| Hamilton | CRIV Renovation for Neighborhood Operation Center | This project will involve the renovation of space in the Over the Rhine neighborhood of Cincinnati to serve as an operation center for CRIV, Cincinnati Initiative to Reduce Violence. The CRIV program began in 2007 as a multi-agency and community effort aimed to reduce gun violence and homicides. Four strategic teams of law enforcement, researchers, social service agencies and community leaders work to reduce street homicide, gang-related violence and engage members of violent groups to connect with social services, training, education and employment opportunities. For the year ending December 31, 2008, group member-involved homicides decreased 23.4 percent, group member-involved homicides for the 15-month period prior to CRIV started 71; the total for the 15 months after CRIV began (October 2007 to December 2008) was 43, a decrease of 39.4 percent. Of 403 probationers and parolees involved in "call-in" sessions, 300 attended at least one session; 207 CRIV clients have started job training, and 88 are currently employed. Support of this program has and will continue to result in employment of the clients, contractors and full time staff of at least 6. | City of Cincinnati | 8 | 31 to 90 days | \$250,000 |
| Hamilton | Northside Warehouse | Resurface existing parking lot | Hamilton County MRDD | 10 | 91 to 180 days | \$49,280 |
| Hamilton | Construction and Demolition Debris Recycling Centre | The Leadership in Energy and Environmental Design (LEED) Green Building Rating System™, developed by the US Green Building Council, encourages and accelerates global adoption of sustainable green building and development practices through the creation and implementation of universally understood and accepted tools and performance criteria. Local LEED Green Building Council Members, Cincinnati Public Square, developers, community building to LEED standards have indicated that recycling C & D waste to LEED standards is commonly difficult and expensive because we do not have a facility locally that can process all the materials. The estimated total amount of demolition debris and being landfilled could be processed as a new state of the art facility. Materials to be recycled include scrap steel, cardboard, wood, drywall, roofing, carpeting. Wood will be used for bobcat. The city of Cincinnati will partner with a local company to site, design, build and operate the facility. | City of Cincinnati, Office of Environmental Quality | 1180 | 31 to 90 days | \$5,000,000 |
| Hamilton | Northside Warehouse | Replace existing roof | Hamilton County MRDD | 10 | 181 days or more | \$406,192 |
| Hamilton | City Hall Partial Roof Replacement with Vegetative | This project at Cincinnati's City Hall will partially install a green roof to use as a means of advocating the latest green technology. This will be done on an area accessible to visitors of the City Hall for viewing and planting for hands on access. The green roof structure hosts numerous artists, developers, school teachers and others and is a prime location for establishing a leadership program. The roof work will result in immediate employment of a contractor. Long term the City of Cincinnati's Environmental Action plan is directed at using education to increase awareness, involvement and participation in the local law enforcement terrorism prevention program. Services include Regional Information Sharing and Centralization of Data Sources related to criminal intelligence, Project Management of Nelson's first Regional Automated License Plate Recognition System, Video and Audio Enhancement with 2 of only 20 nationally certified Analytic, Forensic Comparison and Identification, and Management and Staffing of the multi-county Emergency Operators Center. Absence of an adequate certified laboratory, limited office space for parking, as well as various infrastructure and budgetary concerns impede the advancement of the project. Stimulus funds will be used to purchase and renovate an adjacent facility or construct a new facility and parking garage, expansion of current projects related to criminal intelligence gathering and data analysis, capacity and identification, enhanced information infrastructure improvements, and staffing of critical positions. | City of Cincinnati | 8 | 91 to 180 days | \$300,000 |
| Hamilton | Regional Technology/Information Sharing Center | The Cincinnati Police Department seeks funding to expand the technology/information sharing facility which serves as a resource for the region through mutual aids and participation in the Local Law Enforcement Terrorism Prevention Program, Services include Regional Information Sharing and Centralization of Data Sources related to criminal intelligence, Project Management of Nelson's first Regional Automated License Plate Recognition System, Video and Audio Enhancement with 2 of only 20 nationally certified Analytic, Forensic Comparison and Identification, and Management and Staffing of the multi-county Emergency Operators Center. Absence of an adequate certified laboratory, limited office space for parking, as well as various infrastructure and budgetary concerns impede the advancement of the project. Stimulus funds will be used to purchase and renovate an adjacent facility or construct a new facility and parking garage, expansion of current projects related to criminal intelligence gathering and data analysis, capacity and identification, enhanced information infrastructure improvements, and staffing of critical positions. | Cincinnati Police Department | 100 | 31 to 90 days | \$15,000,000 |
| Hamilton | Findlay Market Security Lighting & Parking Upgrade | Phase one involves: 1) add signage markers to perimeter to reduce crime and security on persons from outside the immediate neighborhood. Increasing patterns will increase need for employees and vendor booths resulting in a minimum of 8 jobs created. Built in 1887 Findlay Market occupies the northeast corner of the intersection of Over the Rhine just north of downtown Cincinnati serving a predominantly low income clientele. The City of Cincinnati subsidizes operators of Findlay Market with Community Block Development Grants and general operating funds to maintain this vital service in a low income area. Due to its location, immediate access to public transportation and parking distance to all 12,000 residents of Over the Rhine this market will remain in use for decades to come. As part of a larger development effort the surrounding area is undergoing construction of new housing and a draw for this investment of private funds is the adjacency of the market house and the active vendor stalls. | City of Cincinnati | 6 | 91 to 180 days | \$200,000 |
| Hamilton | Hoff Academic Quad - Phase 1B | University Library, and modernization of the Alter Hall classroom building, and associated site work. James E. Hoff, S.J., Academic Quad The centerpiece of a sweeping campus transformation, the Hoff Academic Quad will enable Xavier to meet the learning needs of 21st century students as well as any college university in the nation. Phase 1B of the project will include two new academic facilities—the Learning Commons and a new building for the William College of Business, is currently underway. Phase 1B is the modernization of the Alter Hall classroom building and University Library and associated site work is on hold pending acquisition of funding. Alter Hall Xavier's primary classroom building for nearly 50 years will be reinvented to support a variety of teaching strategies in rooms infused with the technologies that enhance the learning environment. The renovated classroom spaces will be functional and symbolic representations of Xavier's commitment to its Jesuit tradition of providing engaging, challenging and rigorous learning environments for its students, while energetically embracing the future. | Xavier University | 150 | 0 to 30 days | \$25,600,000 |
| Hamilton | CRIV Renovation for Neighborhood Operation Center | This project will involve the renovation of space in the Over the Rhine neighborhood of Cincinnati to serve as an operation center for CRIV, Cincinnati Initiative to Reduce Violence. The CRIV program began in 2007 as a multi-agency and community effort aimed to reduce gun violence and homicides. Four strategic teams of law enforcement, researchers, social service agencies and community leaders work to reduce street homicide, gang-related violence and engage members of violent groups to connect with social services, training, education and employment opportunities. For the year ending December 31, 2008, group member-involved homicides decreased 23.4 percent, group member-involved homicides for the 15-month period prior to CRIV started 71; the total for the 15 months after CRIV began (October 2007 to December 2008) was 43, a decrease of 39.4 percent. Of 403 probationers and parolees involved in "call-in" sessions, 300 attended at least one session; 207 CRIV clients have started job training, and 88 are currently employed. Support of this program has and will continue to result in employment of the clients, contractors and full time staff of at least 6. | City of Cincinnati | 8 | 31 to 90 days | \$250,000 |
| Hamilton | Northside MRDD Warehouse | Replace existing HVAC systems to improve quality of air and energy efficiency | Hamilton County MRDD | 10 | 181 days or more | \$406,192 |
| Hamilton | Energy Efficiency for various City Facilities | This project involves various efforts in City buildings to improve energy efficiency, reduce utility cost and decrease the City's carbon footprint. The City of Cincinnati just completed an energy audit of 88 facilities covering almost 2,000,000 square feet used and found projects covering HVAC, electric, lighting, digital controls, noise and sensor well systems that require action. Completion of this work will result in the reduction in use of 3,510,838 kWh of electricity per year, 116,527 ccf of natural gas and an overall reduction of 832 tons of CO2 from the atmosphere. The work will involve almost 150 different employees working and learning various trades and technology in what would be the largest environmental conversion in the region. Additionally funds saved by reducing cost can be utilized for maintaining staff level or more work thereby creating more opportunity for employment. | City of Cincinnati | 150 | 31 to 90 days | \$11,000,000 |
| Hamilton | Business Development Roof Replacement with a green | This project at Cincinnati's Business Development and Permit Center (BDPC) involves the complete replacement of that current roof with a vegetative roof. This building serves as the hub for all development projects, zoning and construction permit activity at the City of Cincinnati and numerous citizens, developers, and contractors visit this building. Employees of the BDPC have been part of a pilot program to show how employees actions can greatly reduce energy usage and so far have reduced 10% less energy than the previous year. The next phase of this pilot program is to begin updating systems and the exterior to further reduce energy use and to be used as a public display of the opportunities and savings available. This roof work will result in immediate employment of 15 full time staff. Long term the City of Cincinnati's Environmental Action plan is directed at using education to increase awareness, involvement and installation of green technology thereby creating jobs and reducing carbon footprint. | City of Cincinnati | 15 | 31 to 90 days | \$230,000 |
| Hamilton | MRDD Support Center | Install new generator to allow for the building to have uninterrupted power. This would provide for better service. | Hamilton County MRDD | 10 | 181 days or more | \$276,500 |
| Hamilton | CRIV Renovation for Neighborhood Operation Center | This project will involve the renovation of space in the Over the Rhine neighborhood of Cincinnati to serve as an operation center for CRIV, Cincinnati Initiative to Reduce Violence. The CRIV program began in 2007 as a multi-agency and community effort aimed to reduce gun violence and homicides. Four strategic teams of law enforcement, researchers, social service agencies and community leaders work to reduce street homicide, gang-related violence and engage members of violent groups to connect with social services, training, education and employment opportunities. For the year ending December 31, 2008, group member-involved homicides decreased 23.4 percent, group member-involved homicides for the 15-month period prior to CRIV started 71; the total for the 15 months after CRIV began (October 2007 to December 2008) was 43, a decrease of 39.4 percent. Of 403 probationers and parolees involved in "call-in" sessions, 300 attended at least one session; 207 CRIV clients have started job training, and 88 are currently employed. Support of this program has and will continue to result in employment of the clients, contractors and full time staff of at least 6. | City of Cincinnati | 8 | 31 to 90 days | \$250,000 |
| Hamilton | MRDD Support Center | Install new cameras to improve safety and security at the building | Hamilton County MRDD | 5 | 91 to 180 days | \$22,400 |
| Hamilton | Blacktop Project | Repair damaged blacktop at 10 school buildings. | Winton Woods City Schools | 25 | 91 to 180 days | \$450,000 |
| Hamilton | Centennial 2 Photovoltaic Panels Installation | This project involves the installation of a photo voltaic system on the roof of the largest office building operated by the City of Cincinnati, Centennial Two. The renewable energy created by this system will be utilized to support the building and reduce overall carbon footprint. Initial calculations and design concepts have been completed and this project will result in the employment of 10 staff and other activities. This project will involve the renovation of space in the Over the Rhine neighborhood of Cincinnati to serve as an operation center for CRIV, Cincinnati Initiative to Reduce Violence. The CRIV program began in 2007 as a multi-agency and community effort aimed to reduce gun violence and homicides. Four strategic teams of law enforcement, researchers, social service agencies and community leaders work to reduce street homicide, gang-related violence and engage members of violent groups to connect with social services, training, education and employment opportunities. For the year ending December 31, 2008, group member-involved homicides decreased 23.4 percent, group member-involved homicides for the 15-month period prior to CRIV started 71; the total for the 15 months after CRIV began (October 2007 to December 2008) was 43, a decrease of 39.4 percent. Of 403 probationers and parolees involved in "call-in" sessions, 300 attended at least one session; 207 CRIV clients have started job training, and 88 are currently employed. Support of this program has and will continue to result in employment of the clients, contractors and full time staff of at least 6. | City of Cincinnati | 10 | 91 to 180 days | \$250,000 |
| Hamilton | CRIV Renovation for Neighborhood Operation Center | This project will involve the renovation of space in the Over the Rhine neighborhood of Cincinnati to serve as an operation center for CRIV, Cincinnati Initiative to Reduce Violence. The CRIV program began in 2007 as a multi-agency and community effort aimed to reduce gun violence and homicides. Four strategic teams of law enforcement, researchers, social service agencies and community leaders work to reduce street homicide, gang-related violence and engage members of violent groups to connect with social services, training, education and employment opportunities. Support of this program has and will continue to result in employment of the clients, contractors and full time staff of at least 6. | City of Cincinnati | 8 | 31 to 90 days | \$250,000 |
| Hamilton | Fairfax School | Provide new play ground equipment to replace existing. Bring up to code and for janitor's bay | Hamilton County MRDD | 5 | 31 to 90 days | \$13,200 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-----------------------------------|----------------|--------------------|---------------------------|
| Hamilton | South Hamilton Avenue Mixed Use Office/Retail Comp | Project entails acquisition and demolition of a vacant gas station and two other adjoining vacant retail properties at the strategic intersection of South Hamilton Avenue and Hamilton Avenue. The North College Hill Master Plan calls for the elimination of this possible brownfield and the redevelopment of the site with a mixed-use office/retail development. This project comprises approximately 1.0 acre and six highly visible parking lots located at the city's "100% retail corner". The gas tanks have been removed and a "No Further Action" (NFA) letter is being secured from EPA. The property owner has agreed to undertake any required remediation for the HRF. All three properties are listed for sale and this project is ready to proceed. The city will leverage \$120,000 in approved CDBG funds toward the project. The city is working with a developer who is interested in redeveloping the site with an office/retail building that will employ approximately 60 new jobs. Three potential sites have been identified for the project. | City of North College Hill | 60 | 31 to 90 days | \$580,000 |
| Hamilton | CRV Renovation for Neighborhood Operation Center | This project will involve the renovation of space in the Over the Rhine neighborhood of Cincinnati to serve as an operation center for CRV. Cincinnati Initiative to Reduce Violence. The CRV program began in 2007 as a multi-agency and community effort aimed to reduce gun violence and homicides. Four strategic teams of law enforcement, researchers, social service agencies and community leaders work to reduce street homicide, gang-related violence and engage members of violent groups to connect with social services, training, education and employment opportunities. For the year ending December 31, 2008, group member-involved homicides decreased 24.4 percent, group member-involved homicides for the 15-month period prior to CRV ended 71, the total for the 15 months after CRV began (October 2007 to December 2008) was 43, a decrease of 39.4 percent. Of 403 probationers and parolees invited to "call-in" sessions, 300 attended at least one session, 207 CRV clients have started job training, and 48 are currently employed. Support of this program has and will continue to result in employment of the business, contractors and full time staff of at least 8. | City of Cincinnati | 8 | 31 to 90 days | \$250,000 |
| Hamilton | 400 Wyoming Avenue Energy Improvement Program | Energy Efficiency Rehabilitation of this City owned building including the installation of a geo-thermal heating and cooling system with HVAC upgrade. Installation of energy efficient windows and doors. Upgrade lighting system to energy efficient lighting system. | City of Wyoming | 12 | 0 to 30 days | \$450,000 |
| Hamilton | Westfork Incinerator Assessment and Demolition | This project is for the assessment, demolition and clean up of a waste incinerator closed in the early 1970's and sitting vacant in depressed neighborhood. The Westfork Incinerator, built in 1954 has stood vacant since the early 1970's and requires abatement of heavy metals, asbestos and other contaminants that need to be identified in the assessment. The surrounding low income neighborhood has occurred the construction of a new school less than 500 yards away from this incinerator and other potential improvements are hampered by this vacant facility. The project will result in 25 people being employed. | City of Cincinnati | 35 | 181 days or more | \$3,000,000 |
| Hamilton | 500-506 Wyoming Avenue | Modernize this publicly owned building with energy efficient windows and insulation. | City of Wyoming | 8 | 0 to 30 days | \$250,000 |
| Hamilton | School Window Replacement | Replace middle school and high school buildings current single pane casement windows with new energy efficient windows. | Winton Woods City Schools | 30 | 91 to 180 days | \$950,000 |
| Hamilton | Science Lab Upgrade Capacity | Expected Outcome: Energy Efficiency, lower operational costs, improved learning environment. Winton Woods Elementary Grades 3-4 Add one fully equipped hands on experiential lab Capacity of 30 students Add technology infrastructure to allow for first evidence gathering and observation by students Winton Woods Intermediate Grades 4-6 Add one fully equipped hands on experiential lab Capacity of 50 students Add technology infrastructure to allow for first evidence gathering and observation by students Winton Woods Middle School Replace 2 science lab hoods in current labs Add one fully equipped science lab Capacity of 30 students Add technology infrastructure to allow for first evidence gathering and observation by students Winton Woods High School Replace 3 science lab hoods in current labs Add one fully equipped science lab Capacity of 50 students Add technology infrastructure to allow for first evidence gathering and observation by students | Winton Woods City School District | 30 | 91 to 180 days | \$350,000 |
| Hamilton | Cincinnati Fire Station 14: Vegetated Roof | The Cincinnati Fire Department's Headquarters is in need of a new roof. This should mean project would involve a complete replacement of the current roof with a green roof. The building is located downtown adjacent to the Duke Energy Convention Center, which is visible to almost all downtown participants. The Convention Center costs hundreds of thousands of dollars, visitors, and school children). Therefore, the Fire Department is a prime location to be part of the City's effort to establish learning opportunities on green technology. The roof work will result in immediate employment of 15 contractors. In the long term, the City of Cincinnati's Environmental Action plan is devoted to using education to increase awareness, involvement and installation of green technology. These efforts will help create jobs and help to reduce Cincinnati's carbon footprint. | Cincinnati Fire Department | 15 | 91 to 180 days | \$500,000 |
| Hamilton | Wastewater Engineering Building for MSD | The City of Cincinnati is in the process of constructing a new Wastewater Engineering Building for the Metropolitan Sewer District (MSD) on a 100,000 sq ft site in the Lower Price Hill neighborhood, a low income neighborhood area surrounded by light industry. The project involves renovating an existing building, constructing a LEED Gold office building and using the new office as a catalyst for an adjoining 17 acre development site which is being remediated and sold at this time. The goal is to invest in the site and begin investment in companies who will be working with this group in moving to the adjacent development area as the MSD works on a 20 year upgrade of the entire county sewer system. The project would employ 30 people in the construction and be a catalyst for many additional positions once it is fully operating. | City of Cincinnati | 30 | 31 to 90 days | \$2,000,000 |
| Hamilton | CRV Renovation for Neighborhood Operation Center | This project will involve the renovation of space in the Over the Rhine neighborhood of Cincinnati to serve as an operation center for CRV. Cincinnati Initiative to Reduce Violence. The CRV program began in 2007 as a multi-agency and community effort aimed to reduce gun violence and homicides. Four strategic teams of law enforcement, researchers, social service agencies and community leaders work to reduce street homicide, gang-related violence and engage members of violent groups to connect with social services, training, education and employment opportunities. For the year ending December 31, 2008, group member-involved homicides decreased 24.4 percent, group member-involved homicides for the 15-month period prior to CRV ended 71, the total for the 15 months after CRV began (October 2007 to December 2008) was 43, a decrease of 39.4 percent. Of 403 probationers and parolees invited to "call-in" sessions, 300 attended at least one session, 207 CRV clients have started job training, and 48 are currently employed. Support of this program has and will continue to result in employment of the business, contractors and full time staff of at least 8. | City of Cincinnati | 8 | 31 to 90 days | \$250,000 |
| Hamilton | Cincinnati Fire Station 8 | In Cincinnati there is a critical need to build new fire stations in older neighborhoods. Current buildings used by the fire department are too small for modern fire and emergency medical response equipment. Built in 1931, Fire Station 8 has room for fire truck and the area is too limited to house emergency equipment. The current station cannot support emergency medical response equipment or other modern fire equipment to meet the changing demographics of the area. The project is to build a new station on land that the City is in the process of purchasing, which other allows this project to be shovel ready. The work will result in the employment of over 75 individuals in the construction of the facility, as well as support several material supply companies. The Cincinnati Fire Department was organized in 1853 and is the nation's oldest fully paid professional fire department. The City of Cincinnati operates every six stations, of which fourteen are over eighty years old. Therefore, this project is considered a high priority. | Cincinnati Fire Department | 75 | 181 days or more | \$5,000,000 |
| Hamilton | Fairfax School | Provide new walkway canopy to allow for easy access to buses | Hamilton County MRDD | 10 | 181 days or more | \$198,000 |
| Hamilton | Cincinnati Fire Regional Training Center | In the Fire Service today, there is much greater awareness than ever before of the need for realistic, innovative and effective fire training and the training facilities. This has occurred as a result of the additional responsibilities in the form of emergency medical response. Weapons of Mass Destruction (WMD) preparedness, technical rescue and increased expectations for fire response. Also, as DHS's USAS grant program has evolved, it has placed increased emphasis upon the Cincinnati Fire Department to configure their four homeland security mission areas (prevent, protect, respond and recover) within a regional scope. The Fire Department is responding accordingly by improving training for a regional training facility that specifically prepares responders for these situations. There is need to replace the current antiquated and inadequate facilities currently being used. The project will provide training to the region's firefighters simultaneously with Cincinnati firefighters, to improve interoperability with departments. This project could provide a work opportunity for area construction workers and companies. Thus, creating job opportunities within the region. | Cincinnati Fire Department | 30 | 91 to 180 days | \$8,000,000 |
| Hamilton | Cincinnati Fire Station 14 Renovation | Built in 1962, Fire Station 14 is located in downtown Cincinnati and serves as the headquarters for the Fire Department and all administrative functions. The fire station still operates five response companies with five engines, a ladder truck, ambulance, heavy rescue and bomb squad in a building built for just three companies. This has occurred as a result of the additional responsibilities in the form of emergency medical response. Weapons of Mass Destruction (WMD) preparedness, technical rescue and increased expectations for fire response. The station has had minor renovations since 1962, however it still utilizes the original 1960's heating and cooling system. The station does not have the facilities for the female fire fighters, who must also share space with the office workers. The project will result in the employment of 45 construction staff, during a major renovation to bring the facility up to modern standards. This project currently has current estimates and is shovel ready for entry within our city process. | Cincinnati Fire Department | 45 | 181 days or more | \$6,000,000 |
| Hamilton | School Roofing Project | Replace roofs at select school buildings. Expected outcome - Decreases economic impact of HVAC and reduces environmental contamination caused by leaks. | Winton Woods City Schools | 50 | 31 to 90 days | \$600,000 |
| Hamilton | Various Renovations to Cincinnati Fire Stations | The Cincinnati Fire Department was organized in 1853 and is the nation's oldest fully paid professional fire department. The City of Cincinnati operates every six stations, of which fourteen are over eighty years old. Therefore, this project is considered a high priority. The project will result in the immediate employment of 35 construction personnel as work will proceed at three of these buildings. The work scope includes painting, roof replacement, boiler replacement, in addition to one location and numerous other activities that can begin in ninety days. The project is based on maintaining the current infrastructure and avoiding future increased expenses if items are not addressed at this time. This project is shovel ready. | Cincinnati Fire Department | 35 | 31 to 90 days | \$2,328,000 |
| Hamilton | CRV Renovation for Neighborhood Operation Center | This project will involve the renovation of space in the Over the Rhine neighborhood of Cincinnati to serve as an operation center for CRV. Cincinnati Initiative to Reduce Violence. The CRV program began in 2007 as a multi-agency and community effort aimed to reduce gun violence and homicides. Four strategic teams of law enforcement, researchers, social service agencies and community leaders work to reduce street homicide, gang-related violence and engage members of violent groups to connect with social services, training, education and employment opportunities. For the year ending December 31, 2008, group member-involved homicides decreased 24.4 percent, group member-involved homicides for the 15-month period prior to CRV ended 71, the total for the 15 months after CRV began (October 2007 to December 2008) was 43, a decrease of 39.4 percent. Of 403 probationers and parolees invited to "call-in" sessions, 300 attended at least one session, 207 CRV clients have started job training, and 48 are currently employed. Support of this program has and will continue to result in employment of the business, contractors and full time staff of at least 8. | City of Cincinnati | 8 | 31 to 90 days | \$250,000 |
| Hamilton | Cincinnati Fire Department - Emergency Generators | Fire Service today now has additional responsibilities in the form of emergency medical response. Weapons of Mass Destruction (WMD) preparedness, technical rescue and increased expectations for fire response. During the past decade the need for generating operations during a disaster, either natural or man made has been brought to the forefront. Within the past few months, the Cincinnati area has had several windstorms and one ice storm. The Fire Department is in need of generators for its fire stations, as is several of their fire stations but power during the fire stations in September of 2008. The Department is responding accordingly by requesting funds for installation of four generators at the four district stations to support operations during any local and regional event. The work will result in the employment of 15 individuals for the installation of the equipment, as well as those involved in the manufacturing of the equipment. With financing, this project is shovel ready. | Cincinnati Fire Department | 15 | 181 days or more | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------------|----------------|--------------------|---------------------------|
| Hamilton | Highly Qualified Professional Development in Reading | Provide administrators, staff and parents Highly Qualified Professional Development (HQPD) in the areas of: reading comprehension, fluency, vocabulary, phonics, and grammar. HQPD will be provided through coaching, model lessons, on-site workshops, summer institutes, and parent education events. HQPD will be provided by staff and contracted vendors. Laboratory classrooms will be established for embedded, ongoing and supported HQPD. Evidence of a successful project will be: improved student achievement in reading on state mandated achievement tests, and documentation of teacher's implementation of research-based best practices in reading instruction. | Princeton City Schools | 2.0 | 0 to 30 days | \$200,000 |
| Hamilton | Cincinnati Fire Station 35 - New Construction | In Cincinnati there is a critical need to build new fire stations in older neighborhoods. Current buildings used by the fire department are too small for modern fire and emergency medical response equipment. Built in 1907, Fire Station #35 serves over 36,000 citizens in the largest Cincinnati neighborhood and is only has room for one fire truck. The building does not have facilities for female employees and cannot support emergency medical response equipment or other functions of a modern department to meet the changing demographics of the area. The project will result in the employment of over 75 individuals in the construction of the facility, as well as support several material supply companies. The City of Cincinnati operates twenty six stations, of which fourteen are over eighty years old. Therefore, this project is considered a high priority. | Cincinnati Fire Department | 75 | 181 days or more | \$5,000,000 |
| Hamilton | Hybrid/ Alternative Fuel/ Electric Car Power Station | The City of Cincinnati has begun the process of purchasing hybrid and other alternative fuel vehicles. As part of this program the infrastructure to support these vehicles needs to be created and put in place for use by the City and potentially citizens. This program would be to start the process of studying options for installing the support system and potentially installing the first ones. At first this will employ up to 5 employees to design and eventually 35 to install the infrastructure. | City of Cincinnati | 35 | 91 to 180 days | \$400,000 |
| Hamilton | Cincinnati Fire Station 49 - New Construction | In Cincinnati there is a critical need to build new fire stations in older neighborhoods. Current buildings used by the fire department are too small for modern fire and emergency medical response equipment. Built prior to 1900, Fire Station #49 serves an area undergoing major development of office buildings, light industrial facilities and condominiums, yet only has room for one fire truck. The building does not have facilities for female employees and cannot support emergency medical response equipment or other functions of a modern department to meet the changing demographics of the area. The project will result in the employment of over 75 individuals in the construction of the facility, as well as support several material supply companies. The City of Cincinnati operates twenty six stations, of which fourteen are over eighty years old. Therefore, this project is considered a high priority. | Cincinnati Fire Department | 75 | 181 days or more | \$5,000,000 |
| Hamilton | Data Analysis | Provide Coaching for schools to support principals and staff in data collection, analysis and problem solving in the building, student group, and individual student levels for the purpose of improving student achievement. | Princeton City Schools | 5 | 0 to 30 days | \$400,000 |
| Hamilton | Cincinnati Fire Station 8 - New Construction | In Cincinnati there is a critical need to build new fire stations in older neighborhoods. Current buildings used by the fire department are too small for modern fire and emergency medical response equipment. Built in 1931, Fire Station #8 has room for one fire truck and there are no facilities for female employees. The current station cannot support emergency medical response equipment or other functions of a modern department to meet the changing demographics of the area. The project is to build a new station on land that the City is in the process of purchasing, which further allows this project to be shovel ready. The work will result in the employment of over 75 individuals in the construction of the facility, as well as support several material supply companies. The Cincinnati Fire Department was organized in 1853 and is the nation's oldest fully paid professional fire department. The City of Cincinnati operates twenty six stations, of which fourteen are over eighty years old. Therefore, this project is considered a high priority. | Cincinnati Fire Department | 75 | 181 days or more | \$5,000,000 |

| Hamilton | 2009 Firefighter Retention in Cincinnati | This City of Cincinnati is closely monitoring its 2009 revenues. The City Manager requested all departments "pork" 5% of its current year funding, which equals approximately \$3,700,000 for the Fire Department. Our approved budget amount is \$73,465,460, broken out as \$65,557,400 in personnel and \$7,888,000 for non-personnel items. Our nonpersonnel expenses include: heating our firestations (28 stations), gasoline for repairs, municipal garage expenses, medical director contract, etc. Personnel expenses account for 89% of our budget, therefore, to reduce personnel by 5% would translate to 100 firefighter positions and the elimination of 10 companies. The Cincinnati Fire Department is an urban department, consisting of 841 sworn members. We have researched other funding sources and SAFER funding cannot be used to avoid layoffs. The abandonment of additional companies will have a significant impact on the Fire Department and citizens of the City of Cincinnati. The most significant impact will be the increased response time for companies to arrive at the scene of emergency. This more than likely will result in an increase in loss of life and property for citizens and firefighters. | City of Cincinnati - Fire Department | 100 | 181 days or more | \$3,720,898 |

| Hamilton | CRV Neighborhood Operations Center | This project will involve the renovation of space in the Over the River Rhine neighborhood of Cincinnati to serve as an operation center for CRV. Cincinnati Initiative to Reduce Violence). The CRV program began in 2007 as a multi-agency and community effort aimed to reduce gun violence and homicides. Four strategic teams of law enforcement, researchers, social service agencies and community leaders work to reduce street homicide ganging violence and engage members of violent groups to connect with social services, training, education and employment opportunities. For the year ending December 31, 2008, group member-involved homicides decreased 24.4 percent, group member-involved homicides for the 12-month period prior to CRV totaled 71; the total for the 12 months after CRV began (October 2007 to December 2008) was 54, a decrease of 39.4 percent. Of 403 probationers and parolees involved in "walk off" sessions, 300 attended at least one session, 207 CRV clients have started job training, and 68 are currently employed. Support of this program has and will continue to result in employment of the services, contractors and full time staff at least 8. | City of Cincinnati | 8 | 31 to 90 days | \$250,000 |

| Hamilton | Positive Behavior Supports | Each school will implement a system of positive behavior supports for all students including explicit instruction of school wide expectations, tiers of culturally responsive support for students not meeting expectations, a system for monitoring student progress and problem solving and a system of rewards. Support for problem solving and instructional practices for staff, administrators and parents will be provided through coaching and district personnel. Model lessons will be recorded for instruction to students. Expected Outcomes include a 20% improvement in attendance and a 25 - 30% reduction in suspensions and expulsions following the first full year of implementation. It is anticipated that these outcomes will continue to improve each year as these support systems impact increasing numbers of students. | Princeton City Schools | 5 | 0 to 30 days | \$50,000 |

| Hamilton | Material Recovery Facility Upgrade | Recycling saves energy. The city of Cincinnati would like to enhance the recycling infrastructure in our region with new technology. The current processor in our region has old equipment that is nearing the end of its useful life and is inefficient. It also has very limited climate control capabilities, lowering the quality of the work environment. MPF enhancements, including climate control and optical sorting equipment will result in: 1) The material recovery plant will be able to accept a wider range of materials. 2) Lower labor costs, through a reduction in the number of hand sorters. 3) Increased throughput (the amount processed per hour). 4) A higher percentage of extraction resulting in less remaining, non-recyclable waste that is higher accuracy and value. (Capacity shored, recycled material is purer and thus more valuable to industry.) 5) Increase the number of acceptable items (ie more metals and plastics). We currently recycle approximately 10,000 tons per year in Cincinnati. Process facility upgrades will increase the amount by 5845 tons or 58%. Other communities in the region will also benefit from the upgrade. | City of Cincinnati, OEQ | 51 | 0 to 30 days | \$4,000,000 |
| Hamilton | Alternative School Conversion Project | Remodel existing facility into an alternative school. This alternative school will provide and enhance the learning environment for students who have not been successful in a traditional setting. Provide an alternative to expulsion, keeping the students in school. Evidence of a successful project will be: improved student retention; improved passage rate on state mandated tests; graduation rate increase of 25% after the first full year and an anticipated 10% each year thereafter. | Princeton City Schools | 50 | 0 to 30 days | \$500,000 |
| Hamilton | Energy Efficiency | Our company's vision is to establish relationships with area businesses and associations while providing an ongoing training program guaranteed to bring measurable results to our clients. Utilizing a 3-step process that is designed to take training program attendees to the next level of behavior will help our clients achieve their talent development and strategic objectives. Improving the state of the science for industries. This involves activities to advance EPA's understanding of asbestos technology, asbestos-related exposures, sampling collection and analysis and applied science in the field. Identifying and addressing ways people are exposed to asbestos in products, schools and buildings, and potential risks to reduce exposure and Assessing and reducing risks associated with areas that require asbestos cleanup. We will provide training in these areas, so individuals will become certified and therefore become employable. The goal is to certify 300 people, plus giving them the opportunity to become employable. | EnviroTech Industries | 200 | 31 to 90 days | \$1,000,000 |
| Hamilton | Upgrade HVAC pumps with variable speed drives Love | Replace existing 2-way and 3-way valves on heating and cooling systems to provide precise control at all handlers and other HVAC equipment. | Loveland City School District | 2 | 31 to 90 days | \$174,000 |
| Hamilton | Upgrade HVAC 2-way and 3-way valves at Loveland HI | Replace existing 2-way and 3-way valves on heating and cooling systems to provide precise control at all handlers and other HVAC equipment. | Loveland City School District | 4 | 31 to 90 days | \$45,000 |
| Hamilton | Install Co2 sensors and controllers on air handler | Install CO2 sensors in classrooms and common areas in school to provide more accurate and healthy air quality. The township is rapidly redeveloping with over \$600,000,000 in new construction and development of existing properties. The largest area is the major hub for this development has a 1 square mile area in which day time is approaching 100,000 people. The area houses a large regional shopping mall, a new high rise building with retail of over 1 million sq foot. The FBI is locating a new regional operational center which will bring and keep over 400 new jobs to the township. Fire Protection is the largest one component that is needed with all these new projects and increase workforce is the need to perform efficient rescue and fire protection in this area. Any fire loss in this area could greatly affect the economy and utility those jobs. A community development need assessment that Fire Life safety is paramount in their workplace. The need for this specialized piece of equipment is to aid worker in emergency situations to safety, so that the area stays viable during any emergency situation. This high profile area is a large economic hub in Hamilton County as it relates to income through sales & property tax. | Loveland City School District | 1 | 31 to 90 days | \$18,500 |
| Hamilton | Tower Ladder Protection Project | Install system which utilizes atmospheric cooling derived from the cooling towers during intermediate cooling season. Convert existing domestic hot water boilers to utilize solar thermal heat reducing the use of natural gas. Install solar pv panels to supplement electricity consumption at Loveland High School Replacement of original windows and daylight in Greene Intermediate and Sycamore High School with energy efficient windows. Replacement should increase energy efficiency in these buildings, reducing energy costs. Project will provide jobs for window fabrication and installation companies. Wind turbine will provide electricity for specific areas of the building while providing a test environment for workability and potential future expansion. | Sycamore Township | 1000 | 0 to 30 days | \$1,750,000 |

| Hamilton | Village Of Indian Hill Distribution System Improve | 20,000 feet of water line. This project consist of galvanized transmission mains to help fire flows and maintain system storage. | Village of Indian Hill | 20 | 0 to 30 days | \$5,500,000 |
| Hamilton | Lighting Replacement Project | Replace lighting in corridors of E.H. Greene Intermediate School with energy efficient system. | Sycamore Community School District | 10 | 31 to 90 days | \$30,000 |
| Hamilton | Village Of Indian Hill Distribution System Improve | 4,000 feet of water line. This project would improve fire flows and water quality. | Village of Indian Hill | 15 | 91 to 180 days | \$500,000 |
| Hamilton | Wireless Infrastructure | Install wireless infrastructure at Blue Ash Elementary, MapleCrest Elementary, Montgomery Elementary, Sycamore Junior High and Sycamore High Schools. Infrastructure would support development of 21st century Education System and investments in technology to advance Ohio's economy. Infrastructure will provide the opportunity for a one-to-one laptop initiative for Sycamore students, advancing 21st century skills. Project would create jobs for installers that the project. | Sycamore Community School District | 10 | 31 to 90 days | \$300,000 |
| Hamilton | Interactive Whiteboard Project | Purchase and installation of 140 interactive whiteboards in support of development of 21st century education system and investments in technology to advance Ohio's economy. Use of whiteboards in the instructional process supports development of 21st century skills for Sycamore's students. The equipment is manufactured in the United States. Installation of the whiteboards will create jobs locally for installers and electricians. | Sycamore Community School District | 5 | 31 to 90 days | \$568,000 |
| Hamilton | Public Works Facility | The City of North College Hill and the North College Hill School District created a partnership in whereby the school district is building all new schools and continuing to one campus for a cost of \$38,000,000. In order for this to happen, the school needed some city owned property, primarily our public works facility and parking area. In exchange for our city property the school district is giving the city an old elementary school site. The city will be required to construct a public works facility which will consist of a 60x80 foot garage for vehicle equipment and repair, an above ground storage tank and a salt dome. This project will create approximately 25 construction jobs for the public works garage with the assistance of some faith-based groups, a large portion of the old school will be renovated to create community center. The faith-based groups and the city will provide activities for people of all ages, with an emphasis educational programs and recreational facilities. Additional 40 jobs will be created to renovate, and then operate the community center. | City of North College Hill | 30 | 181 days or more | \$350,000 |
| Hamilton | Village Of Indian Hill Distribution System Improve | 2000 feet of water line. This project will improve fire flows and water quality. | Village of Indian Hill | 15 | 91 to 180 days | \$325,000 |

| Hamilton | Colerain Township Various Street Rehabilitation # | Rehabilitation of existing roadways includes such work as: new asphalt concrete wearing course, curb replacement, sidewalk ramps, catch basin reconstruction, pavement fabric, catch basin and sewer lid adjustments. Estimated quantities: Various street lengths total 3,187 feet 622 cubic yards of Asphalt Concrete wearing course 1600 linear feet of curb replacement 22 catch basins reconstructed 9,000 square yards of pavement fabric 12 catch basin and sewer lid adjustments | Colerain Township Public Works Department | 40 | 31 to 90 days | \$192,000 |
| Hamilton | Colerain Township Various Street Rehabilitation # | Rehabilitation of existing roadways includes such work as: new asphalt concrete wearing course, curb replacement, sidewalk ramps, catch basin reconstruction, partial and full depth repair, hot-milling, pavement fabric, catch basin and sewer lid adjustments Estimated quantities: Various street lengths total 5,948 feet 1,126 cubic yards of Asphalt Concrete wearing course 12,000 linear feet of curb replacement 1500 square feet of sidewalk ramps 24 catch basins reconstructed 2,119 square yards of partial depth repair 26,000 square yards of hot milling 14,800 square yards of pavement fabric 42 catch basin and sewer lid adjustments | Colerain Township Public Work Department | 40 | 31 to 90 days | \$670,000 |
| Hamilton | Little Miami Fire District Newtown Fire Station Co | The Little Miami Fire District (LAFD) is seeking funds to construct a new fire house in the Village of Newtown, Ohio. The Fire District provides fire and ambulance service four communities in Hamilton County. Due to our unique status as a fire district, we are able to provide services as well as bond projects. Toward that end, we have been in need for some time for upgrades to our buildings. As an example, the existing fire station was built in the late 1800's as a schoolhouse. It is so narrow that we have difficulty getting trucks in and out efficiently. We have had to buy specialty assign trucks just to fit in the bays. These funds will go to purchasing a five acre parcel of land previously used as an e-check center. We will be demolishing the building and add additional sleeping and training rooms to accommodate our fire staff. | Little Miami Fire District | 50 | 31 to 90 days | \$3,000,000 |
| Hamilton | Village Of Indian Hill Distribution System Improve | 19000 feet of water line. This project will increase the volume of water in our northern service area. This will improve water quality and fire flow. | Village of Indian Hill | 20 | 181 days or more | \$4,410,000 |
| Hamilton | Village Of Indian Hill Distribution System Improve | New Water Tower. This project would improve system pressure along with the flow. | Village of Indian Hill | 20 | 181 days or more | \$3,400,000 |
| Hamilton | Glencoe Hotel & Condominiums | Funds would be used to test for and remediate environmental concerns of asbestos and lead paint, and to install energy efficient systems in the 54 condominium units and the 27 units in the townhouse hotel and residences. The project comprises redevelopment of an entire historical Historic District which has received an allocation of State Preservation Tax Credits. | Dorian Development | 50 | 0 to 30 days | \$200,000 |
| Hamilton | Lincoln Terrace Gardens | Transfer an 88 unit apartment to a general community for single use, including an urban farm component. Which initially this project had when was first built in 1919. Funds would be used for removal of lead paint and replacement of doors, balconies and retrofit energy efficient mechanical's and windows and create working gardens and general rehab to provide 88 affordable housing units in a federal employment zone community. | Dorian Development | 20 | 0 to 30 days | \$1,500,000 |
| Hamilton | Redwine Property Improvements | This project entails construction of a new street for a 17 site property owned by the city of Reading (12 acres) and its development partner, General Tool Company (8 acres). The site is located on Reading Rd. (U.S. 40) and is a great commercial/office along Reading Rd. and light industrial in the near. Plans are underway to construct a Class A office building for the headquarters of Vioe Services Inc., an integrated facilities management firm with \$74 million in annual sales. The project will result in an annual payroll of \$7.5 million. Economic stimulus funds will be used to build an alternate access road to the back undeveloped industrial portion of the 17 acre site, namely from Landy Lane (an existing industrial park located adjacent to and just south of the subject site). This access is necessary to accommodate heavy truck traffic that will be generated when the back industrial property is developed, thus not jeopardizing the office environment of the Vioe Services, Inc. facility which is accessed off Reading Rd. A secondary benefit of the Landy Lane extension is that it will provide an alternate ingress and egress point for the seven businesses located one | City of Reading | 80 | 91 to 180 days | \$320,000 |
| Hamilton | Township Street Resurfacing | This project will enable the Township to resurface 53 of its 400 streets. The project will consist of more than 11 miles of roadway. Currently, the Township does not have the resources to adequately maintain its streets due to the poor economy, which has caused Township residents to vote against tax increases for road resurfacing in four consecutive ballot issues. Not only will this project retain and create jobs, but it will increase property values and build equity for our property owners. | Springfield Township, Hamilton County | 162 | 31 to 90 days | \$6,288,953 |
| Hamilton | Landy Lane Stormwater Improvements | The pipe currently draining this area is undersized and causes localized flooding to the businesses in this area. The new pipe would also serve the Redwine Property, which the City hopes to develop, as indicated in the application for the Redwine Property Improvements submitted to this site. | City of Reading | 80 | 31 to 90 days | \$300,000 |
| Hamilton | System-Wide Watermain Upgrade | The City currently has numerous mains ranging in size from 1.5 inches to 6 inches that should be upgraded to 8-inch mains to provide adequate fire protection. | City of Reading | 20 | 31 to 90 days | \$2,000,000 |
| Hamilton | Mckelvey Athletic Fields | Construct athletic fields for use by area youth from several communities. This is a collaborative effort by the Township, the City of Wyoming and the Hamilton County Park District. The construction of this park containing athletic fields will provide much needed recreational space for area athletic organizations that serve children and adults within the community. | Springfield Township | 100 | 91 to 180 days | \$600,000 |
| Hamilton | Fire Supply Line | This grant award will allow the Village of Lockland to replace existing large diameter supply lines for three fire trucks. Current hoses need to be replaced due to their age. Replacement hoses will provide replacement of general purpose fire protection. | Village of Lockland | 1 | 31 to 90 days | \$21,000 |
| Hamilton | Gateway IV | On a 2.87 acre site along Vioe, Walnut, Menard and Fairmount Streets, twenty existing buildings and twenty six vacant parcels will be redeveloped to create 100-160 mixed-income rental residential units, 21,000 SF of commercial space, and a new parking structure. Five currently vacant properties on Vioe Street that have been awarded Ohio State Historic Tax Credits will be redeveloped into approximately fourteen market rate apartments, and six ground floor commercial spaces. On Race Street, six currently vacant properties that have been awarded Ohio State Historic Tax Credits will be redeveloped into approximately twenty condos and four commercial spaces. | Cincinnati Center City Development Corporation | 822 | 0 to 30 days | \$6,200,000 |
| Hamilton | Install new "Green" technology field lighting Love | Remove existing metal halide lamps with wooden poles and replace with green technology lamps and ballasts. New steel poles will be integrated with wind turbine project to provide dual function. | Loveland City School District | 6 | 31 to 90 days | \$266,000 |
| Hamilton | Cincinnati Downtown Redevelopment | The proposed redevelopment work encompasses a series of five buildings in Cincinnati's Central Business District. \$1 million in funds are requested to assist with environmental remediation work associated with the redevelopment of these properties (\$200,000 per each of the five buildings). Total development costs for the five buildings are estimated to be \$58 million. | Cincinnati Center City Development Corporation | 1160 | 0 to 30 days | \$1,000,000 |
| Hamilton | Energy Efficient Doors and Windows | The Lockland Village Hall, constructed in the early 1900's. Most of the doors and windows are of that vintage. This proposal is to replace the 5 doors and 54 windows with up-to-date, highly energy efficient doors and windows. | Village of Lockland | 1 | 31 to 90 days | \$45,000 |
| Hamilton | Northwest Quadrant Water Main Project | Project entails replacement of an existing 4" water main with an 8" main along Reserben Ln, Bernard Ave., West St. and W. Pleasant St. in the northwest quadrant of the city. The enlarged water main would enhance the protection in the area including for one of the city's major employers, Johns & Heiss. The new main would tie with an existing 8" main on W. Columbia Ave. an existing 10" main at the Veterans Memorial Stadium, and a 12" main on Reading Rd. The new water main would also support the economic development of a vacant facility at 1700 West St., the former Rosemount Industries. This 4.6 acre property is currently being marketed for redevelopment, in the mid-1990s these facilities employed approximately 150 jobs. The proposed water main project would not only help preserve the approximately 100 existing jobs at Rose & Heiss but would also assist in marketing the underutilized Rosemount Industries site for a more productive, job generating use. | City of Reading | 250 | 31 to 90 days | \$450,000 |
| Hamilton | Heating, Air Conditioning, Water Heating | The Lockland Village Hall was constructed in the early 1900's. The building currently houses the Village administration, police and fire fighting personnel. Heating and air conditioning has been added incrementally over the years so that there now are 7 heating and air conditioning units. There also are 3 water heaters that are estimated to be 15 years old. This proposal is to replace the heating and air conditioning units with 2 energy efficient units and each of the water heaters with new, energy efficient units. | Village of Lockland | 1 | 31 to 90 days | \$150,000 |
| Hamilton | Title VII and Title VIII Federal Training Dollars f | These are federal dollars which will not run through the state of Ohio. Cincinnati Children's already receives Title VII training dollars for primary care doctors. We expect the feds will base a new competitive RFA that we will apply for to draw down more training dollars. Currently we do not get Title VIII nurse training dollars but we are looking into the further to see how we can partner with to draw these dollars as well through a competitive RFA. Jobs created listed above is probably not a real number. It is more number of doctors and nurses trained with these dollars if we are successful in the RFA process. I would assume the state of Ohio can not help us much with this pot of funds since we expect the RFA will be issued directly from the feds as it has been in all other Title VII and Title VIII rounds of funding. I am submitting this proposal on the Ohio site because I was told you want to track everything from this site including those pots of dollars that Ohio will never actually touch. | Cincinnati Children's Hospital Medical Center | 300 | 31 to 90 days | \$1,500,000 |
| Hamilton | NIH Capital Funds | These are federal dollars which will not run through the state of Ohio. Cincinnati Children's has several shovel ready capital projects that we will submit under the RFA that will eventually be released by the NIH to tap into the 1.38 fund for NIH capital projects. The Cincinnati Children's projects include a rehab of our animal research and lab facilities which are located in the basement of our research building. The cost on this rehab is 17M. We also have a shovel ready project for a new glass washing sterilization facility which will cost \$4M and will benefit all our research activities. Finally under the \$300M in equipment we would like to do a renewed MRI machine to do our basic research. I would assume the state of Ohio can not help us much with this pot of funds since we expect the RFA will be issued directly from the feds. I am submitting this proposal on the Ohio site because I was told you want to track everything from this site including those pots of dollars that Ohio will never actually touch. | Cincinnati Children's Hospital Medical Center | 300 | 31 to 90 days | \$25,000,000 |
| Hamilton | Maple Avenue | Reconstruction of an approximately 1800 LF Roadway with Stormwater Improvements | City of Mt. Healthy | 20 | 91 to 180 days | \$1,300,000 |
| Hamilton | Remodel Council Chambers and 2nd floor of Village | The Lockland Village Hall was constructed in the early 1900's. The Council Chambers, Mayor's office and administrator's office are all located on the second floor. The second floor is not ADA compliant regarding either the access or the room. This proposal is to remodel the Council Chambers, install an elevator, and reconstruct the rest room. | Village of Lockland | 1 | 31 to 90 days | \$150,000 |
| Hamilton | Clovernook Avenue Reconstruction | Reconstruction and Storm Sewer Upgrades of Clovernook Avenue, from Compton to Adams. Length of street is approximately 2000 LF. | City of Mt. Healthy | 20 | 91 to 180 days | \$1,400,000 |
| Hamilton | NIH funding to Institutes Bread and Butter NIH R01 | These are federal dollars which will not run through the state of Ohio. Cincinnati Children's has several R01's that we will submit under various various RFA's that will eventually be released by the NIH to tap into the 1.38 fund for NIH research dollars. R01's. I would assume the state of Ohio can not help us much with this pot of funds since we expect the RFA will be issued directly from the feds. I am submitting this proposal on the Ohio site because I was told you want to track everything from this site including those pots of dollars that Ohio will never actually touch. | Cincinnati Children's Hospital | 500 | 0 to 30 days | \$25,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Hamilton | Price Hill weatherization | We would like to use our not-for-profit organization to facilitate and spearhead a weatherization and home efficiency program for the Price Hill area. This program would be aimed at low income homes in the Price Hill area. It would at the same time lessen the strain on the environment and the power grid. We would hope to not only weatherize the homes of low income home owners, but also to update the HVAC systems of the homes. We would also be asking the subcontractors in the community to do the work and to provide the supplies and services that would be needed. We have our own funds that we would like to put towards this endeavor as well. We are at this time meeting with our local government partners to work very closely with groups like People Working Co-operatively and Data energy. Thank you for your consideration of our proposal. Jill Tuttle | Seton Home Co. | 40 | 31 to 90 days | \$3,000,000 |
| Hamilton | Countryview Drive Rehabilitation | Countryview Drive is deteriorating and must be rehabilitated. Project consists of a mill/overlay and new curbs where necessary. These are federal dollars which do not believe will run through the state of Ohio. Cincinnati Children's leads the way in pediatric clinical effectiveness and quality and transformation. Cincinnati Children's will apply to tap into the 1.1B in funds for clinical effectiveness. 40M of these dollars are being transferred to the WH for grant management. We will apply competitively for these funds. 30M of these funds are staying at AHRD which will also issue an RFP for clinical work such as surgical site infection reductions, system flow and system transformation. This is an area that Cincinnati Children's excels. Finally 40M is staying in HRD office of the director for regenerative health IT quality and other items. We will apply for these funds as well. I would assume the state of Ohio can not help us much with this pot of funds since we expect the RFA will be issued directly from the CDC. I am submitting this proposal on the Ohio site because I was told you want to track everything from the including those pots of dollars that Ohio will never actually touch. | City of Harrison | 20 | 31 to 90 days | \$250,000 |
| Hamilton | Comparative Effectiveness Research | These are federal dollars which it is unclear to us at this time whether or not they will run through the state of Ohio. Cincinnati Children's has several projects that we would like to submit to the CDC for prevention and wellness. Of the 1.1B CDC is designated for infection reduction strategies, Cincinnati Children's has major projects under way to reduce surgical site infections, central line infections and ventilator associated pneumonia. We will apply for this funding. There is also \$50M for chronic disease health promotion. Cincinnati Children's has a major Medicaid genetics project in partnership with the schools that we would like to continue. I would assume the state of Ohio can not help us much with this pot of funds since we expect the RFA will be issued directly from the CDC. I am submitting this proposal on the Ohio site because I was told you want to track everything from the including those pots of dollars that Ohio will never actually touch. | Cincinnati Children's Hospital | 300 | 31 to 90 days | \$10,000,000 |
| Hamilton | Washington Avenue Reconstruction | Reconstruction of Washington Avenue. Project length is approximately 30 LF | City of Harrison | 15 | 31 to 90 days | \$220,000 |
| Hamilton | CDC Health and Wellness Funding | These are federal dollars which it is unclear to us at this time whether or not they will run through the state of Ohio. Cincinnati Children's has several projects that we would like to submit to the CDC for prevention and wellness. Of the 1.1B CDC is designated for infection reduction strategies, Cincinnati Children's has major projects under way to reduce surgical site infections, central line infections and ventilator associated pneumonia. We will apply for this funding. There is also \$50M for chronic disease health promotion. Cincinnati Children's has a major Medicaid genetics project in partnership with the schools that we would like to continue. I would assume the state of Ohio can not help us much with this pot of funds since we expect the RFA will be issued directly from the CDC. I am submitting this proposal on the Ohio site because I was told you want to track everything from the including those pots of dollars that Ohio will never actually touch. | Cincinnati Children's Hospital | 100 | 0 to 30 days | \$5,000,000 |
| Hamilton | Campbell Road Improvements | Campbell Road consistently floods and causes problems for traveling motorists and residents and businesses in the area. Project would consist of flood control measures and road rehabilitation. | City of Harrison | 20 | 91 to 180 days | \$1,500,000 |
| Hamilton | Health IT EMR under Medicaid | This project is the Medicaid Incentive Health IT for hospitals. I believe these dollars will flow to the States through Medicaid but it will be formula driven and not competitive. I believe the formula will be based in part on the amount of Medicaid we service which for Cincinnati Children's is 45% of our total payer mix and growing. I understand that the formula has a cap of 11M per hospital over the five years. I am assuming that Cincinnati Children's will be eligible for the maximum amount given our high Medicaid population and being a large hospital. I understand none of this money will flow until FY2011. Cincinnati Children's has already invested over 45M in the EPIC electronic medical record system. We have already hired over 125 people in 18 areas to help us with the implementation of the system. With these dollars those people will be able to be trained to be used. | Cincinnati Children's Hospital | 300 | 181 days or more | \$11,000,000 |
| Hamilton | Simonson Road Intersection Improvements | Modifications to intersection, which would involve the City of Harrison, Harrison Township, and Hamilton County, would provide access to a major property that is trying to develop. This site has been on the State of Ohio's short list for many industries looking to locate in Ohio. This has been promoted as the "most 'developable' land site to the Greater Cincinnati Airport, and road improvements would greatly help to spur the development. | City of Harrison | 100 | 181 days or more | \$2,000,000 |
| Hamilton | The new School for Creative and Performing Arts | 250,000 square foot state-of-the-art kindergarten thru 12th grade public performing arts school in downtown Cincinnati's Over-the-Rhine neighborhood. | The new School for Creative & Performing Arts | 500 | 0 to 30 days | \$6,000,000 |
| Hamilton | Recreational Replacement Complex | By the number of park users every day. For 35 years our mission has been the same and our participation has increased every year. The main problem we have been missing is indoor recreational space. We would like to create a facility for year round physical activity opportunities, including 4 basketball courts, indoor soccer/basketball practice area, an indoor walking trail to compliment our outdoor trail system. This facility would accommodate people of all ages and abilities just like our current outdoor facilities. The Governor's Council for Physical Fitness & Recreation states that the grass roots level starts in community parks. The key to being successful with any endeavor is consistency especially with physical fitness and health. This indoor recreational space will provide the space for community members of all ages and abilities stay active year round, for decades to come. | Anderson Township Park District | 200 | 181 days or more | \$6,000,000 |
| Hamilton | Greater Harrison Bikeway - West Road Phase I | The City of Harrison and Harrison Township have developed a Master Bikeways Plan throughout their community which will, when implemented, greatly enhance the quality of life and vitality of their communities, including economic development opportunities. West Road Phase I consists of construction of a 10 foot wide multi-use trail along West Road from Carolina Trace to Dry Fork Road. This trail runs in front of the high school and provides school facilities and creates better access to Mary Whitewater Forest, which enhances the access to Dry Fork Road, Cincinnati. | City of Harrison | 20 | 91 to 180 days | \$580,000 |
| Hamilton | Queen City-South Mill Creek Greenway Trail | The project will eliminate blighted conditions, create & retain jobs, stimulate business opportunities, regenerate natural resources, demonstrate sustainable design, reduce automobile traffic, provide outdoor recreation & alternative transportation for bike commuters, & revitalize Mill Creek neighborhoods. The project includes: • Trail construction & development of 5 trail heads, integrated with public transit & local streets to create a multimodal transportation system. The trail will connect 5 residential neighborhoods, 2 business districts, a heavily used public park, & the Spring Grove Cemetery together. • Green technologies, including shredded rubber tires & porous asphalt/concrete for trail & parking lot paving, solar-powered lighting and trash compressor cans, eco-friendly stormwater management, trail head furnishings from recycled/reclaimed materials, & soil bioengineering systems for streambank stabilization. | Mill Creek Restoration Project | 75 | 0 to 30 days | \$4,900,000 |
| Hamilton | Harrison Avenue Sidewalks | Construction of Sidewalks along heavily utilized Harrison Avenue, from New Haven Road to West Road (4.000 LF). Currently there are no sidewalks in this area, and construction of sidewalks would be a huge benefit to residents and the numerous businesses along this stretch. | City of Harrison | 20 | 91 to 180 days | \$675,000 |
| Hamilton | Carolina Trace Improvements | This section of Carolina Trace Road has serious drainage problems, along the road and at the intersection of Carolina Trace and West Road. Flooding during rain events creates dangerous situations and the roadway has been shutdown at times due to the flooding. Flooding remains for days after an event, and those areas also present problems during the winter months with icing. The roadway is also becoming depressed and should be milled and overlaid. A portion of this roadway is in Harrison Township and this project will be done in conjunction with the Township and the County. | City of Harrison | 20 | 91 to 180 days | \$750,000 |
| Hamilton | Silver Street Reconstruction | Stormwater Improvements and Reconstruction of severely deteriorated roadway. Length of project is approximately 270 LF. | Village of Elmwood Place | 20 | 91 to 180 days | \$260,000 |
| Hamilton | Benson Street Sanitary Sewer Replacement | Replacement of 1000 LF of sanitary sewer that will free up potential for development on Hill Street. A 12" sewer would replace current 8-10" and allow the potential development of 300,000 sq. ft. of Class A office and 141 apartments which has been proposed. | City of Reading | 100 | 31 to 90 days | \$150,000 |
| Hamilton | hybrid biofuel cell with ultracapacitor | Our goal is to harness genetically modified bacteria and have them metabolize organic materials, particularly those rich in nitrates, and harvest the generated electrons, hydrogen gas, and water in a hybrid biofuel cell with an ultracapacitor. | Pilus Energy | 39 | 0 to 30 days | \$1,300,000 |
| Hamilton | Hybrid Window System | We then will establish manufacturing for the bacterial/nutrient powder that teches as a refill, the hybrid biofuel cell/ultracapacitor. The project consists of setting up a window production line which would copy the high performance, Hybrid, window lines of Europe. These windows would be used for schools, hospitals and many other buildings here in Ohio and the entire Midwest. They would be much more energy efficient and durable than the aluminum windows now being used in the United States. | Gilkey Window Company | 40 | 0 to 30 days | \$160,000 |
| Hamilton | Commercialization of the Hybrid Rapid Infrared Sulp | Funding allows validation and certification of a new type of energy saving aluminum road treat furnace that has been proved to reduce cycle times by as much as 90% over conventional fossil fuel treat furnaces while producing superior metallurgy in the finished product. The process promises significant reduction in CO2 emissions and process cost. This technology has received an R&D 100 award and an Ohio Edison Program Emerging Technology award. Research grants from ETEEC and the Forging Industry Association (CIWA) completed the proof of concept. The last step to commercialization is to run a series of validation/certification trials to prove the systems will meet requirements of AMS 2750. Funding will provide support for a collaboration between OCF Forge and Case Western University to purchase equipment and hire a student team to accomplish the necessary work. The target product for initial production is aluminum turbocharger impeller forgings, raw material produced by Kaiser Aluminum, Heath, Ohio, and forged by OCF Forge, Cincinnati, Ohio. | Queen City Forging Co. | 5 | 31 to 90 days | \$61,000 |
| Hamilton | Colerain Township Various Street Rehabilitation # | Rehabilitation of existing roadways includes such work as: new asphalt concrete wearing course, curb replacement, sidewalk ramps, catch basin reconstruction, partial and full depth repair, noise-milling, pavement fabric, catch basin and sewer lid adjustments, and storm sewer pipe replacement. Estimated quantities: 1 various street lengths total 7,062 feet 1,180 cubic yard of Asphalt Concrete wearing course 61,000 lineal feet of curb replacement 960 Square feet of sidewalk ramps 45 cubic yards of curb replacement 13,500 square yards of noise-milling 18,400 square yards of pavement fabric 18 catch basin and sewer lid adjustments 57 lineal feet of storm sewer replacement 256 Square yards of concrete apron replacement 60 Cubic yards of full depth work | Colerain Township Public Works Department | 40 | 31 to 90 days | \$550,000 |
| Hamilton | City of Harrison Recreation Center | To construct a 35,000 square foot Recreation Center on a 10 acre tract of land donated by the Southwest Local School District to serve the 10,000 residents of our city. The facility would include a Health & Fitness Center, indoor and outdoor pools, indoor running track, full size gymnasium, racquetball and walkway courts, whirlpool, steam rooms and saunas, child care, childcare, fitness and aquatic classes, and have a multi-purpose meeting room. Project would include construction and installation of building equipment. Completion of project would result in staffing the center with 10 full and part time employees. | City of Harrison | 10 | 91 to 180 days | \$8,000,000 |
| Hamilton | Wellness Center Remodel Project | Project consists of remodel of 4,000 sq ft second floor space that would include wiring, plumbing, dry wall and elevator installation to access space. Project include purchase of cardio and weight equipment. This would then create a Health and Wellness center for the 80 employees of the City of Harrison that would maintain general physical health, reduce medical costs and reduce injuries and medical retirement. | Harrison Police Department | 5 | 31 to 90 days | \$50,000 |
| Hamilton | Wellness Center Remodel Project | Project consists of construction of a 75 ft by 20 ft steel and architectural metal parking awning to protect the marked outdoors of the police department from the weather. This would keep snow and ice off of the cruisers as no indoor parking garage is available. | Harrison Police Department | 0 | 31 to 90 days | \$40,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | Colerain Township Various Street Rehabilitation # | Rehabilitation of existing roadways includes such work as: new asphalt concrete wearing course, curb replacement, sidewalk ramps, catch basin reconstruction, partial and full depth repair, non-milling, pavement fabric, catch basin and sewer id adjustments, storm sewer pipe replacement and concrete drive apron replacement Estimated quantities: Various street lengths total 7,778 feet 1,070 cubic yard of Asphalt Concrete wearing course 10,800 linear feet of curb replacement 440 Square feet of sidewalk ramps 50 catch basins reconstructed 1,000 square yards of partial depth repair 15,000 square yards of non-milling 12,100 square yards of pavement fabric 25' catch basin and sewer id adjustments 53 linear feet of storm sewer replacement 236 Square yards of concrete apron replaced | Colerain Township Public Works Department | 40 | 31 to 90 days | \$600,000 |
| Hamilton | Colerain Township Various Street Rehabilitation # | Rehabilitation of existing roadways includes such work as: new asphalt concrete wearing course, curb replacement, catch basin reconstruction, non-milling, pavement fabric and catch basin and sewer id adjustments. Estimated quantities: Various street lengths total 4,523 feet 860 cubic yard of Asphalt Concrete wearing course 9,200 linear feet of curb replacement 50 catch basins reconstructed 11,400 square yards of non-milling 10,100 square yards of pavement fabric 33 catch basin and sewer id adjustments | Colerain Township Public Works Department | 40 | 31 to 90 days | \$460,000 |
| Hamilton | cunningham roadway infrastructure improvement | 3000 linear feet of repairs to existing roadway, re-enforcement of shoulder areas and replacement/repairs of damaged culverts to facilitate natural waterflow to the Little Miami River, a national scenic river waterway | the cunningham road association | 5 | 0 to 30 days | \$60,000 |
| Hamilton | Law Enforcement Hiring Proposal Ken Hughes | Initiated as an Ohio police chief in 2007, I have extensive history in working with grant funding, COPPS hiring initiatives & Community Policing. I'm encouraging the Governor to use hiring funds with specific retention requirements (i.e. 60 mos. of 5 years). Previous agencies failed to retain funded positions as they did not have funds to maintain the position (even when the economy is good). Training costs and time often negate the length of retention. Hiring funds should be used as hiring incentives and not based on a shared police protection among agencies, contracts are less expensive and can replace officers for assignment on the road, SRCS, DMRE etc. The funding should be competitive, have some teaching/field requirement, application should be reviewed and the development should be based on merit and not just on a resume. Otherwise the jobs will be gone when the money runs out. If the funding is used in a quick spend or else misused to lose long term positions, that's not good. City of Forest Park - Municipal Building Alterations, which include new entry with offices and lobby, repair of original building stone, new roof and police building HVAC System. | Tri-State Regional Community Policing Institute | 800 | 31 to 90 days | \$37,000,000 |
| Hamilton | City of Forest Park - Municipal Building Alteratio | This municipal building improvement is long overdue and will enhance public safety (some of the overhead materials are falling down from deterioration), improve accessibility for handicapped and elderly individuals, and it is part of our homeland security program to better protect who is coming and going in municipal complex. | City of Forest Park | 35 | 0 to 30 days | \$544,000 |
| Hamilton | Next Step | Management is renowned for their work with delinquent youth and hard to reach young men, the program provides consistent, discipline building services that allow for personal growth and enrichment. The professional staff provides 24 hour supervision, mentoring, and the safe haven that is always necessary during the adolescent years. These services are often life-changing for the young men who can include in the program for up to 2 years. The program will consist of Mental Development, Education, Social Development, Community Service, Career Development, Internship/Apprenticeship and Independent Living. New Step Family Services will help youth learn (and independent living skills, how to budget shop for groceries, cook meals, use the public transportation system, and, in some cases, hold down a job and practice living in a more GREEN environment. | Next Step Family Services | 75 | 31 to 90 days | \$135,000 |
| Hamilton | Line Loss Recovery at Fill Station | Researching transfer piping to fill station to enable the capture and containment of line loss when filling from storage tanks or mixing tanks. The captured line loss will be recycled into following batches, instead of flushing the line loss to a holding tank where it waits to be processed and ultimately flushed off as concrete waste. This project will save energy by reducing the run times and demand of our in-house water processing plant and reduce the number waste haul-offs. | Milacron Inc. | 10 | 0 to 30 days | \$25,000 |
| Hamilton | Industry Specific ETA | Industry specific Entrepreneurial Training, Coaching, and Business Development. Key targeted industries based on the projected needs of the community development and growth as well as key areas of growth: the stimulus package addresses. We current operate training and coaching that focuses on businesses of any kind. The target is to moderate income communities as well as individuals from those communities. Job creation will include hiring from those communities. Business Growth will help stimulate more income and revenue for those communities as well as increase the Tax base. | Greater Cincinnati Microenterprise Initiative | 50 | 31 to 90 days | \$227,000 |
| Hamilton | Hatch House Restoration Project | The project includes fully restoring the George Hatch House located in the Dayton Street Historic District. The Hatch House is listed in the National Register of Historic Places at the nationally significant level. The project also includes streetscape improvements in the District. Restoration of the Historic District has been unsuccessful in large part because the Hatch House—the most prominent and significant structure within the District—has not been restored. The overall goal is to safeguard the heritage of the District by preserving sites and structures that reflect elements of the District's cultural, social and architectural history. The Hatch House is the most significant structure within the District, thus its preservation is critical to the community's overall preservation goals. This project will utilize nearly 20 workers and provide work to many contractors who have seen their business shrink significantly during the economic downturn. The project will spur additional investment in the neighborhood. Because the Historic District is a local point in the community, improving the District will improve the overall community. | Hatch's Folly, LLC | 20 | 0 to 30 days | \$300,000 |
| Hamilton | SmartVent | The Melink Inlet-Hood controls provide immediate energy savings on commercial kitchen hoods by varying the speed of the exhaust and make air fans based on the cooking load. Currently there are 6000 systems installed globally. We propose to install Inlet-Hood in the dining facilities at the 13 state universities, 24 regional campuses, 25 two-year colleges, 20 CDC prisons, 1000+ K-12 public schools. We estimate that the kWh and the annual savings would be 1.1 million and 1.3 million respectively. The estimated annual energy savings is \$2.7 million. Finally we estimate that there would be a reduction of 15.1 million pounds of CO2 per year. Note: We have not factored in the tax revenue generated at the state level from the 2200 jobs. | Melink Corporation | 2200 | 0 to 30 days | \$15,000,000 |
| Hamilton | Moahck Honor Roll | Sunday, November 18th, 1945 the Mohawk Honor Roll Memorial located on the corner of Ravine and McMillan was dedicated to the five men and women who served their country during World War II. Five hundred and eighty one of our brothers and sisters were on this memorial, men and women who without hesitation or reservation walked away from their lives to embrace the freedoms of the American way of life for the future. Today, more than seven, in light of terrorism across the globe, and the threat of poses to us, as well as our job and women in the armed forces, we need to stand together and recognize the sacrifices of our military personnel. We are fighting for the same things now that we fought for over 70 years ago. It is my wish that their sacrifice may not be in vain, that we can remember back to a simpler time and realize that freedom and justice mean the same thing today as they have meant in the past. The Mohawk Honor Roll Memorial has seen better days. The brick is starting to faller, and the concrete around the bottom has all chipped away. The worst, however, is that of the five hundred and eight one names that were on the honor roll have been removed. It is my intention to restore | Mohawk Memorial Fund | 50 | 0 to 30 days | \$25,540 |
| Hamilton | King Studios Community Revitalization Project | The King Studios Community Revitalization Project is a partnership between the community of Evanston in Cincinnati, Ohio, Xavier University, the Floor of Art Studio, UltraSuede Studios and the Cincinnati Music Heritage Foundation, the Cincinnati Empowerment Zone and several others to preserve the legacy of King Records in its home neighborhood and provide an economic revitalization catalyst on the Montgomery Road Corridor. The studio will be a place where Xavier students will be able to get arts certification for teaching, where the memory of King will be memorialized, and where art and music will be made in a living tribute to Sam Houston. | Xavier University | 170 | 31 to 90 days | \$12,000,000 |
| Hamilton | St. Bernard Branch Library Project | The project request is to assist with the capital cost of construction of the facility. The City of Cincinnati, along with the Evanston Community Council is currently negotiating the acquisition of the site and building design is complete. Construct a new 8,000 square foot branch library in the city of St. Bernard. This facility would replace the current 2,000 square foot branch and would be constructed on property donated by the city. | Public Library of Cincinnati & Hamilton County | 0 | 31 to 90 days | \$2,200,000 |
| Hamilton | On Going Maintenance | Any jobs saved would be in the construction industry and cannot be estimated by library staff. On going maintenance for the Library's 41 facilities throughout Hamilton County. Work includes HVAC, roofing, paving, etc. | Public Library of Cincinnati & Hamilton County | 0 | 91 to 180 days | \$1,900,000 |
| Hamilton | Public Library of Cincinnati & Hamilton County - R | Any jobs saved would be in the construction industry and cannot be estimated by library staff. Construction of a new 12,000 square foot branch library in Reading, OH to replace a less than 2,000 square foot rental location currently operated. | Public Library of Cincinnati & Hamilton County | 0 | 181 days or more | \$2,300,000 |
| Hamilton | Public Library of Cincinnati & Hamilton County - P | Jobs saved would be in the construction industry and could not be estimated by library staff. Add an elevator and make other changes to the Pleasant Ridge Branch Library to make it handicapped accessible. This is in collaboration with the Pleasant Ridge Community Council. | Public Library of Cincinnati & Hamilton County | 0 | 91 to 180 days | \$1,000,000 |
| Hamilton | Public Library of Cincinnati & Hamilton County - W | The number of jobs saved would be in the construction industry and could not be estimated by library staff. Funds would be used to construct a net new branch library for our system. The new 12,000 square foot facility would be added to the Ohio National Guard Army and Woodland Community Center. The Library participated in the planning of this new facility but has lacked the funds to construct the branch library. As a new facility additional staff would be required, creating 9 new jobs in our system. | Public Library of Cincinnati & Hamilton County | 9 | 181 days or more | \$5,700,000 |
| Hamilton | Silverton Municipal Building | Renovation of historic structure to serve as new Silverton City Hall featuring existing site for future economic development. LEED elements, such as solar panels, green roof, etc. can easily be accommodated in the program. Current City Hall site is in the center of the CBD on the most prominent intersection in the community. It currently generates no additional revenue for the community, the courts or the state. Potential for economic development and creation of jobs over and above this project is considerable. Schematic design is complete. Remaining design can be completed within 3 months. | City of Silverton | 40 | 91 to 180 days | \$1,500,000 |
| Hamilton | Exit 39 I-275 Winton/Gilmore Road Project | Corridor: For the past three years both cities have worked with the Ohio Department of Transportation and the Ohio Kentucky Indiana Regional Council of Governments along with major businesses such as Cincinnati Financial Corporation and Mercy Hospital to develop a plan for improving the corridor. Within one mile of the corridor there are more than 400 businesses which employ more than 8,000 employees. The largest employer along the corridor is the Cincinnati Financial Corporation which employs 3,000 employees with an annual payroll of \$150 million. Mercy Hospital, who is also along the corridor, employs 1,300 employees with a \$40 million payroll and was ranked #46 of the Top 100 Hospitals in America. Both sites along with CFC and Mercy Hospital share concerns over the ability for the corridor to handle additional capacity if they are to continue to grow. | City of Fairfield | 2100 | 181 days or more | \$12,900,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Hamilton | New Regional Recycling Processing Facility (MRF) | The infrastructure for processing recyclables in our region (SW Ohio, No. Kentucky) is outdated. A new state-of-the-art material recovery facility is necessary to improve processing efficiency, improve quality of material sold on the market, increase the number of items that can be collected and improve worker conditions. The private sector will provide a 50% match. We currently recycle 10,000 tons per year. With a better facility we project the City of Cincinnati can recycle 70,000 tons per year. This would mean approximately 700,000 tons over 10 years. The MRF will also be able to process additional material from neighboring communities - like Bay Township City tons for 1. This would mean that the total tons over ten years would be 1 million to 1.4 million tons. According to the NERC analysis model, the 140,000 tons per year of recyclables would result in 3,320,179 Million BTUs (MBTUs) saved per year or 31,291,700 MBTUs over the 10 year timeframe. From a Greenhouse Gas perspective, the 140,000 tons per year would result in 380,000 MTCO2e (metric tons of CO2) per year or 3.8 million MTCO2e over 10 years. This is the equivalent of taking 84,000 cars off the road each year. The jurisdiction covers nearly 28 square miles with a population of over 60,000 with residential neighborhoods and business districts. We support several smaller cities and villages through mutual aid agreements. In 2007 we received over 35,000 calls for service as officers traveled nearly 500,000 miles on patrol. Our officers' workload is extremely low compared to jurisdictions of our size and type. Prior to February 10, 2009 our Department was supplemented in patrol operations by 15 deputy sheriffs. On that date, the Sheriff of Hamilton County reduced staffing in Green Township by three deputies, diminishing the level of police to serve the community. In addition, cutsback to the Hamilton County Ohio budget resulted in Green Township being forced to directly subsidize the entire Sheriff's patrol by paying \$60,000 per month. The ongoing payments have impacted the ability of our department to fund additional positions that we had projected to fill in 2009, 2010, and 2011. Receipt of the COPF funding grant will enable our department to hire four new officers to fill four new positions that are necessary to adequately serve the community of Green Township. Thank you! | City of Cincinnati, OEQ | 575 | 31 to 90 days | \$6,500,000 |
| Hamilton | Green Township Transition | | Green Township Police Department | 4 | 31 to 90 days | \$891,534 |
| Hamilton | SORTA - 57 hybrid buses | Purchase 57 hybrid buses | OKI Regional Council of Governments | 25 | 31 to 90 days | \$37,500,000 |
| Hamilton | Energy saving upgrades | The Rockwren Academy is Greater Cincinnati's Jewish Community Day School, serving Jewish children from across the spectrum of Jewish life. The Campus at Rockwren is in need of serious repairs to the Heating and Air systems and roofing. The School's HVAC equipment is fifteen to twenty years old and at the end of its life expectancy. We are spending twenty thousand dollars a month in energy bills due to the outdated equipment. The roof has several leaks and needs repair to prevent the consequential leaking of oil and gas damage from occurring. My proposal is to replace the HVAC equipment with new high efficiency units and to repair the leaks in the roofing. The upgrade in HVAC equipment is projected to save 25% on energy bills over the course of a year. The estimated savings would allow us to repair Malabar east of whom I am in the process of laying off due to funding issues. I thank you for your consideration of this project Jeffrey Neel Facilities Manager Rockwren Academy 613-766-3190 | Rockwren Academy | 5 | 0 to 30 days | \$400,000 |
| Hamilton | Low emission industrial burner | Development and commercialization of a new industrial air heat burner firing gaseous fuels which will have extremely low NOx and CO emissions. The burner has applications in many industries including power generation, industrial drying of foods, grains, bulk reagents, etc. Industrial ovens for paint drying and coating curing, etc., paper manufacturing, fiberglass insulation manufacturing, etc. There are many and the resulting impact on industrial process emissions would be tremendous. In the power generating industry these burners would be used on refuse reburn applications and would be a good fit for selective catalytic reduction systems and at a minimum the use of urea on existing systems. The development of a new high efficiency heat exchanger and controls for use in an energy saving system for the industrial dryer application. The project will have to be capable of handling dirty, high temperature exhaust gas streams operating at pressures above atmospheric and controlled by computer program to optimize the energy use of the dryer. | Stelter & Brinck, Ltd. | 15 | 0 to 30 days | \$2,500,000 |
| Hamilton | Efficiency improvement for industrial dryers | On many applications the energy savings could be as high as 60% | Stelter & Brinck, Ltd. | 10 | 0 to 30 days | \$950,000 |
| Hamilton | Dist 8, HAM IR 171 Northbound 6.0-6.5 (Dana Ave. to | This project will install a noise abatement structure along I-71 Northbound between Dana Ave. and Smith Rd. (approximately 0.5 miles). This project falls under the Type 2 Noise Wall Program (Braniff) in place by the Ohio Department of Transportation. The intent of this program is to provide highway noise reduction for homes built prior to the construction of the highway. Funding is needed in order to complete this project as the original funding ran out for the Type 2 Noise Wall program. The Madison Park neighborhood includes 190 homes which will all benefit from the installation of a noise abatement structure. This project will employ a 400 man crew and will take 6-10 months to complete. Lawn Life provides specialized lawn care services with an opportunity to gain real work experience and transferable skills by providing customers with well maintained lawns with excellent service at reasonable prices. Services offered will not only include lawn care but also completion of many other important household chores and other seasonal and general work as well. Having showed interest in getting work experience in the work industry employees of Lawn Life will be referred directly from a juvenile court-oriented organization or school. The experiences the student-employees have while participating at this job will assist them in making the transition from school to work and from a debt-ridden student to a motivated professional. This opportunity will allow such juveniles to develop entrepreneurial skills that will be transferable to any job in the future. Short term goal is simple: Employee 20-30 young adults (who often make up half of their household income), offering a good paying landscaping job. Also employ one related manager and one related vocational teacher. Work will be through all seasons, primarily in landscaping with many banks to cut vacant property lawns in Cincinnati. Commercialization of high efficiency immersion heater patent No. 6,296,050 | Madison Park Neighborhood | 40 | 91 to 180 days | \$2,000,000 |

