohio. The city of Xenia has no entertainment facility for a city that holds 9 schools and 3 universities within 10 miles from downtown. This entertainment facility will hold: 5 screen cinema, Billiard, Billiards Room, Indoor Miniature Golf, and Indoor Cycling. This facility is built. It will bring activity to the sleeping economy of Xenia, Ohio and traffic to the local businesses and restaurants of the city. While creating up to 100 new jobs, Xenia needs entertainment and business brought back to the downtown area. | Augustine Entertainment and Revitalization | 100 | 0 to 30 days | \$600,000 |
| Greene | Ohio Photovoltaic Energy Research Stations (OPERS) | Project Description: This project will develop the first Ohio Photovoltaic Energy Research Stations (OPERS) that will collect data from various solar array panels for use in converting sunlight to electrical power. This is an infrastructure grid project that can contribute to planning of solar power conversion to electrical energy for homes and businesses in Ohio. | Innovative Technology Consulting, LLC | 1000 | 0 to 30 days | \$5,750,000 |
| Greene | Raw Water Line and WTP Upgrades | These research stations will be built in Greene, Clark, and Clinton Counties. The Main River Well Field is the primary source of water to over 30,000 residents and businesses of the City of Fairborn as well as a Greene County commercial center located outside of the city's limits. Currently there is only one water main to convey this water from the well field to the Water Treatment Plant. It runs below the Main River before going two miles to the plant. In 2016, the city experienced a leak on this important line which emphasized the vulnerability of our situation. Had the leak not been completed within 4 days limited treatment, our customers that have been without water and our system compromised due to de-aeration. Besides providing redundancy, the new pipeline will allow for a greater conveyance capacity which will support a new wellfield that was recently completed. When coupled with a new upgrade to the Water Treatment Plant, our output capabilities will be increased to over 6.5 million gallons per day providing the ability to sustain current and continued growth of the city. Additionally, the improvements help assure that we can continue to serve as a backup resource to Wright State University and Greene County both of which we | City of Fairborn | 10 | 181 days or more | \$2,100,000 |
| Greene | Greene County Trails | Greene County Greenways (62 miles of multi-purpose trails) are in need of repair including: bridge repairs, repair and upgrade of 5,280 feet to meet national trail standards and seal coating of 14 miles of trail. Greene County's trails have been recognized through out the region, state and nationally as award winning multi-use trails and some of the best trails in the country. This system of trails promotes healthier lifestyles, cuts down on emissions and improves air quality and protection of the environment. Annually over 1 million visitors utilize this trail system and provide economic revenue to the local economy. Contractors will be needed for these repairs, upgrades and seal coating. | Greene County Recreation, Parks and Cultural Arts | 3 | 0 to 30 days | \$425,000 |
| Greene | N. Fairfield Rd. and Dayton-Xenia Rd. Resurfacing | Resurfacing of N. Fairfield Rd. from North Drive to Beaver-Vu Drive and Dayton-Xenia Rd. from Hillside Drive to Factory Rd. in order to replace deteriorated surface course and installation of reflective pavement markings, pavement markings along with associated work items. The project involves the rehabilitation of two (2) existing bridges on Hanes Road by removal and replacement of the existing deteriorated precast concrete box beams and miscellaneous associated repairs. | City of Beavercreek | 8 | 181 days or more | \$1,540,000 |
| Greene | Hanes Road Bridge Rehabilitation Project | Reconstruction of the existing span with type traffic signals from Kump Rd. to Crossing Blvd. allowing for the implementation of required safety improvements and elimination of fatalities from work zone vehicle installations. | City of Beavercreek | 2 | 181 days or more | \$231,000 |
| Greene | N. Fairfield Rd. Signal Reconstruction Project | Resurfacing of Grange Hall Rd. from Patterson Rd. to Danam Drive. | City of Beavercreek | 6 | 181 days or more | \$935,000 |
| Greene | Grange Hall Rd. Resurfacing Project | Resurfacing of Creekside Trail Bikeway within the City of Beavercreek. | City of Beavercreek | 4 | 181 days or more | \$605,000 |
| Greene | Creekside Trail Bikeway Resurfacing Project | Reconstruction of the existing traffic signal at the intersection of Dayton-Xenia Rd. with Longview Drive. | City of Beavercreek | 1 | 181 days or more | \$220,000 |
| Greene | Dayton- Xenia Rd. at Longview Drive Signal Reconst | Development of this reserve includes the construction of a shelter for an "outdoor classroom", restrooms (water/sewer), and fencing. Contractors will be needed for this construction work and educators/naturalists will be needed to conduct the educational programming for grades 3 - 6, in keeping with the state education professionals. Cemex Reserve is a unique site having been restored to its natural state of wetland habitat: marshes, wet meadows and wet prairie. Greene County Parks is known in the region as a leader regarding land management and naturalist led programming for schools, homeschoolers and adult education. | City of Beavercreek | 1 | 181 days or more | \$121,000 |
| Greene | Cemex Reserve Development | Reconstruction and Widening of the existing shoulders on S.R. 835 (Research Blvd) to six (6) feet on both sides of the roadway to better facilitate use by pedestrians and bicyclists. | Greene County Park District | 3 | 31 to 90 days | \$150,000 |
| Greene | Research Blvd.(S.R.835) Shoulder Widening Project | Milling and Resurfacing of Col. Glenn Highway from the City of Beavercreek west corporation line to National Rd. | City of Beavercreek | 2 | 181 days or more | \$385,000 |
| Greene | Col. Glenn Highway Resurfacing Project (Rev.) | The Broad Street region in Fairborn is a crucial economic corridor. It spans from 1875 in the northeast to the gates of Wright Patterson Air Force Base in the southwest. In recent years, the City of Fairborn has been attempting to breathe life back into the corridor by erecting a new multi-million dollar bus station on Broad Street. The City also made several key land acquisitions with the intent to create a new entrance from Broad Street into Fairfield Park, a 4.4 acre sports park which is one of the city most heavily used. It is the intent of the city to construct the roadway and gateway into the park. The new entrance location would be centrally located along the corridor in the heart of the struggling business district. In 2008, over 30,000 softball players plus friends and family utilized the parks softball fields. Many more came to the park for baseball games or to use the playground or lighted basketball or tennis courts. The Broad Street business district stands to benefit the most as the new entrance. It could depict thousands of park participants directly onto Broad Street contributing to the economic base of the corridor desperately needs. | City of Beavercreek | 4 | 181 days or more | \$550,000 |
| Greene | Fairfield Park Entrance / Broad Street Economic St | Preservation of this early 1880's log cabin and the restoration to its natural rustic architectural style includes: replacing the roof, back porch, doors and windows, cabin logs, inside flooring and the addition of side porches to add to the longevity of the site. Skilled craftsmen/artisans will be needed for this preservation work. Educators/naturalists will be needed to conduct the educational programming for grades 3 - 6, in keeping with the state education professionals. Greene County Parks is known in the region as a leader regarding land management and naturalist led programming for schools, homeschoolers and adult education. | City of Fairborn | 0 | 91 to 180 days | \$400,000 |
| Greene | Log Cabin at Indian Mound Reserve | Additional attractions at Indian Mound Reserve include: the Pollock Works, an earthen enclosure constructed by the Hopewell Indians between 100 B.C. and 500 B.C.; the Williamson Mound, an ancient Adena Indian structure built around 500 B.C.; Mosaic Creek Gorge, created by the Wisconsin glacier that retreated from SW Ohio over 12,000 years ago and Cedar Cliff Falls. | Greene County Park District | 5 | 31 to 90 days | \$140,000 |
| Greene | Indian Mound Falls Bridge Repair | \$60,000 is needed to rehabilitate the existing 35 year old, clear, span bridge that traverses Mission's Creek Gorge within the Indian Mound Reserve. The repairs include: removal of the bridge and decking from the site, sand blasting, pre-programming, replacing the footing and re-installing the entire bridge. This bridge is crucial to this public park as it is THE only way visitors are able to access this entire park. Indian Mound Reserve attracts many visitors to the area as it features the Pollock Works, an earthen enclosure constructed by the Hopewell Indians between 100 B.C. and 500 B.C.; the Williamson Mound, an ancient Adena Indian structure built around 500 B.C.; Mosaic Creek Gorge, created by the Wisconsin glacier that retreated from SW Ohio over 12,000 years ago and Cedar Cliff Falls. | Greene County Park District | 3 | 31 to 90 days | \$45,000 |
| Greene | Narrows Reserve Nature Center | Created in a 1920's house, renovations were done in the early 80's to become the Nature Center. Due to the technology of today, the age of the structure and heavy public use of this building, many upgrades and environmentally friendly concepts are necessary for continued use of this site. Renovation efforts will include energy efficient technology, water/sewer upgrades, exterior building renovations, exterior building wiring, observation deck/outdoor classroom and renovation of the displays. Contractors will be brought in to perform the renovations. Naturalist staff will provide environmental educational programming opportunities to pre-schoolers, school groups (based to the state education professionals) and adults. | Greene County Park District | 3 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Greene | Vehicle Energy Recovery System (VERS) | CRG proposes the research and development of a Vehicle Energy Recovery System (VERS) for hybrid and electrically powered vehicles. These vehicles have proven their value in today's marketplace but are still incapable of producing fuel mileage that is revolutionary for the automotive industry. Integrating VERS technology into these vehicles will provide the bridge needed to span the gap. An on-board system will recharge the vehicle's energy storage unit while in transit. The end result will be an ultra-high efficient vehicle that could provide more than twice the gas mileage currently achieved by today's most advanced hybrid vehicles. CRG's ability to seamlessly merge VERS technology into hybrid and electric vehicles will result in an affordable, reliable and environmentally friendly energy conservation solution capable of reducing oil consumption on a global scale. CRG is committed in its effort to pioneer VERS technology for the advancement of energy independence. CRG has an excellent performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 16 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornestone Research Group, Inc. | 100 | 0 to 30 days | \$5,000,000 |
| Greene | upgrades on property lone oak | Run 500 foot drainage, repair buildings on property, upgrade septic system, will need work. | none | 4 | 91 to 180 days | \$45,000 |
| Greene | Home repair | replace existing roof with new energy eff. shingles 30 year. cost est. 13,000. replace 4 in gutters with new 5 in. gutters to improve drainage around house. cost est. 6,000. Repair house with new upto date polymer plastic sealer, energy eff. cost est. 6,000. install new 95 percent natural gas furnace with energy eff. heat pump system to reduce green house gas emissions. cost est. 10,000. Thank you David Larkin | Larkin remodeling | 15 | 31 to 90 days | \$35,000 |
| Greene | Alternative Energy Retrofit Demonstration Residence | Demonstrates retrofitting renewable energy sources and high efficiency utilities into existing homes. The aim of the project is to demonstrate cost-effective retrofits using existing technologies. The end product of this project will be to demonstrate a showcase home and a report on the utilization of different technologies. This provides several Obiairs work to perform the retrofit and testing and will also provide a report at the 1 and 5 year marks on short and long term effectiveness (installation cost, maintenance cost, and energy usage). Gas usage and energy usage history is already recorded. Initial demonstration list: 200V Solar array with battery backup and tracker GeoThermal Heat Pump CFL lighting Advanced insulation techniques reflective shingles automated attic fans | self | 5 | 91 to 180 days | \$45,000 |
| Greene | A family farm becomes a source for energy for a gr | A family farm at the juncture of two major roads needs a new life in order to remain in the family. The children of the current owners would want to keep it in the family as a family farm. We propose to have a wind turbine farm, solar panels and geothermal and perhaps raise the "crops" and become a permanent station in order to provide even more reasons for "business" by "to come and see the beautiful landscape". They are not writers of business plans and are associated with my self funded business incubator for consultation and business plan services. The Energy Employees Occupational Illness Compensation Program Act. The US Congress, with the support of the Senate, enacted this program in 2002. Over the last 6 years, the program has bogged down. It is nearly impossible for a diagnosed claimant to be successful with a claim without help. The process is long and confusing. EECAP works directly with claimants and seeks help from other agencies helping claimants on a volunteer basis. I have general medical coverage and compensation for all claimants I accept as a volunteer representative. I would like to expand and be able to do this for more people. | We Can - Business Incubator, Inc | 30 | 31 to 90 days | \$1,000,000 |
| Greene | EECAP | Claimants face many problems with illnesses and deaths caused by the nuclear industry. They lose their homes due to high uncorrected medical bills. Their children are unable to go to college because of reduced family income. While no one can replace a parent or spouse, the monetary compensation can help the survivors replace the lost income. Compensation money helps to stimulate the economy. | Energy Employees Claimant Assistance Project | 2 | 0 to 30 days | \$50,000 |
| Greene | Greene County Summer Pools | Annual budget for both public county pools is \$210,000, revenue is \$120,000 - shortfall of \$90,000 for 2009. Pools have been announced to be closed by the County and considerations to demolish them. The shortfall is the equivalent of just one annual full-time employee at base salary plus benefits and overhead. The decision impacts thousands of pass-throughs at these public outdoor summer facilities. Impact on: Summer attendance is approx 15,000 users, infant & children swim lessons, swim teams, and High School PE classes. By meeting the shortfall of \$90,000 in 2009, the outdoor pools, which are in good working condition, will get through the recession summer of 2009 allowing advanced planning for the 2010 year (donor funding, county funding, etc.) As of now, the closure and proposed demolition of the two county summer pools will contribute to county problems indirectly related to the closure. County records show that a high number of users utilize the county outdoor pools. To note: these two facilities are the only public outdoor pools in the county. One is located in Fairborn along I-75, the other is located in Xenia. | Dayton Raiders Swim Club | 30 | 91 to 180 days | \$90,000 |
| Greene | windows and door replace upgrades | Install and replace exterior doors and windows in poverty stricken areas that would not be able to afford these cost up dates to these primary residences. These up dates would help these home owners with energy cost that eat their money resources up. Will also cut down on home owners carbon foot print by cutting their home energy/heating and air conditioning cost. Will also cut the cost to local governments as they don't have to subsidize as much to these home owners. From my experience these updates to these types of homes would cost between 7,500 to 10,000 dollars per home. Should be able to do between 500 to 750 homes. Thank you, David Larkin, Owner Larkin Handyman/Remodeling Services | Larkin Handyman/Remodeling | 50 | 0 to 30 days | \$5,000,000 |
| Greene | Xenia Theaters | We have several empty commercial buildings and or property without any development. Xenia has lost family entertainment, we propose opening a family oriented theater fun facility to stimulate economic growth, by providing reasonable, affordable movies and rental facilities for electronic games and tournaments | NONE | 7 | 91 to 180 days | \$750,000 |
| Greene | Painting Ohio | Providing additional opportunities to unemployed, skilled painters that are in need of solid work. My company has leads to engage this activity, but lacks short in available money to hire additional painters. These "jobs" will be a continual entity versus a hand out to allow these outsource and downsized individuals further opportunities. This stimulus would allow freedom to hire even more employees if the other infrastructure avenues occur, painters will be in great demand. | K. S. Painting Services | 10 | 0 to 30 days | \$50,000 |
| Greene | Digitize Patient Medical Records | This project would support the Government initiative of digitizing patients' medical records. This would be accomplished by working with Government agencies to identify medical facilities yet to digitize patient medical records. Once medical facilities are identified, the organization would work with each individual facility to digitize existing medical records while assisting each medical facility to implement new business processes to support digital medical records going forward. This may consist of, but is not limited to, updates from existing business processes, update/improve existing systems by which patient records will be maintained, implement new systems required to support new business processes in the future. It is expected that this project will create a minimum of 100 new full time jobs in the State of Ohio in support of digitizing patient medical records. | Distributed Business Systems, Inc. | 100 | 31 to 90 days | \$500,000 |
| Greene | Home maintenance and repair/environment | Remove old 22 years of shingles & re-shingle (28-30 squares), add fiberglass insulation in ceilings (approx. 2,400 sq ft), new vinyl insulated siding to lower partial brick/stone, siding, foam insulation in exterior walls, plant trees & shrubs, vent dryer, 30 in. new pgs., new tank less water heater, 2-3 air filters to cut electricity cost, and new water efficient toilet. | homeowner | 12 | 31 to 90 days | \$25,000 |
| Greene | debt consolidation / home repairs | much needed home roof repair and outside structural repair to maintain home value and safety. | Homeowner | 10 | 0 to 30 days | \$25,000 |
| Greene | Motorized System for Edging Sprinkler Heads | The stimulus money is to build a prototype. This device saves time and labor. Not only does it have local use but national and worldwide. The design and provisional patent are in place. Help on this invention has been provided through the Ohio Manufacturing Technology, SBDC in Dayton, Ohio, Carol Baumhauer. The project is a motorized head cutter vs the current manual labor. It can be used both commercially on residential irrigation systems as well as golf courses. Outcomes could be hiring Ohio tool makers to develop the manufactured product; once done, then Ohio companies to build and distribute. The project is currently at an impasse because of lack of funding. | Universal irrigation head cleaner | 30 | 0 to 30 days | \$19,000 |
| Greene | Fund the Future | Just give all the money to the state colleges to insure their future. Ohio currently has good higher level education, the funding of the current colleges and universities is of paramount importance to Ohio's future. | Self | 1000 | 91 to 180 days | \$50,000,000 |
| Greene | pay off bills | Have been laid off by parent and I had a job and lost my truck this money will pay off my bills and get my life back on track so please help me thank you! | myself | 0 | 0 to 30 days | \$40,000 |
| Greene | grandma's | I would like to start a restaurant where people with no money could eat at. Where they could feel like they were at grandma's house. They would pay to pay for what they thought they had worth. | self | 20 | 31 to 90 days | \$1,000,000 |
| Greene | Expansion of business | Would like to expand small healthcare business. we need to move to new, bigger facility, update equipment, add new technology to comply with EHR mandates. This would also allow the hiring of additional personnel to expand wellness care to dry of Fairborn. Would like to relocate to local shopping center with available vacant space. We currently have a 900 sq. ft. building. We could easily use and fit 1500 sq. ft. thereby adding to local economy thru construction, supplies, and payroll. | Neff Chiropractic | 6 | 31 to 90 days | \$100,000 |
| Greene | Reinvigorate ABDA | Team requesting federal funds to help me purchase the Aerospace Business Development Associates, Inc. (ABDA). ABDA is a for-profit company devoted to helping companies and large businesses with WIFAPs and currently employs 30 people. The current owner of ABDA is failing health and wishes to sell the company. If he does not find a buyer, the company will close and the current staff will be unemployed. I also plan to reorganize the company's business plan and increase its staff by 50% over the next 12 months. This will require infrastructure investment. I plan to use \$250,000 to pay for half of the purchase price, and \$50,000 for infrastructure upgrades. | Organization to Purchase the Aerospace Business De | 10 | 31 to 90 days | \$300,000 |
| Greene | Pastoral Counseling | Funds needed to acquire Counseling Degree and licensing from State in order to open an office dedicated to counseling the emotionally impaired. Funds would be used to lease office space, employ staff for a period of three years or more. Funds would be used to all related expenses entailed in the practice. | Private | 2 | 31 to 90 days | \$725,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Greene | Enterprise Lane Extension | The Anovitz Industrial Park is a 56+ acre Heavy Industrial Park that commenced construction in 1997. Unfortunately, only 43 acres has since been developed over the last 11 years. Like many land developers, Anovitz Enterprises has been adversely affected by the local and national economic downturn and therefore has been hampered in attending any further to relocate within the park. As such, and in order to attract industrial end-users to the park, the City would undertake the roadway extension of Enterprise Lane, approximately 1500 feet in length. The extension would terminate at Burnett Drive, which is approximately 200 feet east of the east property line of the Anovitz Industrial Park. The City believes that the extension should continue through the park because it would then "open-up" the adjacent 55.5-acre Blake Property, also zoned Heavy Industrial (I-2). The 1500-foot extension of the roadway would then have thorough along 83.3 acres. The extension of Enterprise Lane and the corresponding lot in Burnett Drive is also in accordance with the City's adopted Thoroughfare and Comprehensive Plans. | City of Xenia, Ohio | 833 | 181 days or more | \$800,000 |
| Greene | Hospitality Drive/W. Main Street Intersection Impr | The Progress Center Retail Complex, is a 200+ acre commercial development that has continued to grow over the last eight (8) years. The complex is bounded by Progress Drive on the east, W. Main Street (D.S. 35) on the north and the U.S. 35 Bypass on the west. The complex currently has big box retailers such as Wal-Mart and Lowes in addition to several franchised national chains. The City of Xenia appreciates the amenities that each end user brings to its citizens, the more the complex has developed, the greater the traffic hazard that has been created, most notably during rush hour times and PM peak hours. Currently, there are only two north-south roadways (Progress Dr. and Hospitality Dr.) within the complex to access W. Main Street and only one of those roads, Progress Drive, allows motorists to continue westbound on U.S. 35. Signs from the complex on Hospitality Drive does not permit a left-turn, westbound U.S. 35 movement. Ingress to the complex on Hospitality Drive does not permit a "right-turn" because of the conflict of merging traffic from the eastbound 35 Bypass onto W. Main Street. | City of Xenia, Ohio | 100 | 181 days or more | \$3,000,000 |
| Greene | Education Opportunity | Brain center for building management to obtain employment. Cannot afford college needed for certification/training. This project consists of a simple resurfacing of South Maple Avenue from Dolis Drive to the Five Points Intersection. The roadway has a Functional Classification of an Urban Minor Arterial as defined by the City's adopted Thoroughfare Plan. The road currently has a Pavement Condition Rating (PCR) of 63 and an Average Daily Traffic (ADT) of 10,524 vehicles. | Alpha Omega | 1 | 0 to 30 days | \$7,000 |
| Greene | South Maple Avenue Resurfacing Project | The length of the resurfacing is approximately 5,025 ft and the pavement width is 36 feet with curb on both sides. As can be seen from the proposed pictures, the roadway is in poor condition and the surface is in need of repair. There are alleghored areas throughout the roadway and there have been patch repairs from pot-holes and utility excavations. The existing asphalt pavement will have 1" to 2" of planing performed from the face of gutter to face of gutter. The planing will be performed prior to the installation of a 1.5 inch thick 2" 4.40 asphalt concrete. Also, as part of the project, manholes and water valves will be adjusted to grade and pavement markings will be replaced. | City of Fairborn | 10 | 31 to 90 days | \$383,740 |
| Greene | Colonel Glenn Highway Resurfacing Project | The roadway in this area is wide enough to maintain two lanes of traffic and parking on each side. The City is currently analyzing the roadway to this project consists of a simple resurfacing of Colonel Glenn Highway from Reverend Drive to Summer Avenue. The roadway has a Functional Classification of an Urban Minor Arterial as defined by the City's adopted Thoroughfare Plan. The road currently has a Pavement Condition Rating (PCR) of 63 and an Average Daily Traffic (ADT) of 9,166 vehicles. | City of Fairborn | 10 | 31 to 90 days | \$151,026 |
| Greene | Dayton-Yellow Springs Road Resurfacing Project | The length of the resurfacing is approximately 2,040 ft and the pavement width is 34 feet with curb on one side. As can be seen from the proposed pictures, the roadway is in poor condition and the surface is in need of repair. There are alleghored areas throughout the roadway and there have been patch repairs from pot-holes and utility excavations. The existing asphalt pavement will have 1" to 2" of planing performed from the face of gutter to the edge of pavement. The planing will be performed prior to the installation of a 1.5 inch thick 2" 4.40 asphalt concrete. Also, as part of the project, manholes and water valves will be adjusted to grade and pavement markings will be replaced. | City of Fairborn | 10 | 31 to 90 days | \$227,824 |
| Greene | Dayton-Yellow Springs Road Resurfacing Project | The roadway in this area is wide enough to maintain two lanes of traffic and parking on each side. The City is currently analyzing the roadway to this project consists of a simple resurfacing of Dayton Yellow Springs Road from Kautman Avenue to Howard Drive. The roadway has a Functional Classification of an Urban Minor Arterial as defined by the City's adopted Thoroughfare Plan. The road currently has a Pavement Condition Rating (PCR) of 63 and an Average Daily Traffic (ADT) of 1,017. | City of Fairborn | 10 | 31 to 90 days | \$227,824 |
| Greene | Cincinnati Avenue Pavement and Sidewalk Rehabilita | The City of Xenia is seeking funding through the American Recovery and Reinvestment Act for transportation funds for the Cincinnati Avenue Pavement and Sidewalk Rehabilitation Project. According to the Highway Functional Classification Map adopted by the City, CDOT #1 M/WSPC Cincinnati Avenue (aka US 42) is deemed a Principal Arterial Street, and therefore eligible for funding under the federal recovery act. The proposed project measures approximately 2400' in length and scales from W. Main Street on the north to S. Miami Avenue on the south. This road's recent PCR ranking for this 2400' section of Cincinnati Avenue was 42, also qualifying for consideration under the federal recovery act. Over the entire length of the proposed project, the public right-of-way measures 66 feet in width. Given that this is a 4-lane principal arterial street, an additional right-of-way is necessary for acquisition. In addition, there are existing sidewalks on both sides of the street over the entire length of the project. Because there is existing sidewalk within the public right-of-way, any ADA-handicap ramps that will be installed will either be new or retrofitted to ADA-compliant standards. | City of Xenia, Ohio | 100 | 91 to 180 days | \$874,273 |
| Greene | General Aviation Airport Classification | The federal government has initiated several programs aimed at enhancing CAT as a transportation alternative. NADA's programs include the CATS, CATS and SATS programs. As a result of the joint Transportation Development Office was established to collaborate with the FAA and the Department of the Next Generation Air Transportation System (NextGen). As a result of NextGen coupled revolutionary Very Light Jet developments, "On-Demand" transportation is emerging. Air taxi has been established and realized considerable growth. Thus the recent economy slowed the growth down, but air taxi will be the preferred alternative transportation mode for business. The airports that air taxi industry will benefit from the economic development which inevitably results from being accessible. As the economy recovers the air taxi industry will expand beyond the northeast and as Ohio needs to be the leading candidate for that expansion. It is critical that Ohio community airports have the capabilities and services that air taxi passengers need. This project will provide an airport classification database so that taxi operators and their passengers can easily find their nearest airport offer. | Consortium for Aviation System Advancement | 58 | 31 to 90 days | \$58,000 |
| Greene | Miami Avenue Street Rehabilitation and Drainage Im | The City of Xenia is seeking funding in the amount of \$186,815 under the American Recovery and Reinvestment Act to rehabilitate Miami Avenue and install drainage improvements from S. Miami Street to Cincinnati Avenue. The City of Xenia was successful in obtaining State of Ohio loan 1 funds in the amount of \$399,652 for this project in October 2008. However, the City's local funding match for this project is \$154,000. In addition, if this project is awarded funding under the federal recovery act, it will be necessary to contract with an outside firm to complete the construction inspection. As such, the requested \$186,815 includes the \$154,000 to OPRC and \$32,815 for the construction inspection. Officials at OPRC have indicated that these funds will become available on July 1, 2009. The City Engineering Staff will be designing these improvements in-house and anticipates the start of this project in August 2009. | City of Xenia, Ohio | 30 | 91 to 180 days | \$186,815 |
| Greene | Start up assistance | The proposed project is critical for the City to complete this section of roadway supports the Xenia Station where five (5) bike trails meet. In addition, there has been over \$1,000,000 expended by various entities to rehabilitate the old railroad station to provide parking, restrooms, lockers, lockers to existing building to enable manufacturing of cabinets/countertops and other wood related projects.Purchase of some woodworking equipment and a new saw. | Jay Graham Woodworking | 3 | 0 to 30 days | \$30,000 |
| Greene | Teradata | The Coffing Corporation proposes a 3 year test bed for Teradata technology education, research, and development. This is an educational model that will work in conjunction with various institutions in developing Teradata skills that will benefit the region as a whole. The test bed will also be utilized for advanced research and development to maintain Teradata's (a Dayton based corporation) competitive advantage over data processing platforms. The test bed will include research, access and training in Teradata technologies to prepare them for testing and certification. If certification is achieved internships or staffing opportunities will be made available. The program will select 8 students a year for training, research, and certification. There will also be systems administrator, test database administrator, test research analysts, and a Teradata Certified Master working within the test bed. A leading edge Teradata platform will be purchased to create the test bed in already existing, secure lab space. The goal is to create a Teradata Training and Education Center of Excellence to provide the Dayton region with highly skilled Teradata professionals. | The Coffing Corporation | 30 | 91 to 180 days | \$3,200,000 |
| Greene | Downtown Xenia Comprehensive Streetscape Project | As part of its continuing effort to revitalize the Xenia Downtown Area, the City of Xenia has implemented a downtown streetscape project. The project involves replacement of trees, installation of ornamental lighting, replacement of sidewalks and curbs where it is needed, installation of crosswalks and accessible ramps and provision of streetscapes such as benches, trash receptacles, planters and banners all in the City of Xenia's right-of-way. | City of Xenia | 500 | 91 to 180 days | \$1,282,933 |
| Greene | Bicycle and Pedestrian Crossing Improvements From | The requested amount will complete the project along nine blocks of the downtown area along Main Street and South Detroit Street. The goal is to deter disinvestment in the downtown area by improving the physical appearance that could spur reinvestments. | | | | |
| Greene | Bicycle and Pedestrian Crossing Improvements From | This project will address an unsafe crossing for pedestrians and cyclists who use the Xenia Station Bicycle Hub to cross South Detroit Street to get to Ohio One Trail. This project requires an original proposal to construct an overhead bridge which was determined too cost prohibitive. It will include the following: 1. Improve the crosswalk across South Detroit Street from Xenia Station located on Miami Avenue with proper pavement marking. 2. Re-open existing accessible ramps at both corners of South Detroit Street/Washington Street and Washington Street. 3. Widen existing sidewalks on the east side of South Detroit Street between Washington Street and Hill Street and install protective barrier. 4. Widen existing sidewalks on the north side of Hill Street up to the bridge leading to the access ramp to Ohio One Trail. 5. Replace existing 2-2 B cash basin with storm manhole to make it bicycle and pedestrian friendly. 6. Install appropriate pedestrian and bicycle signage as recommended by the Walkable Communities Workshop. | City of Xenia | 10 | 91 to 180 days | \$51,123 |
| Greene | Jamestown Connector Project Bicycle Path Construct | The Xenia-Jamestown Connector has been the missing link in Greene County's trail system since 1995. The existing system branches out from Xenia Station Hub in the heart of Xenia to the north, south, west and northeast but not the east. This project is to construct three 1/2 mile recreation trail segments, including necessary site work, grading, drainage structures, paving, shelters, signage, barriers, and trail self stabilization from Washington Street to Jasper Road. The construction of the segment from Jasper Road to Blaker Road was started in the fall of 2008. The first of the segment between Blaker Road and Washington Street is slated to be completed in the Spring of 2009. The second segment of this project, which is being funded by CDOT/MVRP/CMAG/STP funds is to design and construct a tunnel under U.S. 35 By-pass. | City of Xenia | 25 | 31 to 90 days | \$350,000 |
| Greene | Wayfinding Sign Plan and Construction Project, Xen | Recommendations for the City of Xenia's wayfinding system are to develop a wayfinding system that is consistent with the City of Xenia Downtown has multiple functions. As the County Sign for Greene County, Xenia houses the County Courthouse, Xenia City Government, and a number of county offices and related businesses. A major highway connector for the regional bike trail system has been chartered through the downtown. These multiple functions require specialized signage systems. The project will consist of creating a Downtown and Adjacent Area Wayfinding Plan. The plan will contain a schematic design of a sign system that will organize message content of all sign types; help residents, visitors, guests, customers and motorists navigate the downtown area and adjacent neighborhoods for the downtown area. The second part of this project is the development of the construction specifications for the signs in the Wayfinding Plan, and finally through implementing the recommendations of the plan through actual sign construction and placement. | City of Xenia | 200 | 181 days or more | \$180,000 |
| Greene | Cedarville High School Bleacher Replacement | Replace existing home, visitors, and portable bleachers that have been deemed unsafe. | Cedar Cliff Local Schools | 4 | 91 to 180 days | \$190,000 |
| Greene | New school building | Replace aging school facility with a 21st century building. | Cedar Cliff Local Schools | 30 | 181 days or more | \$14,000,000 |
| Greene | ROUTE EXPANSION/NEW EQUIPMENT FUNDING | FUNDING TO EXPAND CURRENT ROUTE AND TO UPDATE AND/OR BUY NEW EQUIPMENT. I currently distribute bread products to grocery stores, and due to the current economic crisis and fluctuating operating costs has made it difficult to cover daily business operations. If I had funds to expand and replace equipment, would allow me to keep my business operating. | GEORGE WESTON BAKERIES | 1 | 0 to 30 days | \$50,000 |
| Greene | additional funds for GPS/MDTs for vehicles | This funding enhances the funds available for placing GPS/MDT technology on Greene CATS fleet of 34 transit vehicles. This technology will allow us to locate the vehicles at all times (to improve scheduling, dispatching, operations, and emergency response), and to monitor the location and from the drivers in a timely and accurate manner. | Greene County Transit Board (Greene CATS) | 4.5 | 181 days or more | \$225,000 |
| Greene | Automatic bus washer | Improvement to and from the drivers in a timely and accurate manner. A clean bus needs to be washed daily on the outside during those months. And, when it is very cold, washing cannot occur since the bus will freeze. An automatic bus washer, with the capability to access the inside water, will result in a fleet that is washed very often and is functional, thereby adding to the attractiveness of public transit as a mobility option. | Greene County Transit Board (Greene CATS) | 2 | 181 days or more | \$120,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Greene | Sterling Green Park Development | This is a neighborhood park located in a new residential neighborhood in the City of Xenia. The City of Xenia developed a master plan for the development of this park with the support of the residents of the residential subdivisions it is intended to serve. The type of improvements required include grading of the parkland, installation of a main gazebo and two other shelters, walking paths, perching park amenities such as benches, water fountain, picnic tables, trash receptacles. | City of Xenia | 20 | 91 to 180 days | \$200,000 |
| Greene | Electronic destination signs for 20 buses | 14 of Greene CATS 34 vehicles were recently outfitted with electronic destination signs. They have proven to be very popular as a marketing and information device, as well as an effective way for seniors and persons with disabilities to know which bus to board. | Greene County Transit Board (Greene CATS) | 2 | 181 days or more | \$100,000 |
| Greene | West Main Street Enhancement Project | This is a transportation enhancement project designed to improve the main gateway of the City of Xenia. This project is aimed at improving air quality, providing protective buffering for pedestrians, beautifying the city landscape, including ornamental enhancement, street tree planting, and traffic median landscaping. The City and various entities and business establishments believe that by investing in the community's image and aesthetic character, it will encourage existing businesses and residents to invest in their area and neighborhoods and attract new economic and neighborhood investments. It will also project an image that Xenia is a special place to be. | City of Xenia | 200 | 91 to 180 days | \$449,239 |
| Greene | Electronic fareboxes with smart cards and associat | Equip all 34 vehicles with electronic fareboxes with smart card capabilities. Greene CATS will be implementing a significant fare increase later this year, which will result in much more cash to be handled. The use of electronic fareboxes will make this occur in a more orderly and accountable and secure fashion. In addition, Greene CATS carries many rides whose trips are not included in social services agencies and many of whom have medical and disability issues. It would be preferable to have those riders use smart cards that could better track their usage and provide dispatch (since the drivers with immediate emergency response and contact information). | Greene County Transit Board (Greene CATS) | 3 | 181 days or more | \$150,000 |
| Greene | Phone system upgrade for call center | Greene CATS currently handles 100's of trip requests and queries by phone every day. The phone system is basic and unreliable, and does not have any capabilities for providing customers information while they wait. Tracking how long customers are waiting for a Greene CATS person to get to them, duration of calls, ability to easily transfer to dispatchers, etc. A call center phone system will provide customer-oriented technology to handle our 15% ridership growth per year. Greene CATS owns. | Greene County Transit Board (Greene CATS) | 2 | 181 days or more | \$100,000 |
| Greene | Start my own business | I have worked in the corporate world for more than 15 years. I was in several management positions and I know what it took for and how to prepare resumes for students leaving educational institutions to executives seeking another field of employment or position. This will require a computer with specific software, presentations, and a printer that is of good quality. I will also require office supplies, varied grades of paper, fax machine, copier and a designated phone line. I expect the outcome to be good in this market. As many people have been displaced or they are out of work. They may seek assistance and guidance for resume creation and distribution. My background in Mortgage Banking and the legal profession have exposed me to many resume errors and opportunities. I have been a project that has been considered for many years and that has been a good time to put some ideas into writing. I know that what I have been doing is not just a job, I want to do something that will make a contribution! | Individual | 2 | 0 to 30 days | \$5,000 |
| Greene | Security cameras in outdoor vehicle storage area | Currently, the fleet is stored out doors in a semi-secure fenced area. The potential for security issues and theft is large. Cameras to observe and record in the outdoor storage area will help address this issue. | Greene County Transit Board (Greene CATS) | 1 | 181 days or more | \$40,000 |
| Greene | Additional flex capabilities to scheduling compute | Current computerized scheduling system does not include the new flex services. Will be adding new services and therefore need to have the capability, to do trip requests, scheduling, billing and reporting. | Greene County Transit Board (Greene CATS) | 2 | 181 days or more | \$100,000 |
| Greene | Additional funds for operations facility | Greene CATS was planning to build a modest basic maintenance/operations/storage building for outdoor vehicle storage. The stimulus funds would allow us to enclose all the vehicles (for maintenance, security and cold weather protection), and add "green" and alternative energy technology to the facility. CO Sustainable (Columbus) and CRG (Dayton) propose to create at least ten jobs in Ohio by surveying and identifying opportunities to lower the theoretical minimum energy use of specific manufacturing processes in Ohio and developing technology demonstrators to show the feasibility of achieving similar or superior products using processes that require significantly less energy to produce. These new technologies will allow Ohio manufacturers to be produced with less energy, lowering the cost and making Ohio manufacturers more competitive in U.S. and global markets. These technologies will help increase the energy needed to manufacture products in Ohio and help increase the energy needed to manufacture products in Ohio. These technology demonstrators will then be used to spur further government or private investment in order to be transferred to industry. CO Sustainable and CRG will leverage their existing surveying and technology development capabilities to create the R&D in this project. CRG has an excellent performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Greene County Transit Board (Greene CATS) | 14 | 181 days or more | \$689,164 |
| Greene | Increasing Energy Efficiency - Increasing Manufacu | Comerstone Research Group Inc. (CRG) proposes to create at least 36 jobs by developing storage tolerant composite wind blades to reduce the overall cost of wind turbine-based energy. Passive adaptive aerodynamic structures are designed to provide a tailored, nonlinear, passive response to changing aerodynamic conditions such as gust loads. A lighter weight passive-adaptive blade that can survive wind gusts will reduce the cost of many rotary generator and bearing systems, resulting in a more reliable and longer lasting wind turbine. CRG will leverage previous development in passive composite structure design and fabrication to provide a design tool and fabrication guidance to Ohio wind blade manufacturers. CRG has an excellent performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group, Inc. | 10 | 31 to 90 days | \$500,000 |
| Greene | Passive Adaptive Aero Structures for Wind Turbines | Comerstone Research Group Inc. (CRG) proposes to develop a personal air vehicle (PAV) that leverages emerging technologies resulting from numerous government and commercially sponsored programs. The PAV would offer three modes of operation: aerobically performance comparable to smaller automobiles such as the Subaru Brat, vertical takeoff and landing capability to permit operational versatility, and high speed personal flight for rapid response. From a cost perspective, CRG has identified possible applications for this technology to include military personal transport, scouting, casualty evacuation, and SDF insertion as well as commercial applications in law enforcement and personal transportation. Develops the type of vehicle requires a highly multidisciplinary design team that will utilize the skills of a versatile team that will include engineers, scientists, and manufacturing technicians among others. CRG has an exemplary performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group, Inc. | 10 | 31 to 90 days | \$1,250,000 |
| Greene | High Efficiency Vanaxial fan | Comerstone Research Group Inc. (CRG) proposes to apply its advanced synthetic foam materials and composite fabrication processes to produce lightweight, energy-absorbing materials for blast protection of structures, vehicles and containers. Synthetic materials are engineered using resins made by combining various glass, ceramic or polymer microspheres or "microballoons" in a resin matrix. CRG currently markets custom synthetic formulations tailored to meet specific property requirements. CRG's synthetic formulations have recently been tested for explosion mitigation. Initial test results indicate high potential for successful mitigation of blast effects using CRG's synthetic foam technology in conjunction with fabric reinforcement in a unique composite material. CRG proposes to incorporate this synthetic foam product as a blast absorbing component to protect structures, vehicles and containers from the explosive energy of ground blasts, safeguarding both lives and property. CRG has an excellent performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group, Inc. | 8 | 31 to 90 days | \$800,000 |
| Greene | Blast Protection Material | Capital cost of contracting in 2010, to help continue transit operations in the future and to provide access to job, training, medical, etc. services for persons in need of transit services in the region. CRG will deliver lightweight chassis and structural components for various automotive and terrestrial vehicles to various safety agencies such as National Highway Traffic Safety Administration for qualification and performance testing. Mass savings are required through combination of the power source with structural members of the vehicles. Additionally, benefits are realized by reduction of power cabling and ability to optimize space by allowing more efficient packaging within the vehicle. Design, sales and manufacturing capability will be established to provide these components to the automotive industry. Many applications where weight and space are a premium will benefit from the synergistic combination of battery with structural members. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Greene County Transit Board (Greene CATS) | 5 | 181 days or more | \$267,000 |
| Greene | Capital cost of contracting in 2010 | Comerstone Research Group Inc. (CRG) proposes to develop a personal air vehicle (PAV) that leverages emerging technologies resulting from numerous government and commercially sponsored programs. The PAV would offer three modes of operation: aerobically performance comparable to smaller automobiles such as the Subaru Brat, vertical takeoff and landing capability to permit operational versatility, and high speed personal flight for rapid response. From a cost perspective, CRG has identified possible applications for this technology to include military personal transport, scouting, casualty evacuation, and SDF insertion as well as commercial applications in law enforcement and personal transportation. Develops the type of vehicle requires a highly multidisciplinary design team that will utilize the skills of a versatile team that will include engineers, scientists, and manufacturing technicians among others. CRG has an exemplary performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group | 54 | 31 to 90 days | \$3,200,000 |
| Greene | Structural Batteries for Transportation Systems | Comerstone Research Group Inc. (CRG) proposes to develop a personal air vehicle (PAV) that leverages emerging technologies resulting from numerous government and commercially sponsored programs. The PAV would offer three modes of operation: aerobically performance comparable to smaller automobiles such as the Subaru Brat, vertical takeoff and landing capability to permit operational versatility, and high speed personal flight for rapid response. From a cost perspective, CRG has identified possible applications for this technology to include military personal transport, scouting, casualty evacuation, and SDF insertion as well as commercial applications in law enforcement and personal transportation. Develops the type of vehicle requires a highly multidisciplinary design team that will utilize the skills of a versatile team that will include engineers, scientists, and manufacturing technicians among others. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group | 52 | 31 to 90 days | \$3,600,000 |
| Greene | Universal Modular Litter Pallet for Patient Transp | Comerstone Research Group Inc. (CRG) proposes to develop a personal air vehicle (PAV) that leverages emerging technologies resulting from numerous government and commercially sponsored programs. The PAV would offer three modes of operation: aerobically performance comparable to smaller automobiles such as the Subaru Brat, vertical takeoff and landing capability to permit operational versatility, and high speed personal flight for rapid response. From a cost perspective, CRG has identified possible applications for this technology to include military personal transport, scouting, casualty evacuation, and SDF insertion as well as commercial applications in law enforcement and personal transportation. Develops the type of vehicle requires a highly multidisciplinary design team that will utilize the skills of a versatile team that will include engineers, scientists, and manufacturing technicians among others. | Greene | Rubbn Repair for Trucking | Comerstone Research Group Inc. (CRG) offers Rubbn Repair for Trucking which easily repairs holes and damage to truck bodies or trailer panels in minutes. It is a tough, moldable, all-weather material patch that forms over and around the damaged area and holds with a high-performance adhesive. The patch holds, strengthens and forms to a variety of materials and surfaces including metal, plastic, fiberglass, painted surfaces, and glass, and provides quick structural repair with no chemicals, no glue, no curing and no drying. One business rely heavily on the transportation of goods. As the current demands on our transportation system rise, it is necessary to support the trucking industry in keeping its fleet of vehicles on the road instead of waiting for repair. Following COO's Strategic Initiative, CRG's Rubbn Repair for Trucking provides a quick, cost-effective solution to the transportation industry service departments. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group, Inc. | 8 | 31 to 90 days | \$750,000 |
| Greene | Five (5) modified minivans (wheelchair accessible) | Purchase of five (5) modified minivans that are wheelchair accessible, to be used mostly in the offpeak, evenings and weekends, when ridership is lighter than peak, in order to cut fuel usage and emissions. Comerstone Research Group Inc. (CRG) proposes to develop a personal air vehicle (PAV) that leverages emerging technologies resulting from numerous government and commercially sponsored programs. The PAV would offer three modes of operation: aerobically performance comparable to smaller automobiles such as the Subaru Brat, vertical takeoff and landing capability to permit operational versatility, and high speed personal flight for rapid response. From a cost perspective, CRG has identified possible applications for this technology to include military personal transport, scouting, casualty evacuation, and SDF insertion as well as commercial applications in law enforcement and personal transportation. | Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Greene | Greene CATS agency vehicle | Greene CATS needs to have its own administrative staff vehicles, to monitor the service and routes, to go out very early in the morning to evaluate the safety of road weather, potholes, etc. annual meetings, other street brochures, etc. | Greene County Transit Board (Greene CATS) | 0.5 | 181 days or more | \$20,000 |
| Greene | Low-Cost Sensors for Food Monitoring | Cornerstone Research Group, Inc. has developed a low-cost, thermally stabilized reliability sensor for the Department of Defense to permit monitoring of munition stores without requiring power for sensor operation or data download. This sensor uses CRG's shape memory polymer (SMP) substrate to monitor a specific degradation profile and trigger the appropriate hazard for a given application. During initial development, CRG proved the feasibility of a version of this SMP sensor tailored for use in the refrigerated frozen food beverage industries. Incorporation of a low-cost temperature sensor in packaged food and beverage products would safeguard the public from undetected exposures of these products to dangerous temperature excursions. CRG proposes to optimize and scale up manufacturing processes to enable implementation of SMP thermal sensors into food and beverage packaging. CRG has an excellent performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group, Inc. | 10 | 31 to 90 days | \$2,000,000 |
| Greene | Autonomous Road and Bridge Inspection System | Cornerstone Research Group (CRG) Inc. proposes to field an autonomous road and bridge inspection system based on CRG's new low cost micro air vehicle (MAV). This system will deploy millions of MAVs to physically trace all roads and bridges monitoring them for visual damage and maintaining a continuously updated log of prioritized roadway maintenance needs. This level of monitoring will enable departments of transportation to reduce time, cost, safety, and ambiguity of roadway maintenance activities from a centralized command center. Also, this system can be employed by road crews for additional eyes and ears to improve on-site performance, capability, safety, and efficiency. | Cornerstone Research Group, Inc. | 20 | 0 to 30 days | \$6,000,000 |
| Greene | Low Cost Solar Collector Manufacturing Technology | Unlike the traditional aerospace industry, this business model will focus on consumable aircraft that are manufactured affordably at high volume. We will manufacture and supply vehicles, install regional and mobile command centers, provide training and support to fully employ systems internationally. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350K state grant. *Integrative material of utility (i.e., UV) provides to enhance sensor solar collectors or solar power production systems using proven, lightweight aerodynamic technology. Synthetic air engineered foams made by incorporating hollow glass, ceramic or polymer microspheres in a resin matrix. Existing solar power production systems are undergoing scaling-up to enable large-scale power production. Solar collectors that are used with current systems are often too difficult to use to manufacture. Combining CRG's synthetic foam substrate with a reflective coating will produce efficient, low-cost solar collectors. CRG has demonstrated low-cost manufacturing techniques for synthetic foam materials and has developed partnerships with potential system integrators. CRG is primary effort under this project will be the scale-up of manufacturing processes to support production of solar collectors needed for construction of large-scale solar power production facilities. CRG has an excellent performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 34 | 31 to 90 days | \$2,600,000 |
| Greene | Micro Air Vehicle - Urban Surveillance | Lightweight and capable of being deployed from staging areas within urban structures. It is also stowable within vehicles for on-site deployment to command security and elements of public service and national defense. CRG has identified key power technologies that would contribute to the long-term storage and operational readiness of the vehicle. Further, emerging power technologies are being developed within and outside of CRG that would allow the HALO MAV to be used for continuous, long-term surveillance within the urban environment. Miniaturization of control and surveillance technologies will also be pursued as a key element of this micro vehicle technology. CRG will work with Ohio universities and technology partners to further optimize this technology, and to support the manufacturing of the HALO MAV. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 40 | 31 to 90 days | \$4,750,000 |
| Greene | Energy Concept Home | * Educating public to the introduction of Energy Efficient Construction, which consists of: * house placement on the lot * 2 x 4 Frame construction * Insulation Levels & Components that are well above the Model Energy Code. dual Fuel HVAC System w/ Payback Data available. * Producing a product that utilizes "Green" building concepts both the home itself and the appliances, light fixtures, bath fans and furnishings, as well. * Using a floor plan that uses one room for both a Sunroom for heat in the winter and a Screened In Porch as a buffer in the summer * Utilizing an Energy Efficient Builder for over the past 30 years before "green" got the new buzz word reputation, it currently has in this new world of today. * Water saving toilets (1.28 GPF) * Using Energy Friendly Landscaping * Employing multiple Sub Contractors * Utilizing local suppliers creating "the domino effect" that the house building market generates * Provide quality housing for the new BRAC corridor @ WPAFB Respectfully Submitted, Clay M. and Kathryn J. Haeb | Custom Concepts Construction Company | 25 | 31 to 90 days | \$450,000 |
| Greene | Energy Concept Home | * Educating public to the introduction of Energy Efficient Construction, which consists of: * house placement on the lot * 2 x 4 Frame construction * Insulation Levels & Components that are well above the Model Energy Code. dual Fuel HVAC System w/ Payback Data available. * Producing a product that utilizes "Green" building concepts both the home itself and the appliances, light fixtures, bath fans and furnishings, as well. * Using a floor plan that uses one room for both a Sunroom for heat in the winter and a Screened In Porch as a buffer in the summer * Utilizing an Energy Efficient Builder for over the past 30 years before "green" got the new buzz word reputation, it currently has in this new world of today. * Water saving toilets (1.28 GPF) * Using Energy Friendly Landscaping * Employing multiple Sub Contractors * Utilizing local suppliers creating "the domino effect" that the house building market generates * Provide quality housing for the new BRAC corridor @ WPAFB Respectfully Submitted, Clay M. and Kathryn J. | Greene | Bickett Road / US 42 (MVRPC 10A,B,C & D; 32-A Gre | Major project to move students, staff & faculty and vendors to Central State University for their "Speed to Scale" growth focus, moving from a 2,000 to 8,000 student university. Second, the relocation of Bickett Road would eliminate a safety issue by removing the traffic from the center of Wilberforce University. A major congestion management strategy. Third, the relocation and upgrade of Bickett Road to a US 42 by pass will redirect major traffic for all of Eastern Greene County, a favorable strategy with the City of Xenia. Fourth, the 42 upgrade will assist economic development and university growth for Cedarville University. | Xenia Township Board of Trustees | 100 | 181 days or more | \$30,000,000 |
| Greene | Shape Memory Sewer Lines | Cornerstone Research Group (CRG) Inc. proposes to launch a new manufacturing company to produce and internationally market shape memory sewer lines. This product will reduce the cost and inconvenience of tearing up otherwise well conditioned city streets. The estimated cost of a single city block of sewer pipe replacement is \$1M. This process can be replaced with a shape memory sewer line estimated to cost less than \$100K. The technology will allow high strength composite pipe/fibers to be temporarily softened, collapsed, and inserted through existing manholes into the sewer system and easily put into place. Subsequent to the placement of the liner, it will return to a rigid state and function as new. | Cornerstone Research Group | 50 | 31 to 90 days | \$3,500,000 |
| Greene | Energy Harvesting Technologies for the Home | This advanced technology product is based on shape memory polymer technology of which CRG is the foremost international leader. The stimulus budget would be used to develop an Ohio based manufacturing facility and begin manufacturing and marketing this product internationally. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10M in sales under a \$350K state grant. | New Way Solutions, LLC | 15 | 0 to 30 days | \$1,000,000 |
| Greene | Promotional Support for Nonprofit Organizations | Develop, test, and implement home-based energy harvesting technologies. This will be done by utilizing current research and development work done by New Way Solutions under our recently completed, very successful Phase I Small Business Innovation Research (SBIR) program for the U.S. Air Force. This Air Force project demonstrated the feasibility of a wireless, energy harvesting (self-powered) fire detection sensor to be used on military aircraft. New Way Solutions will expand this technology for self-powered, wireless sensors that will monitor home energy systems for efficient energy consumption. We will do this by using various energy harvesting technologies including piezoelectric (stratons), thermoelectrics (temperature differences), and solar for application in residential home to create smart home energy systems. The expected outcome is more efficient use of energy in the home through the use of self-powered, zero-maintenance sensors. Work with nonprofit organizations on promotion-based awareness and educational programs. Examples include Dayton and Xenia Public Schools, The American Red Cross, Family Violence Prevention Center, United Church Homes, WYCA of Dayton, Fish Party, The Other Place, Charities That Work, and other agencies that provide emergency shelter and clothing to individuals. Expected outcome would be 40% greater awareness of services and a comparable increase in fundraising opportunities through sale of promotional/educational products with the content information printed on the product. Examples: T-shirts, info cards, little notebooks, magnets, mugs, water bottles, memo boards, stress balls, pens and clips. | Promotionality, LLC | 5 | 0 to 30 days | \$75,000 |
| Greene | dayCARE | STARTED A NEW JOB AS A HOME DAYCARE AND DUE TO THE ECONOMY THINGS HAVE STARTED TO FALL THROUGH | In Home Day CARE | 10 | 31 to 90 days | \$10,000 |
| Greene | Spring Valley Pizza company | This is a Grass Roots start up company of Pizza & Deli Business in Spring Valley Ohio. Currently there is but three business in Spring Valley Ohio. One is a gas station the other is a small bar restaurant the other is a Maroon's store that is only open on weekends. I want to start up a new business in Spring Valley that promotes a strong work ethic especially among youth. Spring Valley is a wonderful little community with a lot of opportunity for growth and to stimulate the local economy and provide jobs for the unemployed and the local youth. Spring Valley Pizza would be able to make the most of being an underemployed to be productive responsible citizens through hard work and dedication while maintaining a goal oriented organization. | Ms. Gail L. Harris (Owner) | 10 | 31 to 90 days | \$100,000 |
| Greene | Red Light Camera | Install the City's portion of the cost to have a "red light camera" installed at the intersection of US35 and Factory road. This intersection is notorious for red light violators and the scene of several fatal accidents. The intersection will be replaced with an interchange in five years. Until then, a red light camera has the potential to prevent further accidents. | City of Beavercreek | 0 | 31 to 90 days | \$5,000 |
| Greene | license plate reader camera | Cost represents the purchase and installation of an automatic license plate camera that would monitor the license plate of vehicles passing through a major intersection into Beavercreek. Each license plate would be compared against a data base and a citation issued to a match in real time. This is an excellent aid in crime prevention by alerting police to the presence of stolen cars or those owned by persons with an outstanding arrest warrant. This would assist in crime reduction in one in the city. | City of Beavercreek | 0 | 31 to 90 days | \$25,000 |
| Greene | Downtown Xenia Comprehensive Streetscape Project | As part of its continuing effort to revitalize the Xenia Downtown Area, the City of Xenia has implemented a downtown streetscape project. The project includes replacement of trees, installation of ornamental lighting, replacement of sidewalks and curbs where it is needed, installation of sidewalks and accessible ramps and provision of street trees like benches, trash receptacles, planters and banners in the City's right-of-way. The required amount will complete the project along five blocks of the downtown area along Main Street and South Street. The goal is to beautify investment in the downtown area by improving the physical appearance that could spur reinvestments and retail jobs. The new township office and garage space. The new space would permit us to have an indoor facility to work and store equipment and would have office space for township meetings. The space would also be used to store Township equipment related to fire training. The space Township currently used would be used for other local government activities. | City of Xenia | 500 | 91 to 180 days | \$1,282,933 |
| Greene | Cedarville Township Building Project | Repair township roads that have surface and shoulder problems that a normal chip and seal operation will not fix. | Cedarville Township Trustee | 3 | 181 days or more | \$200,000 |
| Greene | Road Repair | Add restrooms and development museum for the Opera House. The Opera House is a historic building and the area where the performances are held does not have restrooms. In addition the project will add HVAC to an area of the building that will be used as a museum for the Opera House Society. | Cedarville Township Trustee | 3 | 91 to 180 days | \$70,000 |
| Greene | Opera House Facility Upgrade | Add restrooms and development museum for the Opera House. The Opera House is a historic building and the area where the performances are held does not have restrooms. In addition the project will add HVAC to an area of the building that will be used as a museum for the Opera House Society. | Cedarville Township Trustee | 3 | 91 to 180 days | \$75,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Greene | Water/Sewer Extension, Lewis A. Jackson Airport | This project would be an enhancement to the Southeast Beaver Creek Service area. It would provide water and sanitary sewer services to the Lewis A. Jackson Airport. The airport's master plan includes over 40 acres of land to be developed for aviation related businesses. There are also 100 additional acres in close proximity that could be expanded to a business office setting. Finally there are approximately 300 acres that could be available for the construction of new residential homes. Total acreage that would be serviced is approximately 1050 acres. Detailed engineering design work, easement acquisition and environmental reviews will take at least 12 months. | Deputy Director of Sanitary | 100 | 181 days or more | \$2,970,000 |
| Greene | Automated Meter Reading System | Furnish & installation of radio frequency-read water meters throughout the Northwest Regional Water System (serving the City of Beavercreek, Beavercreek Township and northern Sugar Creek Township). Completion of the project will allow the replacement of costly and unreliable monthly meter reads (vs. the current quarterly method of reading meters). This project includes the conversion of 5,500 touch-read meters to radio frequency-read meters and 3,300 standard meter pits to radio frequency-read meters. | Greene County Sanitary Engineering Department | 6 | 31 to 90 days | \$2,000,000 |
| Greene | W08-4 (New Germany-Trebein Booster Pump Station) | Project consists of a prefabricated water booster station (with standby natural gas fired electric generator) that will pump from the low to high water service area (Northwest Regional Water System which services Beavercreek City and Township and portions of northern Sugar Creek Township). It will be the only water booster station in the system with standby electric available. Currently this water system is vulnerable to a lengthy power outage (such as the recent Hurricane Ike event in September of 2008). | Greene County Sanitary Engineering Department | 6 | 31 to 90 days | \$600,000 |
| Greene | W97-7d (Water Main Extension - Cedarville) | This is a water main extension (2000 L.F.) within the Village of Cedarville (Eastern Regional Water System) and provides a much-needed loop for the water lines in the north portion of the Village. | Greene County Sanitary Engineering Department | 6 | 31 to 90 days | \$580,000 |
| Greene | Innovation Way - Phase 2 | Construction of a new 5107' access road (including accompanying sanitary sewer, water, storm drainage, curbs and gutters) through a newly developed office/business park in the city of Xenia. The property is County owned. All engineering and design work has been completed and approved by DCOF. The project site abutments from Union Road to Ohio Rte. 380 Innovation Way will run parallel to US RTE 38, South and West of the US RTE 35 and US RTE 68 interchange. The project is being addressed in two phases: Phase 1, approximately 2000' is currently under construction. Funding is still being sought for Phase 2. | Greene County, Ohio | 300 | 31 to 90 days | \$3,209,681 |
| Greene | Appropriate Financing Strategies for Composite Bri | Research, design and fabricate installation. Composite bridge materials, installation of composite bridges in Ohio has stagnated due to the lack of information regarding the return on investment for the buyer. CRG and LIS will work with the Ohio Department of Transportation and the Ohio Department of Development to create financing strategies that allow municipalities to finance composite bridges with payments initially similar to conventional bridge design and construction, with the remainder of the cost amortized over the longer life of the bridge when the benefits are realized. LIS has over 12 years of experience in composite bridge design and installation. CRG has an excellent performance record on state grants in both job positions and cost share as demonstrated by Tech Grant 07-000 where CRG received 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group Inc | 2 | 31 to 90 days | \$100,000 |
| Greene | Home Heating | Heat pump with electric back up. Insulate crawl space, basement and exterior walls. We live in a 120 yr. old farmhouse. We have done extensive updates with energy efficiency in mind. With our income under \$5,000.00 we need to ask for help to finish. We are currently heating our home with a woodburning fireplace and propane fireplace. We have 6 kids and a new heating system would be more economical for us and help us warm. Thank you for your time. | Home | 4 | 0 to 30 days | \$17,000 |
| Greene | Water/Sewer Extension, Lewis A. Jackson Airport | This project would be an enhancement to the Southeast Beaver Creek Service area. It would provide water and sanitary sewer services to Lewis A. Jackson Airport. The airport's master plan includes over 40 acres of land to be developed for aviation related businesses. There are also 100 additional acres in close proximity that could be expanded to a business office setting. Finally, there are approximately 300 acres that could be available for the construction of new residential homes. Total acreage that would be serviced is approximately 1050 acres. Detailed engineering design work, easement acquisition and environmental reviews will take at least 12 months. | Deputy Director of Sanitary | 100 | 181 days or more | \$2,970,000 |
| Greene | Rail Connection to Transport Portland Cement | The Fairborn Quarry Plant located in Xenia did have rail connection to the Norfolk-Southern line, but the rail was torn up and removed (1988). The plant has rail mainlines that extend to 100 - 120 miles. The plant produces a high quality cement product that is in high demand in the Midwest and is used in Indiana, Kentucky and Tennessee. The plant's ability to make specialty masonry cements provides a niche product to markets up and down the East Coast. Supplying building product through out the region promotes construction and growth on local Greene County manufactured goods. | CEMEX, Inc. | 120 | 181 days or more | \$4,950,000 |
| Greene | Bicycle and Pedestrian Crossing Improvements From | This proposed bicycle/pedestrian crossing improvement project will make it safe for bikers and joggers to utilize the Little Miami Scenic Trail through Xenia Station to Ohio Erie Trail. Originally, there was an overhead pedestrian crossing through the constructed access to U.S. 69/South Depot St. But this proved to cost prohibitive. In lieu of a pedestrian and bicycle overhead bridge, it is necessary to complete the following improvements to provide safe crossing between regional trails: 1. Improve the crosswalk across South Depot Street located on Miami Avenue with proper pavement marking. 2. Reorient existing accessible ramps at both corners of South Depot Street/Hill Street and Washington Street. 3. Widen existing sidewalks on the east side of South Depot Street between Washington Street and Hill Street and install protective barrier. 4. Widen existing sidewalks on the north side of Hill Street on to the bridge leading to the access ramp to Ohio Erie Trail. 5. Replace existing 2-8 curb bases with storm manholes to make it bicycle and pedestrian friendly. 6. Install appropriate pedestrian and bicycle signage as recommended by the Walkable Communities Workshop. | City of Xenia | 25 | 91 to 180 days | \$51,123 |
| Greene | Eagle Rise | Minor Rehab - Resurfacing of Township road ways in Eagle Rise Subdivision. | Sugar Creek Township | 25 | 91 to 180 days | \$122,000 |
| Greene | Innovation Way - Phase 2 | Construction of a new 5107' access road (including accompanying sanitary sewer, water, storm drainage, curbs and gutters) through a newly developed office/business park in the City of Xenia. The property is County owned. All engineering and design work has been completed and approved by DCOF. The project site abutments from Union Road to Ohio Rte. 380 Innovation Way will run parallel to US RTE 38, South and West of the US RTE 35 and US RTE 68 interchange. The project is being addressed in two phases: Phase 1, approximately 2000' is currently under construction. Funding is still being sought for Phase 2. | Greene County, Ohio | 300 | 31 to 90 days | \$3,209,681 |
| Greene | Start my own IT company | would like to start my own IT company that can take out of work Obese and make them computer literate so they have a better chance of working in the future. Many computer classes today are very expensive and mine would be affordable. | IT Activist | 5 | 0 to 30 days | \$100,000 |
| Greene | Posterior Chain training | training of equipment and to providing the skills and the benefits of strength training of the posterior chain of muscles in the body for their health and well being. This training would allow for more hip and muscle strength and balance leading to less fall and medical expense, among other things. | Health and wellness of Yellow Springs | 5 | 31 to 90 days | \$50,000 |
| Greene | Expansion of business | We are a Disabled/Veteran owned small business that has found the opportunity to expand our business and create an additional 5-10 jobs that could pay starting at \$40.00 a week. The expansion would consist of opening a auto towing and recovery service. We have a business plan in place and agreements with a local service garage for towing services. Geographically the business is located near three colleges that generate multiple service calls per week. Additionally, we have had positive contacts and lead back from the local village, town and county for enforcement and fire fighting services for our towing service. The previous operator of the nearest towing service closed as he couldn't handle the work load as a sole proprietor. I have been trained and certified as a tow operator. Ohio is a Veterans Day Veterans that was recently left. The other two are both unemployed and ready to work. | Beavercreek Door/Mr. Handy Handyman Service | 10 | 0 to 30 days | \$25,000 |
| Greene | Teen Driver Crash Rate Reduction Demonstration | teaching critical driver skills. Each year, over 100,000 Ohio drivers age 16-25 are at fault in traffic accidents resulting in over 40,000 injuries and over 400 deaths. Annual cost of these crashes to Ohio for property for emergency services, medical, etc., exceed \$1.2B, in addition to the \$1.5B paid by Ohio's insurance industry. Our analysis, conducted over four years, shows crash rates for drivers age 16-25 can be reduced by as much as 40%, through use of proven military combat training technology exploiting advanced automobile simulators, driver performance tracking, and on-line training methods. This training will deliver cognitive benefits through learning and retention many years after the training. The program will also improve performance of the prototype training system will be used to secure insurance industry sponsorship, enable privately funded state-wide and national application, and create 800 jobs in Ohio alone. VTSAT is a leader in military training system analysis, design, and evaluation. | Virtual Simulation and Training, Inc. | 18 | 0 to 30 days | \$450,000 |
| Greene | OXY Gen | New business startup to provide 7 new jobs to current unemployed workers. Stimulus money is needed to fund capital costs of installing an Oxygen Bar operation at the Fairfield Commons Mall area. Anticipate immediate and sustainable growth of this startup business, with growth to 20 employees in the next 12 months. Due to current lending environment, loan funds for new business startups are non-existent. | OXY Enterprises | 7 | 31 to 90 days | \$75,000 |
| Greene | Students in Need | Work for an educational program that is in jeopardy of being closed. This program helps students that struggle in their home schools and now have the opportunity of graduation. We need those funds to help with keeping our program a float. I want to be able to provide the school and my students the best opportunity to move forward in life. All my students struggle, not just academically but emotionally. This money would bring new hope to all of these students! This will keep our family open and continuing to education the rest of our future. | Christina Sawyer | 12 | 181 days or more | \$250,000 |
| Greene | Dayton Xenia Rd. at Longview Dr. Signal Reconstruc | Reconstruction of the existing traffic signal at the intersection of Dayton Xenia Rd. with Longview Dr. | City of Beavercreek | 1 | 91 to 180 days | \$121,000 |
| Greene | fairborn on the wright track | I am a citizen of Fairborn. I'm asking for help to bring new life into our old buildings, possibly our Fairborn Theater which is a registered historical site. We have several other large buildings that have been closed for many years. Wright Park and Force Base recently received BRAC. Developing business in our city will help the environment by providing a close commute for lease employees as they will be more likely to live in Fairborn due to our improving schools and the reuse of current empty retail buildings, also improving economic growth by providing jobs for both adults and managers who may want to help their family in hard times and of course taxable income. Thank you for your interest and any possible stimulus amount you can provide to the City of Fairborn. | self | 100 | 0 to 30 days | \$10,000,000 |
| Greene | Yellow Springs Home Assistance Program | The Home Assistance Program (HAP) is a service of the Friends Health Care Association with additional funding from the Greene County Council on Aging and the Yellow Springs Senior Center. Two part-time employees, Coordinator Amy Crawford, RN, and Assistant Coordinator Corinne Madsen, LSW assist the program. HAP provides information and support to residents of Yellow Springs and Marietta in a number of areas such as home health care, insurance counseling, caregiver support, and planning for long-term or short-term care needs. We had 843 client meetings during 2008. | Yellow Springs Home Assistance Program | 2 | 31 to 90 days | \$20,000 |
| Greene | Hydrocell manufacturing database | Development of local manufacturing company database using existing local companies that can provide products and services to develop or bring jobs to Southeastern Ohio in the field of hydrocell energy. I propose to take the lead in developing high tech jobs to employ local displaced engineers to research the hydrocell power industry needs and then work with existing local companies to improve their current abilities in order to provide the necessary resources to meet those needs for the hydrocell power industry. This would include improving existing manufacturing capabilities and the acquisition of new capabilities. | Myself | 20 | 31 to 90 days | \$750,000 |
| Greene | Manufacturing database for wind turbine manufactur | Development of local manufacturing company database using existing local companies that can provide products and services to develop or bring jobs to Southeastern Ohio in the field of wind turbine energy. I propose to take the lead in developing high tech jobs to employ local displaced engineers to research wind turbine industry needs and then work with existing local companies to improve their current abilities in order to provide the necessary resources to meet those needs for the wind turbine power industry. This would include improving existing manufacturing capabilities and the acquisition of new capabilities. | Self | 20 | 31 to 90 days | \$750,000 |
| Greene | Court Prevention Programs | This would include improving existing manufacturing capabilities and the acquisition of new capabilities. Ensure continuation of prevention programs currently offered through Greene County Juvenile Court that will no longer be funded due to loss of TANF and Mental Health funding. | Greene County Juvenile Court | 3 | 31 to 90 days | \$350,000 |
| Greene | Solar energy manufacturing database | Development of local manufacturing company database using existing local companies that can provide products and services to develop or bring jobs to Southeastern Ohio in the field of solar energy. I propose to take the lead in developing high tech jobs to employ local displaced engineers to research solar industry needs and then work with existing local companies to improve their current abilities in order to provide the necessary resources to meet those needs for the solar power industry. This would include improving existing manufacturing capabilities and the acquisition of new capabilities. | Myself | 30 | 31 to 90 days | \$750,000 |
| Greene | Electrolysis optimization | High risk research effort to determine the parameters optimizing the electrolysis of water. To alter the electrical variables and water/salt content which optimize the electrolysis process. Currently the electrolysis of water is inefficient. Determine which variables in the process can be altered to increase the generation of hydrogen and oxygen. Outcome would be a research paper. Resources would be utilized for: Project manager, electrical engineer consultant, contract electrical technician, laboratory supplies. | None | 1 | 91 to 180 days | \$120,000 |
| Greene | Far East imports | Plan to import goods from the Far East and open an Oriental gift shop in the mall at Fairfield Commons. I estimate that I will need 3 fulltime workers and up to 6 part-timers. Need to rent a store front, cover all fees and acquire all import licenses. My business could help stimulate word wide. I would like to go to the far east and personally shop for items from the local population. This, I would be helping the economies of the countries that I visit as well as the populace. | Dan Creech Imports | 6 | 181 days or more | \$250,000 |
| Greene | House repairs and sinking foundation, insulation, | sinking foundation basement walls, water resistant, insulation for house, windows repairs or replaced. Installation of energy efficiency and resources such as solar, gas, wind, etc | civil service employee | 6 | 91 to 180 days | \$45,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Greene | Autonomous Road and Bridge Inspection System | Miro air vehicle (MAV). This system will deploy millions of MAVs to physically trace all roads and bridges monitoring them for visual damage and maintaining a continuously updated log of prioritized roadway maintenance needs. This level of monitoring will enable departments of transportation to reduce time, cost, safety, and ambiguity of roadway maintenance activities from a centralized command center. Also, this system can be employed by road crews for additional eyes and ears to improve overall performance, capacity, safety, and efficiency. Unlike the traditional aerospace industry, this business model will focus on consumable aircraft that are manufactured affordably at high volumes. We will manufacture and supply vehicles, install regional and mobile command centers, provide training and support to fully employ systems internationally. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10M in sales under a \$350K state grant. | Cornerstone Research Group | 20 | 31 to 90 days | \$6,000,000 |
| Greene | Autonomous Road and Bridge Inspection System | Miro air vehicle (MAV). This system will deploy millions of MAVs to physically trace all roads and bridges monitoring them for visual damage and maintaining a continuously updated log of prioritized roadway maintenance needs. This level of monitoring will enable departments of transportation to reduce time, cost, safety, and ambiguity of roadway maintenance activities from a centralized command center. Also, this system can be employed by road crews for additional eyes and ears to improve overall performance, capacity, safety, and efficiency. Unlike the traditional aerospace industry, this business model will focus on consumable aircraft that are manufactured affordably at high volumes. We will manufacture and supply vehicles, install regional and mobile command centers, provide training and support to fully employ systems internationally. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10M in sales under a \$350K state grant. | Cornerstone Research Group | 20 | 31 to 90 days | \$6,000,000 |
| Greene | Student University Center | Design and construction of a state-of-the-art, green technology, energy efficient student university center to efficiently service and support student retention and enrollment growth. | Central State University | 40 | 91 to 180 days | \$13,000,000 |
| Greene | Non-Linear Morphing Design Tool for High Speed Rai | Cornerstone Research Group Inc. (CRG) proposes to leverage previously developed modeling tools for the design of morphing structures in high speed rail systems. Highly nonlinear design tools are needed to simulate the rigorous conditions of a high speed rail system. To reach anticipated high mile speeds, a morphing leading edge on these systems would provide beneficial performance improvements in the reduction of drag. The ability to tailor aerodynamics of high speed surfaces will lead over time to reduction in energy cost and operation of the rail system. Cycling of recently demonstrated morphing skins has demonstrated that an abrupt interface between rigid and soft materials leads over time to localized failure at the interface. The development of these modeling tools provides the necessary improvements needed for morphing component performance. Application ranges from infrastructure performance optimization, aerospace, and automotive industries. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 10 | 31 to 90 days | \$2,000,000 |
| Greene | Student Living-Learning Residence Facility | Design and construction of a state-of-the-art, green technology, energy efficient, 400-bed, student resident living-learning facility to support retention and student enrollment growth. | Central State University | 25 | 31 to 90 days | \$17,300,000 |