| Hamilton | Training for Placement | PCS Technical Services, a technical recruitment firm is working on an initiative to find people who may not have all of the technical skills necessary for a position, but that could be trained and train them for greater opportunity. We feel that in this difficult economic time, people will need to shift from one occupation and experience, to a similar area, but one that they don't currently know as well. PCS has been in the staffing and job placement industry for over 20 years and has weathered many storms. There's one thing we've learned in our experience that surprises all of us and that's that you have to learn to be flexible and adapt to changing times because what you know suddenly, WIL change. Those companies that follow that simple guideline will be successful in ANY economy. Thank you for your consideration as we feel our project will benefit many people and will not only keep existing jobs, but will adapt people for new opportunities and help our areas overcome Recession and put people back to work. | PCS Technical Services, Inc. | 30 | 0 to 30 days | \$100,000 |
| Hamilton | Annual Campaign | The cash or annual campaign that provides necessary operating capital for the running of our school including, but not limited to: salaries, building maintenance, and technology was estimated to cost \$700,000-\$800,000 this year. This campaign consists of two major events per year: The Friends Campaign and the Tribute Dinner. The shortfall this year could be as much as \$600,000 due to many factors not least of which is the economic downturn. | Rockwren Academy | 50 | 0 to 30 days | \$500,000 |
| Hamilton | Financial Scholarship Assistance for Jewish DaySch | Rockwren Academy is the only Jewish day school in Cincinnati for Jewish families who wish to send their children to a school that encompasses secular and Jewish education. Our enrollment is down and we are receiving requests for additional financial assistance from our current families due to the economic downturn. We are finding it difficult to attract new students because of the additional financial burden of private school education. The ability of our school hinges on a long-range goal of increasing enrollment to a minimum of 250 students over the next 5-6 years. Unless we are able to provide more scholarship opportunities, Jewish day school education which is open to all members of the Jewish community, will not be able to reach for a great deal of our constituents. We foresee this request for stimulus money to be needed for multiple years. | Rockwren Academy | 45 | 0 to 30 days | \$1,720,000 |
| Hamilton | Winton & Sharon Road Signals | Hamilton/Winton Rd. / Sharon Rd. Intersection-New signal poles and signals | OKI Regional Council of Governments | 5 | 31 to 90 days | \$150,000 |

| Hamilton | Little Miami Oh Scenic River Bike Bridge | Renovation of existing bridge while providing an additional bike bridge to connect the City of Milford to the Lowland Blue Trail and 8 other outdoor trails. Plans have been completed and awarded to a bid by a high caliber engineering firm, endorsed by many local environmental groups, as well as steps taken to initiate interest with ODNR. Milford is the only place in the country that has the 8 trail attribute (see www.jordantrails.com for details), yet we are a city divided by the river that prevents geographic attraction and economic development. The Lowland Blue Trail (boasts of 124,000 visitors every year) has NO direct connection to Milford. We are the "valley" of the area for a reason, but with a population of 7,400 there would never be enough funds on our own to undertake a project of this magnitude. We have done other bond projects such as Valley View. This work has also been coordinated with our new Massie Park Plan, which will have a bike bridge. | City of Milford/Milford Miami Township Chamber of | 39 | 0 to 30 days | \$3,500,000 |
| Hamilton | Fields Ertel Reprofling | Sharonville- Reed Hatman Hwy to 600 West of Copperfield Dr--Turn Lane Addition and Sight Distance Improvement | OKI Regional Council of Governments | 20 | 31 to 90 days | \$875,000 |

| Hamilton | Northland Blvd | Springdale--Northland--Repair concrete base, resurface, intersection improvements, pedestrian walkway The Property was used as a apartment's club prior to purchase in 1970 by Bill Schumann. Mr. Schumann purchased the property to end the nuisance caused by gun club (now defunct), and was unaware that the gun club left the property with lead concentrations in soil and sediment above the human health standards for lead in a residential use location. Approximately 8,000 tons of impacted soil and sediment are present on the site and in a creek flowing across the property. Mr. Schumann is 75 years old, retired, and cannot afford the cleanup of the property. Unless he receives outside funding, this property will sit idle and unusable for many years. He has met with the ODNR for funding, but was told that since he is not a municipality, ODNR will not fund the work. He has met with Hamilton County officials and they agree that, besides the cleanup, it is worth only a small fraction of its true value. Mr. Schumann is seeking Federal funds to clean this property. The cleanup is professionally scoped and shovel ready. The project can begin immediately and will retain employment for 50 professional/contractors. Once cleanup of the site will be ready for redevelopment as parkland or homes. | OKI Regional Council of Governments | 160 | 31 to 90 days | \$950,000 |
| Hamilton | Sickmann Property Development | Thurston Park--West of Elm St. to Terminal Park/Milford Cops. | Hamilton | Glennmore Avenue Curb Replacement - Cheviot | Curb replacement, base repair, resurfacing from Lowell to School Section (2700') | OKI Regional Council of Governments | 20 | 31 to 90 days | \$635,000 |
| Hamilton | Harrison Avenue Phase 2 - Cheviot | Purchase of 4 new coaches with chair lifts | OKI Regional Council of Governments | 2 | 31 to 90 days | \$1,103,232 |
| Hamilton | SORTA - concrete driveway | Concrete driveway upgrades at fee facility | OKI Regional Council of Governments | 2 | 31 to 90 days | \$24,000 |
| Hamilton | SORTA - driveway reconfiguration | Driveway reconfiguration | OKI Regional Council of Governments | 5 | 31 to 90 days | \$192,000 |
| Hamilton | SORTA - fleet watch RF hubos | Fleet watch RF hubos and system | OKI Regional Council of Governments | 2 | 31 to 90 days | \$299,732 |
| Hamilton | SORTA - Facility exterior doors | Upgrade to exterior doors at transit garage facility | OKI Regional Council of Governments | 5 | 31 to 90 days | \$125,000 |
| Hamilton | Intervention Unit | The Intervention Unit is a family based counseling/intervention program operated by Hamilton County Juvenile Court. The goal of the Unit is to empower parents and families to take their own strengths and resources to solve conflicts without ongoing official Court involvement. 1100-1500 referrals are received per year. The Unit also assists the County in its effort to decrease minority confinement/courtship with the Juvenile Court. 70% of the referrals are minority youth, with 62% being female. This request is to fund one Family Counselor position in order for the Unit to remain a viable alternative to the filing of charges against incorrigible/minorly adolescents. Without support it is likely that this free service will no longer be available to county residents. | Hamilton County Juvenile Court | 7 | 91 to 180 days | \$55,000 |
| Hamilton | SORTA - 9 hybrid articulated vehicles | Purchase of 9 hybrid articulated vehicles | OKI Regional Council of Governments | 5 | 31 to 90 days | \$7,200,000 |
| Hamilton | SORTA - Portable and pit lifts | Purchase of portable and pit lifts for articulated buses | OKI Regional Council of Governments | 5 | 31 to 90 days | \$140,000 |
| Hamilton | SORTA - 8 hybrid minibuses | Purchase of 8 hybrid minibuses for neighborhood circulators | OKI Regional Council of Governments | 5 | 31 to 90 days | \$1,300,000 |
| Hamilton | Cincinnati Art Museum Road and Garage Infrastrctu | Community area. This environmentally friendly project will provide a viable needed green, art and parking infrastructure to Cincinnati's foremost cultural institution that is increasingly served by mass transportation. Doubling its 250 visitor parking spaces will attract a broader demographic audience. The sculpture garden will increase the area's green zone. The new entrance will eliminate an unattractive roadway, allowing for the planting of clearing aged trees. Large windows in the garage will overlook a spectacular view of Cincinnati. The museum is the oldest West of the Alleghenies having the largest collection in Ohio, with no addition since 1962. It presents a wide range of educational programming to all ages, annually serving over 100,000 school children. This project would be a model for how to solve infrastructure needs while being environmentally responsible. It will increase the museum's annual economic impact of \$55 million and increase the capacity to raise funds for a major expansion and total renovation amounting to \$160 million. | Cincinnati Art Museum | 145 | 91 to 180 days | \$33,820,894 |
| Hamilton | 21st Century Skills Teacher Technology Coordinator | The Southwest Local School District is in need of new technology for all of its teachers to achieve "21st Century Skills". Due to a lack of funds on the part of our financially fragile school district the teachers in Southwest have not had easy access to current technologies for almost 20 years. This project would spend a significant sum of money on new technology, specifically laptops both in the United States and other resources from U.S. companies. This program would also create 3 jobs for Teacher Technology Coordinator to work with the teachers implementing the technology. This program would improve our teachers and thus improve our students and community. The chance to be trained like no other teacher can make a difference to everyone involved. We have done without for so long while we have watched other schools all around us simply become "modernized" or join the 21st Century while we have done without. This is our chance! We would purchase over 200 laptops, over \$50,000 in technology equipment and create 3 new jobs. | Southwest Local School District | 3 | 0 to 30 days | \$750,000 |
| Hamilton | Fire Bureaus Consolidation Project | This project includes purchase of a two story building adjacent to the Cincinnati Regional Operations Center (ROC). Building cost is \$3 million. It funds significant building rehabilitation on the interior. The project would employ carpenters, electricians, laborers, plumbers, surveyors, architects, and technology firms. The rehabbed building will place Fire Department personnel in one location enhancing fire safety/service to the public. This would save \$17K monthly rent used for other buildings which could be applied to fire safety/education programs versus office rent. Fire deaths in Ohio were at record numbers (modern history) in 2008, this project will enhance fire prevention, inspection, permits, arson investigation and public safety education efforts for citizens of Hamilton County while partnering with other FDs in the region. Also, a Fire personnel resource need to the ROC will enhance public safety/service by serving as a primary incident management (personnel) resource able to ramp up ROC staffing quickly during a City, State, Regional, or National emergency. This project will improve fire dept. ancillary services delivery and safety of our citizens in OH. | Cincinnati Fire Department | 125 | 91 to 180 days | \$5,500,000 |
| Hamilton | Lockland Youth Recreation Program | Project of Lockland Art Museum/Highway 702 area involves renovation to turn in place 60,000 sq. ft. fire service station into recreation in 1800 - mid floor swimming pool was installed in 1949. Due to the expense to update the building, the district was forced to close the facility. This ended our use of the facility for physical education classes, swim teams and our summer recreation programs. This request for funding would make it possible to reopen the pool which would make it available for grades K-12 to participate in physical education classes and help our community by providing a recreation center to the Villages of Lockland and Arlington Heights. This money would also include training for supervision of the pool and recreation center during off school hours and would provide for professional development in the areas of swimming and recreation. Due to our declining industrial tax base, with five factories closing, this would give the youth of the two communities an opportunity to participate in recreational activities. | Lockland Local School District | 20 | 181 days or more | \$500,000 |
| Hamilton | Renewable Energy Project - Solar | Madeira City Schools is embarking on a renewable energy project and efficiency initiatives to reduce energy operating costs within the district. With the support of a private community donor already secured, we seek additional stimulus support to maximize our district's opportunity. The project includes a significant solar panel array on two school buildings, an energy audit focused on identifying other "green technologies" desired for energy savings including lighting systems and controls, daylighting, and the replacement of our high school boiler with geothermal technology. Primary to the focus of our costs savings efforts will be an educational focus for our students that will include hands-on interactive data collection, a student energy team, a community energy efficiency outreach program, and a sustainable approach to identifying other opportunities for energy cost saving measures. This "broader based" project has the potential to serve as an immediate example of the federal stimulus initiative's intent and will serve as a model for existing public school buildings becoming more involved in awareness of energy consumption, energy conservation, and renewable alternatives. | Madeira City Schools | 100 | 31 to 90 days | \$600,000 |
| Hamilton | Partial Roof Replacement | Replace Roof Section on Breen Elementary in our school district. The roof has been evaluated by a roofing consultant, and determined to have "fallen". It is very old, and has been in need of replacement for over 10 years. | Finneytown Local Schools | 20 | 91 to 180 days | \$325,000 |
| Hamilton | New Construction Of a jail | By replacing this roof will eliminate the numerous leaks that occur, which in turn will eliminate the destruction of property and materials, and improve the educational environment. It will also help preserve the life of the structure. Constructed new jail facility to accommodate Psych and medical facility for incarcerated population in Hamilton county. | Hamilton County Sheriff | 1000 | 0 to 30 days | \$90,000,000 |
| Hamilton | Resurfacing or new blacktop for parking areas | We were forced to close a rented facility due to decreased tax base and downturn in economy. Facility is necessary for public safety in Greater Cincinnati region. The construction of this facility would create hundreds of new jobs during construction and additional jobs after completion the site is suitable project could start here. This facility would benefit the mental health community by the medical needs of incarcerated population in Hamilton County. | Hamilton County Board of MRDD | 10 | 31 to 90 days | \$332,642 |
| Hamilton | Property acquisition and facility expansion | Resurface parking lots at 2 schools and 4 adult centers with a new blacktop parking lot at a office/warehouse. All locations are located in Hamilton County, Ohio. To acquire property adjacent to our current fire station for the purpose of expanding our current building to house additional offices, sleeping facilities and equipment and records storage area | Deer Park Silvertown Joint Fire District | 40 | 181 days or more | \$500,000 |
| Hamilton | South Mill Creek Greenway Trail | Engineering design for the 3.25 mile South Mill Creek Greenway Trail. The trail will connect upstream to the Quaker City/Ohio Mill Creek Trail to be constructed in the north with a stimulus investment, & extend downstream to the confluence with the Ohio River where it will connect to the Ohio River Trail. The comprehensive City of Cincinnati Mill Creek Greenway Program includes ecological regeneration of the river, retention & creation of jobs, economic revitalization of Mill Creek neighborhoods, & construction of over twelve miles of multi-purpose trail/bike trails in the river corridor. The trails will make bike commuting, outdoor exercise, recreation, & environmental education/training possible for 1/3 to 1/2 of the City's neighborhoods. Design/construction of the South Mill Creek Trail & four trail heads will integrate green technologies, including installed outdoor trails & porous pavement/concrete for paving, solar-powered music computer cases & lighting, and trail furnishings made from recycled/reclaimed materials. | Mill Creek Restoration Project | 12 | 31 to 90 days | \$240,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Hamilton | Princeton After School Computer Program | Princeton City School district will lose 24 million dollars in state revenue by 2016. That's 1/3 of our total operating budget. Princeton is a diverse community - diverse ethnically, socioeconomically, and culturally. Our diversity adds richness to the learning experience of students and staff alike. Princeton's diversity is a valuable asset which prepares students for the global society. Hence our mission statement: Princeton is a diverse community where we are all learners - inspired to dream and challenged to achieve. At the present time, three of our neighborhood schools are called "Continuous Improvement". In an effort to "level the playing field" to all of our students, regardless of ethnicity, socio-economic status, we would like to open our learning centers (libraries) to our students for an extended time after school. Students would have access to computers to work on Study Island, which is a state assessment online tutorial program. We would need funding to pay for computers, software and staffing to make this a reality. Students could also use the computers to do research or complete homework which would require the use of a computer. | Princeton City School District | 11 | 31 to 90 days | \$50,978 |
| Hamilton | City of Forest Park - Salt Barn | City of Forest Park - New Salt Barn | City of Forest Park | 15 | 0 to 30 days | \$175,000 |
| Hamilton | Cooperative Energy Conservation | I believe that through a study of University scholars and developers, we can combine the benefits of thermal, ground, and solar energy that could be shared by all. While the initial costs are prohibitive to one, if many shared the benefits, the costs will diminish greatly. Imagine a condo that shared its ground air, solar panels and are built with proper the sun orientation with materials to take advantage of all of our free energy. I have seen in my job, many homes built without any regard to the sun or wind and wonder if these developers don't need some direction. My name is Michael Collett. 513-753-3358 Graduate of Modler High School University of Cincinnati | Michael Collett idea to save the planet | 1000 | 91 to 180 days | \$3,500 |
| Hamilton | Get My Home Back | I am a single parent with four children. I lost my home to Foreclosure. I would simply like to use this money to reclaim my home for myself and my four children. I am not asking for one more penny than I need. Address: 9111 Whitehead Drive, Cincinnati, Ohio 45251. | Ruthemeyer Family | 5 | 0 to 30 days | \$250,000 |
| Hamilton | City of Forest Park - ADA sidewalk compliance upgr | City of Forest Park - Upgrade of sidewalks/ramps throughout city to bring them into accordance with ADA regulations. | City of Forest Park | 5 | 0 to 30 days | \$1,000,000 |
| Hamilton | Solar Panels on the roof | Rockwell Academy would like to install Solar Panels on the School Building. Our monthly energy costs are 17,000 to 20,000 per month. We would like to invest in renewable energy resources to help protect the environment and reduce dependence on oil products. This will teach our students important lessons in renewable energies and help keep the School running without the large electric consumption | Rockwell Academy | 5 | 0 to 30 days | \$600,000 |
| Hamilton | City of Forest Park - Miscellaneous Street Repairs | City of Forest Park - Miscellaneous street repairs including curb replacement/repair, SEM and resurfacing and street repair. The Mill Creek Green Schools/Green Infrastructure Program will equip students with the technical knowledge and skills to perform green technology jobs in the future. | City of Forest Park | 10 | 0 to 30 days | \$3,000,000 |
| Hamilton | Mill Creek Green Schools/Green Infrastructure Prog | The initiative will provide year-round environmental education programming for over 2,000 6th-12th grade students in Cincinnati Public Schools (CPS) District. The program will include innovative classroom & field instruction on green technologies for addressing water conservation/efficiency, managing urban stormwater runoff, & restoring wildlife habitat. Students will engage in "hands-on" science activities including water chemistry, biological and soil testing; participate in challenging environmental service learning opportunities; visit green technology demonstration sites in Greater Cincinnati; & design and install Green Infrastructure projects on their own school campuses. The Mill Creek Restoration Project (MCRP) team (educators, landscape architects, ecologists and engineers) will collaborate with CPS, the City, the Metropolitan Sewer District and other public/private partners to implement the program. MCRP is currently testing program components with 6 pilot schools, with excellent results. | Mill Creek Restoration Project | 10 | 0 to 30 days | \$232,500 |
| Hamilton | Roofing Replacement Reading Community CSD | The project would replace existing roofing in Reading High School, Reading Central Elementary and Hilltop Elementary to 7-8 or higher efficiency roofs and gutters. The project would generate long term electricity and operational savings. | Reading Community City School District | 25 | 31 to 90 days | \$1,050,584 |
| Hamilton | Interior Lighting Retrofit/Replacement | The project would replace the exterior doors for Reading High School, Reading Central Elementary and Hilltop Elementary School. | Reading Community City School District | 50 | 31 to 90 days | \$1,037,540 |
| Hamilton | Exterior Door Replacement - Reading Community CSD | The project would replace the exterior doors for Reading High School, Reading Central Elementary and Hilltop Elementary School. | Reading Community City School District | 25 | 31 to 90 days | \$104,000 |
| Hamilton | Low Emissions Combustor | Triumph Engineering Corp. is participating in the development of a low emissions combustion system for a gas turbine. The benefits of this system is a reduction in the emissions from gas turbines operating on various fuels. The funding is required to take the patented design and commercialize it. This project is currently in the testing phase and will enter the commercial market place within the next 45 days. The funds will be used to hire highly skilled engineers to develop the product commercially for our customer. The expected outcome is a commercially viable advanced combustion system that can be locally manufactured. | Triumph Engineering Corp. | 30 | 31 to 90 days | \$1,000,000 |
| Hamilton | Asphalt Lot Repair/Renovation | The project would permit the reconstruction of parking lots at Reading High School and Hilltop Elementary and for the partial replacement of asphalt at Reading Central School with a conversion of a portion of the area back to green space. | Reading Community City School District | 25 | 91 to 180 days | \$1,200,000 |
| Hamilton | Home addition | To create a first-floor bedroom/bathroom of approx. 200 sq ft that meets ADA criteria. Healthcare category is met in improving personal hygiene access for my disabled child. Current bathroom facilities are only available on our second floor and the bath is not accessible to assistive equipment. Home values have dropped to the point that we cannot borrow against the house. Prevention and Wellness criteria met by: -eliminate need to carry 50lb child up and down stairs, reducing chances of injury from falls and lifting. -improved bath access will improve personal hygiene and therefore overall health. -assistive equipment will reduce chance of injury from lifting in and out of tub. Jobs sustained: Design/architecture, local building dept., General Contractor, Concrete/Foundation Workers, Plumber, HVAC Spec., Electrician, Rough Carpentry, Finish Carpentry, Materials suppliers -reconversion ("home agent") fields in and around the City of Wilmington/Clermont County region. By retaining the recently displaced worker population in this area on new technology and telecommunications programs, Convergys would equip an individual with the skills and education potential for full-time virtual work opportunities within our global organization. Convergys provides competitive wages and full benefits packages to its employees. | Private Citizen | 10 | 91 to 180 days | \$50,000 |
| Hamilton | Retraining Displaced Worker Population | This workforce training and development project is a significant investment, with total project and training costs totaling over \$30 Million over the next 3 years. The offset amount requested is about \$1,500,000 for each year of the 3-year period. | Convergys Corporation | 325 | 91 to 180 days | \$5,000,000 |
| Hamilton | Foreclosure Procurement | The benefits of a Convergys virtual workforce plan includes the following acceleration of displaced workers back into the workforce, increased job opportunities for the disabled or mobility restricted, tangible environmental benefits due to decrease in commutes; reduced wear and tear on roadways; and non-interrupted work during major emergencies. I am proceeding to start a company that would begin purchasing foreclosed homes, performing renovations, and then renting or selling these homes. This program would help the economy by increasing home sales, creating real estate commissions, employer contractors to clean up and renovate properties, and allowing me to rent these homes for a little bit less than normal market conditions would normally allow. The funds will be exclusively used for down payments on various properties, and I estimate the down payments to be 30% of the total investment. My wife and I currently have excellent credit scores (750+) which will allow us to obtain bank financing for the balance of the project. Currently, we also own two properties. | Harris Rental Properties | 6 | 31 to 90 days | \$500,000 |
| Hamilton | Take Back our streets | I would like to start an initiative with local companies to hire felony offenders. By employing our unemployable, this will get them off of our streets. The city of Cincinnati has over 600 convicted felons who will become repeat offenders unless something is done to keep them off of the streets and in a productive environment. | Take Back our Streets | 500 | 91 to 180 days | \$1,000,000 |
| Hamilton | Building Energy Conservation Measures | In accordance with Hamilton County's Internal Energy Conservation Plan, undertake the upgrade, retrofit, and installation of energy reducing technologies within Hamilton County's public buildings. It is estimated that the projects undertaken within the scope of this initiative will save the County between \$500,000 and \$750,000 annually in energy utility costs and reduce the internal carbon footprint of government operations. Such utility reductions will lead to more efficient operations while also reducing budgetary pressure to allow for the retention of necessary public services and jobs while also providing economic benefit and job retraining/creation benefits to local energy/mechanical contractors and trades. I am the director of a fully funded rescue fund that is also a licensed professional counselor with extensive career experience in adolescent behavioral health. The premise of this program is that partnering rescued animals with adolescents in legal trouble has the unique ability to not only save animals that are about to be euthanized but also teach responsibility and commitment to troubled teenagers. Chances would include but not be limited to: 1) Reducing local shelter euthanasia rates by using animals scheduled for euthanasiation. 2) Reduce need for other community resources to handle the problem (youth 3) Teach responsibility, commitment and awareness to the youth in question. 4) Reduce recidivism in the adolescent group that participates in the program. | Hamilton County | 50 | 31 to 90 days | \$4,000,000 |
| Hamilton | Bully to Bully: Addressing Juvenile Delinquency th | The funding will be used to continue the existing professional development network for Reading Recovery teachers in Ohio. The funds will be used for salaries for the teacher leaders who provide the professional development for multiple districts and the Ohio State University faculty who conduct the research and professional development. In addition, funds requested will provide professional development for teacher leaders to prepare them to work with area teachers to provide expert literacy instruction in small groups for K-2 students who struggle to read. Reading Recovery is the highest rated scientifically based early literacy intervention according to the What Works Clearinghouse, a division of the US Dept of Ed, making this proposal a wise use of tax payers' funds. I teach 4th graders in an at-risk school throughout Ohio and will be pleased to serve multiple districts. This provides professional development for Reading Recovery teachers, Special education teachers, Teachers of English language learners, and any other teacher providing instruction to struggling readers in schools. There are 13 teacher training sites in Ohio. | Bark Ark | 416 | 31 to 90 days | \$10,000 |
| Hamilton | Reading Recovery Training Network | I would like to start an initiative with local companies to hire felony offenders. By employing our unemployable, this will get them off of our streets. The city of Cincinnati has over 600 convicted felons who will become repeat offenders unless something is done to keep them off of the streets and in a productive environment. | Reading Recovery | 470 | 0 to 30 days | \$2,155,000 |
| Hamilton | Computers for Centerpoint staff | We want to replace 60 sets of computers (WYSX terminal, monitor, keyboard and mouse) at \$489.00 per set for a Total cost of \$29,340.00. | Centerpoint Health | 0 | 31 to 90 days | \$29,340 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Hamilton | Psalm 27 | Psalm 27 will be a community based business that would include a thrift shop, educational classes, and volunteer opportunities for professionals and students. The ideal location would be downtown Over the Rhine and the idea is to get more people involved in community up-thing through variety of services, lectures and classes aimed at inspiring change. I would like idea to include a weekly "Community Cafe" a circular written by volunteer writers volving positive improvements and actions with the city. The organization will be a faith based business with table study, charm and antique classes geared toward middle and high school students. In addition there will be fundraising events throughout the city to encourage participation with proceeds going toward scholarships and continuing our mission. | N/A | 15 | 91 to 180 days | \$75,000 |
| Hamilton | New Pre-K-6 Elementary | New Combined school facility to replace a closed school due to Ohio EPA report of higher than normal chemical concentrations in the air surrounding the school. This new school will be a minimum of LEED Gold with hopes of achieving Platinum. | Three Rivers Local Schools | 125 | 181 days or more | \$28,586,892 |
| Hamilton | Saturday Wellness Clinic | The "Saturday Wellness Clinic" will open in early May 2009 in response to a growing awareness that Southwestern Ohio youth, particularly those uninsured, underserved with poverty associated and of communities of color, experience barriers to accessing culturally appropriate and sensitive health care. The Saturday Wellness Clinic (SWC) will maintain approximately 300 youth population especially youth of color including LGBTQ and homeless youth. During 2009 fiscal year, 1,560 clinical encounters are anticipated for these youth. These visits will include evaluation and treatment of acute issues, follow-up and management of chronic illness conditions (Asthma), and health maintenance visits including routine and sports physicals, immunizations, contraceptive counseling and prescriptions, and HIV and post-test counseling. HIV testing, sexually transmitted infection (STI) screening and treatment and Hepatitis screening and treatment. | Community Impact, Inc. | 6 | 31 to 90 days | \$202,630 |
| Hamilton | SBEP Schools Health Center | SBEP Schools Health Center. We currently operate a part time school based health center with a part time pediatrician, nurse practitioner and medical assistant. The funds would be used for one full time health center 9 days a week, 50 weeks of the year for a one year period. St. Bernard-Elmwood Place Schools are located in the city of St. Bernard and Elmwood Place, Ohio. The rate of economically disadvantaged for St. Bernard and Elmwood Place is 56.5% and 81.38% respectively. The ave 21.8% of the students in St. Bernard designated with a disability and 27.1% for Elmwood Place, the highest in Hamilton County. Also, there is no Doctor in either city. The center will first provide healthcare to the students of the SBEP School District and expanded to all citizens of both cities. Our goal at the end of the two year period is to be self sufficient and to continue to provide healthcare to all students and citizens of St. Bernard, Ohio and Elmwood Place, Ohio. | St. Bernard-Elmwood Place City Schools | 15 | 91 to 180 days | \$1,500,000 |
| Hamilton | Mt Healthy Family Practice Center Build Out | Services ceased on temporary basis. Our proposal to renovate our current center or an open location is now under way in an ongoing way and we began when 12 months of approval, adding 20 construction jobs for 6-8 months as well as 16 permanent staff in the center. It also brings us the chance to significantly expand our services in an already busy FQHC practice. This build-out of a former grocery store will give us over one, third more space and allow us to add a dental center, a service that has been highly requested by our patients in that area. This center currently offers a full range of medical services including family practice, internal medicine, pediatrics, ob/gyn and social work support. The expansion of space would allow us to meet a growing need in the community. In 2008, this site accounted for 38% of our 16,800 patient visits, an increase of 15% over 2007. We expect annual continued growth at this center, as more residents move from areas directly surrounding the City of Cincinnati to this northwest quadrant of Hamilton County. Our financial request covers all construction costs, new medical equipment as needed and dental equipment for a new center with 4 dental chairs. | The HealthCare Connection | 39 | 31 to 90 days | \$2,216,398 |
| Hamilton | SBEP Schools Technology Equipment Program | SBEP Schools Technology Equipment Program. Purchase 300 Apple computers (American Made) and smart boards for the schools. The program district will repair and replace on an as needed basis, but not less than every 7 years. The equipment will be used in the classroom by the teachers and teachers. St. Bernard-Elmwood Place School District is located in the city of St. Bernard and Elmwood Place, Ohio. The rate of economically disadvantaged for St. Bernard and Elmwood Place is 56.5% and 81.38% respectively. There are 21.8% of the students in St. Bernard designated with a disability and 27.1% for Elmwood Place, the highest in Hamilton County. We have the second lowest median income in Hamilton County. Because of the elimination of personal property tax in Ohio our school valuation has decreased by \$100 Million in the last five years. We have changed from a wealthy district to a poor district. We are unable to provide new computers for our students. | St. Bernard-Elmwood Place City Schools | 13 | 0 to 30 days | \$500,000 |
| Hamilton | EHR IT Project | This project is currently being implemented at our three health centers: Lincoln Heights Health Center, The HealthCare Connection Phone Center, and Mount Park Health Center. The health centers are scheduled to implement the NextGen practice management system by the end of March 2, 2009. There is at least \$112,000 worth of hardware still to be purchased. The next phase of this program is to begin the patient record, new and current, to be electronic format. The HealthCare Connection at this point has received funding from Federal Health Care Transformation Grants and a Federal Earmark totaling \$431,668. This leaves \$424,582 in order to complete this project. The HealthCare Connection is looking for funding for the second part of the project. Funding or financing to complete the project could be in the form of a grant. | The HealthCare Connection | 8 | 91 to 180 days | \$424,582 |
| Hamilton | The HealthCare Connection Phone System Project | The HealthCare Connection's phone system was designed almost 10 years ago. Since then, we have expanded to two other health centers and 4 primary care sites at individual health centers. As our services continue to expand, we have found that the phone system covering our three main sites needs to be upgraded to keep up with a growing complexity of services and the increasing requests that our patients, community and supporters contact us. In order to maintain quality control and customer service, we staff these schedules on our main center. Appointments for new centers come from this location simultaneously so we need greater efficiencies to our down on waiting time. Additionally, because of our growing number of Latino patients, we also offer an appointment line in Spanish, as well with translation on staff. We hope to better link those through medical translations, in his languages, to staff and patients. Finally, our reach into the community has increased greatly in the last few years - both because of public relations opportunities and fundraising events. When media, potential funders or new patients/care, try to reach us, they don't always easily find a person to talk with. An update of our phone system would help ensure that each person calling by | The HealthCare Connection | 5 | 31 to 90 days | \$49,715 |
| Hamilton | Lincoln Heights Diabetes Center Build Out | In 2008, nearly 60% of our patients were from minority groups, with high patient numbers from the African-American and Latino communities. Those two ethnic groups are two times more likely to develop diabetes than the rest of the population. In 2008, we announced our Diabetes Initiative 2009, a comprehensive program that would provide educational classes on nutrition, diet and managing diabetes and avoiding complications from the disease, as well as support groups for those trying to successfully "self-manage" their disease. A critical piece of this initiative is the availability of classroom and gym space at our Lincoln Heights Health Center. We are requesting funds to assist with plans to build out our existing basement space, creating a 5,000 sq. ft. of space, including a small gym, three classrooms and a storage area for the equipment. This project would require eight construction workers for three months and the permanent addition of three staff member for The HealthCare Connection Center for Diet & Exercise. | The HealthCare Connection | 11 | 181 days or more | \$208,000 |
| Hamilton | SBEP School Construction Project | SBEP Schools Construction Project. To construct two school buildings. Existing buildings 40 to 50 years old. First building, Pre-School through 6th grade, approximately 150,000 sq. ft. and a second building, 7th through 12th grade, of approximately 220,000 sq. ft. Construction period estimated at three years beginning June 2009 and ending August 2012. The rate of economically disadvantaged for St. Bernard and Elmwood Place is 56.5% and 81.38% respectively. There are 21.8% of the students in St. Bernard designated with a disability and 27.1% for Elmwood Place, the highest in Hamilton County. We have the second lowest median income in Hamilton County. Because of the elimination of personal property tax in Ohio our school valuation has decreased by \$100 Million in the last five years. We have changed from a wealthy district to a poor district. We are unable to provide new computers for our students. Whatever amount would decrease the total federal contribution. So you could've looked. Get more jobs for less money. | St. Bernard-Elmwood Place Schools | 900 | 91 to 180 days | \$45,000,000 |
| Hamilton | Diesel Exhaust Elimination System | To install diesel exhaust removal equipment that is attached to five apparatus. Our department currently has no means of removing diesel exhaust and soot from our fire station. As a result of not being able to efficiently remove exhaust contaminants we our exposing employees to harmful fumes and diesel by products when the vehicles are started inside the fire station. | Deer Park Silvertown Joint Fire District | 4 | 31 to 90 days | \$60,000 |
| Hamilton | Vehicle Replacement | Replace the departments 2 staff vehicles and 1 paramedic unit with hybrid SUV's | Deer Park Silvertown Joint Fire District | 50 | 0 to 30 days | \$150,000 |
| Hamilton | replace furnace; hot water heater; new windows | put new hot water heater building 46238 put new windows in building 46238 | Indian Walk Apartments, Inc. | 10 | 0 to 30 days | \$45,000 |
| Hamilton | Community Fellowship Center | The Community Fellowship center will aid the residents in Hamilton County in the areas of Food, Clothing, emergency Shelter, Job Seeking, Addiction Counseling, Computer training, Father and Me Program (Reuniting Parents with their children, Program called a Better Life, And Aids / HIV Awareness, Mentors for adults and Youth, and last but not least A Senior Program for adults over 50 Yrs Old that will help Transportation, Medicine Assistance, Summer Air conditioning, Winter Heaters for the cold weather. We are already delivering most of these services, but need funding for a building and maintain the building, and workers to help in the effort to aid our Communities. God Bless, Mark S. Miller Founder & Executive Director | True Life Inter City Ministries | 6 | 31 to 90 days | \$10,000 |
| Hamilton | Our Safe Schools | We are currently distributing over 1,000 boxes of bread weekly throughout the Communities, Giving Supplies, recognizing students for their good Grades, and providing Christmas and Thanksgiving for families and individuals. i.e. We just need more capital to continue our services. | Deer Park City School District | 3 | 31 to 90 days | \$150,000 |
| Hamilton | Indoor Air Quality | We would be able to obtain an emergency communications system for the district, and allow us to install security cameras in all buildings. I propose our employees to be the access of the general public to ensure the safety of our students and staff. Allow the district to install better indoor air quality for the district. By installing air conditioning and better make up air for the buildings. Our buildings are 100 and 50 years old. By making the buildings more comfortable the students and staff will be able to learn and teach more effectively. | Deer Park City Schools | 15 | 91 to 180 days | \$1,000,000 |
| Hamilton | Public Safety Project | CRF is a Non Profit that provides Tech support for Police & other Agencies, the systems that we provide help them in their overall fight against crime & to be able to document, with high tech equipment. New equipment is needed very badly & will be used through out Ohio in multiple counties. This has an Excellent track record & have the support of All Local Police Depts, DEA, FBI, State of Ohio Tax Office, Ohio Workers Comp, to name a few | CRI | 1000 | 0 to 30 days | \$495,000 |
| Hamilton | Delhi Park Surface Improvements | Repaving and paving all roadways and parking lots in heavily used, 50-acre recreational park | Delhi Township | 40 | 31 to 90 days | \$500,000 |
| Hamilton | SuperJobs Center Parking Lot Repair | The SuperJobs Center - central One Stop Employment Center for the City of Cincinnati and Hamilton County see over 1000 customers a month many of whom come to downtown by bus and need to be able to park their car to use services. The Center has two level parking lots which has been in a deferred maintenance process for several years and needs to be repaired in order to maintain its structural integrity and original planned life. The irrigation system for the lot is broken and needs to be replaced. The concrete is cracked and needs to be repaired. The concrete protection of the structure that would negatively impact the 80 parking spaces. This repair will allow the 1000 monthly jobseeking and employer customers to continue to be able to use the facility and obtain critical employment services, while also providing 10-15 tradesman with employment for the repair work. | Southwest Ohio Region Workforce Investment Board | 10 | 0 to 30 days | \$200,000 |
| Hamilton | ADA Infrastructure Compliance to One-stop Center f | The SuperJobs Center is the central one-stop employment center for the City of Cincinnati and Hamilton County and is located in a former employment services office close to downtown Cincinnati built 50 years ago. The building's entrance way must be reconstructed to provide compliance with handicapped accessibility which will require reconstruction of the entrance walkway, installation of appropriate doorways, and upgrading of the elevators. Additionally, the front curbs must be adjusted to provide for handicapped accessibility and grades that allow for van delivery as well as accessible front area parking spaces. Appropriate labeling and signage is also needed to make the facilities access compliant. | Southwest Ohio Region Workforce Investment Board | 12 | 31 to 90 days | \$250,000 |
| Hamilton | Basement infrastructure renovation of SuperJobs Ce | The SuperJobs Center is the central one-stop employment center for the City of Cincinnati and Hamilton County and is located in a former employment services office close to downtown Cincinnati built 50 years ago. The SuperJobs Center receives an average of 1000 visitors a month who use the two functioning floors of the building for work skills development, training, and job searching, as well as employees who recruit from our client base. The basement would provide us another 15,000 sq. ft. of usable space for staffing positions, training, and job searching. We would use around social services to support our customers, but we are unable to use it because of environmentally problematic building materials and methods of a prior time. Plumbing, electrical, and flooring work for the full 15,000 square feet is required to make the space habitable. | Southwest Ohio Region Workforce Investment Board | 25 | 181 days or more | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Hamilton | Weatherization and Greening of the SuperJobs Center | The SuperJobs Center is the central one-stop employment center for the City of Cincinnati and Hamilton County and is located in a former employment services office close to downtown Cincinnati built 50 years ago. The SuperJobs Center receives in excess of 1000 visitors a month who use the center for work skills development, training, and job searching, as well as employers who recruit from our client base. The facility is outdated and has no energy efficiency, window or operating upgrades in windows resulting in tremendous energy usage from the large attendance and heat/cooling bills through old windows and doors. The roofing materials are not energy conserving and contribute to polluter problems in the area, as well as the heating and cooling grid units exacerbating resources for utility management. The location of the facility is highly visible on a central arterial near downtown and could provide an excellent model for conversion to various energy improvement approaches. The Center could also provide training to its thousands of customers on energy efficiency through modeling new technologies that all visitors can see and feel first-hand. | Southwest Ohio Region Workforce Investment Board | 10 | 181 days or more | \$300,000 |
| Hamilton | Up-date building boiler | 3 story building at 808 Main Street to replace the building boiler #5030 | Stagnaro Company | 4 | 0 to 30 days | \$15,000 |
| Hamilton | Expanding Computer Aided Realtime Transcription (C | BRIEF PROJECT DESCRIPTION: My project would create at least 20 Computer-Aided Realtime Transcriptionists (CART) or CART provider jobs and 15 administrative support staff in the Ohio colleges or universities. With the addition of CART providers hard-of-hearing and deaf students will not be turned away because the school's disability office lacks qualified and well-trained CART providers. EXPECTED OUTCOMES: Higher enrollment in colleges and universities of hearing-impaired and deaf students. Better access to communication means better academic results. A more educated and technologically advanced deaf community. Increased brain power, creativity and positive contributions to our society, our country and the world as a whole. | Edmark Court Reporting Agency, LLC | 35 | 31 to 90 days | \$500,000 |

| Hamilton | Roof | This project would consist of a roof tear off and repair of any damaged areas. New ventilation for the roof to properly allow air flow in attic and into the home a general ability to heat or dehumidify. This would also include new gutters and gutter guards along with down spouts. New windows and doors to keep the cost of losing precious fuel to the cracks and seeps of old windows and doors. Also would like to build an addition to have enough room to live comfortably. This is a very affordable to keep the economy moving from paying a mortgage, we would be able to buy goods to help other move their wares. | Property Owner | 2 | 91 to 180 days | \$6,000 |
| Hamilton | energy savings funding | New Elementary school that will replace 2 existing elementary that exceed 50 years of age. \$ 7,500,00.00 New and replacement roof on 9 school buildings. \$ 450,00.00 Demolition of a closed Elementary \$ 250,00.00 New windows on school buildings that exceed 30 years of age. \$ 475,000.00 Replacement of 20 year old track at athletic field. \$ 275,000.00 | self | 2 | 91 to 180 days | \$50,000 |
| Hamilton | Building and Facilities Maintenance Upgrades | | Southwest Local School District | 150 | 91 to 180 days | \$8,950,000 |
| Hamilton | Maintain Properties | We currently own 113 properties. The credit crunch and the decline in real estate values, has eliminated much of our cash flow. We are struggling to make ends meet and will not be able to support these properties much longer. We have used all of our credit resources to make it this far. These properties are in areas 3 mile radius and they would go to foreclosure, it would have an adverse effect on the communities around them, not to mention displacing over 115 lower to middle income families. The many financial institutions (many local) would also feel the impact. We feel these funds would help us maintain the properties, reduce our debt, and allow us to move forward in improving and providing affordable housing in the west side of Cincinnati. We have many middle class families in our houses allowing them to send their children to a great school district, and we also provide section 8 housing for about 24 families. We have been talking to our local creditors requesting assistance, with very little cooperation and feel we have no other resources. We would never ask for taxpayers money unless we felt it was imperative to our survival. Thank You. Note: VENT'S use AED to stabilize the structure in high wind conditions, compared to a traditional HVAC (Horizontal Axis). With the heaviest component generator - mounted near the base of the structure, the spinning axis adds stability to the upright structure through increased centrifugal force as wind speed increases. By utilizing a proprietary system of parallel wiring, any break in the line can be by-passed, ensuring at least a portion of continuous electric flow EVEN when one pole in a line is knocked down in a high wind storm. We seek funding for AED R&D and integration of WindSLAT technology into 100 miles of existing Grid (14 mile intervals = 400 units) at INITIAL cost of \$50,000/unit. Each unit can generate 15kW/yr. at AVERAGE wind velocity of 9mph BTU/during high winds with severe storms of 30mph, the capacity increases by THIRTY-fold to 300kW/unit. This is significant to Power companies because greatest demand AND greatest vulnerability occurs in high wind storms. Eventual cost down to \$20,000/unit, so @ 5-10 cents/kwh hr, payback in only 2-4 years. | Valex Properties LLC | 25 | 0 to 30 days | \$500,000 |
| Hamilton | WindSLAT | | HeadStand Consulting | 300 | 0 to 30 days | \$10,000,000 |
| Hamilton | (A Small Business called) Wired Essentials. | Myself and another individual are going to be starting a new business called 'Wired Essentials LLP'. We are currently saving the money for legal fees, state fees, and insurance to get the business rolling. A primary job we would be doing is running wire throughout homes and doing smaller projects at low-cost. One major current project is running cable/antenna wire to get citizens ready for the 'Big Switch' in June. There is a big need for this and doing this as a second job, we can keep the prices low and affordable so no one is left behind. | Wired Essentials LLP (in process of filing) | 2 | 0 to 30 days | \$10,000 |
| Hamilton | Test | This test | Cincinnati Children's | n/a | 0 to 30 days | |
| Hamilton | Alternative Energy | Purchase and install 1 - 2 wind turbines to determine the feasibility of establishing wind farm in Southwest Ohio. This project would provide the data for further expansion of the use of wind power and feasibility of extensive use of wind power to reduce our state and country's oil dependency of fossil fuels. | Personal | 0 | 91 to 180 days | \$100,000 |
| Hamilton | Renaissance West | This is a 122 unit independent / assisted living and memory impaired project nearing completion in Green Township. The funding requested is to fund cost overruns and provide furniture, fixtures, and equipment. Need is immediate. | Renaissance West, LLC | 100 | 0 to 30 days | \$1,900,000 |
| Hamilton | Renaissance North at Crossings at the Park | Additional funding is required by lender in order to construct a 131 unit independent / assisted living memory impaired facility in Springdale, Ohio. Expenses from 250 to 400 plus necessary to construct and 100 more to operate. | Renaissance North, LLC | 250 | 0 to 30 days | \$2,000,000 |
| Hamilton | Grant for Education | I would like to get a degree Business Computer Programming and Database Management from Cincinnati State Technical & Community College. I was laid-off last June (2008) from the The Health Alliance in Cincinnati after almost 11 years of employment. I have been unable to get another job. I think this would be excellent degree and help me obtain employment since the program is a co-op program. | Unemployed | 1 | 181 days or more | \$9,000 |
| Hamilton | Youth Initiative for Young Women | WYN is a non-profit organization that helps in the development of youths in the Greater Cincinnati Area. Programs are provided in Nutrition, Fitness, substance awareness, educational assistance, mentoring, volunteering, and competitive sports. These programs are provided for youths in which many of them either cannot attend these opportunities and/or may have some type of physical or learning disability. The program benefits from all different types of backgrounds. There are currently over 100 youths involved with the programs on a full time basis and more than another 250 that the programs have reached out to help. The focus of the program where the funds would be used is to get more young women involved with the organization on an additional 50-75 on a full time basis. WYN works on developing young men and women into better people by offering no cost programs in nutrition, sports and training, and education assistance. The youths participate in these programs and in return they are required to do volunteer work to complete a substance awareness program and agree to get tested randomly for drugs and alcohol. More information can be found at www.wynsports.org | WSN Sports Academy | 10 | 31 to 90 days | \$50,000 |
| Hamilton | Child Abuse training | This request to continue a current education/training program which will focus beginning in July 2009. Using behavior technology one-on-one, we train Ohio social workers, physicians and law enforcement officers in best practice forensic interview methods and diagnostic methods to recognize child abuse. The project a) adds video conferencing technology to Ohio courses without such capability and b) peer review training of interviewers and investigators. | Mayerson Center for Safe and Healthy Children | 0 | 0 to 30 days | \$70,000 |

| Hamilton | Energy Efficient Lighting | We provide facility audits of existing lighting systems for public and private institutions and provide proposals to upgrade to energy efficient lighting products. This includes providing the product, coordinating installation, facilitating available rebates and sometimes locating financing. We have been in business for 12 months and have been hit hard by the shrinking economy. However, we provide a service of great value that is in line with President Obama's energy initiatives. We need this additional funding to keep our business open. | GreenTech Lighting | 2 | 31 to 90 days | \$50,000 |
| Hamilton | WVQC, Low Power FM Radio | WVQC is a true community station. Programs will be produced by local volunteers and will reflect the station's four goals: encouraging civic engagement; showcasing local arts and culture; increasing the diversity of voices on the air and expanding access to local media. WVQC will broadcast city council meetings, local music, talk, arts programs and even Spanish language news. WVQC presents a unique opportunity for Cincinnati. Because it is practical and affordable, low power radio is the perfect community medium. However, licenses are hard to come by. Media Bridges' permit to operate WVQC was the result of a 7 year application process with the Federal Communications Commission. It is the only one of its kind in the city. | Media Bridges | 2 | 0 to 30 days | \$121,842 |
| Hamilton | School Library, Media, Arts Center | Establishing and provide an educational facility that complements the academic and technological instructional processes so that the unique learning styles of each student is challenged to achieve maximum potential according to respective capacities. Outcomes: Ideal building foundation; change the structure of the antiquated existing facility; establish an environmentally controlled facility; purchase needed printed books, desks, technological equipment; change the lighting; acquire acoustic flooring; establish a reading area; enhance a closed circuit TV studio. | Guardian Angels School | 100 | 91 to 180 days | \$400,000 |
| Hamilton | OPEN A UPS STORE | SET UP A UPS STORE FRANCHISE IN HARRISON OHIO | JAMES B SMITH | 4 | 91 to 180 days | \$400,000 |
| Hamilton | MAKE A WALK IN BASEMENT ENTRY | INSTALL A WALK IN BASEMENT DOOR AND SIDEWALK SO THAT MY WIFE CAN GO TO THE BASEMENT SHE HAS PROBLEMS WITH HER LEGS AND BACK AND CANNOT CLIMB STAIRS. | JAMES B SMITH | 2 | 31 to 90 days | \$20,000 |
| Hamilton | MAKE A WALK IN BASEMENT ENTRY | INSTALL A WALK IN BASEMENT DOOR AND SIDEWALK SO THAT MY WIFE CAN GO TO THE BASEMENT SHE HAS PROBLEMS WITH HER LEGS AND BACK AND CANNOT CLIMB STAIRS. Financial promotion and expansion of tree farms, tree planting, and farmland within Ohio over twenty years. | JAMES B SMITH | 2 | 31 to 90 days | \$20,000 |
| Hamilton | trees -n- farms the charm | tree planting sites = highways, cloverleafs, commercial blvds. farmlands = all existing ones at present time and appropriation of numerous vacant lots within municipalities. argument: farmland = last remaining indisputable asset of nation other than water that is irreplaceable and strengthens nation's security = means for "greening" inner cities and for providing sites for community collaboration and community sustenance that's convenient and environmentally enriching argument: trees literally and figuratively = nodes of cleaner air, water/evaporation cycle, nature's air conditioning, habitat perpetuation for songbirds, birds of prey, and fruit production, and soil retention tree and farm growth = base for business growth (tool and machinery, nurseries, research, community camaraderie and "grassroots" work) and ever inspiring symbol of "being" | na | 8,000 | 31 to 90 days | \$3,450,000 |
| Hamilton | Low income families deserve a quality childcare pr | An existing child care center located in a low income area, that is predominantly funded by Title XX. We would replace approximately 3600.00 square feet carpet, paint walls, install a computer in classrooms of children that are 2-12 and older. Remove an existing 2nd floor of the building to accommodate up to 72 additional children to allow for additional staff needed to be hired. All programs would receive new developmentally appropriate equipment. Tuition would be implemented to assist children with their homework. | Kids Plus Learning Center | 10 | 0 to 30 days | \$25,000 |
| Hamilton | Artistic Development Jobs for Ohio (ADJO) | Funds would be used to recognize a community of diverse individuals with musical or artistic aptitude within the arts. The organization's employees would work to identify, fine-tune and develop the skill sets and talents of area artists. Artist would then mature to pass their skills and talents to subsequent artists. Emphasis would be on the development professionals and the talent that is identified. The jobs would be starting since ADJO would provide a set curriculum for the development of the artist - including the business management skills required to sustain the artist and job. The identification of talented individuals and the development of their skills, in tandem with fostering well rounded business skills would be at the heart of this project. It would put individuals to work quickly - in a way that sustains the development of the talented individual. | Ohio Artist Job Development | 104 | 31 to 90 days | \$1,848,372 |
| Hamilton | Beautiful Bond Hill | Within the boundary area of Bond Hill: To make streets close to Yarmouth Park safer by enforcing parking to one side of the street with assigned time and mark street to one-way traffic (opposite for each street in the neighborhood); enforce one way and turn-offs onto side streets difficult. Signs with these markings at traffic signals, street lights and create a sign at the entryway of leaving and entering the neighborhood of Bond Hill. Plant new garden by expressway entrances. | Bond Hill Community | 50 | 91 to 180 days | \$100,000 |
| Hamilton | Hamilton County Bike and Kayak Store Expansion | This project will involve the start-up of two new bike/kayak stores in the Cincinnati area. Each store will repair bikes and sell new bikes and parts. We will also sell parts and accessories for bike/kayaks. We have started a store 2-10 years ago, and it is doing well. Each location will employ one manager, three mechanics, and one sales person, at a minimum. The first store will begin shortly after fund receipt. The second store will follow approximately one year later. If the emphasis of the second store is an issue, it can be moved up to 6 months after fund receipt. I worked in bike shops in the severies, and owned a store then. I joined the corporate world and managed an engineering and project management office responsible for \$20-25 million each year. My corporate involvement will insure success for these two new start-ups that form this project. We are a health and wellness center specializing in defense technique. We offer self defense classes, youth programs which help instill positive work ethic and support for area children (some from troubled situations) and help create healthy lifestyles for everyone in our center. Our programs have helped many people overcome unhealthy lifestyles. We put on yearly events with a portion of the proceeds going to charities. We currently employ 9 and had 5 lay offs in the last 6 months. With the economic downturn we are suddenly in a negative cash position with the loss of memberships starting last November and very limited sales revenues since the same period. Being a small business we will not be able to maintain this type of loss. We have estimated going into default of our loan within 3 months leaving an Ohio business disappearing. 9 employees and a bank dealing with the pressure of no payment. We are requesting some assistance to cope with the global economic downturn so that we may continue to serve our community. The above stimulus request is to maintain payment of the loan, preserve current jobs for our employees and create new jobs in the project of growth. | BJ'S Bikes 'N Kayaks | 10 - 12 | 31 to 90 days | \$1,000,000 |
| Hamilton | Health: wellness and sales | Rockwern Academy expects its teachers and staff to continue their education and be informed the most up-to-date teaching techniques, programs, and technology. This is not only wonderful for our students but, in being able to offer education to our staff we are able to attract some of the best people in their respective fields. We would like to be able to continue to support teacher/staff education and ad to what we have previously offered. The \$100,000 figure is for a two year period and would offer education opportunities for a majority of our staff. | Hincato, LLC | 11 | 0 to 30 days | \$300,000 |
| Hamilton | Faculty & Staff Training & Education | The Ohio Valley Construction Education Foundation (OVCEF), the educational affiliate of Ohio Valley Associated Builders and Contractors, seeks to expand its registered construction trade apprenticeship program in Southeastern Ohio. The project would involve lease or purchase of a 15,000 to 20,000 square foot facility that would be equated to provide state of the art classroom and hands on construction craft training to current contractor employees, as well as, new applicants. The OVCEF apprenticeship application process is open to the public. The open enrollment process is currently facilitating a connection between secondary vocational school graduates, the unemployed, and the under employed population of the region. Expansion and development of the apprenticeship program will not only provide more opportunities for students to attain good paying jobs, it will produce a safer, more professional construction workforce in the Greater Cincinnati area. Given that there are now empty skill set employees representing the full complement of residential trade skills, many which could be considered "green" jobs. In addition, we utilize skilled subcontractors along with the dedicated assistance of over 6,000 volunteers who support our work and help keep our overall costs down. | Rockwern Academy | 50 | 91 to 180 days | \$100,000 |
| Hamilton | ABC Cincinnati Apprenticeship Training Center | A unique aspect to PWC's approach is that we utilize a "Whole House" approach. We combine funds from various sources to provide the maximum amount we can in an attempt to provide a comprehensive approach to the structure's overall needs including energy conservation services. This reduces our overall costs by reducing multiple visits by crews from different disciplines. We are continually cross training our crew and volunteers so that we have multidisciplinary crews going out to address the homeowner's concerns as well as looking out for any additional repair needs they may notice in the home. | Ohio Valley Construction Education Foundation | 500 | 31 to 90 days | \$1,000,000 |
| Hamilton | PWC Weatherization Program | Study to be used as a quality control check to verify ODNR data on environment cleanliness. Also to determine if any signs of global warming is affecting these discharges in a hazardous manner. | People Working Cooperatively, Inc. | 40 | 0 to 30 days | \$3,000,000 |
| Hamilton | Independent study of urban and rural discharges in | To continue production of electric powered Excavators and Tracked Haulers to be utilized in the production of safe farm - free hospital foodservice and education facilities. Using our equipment will result in less diesel emissions on many construction and commercial remodeling projects and a safer indoor working environment due to the elimination of Carbon Monoxide fumes. We are receiving MANY calls to purchase and rent this equipment from ALL over the U.S. and other parts of the world. We have had this unit sold along with others we already put up of our own assets. we can employ more people and decrease emissions while creating a safer work environment. Please visit miniequipment.com to get an idea of what we do. Thank you for your consideration. | S&S OnSite Labs | 2 | 181 days or more | \$500,000 |
| Hamilton | Production of Fume -free Green Electric Powered Co | This project is aimed at creating and retaining auto supplier jobs by providing operational improvement training. This would extend a highly successful, existing program funded by ODOD and DOL over an additional 3 year period. This project trains employees in Lean Sigma techniques which impacts company operations through improved productivity and quality. This ultimately makes the auto suppliers more competitive so they can sustain their business and employment in this economy. Our experience shows that when auto suppliers engage in this type of program they make investments and hire or retain employees. Over the past three years, TechSolve's Lean Sigma training has provided an impact of \$61 per training dollar and over 1,500 jobs have been created or retained. | CreteBusters Residential Rentals LLC. | 10 | 0 to 30 days | \$500,000 |
| Hamilton | Automotive Manufacturing Educational Partnership P | TechSolve, with MAGEE, Columbus State, and Lorain County Community Colleges have successfully developed an integrated network of industry-based, demand driven Lean Sigma curricula addressing the training challenges of auto suppliers. Based upon our historical success with similar projects and our funding request, we anticipate creating over \$300MM in economic impact and also creating or retaining over 1,900 jobs. | TechSolve, Inc. | 1,900 | 0 to 30 days | \$3,000,000 |

| Hamilton | ITn3d go to Market | Investing in Science and Technology to Advance Ohio's Economy - I am an Ohio entrepreneur who has started a high tech business around a software tool that developed called ITn3D (www.itn3d.com). My goal is to make this a thriving business based in Ohio supported by Ohio IT professionals. Currently I am a one man show with a few customers, and want to expand the service to a much broader marketplace and grow the business to where I can hire as many people as are needed to support the software. In addition I would like to broaden the product technology into a database solution which will also generate more work for IT professionals in Ohio. I have funded the business with my own personal funds so far and there are many opportunities. I have some good existing customers and prospects but still through revenue to sustain the business. The project would involve receiving ongoing funding to 'go to market' with ITn3D, where the business turn rate is about \$10,000 per month and there is a need to spend additional marketing dollars. I believe that the success of ITn3D will create a new high tech software company in Ohio which will generate important new IT jobs. | IT Business Dimensions Ltd | 10 | 0 to 30 days | \$500,000 |
| Hamilton | THU Redevelopment Program | The money would be used to fix existing facilities, improve common area (and fix parking lot, lighting, etc), wire facilities for internet capabilities, and some marketing. | Thompson, Hall and Jordan Funeral Homes | 40 | 0 to 30 days | \$300,000 |
| Hamilton | Galbraith Road (Daly to Winton) - Ham. CR 101 - 0 | The project involves the repair, replacement & resurfacing of pavement structures within the existing right of way. Approximate length is 3,700 feet. The project will provide needed improvements to the roadway and adjacent sidewalks that have significantly deteriorated. Proposed improvements will provide improved travel efficiency as well as safety for an arterial corridor that serves the urbanized area of Hamilton County. The plans for the project are complete, and the project is "shovel ready". | Hamilton County Engineer's Office | 20 | 31 to 90 days | \$3,000,000 |
| Hamilton | City of Cheviot - Harrison Ave Streetscaping | City of Cheviot - Harrison Ave Streetscaping - Aesthetic improvements to Business District including benches, trash receptacles, gateways, banners, trees, sidewalks and crosswalk paving, landscaping and banners. | City of Cheviot | 20 | 0 to 30 days | \$1,077,000 |
| Hamilton | Amend Advancement | Project length - approx. 2500 linear feet Funding to immediate needs requesting funds to overcome impact of predatory lending replace residences provide automobiles provide employment locating assistance overcome hardships of being disabled provide for disabled person start educational fund reduce global warming from greenhouse gases. | The Amend Family | 25 | 0 to 30 days | \$11,400,000 |
| Hamilton | City of Cheviot - Harrison Ave, Phase II | City of Cheviot - Harrison Ave, Phase II, 2700 linear feet of concrete base repair and resurfacing and curb repair. | City of Cheviot | 45211 | 0 to 30 days | \$635,000 |
| Hamilton | City of Cheviot - Glenmore Ave | City of Cheviot - Glenmore Avenue - 2400 linear feet of total curb replacement, concrete base repair and resurfacing. | City of Cheviot | 20 | 0 to 30 days | \$662,000 |
| Hamilton | Cincinnati Fire Department - Self-Contained Breath | The Cincinnati Fire Department needs to purchase all new SCBAs to ensure the safety of the firefighters responding to fires and hazardous materials incidents. Funding for the total replacement of all existing SCBAs is necessary in one year in order to ensure that parts between the SCBAs are interchangeable. The department's SCBA set consists of air bottles, air masks, harness regulators, face pieces, and connecting hoses. | Cincinnati Fire Department | 3 | 31 to 90 days | \$2,400,000 |
| Hamilton | Rookwood Pottery Arts Campus | This project is about the Rookwood Pottery Company's business re-emergence and the positive impact on a depressed urban community in Cincinnati. We have detailed plans and programs for this arts-based campus project. We include manufacturing, community development, tourism, food service, museum, retail and education. We also plan to bring in and house national and international artists to work on the campus. Our impact and use of funds include the adaptive reuse of over 175,000 sq feet of historic vacant buildings. We plan to be a leader in green technologies and manufacturing in the urban core. We plan on being a destination for over 200,000 visitors annually per year. Rookwood has an international legacy as a leader for 128 years supported by politicians and business leaders world-wide. We believe the social and economic impact will be of great benefit not only to the City of Cincinnati but to the region, the State and the Country. The project economic impact is higher than as much as \$120,000,000 annually by 2012. We believe the merits of this project are worth the investment of other municipalities and government agencies to realize the objective. | The Rookwood Corporation | 125 | 0 to 30 days | \$4,500,000 |
| Hamilton | Blue Rock Road (Sheed to Cheviot) - Ham. CR 71 - 0 | The project involves the repair & resurfacing of pavement structures within the existing right of way. Approximate length is 7,000 feet. The project will provide needed improvements to the roadway that have significantly deteriorated. Proposed improvements will provide improved travel efficiency as well as safety for an arterial area of Hamilton County. The plans for the project are complete, and the project is "shovel ready". | Hamilton County Engineer's Office | 20 | 31 to 90 days | \$500,000 |
| Hamilton | Serenity Hair Salon and Spa | The wife and I own a Beauty Salon and presently have 22 employees working for us. We have both commisioned and the salon booth returns as well. With the ongoing decline in the economy, business has been slow. My commission girls are struggling to keep their income, which in return is hurting our business and making it hard on us to keep up on the monthly bills. The booth returns, which pay for the rent of the building, are struggling also because their business is slow but they have to continue to pay that rent to the landlords. We are in desperate need of a loan and parking lot. The funds would be used for the following: The new parking lot and to add another 2000 sq ft. By adding more stations for booth returns, I could continue to pay the salon on the booth returns income, thereby keeping my girls in the salon. The other commission employees to work. At the same time I could reduce the amount of rent for the booth returns, which would in turn help them with their monthly personal bills. Any other funds I could request to reduce the outstanding debt the salon owes with the bank return will help keep my doors open and everyone employed. Thank you for your time. | Serenity Hair Salon and Spa | 28 | 31 to 90 days | \$125,000 |
| Hamilton | Removal of Dead Trees On Private property | In the recent hurricane winds and heavy rain & snow damage! This resulted in many trees that need to be removed and because of the safety aspect to personal injury due to falling trees but also damage to their buildings & homes on their property, not to mention neighbors properties! Estimated cost of removing these trees range from 500 to 1,000 dollar per tree! This would help the economy by hiring more crews to do this work and by adding to the value of the homes and properties that this service would be afforded too! This would entail Clipping Tree Services of the individual home or property owner contracting the service! In my case I have 2 (two) mature trees & 8 in my property that need to be taken down! Estimated cost for my 2 trees is about 2000 dollars! And I am 81 years old and on a small retirement income! I hope you will take my "Stimulus" suggestion to heart and approve my idea! Sincerely, I am yours, Tom Haviland | Homeowner | 40 | 91 to 180 days | \$30,000 |
| Hamilton | Voice over IP | Entire new state of the art Voice over IP phone system for a public school district of 10,000 students. | Northwest Local School District | 5 | 31 to 90 days | \$350,000 |
| Hamilton | Galbraith Rd. (Vegas to Georgianna) - Ham. CR 101- | The project involves the repair, replacement & resurfacing of pavement structures within the existing right of way. Approximate length is 3,400 feet. The project will provide needed improvements to the roadway and adjacent sidewalks that have significantly deteriorated. Proposed improvements will provide improved travel efficiency as well as safety for an arterial corridor that serves the urbanized area of Hamilton County. The plans for the project are complete, and the project is "shovel ready". | Hamilton County Engineer's Office | 25 | 31 to 90 days | \$1,400,000 |
| Hamilton | Truck Program | Purchase 8 new Hybrid Trucks/Cargo Vans. To retain 3 existing employees and hire 3 new employees. | Adams Company, Inc. | 6 | 31 to 90 days | \$240,000 |
| Hamilton | Compton Rd. (Pippin to Mt. Healthy Corp.) - Ham. C | The project involves the repair & resurfacing of pavement structures within the existing right of way. Approximate length is 5,040 feet. The project will provide needed improvements to the roadway that have significantly deteriorated. Proposed improvements will provide improved travel efficiency as well as safety for an arterial corridor that serves the urbanized area of Hamilton County. The plans for the project are complete, and the project is "shovel ready". | Hamilton County Engineer's Office | 20 | 31 to 90 days | \$350,000 |
| Hamilton | Furnace replacement | Replace old equipment that is hanging on by its last tooth, with up dated efficient equipment. This reduce monthly operating and complete drain on the grid in the area. The Village of Newtown is seeking funds to build a new police training and dispatch facility. | Cottingham Family | 2 | 0 to 30 days | \$6,000 |
| Hamilton | Newtown Police Training and Dispatch Center | Our current location for our police station and dispatch center is in a back portion of our city hall. We currently have roughly 700 square feet for both a police station and dispatch center. The new facility will be approximately 8000 square feet with a fitness center, locker room, break area and practice range. Additionally, the plan calls for space to be used as an evidence room and meeting room for our officers. | Village of Newtown | 100 | 91 to 180 days | \$1,000,000 |
| Hamilton | Safe House | Remodeling old fire house into an educational building to help teach kids and adults how to get out of burning building alive. The premise behind it is to remodel part of the fire house into a building where as schools and communities can come and simulate being in a fire and be instructed on how to get out of burning building. The expected outcome is to reduce fire deaths in Cincinnati and the surrounding communities. | Cincinnati African American Fire Fighters Associat | 15 | 31 to 90 days | \$175,000 |
| Hamilton | Purchase two new police vehicles | The Village of Newtown would like to purchase two new SUV's for the police department use. The current vehicles used need to be replaced. The existing vehicles are used for various public safety tasks. We are simply seeking needed funds to replace them. | Village of Newtown | 2 | 0 to 30 days | \$120,000 |
| Hamilton | Cornell Rd. (I-275 to Snider) - Ham. CR 256 - 03.8 | The project involves the widening and resurfacing of the existing pavement to accommodate 3 lanes of traffic as well as the construction of new sidewalks within the existing right of way. Approximate length is 1,350 feet. Proposed improvements will provide improved travel efficiency as well as safety to support and sustain anticipated economic development along the arterial corridor that serves the urbanized area of Hamilton County. The plans for the project are complete, and the project is "shovel ready". The Village of Newtown is seeking funds to improve two of our existing park facilities. | Hamilton County Engineer's Office | 20 | 31 to 90 days | \$1,000,000 |
| Hamilton | Newtown Village Park Re-Development Projects | The first is Short Park. The project plan calls for construction of restroom facilities at the park as well as purchase of new playground equipment. The approximate cost for this upgrade is \$200,000. The second project is Moundsview Park. Moundsview is in great need of playground equipment replacement. In 2008 the State of Ohio condemned the existing playground equipment. We are seeking to replace them at a cost of approximately \$35,000. As we all know, parks are an amenity that improves any community. With the work we are doing to improve our overall pedestrian connectivity in Newtown these park upgrades will be extremely timely and useful to our future growth. Replacement of present barn which was damaged during company recommended barn to be torn down in windstorm in September of 2008. Insurance company refuses to pay for barn. | Village of Newtown | 40 | 31 to 90 days | \$235,000 |
| Hamilton | replacement barn | Replacement of present barn which was damaged during company recommended barn to be torn down in windstorm in September of 2008. Insurance company refuses to pay for barn. | home owner | 10 | 31 to 90 days | \$14,000 |
| Hamilton | City of Cheviot - Harrison Ave. Phase II | City of Cheviot - Harrison Ave Phase II, 2700 linear feet of concrete base repair and resurfacing and curb repair. Replacement of existing concrete curb center on 15,000 square feet located in community development/enterprise zone. Services primary and preventive health care, and a new service for dental, social services and behavioral health and community health education. To be built with energy efficient built out with a green roof system. To be compatible with broader based health care for uninsured and at risk populations. Current patients served is 3,500 for a total of 15,000 jobs. 45% are uninsured and the potential growth in the area is that a fifty percent increase in services in the next five years-- an evolving community in need of high quality healthcare and social services. | City of Cheviot | 20 | 0 to 30 days | \$635,000 |
| Hamilton | Braxton Cann Health Center relocation | Expansion of parking and green space for existing health care facility. To provide more than 30 parking spaces for an existing health center and to develop a park like green space area in the community for enhanced public safety, recreation and beautification. Funds will be used to purchase many inner city buildings, to enhance service area to include all community safety. Current services include 35,000 visits for 9,000 patients. Over 60% are uninsured. | Cincinnati Health Department | 10 | 181 days or more | \$5,250,000 |
| Hamilton | Elm Street Health Center Green Space and parking | Expansion of parking and green space for existing health care facility. To provide more than 30 parking spaces for an existing health center and to develop a park like green space area in the community for enhanced public safety, recreation and beautification. Funds will be used to purchase many inner city buildings, to enhance service area to include all community safety. Current services include 35,000 visits for 9,000 patients. Over 60% are uninsured. | Cincinnati Health Department | 3 | 181 days or more | \$500,000 |
| Hamilton | Lockland Up Grade Program | The funds are used at overhauling aerospace supplier jobs by providing operational improvement training & electronic tools to enhance productivity & access to new military business opportunities. This would extend & equip a highly successful existing Boeing ODP program funded by OODC over an additional 2 years. This project trains employees in Lean Sigma & aerospace awareness which impacts company operations through improved productivity & quality. Our experience shows that when suppliers engage in this type of program, they make investments & hire/train employees. Over the past 2 years, the Boeing ODP program has provided an impact of \$167 MM & over 374 jobs have been maintained. Additionally, TechSolve, with Renaissance Services, has developed aerospace awareness training & a readiness assessment tool to fast track manufacturers that are not currently supplying the aerospace industry into military markets. Through training & DDCUS software, aerospace suppliers will become adept at First Article Compliance & preparing Tech Data Packages that will be in compliance with military requirements plus reducing engineering hours for First Article Compliance by 50%. | Lockland Local Schools | 9 | 91 to 180 days | \$1,800,000 |
| Hamilton | Suppliers' Ohio Aerospace Resource (SOAR) Alliance | The funds are used at overhauling aerospace supplier jobs by providing operational improvement training & electronic tools to enhance productivity & access to new military business opportunities. | Hamilton | Anchor Connector (SR 32 to Broadwell Rd.) | The Anchor Connector project involves the construction of a new 2 lane roadway on new alignment between State Route 32 and Broadwell Road in the Anderson Township area of Hamilton County. The approximate length is 14,700 feet. Previous studies have identified this project as a significant need to provide better connectivity to large areas where industrial development exists and where there is considerable potential for expanded strategic economic development and job growth. Hamilton County, Anderson Township and the private sector are working cooperatively to advance the Anchor Connector. The design of the project has been advanced through the Hamilton County Transportation Improvement Districts, while the private sector is providing the required right of way. Stimulus funding is needed for construction in the amount of \$6 million to complete the project. | Hamilton County Engineer's Office | 1,600 | 91 to 180 days | \$6,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Low Income Housing Updates | Update all windows and doors, add needed insulation so the energy bills for low income tenants can be reduced and they can afford decent housing. | Turtle Enterprises, LLC | 2 | 0 to 30 days | \$30,000 |
| Hamilton | Day Rd. Bridge (B-0021) - Ham. CR 103 - 00.21 | The project involves the removal and replacement of a deteriorated bridge including the abutments. The project is needed to provide safe and essential connectivity between the existing communities and business districts of western Hamilton County. | Hamilton County Engineer's Office | 10 | 91 to 180 days | \$200,000 |
| Hamilton | Blue Rock Road Bridge (B-0225) - Ham. CR 71 - 02.2 | The project involves the removal and replacement of a deteriorated bridge including the abutments. The project is needed to provide safe and essential connectivity between the existing communities and business districts of western Hamilton County. | Hamilton County Engineer's Office | 10 | 91 to 180 days | \$200,000 |
| Hamilton | Maintenance and Improvements | New roof, outside concrete work and doors for home that provides housing for the homeless, mentally ill in our community. Outcome: The continual maintenance of safe, secure housing with supervision enables these individuals living on the streets, or recurrent hospitalization, the residence provides medication management, supervision, daily living skills and encourages training for employment. | Troy Residential, Inc. | 10 | 91 to 180 days | \$30,000 |
| Hamilton | Project Winning Season | To purchase the Cincinnati Bengals to get a winner in this town. I will create at least 40 new jobs by hiring a scouting department to have scouts at all NFL games, some college games and hire a General Manager to run the team. I do hope you will that this into great consideration. I will even have the name to Obama Stadium of Cincinnati. | Hatfield Family | 53 | 91 to 180 days | \$500,000,000 |
| Hamilton | Home Energy Efficiency Project | Two energy conscience retired public school teachers volunteer their total electric home in the Morfont Heights area of Green Township in Hamilton County to be updated to 21st century model of energy efficiency. This will be done by installing a grid-tied home solar energy system over a new roof, installing updated insulation, replacing their 23 year old kitchen appliances with high efficiency appliances, and replacing their 23 year old heat pump system with a new high efficient heat pump system. This project can be used as an example for showing other home owners what can be done in making a home energy efficient. This project can be a model for changing the home of today into the home of tomorrow as we work toward eliminating America's dependence on fossil fuels. | Self | 8 | 31 to 90 days | \$75,000 |
| Hamilton | CincyJobSpace, heartprints project, Coffee With A | heartprints inc. is a non-profit that seeks funding to amplify efforts, improve lives, opportunities, jobs, mentoring, and outreach via connecting with the community (primarily in Cincinnati, and ending areas) to reduce unemployment, improve knowledge economy, mentoring, education, and eliminate poverty through creating opportunities: 1.mentorship/ at risk' youth (heartprints project which we have done for 10 years 2.Jobs (CincyJobSpace, connecting quality candidates to quality companies, catalyzing reemployment for our growing talent pool of laid off workers) 3.Outreach: Thrift! Campaign (non-profit partner for prison mentoring, ending harmful cycles, eliminating violence against women/children, teamed with heartprints project to 'WCS' Ballard Women's Shelter, Crisis Outreach (Building homes,schools and churches in La Crosse, Honduras), ecochange, Operation Freedom (social justice), and other projects for improving lives & our communities) Sincerely, Blair Siegel www.Heartprints.org "We're as great as we help others become" | heartprints inc. | 100 | 0 to 30 days | \$50,000 |
| Hamilton | Green Jobs training program for Solar Thermal Inst | A Solar Thermal array would be installed on Woodward high school by a certified Ohio Solar installer (to be hired from the grant.) Students in the Career Technical construction program, under the direction of their lead teacher West Davis, a certified electrician, would assist in the installation, document and video tape the installation and calculate the cost saving on electricity. Curriculum for this program would be developed with Larry Field at Cincinnati State in the alternative energy program. Woodward students could get college credit in alternative energy for maintenance of the solar hot water system through CTAS credit. For completing the Solar thermal course in the Woodward Construction Program. This would quickly increase the number of solar thermal installers in South West Ohio and decrease coal-powered electricity consumption at Woodward and where ever subsequent Solar Thermal units are installed. | Greater Cincinnati Tech Prep Consortium | 3 | 91 to 180 days | \$220,000 |
| Hamilton | Cincinnati Streetcar Project, and Light Rail in C | Cincinnati is in the midst of an in-city revitalization. The construction of a streetcar, and supporting light rail system that connect the city's disparate suburbs will create hundreds, if not thousands of jobs while improving southwest Ohio's infrastructure. Unfortunately, gas prices, while currently at the peak of 2008, today still make us an expensive place to live. I assure you that electric, especially in such a suburbanized area as Cincinnati will most certainly feel the pinch of gas prices. Building a light rail system that serves the majority of the city's neighborhoods, not only helps to cut fuel costs for consumers, and eventually adapts to a society that is not as car-driven, but the project is green as well. A streetcar rail system (streetcar and light rail) could cut down on commuter traffic on all three highways, which in turn could save money on highway repairs and train fare could actually become profitable over the long run. I want to help the environment, save money, employ people and set an example to follow for the rest of the state and America. I want to build a windmill farm on my property and also develop solar heating and electricity smart board and computer in every classroom. | Tufts University (I'm a student) | 1000 | 31 to 90 days | \$60,000,000 |
| Hamilton | Lean, Mean & Green | | | 5 | 31 to 90 days | \$200,000 |
| Hamilton | Technology | Create labs so that students will be able to complete research work. update all our dated technology | Southwest Local School District (Harrison High Sch | 200 | 91 to 180 days | \$900,000 |
| Hamilton | NWLSD Wireless Access | Wireless access coverage for a school district comprised of 2 high schools, 3 middle schools, 8 elementary schools, and 1 early learning center. This project will lay the infrastructure which will allow the district to move toward a 1 to 1 student computer ratio. | Northwest Local Schools | 5 | 91 to 180 days | \$300,000 |
| Hamilton | Northside Health Center Relocation | Replacement of existing community health center in 20,000 square feet located in community development/enterprise zone. Services primary and preventive health care, dental and behavioral health and community health education. To be built with energy efficient build out with a green roof system. Construction project will be designed to meet a minimum Silver LEED as rated by the US Green Building Council. It is compatible with broader health care for uninsured and at risk populations. Current population is 25,000 with a total of 25,000 visits, 51 % are uninsured and the potential growth in the area is for a doubling of this population in the next five years- an evolving community in need of high quality healthcare and social services | Cincinnati Health Department | 15 | 181 days or more | \$7,000,000 |
| Hamilton | In-Car Digital Video Cameras | Upgrade from mobile video cameras, in 15 police cars, to DIGITAL video cameras. We recently received \$25,000 from BIA Grant. The cost of the conversion was \$80,000. With the current grant (\$25,000) we lack \$55,000 to convert ALL cars. We would like to convert all at the same time. This additional funding would allow us to do that. | Delhi Township Police Department | 0 | 0 to 30 days | \$60,000 |
| Hamilton | Speen Monitor (bringing awareness to motorist) | Requesting a "speed monitor". Our current one is 10+ years old and not functioning properly. The placement of the sign alerts motorists of the speed at which they are traveling. Plus possibly saving a life. We welcome requests for placement of the sign, weekly. We place the sign in school zones, neighborhoods, business districts, etc. | Delhi Township Police Department | 0 | 0 to 30 days | \$14,000 |
| Hamilton | Elm Street Health Center Renovations | Improvement of exam rooms with improved patient flow and energy efficient lighting. An additional 3 exam rooms will be provided, improved patient registration and patient flow and an estimated 2,000-3,000 additional patient care encounters | Cincinnati Health Department | 3 | 91 to 180 days | \$500,000 |
| Hamilton | Dornbusch Sewer project Committee | The Cincinnati Metropolitan Sewer District has informed our subdivision consisting of approx 115 homes, that we will have to shut down our existing working septic systems and be into a proposed sewer project in the next 3 years. Each homeowner has the potential cost of up to \$25,000.00 per home which includes fee assessments, planning, engineering report, driveway repair, tap in, hole, state water/sewer bills each month, land can interest. The majority of residents cannot afford this and will not qualify for loans in the present economy. Why not give each homeowner \$50,000.00 pay for that? We will add to a general rehabilitation if this project is completed. If not, many residents will have to sell at a loss to avoid the costs involved. Thank you. | Dornbusch Sewer Project Committee | 50 | 181 days or more | \$50,000 |
| Hamilton | MUV (Multi-Use Vehicle) | Multi-Purpose Vehicle (MPV) to conduct surveillance of drug transactions, crimes in progress, etc. Currently we have no means to conduct, and record, surveillance in a covert manner. Delhi Township borders the western portion of the City of Cincinnati. The Township certainly has the need to have such a vehicle. | Delhi Township Police Department | 0 | 0 to 30 days | \$90,000 |
| Hamilton | Elm Street Back-up Generator Replacement | Replace diesel generator with larger natural gas generator used for vaccine storage and emergency response | Cincinnati Health department | 0 | 31 to 90 days | \$180,000 |
| Hamilton | Building Rehabilitation | Rehabilitate current police department which was built in the early 70's. The number of police department employees has DOUBLED since the 70's. Naturally additional space is needed, however the Township does not have the funds to consider such a project. | Delhi Township Police Department | 25 | 91 to 180 days | \$1,000,000 |
| Hamilton | Administrative Building natural gas emergency gene | Natural Gas back-up generator used for emergency response. | Cincinnati Health Department | 0 | 31 to 90 days | \$180,000 |
| Hamilton | North side Health center back-up generator | Natural gas back-up generator used for emergency response, for patient care safety and continuity of health center operations. | Cincinnati Health Department | 0 | 31 to 90 days | \$180,000 |
| Hamilton | Price Hill Health Center emergency generator | Natural gas back-up generator used for emergency response, for patient care safety and continuity of health center operations. | Cincinnati Health Department | 0 | 31 to 90 days | \$180,000 |
| Hamilton | Three new cruisers | Three police cruisers (\$25,000 each) to replace older cars in the fleet. | Delhi Township Police Department | 10 | 0 to 30 days | \$75,000 |
| Hamilton | New Construction Painting | We are a small family owned business (Painting Care) We were working steady and then when the economy went down so did our work. New construction cost get being to build when gas is at a high. Now we will have work but have know way to pay for materials because we have no money left. We need this help so we can get back to work and pay for materials and payroll. We can get a 50 loan because banks think new construction is a risk. The contractor we have worked to hard to give you. We will not let this opportunity pass. We will have buildings interior and exterior which would give 8 people jobs for the rest of the year. I am swallowing my pride to ask for help. I don't know what else to do. We work hard to pay our taxes and do the best we can. I would really appreciate if you would consider us for this funding. If not I am afraid we are going to be another statistic with no home or job. Along with the other people that depend on us. Thank you for your time. Respectfully, Tim and Phyllis Ryan- Ryan's Painting & Services | Ryan's Painting & Services | 8 | 0 to 30 days | \$20,000 |
| Hamilton | Electronic medical records for six Health Centers | Implementation of electronic medical records(a soon to be mandated requirement of Federally funded health centers) at six sites: Elm St Health Center, Clarendon Health Center, Price Hill Health Center, Blanton Care Health Center, Northside Health Center and Midtown Health Center. The electronic medical record management system will consist of three components: office management, electronic clinical records (electronic medical records), and imaging. The office management component will include patient registration (integrated with the dental, lab, and pharmacy systems) to exchange information, billing and collection, appointment scheduling, and appointment reminders. The clinical records area will include: imaging, progress notes, informed consent forms, prescriptions, lab orders, lab results, immunization history, and other patient information. The imaging system will allow storage of both paper records and x-rays in digital format. The digital images would be stored in a TIF format. | Cincinnati Health department | 10 | 181 days or more | \$800,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Power factor improvement for small motors | Small motors, and lightly loaded motors, waste a significant amount of energy because they only use the power from the "front" side of the 60Hz power wave. This is called power factor utilization and is a problem for utility power generators. Proposed is the development and manufacture of a modular electronic device which improves power factor of small motors (such as refrigerators or fans) by actively switching waveform to use backside of 60Hz wave. When used in large numbers, this device would significantly reduce waveform power loss by improving overall waveform utilization efficiency. This will have a direct benefit by improving efficiency on the on the generation side, and will also improve transmission efficiency by smoothing the waveform. Project is to develop and patent the device, then to produce it in quantity. | OnikoLabs llc | 200 | 0 to 30 days | \$200,000 |
| Hamilton | cheviot home improvements | Put insulation in our attic to cut down on our energy cost. Retrod our backyard. Animals have destroyed our grass and now it is just a mud pit. Right a drain in the back yard. Install a hot water heater. Also to be installation requirement of probably 5 other items by an electrician. Also to measure Client Health Center, Price Hill Health Center, Boston Carr Health Center, Northside Health Center and Midvale Health Center for patient visits of 136,000 serving over 35,000 citizens) | Self | 20 | 0 to 30 days | \$30,000 |
| Hamilton | Electronic Medical records for six health centers | The electronic medical record management system will consist of three components: office management, electronic clinical records (electronic medical records), and imaging. The office management component will include patient registration (integrated with the dental, lab, and pharmacy systems to exchange information), billing and collection, appointment scheduling, and appointment reminders. The clinical records area will include imaging progress notes, informed consent forms, prescriptions, lab orders, lab results, immunization history, and other patient information. The imaging system will allow storage of both paper records and x-rays in digital format. The digital images would be stored in a TIFF format | Cincinnati Health department | 10 | 181 days or more | \$800,000 |
| Hamilton | electronic Dental medical records | Implement Electronic Dental Records at six Health Department clinics, currently providing over 25,000 visits in five sites: Elm St Health Center, Crest Shilo Shopping - Price Hill Health Center, Northside Health Center and Midvale Health Center. A dental electronic record software system incorporating enhanced practice management capabilities, electronic charting, and digital x-rays and imaging will be purchased and installed. A few of the benefits would be: Enhanced scheduling options, will allow clinical staff to schedule multiple appointments for a dentist based on the number of chairs available to the dentist. This will increase each dentist's productivity, improve billing procedures and less denials. Less time spent locating and handling paper files, improve dentists productivity with digital x-rays | Cincinnati Health Department | 0 | 91 to 180 days | \$600,000 |
| Hamilton | Electronic Laboratory records at six health center | Implement Electronic Laboratory Records at six Health Department clinics: Elm St Health Center, Clamere Health Center, Price Hill Health Center, Boston Carr Health Center, Northside Health Center and Midvale Health Center. These records will be stored on the lab tests annually) The Laboratory electronic record management system will move the Health Department lab practice to a paperless environment. The lab results come in several days after the physician has seen the patient. Electronic lab results will create tremendous time savings for clinic staff through eliminating the in-lab-out records and filing lab results. For Cincinnati Health Department, this will result in the elimination of manual paperwork and integration of lab equipment with the software application. | Cincinnati Health Department | 0 | 91 to 180 days | \$175,000 |
| Hamilton | Lean Product Development and Innovation Training | This project provides small businesses training to drive new sales through the creation of new products. TechSolve will then create/retain manufacturing and other supporting jobs plus require small to medium enterprises (SME) additional investments. In 2008, TechSolve began a project with the University of Cincinnati to develop an approach and pilot this process that was highly successful. The original project forecast was for roughly \$20MM in impact. The program ultimately generated over \$171MM, but more importantly 318 jobs were created or retained versus the original program goal of 121 jobs created or retained | TechSolve, Inc. | 750 | 31 to 90 days | \$1,000,000 |
| Hamilton | Home Health Electronic medical records | Implement Electronic Records for Health Department Home Care Nursing, providing 15,000 visits for both maternal and adult in five patients. The Home Care section of the Health Department Community Nursing organization is a Qualified Medicare Care Provider. This status provides the Health Department the ability to bill Medicare and Ohio Medicaid (or the Ohio Managed Care Plans) for services provided patients of these plans. The major deliverables from this system will be enhanced practice management system for the Home Care program. This purchase will provide significant employee productivity increases through the elimination of paper work and multiple entry of the same information. This will allow more timely and accurate billing to third party payers. | Cincinnati Health Department | 0 | 91 to 180 days | \$100,000 |
| Hamilton | Re-tooling Existing Manufacturer for Solar Product | Rough Brothers is a greenhouse, garden center and conservatory company based in Cincinnati, Ohio. The company has been in business since 1934 and is considered a leading manufacturer of steel and aluminum structures. The company's factory is located in St. Bernard and employs 55 people. The company has recently entered the solar power market and is just completing a project at Stockton College in New Jersey which integrates solar panels as the roof for covered parking. This initial project was done in conjunction with Marine Energy (a public utility company) and they are planning on expanding this solar facility to be the largest parking/solar installation on the East Coast. The company will need to re-tool it's manufacturing equipment and provide additional training to it's existing and new manufacturing employees. | Rough Brothers Greenhouses | 25 | 0 to 30 days | \$1,000,000 |
| Hamilton | 800 MHZ portable radios | Purchase additional 800mhz portable radios to provide every firefighter working on an emergency scene to have access to a radio. This is a major step toward the overall safety of our operation. | Deer Park Silverton Joint Fire District | 100 | 31 to 90 days | \$50,000 |
| Hamilton | Mortgage Assistance | I would like to request \$150,000 to pay off my second mortgage and pay down my first mortgage. That way I can afford to stay in my house and save money for the future, and/or to replace or repair my children's college education funds that was lost in the meltdown. | Family | 1 | 31 to 90 days | \$150,000 |
| Hamilton | Waverly Avenue Water Main Reconstruction | Project consists of replacing 360-ft of 4" water main with 8" ductile iron water main. This project also includes an extension of 500-ft of 8" water main to facilitate a water loop for water water quality and fire protection for our customers. | Wyoming Water Works | 10 | 31 to 90 days | \$75,000 |
| Hamilton | Chisholm Park Watermain Extension | Project includes furnishing and installing 1,500-ft of 12" water main, valves and appurtenances from Chisholm Trail to Compton Road. The purpose of the project is to increase water volume to remote sections of our water system for fire flow and to add system redundancy so that water main breaks affect fewer homes. This project was identified as a priority to be completed in 2007-2011 in Wyoming's 2007 water master plan. | Wyoming Water Works | 10 | 31 to 90 days | \$200,000 |
| Hamilton | Jewett Water Main Replacement | This project consists of replacing 2,000-ft of old 4" cast iron water main with new 8" ductile iron water main from Springfield Pike to Oliver Road. The purpose of this project is to improve water quality by replacing the old cast iron water main. Fire flow is also greatly improved as a 4" main is not adequate for fire flow by today's standards. | City of Wyoming | 10 | 91 to 180 days | \$200,000 |
| Hamilton | Ohio Medical Manufacturing Supplier Development Pr | This project is aimed at creating/training healthcare & medical manufacturing supplier jobs by providing training in FDA mfg regulations (GMP & Good Manufacturing Practices) and quality tools (Lean Six Sigma). This program is modeled after 2 highly successful supplier dept programs implemented by TechSolve serving Ohio's aerospace & automotive industries. Over the past 2 years these programs have jointly been credited with creating/training 1,204 jobs. This project trains employees in GMP & Lean Six Sigma techniques that impacting company operations through improved productivity, quality & regulatory compliance. TechSolve would provide an integrated training offering in partnership with the Center for GMP that has 30 years experience in providing FDA GMP regulatory compliance support to major medical manufacturers worldwide. TechSolve & the Center for GMP will also provide medical mfg awareness training & a readiness assessment to fast-track manufacturers that are not currently supplying the medical industry into the medical industry supplier marketplace. Based on the documented results of our previous supplier dept programs it is estimated that the program would create/train 950 jobs. | TechSolve, Inc. | 950 | 31 to 90 days | \$1,500,000 |