| Greene | Land Improvement | The land at 2151 Northern Dr. has deteriorated to the point that water enters the HVAC ducts when the wind blows. To prevent degradation of the entire yard needs to be graded and filled where necessary, the drain system around the property, the system is plugged and collapsed, a drain system needs to be installed around the building to prevent water from entering HVAC ducts, the current heating and air conditioning system needs to be replaced, and 13 drainage basins that pollute the water in the yard need to be set down. Once everything is done the land will need to be landscaped. To do all of this it will create 26K for at least 4 contractors using about 12 individuals. | Worthy's Land and Building Improvement | 12 | 0 to 30 days | \$45,000 |
| Greene | Rubbr/Repair for Trucking | Cornerstone Research Group Inc (CRG) offers RubbrRepair for Trucking which easily repairs holes and damage to truck bodies or trailer panels in minutes. It is a tough, moldable, all weather material patch that forms over and around the damaged area and holds with a high-performance adhesive. The patch holds, strengthens and forms to a variety of materials and surfaces including metal, plastic, fiberglass, painted surfaces, and glass, and provides quick structural repair with no chemicals, no glue, no curing and no heating. Ohio businesses rely heavily on the transportation of goods. As the current demands on our transportation system rise, it is necessary to support the trucking industry in keeping the fleet of vehicles on the road instead of waiting for repair. Following ODOT's Strategic Initiatives, CRG's Rubbr Repair for Trucking provides a quick, cost-effective solution to the transportation industry service departments. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 8 | 31 to 90 days | \$750,000 |
| Greene | Anderson Hall Rehabilitation | Rehabilitation and renovation of an existing 146 bed student residence facility to improve energy efficiency and building environmental conditions. | Central State University | 25 | 91 to 180 days | \$2,500,000 |

| Greene | Appropriate Financing Strategies for Composite Bri | Strategies to help promote use of composite bridges in the state of Ohio. Composite bridges offer the benefits of longer life cycle, reduced maintenance, and faster installation. Despite these benefits, installation of composite bridges in Ohio has stagnated due to the lack of information regarding the return on investment for the buyer. CRG will work with the Ohio Department of Transportation and the Ohio Department of Development to create financing strategies that allow municipalities to finance composite bridges with payments initially similar to conventional bridge design and construction, with the remainder of the cost amortized over the longer life of the bridge when the benefits are realized. LRB has over 12 years of experience in composite bridge design and installation. CRG has an excellent performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 2 | 31 to 90 days | \$100,000 |

| Greene | Exterior Renovations and Security | Renovation of parking lot surfaces, lighting, and security systems to improve campus health & safety and building code compliance conditions. All leverage syntactic foam technology developed for aerospace and marine industries. The result will be a structural material with high strength, flame resistance, light weight, thermal insulation, and low cost. Current technology relies on aluminum honeycomb material. However, this material is susceptible to moisture-induced damage such as corrosion and component delamination when used in hot/wet environments. Syntactic foam will allow increased flexibility over honeycombs in the construction of structural panels. This material will have commercial use in other industries, such as aircraft production and building construction. CRG is a major manufacturer of syntactic foams in the state of Ohio. Commercial production of this structural syntactic foam will grow the industry in Ohio and create research and manufacturing jobs. CRG has an exemplary performance record on state grants in both job creation and cost share, as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Central State University | 10 | 0 to 30 days | \$1,000,000 |
| Greene | Next Generation Structural Foam for Transportation | All leverage syntactic foam technology developed for aerospace and marine industries. The result will be a structural material with high strength, flame resistance, light weight, thermal insulation, and low cost. Current technology relies on aluminum honeycomb material. However, this material is susceptible to moisture-induced damage such as corrosion and component delamination when used in hot/wet environments. | Greene | Structural Batteries for Transportation Systems | CRG has an exemplary performance record on state grants in both job creation and cost share, as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. CRG will deliver lightweight chassis and structural components for various automotive and terrestrial vehicles to various safety agencies such as National Highway Traffic Safety Administration for qualification and performance testing. Mass savings are realized through combination of the power source with structural members of the vehicles. Additionally, benefits are realized by reduction of power cabling and ability to optimize space by allowing more efficient packaging within the vehicle. Design relies and manufacturing capability will be established to provide these components to the automotive industry. Many applications where weight and space are a premium will benefit from the synergistic combination of batteries with structural members. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 54 | 31 to 90 days | \$3,200,000 |
| Greene | Structural Batteries for Transportation Systems | CRG has an exemplary performance record on state grants in both job creation and cost share, as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Greene | Student Health Center Energy Renovations | Renovation of windows, HVAC systems, and HVAC controls to improve energy efficiency and building environmental conditions. | Central State University | 20 | 0 to 30 days | \$295,000 |
| Greene | Henderson Hall Renovations | Renovation of windows and skylights to stem water infiltration and to improve energy efficiency. Interior renovations, flooring, paint, finishes, technology, and space utilization to enhance environmental and to improve efficiency. | Central State University | 25 | 0 to 30 days | \$565,000 |
| Greene | Hallie Q. Brown Library Energy Renovations | Renovation of windows, skylights, exterior systems to stem water infiltration and to improve energy efficiencies. HVAC systems and controls renovations to improve energy efficiencies and building environmental conditions. Facility serves over 2,000 students and over 400 faculty and staff. | Central State University | 20 | 31 to 90 days | \$1,262,000 |
| Greene | Rural Health Initiative | People in southern Ohio counties struggle with access to health care (e.g. acute care, chronic care management, wellness, immunizations, etc.). Pharmacies are located throughout southern Ohio and may serve as a health care center for the local population. Through a joint venture with nursing and medicine, mid-level practitioners could expand practices in local pharmacies offering a host of services to improve overall health. Medicaid reimbursements, and expand wellness and health education opportunities. A partnership would develop between Colleges of Medicine, Nursing and Pharmacy to achieve this initiative. | Cedarville University School of Pharmacy | 25 | 181 days or more | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Greene | Jamestown 1889 Opera House renovation | Have spent \$425,000. to date renovating a historical opera house. \$375,000. requested would allow us to complete the project which includes: Installing fire escapes Tuck pointing and sealing brick exterior Reinstall seating Handicap accessible elevator Complete renovation of Senior Citizens Center portion of building | Jamestown Area Historical Society | 10 | 181 days or more | \$375,000 |
| Greene | SMP Sewer Pipes | Cornerstone Research Group (CRG) Inc. proposes to launch a new manufacturing company to produce and internationally market shape memory sewer liners. This product will reduce the cost and inconvenience of leaving up otherwise well conditioned city streets. The estimated cost of a single city block of sewer pipe replacement is \$1M. This process can be replaced with a shape memory sewer liner estimated to cost less than \$100K. The technology will allow high-strength composite pipe/fibers to be temporarily softened, collapsed, and inserted through existing manholes into the sewer system and easily put into place. Subsequent to the placement of the liner, it will return to a rigid state. This product is based on shape memory polymer (SMP) technology. CRG is the foremost international leader in SMP. The stimulus budget would be used to develop an Ohio-based manufacturing facility and begin manufacturing and marketing this product internationally. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-050 where CRG created 19 jobs and almost \$10M in sales under a \$350K state grant. | Cornerstone Research Group | 50 | 31 to 90 days | \$5,000,000 |

Sincerely, Patricia Johnson | Hassler Communication Systems Technology, Inc. | 3 | 31 to 90 days | \$150,000 |
| Greene | Infrastructure to improve and enhance services | Acquisition and installation of emergency backup power and related infrastructure to enable continuing operations during increasingly frequent power outages. Company provides broadband-based Internet services to companies nationwide, but specifically, local organizations including city and county governments are impacted with loss of services during emergency situations. | Hassler Communication Systems Technology, Inc. | 2 | 31 to 90 days | \$45,000 |
| Greene | Removal of abandoned Buildings | Purchase of properties and removal of 3 abandoned houses which present hazards. One lot would be used for additional parking for the senior citizens center. The other two lots would be prepared for resale to buyers who would contribute to small business usage. | Village of Cedarville | 15 | 31 to 90 days | \$85,000 |
| Greene | Police Station Remodel and Upgrade | Remodel and expand existing police station which is over 60 years old. The upgrade would include computerization and connection with state law enforcement resources. Present facilities has 6 offices in one 15'x15' room with no computer or storage space other than old file cabinets. Project would study and develop standards that adopted would make sure that future Wireless Mesh networks deployed for use by State and local governments would be interoperable and provide seamless statewide redundant data and voice communication. Since most future systems will be funded and installed by County and City separately, it is imperative that the opportunity to be all these networks together to be by examining the future benefits and use of funds. Without standards, the result would be like if there were no standard protocols for internet traffic (TCP/IP) or e-mail. The final delivery of this project would be a comprehensive study and recommendations including state standards throughout Ohio as it would enable the local governments to know they are making a prudent investment and they will not be at "islands of their own" as it will also bring down the cost of the equipment and supporting software. | Village of Cedarville | 10 | 31 to 90 days | \$225,000 |
| Greene | Statewide Wireless Mesh Specifications for Interop | Remodel and expand existing police station which is over 60 years old. The upgrade would include computerization and connection with state law enforcement resources. Present facilities has 6 offices in one 15'x15' room with no computer or storage space other than old file cabinets. The final delivery of this project would be a comprehensive study and recommendations including state standards throughout Ohio as it would enable the local governments to know they are making a prudent investment and they will not be at "islands of their own" as it will also bring down the cost of the equipment and supporting software. | Avistix Technology Solutions | 4 | 0 to 30 days | \$195,000 |
| Greene | Return to the work force | This money will help to retain myself to get back into the work force. My husband has asked me for a divorce and I am taking care of a parent with dementia, and need to be able to have a better job to take care of the both of us. | The Jeannine Neumann-Gestrich | 1 | 91 to 180 days | \$4,000 |
| Greene | Storm Sewer along Main Street | Approximately 1000 feet of storm sewer. The village is in a flood plain and the existing system is old and inadequate. | JWCI Jones Warner Consultants, Inc. | 28 | 31 to 90 days | \$147,000 |
| Greene | Sports Medicine Research Institute | This mission for the Center of Excellence (COE) in Sports Medicine and Rehabilitation is to create a multidisciplinary approach (Athletic Training, Engineering, Anatomy, Physiology, Epidemiology, Biomechanics, Medicine, and) by utilizing expertise in the care, treatment, and prevention of musculoskeletal disorders and the rehabilitation of individuals. The center will embrace an interdisciplinary approach employing rehabilitation researchers such as exercise and nutrition that are associated with a reduction in risk of occurrence, prevention of impairment, alleviation of disease and treatment-related complications, and improvement in the quality of life. The COE will have dedicated areas for patient evaluation and care, lecture halls and conference rooms for education, and laboratories for basic science and clinical research. Education and research activities will be made available to physical therapists, athletic trainers, and exercise scientists. An approximately \$1,000,000 facility will be constructed on the WSU campus to house the necessary academic, research, and clinical programs. | Wright State University | 50 | 31 to 90 days | \$30,000,000 |
| Greene | Emergency Generator for Booster Station | This area is located in a tornado corridor. An emergency generator requires because the water tower is without power and local residents could be without water for an extended period of time. The area is located in a tornado corridor. | JWCI Jones Warner Consultants, Inc. | 7 | 31 to 90 days | \$25,000 |
| Greene | Storm Sewer Remediation | There is an existing gas station on stream of this ditch and petroleum spills have occurred in the past. Replacement of existing storm water lines in the area of 1/2 mile from water lines. The old line are fragile and made of asbestos. Breaks are difficult to fix and present an asbestos hazard. The line are being updated to improve fire protection. | JWCI Jones Warner Consultants, Inc. | 13 | 31 to 90 days | \$40,000 |
| Greene | Water Line Replacement Village of Spring Valley | There is an existing gas station on stream of this ditch and petroleum spills have occurred in the past. Replacement of existing storm water lines in the area of 1/2 mile from water lines. The old line are fragile and made of asbestos. Breaks are difficult to fix and present an asbestos hazard. The line are being updated to improve fire protection. | Village of Spring Valley JWCI Jones Warner Consultants, Inc. | 27 | 31 to 90 days | \$906,001 |
| Greene | National Center for Medical Readiness - Tactical L | This request is to fund Phase 4 of the building plan for Wright State University's National Center for Medical Readiness-Tactical Laboratory project (Also known as Calamityville). This project would provide a training, research and commercialization site for disaster medical providers and military personnel and respond to natural and human-made disasters. NCMR-TL describes a set of facilities, programs, and personnel which, as a whole, represent a center of medical readiness training, research, development and commercialization. This plan-of-the-art, integrated, collaborative training and research community located near Dayton (Greene Co.), Ohio, will provide innovative and unique experiential training opportunities for medical, military, public health, and public safety practitioners and decision makers. It will also serve as a commercial "test bed" for materials, products, and equipment designed to support medical first responders in their respective roles and tasks. This project is estimated to bring a \$50M economic impact to Ohio and 35 new jobs. | National Center for Medical Readiness - Wright Sta | 35 | 0 to 30 days | \$4,500,000 |
| Greene | Integrated Asset Management and Resilient Prognost | Generation manufacturing. The WatchdogNet technology will utilize the features of the Watchdog Agent prognostics toolbox (UC-IMS), NormNet/PT sensor fusion stochastic modeling and smart machine techniques (TechSolive). The system will provide a standard based integrated platform for performance monitoring, prognostics, machine utilization, product quality & assurance, energy saving possibilities and operation management. The project will generate new business opportunities, not only in advanced prognostics technology, but also in the expansion of new manufacturing facilities. FTI, a leader in the development and implementation of prognostic health management technologies together with TechSolive, a leader in manufacturing research, development, and consulting, and the UC-IMS Center in the establishment of a new for-profit company, CiroTech, for the commercialization of the Watchdog. Completion of the project will ensure the creation of a stand-alone, for-profit ent | Frontier Technology, Inc | 2750 | 31 to 90 days | \$6,350,000 |
| Greene | Student Academic Success Center | This project renovates an existing building that was inhabited by this department with very little work to the structure. The project will reconfigure existing functions to enhance academic services and supply furnished solutions for student tutoring areas. The Student Academic Success Center provides academic tutoring services to students via scheduled appointments and random drop-ins. The range of student services includes writing tutoring, mathematics tutoring, and general tutoring. Space is also allocated to SASAC administration and University College adjunct faculty members. | Wright State University | 5 | 31 to 90 days | \$500,000 |
| Greene | Nutter Center Parking and Retention | The purpose of this project will be to alleviate congestion around Nutter Center during events and provide a stronger pedestrian connection between the Nutter Center and parking. The existing area adjacent to the Ervin J. Nutter Center is currently being used as detention pond. This structure would be reduced and transformed into a retention basin. The new retention area would be used by the Registrar and used for teaching purposes. Included in this project will be a new parking area with lighting, walkways, curbs and storm drainage. | Wright State University | 20 | 31 to 90 days | \$3,000,000 |
| Greene | Lot 4 Parking Lot Expansion | This new parking lot will become an extension to the existing student parking for the west end of campus. The recent enrollment increase at the university requires that additional parking will be needed on the main campus. Project is to include an asphalt parking lot, lighting, curbs and drainage. | Wright State University | 5 | 31 to 90 days | \$2,000,000 |
| Greene | Rathskellar Asbestos Removal | The Rathskellar is a student gathering space in need of renovation. A current condition with asbestos on the structure prevents rehabilitation to this space. This project will remove all asbestos and return a renovated space back to the students. | Wright State University | 3 | 31 to 90 days | \$300,000 |
| Greene | Russ Engineering Upgrades | An addition was just completed to the building which requires an upgrade to this existing Russ Engineering Center. The lobby for this building has had a lot of use and needs to be renovated. Work for this project would include new ceiling, wall and floor finishes as well as new lighting and HVAC. Also included would be furnishing for the lobby. | Wright State University | 5 | 31 to 90 days | \$500,000 |
| Greene | Energy Efficiency Improvements | Ohio State Sub House Bill No. 251 calls for the reduction energy consumption of 20% by the year 2014. The university has reviewed its entire operations and has identified an efficient energy program called Calibri. When implemented, the university will exceed the target goal. Included in this project will be Lighting Retrofit, Ventilation Controls, Toilet Exhaust, Parts Commissioning, Boiler, and Hot Water, Vending Machine Controls, Computer Optimization and Printing/Facsimile Optimization. Payback for this entire project is projected 4.3 years with BTU savings of 121,000,000.00 and 11,800 tons CO2 emission/season. | Wright State University | 30 | 31 to 90 days | \$8,000,000 |
| Greene | HUBZONE Technology Center | This request is for the development of a mixed-use facility in a pre-defined HUBZONE area in Fartton, OH. This mixed-use development will include a multi-company Technical Center, a conference area open to local professional organizations, and a family restaurant with an outdoor activity center. The facility will include 4-6 separate 600-2400 square foot offices dedicated to support existing small business and also bring new technology companies to the area. The facility will include a separate eating establishment to service the needs as well as the local community. This eating establishment will be hiring 25-30 employees mostly from the local area including poverty level income personnel. Plans also include a designated outdoor activity area to support community and professional team building activities. This will help improve and support bonding of local technical professionals as well as attract new businesses to the area as they participate in team building events/competitions. | Tradeline Policy and Contracting | 125 | 91 to 180 days | \$375,000 |
| Greene | Yellow Springs Building Project | The Yellow Springs School District faces building maintenance and funding obstacles. The schools were built in the early 60s, and they have original roofs, mechanical, plumbing and electrical systems. The village of Yellow Springs and the school district value sustainable energy policies and had been planning for building upgrades using LEED principles. The district is unable to make up the cost of the energy and maintenance and requires funding to accomplish "pilot" projects. The quality of the facilities and the use of LEED principles will greatly impact the students, teachers and administrators to lower absenteeism and increase employee and student productivity. The projects will stimulate the region's economy through new construction jobs. | Yellow Springs EVSD | 20 | 91 to 180 days | \$100,000 |