| Hamilton | Mt. Pleasant Water Main Replacement | Project consists of replacing 3,400-ft of old 4" cast iron water main with new 8" ductile iron water main from Springfield Pike to Compton Road. The purpose of this project is to improve water quality by replacing the old cast iron water main. Fire flow is also greatly improved as a 4" main is not adequate for fire flow by today's standards. | Wyoming Water Works | 15 | 91 to 180 days | \$325,000 |
| Hamilton | Galbraith Rd (Blue Ash to Kenwood) - Ham. CR 101 - | The project involves the widening and resurfacing of the existing pavement to accommodate appropriate turn lanes. Approximate length is 3,200 feet. Proposed improvements will provide improved travel efficiency as well as safety for an arterial corridor that serves the urbanized area of Hamilton County. | Hamilton County Engineer's Office | 20 | 91 to 180 days | \$1,400,000 |
| Hamilton | Winton Rd. (Timber Trail to North Hill) - Ham. CR | The project involves the repair & resurfacing of pavement structures within the existing right of way. Approximate length is 5,040 feet. The project also provides needed improvements to the roadway that has significantly deteriorated. Proposed improvements will provide improved travel efficiency as well as safety for an arterial corridor that serves the urbanized area of Hamilton County. | Hamilton County Engineer's Office | 20 | 91 to 180 days | \$1,200,000 |
| Hamilton | Colerain Avenue US 27 Access Management plan | The Colerain Avenue Project was divided into 8 sub-areas and is an access management plan on US 27 in Hamilton County. The project was the first retrofit of a commercial corridor to institute access management principles in an urban environment. The first 8 sub-areas of the project were the overwhelming success. The project resulted in over 100 Million Dollars in 1500 jobs representing NEW investment in Colerain Avenue. In addition, the accident rate was decreased by over 35%. The Ohio Department of Transportation completed the first 8 sub-areas and ran out of money for the last two. All plans are drawn up and ready to bid. The area set-aside for this project is approximately 1.5 Million Dollars. If these sub-areas are funded it is anticipated that an additional 600 jobs and 15 Million Dollars in new investment should occur in the area. This is based upon past experience with development of previous sub-areas. | Colerain Township (Largest Township in the State o | 600 | 181 days or more | \$6,000,000 |
| Hamilton | Smart Education | 150 Interactive SMARTBoards, 150 Projectors, 150 Laptop Computers | Northwest Local School District | 5 | 91 to 180 days | \$668,000 |
| Hamilton | Muchmore Rd. (Walton Creek to Indian Hill Cor.) - | The project involves the repair & resurfacing of pavement structures within the existing right of way. Approximate length is 5,040 feet. An existing culvert will also have to be removed and replaced as part of the work. The project will provide needed improvements to the roadway that has significantly deteriorated. Proposed improvements will provide improved travel efficiency as well as safety for an arterial corridor that serves the urbanized area of Hamilton County. | Hamilton County Engineer's Office | 20 | 31 to 90 days | \$450,000 |
| Hamilton | City of Forest Park - Municipal Building Alteratio | City of Forest Park - Municipal Building Alterations, which includes new entry with offices and lobby, repair of original building stone, brick, EPS, and policy building HVAC system. This municipal building improvements is long overdue and will enhance public safety (some of the overhead material on the entrance is falling away from deterioration). Improvements will provide improved travel efficiency as well as safety for our nonbonded security enhancement to better monitor who is coming in this municipal building. | City of Forest Park | 35 | 0 to 30 days | \$569,000 |

|----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | District wide rehabilitation | The Mariemont City School District consists of 5 buildings which range from 39-96 years of age. After going through a comprehensive review, it has been determined that it would cost \$63,453,382.52 to update all infrastructures to meet current state and federal standards. | Mariemont City Schools | 300 | 91 to 180 days | \$63,453,383 |
| Hamilton | Winton Rd. (Timber Trail to North Hill) - Ham. CR | The project involves the repair & resurfacing of pavement structures within the existing right of way. Approximate length is 1,700 feet. The project will provide needed improvements to the roadway that has significantly deteriorated. Proposed improvements will provide improved travel efficiency as well as safety for an arterial corridor that serves the unincorporated area of Hamilton County. | Hamilton County Engineer's Office | 20 | 91 to 180 days | \$1,200,000 |
| Hamilton | Safe Routes to Schools Sidewalk Program | The project is to implement the number 1 priority of the Colerain Township Safe Routes to Schools Plan published in December 2008. The plan would construct the following sidewalks: A. Poole Road Intersection at Springdale Road Colerain Middle School and Colerain Elementary School 400 ft B. Poole Road to Springdale Road -YMCA Colerain Middle School and Colerain High School 4,600 ft C. Joseph Road between Cheval Road and Colerain Avenue Intersections -Connectivity 3900 ft | Colerain Township (Largest Township in the State) | 100 | 31 to 90 days | \$850,000 |
| Hamilton | At grade railroad crossings on the Indiana and Oh | Rebuild at grade road crossing on the Indiana and Ohio Railroad at the following locations, SR 65, SR 741, SR 81, Baker Rd, Bible Rd, Berton St, SR 16, Bovee Rd, Wise Rd, Summit Rd, Chester Rd, Blue Ash Sub, Lorain Rd, Chiles Sub, Norewood Ave, Linden Ave, Stray Rd, US 50, Pickerington Rd. Crossings being rebuilt will greatly enhance public safety at the crossings. The work will employ about 10 people. We would like to remove the leaking steam boiler and install 50% efficient hot water boilers in its place. This will have an net all savings in energy consumption of 45% or more for this school. | Indiana and Ohio Railroad | 10 | 0 to 30 days | \$1,550,400 |
| Hamilton | St. Johns | Replacement of HVAC system in current police department. | HEUER HTG & AIR | 4 | 31 to 90 days | \$50,000 |
| Hamilton | HVAC Replacement | Replacement of HVAC system in current police department. I would like to outfit my home with some green renovations and | Delhi Twp. PD | 0 | 91 to 180 days | \$75,000 |
| Hamilton | Green Renovations | 1. Solar energy system The roof currently has 2 layers of asphalt shingles. The asphalt material is weathering off whenever it rains. Since I'll need a new roof in the future, I would like to install solar panel shingles. By running my home on solar panel, I can reduce my impact on the environment and reduce my need for electric from the local power company. Any additional energy harnessed could be sold back to the local power company. This will reduce my impact on the environment too. 2. Energy efficient appliances/furniture. Most of my appliances are older. For example, my refrigerator was manufactured in 2004. I don't even realize R134 made refrigerators until I saw the one. 3. Remove damaging/aging trees (due to weather events over the last 3-5 years) and replace with younger trees that are native and fast-growing. This will enhance the curb appeal of my property and beautify the environment. | Brenda Household | 0 | 31 to 90 days | \$50,000 |
| Hamilton | electronic Medical Records at six health centers | Implementation of electronic medical records system to meet regulatory requirements for necessary regulatory compliance as we were cited on recent center. Current Health Center, Price Hill Health Center, Braden Carr Health Center, Northside Health Center, and Milvale Health Center. Total patient visits is 150,000 serving over 35,000 citizens. The electronic medical record management system will consist of three components: office management, electronic clinical records (electronic medical records), and imaging. The office management component will include patient registration (integrated with the dental, lab, and pharmacy systems to exchange information), billing and appointment scheduling, and appointment reminders. The clinical records area will include charting, progress notes, informed consent forms, prescriptions, lab orders, lab results, immunization history, and other patient information. The imaging system will allow storage of both paper records and x-rays in digital format. The digital images would be stored in a TEF format. | Cincinnati Health Department | 0 | 181 days or more | \$800,000 |
| Hamilton | Road Reclamation Project | The township is seeking funds to improve several roadways by milling, re-cutting and guttering. These roadways will be selected by the township for reconstruction through our Roadway Master Plan document which will be done before these funds are distributed by the state. Title will use these funds to repair the top three roads identified by the plan. This is important for both safety and economic development purposes. First, these roads have been repaired over the years but not milled. This has created a difficult situation when it comes to run-off-during the winter there is extensive icing and in the summer standing water during rain event. Second, several of our neighborhoods have had problems with the run-off issues as well as the aesthetics of run down roadways that have a seaward effect on housing. | Columbia Township | 150 | 31 to 90 days | \$5,000,000 |
| Hamilton | Burnet Woods | This project will relocate the current roadway, create a scenic park drive, expand the Disc Golf Course, provide infrastructure improvements to the destination plaza and lake area and the project will provide healthy trails, new wetland areas, improved signage and utilities, and provide a new gateway to the city. | Cincinnati Park Board | 92 | 91 to 180 days | \$9,000,000 |
| Hamilton | Advanced Machining Training & Certification Progra | This project is aimed at creating and retaining machining and manufacturing related jobs by providing the required basic and smart machining training to displaced machinist in Ohio. The program would focus on advanced machining training including, but not limited to basic machining and grinding principles and practices, high speed machining, and smart machining technologies such as on-machine probing, tool condition monitoring, adaptive planning, supervisory control, advanced diagnostics and intelligent machining networks. The program will facilitate placement in high growth and emerging areas empowering the manufacturing sector, which is the backbone of Ohio's economy, to be more competitive at the national and international level. The dissemination of advanced and smart machining technologies in the manufacturing base will enable Ohio manufacturers to ensure the highest product quality assurance, reduced costs, and lower lead times. TechSolve will collaborate with the University of Cincinnati in this training and certification program that will be delivered both in a traditional classroom setting and through the Internet maximizing the target audience and potential impact. | TechSolve, Inc. | 100 | 31 to 90 days | \$625,000 |
| Hamilton | Jackson Hill Park | This project is situated in one of the City's Empowerment Zones and will provide a new entry plaza, create a new overlook of the City's skyline, and repair and replace the current walkway of the park, provide for new landscaping to benefit the neighborhood, provide a new shelter to serve the neighborhood, update the utilities and furnishings within the park. | Cincinnati Park Board | 51 | 91 to 180 days | \$2,100,000 |
| Hamilton | Inwood Park | This park is located in one of the City's Empowerment Zones. The project will provide a new entrance to the park, create several new picnic and parking areas, create new walkways throughout the park, create a new dog park, renovate the historic shelter, provide new shelters throughout the park, provide new gardens, utilities, and furnishings throughout the park. | Cincinnati Park Board | 94 | 91 to 180 days | \$9,200,000 |
| Hamilton | Fleischmann Gardens | This park is located in one of the City's Empowerment Zones. This project will provide the much needed renovation of the formal gardens, expand the park, add new terraces, utilities and furnishings, and create a new plaza in the park. This park is an historic old park that has always been a neighborhood stabilization factor. | Cincinnati Park Board | 48 | 91 to 180 days | \$1,900,000 |
| Hamilton | Electronic Dental Records at 5 health centers | Implement Electronic Dental Records at the Health Department clinics, currently providing over 25,000 visits in five sites: Elm St Health Center, Crear Smile Shoppes, Price Hill Health Center, Northside Health Center and Milvale Health Center. A dental electronic record software system incorporating enhanced practice management capabilities, electronic charting, and digital X-rays and imaging must be purchased and installed. A few of the benefits would be: Enhanced scheduling options will allow clinical staff to schedule multiple appointments for a dental based on the number of chairs available to the dentist. This will increase each dentist's productivity, improve billing procedures and less denials. Less time spent locating and handling paper files; improve dentists productivity with digital x-rays | Cincinnati Health Department | 25 | 181 days or more | \$600,000 |
| Hamilton | Fairview Park | This park is located within one of the city's Empowerment Zones. This project will relocate the entrance of the park and parking, renovate the entire roadway system throughout the park, provide for new landscaping, create update furnishings and utilities, and reconstruct the playground for the neighborhood. | Cincinnati Park Board | 76 | 91 to 180 days | \$6,400,000 |
| Hamilton | Energy efficiency upgrades | Three River's 4 existing 50-60 year old school buildings are horribly energy inefficient. We have a ready to go project that would put 85 people to work in 3-4 months increasing the energy efficiency of the schools. The project includes upgrading the buildings by replacing 64 exterior doors, 28,943 sq ft of windows, and 300,000 sq feet of roofing with energy star products. In addition 4 old boilers will be replaced with clean ECOTHERMAL HVAC systems. Benefits of this project include: Reduce employing 87 people, Reducing total energy cost by 24-30%, Reducing Ohio's air pollution and dependence on fossil fuel, Improving the students learning environment, and Saving as a show piece to encourage others to convert to clean ECOTHERMAL heating and cooling. The districts preference is to consolidate the existing schools into 2 new buildings (see price Ohio Stimulus funding request, if the \$75,000,000 funding for the new buildings is not available we need the \$21,646,425 to improve the energy efficiency of the 4 existing buildings. | Three Rivers Local School District | 85 | 91 to 180 days | \$21,646,425 |
| Hamilton | Bellevue Hill Park | This park is in one of the city's Empowerment Zones. This project will implement and construct a new master plan for the park. The plan calls for a new roadway system to enter and exit the park, new parking, a new walkway loop, new terraces, interpretive areas, a new lawn promenade, pottered playground, new utilities and furnishings. | Cincinnati Park Board | 46 | 91 to 180 days | \$2,500,000 |
| Hamilton | Classen Park | This pocket park is located in one of the city's Empowerment Zones. This project will provide for a new walkway system, enhanced and improved landscape, new furnishings, and updated utilities for this park. The project would create new walkways, restore the landscape to its original design, and new plantings to the site, update the utilities and furnishings, create an interpretive single system, create new gardens, replace the roadway, and replace the parking. | Cincinnati Park Board | 17 | 91 to 180 days | \$400,000 |
| Hamilton | Hauk Gardens | This project would implement the master plan for this park. The project would create new walkways, restore the landscape to its original design, and new plantings to the site, update the utilities and furnishings, create an interpretive single system, create new gardens, replace the roadway, and replace the parking. | Cincinnati Park Board | 84 | 91 to 180 days | \$3,500,000 |
| Hamilton | Trucking Business | I, My Son and I seriously want to start a Trucking Business. We have approximately 7 years of experience in trucking. We want to establish it in Hamilton County, Ohio where we will use to acquire suitable assets for Development and Growth. We want to start out with as many Trucks possible and have a continuing growth to 2 thousand Trucks or more over time. This will provide long term employment and Benefits to those who qualify for a variety of full time jobs. In addition the Company will provide bases for the State and Ohio Community for continuing Care for Roads, and Better Schools and other assistance necessary. The Trucks will be equipped by Custom for Dispatch, Tracking and Controlled Data. We have everything ready in place to start. We Respectfully Submit our Request. Thank You. | Lucas Logistics | 10 | 0 to 30 days | \$175,000 |
| Hamilton | Jail Diversion/Offender Reentry Programs | Central Clinic/Court Clinic proposes to expand its current treatment and diversion programs and to develop offender reentry programs. Both diversion and reentry programs would offer comprehensive services to male and female non-violent offenders and to people entering the community after completing their incarceration. These services include substance addiction treatment and/or mental health services, vocational and educational services, housing opportunities and relapse prevention services. Central Clinic/Court Clinic has collaborative relationships that could expand service offering to meet a client's specific needs. Its programs have been recognized nationally by SAMHSA and the OAINS Center. Additional employees would be needed for outreach, prevention, case management, peer counseling, treatment services and recovery coaching. Other additional employees would be needed as trainers and data specialists to track and report client progress. | Central Clinic/Court Clinic | 30 | 91 to 180 days | \$1,500,000 |
| Hamilton | Mt. Airy Forest Bike Trail | Outcomes: lower recidivism rates, lower crime rates, reduced substance use, improved mental health. | Cincinnati Park Board | 38 | 91 to 180 days | \$2,000,000 |
| Hamilton | Mt Airy Arboretum | This project will create a new four mile long paved ballast-based use trail loop in this park. This new trail will promote a healthy lifestyle and promote healthy programs within the park. This project will implement the master plan for the Mt. Airy Arboretum. This project will provide for new landscape infrastructure and restoration, new walkways, updated utilities, parking, and furnishings. | Cincinnati Park Board | 57 | 91 to 180 days | \$3,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Hamilton | Caldwell Nature Center | To renovate and add a youth education room, add alternative energy infrastructure such as geo-thermal to reduce our carbon footprint, new restrooms, and new storage facility. The location is in a historic old forest area. | Cincinnati Park Board | 39 | 91 to 180 days | \$1,300,000 |
| Hamilton | California Woods Nature Preserve | This project will rebuild the California Woods Nature Center out of the Flood Plain that currently exists in. The center will be state of the art and provide education programs to the local city youth of Cincinnati. This center has over 300 waterfowl species and is unique to Cincinnati. The center will provide over 500 programs a year to the citizens of Cincinnati. | Cincinnati Park Board | 72 | 91 to 180 days | \$4,000,000 |

| Hamilton | Music Resource Center - Cincinnati Expansion | Start a low truck company that specializes in assisting intoxicated people, by providing a means of transportation for them and their vehicle. This concept is to safely return these people to their place of residence with their vehicle in tow. This will reduce the amount of intoxicated people on the road therefore reducing the number of fatal accidents which in turn leaves police officers available to respond to other calls. MRC-Cinc is a non-profit center for music education that uses recording and performing arts to create a sense of empowerment and accomplishment in the community. We are converting the front half of a building in the Eastman neighborhood of Cincinnati into project rehearsal and practice studios. Any student in 7th to 12th grade enrolled in local area schools can be a member at MRC, which will be open after school and during the summer. The funds we are requesting under this Federal Stimulus Request will allow us to purchase the building that we currently rent, do repairs to the roof, HVAC, and electric, install a sound and lighting system and construct a dance and recording studio. This project will employ over 50 people through many contractors by converting a shell of a building into an operational youth center and recording studio. Once open MRC will employ at least 3 full time, 6 part time and many volunteers. This program is needed in our neighborhood and the expected outcome is to give over 500 local teens a way to spend their time and talents wisely. We have had a tremendous support and feel that I can only get better with support from this Recovery Program. | Music Resource Center - Cincinnati | 20 | 0 to 30 days | \$470,000 |
| Hamilton | Green Pastures for Kristiridge | I am retired and have lost so much money in the financial crisis that I cannot afford the new furnace and roof I need for my house. I need both badly. I was an extremely hard working American for almost 40 yrs and feel that I deserve this money as much as anyone. If I get the grant I plan to do geo thermal heating in honor of our new green president, the great Mr. Obama. Thank You | Retired | 1 | 0 to 30 days | \$30,000 |
| Hamilton | my home is in dire need if a furnace and a lot of | Frank Buschelmann | | | | |
| Hamilton | Pay State and City past due taxes | to maintain homes and senior in their homes and the time, no more than 6 months. The past due Federal, State, City and Retirement corporation liabilities are a \$2k loan to the City of Cincinnati. This stimulus would enable me to clear all past debt and distribute the money back into these government entities. The state, city and federal government would all benefit from this. This would enable me to retain my 12 employees in the current business and have it fresh start. Taxes in the business are current and will remain so. | Beverly Dennis | 35 | 0 to 30 days | \$25,000 |
| Hamilton | westwood blight | remove blighted building from our neighborhood, eliminating high crime areas and drug/prostitution hot spots, redevelop parcels as greenspace (yards) to adjoining single family homes who are in good standing with taxes. Our neighborhood is being ignored by our city councilmen, after many concerns from our residents. The Westwood Civic Assoc. has been fighting to return our neighborhood to a safe family friendly environment for many years, this money could help us begin a "land bank" eliminating crime hot spots from the area, thus saving the city tax dollars in crime fighting and maintenance | Paula's Cafe | 12 | 0 to 30 days | \$100,000 |
| Hamilton | Open Door Literacy Project | Provide 20 Literacy Post Kits for 15 adult training/re-training centers that will increase the literacy skills of up to 600 adult a year-- | westwood civic | 25 | 0 to 30 days | \$900,000 |
| Hamilton | Project home loans | I am a fha approved lender in Cincinnati. I need resources to do loans cheaper so the Ohio people can get extremely cheap loans. With this money I can offer loans at par rates and dead cost then pay my loan officers out of these funds. This way the clients of Ohio get dead cost loans. This can only help Ohio. People of low income thru high income, people of color, people who are first buyers, everyone can benefit. Dead cost on a loan would keep the clients money to bring at a minimum and the par rate would give them the lowest rate in the country. I will hire 20 loan officers that want a job and take the money to pay them while they do loans for almost free. The money would get us thru 2 yrs and help turn around this housing nightmare in Ohio. The people of Ohio would get the best loans possible and we would add jobs. This money would go directly to the people of Ohio with Cronin Financial only profiting off the good press for helping Ohioans. ALL the money would go to the people. 100% THE TRYING TO BUY A 3 BEDROOM HOME FOR MY KIDS AND MYSELF. I WANT TO OWN THE HOME THAT IS WHY IM TRYING OUT FOR THIS GRANT PLEASE HELP US HELP OURSELVES. ITS REALLY HARD NOW FOR US. We purchase homes in various neighborhoods that are in need of major or minor repair. We renovate/build these homes and then rent the homes at a slightly below market rate in order to give tenants that have had their homes foreclosed on a decent place to live. The money that we have requested would allow our company to lower heavily in neighborhoods in Hamilton county that have been devastated by foreclosures. We want to help rebuild our neighborhoods. Our company has been in business for two and half years and has made an after tax profit each year. I Rich Webber am a Master's student at the college of Mount Saint Joseph in Ohio and I would like to show the state and the country what I can do. | cronin financial services, llc | 25 | 0 to 30 days | \$250,000 |

| Hamilton | Re Recycle It LLC rehabbing homes project | | Re Recycle It LLC | 10 | 0 to 30 days | \$127,500 |
| Hamilton | Digitization of Collections at the Cincinnati Museum | I am currently an volunteer at the Cincinnati Museum Center working to digitize (photograph) the entire collection of material in the museum, to display on computers in the facility and on the internet. I am almost totally alone in doing this project using my own equipment. The size of the collection precludes my doing it all in my lifetime without money for better equipment and a small paid staff. I would like to expand it with one or two full time people and myself out to business available to the public sooner rather than later. There is much in science and history from this area that needs to be made available to all to the citizens of the Southwestern Ohio. I shot all of the contemporary photos for the 75th anniversary commemorative book for Union Terminal. It was a project that cost me three times more than the small amount that I was paid for it. So my motives are not for the money but for what it will do for the community. My intention is to hire young people from the community and train them in museum photography and what the museum means to the community. I think the project would last about two years. | None | 3 | 181 days or more | \$100,000 |
| Hamilton | The Tri-State Film Fest | This project would start and maintain a film creation, production, training, and distribution program for the state of Ohio, centralized in Cincinnati. | Ground Zero Media | 50 | 0 to 30 days | \$70,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Hamilton | High Efficiency Wind Turbine | The hope is to create a system that is so efficient, municipalities would start requiring systems to be purchased with any new home. High efficiency wind turbine, mounted on standardized tower. System will be designed to have maximum efficiency in any wind condition. Initial production would use local fabricators and as sales increase the company would reinvest profits to start working jobs internally, hence increasing employee staffing. Targeted system costs would be low enough to encourage buyers to purchase. Targeted use is for individual homes and businesses...reducing the users dependency on the electric grid. Benefits include the following: * reduced utility bills * reduce the amount of energy the electric companies would have to produce reducing emissions from the electric companies * a clean energy source * reduce the electric company's dependency on fossil fuels * enlarging local economic outlook (creating jobs, and local spending) | Your Solutions & Associates, Inc. | 1 | 0 to 30 days | \$1,000,000 |
| Hamilton | audio advantage expansion | Audio Advantage currently has 3 retail audio locations. AA has been in business for 13 years. We will use the funds in the following ways. Relocation of 2 retail locations to more energy efficient, and more suitable buildings. Add 3 new locations in the Cincinnati, Dayton area. Purchase inventory for new and existing locations. Purchase fixtures for new locations. Lease or purchase 5 new buildings. Sure up payroll. This loan will secure existing retail and technician jobs and add many new jobs with the addition of the new stores. | Audio Advantage LLC | 30 | 0 to 30 days | \$350,000 |
| Hamilton | Ombudsman Outreach & Accountability Services | Child Advocacy for Rights & Equity, Inc. has represented the interests of eligible consumers of govt services for almost a decade. We represent the most "hard to place" and "hard to serve" of disadvantaged populations. Those individuals lacking the emotional or intellectual capacities to acquire needed services to attain self-sufficiency. Those with criminal records, disabled, low-education levels, and those facing multiple obstacles in receiving an array of services. In addition, we specialize in facilitating the receipt of services to persons improperly denied services and represent those consumers in adverse situations. The objective of this program is to advocate for and represent these clients in disputes with other organizations and govt bodies to assure fair and equitable access to the array of services available. We are experienced Counselors that facilitates resolutions between aggrieved consumers and service providers - acting as an intermediary. We also conduct reviews of programs to improve services. The program objective is to provide these services to consumers of services under the Stimulus Package across the state utilizing our existing staff. | Child Advocacy for Rights & Equity, Inc. | 875 | 0 to 30 days | \$244,000 |
| Hamilton | Used Car Sales | Two people will be employed in addition to myself I needed the money to be able to buy used cars to more of my customer who needs a used car and to get around the bank won't loan me money thanks please I am counting on this stimulus package to help in making this happen. | Bola Used Auto Sales | 2 | 0 to 30 days | \$100,000 |
| Hamilton | Together We Learn | This project will use 6 trainers to work in urban schools in Cincinnati Public Schools to address learning and social language skills of students who are at risk for failure in preschool through grade-based on academic and social skills assessment. Weekly prescriptive language therapy members, daily training in social language interactions and academic skills combined with after school reinforcing activities. The practice in using the social skills training (peer language, conflict resolution, problem-solving, character development) to help students become school recreational leaders. We will use 5-8 trainers, 3 office personnel, up to 20 tutors, and 20-35 high school students trained to be tutors and school recreational leaders. Outcomes: increased achievement and social language interaction skills for students in preschool through grade 5. In up to 10 identified urban, low performing schools in the CPS district and employability skills in 20-35 high school students from high performing high schools in the CPS district. | Family Training Group | 30 | 31 to 90 days | \$640,000 |
| Hamilton | Capital for sustaining new business start-ups | Business incubator designed to fund, start, and assist in management of 15-20 new service companies based on the top 10 residential, auto and personal service needs. | 25th Hour Associates | 50 | 0 to 30 days | \$500,000 |
| Hamilton | office and ware house construction | Construct 2 buildings each containing office and ware house units for local small businesses to operate from. construction of this new building will be a place for many new jobs in our town. construct two buildings each containing 6 office and ware house units providing a total of 12 positions for new businesses to operate. | Riverside Office and ware house | 50 | 31 to 90 days | \$175,000 |
| Hamilton | Material recycle facilities expansion (Plastic Re | To expand the recycle capacity of 5 to 6 surrounding counties and expand our wind energy program. This money will allow us to in the se region reduce the large waste and recycle of wasted plastics and to expand the sale and induction of wind energy." | ECO-INTERNATIONAL | 150 | 91 to 180 days | \$3,567,833 |
| Hamilton | faith' family resale shop | Want to open a resale shop to help people in my area to be able to buy clothes for there family by taking in gently used clothes and selling the clothes for less to people that can't afford to buy new clothes. I would also like to open a and sell toys for children I would be called faith's baby resale shop | faith' resale shop | 6 | 181 days or more | \$40,000 |
| Hamilton | Think Green - Midwest | I am a REINTErners energy auditor, NAHB Green Verifier and LEED for Homes Inspector - I propose energy audits for homes to determine CORRECTLY what weatherization steps are needed on a home, and matching the problem with a teaching of the homeowners for self help where possible. Many times weatherization projects put emphasis on insulation - when actually stopping air infiltration would be a better fit. This need for correct identification and homeowner self help is paramount to get the most for the money spent. The money received would purchase required equipment and training for field inspectors, and writing and implementation of a simple to understand homeowner training. This would also set up regional seminars throughout Ohio for homeowner training, to work with funding from outside sources for weatherization supplies. For a small amount of the stimulus money - we could train over 5000 homeowners and return on how to fix their own homes and save energy. | ThinkGreen-Midwest | 6 | 0 to 30 days | \$24,000 |
| Hamilton | Green weatherization | Working with local HERO energy centers, we will weatherize homes with green materials - and work with homeowners on how to do additional work on their homes, and keep the maintenance on their homes done as professional help is not required in the future. We propose to use recyclable materials like VOC materials and add heat to homes for comfort, save energy, and create jobs. The money would be spent on hiring and training of installers; self help literature for homeowners; and startup materials needed for the weatherization of residential homes. | Green Help for Homes | 10 | 31 to 90 days | \$40,000 |
| Hamilton | Reclaiming Our Neighborhood | To purchase and remove foreclosed homes within a certain geographical area. The purpose for this request would enable me to purchase and demolish the homes in the most "ENERGIC, EFFICIENT, ENVIRONMENTALLY FRIENDLY" manner possible. Only foreclosed homes would be considered and the eventual sale of said homes would be directed towards the "first time" home buyer. Completed homes would be priced in such a manner that they are, without a doubt, the "MOST AFFORDABLE" homes in that particular neighborhood. I would like to purchase approximately twenty (20) job opportunities for skilled and unskilled labor. It would also boost the tax revenue to the local school district by taking a currently vacant home and occupying it with productive, hard-working taxpayers. | Bohlinger Properties | 20 | 0 to 30 days | \$200,000 |
| Hamilton | Fund 11 Learning Centers for Children - Tried and | This is a program which is free to children with dyslexia. It has been audited by 3 of the top 10 dyslexia experts in the world and is found to be 100% successful. The cost per student is \$5000.00 per year vs. a cost of \$32,000 when this same service is provided by the public school system. 92% of all costs go directly into the students. The amount requested would allow for 2 years of operations and saving jobs at Ohio's 10 none endowed centers. No tax payer funds have ever been used for this program and the program is 10 years old with international accreditation. Our Motto: "A child must learn to read before the can read to learn!" This is the largest program of it's type in the world and we have the largest data base on dyslexia in the world which is accessed by many educators and even the US Government. We proved Master Level training in this program in co-operation with most major colleges in Ohio. | Scottish Rite | 120 | 91 to 180 days | \$2,750,000 |
| Hamilton | Manufacturing | Manufacturing of new products for maintenance of draught beer systems and training. | Capital Coil Cleaning | 10 | 31 to 90 days | \$150,000 |
| Hamilton | Building Repairs | This project is to set up heat and air conditioning and restructure office on logistics business. Currently working with no heat or air conditioners, using space heaters. Would like develop more space more new employees up to 50-75 if possible in current space. The trading industry is a growing industry and always a need for our services. Everything must be shipped somehow, someone. Unable to expand currently due to cost of products and a commission based business. If funds are available will expand and create up to 75 new jobs and possibly more than this. Have been in business for over a year and still growing daily but not enough employees to cover the load. Can't bring employees to current location due to the fact we have no heat or air and very at some point unworkable conditions. | over the road logistics llc | 10 | 91 to 180 days | \$100,000 |
| Hamilton | Self reliance for energy | Start of company that will focus on sale and distribution of energy efficient products such as wind mills, solar panels, and other related products to help people make homes independent from the grid and lower their dependency on foreign fuels. will also employ 150 people in Ohio. Our plan is to have internet as well as a brick location or two as well as a distribution center. A section of the company will also focus on sales and service of electric cars and two wheel vehicles. We already have locations, key personnel, marketing, and operational procedures identified. | Heathers Planet, Inc | 150 | 0 to 30 days | \$936,000 |

| Hamilton | Beverage Butler outdoor drink holders | Beverage Butler outdoor drink holders are an ornamental iron product manufactured exclusively by my company, A1 Price Enterprises, in Cincinnati, Ohio. I am the inventor and holder of this product. Using a Cincinnati, Ohio law firm I have applied for a Registered Trademark for the name "Beverage Butler" as well as a Design Patent. They are marketed via the internet and locally in the greater Cincinnati area. It is used used in manufacturing the best awarded from an Ohio company. The powder coat finish applied to this product is done by an Ohio company. The product is sold locally in Cincinnati at an Ohio business. Under current economic conditions it is evident that more people are foregoing travel vacations and instead staying home. Beverage Butler outdoor drink holders is an item that helps to make the "Staycation" experience a much more enjoyable and stress relieving one. There is substantial personal investment in the product. Requested funds would be used to expand my manufacturing capability by a helper and/or marketing. | A1 Price Enterprises | 6 | 0 to 30 days | \$200,000 |
| Hamilton | Bad assets investment | This project will purchase foreclosed homes or "troubled assets" from banks and attempt to reinvest into the local ohio communities to stop the fall of home prices. | The Copius Group | 100 | 31 to 90 days | \$600,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |

| Hamilton | Cincinnati Trades Project | Coaching high school and college students of both at risk and college prep backgrounds to increase college entry and matriculation statistics. Our goal is to coach for soft skills that increase motivation, drive, problem-solving and self accountability, as a vehicle to achieve one's goals in higher education and success beyond. One is an evidence based program. These dollars would fund the project for one year allowing efficacy data to be gathered and analyzed while affording 20 students in the Greater Cincinnati area each one year of coaching and measured outcomes against students of the backgrounds who are in the study without benefit of coaching as a baseline for program development and service improvement. | Kluse Remodeling | 100 | 181 days or more | \$185,000 |
| Hamilton | Game Day Media Network | We wish to implement a program through which we purchase and rehab neighborhood distressed properties while training & paying unemployed workers in the remodeling trades at the same time in such fields as plumbing, drywall, framing, demo, electrical, roofing, property management, ect. some properties will be resold for profit to reinvest in more properties and traneer's and some will be rental properties managed and maintained by our students. Thank you | Game Day Communications | 2 | 31 to 90 days | \$100,000 |
| Hamilton | heartprints | The Game Day Media Network will be a social media network, using new media applications such as Twitter, Facebook and the like to promote clients' projects. We are currently primarily in Cincinnati, and studying areas to reduce unemployment, improve knowledge economy, mentoring, education, and eliminate poverty through creating opportunities. 1.mentorship at risk youth (heartprints project) which we have done for 10 years. lead efforts to end violence against women & children, and prevent negative cycles associated with the partners of the Restored Women's Shelter 2.Job (CityJobSpace, connecting quality candidates to quality companies, catalyzing reemployment for our growing talent pool of laid off workers) 3.Outreach: Thank! Campaign (no-pret partner for prison mentoring, ending harmful cycles, eliminating violence against women/children, teamed with heartprints project to "WOC Restored Women's Shelter), Criminal Outreach (building homes/schools and churches in La Crosse, Honduras), eexchange, Operation Freedom (social justice), and other projects for improving lives & our communities @inively. | heartprints inc. | 25 | 0 to 30 days | \$125,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | Campus Elevator Upgrades | Upgrade to elevators in principle campus teaching facilities. Scope includes doors, controls, motors, machines, and rails to replace parts and components that are worn beyond their useful life and beyond the scope of current and ongoing maintenance agreements. Buildings include DAAP, CCM/Mary Energy, Logan, OMI/Chemistry, SRI, and Zimmer. | University of Cincinnati | 4 | 181 days or more | \$1,400,000 |
| Hamilton | I-71 Interchange | Provide direct access to this urban campus from the adjacent academic health center, hospitals, and area employers and the adjacent neighborhoods. Scope of final project includes new exit and entry ramps, road re-alignments, roadways, new bridge overpass reconfigurations and structures, pedestrian and vehicle traffic signals and controls, related street lighting, walks, and adjacent property restoration. Project proceeding under CDOT and federal guidelines. Total reflects completing the next 3 steps of a multi-step federal process. Previous steps have been completed. | University of Cincinnati | 12 | 31 to 90 days | \$6,000,000 |
| Hamilton | Forest Park Convention Center | This project will create a Convention Center in Forest Park Ohio with an immediate Permanent Tenant. The facility will be approximately 150,000 square feet and will employ LEED characteristics and obtain basic LEED certification. Contained within the facility will be a general auditorium that will seat 5000 capable of sponsoring regional, statewide and national events such as conventions, concerts, sporting events, retail events, political events, and countless other large corporate events. | Cincinnati United Contractors | 100 | 91 to 180 days | \$15,000,000 |
| Hamilton | Rebuilding | The Center will contain rooms suitable for formal Dining, A retail Bookstore, A Cafe, Classrooms, A Daycare Facility and other public rooms for lease and rent. The facility will create or retain more than 100 jobs and will provide an immediate economic stimulus for the Forest Park Ohio community. Install new energy saving equipment, reintroduce company, increase employment capabilities, strengthen infrastructure, and improve cultural surroundings. | Anglo's Pizza | 25 | 31 to 90 days | \$350,000 |
| Hamilton | 690 NorthLand WOD | At 690 Northland Blvd. in Forest Park Ohio a private entity owns a building of approximately 10,000 square feet that is currently being used for office space. The structure is less than 20% leased and is underutilized. A local Hospital would like to use the facility to establish a presence in the community providing General and Primary Health Care using African American Doctors as the foundation for the facility. The owners of the facility are also African American and they are interested in establishing a community based physician medical center with African American Doctors serving the minority based community. | Cincinnati United Contractors | 20 | 0 to 30 days | \$700,000 |
| Hamilton | GreenRidge | This project is ready to move forward and with the aid of the stimulus the owners can offer a below market lease rate to immediately provide medical care facility to the community. This project involves the creation of an 80,000 square foot class A Office Building that will specialize in Health and Wellness. The building is expected to be a Health and Wellness Expert specializing in the treatment and prevention of Sports and Sport Related Injuries. | Cincinnati United Contractors | 300 | 91 to 180 days | \$9,600,000 |
| Hamilton | cincinnati home rehab | A master plan and preliminary engineering has been completed for this project. The site has been fully pad ready (shovel ready) to begin immediately. To develop a company that rehabs abandon and foreclosed properties and makes them available for the middle class residents We would deal with certain financing plans and lease options. The goal is to create jobs throughout the trade world and make Cincinnati buildings less of an eyesore. I want people to fall in love with their neighborhoods and how can that be when people can't afford to keep their homes and feel good about their area. I feel that there are alot of wasted buildings in the Cincinnati area that could be used for business other than their current use. My company could make that happen by having to invest in our future and the community we live in. Help the companies that have to many foreclosures on their hands and outsource of buyers and contractors to locate the people who need these homes and work our plans for they can afford them. I feel I could make a difference in the community with my plan. | Homes that Help | 100 | 91 to 180 days | \$500,000 |
| Hamilton | Campus Energy Recovery Systems | Project includes the installation of heat recovery coils or air/water energy recovery wheels. Buildings include University Hall, Wolfson Hall, Pineschil Hall, and Rhodes Hall. Projects are designed to comply with a state-mandated 20% reduction in energy consumption by 2014, and anticipate an annual savings in utilities estimated to be \$250,000. | University of Cincinnati | 5 | 31 to 90 days | \$2,000,000 |
| Hamilton | The Sweeterie | Opening a new small niche bakery where we would expect to employ 3 to 5 initially then perhaps expand that number to include up to 10 full and part time positions. The money would be used to help pay for the space built out including display cabinets and counter, access guards, lighting, flooring and kitchen equipment of various types - tables, sinks, refrigeration etc. It will also be used to sustain us as we are presently taking out loans and borrowing on credit cards to get this venture started. We will need the money to pay some of those debts off and to use as working capital to pay our employees during an economic slowdown. | Small Business Owner | 5 | 0 to 30 days | \$70,000 |
| Hamilton | Campus Variable Speed Drive Installations | Scope includes installation of VSD chilled water pumps, hot water pumps and air handling units in Revesch Hall, a domestic water pump in Revesch Hall, CCM scope shop inlet valves replaced with drives, and AC-6 supply and return fan, and West Campus chilled water VSD & controls. Projects are designed to comply with a state-mandated 20% reduction in energy consumption by 2014, and to achieve energy savings. | University of Cincinnati | 2 | 31 to 90 days | \$350,000 |
| Hamilton | Campus Utility Plant Improvements | Scope includes West Campus Chilled Water VSDs with added control sequences; Ash removal system improvements, replace steam driven vacuum pump with an electric vacuum pump. Compressed air system improvements; Steam turbine generator in place of steam pressure reducing stations; Water to water heat pump in Medical Science Building to pre-heat hot and chilled water as a reduced cost; CO2 trim and pre-heat air CIP boilers no's 1 & 2; Central plant condenser water pumping improvements; Water-to-water heat pump on West Campus, Chiller Plant Optimization; Fresh airing generator at Carter Hill Campus; Steam condensate system improvements traps, pumps, and flash tanks; and Emissions control for East Campus coal boilers. Projects are designed to comply with a state-mandated 20% reduction in energy consumption by 2014, and to achieve anticipated energy savings. | University of Cincinnati | 10 | 31 to 90 days | \$4,500,000 |
| Hamilton | Expansion | Started my business in 1985 & equipment I purchased is now outdated with today's motors requiring specialized equipment. I would like to purchase a new cleaning system, milling machines, cylinder rebaring and honing, and a complete cylinder head reconditioning machine. This equipment would use less chemicals which would be environmentally friendly. Expansion to a newer facility would create more jobs. My son, who is now 23, is becoming interested in this type of work and could carry on the business. With today's economy and the cost of new cars my business is showing signs of increasing and this stimulus will help me better prepare for myself and my son and create jobs in the process. Project removed and replaced existing windows with new high-performance energy efficient units. Buildings include HPS (2.0M total cost), Teachers/Dyer (1.5M total cost) and Ketchum (2.0M total cost). Projects are designed to comply with a state-mandated 20% reduction in energy consumption by 2014 and to achieve anticipated energy savings. | Newpower Engine Rebuilders | 5 | 0 to 30 days | \$225,000 |
| Hamilton | Campus Window Replacements | Replace my current home windows with new triple-pane energy efficient windows. Projects are designed to comply with a state-mandated 20% reduction in energy consumption by 2014, and to achieve anticipated energy savings. | University of Cincinnati | 12 | 31 to 90 days | \$6,400,000 |
| Hamilton | Abundant Energy Project | Portable Hydro-electric Power Generating Stations. Simple wheel structures that turn gear apparatus which turn generators that produce electric power which is supplied to existing power grids. Can be used in any location that has continuous flow such as the Ohio, Great Miami, Little Miami, and many other rivers throughout the state. After the initial investment of installation the source is free except for maintenance and administration. | Concerned Citizens in Action aka C.C.I.A. | 4,000 | 181 days or more | \$12,000,000 |
| Hamilton | Alternative Fueled Vehicle | This project will make my SUV less dependent on oil based fuel, and will consist of the following activities: 1) Install a conversion kit in my SUV that will allow my SUV to also run on compressed natural gas (CNG). 2) Install a refueling station at my home to allow me to refuel my SUV at my home. This is an asbestos abatement and remediation project in Forest Park Ohio. The total scope of this project includes more than 300,000 square feet of asbestos removal and subsequent recycling of the building infrastructure. The company is hoping to remain in the building while the removal and reclamation process is completed. | SUV Owner | 5 | 181 days or more | \$30,000 |
| Hamilton | Abatement Process | The company has one of if not the largest payroll for the City. The building project also includes the lease of space to another very large employer. | Cincinnati United Contractors | 1200 | 91 to 180 days | \$26,000,000 |
| Hamilton | Solar power water usage initiative | At our locations in Hamilton County and Butler County we would like to upgrade our water systems to be as efficient as possible with touch-less faucets for health, timers for usage and grey water recovery from our sinks for use in our toilets. We would like to add solar energy at each location. We are in open high rise buildings. Our electric bill averages 2000.00 per month and water 400.00 per month at each location. If we were as energy efficient as possible we will use that money to hire additional employees to increase the care for our children and put more people to work. Both Locations are in high traffic areas and serve over 240 children at both locations every day. Our business could be a viable, positive model for energy and water efficiency. | ABC Early Childhood Learning Centers | 8 | 31 to 90 days | \$240,000 |
| Hamilton | Energy Efficient Home Windows | This project will make my home more energy efficient and will consist of the following activity: 1) Replace my current home windows with new triple-pane energy efficient windows. | Home Owner | 3 | 181 days or more | \$15,000 |
| Hamilton | Start-Up for Residential Solar Panel Installations | This project entails the start up costs of a new business to retrofit new and existing residential homes with solar energy systems. This business is designed to reduce the carbon foot print of the individuals who will become customers and create jobs as the company grows in size. | Green Renovations, Inc. | 5 | 91 to 180 days | \$200,000 |
| Hamilton | Not-for-Profit Adoption Agency | Build upon not-for-profit adoption agency that provides homesteady services to those adopting children domestically and internationally. The need is an adequate office location as well as that some staff person to handle administrative aspects of agency as well as a part-time staff person to manage birthparent needs. This stimulus would also establish a fund for individuals in need of financial assistance with the costs of their homesteady services. This would enable more options to be placed into loving and stable homes. | Worlds Together, Inc. | 2 | 31 to 90 days | \$100,000 |
| Hamilton | Home weatherization | Major insulation of home and installing 2 new solar panels to our home. Our home could become an example for other homeowners to follow. Also, we would allow our home to be monitored with air sensors, mold sensors, and power meters by the state and energy companies to see if power monitoring a home and alternative energy will work in this area. Thank, William Tansler | Home Owner | 10 | 0 | \$50,000 |
| Hamilton | Greater Cincinnati Debutante and Diplomat Mentor | The goal of our mentoring initiative is simple. We help at-risk, low-income and minority students not only think seriously about attending college, but also provide them with the skills and support they need to enroll in college and succeed. Through CDDSP we provide free tutoring, ACT and SAT prep, college tours, personal enrichment and role modeling to ensure our participants reach college. With Federal Stimulus Initiative funds we hope to expand the number of University students we employ by to ten. | Winton Woods Community Coalition | 10 | 0 to 30 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|-------------------|--------------------|---------------------------|
| Hamilton | GREEN ORTHOPAEDIC BRACING | Bracing is an essential part of the orthopaedic armamentarium for patients. Braces allow for protection, alignment, and healing in acute and chronic disorders. Currently braces provide an indispensable substitute to a cast or bandage when an extremity requires immobilization. They provide the flexibility of being able to be removed as needed and adjusted when appropriate. Physiologene is usually referred to as Neoprene. Neoprene is used in many sports medicine and orthopaedic applications. Neoprene material is known to provide the highest heat retention and insulation of any material. Unlike elastic braces which can stretch only in two directions, neoprene braces can stretch in four. Neoprene's unique characteristics allow it to maintain its shape and support the extremity/body part without bunching up. Neoprene usually lasts longer than standard elastic braces. Many athletes use this type of brace in cold-weather sports, such as skiing and ice skating where it is also essential for its water resistant properties. This product provides a solution to our state wounds care not necessary and creates revenue. Helps care to determine in the event treatment or rehabilitation of patients with open wounds stemming from missile trauma, open fractures, and bleeding extremities. The majority of casualties involve open fractures or wounds(1). A one-step mechanism is critically needed to stabilize a compromised extremity, control bleeding and improve the chance of bone and soft tissue survival in light of significant trauma. THIS PRODUCT SERVES TO DECREASE SIGNIFICANT HEALTHCARE COSTS OF INFECTION AND WOUND HEALING. | Concepto LLC | 80 | 31 to 90 days | \$1,650,000 |
| Hamilton | BATTLEFIELD AND EMERGENCY WOUND CONTAINMENT SYSTEM | Our device will provide the following direct benefits: 1. Open wound containment 2. Immediate supportive dressing 3. One-step tourniquet application The device also allows indirect benefits: 1. It will reduce blood and body fluid exposure/contamination 2. Allow a sterile field to be immediately utilized in a non-sterile setting 3. Permit on-the-spot irrigation in the field in an effort to decrease bacterial contamination 4. The field created can be used for safe sterile procedures on the battlefield. | Concepto LLC | 10 | 0 to 30 days | \$500,000 |
| Hamilton | Ohio Rainwater Harvesting Installation Program | Rainwater Harvesting product: Opportunity to become the exclusive agent of comprehensive array of product from leading German company REWATEC. This would provide jobs for citizens, collection or rainwater, conservation of a valuable natural resource and help citizens begin to see the need for rainwater system. This will help Ohio prepare for the future which includes water shortage. Marketing campaign will show Ohioans the need for water preservation and economic benefits for the state of Ohio. Ohio's has 700 school districts, nearly all of which require assistance to successfully pass levels which require voter's approval to triumph. In the process of developing Alumni Connection.com, we identified school districts' ignorance to effectively sell the need for their levy, understand their community's perspective, target their state demographics which swing votes (i.e. senior citizens). In addition, we found that districts habitually do not sell their success stories that their voters find important. | WRS-USA | 11 | 31 to 90 days | \$150,000 |
| Hamilton | Coaching Districts How to Successfully Pass School | This funding shall give rise to "The How to Model" for Ohio school districts to prevail elections. Alumni Connection will greatly expand our team of professionals including researchers, statisticians, analysts, and other professionals to national investigate school districts which passed levels by a wide margin which repeatedly failed prior. This in-depth research project shall yield correct techniques districts should utilize for successful levels. Thereafter, we will publish our findings and hold seminars. In addition, we will work in hand with districts to implement, deliver, and execute the plan for triumphant levels. | Alumni Connection.com | 12 | 31 to 90 days | \$3,500,000 |
| Hamilton | Coaching Districts How to Successfully Pass School | This funding shall give rise to "The How to Model" for Ohio school districts to prevail elections. Alumni Connection will greatly expand our team of professionals including researchers, statisticians, analysts, and other professionals to national investigate school districts which passed levels by a wide margin which repeatedly failed prior. This in-depth research project shall yield correct techniques districts should utilize for successful levels. Thereafter, we will publish our findings and hold seminars. In addition, we will work in hand with districts to implement, deliver, and execute the plan for triumphant levels. | Alumni Connection.com | 12 | 31 to 90 days | \$3,500,000 |
| Hamilton | Greenwel Fire Station Replacement | Replacing a 50 year old fire station designed for the volunteer fire service. The living space is less than 1,000 square feet, and the apparatus bays were not designed with today's apparatus in mind. The building no longer meets the needs of the community of the Department. | Delhi Township Fire Department | 100 | 181 days or more | \$2,500,000 |
| Hamilton | Mt. Airy Arboretum | This project will restore the green infrastructure at the Mt. Airy Arboretum. This area has many specialty trees that are not found in other areas of the region. The project will create new walkways, updated utilities, new landscaping, new parking, and new furnishings. | Cincinnati Park Board | 58 | 91 to 180 days | \$3,500,000 |
| Hamilton | Saving my point of purchase manufacturing company | We are a designer and manufacturer of point of purchase displays. We can take a design and manage the printing, laminating, die cutting, gluing, assembly, warehousing and distribution. Our parent Stone has filed for bankruptcy and we some temporary help to keep our business going. This project will renovate the current green infrastructure, provide for a new playgroundset, provide new picnic area, a new overlook, updated utilities, landscaping, walkways, new trails, and new furnishings. All renovations will include green initiatives such as wind, solar, geothermal, air gardens, and bio-rain. | Advance Finishing & Display | 50 full time jobs | 0 to 30 days | \$600,000 |
| Hamilton | French Park | This project will renovate the current green infrastructure, provide for a new playgroundset, provide new picnic area, a new overlook, updated utilities, landscaping, walkways, new trails, and new furnishings. All renovations will include green initiatives such as wind, solar, geothermal, air gardens, and bio-rain. | Cincinnati Park Board | 62 | 91 to 180 days | \$3,700,000 |
| Hamilton | City of Forest Park - City Wide Signal Upgrade - L | City of Forest Park - City Wide Signal Upgrade - LED A UPS - 23 intersections throughout the City in which vehicular and pedestrian signal heads and/or lenses will be replaced with light emitting diode (LED) lenses and allow for uninterruptible power supply (UPS) to be installed at each intersection. | City of Forest Park | 20 | 0 to 30 days | \$400,000 |
| Hamilton | District Heating/Cooling and CHP | Perform a study to determine the optimal sites for new installations of District Heating/Cooling and Combined Heat and Power (CHP). District Heating and Cooling (DHC) and CHP reduce atmospheric pollution. District heating/cooling and CHP have enormous potential when considering thermal efficiency and lowered environmental impacts. The basic technology is proven, it would be relatively simple to satisfy a substantial part of the energy demand and the higher efficiency process less pollution including greenhouse gas emissions. Compared with individual heating DHC can provide a community with an operationally efficient and most often also an economically competitive heat and cooling supply. This is especially true under the circumstances where the DHC system is supplied from CHP plants. This use results in very substantial improvements in overall efficiency. Further environmental improvements arise from the reduced air pollution (observable in residential large CHP plants equipped with flue gas cleaning to remove particles, sulphur dioxide, and nitrogen acids). The expected outcomes would be a study identifying the most likely projects to utilize DHC and CHP. | Triumph Engineering Corp. | 5 | 0 to 30 days | \$250,000 |
| Hamilton | Expand Tech Jobs in Ohio | We would like to request money to use as operating capital for 6 months. We will use this capital to pay the salaries of 10 new employees in various areas of high-tech information Technology jobs. These new employees will work to build a sustainable business practice that will likely add another 10 jobs (for a total of 20) over the next 24 months with the need for additional staff. The new employees will work on previously sold businesses as well as be responsible for generating new business development. While our consulting practice is national, our Data Center is located in Cleveland, Ohio and many of our existing customers are already located in Hamilton County, OH, Cleveland, and Columbus so a majority of these funds will be used to develop opportunities in the Ohio market. Server Suites, LLC, presently 13 employees, does not have the cash to pay the salaries of these 10 new positions until they become profitable (likely 6 months) and that is why we are requesting the money. | Server Suites, LLC | 20 | 0 to 30 days | \$720,000 |
| Hamilton | expansion | expand existing stations from 4 to 8 requiring new plumbing and equipment, hiring and training of 3 employees | self seve dogwash | 5 | 31 to 90 days | \$50,000 |
| Hamilton | Energy Efficiency District Heating and End Use | Project Objective: To reduce the energy losses in the heat generation system, transmission facilities and end uses and achieve an associated reduction in GHG. This project can be applied as a retrofit to a current District Heating (DH) plant or as a new project incorporation with other infrastructure projects including Combined Heat and Power (CHP). DHC/CHP has many advantages as compared to other systems. DH has improved efficiency, reduced efficiency, reduction in pollution. DHC/CHP utilizes the heat produced from the electricity generating process to create heating and cooling. By utilizing the heat the efficiency is vastly improved. As a retrofit project the project would identify current DH plants, determine their efficiency and implement changes to improve efficiency resulting in reduced GHG emissions. As a new project DHC could be designed into a ground level infrastructure project that needs electrical and heat/cooling supply. This project could be coupled with recovery project making the overall project an efficiency success. Potential applications are universities, municipal projects, governmental projects, housing project, and existing DH systems. | Triumph Engineering Corp. | 50 | 0 to 30 days | \$10,000,000 |
| Hamilton | Facility Maintenance Projects - Brent Elementary | Replace Roof areas A, C, D, and B (\$520,000) and replace 15 vents (\$278,000) | Finneytown Local Schools | 20 | 181 days or more | \$400,000 |
| Hamilton | Brent Facility Maintenance Project - Phase II | Replace old windows (\$225,000), replace electric panels (\$11,000), replace boiler room doors (\$148,000), and install a security system (\$28,000) | Finneytown Local Schools | 10 | 181 days or more | \$140,000 |
| Hamilton | Finneytown Secondary Campus Phase I | Replace Lockers (\$136,000) Upgrade boilers (\$69,000), and Replace Rooftop Units (\$64,000) | Finneytown Local Schools | 30 | 181 days or more | \$248,000 |
| Hamilton | Finneytown Secondary Campus Phase II | Replace Exterior Doors (\$80,000), Add Lighting to basement (\$30,000), and Renovate the Athletic Locker Rooms (\$88,000). | Finneytown Local Schools | 10 | 181 days or more | \$208,000 |
| Hamilton | Finneytown Secondary Campus Phase III | Replace Electric Panels (\$84,000), Replace Multi Purpose Roof and other roof repairs in "100" and "100" buildings (\$220,000). The Secondary Campus is one large connected area with different buildings 1100, 200, 300, Performing Arts Center, Main Gym, Multi-Purpose Room, etc.,. | Finneytown Local Schools | 5 | 181 days or more | \$244,000 |
| Hamilton | Domestic production of corrosion inhibitor | We establish domestic production and distribute inhibitor used in the defense industry for cooling towers, metalworking fluids, engine coolants, lubricants and heat exchanger fluids, that are presently 100% imported from China. | Wincom, Inc. | 10 | 31 to 90 days | \$600,000 |
| Hamilton | Over the Rhine West End Stimulus Project | Community Empowerment, Employment and Engagement through Comprehensive Community Building and Asset Development Strategies. Our Comprehensive Community Building Model includes: Community Policing & Safety, Housing Homeownership, Education, Recreation, Transportation & Economic Empowerment & Development. We have had luck at this time that one day our ideas, our projects and our goals would be at the forefront of the Urban Planning agenda. This is the way to make it happen. | Mohawk Area Development Corporation | 75 | 0 to 30 days | \$300,000 |
| Hamilton | Galbraith Road Improvements | Street Reconstruction of Galbraith Road (West Corp Line to Blue Ash Road) | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$680,000 |
| Hamilton | Recruitment for Non-Profit Behavioral Health Agency | Utilize the stimulus money to pay the fee for PsychTemps to recruit staff for Neagoff Behavioral Health and Chemical Dependency staff to fill 88 open positions. PsychTemps will match these laid off with open positions and the stimulus money pay our fee for the recruitment. Agencies will not have to pay for our efforts. As a minority owned business enterprise (WBE/NC) we will work with the local agencies to ensure quality talented staff last of this stimulus money be placed rapidly to provide jobs to them but more importantly to provide services to the clients in our catchment area that need staff. We can fill positions across the state of Ohio and that will allow more opportunities to improve mental health services to companies across the state. I projected calculation that our fee will be 17% of annual salary for all positions filled under this project. We project 225 jobs at an average salary of \$50,000.00. for a total charge of \$1,887,500. We provide the discounted rate of 15% to all positions and with this average calculation we should be able to re-employ 225 individuals in the state of Ohio. | PsychTemps, Inc. | 225 | 0 to 30 days | \$1,687,500 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Hamilton | Vital Records Upgrades | Threats to vital records are customarily divided into three broad categories: (1) destruction, (2) loss, and (3) corruption, and The CHD is currently at risk in each category. Potentially catastrophic agents of accidental destruction include natural disasters or fire that will affect the records. Vital records can also be damaged or destroyed by human-induced accidents such as fire, flood or any others. - To avert the malicious destruction of vital records information and property we have determined that modification on the 4th Floor Office of Vital Records to provide two employee only access doors are necessary. - For the protection of vital records information and staff, the receptionist area needs to be protected behind a security glass - Electronic storage will allow for back up copies to be available and will reduce the immediate risk of destruction, loss or corruption of files, particularly those that are currently on crumbling microfiche. | Cincinnati Health Department | 5 | 91 to 180 days | \$25,000 |
| Hamilton | Risk Management and You | Expanding the scope of risk management (corporation/profession and research events) to being related to the welfare of many organizations as a result of the recent economic climate. The proposed project is for the development of a five-step risk assessment process that identifies management and leadership gaps contained in human resource development strategies. The objective is to assess the impact of management and leadership gaps on an individual's enterprise risk management program. This is accomplished by conducting an assessment of human resource development policies, strategies, and programs from a risk management perspective. By synchronizing risk management and human resource development in Ohio's 21st Century Education System the goals of (1) raising participants' awareness and understanding that managing individual risks on an enterprise-wide basis is a critical component of success and (2) providing practical, affordable, and easily accessible individual risk management education and training resources to help constituents effectively manage risks on an enterprise-wide and community-wide basis will be attained. | SEMorgan Corporation | 5 | 0 to 30 days | \$1,000,000 |
| Hamilton | Risk Management, Training, and You | Provide Human Resource Development and training to individuals hurt by the economic down turn. Training covers includes Coaching programs Training designed to empower individuals to capitalize on their strengths and pursue objectives that are aligned with their set. | SEMorgan Corporation | 5 | 0 to 30 days | \$1,000,000 |
| Hamilton | Risk Management and Your Career | Using 21st Century approach to General Educational Development (GED) programs to prepare adult learners to successfully pass the GED. Adult learners without an education are more severely hurt by the economic downturn than most. The preparation strategies and programs are designed to prepare 21st century adult learners (referred to as a 21st century culture. Our GED program addresses education, job training, and career - resulting in a more prepared adult who is ready to become an active partner in the workforce. | SEMorgan Corporation | 5 | 91 to 180 days | \$500,000 |
| Hamilton | Lead Abatement/Lead Safe Housing | Additional funds to supplement our existing \$3 Million HUD Lead Abatement Grant for lead abatement that will create 140 jobs including as well as provide jobs for Section 3 individuals to create an additional 140 homes - Funding to be utilized for creating lead safe housing in the City of Cincinnati. This grant will be geared toward the creation of lead abatement in properties where young children 6 yrs. and younger) reside that have a blood lead level between .5 - 9 ug/dL. - Increased funding to support the training for Section 3 individuals to become certified lead abatement workers and/or workers. They are then able to bid on the lead jobs that are administered by our program. - Funds will create 140 lead safe homes and jobs for lead abatement workers and contractors. | Cincinnati Health Department | 10 | 181 days or more | \$2,000,000 |
| Hamilton | Grow Revenues Through Search Engine Marketing | Expand company by immediately hiring and training twelve search engine marketing professionals to increase the business footprint of Search Engine Experts. This expansion will allow us to assist our clients in growing their businesses. Search Engine Experts is the leading provider of search engine marketing services in the Cincinnati and Dayton areas. We help our clients increase their business and drive more revenue through their websites by obtaining greater visibility for their websites in the major search engines. We are a stable, growing company. Adding staff enables us to meet the demand for our services in order to continue to help our clients increase revenues. This funding will allow Search Engine Experts to hire the required professionals to help additional clients grow their businesses faster. Ongoing revenue generated from the acquisition of new clients will keep these professionals employed for many years. | Search Engine Experts | 12 | 0 to 30 days | \$1,150,000 |
| Hamilton | Energy Management Services | Bring proven technologies and superior energy management methodologies to help companies, institutions, businesses, schools, universities and hospitals within the state of Ohio reduce their energy usage and carbon foot prints. | Hamilton | Private Lot Abatement Assistance | install a video retrieval system for use by the District and Community. This system would broadcast video information to all buildings as well as provide a vehicle for the community to watch some school activities through a secure outlet. This system will help teachers bring video into their classrooms to enhance their teaching and student learning in a way that the students can relate to. Our initial testing has proved very favorable. Help people do initial sring and digging to start home and community gardens. - \$150,000 Assistance would include providing materials to break up the ground and removal of rocks to prepare the plot. Also would cover soil sample testing to determine whether soil has toxic levels of lead or other compounds that could be taken up by crops. Will provide food assistance to low income families, and plots will be usable year after year once started. Jobs created to actually prepare the plots and remove debris, as well as increased testing of soil. This will provide the needed infrastructure and also promotes healthy eating habits. | Cincinnati Health Department | 6 | 0 to 30 days | \$300,000 |

| Hamilton | City of Forest Park - Video Monitoring System | City of Forest Park - Video Monitoring System - The objective of establishing a system is to provide a tool for our Police Department to gather evidence for the capture and prosecution of perpetrators of criminal activity that might occur in our community. Our focus is to place video monitoring cameras and license plate capture cameras at the three major access points to our community, within three of our most used parks, and to incorporate a mobile camera system that can be mounted on utility poles and placed in high crime areas as the need arises. This system is intended to alert our Police department if activity occurs in our parks after they close, and will provide them with an information gathering tool for investigation. | City of Forest Park | 10 | 0 to 30 days | \$475,341 |
| Hamilton | Canterbury/Peiperway Street reconstruction | Remove and replace concrete pavement and curbs on this street that is 3170 FT long and 25 FT wide. This street is over 50 years old in a small older community that does not have the funding. | Village of Golf Manor | 20 | 181 days or more | \$1,000,000 |
| Hamilton | Site Preparation, Central Riverfront Street Grid a | Removal of Theodore Berry Way West, Elm to Rosa Parks (Vine Street) to permit construction of Phase II of the Street Grid and Intermodal Center. Include reconfiguring Milling Way | Ohio Kentucky Indiana Regional Council of Governme | 73 | 31 to 90 days | \$1,500,000 |
| Hamilton | Retraining for Technical Positions with CAD and St | High-paying technical jobs are going to states other than Ohio because of a lack of training in Ohio on the latest CAD and Stress Analysis packages. The two most demanded positions in the Aerospace and Energy industries are CATIA (CAD) and Stress Analysis (Mac Naster). Triumph Engineering Corp. is a certified re-trainer of the software and can provide training to displaced workers. By training displaced workers on the software in most demand you create opportunities in the State of Ohio. Triumph Engineering Corp. provides resource solution to both the aerospace and energy industries. Creating a center of excellence for these skills will increase jobs that can be kept in Ohio. The cost of labor on the west coast and east coast provides an opportunity for Ohio to market those in-demand skills. Triumph Engineering Corp. is uniquely qualified to provide the training and provide opportunity for employment. | Triumph Engineering Corp. | 200 | 0 to 30 days | \$1,000,000 |
| Hamilton | Mayflower Street Reconstruction | Remove and replace concrete pavement and curbs on this street that is 2970 FT long and 25 FT wide and over 50 years in a older community. Does not have the funding. | Village of Golf Manor | 20 | 181 days or more | \$1,300,000 |
| Hamilton | Francis Lane Connector Roadway | Concrete apron. 1800 LF of a new collector roadway to allow rededication of the NW quadrant of SR 747 & Kemper Rd. Redesign. consists of mixed use retail, office, hotel, townhomes and multi-family residential. | City of Springdale | 700 | 181 days or more | \$1,750,000 |
| Hamilton | Blue Rock Road (Sheed to Cheviot) | Repair a resurface with leveling & surface asphalt concrete within the existing right of way. Length = approximately 7,000 feet. | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$500,000 |
| Hamilton | Hammel Street Reconstruction | Remove and replace concrete pavement and curbs on this street which is 2880 FT long and 25 FT wide which is over 50 years old in a older community with limited funding. | Village of Golf Manor | 20 | 181 days or more | \$1,300,000 |
| Hamilton | Ardmore Street Reconstruction | Remove and replace concrete pavement and curbs on this street which is 1650 FT long and 30 FT wide and is over 50 years old in a older community that has limited funding. | Village of Golf Manor | 15 | 181 days or more | \$500,000 |
| Hamilton | Galbraith Road (Daly to Winton) | Repair a resurface with leveling & surface asphalt concrete within the existing right of way. Length = approximately 3,700 feet. | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$3,000,000 |
| Hamilton | Rosedale/Chuck Harmon | Remove and replace concrete pavement and curbs on this street that is 2400 Ft long and 25 FT wide and is over 50 years old in a community with limited funding. | Village of Golf Manor | 15 | 181 days or more | \$800,000 |
| Hamilton | Lower income housing | Business plan is to purchase, renovate then re-sell or rent foreclosed or neglected properties. This project will help to retain property values, reduce crime that is attracted to vacant properties and provide housing to lower income families. It will also help to employ about 10 people in the area and help the banks reduce the number of foreclosures on their books. I have 12 years of experience in property management and renovations. I currently own 15 properties which provide housing to lower income families. | A Schmitt Real Estate LLC | 10 | 0 to 30 days | \$500,000 |
| Hamilton | Apricot Lane Funding | Funding to continue operations of a retail store in the Norwood section of Hamilton County. | Apricot Lane | 6 | 31 to 90 days | \$100,000 |
| Hamilton | Stub Road Extension | 400 linear foot road way extension to open up 25 acres of land in Harrison Commerce Center. One Ohio company will be retained and the additional acreage that could be accessed by this extension would support an additional 50-100 jobs created or retained. | City of Harrison | 75 | 0 to 30 days | \$400,000 |
| Hamilton | Ohio River Trail (Wilmer to Carrel) | This project would construct a portion of the Ohio River Trail from Wilmer Avenue to Carrel Street. This segment will connect the trail to the sunken Airport/field area and extend toward Downtown Cincinnati. | Ohio Kentucky Indiana Regional Council of Governme | 100 | 31 to 90 days | \$1,750,000 |
| Hamilton | Computerized Traffic Control System Interconnect | The City's Computerized Traffic Control System (CTCS) is scheduled for a software/hardware upgrade in 2008. At this time, the existing phone grade twisted pair cable from the 1990s will continue to be used for the communication network for the system. However, given the improvements to fiber optic cable and its ability to allow for other IT solutions (such as cameras), the Traffic Engineering Division would like to hire a consultant to perform Feasibility Engineering, Construction Documents and Construction Management for a new CTCS interconnection network in phases for utilizing fiber or a hybrid system to provide for the full utilization of the new software. | Ohio Kentucky Indiana Regional Council of Governme | 30 | 31 to 90 days | \$2,750,000 |
| Hamilton | Cornell Road Black Mat | Cornell Road Black Mat Program | Ohio Kentucky Indiana Regional Council of Governme | 10 | 31 to 90 days | \$132,000 |
| Hamilton | Waldvogel Rail Relocation | Before the Waldvogel Viaduct can be replaced, it will be necessary to relocate four railroad tracks, adjacent to the existing viaduct, approximately 150 feet southeast to accommodate the Waldvogel Viaduct replacement project. | Ohio Kentucky Indiana Regional Council of Governme | 100 | 31 to 90 days | \$1,075,000 |
| Hamilton | Ham-Kellogg Bikepath | Installation of 10' wide, 1.3 mile section of the Ohio River Trail on the north side of Kellogg Road between Buton Road and Five Mile Road | Ohio Kentucky Indiana Regional Council of Governme | 15 | 31 to 90 days | \$463,000 |
| Hamilton | Rybolt/Taylor Intersection | Intersection reconstruction/overlay with added turn lanes | Ohio Kentucky Indiana Regional Council of Governme | 30 | 31 to 90 days | \$450,000 |
| Hamilton | S.R. 264 | Full Depth Repair & Repaving of S.R. 264 from Pontiac to the corp. line. Plans are complete | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$750,000 |
| Hamilton | Cincinnati Riverfront Park | This project will complete 20 acres of the proposed 40 acre flood and erosion control public infrastructure project along the Ohio River. The U.S. Army Corps of Engineers has estimated that when this project is completed the region will receive more than 1.1 million new visitors annually to the new public project. The project will also reinforce the private/public development of the "Banks Project", which is a new mixed use development project under construction adjacent to the site. The project will stimulate the local economy and begin bringing about over 180 new jobs to the region. In addition, the project is designed to support the environment through watershed reclaiming, recycle, and mitigation, reduce carbon footprint, providing sustainable buildings by adhering to LEAD certifications. Moreover, the project will employ geo-thermal, solar, wind, and bio-mass technologies. The project, once completed, will also showcase the largest green roof within the State of Ohio. | Cincinnati Parks Foundation | 182 | 91 to 180 days | \$29,500,000 |
| Hamilton | Lawn Life | Lawn Life is a nonprofit shovel-ready project that will create 20-25 desperately needed jobs primarily for young workers (starting at age 16), restoring the previously unskilled group in landscaping and other related work. Lawn Life is uniquely designed to seek out at-risk youth and through training and other services, help combat the high unemployment rate (which) on independently hired to recondition into criminal activity for the target group largely residing in Cincinnati's urban center. Not only will Lawn Life be a vital source of 21st Century education and career jobs for an often-overlooked segment of the community's potential workforce, but the Youth Employment Source will also be working in direct connection with local law enforcement, Hamilton County's juvenile detention center, and other area youth service agencies to seek out at-risk young people who can be positively diverted to becoming productive, stably employed members of their communities. This cutting southeast Ohio's growing crime rate for underage offenders and improving public safety within the greater Cincinnati area and helping to promote family welfare for many youth by the economic development. \$70,000 start-up cost | Lawn Life | 25 | 0 to 30 days | \$70,000 |
| Hamilton | Galbraith Road Improvement Project | Resurfacing/Stormwater Management / Curb and Gutter / Sidewalk (Northside) | Ohio Kentucky Indiana Regional Council of Governme | 25 | 31 to 90 days | \$500,000 |
| Hamilton | Computers For Guns | Train at risk youth to build computers from scratch and to trouble shoot and repair them. We then load music software onto the computer and teach the student to use the computer to record music digitally. As a special part of the program to promote community safety, we developed "Computers for Guns". We offer a free 12 week course to youth who turn in a gun to Max Traxx Studios along with a computer upon completion. Funding from this program will allow us to advertise our program and to reach the maximum amount of youth to build onto the line Employment Zones in Cincinnati, Ohio. To date we have graduated three classes of 17 each with ages from 11 to 30 being certified. We have absorbed all of the costs associated with this training to date. We are community driven and plan to serve the Greater Cincinnati area better with a grant. Our location is 1650 Central Parkway, Cincinnati Ohio and our e-mail is maxtraxx@comcast.com. The principals are Mr. Charles Menden and Mr. Bruce Schemel. | Maxx Traxx Learning Center | 20 | 0 to 30 days | \$960,000 |
| Hamilton | E. Warren St. (US42) Reconstruction | Reconstruct 795' of roadway | Ohio Kentucky Indiana Regional Council of Governme | 5 | 31 to 90 days | \$400,000 |
| Hamilton | Mason Main St. Improvements | Storm and Roadway Improvement | Ohio Kentucky Indiana Regional Council of Governme | 25 | 31 to 90 days | \$350,000 |
| Hamilton | Warder Nursery | This project will provide a complete renovation of Warder Nursery, which is the Park Board's only nursery. This project will create a more efficient greenhouse and reduce the carbon footprint for the park system, it will allow parks to install softening systems, geothermal, solar, wind, and rain gardens. | Cincinnati Parks Foundation | 41 | 91 to 180 days | \$2,200,000 |
| Hamilton | Lytle Park | The reconstruction of Lytle Park will provide more green space and garden area for the urban downtown community, improved and relocated sidewalks, new infrastructure including irrigation and lighting, more seating and landscaping and better pedestrian connections to the surrounding area. It also includes a shelter and gathering area, renovated comfort station, a natural play area, and several water features. All features of this project will utilize green initiatives of solar, water reclaiming and water recycling. | Cincinnati Parks Foundation | 19 | 91 to 180 days | \$4,500,000 |
| Hamilton | Cincinnati Parks Green Initiatives | Green initiatives are essential in Cincinnati Parks' mission statement, "enhancing, managing, conserving, restoring parks natural and cultural resources and public green spaces - for the education, enlightenment, and enrichment of the Cincinnati community." Our parks are the preeminent green industry, hosting green jobs of today, and providing a great development ground for more jobs in the green collar economy. More than a clear purpose, we have a passion. Since 2005, the Park Board has been the Green Initiative pilot for the City of Cincinnati. Parks has installed solar panels, a wind turbine, solar fish tanks, and uses bio-diesel in all mowing vehicles. This project will fund the following projects: Photovoltaic systems, Geothermal HVAC and Biomass, Conservation, Deployment of BigBelly Smart trash compactors, Green Infrastructure, Mowing and Transportation Equipment. We are a system of public parks, preserves, pathways, highway green space and greenways providing numerous sites for green infrastructure projects. Park property covers over 6,000 acres of the city with multiple buildings and public facilities. There is a Cincinnati Park in every neighborhood. | Cincinnati Parks Foundation | 20 | 91 to 180 days | \$7,375,000 |
| Hamilton | SR 4 - Wyoming Traffic Signal Upgrade | Traffic Signal System Upgrade, ADT 17-860 | Ohio Kentucky Indiana Regional Council of Governme | 20 | 31 to 90 days | \$2,000,000 |

| Hamilton | Wooster Pike Repair | Pavement repair, catch basin repair, curb replacement, drive apron replacement, install curb ramps as required, sidewalk replacement. | Ohio Kentucky Indiana Regional Council of Governme | 30 | 31 to 90 days | \$837,200 |
| Hamilton | ARMGuard | PaymentGuard is positioned, through its ARMGuard product, to bring the first product to market that helps homeowners with adjustable rate mortgages (ARMs) effectively manage their interest rate risk by providing a cost effective interest rate "cap". PaymentGuard, LLC, through its product, ARMGuard, will contract with borrowers who have ARMs to cost effectively "cap" their monthly principal and interest payments at an agreed upon amount (known as the Maximum Payment Amount) for an agreed upon period of time (up to ten years), in exchange for an agreed upon monthly Service Fee. ARMGuard is sold directly to the public, as our primary product, PaymentGuard will likely be regulated as an insurance company. The requested funds would be used to meet the minimum state regulatory capital requirements to begin operations. Once the ARMGuard product is approved by the state insurance regulators, millions of homeowners could benefit from reduced interest rate risk on their adjustable rate mortgages. In addition, a new business enterprise would be established that would hire and employ up to 20 or more professional paid jobs in Hamilton County, Ohio. Sections and funds for four new positions all of which address health needs in Southwest Ohio. Funds will expand education programs to offer web-based training with capacity for broad based outreach. 24 webinars will be produced targeting the professional and lay communities throughout the State of Ohio (year 1). Continuing education units will be provided. Face to face training and prevention programs will also be facilitated. Funds will be used to make significant changes to the existing web site to promote access to health care impacting hundreds of thousands of people each year. The site will be redesigned by both professional members and general consumers to improve navigation and user experience. Resources, support group and education programs on a variety of health issues. Specific services will be expanded to include mental health system. Funds will support a tele-mental health program for patients and peers and 25 new desks for 4th grade classrooms. Desks would be "standing" desks with stools and each with a swing-out chair. All desks would be ergonomically designed to help students can strengthen their feet while standing or sitting. This would give "active" and "KIDZ" students to have more "active" and "KIDZ" freedom as they worked. | PaymentGuard, LLC | 20 | 31 to 90 days | \$5,000,000 |
| Hamilton | Economic Recovery Project | Sections and funds for four new positions all of which address health needs in Southwest Ohio. Funds will expand education programs to offer web-based training with capacity for broad based outreach. 24 webinars will be produced targeting the professional and lay communities throughout the State of Ohio (year 1). All desks would be ergonomically designed to help students can strengthen their feet while standing or sitting. This would give "active" and "KIDZ" students to have more "active" and "KIDZ" freedom as they worked. | Three Rivers Middle School | 5 | 31 to 90 days | \$2,500 |
| Hamilton | Home Again | This project will buy, repair and sell foreclosed and abandoned homes giving current or the most former homeowners preference in re-buying, pricing or lease to own. The project will mainly focus on the area of Price Hill, a community in the southwest of Cincinnati, Ohio. Price Hill is a unique community where a majority of the homes are over 100 years old. Due to the housing crisis, many jobs and job losses in the past five years Price Hill real estate has been one of the hardest hit communities in the state. Home prices have dropped up to 50 percent of their value and the time can be sky rocketed. What used to be the most prestigious areas in Cincinnati it has now become an area. This project will be the home ownership crisis in Price Hill and which will lead to a decline in crime. | Lind Investing | 25 | 31 to 90 days | \$3,000,000 |
| Hamilton | Housing Investments | Rehab of existing homes and purchase of new homes for resale to owner occupied | The Tippitt Group LLC | 5 | 0 to 30 days | \$250,000 |
| Hamilton | Compton Road Rehabilitation | Mill and overlay of Compton Road (approximately 7,000 ft.) with spot curb replacement. Installation of new sidewalk on 1 side of the street. | City of Wyoming | 54 | 91 to 180 days | \$1,300,000 |
| Hamilton | Downtown Cincinnati Entertainment Center | We are seeking to create an entertainment center in downtown Cincinnati that will offer opportunities for the city's youth in the music, nightlife, and fashion industries along with revitalize downtown Cincinnati and return it to its past glory. Cincinnati's influence on the music industry goes beyond what is known by the majority of Americans which is called rock and roll. We also aim to divert youth from the areas of crime and drug use by empowering and inspiring them with Cincinnati's rich music history, offering a music networking resource, and uncovering their own untapped potential. Musical opportunities include informational lecture series, classes to great Cincinnati musicians, and a professional recording studio, all of which is integrated and patronized by the largest names in music today. The fashion sector is coordinated by offering independent designers an opportunity to put on professional fashion shows and have samples of their work put into the hands of celebrities. The nightlife aspect offers an upscale venue for locals and visitors alike to enjoy downtown Cincinnati in its greatest grandeur. This project offers immediate job opportunities. | The LaPrade Group, Inc. | 60 | 0 to 30 days | \$2,000,000 |
| Hamilton | Felony Screening & Amnesty Program (FSAP) | This Program is designed to aid and assist felons. There are thousands and thousands of felons in every city in the USA who deserve an opportunity to have their charge expunged? Most of these felons controlled their offenses, when they were younger or they were juveniles, now they are law abiding citizens. Many have been denied, because expungement is not possible, because they have a prior misdemeanor or more than one felony charge. Applicants will be screened, interviewed and fit-skilled assessed. Those that qualify for expungement will be given direction to job training, mental health assistance, health care assistance, housing, food, whatever it takes to put individual back on the workforce. Applicants could pay an affordable fee, for the Service. We would need workers to take the initial application, set appointments, interviews, interviews, deal with legal settlements, court appointments, and follow-up. By Appointment Only-Waiting List. Office Located in Local Neighborhood, and does not have to be open everyday. THANK YOU | FELONY SCREENING & AMNESTY PROGRAM (FSAP) | 10 | 31 to 90 days | \$75,000 |
| Hamilton | Electronic Medical records | Implementation of electronic medical records at six health center sites: Elm St. Clement, Price Hill, Braxton Carr, Northside and Milvake Health Center) (total patient visits of 195,000 serving over 35,000 citizens) The EMR management system will consist of three components: office management, electronic clinical records (electronic medical records), and imaging. The office management component will include patient registration (integrated with the dental, lab, and pharmacy systems to exchange information), billing and collection, appointment reminders. The clinical records area will include charting, progress notes, informed consent forms, prescriptions, lab orders and other patient information. The imaging system will allow storage of both paper records and x-rays in digital format. The digital images would be stored in a TIFF format | Cincinnati Health Department | 25 | 181 days or more | \$800,000 |
| Hamilton | Electronic Dental Records | Implement Electronic Dental Records at five Health Department clinics, currently providing over 25,000 visits in five sites: Elm St Health Center, Crest Smith Shopping, Price Hill Health Center, Northside Health Center and Milvake Health Center. A dental electronic record software system incorporating, image processing, electronic charting, and digital x-rays and imaging must be purchased and installed. A few of the benefits would be: Enhanced scheduling options, will allow staff to schedule multiple appointments which will increase each dentist's productivity, improved billing procedures and less denials, Less time spent loading and handling paper files; improve dentists productivity with digital x-rays | Cincinnati Health Department | 25 | 181 days or more | \$600,000 |
| Hamilton | Exit 39 I-275 Winton/Gilmore Road Project | Order: For the past three years both Cities have worked with the Ohio Department of Transportation and the Ohio Kentucky Indiana Regional Council of Governments along with major businesses such as Cincinnati Financial Corporation and Mery Hospital to develop a plan for improving the corridor. Within one mile of the corridor there are more than 400 businesses which employ more than 8,000 employees. The largest employer along the corridor is the Cincinnati Financial Corporation which employs over 3,000 employees with an annual payroll of over \$100 million. Mery Hospital who is also along the corridor, employs 1,300 employees with a \$40 million payroll and was named one of the "Top 100 Hospitals in America". Both cities along with CFC and Mery Hospital share concerns over the ability for the corridor to handle additional capacity if they are to continue to grow. | Cincinnati Financial Corporation, in coordination | 2100 | 181 days or more | \$12,900,000 |
| Hamilton | Family and Community Engagement Coordinators | The Governor has stipulated in his Education Reform Proposal that "each district shall be required to have a Family and Community Engagement Team, which will work with the county and state Family and Children First Councils to break down non-academic barriers that may inhibit learning for students. The document also requires that each district place a Family and Community coordinator in each school building. The Hamilton County Family and Children First Council has a twelve year history of playing an important role in working with the students, families, teachers and the community and has well documented success in doing so. The Hamilton County FCFC responds to the need for Family and Community Engagement coordinators in each school district in Hamilton County (22) to work with the school district to develop a strategic plan for each building in their district to engage families and communities, to assess needs of individual schools, to train school coordinators for individual school to work with the large number of members (75+) of the Hamilton County Family and Children First Council to bring high quality coordinated services to the schools. | Hamilton County Family and Children First Council | 25 | 31 to 90 days | \$1,600,000 |
| Hamilton | Administration Building Addition | This project will construct an addition on the Stepping Stones Center Administration building, an 1800s farmhouse, and make necessary repairs to the existing structure. The renovation includes adding an elevator to provide handicapped accessibility to the second floor, adding a glassroom, a staff kitchen, and additional storage space for secure record keeping. Education programs include 2-ster rated preschool, alternative education program for elementary, middle and high school students with severe autism, extended school year programs, and adult job re-education and skills training skills. Project details: 1650 sq. ft. two story building, masonry repair to existing walls, new roof on existing building, wrought iron repair work, exterior refinishing, repairs to driveway and parking lot. Congestion along our busy streets and highways is a leading cause of air energy waste but is a leading cause of increased air and noise pollution, time delay and frustration among commuters. It is estimated that poor traffic signal accounts for 15% of all traffic delay, or about 300 million vehicle-hours of delay, on major roadways alone. According to a recent study by the National Transportation Operation Commission, the Nation currently has an overall D- rating for traffic signal operations along our street and highways. Currently, signal timing operations are regulated by the public agencies because of higher priority items. A funding source needs to be set up to EXCLUSIVELY fund signal timing and maintenance for any agency that maintains signals. Studies have shown that a 60% benefit could be realized by implementing mandatory signal timing by ALL municipalities every three years and to link signals together along corridors to reduce stops and delays, even if traffic flows through different municipalities. Each of these components is relatively low cost when compared to its benefits and safely implemented through existing mechanisms. | Stepping Stones Center for Handicapped | 80 | 31 to 90 days | \$595,000 |
| Hamilton | Traffic Signal Timing and Maintenance | Reasons lost business by hiring new sales people and generate new business by expanding our product mix and our geographic area. Funds needed to improve credit positions with suppliers. These funds will not only have an effect on our company but on the businesses that rely on us for orders to keep their doors open as well. Also AFP needs more technically advanced products to keep up with expanding markets and therefore would like to update and improve inventory. Expand and enhance a historic building owned by United Way of Greater Cincinnati that currently houses United Way and six human service agencies, including Big Brothers/Big Sisters, Visiting Nurse Association and the Mental Health Association. The project will create a new conference facility for up to 150 persons for the community, provide safety improvements - including new mechanical, electrical and fire protection, and demonstrate an investment in Mt. Auburn, one of Cincinnati's historic neighborhoods. United Way and partners are among the largest employers in the Mt. Auburn neighborhood. Renovation will ensure employees maintain their presence, helping to stabilize an increasingly distressed neighborhood. The new conference facility is an investment in Mt. Auburn and traffic to the center will provide increased business and other local employees. United Way, its tenants and external community groups hold nearly 2,000 meetings in the building's existing space. The renovations will create a safe, healthy, and functional work environment for the 130 employees and thousands of annual visitors to the building. This project will provide an est. 280 Ohio jobs. | Bar & Prevost | 100 | 0 to 30 days | \$25,000,000 |

| Hamilton | Urban League Fulfillment Center. | The scope of our Solid Opportunity for Advancement and Retention (SOAR) program is to assist individuals who may have difficulty finding employment due to limited education, poor work history, or criminal convictions. Some of these clients have multiple barriers such as mental health or substance abuse issues, lack of transportation, or unstable housing. These issues as well as others limit their ability to obtain traditional employment and increase their chances of finding traditional employment. The goal of traditional employment is to give individuals work experience so they are able to transition into other jobs that will enhance their self-sufficiency. Individuals are hired as employees of the Urban League and may work in our Fulfillment Center. Our Fulfillment Center would serve as a vehicle to provide program graduates with on the job training and skill development as well as verifiable work experience. All individuals will work with a case manager to assure that they are progressing beyond self-sufficiency. Our fulfillment Center would also serve as a cost effective warehouse, packaging, and shipping alternative for local businesses. | Urban League of Greater Cincinnati | 200 | 31 to 90 days | \$1,000,000 |
| Hamilton | Landscaping/Horticulture Training Program. | The field of landscape and ornamental horticulture is one of the fastest growing industries in the country. The demand for skilled personnel in this field far surpasses the supply. Over the next several years, job opportunities in landscaping, lawn services, plant care and grounds keeping are expected to increase by 13% in Ohio and 18% nationally. Ohio's Greenest Industry, accounts for over \$4 billion of Ohio's economy annually. City level pay ranges from \$8.00 to \$12.00 per hour. The Urban League of Greater Cincinnati is currently seeking individuals who are ready to be job ready. The landscaping industry also has a career path that leads to economic self-sufficiency where supervisors and managers can earn between \$22,000 to \$90,000 yearly. The Urban League of Greater Cincinnati proposes to develop a Landscaping Training Program modeled after a program designed for the Council of Urban League's Workforce/Advanced Manufacturing Program to fit hundreds of job opportunities in multiple states in multiple courses. Employment partners would be recruited to provide opportunities to program participants and our graduates would fit employee needs of a qualified workforce. | Urban League of Greater Cincinnati | 350 | 0 to 30 days | \$1,000,000 |
| Hamilton | Hamilton County Park District Roadway & Parking Lo | Rehabilitate and resurface 3.8 miles of existing park roadways and 312,000 square feet of parking lots, including wearing course removed, asphalt concrete surface and intermediate courses, full depth pavement repair, asphalt and concrete curb replacement, pavement markings, and parking blocks. To be completed at the following regional parks: Embshoff Woods, Miami Whitewater Forest, Sharon Woods, Triple Creek, and Winton Woods | Hamilton County Park District | 20 | 31 to 90 days | \$950,000 |
| Hamilton | Welding/Advanced Manufacturing Apprenticeship Prog | The general purpose of the proposed project is to provide low-skilled unemployed Ohioans with training and employment in an appropriate, green occupation—welding/advanced manufacturing. Manufacturing is the single largest employment sector in Ohio (14.2% in 2007). Unfortunately, manufacturing in Ohio is expected to decrease by 10.8% by 2016, although welding employment growth is estimated conservatively at 5% a year, which may even increase further as baby boomers begin retiring. Currently, there are no registered welding apprenticeship programs in Ohio open to the public. The Ohio Welding Apprenticeship program will consist of three parts. First, an Apprenticeship Bridge Program will bring participants up to required standards of reading, math, and general science knowledge. At the successful completion of the bridge and job readiness part, participants will be placed in an apprenticeship position with an employer and simultaneously be assigned classroom instruction in welding and related training provided. The program will be duplicated and administered at all OCCU cities which are Akron, Canton, Columbus, Dayton, Toledo, Youngstown, Elyria, Lorain as well as Cincinnati | Ohio Council of Urban Leagues | 200 | 31 to 90 days | \$1,000,000 |
| Hamilton | Rebuilding of East End/Lunken Airport levee system | FEMA is in the process of de-certifying the East End/Lunken Airport levee system that was built in the 1930s. If the levee system is not brought up to FEMA standards, the area now protected by the levee system will be included in the Regulatory Floodplain. Commercial, residential, and businesses will need to comply with the requirements of the National Flood Insurance Program (NFIP). East End is a large, multi-family neighborhood and having to buy flood insurance will be a definite hardship for some of the residents and businesses. Additionally, any new construction or addition to an existing structure will need to meet the NFIP standards. The area is currently protected by a 100-year levee system. The area now provides about 800 full-time jobs and has an economic impact of \$172 million per year. | City of Cincinnati | 200 | 31 to 90 days | \$35,000,000 |
| Hamilton | Ohio River Intermodal Interchange | Property consists of 25 acres, 3000 feet of frontage, on the Ohio River. Currently utilized as a large bulkhead terminal since 1950. The intent is to upgrade, adding 150-200 ton capacity heavy lift cranes for container to barges/flat interchanges, bulk barges, & bulk cargo. This modernized port operation will help shippers and receivers of domestic and international cargo reduce their transportation costs by an est. \$2.54 dollar/ton, in utilizing this trans-load facility for greater volumes of both raw feeder stock materials inbound as well as finished products outbound on barge. Rail access should allow for a substantial reduction in the volume of truck traffic. Add savings by unit train movement 100 car train is 10,000 ton which would require 400 plus if (7.50 ton min) & would return empty. Shipper will divert to a convenient intermodal traffic point to gather savings. | Cincinnati Barge & Rail Terminal, LLC | 15 | 91 to 180 days | \$4,300,000 |
| Hamilton | Hillside Hall Renovation | In obtaining is primarily logistics and the advantage that the 70% underutilized Ohio River provides for cargo/intermodal alignments, that will make this project & Ohio succeed. Hillside Hall houses the warm water pool, gym and classrooms for Stepping Stones Center program including 2 1/2 tier rated preschool for children with disabilities, the region's only extensive education program for elementary, middle and high school students with severe autism and intense behavior needs, and for students in the extended school year program during the summer. The pool is a proven therapy tool and part of the education plan for students. The Project: Replace the roof, skylights, gutters and downspouts, exterior siding and trim including 6,000 square feet of structural roof decking. Repair the exterior. Make interior repairs to the dining and recreation rooms to improve accessibility. Hillside Hall was built in 1976. Multiple original roof sections are between 10 and 20 years old. This repair and restoration is needed to continue vital services that are an integral part of students' ongoing education. | Stepping Stones Center for Handicapped | 25 | 0 to 30 days | \$350,000 |
| Hamilton | Madeira Fire Station Improvement | Expansion of existing fire station in Madeira, Ohio to accommodate new equipment (fire truck) which cannot fit into existing bays. New equipment is required to replace outmoded Quire vehicle, new vehicle will improve fire protection/loss for larger structures constructed within the community. | City of Madeira, Ohio | 0 | 91 to 180 days | \$750,000 |
| Hamilton | Camargo Road Stormwater Culvert Repairs | Repair/Replace 12 ft. diameter 600 ft. long stormwater culvert adjacent to Camargo Road. Concrete structure is 30 years old and is significantly deteriorated. Failure of pipe will compromise section of Camargo Road which is a major east-west arterial for local and regional traffic. Located in the Little Duck Creek Watershed. | City of Madeira, Ohio | 0 | 91 to 180 days | \$500,000 |
| Hamilton | Energy efficiency changes - gym lights and ventilat | The District's gymnasiums do not have state of the art lighting fixtures for energy efficiency. By changing to T-5 fluorescent fixtures and bulbs and by adding ventilating fans the district can cut considerable consumption. Take down old metal halide lights, install new T-5 fluorescent fixtures and install 2, 10 foot diameter fans. | Cincinnati Public Schools | 0 | 91 to 180 days | \$1,275,000 |
| Hamilton | Construction Pre Apprenticeship Program | Apprenticeships are highly structured and combines three to four years of on-the-job training with related technical instruction. They also include practical courses related to an industry and leads to a state certification documenting skills obtained. Apprenticeships are driven by employer demand, involve extensive training in an actual work environment, and have built in wage increases and career advancement. Employers pay most of the training costs but earn returns by retaining skilled workers who contribute during the learning process. Although there are currently several apprenticeship programs for the construction building trades, applicants must meet certain requirements and pass an entrance exam to qualify. A Pre-Apprenticeship Program will bring potential applicants up to the required standards of reading, math, mechanical aptitude, and basic science knowledge. The Urban League of Greater Cincinnati will recruit, screen, and assess applicants and then enroll them in the pre-apprenticeship program. The program will not only consist of the core curriculum needed-to-be successful in the construction trades, it will also prepare participants in basic | Urban League of Greater Cincinnati | 120 | 0 to 30 days | \$250,000 |
| Hamilton | Vine Street Resurfacing | Resurfacing of Vine Street within the corporate limits of the City of St. Bernard | City of St. Bernard | 20 | 31 to 90 days | \$860,000 |
| Hamilton | Carolina Trace Improvements | This section of Carolina Trace Road has serious drainage problems, along the road and at the intersection of Carolina Trace and West Road. Flooding during rain events creates dangerous situations and the roadway has been shut-down at times due to the flooding. Flooding remains for days after an event, and those areas also present problems during the winter months with ice. The roadway is also becoming distressed and should be milled and overlaid. A portion of this roadway is in Harrison Township and the project will be done in conjunction with the Township and the County. | City of Harrison | 20 | 91 to 180 days | \$750,000 |
| Hamilton | Language & Enrichment Staff | 10 Foreign Language Teachers 8 English as a Second Language Teachers 8 Gifted Teachers | Cincinnati Public Schools | 21 | 31 to 90 days | \$1,890,000 |
| Hamilton | Replacement of Aiken College & Career H.S. | Replacement of the Aiken College and Career High School to LEED Silver standards | Cincinnati Public Schools | 49 | 0 to 30 days | \$37,500,000 |
| Hamilton | Gamble renovation to Montessori H.S. | RENOVATION SUBMISSION. ORIGINAL HAD INFORMATION OMITTED. PLEASE CONSIDER THIS PROPOSAL. | Cincinnati Public Schools | 49 | 91 to 180 days | \$21,730,000 |
| Hamilton | Madeira CBD Public Parking | Renovation of Gamble School to LEED Silver standard to serve as a 600 student Montessori High School. Project would provide funding for property acquisition and construction of public parking in the Madeira CBD. Property acquisition would also assist with funding the gap between land values and development values to enhance economic development and attract new retail and office development utilizing existing business corridors with the lack of available parking in the CBD. Project would include relocation of two historical structures to make way for the public parking and utility work. Parking lot size would depend on the amount of property acquisition, however, it is likely to provide a minimum of 80 spaces in addition to creating available property for new development. | City of Madeira, Ohio | 50 | 91 to 180 days | \$1,000,000 |
| Hamilton | City schools and parks Urban Timber Initiative | City schools and parks Urban Timber Initiative. Harvest quarantined lumber from city parks to be milled and fabricated into school storage units. | Cincinnati Public Schools | 36 | 31 to 90 days | \$1,720,000 |
| Hamilton | Anderson Township Community Radio | Anderson Township Community Radio utilizes existing FCC program to establish a low-power radio station serving this community in Hamilton County, Ohio. Due to the economic downturn, many worthy local businesses, programs and individuals do not have the means to distribute their message to the community. This radio station would help to improve the economic environment of Anderson Township. It would also be an educational resource. Funding would include the purchase and installation of a transmitter and antenna on the site at 2770 Connersdale Drive, purchase and installation of other broadcast equipment to supplement the existing resources and the part-time workers to staff and operate the station. Anderson Township Community Radio would operate 24/7, 365. I have worked in broadcasting for more than twenty years and have the expertise and experience to see this project successful, helping to boost the local economy and to reach an audience underserved by traditional radio broadcasters. | Anderson Township Community Radio | 5 | 0 to 30 days | \$30,000 |
| Hamilton | Renovate East Side Neighborhood School | Renovate East Side Neighborhood School to LEED Silver Standards | Cincinnati Public Schools | 49 | 91 to 180 days | \$14,497,876 |
| Hamilton | Vending and Office Coffee Service Operation Expans | Purchase and installation of the following equipment: 20 new vending soft-drink and snack machines; 30 new coffee brewers, including water filtration units; 20 new hot/cold water dispensing units. | Investment Portfolios Plus, Inc. | 4 | 0 to 30 days | \$120,000 |
| Hamilton | Replace West Side Neighborhood School | Replace West Side Neighborhood School to LEED Silver standards | Cincinnati Public Schools | 49 | 31 to 90 days | \$16,639,331 |
| Hamilton | Renovate Oylar PK-12 Community Learning Center | Renovate the Oylar PK-12 Community Learning Center to LEED Silver standards. | Cincinnati Public Schools | 49 | 31 to 90 days | \$20,669,634 |
| Hamilton | Camargo Corridor and Streetscape Improvements | Project would provide infrastructure improvements to the east section of Camargo Road (approximately 300 ft. between Euclid Avenue and Burn Road) including sidewalks, streetscape improvements (lighting, landscape, etc.) and stormwater improvements. The project area is a transitional area which has manufacturing and retail uses directly across the street from residential. Project would provide aesthetic and safety improvements for both residents and businesses, improve the potential for additional economic development and better property values for the local base. Project would also attract new business development to the area thereby providing additional and retained jobs. | City of Madeira, Ohio | 20 | 91 to 180 days | \$600,000 |
| Hamilton | Replacement of Woodford Paidela Academy | Replacement of Woodford Paidela Academy to LEED Silver standard | Cincinnati Public Schools | 49 | 31 to 90 days | \$16,639,331 |
| Hamilton | Efficient Management of District's energy | Install a central computerized monitoring system that would identify and control energy usage in all 54 District schools. On a much grander scale, Duke Energy has such a system for their operations. As a major customer, Duke has worked with the district in various ways including being a member of the District's Energy Conservation Task Force. Hopefully, Duke will again work with Cinc. Public Schools advising us on the technical aspects of such a system. | Cincinnati | 0 | 31 to 90 days | \$1,000,000 |
| Hamilton | Relocation & replacement of Winton Montessori Scho | Relocation and replacement of Winton Montessori School at the Schwab School site to LEED Silver standard. | Cincinnati Public Schools | 49 | 31 to 90 days | \$19,664,639 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | SBEP Alternative School | To provide teachers and aides for alternative schools in three buildings for two years. St. Bernard-Elmwood Place School District is located in the city of St. Bernard and Elmwood Place, Ohio. The rate of economically disadvantaged for St. Bernard and Elmwood Place is 86.5% and 81.8%, respectively. There are 21.8% of the students in St. Bernard designated with a disability and 27% of Elmwood Place, the highest in Hamilton County. We have the second lowest median income in Hamilton County. Because of the elimination of personal property tax in Ohio our school district has decreased by \$103 Million in the past three years. We have changed for a wealthy district to a poor district. We are unable to provide the additional help to students in need without funds. | St. Bernard-Elmwood Place | 12 | 91 to 180 days | \$900,000 |
| Hamilton | Illicit Discharge and Sewage Nuisance Abatement | This project would eliminate existing illicit discharging septic systems connected or draining to the municipal separate storm sewer system (MS4) located within Hamilton County. The project would provide partial to full funding to owners of the approximately 14,000 existing discharging and failing home septic systems within Hamilton County for: 1) abandonment of a septic system and connection of the building sewer to a new or existing available and accessible sanitary sewer; 2) extension of new sanitary sewer into areas with dense concentrations of existing discharging and failing septic systems; 3) replacement or upgrades of existing discharging and failing septic systems to non-discharging soil absorption systems when a cost/benefit analysis determines that a sanitary sewer is not appropriate; 4) replacement or upgrades of existing discharging and failing septic systems with new NPDES authorized discharging septic systems when cost/benefit analysis determines that a sanitary sewer is not appropriate and a soil absorption system is not feasible. | Hamilton County Public Health | 500 | 31 to 90 days | \$60,000,000 |
| Hamilton | Bus Replacement | We need to replace 2 school buses. 1 of the buses will be for handicap transportation and the other one for regular transportation. Our fleet is in period need of upgrading. New buses cost about \$70,000 each, depending on options chosen. | Fincetown Local Schools | 5 | 31 to 90 days | \$70,000 |
| Hamilton | Traffic Control Sign Upgrade Program | Replacement and upgrade of all regulatory and warning signs on Principal and Minor Arterials within the City of Cincinnati to meet new standards for reflectivity, color and content as specified in the MUTCD to improve safety of the traveling public. | City of Cincinnati | 20 | 31 to 90 days | \$5,000,000 |
| Hamilton | Purchase energy efficient light bulbs for all Dist | Purchasing bulbs and/or fixtures for the energy efficient bulbs - CFLs. By simply changing over to energy efficient light bulbs and new fixtures where needed, the District could cut electric usage for lighting considerably. CPS schools used over 81 million kWh last fiscal year. | Cincinnati | 0 | 31 to 90 days | \$500,000 |
| Hamilton | Euclid Avenue/Ken Arbre Sidewalk Improvement | Approximately 12,000 Lf. of concrete walkways on Euclid Avenue and Ken Arbre Drive between Steveson Road and Miami Avenue and to help link the west side of Madiera to the Madiera CBD, local schools, public library and Madiera Historical Society Museum. Project will improve safety for pedestrians, increase and enhance business activity in the Madiera CBD, and provide more walkability in the community for students to local schools to promote health and wellness. | City of Madeira, Ohio | 0 | 91 to 180 days | \$367,500 |
| Hamilton | Gamble renovation to Montessori H.S. | Renovation of Gamble School to serve as a 600 student Montessori High School. | Cincinnati Public Schools | 49 | 91 to 180 days | \$21,730,000 |
| Hamilton | Replacement of Aiken College & Career H.S. | Replacement of the Aiken College and Career High School. | Cincinnati Public Schools | 49 | 0 to 30 days | \$37,500,000 |
| Hamilton | Puma Properties Deck Structure Rehab | This project will replace and bring deck structure on the rear of an apartment building. The deck structure is wooden and has been standing since the building was built in the 40's. The project will involve removal, construction of a new structure and painting. We estimate it will require at least 2 companies. | Puma Properties | 15 | 0 to 30 days | \$30,000 |
| Hamilton | Renewable Energy Sources | Five on 6 acres of totally flat land, the back of which cannot be built upon due to flood plain. This is a perfect area to harness wind power and solar home for solar energy. Our wind potential is excellent. There is never a shortage of wind across our property. | None | 5 | 0 to 30 days | \$100,000 |
| Hamilton | Laurel Avenue Streetscape Improvement | Laurel Avenue Streetscape Project. Provide general infrastructure improvements to the Madiera CBD along Laurel Avenue. Project includes Economic Development to the Madiera tax base by aesthetic enhancements for existing and future business development. Projecting includes new sidewalks, improved lighting for safety and aesthetics, landscape and gateway improvements, pedestrian crossings, bicycle paths and signage. | City of Madeira, Ohio | 15 | 91 to 180 days | \$375,000 |
| Hamilton | CPS Renewable Energy Program | ORIGINAL SUBMISSION HAD AN ERROR. PLEASE CONSIDER THIS APPLICATION. This project transforms the Cincinnati Public School District with renewable energy producing equipment for every school. ARRA funds will be placed in the existing CPS HB-264 program and earmarked for CPS to borrow and repay for other school districts to use in the future. The stimulus money will be used to purchase equipment and enhancements to future schools totaling approximately \$500 MM of solar power, 1.5 GW of hot water, 25.5 MW wind turbines, 1000T of geothermal heating and cooling for the district. The equipment will be purchased from Ohio manufacturing companies and installed with local labor creating immediate jobs in a variety of fields. | Cincinnati Public Schools | 150 | 0 to 30 days | \$66,000,000 |
| Hamilton | Highly qualified teachers including foreign language | Due to budget cuts and state and federal requirements, including no child left behind has created staffing deficiencies in the classroom. This has resulted in overcrowding. Also, an increasing number of Spanish speaking families have moved into the district. Cincinnati Public Schools lack teachers that can speak Spanish and teach content. The additional teachers would provide the quality education that is needed for every child. | Cincinnati Public Schools | 10 | 0 to 30 days | \$500,000 |
| Hamilton | CPS Renewable Energy Program | This project transforms the Cincinnati Public School District with renewable energy producing equipment for every school. ARRA funds will be placed in the existing CPS HB-264 program and earmarked for CPS to borrow and repay for other school districts to use in the future. The stimulus money will be used to purchase equipment and enhancements to future schools totaling approximately \$500 MM of solar power, 1.5 GW of hot water, 25.5 MW wind turbines, 1000T of geothermal heating and cooling for the district. The equipment will be purchased from Ohio manufacturing companies and installed with local labor creating immediate jobs in a variety of fields. | Cincinnati Public Schools | 150 | 0 to 30 days | \$66,000 |
| Hamilton | Oracle applications - Human Resource self-service | This application is needed to allow employees to view and update employment and personal information online. Allow human resources to track and evaluate employee attendance, Etimes manual tracking and updates and associated paperwork. Streamlines process and delivery of services. | Cincinnati Public Schools | 5 | 0 to 30 days | \$150,000 |
| Hamilton | Metro Transportation for high school students | To provide metro passes to all students in high school allowing them to attend classes. High school busing isn't a requirement and in tight budget times it is often times eliminated. This in turn would free up general fund dollars for additional classroom support. This also allows students to access work study and internship programs for part of their school day. It supports the local transit agency helping them keep employees who without the high school busing wouldn't be needed. | Cincinnati Public Schools | 75 | 91 to 180 days | \$8,473,050 |
| Hamilton | Iowa elevator | Install elevator to comply with ADA requirement. | Cincinnati Public Schools | 0 | 31 to 90 days | \$200,000 |
| Hamilton | HVAC Integration | Integration of our Energy Management Systems to control and monitor our HVAC systems. This will lower the energy consumption in our schools. This system would serve as a CO2/Infrared Active Controller/Officer. Manage A/C, P&ID, and have issues. Interact with principals and teacher discipline and general human resource issues. Issues consistent in all federal, state, and local matters consistent with CPS Board policy and procedures. | Cincinnati Public Schools | 9 | 31 to 90 days | \$1,000,000 |
| Hamilton | Compliance Manager/FMLA and ADA | 25 to 15 Security positions in schools. Positions necessary to bring staffing level up to Cincinnati Police recommended level. This is for a 4 year period. | Cincinnati Public Schools | 1 | 0 to 30 days | \$90,000 |
| Hamilton | Fill Security Assistant positions | 25 to 15 Security positions in schools. Positions necessary to bring staffing level up to Cincinnati Police recommended level. This is for a 4 year period. | Cincinnati Public Schools | 18 | 0 to 30 days | \$3,141,902 |
| Hamilton | Village of Glendale - Sharon Road Resurfacing | Resurfacing Sharon Road in Village of Glendale. This is the cost for 4 years with benefits. | Village of Glendale | 0 | 0 to 30 days | \$261,000 |
| Hamilton | Fill vacant Security Response Team position | Position not filled due to budget cuts. This is the cost for 4 years with benefits. | Cincinnati Public Schools | 1 | 0 to 30 days | \$200,000 |
| Hamilton | Video Surveillance Equipment | Fill 7 vacant maintenance positions. Position not filled due to budget cuts. This is the cost for 4 years with benefits. | Hamilton County Park District Rangers | 2 | 31 to 90 days | \$50,000 |
| Hamilton | Fill 7 vacant maintenance positions | Reduce the present .75 of mile walk distance from home to school to zero, allowing all students to ride a bus to school. This should improve attendance, allows for a safer means of getting to school, reducing exposure to crime and traffic. Reduces parents from driving which reduces pollution and saves them money. | Cincinnati Public Schools | 7 | 0 to 30 days | \$2,400,000 |
| Hamilton | Reducing walk distance to zero | Emergency generator, Dryvit System replacement. Repairs needed to maintain building. Also replace carpet in the two remaining floors. | Cincinnati Public Schools | 25 | 91 to 180 days | \$4,827,360 |
| Hamilton | Administrative Building Improvement | Replace all siding and SUIV's with Hybrids. Saves money and the Earth. | Cincinnati Public Schools | 72 | 0 to 30 days | \$3,850,000 |
| Hamilton | Hybrid Vehicles | Conduct air leakage test on 20 apartments throughout Hamilton County that are owned by CRHA. | Cincinnati Public Schools | 0 | 0 to 30 days | \$625,440 |
| Hamilton | Air Leakage Test | Replace 20 existing vehicles with electric hybrid vehicles. | Cincinnati Metropolitan Housing Authority | 4 | 31 to 90 days | \$70,000 |
| Hamilton | Purchase of Hybrid Vehicles | Provide transportation for pre-school students to enable more students to take advantage of early childhood education opportunities. Many parents do not have the means to get their children to school due to lack of transportation therefore the students are not enrolled. Replace Service Vehicles to maintain 7 year replacement schedule. This funding was cancelled due to budget cuts. This covers the missing 2 years and 2 years in the future. | Cincinnati Metropolitan Housing Authority | 5 | 31 to 90 days | \$600,000 |
| Hamilton | Transportation for Pre-school students | Investigate the feasibility of using solar panels to generate domestic hot water at various buildings owned by CRHA throughout Hamilton County. | Cincinnati Public Schools | 42 | 91 to 180 days | \$2,298,870 |
| Hamilton | Vehicle, Fleet Maintenance | Remove electric transformers from roof and related electric supply. | Cincinnati Public Schools | 3 | 31 to 90 days | \$75,000 |
| Hamilton | Feasibility - Solar Hot Water | Replace the existing boiler and chiller of a 10-unit multifamily building with a ground source heat pump located in Anderson Township. | Cincinnati Public Schools | 11 | 91 to 180 days | \$350,000 |
| Hamilton | North Fairmount Roof/Electric | Replace HVAC in Old Douglas building. Not required due to budget cuts. | Cincinnati Metropolitan Housing Authority | 12 | 91 to 180 days | \$120,000 |
| Hamilton | Ground Source Heat Pump | Replace HVAC in Old Douglas building. Not required due to budget cuts. | Cincinnati Metropolitan Housing Authority | 28 | 181 days or more | \$600,000 |
| Hamilton | Old Douglas HVAC | To achieve alternatives to ISS, equipping, with parent involvement achieving a class room learning based environment geared towards academic success for all students and parent satisfaction with customer service, safe, supportive and family friendly, achieving a positive school culture overall. Students participate will learn our sigma from Master Black Belt Trainer and learn to solve their problems with this proven technique. Their parents will also be engaged and experience the learning and become facilitators in school and out of school. | Straight 2 The Heart | 3 | 0 to 30 days | \$250,000 |
| Hamilton | Discovering Success Jr. Ombud's Leadership Program | Topic 1 Logic: Provide services for Student Services supporting positive school culture with primary focus on discipline. Topic 2 Results: Decrease the total percentage of ISS students and increase academic benchmarks of ISS population. Corrective discipline for a positive school culture. | | | | |
| Hamilton | Miami Whitewater Forest Timberlakes Drive Engineer | Main Whitewater Forest is a regional park that serves 600,000 visitors annually. Timberlakes Drive is a major access road into and through the park. Engineering work is needed to design road repairs due to soil erosion and creek bank erosion. The work will improve traffic flow and safety. | Hamilton County Park District | 1 | 91 to 180 days | \$35,000 |
| Hamilton | Reading Road Warehouse | Demolish existing warehouse and rebuild new building. | Cincinnati Public Schools | 97 | 181 days or more | \$15,000,000 |
| Hamilton | Iowa Maintenance Complex | Replaced needed maintenance to Iowa Administration/Maintenance/Warehouse complex. Issues not addressed due to budget cuts. Replace windows/HVAC. | Cincinnati Public Schools | 97 | 91 to 180 days | \$2,025,000 |
| Hamilton | Metal detectors (hand held) | Upgrade model needed in all Elementary schools. To increase search ability in elementary schools. | Cincinnati Public Schools | 18 | 0 to 30 days | \$11,375 |