| Greene | Smart Tooling Infrastructure | Comerstone Research Group Inc. (CRG) is currently in the process of scaling up production capabilities for Smart Mandrels (TM), a low cost mandrel system used for fabrication of complex composite parts. CRG has invested millions of dollars to reach product maturity and is currently assisting several large aerospace customers in integrating the technology into their composite fabrication processes. The technology is also well-suited to wind turbine blade manufacturing, but this market has not been adequately pursued. Smart Mandrels (TM) have the ability to offer significant cost savings to the manufacturing process of blades and will also significantly decrease the capital cost associated with part molds. Both of these cost savings have been well documented in case studies. Grant funding will be used to manufacture a full-scale wind turbine blade to demonstrate to potential manufacturers the advantage of the technology and to spur continued interest and growth. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group | 5 | 0 to 30 days | \$700,000 |

| Greene | Deployable Structures for Emergency Response | Comerstone Research Group Inc. (CRG) proposes to develop reconfigurable, modular structures based on CRG's VerTex™ materials for emergency shelter applications. VerTex is a fully cured, off-the-shelf composite of most system operating temperatures, yet it can be made flexible by heating it above an activation temperature. This feature enables the use of VerTex as structural members that are shape-adaptive and can be used for quick assembly, reconfiguration, and reassembly of many different types of habitat structures such as support beams, frames, trusses, protective outer walls, inner wall systems, air ventilation ducts, and even furniture and workspaces. This technology requires packing volume similar to inflatable structure technology, but is not susceptible to deflation and is more resistant to damage, making it a desirable solution for emergency shelters. CRG has an excellent performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group Inc | 16 | 31 to 90 days | \$850,000 |

| Greene | Smart Polymers for Medical Devices | Comerstone Research Group Inc. (CRG) proposes to develop smart materials to increase the functionalities of medical devices. These include functionalities such as polymers that respond to stimuli such as heat, sound, light, and moisture. CRG is a leader in material development and engineering designs that maximize the functionalities of smart materials. CRG will leverage eleven years of research and success in material development, integration into applications, and scale-up to manufacturing of these smart materials into a variety of fields, such as aerospace, automotive, semiconductors, to increase the functionalities of medical devices. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group | 65 | 0 to 30 days | \$4,500,000 |
| Greene | Personal Air Vehicle | Comerstone Research Group Inc. (CRG) proposes to develop a personal air vehicle (PAV) that leverages emerging technologies resulting from commercial government and commercial programs. The PAV would offer three modes of operation: roadworthy performance comparable to smaller automobiles such as the Subaru Brat, vertical takeoff and landing capability to permit operational versatility, and high speed horizontal flight for rapid ingress/egress. From a user's perspective, CRG has identified possible applications for this technology to include military personnel transport, scouting, casualty evacuation, and EOD insertion as well as commercial applications in law enforcement and personal transportation. Developing this type of vehicle requires a highly multidisciplinary design approach that will utilize the skill sets of a versatile team that will include engineers, scientists, and manufacturing technicians among others. CRG has an exemplary performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group | 75 | 31 to 90 days | \$12,000,000 |
| Greene | Veritex for Structural Reinforcement During Emerg | Reinforcement/stabilizer in emergency situations until crews can clear or demolish damage or debris. This formable composite is already used in diverse structural protection and repair application markets such as auto body, outdoor equipment, race car wing caps, and canoe side plates. VerTex is formable when heated and rigid when cooled. While heated, it can be shaped around angles and curves and used to brace, reinforce, or protect areas or persons at risk until a permanent solution is devised. The material itself could form a temporary structure or shield. Because the material can be heated and reheated, it is also reusable. CRG proposes to scale up the use of VerTex and evaluate usability of the material with assistance from emergency preparedness crews and DOT, delivering several small and large scale panels for performance testing. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10M in sales under a \$350k state grant. | Comerstone Research Group, Inc | 10 | 0 to 30 days | \$750,000 |

| Greene | Blast Protection Material | Comerstone Research Group Inc. (CRG) proposes to apply its advanced synthetic foam materials and composite fabrication processes to produce lightweight, energy-absorbing materials for blast protection of structures, vehicles and operators. Synthetic materials are engineered foams made by combining hollow glass, ceramic or polymer microspheres, or "microballoons," in a resin matrix. CRG currently markets custom particle formations tailored to meet specific property requirements. CRG's synthetic formations have recently been tested for explosion mitigation. Initial test results indicate high potential for successful mitigation of blast effects using CRG's synthetic foam technology in conjunction with fabric reinforcement in a unique composite material. CRG proposes to incorporate this synthetic foam product as a blast-dissipating component to protect structures, vehicles and containers from the explosive energy of ground blasts, safeguarding both lives and property. CRG has an excellent performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group | 8 | 31 to 90 days | \$800,000 |
| Greene | Low Cost Sensors for Food Monitoring | Smart Packaging Materials (SPM) tailored to monitor a specified degradation profile and designed into the appropriate form factor for a given application. During initial development, CRG proved the feasibility of a version of this SPM sensor tailored for use in the refrigerated food and beverage industries. Incorporation of a low-cost temperature sensor in packaged food and beverage products would safeguard the public from undetected exposure of these products to dangerous temperature excursions. CRG proposes to optimize and scale up manufacturing processes to enable implementation of SPM thermal sensors into food, beverage, and medical packaging. CRG has an excellent performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group | 10 | 0 to 30 days | \$2,000,000 |

|----------------|--|--|-------------------------------------|----------------|--------------------|---------------------------|
| Greene | Non Linear Morphing Design Tool for High Speed Rai | Comerstone Research Group Inc. (CRG) proposes to leverage previously developed modeling tools for the design of morphing structures in high speed rail systems. Highly nonlinear design tools are needed to simulate the rigorous conditions of a high speed rail system. To reach anticipated high line speeds, a morphing leading edge on these systems would provide beneficial performance improvements in the reduction of drag. The ability to tailor aerodynamics of high speed surfaces will lead over time to reduction in energy cost and operation of the rail system. Cycling of recently demonstrated morphing sails has demonstrated that an abrupt interface between rigid and soft materials leads over time to localized failure at the interface. The development of these modeling tools provides the necessary improvements needed for morphing component performance. Application ranges from infrastructure performance optimization, aerospace, and automotive industries. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group | 10 | 0 to 30 days | \$2,000,000 |

| Greene | Micro Air Vehicle Power Line Monitoring System | Comerstone Research Group (CRG) Inc. proposes to field an autonomous power line monitoring system based on CRG's new low cost micro air vehicle (MAV). This system will deploy millions of MAVs to physically trace power lines, monitoring them for visual damage and excessive electromagnetic business, which indicates low efficiency. This level of monitoring will enable utilities infrastructure to: <ul style="list-style-type: none"> Deliver a higher percentage of generated power through a more efficient power grid. Minimize downtime by conducting preventative maintenance to fix otherwise inoperable problems during off-peak hours. Minimize large-scale downtime due to storms by maintaining a higher level of power grid strength. Unlike the traditional aerospace industry, this business model will focus on consumable aircraft that are manufactured affordably at high volume. CRG will manufacture and supply vehicles, install regional command centers, and provide training and support to fully employ systems internationally. CRG has exemplary performance on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10M in sales under a \$350K state grant. | Comerstone Research Group | 25 | 0 to 30 days | \$4,500,000 |

| Greene | Rubbn' Repair for Trucking | Comerstone Research Group Inc. (CRG) proposes to develop a repair for trucking which easily repairs holes and damage to truck bodies or trailer joints in minutes. It is a tough, moldable, all-weather material patch that forms over and around the damaged area and holds with a high-performance adhesive. The patch holds, strengthens and surfaces including metal, plastic, fiberglass, painted surfaces, and glass, and provides quick structural repair with no chemicals, no glue, no curing and no heating. Ohio businesses rely heavily on the transportation of goods. As the nation's demand for our transportation services rises, it is necessary to support the trucking industry in keeping its fleet of vehicles on the road instead of waiting for repair. Following OOT's Strategic Initiatives, CRG's Rubbn' Repair for Trucking provides a quick, cost-effective solution to the transportation industry service departments. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group Inc | 8 | 31 to 90 days | \$750,000 |
| Greene | High Efficiency Vaneaxial Fan | Comerstone Research Group Inc. (CRG) proposes to continue development of a variable flow rate, high efficiency, vaneaxial fan. Leveraging CRG's experience of custom designed ducted fans, high-performance materials, and innovative manufacturing processes, a vaneaxial fan with an increased overall efficiency of 85% to 90% reduction in weight and volume, and a reduced acoustic signature will be designed. This fan design was originally developed for the ventilation of waste heat generated by electronics aboard naval ships and other military platforms. CRG has identified alternative applications for this technology, including use in commercial and home HVAC systems. Companies specializing in mobile heating and cooling units (i.e., construction site heating and cooling) would benefit greatly from these highly efficient, compact fans. Additionally, these fans can integrate with the agricultural industry by providing a more efficient fan for large grain dryers. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group | 10 | 0 to 30 days | \$1,250,000 |

| Greene | Shape Memory Sewer Lines | Comerstone Research Group (CRG) Inc. proposes to launch a new manufacturing company to produce and internationally market shape memory sewer lines. This product will reduce the cost and inconvenience of tearing up otherwise well conditioned city streets. The estimated cost of a single city block of sewer pipe replacement is \$1M. This process can be replaced with a shape memory sewer line estimated to cost less than \$100K. The technology will allow high strength composite pipes/fibers to be temporarily softened, collapsed, and inserted through existing manholes into the sewer system and easily put into place. Subsequent to the placement of the liner, it will return to a rigid state and function as new. This advanced technology product is based on shape memory polymer technology of which CRG is the foremost international leader. The stimulus budget would be used to develop an Ohio based manufacturing facility and begin manufacturing and marketing this product internationally. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10M in sales under a \$350K state grant. | Comerstone Research Group | 50 | 31 to 90 days | \$3,500,000 |

| Greene | Structural Batteries for Transportation Systems | Comerstone Research Group Inc. (CRG) proposes to integrate ITN Energy Systems solid state battery technology into structural batteries for transportation systems. CRG will deliver lightweight chassis and structural components for various automotive and terrestrial vehicles to various safety agencies such as National Highway Traffic Safety Administration for qualification and performance testing. Mass savings are realized through combination of the power source with structural members of the vehicles. Additionally, benefits are realized by reduction of power cabling and ability to optimize space by allowing more efficient packaging within the vehicle. Design sales and production will be established to provide these components to the automotive industry. Many applications where weight and space are a premium will benefit from the synergistic combination of batteries with structural members. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Comerstone Research Group, Inc. | 54 | 31 to 90 days | \$3,200,000 |

| Greene | Micro Air Vehicle for Urban Surveillance | Lightweight and capable of being deployed from storage areas within urban structures. It is also stowable within vehicles for on-site deployment by concealed security and elements of public service and national defense. CRG has identified key power technologies that would contribute to the long-term storage and operational readiness of the vehicle. Furthermore, emerging power technologies are being developed within and outside of CRG that would allow the HALO MAV to be used for continuous surveillance within the urban environment. Miniaturization of control and surveillance technologies will also be pursued as a key enabler of all micro vehicle technologies. CRG will work with Ohio universities and technology partners to further optimize its technology and begin manufacturing of the HALO MAV. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 40 | 31 to 90 days | \$4,750,000 |
| Greene | Residential Thermal Energy Optimization System | Cornerstone Research Group Inc. (CRG) and the University of Dayton have developed energy management technology to optimize the use of the available energy to reduce consumption while maintaining home comfort. The developed system will predict the energy needs within the home and then monitor, collect, store and redistribute the thermal energy while consuming the least possible amount of energy. The system is designed to work existing home heating, air conditioning and domestic hot water systems as well as solar hot water collection and storage systems. This project will complete the product design, build several prototype systems, develop the manufacturing plan and validate the system performance. CRG will then work with Lockheed, Jones, and Blake (LJB), an Ohio architecture and engineering firm, and Forthoe Homes, an Ohio residential home builder, to test market the technology. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 14 | 0 to 30 days | \$1,200,000 |
| Greene | Residential Thermal Energy Optimization System | Cornerstone Research Group Inc. | Greene | Next Generation Polymers for Energy Efficient Manu | Cornerstone Research Group (CRG) proposes to create jobs by developing high-performance composite resin that require less amounts of energy for curing. CRG will leverage over \$2 million in existing research in this area for use in manufacturing composite automotive components, wind turbine blades, bridge structures, building components, consumer products and other composite products manufactured in Ohio. High-performance composite structures typically require large ovens and pressure vessels to create a quality product. This technology will allow high-performance composites to be manufactured using less total energy, thereby making them more cost-effective solutions for a wide variety of structural components when compared with metal or carbon fiber. CRG will transition these resin and curing processes from CRG to composite part manufacturers during this effort. CRG has an excellent performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 55 | 0 to 30 days | \$3,800,000 |
| Greene | Deployable Solar Panels | CRG proposes to create jobs by developing high-performance composite resin that require less amounts of energy for curing. CRG will leverage over \$2 million in existing research in this area for use in manufacturing composite automotive components, wind turbine blades, bridge structures, building components, consumer products and other composite products manufactured in Ohio. CRG has an excellent performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group Inc. | 34 | 0 to 30 days | \$2,600,000 |
| Greene | Structural Batteries for Transportation Systems | Cornerstone Research Group Inc. (CRG) proposes to integrate ITM Energy Systems solid state battery technology into structural batteries for transportation systems. CRG will deliver lightweight chassis and structural components for various automobiles and transport vehicles to various safety agencies such as National Highway Traffic Safety Administration for qualification and performance testing. Mass savings are required through combination of the power and structural members. Additional benefits include weight savings, reduced energy consumption, and ability to optimize space by allowing more efficient packaging within the vehicle. Design rules and manufacturing capability will be established to provide these components to the automotive industry. Many applications where weight and space are a premium will benefit from the energetic combination of battery with structural members. CRG has an exemplary performance record on state grants in both job creation and cost share as demonstrated by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group, Inc | 54 | 31 to 90 days | \$3,200,000 |
| Greene | Universal Modular Patient Transport Unit | CRG developed a conceptual patient transport system with the Air Force that reduces time required for aircraft configuration and patient loading, and increases comfort for both patient and caregiver. CRG proposes to fabricate 100 Universal Modular PTU's for patient transport which will be delivered to military and civilian groups for evaluation. CRG has an exemplary performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group Inc. | 52 | 0 to 30 days | \$3,600,000 |
| Greene | Passive Adaptive Aero Structures for Wind Turbines | Cornerstone Research Group (CRG) proposes to create at least 38 jobs by developing damage-tolerant composite wind blades to reduce the overall cost of wind turbine-based energy. Passive-adaptive aerodynamic structures are designed to provide a tailored, nonlinear, passive response to changing aerodynamic conditions such as gust loads. A lighter weight passive-adaptive blade that can survive wind gusts will reduce the cost of heavy, robust generator and bearing components and help increase the lifecycle maintainability of the overall system. CRG will leverage previous development in passive composite structure design and fabrication to provide a design tool and fabrication guidance to Ohio wind blade manufacturers. CRG has an excellent performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 38 | 31 to 90 days | \$1,800,000 |
| Greene | Universal Modular Patient Transport Unit | CRG developed a conceptual patient transport system with the Air Force that reduces time required for aircraft configuration and patient loading, and increases comfort for both patient and caregiver. CRG has an excellent performance record on state grants in both job creation and cost share as exemplified by Tech Grant 07-060 where CRG created 19 jobs and almost \$10 million in sales under a \$350,000 state grant. | Cornerstone Research Group | 38 | 31 to 90 days | \$1,800,000 |
| Greene | PRODUCTION OF CONTINUED PRODUCTION OF CALIFORNIUM 252 NEUTRON SOURCES FOR | FRONTIER TECHNOLOGY CORPORATION | 1000 | 31 to 90 days | \$6,000,000 | |
| Greene | KnitKnot System | The KnitKnot system will be such a tool. It will help people to navigate through the tangle of interactions. It can be thought of as a website ecosystem in which options within the stimulus programs can be explored in context. It includes integration functionality, such as tools for comparing options, exploring the chain of cascading consequences, capturing lessons learned, performing analyses, and evaluating total costs. It brings together the knowledge of experts, policymakers, and laypeople. | Deal Corp | 5 | 0 to 30 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Greene | Xenia Metropolitan Area Network - 1st Phase | seeks creating a Metropolitan Area Network (MAN). For the purposes of this project to be determined fiber optic strands would be placed and terminated in each building or area. The proposed network configuration is based on a fiber ring with multiple buildings. The scope of work will consist of: 1. Provide and install approximately fifteen miles of combined underground and aerial 8.3125um single-mode fiberoptic cable on new conduits and existing Dayton Power & Light poles 2. Bulk cable routes on existing poles utilizing appropriate hardware and stand, as necessary 3. Build underground pathway utilizing 4" PVC conduit 4. Make building entrances 5. Bulk cable routes on existing poles utilizing appropriate hardware and stand, as necessary 6. Test all fibers and provide documentation 7. Build Data Center to support Fiber Network Expected outcome to provide broadband connectivity to all buildings or assets listed in Xenia Ohio and provide future expansion to a future County-wide Network and private use. | City of Xenia | 10 | 181 days or more | \$2,500,000 |
| Greene | Infiltration/Inflow Removal | Project will eliminate sources of infiltration/inflow to the sanitary sewer system that are currently causing excessive flow, even occasional overflows, at the main treatment, and operational problems at the WWTP. | Village of Yellow Springs | 30 | 91 to 180 days | \$750,000 |
| Greene | Water System Improvements | Clear the connection to the main sewer line, which currently severely restricts the flows to important commercial, industrial and residential areas. Project will involve construction of 4700 feet of 12-inch water line. | Village of Yellow Springs | 25 | 91 to 180 days | \$600,000 |
| Greene | 2009 WWTP Improvements | Process improvements and addition of phosphorus removal required to bring WWTP into consistent compliance with effluent limits, to improve WWTP operational reliability, and to handle high wet weather flows. | Village of Yellow Springs | 100 | 91 to 180 days | \$1,500,000 |
| Greene | Recovering Community | Purchase, renovation and staffing of 3 buildings: 1 treatment facility for substance abusing adults; 2nd stage house for men entering the treatment facility; 3rd stage house for women entering treatment facility. Treatment facility would accommodate 16 b | TC Behavioral Health Services, Inc | 12.25 | 91 to 180 days | \$1,500,000 |
| Greene | rachel | to clear my debt for my credit and a down payment on a home | rachel | 2 | 31 to 90 days | \$10,000 |
| Greene | Translational Neuroscience Research building | In collaboration with regional hospitals, Wright State University will construct a new translational neuroscience facility to meet the community's needs in critical neurology. The goal is to establish a world class center to attract top talent to the area | Wright State University | 50 | 91 to 180 days | \$20,000,000 |
| Greene | Medicine Supply | I have recently been diagnosed with Multiple Sclerosis in November of 2008. I have started on a medication called Rebif injections that I have to take 3 times a week. I am a hard working person who has been employed with Altronics Inc. in Beavercreek, Ohio since May 21st of 2008. I have insurance with my company but my rebif medication is still \$610.00 a month, with all the other bills I have running a house and being unable to find for me to pay the required co-pay each month for my much needed medication which helps in slowing down the progression of MS. I am asking for help for the next 24 months for my rebif medication each month so that I can live well and not worry about getting behind on bills. \$600.00 a month for 12 months would be an average of 720.00 for 2 years that is an average of 1400.00, I would continue to pay for my medication for a few months after that with the grant of 2000.00, please help me continue to live well with this disease that I have been diagnosed with I have been a hard working person for a very long time and being diagnosed with MS is NOT slowing me down but I do need help with paying for my medication! Thank You Sincerely, Lorie Price | Private/Family | 1 | 0 to 30 days | \$2,000 |
| Greene | Tennis Court rehabilitation | Midland tennis courts to support community programs, including providing courts for local High School tennis team. Local HS has NO tennis courts - team must rely on private courts, this would provide three courts to non profit club, high school and 1 high school teams, as well as serve overall community for recreation. Beach and Tennis club provides seasonal employment for approx. 1000 people (approx. 200 seasonal jobs) and summer recreation for approx. 200 local families. Promotes healthy recreation and fitness for community youth, combating obesity. | Brookview Swim and Tennis Club | 40 | 0 to 30 days | \$45,000 |
| Greene | Declassified Documents Accessibility Project | Major library in one state uses one of the nation's most advanced document scanning and digitization services. The project will scan and digitize historical documents as well as assist in document purchasing clients under the Energy Employment Occupational Stress Compensation Program. The majority of these documents are not currently available on the internet or otherwise accessible to the public although they are classified or restricted. Making these primary documents accessible online will allow students and historians a greater understanding of the nation's earlier weapons history and the thinking that went on during the cold war. As we move into the 21st century understanding our national history is important. Having the documents accessible online will also make researching radiation or toxic chemical exposures possible for EOEPA documents. This will result in more people being compensated which will in turn help stimulate the economy. | Energy Employees Claimant Assistance Project | 4 | 0 to 30 days | \$20,000 |
| Greene | New Historical Outdoor Drama / Companion Drama Dev | Caesar's Ford Theatre produces historical outdoor dramas and educational programs regarding the American Revolution. Under consideration is the development of a trilogy of historical outdoor dramas regarding the life of Simon Kenton, Caesar (an escaped slave who joined the Shawnee) and the Shawnee Nation. We hope to educate the public about the clash of Native Americans, African Americans, and European American cultures that shaped our great State. A companion drama will also be developed based on Ohio's Civil War history and/or famous literary works. The funding will be used to hire new playwrights (4), composers (4), Conservators (performer) and for cast production costs. Approximately 1000 seasonal jobs and 3 year round jobs will be created in Greene County following the closure of the historical outdoor drama Blue Jacket will be restored. The production will be performed at the beautiful Caesar's Ford Amphitheater in Xenia, Ohio recently renovated 2008 and is currently not in use. The Ohio Trilogy will be American outdoor historical drama at its finest. Educational programs for Community schools and Girl / Boy Scouts will be restored as well. | Caesar's Ford Theatre, Inc. | 120 | 91 to 180 days | \$500,000 |
| Greene | Innovation Way - Phase 2 | The request is for the installation of approximately 2600 linear feet of sanitary sewer and 2600 linear feet of waterlines to be installed at the same time as the 2007 road construction being requested separately. Funding overview by ODOT and MWPC does not allow for the installation of sanitary sewer and waterlines. The project is called Innovation Way Phase 2. Currently Innovation Way Phase 1 is under construction. Phase 2 will open up a 166 acre technology park in the City of Xenia. Innovation Way will stretch across the entire property and provide two points of access and egress to the park. | Greene County, Ohio | 300 | 31 to 90 days | \$930,960 |
| Greene | Joyce Combs and Associates | Open up 3-4 new offices in Ohio | Joyce Combs and Associates | 20 | 0 to 30 days | \$50,000 |
| Greene | Flow Analysis System For Undergraduate Training | Visualizing the path and velocity of air and fluid flows is a critical element of research in aerodynamics, hydrodynamics, combustion, biomedical device development, pump/turbine design, and flow control technologies. This is typically done using a laser for flow visualization, digital cameras, and image processing software. The use of lasers produces two undesirable side-effects: 1) system cost is significantly increased, especially for systems that collect data at kHz rates, and 2) safety concerns make such systems inappropriate for use by undergraduate students. Hands-on experience with flow analysis systems would be a major plus for bachelor-level engineering the workforce. We have demonstrated an alternative approach, with US Air Force funding, which uses pulsed, light-emitting diodes instead of lasers. Commercialization analysis suggests a market for more than 1200 systems (\$6M in U.S. universities/government markets, wind and water tunnel facilities, bio-fluid flow research, and fluid control system development. The grant will support commercialization and marketing of the educational version of this system in collaboration with US universities. | Innovative Scientific Solutions Inc. | 4 | 0 to 30 days | \$150,000 |
| Greene | Middle School/High School/College STEM Collaborat | Accommodate the increased instructional space requirements, the upper floor of the building (25,760 sq. ft.), currently unfinished, will be configured with STEM classrooms and labs. The school will be operated by nearby Wright State University. STEM students from Clark, Greene and Montgomery counties will benefit from the College Park location, exposing them to a campus environment, as well as technology-related businesses and research labs, including the Advanced Technical Institute Center. Clark State and the STEM school will share all instructional space and resources within the building until a permanent building for the STEM school is completed in 2012. The vacated space will then accommodate Clark State's rapidly growing enrollment. | Clark State Community College | 30 | 31 to 90 days | \$300,000 |
| Greene | Expansion | It is critical to have a pipeline of students choosing the high growth, high wage STEM careers needed by area employers, especially by Wright Patterson AFRL. In total, 1,800 STEM workers will be needed between 2009 and 2012 to fill jobs created by the federal Base Realignment/Expansion to include 3 additional locations and to hire and train 20 more employees. | Water for Less | 20 | 0 to 30 days | \$500,000 |
| Greene | Shawnee Hills Storm Drainage | This project places approximately 6000 feet of new storm sewer lines with supporting apparatus and manholes. | New Jasper Township | 5 | 91 to 180 days | \$816,000 |
| Greene | Silicon-Coated Carbon Nanofibers for Advanced Batt | Applied Sciences, Inc. (ASI) is seeking \$3 million to launch a new carbon nanofiber (CNF) processing line, located in tandem with Pyrograf Products Inc.'s CNF production facility in Castalia, OH. The processing line will produce up to 50,000 lbs./yr. of high performance carbon anode material for use in extended range lithium-ion batteries, for energy storage in hybrid electric vehicles (HEVs), defense applications, consumer electronics, and medical devices; and for future needs to support fuel cell, solar cell, and wind turbine applications. Within 12 months of receipt of funding, the coating line will have the capacity to produce 50,000 lbs. /yr. of carbon anode material having a sales potential of \$8M, and retain 8 direct jobs and create 24 new direct jobs, each paying about \$65,000 / year. In addition to supporting the U.S. Defense and automotive industries, the proposed CNF processing line would strengthen Ohio's position as a leader in nanotechnology, energy storage devices and advanced materials for Defense and automotive applications. In conjunction with capital equipment, installation and start-up costs, complementary R&D activities will be performed. | Applied Sciences, Inc. | 32 | 0 to 30 days | \$3,000,000 |
| Greene | Security Operational Standards | 1) VHS Portable: Radios, walk-talkers for Court security officers. Install 16 channel digital camera/recording system at security control desks for courtrooms, holding cells, lobbies, etc. ... Add 2 DVD playback systems to upgrade existing VHS in video recorded evidence/lobby/bits Phase. | Greene County Common Pleas Court, Juvenile Div. | 0 | 0 to 30 days | \$10,000 |
| Greene | Center for Student Innovation | The College of Engineering & Computer Science (CECS) has reached capacity in its Ross Engineering Building and, faced with increasing enrollment, has a critical need for additional space. The most practical solution is to construct an auxiliary building as a center for student design projects. Student design projects are an important element of the engineering curriculum. WRSU students participate in a variety of national and international design competitions, including the M&E-Ball, Human-Powered Vehicle, High Altitude Balloon and A&E-Design events. Successful completion of these projects requires access to design software, tools, workshops, as well as sufficient space for teams to brainstorm, build, and demonstrate their creations. The building will facilitate interactions with project advisors from the military and industry and serve as a demonstration space for green technology. It will incorporate solar panels and wind turbines for energy production, as well as enhanced insulation. | Wright State University | 15 | 31 to 90 days | \$3,000,000 |
| Greene | solar heated woodworking teaching space | Materials to build a 20' x 40' insulated space: 8 solar panels and mounting; plumbing, controls and hot water storage for heating system; materials for floor radiant heat system; high-efficiency, non-pulsating, biomass-burning boiler to burn wood waste for backup heat. | Hawley Design | 2 | 0 to 30 days | \$50,000 |
| Greene | Energy Management System | Using a straight-forward, proven approach, the Energy Management System will employ Chicanos to design, develop, and implement a web-based system for capturing and analyzing energy consumption by a municipality. The output will allow a city to measure and manage use of electricity, gasoline, natural gas, and other energy resources. Input can be further granulated to reflect greenhouse gas impact (e.g., "wind-derived electricity," "geo-normal heat") so the carbon footprint and generation of greenhouse gases can be managed. Inputs will evolve from manual to automated as the system matures. The output of the system will be used both for satisfying potential regulatory requirements and for managing energy usage. | C & W Information Technology, LLC | 21 | 31 to 90 days | \$3,080,000 |
| Greene | Collett Propane Inc., a Clean Fuels Ohio Partner | Infotech will team with 10 cities (1 large, 4 medium, and 5 small) to implement the Energy Management System. We will participate in data acquisition and entry and will train city personnel to perform those tasks. Infotech experts also will assist city management in interpreting results and formulating strategies to optimize the use of newly acquired data. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Greene | Southwest Landmark, Clean Fuels Ohio Partner | Signage of an existing petroleum bulk plant in Lebanon, Ohio to a new environmentally friendly facility with vapor recovery technology. Storage tanks for biodiesel and E-85. Expansion potential to meet product 2010 clean air requirement. Eliminate 60 hours of annually of truck idling time. Installation of back up generator for plant powering. | Clean Fuels Ohio | 5 | 31 to 90 days | \$524,000 |
| Greene | Southwest Landmark, Clean Fuels Ohio Partner | Construction of a new environmentally friendly "petroleum" with vapor recovery system including: Storage tanks for biodiesel and E-85. Expansion potential to meet product 2010 clean air requirement. Installation of back up generator for plant powering. | Clean Fuels Ohio | 5 | 31 to 90 days | \$524,000 |

|----------------|--|---|---|----------------|--------------------|---------------------------|
| Greene | Help me pay for graduate school | Hi, my name is Jessica Walker. I'm a graduate student at the University of Dayton. I'm the first person in my family to graduate from college! I'm 32 year member of two and I'm working towards my teaching degree. I believe that education can open doors for people! Especially those who are discouraged. I've can tell you that education has made a difference in my life and I hope to inspire our youth! I'm very passionate about teaching and I love it! I really enjoy my very expensive. Currently I pay for my room with taxes, but I don't have to live a future when I'm finished. This will place an even bigger financial burden on my family. We struggle everyday to get by. I'm lucky that their father supports me and asks me to finish with school but I can't do what I love, but my dream has been to be a teacher. I'm not sure how long it will take, and with today's economy it takes two incomes to survive. Currently none of us has insurance. This worries me everyday. I hope to have a job-teaching soon so that we have another income and insurance. Funding to help pay for school would really help me and my family. Thank you very much for your time and consideration. | Future teacher | 1 | 181 days or more | \$45,000 |
| Greene | Solas | Solas would be a Concentrated Trough Solar Power program for buildings, particularly homes. 425 people would be trained to manufacture the solar technology, steam turbines, motors and inverters here in Ohio. For instance one home using 1000 kWh per month needs 24 feet of trough, a 1000-watt motor and a 1000-watt inverter. At 3000 per foot, a motor and inverter at \$1000 per foot, a 1000-watt inverter at \$1000 per foot. Next Generation Technologies, using an SBA grant and a Vantage grant would leverage that with Stimulus funds to open the first manufacturing plant in the region in 15 years. The first employees could be hired in 30 days. The product sells for \$3000 with the ability to perform maintenance. Ohio would be able to sell them across the country. We would put 500 people to work in the first 6 months and another 200 in the next 6 months. Sugarcreek Township Fire Department Greene County Ohio is requesting funding to provide us the ability to continue quality, safe and efficient fire and EMS services to the citizens and visitors of Sugarcreek Township. Recently we had to close our Station 71 at night due to the failure of a recent tax levy. The station closure led off 6 firefighters. With this station closure in effect, it leaves 3 paid firefighters on duty to cover more than 28 square miles. This is not only in 1/2 public safety, but safety as well. Current staffing levels in Sugarcreek Fire are well below the staffing guideline outlined by NFPA 1710. As mentioned before this is a tremendous risk to all. The stimulus funds requested would allow us to hire the 6 firefighters that were laid off. If 2 open positions that we were not able to fill due to the failure of the tax levy, that providing adequate fire and EMS services to the public and surrounding communities. For additional information please do not hesitate to contact me. Thank you for your consideration. | Next Generation Technologies | 500 | 31 to 90 days | \$250,000 |
| Greene | Keep Sugarcreek Safe | Sugarcreek Township Fire Department Greene County Ohio is requesting funding to provide us the ability to continue quality, safe and efficient fire and EMS services to the citizens and visitors of Sugarcreek Township. Recently we had to close our Station 71 at night due to the failure of a recent tax levy. The station closure led off 6 firefighters. With this station closure in effect, it leaves 3 paid firefighters on duty to cover more than 28 square miles. This is not only in 1/2 public safety, but safety as well. Current staffing levels in Sugarcreek Fire are well below the staffing guideline outlined by NFPA 1710. As mentioned before this is a tremendous risk to all. The stimulus funds requested would allow us to hire the 6 firefighters that were laid off. If 2 open positions that we were not able to fill due to the failure of the tax levy, that providing adequate fire and EMS services to the public and surrounding communities. For additional information please do not hesitate to contact me. Thank you for your consideration. | Sugarcreek Township Fire Department | 8 | 0 to 30 days | \$150,000 |
| Greene | Bio Fuel Cell for the Generation of Energy from Ag | This project is to develop a process to reclaim energy from agricultural waste streams. The design and implementation of a nitrate reductase bio fuel cell will allow the cost-effective production of a renewable fuel source and exportable technology. The development of this regional and internationally exportable technology will provide a basis for the expansion of high tech infrastructure and human capital investment in Ohio. | Riehl Engineering | 20 | 31 to 90 days | \$1,500,000 |
| Greene | LED vs. Halogen lighting, a Greener way of doing b | LED lighting systems work with much less electricity than a traditional system. For example, a 20 watt LED lamp in an MR-16 fixture will generate a light pattern 11 feet in diameter with an intensity of 195 footcandles. A fixture with a 20 watt LED will generate a light pattern with a 10.0 foot diameter at 2.07 footcandles. The lighting effect is very similar, but the LED system will use with 4.5 watts while the halogen system requires 20 watts. When you develop an entire lighting package, a traditional halogen system might require 200 watts while an LED system would only require 40 watts. Additionally, we cost 1300 watt transformer at \$117.60 a 40 watt at \$61.25. A significant savings of these "space" times where energy conservation is the standard, installation costs are only one consideration. Annual operational costs are just as critical. At an electricity rate of \$1.10 per kilowatt-hour, the halogen system will run for 10 hours per week at \$17.60 whereas the LED system will cost \$17.52. Over a 20 year period, you will save \$138.80 on your electric bill (79% more efficient). | Virtual DJ Entertainment | 2 | 0 to 30 days | \$7,900 |
| Greene | Bio-Battery Electrode | Research and development of a bio-battery electrode technology is severely limited in utility and performance because of poor electrode performance. Current bio-battery electrode technology prevents effective electron transfer from the fuel to electrode. Until such technology exists, the potential for bio-batteries will be unrealized. Sustainable Carbon Nano Technology, Inc. (SNT) has developed a proprietary bio-electrode technology that enables the physical arrangement and engineering of the bio-battery electrode can take place anisotropically - in thermally isolated designs. This will significantly increase power density and the range and portability of bio-battery designs. At the completion of the project, SNT will commercially market a suitable bio-battery electrode material. | Riehl Engineering | 20 | 31 to 90 days | \$1,000,000 |
| Greene | LEED Up-grades and replacement program for the sch | Existing school facility built in 1986 with aging roof, HVAC, electrical, plumbing and security systems are in need of major interior up-grades. The district seeks funding to up-grade these systems to LEED Gold Certification. State funding provides for the replacement of up-grades and the school is interested in integrating educational program elements with the facility green goals. The school is currently a LEED Silver building. Vocational School is a leader in offering new technologies courses for adult education and grades 9-12. Most of the facilities have not been updated since 1986. The school economic conditions the school must reflect the trends toward energy independence therefore these up-grades are including solar and geo-thermal applications in addition to the LEED Standards. | Greene County Career Center | 100 | 91 to 180 days | \$10,000,000 |
| Greene | Orange Sky High Performance Construction | The Orange Sky project is a systems approach to panelized high performance building systems. These systems are adaptable to any market niche including affordable homes. The designs are site specific and use passive solar techniques for reductions in cooling/heating costs and all design/construction exceed LEED standards. The system can be used to help create local neighborhoods through training and construction of the panels. The systems accommodate the use of alternative energy sources that may be available within the geographical region. The system reduces waste at the site waste of 90% of conventional methods of construction and product waste created by the construction in the plant is recycled or used on site. | orange sky systems | 45 | 31 to 90 days | \$500,000 |
| Greene | Peerless Scientific Job Creation Growth Initiative | Peerless Technologies Corporation, located in Fairborn, OH provides scientific, technical and intelligence services to the Air Force and Dept of Homeland Security. We are in the process of expanding our facility to accommodate the creation of 36 new positions planned to grow in the next 24 months. The job creation initiative is characterized as follows: Positions: Approximately 36 Timing: Added by June, 2011 Type of Positions Created: Primarily scientific, technical, acquisition management, information systems security Average Annual Salary: \$70,000 Location: All of these jobs will be created to be located in our facility at: 2300 National Road Fairborn, Ohio 45324 Greene County | Peerless Technologies Corporation | 36 | 0 to 30 days | \$200,000 |
| Greene | Bio-Fuel Cell Electrode Material and Production | We are planning for this anticipated growth in our presently unfinished 7,000 square foot mezzanine. In order to create these jobs, we need to provide furniture, computers, and equipment. We are ready to begin creating these high technology jobs today! Bio-fuel cells represent the most promising future green energy production technology and environmentally friendly energy sources for efficiency rather than expensive and non-renewable metal catalysts used in current fuel cell technology. Riehl Engineering (RE) has a proprietary bio-electrode technology that enables the physical arrangement and engineering of the bio-battery electrode can take place anisotropically - in thermally isolated designs. This will significantly increase power density as well as storage and end product of bio-fuel cells. As the completion of the project, RE will commercially market a suitable bio-battery fuel cell electrode material. Market Impacts: Production of the described electrode material will significantly advance bio-green energy state of the art. Additionally, such technology may significantly impact medical and environmental testing state of the art, specifically relate sensing in agricultural runoff and blood glucose monitoring in diabetic patients. Direct electron transfer between analyte/enzyme and the electrode bulk represents significant nano-bio-tech | Riehl Engineering | 20 | 31 to 90 days | \$2,000,000 |
| Greene | IP Telephony | Our organization, MVECA, is a consortium of 24 school districts located in Greene, Clark, Clinton, Fayette, Highland, and Madison Counties in Ohio. MVECA is one of 23 Information Technology Centers (ITCs) throughout Ohio that are owned and operated by the Ohio 12 school districts served by the ITC. The funding would provide a very needed upgrade to our phone system to IP Telephony. A new Phone System would allow MVECA to better serve and support our school districts in the case service such as: Student, EMS, ITC and Technology Services. The addition of this service would allow MVECA to then offer IP Telephony services to any of the 24 School Districts that we serve at a lower cost than what is currently available. MVECA would hire a full-time position to maintain our system and support any school districts wishing to connect their phone systems through us. | Miami Valley Educational Computer Association | 1 | 91 to 180 days | \$175,000 |
| Greene | Data Driven Decisions | Our organization, MVECA, is a consortium of 24 school districts located in Greene, Clark, Clinton, Fayette, Highland, and Madison Counties in Ohio. MVECA is owned and operated by our school districts. Many of our school districts are anxious to implement new educational technologies that would introduce Data Driven Decisions into their schools and into their teachers' toolkits of resources. This project would provide funding for MVECA to hire a full-time education technology person to provide professional development to our schools in their efforts to begin using state and other assessment data to assist them with improving their student's results. This project could further stimulate additional employment into the school districts that MVECA serves. Besides implementation and professional development services, the funding would assist MVECA in other system and technical costs associated with this project. | Miami Valley Educational Computer Association | 1 | 31 to 90 days | \$150,000 |
| Greene | Energy Audits & Energy Efficiency Education for Gr | This project will allow non-profit Ohio Energy Project to assist Greene Co. districts improve the energy efficiency of facilities & educate students & staff about energy & energy efficiency, including: Analysis of each building's current energy usage & costs; Identification of low-cost/no-cost energy conservation opportunities; Identification of projects for significant energy conservation savings; Assistance to district's science/math curriculum directors & teachers on educational energy efficiency & sustainability programs for classrooms, staff & community; Implementation of district-wide sustainable energy efficiency programs, including energy education & energy efficiency programs for students, staff & community; Assist districts with potential funding avenues to implement energy efficient projects, including federal, state & utility grants & rebates, such as HE 204 and Ohio Advanced Energy Program. Expected outcome: to provide districts with information necessary to operate facilities more efficiently, & more importantly, educate students, staff & community on understood how to conserve energy & make our environment a cleaner, safer place to live in the future. | Ohio Energy Project | 5 | 31 to 90 days | \$175,000 |

| Greene | Plastic to Renewable Diesel Fuel Heating Oil | Expand our existing business by installing conversion machines that converts used plastic and oil into low sulfur diesel fuel and heating oil. The machines emit no emissions into the atmosphere. Each machine will consume 500-600 lbs of plastic producing 1,000-2000 gallons of renewable diesel fuel and heating oil each year. This process will reduce plastic into landfills, cleaner environment, reduce foreign oil, good fuel will be below market price and create new jobs increasing local, state and federal taxes. | GrandVista Oil LLC | 25 | 31 to 90 days | \$2,500,000 |
| Greene | Nutritional and Physical Fitness Education | Our Mission We are committed to building a child's self-esteem and confidence. We inspire and motivate children and their parents to adopt healthier lifestyles through education and the implementation of improved diet and exercise. Our Promise We will invest in the health and well-being of each child. We will equip them with habits and practices that they will embrace and pass along to further generations. Our team of fitness and nutrition experts are committed to educating and empowering children at every fitness level with the knowledge that will allow them to make healthy choices, both now and in the future. Here, children and their families will find an environment where positive diet and exercise routines are nurtured and taught with a balanced approach that puts personal goals within reach. A generation ago, kids were more involved in activities that took them outside of the home and were engaged in forms of play where exercise was the norm, not the exception. Lifestyles and the culture may have changed since, but Youth Fitness Academy instructors have specifically designed a curriculum that is centered around stress-free, organized play just like their parent. | Youth Fitness Academy LLC | 15 | 31 to 90 days | \$750,000.00 |

| Greene | Nutritional Education and Physical Fitness to fight | <p>The Miami Valley Youth Fitness Alliance is a 501(c)3 non-profit organization. Our mission of the Alliance is to educate and put forth programs to eliminate childhood obesity and to inspire all young people and their families to develop lifelong, healthy habits.</p> <p>The goal of the Alliance is to stop the increase in childhood obesity and to empower families nationwide to make healthy lifestyle choices. The Alliance will positively affect organizations and facilities that can make a difference to a child's health that include but are not limited to homes, schools, doctor's offices, and communities.</p> <p>Our programs will inspire and motivate children and their parents to adopt healthier lifestyles through education and the implementation of improved diet and exercise. We will create jobs through these programs, and will improve the health and wellness of area children, underprivileged and otherwise, and will ultimately help to improve the local economy.</p> <p>OUR NATION IS IN A CRISIS!!!!</p> <p>Need for Programs</p> | Miami Youth Fitness Alliance | 14 | 31 to 90 days | \$500,000.00 |
| Greene | Aviation fiber Optics Training | <p>Pinnacle Systems, LLC is a start up company developing products for the aviation industry. The initial internally funded effort is to develop fiber optic products specific to the aircraft; however, the products will also be applicable to fixed based facilities. Pinnacle plans to grow a staff of qualified engineers and technicians with fiber optics and electrical skills and seeks stimulus funds to accelerate its hiring of local youth. Pinnacle will train youth in the fields of fiber optics, aircraft optics, avionics and electrical systems to the aircraft industry. The planned hires include one to two entry level engineers, two to three technicians. The skill training will include basic to advance design, fabrication, installation, maintenance of electrical, avionics, and sensor systems. This group of five to ten youth will augment Pinnacle Systems' small engineering management staff and will be the core of Pinnacle's design and field team as clients are added to provide Pinnacle's customer and product kits. The outcome of this stimulus funding will be qualified personnel in Pinnacle System' products will a broad education to work with most other similar technologies.</p> | Pinnacle Systems, LLC | 3 | 0 to 30 days | \$500,000.00 |
| Greene | New Source- Renewable Energy (Hydrokinetic Tech) | <p>Dayton Hydroelectric in consultation with Central state University has designed a new Hydro-kinetic technology applicable to existing "Low Dam" No other existing or emerging technology is specifically designed for Low Dams. There are 5,000 untagged Low Dams within Ohio and 72,000 distributed throughout the US. The projected power production from such low dam is 1 megawatt and expected job creation is one full-time job per low dam. The installation of our power production modules also serve as a safety net for the prevent recreational users from becoming entrapped in a dam's "back-wash". Funding is now being sought to build and test a full-scale prototype.</p> | Dayton Hydroelectric LLC | 5,000 | 0 to 30 days | 1,000,000 |