So that we are submitting to investigate the feasibility of installing wind turbines and/or solar panels to generate electricity for various buildings owned by CMHA throughout Hamilton County. Install on demand hot water heaters in place of tank-type water heaters in 194 units at the Mariana Terrace Community School. This amounts to 50% of all utility cost associated with these water heaters. | First Prayer in Song Corp. Ministries | 511 | 181 days or more | \$2,932,569,600 |
| Hamilton | Feasibility Study - Wind Energy | Investigate the feasibility of installing wind turbines and/or solar panels to generate electricity for various buildings owned by CMHA throughout Hamilton County. | Cincinnati Metropolitan Housing Authority | 3 | 31 to 90 days | \$75,000 |
| Hamilton | On Demand Water Heaters | Install on demand hot water heaters in place of tank-type water heaters in 194 units at the Mariana Terrace Community School. This amounts to 50% of all utility cost associated with these water heaters. | Cincinnati Metropolitan Housing Authority | 6 | 91 to 180 days | \$400,000 |
| Hamilton | Autism Education Building | Build an education building to house the region's only alternative education program for elementary, middle and high school students with severe autism and intense behavior needs, who have been removed from their typical school systems. This successful program is operating in several renovated spaces now on the Stepping Stones campus. The new building would provide a central education facility, housing students and training teachers to use the successful methods in their classrooms. This will allow current space to be changed to meet the needs of students as part of their ongoing education program. The Project: Construct a 2000-sq-ft building with teaching, calming and observation rooms and administrative office. Construction includes a new septic system. Project will use green construction technology. Sharon Woods is a regional park that annually serves over 1 million visitors. This funding will support a DOT funded resurfacing of a parking lot at Sharon Woods golf course clubhouse and will accomplish the following improvements: new walk and curb, wheelchair ramps, widen parking lot, improve center curbing, relocate fire hydrant, relocate light pole, add top parking lot lights and landscaping. The work will improve traffic flow, safety and accessibility. | Stepping Stones Center for Handicapped | 32 | 31 to 90 days | \$400,000 |
| Hamilton | Sharon Woods Clubhouse Parking Lot Improvements | High schools. Needed to increase security in Cincinnati Public Schools high schools. | Hamilton County Park District | 2 | 91 to 180 days | \$46,000 |
| Hamilton | Metal Detectors (Walk through) | Inspect and perform lead abatement on multiple units owned by CMHA and built prior to 1978 that are located throughout Hamilton County. | Cincinnati Public Schools | 18 | 0 to 30 days | \$65,000 |
| Hamilton | Lead inspection and removal | Remove and replace damaged wall, driveways and sidewalks at various single family and multifamily units throughout Hamilton County. | Cincinnati Metropolitan Housing Authority | 40 | 31 to 90 days | \$1,200,000 |
| Hamilton | Retaining Walls, Driveways and Sidewalks | Perform kitchen and bath renovations on various scattered sites properties located throughout Hamilton County. | Cincinnati Metropolitan Housing Authority | 30 | 0 to 30 days | \$1,300,000 |
| Hamilton | Kitchen and Bath Rehabilitation | This expands the successful Step-Up education program for elementary, middle and high school students with severe autism and intense behavior needs. It is the only alternative education program for severe autism in Greater Cincinnati, and is a collaboration with 7 school districts, with more ready to join when the program expands. Expansion creates additional educational space in two locations. Project in Hamilton County. Construct a 900-sq-ft, two-story addition on an existing building, renovate interior of existing building including existing basement floor, existing flooring, walls, kitchen area, parking, utilities, sprinkler system, classrooms and observation rooms. In Clermont County, renovate existing space to create a second site with five classrooms, safety features, HVAC, utilities, acoustic walls, sensory-sensitive lighting. | Cincinnati Metropolitan Housing Authority | 30 | 31 to 90 days | \$1,600,000 |
| Hamilton | Step-Up Expansion | Rehabilitate the remaining bathrooms and kitchens at 25 unit at CMHA's Butler View family housing complex. | Stepping Stones Center for Handicapped | 32 | 0 to 30 days | \$225,000 |
| Hamilton | Kitchen and Bath Rehab | This project will focus on acquiring lighted homes in Target Areas of the State of Ohio specifically in the City of Cincinnati. These homes will be torn down and replaced with new single family homes built to Energy Star Specifications and attaining LEED Certification Status. These homes will be marketed towards first time, low income home buyers. The goal of the program will be to construct at least ten new homes therefore providing at least ten low income families home ownership that is not only energy efficient but also qualifies for the City of Cincinnati's 15 year property tax abatement for LEEDS Built Homes. This program will also help to improve the City's infrastructure and neighborhood appearance by removing old, neglected, unsafe properties and replacing them with new environmentally friendly homes in the Slaves Target Areas. Furthermore, every new home built creates new jobs and retains employment. From subcontractors, to laborers to material suppliers to manufacturers, new home construction has a trickle down effect on employment in various sectors. | Cincinnati Metropolitan Housing Authority | 24 | 0 to 30 days | \$415,000 |
| Hamilton | Green Dream Home | Replace existing windows with new weather tight windows at CMHA 15 story Marquette Manor high rise community. | BMF99, LLC dba JCB Homes | 60 | 31 to 90 days | \$1,000,000 |
| Hamilton | Window Replacement | Replace 24 tripled roofs at the end of their life span at various properties throughout Hamilton County. Public Developer Development: The developer will also improve the public environments, retail and multifamily residential apartments which are currently in design and "shovel ready". The project will include basic Leadership in Energy and Environmental Design (LEED) certification. The project will transform the region's footprint and the southern gateway to Ohio. This stimulus request increases the LEED certification level on this important economic development project to Platinum. \$9,271,672 Achieving a platinum certification is rare. We believe that this project will kick-start green building renovations and is a showcase for the state and the nation. To achieve the platinum level the following will be incorporated into the project: Green Roof: \$228,000 Grey Water System: \$900,000 Solar PV and solar thermal heating: \$1.8 million Energy Optimization: \$1.2 million Material Reuse/Increased Recycled Content-Certified wood: \$970,000 Air Quality: increased ventilation/low emitting wood products/Min 13 filtering system | Cincinnati Metropolitan Housing Authority | 8 | 91 to 180 days | \$860,000 |
| Hamilton | Roof Replacement | Replace old, worn out doors with newer, weather tight doors at several scattered sites locations throughout Hamilton County and CMHA's Beacon Glen community. | Cincinnati Metropolitan Housing Authority | 10 | 0 to 30 days | \$285,000 |
| Hamilton | Banks Riverfront Development LEED Certification | Contractor education program. Annual program runs 9 months. Provides business and technical training to support business development for day-to-day operations for a construction or related industry business. Primary targets are small, minority-owned and women-owned businesses. Pre and post evaluations are performed to determine learning needs and measure how much learning occurred. Helps businesses to become better partners and win more contracts. | Hamilton County Government | KUn/a | 31 to 90 days | \$9,721,672 |
| Hamilton | Patio Door Replacement | Replace drafty, inefficient, structurally deficient doors and windows on various rental units in neighborhoods throughout Hamilton County. | Cincinnati Metropolitan Housing Authority | 8 | 31 to 90 days | \$60,000 |
| Hamilton | ACI-Cincinnati Contractors Technical Support Center | The Cincinnati Public Schools began an assessment program approximately 5 years ago to monitor the progress students are making in meeting state standards at various benchmark points during the school year. To continue to monitor, this program needs to update its scanner. The scanner 5000 scanner needs to be replaced with the Scantron Navigator 150 scanner. This will cost approximately \$100,000. The additional \$60,000 will cover maintenance for 4 years. | Cincinnati Public Schools | 200 | 0 to 30 days | \$150,000 |
| Hamilton | Window and Door Replacement | Replace older, inefficient window air units with higher efficiency new units at the Princeton public housing high rise community. | Cincinnati Metropolitan Housing Authority | 30 | 0 to 30 days | \$1,900,000 |
| Hamilton | Benchmark Assessment Project | Help Children's Comprehensive Oral Health Program The Cincinnati Public Schools began an assessment program approximately 5 years ago to monitor the progress students are making in meeting state standards at various benchmark points during the school year. To continue to monitor, this program needs to update its scanner. The scanner 5000 scanner needs to be replaced with the Scantron Navigator 150 scanner. This will cost approximately \$100,000. The additional \$60,000 will cover maintenance for 4 years. | Cincinnati Public Schools | 5 | 91 to 180 days | \$152,961 |
| Hamilton | Replace Air Conditioning Units | Replace older, inefficient window air units with higher efficiency new units at the Princeton public housing high rise community. | Cincinnati Metropolitan Housing Authority | 12 | 31 to 90 days | \$120,000 |
| Hamilton | Help: Children's Comprehensive Oral Health Program | Help Children's Comprehensive Oral Health Program The Cincinnati Public Schools began an assessment program approximately 5 years ago to monitor the progress students are making in meeting state standards at various benchmark points during the school year. To continue to monitor, this program needs to update its scanner. The scanner 5000 scanner needs to be replaced with the Scantron Navigator 150 scanner. This will cost approximately \$100,000. The additional \$60,000 will cover maintenance for 4 years. | CincySmiles Foundation | 6 | 31 to 90 days | \$650,000 |
| Hamilton | Entry door replacement | Replace, bent, rusted and damaged doors with energy efficient steel doors in the Winton Terrace public housing community. | Cincinnati Metropolitan Housing Authority | 12 | 91 to 180 days | \$1,740,000 |
| Hamilton | Purchase Milk Coolers for Schools | Purchase 15 milk coolers for various schools. | Cincinnati Public Schools | 0 | 31 to 90 days | \$23,400 |
| Hamilton | Purchase Nutritional Analysis Software Program | This will allow accurate nutritional analysis of all food items served in Cincinnati Public Schools Lunchrooms. This data will replace the timely manual calculations necessary for students with diabetes, asthma and food allergies, etc. Central Parkway, as well as pedestrian improvements such as landscaped medians and bumpouts, as outlined in the 2002 Over-the-Rhine Comprehensive Plan. Funds will provide architectural & engineering fees, construction, construction administration, inspection, legal fees, and project management of the project. The intersection re-design project will provide clearer and safer movements for vehicles and shorter and safer pedestrian crossings. The improvements at Liberty and Central Parkway will be reduced to more accurately reflect the current and anticipated capacity. In addition to providing more pedestrian connection between the north and south sections of Over-the-Rhine, a significant amount of asphalt (from CMHA) will be converted to much-needed green space. The City has already spent approximately \$250,000 to construct the existing medians and bumpouts along Liberty from Main Street to Reading Road. | Cincinnati Public Schools | 0 | 31 to 90 days | \$4,430 |
| Hamilton | Liberty Street Traffic and Pedestrian Improvements | Install asphalt overlays on golf cart paths throughout the Park District's seven golf courses. The courses generate \$7.2 million in revenue annually. The overlays are necessary to provide safe conditions for golfers. | City of Cincinnati | 35 | 91 to 180 days | \$1,250,000 |
| Hamilton | Park District golf cart path overlays | Dental pain and infections have been the #1 barrier to employment for WWII, Vietnam and the Middle East war. It causes lost opportunities for employment and jeopardizes the employment of low wage earners. In 2007, more than 25,000 people in the Cincinnati DMA sought emergency dental care at local hospital emergency rooms through emergency staff physicians are not able to provide definitive dental care. Most of these are uninsured. Another 12,000 sought emergency dental care at community health centers regarding their ability to provide the routine primary oral care which they were established. We are working collaboratively with area hospital administrators, ER physicians, community health centers and local health departments to create a dental urgent care center that would relieve pain, resolve infections, and get people back to work. It will employ 20 staff members on an ongoing basis to assist potentially 4,000 patients annually to maintain or gain employment. This is a shovel-ready project. | Hamilton County Park District | 1 | 91 to 180 days | \$50,000 |
| Hamilton | Cincinnati Dental Urgent Care for Uninsured | Dental pain and infections have been the #1 barrier to employment for WWII, Vietnam and the Middle East war. It causes lost opportunities for employment and jeopardizes the employment of low wage earners. In 2007, more than 25,000 people in the Cincinnati DMA sought emergency dental care at local hospital emergency rooms through emergency staff physicians are not able to provide definitive dental care. Most of these are uninsured. Another 12,000 sought emergency dental care at community health centers regarding their ability to provide the routine primary oral care which they were established. We are working collaboratively with area hospital administrators, ER physicians, community health centers and local health departments to create a dental urgent care center that would relieve pain, resolve infections, and get people back to work. It will employ 20 staff members on an ongoing basis to assist potentially 4,000 patients annually to maintain or gain employment. This is a shovel-ready project. | CincySmiles Foundation | 1020 | 91 to 180 days | \$1,425,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Hamilton | HJS Landscaping | The money will be used to buy a new pickup truck to expand my landscaping business. The work will take place in Hamilton and Butler counties for the majority of a North College Hill, Ohio. I hope to hire another employee to help with the work. | HJS Landscaping | 1 | 31 to 90 days | \$30,000 |
| Hamilton | Dawson Road Reconstruction Project | Reconstruct 1 mile of concrete street including installation of concrete sidewalks to improve safety and the walkability of the neighborhood relative to the city's CBD. Dawson Road connects Kenwood Road and Miami Avenue and serves as a major east/west street through the center of the community. The street would be widened slightly and include bicycle paths. | City of Madeira, Ohio | 0 | 91 to 180 days | \$250,000 |
| Hamilton | Woodland Mound Sanitary Sewer | Woodland Mound is a regional park serving 383,000 visitors annually. This project will construct a sanitary sewer that will connect to a public sewer system to serve a golf course clubhouse, park lodge, and park maintenance facility. The sewer will replace two existing on-site sewer treatment systems. The improvements will create a system to meet the EPA's current and future environmental requirements and will provide a long term, cost effective solution to the park's sewage treatment. | Hamilton County Park District | 3 | 91 to 180 days | \$200,000 |
| Hamilton | Hillside Hall Renovation | Hillside Hall houses the gym, heated pool, and classrooms for Stepping Stones Center programs serving early childhood education programs and the region's only alternative education program for elementary, middle and high school students with autism and intense behavior needs. Also serves extended school year students through the summer. Project: Repair and renovate roof, skylights, gutters, downspouts, exterior siding and trim, including 6,000 square feet of structural roof decking, paint exterior. Repair interior floors, update restroom facilities for increased accessibility. This facility was built in 1976 and includes multiple angled roof sections from 10 to 20 years old. | Stepping Stones Center for Handicapped | 25 | 0 to 30 days | \$350,000 |
| Hamilton | Shawnee Lookout Pier Wall | This project will construct a pier wall project in Shawnee Lookout, a regional park annually serving 75,000 visitors. The pier wall supports an access road into the park, providing access to a nationally significant 2,000 year old earth mound structure, as well as access to park trails. The project includes a 640 linear foot drilled concrete pier wall designed to connect the hillside soil movement that has been impacting the park drive. | Hamilton County Park District | 3 | 31 to 90 days | \$280,000 |
| Hamilton | McMicken Health Collaborative | The McMicken Health Collaborative includes medical, dental and mental health care providers for Greater Cincinnati's homeless and hardest to serve low income populations. This collaborative has been developed to share resources, achieve economies of scale and co-locate health and human services agencies to provide more efficient and effective services. A homeless rehab center and a non-profit day labor organization are also considering joining the group should financial resources come available. By coordinating service delivery, we anticipate success in providing many of the homeless to get jobs and be productive members of society. The collaborative proposes to renovate a former brewery 43,000 square foot building to accommodate the services and serve as an anchor for redevelopment in Over-the-Rhine. Other funders include the City of Cincinnati and local foundations. | CincySmiles Foundation | 394 | 181 days or more | \$2,500,000 |
| Hamilton | MSD Green Projects | This is the installation of green storm water management controls at several new buildings. The project will aid in addressing the reduction and elimination of direct sewage discharge into our local waterways. It will also assist MSD in meeting some of the challenges of the state and federal regulators by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunity for sustainable redevelopment to revitalize our neighborhoods and supporting job growth/retention. The US Conference of Mayors estimates that every job created in rebuilding our water systems creates over 3 jobs elsewhere and over 10 jobs needed in infrastructure for the national economy. | Metropolitan Sewer District of Greater Cincinnati | 23 | 91 to 180 days | \$2,023,300 |
| Hamilton | Winton Woods Southshore Drive Curb Replacement | Replace 1,100 linear feet of concrete curb along Southshore Drive in Winton Woods park. Winton Woods is a regional park serving 3 million visitors annually. The curb replacement project will improve the safety and condition of the curb. | Hamilton County Park District | 1 | 91 to 180 days | \$35,000 |
| Hamilton | Winton Woods Possum Run Youth Camp | Winton Woods Possum Run Youth Camp is an overnight camp facility for Scouts and other youth groups. It is located in Winton Woods park with an annual visitation of 3.7 million people. The camp facility is in poor condition and needs the following improvement project: new ramping, new picnic table, new picnic shelter, the new leveled parking, accessibility improvements, signs. | Hamilton County Park District | 1 | 91 to 180 days | \$80,000 |
| Hamilton | Cleaning equipment | Purchase 67 pieces of custodial equipment. Most of these items are state of the art efficient cleaning equipment pieces that are not used throughout the district's 40 buildings. Some bulky needed items such as basic tool kit will be purchased from other departments as they are not available. | Cincinnati Public Schools | 0 | 31 to 90 days | \$126,020 |
| Hamilton | Hemphill Improvements | Rebuild residential roadways, Hemphill and Hemphill Way, both completely in a failed condition. | City of Deer Park | 25 | 91 to 180 days | \$575,000 |
| Hamilton | Electronic Dental Records at 5 Dental Centers | Implement Electronic Dental Records at five Health Department clinics, currently providing over 25,000 services per year. The sites: Elm St Health Center, West Smith Shoppe, Price Hill Health Center, Northside Health Center and Milvale Health Center. Estimated cost: \$200,000. A dental electronic record software system incorporating enhanced practice management capabilities, electronic charting, and digital X-rays and imaging must be purchased and installed. A few of the benefits would be: Enhanced scheduling services, will allow clinicians staff to schedule multiple appointments for a dentist based on the number of chairs available to the dentist. This will increase each dentist's productivity, improved billing procedures and less delays. Less time spent waiting and handling paper files, remove dentists productivity with digital x-rays. | Cincinnati Health Department | 4 | 31 to 90 days | \$600,000 |
| Hamilton | Winton Woods Harbor Parking Lot Repair | Repair parking lot paving at Winton Woods park parking lot. Winton Woods is a 2,500 acre regional park with 3.7 million visitors. The paving repairs will improve safety and accessibility of the park. | Hamilton County Park District | 1 | 91 to 180 days | \$20,000 |
| Hamilton | Electronic Medical Records at 6 Primary Care Cente | Center: Clement Health Center Price Hill Health Center, Blanton Carr Health Center Northside Health Center and Milvale Health Center (total patient visits of 165,000 annually and 100 employees). COST: \$800,000. The electronic medical record management system will consist of three components: office management, electronic clinical records (electronic medical records), and imaging. The office management component will include patient registration (integrated with the dental, lab, and pharmacy systems to exchange information), billing and collection, appointment scheduling, and appointment reminders. The clinical records area will include: sharing progress notes, informed consent forms, prescriptions, lab orders, lab results, immunization history, and other patient information. The imaging system will allow storage of both paper records and x-rays in digital format. The digital images will be stored in a PDR format. | Cincinnati Health Department | 3 | 31 to 90 days | \$800,000 |
| Hamilton | Hire Additional Custodians | Hire 19 additional custodians. This will allow the district to staff schools at the industry standard of 27,000 sq ft which is considered "Casual maintenance". It will allow districtally needed support to clean our schools. | Cincinnati Public Schools | 19 | 31 to 90 days | \$631,540 |
| Hamilton | Vehicle Replacement - 2 vehicles | Vehicle Replacement - for district planner and refrigeration technician. One vehicle is 14 years old the other is 13 years old. | Cincinnati Public Schools | 0 | 31 to 90 days | \$60,000 |
| Hamilton | Lunchroom Point of Sale Computer System | Replace 4 refrigerated trucks used to delivery food, supplies, testing data, science kits, and other misc items throughout the district. | Cincinnati Public Schools | 0 | 31 to 90 days | \$240,000 |
| Hamilton | HealthBridge-Hamilton County Public Health | This project would demonstrate enhanced disease prevention by providing richer and more efficient data for public health surveillance, while reducing both healthcare and public health costs. HealthBridge (Ohio's most advanced regional health information exchange) will facilitate sharing health data among healthcare providers, Hamilton County, and the Ohio Department of Health. The project would: 1) assess information exchanged among state/local public health and healthcare providers, including disease reports and other health indicators from providers as well as public health agencies generated by public health; 2) practice and implement the electronic exchange of data through HealthBridge and from health care providers, local, and state public health by leveraging national standards (e.g. N4N); 3) implement electronic reporting of state-mandated reportable diseases from HealthBridge into the Ohio Disease Reporting system to enable real-time response to public health problems; and 4) assist local hospitals with the transition to electronic disease reporting. | Hamilton County Public Health | 14 | 0 to 30 days | \$4,500,000 |
| Hamilton | Lunchroom Point of Sale Computer System | Point of Sale computer system will allow parents to prepay for food and meals at their child's elementary school throughout 46 CPS elementary schools. This one change can increase sales which in turn will translate to more labor needed. | Cincinnati Public Schools | 0 | 31 to 90 days | \$240,385 |
| Hamilton | Waldvogel Viaduct Replacement Project | For 100+ years and several as direct links between the west side of Cincinnati and the Central Business District, and between core manufacturing areas in the Over-the-Rhine neighborhood and intermodal (barge, rail, truck) freight facilities. The existing condition rating for the Waldvogel Viaduct is "Poor" (condition rating of 4) and it has been listed retrofitted to 40% of the legal load limit since 1993. The viaduct has one of the lowest bridge condition ratings in the region and it is likely that the viaduct will require further load reductions or closure unless replaced. This project will remove the severely deteriorated, functionally obsolete viaduct and replace it with a widened US 50 and four ramp structures to Eberon Avenue and Warsaw Avenue. Geometry, safety ratings, and lane widths will be improved on the new structures, and US 50 (Over-the-Rhine) will be improved by widening lanes, installation of turn lanes, and improved geometry. In addition, the project will expand regional economic development opportunities. | City of Cincinnati | 1500 | 181 days or more | \$15,500,000 |
| Hamilton | Accelerated Call Center Education Program | A simulated call center environment. This four-week day or evening program is designed to qualify graduates for high end of entry-level employment in the call-center industry. Upon graduation, our students are scheduled for Mock Interview with some of the over 60 plus call centers in the Greater Cincinnati Area. We then provide our students with job placement assistance with the companies along the mock interview or some of our other Employer Partners. Our current placement rate is 75%. What our employer partners are saying about us...Citi has identified the partnership with the Urban League for the dedication to the people they serve and the outstanding individuals who have recruited from the ACE program. This program is forward thinking and has provided real-life call center experiences for individuals who are seeking skills to be successful in this environment. Graduates of this program understand the call center environment and have proven to be very successful with our organization. Crystal Gibson | Urban League of Greater Cincinnati | 110 | 0 to 30 days | \$500,000 |
| Hamilton | Western Hills Viaduct and McMillan Avenue Hillside | This phase of the project includes the study and preliminary engineering of the Western Hills Viaduct and McMillan Avenue hillside. The Western Hills Viaduct is planned for rehabilitation or replacement in the same time frame as the construction of the Brent Spence Bridge and sections of I-75 north to the Viaduct. There are currently many significant safety concerns with both McMillan Avenue and with the deterioration of the viaduct. These facilities do not meet current safety or ADA standards. Unless plans are put in place to improve these facilities, the new interchange will be designed to function with the current connections. | City of Cincinnati | 100 | 0 to 30 days | \$10,000,000 |
| Hamilton | Armleder Off Leash Dog Park Parking Lot Expansion | The development of Armleder Park is a cooperative project between the City of Cincinnati and the Hamilton County Park District. An off-leash dog park was developed that is extremely popular. Additional asphalt parking is needed to serve the facility. | Hamilton County Park District | 1 | 31 to 90 days | \$65,000 |
| Hamilton | Liberty Street Traffic and Pedestrian Improvements | Central Parkway, as well as pedestrian improvements such as landscaped medians and bumpouts, as outlined in the 2002 Over-the-Rhine Comprehensive Plan. Funds will provide architecture & engineering fees, construction, construction administration, inspection, legal fees, and project management of the project. The intersection design projects will provide clearer and safer movements for vehicles and shorter and safer pedestrian crossings. The bumpouts at Liberty and Central Parkway will be reduced to more accurately reflect the current and anticipated capacity. In addition to providing a more pedestrian connection between the north and south sections of Over-the-Rhine, a significant amount of asphalt that only will be converted to much-needed green space. The City has already spent approximately \$200,000 to construct the existing medians and bumpouts along Liberty from Main Street to Reading Road. | City of Cincinnati | 35 | 91 to 180 days | \$1,250,000 |
| Hamilton | Warsaw Avenue Streetscape in East Price Hill (Phas | This project requests \$750,000 to construct Phase II of the East Price Hill Streetscape from McPherson to and including the intersection of St. Lawrence Avenue. The project will include new curbs, new sidewalks, new traffic signals and street lighting, new parking meter and sign posts, and other amenities such as bike racks, trash receptacles and benches. Construction documents for the project are nearly complete. Funds will provide construction, construction administration, inspection, legal fees, and project management of the project. Phase II of the project includes developing along McPherson, Warsaw and Enright adjacent to the new East Price Hill Krogger store, which was designed by the City and constructed by Krogger under a Construction agreement. The City has already contributed \$500,000 for architectural and engineering services for the entire project and construction of Phase I. | City of Cincinnati | 45 | 91 to 180 days | \$750,000 |
| Hamilton | Software for the City's Computerized Traffic Contr | The City's Computerized Traffic Control System (CTCS) is scheduled for a software/hardware upgrade in 2008. Cincinnati currently has 745 traffic signals, with approximately 85 percent interconnectivity and operating a variety of timing plans. Over half of the signalized intersections are controlled by a central system initially installed in the mid-1990s. This system is not as user friendly as newer systems throughout the country. Therefore, this system is planned for upgrade to the Transcon software and hardware in 2009. | City of Cincinnati | 10 | 0 to 30 days | \$1,000,000 |
| Hamilton | City Street Network Rehabilitation Program | The City's street network is in serious need of rehabilitation. This funding request of \$15 million would enable the City to grind and repave all streets currently rated to be in "poor", "very poor", and "substandard" condition in several disadvantaged neighborhoods. The work would include full depth repair of pavement failures where necessary, repair or replacement of existing curbs, and replacement of pavement markings. Cincinnati is a historic central city, and its aged infrastructure is due for significant targeted rehabilitation to protect and extend the life of our previous investment. By improving the condition of our street system, this funding will spur economic development in our city and region-wide, as well as improve quality of life for residents. | City of Cincinnati | 900 | 31 to 90 days | \$15,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Wooster Pike Revitalization Project | Restructure the traveling lanes of Wooster Pike/US 50 by creating three 12' lanes including a center lane for left turns, cut-de-ice 5' residential streets that come off of Wooster, eliminate several curb cuts along Wooster, relocate above-ground utility poles to one side of the street, install landscaping throughout the Wooster corridor, replace six antiquated traffic signals with modern smart sensors/signals, create water sidewalks and pedestrian crosswalks. This project is partially funded by federal CMAQ (Congestion Mitigation Air Quality) grant and those funds are available in July 2015. The project can begin construction at that time. | Village of Fairfax | 45 | 181 days or more | \$1,500,000 |
| Hamilton | Fairfax Residential Street Rehabilitation Project | Replace 7,500 linear feet of curb on 10 residential streets, partial depth repair to pavement; plane and repave the streets with 2" layer of asphalt concrete; apply SAMM (stress absorbing membrane). | Village of Fairfax | 25 | 31 to 90 days | \$1,000,000 |
| Hamilton | Ohio River Trail – Wilmer to Carrel | This project would construct a portion of the Ohio River Trail from Wilmer Avenue to Carrel Street. This segment will connect the trail to the park. Appropriately located area (an extremely popular recreational facility) and extend toward Downtown Cincinnati. Construction of this trail will enhance quality of life, increase mobility and recreational opportunities, and support economic development and tourism. | City of Cincinnati | 100 | 31 to 90 days | \$1,750,000 |
| Hamilton | Engineering, Plan Preparation and Construction of | grade heated pair cable from the 1990s will continue to be used for the communication network for the system. However, given the improvements in fiber optic cable and its ability to allow for other IT solutions (such as cameras), the Traffic Engineering Division would like to hire a contractor to perform Preliminary Engineering, Construction Documents and Construction Management for a new CTCS interconnection network in phases of existing fiber or a hybrid system to provide for the full utilization of the new software. | City of Cincinnati | 30 | 31 to 90 days | \$3,500,000 |
| Hamilton | Going Green | The engineering and plan design is estimated to cost \$500,000 and will employ engineers, technicians and clerical support personnel from consulting engineering firms. Construction Management and Installation could be performed in phases throughout the City, but is estimated to cost more than \$3,000,000. This effort would employ engineers, technicians, electrician/fiber optic specialists, and general construction craftsmen. | Straight 2 The Heart | 6 | 0 to 30 days | \$250,000 |
| Hamilton | Going Green | Program Goals: The primary goals of Straight 2 The Heart Programs are to increase individual achievement, promote a positive school culture, engage discipline for healthier lifestyles and productivity, support education regardless of age, gender, or religion, provide advocacy services, and additional resources for support. This program will provide students with environmental awareness. Students are engaged by looking at their surroundings from home, school, community, and city and how construction is effected. Acknowledging team building, coordinating, mentoring, walking activities for health awareness and field trips. Our expected outcomes is that students are aware of their environment and construction surroundings. They will learn energy efficiency is important for the economy. | Straight 2 The Heart | 6 | 0 to 30 days | \$250,000 |
| Hamilton | Hot Water Heaters | Program Goals: The primary goals of Straight 2 The Heart Programs are to increase individual achievement, promote a positive school culture, engage discipline for healthier lifestyles and productivity, support education regardless of age, gender, or religion, provide advocacy services, and additional resources for support. This program will provide students with environmental awareness. Students are engaged by looking at their surroundings from home, school, community, and city and how construction is effected. Acknowledging team building, coordinating, mentoring, walking activities for health awareness and field trips. Our expected outcomes is that students are aware of their environment and construction surroundings. They will learn energy efficiency is important for the economy. Producing clean and efficient Ohio | Cincinnati Metropolitan Housing Authority | 18 | 91 to 180 days | \$97,000 |
| Hamilton | Going Green | Replace the existing older, inefficient hot water heaters with new high efficiency furnaces at 194 units in CMAHA's Mariana Terrace community. Program Goals: The primary goals of Straight 2 The Heart Programs are to increase individual achievement, promote a positive school culture, engage discipline for healthier lifestyles and productivity, support education regardless of age, gender, or religion, provide advocacy services, and additional resources for support. This program will provide students with environmental awareness. Students are engaged by looking at their surroundings from home, school, community, and city and how construction is effected. Acknowledging team building, coordinating, mentoring, walking activities for health awareness and field trips. Our expected outcomes is that students are aware of their environment and construction surroundings. They will learn energy efficiency is important for the economy. | Straight 2 The Heart | 6 | 0 to 30 days | \$250,000 |
| Hamilton | Ohio River Trail – Wilmer to Carrel | This project would construct a portion of the Ohio River Trail from Wilmer Avenue to Carrel Street. This segment will connect the trail to the park. Appropriately located area (an extremely popular recreational facility) and extend toward Downtown Cincinnati. Construction of this trail will enhance quality of life, increase mobility and recreational opportunities, and support economic development and tourism. | City of Cincinnati | 100 | 31 to 90 days | \$1,750,000 |
| Hamilton | Engineering, Plan Preparation and Construction of | grade heated pair cable from the 1990s will continue to be used for the communication network for the system. However, given the improvements in fiber optic cable and its ability to allow for other IT solutions (such as cameras), the Traffic Engineering Division would like to hire a contractor to perform Preliminary Engineering, Construction Documents and Construction Management for a new CTCS interconnection network in phases of existing fiber or a hybrid system to provide for the full utilization of the new software. | City of Cincinnati | 30 | 31 to 90 days | \$3,500,000 |
| Hamilton | Industrial District Street Rehab Project | Repair roads and off-street parking areas and repair damaged curbs on Trade Street from Mariemont Avenue to Wooster Road and on Mariemont Avenue from East Terminal to Wooster Road. | Village of Mariemont | 15 | 91 to 180 days | \$195,000 |
| Hamilton | Replace Furnaces | Replace the existing older, inefficient furnaces with new high efficiency furnaces at 194 units in CMAHA's Mariana Terrace community, using multiple contractors, replace furnaces, boilers and domestic hot water heaters in numerous single and multi-unit units scattered in neighborhoods throughout Hamilton County. | Cincinnati Metropolitan Housing Authority | 18 | 91 to 180 days | \$190,000 |
| Hamilton | Furnace, Boiler & Hot Water Heater Replacement | Replace the existing older, inefficient furnaces with new high efficiency furnaces at 194 units in CMAHA's Mariana Terrace community, using multiple contractors, replace furnaces, boilers and domestic hot water heaters in numerous single and multi-unit units scattered in neighborhoods throughout Hamilton County. | Cincinnati Metropolitan Housing Authority | 18 | 0 to 30 days | \$650,000 |
| Hamilton | New phone system | Improve the phone system used by 300 employees to provide better service to our 15,000+ customers. The total project includes hardware such as phones, routers, & switches, software, development and implementation teams, call recording and an automated dialing system to provide customer messages to our customers. Upgrading CMAHA's old phone system will allow for more efficiency within our organization. | Cincinnati Metropolitan Housing Authority | 5 | 31 to 90 days | \$200,000 |
| Hamilton | Financial Literacy & Health Awareness | The primary goals of straight 2 the heart programs are to increase individual achievement, promote a positive school culture, engage discipline for healthier lifestyles and productivity, support education regardless of age, gender, or religion, provide advocacy services, and additional resources for support. Academic Skills Development. This is a strengthening families initiative with Parent involvement, community engagement and management activities to help the community educated and connected. Adults and youth learn how to budget, spend wisely, healthy, save and spend and income with sustained income. While searching for additional income. Alignment With Ohio Academic Standards: Improved academic, school performance, improve learning environment, application of knowledge, and improve communication, exceeding expectations, Career Exploration & Sustainability to Sustain employment Increase income by promotions, increase employment opportunities, Tutoring, counseling & Mentoring to raise the bar of eligible opportunities within their expertise. Straight 2 The Heart will consider to hire the unemployed participants to help achieve the employment gap of jobs eliminated due to economy. | Straight 2 The Heart | 20 | 0 to 30 days | \$1,000,000 |
| Hamilton | Oil and Energy Expansion | These funds will allow the purchase of a large lathe and mill to support Faxon's expansion in the oil and energy business. These two pieces of equipment will provide approximately 10 jobs paying \$31,000 to \$50,000 dollars per year. | Faxon Machining Inc | 10 | 0 to 30 days | \$455,000 |
| Hamilton | Conversion of Shaker Stable to a Visitor's Center | Economic Stimulus funds will enable the FFWV to open this historic site to the public as educational and cultural resources in SW Ohio. White Water Shaker Village includes 11 historic Shaker buildings on 8 acres in one of the only intact Shaker villages in Ohio. The project will focus on the conversion of the historic Shaker stable to a visitor's center (including handicapped restrooms, gift shop, and AV room), paving of parking lot and access drive, laying of side walks, fencing and gates, utility services, landscaping, and other items necessary to satisfy County Zoning requirements. A review of the zoning, building code, county regulatory and utility requirements has been conducted by Theodore Johnson AIA, and architect for the FFWV on this project. The project can start in three months, allowing 4-5 weeks for drawings, 2-3 weeks to bid and 2-3 weeks for permits. Preliminary plans and detailed cost estimates have been completed. The cost of the project totals \$415,168. Project funding will flow quickly into the local economy because conversion of the stable to a visitor's center is an essentially building construction involving all of the building trades. | Friends of White Water Shaker Village, Inc. | 50 | 31 to 90 days | \$415,368 |
| Hamilton | GROUP HOME | THIS IS GOING TO TAKE RESIDENTS OUT OF A COMMERCIAL NURSING HOME SETTING AND RELOCATE THEM IN A LOCAL RESIDENTIAL HOME BASED ENVIRONMENT WHERE DWELLERS WILL RECEIVE ACQUITE DETAILED WELL AS ONE ON ONE HEART FELT EMOTIONAL AND PSYCHOLOGICAL CARE AND MADE TO FEEL A PART OF SOMETHING SPECIAL-ALSO DAILY OUTINGS WITH ACTIVITIES AMONG LIVING FAMILY ORIENTED STAFF. | THESE OL' HANDS HEALTHCARE FACILITIES | 6 | 31 to 90 days | \$200,000 |
| Hamilton | Replicable Workforce Development Solution | THIS IDEA HAS ALWAYS BEEN A THOUGHT OF MINE, HELPING THE ELDERLY AND DISABLED FULFILL MY VISION. IF THIS VISION SHOULD COME TRUE, IT WILL ENABLE ME TO ASSIST THOSE IN NEED, MY DREAM OF NURSING IS FULFILLED!! With over 3.1 million dollars in investments and over 200 years of combined experience, we have developed a system that delivers a proven "10-point" plan to remedy workforce and economic development challenges. Additionally, our solution provides individuals with well-based portfolio development, helps place their career aspirations with employer's skills demands, educational curriculum, and long-term objectives of each region. For a cost of less than \$2,500 per individual, we deliver a solution that integrates all aspects of job training and professional development into a comprehensive package that is markedly stronger and more cost-effective than anything else on the market. Based on this system, we can have qualified workers in desired fields (e.g., Clean Technology) in as little as one year from the start of the project. We will also help individuals find jobs through our professional placement services, provide continued support after placement, and monitor their continued success. This replicable solution will become self-sustained after three years, and will positively impact thousands of jobs in our local region and across the nation. | DigiLore, Inc. | 10,000 | 0 to 30 days | \$1,250,000 |
| Hamilton | Use my skills and experience to put people to work | provide independent families and individuals with a central facility with their immediate needs, food, temporary shelter, clothing, counseling, direction and information, groups such as NA and AA. Also, job skills, interview skills, subsidized transportation to interviews, Addressing child care. Care for the elderly and disabled. Get the local and state government, business community at large, students/scholar's excited about donating their time, knowledge, and skills to get people working. | AMERICA BACK TO WORK | 1000 | 91 to 180 days | \$750,000 |
| Hamilton | Enterprise Management | I have incorporated as Atta2d, LLC in the state of Ohio. The intended purpose of Atta2d is to design software for use within DuD. Although I have presented software to the Air Force at Wright Patterson AFB and Langley AFB and been met with rave reviews, I have not found a path to patented funds to purchase. The software has a DOD niche and we have an AFMAY approved reseller. With no the cost of building a small business that could hire catering to DOD niche needs. We also have emergency notification software for large enterprises that draws anything I can find on the market. I believe once established, we can grow more jobs locally for local small businesses that they could not possibly afford who a company with local interest that has established success. Thanks, Steve Kalne | Atta2d | 10 | 181 days or more | \$140,000 |
| Hamilton | sugar n spice rebirth project | We will be employing 50 people who are economically needy to provide food service for the local region. We are creating a mobile food service operation that will feed the community's special events in order to help generate interest in a resurgent neighborhood. If the prototype works, we are interested in duplicating this model. The goal is to create an opportunity for underemployed members of the community who might learn how to give a business and manage their own district. This is a "for profit" project which teaches entrepreneurial skills. | sugar n spice | 50 | 91 to 180 days | \$100,000 |
| Hamilton | Home Health Aide | Home Health Aide, 2 credit hour, 40-contact hour course. This course provides appropriate training to individuals to allow them to properly care for people in their homes who require home health aide assistance. Successful completion of the course allows participants to care for relatives and receive payment from the Respite/ESP program. The requested stimulus funding will provide tuition to interested students and marketing of the program. | Workforce Development Center - Cincinnati State Te | 100 | 91 to 180 days | \$75,000 |
| Hamilton | Geriatric Activities Coordinator | Senior Activities Coordinator Certificate, 10 credit hour/90-contact hour course. The course enables individuals to work in nursing homes and assisted living facilities to conduct a variety of diversion activities for clients in those settings. According to the legal requirements, these facilities are required to employ someone with these credentials. The requested funds will certify additional instructors to NCCAP (National Certification Council for Activities Professionals), assist the initial development of this certificate, and provide the funds for student tuition. | Workforce Development Center - Cincinnati State Te | 100 | 91 to 180 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Asceptic Practices Training | Research has proven that personnel is one of the main sources of potential contamination throughout the healthcare field. Asceptic 101 - Special request must be given to hygienic behavior of personnel (infectious diseases, open wounds, regular health check-ups). In addition, other related training includes the proper use of protective gear, and change of garments and gloves. The training module is customized to healthcare organizations in the concepts of contamination, microbiology, and asepsis, especially as it relates to the systems associated with a company's manufacturing and handling of sterile products. Asceptic 201 - This advanced module is an orientation intended to provide appropriate training to clean room employees for their education and techniques to carry out their duties in the health care organization. | Workforce Deceopment Center - Cincinnati State Te | 100 | 31 to 90 days | \$200,000 |
| Hamilton | Connect2Success and Employment | According to census data, 24.5 % of Hamilton County residents ages 18 to 25 lack a high school diploma. Recognizing the significant economic and societal costs that dropout place on society, more than 25 Hamilton County organizations have come together to implement a comprehensive approach to re-engaging these young people in education and employment. Connect2Success helps participants earn a high school or GED diploma, gain job readiness skills, secure connections to apprenticeships, training, or post-secondary connections, and secure a range of services customized to address barriers. This proposal would expand the available services by providing support to remove barriers and employment support including residential training and job search leading to certificates or jobs with identified need for employment, using accurate certificates that are state and industry recognized. Most certificates can be completed in three to six months. Through this proposal, 400 participants would gain skills that make them job ready in high growth fields including health care and supported until they gain employment. They will be supported and tracked for a minimum of 6 months after gaining employment. | Cincinnati State Technical and Community College | 400 | 0 to 30 days | \$250,000 |
| Hamilton | Harrison Fire Station Modifications | This proposal is for the renovation of an existing fire station. The new station would modify current living quarters, provide vehicle exhaust extraction, and provided necessary living arrangements to allow for an increase in staffing of on duty personnel to meet service demands. Furthermore, it would create additional space for necessary training facilities, and physical fitness facility. Roxx provides a clean, fun place for young people to gather and play games and drink coffee. In order to accommodate the Spring/Summer rush period, as well as insure that our business continues, Roxx is requesting in \$50,000 in stimulus money for the following: \$10,000 for capital improvement to the outside, including a wide awning for shelter, and outside seating for customers, \$5,000 to pay down credit card debts and other bills which have crept up on us. | Harrison Fire Department, City of Harrison | 12 | 91 to 180 days | \$500,000 |
| Hamilton | Roxx Expansion Program | \$15,000 to employ either a single morning barista (coffee server) full time OR two part time baristas. We would offer higher than minimum wage, as well as a small insurance package. The Roxx management team is not asking for money to pay ourselves. As business owners, our payment comes only when it becomes successful. Instead, we are asking for assets which will have a direct effect on making our business thrive, and will offer at least one or two people the opportunity to work here for pay, who otherwise might not be able to find a job elsewhere. America thrives on small business, and even in this economy, we are nearly making it. Some help from the stimulus package will ensure our survival. This product can be made in any color, even black. This product significantly reduces pavement temperatures thereby providing for an overall reduction of the heat island effect. This product also extends the lifecycle of an asphalt parking or roadway surface, and is considered a sustainability practice. Jobs will be created in the development phase of the project as well as the sale, manufacturing, distribution and sale of it. | Roxx Coffeehouse and Games | 1 | 31 to 90 days | \$30,000 |
| Hamilton | Sunshield | This project entails the development of a pavement preservation coating which reflects 30% or more of solar energy in the form of ultra violet and infrared light. This product can be made in any color, even black. This product significantly reduces pavement temperatures thereby providing for an overall reduction of the heat island effect. This product also extends the lifecycle of an asphalt parking or roadway surface, and is considered a sustainability practice. Jobs will be created in the development phase of the project as well as the sale, manufacturing, distribution and sale of it. | Neyra Industries Inc. | 65 | 0 to 30 days | \$150,000 |
| Hamilton | Video Equipment Replacement and Connectivity Proje | This project would replace existing video equipment in the council/trustee meeting rooms at the City of Forest Park, Village of North Hills, and Springfield Township, and create a video pathway to a second cable provider. | Community Programming Board of Forest Park, Greenh | 4 | 31 to 90 days | \$125,000 |
| Hamilton | Township Elevated Water Storage Tank - Constructi | The expected outcome: residents will be able to continue to participate in their local government and stay informed of meeting council/trustee and other government meetings on cable and the web and expand the number of people able to watch the meetings on cable. A new 0.5 million gallon elevated water storage tank will be constructed in Hamilton County, Harrison Township. This tank will replace two existing standpipes and an underground and do not provide surface protection for the flows in the Harrison Township. The new tank will be 33 ft higher than that of the standpipes. The new tank will enable the City of Harrison to handle up to 35 psi of pressure throughout the Township Pressure Zone, provide fire flows throughout the Township Pressure Zone, and supply peak water demand at sufficient pressures throughout Harrison Township. | City of Harrison, Ohio | 200 | 0 to 30 days | \$1,524,000 |
| Hamilton | Oracle | Oracle Support Oracle Sourcing Oracle Procurement Contracts | Cincinnati Public Schools | 5 | 31 to 90 days | \$200,000 |
| Hamilton | Alternative Dimensions Dispute Resolutions LLC | Is a large amount of suspensions, expulsions, and deviant behavior within the schools. It is also having a negative effect within the community/households. Improve the school climate. Individuals learn how to relate to each other. Fosters positive student/teacher and student/student relationships. Creates a productive work environment and allows teachers to focus on curriculum. Reduces school violence, vandalism, chronic school absence and suspensions/expulsions. Helps students and teachers deepen their understanding of themselves and others while developing important life skills. Encourages community activity. Students become more responsible which allows adults and teachers to focus on teaching rather than disciplinary actions. Alternative that is more effective than detention, suspensions and expulsions. Empowers/promotes better communication skills. Increases skills in critical thinking, learning, and problem solving, which are all basic to learning. | Alternative Dimensions Dispute Resolutions LLC | 2 | 181 days or more | \$60,000 |
| Hamilton | Project Staying Afloat | My project to help keep my company afloat. With limited funds available I have had to put most of my projects on hold. I am still in need for critical equipment to run my business. I also have had to put jobs on hold because I am not able to pay employees to work, due to spending all available funds just to maintain. If funds are received, I believe I will be able to bring in new employees to help with daily operation. I generally give jobs to those in the food industry with records and am unemployable to most large companies. The money will not cover the rent and my company but the people in the community who look forward to having job availabilities. | Edible Dreams LLC. | 20 | 31 to 90 days | \$30,000 |
| Hamilton | Graduation Follow Up | Helping five college graduates with education degrees support Cincinnati Public School graduates by tracking their progress that freshman year. This will be accomplished by assisting the students in scheduling, writing papers, completing projects etc. The student and mentor would communicate through email or whatever is convenient. My goal is to give these hard working graduates the means necessary to be successful in life with a meaningful education. | Cincinnati Public Schools (not currently employed) | 25 | 31 to 90 days | \$5,000,000 |
| Hamilton | Vacant Buildings | We clean out, partially renovate, and do the up-keep of vacant, foreclosed, and bank owned properties in Cincinnati. Capital needed to expand area of business in order to hire more people and purchase proper equipment. | A & C Properties | 100 | 0 to 30 days | \$50,000 |
| Hamilton | gateway development | Acquire commercial real estate in employment based community and develop into multi-use facility using renewable energy technology, LEED certified architects, contractors and employ local residents in community, this would produce an example or statement about utilizing your natural resources to produce an affordable and positive result that empowers the community. | gateway development corporation of cincinnati | 50 | 31 to 90 days | \$2,500,000 |
| Hamilton | automotive air filtration new product development | Development of new product manufacturing and marketing. Ohio job creation and fiber that is eco friendly-- new high and proprietary reusable filtration media using nano technologies designed to improve filtration and airflow-- improves fuel economy, reduces emit jobs -- reusable self-cleaning filter media keeps millions of disposable filters out of landfills. Sales quantities projections 50 million-- projected Ohio jobs created 1200 -- Exote LLC. | exotx LLC | 1200 | 0 to 30 days | \$1,500,000 |
| Hamilton | expand existing haircare services | Create, train and staff 6 needed positions at new hair service company. expand floor plan by utilizing all sq ft of business, upgrade utilities with renewable energy production/components, increase advertisement and decrease overhead cost, taxes, utilities and lease. In turn operation cost decrease, services and demands increase producing positive cash flow/profit and healthier work environment for clients and staff. | professional accommodations hair salon LLC | 6 | 31 to 90 days | \$300,000 |
| Hamilton | TII Fund Raiser/Consciousness Raiser | to change a very common negative view about autism (inappropriate, unorganized, or socially inept) to one that is more respectful and inclusive. The outcome would be a raise event that attracts old and new supporters of services for individuals with Intellectual and Developmental Disabilities (IDD) in the Cincinnati area. Education about the abilities and the needs of persons with IDD will be highlighted. Dollars raised would support the needs that are not funded or under-funded by government or other personal financial resources. Stimulus funds would help pay salary and benefits of at least two part time staff and also related cost to actively develop and paying the specific event staff. If successful, which is anticipated with proper planning and implementation (we have prior experience), the event could be repeated annually and sustained by its respective organizations because the value would have been tested and proven. Although the event will have expenses, in-kind contributions and volunteers will be solicited. It is anticipated that up to \$20,000 (cash) could be raised the first year. | Toward Independence, Inc. | 3 | 31 to 90 days | \$9,000 |
| Hamilton | TII Transportation Update | Toward Independence, Inc. (TII) transportation update. Objective: To have a handicapped accessible van for use with consumers with intellectual and other developmental disabilities. (IDD) have a need for specially equipped transportation. Also, to replace two other vehicles with high mileage and high maintenance costs related to age and wear. TII provides up to daily transportation for individuals with IDD and who receive other residential and community services from our agency. Transportation is provided for medical, shopping, recreation and leisure outings, to and from work, church and other community destinations. Consumers with IDD do not drive and most, respectively, cannot learn to use public transportation and/or it is not readily available. Funding for vehicles is very limited from governmental resources, at best covering cost of gas and minor maintenance. | Toward Independence, Inc. | 3 | 31 to 90 days | \$80,000 |
| Hamilton | Keeping the lights on | Team in urgent need to replace my reserves and establish new marketing efforts outside of the Midwestern states. We have just recently made changes to pursue marketing efforts elsewhere and to employ new personnel to make this happen. I would like to access short term funds from the government to help me in my efforts to keep my company afloat through these troubled times. I am asking for a grant, low interest loan, subsidy, or even a line of credit in the amount of \$125,000.00 to be used for help with normal operating cost, marketing, and retaining and addition of personnel staff. I estimated this number based on our monthly budget of \$5,000 a month times 24 months. These funds would help cover our increase in hourly employment of new marketing personnel and help with the increase in marketing budget. I am allocating 24,000 salaries for each of the marketing personnel. I have allocated \$32,000 to our marketing budget consists of advertising, national email campaigns, marketing materials, and presentations. The remaining \$41,000 would be used in accordance with our loan, change to help sustain us through the next year and a half. We are actively pursuing loans across all states. I am and send donors have created free damage and disaster in common areas of the neighborhood. This respectively asks for \$10,000.00 in stimulus funds to help with a clean up. This would help neighborhood beautification, home values, and safety. | Huff McDermott CRES | 5 | 0 to 30 days | \$125,000 |
| Hamilton | Common Area Beautification | Approximately 9,500 feet of new 12-inch water main will be constructed on New Haven Road and approximately 9,500 feet of new 12-inch water main will be constructed on Baughman Road in the City of Harrison, Harrison Township, and Crosby Township in Hamilton County. The project will extend City water service to residential and commercial properties in these areas, enabling them to abandon existing septic systems. The project will also provide fire flows to protect residents in these areas and improve the overall performance of the City's water distribution system by creating additional loops within the system. | Clabrone Neighborhood Organization | 5 | 31 to 90 days | \$10,000 |
| Hamilton | New Haven Rd/Baughman Rd Water Main - Construction | Approximately 9,500 feet of new 12-inch water main will be constructed on New Haven Road and approximately 9,500 feet of new 12-inch water main will be constructed on Baughman Road in the City of Harrison, Harrison Township, and Crosby Township in Hamilton County. The project will extend City water service to residential and commercial properties in these areas, enabling them to abandon existing septic systems, provide fire flows to protect residents in these areas, and improve the overall performance of the City's water distribution system by creating additional loops within the system. | City of Harrison, Ohio | 400 | 31 to 90 days | \$2,900,000 |
| Hamilton | New Haven Rd/Baughman Rd Water Main - Design | Approximately 9,500 feet of new 12-inch water main will be designed for New Haven Road and approximately 9,500 feet of new 12-inch water main will be designed for Baughman Road in the City of Harrison, Harrison Township, and Crosby Township in Hamilton County. The design intent is to extend City water service to these areas so that residential and commercial properties can abandon existing septic systems, provide fire flows to protect residents in these areas, and improve the overall performance of the City's water distribution system by creating additional loops within the system. | City of Harrison, Ohio | 0 | 0 to 30 days | \$125,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|----------------------------------|----------------|--------------------|---------------------------|
| Hamilton | Treetops Neighborhood Beautification Project | Creating jobs and maintaining the values of our homes is essential. The requested stimulus \$'s would be used to employ 10 deserving high school students for the summer in a neighborhood beautification project. This would include: 1) Installation of landscaping, lighting, 2) improvement of the current stone structure and 3) maintenance of project over the summer and fall. In addition to the 10 summer jobs, the project will help maintain home values and improve the current aesthetics of the neighborhood. | Treetops Homeowner's Association | 10 | 31 to 90 days | \$10,000 |
| Hamilton | Township Elevated Water Storage Tank - Constructio | A new 0.5 million gallon elevated water storage tank will be constructed in Hamilton County, Hamilton Township to replace two existing standpipes that are undersized. The overflow elevation of the new tank will be 33 feet higher than that of the standpipes. The new tank will enable the City to provide >35 psi of pressure throughout the Township Pressure Zone, provide fire flows throughout the Township Pressure Zone, and supply peak water demand at sufficient pressure throughout Hamilton Township. | City of Harrison, Ohio | 200 | 0 to 30 days | \$1,524,000 |
| Hamilton | Chatsworth & Warren Sanitary Sewer | 1300 LF of sanitary sewer to allow elimination of 13 HSTS in low income area. | Village of Woodlawn | 15 | 0 to 30 days | \$392,000 |
| Hamilton | Electronic Medical Record Implementation for Beech | Implementation of electronic medical billing and patient management software with the following outcomes: *Increase direct service utilization for clients from 50% (current) to 70% (future) *More secure management of PHI data, HIPAA compliance *Decrease medical billing/management error rates *Implementation of e-prescribing *Transition of employees from low value work to higher value work (from data entry to utilization review and claim resolution) *Increased transmission rate of electronic claims *Streamline client management through single share database *HIPAA compliant electronic transmission (Portability of PHI) *Increased parental access to child mental health record | Beech Acres Parenting Center | 17 | 0 to 30 days | \$395,000 |
| Hamilton | Crest Hills Class I Dam Replacement | Replacement of ODNCR Class I Dam that has been deemed to be of insufficient design based on current ODNCR criteria. | Amberley Village | 25 | 0 to 30 days | \$1,200,000 |
| Hamilton | Village Storm Drainage Improvements | Various storm drainage improvements throughout Village. | Amberley Village | 10 | 0 to 30 days | \$250,000 |
| Hamilton | Crest Hills Stream Restoration Project | Restoration of stream to natural riparian corridor conditions utilizing native species Employing roughly 50 people and has annual revenues of \$7,000,000.00. Currently SpringDot is the 10th largest printing company in the Cincinnati area. (Based on Cincinnati Business Courier Feb. 08) | Amberley Village | 10 | 0 to 30 days | \$650,000 |
| Hamilton | SpringDot ReFinance Plan to Retain Jobs | To support growth of the business, at the end of 2008 SpringDot purchased a new commercial printing press at a cost of 2.2 Million dollars at rate of 7% over 8 years. When the economy went down SpringDot had to lay off 5% of its workforce and is looking at more layoffs and other reductions of the business to stabilize the business in the time of smaller margins and increased competition. If SpringDot could use the stimulus bill to refinance our debt on the press at a interest rate of 4% it would save SpringDot \$100,000 in principle over the term of the loan. These funds could be used to save another 12 jobs as well as give SpringDot the ability to keep growing and hiring. The funds would flow to hire more people and invest in continuing its mission to grow the business. | SpringDot | 12 | 0 to 30 days | \$2,200,000 |
| Hamilton | Amberley Village Storm Sewer Replacement | Replace 700' of deteriorating 48" CMP storm sewer | Amberley Village | 10 | 0 to 30 days | \$400,000 |
| Hamilton | Montgomery Road sidewalk construction Radabaugh to | The project would construct a sidewalk along the east side of US 223 (Montgomery Road) directly north of the major regional hospital (Bethesda North), other medical offices and two retail centers. The physical connectors of sidewalks would provide pedestrian travel to and from the hospital and retail and shopping areas just north of the northern terminus of the project at Walker Road. The project would also construct a sidewalk along the route of a mass transit line that is frequently utilized by both hospital staff and patients. The City of Montgomery would consider and accept partial funding through 100% funding was listed in this application request. | City of Montgomery | 15 | 181 days or more | \$310,000 |
| Hamilton | City of Springdale - Chamberlain Park Gabion Wall Repair | City of Springdale - Chamberlain Park Gabion Wall Repair | City of Springdale | 25 | 0 to 30 days | \$200,000 |
| Hamilton | Wright Farm Regional Detention/Water Quality Basin | Installation of 1st stage detention / water quality basin, including an on-site bio-engineered green retaining wall, and off-site installation of J-Hook Weirs and riffles as part of CEPA agreed upon mitigation. Design Completed. CEPA #01408485 | City of Forest Park | 15 | 0 to 30 days | \$150,000 |
| Hamilton | Sequels Consignment & Boutique Expansion | Expansion of a local retail consignment and boutique offering the public a way to sell items to make money as well as buy nice clothing and home decor at greatly reduced prices. Currently one location exists. The need is for the business to expand to 7 locations around the city of Cincinnati. This will offer a needed service to the entire city area, enable the public to make money through consignment of their goods (clothing) and stimulate spending through the goods being sold for reduced affordable prices. 7 locations will create approximately 50 jobs in the local market. | Buy Fix Sell Co | 50 | 31 to 90 days | \$250,000 |
| Hamilton | Wind Farm Health Monitoring System | Real time Monitoring and defect detection of wind farm machinery components Create a network of wireless test systems that monitor bridges all over the state and provide early warning for changing and deteriorating conditions. | Signalysis, Inc. | 50 | 0 to 30 days | \$75,000 |
| Hamilton | Bridge Monitoring System | DESCRIPTION: Benchmarking program of large non-profit buildings, including hospitals and colleges; perhaps in conjunction with UC; seek match with competitive Energy Block Grant monies. EXPECTED OUTCOMES: - comprehensive program to save non-profits money while increasing sustainability and useful life of their building | Signalysis, Inc. | 75 | 0 to 30 days | \$100,000 |
| Hamilton | Benchmarking Program – Large Non-profits | DESCRIPTION: Benchmarking program of large non-profit buildings, including hospitals and colleges; perhaps in conjunction with UC; seek match with competitive Energy Block Grant monies. EXPECTED OUTCOMES: - comprehensive program to save non-profits money while increasing sustainability and useful life of their building | Cincinnati Energy Alliance | 10.4 | 0 to 30 days | \$200,000 |
| Hamilton | Energy Efficiency Retrofit Financing – Large Comme | DESCRIPTION: Gap financing to fund audits, and provide other technical expertise to retrofit large commercial and industrial buildings; seek matching funds from Duke Energy & customer cost-share. EXPECTED OUTCOMES: - a one-stop shop to perform full scale of energy efficiency retrofit services to end consumer, including the provision of financing solutions - can be aggregated with Duke Energy's rebates through their Save-a-watt to create affordable solutions and leverage stimulus funding | Cincinnati Energy Alliance | 10.4 | 0 to 30 days | \$200,000 |
| Hamilton | Cincinnati State Workforce Development | DESCRIPTION: Cincinnati State for Workforce Development efforts; seek match from competitive Energy Block Grant monies & Duke Energy EXPECTED OUTCOMES: - structure job training programs to support increased work in providing energy efficiency services, leveraging Cincinnati State's dynamic academic environment, to become a leader statewide and across the country | Cincinnati Energy Alliance | 10 | 0 to 30 days | \$200,000 |
| Hamilton | Energy Efficiency Retrofit Financing – Non-profits | DESCRIPTION: Gap financing and subsidies to write down interest rates and co-fund energy audits for Non-profit organizations in the City. EXPECTED OUTCOMES: - a one-stop shop to perform full scale of energy efficiency retrofit services to end consumer, including the provision of financing solutions - can be aggregated with Duke Energy's rebates through their Save-a-watt to create affordable solutions and leverage stimulus funding | Cincinnati Energy Alliance | 20.8 | 0 to 30 days | \$400,000 |
| Hamilton | Energy Efficiency Retrofit Financing – Residential | DESCRIPTION: Gap financing and subsidies to write down interest rates on a financing program for small residential and commercial customers. EXPECTED OUTCOMES: - a one-stop shop to perform full scale of energy efficiency retrofit services to end consumer, including the provision of financing solutions - can be aggregated with Duke Energy's rebates through their Save-a-watt to create affordable solutions and leverage stimulus funding | Cincinnati Energy Alliance | 20.8 | 0 to 30 days | \$400,000 |
| Hamilton | Organizational & Administrative Support | DESCRIPTION: Organizational support for the Cincinnati Energy Alliance (CEA), a partnership with the City of Cincinnati, Greater Cincinnati Foundation, and Duke Energy Foundation. CEA is a non-profit organization designed to lead the local effort to reduce the carbon footprint and promote the use of energy-efficient technologies through retrofitting buildings. CEA will achieve these goals through the funding, completion, and certification of projects and intends to reach a significant percentage of the building stock by creating customized solutions that work for residential, retail, small and large commercial buildings, and everything in between. EXPECTED OUTCOMES: - build a scalable model that can be applied throughout the state - create infrastructure of a nonprofit business model designed to leverage stimulus funding through involving loan funds and in aggregate with private sources, i.e. Duke Energy rebates, bank loans - "This work is 'lead ready'." The technology exists today, there's a stated demand from consumers, and there are local companies that provide the needed services, plus stimulus funding can be used quickly and effectively. | Cincinnati Energy Alliance | 8 | 0 to 30 days | \$350,000 |
| Hamilton | Energy Efficient Lighting | In order to be more environmentally friendly and reduce costs, Talbert House would like to replace existing T12 fluorescent bulbs and ballasts with energy efficient T8 bulbs and ballasts in the City of Hamilton County facilities. It is estimated that this change will result in the use of about a third of the electricity and produce more light. | Talbert House | 0 | 91 to 180 days | \$70,000 |
| Hamilton | Computer Support | The funding will support the replacement of 100 aging sets of computers (Wynne terminal, monitor, keyboard and mouse) at \$480.00 per set for a total cost of \$50,387. These computers will be more energy efficient and reliable for the delivery of behavioral health services. | Talbert House | 0 | 31 to 90 days | \$50,367 |
| Hamilton | Myres Educational Expenditure | The project is designed to eliminate the final debt resulting from higher education within the Myres organization, and to eliminate all interest and provide interest. Funding will provide the means for 7 Ohio citizens to maintain a standard middle income lifestyle in Hamilton county, all while providing protection and wage garnishment's Saly Mata. | Myres Educational Expenditure | 7 | 0 to 30 days | \$20,000 |
| Hamilton | Hamilton County Park District hybrid vehicle purch | The Park District has issued a program of phasing out inefficient vehicles and replacing them with hybrid cars and SUV's. This funding would enable the Park District to purchase five additional hybrid vehicles, increasing the fuel savings for the Park District and county taxpayers. | Hamilton County Park District | 5 | 31 to 90 days | \$125,000 |
| Hamilton | Heat Efficiency | Replace two 50-year old boilers in an office building that houses over 100 employees and serves clients in outpatient settings. These new boilers will provide energy efficiency and service reliability. | Talbert House | 0 | 31 to 90 days | \$100,000 |
| Hamilton | Hamilton County Park District Water Meter Pit Repl | Replace the water meter pit that services Hiram and Nature Preserve, a regional park serving 105,000 visitors annually. The pit is constructed of concrete block and is in poor condition. The walls are collapsing and near failure. The mechanical contents will remain and include the existing water meter, backflow preventer, and other relative water main items. The pit measures 10' wide x 12' long x 8' deep and is located adjacent to the edge of pavement of the park entrance road. The improvements will improve the protection and maintenance water safety. | Hamilton County Park District | 1 | 31 to 90 days | \$35,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Hamilton | Advanced Manufacturing | CLASS elements of success are to have Employer-driven process, tuition pre-payment for incumbent employees. We work with employees to arrange convenient class locations and help employers to create flexible work hours for them at varied classes. Through our leadership we will also employers access funding for capital and operations for their facilities. CLASS will work with employers on job readiness, soft skill, MBSC and stackable certificates that could be transferable credits and articulated between educational institutions. The training and education programs would address the needs of long-term and entry-level production workers as well as the requirement for both incumbent worker and new entrants (apprentices to the skilled trade's positions). CLASS will build on Cincinnati's experience with its existing Job Corp and pursue innovative solutions to create work opportunities for the hard to serve. Adopt a comprehensive focus for allocating resources for youth services into Advanced Manufacturing careers and Apprentices programs. | Cincinnati Labor Agency For Social Services | 500 | 31 to 90 days | \$200,000 |
| Hamilton | AJA Internship Program | Over the last 40 years, the American Jewish Archives (AJA) (a non-profit organization that preserves historical documents) has provided an internship program for over 250 students. Participants have included archival students who are required to have a pre-require number of hours to be certified, public history students from UC, high school students from the greater Cincinnati area and students of the Hebrew Union College where the AJA is located. We have partnered with Ohio universities including Wright State, Xavier, and UC to assist in providing these much needed "training" programs. Up until the recent economic crisis, our organization has been able to sustain its internship program through revenue from long-established endowments - which now are providing little if any income. Also, our budget may be so severely cut that we will have to lay off full-time employees who have served as mentors and trainers to the program - some for more than 20 years. | American Jewish Archives | 12 | 0 to 30 days | \$176,000 |
| Hamilton | REPAIRS, BEAUTIFICATION & EXPANSION | Our hope is that the stimulus funds will provide the necessary funding to support our program through the next two years. When the economy is restored, the AJA will return to funding its own internship program. | ALAMO ELECTRONICS INC | 3 | 0 to 30 days | \$50,000 |
| Hamilton | Green Roof Loan Fund | NECESSARY REPAIRS TO EXISTING BUILDING, BEAUTIFICATION OF THE BUILDING IN THE COMMUNITY, EXPANSION OF SHOWROOM TO DISPLAY ADDITIONAL HIGH ELECTRONICS FOR SALE Cincinnati is currently approved for \$5 million dollars in the CWRBF linked deposit program to assist in the financing of vegetated roofs. Additional funding would enable the City to support additional green roof projects, and to assist in financing other stormwater management projects. | City of Cincinnati | 100 | 91 to 180 days | \$5,000,000 |
| Hamilton | Water Treatment Plant Improvements, Membrane Softening | A Pilot Study has indicated that it would be cost-effective to use membranes to soften the City's raw water, which is groundwater derived from wells along the Whitewater River that exhibits high hardness. The project would involve the design of a membrane softening system for the City's existing Water Treatment Plant. The membranes are a physical barrier not only to calcium and magnesium (the cations responsible for high water hardness) but also to water borne pathogens that could threaten public health. | City of Harrison, Ohio | 0 | 0 to 30 days | \$500,000 |
| Hamilton | Geriatric Activities Coordinator | This course provides the education for central service technicians who must have the knowledge and skills for preparation, sterilization, handling and storage of patient care items. The course is approved by AHJCSMM and graduates are eligible for the instructional certification examination to be designated as a certified Registered Central Service Technician. Hospitals are currently challenged to find the funds to have employees certified. | Workforce Development Center - Cincinnati State Te | 100 | 91 to 180 days | \$100,000 |
| Hamilton | Dry Fork Road Sanitary Sewer, Phase 2 -- Construct | Approximately 10,000 feet of new 24-inch gravity sewer will be constructed between the Dry Fork Rd/Enterprise Dr intersection and Enterprise Dr in the City of Harrison. The new sewer will cross Interstate 74 approximately 300 feet northeast of the Dry Fork Road intersection. The project will provide a trunk sewer from anticipated development in northeastern Harrison Township, Hamilton County, Ohio, to the existing Crosby Township in Hamilton County. Further, the project will provide a pumping station, provide the City a secondary line of Interstate 74, and significantly reduce sewer flow and eliminate surcharging problems in other portions of the sewer system. | City of Harrison, Ohio | 200 | 31 to 90 days | \$1,600,000 |
| Hamilton | Fiedelley Phase II | We are a structural steel fabricator founded in 1974. The project is the completion of Phase II of our expansion program. Currently 10,000 sqft manufacturing and 4,000 sqft office space have been added under the project. Funds would be used to purchase the automated manufacturing equipment to allow us to compete with ODOT bridge projects. Our industry has been hit hard by the loss of business due to rising raw material costs. Grant will provide the funds necessary to procure the final piece to the project. | Fiedelley Steel Fabricators, Inc. | 25 | 0 to 30 days | \$350,000 |
| Hamilton | Housing Energy Reduction | The Housing Energy Reduction program would broadly create a program of educational and training grants to services the following: displaced and underemployed workers with construction background, home inspectors/trainees, facility managers, maintenance personnel and opportunities for recent high school graduates. This will be done by developing new curriculum, instructor support, hands-on laboratory equipment and classroom facilities. | Cincinnati State Technical and Community College | 1250 | 31 to 90 days | \$4,250,000 |
| Hamilton | New Haven Rd/Baughman Rd Water Main - Construction | Approximately 9,500 feet of new 12-inch water main will be constructed on New Haven Road and approximately 9,500 feet of new 12-inch water main will be constructed on Baughman Road in the City of Harrison, Harrison Township, and Crosby Township in Hamilton County. The project will extend City water service to residential and commercial properties in these areas, enabling them to be abandoned from a State reported fiscal watch. It has not had the ability to upgrade the main over the decades and still has routing budgeted to replace it. This project would allow the installation of an up-to-date emergency water main in a geographic location. | City of Harrison, Ohio | 400 | 31 to 90 days | \$2,900,000 |
| Hamilton | Emergency Sirens | The Village of Lockland's only emergency siren is estimated to have been installed in the 1950s. It is located on the top of a factory building that has been abandoned and will soon be demolished. The Village has had severe financial difficulties, only recently released from a State reported fiscal watch. It has not had the ability to upgrade the siren over the decades and still has routing budgeted to replace it. This project would allow the installation of an up-to-date emergency water main in a geographic location. | Village of Lockland | 0 | 0 to 30 days | \$60,000 |
| Hamilton | New Haven Rd/Baughman Rd Water Main - Design | Approximately 9,500 feet of new 12-inch water main will be designed for New Haven Road and approximately 9,500 feet of new 12-inch water main will be designed for Baughman Road in the City of Harrison, Harrison Township, and Crosby Township in Hamilton County. The design phase is to extend City water service to these areas so that residential and commercial properties can abandon existing septic systems, provide fire flows to protect residents in these areas, and improve the overall performance of the City's water distribution system by creating additional loops within the system. | City of Harrison, Ohio | 0 | 0 to 30 days | \$125,000 |
| Hamilton | Marvin Rd/Carolina Trace Rd Water Main - Construct | Approximately 6,700 feet of new 12-inch water main will be constructed on Marvin Road and approximately 3,300 feet of new 12-inch water main will be constructed on Carolina Trace Road in Hamilton County, Harrison Township. The new force main will provide fire flows to protect residents in this area and eliminate current water pressure problems resulting from increased demand in this area. | City of Harrison, Ohio | 220 | 0 to 30 days | \$1,520,000 |
| Hamilton | Establishing Fulltime Firefighter/EMT Positions | The Village of Lockland has experienced decades of economic hardship that it is now beginning to recover from. Due to the Village's financial situation, during the period the State of Ohio's Auditor Office placed Lockland on Fiscal Watch, the Lockland Fire Department lost its only two (2) Fulltime Firefighter/Emergency Medical Technician Positions by not hiring replacements as they left our employment in order to help reduce operating costs. This measure as well as other recently benefited the Village by allowing us to be released from the State's Fiscal Watch designation. The Village wishes to use the stimulus initiative for the establishment of three (3) Fulltime Firefighter/Emergency Medical Positions to maintain these positions for 10 years. This measure will not only create jobs but also increase safety and protection of Fire and Emergency Medical Services to the Village of Lockland. | Village of Lockland | 3 | 91 to 180 days | \$1,710,000 |
| Hamilton | Aquisition and Demolition of Stearns & Foster Prop | In addition to being financially unstable, its wooden floors have rotted, the upper level windows are broken, and it is an ever-present danger to and blight on the community. It is located adjacent to I-75. A portion of the land it is on will be necessary for the widening of I-75 in the near future. Once the buildings are demolished and the site is ready for development it will become a highly valuable development site. As it stands, the site is not economically viable for development. It is proposed that the site be purchased by the Village and the buildings be demolished. The property required by the State for the widening of I-75 would be transferred to the State without charge. The remaining approximately 14 acres would be made available for development. Based on similar development projects in the Village, the development of this project will bring about an estimated 300-400 permanent jobs and 50 limited-term construction jobs. | Village of Lockland | 450 | 0 to 30 days | \$5,000,000 |
| Hamilton | Working to Keep You Working | Through the Cincinnati State, individualized Working to Keep You Working Program - 1500 Ohio displaced worker residents will each receive assessment of past education, current skills, abilities and transferable skills; continuous supportive career and personal counseling; registration assistance; financial aid; funding connections; tutoring and needed and GED and job placement assistance. The program will emphasize the employment opportunities that are and are predicted to be available - emphasizing the specific STEM focused education and new career pathways - education and training available through Cincinnati State: Agricultural Sciences, Horticulture and Landscaping; Automotive, Aviation Maintenance and Repair; Automotive, Biological Sciences, Business and Entrepreneurship; Chemistry, Computer Science, Construction, Energy, Engineering, Environmental Science, Healthcare, Culinary; Hospitality, Logistics, Mathematics, Physics, Public Safety and Transportation. | Cincinnati State Technical and Community College | 1000 | 0 to 30 days | \$850,000 |
| Hamilton | Hamilton County Park District HVAC Replacement | The Park District needs to continue upgrading old and inefficient HVAC units in buildings throughout the park system. Proposed new systems are more efficient and high efficiency commercial natural gas. Locations included in this request are Winton Woods Bayland Barn, Winton Woods Winton Center, Winton Woods Snack Bar and Woodland Manor Seasonal Nature Center. Cincinnati's businesses, neighborhoods, organizations, and people. Using cutting-edge technology - high quality video production made affordable, video usability online, in emails, and in video phones - The CQCV will help the region fulfill its economic potential. It's being important simulation on macro level job creating, branding, attract VPs, national/international recruiting) and micro level (stimulate business, save and create jobs). See demo: www.cincinnativideo.com | Hamilton County Park District | 8 | 91 to 180 days | \$210,000 |
| Hamilton | THE GREATER CINCINNATI VIDEO GUIDE | The CQCV is fully developed and entirely financed. Many of the companies that need our help the most cannot afford it due to the economy. So we're requesting stimulus funds for 500 free video productions. For 500 companies we can make an important change. 500 videos to stimulate business, save/create jobs, introduce Ohio companies to tomorrow's technology/marketing, and brand our region nationally as exciting and modern. | Brundin & Geier LLC | 25 | 0 to 30 days | \$575,000 |
| Hamilton | Downtown Cincinnati Media Center | We are seeking to create an entertainment center in downtown Cincinnati that will offer opportunities for the city's youth in the music, nightlife, and fashion industries along with revitalize downtown Cincinnati and return it to its past majesty. Cincinnati's influence on the music industry goes largely unnoticed by the majority of Americans which is a call to action. We also aim to bring youth from the vicious cycle of inner cities by empowering and inspiring them with Cincinnati's rich music history, offering a music networking resource, and uncovering their own unfulfilled potential. Musical opportunities include informational lecture series, tickets to great Cincinnati musicians, and a professional recording studio, all of which is integrated and patronized by the target names in music today. The fashion sector is coordinated by offering independent designers the opportunity to put on professional fashion shows and have samples of their work put into the hands of celebrities. The nightlife aspect offers an upscale venue for locals and visitors alike to enjoy downtown Cincinnati in its greatest grandeur. This project offers immediate job opportunities. | Precocious Media Group, LLC | 65 | 0 to 30 days | \$1,750,000 |
| Hamilton | Downtown Cincinnati Entertainment Center | We are seeking to create an entertainment center in downtown Cincinnati that will offer opportunities for the city's youth in the music, nightlife, and fashion industries along with revitalize downtown Cincinnati and return it to its past majesty. Cincinnati's influence on the music industry goes largely unnoticed by the majority of Americans which is a call to action. We also aim to bring youth from the vicious cycle of inner cities by empowering and inspiring them with Cincinnati's rich music history, offering a music networking resource, and uncovering their own unfulfilled potential. Musical opportunities include informational lecture series, tickets to great Cincinnati musicians, and a professional recording studio, all of which is integrated and patronized by the target names in music today. The fashion sector is coordinated by offering independent designers the opportunity to put on professional fashion shows and have samples of their work put into the hands of celebrities. The nightlife aspect offers an upscale venue for locals and visitors alike to enjoy downtown Cincinnati in its greatest grandeur. This project offers immediate job opportunities. | The LaPrade Group, Inc. | 70 | 0 to 30 days | \$1,750,000 |
| Hamilton | MVP Education Academy | The MVP M&C City Education and Sport Academy concept was born out of the desire to improve development of the city's youth - particularly urban youth - across many facets. Baseball and softball will be used as a means to meet these overall development goals. The Most Valuable Persons (MVP) program was born out of the idea that education, character and athletic development could go hand in hand. The program was developed to provide children living in underserved areas of Cincinnati, Ohio with an outlet to engage in positive activity during the critical out-of-school time. The William Still Foundation will offer the program to select inner-city youth which will include approximately 65% of the youth of Cincinnati's neighborhoods. To meet the overall goals of the program, time will be spent proportionally on academic and non-academic activities, including teaching athletic, social and character development skills. The William Still Foundation will work in cooperation with the Barnes Road Estate Group, Cincinnati Public Schools, the City of Cincinnati, Local Initiative Support Corporation (LISC), Community of Hartwell, the Cal Ripken Sr. Foundation and Ripken Management & Design to rehabilitate a b | William Still Foundation Inc | 40 | 31 to 90 days | \$300,000 |

| Hamilton | Winton Hills Medical Center Electronic Health Reco | Winton Hills Medical and Health Center, Inc. (WintMed), a federally qualified health center (FQHC), providing medical and dental health care to 6,000 underserved, underserved, and underserved patients, regardless of ability to pay. 20,000 encounters per year. It is requesting a stimulus grant of \$250,000 for the acquisition and implementation of Electronic Health Records (EHR). This grant will be leveraged with \$100,000 already received by WintMed; total cost of project is \$350,000. From 2008 to 2009, there has been a 40% increase in uninsured and 30% increase in total care. The EHR expenses involve the purchase of hardware, software licensing, electronic medical record and practice management system by WintMed. In collaboration with the Information and Technology IT partner, WintMed's health records and practice management system, WintMed will be able to see more patients while delivering evidence-based health care and improving the documentation and financial reimbursement. These systems will maximize better access to high quality health care for all patients, including the uninsured, underserved, and underserved. | Winton Hills Medical and Health Center, Inc. | 27 | 0 to 30 days | \$250,000 |
| Hamilton | Off-grid power production, using carbonaceous waste | MicroBioPower's project (to be developed in partnership with Cleveland area's Magnet organization), is to produce alternative energy from synthetic diesel to electricity to many other synfuels-- for the self-sustainability of prisons in the State of Ohio. Electricity is produced 24/7, utilizing residual cellulose materials from industrial processes, e.g., wood chips, corn husks, etc.; no issue with "food vs. fuel" debate. Our proprietary and proven technology (a plant is operating in Alabama) breaks down the raw material and produces a synthetic gas (Syngas) that then produces "green" electricity via a gas turbine. Approximately 20 jobs per small-scale power plant will be created, helping the State of Ohio achieve its job retraining/growth goals, while significantly increasing the percentage of electricity generated from alternative energy sources to meet the State's power generation mandate. The combination of relatively low raw material costs, and low prison inmate wages, will put the State of Ohio in the best possible position to not only save money on electricity costs associated with prisons, but to also allow for inmate training in "green technology" jobs. | MicroBioPower, LLC | 20 | 31 to 90 days | \$600,000 |
| Hamilton | School Crossing Guards | Pay for the school crossing guards throughout the City of Cincinnati. The City cut support for this program last year and Cincinnati Public had to pick up the cost. This funding request is for four years. Due to budget issues this program is in serious jeopardy. | Cincinnati Public Schools | 120 | 0 to 30 days | \$4,000,000 |
| Hamilton | The Pleasant Sol | There are thousands of inner city kids who are passionate about art, yet their work is never seen beyond close friends and family members. Using the fashion connections of The LaPrade Group, Inc., the best way we know how to give kids a canvas for their artwork is through fashion and t-shirts. The Pleasant Sol is a line of t-shirts that are designed by inner city kids to help their artwork be seen by the world, empower them to follow their dreams, and show that there are ways to make an honest living doing what you love. Revenue generated from selling these shirts is split three ways: money retained by the company, money paid to artists in royalties, and money put into a charity foundation to combat inner city youth. | The LaPrade Group, Inc. | 30 | 0 to 30 days | \$20,000 |

| Hamilton | Palligistics | The Product: The Palligistics™ system, which uses proprietary software and programming to match customer order information to the ready production/operations information, by gathering and using production line MPM/MSI data to keep track of incoming and outgoing inventory product inventory quality and quantity, efficiently building pallets of products matched to retail outlet customer wants and needs. The Problem to Solve: With manufacturing in the U.S. being produced in leaner, competitive, it must identify and solve the most accessible technologies that reduce costs and streamline the supply chain. "Palletizing-to-order" or "mixed pallet building" is the most effective manufacturing, distribution and retail environments closer together to reduce costs, including cost of order fulfillment through reduced inventory, reduced risk and quality and trailer density), and to decrease costs associated with out-of-stock inventory, lack of speed to market, product damage, transportation and storage, and labor costs (worker compensation, lost time and disability). | AIDCO International | 10 | 31 to 90 days | \$250,000 |
| Hamilton | Preparedness Planning Program - Protecting Ohio Vi | Project: provide work, improve use of energy, reduce carbon impact on environment, build German technology in Ohio. Public Utilities: Develop training/facility assessment packet for full implementation of the NPP, NERC, and other operational aspects from the NFPA 1600 standard on Business Continuity Planning, Current Public Utilities (self) are poorly trained and need to implement NPP, 1600 and Business Continuity Planning. Educational Institutions: Develop training/facility assessment packet for implementation of the FEMA Comprehensive Preparedness Guide. The FEMA CPG 101 along with NIMS and the National Response Framework will enable educational institutions to develop advanced Emergency Operations Plan and staff an All Hazards event. County/Municipal Governments: Develop an organization resources assessment/training program. A majority of townships, small cities, and villages are not trained, resourced or equipped for a major All Hazards event. The assessment and training program will be based on FEMA CPG 101, NIMS, and the National Response | Cincinnati State Technical and Community College | 5000 | 31 to 90 days | \$750,000 |
| Hamilton | Green Roof Loan Fund | Cincinnati is currently approved for \$5,000,000 of Clean Water Revolving Loan Funds for a Green Roof Loan Program. This request is for an additional \$5,000,000 to expand the program, and to broaden its eligibility criteria to include all stormwater BMPs. This is a second submittal of this project because I did not receive a receipt for the first submittal. | City of Cincinnati | 100 | 91 to 180 days | \$5,000,000 |
| Hamilton | Colerain-Kemper Wastewater Treatment Plant | The Kemper-Coterain area located in Hamilton County and the Indian Creek area located in the southwestern Butler County are two largely unsewered areas that are the focus of this project. These areas comprise about 21,000 acres of Hamilton County and include areas that are undeveloped as well as areas that have developed utilizing on-site household sewage treatment systems and small, unpermitted septic treatment plants. The Pleasant Run portions of the study area currently discharge to the Mill Creek basin by a series of pump stations that are at the end of their useful life. In addition, the Pleasant Run portions of the study area are currently discharging to the Mill Creek basin by a series of pump stations that are at the end of their useful life. It is the intent of this project to provide environmental protection and opportunities for development in northwest Hamilton County. | Metropolitan Sewer District of Greater Cincinnati | 318 | 181 days or more | \$116,000,000 |
| Hamilton | Art Academy of Cincinnati Community Engagement Cen | several building. When opened, its 8,000 square feet will provide an expanded public lobby, a gallery for student and public art shows and a studio for a growing community education program that serves over 2,100 adults and children through access of drop-in art classes. The Art Academy is located in Cincinnati's Historic, but troubled Over-the-Rhine neighborhood, having moved there in 2005 after being located in the Eden Park and Mt. Adams neighborhoods for over 135 years. OTR is having a rebirth as an arts and entertainment district, in part, because of the Academy's presence and commitment to the community. This new facility will not only enhance the educational opportunities for all Art Academy stakeholders, but also allow for a further connection with the neighborhood as the new facility will have floor to ceiling windows that will animate the two streets that bound the facility. | Art Academy of Cincinnati | 35 | 0 to 30 days | \$1,200,000 |
| Hamilton | Toll blending containerize products for Dept of De | The State of Ohio has pledged \$600,000 for this project which is already in progress. Need capital to purchase equipment to fill, blend and containerize our Green products so that the Dept of Defense and stock Green products at their hubs and depots. Many DoD RFPs request that products are sold in quart containers. We don't have the ability to do size that small amount special equipment to fill and package. | Coolant Control Inc | 4 | 31 to 90 days | \$2,000,000 |
| Hamilton | Electric Energy Reduction / Efficiency | We need 20 ice blasting machines and 20 lifts probe 5000 and 20 CB infra-red gun. We already have two large customers that have requested our service to clean their electric motors and repair air leaks. Ford has identified over 5 MM electric motors and Harley Davidson has identified 2 MM. Both companies have facilities that have millions of air leaks and motors that are using too much electricity because they are contaminated with compressor air being too hot being too tight for the many air leaks. | Coolant Control Inc | 40 | 0 to 30 days | \$4,000,000 |
| Hamilton | green water treatment chemicals and services | We currently manufacture and sale green chemistry to major suppliers of water treatment chemicals and services. We want to enter this business and also provide the service and technical support. We have the manufacturing capacity and technical staff ready to go now. We have thousands of existing customers that would become add on customers for our water treatment services. | Coolant Control Inc | 25 | 0 to 30 days | \$10,000,000 |
| Hamilton | Green Technology | We have developed a substrate for foreign mineral oil for the manufacturing, transportation and construction industries. We need working capital for development and infrastructure support. As we progress into Green products we need additional storage tanks, mixers and equipment to change over to Green chemistry and not cross contaminate the different feed stocks. Personnel and relation selling sales to add additional customer service space and to do needed long term maintenance and repair to 120 year old building. Will assist in maintaining employment for 13 workers and provide for the creation of 4-7 new jobs needed to meet expanded capacity. | Coolant Control Inc | 4 | 0 to 30 days | \$2,000,000 |
| Hamilton | Patio and Building Improvement | Project consists of installing a 200 KW generator at the Wyoming Plant. Also included are 2 transfer switches, associated conduit, wire and appurtenances. The purpose of the project is to provide back-up power in an emergency. | Alley Tavern, LLC d/b/a Boswell Alley | 20 | 0 to 30 days | \$50,000 |
| Hamilton | Water Plant Emergency Generator | Project consists of installing a 200 KW generator at the Wyoming Plant. Also included are 2 transfer switches, associated conduit, wire and appurtenances. The purpose of the project is to provide back-up power in an emergency. | City of Wyoming | 20 | 181 days or more | \$120,000 |
| Hamilton | HILLTOP MEATS WATER TREATMENT SYSTEM | 1,500 GALLON SEPTIC TANK H/I 72-SD 77 RECIRCULATING SAND FILTERS 1,000 GALLON RECYCLING/ULTRACLEANING TANK DOSING PUMP WITH CONTROL PANEL ULTRAVIOLET DISINFECTION UNIT ALL PIPE CONNECTIONS/FITTINGS/VALVES | HILLTOP MEATS INC. | 6 | 31 to 90 days | \$54,000 |
| Hamilton | Hilltop Lane Watermain Replacement | Project consists of replacing 2,800 LF of failing 8" watermain from Compton Road to Congress Run Road | City of Wyoming | 20 | 91 to 180 days | \$487,500 |
| Hamilton | Congress Run Watermain Replacement | Project consists of replacing 2,600 LF of failing 6" watermain. | City of Wyoming | 15 | 181 days or more | \$310,000 |
| Hamilton | Wyoming Sphere Pump Station Replacement | Project consists of replacing the Wyoming sphere pump station with a new pump station located at a lower elevation to address hydraulic deficiencies of the existing pumps. New pumps to operate at 1200 GPM, 150+ TDH. Project would allow better utilization of existing storage and provide better water turnover. | City of Wyoming | 20 | 181 days or more | \$150,000 |
| Hamilton | Mt. Lookout Sidewalk Replacement | 150 Linear feet of sidewalk replacement where the street has been repaved so many times that the sidewalk now in some instances is actually below the street level. This creates a safety hazard in that automobiles and trucks use the sidewalk for passing other cars and trucks. I also allows cars and trucks to use excessive speed around the corner by cutting the corner short and driving over the sidewalk. There is a church and school a block away and a number of playgrounds and children use the sidewalk daily. There is no longer any curb. There is a lot of no stenciling of surface water runoff to the storm sewers. Also, where the sidewalk is even with the street, snow plows in the Winter have caught a number of blocks and caused what are called potholes. No real maintenance has been performed on this sidewalk in over 50 years. The sidewalks surrounding the area have primarily all either been replaced or replaced with 1/4" flat 15 years. | Resident | 8 | 0 to 30 days | \$5,500 |
| Hamilton | Instrumentation and Controls Certification for Ele | Cincinnati has a highly regarded Industrial Controls and Instrumentation training program used by local companies to train and obtain nationally recognized ISA Certified Control Systems Technician (CCST) certification. This training provides electronics and electrical contractors with the skills to calibrate, document, troubleshoot and repair instrumentation for industrial systems that measure and control level, temperature, pressure, flow, and other process variables. The certification ensures contractors qualify to bid projects regarding process automation. Cincinnati State's Industrial Controls and Instrumentation training program is established, but a great deal of the area electronics and electrical contractors are not utilizing the training due to limited training budgets. Both union and non-union electronics and electrical contractors will be able to utilize this training opportunity. The local IBEW union with 1,400 members has been seeking such training but costs has prohibited them from obtaining it. | Cincinnati State Technical and Community College | 200 | 0 to 30 days | \$1,200,000 |
| Hamilton | Call Center Services | Provide inbound call center services to a variety of government and private entities to facilitate the dissemination of information and communication between public and private entities. Also, the collection of data parceled by various demographics. | Lead Source Call Center | 30 | 0 to 30 days | \$300,000 |
| Hamilton | Virtual Experience-based Multi-source Active Lear | Individuals who work in a distributed, multifunctional, cross-cultural and multicultural environment. There is a need to change the traditional lecture-based passive learning methodology to an active technology-enabled multi-source learning methodology using simulation games. To fill this critical gap, University of Cincinnati in collaboration with TechSolve, provides development of motion-based multi-source active learning methodology which meets the expectations and demand from the industry as well as creates a technology-enabled virtual learning experience. The virtual integrated and comprehensive simulation game applications will enable realistic and lead themselves on a successful career path. The project concentrates on development and deployment of the simulation game methodology by creating the required tools and resources in the area of advanced manufacturing, healthcare and renewable energy. | University of Cincinnati | 2180 | 0 to 30 days | \$3,100,000 |

|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Smart Machine Supervisory System Platform for Sust | The University of Cincinnati in collaboration with Teetehoe, Inc. proposes the development of a smart machine supervisory system to support the next generation sustainable manufacturing. The supervisory system provides an ideal platform for sustainable manufacturing by maximizing the usage of energy (through process optimization technology), materials (through first part correct technology), and other resources through paperless communication and automation technology. The supervisory system will transform the current factory to a paperless factory through the usage of state of the art computer networking, internet security, and e-documentation. The project involves large scale multi-objective multi-criteria optimization, real time data integration of sensor data, integration of data and knowledge, and standardized communication interface across a variety of software and hardware platforms. The benefits include new levels of efficiency, reliability, and performance that will result in shorter lead times, reduced maintenance cost, real-time data access, lower input resources, energy savings and optimized efficiency in all steps of manufacturing. | University of Cincinnati | 2500 | 31 to 90 days | \$3,980,000 |
| Hamilton | Bass Lake Dam Improvements | Deauga Park District would like to undertake repairs to the Bass Lake Dam within the Chgri River Watershed. GFD inherited the dam structure as part of the acquisition of Bass Lake through the WRRSP program. The dam is in need of some maintenance, including the development of an emergency outlet that was not part of the original structure. This project will help to control water levels within Bass Lake (which is open as a public park) and help to protect downstream flooding. | Geauga Park District | 3 | 91 to 180 days | \$100,000 |
| Hamilton | Second emergency water connection to the Village o | This project adds a critically needed second emergency connection from GCWW's water system to the Village of Addison. It will provide regularization opportunities for a community that is considering alternatives to its water supply. The project includes 2200 feet of 12" Ductile Iron Water Main, including a pressure regulator vault with pressure reducing/bursting valve and a meter near connection. | Greater Cincinnati Water Works | 4 | 31 to 90 days | \$600,000 |
| Hamilton | Backup power generator at Eden Park | The Eden Park pump station is a critical facility for GCWW because it serves a large number of nearby hospitals as well as one of GCWW's larger pressure zones that supplies regional customers. The standby generator will increase the reliability to provide water to critical customers during a regional power outage. The generator will also provide opportunities to reduce energy costs. Design on this project is completed. | Greater Cincinnati Water Works | 28 | 31 to 90 days | \$3,800,000 |
| Hamilton | Geothermal and HVAC Improvements at administrative | This project adds geothermal and HVAC improvements to help GCWW lower the overall energy costs of its facility. | Greater Cincinnati Water Works | 4 | 31 to 90 days | \$600,000 |
| Hamilton | Solar Energy Panels at administrative offices | This project will add a large, 40KW, solar array that in combination with other planned solar projects will offset a substantial amount of energy for GCWW's proposed UV treatment project. This solar energy project will help make the UV treatment facility energy neutral. Design of the solar project has already been completed. | Greater Cincinnati Water Works | 3 | 31 to 90 days | \$220,000 |
| Hamilton | GOING GREEN | INSTALLING NEW EFFICIENCY FURNACE, HOT WATER HEATER AND SLOAR PANELS TO CONSUME LESS ENERGY | FAVIA'S | 10 | 0 to 30 days | \$30,000 |
| Hamilton | eco friendly | acquire commercial real estate in an empowerment zoned neighborhood use all renewable energy to decrease or eliminate utility overhead, contract LEED certified architects and contractors to maximize mechanical components train and employee neighborhood residents to facilitate the operational needs of small business tenants, this model could influence more eco friendly attitudes for merchants and laymen. | gateway development of cincinnati | 50 | 31 to 90 days | \$2,500,000 |
| Hamilton | "It's a Financial af Fair" | Full-day Affairs where banks, S & Ls, would meet, interview, and make loans and/or commitments to small, minority, women and veteran owned businesses. Those business that have been certified by the State of Ohio as "locally and/or economically disadvantaged". The trial event would be held in Cincinnati, followed by Columbus and Cleveland. All regular lending institutions that are insured by the FDIC would be encouraged to have married booth/table, space at the event. Lenders provides would be responsible for assisting the businesses with putting together the loan requests. Loan funds would be made available to the "small business" and other legitimate business purposes. There would be goals set for each participating area, for loans made or commitments. Round 1: would focus on the metropolitan areas of Dayton, Toledo, Youngstown, Akron, and Portsmouth. To ensure success, the local MCBAP office would be encouraged to work with local SBOCs, PTACs, MBOCs, and Chambers of Commerce. The Cincinnati BDS would be responsible for the overall management and coordination of same. The Cincinnati BDS is a 32 year old not-for-profit, tax-exempt organization. | Cincinnati BDS, Inc. | 40 | 31 to 90 days | \$375,000 |
| Hamilton | Magna Windmill Generator | Develop and manufacture a generating device utilizing wind and magnetic properties. | Carroll Industries | 100 | 0 to 30 days | \$1,000,000 |
| Hamilton | Job Creation & Support for Current Working Parents | Our focus is on Job Opportunities. We currently employ 17 Americans. With additional working capital and training funds, we could add another 25 new employees, more than doubling the number of workers. Not only does Young Rembrandts provide teaching and administrative job positions, we also enable working parents to keep working, keeping their children safe in a safe, familiar environment while parents work (children remain at their school to participate in our an enrichment program). Most importantly, we provide a new and very distinct element of education in the classroom. Specifically, our drawing program teaches skills beyond the technical know-how (or left-brain methodologies) of standard classroom education. Instead, we equip children (ages 3 1/2 to 13 yrs) with the ability to create, analyze and transform information--skills that are vital to our future workforce where basic data and technical skills will not be enough to succeed in the new conceptual and global economy. In short, our proposal increases jobs, allows parents to remain working at other jobs and improves critical thinking skills for children to use as tools for life. | Queen City Art LLC, dba Young Rembrandts | 25 | 0 to 30 days | \$490,000 |
| Hamilton | Oracle Human Resource Technology Upgrade | Cincinnati Public Schools has the need to upgrade our Oracle HRMS system in order to achieve significant operational efficiencies in the recruitment, hiring and maintaining of high performing instructional and support staff. The modules include: Self-service for better time tracking and leave usage maintenance, Recruiting to better allow applicants to submit for new jobs and Performance management to increase our ability to hold employees accountable for their performance in and out of the classroom. | Cincinnati Public Schools | 1 | 91 to 180 days | \$2,000,000 |
| Hamilton | Hardware Refresh - School technology | CPS has aging computers and printers in their 58 school buildings (approximately 20,000 pieces of equipment). The district needs to establish a refresh cycle of computer technology in order to keep pace with emerging instructional technologies and instructional delivery methods. We strive to begin a three- (3) year refresh cycle to prevent limited or no access to students who need technology to meet academic standards. | Cincinnati Public Schools | 10 | 181 days or more | \$18,000,000 |
| Hamilton | Learning Management | We need to install software and hire an individual to assist us in implementing a Learning Management system. With the growth in technologies we find ourselves needing to deliver on-line training to our teachers (2700) and 100 field administrators in the use of new technologies used in instruction. These technologies include smartboards, classroom projectors, instructional software delivery, as well as, required training such as child abuse. We are interested in using this system to encourage more student and parent involvement in the learning and communication of academic progress. Further we would like our teachers to begin exploring the use of on-line instructional delivery. | Cincinnati Public Schools | 1 | 31 to 90 days | \$500,000 |
| Hamilton | eDiscovery | This project will allow us to become compliant with eDiscovery laws. We need to purchase storage equipment and software to be able to appropriately store electronic correspondence and be able to retrieve the information when needed. | Cincinnati Public Schools | 0 | 31 to 90 days | \$500,000 |
| Hamilton | Disaster Recovery | We need to implement a Disaster Recovery System in order to be able to functionally perform core computer systems in the event the district's data center suffers a disaster event preventing the district's servers and networks to perform. The data center supports the core computer systems such as student information, financial information, transportation & food services. A break in operation will severely harm the district's ability to provide basic services to students. | Cincinnati Public Schools | 1 | 91 to 180 days | \$1,000,000 |
| Hamilton | Fire Hydrant Services | Company will create 15 to 20 new jobs servicing existing hydrants in local Township, and Cities within Hamilton, Clermont and Brown counties of Ohio. | H&P Fire Services | 15 | 31 to 90 days | \$100,000 |
| Hamilton | Madeira Municipal Building Energy Efficiency Proj | Replace existing boiler system and AC system with a geothermal unit with a geothermal unit. Existing boilers need to be replaced (20 years old) and we are looking for a more energy efficient system to keep them warm. | City of Madeira, Ohio | 0 | 91 to 180 days | \$37,500 |
| Hamilton | Laurel Avenue Streetscape Improvement | Provide general infrastructure and aesthetic improvements to the Laurel Avenue Corridor within the Madeira CBD. Repair and replace sidewalks, brick pavers, landscaping, lighting improved pedestrian crosswalks and signage. Purpose would be to improve aesthetics and safety for business district and to attract new retail and office development/business into the Madeira CBD. | City of Madeira, Ohio | 15 | 91 to 180 days | \$375,000 |
| Hamilton | Youth Training and Business Development | Open an internet Cafe to develop the entrepreneurship skills and encourage other types of businesses to opening by providing specific skills training to successful business. | ComPro-Tax Cincinnati Co. | 200 | 0 to 30 days | \$800,000 |
| Hamilton | Coaching Districts How to Successfully Pass School | Integrate students into an already proven successful business model. UPDATED VERSION OF A PREVIOUS SUBMISSION Ohio's has 720 school districts, nearly all of which require assistance to successfully pass levels which require voter's approval to triumph. In the process of developing Alumni Connection.com, we identified school district's ignorance to effectively sell the need for their law, understand their community's perspective, target their message to the demographics which swing votes (i.e. senior citizens), in addition, we found that districts habitually do not sell their success stories that their voters find important. This funding shall give rise to "The How to Model" for Ohio school districts to prevail elections. Alumni Connection will greatly expand our team of professionals including: researchers, statisticians, analyst, and other professionals to national investigate school districts which passed levels by a wide margin which repeatedly failed prior. This in-depth research project shall yield correct techniques districts should utilize for successful levels. Thereafter, we will publish our findings and hold seminars. In addition, we will work in hand with districts to implement, deliver, and execute this plan for triumphal levels. | Alumni Connection.com | 65 | 31 to 90 days | \$3,500,000 |
| Hamilton | Coaching Districts How to Successfully Pass School | UPDATED VERSION OF A PREVIOUS SUBMISSION Ohio's has 720 school districts, nearly all of which require assistance to successfully pass levels which require voter's approval to triumph. | Hamilton | Reactivation of Former Rail Line | Reactivation of the former rail line would assist in more efficient freight operations into the Sharonville Yard. Current trains often create bottlenecks at several key grade crossings. This initiative impacts commerce and safety throughout Sharonville. Numerous industrial and commercial businesses are located in Sharonville and serve the larger SW Ohio economy. The continued health of these businesses is critical to the local, regional and state economies. Efficient freight transportation will encourage current businesses to expand and new to relocate to this central SW Ohio location. With the reactivation of the rail line, trains would be totally removed from all grade crossings. With the forecasted growth in freight coming from NS opening of the Heartland Corridor in Spring 2010 and the important double stack clearance of NS line from Clarksville Intermodal Facility into Cincinnati, the issue of roadway blockages needs to be addressed or else commerce flow will be compromised and businesses will fail rather than flourish from their multi-million dollar transportation investments. This project provides an opportunity for Ohio engineers to study Graphnet Inc's Energy Data Mining and Analysis (EDMA) technology advantage & develop a confidential knowledge base of energy efficiency solutions for Ohio industries. It would provide infrastructure, software tools and training to transform energy data insights that drive energy efficiency and Create 15 (fifteen) jobs: 15 interns & temp positions and secondary job/educate in energy costs / greenhouse gas/improve profitability/Provides the impetus to drive SB221 initiative | City of Sharonville, Ohio | 5000 | 31 to 90 days | \$120,000,000 |
| Hamilton | State of the Art Technology Toolkits for Achieving | Graphnet Inc applies a very specialized and novel approach for energy data collection, validation and analysis with significant success in various industries. The success is due to application of EDMA tools to reduce cycle time to results. In the last 7 yrs, Graphnet Inc has serviced small and large industrial facilities achieve energy conservation, reduce greenhouse emissions, justify implementation and reduce energy costs. The have worked with safety and state sponsored programs, including OGDOD to bring implementation release to our customers. The growing demand for our approach requires investment in technology and personnel (duration 1.5yr) | Graphnet Inc | 16 | 0 to 30 days | \$1,575,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | Building insulation and access road project | New residential/educational building constructed on Altavest campus of St. Joseph Orphanage needs to have access road from floor of building to back basement entrance in order to transport resident items and furnishings and equipment that need to be stored temporarily. Estimated cost is \$15,000. On same campus, construction of back office services, administration, and IT building constructed in 1986 needs to be insulated and have some energy retrofit. Items installed to bring up to current building code standards. Campus programs treat seriously emotionally disturbed students residentially and also as day students. Agency is CASH accredited. Current operational deficits preclude those capital expenditures. Building needing energy retrofits houses central services for entire agency that serves 1,600 children and families per year and that has been in existence for 180 years. Building needing access road was constructed after a successful capital campaign in 2007/2008. St. Joseph Orphanage is non-sectioned in its services, its clients, in its staff, and in its board and has \$18 million annual operating budget. | St. Joseph Orphanage | 10 | 0 to 30 days | \$45,000 |
| Hamilton | Pristine Inc. Superfund Site | Remediation of ongoing TCE contamination issues at a spill site. ABSEMaterials of Wooster Ohio's recently EPA approved swelling glass materials are capable of fully remediating this location's persistent and plumed TCE issues. NFP foundation set up as part of \$5M victim relief and remediation fund requested help from ABSEMaterials, but lacked funding for the clean up. | Absorbent Materials Company of Wooster Ohio | 6 | 31 to 90 days | \$425,000 |
| Hamilton | Forensic ACT (FACT) | Forensic Assaive Community Treatment (FACT) is an emerging best practice which takes the principles of ACT and applies them specifically to population which has experienced involvement in the criminal justice system. The Ohio Coordinating Center for ACT has obtained almost 3 years of outcomes data from four FACT sites across Ohio. The data is collected in six month intervals and fed into a database. Analysis of this data is completed regularly to look at the effectiveness of FACT services. Initial data findings include a decrease in recidivism as compared with recidivism rates for individuals with mental illness not served by FACT. Examples of other outcomes tracked through this project are hospitalization usage and employment rates. The intent of continuing this project is to continue funding for the four teams currently involved in the project, and to create new FACT teams across the state. FACT services are proving successful at helping individuals re-integrate into the community and achieve stability. The end result of the FACT services can save money not only in the mental health system but the criminal justice system as well. | Ohio Coordinating Center for ACT | 28 | 91 to 180 days | \$500,000 |
| Hamilton | Chlorine Contact Chamber & High Service Pumps | Village of Addyston - Chlorine Contact Chamber and High Service Pumps - Install chlorine contact chamber at water plant to improve efficiency of chlorination system and ensure adequate chlorine in the water service lines. Install high service pumps to improve water pressure in areas being served by contact chamber to system elevated storage tank. | Village of Addyston | 10 | 91 to 180 days | \$487,000 |
| Hamilton | Greening of Springfield Township | Greening of Springfield Township - Install rain gardens, rain barrels, rain water harvesting, water saving devices, energy efficient lighting, and green areas, which is a suitable to either build a roof garden or a rain garden in the vicinity of the building. We will then approach and petition the local government to request them about the subjects related to roof gardens and green gardens, and explore with them the possibility of creating roof gardens and rain gardens. We will draw on the experience of the Gala companies in the local government's efforts to address the issue in Hamilton County, and our expertise in that area. The goal of this proposal is to introduce the concept of roof gardens techniques and possibly some other green technologies as a method of solving not only storm sewers overflow, but also decreasing their heating and cooling bills. Depending on the success of this education and outreach program, we will proceed designing and creating of rain gardens wherever feasible. | Gala Foundation, Inc. | 10 | 0 to 30 days | \$50,000 |
| Hamilton | Preventing and Managing Childhood Obesity | This proposal will build on existing funding from the Mettapp program to enhance the capacity of Ohio counties to prevent, identify and manage childhood obesity and its consequences, including chronic disease. Funding will support grant and local collaborative improvement strategies to implement the most recent evidence and recommendations about the prevention and management of childhood obesity. It will also support training and technical assistance to health professionals to assist them in working in partnership with their local communities to design and implement comprehensive community based strategies. Providers serving low income, minority and rural communities will be particularly recruited for participation. The latest clinical data registry and network approaches will support this effort. Results will be evaluated and reported/disseminated to Ohio policy and program managers statewide. | Child Policy Research Center, CCHMC | 20 | 31 to 90 days | \$1,600,000 |
| Hamilton | Energy Auditing | New startup company offering energy audits and weatherization to individuals and businesses utilizing thermal imaging technology. Existing homes in Hamilton county will benefit as most are older than 30 years and do not have sufficient insulating materials or electronic energy saving devices to maximize energy consumption. Our business plan also includes marketing the use of thermal imaging to new home builders which will identify areas needing energy improvement during the construction process. As new home buyers begin to demand thermal imaging reports, construction companies will proactively build more energy efficient structures and advance our progress towards energy independence. Energy efficiency, renewable energy production and minimal impact on the environment. Kyoto Index™ is an indicator for the total environmental impact of electric energy production. | Energy Savers | 4 | 31 to 90 days | \$391,000 |
| Hamilton | Kyoto Index-a tool to evaluate electric power plan | Kyoto Index consists of set of parameters: Demand Side Management (DSM) Program at the utility (DSM index + Energy saved / Total Energy sold); Renewable energy rates; Energy generated using Renewable resources; Total Energy produced; Energy Efficiency (amount of CO2/KWh); Reliability to greenhouse gases and global warming; Human health effects (NOx, SO2, suspended particles, mercury and other toxic substances, quantity and type of waste generated); Ecological effects (mining for fuels that are used in electric energy generation, heating of environment, NOx, SO2, particulates, mercury and other toxic, quantity and type of hazardous waste generated during energy production); Acid rain impact on lakes, other ecosystems and cultural heritage; Catastrophic potential (e.g., nuclear power plant, large dams). The Kyoto Index is superior to any other energy evaluation. | Gala Foundation, Inc. | 20 | 0 to 30 days | \$200,000 |
| Hamilton | Sekitan Street Waterline/Main Street Services | Village of Addyston - Sekitan Street Waterline - 2170 linear feet - Replacing the existing substandard existing 4" waterline with 8" new valves and hydrants to improve pressure and flow. No safety measures. Reconstruct/replace service branches as required. On Main Street installation of 4" main on north side of street and new services to existing 8" main on south side of street to improve water pressure and flow to homes. | Village of Addyston | 10 | 31 to 90 days | \$387,800 |
| Hamilton | Industrial water and wastewater repurposing | Eliminate or minimize industrial or commercial process wastewater streams. We have developed a new technology that will eliminate the organic load to allow for wastewater reuse, rather than release and disposal to stream or a municipal wastewater plant. Currently our piloting activities with major US food corporations have shown consistent reductions of over 90% Biochemical Oxygen Demand and Total Suspended Solids. | CEWTS (Clean Environment Water Treatment Solutions) | 30 | 31 to 90 days | \$300,000 |
| Hamilton | Water Storage Tank Repairs | Village of Addyston - Water Storage Tank Repairs - Drain and clean 250,000 water storage tank and repair as required. Paint tank interior. Install security fence around tank site with key card gate operator. To maintain water storage in safe and operable condition and ensure system security. | Village of Addyston | 10 | 31 to 90 days | \$107,000 |
| Hamilton | Jessup Rd storm sewer replacement | The Jessup Rd storm sewer system drains water from 100 acres of developed urban area. The system is drains into road culvert underneath Jessup Rd. The pipe was installed in 1975 to prevent erosion and protect properties and roads from flooding. The existing pipe material is elliptical CMP (Corrugated Metal pipe). The bottom of the pipe has raised, the rest of the pipe has deteriorated and is failing apart. | Hamilton County Public Work | 12 | 91 to 180 days | \$550,000 |
| Hamilton | Wheatcroft Dr, storm sewer replacement | The Wheatcroft Drive storm sewer is comprised of two (2) 60 inch diameter pipes. This storm system drains water from 300 acres of developed urban area including Cheviot, Jessup and Blue Rock Road. The pipe was installed in 1982 to prevent channel erosion and protect house from future instability. The existing pipe material is CMP (Corrugated Metal pipe). | Hamilton County Public Works | 12 | 91 to 180 days | \$500,000 |
| Hamilton | Enterprise-wide Deployment of Electronic Medical R | Implementation of the system requires that entire collection of care services not emanate from our primary care clinics and not accurate hospital, to our skilled nursing facilities and long-term acute care hospital. Implementation of this system would create 50 new high-paying jobs that together would pay approximately \$4.1 million per year in salaries. Most of those jobs - nearly 80% - would be created in an economically depressed central Ohio. | Health Alliance of Greater Cincinnati, Inc. | 50 | 31 to 90 days | \$60,000,000 |
| Hamilton | Second Street Waterline | Village of Addyston - Second Street Waterline - 1300 linear feet - replace the existing substandard 4" and 8" new valves and hydrants, to improve pressure and flow, the safety measures, and reconstruct/replace service branches as required. | Village of Addyston | 15 | 31 to 90 days | \$178,300 |
| Hamilton | Crest Rd Storm Sewer replacement | The Crest Rd. storm sewer system drains water from 120 acres of developed urban area. The system is linked to a Road culvert underneath Crest Road. The pipe was installed in 1982 to prevent erosion and protect properties and roads from flooding. The existing pipe material is CMP (Corrugated Metal pipe) metal pipe. The bottom of the pipe have eroded the pipe has started to lose its rigidity and shape indicating bulging at different locations, thereby limiting by hydraulic capacity. This pipe is near the end of its useful life. | Hamilton County Public Works | 12 | 91 to 180 days | \$450,000 |
| Hamilton | Crystalview Court - Sanitary Sewers | City of Sharonville - Crystalview Court Sanitary Sewers - Install 1200 LF of 8" sanitary sewer and 500 LF of 6" sewer lateral to eliminate failing in-home disposal systems. Project will remove pollutants from tributary to nearby Sharon Woods Lake (Sharon County Park), improving water quality and protecting health of residents and park visitors. | City of Sharonville | 15 | 91 to 180 days | \$350,000 |
| Hamilton | Blanchetta Drive Storm Sewer Replacement | The Blanchetta storm water pipe system is about 1425 feet long. The storm water system carries water from over 350 urbanized acres including cross county highway (SR 126), Colston Ave (US 27), Cheviot and Galbraith Roads, Jackies, Sheban and Blanchetta Drive. The storm water system was constructed over long period of time adding different materials. The last section was added in 1972 and 1980. The system is comprised of different pipe size and materials. Most of the pipe materials are CMP (Corrugated Metal Pipe). The pipe has collapsed in some sections, which were repaired by Public Works. The storm pipe has reached the end of their useful lives and can crack, leak and collapse. These failures can cause stress and property flooding resulting in damage to property, streets and life. | Hamilton County Public Works | 15 | 91 to 180 days | \$2,500,000 |
| Hamilton | Roof repair | New roof for mental health family care home. Home has few wind storm caused major damage causing it to leak in four of our clients beds which is creating ceiling damage to a newly painted room. And mainly a safety hazards to the beds in that room. We are a small family care operated mental health home, that accommodates 5 beds from 23 to 83 years of age. Having a safe healthy environment for the ladies here would be a blessing and help us continue our mission. | Minnie Scott's Family Adult Care | 3 | 31 to 90 days | \$75,000 |
| Hamilton | City of Sharonville - Kemper Road and Carpol Avenu | City of Sharonville - Kemper Road and Carpol Avenue Sanitary Sewers - Install 5600 LF of 8" sanitary sewer and 2000 LF of 6" sewer lateral to eliminate failing sanitary disposal systems. Project will remove pollutants from tributary to nearby Sharon Woods Lake (Sharon County Park), improving water quality and protecting health of residents and park visitors. | City of Sharonville | 15 | 91 to 180 days | \$1,150,000 |
| Hamilton | Roof Gardens of Downtown-Cincinnati | The plan is to persuade the Downtown building owners to install rain gardens in order to decrease energy consumption and improve the image of the city as a green city. The goal is to introduce roof garden techniques and possibly some other green technologies as a method of decreasing heating and cooling costs, and also to solve the storm sewers overflow. We will then proceed to design and create roof gardens where feasible. Roof Gardens have been known to decrease the heating and cooling energy requirements and thus decrease the impact of CO2 emissions. Additionally, during the green seasons, the plants on the roofs will absorb the CO2 and thus indirectly decrease the effects of global warming. It will be overall multiple win solution for the Downtown business community. The sustainability is enhanced by rising awareness of problems of ecological footprint of everyday life and by decreasing energy requirements in addition to direct absorption of CO2 emissions by the plants during the growing season. Large job creation and creation of healthy life styles. People working and living Downtown will be able to enjoy roof gardens for recreation and lush air. | Gala Foundation, Inc. | 500 | 31 to 90 days | \$500,000 |
| Hamilton | Chatsworth & Warren Sanitary Sewer | 1300 LF of 8" sanitary sewer to allow elimination of 13 HSTS in low income area. | Village of Woodlawn | 15 | 0 to 30 days | \$392,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Hamilton | Construction Worker Orientation to Ergonomics | Educate construction workers on proper ergonomic techniques specific to their field and to reduce the injury rate. We propose to develop a bank of five buildings, under the name of GSA/CASIS, including City of Cincinnati-owned 24 W. Elder Street and the building at 1800-1802 Race Street, and privately owned 180A-66 Great Street building. | Allied Construction Industries | 500 | 31 to 90 days | \$154,000 |
| Hamilton | Gala Oasis | We wish to develop the three buildings belonging to the City of Cincinnati, together with the inner courtyard, as a cohesive unit and use it to practice the principles of sustainable development, utilizing energy-efficient appliances, insulation, buried water lines, and solar collectors and wind energy. We will promote maximal community involvement by training local unemployed people to work on the buildings. Part of that payment will be in a variety of non-cash incentives. In addition, we will promote the purchase of green energy, green businesses and thus provide continuous employment for the population living in OTR and adjacent areas. We will demonstrate a general application of sustainability concepts in GSA/CASIS. We believe that this project will show both efficient and economically viable by its success. We could then use this "tagline" project to show the viability of a broader vision of SEARCH project. | Gala Foundation, Inc. | 200 | 0 to 30 days | \$2,000,000 |
| Hamilton | Kemper-Colerain Wastewater Treatment Plant | The Kemper-Colerain area located in Hamilton County and the Indian Creek area located in the southwestern Butler County are two largely undeveloped areas that are the focus of this project. These areas comprise about 21,000 acres of Hamilton County and include areas that are developed as well as areas that have developed utilizing on-site household sewage treatment systems and septic tanks or septic treatment plants. The Passaic Run portion of the study area currently discharges to the Mill Creek basin by a series of pump stations that are part of the main canal line. In addition, the current Urban Wastewater Treatment Plant identifies 22 million gallons in project costs which could be better used to provide environmental protection and opportunities for development in northwest Hamilton County. | Metropolitan Sewer District of Greater Cincinnati | 318 | 181 days or more | \$116,000,000 |
| Hamilton | Jessup Rd Storm Sewer replacement | The Jessup Rd storm sewer project comprised of 200 feet of 79"48" elliptical CMP pipe. The system drains 100 acres of developed urban area. The pipe was installed in 1975 to prevent erosion and protect properties from flooding. The bottom of the pipe has raised and eroded in some spots and the area area of the pipe is falling apart. | Hamilton County Public Works | 12 | 91 to 180 days | \$550,000 |
| Hamilton | Cincinnati Fire Department - Automated Vehicle Loc | The Cincinnati Fire Department proposes a regional project for an automated vehicle locator (AVL). An AVL is a device that makes use of the Global Positioning System (GPS) to enable an agency to remotely track the location of its vehicle fleet by using their Internet. The device combines GPS technology, cellular communications, thermal image maps, and an intuitive user interface, with the goal of improving fleet management and customer service. The Cincinnati Fire Department, Cincinnati Police Department and Hamilton County Emergency Agency through its collaborative partnership could benefit greatly from an AVL system. AVL technology will improve fire response times by being able to dispatch the closest vehicles for emergencies. The equipment also utilizes the shared radio network to incorporate high speed data, which will increase the speed of the data on the current radio system shared by all three partners. | Cincinnati Fire Department | 25 | 91 to 180 days | \$4,100,000 |
| Hamilton | Linked Deposit Financing for HSTS Abandonment & La | This is the construction of lateral sewers from buildings to adjacent collector sewers and associated abandonment of home sewage treatment systems (HSTS). Financing will be used for construction of existing buildings to either existing or new central sewers. It will also assist MCO in meeting some of the challenges of the state and federal regulations by complying with the Clean Water Act and Consent Decrees and improving local water quality while striving to maintain affordable rates for our customers. In addition, this project will provide opportunities for sustainable development to revitalize our neighborhoods and supporting job growth. The US Conference of Mayors estimates that water energy generated in rebuilding our water systems creates over 3.4 jobs elsewhere and every dollar invested in water infrastructure adds \$6.35 in national economy. | Metropolitan Sewer District of Greater Cincinnati | 0 | 91 to 180 days | \$500,000 |
| Hamilton | Wheatcroft Dr. Storm Sewer Replacement | The Wheatcroft drive storm sewer is comprised of two (2) 60 inch diameter CMP pipes. This storm sewer drains water from two (2) undeveloped urban area including Wheatcroft, Jessup and Blue Rock Rd. The pipe was installed to prevent channel erosion and flooding. The pipe is near the end of its useful life. | Hamilton County Public Works | 12 | 91 to 180 days | \$500,000 |
| Hamilton | Cincinnati Fire Department - Thermal Imaging Devic | The Cincinnati Fire Department needs to replace (50) thermal imaging devices. The first set of cameras was purchased in 2000, and the last set was purchased in 2004. The units have a useful life of five years. Thermal imaging cameras are an integral part of the fire as firefighters search buildings, they use the cameras to locate victims who are hidden or unresponsive. They can also be used to locate hot spots and catch them before they spread. Therefore, replacement of these devices is a high priority for the Department. | Cincinnati Fire Department | 5 | 31 to 90 days | \$502,000 |
| Hamilton | Crest Rd Storm Sewer replacement | The Crest Rd storm sewer pipe is about 148 feet, 60 inch diameter pipe. It drains water from 120 acres of developed urban area. The system is located in a road culvert underneath crest road. The pipe was installed to prevent properties from flooding. The pipe material is CMP. The bottom of the pipe has rust and eroded and has lost its rigidity and shape at different locations. | Hamilton County Public Works | 12 | 91 to 180 days | \$450,000 |
| Hamilton | Blanchette Drive Storm Sewer | The Blanchette Storm Pipe system is about 1425 feet long. The existing pipe size is 72 and 84 inches which is under size and will be replaced with 100 inch diameter pipe. It passes underneath several major road and bridges. The storm system carries water from over 350 urbanized areas including cross county highways (SR28, Colerain Ave IUS 271, Chevere, and Carabath road, Jackson Macke, and Carabath road). The storm system was constructed over long period of time adding different sections. The last section was added in 1972 and 1980. The system is comprised of different pipe size materials. Most of the Pipe materials are CMP. The pipe has several problems. The pipe has been replaced by Hamilton County Public works. The storm pipe has reached the end of their useful lives and can crack, leak and collapse. These failures can cause street and property flooding, leading to damage to property, streets and life. | Hamilton County Public Works | 15 | 91 to 180 days | \$2,500,000 |
| Hamilton | Provision of Sanitary Sewer | This recently been discovered that raw sewage from the Village Hall and a neighboring apartment building flows into a storm sewer that flows directly into Mill Creek. It is estimated that it will cost \$65,000 to correct this situation. | Village of Lockland | 1 | 31 to 90 days | \$85,000 |
| Hamilton | WinMed Health Center Renovation and Weatherization | WinMed Hills Medical and Health Center, Inc. (WinMed), a federally qualified health center, is requesting a stimulus grant of \$266,000 for renovation, underpinning, and uninsured patients, with 30,000 encounters (2008). WinMed is requesting a stimulus grant of \$266,000 for reconstruction of the health center building, mechanical and electrical work for new fixtures, new roof, upgrades, and a new HVAC system. The HVAC system must be restarted every 20 minutes. WinMed will replace steel doors and roof to make the building more energy efficient and eliminate leaks. It will repair separate the health center parking lot for new fixtures, new roof, upgrades, and a new HVAC system. This project will increase safety, efficiency, decrease patient wait time, increase productivity and improve patient satisfaction. Digital imaging equipment will decrease radiation exposure to staff and patients by evenly spaced and eliminate staff exposure to lead. Chemical such as mercury and lead digital imaging equipment will also eliminate the disposal of these toxic chemicals which are hazardous to the environment. The program will decrease health disparities by educating more patients about dental care and providing dental services. The program will provide comprehensive dental services to 2,200 patients. Total cost of the project is \$115,000 with \$50,000 leveraged for electronic dental records & Direct and 50 indirect jobs. | Winton Hills Medical and Health Center, Inc. | 150 | 31 to 90 days | \$265,000 |
| Hamilton | WinMed Digital Dental Imaging and Electronic Health | WinMed Hills Medical and Health Center, Inc. (WinMed), a federally qualified health center, currently provides medical and dental health care to 6,000 underserved, uninsured, and unrepresented patients, regardless of ability to pay, with 30,000 encounters annually. WinMed is requesting a stimulus grant of \$60,000 for digital dental imaging equipment. WinMed will use grant funds to purchase and install digital imaging equipment. Digital imaging equipment will increase safety, efficiency, decrease patient wait time, increase productivity and improve patient satisfaction. Digital imaging equipment will decrease radiation exposure to staff and patients by evenly spaced and eliminate staff exposure to lead. Chemical such as mercury and lead digital imaging equipment will also eliminate the disposal of these toxic chemicals which are hazardous to the environment. The program will decrease health disparities by educating more patients about dental care and providing dental services. The program will provide comprehensive dental services to 2,200 patients. Total cost of the project is \$115,000 with \$50,000 leveraged for electronic dental records & Direct and 50 indirect jobs. | Winton Hills Medical and Health Center, Inc. | 58 | 0 to 30 days | \$60,000 |
| Hamilton | WinMed Bond Hill Roselawn New Health Center Constr | WinMed Hills Medical and Health Center, Inc. (WinMed), a federally qualified health center (FQHC), is requesting a stimulus grant of \$700,000 for capital construction and start-up to build and open a new service site, in the medically underserved areas of Bond Hill Roselawn and surrounding communities. They have the highest percentage of uninsured patients in the city. WinMed currently provides medical and dental care to 6,000 underserved, uninsured, and unrepresented patients, regardless of ability to pay, with 30,000 encounters annually. WinMed's new site will be sited at the Cincinnati Community Action Agency headquarters, the target population of 30,000 includes 8,000 Bond Hill eligible users. The health center will use electronic health records, which providing comprehensive, culturally competent, primary medical and dental services to 6,000 users. This health center will create 25 new jobs directly (100 indirectly) and serve 6,000 new users by year 2. Construction will convert the 4000 square feet into 10 medical exam rooms, a dental operation, 2 jobs and other areas necessary to support the services. Total project is \$900,000, with \$200,000 leveraged for equipment. | Winton Hills Medical and Health Center, Inc. | 125 | 31 to 90 days | \$700,000 |
| Hamilton | Endicott Cincinnati LLC | Endicott Biofuels II, LLC is an advanced biofuels development company with \$40 million of private equity backing, and is seeking to develop, engineer, construct and operate a 30 million gallon per year biodiesel facility in Hamilton County. | Endicott Biofuels II, LLC | 15 | 91 to 180 days | \$27,700,000 |
| Hamilton | Metro Innovation - Rapid Technology Discovery | Metro Innovation is a Rapid Technology Discovery & Commercialization Program that helps close innovator and commercialize their latent intellectual property. Through city-wide innovation competitions, the program inspires hundreds of first-time and senior. | Metro Innovation | 1,000 | 31 to 90 days | \$500,000 |
| Hamilton | District Operations Facility | The district operations facility will house maintenance, food service, transportation and the computer service divisions of the school district. | Hamilton City School District | 30 | 91 to 180 days | \$4,000,000 |
| Hamilton | Hamilton County Home Improvement Program | This 26,600 square foot facility will position the district to streamline support operations at one location. | Home Ownership Center of Greater Cincinnati | 120 | 0 to 30 days | \$20,000,000 |
| Hamilton | Energy Saving Lighting Products LED & Plasma | The stimulus request leverages bank funding for low interest rehab lending in a linked deposit format. It is deposited in accounts in participating banks. The interest earned is passed to homeowners for the loans they receive to rehabilitate their leading manufacturers, suppliers a full-service installation providers. Businesses increasingly embrace energy efficiency as an opportunity to streamline their operations while improving environmental benefits, reducing the carbon footprint and enhancing public relations and community support. BCE's loan arrangement utilizes our ultra-high energy efficient LED lights, but has reached a price point where through a cash sale the return on investment is less than two years with savings beginning from the first day of use. The plan is simple: 1) sell superior products in Ohio, gain an early foothold, and create the largest footprint for national distribution in the marketplace. The LED market reached \$3.8 billion worldwide in 2008 and is set to reach \$8.4 billion by 2011. Our projections for the first year gross sales are \$3.6 million, \$4.1 million in the second year and \$6.1 million in the first year with a total profit margin of over 30%. Benefits of LED & Plasma Roadway Lighting: Energy Savings of 75% to 80%. | Leitner Electric Co. dba Blue Chip Energy Services | 500 | 0 to 30 days | \$2,600,000 |
| Hamilton | Storm Water Run-Off Reduction Project | Project entails installing hundreds of feet of pipe (over 1 thousand) under one of our parking lots to capture storm water flow and divert it from the communities combined sewer system. Water would be used for irrigation and other grey water projects. This project has already been engineered and could be ready to bid to subcontractors in 30 days. The goal would be to have this retention system handle at least 75% of the storm storm water runoff, going a long way to fulfilling our long term goal of making the Zoo a "zero storm water discharge" facility. | Cincinnati Zoo | 40 | 91 to 180 days | \$800,000 |
| Hamilton | Great Miami River Ground Water Observatory | The proposed Great Miami Ground Water Observatory would consist of an array of observation wells in the Great Miami River Aquifer immediately adjacent to Great Miami Park. Each well would be instrumented to continuously monitor water level, temperature, oxygen level, specific conductivity, pH and selected chemical or biological constituents of interest or concern. These data would be hourly and publicly distributed via real-time use by all concerned with the continued protection of our local groundwater system including those in public health, natural resource protection, and public water suppliers pumping from the aquifer. The observatory would also be used in teaching about ground water and by researchers as an area universities for studying the exchange of water between the aquifer and river, for defining the movement of water within the aquifer, for assessing the risk to the aquifer posed by contaminants in the river water, and for informing the public on the aquifer's secure management. The observatory would provide the infrastructure for research projects on the sound stewardship of this essential natural resource to assure its future availability and health. | Department of Geology | 5 | 31 to 90 days | \$1,500,000 |
| Hamilton | Great Scott Downtown | To quickly expand our existing restaurant operation on the East Side (Great Scott) to a downtown location in the Tower Mall on 4th Street. The timely history of the Tower Mall is the growing reputation of great food and service for the past three years at the East Side. We have a recipe for success for downtown to both increase consumer traffic and grow JOBS in a depressed area. The old Morton's location is an easy fit for our concept and could be up and running in 30-45 days. Start up money is required for reconfiguring new employees, marketing, some renovation and initial inventory. | Great Scott Restaurant | 50 | 31 to 90 days | \$300,000 |
| Hamilton | Family Needs | Our family is in need for some work done our house so bad we are a poorer consumer, so most of this is used to our tool. | Self | 5 | 31 to 90 days | \$25,000 |
| Hamilton | solar pannels for heating water used in operation | If we heated the water with solar energy before the millage water is put into the boiler it would save energy. If this is something that is feasible under a grant we could figure the cost and savings estimates. | Cindus Corporation | 85 | 181 days or more | \$1 |
| Hamilton | Low Interest Working Capital Loans for Retooling O | Ohio companies serving the auto and other declining manufacturing industries often have the facilities, equipment and talent to retrofit to serve other growing industries such as healthcare and life science. This effort may include complete business conversions, creation of new production lines or creation of new retail or subsidiary companies. These companies need a lending source that provides low cost working capital to supplement the Ohio Innovation Loan and other loan programs for construction and equipment. This program would serve up to 30 companies with loans ranging from \$50,000 - \$500,000 and would focus on companies that are in need for retooling in today's credit market. This project would create or retain 500 jobs as a result of retooling or retaining necessary to implement a new business strategy. Loan decisions would be made utilizing the business, manufacturing and financial expertise possessed by BIOSTART's board, operators and partners based on the strength of the business case, projected job creation/retention and contribution of Ohio's life science industry supply chain. | BIOSTART | 500 | 31 to 90 days | \$10,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Hamilton | Project GRAD Comprehensive P-16 School Reform Mode | The Project GRAD is a proven comprehensive P-16 school reform model within Cincinnati. It serves economically disadvantaged students. It was piloted in Cincinnati public schools in 2007 and is presently serving over 2100 students. The mission of PGRC is to align community, financial and other resources to support and enhance Cincinnati Public School District efforts to increase graduation rates and increase postsecondary readiness. Through its primary component college readiness program students receive not only a college scholarship but also significant support through the college application, financial aid, and social acclimation processes. PGRC recognizes the importance of family support in raising a student scholar. We are the largest provider. Through program and support staff, PGRC encourages family participation throughout the student's education and provides additional campus-family support. PGRC coordinates nationally research based best practices in Literacy, Math, Classroom Management, Social Services, and College Access with the expected outcomes that at least 80% will graduate high school and at least 50% are prepared to enter and be successful in college. | Project GRAD Cincinnati | 200 | 0 to 30 days | \$250,000 |
| Hamilton | OPQC Ohio Perinatal Quality Collaborative | Existing statewide collaborative of health care providers- 200+ physicians, nurses and staff in 26 hospitals across the state. Other partners include ODH vital stats and regional perinatal centers and Ohio Dept of Job and Family Services. Collaborative is improving both outcomes and reducing health care costs by teaching providers methods to improve clinical care in small increments, measure if changes work and if the best practice) sharing lessons and successes with each other across the state. Two current clinical projects- reduce infection in very premature newborns and reduce late term OB-38 Wt delivery that don't have medical reason. See our results and how to see www.opqc.net. Looking to expand to other Ohio maternity hospitals. Also develop new clinical improvement spaces for ODH and hospitals. | Ohio Perinatal Quality Collaborative (OPQC) | 8 | 91 to 180 days | \$500,000 |
| Hamilton | Art Academy of Cincinnati Rooftop Project | 1 Waver Garden a 1151 sq glass walled space that will be used for school events and activities and community meetings. An active neighbor to its west-the River/OTR community, the AAC will make this facility available to groups in need of meeting space. 2 Spring-Box a 1166 sq conference room with a gallery kitchen that will be used for meetings, presentations, portfolio reviews and small community gatherings. 3 Terrace- a 2141 sq open-air deck where artists can create using OTR's 19th century architecture as background. This terrace also would be used for classes and community meetings. The AAC has played a major role in the revival of OTR, a historic, but troubled neighborhood that abuts the downtown business district. Its presence has been instrumental in OTR's rebirth as an arts and entertainment area. Like the Community Engagement Center the AAC wants to open on its first floor, the rooftop Project will benefit its students and the OTR neighborhood. The Art Academy of Cincinnati is a private college of art and design. | Art Academy of Cincinnati | 27 | 0 to 30 days | \$2,000,000 |
| Hamilton | Open automotive repair facility | Need funds to purchase building to open automotive repair facility. I was laid off after 10 years with my employer to save my employer money. I have 30 years experience in auto repair and a long list of clients, just need a place to get to work! | Dallas Automotive | 6 | 0 to 30 days | \$400,000 |
| Hamilton | Summer Enrichment | A Summer Enrichment opportunity for students who reside in the West End Community of Cincinnati. This summer program will engage students in activities that will strengthen them academically through grade level Math, Reading, Science and Computer Labs as well as providing students an exposure to cultural enrichment activities through field trips to local and distant locations and physical activities such as swimming, basketball and track, utilizing our partnerships with the Boys and Girls Club and the Seven Hills Neighborhood Houses. This summer program will provide an average of 100 hours per day, from 9:00 am to 3:00 pm, Monday through Friday, at the homes alone or playing in the unsafe streets of the West End where gang fire is a common occurrence. Students will attend this summer program to gain skills in core academic areas in a relaxed and fun atmosphere. Students will be engaged in activities that will enrich their lives culturally and prepare them for the upcoming school year. | Cincinnati Speech and Reading Intervention Center | 20 | 91 to 180 days | \$40,000 |
| Hamilton | improvement | Modified existing equipment, Certifications, Training of 2 new employees. Develops and implement Quality Maintenance program. Recovering ISO 9000 certifiac. Register with proper facilities for outside US sales. Repair and bring up to code of building. This project consists of the inspection of approximately 700,000' of sewer infrastructure on a yearly basis. The project will be used to purchase 2 new sewer inspection systems with mapping software. | Compfab Custom Welding | 3 | 91 to 180 days | \$175,000 |
| Hamilton | Sewer Infrastructure Inspection | Request start-up funding to establish a community bookstore. It will be a brick and mortar expansion of an online book business that our family founded in 2004. With this project, our goals are to: 1. Recycle used books, magazines, DVDs, CDs as well as other media and prevent tons of recyclable waste from needlessly entering area waste. (Per the EPA, in 2007 alone, 138 thousand tons of books and 1,500 tons of magazines and newspapers landed in landfills.) 2. Provide permanent full-time and 5 part-time positions for store staff. 3. Provide Anderson Township with the areas only recycled full-time book store. The closest national chain bookstore is located 6 miles away. 4. Create a local point for citizens to gather, share their interest in books, participate in lectures and enjoy community-based musical entertainment. In less than four years, we estimate that our cumulative state payroll and sales taxes will exceed the funds requested. | Champion Cleaning Specialists, Inc | 8 | 0 to 30 days | \$175,000 |
| Hamilton | Community Used Book Reclamation | Request start-up funding to establish a community bookstore. It will be a brick and mortar expansion of an online book business that our family founded in 2004. With this project, our goals are to: 1. Recycle used books, magazines, DVDs, CDs as well as other media and prevent tons of recyclable waste from needlessly entering area waste. (Per the EPA, in 2007 alone, 138 thousand tons of books and 1,500 tons of magazines and newspapers landed in landfills.) 2. Provide permanent full-time and 5 part-time positions for store staff. 3. Provide Anderson Township with the areas only recycled full-time book store. The closest national chain bookstore is located 6 miles away. 4. Create a local point for citizens to gather, share their interest in books, participate in lectures and enjoy community-based musical entertainment. In less than four years, we estimate that our cumulative state payroll and sales taxes will exceed the funds requested. | Total Service Books | 13 | 0 to 30 days | \$245,000 |
| Hamilton | Mama's Home | This project will entail construction of a residence for a family of four-a single mother with 3 younger children. Currently, the family resides in a small home with many stairs. The mother was injured during work and is working with the Ohio Industrial Commission to have proper treatment. The injury sustained limits her ability to work and climb stairs. The goal is to provide a residence that does not have stairs that the mother is required to climb into the residence and have laundry facilities on the main floor so laundry can be completed without difficulty. The construction of this project would employ at least 10 workers for a period of at least 12 months. Granite Incouters was a business that started in October 2007. The business was closed in December 2008 due to a lack of consumer spending leading to negligible sales revenue. There was not enough revenue to support the business. The company owes \$475,000 in debt, and is contemplating bankruptcy. | Mama's Home | 10 | 91 to 180 days | \$250,000 |
| Hamilton | Debt relief | We are hoping to improve a local community immediately by redeveloping a low-risk, abandoned gas station site that has been an eyesore in the area for years. It is located on a prime corner in one of Ohio's most beautiful communities. Once cleaned up and redeveloped this property will increase the aesthetic value of the local landscape through adaptive reuse of an existing building. We will be working with BUSEY to clean up the site and are looking for funds to redevelop the site to create a location for 4 new small businesses, a new parking lot and a park-like setting including sidewalks and landscaped areas. Reusing this abandoned gas station site will help preserve green space, reduce urban sprawl, and reduce the distance people have to travel, thus decreasing air pollution. This redevelopment will put several local subcontractors to work immediately while enhancing the neighborhood and the environment at the same time. | Granite Incouters | 4 | 0 to 30 days | \$450,000 |
| Hamilton | Abandoned gas station site | The housing and banking/credit crisis has taken its toll on my residential appraisal business. I'm trying to hang on, but with operating costs remaining the same or increasing and revenue decreasing by about 70% over the past two to three years, I have accumulated more debt than my company can afford. The money would be used to eliminate this debt and cover two upcoming major annual costs for 2009 (insurance and office digital file storage). I am requesting the money to help get my appraisal business back on track, continuing to ethically provide quality appraisal reports. Qualified appraisers will be vital when the housing and credit markets stabilize. The objective of this project is to create a recyclable bracing product for orthopaedic care. GUAAPRENE is a newly developed product. Addressing the growing concern for the environment, it is designed especially for replacement of neoprene in many fields of application. It does not use CFC's or HCFC's, ozone depleting materials. This halogen, PVC and Phthalate ester free compound meets RoHS regulations. In medical uses, where odor is important, GUAAPRENE offers an alternative that will not have the rubbery odor of neoprene. With superior durability, it can withstand the rigors of the medical environment better than its counterpart. | Nubuck Tweed & Company Real Estate | 100 | 31 to 90 days | \$600,000 |
| Hamilton | Citywide Stimulus | The objective of this project is to create a recyclable bracing product for orthopaedic care. GUAAPRENE is a newly developed product. Addressing the growing concern for the environment, it is designed especially for replacement of neoprene in many fields of application. It does not use CFC's or HCFC's, ozone depleting materials. This halogen, PVC and Phthalate ester free compound meets RoHS regulations. In medical uses, where odor is important, GUAAPRENE offers an alternative that will not have the rubbery odor of neoprene. With superior durability, it can withstand the rigors of the medical environment better than its counterpart. | Citywide Appraisals, LLC | 3 | 0 to 30 days | \$20,000 |
| Hamilton | GREEN ORTHOPAEDIC BRACING | The inhaled environmentally friendly foam -Halogen/PVC free compound -Phthalate ester plasticizer free compound -Pass CE000808/RECP PAPER (Polycyclic Aromatic Hydrocarbons) -Pass RoHS -Lowest Free Material features: 1 Low apparent density. 2 Free of CFC ozone depleting materials. 3 Easy to clean and maintain. Resistant to most chemicals, petroleum products and humidity. 4 Will not rot. | CONCEPTO LLC | 50 | 31 to 90 days | \$1,591,318 |
| Hamilton | Improving care coordination for children with spec | This proposal will enhance the capacity of Ohio practitioners to achieve measurable improvements in children's healthcare and health outcomes by improving care coordination for children with special health care needs. Funding will address needs identified in a current project focused on autism and developmental screening of young children that involves primary care practices in 16 Ohio counties. Funding will be used to design, test, and implement a patient-centered medicine home in a group of primary care practices. Lessons learned from the effort will be disseminated. This work will support training and technical assistance to health professionals to assist them in working in partnership with their local communities to design and implement comprehensive community-based strategies. In addition, we will facilitate local linkages between primary care practices and community resources such as Help-Me-Grow. We are working in collaboration with ODH, ODJFS, and the Ohio chapters of the American Academy of Pediatrics and the American Academy of Family Physicians. Results will be evaluated and reported/disseminated to Ohio policy and program managers statewide. | Cincinnati Children's Hospital Medical Center | 10 | 91 to 180 days | \$600,000 |
| Hamilton | Improving developmental outcomes in early childhood | This proposal will build on existing funding from the Medstep program to enhance the capacity of Ohio practitioners to achieve measurable improvements in children's healthcare and health outcomes. Funding will supplement program and data infrastructure development to allow the statewide spread of tools and strategies for implementing evidence-based and developmental screening in young children; those changes are are currently being tested and evaluated in a pilot project in 16 Ohio counties. This work will support training and technical assistance to health professionals to assist them in working in partnership with their local communities to design and implement comprehensive community-based strategies. In addition, we will facilitate local linkages between primary care practices and community resources such as Help-Me-Grow. We are working in collaboration with ODH, ODJFS, and the Ohio chapters of the American Academy of Pediatrics and the American Academy of Family Physicians. Results will be evaluated and reported/disseminated to Ohio policy and program managers statewide. | Cincinnati Children's Hospital Medical Center | 10 | 31 to 90 days | \$500,000 |
| Hamilton | Future Energy Effect Study | State wide county and community research on Ohio residents gathering their opinions and ideas on the future of energy and the emerging green economy and it's effects on their communities. Project would encompass convincing Ohio residents, door to door, phone interviews and community focus groups to obtain Ohio residents opinions and ideas on the future of energy and the emerging green economy and it's effects on their communities. | Product Solutions CPG | 100 | 0 to 30 days | \$3,700,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | New Construction of Prek-6 Building | <p>PROJECT SCOPE New PreK-6 Building on the current Whitaker Elementary Site New Secondary School, grades 7-12, on the current Secondary Site In order to make space for these two structures we would demolish the current Whitaker School and Secondary School, but keep Brent and Cottonwood Elementary Schools for possible future use.</p> <p>The Ohio School Facilities Commission will pay for 33% of this project. We are asking for the Local Share. This would help us quicken the pace for project implementation since we would not have to go to our voters to approve a Bond Issue to pay for the 67% of the cost of the project.</p> <p>The project will produce Silver Rated LEED buildings and bring our structures up to "21st" facilities that integrate technology and instructional design for students who must compete in a very competitive global environment. In addition the:</p> <p>We have had a Long Range Facilities Steering Committee in place for over 2 years. The research this 40+ member group, which consists of staff, community members, and our architects, has resulted in a recommendation of this plan.</p> | Finneytown Local Schools | 100 | 181 days or more | \$31,600,000 |
| Hamilton | Center for Improving Child Health Outcomes | This proposal will build on existing funding from the Mettapp program to enhance the capacity of Ohio practitioners to achieve measurable improvements in children's healthcare and health outcomes. Funding will supplement program and data infrastructure development to address the various statewide projects currently being supported: autism and developmental screening, decreasing late system scheduled deliveries, eliminating antibiotic-associated bloodstream infections in the neonatal intensive care unit, testing strategies for the prevention and management of childhood obesity, and supporting the implementation of care coordination strategies for children with special health care needs. This work will support training and technical assistance to health professionals to assist them in working in partnership with their local communities to design and implement comprehensive community based strategies. We are working in collaboration with ODH, OZHS, and the Ohio chapters of the American Academy of Pediatrics and the American Academy of Family Physicians. Results will be evaluated and reported/disseminated to Ohio policy and program managers statewide. | Cincinnati Children's Hospital Medical Center | 25 | 31 to 90 days | \$750,000 |
| Hamilton | Queen of Angels Montessori Building Upgrade | Our 55-year-old building has rotting, leaky windows, aging, and asbestos flooring, inadequate electrical and plumbing service, old lighting, and needs a new roof. The windows are built into a complete curtain wall system, so the entire curtain wall needs replacement. | Queen of Angels Montessori School | 100 | 91 to 180 days | \$500,000 |
| Hamilton | Full-time Police Officers | Our total project includes new classrooms (set to now taught) in the hall, Spanish in an old storage closet, physical education room, and we will work to take funding for new construction. We are seeking stimulus package aid for our most pressing need, facility upgrades, over a three-year period. This is an amendment to a previously submitted application. The cost was increased from \$700,000 to \$1,000,000 to cover a three-year period. We would be hiring 2 Police Officers and this would allow us to provide management to some degree for the Violence Reduction Taskforce (VART), and allow for rest paint. | City of North College Hill | 2 | 31 to 90 days | \$360,000 |
| Hamilton | ADHD Collaborative | Primary care providers who care for children with Attention Deficit Hyperactivity Disorder (ADHD) are struggling to implement evidence-based ADHD care. CCHMAC has successfully executed an ADHD Collaborative intervention which trained 372 community-based physicians across Greater Cincinnati to implement evidence-based practices when assessing and treating their patients with ADHD. The CCHMAC intervention works with the entire office staff to provide the rationale for the guidelines and modify office systems to promote the systematic use of the guidelines across the whole office (Elliott et al., 2008; Petraitis). Given the relationship between low income status and poor ADHD outcomes, it is imperative that models such as the ADHD Collaborative be tested in such settings to improve quality of care and, concordantly, improve the outcomes of low-income children with ADHD. We propose to implement the ADHD Collaborative intervention model in five community health centers in the Southern Ohio Health Services Network and track improvement in physician practice behaviors. We view the activities proposed here as an initial test of the effectiveness of the intervention in a community health center setting that, if effective, could be disseminated to purchase, retrofit and install up to 15 low cost housing units in North College Hill, Ohio. Housing units will be brought up to existing codes, insulated for energy efficiency, and updated with efficient windows, doors, heating eq, water usage eq and appliances. Neighborhood contractors and laborers will be recruited whenever possible. Job training is included for at least 3 unskilled neighborhood workers. At least 10 local jobs will be created and/or retained. | Cincinnati Children's Hospital Medical Center | 5 | 0 to 30 days | \$1,000,000 |
| Hamilton | North College Hill Housing Rehab and Update | Construction of new facilities to expand current business | West Chester Rental | 10 | 0 to 30 days | \$630,000 |
| Hamilton | HOT DOGGIN IT EXPANSION | The target audience are adults, who are economically disadvantaged, displace from work as a result of layoffs and looking to acquire new skills in leadership, technology, or management. | HOT DOGGIN IT | 60 | 91 to 180 days | \$4,000,000 |
| Hamilton | Coaching Dreams Into Success | Objective: Equip every participant with new or enhanced leadership, technology, and management skills that will position them with the credentials, experience and capacity to perform for gainful employment. | Thoughts Developed, LLC | 150 | 0 to 30 days | \$986,400 |
| Hamilton | Aunt Flora's Kitchen Stadium | An intriguing atmosphere with excellent, upscale southern food. The mission is not only to have great tasting food, but have efficient and friendly service to ensure customer satisfaction in our restaurant. We want to be the restaurant of choice for all families and singles, young and old, male or female. Employee welfare will be equally important to our success. Everyone will be treated fairly and with the utmost respect. We want our employees to feel a part of the success of Aunt Flora's LLC. Happy employees make happy guests. We will combine a menu variety, atmosphere, ambiance, learning and a friendly staff to create a sense of place in order to reach our goal of over all value in the dining/entertainment experience. We want top profits for the owner, and a rewarding place to work for the employees. | Aunt Flora's LLC. | 48 | 31 to 90 days | \$1,500,000 |
| Hamilton | Endicott Biofuels LLC Ohio Biorefinery | Aunt Flora's LLC A. Aunt Flora's Restaurant B. Aunt Flora's Cooking School C. Aunt Flora's Eat & Learn Entrepreneurial Kitchen D. Aunt Flora's Complete Food Prep Commissary | Endicott Biofuels | 140 | 0 to 30 days | \$35,000,000 |
| Hamilton | Sustainability Coordinator | This program will create a new sustainability coordinator position at Cincinnati State Technical and Community College. The responsibilities would include monitoring campus wide initiatives to act as an advocate for sustainability issues on campus. This sustainability coordinator would report the status of all college wide initiatives to the administration, faculty and staff, students of the college. The coordinator would conduct an audit a sustainability audit for Cincinnati State. Other duties would include monitoring the recycling program and organizing a sustainability week. Student groups would be encouraged to participate in the program. The coordinator would also be responsible for monitoring and reporting on the progress of the program. Ohio is not immune to this new influx of immigrants as the 2005 Census reports. Of the total residential population: * 1.8% in Hamilton county are identified as Hispanic/Latino. * 2.4% in Butler county * 1.1% in Clermont county * 0.6% in Warren county | Cincinnati State Technical and Community College | 1 | 181 days or more | \$50,000 |
| Hamilton | Latino/Hispanic Academic Scholar Program | The Office of Admission at Cincinnati State recognizes the need to increase our efforts and services targeted the Hispanic/Latino community in the geographical area. Consequently, our office is committed to creating a pipeline for sustainability issues on campus. This sustainability coordinator would report the status of all college wide initiatives to the administration, faculty and staff, students of the college. The coordinator would conduct an audit a sustainability audit for Cincinnati State. Other duties would include monitoring the recycling program and organizing a sustainability week. Student groups would be encouraged to participate in the program. The coordinator would also be responsible for monitoring and reporting on the progress of the program. Ohio is not immune to this new influx of immigrants as the 2005 Census reports. Of the total residential population: * 1.8% in Hamilton county are identified as Hispanic/Latino. * 2.4% in Butler county * 1.1% in Clermont county * 0.6% in Warren county | Cincinnati State Technical and Community College | 100 | 0 to 30 days | \$600,000 |
| Hamilton | Greenhills Community Building Revitalization Proje | The installation of an ADA compliant elevator and entry door systems, in combination with new exterior ramping, sidewalks, and related safety upgrades will help this shared school facility meet its full potential and become the revitalization catalyst of a struggling nationally significant historic community. The Greenhills Community Building stands as the pivotal cornerstone structure in both the physical and cultural identity of the Village of Greenhills, Ohio. Listed on the National Register of Historic Places, Greenhills is one of only three New Deal Grant/Title II Transit oriented cities in Franklin D. Roosevelt's administration in 1938. The historic 30,000 square foot Community Building, administered by the Victorian Woods City School District, serves three communities and contains an important collection of integrated original New Deal WPA (Works Progress Administration) artwork. Full museum, sculptural base and related installations, as well as an extensive network of observation and two local museums are currently inaccessible to those with physical challenges. The development of school, community, and outreach programs is severely inhibited due to ADA accessibility issues. Currently, our fleet of vehicles utilizes an outdated VHS camera system. These units are aging and parts for these systems are becoming impossible to come by. As a result, two units are currently inoperable. We would like to continue this important program, as has increased the inspection of multiple CVTs and other critical infrastructure, to obtain the newest wireless technology would be cost-prohibitive due to our budget. This proposal would allow us to purchase enough units for our fleet, upgrade to a more stable model and allow us to continue this important program. | Greenhills Revitalization Organization | 100 | 0 to 30 days | \$283,400 |
| Hamilton | In-car cameras | Currently, our fleet of vehicles utilizes an outdated VHS camera system. These units are aging and parts for these systems are becoming impossible to come by. As a result, two units are currently inoperable. We would like to continue this important program, as has increased the inspection of multiple CVTs and other critical infrastructure, to obtain the newest wireless technology would be cost-prohibitive due to our budget. This proposal would allow us to purchase enough units for our fleet, upgrade to a more stable model and allow us to continue this important program. | City of Reading Police Dept. | 5 | 31 to 90 days | \$55,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Hamilton | Graduate Education in Prognostics and Health Manag | Aerospace industry, semiconductor industry, automotive industry and the energy sector are a few examples of industries that have focused on achieving advanced progress in their products and systems. Prognostics and health management for engines, bridge structures, space shuttles, combat vehicles, electric grids, wind turbines, and manufacturing processes, while different in application, come under a same set of principles and body of knowledge called Prognostics and Health Management (PHM). The purpose of this project is to create a multi-disciplinary integrated educational and research platform for graduate studies in the area of PHM for complex systems and to attract qualified students, specially women and minorities, to this field. At the University of Cincinnati, a number of departments teach courses and conduct research in areas relevant to PHM. However, there is no official graduate program with specialization on PHM. This emerging area can bring about innovation and re-generation of talents for not just our local companies including GE Aviation, PKG, and Wright Patterson Air Force Base, but also can position Ohio as a research hub in this area. Our students, local healthcare practitioners, and caregivers about using assistive technology options to remain at home and age in place. The program admits 30 students each year, and will increase its enrollment by a minimum of 5 students for the next two years to a maximum of 40 students with this project. Although current laboratory space exists, it does not support practice in "real life" experiences. The donated house will also serve as a resource for community members to test assistive technology. The house needs an early alert fire suppression system to meet building codes for commercial use. This involves the installation of a sprinkler alarm system and replacing the basement door to meet building code. Also, funding is sought to support the creation of additional 2 full time faculty positions to teach additional sections of courses to meet the current demand in the Cincinnati area. With added faculty, evening options can be made available to increase flexibility and enable additional individuals to obtain their degree. | University of Cincinnati | 20 | 91 to 180 days | \$1,000,000 |
| Hamilton | Occupational Therapy Assistant Demonstration House | Occupational Therapy Assistant Demonstration House | Cincinnati State Technical and Community College | 80 | 31 to 90 days | \$173,000 |
| Hamilton | Create the National Advanced Biologics Manufacteri | Nearly 80% of all of the new drugs in global development will be "biologics" as opposed to the traditional "small molecule" drugs. Biologics are strictly modeled after the larger molecules that regulate functions in the human body and are inherently more difficult to produce than small molecules made through chemical synthesis. These are numerous production challenges including contamination of production equipment leading to the introduction of "defectable" manufacturing impurities. These impurities require significant capabilities in biological, engineering, advanced materials, instrumentation controls and electronics among others, all areas where Ohio has world class capability. BioOhio proposes the creation of a physical Center (NABMC) to support Ohio in the global lead in this area of manufacturing. The existence of the center will attract global manufacturers of the new biologics including most of the major biotech companies in the world as well as the emerging follow-on (generic) biologics manufacturers. BioOhio would collaborate with the engineering schools at Case, OSU and UC, with Ben Venuta Labs among others to design, build and operate the Center. | BioOhio (formally, the Edison BioTechnology Center) | 1,500 | 31 to 90 days | \$3,000,000 |
| Hamilton | Creation of the "Medical Device Innovation Center | Ohio is a recognized national leader in pediatric medicine in the US with three of the world's most highly ranked children's research and clinical centers in Cincinnati Children's in Cincinnati, Nationwide Children's in Columbus and Rainbow Babies in Cleveland. According to researchers and physicians in these eminent institutions, the market for medical devices and other products specifically for pediatric use is dramatically underserved. BioOhio proposes to create a combination physical and virtual center to address these needs creating jobs, improving patient outcomes and lowering health care costs. MEDICO-P would do outreach to additional hospitals across the state and provide professional services in IP management, market analysis, product development and prototyping, etc. MEDICO-P would operate with increased ESIP's supporting emerging device companies across the State. BioOhio would collaborate with the engineering schools at Case, OSU and UC, with Ben Venuta Labs among others to design, build and operate the Center. The Center would work with interested ESIP's supporting emerging device companies across the State. BioOhio would collaborate with the engineering schools at Case, OSU and UC, with Ben Venuta Labs among others to design, build and operate the Center. | BioOhio (formally, the Edison BioTechnology Center) | 1,500 | 31 to 90 days | \$3,000,000 |
| Hamilton | Energy Efficient Window | Ohio is a recognized national leader in pediatric medicine in the US with three of the world's most highly ranked children's research and clinical centers in Cincinnati Children's in Cincinnati, Nationwide Children's in Columbus and Rainbow Babies in Cleveland. According to researchers and physicians in these eminent institutions, the market for medical devices and other products specifically for pediatric use is dramatically underserved. BioOhio proposes to create a combination physical and virtual center to address these needs creating jobs, improving patient outcomes and lowering health care costs. MEDICO-P would do outreach to additional hospitals across the state and provide professional services in IP management, market analysis, product development and prototyping, etc. MEDICO-P would operate with increased ESIP's supporting emerging device companies across the State. | Hamilton | Adult Vocational Evaluation and Job Placement | Goodwill has a long history of simple networks with local employers and can begin to be successful in a market with higher quality. | Ohio Valley Goodwill Industries, Inc | 100 | 31 to 90 days | \$200,000 |
| Hamilton | Compressed Natural Gas Fueling Station and Waste T | 10 CNG-fueled Residential Waste Collection Vehicles to service urban Hamilton County area and reduce CNG refueling station open to public. | Rumple of Ohio, Inc. | 10 | 91 to 180 days | \$4,000,000 |
| Hamilton | Neighborhood Geothermal Energy | Lot size can be a limiting factor on the application of energy efficient geothermal systems in older neighborhoods. This project will design and test prototype application of shared geothermal energy heat pump systems to groups of houses in an attempt to overcome the lot size restrictions. Four homes in an older section of Hamilton County will be analyzed for energy demand. A set of lot size rules will be drafted and based upon the resultant soil temperature profiles and groundwater characteristics, a shared geothermal heating and cooling system will be designed and implemented at those homes. The system design work will include an analysis of the benefits of increasing insulation to decrease heat loss in the homes in order to decrease the demand placed upon the geothermal system. The project will result directly in lowering energy use for the homes involved and will produce three new energy engineering and technician jobs. The project will indirectly create a new approach for applying energy efficient geothermal heating and cooling systems to older communities. | Trinity Engineering Associates | 3 | 31 to 90 days | \$275,000 |
| Hamilton | Housing Rehabilitation | Rehabilitation of two existing homes in Cincinnati area. Will need funds to completely rehabilitate homes and use these homes to house low income families in Cincinnati area. Will need to replace roof (approximately \$5000.00), roofing (approximately \$3000.00), kitchen areas (approximately \$2000.00), landscaping (approximately \$3000.00), electrical (approximately \$3000.00), and plumbing (approximately \$3000.00). Could start project immediately and would substantially increase spending in these areas. Would also increase home values in the area and provide quality low income housing for Cincinnati. | C & B Investors, LLC | 6 | 0 to 30 days | \$20,000 |
| Hamilton | Integrated Charger System for Lithium Batteries fo | Advanced Energy (AE) is technology that can diversify & decentralize Ohio's energy sources enabling a sustainable growth opportunity for Ohio manufacturers. Through the development of innovative new products by Ohio's small/medium sized companies conventional products to the traditional energy markets these Ohio companies can transition to be a strong economic contributor for these new energy markets thereby retaining and creating new jobs in Ohio. | Edison Materials Technology Center (EMTEC) | 12 | 0 to 30 days | \$300,000 |
| Hamilton | Greater Cincinnati Revitalization | WMI's goal is to revitalize the Cincinnati tri-state by rehabilitating foreclosed homes that require some cosmetic work and minor structural work. We seek to rehab approximately 5-10 homes in 1 year with the appropriated funds and help keep community values from decreasing, while putting skilled trades to work. WMI will inspect each and every home to make sure these homes meet the criteria of minor structural damage. This in turn will help keep rehab costs down and a shorter time frame to flip properties. In addition, we hope to create jobs for skilled trades, such as real estate agents, electricians, drywallers, carpet layers, painters, landscapers, roofers, HVAC's, excavators, insulators, carpenters, etc. Our goal is to make these homes more energy efficient and consumer safe while boosting our local economy. Thank you for your time. Sincerely, WMI, LLC By WMI's Cynthia Green and I am a resident in one of these foreclosed areas, I understand these homes' structural issues, I am an existing educator and school modernization budget for the Ohio districts (please see a word doc) idea. So many people have already been personally affected by all of the schools closings and the number is just growing. It would help make things easier for the school district. According to www.ohio.gov, Ohio has set aside 1.5 billion dollars to go to education and school modernization. Personally I think this is going to be very good thing! There are many school districts in my area alone that have attempted to pass a very numerous times and do not get it passed for anything. At least many schools have had to cut jobs, which leads to higher unemployment, less tax base, made pay-to-play with sports much higher, and many districts have just had to close down certain school all together. | WMI LLC | 50 | 31 to 90 days | \$250,000 |
| Hamilton | school modernization | I graduate from Taylor High School in 2008 and my district had already begun to suffer from not being able to pass a levy. Our lunch prices were so low. Our pay-to-play for sports increased. But I think on top of all, being bus service hurt us the most. Parents that never had to worry about getting their name to Brandon McCollum and I am a student at Beckfield college. I recently lost my job when I went into the navy and got discharged my job was not there for me when I got back. I am now currently working two jobs trying to stay on my own education but not able to get any healthcare benefits. I am kindly asking you to not just look at kids who are under the 300 percent above poverty level. To help students who are not receiving grants and are paying for their own college. | Beckfield College | 100 | 91 to 180 days | \$1,000,000,000 |

| Hamilton | Saint James School Energy Conservation Project | <p>Project Description: Upgrade school building windows with energy efficient and cost effective windows.</p> <p>Current windows located in our 1957 and 1963 wings are outdated, causing grossly inefficient and costly energy consumption.</p> <p>Main Floor: 16 classrooms -95' 4" x 9' windows Top Floor: 15 classrooms & library -95' 4" x 9' windows Basement Floor: 9 classrooms - 54' x 9' windows Basement Floor: Cafeteria - 15' x 4' windows</p> <p>Expected Outcomes: • Significant reduction in energy consumption which will result in lower utility costs • Improved instructional setting due to reduction of road noise & better classroom climate control • Elimination of condensation problems that could lead to mold • Reduction of dirt, dust, and other impurities due to current air leakage</p> | Saint James the Greater School | 100 | 181 days or more | \$800,000 |
| Hamilton | Success Through Empowerment Program(STEP) | <p>Seven Hills Youth Employment Program, trains and supervises 100 youth from economically disadvantaged families and youth in need of employment. These youth are placed in local recreation centers, in clerical positions, learning centers, on community clean-up projects, in summer camps, and in daycare. These youth attend six workshops, child care provider assistance, camp management, and substance. The program provided on-the-job training and experience. This program offers a month long basic job skill training in financial literacy, public speaking, character development, and site placements or opportunities of continuing education. Our goal is to assist our managers in obtaining job training, sustainable employment, positively contributing to their community, become role models, abstain from drug abuse, and develop marketable skills. After completion of the month long trainings trainees will have the opportunity to go back school or be placed in one of 4 programs. 20 students earn and receive training in the skills. 10 teens receive educational incentives to further their education</p> | Seven Hills Neighborhood Houses | 100 | 0 to 30 days | \$250,000 |
| Hamilton | Creating PK-8 STEM School Feeder System in Cincin | <p>Our strategy is to create a PK-8 STEM school feeder system that provides and enhances the educational and enrichment opportunities for all in our elementary education system that creates modern learning environments with STEM content contextualized in 21st century skills. Research has shown the need for STEM based learning as well as the benefits of 21st century skills in schools. These schools will serve as the first step toward a PK-16 STEM focus encouraging students to consider STEM careers. Funds will be used to transform existing schools to modern learning environments. It will pay for physical plant changes, technology infrastructure upgrades, teacher professional development, consultation of content and pedagogical experts, learning environment and technology support. This project is "school ready" in 2008/09 the partnership opened a STEM PK-8 School. To date, our PK-8 STEM School has shown great success in changing the learning environment and meeting designated 21st century learning outcomes. The partnership would use the same plan as used in 2008.</p> | Strive | 30 | 0 to 30 days | \$1,500,000 |
| Hamilton | Bramble Plainville Road Redevelopment Project | <p>This project was originally an ODOT project.</p> <p>Columbia Township is seeking funds to mill, resurface and reconstruct sections of Plainville Road and Bramble Avenue within township limits. This area has been targeted by the Township as an economic re-development corridor. Several new businesses have opened up in the area over the past few years. We are working to encourage additional growth in this area and are fringing a number of new developable areas. We will provide additional jobs and opportunities to our township.</p> <p>Rebuilding access in this area will certainly improve our ability to promote the Bramble/Plainville corridor as a regional job growth.</p> <p>This project had originally been included in the ODO (Metropolitan Planning Organization) funding but was eliminated at the last cut down date. Unfortunately, that date was after the March 15 deadline date with the state.</p> <p>This proposal is for the expansion of the Energy and Environment Center (EEC) at Cincinnati State. The EEC integrates community and technology, traditional and cooperative education with workforce development, graduate placement and retraining displaced workers, post secondary and K-12 education. All in the framework of the advanced energy market and the environment. The EEC will be a prototype comprehensive LEED Platinum, net zero energy structure containing new laboratories dedicated to renewable energy, energy efficiency, sustainable design and construction, bio-fuels, rainwater management, environmental technologies, sustainable and environmental horticulture as well as culture. The EEC is working with and seeking new strategic partners who are vital for broad regional support and success. This support will allow the EEC to offer traditional education and consulting services in the specific areas of expertise. The EEC will serve as regional resource for the rebirth and attraction of new industry. The EEC will be a Center of Excellence in energy and environment issues and solutions.</p> | Columbia Township | 50 | 91 to 180 days | \$2,000,000 |
| Hamilton | The Energy and Environment Center at Cincinnati St | <p>Environmental technician jobs. At MCRP training will focus on wildlife habitat restoration, greenways & trails, & vegetation management. Fieldwork trainees will develop marketable outdoor skills.</p> <p>We will collaborate with agencies that have existing job training programs. MCRP will pay tuition & hourly wages for trainees to attend 8 weeks of technical training (brownfields, mold remediation, asbestos abatement, OSHA construction, confined space and more) offered by the International Technical Workers Union Council (ITWUC).</p> <p>Trainees will be paid to attend career development classes, & potentially construction and energy efficiency training, offered by the Community Action Agency (CAA). MCRP will collaborate with ICWUC & CAA on field trips to Green Technology/brownfields sites in Greater Cincinnati. Working with CAA, ICWUC, City of Cincinnati, & others, MCRP will help trainees identify employment opportunities.</p> <p>Funds will be used to help create a 21st century learning community at Hughes Science, Technology, Engineering and Math (STEM) High School Cincinnati by enabling the use of one-on-one computing in the classroom, and providing technical assistance and professional development to enable teachers to fully integrate technology into the STEM school culture. There is an abundance of research on the positive outcome of one-on-one computing in schools, but it requires resources for teacher training and technical assistance. These funds, along with partner funding, will provide both the technology infrastructure (laptops, wireless) and the ongoing support to ensure that students have a wider array of resources to support their learning and can become fluent in their use of the technological tools of the 21st century workplace. Without support from the stimulus, the existing funding to support the Hughes STEM school technology through state and private grants and school district funding all only allow for the establishment of shared computer labs, which research shows do not have as great of an impact on student learning and achievement as one-on-one computing.</p> <p>Provide disabled worker access to computers, printers, copier/machines, and telephones.</p> | Mill Creek Restoration Project | 15 | 31 to 90 days | \$150,000 |

| Hamilton | Adult Workforce Training | <p>The second Renner EquityEM project, Community Views, is a partnership with the Over-the-Rhine Community Housing. Cornerstone subcontracted for day-to-day management and maintenance of this 12 unit scattered site project, ensuring a free that it meets the financial need for residents. Aquarius is a start-up company specializing in retrofit renovations of homes and businesses to meet the physical needs of our aging population. It is our intention to develop the strain on public resources that will be realized as more than 75 million baby boomers begin to make use of government entitlements such as Medicare. We believe the environments of this aging population using existing and newly developed universal design principles will enable them to remain independent longer thereby reducing the number of that generation who reside in state subsidized living facilities. We will strive to make their homes easier to use and maintain and much safer. This will reduce government and private funds being spent on assisted care. It will also allow a very productive and still valuable resource to our workforce to continue to contribute by simply adding work and home to meet their changing physical needs. We believe this will also help to temper those in the construction industry whose labor force have seen massive job cuts. Our dual created number is based upon a small start estimation of 1-2 projects. The final number could be much higher once the project takes off.</p> | Lasting Impressions Marketing Solutions | 5 | 91 to 180 days | \$300,000 |
| Hamilton | Community Views | <p>The first Renner EquityEM project, St. Anthony Village, is a 22 unit community in Over-the-Rhine. It was originally located in a "hot spot" for crime but the environment has become peaceful as a result of resident efforts. Cornerstone contacted with the developer to establish and facilitate the resident Renner EquityEM community prior to construction. Development involved rehabilitating 7 buildings with funding that includes low-income housing tax credits. High rates of occupancy and rent collection sustain the property's value. Resident retention is high and the community has collectively earned over \$60,000 in financial assets. This success has been achieved in spite of the failure of the developer to complete construction, their replacement by Over-the-Rhine Community Housing, four changes in management companies during the first three years and several turnovers in the current manager's staff.</p> <p>*Hoard Court will produce 25 new affordable rental units in 7 historic buildings. *All of the buildings were formerly vacant. They are located within one block, which is walking distance from downtown and near the historic Proxmire Market. *It is a second phase of the rehabilitation in this block. It will have a dramatic impact on the area. The first six buildings with 25 units were completed in 2002. *Occupancy rates in the first project are 100% and there is a waiting list. 70% of the residents are original. *Total development cost is \$3.4 million. The budget includes over \$100,000.00 in operating reserves, ensuring that the project will be sustainable.</p> | Colliers International | 6 | 0 to 30 days | \$300,000 |

| Hamilton | St. Anthony's Village | <p>The program will result in a state recognized Teaching Certificate. The trained Teacher Assistants will be employable in centers that have a sizeable population of Latino children as a collaborative assistant to the Lead Teacher. This collaboration will provide a rich resource to the students, parents, teachers and community. The Teacher Assistant will be trained and receive college credit in the key components of early childhood education with an emphasis on cultural education. The staff, administrators, and home visitors who have limited knowledge of Latino values, knowledge, and language will be benefited immensely. The specialized training for the Teacher Assistant will play a pivotal role in linking the Lead Teacher, students, parents and ultimately the community.</p> <p>test to determine college readiness. When tests indicate remediation is necessary Developmental Education (DE) courses are mandatory prerequisites. DE classes are four credit hour classes with a course-to-credit cost of \$80.00 per credit hour. Students use financial aid to pay for these classes. About 80% of new students test into at least one DE class and most test into 2 or more. Many fail to pass and must retake the courses. The College would like to implement an online support program. Admission is used successfully in other colleges, which would enable students to receive extensive learning and tutorial 24 hours a day. Implementing this approach would enable students to enhance their skills without the cost of DE courses. Those who increase their skills and test out of DE classes will save time and money thus enabling the student to enter into the workforce rapidly. For those students who do not test out, it will help their academic placement if they are ready for college or if they would benefit from the ABLE program.</p> | Colliers International | 18 | 0 to 30 days | \$500,000 |