| Guernsey | Water Pollution Control Sludge Management | <p>Design & installation of Sludge Management & Phase System. Includes the addition of the equipment to existing buildings or the new plant to manage the solids in a more economic & environmentally responsible manner. A sludge management system modifications will be the main components of the improvement. The press will allow liquid to be removed from the sludge and the sludge will be transported thus reducing the cost in terms of fuel, trucking & more hours. Improving the plant in this capacity will allow the City to keep the plant as open as possible thus attracting & retaining industrial businesses.</p> | City of Cambridge | 500 | 31 to 90 days | \$450,000 |
| Guernsey | School Campus Water Tank | <p>15 MGD Water Tank and 10,000 Gallon of 16-inch Water Main</p> <p>Project includes the extension of water system to access approx. 200 acres of undeveloped ground. Water tank will provide necessary reserve capacity for fire protection & provide industrial fire service. This will also provide the needed reserves for SECCOMC as well as allowing the continued expansion for our largest private employer. The City schools and nursing facilities also need a reliable source of drinking water to care for patients & students.</p> | City of Cambridge | 500 | 31 to 90 days | \$1,620,000 |
| Guernsey | East 40 Sanitary Sewer Extension | <p>16,000 ft of 8" gravity sewer line & two 6" pumping stations. The project will allow for the completion extension of the City's sanitary sewer line. Without the proper utilities, the area is not suitable for any significant commercial, industrial, or residential development. Once fully developed, 500 or more jobs may be created by opening up land for building construction. The addition of sewer to this area will also alleviate environmental issues and create a more attractive development to and users.</p> | City of Cambridge | 900 | 31 to 90 days | \$1,350,000 |
| Guernsey | Whitaker Road Water, Sewer & Road Infrastructure | <p>Water Tank, booster station & 600' of 12" water main. 500' of 8" gravity sewer line. Reconstruct 3500' of 24" road. The project will allow for the completion of the DO Hill Business Park loop route. The 1st phase began in 1998 & has become substantially completed. Once fully developed, 500+ jobs may be created by opening up land for building construction. The addition of sewer to this area will also alleviate environmental issues & create a more attractive development to and users.</p> | City of Cambridge | 500 | 31 to 90 days | \$2,250,000 |
| Guernsey | Village of Byesville - John R. Smalley Wastewater | <p>Byesville is a rapidly growing community and residential growth of the area and to comply with orders from Ohio EPA to eliminate wet weather bypasses of untreated sewage to Wills Creek, the Village of Byesville needs to increase the capacity of the wastewater treatment plant (WWTP). A new WWTP will be constructed and will be functional during a 100-year flood event which will allow industries to continue to operate during flood events. The average daily design flow capacity of the WWTP will be increased from 0.5 MGD to 1.0 MGD with a peak hourly flow of 4.0 MGD. Specific improvements include a 1.084 acre feet administration building, new sewage pump station (3 pumps each with a capacity of 1.128 gpm), mechanical screen, grit removal, 1.0 million gallon oxidation ditch, two 50-foot diameter clarifiers, UV disinfection, post-aeration, two 232,630 gallon aerobic digesters, a 0.5 meter belt filter press, a sludge press building, a 10,000 gallon septage receiving tank, and a 10,000 gallon sludge storage tank. Ohio EPA issued the RTI on 12/17/08. Plans are complete and the project is ready to advertise for bids. A bid opening is tentatively scheduled for 4/14/09.</p> | W.E. Quicksall and Associates, Inc. | 50 | 0 to 30 days | \$8,400,000 |
| Guernsey | Eastern Guernsey Water System Phase III | <p>Build 28,800 linear feet of main wastewater from the end of the Eastern Guernsey Water System Phase II main line at Antlers, along U.S. 22 and Ohio Route 800 to the Harrison and Belmont County lines. This will establish the key link from the Guernsey County side for a future multi-county system to ensure flexibility of supply and service in the event of shortages or a natural or man-made disaster, and will bring water to approximately 100 homes and 4 businesses now without an adequate or reliable source of water, due to the insufficiency of groundwater throughout this area.</p> | Guernsey County | 10 | 91 to 180 days | \$2,000,000 |
| Guernsey | Exit 193 Waterline | <p>Build 2800 linear feet of waterline, from the County waterline at the I70 rest stop east of Cambridge to the interchange area at Exit 193 on I70 (Quaker Ctl). The line will provide water to the businesses serving interstate traffic at the exit with food, fuel, and sanitary facilities. The groundwater supply at these facilities is threatened by spreading contamination in the groundwater which could force all of them to close. This would cause a loss of the jobs now provided by the businesses, the potential the location has for future job creation, and the services provided to interstate travelers. If the businesses around Exit 193 are forced to close, there will be no stop on I70 between eastern Belmont County and western Guernsey County providing an needed services.</p> | Guernsey County | 45 | 91 to 180 days | \$800,000 |
| Guernsey | CR 71 RESURFACING | <p>RESURFACING 6.743 MILES OF CR 71, FEDERAL AIDE ROUTE, INCLUDING BERM, PAVEMENT MARKING, AND RPM.</p> | Guernsey County | 25 | 31 to 90 days | \$957,000 |
| Guernsey | CR 851 RESURFACING | <p>RESURFACING CR 851, FEDERAL AIDE ROUTE, BERM, PAVEMENT MARKING, AND RPM.</p> | Guernsey County | 25 | 31 to 90 days | \$1,178,000 |
| Guernsey | RESURFACING CR 585 | <p>RESURFACING CR 585, FEDERAL AIDE ROUTE, BERM, AND RPM.</p> | Guernsey County | 25 | 31 to 90 days | \$892,000 |

| Guernsey | Cumberland Water Line Extension Project | Ohio EPA has mandated the Village of Cumberland take action to resolve significant deficiencies with their public water system that involves issues of public health and safety. The Village of Cumberland has a low Median Household Income and a High Low-to-Moderate-Income level. Stimulus Package funds are desperately needed to fund the water line connecting the Village of Bylesville's Water Line to Cumberland's water distribution system. Ohio EPA has listed this as the number one project on their Project Priority List for all water projects in the state of Ohio. The Village of Cumberland will gladly submit any additional information needed to support this request for Stimulus Funds. Project Outcomes: Approximately 7-miles of water line and appurtenances required to connect Cumberland's water distribution system to Bylesville's water distribution system. | Cumberland, Village of | 25 | 31 to 90 days | \$2,200,000 |
| Guernsey | Expansion of Workforce Training and Education Capa | As the region's fastest growing source of workforce preparation and development, Zane State College's Wilkes/Pruitt Training Center (WPTC) in Guernsey County is vital to the area's economy. Employers see the College as a leader in programs, service, and quality. In the last 3 years, workforce development activities have doubled. The number of people served each year for beyond what the building was designed to handle. The phenomenal growth--still continuing--has stretched the Center's capacity and jeopardized the College's ability to respond to increasing industry needs. This project adds 24,000 square feet to the WPTC. With additional capacity, more workers will receive training in promising careers and the pool of qualified workers for job-prospecting businesses expanding or moving into Ohio will increase. Services will include increased customer training for existing and new business and industry, entrepreneurial counseling to create new small businesses, skills assessment, re-training, and job readiness training for unemployed or displaced workers, training for Ohio law enforcement, and medical assisting and other allied health degrees for students preparing to enter the workforce. | Zane State College | 3,020 | 31 to 90 days | \$5,000,000 |
| Guernsey | ODMRDD Developmental Center Building Demolition | Demolish ODMRDD developmental center building no longer needed to save on energy and maintenance costs. | Ohio Department of MRDD | 30 | 91 to 180 days | \$1,349,000 |
| Guernsey | ODMRDD Developmental Center Replacement of Kitchen | Replace freezers and dishwashers that have outlived their useful lives. | Ohio Department of MRDD | 0 | 91 to 180 days | \$165,000 |
| Guernsey | ODMRDD Developmental Center Replace Windows and Do | Replace energy inefficient windows and doors at ODMRDD developmental centers. | Ohio Department of MRDD | 30 | 91 to 180 days | \$995,000 |
| Guernsey | ODMRDD Developmental Center Bathroom Renovations | Replace bathrooms at one ODMRDD Developmental Center. | Ohio Department of MRDD | 30 | 91 to 180 days | \$850,000 |
| Guernsey | Pilot Careers | Create improvements in flight training which will provide students the capacity to move from initial pilot training to airline transport pilot (ATP) licensure. Having the ATP license will enable individuals the opportunity and professional requirements to find a position in commercial flight operations. The requested funds will provide the addition of a complex aircraft to the training fleet which would provide the FAA mandated training. There are 2 flight instructors employed however the business plan would add 3 additional positions based on demographic projections. In addition, available funds to be used to construct an education and hangar building to house the operation from its current home at the airport complex. The building of a new facility will add to the local economy in the form of employment and increasing the county's tax base. | Cambridge Flight Academy | 4 | 91 to 180 days | \$147,340 |
| Guernsey | Firehouse leaking roof replacement | Removal of old leaking roof covering and replace with 10,000 sq feet of 1/4 in neoprene roofing material. Add additional drains to correct drainage problems. | Cambridge Fire Department | 10 | 181 days or more | \$60,000 |
| Guernsey | Talented and Gifted Program | | EGUSD | 1 | 31 to 90 days | \$25,000 |
| Guernsey | Byesville Scenic Railway Extension | The Bylesville Scenic Railway (BSRW) will transport 8,000 tourists across a 13-mile rail line ending at the Wills in Cumberland and returning to the Bylesville Depot. The first 5 miles of rail is operational. Our four-year project consists of installing new RR ties where some exist and replacing deteriorated ties for safety for the remaining 8 miles. Project includes labor, RR ties, RR spikes, RR tie plates, RR signals and signs, highway crossing signs, gravel, travel cost to transport material to the site and rental of the removal and insertion machinery for a total cost of \$1,000,000. Project could begin June 1, 2009. Project outcomes are hire 10 employees, increase ridership by 10% in its existing tourism rail project through four buses and increase local tourism dollars for Village of Bylesville and Guernsey County. | Byesville Scenic Railway Inc. | 10 | 31 to 90 days | \$1,000,000 |
| Guernsey | Family preservation | For over ten years, TCS&S, Inc. has provided intensive home based treatment and residential treatment for youth in a six county area whose mental or behavioral health threatens to separate them from their natural families. We have had to use various sources of funding to keep these services available, most of which are now dwindling. We would like to have grant funds available to supplement the cost of these services to families and referral sources. The intensive home based services are intended to prevent placements or re-placements. The residential services are designed to be of last resort, coordinated closely with home based services, and short term. | Thompkins Child & Adolescent Services, Inc. | 30 | 91 to 180 days | \$300,000 |
| Guernsey | Remediation of Closed Westland Landfill | Remediation of uncontrolled off-site migration of leachate from an orphaned closed landfill which threatens Village of the New Concord's drinking water source protection area. Task EPA and state approval 281 funds and small trust account funds. This would replace 225 old and failing computers that would be used for students to run educational programs and to access the internet. | Ohio EPA DS/IWM Contracting & Remediation Oversight | 10 | 31 to 90 days | \$450,000 |
| Guernsey | Student Computers | Leasing issues associated with freeze/thaw cycles have caused the cleanwell at the water treatment plant to develop serious structural issues. If this tank were to suffer a catastrophic failure clean water to all customers served would be severely compromised. Repairs that are needed will incorporate salvaging concrete roof and wall panels of the tank to eliminate any additional cost of pipe movement. The next process would be to install a liner to eliminate leaks. The Bylesville Water Treatment Plant serves area that do and will extend beyond the municipal boundaries of the Village of Bylesville. All residents of the Village of Bylesville and the adjacent residential in unincorporated areas of Jackson Township will directly benefit from this project, including those of low to moderate income which account for 52.0% of the households in the village. With the recent closing of PlastTech and the loss of over 400 jobs, this project is vital to provide the infrastructure needed to accommodate new businesses and to allow existing businesses to expand. Residents of Guernsey County (with an unemployment rate of 10%) are in need of a financial boost to our local economy through increased job opportunities. | Cambridge City School District | 2 | 31 to 90 days | \$50,000 |
| Guernsey | Water Treatment Plant Clearwell Rehab | Newer and more efficient boiler/heating system to heat our building. | Village of Bylesville | 2000 | 0 to 30 days | \$500,000 |
| Guernsey | Community Center New Heating System | New Harvest Power and the Wills (local non profit) are working with American Electric Power to develop a closed loop biomass project that would grow prairie grass on reclaimed strip-mined land, that would then be co-fired in an American Electric Power generation facility. | Wheeling Township Trustees | 5 | 31 to 90 days | \$40,000 |
| Guernsey | New Harvest Power / American Electric Power Biomass | A application was previously submitted for \$1M to cover just the start up funds. This application is for \$15M funds which would cover the entire cost of the project, ensuring its completion and all of the benefits that would flow from it. | New Harvest Power | 20 | 0 to 30 days | \$1,000,000 |
| Guernsey | Window preformance upgrades | Expansion of existing fabrication facility with the purpose of fabrication of steel bridges. New facility will house technologically advanced equipment increasing production capabilities and adding approx 47 new positions and development of an additional 30 positions within the business. This will represent the first step toward planned expansion of the existing facility to enable the further hire of as many as 45 new positions in 2010 and additional development of technology throughout the facility to meet the expected demand for infrastructure and bridge demands throughout the region. In addition to a expanded facility, we will be investing in approx \$2MM - \$5MM in new equipment to facilitate this demand in existing operations. We are hopeful that you will consider this request as we continue to strive to be a financial boost to our local economies and citizens through increased revenues and employment opportunities. | Edgetech IG inc | 50 | 31 to 90 days | \$20,000,000 |
| Guernsey | Lore City Sanitary Sewer Collection System and Tre | Currently the Village is served by taking on-site septic systems. Ohio EPA has mandated construction of a centralized wastewater collection system. | URS Corporation | 12 | 181 days or more | \$3,200,000 |
| Guernsey | heating system for township garage | Install waste oil / fuel oil furnace in township garage, basic duct work, oil storage tank with wiring and plumbing. | Township Government Entity | 5 | 31 to 90 days | \$10,000 |
| Guernsey | septic system | Aeration system with 600 ft linear leach line with diversion valves and inspection wells done by county specifications. | Township Government Entity | 5 | 31 to 90 days | \$10,000 |
| Guernsey | New Harvest Power / American Electric Power Biomass | New Harvest Power and the Wills (local non profit) are working with American Electric Power to develop a closed loop biomass project that would grow prairie grass on reclaimed strip-mined land, that would then be co-fired in an American Electric Power generation facility. | New Harvest Power | 50 | 0 to 30 days | \$15,000,000 |
| Guernsey | Erection of new fabrication facility for fabricati | A application was previously submitted for \$1M to cover just the start up funds. This application is for \$15M funds which would cover the entire cost of the project, ensuring its completion and all of the benefits that would flow from it. | Ohio Bride Corporation | 47 | 0 to 30 days | \$10,231,741 |
| Guernsey | Equipment purchase for steel bridge fabrication | Expansion of existing fabrication facility with the purpose of fabrication of steel bridges. New facility will house technologically advanced equipment increasing production capabilities and adding approx 47 new positions and development of an additional 30 positions within the business. This will represent the first step toward planned expansion of the existing facility to enable the further hire of as many as 45 new positions in 2010 and additional development of technology throughout the facility to meet the expected demand for infrastructure and bridge demands throughout the region. In addition to a expanded facility, we will be investing in approx \$2MM - \$5MM in new equipment to facilitate this demand in existing operations. We are hopeful that you will consider this request as we continue to strive to be a financial boost to our local economies and citizens through increased revenues and employment opportunities. | U.S. Bridge | 25 | 0 to 30 days | \$5,550,241 |
| Guernsey | Emergency stand-by generator for fire station | For the purchase of approximately \$5.6MM of technologically advanced fabrication for the principle purpose of fabrication and installation of steel bridge projects throughout the U.S. This project would create approx 25 new positions in 2009 and an additional 25-35 new positions in 2010. It would also allow for the development of new technological skills for the existing workforce. | Liberty Community Volunteer Fire Department | 3 | 0 to 30 days | \$80,000 |
| Guernsey | Replacement of windows & doors | Install a generator for power station as it also an emergency shelter for the American Red Cross. | Wheeling Township Trustees | 5 | 31 to 90 days | \$30,000 |
| Guernsey | Wireless Broadband for Rural Application | Replace windows and doors with more energy efficient ones at the Guernsey Community Center. Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it those areas without grant monies. Building a wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Guernsey | storm sewer lines replacement to alleviate flooding | Increase size of storm drains to alleviate flooding approximately 300 feet plus catch basins | Village of Quaker City | 1 | 91 to 180 days | \$150,000 |
| Guernsey | CCA Expansion | The Church Christian Academy is planning an expansion of services including: day-care, pre-school, K-6, talented & gifted programs, and services for special needs children. This is the board's intention to purchase and expand the building in which the CCA is currently housed. With the new state-of-the-art facility and technology our students will be given a strong foundation on which they can build. NO child will be turned away from the Church Christian Academy. | Cherish Christian Academy | 32 | 91 to 180 days | \$950,000 |
| Guernsey | Mt Herman Substation | New 12,000 v/ia electrical substation in northern Guernsey County, near Mt Herman. Provides additional capacity and backup capability o additional substations in rural Guernsey County. Source will be a highly reliability 138,000 transmission line (existing). OMRSC already owns the site and has plans near completion. | Guernsey Muskingum Electric Cooperative, Inc | 10 | 31 to 90 days | \$1,250,000 |
| Guernsey | UPGRADE DIRT ROADS | County needs to provide dust control by double chip and seal 100 miles of existing dirt roads. This is a matter of safety and health issues in the county. Being a part of the Appalachian area funds are not available for this work. | Guernsey County | 40 | 31 to 90 days | \$750,000 |
| Guernsey | Building Roof | Resurfacing of preschool / community center roof. Current roof leaks and health code. Will likely have to close until replaced. Our current proposed bid is a +/- 15% offset so funds are unavailable otherwise. This will require limited destructure work and would provide a layer of use on our other building. Currently we have mold issues as well as ceiling damage as a result of the leaking. | Rolling Hills Local School District | 10 | 31 to 90 days | \$125,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Guernsey | New Patient Tower | Construct new 90,000 SF in Patient Tower Renovate 50,000 SF of present tower to accommodate a medical office setting. This will allow for centralized offices and spacious in-patient rooms enhancing care and lowering operating costs while providing an environment that promotes healing and supports clinical evidence. Replacing most of our student computers would enable our students to better participate in the real world job market as well as better education for a highly technology driven world. This will also help our students prepare for the high tech jobs they will be competing for in current work place. | Southeastern Ohio Regional Medical Center | 150 | 181 days or more | \$85,000,000 |
| Guernsey | Student Computers (Update) | Replace existing boilers and associated equipment with properly engineered and sized Ohio Special Boilers, energy efficient components and support equipment. Rework chiller plant and piping to allow all the chillers and towers to operate in a more efficient manner by sharing condenser and chiller water resources. This would include adding a Plate and Frame heat exchanger which will allow for "free cooling" in the cooling towers in mild weather instead of running the chillers. | Cambridge City School District | 4 | 31 to 90 days | \$300,000 |
| Guernsey | Boiler Replacement/Chiller Plant Rework | Resource efficiency and conservation of 300 homes. Decreasing the energy use of homes enables some home owners to economically stay in their homes. Others will be able to use their energy savings to help stimulate local economies. By starting and saving measurable amounts of energy. The efforts will reduce Carbon, dependence of foreign fuels and reduce energy demands of all fields. | Southeastern Ohio Regional Medical Center | 5 | 31 to 90 days | \$5,200,000 |
| Guernsey | Parking Lot & Entrance Resurfacing | Resurface entrances and parking lots on main campus | Southeastern Ohio Regional Medical Center | 5 | 31 to 90 days | \$450,750 |
| Guernsey | Wired and Wireless IT Infrastructure | Fixed and wireless infrastructure to support increased bandwidth utilization for technology such as smart pumps, PACS, VDP, wireless telemetry, etc. | Southeastern Ohio Regional Medical Center | 10 | 91 to 180 days | \$1,000,000 |
| Guernsey | Making Homes Energy Affordable | Improve the energy efficiency and conservation of 300 homes. Decreasing the energy use of homes enables some home owners to economically stay in their homes. Others will be able to use their energy savings to help stimulate local economies. By starting and saving measurable amounts of energy. The efforts will reduce Carbon, dependence of foreign fuels and reduce energy demands of all fields. | Guernsey-Muskingum Electric Cooperative, Inc. | 5 | 31 to 90 days | \$1,200,000 |
| Guernsey | Buffalo-Derwent Sewer System | Build a sanitary sewer system to provide collection and treatment of sewage for the unincorporated, former mining villages of Buffalo and Derwent, which are under firetraps and orders because of failure or complete lack of adequate on-site facilities, and resulting groundwater contamination. The project will consist of building 52,000 linear feet of main and lateral sewerline, will connect to the recently completed Pleasant City wastewater treatment plant, and will serve approximately 300 homes, 850 residents, and 32 non-residential users including 15 businesses. The businesses being approximately 260 and these jobs are at risk because of environmental non-compliance due to the lack of adequate wastewater treatment and the resulting threat to public health. | Guernsey County | 260 | 91 to 180 days | \$600,000 |
| Guernsey | Guernsey County EFP | Provide emergency rent and utility assistance for one month service for families in Guernsey County. Provide 40 families with up to \$500 for one month rent/utility assistance. Provide up to 100 families with up to \$100 for one time heating utility assistance. | United Way of Guernsey County, Inc. | 0 | 0 to 30 days | \$20,000 |
| Guernsey | Replacement of storm sewer lines already engineered | Replacement of storm sewer lines already engineered | Village of Quaker City | 1 | 91 to 180 days | \$150,000 |
| Guernsey | Buffalo-Derwent Sewer System | Build a sanitary sewer system to provide collection and treatment of wastewater from the unincorporated former mining villages of Buffalo and Derwent, which are under firetraps and orders because of failure or complete lack of on-site facilities and resulting groundwater contamination. The project will consist of building 52,000 linear feet of main and lateral sewerline, will connect to the recently completed Pleasant City wastewater treatment plant, and will serve approximately 300 homes, 850 residents, and 32 non-residential users including 15 businesses. The businesses being approximately 260 and these jobs are at risk because of environmental non-compliance due to the lack of adequate wastewater treatment and the resulting threat to public health. Partial funding for this project is in place. | Guernsey County | 260 | 91 to 180 days | \$600,000 |
| Guernsey | Coventry Estates Sewerline | Build 6635 linear feet of 8" sewerline with 181 stations to bypass two failing package plants and connect the Coventry Estates, located west of Cambridge in the Cambridge city sewer system, to the main sewer line. The project will eliminate contamination of surface water and, when fully completed, Muskingum River watershed, from inappropriately treated effluent from the package plants and will provide for treatment of sewage for the community of more than 100 homes and two businesses, by the fully completed Cambridge wastewater treatment plant. | Guernsey County | 10 | 91 to 180 days | \$300,000 |
| Guernsey | Whitaker Road Water, Sewer & Road Infrastructure | The project will allow for the completion of the DD high business Park loop road. The first phase begins in 11 months and will be completed automatically. Once fully developed, 300+ more jobs may be created by opening up land for building construction. The location of sewer in this area will also allow environmental services and create a more attractive development to end users. | City of Cambridge | 300 | 31 to 90 days | \$750,000 |
| Guernsey | Rural Broadband Infrastructure Development | Expand broadband infrastructure to extend high speed data services and voice applications to underserved and unconserved rural areas, in such a way that this infrastructure could potentially be shared with Emergency services. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Guernsey | Chip and seal | Load treatment, dust control, 5 miles | Richland Twp., Guernsey County | 2 | 31 to 90 days | \$30,000 |
| Guernsey | Under storage building | Under storage for usefulness, size to be determined | Richland Township, Guernsey County | 4 | 31 to 90 days | \$20,000 |
| Guernsey | ev, solar and battery business | To purchase equipment for reassembly and ion battery assembly. Act in marketing our line of Electric Utility Vehicles (zero emissions). Research and development of on-board charging systems for low speed vehicles, golf carts and neighborhood electric vehicles. | Battery Depot Inc | 2 | 31 to 90 days | \$50,000 |
| Guernsey | Food Service Business Startup | Purchase/lease land and build/finish facility (to include a green house, commercial kitchen and storage/packaging pole barn building) to produce, process and deliver salsa, beef, jelly, smoked brisket, turkey, ham and salmon and other wholesome, home-cooked style food at a low cost while still providing quality, nourishing food. This business venture will provide employment opportunities as well as much needed specialty in Southern Ohio, an area already hard hit by the recession. This will also provide me and my family with another means of income as well as employment opportunities for local friends and family members, keeping Ohioans working instead of firing for unemployment. | Stone Mountain Pantry | 12 | 0 to 30 days | \$175,000 |
| Guernsey | S. E. Ohio Stimulus | We currently own and operate a Log Cabin rental business here in S. E. Ohio, located right near to the MOST visited state park in Ohio, Ball's Bluff State Park. We currently contract with another 200 acres and have another 400 acres available, located on our premises. We are looking to create 30 more cabins on the first 200 acres, adding to our existing 10. We are interested in having a horse rescue & adoption, have classes for the children--need to learn about the value of the Irish horse, build & teach green building techniques, hoping to work with Carnegie Mellon University (have inquired). Teach organic growing and farming, provide unique gathering opportunities. By keeping customers in our state), to help support existing and growing businesses in our area. Also we own a race track in Harrison County with land available for more cabins. We have over 2.3 mill invested and can't get a bank loan because we are both considered a risky business. We will generate over 2.3 mill a year and assist in giving both veterans and single mothers employment, as well as housing opportunities. | Rural Destinations | 30 | 0 to 30 days | \$2,000,000 |
| Guernsey | Community Garden Project | Please Look at our existing facilities and Pick Me. www.logcab.com www.250peaoway.com Community Garden Projects for the City of Cambridge with vacant properties owned by the City of Cambridge. We would like to have gardens in 3 neighborhoods to benefit low and moderate income residents. | Economic and Community Development | 0 | 91 to 180 days | \$5,000 |
| Guernsey | Winter aggregate storage | The City will supply the water to the gardens. We have a couple of stores willing to donate seeds. We would need to purchase additional plants. We would like to put fencing around the gardens to keep them from being vandalized. We would also need to buy equipment to maintain the gardens. Provision for crickets during the winter to avoid runoff into ground water. Would save considerable man hours of breaking up the frozen chunks during winter storms. | Wheeling Township Trustees | 5 | 31 to 90 days | \$30,000 |
| Guernsey | ROAD MATERIALS | GRAVEL, CILVERT REPLACEMENT & DITCHWORK ON 38 MILES OF TOWNSHIP ROADS | Millwood Township | 0 | 91 to 180 days | \$40,000 |
| Guernsey | PAVEMENT | Repairing of very low income township. | Millwood Township | 0 | 91 to 180 days | \$80,000 |
| Guernsey | GRADER PURCHASE | Purchase of a Newam 65 E Turbo Motor Grader to replace the 1960 model grader we currently use. | Millwood Township | 0 | 181 days or more | \$135,000 |
| Guernsey | New Fire/Ems/Community Facility construction proje | Old Washington (255,000 pop.), Guernsey County, Ohio, and Nationality. Fire service area covers 65 square miles serving 7,500 residents. This fire facility will enable the housing of EMS/Emergency equipment, provide space for training to fire fighters and EMS emergency personnel, create a community center where there is none so local citizens has a place to gather to meet many community needs i.e., emergency shelter, food collection and distribution, public hearings, education classes, youth group gatherings, and fund raising. Total cost of construction is estimated at \$2.5 million. Guernsey County has the highest unemployment rate (13%) out of 10 Southeastern Appalachian Ohio counties with 2,600 person's unemployed having a tremendous impact on the Village. Without Stimulus funds, our local department has not been able to raise funds nor get a loan pressed under the current economic climate to construct a new facility that will be the answer to meeting multi-faceted community needs in the Village of Old Washington. | Old Washington Volunteer Fire Department | 20 | 31 to 90 days | \$2,500,000 |
| Guernsey | Plumbing Replacement | The plumbing in the West Tower is 57 years old and the South Tower is 35 years old. There have been regular sewage line breakouts during the past year as the piping has exceeded its useful life. When the lines break, sick patients must be moved into other areas and this leaves opportunity for disease and infection for the patients, their families, and the workforce. This is a serious health and safety issue. | Southeastern Ohio Regional Medical Center | 4 | 91 to 180 days | \$150,000 |
| Guernsey | Emergency Power Transfer Switch | This project could begin immediately and create both jobs in the community and when combined with other needs would expand pipe manufacturing jobs. When the residential power lines fails because of weather or technology problems, operating power supplies are obtained from another power line feed or backup generators. Because the current automatic transfer switches are over 30 years old, replacement parts are difficult to obtain. If the transfer switch fails during an emergency, the motors for the fire pumps may fail and the hospital patients would need to be transferred to another hospital. This is a serious patient safety concern. | Southeastern Ohio Regional Medical Center | 3 | 31 to 90 days | \$20,000 |
| Guernsey | Emergency Power Upgrade | Currently, new healthcare equipment and services has outgrown the existing emergency power backup system. The December 2009 power job storms knocked out supply power lines and the hospital was forced to receive services and transfer patients. The current emergency power system does not extend to the main food refrigerator and freezers and many new patient testing and treatment services. The upgrade will provide enhanced patient care and services during adverse weather conditions. Present system is 57 years old and unable to handle current load. The heat and humidity buildup causes patient safety and infection control issues. | Southeastern Ohio Regional Medical Center | 4 | 91 to 180 days | \$250,000 |
| Guernsey | HVAC Replacement West Tower | The updated system will reduce energy consumption, provide a safer patient health environment. The project enables the hospital to maintain and grow services and jobs. This level of equipment will assist US equipment manufacturers and local contractors with the installation project. The existing building used as a Village Hall no longer meets the needs of the village and of the residents and would be more costly to repair than construct a new facility. The Village would like to construct a new facility that would house the administrative, legislative, and police department in one building. The new building will be fully accessible, energy efficient, and environmentally friendly. The facility be designed using LEED capabilities and innovative technology to make the new village Hall eco-friendly or green. The new facility will be 4,400 to 5,000 square feet with an estimated cost of \$1,000,000.00. | Southeastern Ohio Regional Medical Center | 4 | 91 to 180 days | \$200,000 |
| Guernsey | Village of Bvesville - Village Hall | The existing building used as a Village Hall no longer meets the needs of the village and of the residents and would be more costly to repair than construct a new facility. The Village would like to construct a new facility that would house the administrative, legislative, and police department in one building. The new building will be fully accessible, energy efficient, and environmentally friendly. The facility be designed using LEED capabilities and innovative technology to make the new village Hall eco-friendly or green. The new facility will be 4,400 to 5,000 square feet with an estimated cost of \$1,000,000.00. | W.E. Quicksall and Associates, Inc. | 25 | 181 days or more | \$1,000,000 |
| Guernsey | Ash Bin | 20x40 ash bin with 24" sidealls. | Township Gov Entity Liberty Township | 5 | 31 to 90 days | \$25,000 |
| Guernsey | Robins Road Waterline | Build 7800 linear feet of 4" waterline on Robins Road, Jackson and Richland Townships, Guernsey County, to connect existing lines at either end of the Road. This will allow installation of taps on the line in and connected to the existing main from both in this area, which will now a significant problem. It will also prevent interruption of service and pressure to approximately 80 households now with water service, and will provide safe, reliable, and adequate water to 30 households now without water. | Guernsey County | 0 | 91 to 180 days | \$75,000 |
| Guernsey | Old Washington Vol. Fire Dept. new Fire department | Old Washington Vol. Fire Dept. requests Stimulus funds to construct a new Fire department/EMS and Community facility to benefit the Village of Old Washington, Guernsey County, Ohio, and Nationality. The Old Washington Fire service area covers 65 square miles serving 7,500 residents. This new facility will enable the housing of EMS/Emergency equipment, provide space for training to fire fighters and EMS emergency personnel, create a community center where there is none so local citizens has a place to gather to meet many community needs i.e., emergency shelter, food collection and distribution, public hearings, education classes, youth group gatherings, and fund raising. Total cost of construction is estimated at \$2.5 million. Guernsey County has the highest unemployment rate (13%) out of 10 Southeastern Appalachian Ohio counties with 2,600 person's unemployed having a tremendous impact on the Village. Without Stimulus funds, our local department has not been able to raise funds nor get a loan pressed under the current economic climate to construct a new facility that will be the answer to meeting multi-faceted community needs in the Village of Old Washington. | Old Washington Volunteer Fire Department | 100 | 0 to 30 days | \$2,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Guernsey | Haven of Hope | One additional Legal Advocate will be hired to assist with a 15% increase in clients served in one year. We have seen a 34% increase in victims served since 2005. With the increase in unemployment in Guernsey County, domestic violence crimes have increased this increase. The rate of unemployment in 2007 was 6.5% and in February 2009 is 12.9%. In addition 6 violence prevention will become more valued through an investment in higher education. A tuition reimbursement plan will be created for the time limited Recovery Act monies of 17 months to provide an opportunity to invest in those staff the Haven of Hope currently have so that we can retain and preserve our most valuable resource. | Haven of Hope | 7 | 0 to 30 days | \$173,160.00 |
| Guernsey | Haven of Hope | Monies from the Recovery Act STOP Violence Against Women grant will enable the creation of one new Advocacy position, and the retention of one Legal Advocate to serve Guernsey County's target population of rural victims of domestic violence and sexual assault. It is important to note that the unemployment rate for February 2009 for the U.S. was 4.8%, for Ohio 5.0%, and 8.1% for Guernsey County. As of February 2009 the rate for the U.S. was 6.5%, for Ohio 9.4%, and 12.9% for Guernsey County. It is a known fact that there is a direct correlation between unemployment rates and domestic violence. Since 2005, the Haven of Hope has witnessed a 40% increase in violence against women. This has been done with no increase in staffing pattern. The expected outcome for this request is the creation one new Advocacy position, and the retention of one Advocacy position to serve the targeted population of rural domestic violence and sexual assault victims in Guernsey County. | Haven of Hope | 2 | 0 to 30 days | 64,000.00 |
| Hamilton | Drug Abuse Reduction Task Force (DART) | The Drug Abuse Reduction Task Force (DART) was established in 1988 and is made up of 15 suburban police agencies who pool resources and share personnel. DART addresses the drug activity and associated violent crime affecting these communities. Without DART, the majority of our communities do not have the capabilities or faculty resources to address these problems. DART has been primarily funded by Biomedical grants and contributions from DART member agencies. With the severe Federal and State funding cuts to Ohio task forces, staying functional is a critical issue. To keep functional, the administrative staff was reduced to part time and other services had to be eliminated. With continued funding cuts it will be difficult to function in a viable manner. The requested funding would allow me to keep my administrative staff and help maintain my Pharmaceutical Diversion program. The pharmaceutical diversion end of enforcement has been increasing cocaine and needs to be effectively addressed. DART has been a viable and needed task force for our communities and this funding would keep us in existence as our faculty resources have been exhausted. | Drug Abuse Reduction Task Force (DART) | 4 | 31 to 90 days | \$160,000 |
| Hamilton | Pedestrian/bicyclist stopover and relaxation areas | The project will include installation of seating areas for pedestrians and those using mass (bus) transit along Montgomery Road (US 22). In addition to seating areas the project will also provide improved lighting and drinking fountains. | City of Montgomery | 5 | 91 to 180 days | \$30,000 |
| Hamilton | Loveland Commerce Park Water Tower | Construction of a 1.0 million gallon elevated water storage tank is needed to provide adequate fire flow to the businesses in the Loveland Commerce Park. There are over 30 businesses employing over 1,000 individuals at the Commerce Park that are dependent on sufficient fire flow for the protection of their property and livelihood. In addition, approximately 10 construction jobs would be filled during the construction of the water storage tank. | City of Loveland | 1010 | 91 to 180 days | \$2,420,500 |
| Hamilton | Lincoln Heights Street Improvement | Resurfacing of Village Streets approximately 6 miles of 24 foot wide streets | Village of Lincoln Heights Municipality | 50 | 31 to 90 days | \$2,500,000 |
| Hamilton | Hamilton/Guardrail Replacement | Guardrail replacement Village wide. | Amberley Village | 10 | 0 to 30 days | \$150,000 |
| Hamilton | The Kennedy Connector | The Kennedy Connector is a new roadway with two bridges that connects Duck Creek Road and Madison Road. Other improvements include widening and relocating Street Avenue, improving the intersection of Madison Road and Ridge Avenue, improving the intersection of Duck Road and Kennedy Avenue. | City of Cincinnati | 500 | 91 to 180 days | \$30,000,000 |
| Hamilton | Galbraith Road Resurfacing | Resurfacing Galbraith Road within Amberley Village Limits. | Amberley Village | 20 | 0 to 30 days | \$1,000,000 |
| Hamilton | Amberley Village wide Street Repair | Amberley Village wide Street Repair which will include Street Program and curb repair. | Amberley Village | 10 | 0 to 30 days | \$220,000 |
| Hamilton | Applegate Avenue | Applegate Avenue - 1300 linear feet of total curb replacement, concrete base repair and resurfacing. | City of Cheviot | 20 | 0 to 30 days | \$300,000 |
| Hamilton | Mt. Pleasant Reconstruction | Reconstruction of Mt. Pleasant. This regional arterial connects Springfield Pike and Compton Road. The project will involve the reconstruction of the roadway, storm water and drainage improvements, water main replacement from a 4 inch main to 18 inch main improving the flow capacity, and a sidewalk extension to connect surrounding neighborhoods. | City of Wyoming | 57 | 31 to 90 days | \$2,000,000 |
| Hamilton | Chester Road | Chester Road - from Sharon Road to Oak Street, 2000 linear feet, grind and resurfacing roadway, reconstruction shoulders, drainage improvements, install sidewalk throughout project. | Village of Glendale | 20 | 0 to 30 days | \$687,000 |
| Hamilton | McIntyre Street | Lincoln Heights - McIntyre Street - Total Street Reconstruction - Sellens Avenue to Lindy Street | Lincoln Heights | 20 | 0 to 30 days | \$273,000 |
| Hamilton | Pioneer Park Shore Line stabilization | The project will restore natural habitat along the shoreline of a retention basin (pond) in the City owned Pioneer Park. The project will improve water quality in the pond and Sycamore Creek watershed by minimizing and/or eliminating erosion and sedimentation. | City of Montgomery | 8 | 91 to 180 days | \$50,000 |
| Hamilton | Leggett Street | Lincoln Heights - Leggett Street - Curb and Base Repair and Resurfacing. Madison Street to Prairie Street | Lincoln Heights | 20 | 0 to 30 days | \$331,000 |
| Hamilton | Weller and Swamp Park restrooms | The project will involve installation of alternative energy heating to create restrooms that can be used year round in two of the City owned parks. Concepts under consideration include use of geothermal energy to provide enough energy/heating to allow restrooms to maintain temperatures above 40 degrees F that allow the facilities to be open to visitors to the parks during the November to April timeframe. | City of Montgomery | 8 | 91 to 180 days | \$70,000 |
| Hamilton | Montgomery Park promenade | The project will create a walkway connection to playground equipment and other recreational facilities in Montgomery Park. The project will also include drinking fountains, walkway lighting and seating areas for park visitors. | City of Montgomery | 15 | 91 to 180 days | \$85,000 |
| Hamilton | Montgomery Street Resurfacing Program | The project includes repairs and resurfacing of City of Montgomery roadway infrastructure on approximately 3.5 cumulative miles of public roadway throughout the community. The work includes repaving to other infrastructure includes but not limited to storm sewers and sanitary sewer manholes to prevent 1/4 inch of the sanitary sewer system. | City of Montgomery | 25 | 91 to 180 days | \$1,000,000 |
| Hamilton | City of Montgomery microsurfacing (Black Mat) pro | This project includes installation of a thin layer surface treatment (microsurfacing) on main public roadways in the community that serve as connector roads with adjoining communities. The work is generally able to be completed in a quick timeframe and construction to be completed without extended periods of time with construction zones and traveling delays to the motoring public. The work has an expected life cycle of 7-8 years and is a cost effective method to extend the service life of public roadways. | City of Montgomery | 10 | 91 to 180 days | \$150,000 |
| Hamilton | East Kemper Road sidewalk | Installation of a new public sidewalk along a major county and City highway. The project includes installation of a sidewalk to connect existing sidewalks on either end of the project that is approximately one third (1/3) of a mile in length that provides a connection for pedestrians and cyclists to park and recreation areas as well as connection to retail (shopping) centers. | City of Montgomery | 15 | 91 to 180 days | \$125,000 |
| Hamilton | Montgomery Road Resurfacing | City of Montgomery - Montgomery Road Resurfacing - Montgomery Road Black Map program being performed throughout City Limits. | City of Montgomery | 10 | 0 to 30 days | \$150,000 |
| Hamilton | Montgomery Road (US22) Streetscape | The project includes installation of streetscape along 700 linear feet of Montgomery Road (US22) in the central business district of Montgomery, OH. The work includes installation of street trees, reestablishment of street lights and installation of sidewalks along this major retail corridor in Montgomery. | City of Montgomery | 15 | 181 days or more | \$375,000 |
| Hamilton | City of Montgomery - City Wide Resurfacing | City of Montgomery - City Wide Resurfacing - Montgomery annual repaving. | City of Montgomery | 30 | 0 to 30 days | \$1,000,000 |
| Hamilton | Montgomery Road Streetscape | City of Montgomery - Montgomery Road Streetscape Phase 2 | City of Montgomery | 25 | 0 to 30 days | \$375,000 |
| Hamilton | Yost Tavern building repairs | The project includes repairs and building renovation of the oldest building that the City of Montgomery owns. While the building is known as the Yost Tavern it is not currently utilized as a tavern and in fact is zoned for retail use however the renovations are necessary to support ongoing retail use as this building is approximately 175 years old, is protected by Landmark designation and needs work to the second floor and not to allow the building to remain in use as either a City owned and leased building in the Montgomery Heritage District. | City of Montgomery | 8 | 91 to 180 days | \$50,000 |
| Hamilton | Montgomery Road (US22)/ Cross County Highway (SR12) | The project will improve roadway and pedestrian lighting, pedestrian walkways, landscaping and motorist "clear zones". The project will also include installation of "vertical" lighting on the overpass of Montgomery Road (US22) over Cross County Highway (SR 120) in the City of Montgomery Heritage Gateway District as this area is a major walkway connection between the retail area in Montgomery and private high schools located approximately 1/4 mile to the south of the overpass. | City of Montgomery | 20 | 181 days or more | \$800,000 |
| Hamilton | Montgomery Road (US22) Urban Paving project | The project will be a partnership between the City of Montgomery and the State of Ohio (OOOT) through the Urban Paving Program. The work on US 22 in Montgomery includes approximately 0.75 cumulative miles of a 4 and 5 lane roadway in a commercial/retail corridor in the City of Montgomery. The City of Montgomery is currently completing final engineering that will be submitted to ODOT by late April/early May 2009 and will be advertised for bids in late 2009 with an expected project award date by ODOT in early 2010. | City of Montgomery | 20 | 181 days or more | \$200,000 |
| Hamilton | AFIS fingerprint system with webcheck | The project includes purchase of an AFIS fingerprinting system that allows fingerprints to submit electronic fingerprints to RCI, BCI and FBI. The project includes improvements and renovation of public owned land in the Montgomery Heritage District at a major crossroads of two highly traveled roadways. The project will provide public gathering space in the Heritage District and will support the adjoining business centers as well as the entire retail area. The project will also provide ADA access and will incorporate the use of improved lighting and landscaping to create a safe and enhanced environment that promotes the use of plants and trees to reduce the "heat island" effect as is often the case in pavement or hardscape areas. | City of Montgomery | 2 | 91 to 180 days | \$18,000 |
| Hamilton | Neully Plaisance plaza improvements | The project includes purchase of an AFIS fingerprinting system that allows fingerprints to submit electronic fingerprints to RCI, BCI and FBI. The project includes improvements and renovation of public owned land in the Montgomery Heritage District at a major crossroads of two highly traveled roadways. The project will provide public gathering space in the Heritage District and will support the adjoining business centers as well as the entire retail area. The project will also provide ADA access and will incorporate the use of improved lighting and landscaping to create a safe and enhanced environment that promotes the use of plants and trees to reduce the "heat island" effect as is often the case in pavement or hardscape areas. | City of Montgomery | 15 | 181 days or more | \$485,000 |
| Hamilton | Full-time Police Officers | Has been (2) new police officers for crime and public safety patrols. With our current budget, hiring of additional officers is not possible. However, with a COPES grant the community would greatly benefit with additional police intervention. With the additional officers, we are capable of supporting the regional Drug Abuse Reduction Task Force (DART). This agency is one of the State of Ohio's recognized drug task forces. This successful task force draws agents from 13 local jurisdictions. Our city is committed to reducing violence and drug abuse and providing a safe environment for our residents and businesses. | City of North College Hill | 2 | 31 to 90 days | \$120,000 |
| Hamilton | Mobil Restaurant | A Mobil Restaurant / Stand serving hot meals to patrons in the downtown Cincinnati, Ohio / Hamilton County Area. This would occur mostly during events at Paul Brown Stadium, Great American Ball Park, US Bank Arena and The Freedom Center such as concerts, Baseball games, Football games and other future events. There are currently no restaurants or stands within a short walking distance from any of these facilities. This provides a great opportunity for job growth and providing hot meals to customers. This project would have a potential for growth and expansion in a very short time. The stands would be environmentally friendly, green and serve healthy foods. Thank You Thank You | Self | 25-50 | 31 to 90 days | \$1,000,000 |
| Hamilton | Infrared sensor | The infrared sensor is being designed to monitor carbon monoxide, carbon dioxide and methane. While being initially designed for application in the heat treat industry, the sensor has the potential for application in multiple industries. The industries that have been identified as potential markets for the product are: thermal, petrochemical, agricultural, environmental monitoring and related industries. The project is currently in R&D and we have invested approximately 65K in time and materials to date. The benefit of this product is that it will help a variety of industries to better monitor, control and ultimately reduce their emissions of carbon monoxide, carbon dioxide and methane | Super Systems, Inc. | 5 | 0 to 30 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | Central Riverfront Intermodal Center Garage Phase | The Phase IA Intermodal transit center is the continuation of the Phase I center that is the key facet of the transportation and transit portion of the Banks Riverfront development within the City of Cincinnati. The Banks project includes over \$600M in private investment and 2M sq ft of development. The requested funding will complete the intermodal transit center (phase I). There are no local funds available to complete Phase II. The center will support future rail as well as bus and car transportation modes in the central business district of the City of Cincinnati. The development and design work is substantially complete and the project ready to go. Separate requests for Phase IB (\$10.5M) and Phase IC (\$11M) have also been requested through the state website. | Hamilton County Government | 400 | 31 to 90 days | \$43,000,000 |
| Hamilton | Red Flag Incident Reporting System | Red Flag is an incident reporting system designed for educational institutions to reduce the risk of violence and other hazardous behavior. The system allows any member of an educational community, students, parents, faculty or staff to report observations of unusual or potentially dangerous incidents and allows the school to analyze this information and take proactive steps to eliminate negative outcomes. | Risk Aware, LLC | 15 | 0 to 30 days | \$400,000 |
| Hamilton | e-trim | The e-trim project is designed to develop an oxygen sensor & control to improve the performance of the heat treating system of an industrial furnace. The product will allow our customers to use less gases (oxygen, nitrogen, etc), reduce their NOx emissions and increase their productivity and efficiency. The use of the e-trim product on an industrial furnace will mean less hydrocarbons and NOx emitted into the environment. This project has been in R&D for two years. We have invested 60K in hours and materials thus far. This project has the potential to increase the efficiency and productivity of the heat treatment industry in OH and worldwide. It also will have a positive impact on the environment because it will help reduce gas emissions into the air by helping the industry run their process more efficiently. The H2 Cell measures hydrogen in the thermal processing industry. The H2 Cell will measure the hydrogen being used and help control the amount of gases being used in the thermal process. | Super Systems Inc. | 10 | 0 to 30 days | \$300,000 |
| Hamilton | H2 Cell | Initially designed for the thermal process industry, the product has applications in the petrochemical, agricultural, environmental and related industries as well. | Super Systems Inc. | 3 | 0 to 30 days | \$300,000 |
| Hamilton | Air Pollution Up Date | Installation of new paint booths to increase the number of employees needed and decrease pollutants. | USA Collision Centers | 12 | 31 to 90 days | \$250,000 |
| Hamilton | Wright Farm Regional Detention/Water Quality Basin | Phase 1 of regional detention/water quality basin (includes two regional green retaining walls, and off-site installation of 3 Hock Weirs) and efflux as part of CEPA appeal upon mitigation. Design Completed. CEPA 401 ID #048485 | City of Forest Park | 15 | 0 to 30 days | \$150,000 |
| Hamilton | Greater Cincinnati Workforce Network | The Greater Cincinnati Workforce Network is a three-year, \$2.25 million initiative to help employers meet their need for a skilled workforce, expanding career and educational opportunities for low-skill workers. Our core objective is to close skills gaps in three priority sectors: healthcare, advanced manufacturing/alternative energy, and construction. We develop career pathways and provide career counseling programs to help workers advance in their careers and fill occupational shortages. We seek to prepare at least 1,500 low-skill workers for better and long-term careers, and improve at least 50 employer's abilities to recruit, train, retain and advance employees and address jobs to fill critical occupational shortages in these industries. The Workforce Network is led by The Greater Cincinnati Workforce Solutions, a major support provided by the National Fund for Workforce Solutions. | Greater Cincinnati Workforce Network | 0 | 0 to 30 days | \$250,000 |
| Hamilton | Police Dept. Evidence Storage & Processing Bldg. | Outfitting to provide secure area to hold and process evidence. | City of Springdale | 25 | 31 to 90 days | \$325,000 |
| Hamilton | Fire Dept. Training Tower | Training facility for fire fighters to become more efficient and safer in dealing with heavy smoke and hazardous materials and recoveries during building fires. | City of Springdale | 25 | 31 to 90 days | \$721,000 |
| Hamilton | Public Works Facility Material Storage Bldg. | In addition to public works storage building to store misc. bulk type materials out of the weather / environment. Development of a vehicle program for the USPS LJV fleet of 180,000 vehicles with a target of 70% improvement in fuel economy for the fleet. This translates into savings of \$20M/yr/year. This proposal includes the following: • 50 engineers and technicians • Vehicle Tech Center for test & development • Powertrain repair system for current LJV fleet • 10 demonstration trucks. | City of Springdale | 25 | 0 to 30 days | \$100,000 |
| Hamilton | USPS - Vehicle Retrofit to Double Fuel Economy | Funding, in addition to our investment, will accelerate this progress through a vehicle development and test facility in SW Ohio and a highly skilled engineering team of 50. Production of vehicles could begin in 18 months with year 3 contribution of 1,500 jobs and \$150 million/year. This technology has realized these savings for FedEx, UPS, and others. NgEK, formed in 2003 to develop green transportation technology, is responsible for the current state of the art in commercial trucking including the first ultra low emission diesel, a transmission with record efficiencies, and hybrid powertrains now used by FedEx, UPS and the 2008 Olympic buses. | NgEK, Inc. | 1,500 | 0 to 30 days | \$11,000,000 |
| Hamilton | Operation growth | EA Hunter is a fast growing company, with potential to add hundreds of local jobs. In the first 2 years of existence EAH has grown from 1 employee to 16. With such growth comes both fire and expansion issues, this money would be utilized to help fund this growth and expand current operations. This project will bring 200 new jobs to my community and the state of Ohio within 5 years of initial funding. EA Hunter Transportation, LLC is a specialized 4PL that provides transportation services, process consulting and integrated technology solutions to small and large companies in both the US and international markets. EA Hunter provides a complete suite of Supply Chain Management services. We customize and implement solutions for our customer's transportation and logistics requirements that allow them to reduce operational costs, optimize speed to market and ultimately increase revenues. We regularly and recently ranked EA Hunter Transportation as the #1 fastest growing company among the Top 50 logistics companies in the country in its inaugural release of the Inc. 500 through strategic partnerships and collaboration. EA Hunter's mission is to be a best in class 4PL service. Reinforcement of a failed gabion wall. Construction of approximately 400 LF of bio-engineered "green" terraces wall which includes native plantings to face the wall. 3 Hock weirs would also be installed as part of the restoration of the riparian corridor. Concept Design Completed. Work to be done under CEPA General Permits #13 - Bank Stabilization. | EA Hunter Group, LLC | 200 | 0 to 30 days | \$500,000 |
| Hamilton | Beaver Run Riparian Corridor Restoration Project, | EA Hunter's mission is to be a best in class 4PL service. Reinforcement of a failed gabion wall. Construction of approximately 400 LF of bio-engineered "green" terraces wall which includes native plantings to face the wall. 3 Hock weirs would also be installed as part of the restoration of the riparian corridor. Concept Design Completed. Work to be done under CEPA General Permits #13 - Bank Stabilization. | City of Springdale | 20 | 0 to 30 days | \$416,000 |
| Hamilton | Amberley Village Storm Sewer Replacement | Replace 700' of deteriorating 48" CMP storm sewer | Amberley Village | 10 | 0 to 30 days | \$400,000 |
| Hamilton | Crest Hills Stream Restoration Project | Restore riparian corridor within stream, and remove existing OCHER non-compliant Class 1 dame (locks adequate safety), replace with normally dry detention facility as compensation. | Amberley Village | 15 | 0 to 30 days | \$650,000 |
| Hamilton | Village Storm Drainage Improvements | Stream bank stabilization, riparian corridor restoration, various storm sewer replacements to reduce downstream silt from leaking inlets / sewers, replacement of non-compliant OCHER Class 1 Dam. Dam locks controlled spillways for Probable Maximum Flood, and has a deteriorated primary spillway. Both issues are safety concerns should the dam overtop due to the apartment complex directly downstream for the dam earthen embankment. | Amberley Village | 10 | 0 to 30 days | \$250,000 |
| Hamilton | Crest Hills Class 1 Dam Replacement | Stream bank stabilization, riparian corridor restoration, various storm sewer replacements to reduce downstream silt from leaking inlets / sewers, replacement of non-compliant OCHER Class 1 Dam. Dam locks controlled spillways for Probable Maximum Flood, and has a deteriorated primary spillway. Both issues are safety concerns should the dam overtop due to the apartment complex directly downstream for the dam earthen embankment. | Amberley Village | 45 | 0 to 30 days | \$1,200,000 |
| Hamilton | Chatsworth & Warren Sanitary Sewer | 1300 LF of 48" sanitary sewer to allow elimination of 13 HETS in low income area. | Village of Woodlawn | 15 | 0 to 30 days | \$392,000 |
| Hamilton | OnkoLabs alternative fuel development | Plastic plastic to solid fuel conversion. | OnkoLabs llc | 30 | 31 to 90 days | \$150,000 |
| Hamilton | OnkoLabs antifungal development | Development of a new class of human topical antifungal drug. | OnkoLabs llc | 30 | 31 to 90 days | \$500,000 |
| Hamilton | Wind and Solar Development Company | We are currently working on a new program in home based renewable energy systems. My partner is in Ohio - and I am in Indiana. The primary location for the business would be in Ohio. This grant money would be to finalize the designs, and start the marketing and sales portion of the program - including a website development. Thank you for considering - I had trouble the first submission - so hopefully this will go through! | Noble Specialties | 15 | 31 to 90 days | \$50,000 |
| Hamilton | Net-Zero Energy House | As a prototype for green building of residential houses, a net-zero energy house will be built utilizing installed concrete forms and energy efficient windows to form the tight skin of the house. To minimize energy usage, the house will use a geothermal HVAC connected via radiant floor heating to the thermal mass of a two-story passive solar room, an in-line water heater, and energy star rated appliances. The two-story passive solar room will also provide heated air to be circulated throughout the house. Photovoltaic solar panels will be used to generate electric. With the usage of electric needed by the house, all excess electric will be loaded back to the grid, thus generating money from the power company for the owner. To reduce storm water runoff, rain gardens and a rainwater collection system for water reuse will be utilized. Landscaping on the western and northern borders will protect the house from the harsh winter winds. This prototype house will be used for training and to gain backing for a business to develop these houses commercially for those who want their house to PAY THEM to live there and give us our freedom from our debt. | Duffy Contracting | 10 | 0 to 30 days | \$450,000 |
| Hamilton | York Street & Central Avenue Sewer Replacement | This project is located at the intersection of York Street and Central Avenue and is adjacent property in the Cincinnati neighborhood of West End. The project will repair and/or replace feet of existing large diameter sewer that is in disrepair. The project will aid in addressing the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MHD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/transition. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.6 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. We have workers or programs, and the local Ochs Career Campuses. Our partnership serves primarily low-income African-American single female heads of household, enabling them to become self-sufficient by obtaining any of four Associate Degrees. | Metropolitan Sewer District of Greater Cincinnati | 3 | 31 to 90 days | \$577,300 |
| Hamilton | The ACT Academy | Outcomes: 1) 100 students will complete all course requirements and remain students in good standing; 2) 100 students will complete their degrees; 3) 100 students will increase their household income to the level of self-sufficiency | Accountability & Credibility Together | 100 | 31 to 90 days | \$215,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Residential Facility Renovation Project | This proposal involves increasing accessibility and improving safety of the facilities at Victory Parkway via the renovation of the physical property. The renovation includes expanded parking facilities, sidewalks and exterior lighting. Currently, LADD senior programs are serving more people than at anytime in its history. This service increase translates into more staff, more training and more involvement from families, volunteers as well as the Cincinnati community. Architectural plans have been developed to meet this need related to the steady service expansion of the organization as well as all current accessibility and safety guidelines. Project II: This initiative involves the renovation of the bedroom areas of the three group homes operated by LADD on Victory Parkway. Based on the agency's most recent accreditation review by an independent third party international organization, it was highly recommended that each person living in a group home of eight be provided with their own private bedroom. This renovation recognizes a basic right we all share, that being the right to privacy. The bedroom renovation in each | LADD, Inc. (Living Arrangements for the Developmen | 30 | 0 to 30 days | \$435,000 |
| Hamilton | The Cincinnati Streetcar Network | The Cincinnati Streetcar Network will improve connectivity between neighborhoods and major employment, commercial, and recreational centers, as well as providing a catalyst for economic development within the Central Business District and redevelopment in its adjacent Over-the-Rhine and Uptown neighborhoods. The City of Cincinnati recently completed a Streetcar Feasibility Study. The study identified an initial phase streetcar loop, potential Uptown extensions and follow-up corridors, an estimate of implementation and operation costs, and identified potential funding strategies. The starter phase connects The Banks redevelopment project, Government Square, Fountain Square, Aronoff Center for Performing Arts, Contemporary Arts Center, Friday Market, and Music Hall. The streetcar network will connect people and places, creating a vibrant cityscape and providing an amenity that is attractive to residents, workers, customers and visitors. In addition, the streetcar will create jobs, private investment, and revenue which will benefit all Cincinnati neighborhoods. Fixed rail infrastructure, which implies permanence, creates a significant catalyst for redevelopment. The Cincinnati Streetcar Feasibility Study indicated that construction | City of Cincinnati | 20 | 31 to 90 days | \$12,600,000 |
| Hamilton | Restoration of Chapel | Restor Historic German Chapel within the first German Cemetery of Cincinnati, Ohio. | Vine Street Hill Cemetery Association | 20 | 31 to 90 days | \$350,000 |
| Hamilton | Placid Meadows Pump Station Elimination | This project will eliminate an existing pump station and install approximately 1400 linear feet of sanitary sewer. The pump station was constructed in 1971. Installation of the elimination sewer will reduce annual O&M costs because of routine deterioration of the pump station. The project will address the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/retention. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.8 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 7 | 31 to 90 days | \$600,000 |
| Hamilton | Roads | Minor Rehabilitation - Pavement Piny Sys | Vine Street Hill Cemetery Association | 15 | 31 to 90 days | \$700,000 |
| Hamilton | SSO 568 & 569 Improvements | This project consists of replacing 4,200 feet of existing 8" and 12" pipe that is undersized and will remove two sanitary sewer manholes. This project will address the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/retention. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.8 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 7 | 31 to 90 days | \$2,317,800 |
| Hamilton | Foley Forest Pump Station Upgrade,Delwood Estates | This project consolidates three old pump stations into one new pump station and includes construction of 1,200 linear feet of gravity sewer and 1,200 linear feet of force main. The project will address the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/retention. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.8 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 11 | 0 to 30 days | \$2,685,740 |
| Hamilton | Dist 8, PID 84497, HAM IR 75 10.09 | Minor Rehabilitation - Pavement Piny Sys | Ohio Department of Transportation | 174.8 | 31 to 90 days | \$6,091,500 |
| Hamilton | Hengehold 2nd Pump Station Elimination | This project will eliminate an existing pump station and install approximately 1,500 linear feet of sanitary sewer. The pump station was constructed in 1965. Installation of the elimination sewer will provide sewer service to unserved areas and reduce annual O&M costs because of routine deterioration of the pump stations. The project will address the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/retention. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.8 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 7 | 31 to 90 days | \$800,300 |
| Hamilton | Iron Fencing Project | Reserve Iron fencing along street frontage of Vine Street and Mitchell Ave. | Vine Street Hill Cemetery Association | 20 | 0 to 30 days | \$250,000 |
| Hamilton | Winton 1 & 2 and Sherwood Pump Station Consolidati | This project consolidates three old pump stations into one new pump station and includes construction of 4,000 linear feet of gravity sewer and 5,000 linear feet of force main. The project will address the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/retention. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.8 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 11 | 31 to 90 days | \$4,290,400 |
| Hamilton | Cincinnati's Union Terminal Renovation & Restorati | In 2006, CMC, in collaboration with Hamilton County, commissioned and completed a study titled "Master plan for the Cincinnati Museum Center Renovation and Restoration Project." The plan concluded that the building was in need of serious repairs, replacement of virtually all building systems and conservation of valuable historic building fabric, including a series of art deco murals. The first project (Diving Room Project) of this phased restoration includes renovation and repair of sections of the exterior envelope, Pierre Bonelle murals, historic dining rooms, and adjacent rooms and structures. In addition to restoration of these historic spaces in the Diving Room Project, CMC also would like to include a green roof system, as a demonstration project, within the project's scope. | Cincinnati Museum Center (CMC) | 205 | 31 to 90 days | \$5,000,000 |
| Hamilton | Harwinton Lane Sewer Replacement | This project is a Wet Weather Improvement Project that will replace 2,000 linear feet of undersized sewer that is beyond repair. The project will address the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/retention. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.8 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 7 | 0 to 30 days | \$1,352,500 |
| Hamilton | MOBILE TRAILER ADVERTISING | THESE ARE LARGE AND SMALL TRAILERS AND TRUCKS THAT ADVERTISE JOBS, EDUCATION, ETC. THEY FULFILL THE NEEDS OF THE COUNTRY BY WAY OF ADVERTISING. EACH MOBILE LOCATION (SUCH AS CORNER OF BUSY CITIES) HAS A TELLER WHO IS ABLE TO ANSWER QUESTIONS, GIVE OUT FORMAL INFORMATION, ASSIST PEOPLE, ETC. ETC. FORMAL EVENTS WILL NEED A MINIMUM OF 10 UNITS/TRAILERS FOR UPCOMING TRAFFIC OF PEOPLE. 100 STAFF TO HELP FOR EVERY EVENT THIS CONCEPT HELPS IN SEVERAL WAYS IT HELPS INFORM PEOPLE. IT FOCUSES ON GIVING HEAVY TRAFFIC FLOW HELP TO THE CITY, SAFETY BY USING STAFF TELLERS WHO COULD BE TIED INTO POLICE AND FIRE DEPARTMENTS. | CPS GRAPHIC SIGNS | 10,000 | 0 to 30 days | \$3,000,000 |
| Hamilton | Helicopters; maintenance and sales | We are an Aerospace Company dealing primarily in helicopter sales (worldwide) and maintenance business. We currently employ 5 and had 10 in January. We support many sectors of industry in Ohio, police, corporate, news, utility etc. as well as across the country, state, public, utility, tourism. With the economic downturn we are suddenly in a negative cash position with the sales of helicopter completely stopping last November and very limited maintenance revenues since the same period. The above estimates represent my calculations of our requirement considering the net losses over the next year and two years. Being a small business we will not be able to maintain this type of loss and will be forced to cease operations leaving an Ohio business disappearing after 30+ years, 5 unemployed, the Hamilton County Sheriff, ODOT and Ohio State Police without local maintenance support. I am requesting some type of program to assist us to cope with the global economic downturn and continue to serve our community and industry | East West Helicopter, Inc. | 4 | 0 to 30 days | \$150,000 |
| Hamilton | GREEN SIGN INITIATIVE | UP TO 80% ENERGY SAVINGS ON RETROFITTING EXISTING SIGNS WITH LED LIGHT SOURCES AND PROMOTING RECYCLED AND MORE GREEN MATERIALS IN NEW SIGN PROJECTS. |----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | Galbraith Road Improvement Project | Multiphase rehabilitation of a main arterial corridor. This project is approximately 2.2 miles long with a project life of 20 years which will provide a long term impact. Includes replacement of failed pavement areas, failed stormwater structures, safety improvements by providing pedestrian signals at intersections and installation of center ADA compliant handicap ramps. Additional work to be provided as well. This road is a main thoroughfare linking the communities of Reading, Deer Park, Cuyahoga Township and Amherly Village and continues West across the entire county of Hamilton. Improvements will enhance the economic well being, and make for safer passage, within the above mentioned communities. Preserve riparian corridor within stream, and remove existing OOHNR non-compliant Class 1 dam (backs adequate safety), replace with normally dry retention facility as compensation. | Amberley Village | 25 | 91 to 180 days | \$1,700,000 |
| Hamilton | Crest Hills Stream Restoration Project | We are 1 district out of 3 in the entire state to be accepted under the Extreme Environmental Program and that had to close a school based upon environmental hazards and safety concerns for our students and staff. We lost millions in revenue due to deregulation of energy and we lost millions more due to elimination of TPP due to our industrial base. 25% of our students qualify for free lunch, 5% are special needs students and with state share at 1% of taxpayers view this as unfair and therefore we will not pass a levy or bond issue. We have a shovel ready Gov-LED building plan that will pay people to work within 4 months and provide 21st Century Learning schools for our students and greatly improve the quality of life for all our residents. We believe our story and school district should be an Ohio Project to receive money from the federal and state governments economic stimulus dollars to minimally build one new school to replace the school we had to close in 2005. We also believe that the state share should be a high dollar amount for Three Rivers that would at least give us a fighting chance to pass a bond issue in our community to build a second school. This project requests \$8.0 million to design and construct Freedom Way between Rosa Parks and Race Street, Moving Way between Main Street and Elm Street, and to relocate and construct components of a new utility distribution network related to these street segments in the Central Riverfront (CRF) Street Grid Project. The project will construct these streets and utilities and will include construction of the roadways, roadway support piers and foundations, sidewalks, streetlights and other site utilities, and components of the new utility distribution network. Funds will provide architectural & engineering fees, construction, construction administration, inspection, legal fees, and project management of the project. | Amberley Village | 15 | 91 to 180 days | \$650,000 |
| Hamilton | Building 2 - 21st Century Schools | We are 1 district out of 3 in the entire state to be accepted under the Extreme Environmental Program and that had to close a school based upon environmental hazards and safety concerns for our students and staff. We lost millions in revenue due to deregulation of energy and we lost millions more due to elimination of TPP due to our industrial base. 25% of our students qualify for free lunch, 5% are special needs students and with state share at 1% of taxpayers view this as unfair and therefore we will not pass a levy or bond issue. | Hamilton | The Central Riverfront Street Grid | The CRF Street Grid project is constructing a new street network to improve local access between Cincinnati's Central Business District (CBD), the redevelopment of the Central Riverfront, and with Northside Parkway through improved connections to the historic John A. Roebling Suspension Bridge, the Taylor Southington Bridge, and the Clay Wade Bailey Bridge. The CRF Street Grid project provides the streets, sidewalks and | City of Cincinnati | 112 | 0 to 30 days | \$8,000,000 |
| Hamilton | Oakley NBD Streetscape: Oakley Square Improvements | Phase 4 of the Oakley Square improvement project will be constructed in 2009. The streetscape will incorporate the use of green infrastructure such as pervious concrete gutters, pervious concrete sidewalks, pervious pavements, rain gardens, and urban bio-retention planters. Additionally, the expansion of the Green Espaleras will reduce the amount of impervious pavement in the area while increasing the permeability available for pedestrian activity. By expanding the area available for pedestrians this project will create a "complete street" that benefits all and increases activity in the heart of the business district. | City of Cincinnati | 125 | 0 to 30 days | \$1,500,000 |
| Hamilton | Ohio River Trail - Wilmer to Carrel | Currently the major intersection in the Square, Madison/Madisonville, is confusing for both vehicles and pedestrians. The intersection actually has two intersections that function as one. Vehicles are often making movements that they are not supposed to make and pedestrians often do not know which vehicles are supposed to be moving when they are crossing the street. The new alignment will bring the two intersections together into one traditional intersection. This will reduce confusion for drivers and make it safer for pedestrians. The Green Espaleras will | City of Cincinnati | 100 | 31 to 90 days | \$1,750,000 |
| Hamilton | The Ohio River Trail - West Corp Line to East Corp | This project would construct a portion of the Ohio River Trail from Wilmer Avenue to Canal Street. This segment will connect the trail to the Lunken Airport/playfield area (an extremely popular recreational facility) and extend toward downtown Cincinnati. Construction of this trail will enhance quality of life, increase mobility and recreational opportunities, and support economic development and tourism. This, and will fund study and design of the 15-mile western arm of the trail that will run from the CBD to Sawyer Park. Construction of this trail will enhance quality of life, increase mobility and recreational opportunities, and support economic development and tourism. The City has identified the eastern portion of the Ohio River Trail. Six segments of the trail have already been completed, including a 0.6-mile segment through T.M. Barry International Friendship Park, and a 7-mile segment from Corbin Street to the intersection of Grand and Kellogg Avenues. Construction will begin in late 2008 on a 0.4-mile segment extending west from the Lunken Airport Trail to Canal Street, and design has begun on a 4-mile segment extending east from Lunken Airport Trail to Magrini Nature Preserve, southern terminus for the Little Miami Scenic Trail. Connection to the Little Miami Scenic Trail will eventually link downtown Cincinnati with over 100 miles of continuous bike trail extending to Springfield and Columbus, Ohio. The portion of the Ohio River Trail from Paul Brown Stadium to the west has been completed at one location - Farnham Park. Additionally, some | City of Cincinnati | 1000 | 181 days or more | \$30,000,000 |
| Hamilton | Mt. Adams NBD Streetscape: St. Gregory St - Hatch | The scope of this project includes narrowing the street to make room for more pedestrian components such as new water city paver sidewalks, street trees and signs. Additionally, the project will move all utilities such as Cincinnati Bell, Duke Energy and Time Warner Cable underground, and creates the opportunity to update water connections and reconfigure the roadway within the proposed improvement area. The project overall brings a significant improvement to the pedestrian environment in the Mt. Adams business district, particularly along St. Gregory Street. | City of Cincinnati | 40 | 31 to 90 days | \$1,100,000 |
| Hamilton | Mill Creek Secondary | The scope of this project is limited to increase Peak Sustainable Capacity of Aeration and Secondary Clarification System to 240 MGD. Expenses include new RAS pumps and piping, energy dissipating baffles, and reconfiguration of piping to accommodate for anaerobic treatment and sorption stabilization. The project will aid in addressing the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/retention. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.6 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 30 | 91 to 180 days | \$46,021,600 |
| Hamilton | Coordination of School Based Services | The Children First Program developed by the Hamilton County Family and Children First Council in 1996 coordinates and contracts for multiple school based services for students and families in 10 selected schools also to provide "full service" schools there. The program focus of the Children First Program is to provide prevention services, intervention, youth development and parent focused programs within the school setting to positively impact the school culture so that families in learning are encouraged and able to prevent. The program has been funded in the past by the FCF Executive Committee, because of budget cuts the program is in jeopardy of being closed down or severely cut back at best. Funds are being requested to maintain current 7x school sites and add an additional 7 schools. This program has been extensively evaluated and is in high demand but because of funding we have been unable to expand it to state. | Hamilton County Family and Children First Council | 15 | 31 to 90 days | \$1,800,000 |
| Hamilton | American Red Cross Cincinnati Headquarters Buildin | This is the installation of green storm water management controls on a new building including 3,200 square feet of sloped green roof, a 14,860 square foot bio-retention system, and 1,200 square feet of pervious parking. The project will aid in addressing the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/retention. |----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | Intercity Passenger Rail Station | Columbus, and Cincinnati (3-C). This project would fund station upgrades at the existing Cincinnati Amtrak facility or design and construct a new station. At the present time, Amtrak has a passenger train (the "Cardinal") that runs from Chicago to New York that stops at the Union Terminal. The Cardinal makes its Cincinnati station stop on one of CSX Transportation's mainline tracks that quickly leaves. Since Cincinnati would be an end-point city on the 3-C route, the station would have to support one or more tracks laying over overnight. The Union Terminal as it exists today does not have that capability. If the Union Terminal were to be used for the 3-C trains, one or more holding tracks would have to be constructed. There is also a possibility that the Union Terminal could not be used for the 3-C service. Amtrak's existing service and any new rail passenger service makes use of the freight railroads' tracks. Based on the congestion on the freight lines in the area, there is a possibility that the 3-C trains would have to use a routing into Cincinnati that bypasses the Union Terminal. If that is the case, a new station would have to be constructed. | City of Cincinnati | 100 | 31 to 90 days | \$10,000,000 |
| Hamilton | Cincinnati Public Schools - North Avondale Montess | This is the installation of green storm water management controls at a new building including 1,200 square foot green roof and rain barrels; and a small bioretention wetland. The project will aid in addressing the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MGD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/initiative. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.6 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 3 | 0 to 30 days | \$34,000 |
| Hamilton | Cincinnati Public Schools - North Avondale Montess | This is the installation of green storm water management controls at a new building including 1,200 square foot green roof and rain barrels; and a small bioretention wetland. | Hamilton | Queensgate Inter-modal Terminal | Queensgate Terminals is the operating company in Cincinnati that is developing a 30+ acre parcel of land along the Ohio River known as the Queensgate Inter-modal Terminal (QIT). Utilityway QIT will form an efficient link to the Central Ohio Logistics Center and an Ohio job ready 2700 acre site in Jeffersonville, at the heart of Ohio's agricultural industry through an exciting new transportation corridor, the Ohio Valley Trade Corridor. Owners gate will be affording barges direct access onto rail lines, thereby originating freight at Cincinnati to be interchanged with carriers to their ultimate destination in west coast quays. With a shortage of railcars and increasing traffic loads on existing back QIT enable the utilization of our waterways to their fullest potential. A large part of QIT's initial business is expected to be the transportation of corn, soybeans and other grain harvested in Ohio. QIT will allow a multi-modal mode of transportation for Ohio Agriculture that puts millions of dollars annually back into the Ohio Agriculture community along with state and local economies. The stimulus funds would be used for infrastructure. | Queensgate Terminals, LLC | 40 | 181 days or more | \$21,000,000 |
| Hamilton | Green Streets Project | This is the installation of infiltration beds, vegetated curb extensions, and other storm water steering devices on East & West Elder Street, East Street and at the intersection of Central Parkway & Vine Street. The project will aid in addressing the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MGD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/initiative. | Hamilton | The Uptown Way finding System | This project will construct a vehicular and pedestrian wayfinding signage system for the Uptown community. Uptown is a collection of five Cincinnati neighborhoods and the second largest employment center within the city, home to the University of Cincinnati, several nationally significant hospitals and the Cincinnati Zoo and Botanical Garden. It is also the location of many significant business district efforts designed to reverse the long-term trend of decline and disinvestment in the community. The new Uptown signage system will be a regional extension of the City of Cincinnati's downtown central business district wayfinding system; provide a framework of district identities; direct to various Uptown destinations; and improve accessibility and convenience for citizens visiting the Uptown District. | City of Cincinnati | 25 | 31 to 90 days | \$250,000 |
| Hamilton | Mill Creek Primary | This project consists of rehab grit removal & primary skidage grit removal by removing grease from Mill Creek WWTP North Pump Station, skimmings removal improvements, odor control improvements, modification to the primary thickening Btts, implementation of a modular green roof and construct a new grit enclosure for grit washing and hauling. This project will optimize space 450 MGD firm capacity through pretreatment and primary treatment. The project will aid in addressing the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MGD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/initiative. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.6 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 20 | 91 to 180 days | \$39,564,400 |
| Hamilton | Family Friendly School Certification Program | It is universally recognized that family engagement in children's education is vitally important to their success. Yet most schools have been historically unsuccessful in engaging families in a meaningful way. In order to both train schools to have become more family friendly and to recognize them publicly for achieving that status, the Family Friendly Certification Committee of the Hamilton County Family and Children First Council has piloted a program to evaluate schools regarding how they do this work in families, offer them technical assistance to help them improve their relationships with families (according to national and state criteria) and to publicly recognize them with a large banner and a public ceremony for achieving that status. This has been successfully piloted in two schools in two different districts. Funds are being requested for a professional staff and 1 critical assistant to implement the Family Friendly Certification Program, to conduct the evaluation, arrange for technical assistance and organize the public recognition. This will improve schools' relationships with families and increase families involvement with the school. | Hamilton County Family and Children First Council | 3 | 31 to 90 days | \$130,000 |
| Hamilton | Charmlear Drive Sewer Replacement | This project consists of the replacement of approximately 1500 feet of deteriorated sewer. The project will aid in addressing the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MGD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/initiative. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.6 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 7 | 91 to 180 days | \$533,400 |
| Hamilton | Upgrade 25 traffic signals to LED signals | Upgrade 39 traffic signals in the City of Blue Ash with emergency preemption systems to support all emergency vehicles improve safety and expedite delivering emergency services when needed. | CITY OF BLUE ASH | 8 | 31 to 90 days | \$390,000 |
| Hamilton | Woodburn Avenue Sewer | This project consists of the replacement of approximately 540 feet of deteriorated sewer from Blair Ave. to Woodburn Ave. The project will aid in addressing the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MGD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/initiative. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.6 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 to the national economy. | Metropolitan Sewer District of Greater Cincinnati | 7 | 91 to 180 days | \$894,600 |
| Hamilton | air charter | Helicopter charter service, FAA part 135 certified, providing specialized transportation, patrol, surveillance, and emergency search and rescue. BusinessCertificate awarded last summer, and immediately impacted by the down turn in the economy. Figures represent three months additional operating cost. Additional work is coming late this spring. | borderline air, llc | 3 | 31 to 90 days | \$34,000 |
| Hamilton | Widen Reed Hartman Highway | Widen Reed Hartman Highway southbound at Carver Road by adding 12' of pavement for 100' as a right turn lane to ease traffic congestion. Modify traffic signal to accommodate widening. | CITY OF BLUE ASH | 14 | 181 days or more | \$240,000 |
| Hamilton | Galbraith Road | This road is the Deer Park portion of a joint project with Amberley Village and Hamilton County. Originally this was submitted to 2008 SCIP application but was not approved for funding. This project is ready to be bid. | City of Deer Park | 50 | 31 to 90 days | \$650,000 |
| Hamilton | Carver Road Rehabilitation | Rehabilitate the entire length of Carver Road by removing the existing asphalt pavement, stabilizing the underlying concrete pavement, rebuilding the roadway as an asphalt pavement, add curb and gutter on the west side, add an 8' wide sidewalk on the west side. Resources and public presentation - for the widening, enlightenment, and enhancement of the Cincinnati community. Our parks are the preeminent green industry, hosting great jobs of today, and providing a great development ground for more jobs in the green collar economy. More than a clear purpose, we have the passion. Since 2006, the Park Board has been the Green Initiative test pilot for the City of Cincinnati. Parks has installed solar panels, a wind turbine, solar trash cans, and uses biodiesel in all towing vehicles. | CITY OF BLUE ASH | 24 | 91 to 180 days | \$926,320 |
| Hamilton | Cincinnati Parks Green Initiatives | This project will fund the following projects: Photovoltaic systems, Geothermal HVAC and Biomass, Conservation, Deployment of BigBelly Smart trash compactors, Green Infrastructure, Mowing and Transportation Equipment. We are a system of public parks, preserves, parkways, highway greenspace and greenways providing numerous sites for green infrastructure projects. Park property covers over 5,000 acres of the city with multiple buildings and public facilities. There is a Cincinnati Park in every neighborhood. | Cincinnati Park Board | 20 | 31 to 90 days | \$7,375,000 |
| Hamilton | Rehabilitate and widen Malsbury Road | Rehabilitate Malsbury Road between Carver Road and Reed Hartman Highway by removing the existing asphalt pavement, stabilizing the underlying concrete pavement, rebuilding the roadway as an asphalt pavement, add 12' of pavement for a right turn lane, add curb and gutter on the both sides, and add an 8' wide sidewalk on the south side. | CITY OF BLUE ASH | 20 | 181 days or more | \$385,000 |
| Hamilton | Lytle Park | The reconstruction of Lytle Park will provide more greenspace and garden area for the urban downtown community, improved and relocated walkways, new infrastructure including irrigation and lighting, more seating and landscape and better pedestrian connections to the surrounding area. It also includes a shelter and parking area, renovated restroom station, a natural play area, and several water features. All features of this project will utilize green initiatives of solar, water reclaiming and water recycling. | Cincinnati Park Board | 19 | 91 to 180 days | \$4,500,000 |
| Hamilton | Widen Plainfield Road between Peppermil Ln and Georgetown Road | Widen Plainfield Road between Peppermil Lane and Georgetown Road to add a right turn lane to relieve significant congestion by adding 12' of pavement, curb and gutter, and an 8' wide sidewalk on the west side between Peppermil Lane and Georgetown Road and replacing 3 asphalt sidewalks with 6 concrete sidewalks between Georgetown Road and Hart Road, install a bus shelter at Georgetown Road, road ADA ramps needed, modify signals at Peppermil Lane and Georgetown Road to support the road widening. | CITY OF BLUE ASH | 20 | 181 days or more | \$680,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Hamilton | Construct Bike Paths throughout the City of Blue A | Concrete concrete bike paths throughout the City of Blue Ash to provide connectivity between residential and business areas to parks, the downtown, City Hall, the Recreation Center and the Sports Complex. Paths shall be constructed in accordance with the "Bike Paths and Walkway Program, City of Blue Ash, September 2004." | CITY OF BLUE ASH | 12 | 91 to 180 days | \$850,000 |
| Hamilton | Washington Park - Downtown Cincinnati | This park project retains the historic character of the current site while growing to the north of the site. Major design features include establishing a large open lawn area which is oval-shaped and which centers on the front of Music Hall. This "community green" is larger than a football field and will provide much needed green space for the neighborhood. It will be a place for informal play, community events and concerts. Infrastructure will be built into the area to serve lighting and access needs, with flexibility for multiple possible placements of temporary stages. Surrounding the lawn are community-oriented features including a dog park, playground, picnic areas and a major water feature. A new comfort station is planned adjacent to the playground on the 13th Street side of the park and a small concession stand is to be located off of Elm Street on the southwest side of the lawn. The historic bandstand remains in its current location but is to be lowered to be able to make it handicap-accessible while also providing a more intimate setting for programs and events. The pathway system throughout the park has been simplified while maintaining existing grades and trees. | Cincinnati Park Board | 30 | 91 to 180 days | \$7,000,000 |
| Hamilton | Dalton Area Improvements | Complete reconstruction of two failed local residential streets, Oakwood and Dalton | City of Deer Park | 25 | 91 to 180 days | \$525,000 |
| Hamilton | School Assessments | The School Contributor of the Family and Children First Council has developed an extensive practical assessment tool to be used on schools to determine their unique needs. The pioneering instrument has been piloted in three schools operating in three different school districts and has been successfully utilized in each. The tool is designed to be implemented by a trained evaluator who has experience with school environments, systems and cultures. As more and more schools recognize the need for support, enrichment and family involvement in their schools, it is essential that schools be properly assessed to determine their needs prior to allocating funds for these programs so funds can be judiciously allocated. This proposal is requesting funds for a trained assessor and 1 casual assessor to begin conducting assessments on schools in Hamilton County. | Hamilton County Family and Children First Council | 3 | 31 to 90 days | \$170,000 |
| Hamilton | Upgrade 25 traffic signals to LED signals | Upgrade 25 traffic signals in the City of Blue Ash from incandescent signals to Light Emitting Diode (LED) traffic signals to improve safety, reduce energy and support battery backup systems; install LED pedestrian signals; install uninterrupted power supply (UPS) battery backup systems. | CITY OF BLUE ASH | 8 | 31 to 90 days | \$375,000 |
| Hamilton | Owl's Nest Park | Owl's Nest Park is a 10.7 acre park in the East Walnut Hills and Evanston neighborhoods. A master plan for the park was created in concert with both neighborhoods and with a community-based park advisory council. The plan calls for new recreational facilities, walking paths, lighting and landscape, and better linking the north and south sections of the park. Phase 1 of the park plan is expected to be constructed in late 2008. Phase 2 work will complete walkingways, create a continuous walking loop, add new lighting, improve the park's infrastructure with irrigation and replacement of a historic masonry gateway, and rebuild the park's shelter. Additionally, the Fairfax Avenue entry plaza will receive additional improvements including new art. | Cincinnati Park Board | 22 | 91 to 180 days | \$2,000,000 |
| Hamilton | Construct Airport Infrastructure | It should be noted that this park falls into one of the major Employment Zones in Cincinnati. Construct all infrastructure for the regional City of Blue Ash Airport Park to be constructed by the City of Blue Ash. Construction will include roadways, sidewalks, drainage systems, sanitary sewers, water, and roadside landscaping | CITY OF BLUE ASH | 50 | 181 days or more | \$6,000,000 |
| Hamilton | Building Readiness | New emergency demands and a growing need for disaster preparedness require the Cincinnati Chapter to expand its disaster relief efforts to a new Disaster Operations Center. The new DOC will serve as the nerve center and command communications hub for emergency response. The project will obtain a LEED rating of Silver with the possibility of Gold. The AHC views the DOC as a 10-year facility. A 7-10 year project schedule is applied to all decisions regarding energy efficiency/sustainable energy, water conservation, recycling, waste development, air quality, alternative transportation. Materials are projected to gain exemplary performance in the LEED Rating System for Recycling (Recycled Content 30%) and Regional Materials (over 40%). Good Indoor Environmental Quality will be maintained by installing low VOC materials, providing natural light and Carbon Dioxide monitoring. With 3 stories the lower floor is below grade for low neighborhood impact and a landscaped area to screen the parking lot. | American Red Cross, Cincinnati Area Chapter | 500 | 181 days or more | \$500,000 |
| Hamilton | Construct south access road to Blue Ash Airport | Construct the south access road to the Blue Ash Airport to support the total relocation of airport support buildings to the south side of the existing runway. Construction will include roadways, sidewalks, drainage systems, sanitary sewer, water, and roadside landscaping | CITY OF BLUE ASH | 22 | 181 days or more | \$1,500,000 |
| Hamilton | insulation of modest to low income houses | save money on bills. Also it would help save energy from the gas and power grid system. I would like to see spray foam be in the application. foam is quick to apply leaves little to no mess to clean up. Ridge Deck Replacement | house ready ltd. | 4 | 31 to 90 days | \$50,000 |
| Hamilton | Dist 8, PID 84444, HAM SR 562 0004L | | Ohio Department of Transportation | 43.1 | 31 to 90 days | \$1,500,000 |
| Hamilton | Beckman adult center slabjacking | slabjacking of existing slab due to poor soil conditions | Hamilton County MRDD | 10 | 181 days or more | \$890,076 |
| Hamilton | Jackson adult center HVAC Replacement | Replacement of rooftop HVAC units in order to be more energy efficient | Hamilton County MRDD | 10 | 91 to 180 days | \$81,840 |
| Hamilton | Beckman Adult Center bathroom renovation | renovations of existing toilet rooms to make them barrier free | Hamilton County MRDD | 10 | 91 to 180 days | \$59,400 |
| Hamilton | Cincinnati Riverfront Park | This project will complete 20 acres of the proposed 40 acre flood and erosion control public infrastructure project along the Ohio River. The U.S. Army Corps of Engineers has estimated that when this project is completed the region will receive more than 1.1 million new visitors annually to this new public project. The project will also reinforce the private/public development of the "Banks Project," which is a new mixed use development project under construction adjacent to the site. The project will stimulate the local economy and region bringing about over 180 new jobs to the region. In addition, the project is designed to support the environment through watershed reclaiming, recycle, and mitigation, reduce carbon footprint, providing sustainable buildings by adhering to LEAD certifications. Moreover, the project will employ geo-thermal, solar, wind, and bio-mass technologies. The project, once completed, will also showcase the largest green roof within the State of Ohio. | Cincinnati Park Board | 182 | 91 to 180 days | \$29,500,000 |
| Hamilton | Cincinnati Riverfront Park | This project will complete 20 acres of the proposed 40 acre flood and erosion control public infrastructure project along the Ohio River. The project, once completed, will also showcase the largest green roof within the State of Ohio. | Cincinnati Park Board | 182 | 91 to 180 days | \$29,500,000 |
| Hamilton | Beckman Adult Center resurface parking lot | Resurface existing parking lot | Hamilton County MRDD | 20 | 91 to 180 days | \$47,227 |
| Hamilton | Jackson Adult Center New sidewalk | Install approximately 150 feet of side walk | Hamilton County MRDD | 10 | 91 to 180 days | \$23,760 |
| Hamilton | Jackson Adult Center resurfacing parking lot | Resurface existing parking lot | Hamilton County MRDD | 20 | 91 to 180 days | \$47,277 |
| Hamilton | Jackson Adult Center Slabjacking of concrete slab | Slabjacking of concrete floor | Hamilton County MRDD | 20 | 181 days or more | \$890,076 |
| Hamilton | Reed Hartman Hwy Rehabilitation | Reed Hartman Highway from Glendale/Milford Road to Cooper Road. Remove 38,000 square yards of deteriorated asphalt pavement; construct Stress Absorbing Membrane Interlayer for waterproofing; construct asphalt surface course; apply pavement sealing; install video detection traffic control system; replace deteriorated signs and signs as required; construct ADA sidewalk ramps as required. | CITY OF BLUE ASH | 14 | 31 to 90 days | \$650,000 |
| Hamilton | Clairetta Ave. Reconstruction | Total reconstruction of an existing roadway including storm sewers, curbs, ditches, drainage, pavement and waterline. | City of North College Hill | 15 | 31 to 90 days | \$350,000 |
| Hamilton | Norco/ Bobwood Reconstruction | Total reconstruction of an existing roadway including storm sewers, curbs, ditches, drainage, pavement and waterline. | City of North College Hill | 15 | 31 to 90 days | \$600,000 |
| Hamilton | Griesmer Ave. Reconstruction | Total reconstruction of an existing roadway including storm sewers, curbs, ditches, drainage, pavement and waterline. | City of North College Hill | 15 | 31 to 90 days | \$500,000 |
| Hamilton | city beautification | Abandon and rebuild private historic residence | self | 6 | 91 to 180 days | \$400,000 |
| Hamilton | HRG | Repairing of three driveways and repairing and improving accessibility of three additional driveways in affordable homes rented by individuals owned by the Hamilton County Board of Mental Retardation and Developmental Disabilities. | Resident Home Corporation | 6 | 31 to 90 days | \$120,000 |
| Hamilton | Maple and Warner street reconstruction | Reconstruct the curb, street and storm sewer of the entire length of Maple Avenue and as short portion of Warner both sections are in very poor condition. | City of Mt. Healthy | 25 | 31 to 90 days | \$750,000 |
| Hamilton | Clovernook street reconstruction | Reconstruct Clovernook Avenue from Compton Road to the dead end as well as the north end of Adams Road to the corporation limit. | City of Mt. Healthy | 25 | 31 to 90 days | \$750,000 |
| Hamilton | Little Miami WWTP and Secondary Tank Recharging | This project will optimize the capacity of the Little Miami Treatment plant to enable it to handle average daily and peak daily flows of 55 mgd and 100 mgd, respectively. The existing primary collector drive was originally installed in 1953 and the secondary drive in 1979. Since then the steel chain and wood flights have changed to plastic material. The plastic chain in the primary and secondary settling tanks was last replaced in 1983. Currently the plant is experiencing more frequent chain failures. The resulting maintenance requires that a tank be taken off-line thus reducing the capacity of the plant. This project will help address the reduction and elimination of direct sewage and stormwater discharge into our local watersheds. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. It will provide opportunities for sustainable development to revitalize our neighborhoods and supporting job growth/retention. | Metropolitan Sewer District of Greater Cincinnati | 10 | 31 to 90 days | \$16,101,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Hamilton | Little Miami WWTP Primary and Secondary Rotating T | The reason for performing this work is to maintain the primary and secondary settling tank structures by enabling isolation of tanks for maintenance and for the treatment processes to remove floating scum and sludge from wastewater. The current equipment does not provide the flexibility needed to operate the processes efficiently. The project will help to address the reduction and elimination of direct sewage discharge into our waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decree and improving local water quality while striving to maintain affordable rates for our customers. It will provide opportunities for sustainable development to revitalize our neighborhoods and supporting job growth/transition. | Metropolitan Sewer District of Greater Cincinnati | 10 | 31 to 90 days | \$9,239,000 |
| Hamilton | Re-roof City Hall | Replace leaking roof on City Hall - some areas starting to mold - would also be interested in making this a green roof since it is a flat roof. | City of Mt. Healthy | 5 | 0 | \$50,000 |
| Hamilton | Mill Creek WWTP Aeration Tanks Diffusers Replacmen | Construction for this project includes replacing the existing diffusers in the aeration tanks at the Mill Creek WWTP. This project will allow MSD to address the reduction and elimination of direct sewage discharge into our local waterways. It will assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decree and improving local water quality while striving to maintain affordable rates for our customers. It will also provide an opportunity for sustainable development to revitalize our neighborhoods and supporting job growth/transition. | Metropolitan Sewer District of Greater Cincinnati | 10 | 0 to 30 days | \$4,921,000 |
| Hamilton | PaintBrush-Ready Projects | ArtWorks impacts lives. We employ teens. We employ artists. Each year ArtWorks hires an average of 150 teens from over 400 applicants from the Cincinnati area. Professional artists guide Apprentices Artists to produce art for public spaces, exhibitions in museums, galleries, publications, or public performances. Apprentices develop their artistic ability and life skills while gaining professional work experience through mentoring. | Art Opportunities, Inc. dba ArtWorks | 150 | 31 to 90 days | \$200,000 |
| Hamilton | Business District Camara project | This year ArtWorks will hire at least 125 teens and 25 professional artists. We have 13 PaintBrush-Ready projects including 10 murals and art by 30,000 sq ft in Ronald McDonald House Charities of Cincinnati. We would do more, but we have a \$200,000 funding goal. The impact of ArtWorks projects is well documented. To date, ArtWorks' award-winning programs have created meaningful employment for over 3,000 high-school age youth and 440 professional artists. ArtWorks creates jobs that foster positive youth development, cooperative learning and job training and enhance the community landscape through art. We can also boast an annual economic impact of over one million dollars and 41 million viewers for the 18 murals we have completed in the past 2 years. | City of Mt. Healthy | 5 | 31 to 90 days | \$100,000 |
| Hamilton | Technology Training Center | These safety courses throughout the business district - 10 courses to cover the area that takes pictures, send to a server for storage of up to 10-15 days. | Cable Enterprises LLC | 500 | 31 to 90 days | \$250,000 |
| Hamilton | Demolition of 8597 Ridge Road House | Final and onsite training center offering education to the unemployed/underemployed who are seeking careers to be re-educated in technology fields including hardware, software, network security, and web site design. | Amberley Village | 6 | 0 to 30 days | \$40,000 |
| Hamilton | Geraldine Drive Reconstruction | Demolition of vacant home at 8597 Ridge Road. Catch basin reconstruction, repair or new, install new concrete curbs, Underdrain/edge drains, Adjust catch basins, manholes, waterworks items, etc. as necessary. Storm line replacement and new installation. Pavement Fabric, install bituminous aggregate base material, install new asphalt concrete surfaces. Reclaim and Seeding and mulching as necessary. Estimated quantities: Street length 1,203 feet. 680 cubic yards Bituminous Aggregate Base, P# 64-22 1,015 cubic yards Aggregate Base, As Directed By Eng. 173 cubic yards Asphalt Concrete Intermediate Course Type 2, P# 64-22 173 cubic yards Asphalt Concrete Surface Course Type 1, P# 64-22 633 Square yards P.P. Cement Conc. Pavement (" Drives) 26 Inseal feet 12" Conduit, Type E, P# 40-40 300 Inseal feet 12" Conduit, Type B, 706.02, Civ 14 new catch basins 2,535 Inseal feet Unclassified Pipe Underdrain 2,535 Concrete Curb, Type E 3,772 square yards Reclaim 3,772 square yards Pavement Fabric Flood isolation of oil conversion process. 2. Research algae system and build prototype. 3. Research and design burner systems that burn fuel without creating soot, and that will be capable of over 2,000,000 btus. 4. Build burners and install on existing equipment. 5. After verification, sell conversion kits and systems to manufacturers, and industries. 6. Manufacture in Cincinnati small systems that would allow companies to convert waste onsite to an energy source for heating of buildings or process equipment. | Colerain Township Public Works Department | 40 | 181 days or more | \$800,000 |
| Hamilton | Conversion process for algae/vegetable oils to fue | Rehabilitation of existing roadways includes such work as: new asphalt concrete wearing course, curb replacement, sidewalk ramps, catch basin reconstruction, partial and full depth repair, re-milling, pavement fabric, catch basin and sewer lid adjustments and storm sewer pipe replacement as needed. Estimated quantities: 18,000 linear feet total 18,000 feet 18,000 cubic yard of Asphalt Concrete wearing course 18,000 Inseal feet of curb replacement 830 Square feet of sidewalk ramps 24 catch basins reconstructed 215 square yards of partial depth repair 24,000 square yards of re-milling 24,000 square yards of pavement fabric 92 catch basin and sewer lid adjustments 123 Inseal feet of storm sewer replacement | Mechanical Finishing Inc. & Deep Fried Diesel LLC | 5 | 0 to 30 days | \$500,000 |
| Hamilton | Colerain Township Various Street Rehabilitation | Rehabilitation of existing roadways includes such work as: new asphalt concrete wearing course, curb replacement, sidewalk ramps, catch basin reconstruction, partial and full depth repair, re-milling, pavement fabric, catch basin and sewer lid adjustments and storm sewer pipe replacement as needed. Estimated quantities: 18,000 linear feet total 18,000 feet 18,000 cubic yard of Asphalt Concrete wearing course 18,000 Inseal feet of curb replacement 830 Square feet of sidewalk ramps 24 catch basins reconstructed 215 square yards of partial depth repair 24,000 square yards of re-milling 24,000 square yards of pavement fabric 92 catch basin and sewer lid adjustments 123 Inseal feet of storm sewer replacement | Colerain Township Public Works Department | 40 | 31 to 90 days | \$800,000 |
| Hamilton | Water-to-Water Heat Recovery | Develop the infrastructure to manufacture and market a packaged heat recovery system that extracts heat from cooling tower water leaving a chiller or other refrigeration system (or can be used with any water-based heat transfer cooling system). This device can heat 100 gallons per minute of water from 40F to 90F, offsetting 4,200,000 to 7,000,000 BTU per hour of thermal load (at the CO2 and NOX associated with it) AND save 3,500,000 to 4,000,000 gallons of water from evaporating (and related chemicals). When used with a refrigeration system and cooling towers, it will also save over 250,000 gallons of water a year, with their corresponding CO2 and NOX releases. Funds would be used to develop offices and manufacturing facilities, to train workers and sales personnel, and to develop a marketing program and literature. | Lighthouse Utility Solutions | 400 | 31 to 90 days | \$1,500,000 |
| Hamilton | Contaminated Exhaust Scrubber adn Heat Recovery | Final Engineer and develop prototypes of a heat recovery system that scrubs the hot exhaust air stream of particulates or fumes that are in the exhaust stream while extracting the thermal waste heat for use elsewhere in the facility. Uses include dryer exhaust from paper plants, exhaust from pickling lines, exhaust from paint booths, etc. A key potential use is to replace electrostatic precipitators on oxidized boilers and power plants. The captured ash could be recycled into bricks, the recovered heat could make additional electricity, a lot of water sprayed into the cooled exhaust "scrubbed" acid can that can be turned into sulfuric acid in an on-site chamber for resale, the NOX can be captured in a similar fashion, finally, the cooled exhaust can be compressed to make liquid CO2 which can be sold or stored. Thus, a totally "green" power plant with several valuable by-products. The units are modular for ease of installation and operation. | Lighthouse Utility Solutions | 2,500 | 31 to 90 days | \$5,000,000 |
| Hamilton | High-Efficiency CoGeneration | Engineer and develop prototypes of a system that would cool and remove 99% of the water vapor from inlet air for industrial air compressors. About 15% or more of the energy required to operate an compressor is wasted compressing water vapor into water droplets. The burner air from the compressor is also only about 85% of the compressor's rated capacity. This system removes virtually all of the incoming water and provides a 100-PSIG pressure head point of "D" which eliminates the need for most discharge lines (leaving another 50% of the compressed air system's total energy head). Since "off-spec" compressor pressure is 1.8 to 3.8 bar, CFM per horsepower (E) to 1.5 CFM per kW) the savings are tremendous: A plant running 14,000 SCFM of compressors can get 14th same NET air to the plant with only 11,200 SCFM of compressor output. The equipment would be built in 1,000, 3,000 and 5,000 SCFM modules, operating on electricity, thermal energy or as a CoGen system. Paybacks can be as quick as 18 months. Funds would be used for engineering, prototype development, office and manufacturing facilities and training personnel. | Lighthouse Utility Solutions | 500 | 31 to 90 days | \$3,000,000 |
| Hamilton | Compressed Air Intake Pre-Conditioning | Final engineer and develop prototypes for ventilation use of a new style air handler that does not use traditional heating or cooling coils for energy transfer. The equipment will be able to support full recirculation to 100% outdoor air over a wide range of air volumes with no risks of frozen coils or other failure. The units will be able to help load, cool humidity and dehumidify the air as required to meet space climate requirements. Supply air temperature can range from 40F to 210F, with corresponding humidity levels of 20% to 90%. The supply air will be duct-free and built sterile without secondary sterilization treatment. Depending on the final programmed use, the equipment can be used as a cooler unit in refrigerated storage rooms and heat treating lines, or as standard HVAC air handlers for schools, office buildings or hospitals. They can support clean rooms and pharmaceutical manufacturing lines. They can also be used for HVAC in computer rooms. Funding will be for engineering, prototype development, testing, manufacturing facilities, office and manufacturing facilities, manufacturing and sales personnel training. Final engineering and prototype development of a combined heat and power system that uses mechanical energy rather than electrical generation to reduce the electrical power consumption of industrial utility and manufacturing systems. When large electrical generation systems are installed, they require a separate market point that "sinks" off about 5% of the electricity being produced. The device also costs about 30% of the cost of the generator. By using the same "prime mover" and powering it hydraulically, all of the "big" electric motors can be "replaced" with "electric drive" systems running parallel to the electric motor. Typical "CoGen" waste heat systems will operate the same, but the system will not be producing electric power. This approach has three beneficial issues: EVERY large motor (electric or otherwise) is backed up 100% with the potential for higher reliability. QUALITY will allow a system turbine to drive the line in a heat without a drive shaft and loss of manufacturing. Plant personnel can SERVICE hydraulics. Funding would be for engineering, prototypes, office and manufacturing sites, personnel training and marketing materials. | Lighthouse Utility Solutions | 1,000 | 31 to 90 days | \$1,500,000 |
| Hamilton | Standard and Critical Environment HVAC Air Handler | Final engineer and develop prototypes for ventilation use of a new style air handler that does not use traditional heating or cooling coils for energy transfer. The equipment will be able to support full recirculation to 100% outdoor air over a wide range of air volumes with no risks of frozen coils or other failure. The units will be able to help load, cool humidity and dehumidify the air as required to meet space climate requirements. Supply air temperature can range from 40F to 210F, with corresponding humidity levels of 20% to 90%. The supply air will be duct-free and built sterile without secondary sterilization treatment. Depending on the final programmed use, the equipment can be used as a cooler unit in refrigerated storage rooms and heat treating lines, or as standard HVAC air handlers for schools, office buildings or hospitals. They can support clean rooms and pharmaceutical manufacturing lines. They can also be used for HVAC in computer rooms. Funding will be for engineering, prototype development, testing, manufacturing facilities, office and manufacturing facilities, manufacturing and sales personnel training. Final engineering and prototype development of a combined heat and power system that uses mechanical energy rather than electrical generation to reduce the electrical power consumption of industrial utility and manufacturing systems. When large electrical generation systems are installed, they require a separate market point that "sinks" off about 5% of the electricity being produced. The device also costs about 30% of the cost of the generator. By using the same "prime mover" and powering it hydraulically, all of the "big" electric motors can be "replaced" with "electric drive" systems running parallel to the electric motor. Typical "CoGen" waste heat systems will operate the same, but the system will not be producing electric power. This approach has three beneficial issues: EVERY large motor (electric or otherwise) is backed up 100% with the potential for higher reliability. QUALITY will allow a system turbine to drive the line in a heat without a drive shaft and loss of manufacturing. Plant personnel can SERVICE hydraulics. Funding would be for engineering, prototypes, office and manufacturing sites, personnel training and marketing materials. | Lighthouse Utility Solutions | 2,500 | 31 to 90 days | \$5,000,000 |
| Hamilton | Hydraulic Combined Heat and Power | Final engineering and prototype development of a combined heat and power system that uses mechanical energy rather than electrical generation to reduce the electrical power consumption of industrial utility and manufacturing systems. When large electrical generation systems are installed, they require a separate market point that "sinks" off about 5% of the electricity being produced. The device also costs about 30% of the cost of the generator. By using the same "prime mover" and powering it hydraulically, all of the "big" electric motors can be "replaced" with "electric drive" systems running parallel to the electric motor. Typical "CoGen" waste heat systems will operate the same, but the system will not be producing electric power. This approach has three beneficial issues: EVERY large motor (electric or otherwise) is backed up 100% with the potential for higher reliability. QUALITY will allow a system turbine to drive the line in a heat without a drive shaft and loss of manufacturing. Plant personnel can SERVICE hydraulics. Funding would be for engineering, prototypes, office and manufacturing sites, personnel training and marketing materials. | Lighthouse Utility Solutions | 300 | 31 to 90 days | \$1,500,000 |
| Hamilton | Upgrade lighting at Loveland Elementary School | Replace fluorescent lighting fixtures in classrooms, hallways offices locker rooms and canteens including motion and infrared sensors. | Loveland City School District | 4 | 31 to 90 days | \$120,000 |
| Hamilton | Upgrade lighting at Loveland Primary School | Replace fluorescent lighting fixtures in classrooms, hallways offices locker rooms and canteens including motion and infrared sensors. | Loveland City School District | 4 | 31 to 90 days | \$120,000 |
| Hamilton | Upgrade lighting at Loveland Early Childhood Cente | Replace fluorescent lighting fixtures in classrooms, hallways offices locker rooms and canteens including motion and infrared sensors. | Loveland City School District | 4 | 31 to 90 days | \$100,000 |
| Hamilton | Upgrade lighting at Loveland Transportation Facility | Replace fluorescent lighting fixtures in high bay area, office including motion and infrared sensors. Resident Home has been given funding from Ohio Children's charity cared for out of state. We would like to build three new homes to serve 12 children but are unable to do so due to the antiquated water treatment system onsite. We could hook up with a neighboring development system but require extensive onsite development. | Loveland City School District | 4 | 31 to 90 days | \$8,000 |
| Hamilton | Resident Home Sewer Line project | Outcome: three pumps and back up generator Extensive excavation/engineering/plumbing and some electrical work would be required | Resident Home Corporation | 8 | 181 days or more | \$300,000 |
| Hamilton | Anthony Wayne Industrial Park Expansion | Lincoln Heights is one of the few self-governed African American communities in the country and is the poorest municipality in Hamilton County. This project creates 26 acres of new industrial park land, located nearby residential. This site has been developed primarily by the community and will be used to attract new businesses to Lincoln Heights, create jobs and increase the tax base. The State of Ohio has awarded a \$750,000 Industrial Site Improvement Fund Grant for the expansion of Shepherd Drive, installation of utilities and site excavation. Previous committed bond issues of credit have been completed and the Village is unable to provide any funds. Additional funding is needed for development set costs and administrative overhead to complete this project. | NuZone Community Improvement Corporation | 100 | 0 to 30 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Franks Adult Center resurface parking lot | Resurface existing parking lot | Hamilton County MRDD | 20 | 91 to 180 days | \$47,277 |
| Hamilton | Burkey Electric Car | Request for monies to further develop low cost electric car used for urban travel. | OpenEdit Inc | 4 | 31 to 90 days | \$100,000 |
| Hamilton | Westwood "Net Zero" Energy Project | As a pilot project, to build 5 new homes and add to re-hab 5 existing homes, installing geothermal energy, solar panels, energy efficient windows, and energy star appliances. In addition, in the new homes to install energy-saving basement slab and walls, and insulated walls. To sell these homes to well-qualified and informed home buyers who will agree to help educate their neighbors on the merits of "net zero." This project will help WestCURC to make informed decisions about the installation and marketing of these products throughout this neighborhood of 45,000 people. This project is the largest neighborhood in Columbus, OH and will be used as a "green" community. WestCURC will be using the proceeds of demolishing worn-out housing structures, and re-habbing foreclosed properties within the guidelines of "The Neighborhood Stabilization Program. Our goal is to give Westwood a "new life," utilizing Form-Based Codes (aka "smart codes." | The Westwood Community Urban Redevelopment Corpora | 50 | 91 to 180 days | \$200,000 |
| Hamilton | Galbraith Road Improvement Project | Multi-jurisdictional rehabilitation of a main arterial corridor. This project is approximately 2.2 miles long with a project life of 20 years which will provide a long-term impact. Includes replacement of failed pavement areas, failed stormwater structures, safety improvements by providing pedestrian signals at intersections and installation of new ADA compliant handicapped ramps. Additional fire hydrants to be provided as well. This road is a main thoroughfare linking the communities of Reading, Deer Park, Sycamore Township and Amberley Village and continues West across the entire county of Hamilton. Average daily traffic counts are 10,000 per day. | Amberley Village | 25 | 91 to 180 days | \$1,700,000 |
| Hamilton | Rost School Resurface Parking Lot | Resurface existing parking lot | Hamilton County MRDD | 20 | 91 to 180 days | \$47,277 |
| Hamilton | Lighting Upgrade Loveland High School | Upgrade fluorescent lighting fixtures in all classrooms, hallways, office, locker rooms including motion and infrared sensors. | Loveland City School District | 4 | 31 to 90 days | \$156,600 |
| Hamilton | Fairfax School resurface parking lot | Resurface existing parking lot | Hamilton County MRDD | 20 | 91 to 180 days | \$47,277 |
| Hamilton | Rost School | Replace HVAC Equipment in order to be more energy efficient. | Hamilton County MRDD | 40 | 181 days or more | \$396,000 |
| Hamilton | Lighting Upgrade Loveland Middle/Intermediate Scho | Replace fluorescent lighting fixtures in classrooms, hallways offices locker rooms and cafeteria including motion and infrared sensors. | Loveland City School District | 4 | 31 to 90 days | \$120,000 |
| Hamilton | Bathroom renovation | Renovate existing toilet rooms for school | Hamilton County MRDD | 10 | 91 to 180 days | \$59,400 |
| Hamilton | Fairfax school slabjacking | Slabjack floor repair and replace existing floor and walls. | Hamilton County MRDD | 25 | 181 days or more | \$1,259,523 |
| Hamilton | Gateway Program | Development of a network of 8 gateway (B) and crossroad(2) improvement projects. The project which enhances the community and its future development contains integral elements such as sidewalks (pavement safety), green infrastructure to assist with water runoff and a small park-like facility. This comprehensive program can be broken down into eight separate project locations. | Amberley Village | 25 | 0 to 30 days | \$492,000 |
| Hamilton | Fairfax school | Replacement of HVAC equipment in order to be more energy efficient | Hamilton County MRDD | 40 | 181 days or more | \$396,000 |
| Hamilton | Brooks/Jewett Street Reconstruction Project | Reconstruct a residential street in the City of Wyoming. Reconstruction includes full depth roadway reconstruction, storm water curb placement, and replacement of a 4 inch water line with an 8 inch water line significantly improving water flow and the City's water utility. Replace existing building automation system which controls indoor environment. Current system is a DOS based program which is inefficient and not a manageable system. Estimated annual savings is \$22,800. | City of Wyoming | 50 | 31 to 90 days | \$1,400,000 |
| Hamilton | Upgrade Building automation system Loveland High S | Major stormwater replacement project on an important channel in upstream of a flood prone area which requires replacement of a failing stormsewer which is critical for preservation of a major stream. | Loveland City School District | 5 | 181 days or more | \$200,000 |
| Hamilton | Aracoma Forest Stormwater Project | Installation of 660 linear feet of 42" stormwater pipeline. | Amberley Village | 20 | 31 to 90 days | \$400,000 |
| Hamilton | Upgrade Building automation system Loveland Middle | Replace existing building automation system which controls indoor environment. Current system is a DOS based program which is inefficient and not a manageable system. Estimated annual savings is \$20,000. | Loveland City School District | 5 | 181 days or more | \$200,000 |
| Hamilton | Fairfax school Masonry Repair | Repair existing masonry, subsoil, chalk and waterstop | Hamilton County MRDD | 15 | 91 to 180 days | \$52,800 |
| Hamilton | Upgrade Building automation system Loveland Elemen | Replace existing building automation system which controls indoor environment. Current system is inefficient and not a manageable system. Estimated annual savings is \$5,000. | Loveland City School District | 5 | 181 days or more | \$50,000 |
| Hamilton | Fairfax school bathroom renovation | Renovate existing toilet rooms | Hamilton County MRDD | 10 | 91 to 180 days | \$59,400 |
| Hamilton | Curb & Stormwater Inlet Replacement/Replacement Pr | Program to replace deteriorated curbing and storm inlet structures along roadways. Designed to restore safe travel conditions, improve stormwater control, and restore curb edge stability. This project will include approximately 7,000 linear feet of curbing and related stormwater catch basins. | Amberley Village | 15 | 0 to 30 days | \$250,000 |
| Hamilton | Upgrade Building automation system Loveland Primar | Replace existing building automation system which controls indoor environment. Current system is inefficient and not a manageable system. Estimated annual savings is \$5,000. | Loveland City School District | 5 | 181 days or more | \$50,000 |
| Hamilton | Upgrade Building automation system Loveland Early | Replace existing building automation system which controls indoor environment. Current system is inefficient and not a manageable system. Estimated annual savings is \$6,000. | Loveland City School District | 5 | 181 days or more | \$50,000 |
| Hamilton | Public Safety Building | This project proposes to build a new public safety building housing the Wyoming Fire Department and Wyoming Police Department on Springfield Pike. The building design meets LEED Platinum level standards. It would be the first Platinum LEED certified Public Safety building in the county and the second platinum certified building in Ohio. The building is self sustaining in terms of energy efficiency. The City employs 21 full time in the police department, and over 100 part-time paramedics and firefighters. The new station location will replace an obsolete existing building and relocate the station closer to the center of the City significantly enhancing response times throughout the community. The project would be out to bid within 90 days depending on final design approval. Construction of new sidewalks to provide pedestrian safety in a high pedestrian traffic area where people are traveling to and from various institutions. | City of Wyoming | 300 | 31 to 90 days | \$4,500,000 |
| Hamilton | Section Road Walkways | The alignment of the pavement offers poor visibility and/or line of sight for pedestrians. | Amberley Village | 15 | 0 to 30 days | \$250,000 |
| Hamilton | Children's Transitional Residential Program | PH: Not obtained funding to begin to serve dualy diagnosed children (SERVICEMEN). Ohio has been paying for these children to be served out of state. The COMRDD Director has identified this program as one which could save Ohio money. Outcomes: Renovate three homes and one all purpose building which includes a commercial kitchen Addition of three accessible bathrooms, outside concrete walkways, installation of two power operated doors, two compressors, thirty six replacement windows with tempered glass and new blacktop driveway. | Resident Home Corporation | 30 | 91 to 180 days | \$381,333 |
| Hamilton | Franks Adult Center Window installation | Install new windows in order to bring in natural light | Hamilton County MRDD | 5 | 91 to 180 days | \$11,880 |
| Hamilton | Franks Adult Center | Construct new outbuilding in order to store lawn equipment | Hamilton County MRDD | 5 | 91 to 180 days | \$7,920 |
| Hamilton | Village Square Redevelopment Project | Redevelop the Wyoming Village Square with additional parking, enhanced central village green, street improvements, lighting, landscaped seating and walking area. The improvements are needed on the 3 acre site in order to attract an estimated \$6-8 million in private commercial investment and jobs creation. The project will also significantly enhance the surrounding downtown business district by attracting annual hundred additional visitors/shoppers each week. The existing business district is fragile, and enhanced investment will support these businesses and well as bring in additional tax revenue to the City of Wyoming, Hamilton County, and Wyoming School District. It is anticipated the project could be bid and awarded within 60 days. | City of Wyoming | 200 | 31 to 90 days | \$3,300,000 |
| Hamilton | home projects | rentable house and driveway | self | 4 | 0 to 30 days | \$150,000 |
| Hamilton | Galbraith Road Improvement Project | Multi-jurisdictional rehabilitation of a main arterial corridor. This project is approximately 2.2 miles long with a project life of 20 years which will provide a long-term impact. Includes replacement of failed pavement areas, failed stormwater structures, safety improvements by providing pedestrian signals at intersections and installation of new ADA compliant handicapped ramps. Additional fire hydrants to be provided as well. This road is a main thoroughfare linking the communities of Reading, Deer Park, Sycamore Township, and Amberley Village and continues West across Hamilton County. | Amberley Village | 25 | 91 to 180 days | \$1,700,000 |
| Hamilton | home | chimney repair and new roof on my home built in 1881 | self | 3 | 0 to 30 days | \$10,000 |
| Hamilton | single parents | PH: who single moms who's struggling on home repair, and needing government assistance right away. Repairs to property without paying the money back and the should get right away. This is a low income based, or transitional with recent evictions, and types power/water use used by PH: who are low income women based in China. | single parents needing help with home fixtures | 5,000 | 0 to 30 days | \$5,000 |
| Hamilton | Green Vehicle Innovation | Current projects extend the capability to new levels of low emissions and high MPG. These projects rely on a phased development approach growing from today's designs of 20-30 MPG to PHEV/EV designs producing greater than 100 MPG without affecting the manufacturing or transportation infrastructures. The product phases are: - Computer Configurable Engine providing 30-50% MPG improvement - Regenerative Braking System providing 25-40% additional MPG - 100 MPG Vehicle Demonstration (requires no connection to power grid) - PHEV with Clean Diesel reaching beyond 100 MPGs Funding, in addition to our investment, will accelerate progress by adding a vehicle development and test facility in SW Ohio and a highly skilled engineering team of 10-20, growing to 40 within 18 months. | NgEK, Inc. | 4000 | 0 to 30 days | \$27,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | Hire of Public Safety – Fire/EMT Employees | Equipment to continuously and progressively manage our fleet vehicles. Also, we are one of three agencies in the county that do not provide paramedic service. This grant proposal is over a three year program period which would allow the city to hire up to 6 full-time officers, or 4 officers and 2 part-time paramedics. After the 3 years, the city would retain the positions and expect to take on the burden of the personnel costs. The hiring of full-time staff would assist the city in meeting many internal needs as well as NEPA regulations. Furthermore it will assist the city in providing an advanced level of service (paramedic level) for those in need of emergency medical assistance. In the past, the city merely transported EMS patients to a hospital less than 3 miles away. However, this hospital is scheduled to close in the next couple of years and will increase our travel to a hospital by 7 to 10 miles. Therefore, this warrants the need to seek paramedic level of service for the EMS. | City of North College Hill | 6 | 91 to 180 days | \$900,000 |
| Hamilton | City of Montgomery - Montgomery Road Resurfacing | City of Montgomery - Montgomery Road Resurfacing - Urban Paving - within the City Limits | City of Montgomery | 5 | 0 to 30 days | \$100,000 |
| Hamilton | Warsaw Avenue Streetscape | This project is Phase II in support of the new full service grocery store in the East Price Hill neighborhood. The project includes new street landscaping, street lights, trees and sidewalks. | City of Cincinnati | 37 | 91 to 180 days | \$600,000 |
| Hamilton | Montgomery Road Resurfacing - ODOT PID - 79394 | City of Montgomery - Montgomery Road Resurfacing - Urban Paving - within City Limits - ODOT PID 79394 | City of Montgomery | 5 | 0 to 30 days | \$140,000 |
| Hamilton | MetroWest Business Park Phase II | Provides for remediation and site preparation of a five acre expansion of a current 18-acre business park that is under construction in the Lower Price Hill neighborhood. | City of Cincinnati | 100 | 91 to 180 days | \$6,800,000 |
| Hamilton | Hamilton/Waycross Road to East Corp. Line | City of Forest Park, Hamilton/Waycross Road to East Corp. Line - spot curb repair, pavement repair, resurface, streetscape improvements | City of Forest Park | 15 | 0 to 30 days | \$1,357,000 |
| Hamilton | Corryville Public Parking Structure | Provides structural parking within the business district to stimulate additional redevelopment of adjacent sites. Anticipated development includes movie theater, bowling alley and family style sports oriented restaurant. • Clean, Low Ion Enabled Heat Generation, Rapid Power Generation for SMV. • Project will be useful for Distributed Energy Production in almost all counties and will additionally provide at least 3 new jobs per county, i.e. in addition to the 20 jobs in Hamilton County for manufacturing the system. • For - 6 tons steam machine (from 16 kg of solid ms). • Absorption of combustion (average caloric value 15000BTU/LB). • Power Output = 10952kW. • TOTAL recoverable power supplied from Low Ion System = 1138kW. • TOTAL recoverable power with Ultra-supercritical Boiler and Generator with efficiency up to 64% = 7.6MW. • Accounting -10% losses from radiation, prior to power recovery. TOTAL RECOVERABLE POWER is about 7MW. • Even with a heat-exchanger efficiency of only 75%, the power recovered is about 5MW i.e. with a overall efficiency of about 50%. Proposing entity has access to ultrasupercritical boiler technology from previous DOE funds. Distributed power technology also enables (1) better scrubbing for removal of sulfur, etc.) (2) Control of CO2 by chemical sequestration and quick change to more efficient power generation techniques as they become available. | City of Cincinnati | 120 | 181 days or more | \$4,500,000 |
| Hamilton | Distributed Energy Generation with Low Ion Plasma | • TOTAL recoverable power supplied from Low Ion System = 1138kW. • TOTAL recoverable power with Ultra-supercritical Boiler and Generator with efficiency up to 64% = 7.6MW. • Accounting -10% losses from radiation, prior to power recovery. TOTAL RECOVERABLE POWER is about 7MW. • Even with a heat-exchanger efficiency of only 75%, the power recovered is about 5MW i.e. with a overall efficiency of about 50%. Proposing entity has access to ultrasupercritical boiler technology from previous DOE funds. | Hamilton | Crosley Building renovation | Renovating an existing industrial building for high technology offices to complement other business revitalization activities going on in the Washington neighborhood. | City of Cincinnati | 300 | 181 days or more | \$4,266,775 |
| Hamilton | New access road for Summit Business Park | Construct a new street to access recently remediated site for business development in the Bond Hill neighborhood. | City of Cincinnati | 200 | 31 to 90 days | \$1,000,000 |
| Hamilton | Call Center Services | Call Center services for state projects. Utilizing our automated dialer which has the capacity to call a large volume of numbers as well as inbound call returns | Lead Source Call Center | 40 | 0 to 30 days | \$300,000 |
| Hamilton | City of Sharonville - Spinner Avenue | City of Sharonville - Spinner Avenue - Reinstating Wall Reprofitment | City of Sharonville | 15 | 0 to 30 days | \$90,000 |
| Hamilton | Demolition of nuisance structures | Demolition of approximately 300 nuisance buildings throughout the City. All have gone through the normal procedure to have been declared public nuisance so the public funds may be used to the highest advantage. | City of Cincinnati | 40 | 91 to 180 days | \$2,750,000 |
| Hamilton | AMP | Convert an old Blue Ash, Ohio e-check facility to an assembly plant in order to convert existing passenger vehicles with our all-electric drivetrain to produce fully electric zero emission vehicles (not hybrids). We commissioned a NEPA study of the existing facility and end received a categorical exclusion rating (no environmental impact). Our first market is the Cincinnati market and then go to other Ohio cities, then a national rollout. We have 75 pre-orders from the Cincinnati area. Employment will be at the assembly plant as well as sales and service centers throughout the state. We have a running prototype of our first production vehicle on the road... a GM Saturn Sky (Gov. Strickland has been in the car). Our converted Sky's travel 150 miles on a charge and can be charged at night from home. No further infrastructure is required for our launch. An integral part of our proprietary drivetrain is the battery packaging as well as the battery monitoring and control system. | Advanced Mechanical Products, Inc | 250 | 0 to 30 days | \$5,000,000 |
| Hamilton | City of Sharonville - Fields Erel Reprofilling | Nationwide Insurance has agreed to insure the converted SKY as a regular Sky. Again, making us ready for market. City of Sharonville - Fields Erel Reprofilling - Tom Rowland Hwy to 800' west of Copperfield Drive with turn lane addition and sight distance improvements | City of Sharonville | 20 | 0 to 30 days | \$875,000 |
| Hamilton | Hilltop and Circlewood Reconstruction | Reconstruction of the Roadway and waterline replacement. This includes a full depth reconstruction, with new curbs. The existing 6 inch water line will be replaced with an 8 inch water line improving fire flow capacity. | City of Wyoming | 87 | 31 to 90 days | \$3,500,000 |
| Hamilton | Ritchie Avenue Reconstruction | Full depth reconstruction with replacement of the existing curbs, and storm sewer systems. The existing 4 inch water main will be replaced with a 6 inch water main improving fire flow capacity. | City of Wyoming | 65 | 31 to 90 days | \$2,700,000 |
| Hamilton | Dist 8, PID 85591, SORTA 57 Energy Efficient Buses | SORTA 57 Energy Efficient Buses | Ohio Department of Transportation | 625 | 31 to 90 days | \$37,500,000 |
| Hamilton | Springfield Pike Traffic Signalization Upgrade | Replace the existing signalization system on State Highway Route 4 (Springfield Pike in Wyoming). Four of the intersections have currently been identified as hot spots by the ODOT. Signals will be coordinated improving traffic flow and reducing wasted idling time, thereby reducing energy consumption and carbon emissions. Energy efficient LED signals would be installed thereby reducing ongoing energy operating costs. | City of Wyoming | 55 | 31 to 90 days | \$2,000,000 |
| Hamilton | Dist 8, PID 85593, SORTA 12 30 ft low-floor buses | SORTA 12 30 ft low-floor buses. | Ohio Department of Transportation | 68 | 31 to 90 days | \$4,092,000 |