| Hamilton | HELP (Homeless Empowering Life Plan) | In partnership with Local Unions and local businesses, recruit 50 youth, age18-30, for varied apprenticeships and job placement. Focus will be on homeless youth, high at risk youth, and no/low income youth. Recruitment includes assistance and mentoring in the completion of GED programs and resolving legal and court issues. Training includes preparation and establishment of a job readiness program. This includes development of an individual resume for the candidates and an assessment of social skills. Focus will be on inner-city african american youth. This program has been developed and recruitment is in place with over 100 applicants. We are now waiting for possible funding for the project. We have the support and assistance available from the Homeless Local 372, Mallett He Tutor, St. Francis Seraph Ministries and the Marianne Sharing Fund. | St. Francis Seraph Ministries | 50 | 31 to 90 days | \$148,000 |
| Hamilton | Cornerstone Construction Training | Cornerstone provides construction training and employment to men and women who are unemployed or unemployable, due to criminal histories, lack of education and skills. The trainees learn carpentry and other skills as they work on rehabilitating housing and commercial buildings in Over-the-Rhine, a downtown neighborhood with high unemployment, crime and poverty rates. There is a high demand for this type of work and the funding request will allow us to expand the program by taking on more contracts with property owners for work. This course provides the education for central service technicians who must have the knowledge and skills for preparation, sterilization, handling and storage of patient care items. The course is approved by IAHCSMM and graduates are eligible for the International certification examination to be designated as a certified Registered Central Service Technician. Hospitals are currently challenged to find the funds to have employees certified. This course, trainee recovery, and core career team or career course allows the new career team engaged in recruitment. The new career system will be made available to government and social service agencies, community and faith-based organizations that will benefit through coordination of efforts and reduced duplication of services. | Cornerstone Corporation for Shared Equity | 15 | 0 to 30 days | \$400,000 |
| Hamilton | Central Service Accelerated Certificate | This course provides the education for central service technicians who must have the knowledge and skills for preparation, sterilization, handling and storage of patient care items. The course is approved by IAHCSMM and graduates are eligible for the International certification examination to be designated as a certified Registered Central Service Technician. Hospitals are currently challenged to find the funds to have employees certified. This course, trainee recovery, and core career team or career course allows the new career team engaged in recruitment. The new career system will be made available to government and social service agencies, community and faith-based organizations that will benefit through coordination of efforts and reduced duplication of services. | Cincinnati State Technical and Community College | 75 | 31 to 90 days | \$100,000 |
| Hamilton | Knowledge Management System of Adverse Childhood E | The XMS will be completed in partnership with Cincinnati Children's Hospital Medical Center and the Ohio Department of Jobs and Family Services in Hamilton County, Ohio. Licensees will use the proposed geo-analytic tool (GIS) to track and improve the quality and efficiency of health and social services by children by promoting coordination of interventions, reducing disparities in the delivery of services, and eliminating duplicate efforts in geographically repeated areas. A primary purpose of the American Recovery and Reinvestment Act of 2009 is to increase economic efficiency through technological advances in health and healthcare. | Health Landscape, LLC | 16 | 0 to 30 days | \$1,500,000 |
| Hamilton | Healthcare Information "Dashboards" | HealthLandscape LLC will create secure, web-based healthcare information "dashboards" using geographic information and analysis (GIS) tools integrated with electronic medical and health record (EMR, EHR) systems being deployed through the state. This effort will be done in partnership with The Health Foundation of Greater Cincinnati, HealthBridge LLC in Cincinnati and the American Academy of Family Physicians in Kansas and Washington DC. Healthcare payers, providers, and community based health organizations will use the proposed geo-analytic dashboards to improve the quality and reduce the cost of health care by promoting better coordination of care across provider organizations and better understanding of health problems, goals, and interventions. Healthcare costs will be reduced by improving the consistency of care among health care providers, reducing the number of redundant interventions, increased understanding of the underlying issues causing health disparities, and by advancing research and education of the underlying causes of health problems. | Health Landscape LLC | 15 | 0 to 30 days | \$1,500,000 |
| Hamilton | Deaconess Hospital Electronic Medical Records Syst | Convert from paper medical record system to an electronic health record throughout hospital. This digital record would be included in the Health Bridge project containing medical records throughout region. Outcomes would include reduced errors, patient safety, reduction in duplication of medical testing, significant savings of funds for State Medicaid and Federal Medicare programs. | Deaconess Hospital | 574 | 181 days or more | \$3,859,854 |
| Hamilton | Youth Employment Student Success Network (YESSN) | The YESSN is a collaboration of multiple organizations who work with at-risk young people and who are involved in youth employment. The collaboration will provide a variety of summer work readiness opportunities to individuals ages 14-24 during June - August, 2009. The advantage of the collaboration is that the organizations will use a single point of intake for individuals not already engaged with one of the organizations and will use common data collection. In addition to providing paid quality summer activities, the collaboration will collect information on the individuals served that will help Hamilton County understand the work readiness, career exploration, and employment histories of the population served. We will be able to create a baseline from which to measure progress in future youth employment efforts. Our outcomes will include: increasing work readiness, exposure to high growth career tracks and industry recognized certification opportunities, and each participant will complete a career plan for their future. | Jobs for Cincinnati Graduates | 750 | 0 to 30 days | \$1,250,000 |
| Hamilton | The Glass Hand Recovery | The Glass Hand is a twenty year old business employing twelve trained people full time. We specialize in custom fiberglass creations such as statues and amusement ride bodies. We have worked for local, national and international companies including Disney. The accident in the secondary staff us badly. We are now poised to continue, with new work scheduled that will keep us going. Unfortunately, to keep the doors open and the staff employed we have run up a lot of debt to vendors and various government agencies. This funding would enable us to clear that debt and continue going business. Without it we may have to close. | The glass Hand, Inc. | 12 | 0 to 30 days | \$45,000 |
| Hamilton | Avondale Pride Center | Avondale Pride Center: \$250,000 community capacity grant to the Avondale Community Council to enhance the service capabilities of a non-profit community partner to offer youth, workforce development training and enhanced community services to nearby residents. The Community Council is working with United Way and other local based foundation strategy to improve the neighborhood. The assistance provided by the community council, the area was recently selected for \$13 million in Low Income Housing Tax Credits to improve the quality of affordable rental housing and to help stabilize the neighborhood. The area is also benefiting from \$100 million in private sector investments to attract, brighten and enhance the walkability of the neighborhood. The market "Take Back Better" center is critical to ensuring that the community partner can provide neighborhood services to keep residents empowered, recruit businesses to create jobs and keep criminals off the block. | Uptown Consortium | 50 | 31 to 90 days | \$325,000 |
| Hamilton | 3478 Burnet Avenue Re-Development Project | The Uptown consortium is seeking funds to re-develop 3478 Burnet Avenue and surrounding parcels. \$350,000 for demolition assistance, land acquisition and green space improvements to create a new 2-acre job ready site next to a new \$85 million commercial development - underway by Cincinnati Children's Hospital, Uptown Consortium and South Communications. The 2-acre site will be marketed for a design-build project that could allow for a 40-500 development and creation of 150 jobs in a high crime, low income community. The green-space improvements will enhance the pedestrian friendly nature of the business corridor to connect employees at nearby hospitals to support the neighborhood retail businesses that exist two blocks away. The elimination of this blighted influence will improve safety by creating a vibrant business district and encourage area employees to support neighborhood retail businesses. | Uptown Consortium | 50 | 31 to 90 days | \$350,000 |
| Hamilton | Ft Washington Way Decks | Hamilton County and the City of Cincinnati are collaborating on "The Banks" Riverfront development. This \$2 billion public-private partnership will transform the urban riverfront of downtown Cincinnati and Ohio's southern gateway. This major economic development project could be further enhanced by covering the gaps in Ft. Washington Way (Interstate 75/I-75) over four city blocks. Eliminating the gaps will connect The Banks project with the central business district and greatly ease the pedestrian traffic downtown. These "gaps" were envisioned with the construction of Ft. Washington Way over a decade ago with the design and construction piers/retainers established to accommodate future decks for green-space or development. If funded, the resulting plaza will encourage easy and safe pedestrian access to the central business district from not only The Banks project but also Northern Kentucky via the historic Reading suspension bridge. | Hamilton County Government | 100 | 91 to 180 days | \$50,000,000 |
| Hamilton | GCM Loan Reserve Fund | The Uptown Consortium is seeking funds to place in our GCM Loan Loss Reserve. \$50,000 for a 20% loan loss reserve to leverage \$250,000 revolving credit facility to assist in the attraction and expansion of retail businesses in the Burnet Avenue business district. The assistance provided by the state will allow for funding of a loan loss reserve to recruit small and minority-owned businesses in an economically-depressed neighborhood business district. The loan fund will be managed by the Greater Cincinnati Microenterprises Initiative. Private sector resources are funding the loan pool. The financial crisis has affected the availability of credit for small retail businesses. The state's investment will allow the community to attract businesses in this target and comprehensive redevelopment area. | Uptown Consortium | 50 | 31 to 90 days | \$50,000 |
| Hamilton | Brownlow Neighborhood rehab project | The Uptown Consortium is seeking \$250,000 - \$250,000 for rehab assistance and debt service subsidy for the Brownlow Building and parking lot. A commercial rehab retail center in high crime, low income neighborhood business area. The assistance for improvements and assistance toward debt service and carrying costs will be leveraged by 10% given private sector investments in excess of \$5 million contiguous to site. The state's investment will assist in the expansion of minority retail businesses that is projected to create 10 jobs. The assistance provided by the state will allow below market rent leases for small and minority-owned businesses, and the rehab of a blighted building. The project is in the city's most violent neighborhood according to the Cincinnati Enquirer. The elimination of this blighted influence will improve safety by creating a vibrant business district and removing the neighborhood of an illegal and open drug trade. | Uptown Consortium | 50 | 31 to 90 days | \$250,000 |
| Hamilton | Peak Energy Management | This solution will create a system that provides cost benefit to industrial users who push the upper limits of the Watts used for process heating applications. Customers using this system will see benefits by adjusting output at times where peak demand is reaching company limits based on approved demand with utility providers. The purpose of controlling the demand is to reduce the contracted maximum demand limit. In order to provide customers with the ability to manage power demand associated to furnace demand, instrumentation and software will be developed to adjust the per equipment energy demand across multiple industrial furnaces. Electronic instrumentation will be used to determine if a furnace should reduce its power draw by dipping the max output. User configuration would also allow setting optional priorities on the equipment to cut power to the least critical equipment first. The system will provide online data logging, peak demand input, equipment setup, slave communication for power demand, slave communication for power metering. | Super Systems Inc | 10 | 0 to 30 days | \$180,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Hamilton | 3500 Burnet Avenue Re-development Project | The Uptown consortium is requesting \$350,000 for demolition assistance and debt service assistance for new retail center to be constructed in high crime, low income neighborhood business area. The assistance for site remediation and assistance toward debt service and carrying costs will be leveraged at 1 to \$1,400,000 commercial rehab and new construction financing and loan and in the form of equity and debt and minority businesses. The assistance provided by the state will eliminate bid and allow below market rent leases for small and minority-owned businesses. This is a catalytic development in a high crime area. | Uptown Consortium | 50 | 91 to 180 days | \$350,000 |
| Hamilton | Community Center Expansion / Remodel Project | Project would entail expanding the existing size of our community center that was constructed in 1978. Scope of project would include electrical, mechanical and plumbing upgrades. Current council chambers are too small and inadequate for community. Expansion project would enlarge council chambers and add additional storage closer to the facility. Audio and video upgrades to include flat screen monitors in council chambers and services meeting room as well as acoustic reproduction systems for both locations. | City of Harrison | 0 | 181 days or more | \$450,000 |
| Hamilton | Rotary Cascading Bed Combustor | The RCBC will burn High-Sulfur Coal, Solid Waste, Sewer Sludge and more to generate electricity while reducing landfills, and allowing the burning of waste and coal without extremely low emissions. It also supports ash that can be used for soil reclamation and also used to produce recycled materials. | RCBC Technologies | 1000 | 91 to 180 days | \$20,000,000 |
| Hamilton | EarthReform.com Carbon Offset Technology Funding M | The Midwest region of the United States is a critical component to the success of the general welfare of the country and the world. It produces a large amount of food and other natural resources that are consumed all over the planet. Unfortunately it is also one of the largest and worst off-putting carbon producers in the country. In the spring of 2008, The Brookings Institution released its findings on the highest and the lowest carbon producing states in the United States. Cincinnati, Ohio ranked 38th out of 100 states. Measured against Cincinnati, Ohio, the Management Team at Earth Reform are all current Midwest residents, or raised in the Midwest and are committed to a safe and healthy environment. | Earth Reform | 8 | 31 to 90 days | \$750,000 |
| Hamilton | Project Rehab | Many properties in Cincinnati are sitting empty and are cause for concern. As they sit, trouble finds a way in, property values drop, neighbors have cause for concern, and the property becomes an overall eyesore. We have been waiting for the right time to get the going more than just our own homes which have all been fire uppers. By having more than just the \$50,000 we have available now to purchase one property at a time we could purchase several and get the whole projects started sooner which will employ approximately 12-15 construction and specialty jobs. We would employ a licensed plumber and licensed electrician as well as laborers for all aspects of rehabbing properties. Although this business is a for profit entity we intend on giving back to the community in the form of scholarships to local high schools. Also we plan to let the renters in need who have children receive a rebate of the rent to purchase gifts. To do this we will keep the margins down so that it will be for everyone. We would have approx 40 properties rehabbed and listed in the first 18 months with a plan to continue clearing up the neighborhood. Thank you for your consideration. | JMMR Holdings | 12 | 31 to 90 days | \$1,000,000 |
| Hamilton | clean taxi company | Small cab company. All models will be diesel VW Jetta wagon models. Cars will be supplemented with vegetable oil tanks. Jobs will be provided for drivers, oil collector/maintainers, secretary staff and others. Use primary veg oil to drastically reduce emissions. Also have a "swap out" plan for the public due to much smaller gas requirements that operate with gasoline. A study will be conducted on how many cars a local metro area can sustain. Cars with simple veg oil can run on that oil 90% of the time. Clean company that provides jobs and a cheaper /cleaner alternative public transportation. | business owner | 12 | 31 to 90 days | \$800,000 |
| Hamilton | Learning Life's Goals Through Street Hockey | Taking kids off the street and into the driveway to play street hockey. Approximately 400 sq. ft. of asphalt for rink. | Street Hockey League | 3 | 0 to 30 days | \$3,000 |
| Hamilton | Facility Upgrade | Renovation of the kitchen facilities that are used to serve the clients including cabinets, countertops, and furniture. Major renovation of front and back porches used by clients. A newly paved driveway for safe entry/exit of vehicles entering the facility. Property to conduct business case analysis, medical transportation, service providers, facility staff. | Beacon of Light Incorporated of Cincinnati | 2 | 31 to 90 days | \$30,000 |
| Hamilton | Cincinnati State Early College Academy | School districts to be directly enrolled in college courses such as Cincinnati State Technical and Community College while still in high school. Students will have the opportunity to earn a minimum college or college credits in the areas of Humanities and Biology, Mathematics, Healthsciences, Biotechnology, and Engineering. All courses will be taught in the high schools by classroom teachers. Full-time faculty from the College will mentor high school teachers to ensure that all students are successful. This will allow for seamless articulation to the students' secondary program. The program builds on many years of success in collaborating with area secondary school districts in bridging the gap between high school and college for students. This Greater Cincinnati Area is the largest in the nation. The program is a model for other areas. Expected Outcome: A minimum of 150 high school juniors and seniors will earn at least three (up to nine) college credits each year of the grant cycle. | Cincinnati State Technical and Community College | 250 | 31 to 90 days | \$225,000 |
| Hamilton | Air Conditioning the Entire Building with Ductless | Financial Aid counseling and other support services will be provided to a minimum of 250 high school students each year. The program will be implemented in the summer of 2009. It is the desire of the MND Board of Trustees and Administration to install approximately 35+ "Green Refrigerant" (Ozone Depleting Ductless Split, Air Conditioning and Heat Pump (Energy Star) units in every classroom of the entire school building, during the summer of 2009. | Mt. Notre Dame High School | 10 | 31 to 90 days | \$400,000 |
| Hamilton | Additional Server Space and Software | In addition to the Green Refrigerant for the air conditioning, the new ductless units will also act as a heat-bump during the moderate winter months, thus reducing the energy expense to operate the current heating system which are two 1985 boiler units. It is estimated that this job will directly create 10 jobs during the installation process. Additional employment is expected in the production of the ductless units. Thank you for considering this Project. If you have any questions, please feel free to email or contact my office directly at the below: Diane P. Barney, Business Manager | McAuley High School | 1 | 0 to 30 days | \$206,495 |
| Hamilton | Phone System with Voice | McAuley High School recently began phasing in a 1:1 TabletPC program. We soon realized that we need additional server space and additional bandwidth for the program. Students need additional space on their own laptops, and resources and research materials. These items will aid in the 1:1 program in reaching its fullest potential. The school is also in need of new Administrative Software for managing repair tickets, materials, daily attendance, discipline reporting, scheduling of classes, grading, billing, accounting, admissions, and health center recording. The cost of the above is prohibitive to us for specific software. A school site license for Goconquer Search Pad is \$1000, for Virtual Business - Personal Finance, \$1395, for a Dynflow license for all computers in the building, \$33,600, additional servers are \$70,000, and administrative software is \$100,000.00. This is a total of \$208,695.00. The skills our students need for success in the 21st century will be more easily accessed with these aspects of technology, generating more successful student outcomes for our 21st century learners. | McAuley High School | 10 | 31 to 90 days | \$250,000 |
| Hamilton | Professional Development for Technology | McAuley High School in Cincinnati, Ohio is in need of a new phone system and an upgrade of our wireless network to accommodate voice. Our current phone system is eleven years old and technologically outdated. It does not provide access to the features necessary to communicate with our constituents effectively and efficiently. A new wireless phone system with voice capabilities will provide us with the capacity, flexibility and ability to branch out school into the 21st century. The wireless features of the new phone system will help to ensure the safety and security of our students as administrators and teachers can be reached at all times of the day. A new phone system will also provide an automated calling system, allowing McAuley High School to communicate quickly and capably with parents in the event that an urgent message must be delivered. Administrative efficiencies will be greatly enhanced by the technology offered by a more modern, proficient, and voice-activated phone system. We seek \$250,000 for this project. | McAuley High School | 0 | 91 to 180 days | \$20,000 |
| Hamilton | Surge Center | McAuley High School has successfully implemented a tablet PC program into its curriculum. To prepare students to be technologically advanced leaders of the 21st century, tablets are used as a tool in our classrooms every day, extending learning opportunities beyond the classroom walls to walls limited only by the parameters of the world. In order to ensure that our students are able to take full advantage of these opportunities, teachers must be adequately prepared. Numerous conferences, such as the Laptop Institute, National Educational Computing Conference, and the Dynflow Conference, are available. These experiences are invaluable to teachers' classroom use of the tablet. Attendance at professional development sessions such as these allows our teachers to explore further creative options for use of the tablets and learn innovative ways to investigate new concepts, bring concepts to life, and assess them. Through our many progressive programs at McAuley High School, we strive to promote 21st century learning. We are seeking \$20,000 in funding for professional development to assist our teachers in this endeavor. | Cincinnati State Technical and Community College | 750 | 31 to 90 days | \$700,000 |
| Hamilton | Solar Panels | The Surge Success Center will serve current Cincinnati State Technical and Community College students and focus on student success and retention initiatives. The Surge Success Center will be offer several services that currently exist at the College such as advising, counseling, and tutoring. The Center will offer new retention initiatives such as an early alert program, peer mentors, and retention specialists. The Center will coordinate the early alert program that will help identify and work with students who are being placed in specific classes and/or have GPAs below 2.0. In addition, the Center will have a team of peer mentors that will assist with advisement, outreach, orientations, and personal mentoring. Finally, the Center will have three retention specialists who will work on a series of outreach projects to help those students who are having academic difficulty and those who have stopped out during the last year. These retention initiatives will help decrease our attrition rate and help more students complete their education and become part of the Greater Cincinnati Area workforce. | McAuley High School | 10 | 0 to 30 days | \$4,200,000 |
| Hamilton | Career Center | McAuley High School, located in Cincinnati, Ohio is seeking funds for solar panels to enable the school to be more energy efficient. Solar panels will be strategically placed on the roof of the school to maximize their efficiency. The solar photovoltaic cells will convert photons into usable electricity, providing clean, renewable and green energy from the sun. The goals of this program are, most importantly, to save a smaller environmental footprint, but also to produce lower utility bills, create a more comfortable building with healthier indoor air, and use less solar power to its best advantage. The school seeks to become more environmentally prudent as well as energy efficient. Students from the school's classes in Engineering programs, physics classes and geophysics classes will learn in a hands-on, eye witness manner about energy efficiency. McAuley High School will promote energy efficiency and being green to the wider community. We seek funding for the cost of this project, approximately \$4.2 million dollars. | Cincinnati State Technical and Community College | 500 | 31 to 90 days | \$420,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Hamilton | Capital Campaign | The objective of the capital improvements to the FDNH is to restore usability of the lower level and provide space for our enhanced youth and adult services. 1. Provide a safe haven for children, youth, adults, and senior citizens to access services that enhance academic and personal development. 2. Create an alternative learning center within the community where youth can receive help with homework, computer training, mentoring, and youth employment and overall personal development. 3. Empower youth to make informed decisions by offering workshops on topics such as pregnancy prevention, anger management, drug prevention, and leadership development. 4. Recopen the Friday Street Slating Fire that would create economic opportunity for the center and provide children and youth with a activity that is not available in the West End. 5. Expand the computer lab and provide 44 access to the entire West End Community 100 youth with a 60% or better participation rate throughout the year. 6. Provide 180 hours of academic tutoring services and 180 (separate) hours of cultural awareness after 30 anger management sessions, 60 pregnancy and prevention sessions. | Seven Hills Neighborhood Houses | 50 | 0 to 30 days | \$289,500 |
| Hamilton | Hamilton County Building Efficiency Project | The program consists of approximately 80 energy conservation and building retrofit projects throughout Hamilton County government designed to reduce energy and resulting operational costs. In essence, funding would be provided to supplement the County's traditional energy conservation program. The County has completed in depth analysis on each of these projects and can provide additional information on energy savings and costs as needed. Projects are of varying cost and complexity with paybacks ranging from 1 to over 100 years. The projects with longer paybacks, in many cases, are critical as they contain larger annual dollar value savings. These represent projects that the County would not typically be able to afford to complete, yet have significant stimulus benefit in terms of reducing annual costs and the resulting ability to maintain current levels of workforce. | Hamilton County | 78 | 31 to 90 days | \$5,495,000 |
| Hamilton | Hamilton County Land Recycling Program | Hamilton County, in cooperation with the local Port Authority, has prioritized a broad listing of the largest industrial and commercial sites requiring remediation and reclamation in the County. Together, these sites consist of over 100 acres of potentially developable land in the urban core. Each of these sites has the potential to yield significant economic development and revitalization impacts should property related challenges be addressed. The County's program seeks to leverage other sources of public and private funding along with stimulus dollars to provide the most efficient reclamation effort possible. | Hamilton County | 5,000 | 91 to 180 days | \$10,000,000 |
| Hamilton | Choices, Inc. | Choices, Inc. offers a number of services to the homeless in Over-the-Rhine in Cincinnati, Ohio. It also serves as the steering group for the recent teenage volunteer based in the M.A.C.H. 1 (Mother Advocates for Community Housing). As you can expect, homelessness continues. It has developed between the Mosler Men and the Community in OTR. Choices is the bridge between two seemingly disjoint communities. It also aids retreat and other special experiences for Ohio colleges and high schools. The Executive Director of Choices is a former Cincinnati man, Mike Rogers, who earns his livelihood by staffing the Choices every day and often times working 7 days a week, with no night time hours, as that groups such as National Anonymous and District 1 Police can meet. Mike has had this job for over 10 years and is committed to a non-profit affordable housing group benevolent. Choices is currently being used to help 128 young at risk, over 1000 people with the our workers union. Choices has served as a valuable meeting space for the job training experience. Choices also provides health care when people from all walks of the can gather. | Choices, Inc. | 1 | 31 to 90 days | \$50,000 |
| Hamilton | Angelo's Crossing | We are trying to develop approx. 3 acres of land in Mt. Washington, City of Cincinnati. The land will be used for affordable housing sites and we would be building Ranch style homes. Currently, these homes will range from 230k-275k and provide a much needed housing for people diversifying in the area. The goal of the project is reaching a level where we would be unable to move forward. With stimulus funding for the project being included in the stimulus plan, we would be able to move quickly and get the project started in about 60 days. This is a very good project that would help stimulate jobs, new construction, lending, and the community. We hope you will consider us as part of the solution to help revitalize the housing market and the economy in Ohio. Thank you for your time. | Rosa Brother's contracting, LLC | 40 | 31 to 90 days | \$200,000 |
| Hamilton | New Windows | McAuley High School's 50 year old building still has its original windows which are not energy efficient and which, during a hard rain, leak. The current windows have a high U factor and R factor, causing a high infiltration rate and leakage, both of which have a negative environmental impact due to increased energy consumption. These factors of windows in all classrooms, both front and back of the building, cause the school to add to carbon emission, fossil fuel consumption, and potentially global warming. In order to maximize the use of monies spent for utilities, the current windows must be replaced with energy efficient windows. McAuley High School is requesting \$ 600,000 to replace existing windows on the original building, the first step toward preparing the building for moving from an agrarian school calendar to a longer school year, eventually, year-round school. Monies saved on utility bills after new windows are installed will be used to continue improvement of programs incorporating 21st century skills for McAuley High School students. | McAuley High School | 10 | 0 to 30 days | \$600,000 |
| Hamilton | Funding for 1:1 Tablet PC Program | McAuley High School's 1:1 TabletPC program enables students to encounter and embrace new skills for a changing global world with necessary advanced technology to enhance achievement as well as critical, independent and creative thinking. This technology allows teachers to support different learning modalities and empower each student. It also gives them opportunity to provide rich learning tools for knowledge, diversity and workforce collaboration. We seek funding to provide financial assistance to students whose families' combined gross income is less than \$40,000. The current fee for the tablet program is \$600/year for 4 years; assistance would provide for half that amount (\$300/year) family for 100 families per grade level, or \$500,000 total, and enable families which are currently experiencing financial hardship to access advantages which might otherwise elude them. This financial assistance program would last for the students' high school years to help lower income families through this difficult economic period. | McAuley High School | 0 | 0 to 30 days | \$500,000 |
| Hamilton | Library Solar Panel Installation | Remove 6 10 sq. ft. school binary roof and replace including the addition of 2" EPS insulation and solar panels. Engineers estimate that the project will pay for its energy savings will occur in 12-15 years. The school is planning to install solar panels on school buildings over the next 15 years. | St. Xavier High School | 75 | 91 to 180 days | \$175,000 |
| Hamilton | Campus Safety | Several college sites asks for events have occurred with troubling frequency and create concerns for safety and security. Cincinnati State must take better use of prevention methods that increase the effectiveness of our police officers through training and enhanced equipment. To better equip Campus Police and enhance safety and security we propose to purchase equipment to supplement the College's capability to provide a safer campus for those that seek and attend our campuses and to provide needed security enhancements, safety communications and video surveillance across campus and in the buildings. This would include 2 Satellite Telephone emergency kits in the event of lost land line telephones and catastrophic failure of cell phone towers, 10 Motorola XTS 2500 800 MHz radios with accessories with intercomparable with Cincinnati Police, Fire, EMS to emergency operations can be handled safely and quickly, security cameras in key locations, programmable locks to computer labs and mobile data class computers for police vehicles to facilitate rapid information retrieval. We would also like to add a data panel to save gas and provide better coverage. | Cincinnati State Technical and Community College | 19 | 0 to 30 days | \$532,220 |
| Hamilton | Gateway Distribution Inc. | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Hamilton | Reis Trucking, Inc., a Clean Fuels Ohio Partner | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Hamilton | Fyda Freightliner Cincinnati, Inc, a Clean Fuels O | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Hamilton | Green and Healthy Schools as Learning Tools | Four Professional Development Workshops for teachers and administrators in public school districts to incorporate a school building's sustainable design features into its curriculum. Expected outcome: 65% increase of participants who demonstrate a greater awareness and understanding of environmental stewardship. | ALLY | 2 | 91 to 180 days | \$30,000 |
| Hamilton | Harvey D. Bailey Inc. , a Clean Fuels Ohio partner | Preparation for green collar jobs This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions by utilizing anti-idling technologies for 15 units and one auxiliary power unit. | Clean Fuels Ohio | 5 | 0 to 30 days | \$85,000 |
| Hamilton | OTR Receivership Program | The project will utilize an existing, previously successful business model to restore roughly 20 housing units to owner-occupied and rental housing. The buildings are currently vacant, distressed, and surround Ohio's oldest farmers market - a market that is growing and producing jobs but which struggles with surrounding blight. Properties would be acquired through legal proceedings, stabilized, and transferred to owner-occupants. All properties are historic, within Ohio's largest urban historic district. All stabilization work will be done consistent with both Secretary of Interior standards for historic rehabilitation and Leadership in Energy and Environmental Design (LEED) certification. The required federal stimulus funds would supplement funding by the City of Cincinnati and private sources. Work will be done by the OTR Foundation in collaboration with the City of Cincinnati and the Corporation for Friday Market (also a non-profit). | Over the Rhine Foundation | 5 | 0 to 30 days | \$220,700 |
| Hamilton | Evolutionary Software Development | Simplance is trying to obtain assistance from the State of Ohio for unemployed and under-employed people to take advantage of Simplance's investments in software development. Simplance basically has already accomplished what Microsoft through Ohio and the European Union through Europe are seeking to accomplish. Put it in plain terms: Simplance makes it possible for people with very little development experience or knowledge to develop robust form-filling, compliance and other rule-based software applications. Simplance desires pilot program funds to stabilize and stabilize an operations and, in turn, teach people how to develop software applications using Simplance's innovations and platform. Simplance has submitted proposals on this site before but never received any response. Whitcomb to operate entirely on electric power. The first prototype was completed & fully operational in February of 2008 & still is in use today on a daily basis. OTR has successfully demonstrated the opportunities & challenges involved in electrical conversion of automobiles. Budget constraints have not limited our success in building a prototype & gain a thorough understanding of the challenges & opportunities involved with electric conversion. This knowledge also recognizes the competitiveness of available battery technology and the electric wholesale power market. | Simplance | 5 | 0 to 30 days | \$100,000 |
| Hamilton | Electric car creation and development | OTR is positioned to engage in dramatic growth & is preparing to acquire the capital & physical space needed to capitalize on an automotive market yearning for alternative methods of transportation. The OTR has the capacity & the expertise to convert a standard, combustion engine automobile to a purely electric car. Reduce emissions, improve response efficiency, energy & advance vehicle safety. Inform the public on availability & advantage of the use of electric cars. and no cost technical support. Since 1990, FCCI has passed thousands of computers on to schools and other nonprofit organizations. We provide training and tech support for, D.A.V.s, handicapped individuals, low income families, students, foster children, offender's children, and at otherwise disadvantaged individuals. | Over the Rhine Electric Morot Car Company | 100 | 0 to 30 days | \$1,000,000 |
| Hamilton | Computer Training | Low income families can't afford to pay for telephone tech support when they have problems or questions. FCCI is responding to this need by providing our community's first bi-lingual Tech Support Call Center, and a wide range of technology based support services, training programs and events. Our Children will benefit the most, by being in a much better position to deal with the technological challenges of tomorrow's global economy. The unemployed get computer skills, use in creating a resume, or applying for a job online. Donating entities are disposing of computer hardware in accordance with EPA regulations, which helps protect the environment. Our entire community benefits through access to technology being made available to those that need it, but simply aren't offered it. | Full Circle Group, Inc. | 6 | 0 to 30 days | \$247,600 |
| Hamilton | Dwelling Upgrade and Refurbishment | Interior deep backscraping including leveling and debris removal. Refurbishment of patio room. Laundry removal and upgrade. | Home Improvement | 5 | 0 to 30 days | \$75,000 |
| Hamilton | (SEEL) Program - Smart Energy Environmental Living | TO provide over 20 low income households with with an energy efficient Appliances. This will help reduce their monthly utility expenses, save water and help the environment. Money saved will help low income people have more disposable income to help stabilize the economy and engage in more culturally enriching activities such as going the museum, plays, and taking classes at the local universities or community colleges. | Holdstein Management Group LLC | 20 | 0 to 30 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Air Conditioning | McAuley High School is located in the North Central Energy Star Climate Zone, bordering on the Northern ESCZ. During the months of May through September, humidity and the temperatures are very uncomfortable, sometimes unbearable. In this typically very hot and humid Cincinnati weather, optimal learning cannot take place, and discomfort levels of teachers and students are high. We are requesting funds to air-condition the original building in order to allow students and faculty to remain in the building and to continue to provide quality instruction. We are requesting funds to air-condition the original building in order to allow students and faculty to remain in the building and to continue to provide quality instruction. We are requesting funds to air-condition the original building in order to allow students and faculty to remain in the building and to continue to provide quality instruction. | McAuley High School | 10 | 31 to 90 days | \$15,000,000 |
| Hamilton | Seven Hills Neighborhood Houses Emergency Assistan | Assistance Program provides food, utility, and rent or mortgage assistance to families that are in need of food, in danger of shut off, or facing eviction and loss. Individuals have the ability to receive financial counseling and parenting assistance. The goal is to help people receive and maintain basic needs of food, shelter, and clothing. Emergency Assistance Staff are responsible for completing a needs assessment of the clients to determine the extent of each client's circumstances. The Emergency Assistance Counselor offers clients an opportunity to develop a strategic plan to create a personal budget, examine financial management, and determine action steps for the client to follow. The Emergency Assistance Counselor follows up appointments with clients. Over 200 individuals and families are served each month through the Emergency Assistance Program. Seven Hills partners with St. Barnabas Church and the Freedom Foodbank to meet the needs of Cincinnati residents. | Seven Hills Neighborhood Houses | 3 | 0 to 30 days | \$100,000 |
| Hamilton | Early Childhood/Teacher Education Career Developme | Early Childhood Education and K-12 Teacher Preparation We know this county lacks qualified K-12 teachers. Often, the best teachers have started in Early Childhood Programs and have significant experience, yet may not fully understand how to transition into higher levels of learning to be a K-12 teacher. This program is designed to provide quality Early Childhood instruction (as has traditionally been done), yet combine other career pathway concepts into the curriculum. The average annual salary of an Early Childhood Assistant is \$17,103. This salary nearly doubles as an elementary teacher, middle school or high school teacher. This projects seeks to integrate vigorous career counseling, curricular innovation, K-12 job shadowing, and K-12 internships to create a "hybrid" early childhood education-K12 teacher education program. The goal of the project is to equip each student entering the Great Oaks program with a solid experience to enter Early Childhood education, yet also know the requirements, opportunities, and investments needed to progress into the teaching profession at the K-12 level. Dual Credit Rapid Expansion In 2007, 25 Great Oaks high school students earned 3,125 college credits with several regional higher education partners. Great Oaks has education agreements in place. The school wants to rapidly expand its dual-credit concept across all program areas and expand into new agreements with a stretch goal of 6,000 college credits earned by 2011. This granting of college credits supports the Governor's vision for a much higher percentage of high school seniors earning college credit, thereby decreasing time to degree and promoting efficiencies. The project is expected to impact 800-1000 students and supports Chancellor Fingerhut's Higher Education Strategic Plan. The return on investment is significant. The project also supports our students and their families by decreasing the overall cost of higher education, and increasing their time to degree and entry into the workforce. It is clearly a win for regional economic growth and a point of collaboration between education and training providers. | Great Oaks Institute of Technology and Career Deve | 100 | 0 to 30 days | \$149,500 |
| Hamilton | Dual Credit Expansion | This granting of college credits supports the Governor's vision for a much higher percentage of high school seniors earning college credit, thereby decreasing time to degree and promoting efficiencies. | Hamilton | Health Information Technologies Career Pathway | Health Information Technologies Project Partnering with regional healthcare and long term care employers (such as Health Alliance, Children's Hospital), the project will provide a trained and qualified workforce in the emerging "health information technologies" sector. Great Oaks will create a tract within a currently developed healthcare career pathways driven by business needs and by collaborating with regional ABLE and postsecondary institutions. Key components: 1. Healthcare employer consortium established and skills and job needs defined. 2. Healthcare Information Technologies certifications and credentials identified. 3. Curricular innovations and improvements across academic and career technical programmatic areas. 4. Classrooms, lab space, and equipment is enhanced or expanded to meet standards. 5. Healthcare information technologies career pathways (with an on-going regional leadership team with employer) are established with a continuum of education and training opportunities with credit stackable certificates so that courses all transfer. 6. Expected to impact 800 participants within three years, including incumbent and displaced workers, high school students, and adult learners. The program links trainees with community services, education, and positive peer relationships. They will: • Avoid of high risk behavior and situations that can lead to violence • Develop life skills • Stay out of the criminal justice system • Obtain substance abuse treatment or behavioral health counseling • Gain job skills and obtain employment • Complete their education • Improve family relationships | Great Oaks Institute of Technology and Career Deve | 500 | 31 to 90 days | \$325,000 |
| Hamilton | Out of the Crossfire | The program is part of a continuum of effort to combat violence and street crime that includes the Partnering Center and CPDF teams, Casefile Initiative, and the Cincinnati Initiative to Reduce Violence (CIRV), the last an intervention that focuses on hardcore perpetrators. Services are voluntary and free to the client. Number to be served at any one time is at least 25; in excess of 250 to 400 over the course of the year, depending on scaling level. | Out of the Crossfire | 8 | 0 to 30 days | \$300,000 |
| Hamilton | Avondale Community Rebuilding Initiative | Once fully staffed and stably funded, OOTC aims for the following changes in the community: We are targeting 22 existing low income/section eight dwelling/uniting quarters that will receive new energy efficient windows, improved and upgraded HVAC units, weather proofing of all buildings, mold remediation performed by a crew of work center members, new roofing provided by displaced workers, and we are going to bring these low income dwellings up to electrical code. We are a manufacturing company in Cincinnati that has been in business for three generations. We have been primarily impacted by the recession and the automotive decline. Approximately 60% of our business is tied in with the auto makes, both foreign and domestic. We have been pressured by offshore competition for many years. The offshore competition has us and all U.S. manufacturers at a distinct disadvantage because of our practices by China and other. We need to automate more of our processes and provide skilled training for our employees. We have laid off nine employees since November 2008. We want to bring these employees back and train them on automated operations. These investments will help us to compete not only with U.S. manufacturers, but also against offshore competition. These funds will help to offset some payrolls and also invest in automated equipment and upgrades of existing equipment. We may not be able to continue our business if we do not receive these stimulus funds. We are a small manufacturer, but we provide jobs and a tax base for the community. We ask for your assistance. Thank you. | Carplin Place Apartments LLC | 25 | 0 to 30 days | \$500,000 |
| Hamilton | Recession Recovery | New Fire Station and Emergency Shelter. A total of three floors: One for the emergency shelter, main floor for offices and truck bays and a four for living quarters. Studies show access and ability to use the Internet help improve students' learning, job prospects and daily living. Access to computer resources and to the Internet is prevalent - over 91% of all high school students have it. However, there is still a digital divide with low-income and minority students having access at home. This project is to build. First, Great Oaks will launch an initiative - One to One - a laptop for every student among our four campuses which draws from 36 districts across 12 southwestern Ohio counties. It's a commitment to bolster learning outcomes, to support students' ability to compete in today's global economy, to encourage parental engagement in the learning process. Second, we'll equip our district, one of the nation's largest career-technical education districts, with BlackBoard technology. This strengthens our learning modalities, especially with distance courses, promotes district-wide efficiencies, and improves parental engagement via access to student progress. Both components will enhance our regional capacity to be connected, informed, and technologically literate. | General Chain & Manufacturing Corp. | 9 | 0 to 30 days | \$120,000 |

| Hamilton | Regional computer & technology capacity building | Due to the high rate of foreclosures in the State of Ohio, as well as the current economic climate, our Chapter has many clients requesting emergency financial assistance for lease breaks and eviction prevention. Our program is not one of ongoing support, but rather temporary assistance toward a path of self-sustainability. Most are individuals seeking new employment due to job loss, or who have had an exacerbation related to their MS resulting in temporary unpaid leave. Through this program we are able to bring clients current in their rent or mortgage from which point they are able to make payments moving forward. Without our program, more families would be utilizing government housing and SSDI at a much younger age and for a much longer time than those for whom these benefits were intended. The Cincinnati Hebrew Day School serves as a school food authority for the National School Lunch Program. More than 50% of the school's student body meets the eligibility for the federal free or reduced lunch program. The lunch program is in dire need of a walk-in refrigerator freezer and new industrial kitchen sinks. We are one of the only school food authorities in Southwest Ohio serving kosher meals. Due to the lack of availability of these products in our region there is an acute need to have single frozen storage space to purchase these items. We have been unable to take advantage of quantity discounts on our kosher programs and commodity purchases because we lack adequate cold or frozen storage facilities for these products. Additionally, there are irreparable leaks in our industrial kitchen sinks. We are in desperate need of replacing the two commercial stainless steel triple sinks and faucets. | Great Oaks Institute of Technology and Career Deve | 500 | 31 to 90 days | \$250,000 |
| Hamilton | Foreclosure and Eviction Prevention | Without this program many of our clients would end up in homeless shelters without transportation to work, or in government housing projects. Many would then make the decision to leave the work force and apply for Social Security Disability. People tend to be diagnosed with MS between the ages of 20-40 and two-thirds of those diagnosed are women, many of whom have small children. Without our program, more families would be utilizing government housing and SSDI at a much younger age and for a much longer time than those for whom these benefits were intended. | Hamilton | Do Right! Campaign | Focus activities around family obesity. The neighborhoods served are primarily low-income, minority areas. The program includes collection of baseline data on obesity related indicators. The data is used to develop implementation plans to improve nutrition and physical activity in the neighborhoods. The assessments gather information about individual, community and environmental factors impacting obesity and include focus groups, resident surveys and a "walkability" survey. It acts in four neighborhoods in Cincinnati. Evaluation will track if short and long term outcomes. The preliminary short term outcomes to be measured are: Community representatives engage in the Do Right Campaign planning process. Community representatives participate in Do Right Campaign implementation and outreach efforts. The preliminary long term outcomes to be measured are: Families increase physical activity and improve nutrition, and Families improve access to opportunities for physical activity and nutrition resources. | The Center for Closing the Health Gap | 30 | 0 to 30 days | \$250,000 |
| Hamilton | Mid-American Disaster and Terrorist Preparedness C | and other disasters." Most of the current training is in New Mexico, Alabama, Nevada, Texas, and Louisiana - these locations are great distances from America's mid-west and eastern seaboard where the majority of America's population is located. Great Oaks, in partnership with the Ohio Department of Public Safety, the Division of Emergency Medical Services, Hamilton County Police and Fire Chief's Association, the Ohio Police & Fire Chief's Association, the Hamilton County Emergency Management Agency, the Ohio Peace Officers Training Commission, propose to build a state of the art single or multi-story training facility to address: | Great Oaks Institute of Technology and Career Deve | 350 | 91 to 180 days | \$15,000,000 |
| Hamilton | School Shootings: The Prevention, Response and Re | Individual or small groups engaged in mass murder i.e. school attacks, mall attacks or attacks on large crowd venues terrorist attacks on U.S. (foreign or domestic) Arms, explosives, hazardous materials organized criminal enterprises National Incident Management System natural disasters Command Leadership and Crisis Decision Making In February 2008 students in Braid Ridge, Mansfield, Conard, and DeLark were shot and killed by their peers. School districts do not know what to do when the shooting starts. Training for Ohio's school districts and police departments which transcends traditional "lock down" measures is proposed. "Safe School Plans" include bomb threats, chemical spills/leaks, fire/explosives, guns/weapons in school, and involve "locking down the school." What isn't identified is the magnitude of multiple victims and/or multiple offenders. While "lock down" is one important strategy, others such as: avoid evacuations, emergency escape procedures, shelter-in-place, alternative sites, emergency kits, and internet and external communications capability, including radio contact with police dispatchers, needs addressing. This will combine a regional forum with multiple stakeholders, with the schools and public safety entities engaging in training with curriculum developed by the Tri-State RCPI. Training includes prevention, history, responsibility, classroom survival, the impact of entertainment, and post event decision making. We train 500 public safety agencies and school districts. In the next 4 years 15% to 20% of all active police officers and fire fighters will retire due to the Delayed Retirement Option Program. This means we must produce new quality recruits and train them using the most up to date methods. A new training model called Police Training Officers (PTO) is what is needed. Great Oaks proposes to provide Ohio's 700+ police agencies with training in PTO, the first new post-academy field training program in 20 years. Police Training Officers are critical to the ongoing training innovation in law enforcement. PTOs have been tested by the Ohio State Police with excellent results. Recruits enter the field with problem-solving skills and display remarkable leadership when they are to work with citizens to fight crime and mitigate disaster problems. PTO is based on community policing and problem solving and ensures that officers work with citizens to solve problems and are able to address ethnic and cultural differences. Great Oaks Public Safety Services will train more than 15,000 students each year, and will provide 12 train the trainer courses over 3 years reaching 300 or 42% of Ohio's police departments. Norwood City Schools is a small urban, high needs district. The project would be to conduct a site survey to determine the best points for connectivity in all 7 district buildings, replacing network infrastructure in all 7 buildings, installation of wireless LAN in all 7 buildings, installation of 149 interactive boards/projectors for classrooms and labs and 36 laptop computers for each of the grade levels within each of the 7 buildings. | Great Oaks Institute of Technology and Career Deve | 300 | 0 to 30 days | \$150,000 |
| Hamilton | Police Training Officer Program for Ohio | We would contract out for the installation of the listed components and therefore create more jobs for local companies. | Great Oaks Institute of Technology and Career Deve | 700 | 31 to 90 days | \$200,000 |
| Hamilton | Technology Infrastructure | PrecisionTemp is a Cincinnati product development & manufacturing company. The Company currently has patented and proprietary technology for instantaneous gas-fired heaters for continuous hot water and hydronic heating. PrecisionTemp's commercial distributor booster heaters are instantaneous gas-fired products that replace high current draw electric heaters in commercial and government food service applications. This high efficiency product uses natural gas to replace electricity. Particularly in Ohio which gets most of its electric power from coal, PrecisionTemp gas booster heaters reduce the carbon footprint by more than 67% and save electric demand of the grid. They also reduce operating cost by thousands of dollars per year. That will have a substantial positive economic impact on both chain restaurant operators as well as public foodservice operators such as schools and generate jobs in Ohio. The stimulus funds would be used to expand the manufacturing, hiring and marketing of this product. | Norwood City Schools | 50 | 91 to 180 days | \$2,073,200 |
| Hamilton | Reduced Emissions Sanitizing System (Corrected App | PrecisionTemp is a Cincinnati product development & manufacturing company. The Company currently has patented and proprietary technology for instantaneous gas-fired heaters for continuous hot water and hydronic heating. The Company also has the expertise and knowledge to develop a high efficiency low emission sanitizing diesel (Diesel Atomizer Burner) burner for continuous hot water and/or hydronic heating. This Diesel Atomizer Burner has direct application in military use for field showers, hazmat decontamination and food preparation where diesel burners are used for such applications. The Diesel Atomizer Burner also would benefit first responders and has civilian uses as well. The stimulus funds would be used to develop, certify, manufacture and market a range of these products. | RAD Technologies, Inc. dba PrecisionTemp, Inc. | 25 | 0 to 30 days | \$900,000 |
| Hamilton | Clean Diesel Atomizing Burner | PrecisionTemp is a Cincinnati product development & manufacturing company. The Company currently has patented and proprietary technology for instantaneous gas-fired heaters for continuous hot water and hydronic heating. PrecisionTemp's commercial distributor booster heaters are instantaneous gas-fired products that replace high current draw electric heaters in commercial and government food service applications. This high efficiency product uses natural gas to replace electricity. | Hamilton | Reduced Emissions Sanitizing System | Renovations to current primary buildings which includes: replacement of HVAC systems, lighting, etc. Renovations to HVAC system at Wyoming High School to add test conditions to the gymnasium area. PrecisionTemp is a Cincinnati product development & manufacturing company. The Company currently has patented and proprietary technology for instantaneous gas-fired heaters for continuous hot water and hydronic heating. One such product, the TenTemp, is designed to provide hydronic heat and hot water for mobile applications. It is also an ideal "Clean" backup system for alternative energy systems such as solar and geothermal power which the main power source may be intermittent. The TenTemp uses very little power and can run on either natural gas or LPG. This would not only directly generate jobs at the Company, but other Ohio companies involved in alternative energy systems. It will help Ohio reduce its carbon footprint by converting typical electric backup systems to efficient, clean gas. This will result in a 67% reduction in carbon power plant emissions while producing the same amount of energy as the electric systems. The stimulus funds would be used to adopt and certify existing product, to integrate this product into the growing alternative energy markets and for manufacturing and marketing of this product. | RAD Technologies, Inc. dba PrecisionTemp, Inc. | 25 | 0 to 30 days | \$9,000,000 |
| Hamilton | Primary School Renovations | Construction of a new middle school which includes acquisition of property and renovates to current middle school to be purpose built. According to census data, 24.5 % of Hamilton County residents ages 18 to 25 lack a high school diploma. Recognizing the significant economic brain and societal costs that dropouts place on society, more than 25 Hamilton County organizations have come together to implement a comprehensive approach to re-engaging these young people in education and employment. Connect2Success helps participants earn a high school or GED diploma, gain job readiness skills, secure connections to apprenticeships, training or post-secondary education; and secure a range of services customized to address barriers. This proposal would expand the available services by providing support to remove barriers and employment support including vocational training leading to certificates in jobs with identified need for employees, using stackable certificates that are state and industry recognized. Most certificates can be completed in three to six months. Through this proposal 400 participants would gain skills that make them job ready in high growth fields including health care and supported until they gain employment. They will be supported and provided for a minimum of 6 months after gaining employment. Casco Manufacturing would like to produce a service capability directly or as a sub contractor for any soft good that would need to be sewn, Radio Frequency Welded or Ultrasonically Sealed. ask to Cincinnati, Governor Ted Strickland received a promising technology called Packtrak. | Wyoming City School District | 15 | 181 days or more | \$5,000,000 |
| Hamilton | Alternative Energy Supplemental Heating System | Packtrak is an innovative, green technology that is used in packaging machines. It improves the energy efficiency of electric motor drive systems by eliminating chains, belts and gears that waste energy and consume petroleum based lubricants. Packtrak also cuts down on landfill from waste generated during product changeovers. Packtrak is a linear motor that independently controls moves on a packaging machine. Each mover has magnets that interact with stationary coils to propel it along a track, thereby eliminating chains, belts and gears that would be used in existing machinery. Packtrak can be used in a variety of applications. Packaging machines are used at Procter & Gamble for consumer products, such as healthbars, personal beauty and pet nutrition. | Wyoming City School District | 50 | 181 days or more | \$27,000,000 |
| Hamilton | Middle School Construction | Major Outcomes 20% reduction in energy usage. Elimination of mechanical components means less energy consumption and smaller carbon footprint. New, high-tech jobs for Ohio. | Jacobs Automation | 10 | 0 to 30 days | \$1,000,000 |
| Hamilton | Coenect2Success and Employment | The 21st century education center for at-risk high school youth would include educational programming, VET games, an auditorium with state-of-the-art programming capability to serve the city of Cincinnati. The building need does is a recently completed YMCA and an elementary school. The YMCA is state-of-the-art and offers everything from computer classes to swim lessons, but the computer lab is small. The Cincinnati College Preparatory Academy is a high-achieving charter school, serving a 60% low-income student population. The school uses a state-of-the-art technology including projectors, a portable laptop lab, and has a strong technology coordinator on staff. This new project would build upon the existing competency in technology and implementation would be seamless. Expected outcomes are to expand technology literacy to the high school population, the age in which most students leave school. Job skills would be developed, preparing these students to be able to participate in a technology-oriented job market and who would not only attend college, but succeed. The American Jewish Archives (AJA) is a non-profit organization that preserves, protects, and ensures that the general public has access to a wide range of valuable historical documents. As a result of the severe economic downturn, the AJA has had to significantly reduce its annual expenditures and core activities. | Cincinnati State Technical and Community College | 400 | 0 to 30 days | \$250,000 |