| Hamilton | Police Officers | Hiring of two police officers for the City of Wyoming. The estimated project costs are for funding the two positions for two years. | City of Wyoming | 2 | 0 to 30 days | \$165,000 |
| Hamilton | Kemper Lane Sewer Repair | This project consists of the installation of approximately 485 ft of new 36" gravity sewer and appurtenances to replace a badly deteriorated existing circular and box stone sewer of varying sizes. The work will consist of approximately 101 ft. of open-cut sewer replacement, 364 ft. of sewer relining and the replacement of six manholes. The project will call in addressing the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Corbett Decree and improving local water quality while striving to maintain adequate rates for our customers. In addition, this project will provide opportunities for sustainable redevelopment to our neighborhoods and supporting job growth. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3.6 jobs elsewhere and every dollar invested in water use | Metropolitan Sewer District of Greater Cincinnati | 7 | 31 to 90 days | \$1,113,302 |
| Hamilton | Mosteller Road | City of Sharonville - Mosteller Road - Total curb replacement, base repair and resurfacing, 6200 linear feet, Sharon Road to Kemper Road | City of Sharonville | 20 | 0 to 30 days | \$1,159,000 |
| Hamilton | Asset Development Coordinator | Consistent with information provided by the Search Institute is asset development as a primary tool for the prevention of youth drug and alcohol abuse. The asset development coordinator's activities will focus on developing relationships, building relationships between youth and the community, and demonstrating to our youth that the community is invested in their development and well being. Additionally, this program will expand our current prevention based activities by providing supportive opportunities with sound role models - particularly during high risk, childhood and weekend hours. This program will be a partnership between the Wyoming Police Department and the Wyoming Youth Services Bureau (WYSB). | City of Wyoming | 1 | 0 to 30 days | \$75,000 |

| Hamilton | tax refund | I think there should be a tax for people that aren't behind in house payments equal to the help that are getting why they should not get a phase of the pie. I am on unemployment at the time and could use a little help, but will be going back to work in march (construction) and my bills wont be as hard to meet. four years ago I had a house fire that I am still trying to recover from, my wife had to retire from c.o.p.d. which cut our income in half, and unemployment is about half what I make, so you can see the problem we are having, the bills dont get cut in half and the credit cards are raising interest and adding time, or causing credit altogether. There should be a limit on credit cards interest. 15% should be high limit. I am getting hit with 31%, which is uncalled for. I have never been late on any payments thank you for reading this... | fair housing | 0 | 31 to 90 days | \$1,000,000 |
| Hamilton | Lockland Recreation Center | Lockland is a community that, only recently coming out of State of Ohio's "Fiscal Valley". Recreational facilities have been neglected for decades. The County Health District has concluded that a combination of poverty and inactivity has led to significant health problems for Lockland area residents. 59% of Lockland's elementary school students qualified for free and reduced school lunch during the 2007-2008 school year. The incidence of obesity is higher among the population along with the incidence of diabetes and cardiovascular disease. Ohio Hospital Discharge data show a hospital utilization rate of 23 per 1000 for diabetes versus 3.76 per 1000 in the Lockland area and a utilization rate of 26.73 per 1000 for cardiovascular disease compared to 185 per 1000 for the state of Ohio. The Health District concluded that the Lockland area "suffers disproportionately from the burden of disease, particularly when compared to state and national data. The construction of a recreation center will be a means to physical activity in a community whose physical health depends on this assistance. | Village of Lockland | 20 | 181 days or more | \$4,500,000 |

| Hamilton | Village of Williamsburg - Fifth St. Improvements | Village of Williamsburg - Fifth St. Improvements - Wilson Street to Main Street - Remove/replace existing pavement, widen, upgrade storm drainage, sidewalks, replace watermain, line and repair sanitary sewer. | Village of Williamsburg | 20 | 0 to 30 days | \$861,000 |
| Hamilton | Village of Woodlawn - Chester Road Improvements | Village of Woodlawn - Chester Road Improvements - Glendale/Milford Road to South Corp. Line - Repair/replace deteriorated pavement section, upgrade drainage, and upgrade traffic control. | Village of Woodlawn | 20 | 0 to 30 days | \$250,000 |
| Hamilton | Village of Woodlawn - Rustic Lane | Village of Woodlawn - Rustic Lane - Restructuring Road to Village Standards and relocating utilities. North Terminus to Mayview Forest Drive. | Village of Woodlawn | 20 | 0 to 30 days | \$500,000 |
| Hamilton | North Bend Road Intersections Improvement Project | The reconstruction of the intersections of North Bend Road at Broomer Road and Morfort Heights Drive. Project to include the construction of additional level lanes (approximately 600') on bothbound and southbound traffic on North Bend Road and additional turn lanes on Broomer Road and Morfort Heights Drive. This project will also require the relocation of utilities such as water main and utility poles. | Green Township | 45 | 91 to 180 days | \$642,000 |
| Hamilton | HAM-27-6.29 (US 27 Safety Improvements Phase 1) | This intersection is located just south of the I-74/North Bend Road interchange. Traffic congestion in this area is severe during morning and afternoon rush hour. The improvements planned here will work to greatly reduce this congestion. | City of Cincinnati | 100 | 0 to 30 days | \$880,000 |
| Hamilton | HAM-27-6.99 (US 27 Safety Improvements Phase 2) | The purpose of the project is to address safety concerns, improve inadequate pavement width and add traffic capacity on US 27 (Coleman Avenue) between Virginia Avenue and I-74 East Ramps and at the intersection of US 27 (Coleman Avenue) and Virginia Avenue/West Fork Road in the community of Northside. The existing combination of narrow lanes and high volumes have led to a significant number of side swipe accidents. This project will improve safety and convenience along an important transportation corridor. | City of Cincinnati | 100 | 181 days or more | \$900,000 |
| Hamilton | Rybolt & Taylor Roads Intersection Improvements Pr | The purpose of the project is to improve the existing road infrastructure by improving horizontal geometry, widen to standard width lanes and street lighting, and remove on-street parking on Coleman Avenue (US 27) between Virginia/West Fork and Leeper in the community of Northside. This project will improve safety and convenience along an important transportation corridor. | Green Township | 30 | 91 to 180 days | \$450,000 |
| Hamilton | City of Monroe - Yankee Road Extension | The present alignment of this intersection presents sight distance problems for motorists on Rybolt Road who wish to make their way onto Taylor Road. This is an ungrabbled intersection. Turn lanes do not presently exist on either Rybolt or Taylor Roads causing much congestion during morning and afternoon rush hour. | City of Monroe | 150 | 181 days or more | \$2,400,000 |
| Hamilton | Village of Amelia - Jenny Lind-Oak Street/Locust L | This intersection is to be realigned to improve sight distance, thus improving safety. Construction of turn lanes on both roads will allow for a more efficient traffic flow. | Village of Amelia | 10 | 181 days or more | \$200,000 |
| Hamilton | City of Forest Park - Street Resurfacing Program | City of Forest Park - Street Resurfacing Program | City of Forest Park | 25 | 0 to 30 days | \$500,000 |
| Hamilton | City of Forest Park - Winton Gilmore Corridor Impr | City of Forest Park - Winton/Gilmore Corridor Improvements @ I-275 | City of Forest Park | 100 | 181 days or more | \$2,500,000 |
| Hamilton | Municipal Building Energy Efficiency Updating | Reetrofitting of 36-year old municipal building to provide for better energy efficiency to reduce utility costs and use of natural gas. Updates would include new insulated windows, insulation of walls & ceilings, new HVAC & gas-thermal heat systems, solar panels, LED lighting, and new energy efficient lighting. Building HVAC systems, fire administration and building departments. Money saved on energy bills could help to offset need for tax cuts of Village employees. Would also like to keep some local trades people working while energy efficiency work is done. Construction work availability increases. Would serve as a "green" example to residents & homeowners to upgrade their own homes. Most of which are 50+ years old and in need of similar retrofits. Project cannot be undertaken without Stimulus Funds. This is one of our National Landmark community, voted one of the Great Places in America and one of the of the Best Homeowners in Ohio and one of the Best of a National Exemplar in Green Building would take credit communities to the GREEN. | Village of Mariemont | 40 | 31 to 90 days | \$750,000 |
| Hamilton | Village of Glendale - South Greenville Waterline a | Village of Glendale - South Greenville Waterline and Resurfacing - Replacing 3200' of 4" with 8" watermain and repairing road (\$161,000). | Village of Glendale | 20 | 0 to 30 days | \$481,000 |
| Hamilton | Village of Glendale - Fountain Avenue waterline | Village of Glendale - Fountain Avenue Waterline - replace 3600 linear feet of undersized 4" waterline with 8" to meet current standards. | Village of Glendale | 20 | 0 to 30 days | \$396,000 |
| Hamilton | Village of Glendale - Sidewalk Connections | Village of Glendale - Sidewalk Construction - Village side 21 segments totaling 99,000 linear feet of sidewalks. | Village of Glendale | 50 | 0 to 30 days | \$3,900,000 |
| Hamilton | water tank rehabilitation | Installation of existing 0.5 million gallon area and a 1.5 million gallon above ground storage tanks. Project is part of the City's water systems operation and maintenance plan. | City of Norwood | 30 | 91 to 180 days | \$1,000,000 |
| Hamilton | Sherman Avenue Improvements | Street rehabilitation project including new curb and storm sewer upgrades. Also the replacement of an antiquated traffic signal allowing for safer pedestrian and vehicular movements to the adjacent school. | City of Norwood | 20 | 31 to 90 days | \$1,100,000 |
| Hamilton | City Hall Renovation | Replace existing windows in City Hall with new energy efficient windows as part of on-going upgrades. | City of Norwood | 15 | 91 to 180 days | \$300,000 |
| Hamilton | Public Works Pole Barn | New building for storage of public works equipment and material. Will reduce maintenance costs and increase the useful life of the equipment. Includes automated traffic control system with new energy efficient LED signalization, interconnected to enhance traffic flow. Construct 20 bus bays alleviating the pavement rutting and shoving which is both a safety concern and maintenance issue. | City of Norwood | 25 | 91 to 180 days | \$500,000 |
| Hamilton | Montgomery Road Improvements | Per day and saved an direct link between the west side of Cincinnati and the Central Business District, and between core manufacturing areas in the Overington neighborhood and intermodal freight, rail, truck freight facilities. | City of Norwood | 30 | 91 to 180 days | \$2,200,000 |
| Hamilton | Waldvogel Viaduct Replacement Project | The existing condition rating for the Waldvogel Viaduct is "Poor" (condition rating of 4) and it has been load restricted to 40% of the legal load limit since 1993. The viaduct has one of the lowest bridge condition ratings in the region and it is likely that the viaduct will require further load restrictions or closure unless replaced soon. This project will remove the severely deteriorated, functionally obsolete viaduct and replace it with a widened US 50 and four ramp structures to Elberon Avenue and Warsaw Avenue. Geometry, safety ratings, and lane widths will be improved on the new structures, and US 50 (River Road) will be improved by widening lanes, installation of turn lanes, and improved geometry. | City of Cincinnati | 1500 | 181 days or more | \$15,500,000 |
| Hamilton | Waldvogel Viaduct - Rail Relocation Project | In addition, the project will expand regional economic development opportunities by improving access to brownfield sites (over 100 acres in total) 150 feet southwest to accommodate the Waldvogel Viaduct replacement project. | City of Cincinnati | 100 | 91 to 180 days | \$1,500,000 |
| Hamilton | TSP Traffic Signal Preemption System | Since 1961 the Waldvogel Memorial Viaduct and US 50, running directly underneath the viaduct, have provided service to over 50,000 vehicles per day and served as direct links between the west side of Cincinnati and the Central Business District, and between core manufacturing areas in the Overington neighborhood and intermodal freight, rail, truck freight facilities. | Village of Evendale | 6 | 0 to 30 days | \$293,950 |
| Hamilton | GENSET Locomotive Upgrades | The existing condition rating for the Waldvogel Viaduct is "Poor" (condition rating of 4) and it has been load restricted to 40% of the legal load limit since 1993. The viaduct has one of the lowest bridge condition ratings in the region and it is likely that the viaduct will require further load restrictions or closure unless replaced soon. This project will remove the severely deteriorated, functionally obsolete viaduct and replace it with a widened US 50 and four ramp structures to Elberon Avenue and Warsaw Avenue. Geometry, safety ratings, and lane widths will be improved on the new structures, and US 50 (River Road) will be improved by widening lanes, installation of turn lanes, and improved geometry. | CSX Transportation | 52 | 0 to 30 days | \$20,000,000 |
| Hamilton | Church Street Waterline | Installation of a traffic signal preemption (TSP) system for the Evendale Fire and Police Department and corresponding safety services. Project will enhance the safety and effectiveness of current emergency response procedures for Evendale and the surrounding communities that provide mutual aid and utilize our roadway during emergency response. Incent of project is to equip Evendale Fire and Police apparatus with GPS units that will communicate with our traffic signals when activated during emergency responses. Neighboring jurisdictions would also have the GPS units provided for their apparatus. Project includes a total of 43 GPS preemption vehicle kits of which 25 are for Evendale Police and Fire and 18 for neighboring jurisdictions. | Village of Addyston | 10 | 0 to 30 days | \$134,000 |
| Hamilton | Aquisition and Demolition of Stearns & Foster Prop | Everedale has two main thoroughfares which connect Everedale with 6 neighboring communities whom all provide mutual aid to one another. With the installation of the signal equipment and vehicle kits the benefits to all communities would be improved response times and safety to other motorists and the department responding. | Village of Lockland | 400 | 31 to 90 days | \$5,000,000 |
| Hamilton | Sullivan Avenue | This funding request will allow CSX Transportation to upgrade 13 locomotives to GENSET technology in three non-attainment areas (Cincinnati, Columbus and Cleveland). GENSET locomotives improve air quality around rail yards by reducing remote oxide and particulate matter emissions by 80%. Furthermore, GENSET locomotives can reduce carbon dioxide emissions by approximately 50%. This is achieved by monitoring engine idling and switching to a "sleep" mode after a period of inactivity. | City of St. Bernard | 20 | 91 to 180 days | \$1,800,000 |
| Hamilton | Chalet-Heger | Village of Addyston - Church Street Waterline - 1400 linear feet - replace the existing 4" with 8" new valves and hydrants, to improve pressure and flow at the end for the street fire safety response. | City of St. Bernard | 10 | 31 to 90 days | \$350,000 |
| Hamilton | Columbia Avenue Widening | The Stearns and Foster property was used for industrial purposes for 150 years. More recently it went into bankruptcy and has been abandoned. In addition to being functionally obsolete, its wooden floors have rotted, the upper level windows are broken, and it is an ever-present danger to and blight on the community. | City of Reading | 20 | 31 to 90 days | \$550,000 |
| Hamilton | Ross Avenue | It is located adjacent to I-75. A portion of the land it is on will be necessary for the widening of I-75 in the near future. Once the buildings are demolished and the site is ready for development it will become a highly valuable development site. As it stands, the site is not economically viable for development. | City of St. Bernard | 20 | 31 to 90 days | \$450,000 |
| Hamilton | Canal Bed Storm & Sanitary Sewer Relocation | It is proposed that the site be purchased by the Village and the buildings be demolished. The property required by the State for the widening of I-75 would be transferred to the State without charge. The remaining approximately 14 acres would be made available for development with an estimated creation of 300-400 jobs. | City of St. Bernard | 20 | 91 to 180 days | \$170,000 |
| Hamilton | Village of Addyston - Boat Ramp | Reconstruction of a well-traveled street in the City of St. Bernard. The condition of Sullivan Avenue is greatly deteriorating. Length of the roadway is approximately 2000 LF, and the project will consist of a complete reconstruction of the roadway, with storm sewer improvements. This project is a priority in the City of St. Bernard's Storm Sewer Master Plan. It is imperative for this suburb like the City of St. Bernard to maintain their streets as best as possible, as it reflects community pride, and will greatly assist in the attraction and retention of residents and businesses. If the City appears through this is a "sleep" mode after a period of inactivity. | Village of Addyston | 10 | 181 days or more | \$2,000,000 |
| Hamilton | Lock St. Bridge | Resurfacing and full depth repairs of a residential street in the City of St. Bernard. The condition of this street is greatly deteriorating and must be repaired. A repaired street will greatly benefit many residents in this area. | JMA Consultants | 15 | 91 to 180 days | \$885,000 |
| Hamilton | Electric Vehicle with Configurable Power Supply | Resurfacing of a major thoroughfare through the City of St. Bernard, connecting to the City of Cincinnati. Length of the roadway is approximately 4000 LF, and the project will consist of milling the existing pavement and overlaying with asphalt, to provide a safer and smoother driving surface. Improvements to the roadway will promote a clear, safe, positive community, which will help to attract and retain residents and businesses in the City. | NgEK, Inc. | 4000 | 0 to 30 days | \$15,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | High Service Pump Station Generator | Project involves furnishing and installing a 200 kW generator at Wyoming's Van Roberts High Service Water pumping station. In addition, two transfer switches and associated controls, wire and appurtenances are included. The purpose of the project is to provide back-up power in the event of an emergency power outage. With emergency power to its neighboring Lockland and City of Cincinnati, the generator could help Wyoming be a regional water supplier in an emergency and help address homeland security issues. | City of Wyoming | 10 | 91 to 180 days | \$80,000 |
| Hamilton | City of Sharonville - Chester Road/ Sharonville Nor | City of Sharonville - Chester Rd/ Sharonville Northern Lights - Roadway widening and turn lanes, lighting streetscape, utility upgrades. | City of Sharonville | 1000 | 31 to 90 days | \$9,000,000 |
| Hamilton | City of Sharonville - Downtown Streetscape | City of Sharonville - Downtown Streetscape | City of Sharonville | 30 | 181 days or more | \$2,400,000 |
| Hamilton | City of Sharonville - Reading Road Widening | City of Sharonville - Reading Road Widening | City of Sharonville | 30 | 181 days or more | \$3,000,000 |
| Hamilton | City of Sharonville - Various Storm Sewer Improvment | City of Sharonville - Various Storm sewer Improvements (Kemper, Cornell and Felts Erst) | City of Sharonville | 35 | 0 to 30 days | \$3,400,000 |
| Hamilton | City of Sharonville - Convention Center Expansion | City of Sharonville - Convention Center Expansion and Pedestrian Bridge - existing building 45,000 SF - Proposed addition 65,000 SF. | City of Sharonville | 480 | 181 days or more | \$36,000,000 |
| Hamilton | Performance Contracts for City Government | Energy efficiency upgrades to 38 City buildings implementing the findings of energy audits performed as part of the City of Cincinnati's Energy Services Performance Contracts. The audits revealed \$11,000,000 worth of recommended energy improvements, of which \$5 million can be defrayed from the energy savings, and the remainder will need some subsidy to be cost feasible. | City of Cincinnati | 100 | 0 to 30 days | \$6,000,000 |
| Hamilton | City of Sharonville - Convention Center Parking Ga | City of Sharonville - Convention Center Parking Garage - Four level with 560 parking spaces | City of Sharonville | 100 | 181 days or more | \$12,000,000 |
| Hamilton | Computer Technology - Electronic Records | This project involves implementation of computing infrastructure, hardware, software, consulting and training for an electronic records system for Hamilton County Board of MRCO. Currently, most of our records are kept in hard copy format. Data on one individual case may be stored by Department in different areas. This makes the management of historical records very difficult. We would like to move to an electronic method of storing and managing historical data. | Hamilton County Board of MR/DD | 5 | 91 to 180 days | \$75,000 |
| Hamilton | City of Sharonville - Community Center HVAC | City of Sharonville - Community Center HVAC replacement | City of Sharonville | 5 | 0 to 30 days | \$200,000 |
| Hamilton | City of Springdale - SR 4 Streetscape - Phase 3 | City of Springdale - SR Streetscape, Phase III | City of Springdale | 10 | 0 to 30 days | \$160,000 |
| Hamilton | City of Springdale - I-275 and SR 747 | City of Springdale - I-275 and SR 747 Interchange Gateway | City of Springdale | 15 | 181 days or more | \$800,000 |
| Hamilton | City of Springdale - SR 747 Streetscape | City of Springdale - SR 747 - Streetscape - I-275 to Kemper Road | City of Springdale | 25 | 181 days or more | \$1,500,000 |
| Hamilton | Water Department Building and Retaining Wall | Construction of a building to shelter Water Department trucks and other equipment. | Village of Lockland | 2 | 31 to 90 days | \$175,000 |
| Hamilton | Antimicrobial Nanocoating | Approximately 2 million healthcare associated infections (HAI) occur in the US each year, claiming 100,000 lives and costing billions of dollars according to the CDC. Several available antimicrobial coatings for invasive medical devices target the most common causes of infection: bacteria, fungi, and viruses. However, most of our records are kept in hard copy format. Data on one individual case may be stored by Department in different areas. This makes the management of historical records very difficult. We would like to move to an electronic method of storing and managing historical data. | Brighton Technologies Group, Inc. (BTG) | 4 | 31 to 90 days | \$900,000 |
| Hamilton | City of Springdale - Chamberline Park Gabion Wall | City of Springdale - Chamberline Park Gabion Wall Repair | City of Springdale | 25 | 0 to 30 days | \$200,000 |
| Hamilton | City of Springdale - SR 4 Glensprings Culvert Exte | City of Springdale - SR 4 Glensprings Culvert Extension | City of Springdale | 15 | 0 to 30 days | \$450,000 |
| Hamilton | Street Maintenance Equipment | Backhoe for maintenance of water system and streets. | Village of Lockland | 2 | 0 to 30 days | \$30,000 |
| Hamilton | City of Springdale - Tri-County Retail District Pe | City of Springdale - Tri-County Retail District Pedestrian Facilities | City of Springdale | 15 | 0 to 30 days | \$500,000 |
| Hamilton | City of Springdale - Kemper Road at SR 4 Improvement | City of Springdale - Kemper Road at SR 4 Improvements | City of Springdale | 15 | 0 to 30 days | \$600,000 |
| Hamilton | Computer Mapping of Water System | Mapping the location of all water lines and placement of the locations on a regional computer system will greatly improve the communication and coordination among the various offices serving Lockland. | Village of Lockland | 2 | 31 to 90 days | \$40,000 |
| Hamilton | Improvements to the Water Plant Operation | The water plant is in need of a rebuilt aerator, metering devices, and a pipe cutting device. | Village of Lockland | 1 | 0 to 30 days | \$105,000 |
| Hamilton | Advanced Materials Technology for Fuel Economy | With USAF support BTG invented quality assurance technology (Surface Energy Probe or SEP) originally designed to enable development of lighter, stronger aircraft with improved performance, fuel economy and range. It quickly became clear that the SEP offers a far broader range of applications and benefits than originally intended. Immediate benefits offered by the SEP include: 1) dramatically improved processing economics, performance, and reliability of bonded, coated, and/or surface treated structures; 2) expanding the reliability of adhesive bonding and light, strong high-strength materials for aerospace, automotive, and many other industries in order to reduce energy consumption and improve performance; 3) providing statistically verifiable control data regarding surface preparation quality to allow identification and analysis of quality drifts leading to failures; 4) optimizing curing treatments for packaging times to reduce energy consumption, reduce ozone emissions. Funding will be used to hire engineering, sales, and marketing personnel, and to expand existing facility into adjacent manufacturing space. | Brighton Technologies Group, Inc. | 10 | 31 to 90 days | \$800,000 |
| Hamilton | City of Springdale - Northland Blvd | City of Springdale - Northland Blvd - Rehabilitation | City of Springdale | 15 | 0 to 30 days | \$760,000 |
| Hamilton | City of Springdale - SR 4 South Bound Lane Additio | City of Springdale - SR 4 South Bound Lane Addition - North of I-275 | City of Springdale | 10 | 0 to 30 days | \$440,000 |
| Hamilton | City of Springdale - Century Circle - North Paveme | City of Springdale - Century Circle - North Pavement Replacement | City of Springdale | 10 | 0 to 30 days | \$240,000 |
| Hamilton | City of Springdale - SR 747 at I-275 Interchange | City of Springdale - SR 747 at I-275 Interchange | City of Springdale | 10 | 181 days or more | \$600,000 |
| Hamilton | City of Springdale - SR 4 South Improvement | City of Springdale - SR 4 South Improvement by Maple Knoll Village | City of Springdale | 25 | 0 to 30 days | \$1,500,000 |
| Hamilton | Public Safety Complex | Construct a new, modern, energy efficient public safety complex for the Village of Lockland Fire Department Life Squad and Police Department under one roof. Funding for this project will provide a great stimulus into the local economy; it will provide local companies and prospective companies and developers considering various location within our community an incentive to invest. It will allow our public safety departments the opportunity to meet ever-changing mandates and standards from a facility designed for modern day (Police and Fire) stations; in addition the design of the complex will afford a Training Classroom that also can be used for public meetings as well as an emergency shelter in time of disaster. | Village of Lockland | 20 | 181 days or more | \$2,500,000 |
| Hamilton | City of Springdale - SR 747 Connector to Beltway C | City of Springdale - SR 747 Connector to Beltway Center at Drive and Butlers | City of Springdale | 100 | 181 days or more | \$5,500,000 |
| Hamilton | St. Bernard Sidewalks: from Industries to Business | The project will consist of new sidewalks on Viva Street from Spring Grove Avenue to the Business District (where sidewalks currently exist). The length of the project is approximately 2800 LF, on both sides of the street. These sidewalks would connect the City's industrial and office area, which includes major employers such as Procter and Gamble, to its neighborhood business district. Currently the City's CIC owns property in the industrial area and is working to develop it. Enhancements of this area with sidewalks will help to promote the property, and boost both the City's business district and industrial areas. | City of St. Bernard | 15 | 31 to 90 days | \$550,000 |
| Hamilton | Galbraith Road | Widening is necessary to accommodate ingress to the Interstate from Galbraith Road. This area is very heavily traveled and accidents are common. It must be widened and repaved. The pavement is exhibiting a rough surface with alligator cracks and potholes, and the curbs are in poor condition and must be replaced. This is also a crucial area for City to potentially enhance its economic development efforts. | City of Reading | 30 | 91 to 180 days | \$1,000,000 |
| Hamilton | Railroad Grade Separation | Grade separation to improve safety and movement of vehicular traffic and enhance the City's efforts for Economic Development in this area. | City of Reading | 20 | 91 to 180 days | \$275,000 |
| Hamilton | Trillium Court Reconstruction | Reconstruction and Stormwater Improvements for deteriorated roadway. Length of project is approximately 1000 LF. | City of Reading | 20 | 91 to 180 days | \$385,000 |
| Hamilton | EOC support area | Purchase 10-15 acres of new land adjacent to Cincinnati-Hamilton County Regional Operations Center (ROC). This construction project will build public development areas for public safety regional support areas including ODF, OEMA (EMAC resources), OODT, OMD, OCS, and ODH as well as DHS FEMA/Coast Guard, NIMS, CDC (SHE), NORTHCOM, and FBI. In the event of a local statewide emergency, the ROC is a primary multi-agency coordination and command/control center (city/county/ state and federal) resources. Construction of concrete and concrete support staging areas will require proper foundation work, drainage, electrical support installation, fencing, area markings, lighting, and security enhancements in addition to the new building to support the ROC. The ROC facility coordinates/supports the 8 counties in Ohio-Hamilton Security Region 6 during all hazards incidents including the 2007 ice storms, 2008 and 2009 wildfires. Acquiring land and building these support structures allow for maximum resources to deploy to/from southeast Ohio during emergencies. The ROC is coordinating with OEMA EOC via the DHS Regional Technology Integration Initiative program initiated by Sen. Voinovich in 2004. | Cincinnati Fire Department | 25 | 31 to 90 days | \$2,750,000 |
| Hamilton | S.R. 264 (State Street) | Rehabilitation, widening (constructing a new turn lane), and storm sewer improvements on this crucial thoroughfare in the Village of Cleves. The first phase of this project is completed, and the next phase will complete the entire project. The roadway is continually deteriorating and must be repaired as quickly as possible. This is the major thoroughfare into the Village of Cleves from the east, and is the most traveled by residents in this area to the business district and to U.S. Route 50. This phase of the project is already designed, and is ready to be advertised for bid when funds become available. | Village of Cleves | 20 | 0 to 30 days | \$700,000 |
| Hamilton | Locust Street | Reconstruction of this severely deteriorated roadway. Length of project is approximately 800 LF. | Village of Cleves | 20 | 31 to 90 days | \$250,000 |
| Hamilton | Timea Avenue | Reconstruction of this severely deteriorated roadway. Length of project is approximately 1000 LF. | Village of Cleves | 20 | 91 to 180 days | \$480,000 |
| Hamilton | Blondeau | Reconstruction of this severely deteriorated roadway. Length of project is approximately 700 LF. | Village of Cleves | 20 | 91 to 180 days | \$550,000 |
| Hamilton | Jefferson Avenue | Influence Avenue is an important roadway leading to the City's business district. The entire roadway, approximately 2400 LF, must be rehabilitated as it is becoming deteriorated. | City of Reading | 20 | 31 to 90 days | \$850,000 |
| Hamilton | Central Riverfront Sreet Grid and Intermodal Center | The Phase I Banks Riverfront development within the City of Cincinnati provides for a intermodal transit center and street grid that will serve as the base for over \$600M in private investment and 2M sq ft of development. The requested funding will allow for the site preparation to complete the intermodal transit center. Due to budget constraints caused by the worsening economy, there are no local funds available to complete phase II. The transit center will support future rail as well as bus and car transportation modes in the central business district of the City of Cincinnati. The development and design work is substantially complete and the project ready to go. Separate requests for the transit center Phase IA (\$43M) and Phase IB (\$12M) have also been requested through the state website. | Hamilton County Government | 73 | 31 to 90 days | \$5,000,000 |
| Hamilton | Lytle Park | The reconstruction of Lytle Park will provide more green-space and garden area for the urban downtown community, improved and renovated walkways, new infrastructure including irrigation system lighting, more seating and landscaping and better pedestrian connections to the surrounding area. It also includes a shelter and gathering area, renovated comfort station, a natural play area, and several water features. | Cincinnati Park Board | 19 | 91 to 180 days | \$4,500,000 |
| Hamilton | Central Riverfront Intermodal Center Garage Phase | All features of this project will utilize green initiatives of solar, water reclaiming, and water recycling. | Hamilton County Government | 275 | 31 to 90 days | \$10,500,000 |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Grandin Phase 2 | Grandin Phase 2 5400 I. of 12" DIP & 2000 I. of 48" Concrete Maintenance The water mains associated with this project are being replaced based on the high maintenance activity on the mains. The replacement of these mains will reduce GCWW repair costs, improve system reliability for our customers, and improve domestic capacity and fire flows in our system. Green Initiative Water mains installations qualify as "green initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 16.65 | 31 to 90 days | \$2,250,000 |
| Hamilton | Emlinger/Lynnview/Janua | Emlinger/Lynnview/Janua 6000 I. of 8" DIP Maintenance The water mains associated with this project are being replaced based on the high maintenance activity on the mains. The replacement of these mains will reduce GCWW repair costs, improve system reliability for our customers, and improve domestic capacity and fire flows in our system. Green Initiative Water mains installations qualify as "green initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 4.67 | 181 days or more | \$631,000 |
| Hamilton | Hamilton Avenue – Houston to Crest | Hamilton Avenue – Houston to Crest 2000 I. of 12" DIP Water Main Replacement GCWW strives to coordinate work with other jurisdictions to optimize work in areas to keep customer disruptions to a minimum. We cooperate with the project firming to upgrade our water mains based on the age and size of pipe. Some of the water mains are experiencing maintenance problems, but many times the extent of the improvement creates occupancy conflicts/interference requiring utility relocation. GCWW tries to be proactive with street improvements to minimize the inconvenience to our customers while maximizing funds through joint projects. Green Initiative Water mains installations qualify as "green initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 4.44 | 31 to 90 days | \$600,000 |
| Hamilton | Griest/Niles/Corbett | Griest/Niles/Corbett 6000 I. of 8" DIP Maintenance The water mains associated with this project are being replaced based on the high maintenance activity on the mains. The replacement of these mains will reduce GCWW repair costs, improve system reliability for our customers, and improve domestic capacity and fire flows in our system. Green Initiative Water mains installations qualify as "green initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 7.8 | 181 days or more | \$1,060,000 |
| Hamilton | Cincinnati Conservation Corps | The Cincinnati Conservation Corps (CCC), a green conservation corps in Cincinnati modeled on a similar agency in Chicago (the Chicago Conservation Corps) would benefit the public interest in reducing GHG emissions, channeling that energy into civic participation into GHG and other conservation activities in the City of Cincinnati. Economically the Cincinnati Conservation Corps would provide individuals with firsthand experience working on GHG projects that they would be unlikely to receive on their own. The collective benefits of a green conservation volunteer corps include both reduction of GHG and further stimulation of economic growth, making some GHG projects less expensive and therefore collectively more likely to be cost effective. | City of Cincinnati | 1 | 91 to 180 days | \$100,000 |
| Hamilton | Blue Ash Golf Clubhouse & Banquet Facility | Construction of a 22,000 square foot Golf Clubhouse and Banquet Center at the Blue Ash Golf Course. This facility would replace an existing facility built in 1975. | City of Blue Ash | 100 | 181 days or more | \$7,000,000 |
| Hamilton | Chlorine scrubber, safety equipment, upgrade of mo | Installation and upgrade of infrastructure and equipment at the Richard Miller Water Treatment Plant, including new chlorine scrubbers, motor control center upgrades, elevator control upgrades, battery chargers, DC panels, carbon transfer pumps, and electric power generating water wheel upgrades. | Greater Cincinnati Water Works | 8 | 31 to 90 days | \$1,023,000 |
| Hamilton | Reading Road - McMillan to Forest | Reading Road - McMillan to Forest 8,200 I. of 12" DIP Water Main Replacement GCWW strives to coordinate work with other jurisdictions to optimize work in areas to keep customer disruptions to a minimum. We cooperate with the project firming to upgrade our water mains based on the age and size of pipe. Some of the water mains are experiencing maintenance problems, but many times the extent of the improvement creates occupancy conflicts/interference requiring utility relocation. GCWW tries to be proactive with street improvements to minimize the inconvenience to our customers while maximizing funds through joint projects. Green Initiative Water mains installations qualify as "green initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 10 | 31 to 90 days | \$1,353,000 |
| Hamilton | Blue Ash Performing Arts & Business Conference Cen | Construction of a new 75,000 square foot Performing Arts and Business Conference Center on City owned property located at the site of the Blue Ash Airport operations. The Performance venue would consist of a 1200-1400 seat performance hall with a full size stage able to accommodate a variety of performances by the arts including but not limited to, concerts, ballet, opera, Broadway and off-Broadway performances, speaker series events, childrens shows and other traveling acts. The Business Conference portion of the facility would be a high-tech corporate training center with a capacity of over 1200 attendees. The facility would feature such items as video conferencing, smart technology and interactive technologies required for todays business world. Our market and feasibility studies have shown that this facility would be a regional asset and would generate millions of dollars to income to the region each year. In addition it would generate an additional 20,000 room nights for the local hotels on a yearly basis. | City of Blue Ash | 500 | 181 days or more | \$35,000,000 |
| Hamilton | The Cincinnati Streetcar Network – Phase 1 | The Cincinnati Streetcar Network will improve connectivity between neighborhoods and major employment, commercial, and recreational centers, as well as providing a catalyst for economic development within the Central Business District and development in its adjacent Over-the-Rhine and Uptown neighborhoods. The City of Cincinnati recently completed a Streetcar Feasibility Study. The study identified an initial phase streetcar loop, potential Uptown connectors and follow-up corridors, an estimate of implementation and operation costs, and identified potential funding strategies. The starter phase connects The Banks redevelopment project, Cincinnati Square, Fountain Square, Atrium Center for Performing Arts, Contemporary Arts Center, Findlay Market, and Music Hall. The streetcar network will connect people and places, creating a vibrant cityscape and providing an amenity that is attractive to residents, workers, customers and visitors. In addition, the streetcar will create jobs, private investment, and revenue which will benefit all Cincinnati neighborhoods. Fixed rail infrastructure, which implies permanence, creates a significant catalyst for redevelopment. The Cincinnati Streetcar Feasibility Study indicates that construction | City of Cincinnati | 345 | 181 days or more | \$57,000,000 |
| Hamilton | Blue Ash Recreation Center Soccer Field | Installation of an artificial turf surface on an existing soccer field located on the site of our Recreation Center. | City of Blue Ash | 50 | 91 to 180 days | \$750,000 |
| Hamilton | Alternative Solid Fuels | The City of Cincinnati will partner with System Enef and Duke Energy to build a facility capable of receiving high bio components of the solid waste stream (wood, paper, plastics, textiles, foam, etc.) and processing it into an alternative solid fuel to co-fire with coal into existing coal combustion units and cement kilns. The facility will process 250,000-500,000 tons of waste material per year, replacing an equivalent volume of coal and eliminating all of the CO2 emissions that would have been associated with that coal. System has several similar but smaller facilities operating in the United States. | City of Cincinnati | 75 | 91 to 180 days | \$15,000,000 |
| Hamilton | Roof Projects district wide | Building Roof replacement at eight school buildings. Complete tear-off, new insulation, metal work. Will install new faced back membrane. Approximately 27,000 square feet of roof replacement. | Oak Hills Local School District | 20 | 31 to 90 days | \$850,000 |
| Hamilton | Energy Efficient Roof Grant Program | A grant program will be established that provides grants to property owners for vegetated roofs and roofs with a high solar reflective index value. The benefit of these types of roofs is more efficient buildings, lower operating costs, reduction of the heat island effect within the City resulting in lowering the surrounding air temperatures. Green roofs have the added benefit of reducing stormwater runoff. The program will provide maximum grants of \$5,000 for a total of 20 grants per year. | City of Cincinnati Office of Environmental Quality | 3 | 91 to 180 days | \$100,000 |
| Hamilton | Washington Park - Downtown Cincinnati | This park project retains the historic character of the current site while growing to the north of the site. Major design features include the installation of a large open lawn area which is oval-shaped and which centers on the foot of Music Hall. This "community green" is larger than a football field and will provide much needed green space for the neighborhood. It will be a place for informal play, community events, and concerts. Infrastructure will be built into the area to serve lighting and sound needs, with flexibility for multiple possible placements of temporary seating. Surrounding the lawn are community-oriented features including a dog park, playground, picnic areas, and a major water feature. A new comfort station is planned adjacent to the playground on the 17th street side of the park and a small concession stand is to be located off Elm St. on the southwest side of the lawn. The historic bandstand remains in its current site but it would be towed to be able to make a handicap-accessible plaza also provides a more serene setting for picnics and events. New pedestrian paths will set within the park at existing grades. | Cincinnati Park Board | 30 | 91 to 180 days | \$7,000,000 |
| Hamilton | Green Cincinnati Plan Summit | The Summit is an educational forum for businesses, non-profits, schools and other community organizations to achieve firm on energy efficiency and other "green" sustainability best practices and tools. The goal is to achieve behavior change among these constituencies so they make the needed building and fleet efficiency modifications for their organizations. It will create numerous downstream audit, construction and other jobs to improve their operations. Supporter are the US Regional Chamber of Commerce, Duke Energy, University of Cincinnati, etc. | City of Cincinnati | 1 | 0 to 30 days | \$25,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Owl's Nest Park | Owl's Nest Park is a 10.7 acre park in the East Walnut Hills and Evanston neighborhoods. A master plan for the park was created in concert with both neighborhoods and with a community-based park advisory council. The plan calls for new recreational facilities, walking paths, lighting and landscaping, and water fountains along the north and south sections of the park. Phase 1 of the park plan is expected to be constructed in late 2006. Phase 2 work will complete walking paths, add new lighting, improve the park's infrastructure with irrigation and restoration of a historic masonry gateway, and rebuild the park's shelter. Additionally, the Fairfax Avenue entry plaza will receive additional improvements including new artwork. | Cincinnati Park Board | 22 | 91 to 180 days | \$2,000,000 |
| Hamilton | Contractor Green Building Training Program | It should be noted that this park falls into one of the major Employment Zones in Cincinnati. This training program will include a partnership with regional governments to offer a comprehensive approach to home improvement that provides comfort, energy savings, and cost saving for homeowners. Designers, contractors and the general public are increasingly seeking information regarding green building strategies. This program will model Boulder, Colorado's Green Building and Green Home Program and provide training workshops to increase building professionals' green building expertise and thereby encourage the use of cost-effective and sustainable building methods. | City of Cincinnati Office of Environmental Quality | 1 | 31 to 90 days | \$100,000 |
| Hamilton | Green Cincinnati Plan Marketing Plan/Campaign | This project will develop a multi-layered marketing plan and then implement those campaigns. The objective of the plan is to produce environmentally conscious "green" behavior through awareness, education and encouragement among all sectors of the city and region including average citizens, business, government, non-profits, etc. The goal is to achieve behavior change among these constituencies so they make the needed building and best efficiency modifications for their residences and organizations. It will create numerous awareness audits, construction and other jobs to improve their homes and operations. | City of Cincinnati | 5 | 0 to 30 days | \$800,000 |
| Hamilton | Regional Land Use Plan | The intent is to produce a land use plan, including a future land use map for the City of Cincinnati. The goal is to establish a blueprint that would lead to more energy-efficient land development across the city. At a minimum the plan will address the aspects of transportation, housing, public facilities and services (including infrastructure, public and private school facilities, recreation and open space, other construction and facilities such as public safety facilities, and information technology), natural systems, economic development, intergovernmental coordination, capital improvements, and land use. | City of Cincinnati Office of Environmental Quality | 0 | 91 to 180 days | \$100,000 |
| Hamilton | Anaerobic Digesters | The City of Cincinnati will partner with a private company to develop a facility using anaerobic digestion to convert organic waste materials (food scraps, yard waste, food industry byproducts, agricultural leavings, etc.) into synthetic natural gas for distribution through the natural gas pipeline. The facility will receive 75,000 tons of waste material per year, and reduce CO2 emissions by a similar amount. | City of Cincinnati | 50 | 91 to 180 days | \$5,000,000 |
| Hamilton | Green Cincinnati Plan Public Education | This project will develop educational outreach materials and tools. The objective is to produce environmentally conscious "green" behavior through awareness, education and encouragement among all sectors of the city and region including average citizens, business, government, and particularly schools. The goal is to achieve behavior change among these constituencies so they make the needed building and best efficiency modifications for their residences and organizations. It will create numerous awareness audits, construction and other jobs to improve their homes and operations. | City of Cincinnati | 2 | 0 to 30 days | \$100,000 |
| Hamilton | Water Meter Replacement and Upgrade | The Village Water Department does not have regularly scheduled replacement of water meters. An industry standard for replacement is every three years. Many of the existing meters are obsolete. The accuracy of the billing is very suspect. It is proposed that all meters be replaced with modern radio read meters. This will result in more accurate billing and time saving which will translate in more time for routine, and emergency, maintenance of the system. | Village of Lockland | 2 | 31 to 90 days | \$450,000 |
| Hamilton | Water Operations Improvements | The Village of Lockland Water Department is lacking in many items required for basic maintenance of the system. The following requests will greatly improve the Village's ability to provide basic maintenance to its water system: Back up electric generator(s) 300 kw; 1000 gallon water storage tank; automation equipment \$120,000; upgrades for water plant including pumps and pumps \$80,000; sludge press and building \$275,000; filter and reservoir cleaning and seating \$80,000; roof over clarifier \$80,000; other required equipment \$50,000. | Village of Lockland | 2 | 31 to 90 days | \$635,000 |
| Hamilton | Street Sweeper | The Village of Lockland is attempting to keep its streets clean with a 1988 Street Sweeper. This would require the Village to purchase a newer one that actually works. | Village of Lockland | 1 | 31 to 90 days | \$175,000 |
| Hamilton | Salt Bin | The Village of Lockland desires an environmentally safe way to store road salt. This would enable the Village to economically buy larger quantities of salt while protecting the environment from salt laden road run off. | Village of Lockland | 1 | 31 to 90 days | \$60,000 |
| Hamilton | Paving Dirt Path Around Service Garage & Water Pla | Village of Lockland vehicles currently have to negotiate a dirt path around the service garage and water plant. This results in dust and dirt covering the water plant and hinders the desalination of the vehicles. Paving the path area will eliminate the problem. | Village of Lockland | 1 | 31 to 90 days | \$45,000 |
| Hamilton | Bucket Truck | The Village of Lockland currently has two bucket trucks. One is to be disposed of as it is deemed to be unsafe. The other is too small for many maintenance operations. | Village of Lockland | 1 | 31 to 90 days | \$55,000 |
| Hamilton | Waldmen/Galbraith Signal | Village of Arlington Heights - Waldmen/Galbraith Signal | Village of Arlington Heights | 5 | 0 to 30 days | \$70,000 |
| Hamilton | Dump Truck | This project will result in the Village having a reliable vehicle required for the efficient provision of service from both the Water Department and the Street Department. | Village of Lockland | 1 | 31 to 90 days | \$90,000 |
| Hamilton | Arlington Avenue Rehabilitation | Village of Arlington Heights - Arlington Avenue Rehabilitation - repave/resurface pavement, repair/replace curb, upgrade storm drainage - Trichterbencher South Mill | Village of Arlington Heights | 15 | 0 to 30 days | \$250,000 |
| Hamilton | Tractor | Village of Lockland | Village of Lockland | 1 | 31 to 90 days | \$65,000 |
| Hamilton | Village of Terrace Park - Wooster Pike | The addition of a large farm tractor with a bush hog will enable the Village to maintain its streets, highways, and recreational facilities. | Village of Terrace Park | 20 | 0 to 30 days | \$837,200 |
| Hamilton | Garbage Truck | Provision of a safe garbage truck will enable the Village to continue its collection service in a safe and economical manner. | Village of Lockland | 1 | 31 to 90 days | \$124,000 |
| Hamilton | Village of Woodlawn - Bicentennial Park Upgrade - | Village of Woodlawn - Bicentennial Park Upgrade - Phase 1 | Village of Woodlawn | 20 | 0 to 30 days | \$250,000 |
| Hamilton | Village of Woodlawn - Streetscape and Gateways Pha | Village of Woodlawn - Streetscape and Gateways Phase 1 | Village of Woodlawn | 20 | 0 to 30 days | \$500,000 |
| Hamilton | Village of Woodlawn - Springfield Pike Municipal C | Village of Woodlawn - Springfield Pike Municipal Complex | Village of Woodlawn | 100 | 181 days or more | \$3,000,000 |
| Hamilton | Lawn Tractors | The provision of three lawn tractors will enable the Village of Lockland to employ 3 additional seasonal workers to maintain its streets and recreational facilities. | Village of Lockland | 3 | 31 to 90 days | \$47,000 |
| Hamilton | Clifton Heights Streetscaping Improvements | This project requests \$3,800,000 to construct streetscaping and infrastructure improvements along Calhoun Street from Vine to Clifton, Clifton Avenue from McMillan to Calhoun, Ohio Avenue from McMillan to Calhoun, Soledad Street from McMillan to Calhoun, Vine Street from McMillan to Calhoun, and McMillan Street from Clifton to Vine. The project will include resurfacing/paving historic granite curb, new sidewalks, new traffic signals and street lighting, new parking meter and sign posts, and other amenities such as bike rings, trash receptacles and benches. The project also includes the upgrading of water and sewer utilities. Funds will provide architectural & engineering fees, construction, construction administration, inspection, legal fees, and project management of the project. | City of Cincinnati | 35 | 91 to 180 days | \$3,800,000 |
| Hamilton | Village of Lincoln Heights - Street Repairs | The proposed project will replicate, in most details, the streetscape work that was completed for the construction of Block 3 of the Calhoun Street Rehabilitation. The proposed work will complete the streetscaping for the proposed redevelopment of Blocks 1, 2, 4 & 5 as well as the historic area between Ohio and Soledad and the Old Town section abutting the Clifton, McMillan and Calhoun blocks. Blocks 1, 2, 4 & 5 will include approved | Lincoln Heights | 10 | 0 to 30 days | \$145,000 |
| Hamilton | Village of Lincoln Heights - Adams Street | Village of Lincoln Heights - Street Repairs - Leggett, Medboh, Adams, Carey, Wabash & Dixie - Storm sewer and Pavement Repairs | Lincoln Heights | 10 | 181 days or more | \$300,000 |
| Hamilton | Liberty Street Traffic and Pedestrian Improvements | Village of Lincoln Heights - Adams Street (Marlburgh to Leggett) and Central Parkway, as well as pedestrian improvements such as landscaped medians and bumpouts, as outlined in the 2002 Over-the-Rhine Comprehensive Plan. Funds will provide architectural & engineering fees, construction, construction administration, inspection, legal fees, and project management of the project. | City of Cincinnati | 35 | 91 to 180 days | \$1,250,000 |
| Hamilton | Village of Lincoln Heights - Steffens Avenue | The intersection re-design projects will provide clearer and safer movements for vehicles and shorter and safer pedestrian crossings. The generators of Liberty and Central Parkway will more accurately reflect the current and anticipated capacity. In addition to providing more pedestrian connection between the north and south sections of Over-the-Rhine, a significant amount of asphalt (park) will be converted to much-needed green space. The City has already spent approximately \$250,000 to construct the existing medians and bumpouts along Liberty from Main Street to Reading Road. | Lincoln Heights | 10 | 181 days or more | \$273,000 |
| Hamilton | Small Truck, Pick-up trucks and plows | Village of Lincoln Heights - Buffers Avenue | Village of Lockland | 1 | 31 to 90 days | \$95,000 |
| Hamilton | Village of Lincoln Heights - Magee Street | The Village of Lockland is in need of vehicles for the basic maintenance of its alleys, parking lots, and streets. This infrastructure will further deteriorate without further investment. | Lincoln Heights | 10 | 181 days or more | \$159,000 |
| Hamilton | 800 MHz Radios | Village of Lincoln Heights - Magee Street (Lindy to Schumann) | City of Cincinnati | 10 | 31 to 90 days | \$2,400,000 |
| Hamilton | Warsaw Avenue Streetscape in East Price Hill (Phas | The City of Cincinnati has already invested \$27 million to implement the 800 MHz radio system, which is the central mechanism of communication for Cincinnati and Hamilton County Police and Fire operations. In order to comply with regulations requiring the narrowing of UHF and VHF radio frequencies currently in use by other Departments, it is necessary for the city to purchase additional 800MHz portable and mobile radios as replacements for all non-public safety city departments: Cincinnati Public Works, Cincinnati Water Works, Department of Transportation and Engineering, the Metropolitan Sewer District, and Parks and Recreation. The following benefits will be gained by this project: Will meet Cincinnati's compliance with deadline street FCC regulations mandating the harmonizing of UHF / VHF radio frequencies; all government agencies and public utilities in the City of Cincinnati will be able to communicate on the same platform and utilize our state of the art 800 MHz radio system; and interoperable communications between Police, Fire, and other public services will be achieved. Jobs will be created through the dismantling of the existing UHF/VHF system. | City of Cincinnati | 45 | 91 to 180 days | \$750,000 |
| Hamilton | Village of Lincoln Heights - Van Buren | This project requests \$750,000 to construct Phase II of the East Price Hill Streetscape from McPherson to and including the intersection of St. Lawrence Avenue. The project will include new curbs, new sidewalks, new traffic signals and street lighting, new parking meter and sign posts, other amenities such as bike rings, trash receptacles and benches. Construction documents for the project are nearly complete. Funds will provide construction, construction administration, inspection, legal fees, and project management of the project. | Lincoln Heights | 10 | 181 days or more | \$93,000 |
| Hamilton | 1000 Solar Roofs | Phase I of the project included streetscaping along McPherson, Warsaw and Enright adjacent to the new East Price Hill Kroger store, which was designed by the City and construction approved. The City has already contributed \$500,000 for architectural and engineering services for the entire project and construction of Phase I. | City of Cincinnati | 2,000 | 31 to 90 days | \$10,000,000 |
| Hamilton | Village of Lincoln Heights - Leggett | Village of Lincoln Heights - Van Buren (Chester to Leggett) | Lincoln Heights | 10 | 181 days or more | \$191,000 |
| Hamilton | Village of Lincoln Heights -Wabash Ave | The City of Cincinnati will partner with non-profits and local businesses to install 1,000 rooftop solar energy systems in Cincinnati. Federal funds will supplement state, local, and private funds for other packages that are sound investments with reasonable payback periods. | Lincoln Heights | 10 | 181 days or more | \$184,000 |
| Hamilton | Rozzi Park Project | Village of Lincoln Heights - Leggett (Schumann to McBooth) | Symmes Township | 15 | 181 days or more | \$1,000,000 |
| Hamilton | Village of Lincoln Heights -Byrd Street | Village of Lincoln Heights - Waldmen/Dixie (Carey to Dixie) | Lincoln Heights | 10 | 181 days or more | \$130,000 |
| Hamilton | Road Project 2009 | The Township recently purchased 54 acres to be developed into a park. Eight of those acres are wetlands. This is a very large project and would take about 18 months to complete construction. | Symmes Township | 15 | 31 to 90 days | \$450,000 |
| Hamilton | Information Technology Upgrades | Village of Lincoln Heights -Byrd Street Symmes Township is requesting bids to do the necessary labor, material, and equipment for the curb replacement, catchbasin repairs and resurfacing of various streets. We would be willing to provide up to 50% of the necessary materials, including operating costs while creating employment opportunities related to the opening on the new program. Full funding of the request would enable the following: • Enhancing the City's E-Government offering to include interactive online forms, complete integration with existing back-end databases and other systems for the realization of complete forms processing with financial transactions. • A document management system, which could be implemented as a stand-alone system or as a duplicate Storage Area Network (SAN) e-File email archiving system. • A centralized call center for citizens to contact the City to request services. • Field force management using GPS or other technology to direct and monitor the workforce while following their progress. • A central multi-media conference facility. • A geobrowser WPF zone to improve the attractiveness of the area to residents, workers, and visitors. • Voice over Internet protocol to replace existing landline system. | City of Cincinnati | 21 | 91 to 180 days | \$2,400,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Hamilton | Recycle Carts | New technology 64 gallon wheeled recycle carts with lid will replace 18 gallon recycle bins for 105,000 households. Recent research shows the increased capacity and convenience will increase the participation rate and the amount of recyclables collected by 30 to 40%. (Denver, CO saw a 100% increase over a 3 year period with only one extra cart per job. It will lay a new foundation for growth in the region's recycling infrastructure due to the increased volume of material collected, processed, and used as feedstock to make new products. Carts will improve the energy efficiency of recycling collection and save a significant amount of energy in manufacturing processes which require constant rather than large material is used. We expect to collect 30,000 tons or more per year (up from 10,000 currently collected in bins). This is a 33.3% increase in amount of recyclable collected. Our current diversion rate is 11.37%, we expect to increase it to 28.6% with this strategy. This is an opportunity to prevent litter by having a lid on recyclables and improve quality of life for our citizens. | City of Cincinnati, Office of Environmental Quality | 888 | 0 to 30 days | \$8,102,645 |
| Hamilton | Humphrey Road Sidewalk Project | Symmes Township would like to build a sidewalk on Humphrey Road that connects residents to our local park. The road has a dangerous 8 curve that needs to be dealt with before someone is injured. The project will consist of about 4,000 feet of sidewalk. The project is in the design phase currently. The Township would be willing to match funds. | Symmes Township | 6 | 91 to 180 days | \$500,000 |
| Hamilton | Kemper Grove Lane Headwall Replacement | The storm sewer headwall located on Kemper Grove Lane in Symmes Township has to be replaced. We have received \$35,000 SCIP funds for the project but need an additional \$35,000. This project is being designed currently and will be ready to go as quickly as it can be bid. | Symmes Township | 5 | 31 to 90 days | \$35,000 |
| Hamilton | Expanded Fiber Network | Cincinnati was one of the first large cities to construct a fiber optic network for government use. The City has provided reliable, high-performance communications services over its fiber network for over ten years. City agencies have developed increased broadband communications requirements that were unforeseen when the network was originally constructed. Thus the current network is not sufficient enough to support broadband connectivity at certain key locations. Computers and personal data assistants continue to become more powerful and useful, with the possibility of rapidly accessing and creating, storing, and transferring images, large files, maps, and generally stored databases. The need to ensure backup and business continuity will push the City to deploy real-time data mining applications and storage at multiple locations. However, most City locations are becoming congested at peak times. Other network resources and the Internet become available or accessible slowly. The City is seeking funding to construct a new broadband fiber optic network to serve high profile agencies such as Police, Fire and Utility Departments. Jobs will lay out additional fiber. | City of Cincinnati | 10 | 31 to 90 days | \$1,840,000 |
| Hamilton | Laboratory and water quality equipment | New advanced laboratory equipment and water quality analyzers. | Greater Cincinnati Water Works | 3 | 91 to 180 days | \$388,000 |
| Hamilton | Geothermal and HVAC improvements to administrative | Add geothermal and HVAC improvements to help lower the overall energy cost of the facility | Greater Cincinnati Water Works | 4 | 91 to 180 days | \$600,000 |
| Hamilton | Station 92 Fire House Energy conservation & Enviro | Station 92 is a active firehouse with energy inefficiencies, heating losses through existing windows, entry doors that need replaced due to rot, door hardware and weather stripping. Replace existing windows and doors along with lighting carpet with low VOC materials to meet environmentally standard. Replace plumbing fixtures with no flush toilets along with replacing kitchen cabinets that have lead based paint from original installation. Remove all floor tiles to refresh existing concrete surfaces to reduce moisture of environment contaminants through out the facility. Use green any electrical low efficient appliances to more efficient energy appliances. | Sycamore Township | 50 | 31 to 90 days | \$500,000 |
| Hamilton | Montgomery Road Streetscape | Explore solar power installation for reducing power consumption. The upgrade will bring a more environmental and energy compliant facility to the local government of Symmes Township. | Symmes Township | 15 | 181 days or more | \$1,000,000 |
| Hamilton | Cherry Grove and Brecon tank interior coating | Montgomery Road (State Route 22 & 3) has just been widened to seven lanes in front of Harper's Point Shopping Center and Harper's Point Shopping Center. The businesses in that shopping centers are suffering as a result of the construction and are having a difficult time surviving under the current financial climate. We believe that a streetscape project that includes sidewalks, lighting, and landscaping will attract new and existing customers. | Greater Cincinnati Water Works | 7 | 91 to 180 days | \$900,000 |
| Hamilton | Washington Park and Garage | Recap the interior of two water storage tanks to increase their useful life. The renovation and expansion of Washington Park is a critical development that addresses the complex needs of a diverse and growing community. The park, one of Cincinnati's oldest and largest urban parks, has served as an integral part of the historic Over-the-Rhine neighborhood for over 150 years. The park plan largely retains the historic character of the current 6-acre site while expanding it 2 additional acres north onto a current surface parking lot. A 120-space sub-surface garage will be constructed under this expansion to serve Music Hall, the new School for Creative and Performing Arts, and community residents. The garage will be covered by a green roof that creates a large civic lawn. Above the garage a large civic lawn will provide much needed green space for informal play, large community events, concerts and school performances. Other amenities include a dog park, playground, picnic areas, comfort station, a major interactive water feature, and sound and lighting improvements. A historic landmark will be lowered to make it handicap-accessible and provide an intimate setting for programs and events. Sustainability considerations have also been addressed in the design through using existing trees, and integrating modern sustainable design. | Cincinnati Center City Development Corporation | 600 | 0 to 30 days | \$6,000,000 |
| Hamilton | Bolton Plant Clearwell Baffling and filter media r | Improve the treatment performance of the water treatment plant to produce high quality water more efficiently. The park, one of Cincinnati's oldest and largest urban parks, has served as an integral part of the historic Over-the-Rhine neighborhood for over 150 years. | Greater Cincinnati Water Works | 7 | 91 to 180 days | \$950,000 |
| Hamilton | Washington Park and Garage | The park plan largely retains the historic character of the current 6-acre site while expanding it 2 additional acres north onto a current surface parking lot. A 120-space sub-surface garage will be constructed under this expansion to serve Music Hall, the new School for Creative and Performing Arts, and community residents. The garage will be covered by a green roof that creates a large civic lawn. The garage and park expansion will support multimodal transit. Improved amenities for bicyclists are included in the plan, as well as new bus shelters to encourage the use of local public transit. Pedestrian circulation will be enhanced with improvements to paths and accessibility upgrades. The structured parking and green roof provide a sustainable alternative to traditional surface lots by reducing impervious surfaces and minimizing stormwater impacts. | Cincinnati Center City Development Corporation | 600 | 0 to 30 days | \$6,000,000 |
| Hamilton | Cincinnati Initiative to Reduce Violence (CIRV) | City, The CIRV program was developed to address the growing number of individuals unable to find work because of a prior criminal record, national unemployment rates and low educational attainment. This program targets individuals who have been convicted of and served time for a higher degree offense. CIRV now has had a tremendous turnout with over 30 participants in the first week of recruitment. The City would like to keep and grow this program to meet the growing needs of the participants. This program serves to focus on education, job training and interpersonal skills. Participants can earn their GED, graduate a greater sense of accomplishment and provide for themselves and/or their families. The best outcome of this program is the ripple effect it can bring. Although CIRV focuses on the person, now the person has a greater sense of achievement and determination, they are better able to provide for their family and most of all keep them from committing crimes in order to meet their needs. | The City of Cincinnati | 100 | 0 to 30 days | \$1,416,544 |
| Hamilton | Bolton water treatment plant secondary basin drive | Replacement of critical water treatment equipment | Greater Cincinnati Water Works | 10 | 181 days or more | \$1,300,000 |
| Hamilton | Solar Energy Panels at administrative offices | Adding a large 40 KW solar array to the administrative offices to help reduce the overall energy cost. | Greater Cincinnati Water Works | 3 | 0 to 30 days | \$230,000 |
| Hamilton | Backup power generator at Eden Park | Install a back up power generator to provide reliability and help reduce energy cost by peak shaving the electric demand | Greater Cincinnati Water Works | 28 | 31 to 90 days | \$3,800,000 |
| Hamilton | Greenhills Tank | Install a back up power generator to provide reliability and help reduce energy cost by peak shaving the electric demand | Greater Cincinnati Water Works | 22 | 31 to 90 days | \$3,000,000 |
| Hamilton | Richard Miller Water Treatment plant expansion to | Install 2 new pumps at 40 mgd each to increase the approved rated capacity of the entire treatment plant from 220 mgd to 240 mgd in a cost effective manner. Suppression and Rescue. The goal of a Cincinnati Fire Cadet program would be to provide a pool of reliable and knowledgeable candidates for the position of Fire recruit, and ultimately, Firefighter. | Greater Cincinnati Water Works | 10 | 31 to 90 days | \$1,355,000 |
| Hamilton | Fire Cadet Program | The selection process for Fire Cadet can enhance affirmative hiring of minorities and women by allowing the Department to recruit minority and female Cadets, then enhance their ability to successfully compete in the Fire Recruit process. Fire Cadets will not perform fire suppression duties for the Fire Department for much less than Fire Firefighters. At the same time, Cadets will develop a depth of understanding of the Cincinnati Fire Department and its mission. Fire Cadets will be considered full-time employees, at half pay. The program will run for three years. During that time, the Cadets will attend Cincinnati State Technical and Community College and work part-time in the Fire Department. At the end of three years, the Cadets will have a two year Associate in Science degree in Fire Science and three years experience working in the Cincinnati Fire Department. By the time Cadets graduate. | The City of Cincinnati | 50 | 91 to 180 days | \$4,659,291 |
| Hamilton | Ross Family Log House Museum | This request for to provide the funding for the re-construction of an original 2-story log house built around 1830. The Society has a lease with Symmes Township for placement of the log house within a community park. A \$100,000 grant has been approved from the Ohio Cultural Facilities Commission and we have \$50,000 on hand. This request would allow for upgrades to the project, as well as provide for artisans to help in furnishing the log house to that period. An architect has plans prepared and we are ready to proceed with bid, with construction to start in April. This would be a valuable educational tool for students to see live from this time period as well as participate in programs. This log house will also be located on property which will contain future buildings associated with the Cincinnati Horticultural Society and we look forward to working with them to make this a destination site for many residents and visitors to the area. Thank you for your consideration. The Symmes Township is currently building the necessary support structures in one of our parks to eventually establish a Horticultural Center. The purpose of the center will be for education of the public on a number of environmental topics like, but not limited to, energy efficiency. The Cincinnati Horticultural Society has signed a 25-year lease to use the center. | Symmes Township Historical Society | 15 | 31 to 90 days | \$50,000 |
| Hamilton | Meade Horticultural Center | Replacement of existing 1" & 2" water lines with 8" water lines to improve fire protection throughout the village. | Symmes Township | 6 | 0 to 30 days | \$650,000 |
| Hamilton | Water line Replacements | Replacement of existing 4" water lines with 8" water lines to improve fire protection throughout the village. | Village of Lockland | 15 | 31 to 90 days | \$480,000 |
| Hamilton | Water line Replacements | Replacement of existing 4" water lines with 8" water lines to improve fire protection throughout the village. | Village of Lockland | 15 | 91 to 180 days | \$6,741,000 |
| Hamilton | Water line Replacements | Replacement of existing 8" water lines with 8" water lines to improve fire protection throughout the village. | Village of Lockland | 15 | 91 to 180 days | \$1,817,500 |
| Hamilton | Cooperative Education Program | Goal of taking over a family business was the most common way of learning, building or expanding one's career. Today as the population increases and unemployment soars, the need to arm young students with the ability to integrate classroom theory with workplace experience is clear. Without the real world experience, letters of recommendation, increased people skills, and an understanding of workplace culture, students face a crippling disadvantage of finding quality employment post graduation, according to the Cooperative Education Association. The City of Cincinnati has grown their partnership program and is currently working with the following four regional schools: The University of Cincinnati, Xavier University, Northern Kentucky University, and Cincinnati State Technical and Community College. These regional schools have over 71,000 students enrolled in 2009. Where are these kids going to go after graduation? Who is going to employ these many graduates? How will they gain an edge? Are there that many people out there? The City's mission is to provide more students with good jobs that will align them for a career after graduation and mentor them through our success. Replacement of existing 16" raw water supply line with 16" water line. This water line is the supply line from the village of Lockland's well fields. It is over 70 years old and in need of replacement. | The City of Cincinnati | 100 | 0 to 30 days | \$1,036,000 |
| Hamilton | Water line Replacements | Replacement of existing 16" raw water supply line with 16" water line. This water line is the supply line from the village of Lockland's well fields. It is over 70 years old and in need of replacement. | Village of Lockland | 15 | 91 to 180 days | \$4,040,000 |
| Hamilton | Western Hills Viaduct and McMillan Avenue Hillside | This phase of the project includes the study and preliminary engineering of the Western Hills Viaduct and McMillan Avenue hillside. The Western Hills Viaduct is planned for rehabilitation or replacement in the same time frame as the construction of the Brent Spence Bridge and sections of I 75 north to the Viaduct. These are currently major safety concerns with both McMillan Avenue and the Viaduct. The hillside at the Viaduct. These facilities do not meet current safety or ADA standards. Unless plans are put in place now to improve these facilities, the new interchange will be designed to function with the current connectors. | City of Cincinnati | 100 | 0 to 30 days | \$10,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Hamilton | Colerain Township Various Street Rehabilitation # | Rehabilitation of existing roadways includes such work as: new asphalt concrete wearing course, curb replacement, sidewalk ramps, catch basin reconstruction, partial and full depth repair, non-milling, pavement fabric, catch basin and sewer lid adjustments, and concrete drive apron replacement. Estimated quantities: Various street lengths total 7,778 feet 1,305 cubic yard of Asphalt Concrete wearing course 15,500 linear feet of curb replacement 1,300 Square feet of sidewalk ramps 100 catch basins reconstructed 8,000 square yards of partial depth repair 23,000 square yards of non-milling 20,000 square yards of pavement fabric 100 catch basin and sewer lid adjustments 12,000 Cubic feet of undersealing 4,000 Square yards of concrete apron replaced 600 cubic yards of full depth work 11,476 cubic yards of undersealing | Colerain Township Public Works Department | 40 | 31 to 90 days | \$1,895,000 |
| Hamilton | I-71 Access Improvements | This funding will provide for the continuation of the federal study and design process for the I-71 highway, interchanges, arterial network, and transit systems in order to provide improved access to Uptown and other Cincinnati neighborhoods adjacent to I-71. The safe and efficient operation of the street and highway network of the I-71 Corridor is essential to existing and proposed development. Transportation improvements within the corridor would improve traffic safety and reduce congestion (and associated CO2 emissions and pollution) for residents as well as those employed in the Uptown area. These Uptown neighborhoods are the second largest employment center in the region (after Downtown Cincinnati) and home to several nationally significant hospitals, the second largest EPA research facility in the country, the University of Cincinnati, and the Cincinnati Zoo and Botanical Gardens. This funding is expected to allow for the study, analysis, and design through step 9 in the ODOT FDP. | City of Cincinnati | 50 | 181 days or more | \$10,000,000 |
| Hamilton | Software for the City's Computerized Traffic Contr | The City's Computerized Traffic Control System (CTCS) is scheduled for a software/hardware upgrade in 2009. Cincinnati currently has 745 traffic signals, with approximately 85 percent interconnectivity and operating a variety of timing plans. Over half of the signalized intersections are controlled by a central system initially installed in the mid-1990s. This system is not as user friendly as newer systems throughout the country. Therefore, this system is planned for update to the Transcon Traffic Control System in 2009. Grade related pair cable from the 1990s will continue to be used for the communication network for the system. However, given the improvement in fiber optic cable and its ability to handle much higher bandwidths, the Traffic Engineering Division would like to test a communication network to perform Preliminary Engineering, Construction Documents and Construction Management for a new CTCS interconnection network in preparation for utilizing fiber or a hybrid system to provide for the full utilization of the new software. | City of Cincinnati | 10 | 0 to 30 days | \$1,000,000 |
| Hamilton | Engineering, Plan Preparation and Construction of | The engineering and plan design is estimated to cost \$500,000 and will employ engineers, technicians and clerical support personnel. The construction of the system is estimated to cost \$3,000,000. This effort would employ engineers, technicians, electrician/fiber optic specialists, and general construction craftsmen. | City of Cincinnati | 30 | 31 to 90 days | \$3,500,000 |
| Hamilton | Riverside Drive Safety Improvements | The purpose of this project is to begin preliminary engineering and environmental studies for the redesign of the bridge over four rail bridges - Riverside Drive Overpass (Rivewood Overpass), Collins Overpass, Riverside/Duffa Overpass and the State Street Overpass. This project would correct roadway alignment deficiencies and associated accidents while coordinating with the rail alignment north of Riverside Drive and design of the Ohio River Bicycle Trail from downtown to Lurken Airport. Riverside Drive will be the truck route for US 50, making this an important commercial roadway and multi-modal facility. This work falls within the Eastern Corridor Program of Transportation System Management (TSM) projects. The Indiana and Ohio Railroad is supported by the bridges. At the present time, the railroad has limited service on the line. The rail line is occasionally used to transport private rail passenger cars and, each year, a portion of the Ringling Brothers Barnum and Bailey Circus train is stored at the end of the line. The rail line is also being considered for potential passenger rail use. | City of Cincinnati | 20 | 31 to 90 days | \$3,000,000 |
| Hamilton | Federal Reserve Apartments | The Federal Stimulus Funds showed errors - I am applying for environmental remediation grant for historic buildings. Energy and Environment - job program. Brownfields. We are renovating approximately 130,000SF of 160,000SF building at 4th and race street in Cincinnati CBD. As part of the renovation we need to remediate asbestos material. It is expected that removal of this material alone will create 20 jobs cost approx \$200,000. | Ashley Commercial Group | 20 | 91 to 180 days | \$200,000 |
| Hamilton | Improving Production Effectiveness in Ohio | Analytical Supervisory Control Technology enables the user to enhance and maximize the operating performance of production / manufacturing of existing production assets according to the user's selected set of metrics. These metrics may include, e.g., energy consumption, environmental impact, costs, quality, and safety. Once operations are optimized, this quantitative discipline also helps understand the barriers that exist to further performance - leading to effective re-engineering projects to further enhance production operations. Ultramax Corporation (UMC) offers a Sequential Empirical Optimization (SEO) technology which is the fastest, safest and simplest today. www.ultramax.com | Ultramax corporation | 20 | 31 to 90 days | \$500,000 |
| Hamilton | Eastern Corridor Light Rail | This request would fund design and construction of a rail transit line that would run from the Cincinnati Transit Center to the eastern part of the Cincinnati metropolitan area. The proposed Eastern Corridor Rail Transit Line was first identified in the Eastern Corridor Major Investment Study (ECS) that was completed in 1999. The alignment is in the process of refinement in the ongoing Eastern Corridor Preliminary Engineering/Environmental Impact Study. The anticipated limit of the rail alignment to the northeast is Milford, and to the east is the Eastgate area (I-275 at US32). The Major Investment Study recommends the use of light diesel multiple unit vehicles in this corridor, though other options for this vehicle type can be considered. | City of Cincinnati | 100 | 31 to 90 days | \$100,000,000 |
| Hamilton | DART Supplement | DART has aggressively addressed the illegal drug problem in the Cheviot neighborhood and other Hamilton County communities. As an example, DART had a total of one hundred and eleven (111) arrests during calendar year 2008 in sixteen communities. Forty four (44) of those arrests originated in the City of Cheviot. The City of Cheviot is requesting a supplement of Officer Dezaan's salary for a period of eighteen months. This salary supplement would benefit DART with needed manpower and allow the City of Cheviot to continue aggressively addressing drug problems in the community. | City of Cheviot Police Department | 1 | 31 to 90 days | \$97,000 |
| Hamilton | US 42 - Mason Montgomery to Fox | US 42 - Mason Montgomery to Fox 1640 LT of 18" DP Street Improvements CCWV agrees to coordinate work with other jurisdictions to optimize work in areas to keep customer disruptions to a minimum. We cooperate with the project being to upgrade our water mains based on the age and size of pipe. Some of the water mains are experiencing maintenance problems, but many times the extent of the improvement creates occupancy conflicts/interference requiring utility relocation. CCWV sees to be proactive with street improvements to minimize the inconvenience to our customers while maximizing funds through jointed projects. Green Initiative Water mains installations qualify as "green initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements | Greater Cincinnati Water Works | 2.6 | 31 to 90 days | \$350,000 |
| Hamilton | Street Security Program | The funds for this project would be used to upgrade and expand our current street security system. This project was started with Homeland Security Funds earmarked to harden soft targets. Our system is part completed and we need to upgrade our current system and expand. This involves the use of LPR and color video cameras. We capture these images at several intersections which involve our shopping mall. This mall is 1,250,000 square feet. These video operators will allow us to observe and report any vehicles which may be involved in criminal activity that arise through these intersections. | Springdale Police Department | 0 | 0 to 30 days | \$150,000 |
| Hamilton | Enhanced Policing | The Village of Lockland has had decades of economic hardship that it is only beginning to recover from. Recently the Village was released from the State's Fiscal Watch designation. The Village wishes to hire a limited term police officers to augment the current staff to enhance the village patrol, crime investigation, and traffic control. It is believed that this will foster an orderly and peaceful village. | Village of Lockland | 4 | 31 to 90 days | \$100,000 |
| Hamilton | Cincinnati Farms | The City of Cincinnati owns or controls more than 18,000 parcels of land within the City limits. While many of these parcels are tiny strips left over from road projects and the like, they range in size all the way up to more than 10 acres, and thousands of these parcels have an identified public purpose. At the same time, there are hundreds of individuals who are interested in having a piece of the land for use for gardening or small scale agriculture. The City has launched and plans to expand a program allowing the City land to be leased for \$1 for gardening/agriculture. These individuals can raise food for their own consumption, for charity, or sell in local farmers markets. Individuals who connect with nature build a connection to their community, supplement their food budget, and increase the supply of fresh, healthy, local produce. | City of Cincinnati | 100 | 31 to 90 days | \$250,000 |

Green Initiative Water mains installations qualify as "green-initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 2.59 | 91 to 180 days | \$350,000 |
| Hamilton | Montgomery Road Sidewalk Project - Phase II | Construction of approximately 600 ft. of tag curb and sidewalk with necessary retaining walls. Stormwater to connect residential with school and retail uses and connect to existing sidewalk network to allow for alternate means of transportation. | Sycamore Township | 20 | 31 to 90 days | \$250,000 |
| Hamilton | Anderson Ferry - Hillside to Corp. Line | Anderson Ferry - Hillside to Corp. Line 3800 L. I. of 12" DIP Maintenance The water mains associated with this project are being replaced based on the high maintenance activity on the mains. The replacement of these mains will reduce GCWW repair costs, improve system reliability for our customers, and improve domestic capacity and fire flows in our system. Green Initiative Water mains installations qualify as "green-initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 4.87 | 31 to 90 days | \$658,000 |
| Hamilton | Lakeridge Drive | Lakeridge Drive 5700 L. I. of 8" DIP New Main/Gapper The water mains associated with this project involves the installation of a new main which connects two dead end water mains and thereby completing its hydraulic loop. This new water main will improve system capacity through the system looping, extend water service to additional customers, and improve water quality in the system by eliminating dead water mains. Green Initiative Water mains installations qualify as "green-initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 5.3 | 91 to 180 days | \$715,000 |
| Hamilton | Academy/Beech/Harris | Academy/Beech/Harris 5,600 L.I. of 8" & 12" DIP Maintenance The water mains associated with this project are being replaced based on the high maintenance activity on the mains. The replacement of these mains will reduce GCWW repair costs, improve system reliability for our customers, and improve domestic capacity and fire flows in our system. Green Initiative Water mains installations qualify as "green-initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 10.73 | 31 to 90 days | \$1,045,000 |
| Hamilton | Solar PV Project | Install 150 kW of solar PV on multiple roofs. This would lower the our peak demand by 10% and would save 180,000 kWh annually. Project would set out only in Ohio installers such as Dowell, TheGrid, and BlueChip. We have inventoried our roofs and the engineer that the investors would like to make sure there are no conflicts. With funding, we would bid this out and have a purchase order out within 30 days. We would also have educational displays/kiosks at each location to take advantage of the exposure that comes with annual attendance of a million people. | Cincinnati Zoo & Botanical Garden | 30 | 91 to 180 days | \$600,000 |
| Hamilton | Cornell Road Improvement Project | Reconstruction of approximately 1,350 ft. of roadway widened to three lanes and to provide sidewalks to support and sustain economic development. | Sycamore Township | 20 | 0 to 30 days | \$400,000 |
| Hamilton | Biomass Project | Project would entail building a biomass reactor on-site to convert all of the facilities organic waste, including elephant manure, food, horticulture slippings, and paper into energy. Project would include building a structure to house the reactor. This would be an incredible demonstration project, as it would be the first, small scale, urban biomass project in the country. We have completed the feasibility study and have identified a handful of Ohio based companies that could build our pre-engineered reactor. This would truly be a one of a kind advanced energy demonstration project, dramatically raising the awareness level locally and nationally about the viability of biomass technology on a small scale. The company that produces the first viable and successful biomass reactor will be in line for tremendous growth. | Cincinnati Zoo & Botanical Garden | 50 | 181 days or more | \$500,000 |
| Hamilton | Corryville Public Parking Structure | The Corryville Public Parking Structure would pave the way for implementation of several new developments in the Corryville neighborhood, just west of the University of Cincinnati main campus, including a movie theater, bowling alley, restaurant, and additional mixed-use space. | City of Cincinnati | 120 | 31 to 90 days | \$4,500,000 |
| Hamilton | Kitchen Waste to Biodiesel Project | Build a biodiesel reactor for on-site conversion of kitchen waste oils to biodiesel. Fuel would be used for on-site diesel fuel, including train, main, and trucks. Would reduce the need to consume 1500 gallons of petroleum based diesel per year, and significantly reducing harmful emissions from the vehicles. Have analyzed the needs and the system required. Would start building the reactor immediately | Cincinnati Zoo & Botanical Garden | 5 | 0 to 30 days | \$15,000 |
| Hamilton | Galbraith Road - Springdew to Daly Rd | Galbraith Rd. - Springdew to Daly Rd 3,600 L.I. of 12" DIP Water Main Replacement GCWW strives to coordinate work with other jurisdictions to optimize work in areas to keep customer disruptions to a minimum. We cooperate with the project bring to upgrade our water mains based on the age and size of pipe. Some of the water mains are experiencing maintenance problems, but many times the extent of the improvement creates occupancy conflicts/interference requiring utility relocation. GCWW tries to be proactive with street improvements to minimize the inconvenience to our customers while maximizing funds through jointed projects. Green Initiative Water mains installations qualify as "green-initiative" projects because water main piping is manufactured from 100% recycled materials. Additionally new water main installation provides for improved water transmission and the energy efficiencies realized by reduced pumping requirements. | Greater Cincinnati Water Works | 3.25 | 31 to 90 days | \$440,000 |
| Hamilton | Auto & Aerospace Supplier Development Program | Continuation of a nationally recognized program of providing advanced lean and six sigma training to incumbent workers in the Auto and Aerospace supply chains leading to job retention and creation, and "stackable" certificates for participants leading to associate degrees. | TechSolve | 2000 | 0 to 30 days | \$3,000,000 |

| Hamilton | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDI's mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, Individual Development Accounts (IDAs), microloans, technical assistance, and access to retail markets. As the only U.S. Small Business Administration microloaner and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners in the creation and expansion of microenterprises. ECDI's Microenterprise Loan Fund fills a gap in the credit industry by providing training, technical assistance and loans ranging from \$500 to \$36,000 to underserved entrepreneurs. ECDI is able to serve underserved populations, including low-income individuals, those with little or no credit, or those precluded from paying interest because of religious beliefs. Hamilton County) and a private non-profit citizens group, the Pleasant Ridge Community Council. | Economic and Community Development Institute | 20 | 31 to 90 days | \$150,000 |
| Hamilton | Campaign for an Accessible Pleasant Ridge Library | The \$1.2 million dollar addition will include an elevator, accessible restrooms and other alterations necessary to make the facility ADA compliant. 1.Will be shored ready (within 90days) 2.Provides vital services to Ohioans (library resources) and the renovation will make the building wheel chair accessible. 3.Construction project will employ workers and the accessibility renovation will retain the current library staff of eight and ensure continued presence of this busy community neighborhood library. 4.The community has taken on the responsibility of raising a total \$400,000 and the Public Library has agreed to raise \$800,000 from outside sources since no operating funds were available for capital projects. 5.Through foundation grants, fundraising events, contributions from residents the diverse socioeconomic community has raised \$136,000. 6.Due to the current economic crisis, both the Public Library and the community have been unable to reach the funding goals needed from outside sources. | Pleasant Ridge Community Council | 37 | 31 to 90 days | \$980,000 |
| Hamilton | County Energy Conservation and Climate Initiative | This program seeks to leverage investment in energy efficiency improvements in residential, commercial and institutional structures to accomplish multiple goals relating to economic stimulus. Primarily, this program will have the impact of lowering energy costs in residential dwellings - thereby reducing the proportion of domestic budgets spent on energy expenses and freeing discretionary income. Similar positive impacts will be felt by commercial entities and local governments in terms of freeing budgetary resources for the continued provision of needed community services and maintenance of local jobs. Additionally, the program will be linked to specific job training programs with the goal of providing a pipeline of trained, eligible labor to serve the needs of contractors making these energy improvements. To the degree possible, the County will utilize existing entities to assist in meeting these goals. | Hamilton County | 7 | 31 to 90 days | \$2,500,000 |
| Hamilton | Highway Wind | Pilot demonstration for the utilization of highway wind as a renewable energy source. Project will demonstrate the economic value of the approach and also the ability to be sustainable and marketable after the initial demonstration effort. Assuming success, the effort will establish a manufacturing assembly operation and installation activity within Ohio with potential job creation of over 100 individuals. | Manufacturing Technology Communications, Inc. | 100 | 91 to 180 days | \$600,000 |
| Hamilton | Window Replacement | The project would be to replace the windows at Reading Central Elementary. The windows range in age between 50 years and 80 years of age. New windows would greatly enhance the energy efficiency of existing heating and cooling systems, thus reducing operational costs. The current windows have asbestos glazing and caulking and the possible environmental hazard would be abated with the project. | Reading Community City School District | 25 | 31 to 90 days | \$655,715 |
| Hamilton | Hilltop Window Replacement | The project would be to replace the windows at Reading Hilltop Elementary. The windows range in age between 40 to 50 years of age. New windows would greatly enhance the energy efficiency of existing heating and cooling systems, thus reducing operational costs. The current windows have asbestos glazing and caulking and the possible environmental hazard would be abated with the project. | Reading Community City School District | 25 | 31 to 90 days | \$578,720 |

| Hamilton | Reading High School Window Replacement | The project would be to replace the windows at Reading High School. The windows range in age between 40 and 50 years of age. New windows would greatly enhance the energy efficiency of existing heating and cooling systems, thus reducing operational costs. The current windows have poor insulating and caulking and are the leading environmental hazard would be dealt with the project. | Reading Community City School District | 25 | 31 to 90 days | \$1,685,035 |
| Hamilton | School Building Energy Efficiency Upgrades | Coleman High School was constructed in 1960 with an addition completed in 1995. Our long-term building plan calls for the renovation of the 1960 section and the school to continue to serve as a high school serving 2100 students. As a part of the renovation, energy efficiency is a major concern. Some of the funding will come from the district's permanent improvement fund. The district proposes to do the following: Replace windows at Coleman High School with energy efficient windows - Est. \$504,000 Replace lobby doors at Coleman High School with energy efficient glass doors - Est. \$18,600 Replace lighting on third floor at Coleman High School with energy efficient fixtures - Est. \$90,000 | Northwest Local School District | 5 | 31 to 90 days | \$500,000 |
| Hamilton | Station 93 | We are currently in the process of building a new fire station. The new station is being built under the LEED bronze along with a attached community center for the public to meet. This project is current being funded by its levying under bondwork funds. The need to enhance and make this station more energy efficient is paramount in serving the general population. This new fire house/Community room is a safe place for children and the general public during adverse weather conditions. The station is being built to seismic and extreme weather conditions. The design of this building is also incorporating the heavy use of alternate energy sources such as solar power energy. | Southwest Township EMS & Fire Department | 100 | 0 to 30 days | \$5,000,000 |
| Hamilton | Over The Rhine Community Center and Aquatic Facility | Re-build existing center. The Over the Rhine Recreation Center and Aquatic Center serves the poorest neighborhood in the City of Cincinnati. The housing stock in the area is in the poorest condition of any area of the city. During adverse weather conditions the center is used as a place to stay warm in the winter during cold emergencies and cool in the summer during heat emergencies. Over the Rhine has the highest crime rate in the City of Cincinnati. Over the Rhine has a large percentage of single parent households. Over the Rhine is a densely built urban area with limited recreational opportunities for the population of the area. The recreation center and aquatic facility provides an island of calm in an often chaotic area. The center works with at risk youth and teenagers through its programs. The center provides a place for children to interact with adults who are positive role models. The center is a safe place for children to come when their parents are unable to care for them to play the many of the area youth value as well. The center provides an introduction to organized sports for many of the area youth and to a place that many of the area youth value as well. | Cincinnati Recreation Commission | 250 | 91 to 180 days | \$5,000,000 |
| Hamilton | Camp Washigton Community Recreation and Aquatic Facility | Re-build existing facility. The Camp Washington Recreation Center is located in the Camp Washington neighborhood of the City of Cincinnati. The existing recreation center has received minor remodeling since it was constructed. The pool and pool house have been virtually untouched since they were built. The Camp Washington Recreation Center and Aquatic Center serves the Camp Washington neighborhood one of the poorest neighborhoods in the City of Cincinnati. The housing stock in the area is in the poor condition relative to other areas of the city. Camp Washington has a high crime rate for the City of Cincinnati. The area has a large number of at risk youth and teenagers. The recreation facility and aquatic facility provides a place for the neighborhood to gather. The recreation center works with at risk youth and teenagers through its programs. The center provides an island of calm in an often chaotic area. The center works with at risk youth and teenagers through its programs. The center provides a place for children to interact with adults who are positive role models. The center is a safe place for children to come when their parents are unable to care for them to play the many of the area youth value as well. The center provides an introduction to organized sports for many of the area youth and to a place that many of the area youth value as well. | Cincinnati Recreation Commission | 200 | 91 to 180 days | \$3,000,000 |
| Hamilton | West Side Public Safety Facility | The Cincinnati Police Department seeks funding for design & construction of a two story Public Safety Building on Glenway Ave in an older neighborhood on Cincinnati's West Side. The facility will replace two older obsolete buildings, a fire station and a police district which is over 100 years old. The building will be Leadership in Energy and Environmental Design (LEED) certified and will include a storm water run off system for the collection and reuse of rain water for such things as landscape watering and refilling paper equipment for the fire department. The fire station will house fire apparatus, equipment, and personnel and will provide much needed storage for Homeland Security first responder supplies and equipment. The police station will be the latest tool in Community Problem Oriented Policing. Housing no only police officers but a state of the art office for the neighborhood crime analysts, the community oriented policing staff and a conference center for community meetings. The facility will be in direct proximity to several schools and will positively impact community and economic development. Re-build existing facility. The Price Hill Recreation Center was built in the late 1970's. The Price Hill Recreation Center is located in the Price Hill neighborhood of the city of Cincinnati. The existing recreation center has received minor remodeling since it was constructed. The center consists of several multi purpose rooms, a day care room, a gym and restrooms. The facility is in need of a major update. The Price Hill Recreation Center serves the Price Hill neighborhood in the City of Cincinnati. Price Hill is one of the poorest neighborhoods in the City of Cincinnati. The housing stock in the area is in the poor condition relative to other areas of the city. Price Hill has high crime rate for the City of Cincinnati. The area has a large number of at risk youth and teenagers. Price Hill is a densely built urban area with limited recreational opportunities for the population of the area. The area consists of a large number of late nineteenth and early twentieth century houses. The recreation facility provides a place for the neighborhood to gather. The recreation center provides an island of calm in an often chaotic area. The recreation center works with at risk youth and teenagers. The center provides a place for children to interact with adults who are positive role models. The center is a safe place for children to come when their parents are unable to care for them to play the many of the area youth value as well. The center provides an introduction to organized sports for many of the area youth and to a place that many of the area youth value as well. | Cincinnati Police Department | 150 | 31 to 90 days | \$21,000,000 |
| Hamilton | Price Hill Community Recreation Center | Re-build existing facility. The Price Hill Recreation Center was built in the late 1970's. | Hamilton | District 5 Police Station | The Cincinnati Police Department seeks funding for design & construction of a building to replace an older building which is no longer sufficient in size to house Community Oriented Policing (COP) services provided by this police district. The new building will become a two story Community Oriented Policing Public Safety building for the community. The Cincinnati Police Department, already recognized as a national leader in community oriented policing, will increase community participation by providing greater access to the community. The police station will be the latest tool in Community Problem Oriented Policing with a state of the art crime analysis office for the community oriented policing staff and a conference center for community meetings. The building will be Leadership in Energy and Environmental Design (LEED) certified. This project will utilize Geothermal HVAC, solar panel energy collectors, and solar energy efficient lighting with motion sensors to turn off lights in areas. A storm water run off system will be included for the collection and reuse of rain water for such things as landscape watering. | Cincinnati Police Department | 100 | 31 to 90 days | \$16,000,000 |
| Hamilton | Police Fleet Transition to Hybrid Vehicles | The Cincinnati Police Department seeks funding to purchase approximately 200 hybrid vehicles as replacement for a portion of the current fleet including court, administrative and support vehicles as well as 25% of current marked patrol vehicles. Budget constraints have necessitated delay in replacing vehicles which have exceeded their normal life cycle. Replacement with new hybrid vehicles would greatly reduce the department's repair and fuel costs. Long Term benefits include reducing of dependency, reducing pollution and stimulating the Hybrid vehicle market. Purchases would include Hybrid vehicles such as the Ford Fusion and Escape, and Chrysler Aspen. The Cincinnati Police Department (CPD) seeks funding to build an environmentally sound regional training complex designed to serve first responders in the areas of homeland security, firearms training, and riot dispersal. CPD has established a partnership with Hamilton County Emergency Management and the Southwest Ohio Homeland Security Terrorism Early Warning Group; and since there is not currently a facility of this type in the region, both support this project and acquisition is not necessary because CPD currently owns a 28 acre complex that is largely undeveloped except for an outdoor target range and an inefficient and environmentally unsound garage which will be removed. Two buildings are planned: a Firearms Training Center and a Homeland Security Training Center. Both buildings will be Leadership in Energy and Environmental Design (LEED) certified. The 20,000 sq ft Firearms Training Center will supplement the existing target range. The 25,000 sq ft Homeland Security Training Center will be constructed with modular rooms allowing for multiple training configurations suited for Simulations training, gas mask, riot training, and other first responder scenarios. The Cincinnati Police Department is currently participating in the Local Law Enforcement Violence Prevention Program, services include regional environmental training and Centralization of Data Sources related to criminal intelligence, Project Management of Nation's first Regional Automated License Plate Recognition System, Video and Audio Enhancement with 2 of only 20 internationally certified Analysts, Fingerprint Comparison and Identification, and Management and Staffing of the multi-county Emergency Operations Center. Absence of an adequate certified laboratory, limited office space & parking, as well as infrastructure and budgetary constraints impede the advancement of the project. Stimulus funds will be used to purchase and renovate an adjacent facility or construct a new facility and parking garage, expansion of current projects related to criminal intelligence gathering and data analysis, capacity enhancement for evidence collection and identification, enhanced information sharing, infrastructure improvements, and staffing of critical positions. | Cincinnati Police Department | 50 | 31 to 90 days | \$7,000,000 |
| Hamilton | First Responder Regional Training Center | The Cincinnati Police Department (CPD) seeks funding to build an environmentally sound regional training complex designed to serve first responders in the areas of homeland security, firearms training, and riot dispersal. | Hamilton | Findlay Market: Replacement of Refrigeration Equip | This project is to replace food refrigeration units in the historic Findlay Market. The units are owned by the City of Cincinnati as a way of helping small vendors remain viable in the market. Since overall sales would not cover the expense to replace these units and maintain them at current employment levels the City is responsible for this work thereby maintaining over 100 jobs and creating opportunity for 10 more. Built in 1853 Findlay market operates in the neighborhood of Over the Rhine just north of downtown Cincinnati serving a predominantly low income clientele. The City of Cincinnati subsidizes operations of Findlay Market with Community Block Development Grants and general operating funds to maintain this vital service in a low income area. Due to its location, immediate access to public transportation and walking distance to all 8,000 residents of Over the Rhine this market will remain in use for decades to come. As part of a major development effort the surrounding area is undergoing construction of new housing and a major draw for this investment of private funds is the adjacency of the market house and the active vendor stalls. | City of Cincinnati | 10 | 91 to 180 days | \$180,000 |
| Hamilton | Thomas Kidd Adult Center | Re-surfacing of existing parking lot | Hamilton County MRDD | 20 | 91 to 180 days | \$47,227 |
| Hamilton | Thomas Kidd Adult Center | Replace existing roof | Hamilton County MRDD | 20 | 91 to 180 days | \$528,000 |
| Hamilton | Cincinnati Police Training Academy | The Cincinnati Police Department seeks funding for design & construction of an environmentally sound, multi-purpose Training Academy to serve the local police department in other regional agencies. Approximately 25 acres of land must be acquired. This area is several sites in Cincinnati that are suitable for this development project, which will positively impact community and economic development. The building will be Leadership in Energy and Environmental Design (LEED) certified. This 160,000 sq ft Training Academy will serve the entire city and region with the ability to simultaneously train police recruit classes, provide in-service training for officers, act as a testing center, host events and conferences, and serve as a law enforcement branch college campus with a pre-incident law enforcement and homeland security curriculum with an emphasis on Spanish and foreign language skills. Partnerships with accredited colleges and universities are already in place to provide such educational opportunities. The Academy will also serve as a Health Emergency Point of Distribution (POD) in the event of a pandemic situation or terrorist attack. | Cincinnati Police Department | 250 | 31 to 90 days | \$35,000,000 |
| Hamilton | City of Forest Park - Evidence/Property Room Addit | The Forest Park Police Department is out of space to store evidence that has been collected at crime scenes. The space is vitally necessary to maintain evidence integrity. Evidence integrity is essential for court presentation for the prosecution of criminals involved in an incident. A minimal area could be lost to court if evidence contamination could be proven in court by defense attorneys. The building addition would provide the additional space desperately needed to maintain evidence integrity. The building addition was planned to be constructed in 2008 as an extension to the existing property room of the Police Facility. The structure would have to be constructed securely and equipped with proper lighting, insulation and HVAC. Currently, the City of Forest Park has minimum funding for this project. Construction of the project will only move forward when funding becomes available. This project is shored ready with plans being complete. | City of Forest Park | 20 | 0 to 30 days | \$390,000 |
| Hamilton | Findlay Market North Addition Tuck Pointing | This project is to begin tuck pointing of the historic 1853 Findlay Market's exterior masonry. This would create jobs for 6 individuals during the work. Built in 1853 Findlay market operates in the neighborhood of Over the Rhine just north of downtown Cincinnati serving a predominantly low income clientele. The City of Cincinnati subsidizes operations of Findlay Market with Community Block Development Grants and general operating funds to maintain this vital service in a low income area. Due to its location, immediate access to public transportation and walking distance to all 8,000 residents of Over the Rhine this market will remain in use for decades to come. As part of a major development effort the surrounding area is undergoing construction of new housing and a major draw for this investment of private funds is the adjacency of the market house and the active vendor stalls. | City of Cincinnati | 6 | 91 to 180 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Hamilton | First Responder Regional Training Complex | The Cincinnati Police Department (CPD) seeks funding to build an environmentally sound regional training complex designed to serve first responders in the areas of homeland security, firearms training, and civil disasters. CPD has established a partnership with Hamilton County Emergency Management and the Southwest Ohio Homeland Security Terrorism Early Warning Group; and since there is not currently a facility of this type in the region, both support this project. Land acquisition is not necessary because CPD currently owns a 28-acre complex that is largely undeveloped except for an outdoor target range and an inefficient and environmentally unsound garage house which will be removed. Two buildings are planned: a Firearms Training Center and a Homeland Security Training Center. Both buildings will be designed to meet the National Fire Protection Association (NFPA) (LEED) certified. The 20,000 sq ft Firearms Training Center will supplement the existing target range. The 25,000 sq ft Homeland Security Training Center will be constructed with modular rooms allowing for multiple training configurations suited for Simulations training, gas training, rapid training, and other first response scenarios. | Cincinnati Police Department | 100 | 31 to 90 days | \$16,000,000 |
| Hamilton | Install AWOS, Site Improvements | Install Automated Weather Observing System, Site Improvements | Cincinnati West Airport | 10 | 31 to 90 days | \$300,000 |
| Hamilton | West Side Public Safety Facility | The Cincinnati Police Department seeks funding for design & construction of a "one stop Public Safety building" on Glenway Ave in an older neighborhood on Cincinnati's West Side. The facility will replace two other disaster buildings, a fire station and police district which is over 100 years old. The building will be designed to Energy and Environmental Design (LEED) certified and will include a storm water run off system for the collection and reuse of rain water for such things as landscape watering and filling purifier apparatus for the fire department. The fire station will house the apparatus, equipment, and will provide all the much needed storage for Homeland Security and other equipment. The police station will be the latest lot in Community Problem Oriented Policing, housing not only patrol officers but a suite of the art office for the neighborhood crime analysis, the community oriented policing staff and a conference center for community meetings. The facility will be in direct proximity to several schools and will positively impact community and economic development. | Cincinnati Police Department | 150 | 31 to 90 days | \$21,000,000 |
| Hamilton | Thomas Kidd Adult Center | Renovate restrooms to make them barrier free | Hamilton County MRDD | 10 | 181 days or more | \$59,400 |
| Hamilton | City of Forest Park - Sharon and Winton Traffic Signal | City of Forest Park - Sharon and Winton Traffic Signal | City of Forest Park | 5 | 0 to 30 days | \$120,000 |