| Hamilton | Creating for Reality | Creating Your Reality is a summer camp and after school program for at risk children. The goal is to build self-esteem and encourage leadership skills especially among girls age 6-12. The camp is divided into three key classes: Etiquette, Entrepreneurship, and Sports. We have an excellent staff, well equipped facility, and a strong community. We are currently seeking members of the business community to ensure the highest level of functioning while offering an enhanced quality of life. CommuCare has 31 facilities in Ohio offering this care. | Designed IV Destiny LLC | 15 | 91 to 180 days | \$175,000 |
| Hamilton | Training Programs for STNA's to become LPN's | Due to the nursing shortage all over the country we need to find ways in which we can educate our current staff to further their careers and become nurses. Currently, STNAs do not have the money to pay for LPN training/schooling. Therefore, stimulus funding could be made available for STNAs who have a desire to become LPN's. Providing this training will help to eliminate burnout, reduce the high turnover (80 to 85%) at this level and provide education and better skills for the employees. The end result will be happier, well trained employees who will want to stay at their facility and continue to take care of their patients and provide excellent quality care. | CommuCare Health Services | 600 | 91 to 180 days | \$2,000,000 |
| Hamilton | School Kitchen Upgrade | King Academy is an inner city school that is rated "effective". 90% of our students receive hot/refreshed breakfast and lunch. We would like to update our kitchen to include a new ventilation hood and a warmer drawer. | King Academy Community School | 1 | 0 to 30 days | \$13,000 |
| Hamilton | Resurfacing Playground | King Academy is an inner city community school that is rated "effective" and serves 100% low income students. We currently only have a concrete area for outdoor activities and would like to resurface it to a rubberized, shock absorbent surface that would be safer for our students. King Academy currently has one technology lab (25 computers) for the entire school of 150 students, K-8. We would like to add smartboard technology in each classroom (11) so that the students and teachers can access the Internet for lesson plans, supplemental content, and technology resources. | King Academy Community School | 1 | 0 to 30 days | \$135,000 |
| Hamilton | Smartboard Technology | The smartboard product we would like to purchase is Promethean Activ Boards which are smartboard/whiteboards designed specifically for the education market. Activboards have access to thousands of standards-based lessons, a full library of figurines and primary software designed specifically for your young learners. Use our current vocational and job service location in the Cincinnati area to develop more vocational services for individuals receiving SSDI checks. Enhance the current Ticket to Work program we are implementing "Project Program". This grant will help us explore ways we can improve our services to support our students and communities they represent. The impact of this data indicates demand far exceeds resources needed to bring our current First Responders up to speed. | King Academy Community School | 2 | 0 to 30 days | \$55,000 |
| Hamilton | Learn to Earn | Annually, Great Oaks trains over 18,000 public safety professionals. In FY 2007 and into 2008, funding from the Department of Justice increased and the ability to train these essential First Responders diminished. As a result, in 2008 we began to experience a demand, most of which were not filled. In early 2009, we experienced a 250% rise in inquiries and applications to our program. This proposal seeks to streamline our staffing and program costs. Once a job is posted, program sustainability would be assured. The grant would allow us to provide the resources to meet the demands and train over 20,000 professionals annually. | Quest for Independence | 500 | 31 to 90 days | \$450,000 |
| Hamilton | Strengthening Training for Ohio's First Responders | Program promises services were one goal is increasing overall academic achievement, also resourcing merger. The project also we can serve about 100 students with the requested money from the Federal Stimulus Fund. | Great Oaks Institute of Technology and Career Deve | 500 | 0 to 30 days | \$400,000 |
| Hamilton | Yes, I Can | Activities in place are a means to achieve a goal of Confident and Capable Children with academic classes, clubs and activities tailored to the individual interest of the children, including music, art, social skills, leadership training, field trips and community volunteer opportunities. We provide homework help and tutoring by qualified retired and active teachers and instructional assistants. We also work with parents-guardians through evidenced based parent training programs. We partner with the FreeStore Foodbank to serve 4 daily dinner meals at the end of our afterschool to our students and a weekend food-backpack for students who are chronically hungry. | The Children's Protective Service/FamiliesFORWARD | 10 | 0 to 30 days | \$100,000 |
| Hamilton | Cargile Re-Stabilization | Build or buy property with land in a HUB Zone area that will house an 80,000 sq ft facility for office space, warehousing, classrooms, office equipment as well as facilities for construction equipment. Funds to hire professionals to teach construction trades and other technical support. Offering apprenticeship programs and mentoring with an existing 50-year general construction/construction management company providing employment opportunities and job placement with other established construction companies and assistance with business startup and creation of new businesses to give back to the community. | William Cargile Construction II, Inc. | 900 | 181 days or more | \$8,000,000 |
| Hamilton | Energy and Environment Center at Cincinnati State | This proposal is for the expansion of the Energy and Environment Center (EEC) at Cincinnati State. The EEC integrates community and technology, traditional and cooperative education with workforce development, graduate placement and retaining displaced workers, post secondary and K-12 education, all in the framework of the advanced energy market and the environment. The EEC will be a prototype Comprehensive LEED @ Platinum, net-zero energy structure containing new laboratories, dedicated to renewable energy, energy efficiency, sustainable design and construction, lab skills, career management, environmental technologies, sustainable and environmental horticulture as well as culinary. The EEC is working with existing new energy partners who are vital for broad regional support and success. This request will allow the EEC to offer traditional education and consulting services in the specific areas of expertise. The EEC will serve as regional resource for the reporting and attraction of new industry. The EEC will be a Center of Excellence in energy and environment issues and solutions. | Cincinnati State Technical and Community College | 9000 | 31 to 90 days | \$5,000,000 |
| Hamilton | Public/Private Economic Development Project | Cincinnati State and a Cincinnati based former 500 company are teaming up for the regions first public-private partnership on Cincinnati State's campus, a 48,000 sq. ft. state-of-the-art technical center. The private sector partner will fund a portion of facility and will use the site to conduct pilot plant level food product research and development and sensory testing. Cincinnati State will provide culinary lab facilities, workforce training facilities and student access through gateway programs. In addition, Cincinnati State plans to construct new Energy and Environment Center on the top and roof levels of the proposed facility. The entire project is designed for top level LEED certification. The project will initially employ 30 workers and replace the technical center headquarters located in Kentucky. The first use of one facility will support the needs of a major SW Ohio corporation and at the same time utilize the academic facilities, students and faculty of Cincinnati State. The new construction will immediately stimulate construction jobs, provide ongoing employment and train workers for the culinary industry. | Cincinnati State Technical and Community College | 130 | 0 to 30 days | \$6,500,000 |
| Hamilton | Center for Sustainable Horticulture Program @ Cinc | Faculty in the region. The CSH will provide training in the form of college courses, community courses, and workforce training in the existing and future technologies of sustainable or environmental horticulture. The CSH will combine forces with partners to provide through multi-faceted academic and hands-on training in the design, installation, and management of sustainable and ecologically healthy landscapes and "green buildings" with technologies such as green roofs and indoor and outdoor "green walls". CSH trained graduates and employees will be able to address and solve from the horticultural perspective the complex environmental issues involving the modern urban environment, such as stormwater management, increasing energy efficiency of buildings through multiple techniques, reducing the phenomena of urban heat islands, carbon sequestration/conservation through landscape techniques, and efficient use of human and natural resources to create ecologically sound, sustainable landscapes for our cities and towns. | Cincinnati State Technical and Community College | 2,000 | 91 to 180 days | \$3,000,000 |
| Hamilton | Sustainability Coordinator | This program will create a new sustainability coordinator position at Cincinnati State Technical and Community College. The responsibilities would include monitoring campus wide initiatives and to act as an advocate for sustainability issues on campus. This sustainability coordinator would report the status of all college wide initiatives to the administration, faculty and staff, students of the college. The coordinator would conduct an audit a sustainability audit for Cincinnati State. Other duties would include monitoring the recycling program and organizing a sustainability week. Attend surge green committees/committees meetings. Increased 1.4 million to reach 45.4 million on July 1, 2007, or 15.1 percent of the estimated total U.S. population of 301.6 million. The state of Ohio is not immune to this new influx of immigrants as the 2005 Census reports. Of the total residential population: • 9% in Hamilton county are identified as Hispanic/Latino. • 2.4% in Butler county • 1.1% in Clermont county • 1.8% in Warren county | Cincinnati State Technical and Community College | 1 | 0 to 30 days | \$50,000 |
| Hamilton | Latino/Hispanic Academic Scholar Project | The Office of Admission at Cincinnati State recognizes the need to increase our efforts and services targeting the Hispanic/Latino community in the geographical area. Consequently, our office is committed to creating a plan in order to retain area Hispanic/Latino students. The program will emphasize the importance of higher education in a population that has traditionally stayed away from pursuing a post secondary degree. The primary focus will be in developing the selected students in the STEM focused education which will contribute to the state's economic growth. | Cincinnati State Technical and Community College | 100 | 0 to 30 days | \$600,000 |
| Hamilton | Community based clinical and micro lab serving th | This local lab started operation on Jan 4 2009 and we have hired 100 people already. We will be the only locally owned and operated clinical lab in the area servicing the hospitals and doctors in the area. This company was established as a joint venture between the Cincinnati Pathology and Labcorp. We have been in operation a little more than 75 days and have already hired over 100. The support for the development and growth for the business is what we imagined. With the option to focus on the central growth of the company serving the Tri-States area, we are currently holding new business at bay to give us the time we need to get the rest of the systems up and the development of the lab testing codes completed. There is tremendous support for this business by the local community and the hospitals and doctors. Cincinnati State will create and maintain a major storm water harvesting/reuse project designed to substantially reduce the amount of rain water that currently enters the Hamilton County storm water system. The project will reduce the load on the system and prevent basement flooding in adjacent properties. Water collected through the harvesting system will be used to maintain the extensive College horticulture collection and College landscape. Captured water will also support green irrigation, geo-thermo heating/cooling for new construction and provide potable water for community during emergency. An educational training lab will be established to provide training to the community, providing training and hands-on experiences for students in a variety of green energy fields and will be established as community model for Hamilton County. Building to house facility related services and personnel. Physical Facilities Department and Campus Police. These services currently occupy multiple lab/educational space in educational building. Space will be retrofitted to expand renewable energy training program and Fire Service Program. | Tri-State Clinical Labs | 200 | 0 to 30 days | \$4,000,000 |
| Hamilton | Water Runoff Retention | Building to house facility related services and personnel. Physical Facilities Department and Campus Police. These services currently occupy multiple lab/educational space in educational building. Space will be retrofitted to expand renewable energy training program and Fire Service Program. | Cincinnati State Technical and Community College | 130 | 0 to 30 days | \$810,000 |
| Hamilton | Campus Facilities Service Building | Building to house facility related services and personnel. Physical Facilities Department and Campus Police. These services currently occupy multiple lab/educational space in educational building. Space will be retrofitted to expand renewable energy training program and Fire Service Program. | Cincinnati State Technical and Community College | 12 | 91 to 180 days | \$1,045,000 |
| Hamilton | Parking Garage | Adding parking spots for students in near future due to ODOT Interstate-75 expansion. Provide parking spaces for future students, to allow for growth as set forth by University System of Ohio. | Cincinnati State Technical and Community College | 50 | 91 to 180 days | \$9,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | Sand Transport System | We would procure a new Dense Flow pneumatic sand transport system. Energy usage will be greatly reduced by the addition of a new pneumatic sand system to transport sand through the facility. Instead of a continuous flow of compressed air through the system, the new technology would "pulse" the air through the system as needed. In addition to lowering our costs, we would reduce significant maintenance that the current system requires from the friction the sand creates when moving at high speed. | Cast-Fab Technologies, Inc. | 40 | 0 to 30 days | \$495,000 |
| Hamilton | Training for Current Employees | We are proposing a variety of training programs for our workforce in an effort to retain them through employment and enhance their job skills until the economy and order volume recovers. This training would encompass employees still currently employed and help us retain their services instead of further cuts to our workforce. | Cast-Fab Technologies, Inc. | 40 | 0 to 30 days | \$250,000 |
| Hamilton | Training for Displaced (Furloughed) Workers | Estimate of 60 people for three (3) weeks training. Upon approval, we would call back to work some furloughed employees. We would bring the furloughed people back for 1 or 2 weeks worth of training and then place them for their time. The state would avoid the unemployment compensation payment for that time period and the employees would have further skill sets to put to use once the economy recovers. | Cast-Fab Technologies, Inc. | 15 | 0 to 30 days | \$135,000 |
| Hamilton | Affordable Housing | Massive investments in a property management and treatment company located in the Cincinnati, OH. Massive investments (20) proposed to acquire, develop and renovate a total of four (4) sites within city limits in order to increase the availability of quality, affordable, and efficient housing for residents. We already has the control of the properties. Over Forty Seven (47) Employment opportunities will be created and over 22 quality households will be sustained within city limits. | Nasdaq Investments | 47 | 0 to 30 days | \$350,000 |
| Hamilton | PRAYSE PAVILION | We have been committed to providing affordable quality housing within the city over the past 10 years. FY funding will allow us to develop four (4) new units in the city which will generate economic benefits in the city in multiple ways. (1) Economic benefits associated with providing quality, affordable housing, ex. communities achieve greater critical masses of human and economic resources to become sustainable. (2) direct job creation created by strengthening and expanding existing businesses. (3) community reinvestment through profits (4) Decreasing the potential for potential criminal activity enhances safety and makes the communities more attractive for businesses. | PRAYSE PAVILION | 25 | 31 to 90 days | \$857,491 |
| Hamilton | Supportive Counseling for Job Readiness and Retent | MENTAL SUPPORT SPACE TO PROVIDE SAFE CARE FOR CHILDREN AND THEIR FAMILIES DEALING WITH THE DISEASE OF AUTISM WE WILL PROVIDE MEALS, CARE AND RECREATION FOR THE CHILDREN ALSO ADDRESSES THE MENTAL NEEDS OF THE PARENTS AT A PROFESSIONAL LEVEL. Depression, and aggressive family stress. Many Professional services will reach low income individuals and families in Hamilton County who have personal and family issues that interfere with self-sufficiency, job attainment and job retention. | Mercy Professional Services | 3 | 0 to 30 days | \$100,000 |
| Hamilton | Crisis Support for Families | Many Professional Services will utilize current and additional licensed therapists to provide supportive counseling to low income individuals and families attempting to enter or re-enter the job market. Cognitive behavioral approaches will be used to assist clients to overcome personal, family and parenting issues which act as barriers to self-sufficiency and steady work. Clients will attend hourly counseling sessions both individually and as families. An average of 8 to 12 hours per family unit will be required to assess and treat pre- or post-traumatic conditions such as low motivation, depression, family conflict, single parent stress, and major life transitions. | Beech Acres Parenting Center | 6 | 0 to 30 days | \$150,000 |
| Hamilton | Power in Parenting | This funding will allow approximately 100 new clients to be seen for 8 to 12 sessions. Currently, wait lists to receive services are 6 to 8 weeks long. This new program will provide immediate support to parents who are struggling with their children's behavior, as well as their social, home and family life. Children are having difficulty coping with their fear and stress and don't have the skills to deal with or communicate their feelings. | Beech Acres Parenting Center | 20 | 0 to 30 days | \$250,000 |
| Hamilton | School Bus security | Beech Acres plans to respond by providing critical support and intervention services for 200-300 indigent children, parents and families who have been impacted by this current economic crisis. We have a continuum of programs and services to meet the critical needs of these families including: one-on-one consultations, parent support coaching, workshops, classes, or intervention groups for parents. The outcomes are to provide parents with opportunities to gain valuable insights into the effects this crisis is having on their children and their children, and provide parents and children with critical coping and communication skills, as well as much needed emotional support. | Three Rivers Local School District | 1 | 0 to 30 days | \$92,000 |
| Hamilton | Southwest Ohio Growers | Power in Parenting is an innovative community-based program which provides at-risk parents with meaningful support, helping them respond to their needs and the needs of their children while developing the skills, knowledge and support to overcome their barriers to success. We are expanding this effort to meet the critical needs of 700+ individuals in subsidized housing. | Holland Property Services Inc. | 60 | 0 to 30 days | \$3,800,000 |
| Hamilton | Harrison Township - Fresh Sausage | PIP matches parents with Parent Partners who serve as mentors, linking them to formal and informal networks of support and providing them with assistance to successfully meet their needs. The critical factors to the program's success include: our commitment to hiring staff from the target communities, as they have a first-hand understanding of the issues faced by these families and have their trust and respect; mutual support among program participants; strong partnerships with community-based organizations; and our ability to offer safe, convenient locations for these parents to meet and develop networks of support. Outcomes include successfully implementing the program expansion, meeting the needs of the families served, and creating formal and informal networks of support for our clients. | Henkle Schueler | 200 | 0 to 30 days | \$137,500 |
| Hamilton | VT Design Solutions - Certified Energy Efficiency | 20 cameras including mounting features and installation for a fleet of 20 school buses. 20 updated bus radios for more efficient and effective communication when school buses are running routes for a fleet of 20 school buses. Rekeying used for the construction & initial operation of a colony of Greenhouses for vegetable production. Greenhouses will use green technology & will be eco & bio-friendly. Vegetables will be locally grown year round to provide healthy produce throughout the state, which is currently being imported. Outcomes: creation of permanent green collar jobs(40), reduced cost of locally grown healthy produce, preservation & transportation industries positively impacted. | Valu-Tech, Inc. dba VT Design Solutions | 15 | 0 to 30 days | \$20,000 |
| Hamilton | Mayerson JCC Cultural Arts | Locally grown produce will reduce the carbon footprint associated with the production, transportation and distribution associated with produce coming from distant locations. Our plan will also benefit from the fact that the greenhouse. The total value of the produce grown in 10,000 acres of vegetables per year is equivalent to planting approx. 10,000 acres of trees per yr. or removing the emissions of approx. 7300 vehicles per yr. or preventing the use of approx. 80,000 barrels of oil per yr. A 1-acre facility would produce approx. 2,500,000 lbs of vegetables per yr. Produce grown in this manner creates jobs, positively impacts trade deficit & is environmentally friendly. | Mayerson JCC | 81 | 31 to 90 days | \$115,728 |
| Hamilton | 2009 Ongoing Maintenance Project | 400 linear feet of new road called "Dole Drive". With most a company called Fresh Sausage Specialists, will stay in Ohio. They employe 75 full annual payroll of \$2.5 million and growing. Without road they will likely move to Indiana along 174 to 2010. With this road they expand into Ohio opening plant by December 31, 2009. Can you help? More information can me provided. Please call Jeff Eshom at 513-673-6048. The funding would be awarded to Harrison Township, Ohio - Hamilton County. | The Public Library of Cincinnati and Hamilton Coun | 10 | 91 to 180 days | \$1,500,000 |
| Hamilton | Summer STEM Enrichment Program | The road will open up 3-4 additional lots which will add 125-200 additional jobs over 3 years. Energy Conservation/Efficiency training. | Cincinnati State Technical and Community College | 4 | 0 to 30 days | \$150,000 |
| Hamilton | Art for Life | VT Design Solutions has identified \$200,000 worth of energy conservation projects to pursue. Our engineers have the skill and knowledge of energy systems but do not have the appropriate certifications to be considered for these projects. Expansion into this market will be the primary focus of the program. We are currently in the process of identifying and securing the appropriate personnel and equipment to be needed for the program. We are currently in the process of identifying and securing the appropriate personnel and equipment to be needed for the program. We are currently in the process of identifying and securing the appropriate personnel and equipment to be needed for the program. | Cincinnati Art Museum | 2 | 31 to 90 days | \$50,000 |
| Hamilton | Greater Cincinnati Collegiate Commons | The safety and well-being of the campers is constantly reinforced, and the staff is praised and encouraged for their efforts. The camp directors serve as supervisors for the staff. A formal evaluation is provided midway through the camp season and casual evaluations occur throughout the summer. | Greater Cincinnati Collegiate Commons | 200 | 31 to 90 days | \$20,000,000 |
| Hamilton | Minority Business Expansion | We serve approximately 280 campers during our traditional six-week camp, and an additional 200 children in our 5-week extended camp programs. We expect to hire 16 junior counselors, entering grades 11-12, and 20 senior counselors, mostly college students. Another 10 hires, mostly college age, will serve as camp specialists. Approximately 25 lifeguards and 10 swim instructors will be hired. | ACE Products, LLC | 5 | 31 to 90 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Hamilton | Gilbert Avenue Greenway | This project seeks assistance on a transportation transportation project to create this area covered over 40 years ago. Known as the Gilbert Avenue Greenway the initial physical construction of a series of green median islands was done in 2006 under a Transportation Enhancement Grant from the State of Ohio. Originally designed to be a closed berm of parking beds, the completion of the Greenway will reduce the overall speed of the cars on Gilbert Avenue, benefiting neighborhood businesses. In particular, The Cincinnati Association for the Blind has their offices, training facilities and Radio Reading Services at approximately the mid-point of the mile long Greenway. A specially signposted crosswalk serves to access that building which, combined with the Greenway plantings, will greatly aid to their client's safety. To date, the islands have only been planted as level grass areas which therefore have no traffic calming effect. A local Walnut Hills neighborhood landscaping business, Dan Druffel Landscaping Inc., has given the Walnut Hills Area Council a plan to complete the traffic calming plantings and berm at reduced wholesale plant costs. | Walnut Hills Area Council | 5 | 0 to 30 days | \$35,000 |
| Hamilton | VT Design Solutions - Home Weatherization Provider | VT Design Solutions will partner with local area governments to provide Home Weatherization services to low income households. Contracts with local governments will allow VT Design Solutions to provide energy audits and weatherization services to low income households. Contracts with local governments will allow VT Design Solutions to provide energy audits and weatherization services to low income households. | Valu-Tech, Inc. dba VT Design Solutions | 25 | 31 to 90 days | \$75,000 |
| Hamilton | Energy Efficient Lighting Retrofit | Replace 153 4000 Hourage Lamps with 133 high efficiency fluorescent light sets. This project will result in a reduction of energy use for lighting by 50% and an annual savings of approximately \$15,000 per year in electricity costs. This savings will allow CDC Distribution to retain one additional employee. | CDC Distributors Inc. | 1 | 0 to 30 days | \$35,000 |
| Hamilton | CONTINUATION OF THE MEADOWS (FAMILY OWNED AND OPER | I AM TRYING MY BEST TO KEEP MY HEAD ABOVE WATER AND TO CONTINUE BEING A PROUD TAX PAYING CITIZEN. WHATEVER HELP AND ASSISTANCE WOULD BE GREATLY APPRECIATED. THANKS FOR YOUR TIME. FRED J. SEIFERT | THE MEADOWS BANQUET AND MEETING FACILITY | 30 | 0 to 30 days | \$500,000 |
| Hamilton | Energy Efficiency Educational Program for Hamilton | This project will allow non-profit Ohio Energy Project to assist Ohio K-12 school districts improve the energy efficiency of facilities & educate students & staff about energy & energy efficiency including: Analysis of each building's current energy usage & costs; Identification of low-cost/no-cost energy conservation opportunities; Identification of projects for significant energy conservation savings; Assistance to district's science/math curriculum directors & teachers on educational energy efficiency & sustainability programs for classrooms, staff & community; Implementation of district-wide sustainable energy efficiency programs, including energy education & energy efficiency programs for students, staff & community; Assist districts with potential funding avenues to implement energy efficient projects, including federal, state & utility grants & rebates, such as HR 264 and Ohio Advanced Energy program. Expected outcome: to provide districts with information necessary to operate facilities more efficiently, & more importantly, educate students, staff & community to understand how to conserve energy & make our environment a cleaner, safer place to live today & in the future. | Ohio Energy Project | 7 | 31 to 90 days | \$275,000 |
| Hamilton | Hamilton County Parent Leadership Institute | The Hamilton County PLI will train thirty parents from multiple schools districts throughout the county to identify the perfect correlation between parent involvement and student achievement levels. The goal is to build and sustain constructive parent engagement so parents will become a force in driving better performance in their schools. The PLI equips parents with a strong knowledge base of state and federal educational standards and accountability systems, along with major local improvement initiatives. With coaching, parents use their passion and creativity to design projects to meet the student achievement needs they've identified. Parent Leaders are empowered to collaborate with school administrators, teachers and other parents as they implement their projects. PLI graduates are charged to engage at a minimum ten additional parents through their projects. The PLI is professional development for parents, many of the skills can be transferred to the workplace. When parents are involved in different roles throughout a school, the performance of all children in the school tends to improve. | Parents for Public Schools of Greater Cincinnati | 2 | 91 to 180 days | \$250,000 |
| Hamilton | Energy Efficiency Educational Program for Hamilton | This project will allow non-profit Ohio Energy Project to assist Hamilton Co. districts to improve the energy efficiency of facilities & educate students & staff about energy & energy efficiency including: Analysis of each building's current energy usage & costs; Identification of low-cost/no-cost energy conservation opportunities; Identification of projects for significant energy conservation savings; Assistance to district's science/math curriculum directors & teachers on educational energy efficiency & sustainability programs for classrooms, staff & community; Implementation of district-wide sustainable energy efficiency programs, including energy education & energy efficiency programs for students, staff & community; Assist districts with potential funding avenues to implement energy efficient projects, including federal, state & utility grants & rebates, such as HR 264 and Ohio Advanced Energy program. | Hamilton | Solar Energy System Installation | Installation of PV solar array panels to provide 7.5% of daily kWh usage at six hospital locations in Ohio. Numbers derived from using average daily demand of 700kwh per hospital with average availability of 4.5 sun hours per day. Total of approximately 1,100,000 watts necessary at \$12/watt installation cost plus soft engineering & design costs. This will reduce the Department's payments for electricity especially during high peak demand times (summer time) as a greater number of hours are available & electricity rates are higher. | Ohio Department of Mental Health | 120 | 31 to 90 days | \$17,000,000 |
| Hamilton | Pay As You Go Efficiency Savings Plan | There are many consumer energy efficiency projects where the energy savings could pay for the cost of the project and create an immediate positive cash flow for the consumer. Duke Energy would establish an on-bill payment plan to facilitate these pay as you go projects. The stimulus funds would be used to pay Duke Energy its weighted average cost of capital for putting up the capital. The stimulus funds could be targeted at consumer segments, the consumer at 200-300% of poverty level, with 0% interest while other consumers would simply pay Duke Energy's weighted average cost of capital directly. The payment plan will complement Duke Energy approved programs to increase investment dollars and jobs over a longer period of time. | Duke Energy | 5600 | 31 to 90 days | \$100,000,000 |
| Hamilton | Energy Efficiency Consumer Incentive | Duke Energy has approved cost effective energy efficiency programs and the infrastructure in place to achieve results quickly. The infrastructure includes third party vendors in place to administer programs, marketing programs for targeting participants, collaboration with key stakeholders, and measurement and verification of results by a qualified third party. The biggest barrier to customer participation in energy efficiency programs is the upfront capital expenditure required. Utility incentives account for a less than 40% of the total project cost, so using stimulus money to offset the customer's portion of the total project cost will stimulate activity and create jobs. The stimulus dollars can be targeted at specific customer segments. The programs are in place and will continue so the jobs are sustainable. | Duke Energy | 3700 | 0 to 30 days | \$93,000,000 |
| Hamilton | GCB/Madison Energy Project | Energy Saving Projects at 1501 Madison Rd Install High Energy Efficient Boilers (1) Install High Efficient Windows (20) Install Energy Efficient Light Fixtures and Bulbs (1000) Energy Efficient Elevator (2) will save \$100,000 per year in energy costs | Greater Cincinnati Behavioral Health | 8 | 31 to 90 days | \$592,000 |
| Hamilton | Heart Center Tie Switch | 1. Provide redundant generator service to the Heart Center if this generator should fail. Currently within the Heart Center, there is an emergency generator that serves the Heart Center. When power to the center is disrupted, the emergency generator starts up and supplies power to the center until normal power is restored. Items that depend on this type of backup power are devices and systems depended on to assist with sustaining for our patients, such as ventilators, monitors, etc. In addition within the hospital we have 3 other emergency generators that supply power to their respective buildings. South, North, and West. These 3 emergency generators are tied together so that in case of a generator failure, we can manually start one of the other 2 generators to power the affected areas of the other buildings. If approved, this project would allow us to install the needed equipment to connect the Heart Center emergency generator to the network of the other 3 generators. | The Christ Hospital | 5 | 0 to 30 days | \$250,000.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Hamilton | 750 Ton Chiller Replacement | 1. Eliminate CFC based refrigerants in the 750 ton chiller 2. Implement a plan to eliminate the 750 ton chiller with a more economical operating approach utilizing our plate and frame heat exchanger 3. Save energy by this new initiative Currently we have 7 chillers located in the Power Plant that produce chilled water that is used to cool the hospital and College of Nursing. Total capacity of chilled water produced is 4833 tons. In addition we have a plate and frame heat exchanger that is used to produce chilled water during the winter months. Neither chiller has variable frequency drive (VFD) associated with the chiller control package. In addition the 750 ton chiller has CFC based refrigerant that has been banned for manufacture by the EPA since 1995. If this project is approved, the 750 ton chiller, which is 23 years old, would be replaced with a 400 ton Carrier electric driven chiller with VFD and a new VFD would be added to chiller #6 which is a 1000 ton chiller. The new 400 ton chiller would have EPA approved refrigerant. The addition of the 400 ton chiller with VFD and the addition of the VFD to the 1000 ton chiller #6, will allow the Stationary Engineers to match the load. Support a full-time job coach position to our successful inner city employment education program to work intensively with participants with disabilities. The current program, with 20 years experience, builds work history and work skills for inner city adults with barriers to employment. These barriers include physical, sensory, cognitive, mental health and addiction disabilities, as well as educational deficits and past incarceration/criminal history. Participants gain a years' part time, paid employment through the program, working in small business with on the job training, insurance and benefits training and educational history. | The Christ Hospital | 33 | 31 to 90 days | \$330,000.00 |
| Hamilton | Job Coach for Employment Education Program | New funding would retain existing staff and add additional support services for participants who fall under VR guidelines. The coach would provide one on one training and would also build relationships with outside employers to assure that graduates of the program can move on to other, better jobs in the community. This would lead to great employment outcomes for program participants, and would improve the quality of the program by assisting those in a way not and to full employment. Request is for 2 years to fully enact the project. | Power Inspires Progress | 40 | 31 to 90 days | \$32,000.00 |
| Hamilton | Job Developer | Builds work history and work skills for inner city adults with barriers to employment. Trainee barriers include disabilities, past addiction, educational deficits and past incarceration/criminal history. Participants gain a years' part time, paid employment through the program, working in small business with on the job training, insurance and benefits training and educational history. The new job developer would build relationships with outside employers to assure that graduates of the program can move on to other, better jobs in the community. He or she would seek out potential employers, gain understanding of their hiring patterns and staffing needs and find a fit among our program participants. He would explain to potential employers about tax credits and advantages of hiring this disadvantaged group. This would lead to great employment outcomes for program participants, and would improve the quality of the program by assisting those in a way not and to full employment. Request is for 2 years to fully enact the project. | Power Inspires Progress | 40 | 31 to 90 days | \$34,000.00 |
| Hamilton | Access to Success | This project will implement an innovative strategy to improve employment outcomes for individuals with disabilities by strengthening the VR program and drive reform and improve the results for people with disabilities. As individuals apply for VR services, their applications would be forwarded to Ohio Valley Goodwill Industries. Those applications will then be scheduled by a counselor for an orientation. Their information will be processed for completeness, on which a determination of eligibility, additional information will be obtained, and an interview will be conducted. The date of their first appointment with VR staff, their eligibility can be determined and a plan for services can be developed. Any questions regarding any required VR staff to determine eligibility, sign individualized employment plans and sign closure statements, this project will be completed. This approach will reduce or even eliminate waiting lists and expedite their ability to successfully obtain employment. Request is for 2 years to fully enact the project. | Ohio Valley Goodwill Industries | 3 | 0 to 30 days | \$206,110.00 |
| Hamilton | Senior Housing Development Project | Construction of new 60 unit, independent living senior housing facility in St. Bernard utilizing geothermal heating and cooling. St. Bernard CAC is partnering with United Church of Christ to construct the first senior housing facility in St. Bernard. | St. Bernard Community Improvement Corporation | 25 | 91 to 180 days | \$500,000.00 |
| Hamilton | Geothermal Heating and Cooling for new Town Home | Construction of 11 new 2300 sq foot town homes as part of an urban renewal project in St. Bernard. The site is adjacent to the former Miami Erie Canal that is the only available land for new housing development in St. Bernard. St. Bernard Urban Renewal Authority is planning to start population based certified housing stock at affordable prices. | St. Bernard Community Improvement Corporation | 15 | 31 to 90 days | \$500,000.00 |
| Hamilton | Energy Efficiency Audit and Upgrade Program | Perform energy efficiency audits on multi-family and single family residences in St. Bernard and provide funding (loans and grants) for energy efficient upgrades based on household income. | St. Bernard Community Improvement Corporation | 10 | 0 to 30 days | \$250,000.00 |
| Hamilton | Energy Efficiency Audit and Upgrade Program | Complete energy efficiency audits on single family and multi-family homes in Lincoln Heights and provide funding (loans and grants) for energy efficiency upgrades in this self-governed African American community that has the lowest household income in Hamilton County. | NuZone Community Improvement Corporation | 10 | 0 to 30 days | \$250,000.00 |
| Hamilton | Multi-Family Energy Efficiency Solution | Initiate a research project to develop a long-term, sustainable solution to overcome the overwhelming barrier to significant energy efficiency improvements in multi-family structures. The overwhelming barrier exists because the owner pays for capital improvements, but the tenant pays the utility bills in non-subsidized multi-family housing market. The objective is to develop a solution that creates value for both the owner and tenant. In order to achieve the objective, efficient ownership options, for equipment and appliances will be evaluated to determine an optimal solution. Ideally, the properties in the research project will include Smart Grid technologies to provide energy pricing options combined with in-home energy management systems and automated equipment monitoring and controls. The proposed project will cover all costs including energy efficiency improvements and automated equipment monitoring and controls. | Duke Energy | 40 | 31 to 90 days | \$1,700,000.00 |
| Hamilton | Over-the-Rhine Vacant Housing Initiative | Utilize 158 vacant Over-the-Rhine. The majority of the properties are dilapidated and many have been seriously vandalized. Our goal in this residential redevelopment project is to renovate 172 existing vacant housing units, thereby increasing availability of Section 8 housing, and increasing employment for those in the construction trade. The estimates that approximately 18 FTEs will be added to our workloads over the next two years to complete this project. Continued management of our project will require permanently increased staff, and current conditions present a strong supply of talented people to hire from the immediate neighborhood. Providing housing for families (most units are at least two bedrooms), we are allowing for more responsible residents to remain in or enter the community. We already provide tenant control of utilities, and plan to offer tenant incentives for utility cost savings and in building insulation barriers. Our ultimate goal is to preserve our traditional neighborhood and reduce crime and poverty. | Historic LLC | 18 | 0 to 30 days | \$3,000,000.00 |
| Hamilton | Community Based Treatment | Open a 24 hour community based recreational facility for juveniles in Hamilton or other urban county. The primary focus of this project is to demonstrate the integration of distributed energy resources into the SmartGrid. | Ohio Department of Youth Services | 26 | 0 to 30 days | \$2,600,000.00 |
| Hamilton | Smart Grid Demonstration of Distributed Energy Res | DERs include solar PV and battery storage technologies Resources will be customer sized as well as a substation sized Monitor performance of DERs resources through seasonal variations of weather and usage patterns Identify ideal locations for distributed resources (customer premises or substation) Demonstrate aggregation of distributed resources to act as a "virtual" peaking resource during peak hours Demonstrate utilization of storage technology for peak load shifting Demonstrate beneficial impacts on overall system efficiency and grid reliability If demonstrated in conjunction with EMS, then we will also aim demonstrate optimization of DER along-side automated demand response for the purpose of overall system efficiency, peak-load management, virtual power and load-levelization. | Duke Energy | 34 | 31 to 90 days | \$6,097,404.00 |
| Hamilton | Smart Grid Demonstration of Electric and Gas Energy | The primary focus of this project is to demonstrate the benefits of automated energy management systems for both residential and commercial customers: Automated (or back of mind) energy conservation and demand reduction Cycling of heavy loads with a customer permit to reduce overall peak load and reduce bills Provide bill reduction and bill stability for customers Optimize total energy consumption and bill across both electric and gas usage Demonstrate reliability and accuracy of automated demand reduction capabilities Improve overall customer experience and promote energy efficient behaviors through bill and usage information Demonstration of various pricing regimes including time of use rates Demonstrate optimization at transformer and substation level to help promote overall grid reliability, improved asset life, and cost avoidance. | Duke Energy | 405 | 31 to 90 days | \$19,425,000.00 |
| Hamilton | Ohio Smart Grid Deployment | The primary focus of this project is to modernize Duke Energy's electric distribution system so that we can: Increase the ability to interconnect with and manage the distribution system. Increase reliability. Provide societal benefits. Improve energy efficiency opportunities, and Increase customer choice and control. We will do this by analyzing, designing and deploying a portfolio of new technologies & communication networks to service specific customer needs within Ohio over the next five years. The network and various technologies will use our electric distribution power designed to link in-home customer networks, smart meters, data aggregators, transformers, and substation devices in a networked fashion. Via the network, these devices will send and receive data to various utility systems for the purpose of improving operational efficiencies and customer satisfaction. The communications network foundation to be implemented under the Smart Grid project will provide benefits for customers, the company and our communities - including Automation of Meter Reading, Outage Management, Improved billing and energy usage information, and others. | Duke Energy | 5861 | 0 to 30 days | \$160,000,000.00 |
| Hamilton | EE Retrofit of Buildings at The Children's Home of | The Children's Home has 8 buildings on its campus that were built between 1920 - 1985. While well-constructed and maintained, their energy efficiency is poor. The annual gas/electric costs are about \$800,000. We will upgrade their energy efficiency which will result in a 20-25% annual decrease in energy consumption, representing a payback period of 8.8 years. Planned upgrades include: • Installing motion-sensor lighting controls and incandescent lighting level technology in 150 rooms. Total cost: \$80,000. • Upgrading HVAC systems controls to allow for separate thermal regulation of zones in each building and individual metering to control utility usage during peak periods. Total cost: \$27,000 per building for 4 buildings. • Replacing old HVAC equipment in our school building with ultra-high efficiency equipment. Total cost: \$150,000. • Replacing 60 windows in our oldest building with high-efficiency (low emissivity/high reflectivity) windows. Total cost: \$54,000. | The Children's Home of Cincinnati | 4 | 0 to 30 days | \$399,900.00 |
| Hamilton | RUMPKIE FLEET | This project would restore and retain 7.8 jobs and would reduce PM 2.5 and NOx emissions in the non-attainment county/counties of Hamilton by re-powering Tier 0 and Tier 1 Caterpillar construction equipment with certified Tier 3 engines. In total, this project would remove 33.7 tons of PM 2.5 and 607.3 tons of NOx in a five year period. Over the next five years, the average cost per ton of PM 2.5 removed from our air will be \$115,816 and the average per ton of NOx removed from our air will be \$6,422. This work will begin within one week of funding. | OHIO CAT | 7.8 | 0 to 30 days | \$2,925,000.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Hamilton | Nelson Stark | This project would restore and retain 1.2 jobs and would reduce PM 2.5 and NOx emissions in non-attainment county of Hamilton by re-powering Tera and Tera Caspellar construction equipment with Tier3 certified engines. In total, this project will remove 467.8 tons of PM 2.5 and 8,121 tons of NOx in a five year period. Over the next five years, the average cost per ton of PM 2.5 removed from our air will be \$ 21.36, and the average cost per ton of NOx removed from our air will be \$ 12.31 | Ohio CAT | 1.2 | 0 to 30 days | \$450,000.00 |
| Hamilton | Morrow Gravel | This project would restore and retain 1.2 jobs and would reduce PM 2.5 and NOx emissions in the non-attainment county of Hamilton by re-powering Tera and Tera Caspellar construction equipment with certified Tier3 engines. In total this project would remove 476 tons of PM 2.5 and 8,063 tons of NOx in a five year period. Over the next five years, the average cost per ton of PM 2.5 removed from our air will be \$ 20.88, and the average cost per ton of NOx removed from our air will be \$ 12.40. | Ohio CAT | 1.6 | 0 to 30 days | \$600,000.00 |
| Hamilton | Jurgensen List | This project would restore 1.2 jobs and would reduce PM 2.5 and NOx emissions in the non-attainment county of Hamilton by re-powering Tera and Tera Caspellar construction equipment with certified Tier3 engines. In total this project would remove 844 tons of PM 2.5 and 15,533 tons of NOx in a five year period. Over the next five years, the average cost per ton of PM 2.5 removed from our air will be \$ 105.88 and the average cost per ton of NOx removed from our air will be \$ 5.32. | Ohio CAT | 1.2 | 0 to 30 days | \$450,000.00 |
| Hamilton | ARISE Life Management Skills | Community Based program to implement the ARISE Life Skills Program (ALP), which is based on three psychological models including: Socio-learning theory and self-efficacy training, Cognitive behavioral model, and information processing model. The ARISE Life Skills models fit well with the goals of the local OAC initiative. Based on our conversation, the goal of the local OAC initiative is to reduce the number of African American males involved in the juvenile justice system. The goal is in line with ARISE Life Skills program goals, which are to: Help high risk youth develop appropriate social behaviors and better self-efficacy training; Teach at risk youth how to negotiate and monitor their behavior by selling themselves what to do, asking themselves questions, and evaluating themselves (cognitive behavioral model), and Teach at risk youth how to better process information by understanding the situation before acting (information processing model). These goals are in line with the local OAC initiative goal which is to reduce disproportionate minority contact with the juvenile court. | Community Impact, Inc. | 15 | 31 to 90 days | \$285,800.00 |
| Hamilton | SAAPS (Substance Abuse Awareness and Prevention St | SAAPS (Substance Abuse Awareness and Prevention Strategies) is a program designed to work with children after school, during the peak crime hours (5-7 yrs. of age, 800 youth) will be prevented from getting involved with drugs and violence. This program teaches youth the hazards of getting involved with illegal drug activity and assist them with their homework, and conflict resolution skills. That is, the drug prevention aspect of the program teaches them the effects of illegal drugs, the violence it brings and the hazards of taking drugs. The homework aspect of the program is designed to help individuals who may be having problems with their grades or homework and is considering leaving school (older youth), and prevents the younger youth from being behind in school as they get older. Because we know that 60% of those who drop out of school (male students) will end in jail. | Mallory Center for Community Development | 30 | 0 to 30 days | \$250,000.00 |
| Hamilton | RAP (Resilient Adolescent Partnership | Our conflict resolution skills training, teaches the youth how to resolve conflict that often leads to violence. In this aspect of the program we also teach the youth the value of having social skills and how it is important to be able to get along with others, especially when entering the job market. This program is designed to teach youth job readiness skills and actually get them a job, or get them into a university, or trade school by the end of the program. They will work with youth mentors, 12-24 years of age. Mentors will be from lower income families, and are from communities that place them at risk of getting involved with the Criminal Justice System. We will teach them skills that will prepare them for their new business. To make a good resume, setting priorities, working well under pressure, sound decision making skills, conflict resolution skills, how to work well with others, how to communicate with others, learning skills, and how to develop the industry they are entering. Our program will also provide tutoring services to those who are in school, which will help them avoid being drop-outs. We will work with the youth's teachers and administrators in order to help make up the individual become successful. We will also engage the participants family and make referrals, when needed. Therefore, our agencies will work with other agencies to succeed. | Mallory Center for Community Development | 600 | 0 to 30 days | \$800,400.00 |
| Hamilton | Computer COP Head Connection | The Computer COP Head Connection Program is modeled after the 4-time award winning Computer COP Head Connection program and seeks to improve high crime neighborhoods and to practice anti-social, disruptive behavioral norms prevalent in the communities where they live. COP Officers will monitor these children and identify those with a propensity toward aggressive, violent behavior and disruptive behavior. They will model and teach Head Start children acceptable and prosocial community behavioral norms to all of their program participants. They will also identify while they are still impressionable and before they begin on developmental pathways toward delinquency. COP Officers also extend the positive relationships formed with Head Start to their family members, who in turn, generate positive relationships throughout their neighborhoods, which help to improve overall police-community relations and policing efforts. Research shows that one single career child delinquent is said to estimated cost from \$1.7 million to \$2.3 million. | Mallory Center for Community Development | 30 | 0 to 30 days | \$150,000.00 |
| Hamilton | Stabilization of Housing in West-Side of Cincinnati | In order to reduce the number of vacancies in rental properties throughout the westside of Cincinnati, we are adding for assistance to continue our business of buying, rehabbing, and leasing properties. Because of the banking crisis, we have been unable to secure 1st mortgages for new properties and also unable to secure a business line of credit. We have been in business for over 25 years and have always been able to secure the line of credit and mortgages to give the business. We employ office personnel, maintenance and other specialty services. We have independent contractors, including carpenter, HVAC, plumbers, electricians, and roofers. With additional funding, we can continue to purchase transitional homes, rehab, and lease them. We also continue to maintain the existing housing stock that we have which is approximately 100 single family houses. The west side needs good landlords who will take care of the properties and their tenants and we have been a good landlord for 45 years. | J.L. Rei Co. | 6 | 0 to 30 days | 300,000 |
| Hamilton | University Hospital Energy Efficiency and Renewal | The goal of this project is to utilize energy efficiency and renewable energy strategies to make facility upgrades and reduce operating costs. In order to accomplish this, this comprehensive energy program is designed to make improvements to the building envelope and facility systems in order to improve energy efficiency, improve patient satisfaction and conditions, and implement renewable energy strategies to improve energy efficiency and move toward a Net Zero facility. The project addresses all aspects of the building into an overall energy reduction program. The scope of the project includes the following areas: roof, facade, parking structures, HVAC systems (boilers, chillers, pumps, cooling towers, fans, variable speed drives and air handlers), Building Automation Systems, air barrier, photovoltaic systems and upgraded controls. | University Hospital of Cincinnati | 60 | 0 to 30 days | 3,500,000 |
| Hamilton | University Hospital Energy Efficiency and Renewal | The goal of this project is to utilize energy efficiency and renewable energy strategies to make facility upgrades and reduce operating costs. In order to accomplish this, this comprehensive energy program is designed to make improvements to the building envelope and facility systems in order to improve energy efficiency, improve patient satisfaction and conditions, and implement renewable energy strategies to improve energy efficiency and move toward a Net Zero facility. The project addresses all aspects of the building into an overall energy reduction program. The scope of the project includes the following areas: roof, facade, parking structures, HVAC systems (boilers, chillers, pumps, cooling towers, fans, variable speed drives and air handlers), Building Automation Systems, air barrier, photovoltaic systems and upgraded controls. | University Hospital of Cincinnati | 60 | 0 to 30 days | 3,500,000 |
| Hamilton | Construction of LEED Therapeutic High School at Th | Demanded for The Children's Home's services has increased by 80% in the past 5 years, but our buildings are inappropriate for the services we provide. In May 2009, we will break ground on a new 200,000 sq. ft. therapeutic high school building that will house Hope Academy, our therapeutic high school for students with special educational needs, and our other mental health treatment clients. These programs serve 100 children/day. The new building will include large classrooms, a dedicated art therapy room, and a game room that will serve as an incentive for good behavior. Construction is expected to take 14 months. Occupancy is planned for the beginning of the 2012 - 2013 school year. This building will be LEED certified (Silver certification). Our plans for sustainable building practices include: storm water collection/reuse; a rain garden to absorb water runoff; recycling 70% of materials from demolition/construction; sensor-activated lighting; and other energy saving features. According to the US Green Building Council, green schools use an average of 23% less energy than conventionally designed schools. LEED schools average an energy cost savings of \$9/ing. ft. | The Children's Home of Cincinnati | 72.5 | 0 to 30 days | 350,000 |
| Hamilton | PACER | This project will retain and create jobs by expanding an intensive mentoring and job training program for incarcerated juveniles in Hamilton County supported by the Juvenile Justice System, Juvenile Court, the Ohio Justice and Policy Center, Cincinnati State Technical and Community College, and local non-profit organizations. The program will engage the youth with paid mentors, provide life skills and job readiness training and connect the participants to postsecondary education and/or employment with continuing support when they are released. Of those completing the current program, the recidivism rate is 10%, compared to the County average of 70%. | PACE Empowerment Corporation | 15 | 0 to 30 days | 300,000 |
| Hamilton | 21ST CENTURY NUTRITION PROGRAM | THE CINCINNATI COLLEGE PREPARATORY ACADEMY serves a 90% free lunch population of 700 students. CCPA will be adding two grade levels and an early childhood education program over the next two years, and capital expansion is needed to accommodate the increase in size. Equipment will be needed to provide food to children at both ends of the age spectrum. Economically disadvantaged youth have shown greater results by the addition of more time spent in school. CCPA has been very successful in terms of academic results with its K-12 population, and we expect to see those same results for these ages. The school embraces the research that proves that nutrition has an impact on students' ability to learn, and thus its lunch program is very health-oriented. This funding will allow the purchase of the equipment needed to expand to these age groups. The outcomes will be measurable in terms of the # of children eating lunch each day, and the relationship to academic results. | CINCINNATI COLLEGE PREPARATORY ACADEMY | 5 | 0 to 30 days | 50000 |
| Hamilton | 21ST CENTURY TECHNOLOGY CENTER | A 21ST CENTURY LEARNING CENTER AND HIGH SCHOOL COMMUNITY CENTER will be created to serve the impoverished NORTH FARMINGTON of Cincinnati. This area has been blighted for years, and this project will impact the youth and families of the area in a far-reaching way. THE EAST END COMMUNITY HERITAGE SCHOOL, a school that serves a 90% free lunch, multi-racial population of 40 students. The project will be the addition of a computer lab that will offer the latest in training on applications essential to preparation for a 21st century workforce. The computer lab will also offer training to the adults of the community, and help prepare them for jobs. The unemployment rate of North Farmington is one of the highest in the city. Outcomes will be measurable through attendance and usage records, adults obtaining new jobs as a result of the training, as well as academic results for the students, and graduation rates in a certain block area with 50% drop-out rate. | EAST END COMMUNITY HERITAGE SCHOOL | 20 | 0 to 30 days | 200000 |
| Hamilton | Police Department Enhancement | To enhance the level of safety services to the 4200 residents by hiring 3 fulltime officers and an investigator for a three year period. More than 75% of residents desire additional police protection in the high drug areas. The presence of more police on public streets will substantially decrease the undesirable activities. Additionally, an investigator will improve the turnaround time for resolving crimes by at least 50%. The lot of potential poses a severe safety issue for the village. A better managed police department will increase the quality of life and increase the flow of revenue to our business community. The expected outcome from a safe community will include a rise in new home construction thus increasing the revenue to the village. | Village of Lincoln Heights | 3 | 31 to 90 days | 450,000 |
| Hamilton | The Christ Hospital's Program Heart ReStart | Project Heart ReStart is a proven educational and instrumentation placement program with the ultimate goal of saving more lives from Sudden Cardiac Arrest (SCA). This project expands Project Heart ReStart and supplies on 200 additional Automatic External Defibrillators to public spaces in a wide range of facilities, including offices, public buildings, and apartment complexes. The program also trains those most likely to arrive first at a medical emergency in CPR and emergency resuscitation. | The Christ Hospital | 0 | 0 to 30 days | \$728,000.00 |
| Hamilton | Hospital Energy Monitor for Real Time Energy Usage | A monitor installed in the Cafeteria would display real time energy use and our benchmark Energy Star usage for energy. In addition, Facilities Management would have the ability to view the data. This would allow us bring consumption in line with our benchmark data. We could also later employee education to train employees on how to reduce energy, with the monitor providing immediate feedback on results. | The Christ Hospital | 3 | 0 to 30 days | \$41,000.00 |
| Hamilton | The Christ Hospital's Parking Garage | Our current employee garage, which can accommodate approximately 1200 cars, is out of capacity due to the additions to our staffing and to additional nursing school students doing clinical work at the hospital. Due to this shortage, a number of employees have been forced to park in the neighborhood streets, which causes parking problems for the residents of Mt Auburn. If this project is approved, a new 1200 car parking garage will be constructed. Roadway modifications to Mason Street and a connector to the hospital will be included. The structure will also include energy-efficient lighting. | The Christ Hospital | 75 | 31 to 90 days | \$47,400,000.00 |
| Hamilton | The Christ Hospital Auditorium Night Set Back | Currently in our 150 seat auditorium, the air conditioning system remains on 24 hours per week, 7 days per week. The auditorium is on an average occupied approximately 50% of the time. The scheduling of events in the auditorium is done through Educational Services. An electronic scheduling program is used to list out times and days for events. If approved, this project would install controls on the AC system serving the auditorium to throttle back the air conditioning system when the area is unoccupied. The control package would be tied into the scheduling package in EIS Services and would gather the meeting and event times and start/stop the air conditioning unit according to the meeting schedules. In addition, electric sub-meters would be installed to monitor the electrical usage of the unit. | The Christ Hospital | 5 | 31 to 90 days | \$65,000.00 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hamilton | The Christ Hospital 6,000 Gallon Fuel Oil Tank | Currently we have four main diesel fueled generators that serve the hospital during emergency power outage conditions. The generators are supplied by on site by 3' half oil tanks. During an extended power outage, the half oil supply would last approx. 36 hours if all generators are operating under full load. This project would add another 6,000 gallon fuel oil tank, which would extend our ability to sustain the generators run times from 36 hours to 52 hours. This would allow us to run crucial hospital functions during extended emergency power outages. | The Christ Hospital | 10 | 0 to 30 days | \$215,500.00 |
| Hamilton | Bringing eICU Capabilities to Rural Areas | Critical Connectors is The Christ Hospital's answer to the inability of rural hospitals to recruit intensivists - doctors specially trained in critical care medicine - and to provide a cost-effective strategy for leveraging limited local resources across a number of hospitals. This project extends The Christ Hospital's eICU program in rural areas in Ohio and Indiana. | The Christ Hospital | 0 | 0 to 30 days | 2,000,000.00 |
| Hamilton | The Christ Hospital Green Infrastructure | This project will provide 24 eICU beds to approximately five rural hospitals and will allow underserved communities to have intensive care facilities available in their communities. This project comprises two programs designed to reduce storm water runoff, mitigate the city's heat-island effect, reduce utility costs, and provide green, aesthetically pleasing environments for staff, patients, visitors, and the surrounding neighborhood. One part of the project expands The Christ Hospital's green roof project, and the second creates a rain garden which will absorb storm water along Mason Street (one of the hospital's main access roads). | The Christ Hospital | 14 | 0 to 30 days | \$1,397,000.00 |
| Hamilton | Renovate Doanne House | The Doanne House built in 1875, is located at 2223 Auburn Ave and is in the Mt Auburn Historic District. The house has served as a dorm for nursing students and as offices for the hospital and physician tenants. Currently the building is vacant due to serious moisture issues due to the poor foundations. The project would resolve the moisture issues, eliminate the most infested finishes, remove the mold, and install new finishes and mechanical systems. | The Christ Hospital | 21 | 31 to 90 days | \$898,000 |
| Hamilton | The Christ Hospital Water Conservation Project | The Christ Hospital plans several new water conservation projects: Smart sprinklers to reduce waste in landscape watering; low flow faucets and waterless urinals to decrease water use and the waste water flowing into the city's sewer system. Expected savings in the area of 30% decrease in water used (81,000 gallons/year) for irrigation; decrease in water use of 1.3 million gallons per year with low flow faucets, and a savings of 400,000 gallons of water a year with waterless urinals. | The Christ Hospital | 3 | 0 to 30 days | \$142,855 |
| Hamilton | Expand Spaces for HR and Pastoral Care | Goal: To provide adequate workspace for the expanding HR Department, provide an accessible location for new job applicants, and provide expanded space for Pastoral Care. | The Christ Hospital | 15 | 0 to 30 days | \$840,000 |
| Hamilton | Weatherization Assistance Program | Project: The Christ Hospital plans to renovate a vacant area within the hospital and relocate Pastoral Care to that space. The Christ Hospital has been renovating space for the HR recruitment group, the HR compensation and benefits group, and the Pastoral Care education staff. | Duke Energy | 800 | 31 to 90 days | 31,464,382 |
| Hamilton | Crimestopper Advocate | Duke Energy will continue the same level of funding that was in a field energy efficiency program, so all stimulus dollars are spent on the energy program to modify the weatherization program to leverage stimulus funds in the existing program infrastructure to encourage new homes and make the program cost effective. Duke Energy will perform marketing to identify customers eligible for weatherization programs, perform measurement and verification to ensure program requirements are met, and provide training to community agencies to effectively administer the program; and provide guidance on training to assure there are qualified technicians with the skills to sustain the stimulus funding period. | City of Cincinnati Police Department | 1 | 31 to 90 days | 20,000.00 |
| Hancock | Lime Sludge Press | To encourage more active citizen participation with the police, Crime Stoppers is collaborating with the National Association for the Advancement of Colored People (NAACP). Crime Stoppers is a proven commodity in this area. In 2008, Crime Stoppers solved 319 tips, which solved 856 crimes, including 30 homicides, and netted \$144,500. | City of Fostoria | 5 | 91 to 180 days | \$1,600,000 |
| Hancock | Vanlue Water System | Crime Stoppers desires to hire an advocate to bridge the gap between the NAACP, citizens and police in creating more avenues for advocates and witnesses of crimes to provide information. This leverages the NAACP's ability to inspire cooperation and involvement by a segment of our community that may be reluctant to get involved. | Village of Vanlue | 150 | 91 to 180 days | \$1,500,000 |
| Hancock | Dist 1, PID 85741, HAN Parking lot with canopy | This project includes the construction of a new steel framed building to house a new lime sludge press. | Ohio Department of Transportation | 1 | 31 to 90 days | \$15,000 |
| Hancock | Dist 1, PID 85739, HAN Purchase 2 LTNs | Construction of new water system to replace private wells. Consisting of water treatment plant, elevated storage tank, and 15,600 linear feet of distribution system. Project will benefit residents of village, who currently have private wells. There are several wells in the village that cannot be used due to problems with water, including the local school. | Ohio Department of Transportation | 1 | 31 to 90 days | \$90,000 |
| Hancock | Dist 1, PID 85740, HAN Phone system, laptop, proj | Purchase 2 light transit vehicles with a narrow body for the Hancock, Hardin, Wyandot, and Putnam Community Action Commission | Ohio Department of Transportation | 1 | 31 to 90 days | \$4,735 |
| Hancock | Dist 1, PID 85742, HAN RouteMatch custom report | Purchase phone system upgrade, laptop computer and projector, and upgrade the computer network hub for the Hancock, Hardin, Wyandot, and Putnam Community Action Commission | Ohio Department of Transportation | 1 | 31 to 90 days | \$2,500 |
| Hancock | Dist 1, PID 85741, HAN Parking lot with canopy | RouteMatch customized report for the Hancock, Hardin, Wyandot, and Putnam Community Action Commission | Ohio Department of Transportation | 1 | 31 to 90 days | \$15,000 |
| Hancock | Dist 1, PID 85738, HAN Purchase 2 minivans | Parking lot expansion with canopy for the Hancock, Hardin, Wyandot, and Putnam Community Action Commission | Ohio Department of Transportation | 1 | 31 to 90 days | \$46,000 |
| Hancock | Rawson Elevated Tower and Waterline Improvements | Purchase 2 minivans for the Hancock, Hardin, Wyandot, and Putnam Community Action Commission | Village of Rawson-Feller, Finch & Assoc. | 25 | 91 to 180 days | \$414,700 |
| Hancock | CSO No. 2 and No. 3 Elimination | The project components include one 100,000 gallon elevated water storage tower, 3340 feet of 8" waterlines, 5 1/2 hydrants, pavement replacement and right of way restoration. The existing waterlines and elevated water storage tank are over 35 years old and are in need of replacement to meet existing EPA requirements. Furthermore, these improvements are needed for a planned 36" single family to development. | City of Fostoria | 5 | 181 days or more | \$5,000,000 |
| Hancock | East Branch Of the Portage River Flood Control and | The project includes the study, design, and construction of a new sanitary pump station and force main to eliminate two combined sewer overflows in the City of Fostoria. The existing sewer system within the project area is required to be studied in detail. The study will include the reassignment of sewer alignments, catchment areas, and capacity. The study may also include the development of the most economic protocol to full/partial separate sanitary and storm sewers, redirect inflow to the East Branch of the Portage River. This project will significantly expedite the City's compliance with the Clean Water Act. | City of Fostoria | 10 | 181 days or more | \$900,000 |
| Hancock | Dist 1, PID 81843, HAN-Blanchard River Greenway Tr | The City intends to decommission an unused reservoir to improve flood control and to improve water quality in the East Branch of the Portage River. The project has been studied by the Ohio Department of Natural Resources and The Ohio State University. A HEC-2 model has been developed to assist with the study. This project involves excavation of the existing reservoir, outlet pipes and weir construction, Connect Two Ends Of The Blanchard River Greenway Trails By Constructing A Bikepath Along The Blanchard River Between Taylor Street And Central Parkway. | Ohio Department of Transportation | 71.8 | 31 to 90 days | \$2,500,000 |
| Hancock | Branch Library Construction | This project will build a new branch library in Arlington. The current branch was damaged by high winds in 2008. The new portion of the building was closed after the roof collapsed during tornado like winds. The branch remains open in limited space. Land for a new branch has been identified within the city limits and a price has been tentatively agreed upon. Due to the financial burden caused by the flooding of the Main Library in August 2007 this project is dependent on outside funding. | Findlay-Hancock County Public Library | 4 | 181 days or more | \$750,000 |
| Hancock | Dist 1, PID 80412, HAN SR 568 3.15 | Add Turn Lanes On The North And West Approaches Of The Intersection. | Ohio Department of Transportation | 16.9 | 31 to 90 days | \$590,444 |
| Hancock | Dist 1, PID 80412, HAN SR 568 3.15 | Add Turn Lanes On The North And West Approaches Of The Intersection. | Ohio Department of Transportation | 16.9 | 31 to 90 days | \$590,444 |
| Hancock | Dist 1, PID 81843, HAN-Blanchard River Greenway Tr | Connect Two Ends Of The Blanchard River Greenway Trails By Constructing A Bikepath Along The Blanchard River Between Taylor Street And Central Parkway. | Ohio Department of Transportation | 71.8 | 31 to 90 days | \$2,500,000 |
| Hancock | Dist 1, PID 25203, HAN IR 75 22.42 | Minor rehab of IR75 | Ohio Department of Transportation | 33.8 | 31 to 90 days | \$1,176,219 |
| Hancock | Dist 1, PID 81843, HAN-Blanchard River Greenway Tr | Connect Two Ends Of The Blanchard River Greenway Trails By Constructing A Bikepath Along The Blanchard River Between Taylor Street And Central Parkway. | Ohio Department of Transportation | 71.8 | 31 to 90 days | \$2,500,000 |
| Hancock | Dist 1, PID 25203, HAN IR 75 22.42 | Minor rehab of IR75 | Ohio Department of Transportation | 33.8 | 31 to 90 days | \$1,176,219 |
| Hancock | NMI Building | New Nuclear Medicine Institute building to allow for expansion of training programs in real health care fields. Those using this building will be capable of providing excellent health care to Ohio's citizens. Construction would get underway in 2010. The building would allow for highly skilled graduates. The existing Institute, housed in a compact facility, is regarded as one of the finest programs of its kind in the nation. | The University of Findlay | 87 | 31 to 90 days | \$6,500,000 |
| Hancock | Water Tower Rehab | The Village water tower is in need of repair both inside and out. Safety issues need to be addressed and brought into compliance with OSHA. The tower was built in the 30's, but after a recent inspection, it was brought to the Village's attention that the tower is still structurally sound, but certain repairs and modifications are needed to restore the life of this tower and to be in compliance with current regulations. | Village of McComb | 20 | 31 to 90 days | \$300,000 |
| Hancock | Street Reconstruction | The Village Main Street roadway, curbs and sidewalks are in desperate need of repair. Due to much truck traffic coming through our Village on their way to a nearby steel mill, the road is in bad shape. With this request, the Village would like to coordinate the reconstruction of the curbs and sidewalks in the downtown area. The current sidewalk approach are not ADA compliant, and need this as a major issue that the Village needs to address. The State has funded the road reconstruction back over the years and the Village feels this is coming back, so it helps getting more year after year. Thank you for allowing me to submit this request on the Village of McComb's behalf. | Village of McComb | 50 | 91 to 180 days | \$500,000 |
| Hancock | Wireless Broadband Internet Service | The Village Broadband Internet Service offering would target potential customers who are in un-served and under-served rural areas who do not have access to Broadband Internet services. The funds would be used to purchase and install Wireless Broadband Radio equipment at the Findlay, Ohio (Hancock County) area on either an existing or a new tower depending on the best coverage area obtainable. The funds would also be used to provide customer premise radio equipment in order to provide the radio link between the customer and the base station antenna. The service would be provided in the 700 MHz digital wireless radio band. NCTCO, Inc. already owns the 700 MHz license for Hancock and surrounding counties. Unlike other radio services, the 700 frequency is not strictly "line of sight". Thus, NCTCO, Inc. will be able to provide service to customers who were previously not able to obtain Broadband service. Approximately 50 to 75 new customers could initially be provided service with the \$85,000 stimulus funds. A total buildout, savings in excess of 200 customers would be possible utilizing the estimated \$200,000 in total project cost estimates. | NETelco Inc. | 3 | 31 to 90 days | \$85,000 |
| Hancock | Relocate T/W, Expand Apron, Grade RSA | Relocate Taxiway A, Expand Aircraft Parking Apron, Grade Runway Safety Area. | Findlay Municipal Airport | 60 | 31 to 90 days | \$3,625,025 |
| Hancock | CAH Generator Upgrade-Findlay | Repair and upgrade the generator for the Findlay pharmaceutical distribution to secure an uninterrupted power supply should power be eliminated. The distribution centers store life saving pharmaceuticals which some require special handling such as refrigeration. Should the power supply be shut off such drugs could spoil. In addition, continuous power supply is necessary to respond to hospitals and pharmacies needs for pharmaceuticals in the event of a natural disaster. | Cardinal Health | 4 | 91 to 180 days | \$75,000 |
| Hancock | CAH Refrigeration-Findlay | Enhance refrigeration at pharmaceutical distribution center to support specified climate and temperature control for pharmaceutical products requiring special handling/refrigeration. | Cardinal Health | 6 | 91 to 180 days | \$115,000 |
| Hancock | Van Buren Village Square Improvements | The project is located at the Van Buren Village square located at the downtown area of town. The project will remove and replace broken down curbs and sidewalks, and will replace handicap pedestrian ramps to meet ADA requirements. The project includes asphalt pavement repairs including milling and overlaying the pavement with new asphalt surface course. Adjust manholes and catch basins to final grade. Relocate parking barrier and install pavement markings on final pavement surface. The project includes 890 linear feet of new concrete, 2200 square feet of new concrete sidewalk, 12 handicap pedestrian ramps, 11 cubic yards of concrete pavement and divots, 175 cubic yards of aggregate base, 180 cubic yards of asphalt pavement, and will adjust 6 manhole/catch basins to grade and will relocate one parking barrier. | Feller, Finch & Associates, Inc. | 2 | 91 to 180 days | \$128,700 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------------|----------------|--------------------|---------------------------|
| Hancock | Century Health MIS Project | To permit Century Health to make a strategic investment in infrastructure and technology to optimize business processes. Century Health will be able to attain the correct tools to provide superior quality of behavioral health care while controlling or reducing costs. Support of this project would allow for the purchase of CATT (Clinical Assessment Training and Tool) software. This package would provide an electronic clinical record, the ability to query technology, the ability to bridge technology to share data with hospital wide registration systems, allow for a disconnected clinician desktop for those providers who work outside of the office, electronic signature technology, Quality Improvement data mining and analysis, and a direct interface for accurate visitable management. The inclusion of new software within our organization would work to improve efficiencies, maximize reimbursement, enhance quality of care and provide the basis for an integrated clinical record. | Century Health, Inc. | 15 | 91 to 180 days | \$50,000 |
| Hancock | 100,000 Gallon Elevated Storage Tank Repairs and R | Elevated tanks is over 60 years old and in need of repairs and improvements to current standards. Paint system must be replaced | Village of McComb | 10 | 91 to 180 days | \$110,000 |
| Hancock | Downtown Street Redevelopment | Road and sidewalks reconstruction of approximately 1,000 LF in the Central Business District | Village of McComb | 45 | 91 to 180 days | \$350,000 |
| Hancock | WWTP Improvements | Replacement of worn out wastewater plant components with new equipment. | Village of McComb | 10 | 91 to 180 days | \$125,000 |
| Hancock | Findlay Radio Interoperability Upgrades | Current existing analog radio system to digital format, allowing the City to interface easily with other area public safety agencies, encouraging interoperability | City of Findlay | 50 | 31 to 90 days | \$2,500,000 |
| Hancock | NAMI of Hancock County startup - support/education | NAMI of Hancock County would like to obtain 501 c 3 status in order to become an independent not for profit organization. We currently provide support, education, and advocacy services to Hancock County residents with an volunteer staff and board. This includes programming, the ability to publicize programs and the ability to truly meet community need. This local chapter would like to hire a part-time Executive Director and a part-time office assistant as well as lease some modest office space equipped with a basic computer system. The requested funds would be considered start-up monies for a two-year period, with continued funding coming from NAMI Walks and other fund raisers. This project would be partially administered by Century Health as they are currently the fiscal agent for NAMI of Hancock County - any donations are directed through Century Health as they have 501 c 3 status. Century Health considers NAMI to be a vital support to our clients in combination with and after graduation from clinical care, and we are committed to this chapter's success. We expect a strong local NAMI to not: job retention, decrease hospitalization, & decrease job loss of mental illness. | Century Health | 10 | 0 to 30 days | \$40,000 |
| Hancock | Processing Plant | Equine Slaughter Processing Plant- Processing Equine facility that would re-cycle the excess horses the lame, aged, unusable. Process with the USDA inspecting the plant and meat. And shipping it for sale to Europe, Asia, France and Belgium. This would provide a decency, high quality. The product can be used for pet food, horse protein in the Horse Transportation Act 503 and 511. The Human Society, the United States made a mistake with these laws, they need to be repealed, opening a processing plant that could make money and make a difference in the lives of the horses. If circumstances are not the owner, it takes a 1800 a year to keep one to 2 million dollars. There are 38 million dollars a year to keep them in shelters. They can produce a income, jobs, and the care of life and profit. | | 250 | 0 | \$850,000 |
| Hancock | Melrose Avenue Reconstruction | Melrose Avenue Reconstruction Local Match for a FHWA funded street reconstruction involving new storm sewers, water mains, curb, gutter and sanitary sewer replacement, traffic signals, and sanitary sewer relocation. | City of Findlay | 25 | 31 to 90 days | \$1,176,800 |
| Hancock | 2009 Resurfacing Program | Curb Replacement and asphalt pavement resurfacing of various City streets in poor condition. | City of Findlay | 15 | 31 to 90 days | \$1,500,000 |
| Hancock | Victim Assistance Program | Victim assistance to juvenile, adult felony and federal crime victims in Hancock County. We are the only office that provides the law required assistance to these victims such as court accompaniment, hearing notifications, restitution and recovery assistance, as well as referral to shelter and counseling services. The fund request would supplement our ever growing needs this year as well as next. | Hancock County Prosecutor's Office | 1 | 0 to 30 days | \$25,000 |
| Hancock | SR 568/CR 236 Intersection Improvements | Local share of intersection upgrade including pavement widening, turn lane addition, and signal modification. | City of Findlay | 15 | 91 to 180 days | \$165,000 |
| Hancock | Crystal Avenue Reconstruction | Local match to a FHWA funded street reconstruction involving 1 mile storm sewers, water mains, curb, gutter and sanitary sewer rehabilitation. | City of Findlay | 25 | 181 days or more | \$1,300,000 |
| Hancock | US 224 Widening (CR 300-CR223) | Reconstruction and Widening of US Route 224 approximately 1 mile from County Road 300 west to County Road 223. Design plans are complete, funding for acquisition and construction are necessary. | Hancock Regional Planning Commission | 25 | 31 to 90 days | \$1,000,000 |
| Hancock | Downtown Street Redevelopment (Revisions to previo | Road and sidewalks reconstruction of approximately 1,000 LF in the Central Business District | Village of McComb | 45 | 91 to 180 days | \$350,000 |
| Hancock | Tail Timbers Connector | Extension of Schuman Drive through Production Drive to improve traffic flow of City's busiest industrial park. Construction involves 2400 LF of curb & gutter and 1200 LF of pavement. | Hancock Regional Planning Commission | 15 | 31 to 90 days | \$250,000 |
| Hancock | Pharmacist Manged Worksite Wellness | This project will initiate wellness in the workplace. The program will empower employees and their families to better utilize their current health insurance program. The focus will be to prevent disease and manage high risk disease states that affect oral health care dollars and/or increased therapy management costs. These disease states and topics include but not limited to: diabetes, obesity, hypertension, heart disease, and medication therapy management to avoid adverse consequences to medication. The outcomes will be measured by weight loss, blood pressure, lab values/HbA1c, blood sugar levels, myocardial infarct occurrences, medication adherence, and a Likert Scale to measure productive time spent with their physicians. The expected outcome will be measure over a 5 year time frame. The expected outcome is documented savings of health care dollars (15%-20%), reduced long term work time off, critical significant improvement in market to values that are used to measure disease states. Overall reduction in health care dollars for employers and improved health care management by employees (Likert Scale improvement >25%). | E3Rx | 300 | 31 to 90 days | \$225,000 |
| Hancock | JobSolutions Expansion | Expansion of JobSolutions Employment & Training Facility. Required renovation of vacant upper floor of Employment & Training Center current use. The need for additional space has existed for many years as the demand for services from businesses, current workers, and the unemployed has increased. Expected Outcomes: Staff will be able to meet demand for services which has increased approximately 100% in the last 18 months. This will result in increased services to the community, providing the skilled workforce needed to foster business expansion, and returning workers to the workforce much sooner. Statutory limitations prohibit use of current available funding for the project, specifically permanent building improvements. | Hancock County Job & Family Services | 300 | 0 to 30 days | \$70,000 |
| Hancock | l.r. 173 | The current road is 10 feet wide, would widen to 16 feet wide. This requires digging dirt out and adding stone for a base. Then asphalt is laid on the sides to match the current road height. The ditch will have to be moved one during the process of digging the sides of the road out. A 2" sewer asphalt is then put down on top of the 16 foot wide road. The road is 1.35 miles long. This road is a safety concern due to the width. Cars are currently forced to the ditch to pass oncoming traffic. | Jackson Township | 30 | 31 to 90 days | \$162,000 |
| Hancock | l.r. 178 | This road is currently 10 feet wide. Would widen to 16 feet. This requires digging out dirt on each side of the existing road and adding stone for a base. The ditch is moved away from the road as well. Asphalt is added to the top of the 16 foot wide road for its final layer. The road is one mile long. | Jackson township | 30 | 31 to 90 days | \$120,000 |
| Hancock | Wastewater Treatment Plant Replacement | Project includes removal and replacement of the Village's existing continuous discharge stabilization pond wastewater treatment facility with an oxidation ditch type treatment plant. The new facility will provide increased ammonia and BOD removal and will provide more consistent wet weather treatment prior to discharge to Buck Run Ditch. | Village of Arlington | 130 | 181 days or more | \$2,600,000 |
| Hancock | Brine Backwash Diversion Project | This project will provide a diversion route for the brine backwash water discharged daily by the water treatment plant. OneEPA has ordered the Village to remove the discharge from the existing storm line and reroute to either Buck Run or Eagle Creek. Additionally, this storm line will provide an alternate stormwater outlet for far areas experiencing localized flooding during moderate rainfall events. Project includes approximately 5,000 LF of Storm Sewer, 13 Manholes, 5 Catchbasins and restoration of existing pavement. | Village of Arlington | 15 | 31 to 90 days | \$300,000 |
| Hancock | HAN Capitalized maintenance; PID 86100 | 2009 Capitalized Maintenance. This is a total transit project whose funding comes through ODOT. | Ohio Department of Transportation | 1 | 0 to 30 days | \$33,800 |
| Hancock | Municipal Building Backup Generator | This project involves the purchase and installation of a stand-by, natural gas fired generator for the Municipal Building/Fire Station. This will permit the building to be utilized as an emergency shelter during natural disasters or extended power outages. Building wiring was installed to accommodate future backup generator, therefore no internal electrical work will be required. | Village of Arlington | 3 | 31 to 90 days | \$26,000 |
| Hancock | Streetscape Improvement Project | Project includes replacing curbing and sidewalk along Main Street (US Rt. 66) from Liberty St. to Park St. (approx. 2,000). Project will provide ADA compliant curb drops and crosswalks, and will also include improved lighting, traffic signals and landscaping enhancements. | Village of Arlington | 15 | 91 to 180 days | \$700,000 |
| Hancock | Findlay Airport Improvements (AIP-19) | Relocate 0.5 miles of taxiway and construct 9000 square yard apron expansion. | City of Findlay | 25 | 0 to 30 days | \$210,000 |
| Hancock | Road Paving | 8 miles of repaving and rebarment township roads | Orange Twp Trustees, Hancock County | 8 | 91 to 180 days | \$289,000 |
| Hancock | Riverside Pool Reconstruction | Riverside Pool is the only public pool in the City of Findlay. The pool is more than 25 years old and in need of replacement in the near future. | City of Findlay | 50 | 181 days or more | \$2,000,000 |
| Hancock | G and H Street Sewer Separation | Construction will provide new storm sewer and sanitary sewer facilities for one LMI neighborhood. | City of Findlay | 30 | 181 days or more | \$1,000,000 |
| Hancock | Park Street and Oakland Avenue Storm Sewer Outlet | 870 lineal feet of storm sewer will provide an outlet for a poorly-drained, older area of Findlay. | City of Findlay | 15 | 91 to 180 days | \$150,000 |
| Hancock | West Park Storm Sewers, Phase I | This project is Phase I of a multi-phase, large scale storm sewer project to provide improved drainage to an LMI neighborhood within the City. | City of Findlay | 25 | 181 days or more | \$450,000 |
| Hancock | Wilson Street/ Bennett Street Reconstruction | Construction of 700 lineal feet of storm sewer and 700 lineal feet of sanitary sewer will be followed by reconstruction of the roadway. | City of Findlay | 30 | 91 to 180 days | \$560,000 |
| Hancock | Brandman Area Sewer Diversion and CSO Removal | Construction of 260 lineal feet of sanitary sewer will replace a pipe crossing the river and eliminate 1 combined sewer overflow. | City of Findlay | 15 | 91 to 180 days | \$200,000 |
| Hancock | West Hardin Street Sewer Separation | 1300 lineal feet of storm sewer and 1300 lineal feet of sanitary sewer will be constructed to separate the currently combined sewers. | City of Findlay | 25 | 91 to 180 days | \$330,000 |
| Hancock | Twp Rd 37 from CR 8 to SR 88 | The road is in need of resurfacing with asphalt. The road is 3 miles long and the project has an estimated total cost of \$165,000. The \$130,000 requested would be paired with an awarded \$35,000 from the Public Works Commission to resurfacing this particular stretch of road. | Jackson Township | 10 | 31 to 90 days | \$130,000 |
| Hancock | West Lincoln Street Sewer Separation | 1300 lineal feet of storm sewer and 1300 lineal feet of sanitary sewer will be constructed to separate the existing combined sewers. | City of Findlay | 25 | 91 to 180 days | \$330,000 |
| Hancock | Twp Rd 188 from Twp Rd 25 to CR 25 Widening | The road is currently 10 feet wide and needs to be widened to 16 feet. This requires digging out dirt on both sides of the road and adding a stone base, covered with asphalt for the new road. The ditch would be moved to accommodate the wider road. Cross pipes and catch basins would need to be moved as well. The road is one mile long and the estimated project cost is \$130,000.00. | Jackson Township | 10 | 31 to 90 days | \$130,000 |
| Hancock | Raw Water Main | A miles of 36" watermain would provide a badly needed secondary water supply for the City of Findlay. The main would deliver raw water from the Findlay Reservoir to the Water Treatment Plant. Project includes design, land and/or easement acquisition, and construction. | City of Findlay | 50 | 181 days or more | \$5,300,000 |
| Hancock | Twp Rd 18 from Tr 25 to Cr 24 Widening | This road is currently 10 feet wide and needs to be widened to 16 feet. This will require digging out dirt on both sides of the road and expanding the road by adding a stone base, with an asphalt covering. The ditch would be moved away as well to accommodate the wider road. The road is 1 mile long and the estimated price for the project is \$120,000.00. | Jackson Township | 15 | 31 to 90 days | \$120,000 |
| Hancock | Clearwell Repairs - Water Treatment Plant | 2 clearwells would be repaired. The two 80 year old clearwells at the Water Treatment Plant were damaged in a flood in 2008. | City of Findlay | 10 | 0 to 30 days | \$150,000 |
| Hancock | Twp Rd 173 from SR 27 to Twp Rd 244 Improvements | The current road is 10 feet wide, would widen to 16 feet. This requires digging dirt out and adding stone for a base. Then asphalt is laid on the sides to match the current road height. The ditch will have to be moved one during the process of digging the sides of the road out. A bear of asphalt is then put down on top of the 16 foot wide road. The road is 1.35 miles long. This road is a safety concern due to the width. Cars are currently forced to the ditch to pass oncoming traffic. The estimated project cost is \$130,000.00. | Jackson Township | 10 | 31 to 90 days | \$162,000 |
| Hancock | Tiffin Avenue Water Main Replacement | 2000 lineal feet of 4" waterline to replace a failing waterline on a major thoroughfare within the City of Findlay. | City of Findlay | 15 | 91 to 180 days | \$325,000 |
| Hancock | Water Pollution Control Clarifier Number 6 | Construction of 1 fresh clarifier to increase treatment capacity at the Findlay Water Pollution Control Center. | City of Findlay | 50 | 181 days or more | \$1,000,000 |
| Hancock | Storage Building - Water Pollution Control Center | 1 storage building will be constructed at the existing Water Pollution Control Center. | City of Findlay | 35 | 91 to 180 days | \$300,000 |
| Hancock | Filter Reconstruction - Water Treatment Plant | 13 Rapid Sand Filters in the Municipal Water Treatment Plant will be rebuilt with new underdrains and air scrubbing backwash equipment. | City of Findlay | 35 | 91 to 180 days | \$2,650,000 |
| Hancock | Water Pressure Zone for Burberry Area | 1 pressure zone will be installed to provide higher water pressures for a specific area of the existing water distribution system. | City of Findlay | 15 | 91 to 180 days | \$200,000 |
| Hancock | Twp Rd 150 Paving | This road is 5.18 miles long. 3.88 miles of this road has been paved over the past two years with 1.5 miles of the road left that needs paved with an estimated cost of \$80,000.00. | Delaware Township | 8 | 31 to 90 days | \$72,500 |
| Hancock | Health Department Relocation | Funding will construct one new Findlay Health Department Facility to replace a facility destroyed by flooding in August 2007. | City of Findlay | 35 | 181 days or more | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Hancock | Twp Rd 84 Paving | This road is 1.18 miles long. It has major surface problems and needs repaved, with an estimated repaving cost of \$ 120,000.00. | Delaware Township | 8 | 31 to 90 days | \$102,500 |
| Hancock | Public Works Department Relocation | Project will construct one building to house City's Public Works Department. Will include offices, mechanic's bays, outdoor storage on existing City-owned land. Project will replace current temporary facility that was relocated due to original location on former dump site. | City of Findlay | 50 | 181 days or more | \$4,000,000 |
| Hancock | Facility Upgrades Design Services | Plans of design plans will be produced. Plans will be for a new Public Works structure, Fire Department Living Quarters, and Health Department location. | City of Findlay | 15 | 31 to 90 days | \$350,000 |
| Hancock | Park Improvements - Ball Field & Pool | Funding will reconstruct 4 baseball fields and provide drain improvements for the public swimming pool. | City of Findlay | 15 | 181 days or more | \$150,000 |
| Hancock | 2009 Waterline Corrosion Protection Program | 7 miles of existing waterlines that have external corrosion issues will be protected with the installation of sacrificial anodes. | City of Findlay | 15 | 31 to 90 days | \$750,000 |
| Hancock | 2009 Waterline Lining | 3000 linear feet of CIPP living installed in existing waterlines in poor condition. | City of Findlay | 15 | 31 to 90 days | \$600,000 |
| Hancock | 2009 Sanitary Sewer Lining | 20,000 linear feet of sanitary sewer lining to rehabilitate existing sewers that are in poor condition. | City of Findlay | 15 | 31 to 90 days | \$600,000 |
| Hancock | Tr 37 | This road is in need of resurfacing with asphalt. This road is three miles long. The estimated cost is \$165,000. We have been awarded \$35,000 through the Public Works Commission to help with the resurfacing cost. | Jackson township | 20 | 31 to 90 days | \$130,000 |
| Hancock | Lr.188 | This road is currently 10 feet wide. It would be widened to 16 feet. This requires digging out dirt on each side of the road and adding stone for base. The dirt would be moved away from the road as well. Cross pipes and catch basins would also be moved. Asphalt would be added to the top of the 16 foot wide road for 1/2 mile. This road is one mile long. The estimated cost is \$130,000. | Jackson township | 30 | 91 to 180 days | \$130,000 |
| Hancock | Install paved parking lot at Delaware Twp communit | The building was built in 2005. We would like to install a paved parking lot to help the building's handicap accessibility. We would also like to move the Township's voting precinct from the Church to the Township building and need the additional parking. The estimated cost of the project is \$ 60,000.00. | Delaware Township | 10 | 31 to 90 days | \$60,000 |
| Hancock | Installing guard rails on Twp Rds. 149,154 and 185 | These roads all have creek or deep open ditch that parallels the road and at times comes within 3 to 4 feet from the edge of the road 149 = 1902.6 feet 154 = 1200 feet 185 = 550 feet The total length equals 3653.6 feet at an estimated cost of \$ 22.00 per foot equals a total project cost of \$ 84199.20 | Delaware Township | 10 | 31 to 90 days | \$84,199 |
| Hancock | Widen Twp Rd 149 from State Route 37 to the county | This road is 1.18 miles long. It has been at least 24 years since the majority of the road has had any paving done. The estimated paving cost for 147 is \$ 70800.00. | Delaware Township | 10 | 31 to 90 days | \$70,800 |
| Hancock | Twp Rd 147 Improvements | This road is 1.11 miles long. It has been at least 24 years since any paving has been done on this road. It is the only Township road that has access to the new U.S. 30 highway that opened 2 years ago. The estimated paving cost of 186 is \$180,000.00. | Delaware Township | 10 | 31 to 90 days | \$180,000 |
| Hancock | Twp Rd 186 Improvements | These two roads are the only access to 7 houses and 2 businesses. Township road 302 is only 10 foot wide and needs widened to 16 feet to meet paved. The combined length of the two is .46 miles with an estimated paving and widening cost of \$78,200.00. | Delaware Township | 10 | 31 to 90 days | \$78,200 |
| Hancock | Twp Rd 191 Improvements from State Rte 37 to Count | This road is cranking due to heavy traffic bypassing the construction in Mt Blanchard. It also has open ditches that parallels the road on both sides eroding the berm and needs mowed. The road is 0.9 miles long with an estimated paving cost of \$ 60,000.00, ditch relocating \$ 20,000.00, total cost of \$ 80,000.00. | Delaware Township | 10 | 31 to 90 days | \$80,000 |
| Hancock | Twp Rd 158 Improvements from Mt Blanchard Corporat | With recent construction in Mt Blanchard we have had repeated heavy truck traffic on this road causing it to crumble. We need to replace crossover pipe and now needs repaired. We also have a petitioned project to install a new waterline and ditch that will cross this road to install a new pipe in this location. The road is .74 miles long with an estimated paving cost of \$ 45000.00, crossover pipes at \$30000.00, and ditch at \$ 75000.00 installation of 1 chemical building to control existing Zebra Mussels that affect low water river levels. Additional modifications to one water pump station are included in project. | Delaware Township | 10 | 31 to 90 days | \$75,000 |
| Hancock | Reservoir Improvements | Construction of 6100 linear feet of storm sewer to complete drainage system for poorly drained, open land around. This project is Phase II of a larger project. | City of Findlay | 15 | 181 days or more | \$1,000,000 |
| Hancock | Fostoria Avenue Storm Sewers, Phase II | Installation of 5000 linear feet of storm sewer in poor condition, other neighborhood. Phase I of larger project that will further extend drainage system in neighborhood. Plans 65% complete as of 3-1-09. | City of Findlay | 25 | 91 to 180 days | \$510,000 |
| Hancock | Fostoria Avenue Storm Sewers, Phase I | Replacement of 17,500 water meters with City's water distribution system and installation of an Automated Meter Reading system to improve customer service and reduce department overhead. | City of Findlay | 25 | 31 to 90 days | \$175,000 |
| Hancock | Water Meter AMR Project | 3000 linear feet of storm sewer construction to eliminate flash flooding in low lying neighborhood. | City of Findlay | 10 | 0 to 30 days | \$1,500,000 |
| Hancock | Hunter's Creek Drainage Improvements | USACE Flood Resilience Feasibility Study for the Upper Blanchard River Watershed and Findlay. Plans are being completed by USACE as part of a local watershed, multi-county restoration effort. | City of Findlay | 15 | 0 to 30 days | \$515,000 |
| Hancock | USACE Feasibility Study | Funding used in conjunction with Hazard Mitigation Grant Program to acquire and demolish 24 houses repeatedly damaged by flooding of Blanchard River. | City of Findlay | 15 | 181 days or more | \$250,000 |
| Hancock | Remediation of Flood-Damaged Homes | Separation of currently combined sanitary/storm sewers serving 2000 linear feet of Lincoln Street. EPA required separation. Rehabilitation of other existing utilities and roadway. | City of Findlay | 30 | 31 to 90 days | \$255,000 |
| Hancock | Lincoln Street Sewer Separation & Rehabilitation | Separation of currently combined sanitary/storm sewers serving 2000 linear feet of Lincoln Street. EPA required separation. Rehabilitation of other existing utilities and roadway. | City of Findlay | 15 | 0 to 30 days | \$1,113,000 |
| Hancock | Findlay Airport Improvements (AIP-19) | Relocate 0.5 miles of paved and construct 9000 square yard apron expansion. | City of Findlay | 25 | 31 to 90 days | \$210,000 |
| Hancock | Van Buren State Park Restroom addition | Funding would provide a handicap-accessible public restroom. Van Buren State Park is an important destination for outdoor recreation in the county and features day-use facilities and an extensive trail network for walking and horseback riding. These restrooms would provide for better sanitation at the Horsemen's area and would support overnight camping. | ODNR-Parks & Recreation | 15 | 31 to 90 days | \$150,000 |
| Hancock | Hancock County Justice Center | Construction of state of the art, LEED certified justice center to house Common Pleas Courts, Probate Courts, Juvenile Courts, Municipal Courts and the County Prosecutor's Office. Building would also provide a location for supportive services such as probation and public defenders offices. Current Court location is too small for growing case load and do not provide adequate security. New building would help free up space for displaced County offices after the devastating August 2007 Flood. Many county offices have been placed in temporary locations. | Hancock County | 25 | 181 days or more | \$10,000,000 |
| Hancock | County Engineer's Garage Replacement | Hancock County Engineer wishes to replace a 65 year old garage with a 45,000 square foot modern and efficient design which will house all of the necessary equipment for the operation of the County Engineer. Equipment includes but is not limited to tow trucks and snow plows, excavators, etc. The current building is not large enough to house all the needed materials and equipment. | Hancock County | 20 | 31 to 90 days | \$5,000,000 |
| Hancock | Meeting hall | Construct a new office building for the township. The current one is old and does not have restroom facilities. We received an estimate to construct a 30 by 40 foot building which would be used for local government meetings as well as a meeting place for residents. Our current estimated cost would be \$190,000. This project would have to be bid out and it would pay prevailing wage. We have been planning this for over a year however with the cost of our road paving projects in the past several years we need to supplement our funds with the above requested \$120,000.00. Sincerely Lowell Roseman, Fiscal Officer | Township | 8 | 31 to 90 days | \$120,000 |
| Hancock | Industrial Road Bypass | Construction of a road to bypass traffic from the central business area of the Village towards the industrial development area. | Village of McComb | 35 | 91 to 180 days | \$650,000 |
| Hancock | Personal Security for Hancock County | Our security program fulfills the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. We utilize state and local services on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rescue operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our device. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can set location boundaries and trigger notifications when exceeded. For personal safety a panic button can issue an alarm with location information to multiple chosen phone numbers with built-in microphone and speaker for communication. Assort tracking solutions are small, portable, self-powered units that continuously monitor location and send data to a central server. EPA required separation. Rehabilitation of other existing utilities and roadway included. | Nuleat Ohio Limited | 2 | 31 to 90 days | \$176,400 |
| Hancock | Lincoln Street Sewer Separation & Rehabilitation | 1 pressure zone will be installed to provide higher water pressures for a specific area of the existing water distribution system. | City of Findlay | 15 | 0 to 30 days | \$1,113,000 |
| Hancock | Water Pressure Zone for Burberry Area | 1 storage building will be constructed at the existing Water Pollution Control Center. | City of Findlay | 15 | 91 to 180 days | \$200,000 |
| Hancock | Storage Building - Water Pollution Control Center | Construction will provide new storm sewer facilities for one LMI neighborhood, and separate existing combined sewers. | City of Findlay | 35 | 91 to 180 days | \$300,000 |
| Hancock | G and H Street Sewer Separation | Construction of 250 linear feet of sanitary sewer will replace a pipe crossing the river and eliminate 1 combined sewer overflow. | City of Findlay | 30 | 181 days or more | \$1,000,000 |
| Hancock | Brandman Area Sewer Diversion and CSO Removal | 1300 linear feet of storm sewer and 1300 linear feet of sanitary sewer will be constructed to separate the currently combined sewers. | City of Findlay | 15 | 91 to 180 days | \$200,000 |
| Hancock | West Hardin Street Sewer Separation | 1300 linear feet of storm sewer and 1300 linear feet of sanitary sewer will be constructed to separate the existing combined sewers. | City of Findlay | 25 | 91 to 180 days | \$330,000 |
| Hancock | West Lincoln Street Sewer Separation | 2 clearwells will be repaired. The two 80 year old clearwells at the Water Treatment Plant were damaged in a flood in 2006. | City of Findlay | 25 | 91 to 180 days | \$330,000 |
| Hancock | Clearwell Repairs - Water Treatment Plant | 3000 linear feet of 8" waterline to replace a failing waterline on a major thoroughfare within the City of Findlay. | City of Findlay | 15 | 0 to 30 days | \$150,000 |
| Hancock | Tiffin Avenue Water Main Replacement | 7 miles of existing waterlines that have external corrosion issues will be protected with the installation of sacrificial anodes. | City of Findlay | 15 | 91 to 180 days | \$325,000 |
| Hancock | 2009 Waterline Corrosion Protection Program | 3000 linear feet of CIPP living installed in existing waterlines in poor condition. | City of Findlay | 15 | 31 to 90 days | \$750,000 |
| Hancock | 2009 Waterline Lining | 20,000 linear feet of sanitary sewer lining to rehabilitate existing sewers that are in poor condition. | City of Findlay | 15 | 31 to 90 days | \$600,000 |
| Hancock | 2009 Sanitary Sewer Lining | Construction of 1 finish clarifier to increase treatment capacity at the Findlay Water Pollution Control Center. | City of Findlay | 15 | 31 to 90 days | \$600,000 |
| Hancock | Water Pollution Control Clarifier Number 6 | Our access system fulfills the objectives of the Stimulus Act for it provides broadband to un-served and underserved areas while employing hundreds in high paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network in Delaware to surrounding communities for greater access to the digital divide. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the funds awarded to the providers of cable and dot, the underserved areas still exist today. Now this is the time to do something different. Rural America needs access today not the faded promises of the past. Our unique program for deployment utilizes the most cost effective wireless mode available. Each dollar spent produces the most coverage per mile of any existing provider which allows low access fees and universal participation even among the low incomes and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident in our existing network, the most advanced and cost effective WiMax technology available. | NexGenAccess | 50 | 181 days or more | \$1,000,000 |
| Hancock | Wireless Broadband for Hancock County | Contracts with local companies will be bid if the company cannot ensure compliance with the security requirements before. If miles of road ditch reconstruction (dipping, widening, tree removal) needed. Directly benefits water flow, to help reduce flooding in the Findlay area. Any funding up to the total project cost would reflect back directly on the involved landowners in 16 parcels/households housing to the field in assessment taxes. | Village of McComb | 19 | 0 to 30 days | \$1,900,000 |
| Hancock | Rader Road & Township Road Realignment | Realignment of both Rader Road and Township Road must be undertaken to ensure adequate/maintained security for a food processing company. Contracts with local companies will be bid if the company cannot ensure compliance with the security requirements before. If miles of road ditch reconstruction (dipping, widening, tree removal) needed. Directly benefits water flow, to help reduce flooding in the Findlay area. Any funding up to the total project cost would reflect back directly on the involved landowners in 16 parcels/households housing to the field in assessment taxes. | Village of McComb | 312 | 91 to 180 days | \$1,019,000 |
| Hancock | Beach Ditch - Total Reconstruction | This project includes the removal and replacement of 5,000 LF of existing 4" asbestos cement reinforced waterlines. Also included are approximately 15 water valves, 8 fire hydrants and 30 service connections. The asbestos reinforced cement (straw) waterlines were installed in 1938 and have been a maintenance problem as the lines become old and brittle. | Hancock County Soil & Water Conservation District | 5 | 91 to 180 days | \$800,000 |
| Hancock | Waterline Replacement Project | In order to be able to isolate portions of the existing water system, the Village would like to replace the install and replace 20 deteriorated gas valves throughout the system. Currently the entire water system must be depressurized and drained to in order to repair any water main breaks requiring hot orders and disruption of service to all customers. The Village would also like to replace 20 fire hydrants to include search valves to allow maintenance/repair. The majority of the hydrants and valves were installed in 1938, with some dating to the early 1900's. This project will provide automatic transfer power for the water treatment system. The storage capacity of the Village's existing water tower is less than one day's typical consumption. This installation will permit the system to pump water to the tower and maintain pressure during extended power outages. | Village of Mt. Blanchard | 25 | 91 to 180 days | \$400,000 |
| Hancock | Water Valve & Hydrant Replacement Project | | Village of Mt. Blanchard | 5 | 31 to 90 days | \$90,000 |
| Hancock | Backup Generator for Water Plant | | Village of Mt. Blanchard | 1 | 31 to 90 days | \$18,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hancock | Water Meter Installation Project | This project includes the installation of water meters on all residential and commercial services within the Village. Currently users are billed on a monthly rate; however, due to the installation of sanitary sewers, USGA has required that the Village switch to usage billing. Included in this project are: 200 residential meter settings (gas, yard, meter, and lid), 10 commercial meter settings, meter reading software and hardware. It is anticipated that installation of meters will reduce peak water demand and residential waste. | Village of Mt. Blanchard | 5 | 31 to 90 days | \$189,000 |
| Hancock | North End Storm Outlet Relief Project | This project involves the replacement of an existing storm sewer between Allen Street and Church Street. The existing storm sewer serving these areas are considerably undersized and have deteriorated beyond repair. Replacement of these facilities will provide a storm outlet for areas which experience localized flooding following moderate storm events. | Village of Jenera | 10 | 31 to 90 days | \$180,000 |
| Hancock | South End Storm Outlet Relief Project | This project involves the installation of a new interceptor storm sewer between Town Hall Dr and Sandusky Street. The existing sewer serving these areas is considerably undersized and has deteriorated beyond repair. Replacement of these facilities will provide a storm outlet for areas which experience localized flooding following moderate storm events. | Village of Jenera | 5 | 31 to 90 days | \$70,000 |
| Hancock | MComb Combined Sewer Separation | The project consists of separation of the Village's sanitary sewer and storm sewer systems. At the completion of the project, the Village's systems will be completely separated, reducing treatment volumes for the Village's wastewater plant and eliminating wet weather combined sanitary outfalls into nearby streams. The project includes approximately 9,900 linear feet of sanitary and storm sewer pipe, 40 manholes and catch basins, and associated site restoration. | Village of MComb, Ohio | 25 | 0 to 30 days | \$830,000 |
| Hancock | Water Tower and Treatment Plant Replacement | Replacement of the Village's 100 year old water tower and water treatment facility. Replacement will permit compliance with EPA chlorine detection requirements and increased treated water storage. | Village of Mt. Blanchard | 50 | 181 days or more | \$950,000 |
| Hancock | fire and township house | Build new a new building to house our 2 fire departments and also our township needs. Right now we have 2 fire departments housed in 2 different buildings. We have a fire building housing our township property that has no restrooms. It is a old school house and has no meeting room and is very inadequate for our needs and our township residents. A new building would allow us to get down to one central fire department and allow us to have a meeting room for our meetings. We would let our community have a place they could use also. This will save our township money and improve our community. | Union township | 125 | 181 days or more | \$400,000 |
| Hancock | Pure Drinking Water for Ohioians | Placement of purified drinking water machines in key Ohio geographic areas with poor quality well water. These drinking water centers will dispense quality purified drinking water at minimal charge for local residents to use. We expect each drinking water center to supply a population base between 5-10,000 people. This drinking water will be affordable, pure, good tasting water that low to middle income people cannot get from their home tap. | Flag City Water Systems | 6 | 31 to 90 days | \$196,000 |
| Hancock | Rawson | The proposed project adds a fourth cell to the existing Rawson Wastewater Treatment Plant. The existing plant currently is a regional facility serving Rawson, Mt. Cory, and Barton Ridge. A new federally subsidized housing project is being built in Rawson that will significantly increase the sanitary sewage flow from Rawson to the plant, and a new on-site septic tank will need to be added at the facility to handle proposed growth. | Feller, Finch & Associates, Inc. | 14 | 181 days or more | \$475,000 |
| Hancock | Child Advocacy Center | This money would assist our non profit agency in several areas: rent and safety costs for 2020-2021. With a projected 3% increase in our building rent we need just over our \$18,000 for rent and just under \$25,000 for employee salary. It is vital that we keep our doors open to our community to serve abused and neglected children, charging is not an option. We hope that with these funds we will help our budget with no more worries than a recycling curbside pickup program for Hancock County. There is no such program here now. Most recyclables are being taken away and provide residents with containers and that will be picked up on a weekly route. Plastic, aluminum, paper and glass are the things we need to pay for some of the costs with the recycled goods. We would like a small fuel efficient fleet of vehicles. We would like to be purchased locally. | Hancock County Center for Safe and Healthy Childre | 1 | 91 to 180 days | \$50,000 |
| Hancock | Recycle for Energy Savings | Our employees are to be hired in the first 90 days. An estimated 10-20 tons per week of recyclables will be accepted. Local recycling centers have been contacted and will hire more employees to handle the increased recycle load. This will reduce energy, create jobs and help save our environment. | Longberry Enterprises | 6 | 31 to 90 days | \$500,000 |
| Hancock | Better Water for Ohio | Identification of low income Ohio families with no or poor quality drinking water. Once qualified the families will receive the installation of a Ohio manufactured drinking water system. This program will support the health and work performance of low income families. | Northern Ohio Superior Water | 50 | 31 to 90 days | \$4,500,000 |
| Hancock | Expanded Network Capacity for Education & Healthca | Implementation of DWDM at Fiber Optic Network Points-of-Presence for expanded capacity based on growth projections to serve Education facilities over the next 3-5 Years. | Independents Fiber Network, LLC | 12 | 181 days or more | \$1,250,000 |
| Hancock | Company reorganizing | In addition to this existing existing Point-of-Presence with DWDM would allow for the establishment of a cost-effective, high capacity Ethernet network for use in Telemedicine Networks for connecting rural healthcare providers to metropolitan and regional health care centers. | Couchot Homes, Inc. | 8 | 0 to 30 days | \$100,000 |
| Hancock | New 100+ Aerial Platform Truck | The additional capacity could also be used for fulfilling a secure Criminal Justice Court System Network and other public service organization information technology service needs for connecting rural areas of Ohio to Metropolitan and Regional Service Centers. To change company from homebuilding to building maintenance / repairs. Will need to train employees and purchase additional equipment & trucks. This will save 6 jobs and create 2 new jobs. We are looking to make an addition to our fleet with a new 100+ aerial platform truck to help protect our and neighboring communities with this job. We have taken the time to find that our community would be a successful location for such a unit as we would be a centralized location of a less than 15 minute window of response for the large factories, churches and apartment complexes that surround our area. 100+ aerial platform truck to include 2000 gpm pump, tank dual turnouts on platform and custom cab. \$810,000 With this unit we would be able to provide mutual aid to the following departments that are unable to afford to purchase and maintain such a unit as this. Liberty Twp - Hancock County Allen Twp - Hancock County North Baltimore - Wood County Deshler - Henry County Leipsic - Putnam County Ottawa - Putnam County Pandora - Putnam County All of these communities have factories, churches and apartment complexes that currently have no protection of an aerial unit to aid in rescue or the suppression if needed. This would greatly help with keeping factories here in case of an emergency or promote new economic development. Please assist in our request. We are looking to replace and update our aging self contained breathing apparatus equipment. Most our current equipment doesn't meet the current NFPA standards and has to wait to look up to another if in case of a downed firefighter. We have 3 types of air packs in our current inventory and would like to get that number to 1. The new air packs would include new face pieces, harness, regulators, voice communication radio hookups and 2 air bottles for each pack. 18 new packs @ \$6,580 each. | McComb Volunteer Fire Department | 999 | 0 to 30 days | \$805,000 |
| Hancock | New and Updated SCBA's | Please help us help secure the safety of our firefighters to protect our community that we live in. We are looking to replace a 43 year old and 29 year old fire engines with a new current model year 2009/2010 to update our fleet and to reduce our maintenance costs. This would be a custom crew cab chassis with a 1500 gpm pump, 1000 gallon tank with a foam system that would be able to flow 12% foam if needed for ethanol fires. We use a 1st call mutual aid company in the Leipsic ethanol plant but we are not required to help with any fire that may arise to any such fire. Let alone a tanker would catch fire in our fire district, we would have to wait some 45 minutes for people with the ability to help us. This new engine would give us a greater chance to protect our community and our neighboring communities and protect jobs as well. Custom crew cab and chassis \$115,000 Body/pump/tank/foam system \$200,000 | McComb Volunteer Fire Department | 999 | 0 to 30 days | \$118,000 |
| Hancock | Replacement Fire Engine | Please look over our request and assist us in help protecting our communities we live in and the jobs that are there. We are looking to update/replace a 1986 model year truck that we have had since new with a 2009/2010 current model year quick attack fire truck that would meet current NFPA standards specifically for safety reasons. The current 1986 vehicle is starting to cost money that is becoming a reason to replace because of costly repairs. We currently have already purchased a skid unit which includes a tank and a pump with a foam system but we are in need of a truck, bed, emergency lights and some minor items to put this skid unit in good use. This unit would be a 1st call vehicle to protect the local community and surrounding mutual aid areas. With this vehicle we would be able to better protect the crops that would feed America and supply corn to the local ethanol plant in Leipsic. CS500 GMC 4x4 Diesel crew cab Chassis \$55,000 Aluminum truck flat bed and mounting of skid unit \$13,000 Warning lights and some minor plumbing \$15,000 Snow plow mounted for winter time rescue use \$7,500 With this vehicle we would be able to protect jobs that depend on the environment in which we live. Please help us protect our community we live in. | McComb Volunteer Fire Department | 999 | 0 to 30 days | \$310,000 |
| Hancock | Quick Attack Fire Truck | 300 anti-icing units at (8,000) units to reduce the amount of extended 0th. This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. Specifically, it will purchase 87 anti-icing units. We have designed and build a new fire station and meeting room facility. The building will be 60x280 with 60x118' of it to house our fire trucks. We now have two fire trucks in Township buildings 4 miles from our main station, before our station is too small. Our old station is land locked with no room to expand. The original station was built 1913-1915 and is not ADA (handicap accessible). It would be built to be as green as possible with geothermal heating, high efficient lighting, and insulation package. The meeting & training room would be large enough to handle our training requirements. The truck bays will have the new exhaust air system in it to prevent carbon monoxide poisoning. | McComb Volunteer Fire Department | 12 | 0 to 30 days | \$90,500 |
| Hancock | American Bulk Commodities, Clean Fuels Ohio Part | | Clean Fuels Ohio | 5 | 31 to 90 days | \$2,400,000 |
| Hancock | Pride Transportation Co Inc., Clean Fuels Ohio Pa | | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Hancock | Garner Transportation Group, a Clean Fuels Ohio pa | | Clean Fuels Ohio | 5 | 0 to 30 days | \$47,700 |
| Hancock | New Fire Station | | McComb Vol. Fire Dept. | 65 | 31 to 90 days | \$770,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Hardin | Police LIDAR | The Ada Police Department would like to purchase a police LIDAR for traffic enforcement. We believe that the purchase would lend to the safety and security of the traveling public. | Ada Police Department | 0 | 0 to 30 days | \$2,500 |
| Hardin | Window Replacement | Simon Kenton School serves children with disabilities of all ages, from Early Intervention, 0-2 yrs., Preschool, age, 3-5, to school age, 6-22 yrs. We have had to recently replace our heating system due to the age of our existing boiler. Our current windows are original with our building, 31 ft. Most windows allow cool air in due to the age of the window. This project will replace our 28 windows with vinyl Weather King windows so as to improve the efficiency of our heating and cooling systems year around. | Hardin County Board of Mental Retardation and Deve | 2 | 0 to 30 days | \$15,890 |
| Hardin | Upgrade of Parking Lot | Hanco Industries serves approximately 110 adults with physical and mental disabilities. Services include: shared workshop, community employment, functional academics, habilitation, case management, transportation, to name a few. There is currently not enough parking for all staff members and no parking for visitors. This proposal would add 20 parking spaces in front and beside the facility. | Hardin County Board of Mental Retardation and Deve | 5 | 31 to 90 days | \$13,070 |
| Hardin | Automatic Doors | Simon Kenton School and Hanco Industries serve over 250 children and adults with various mental and physical disabilities. Many of these individuals are non-ambulatory, therefore using wheelchairs for their mobility. The main front entrance doors of each of these buildings/facilities do not have automatic door operators, making it difficult for individuals in wheelchairs to enter the front of the building. These buildings meet ADA Accessibility Guidelines as there are automatic door operators on the side doors of each building. Visitors in wheelchairs should be able to use the front main entrance as is afforded all visitors. This would directly benefit many individuals every day as they come and go from school and work. | Hardin County Board of Mental Retardation and Deve | 3 | 0 to 30 days | \$11,725 |
| Hardin | Building modification of handicap entrance and par | This money would be used to assist the handicap to enter my business. My business Needs some overall maintenance and improvements which cannot afford at this time. The parking is in need of repair to make sure the patrons can walk safely to and from the vehicles. With these improvements I would be able to offer more services to those driving in my establishment. Therefore increasing my sales and allowing me to hire additional employees due to increased sales. This would give more local persons the opportunity at employment therefore possible eliminating the need for some to be on public assistance. | Alger Freeze | 10 | 181 days or more | \$45,000 |
| Hardin | Safety-Service Building-Public Shelter | Would like to construct a multi purpose building which would house the police and service departments of the Village of Forest and provide a public shelter for persons during storms, power outages etc. The building would have a basement area for use as a training facility as well as a shelter when needed. It would have a communications center and would house employees of the police and service departments and their vehicles. We would like to incorporate energy saving systems such as geo-normal for heating and cooling. | Forest Police Department | 30 | 91 to 180 days | \$950,000 |
| Hardin | Patrol Car Replacement | Would like to replace two aging patrol cars. This will add to officer safety as well as having reliable vehicles for patrol and responding to emergencies. One of our vehicles is a 2003 model and the other is a 2003 model. Both new vehicles will be marked patrol vehicles. | Forest Police Department | 20 | 31 to 90 days | \$50,000 |
| Hardin | New Additional Officer | Would like to hire an additional officer to fill a 40 hour in our present schedule, this would free up one of our two full time employees to work follow on some of our open cases. Currently all hours other than those worked by the two full time employees are worked by part time employees and some hours during the week are now not presently covered. | Forest Police Department | 1 | 31 to 90 days | \$45,300 |
| Hardin | Housing | Buy 20 homes And Creel A Construction Company To Refurbish and Raise Foundations to Help Prevent Flooding In This Area for Homeless People and To Improve Our Holding Company Of Rosa Shoppe LLC And Hire 8 to 10 People To put People Back to Work And Improve Housing in Hardin County | Rosa Shoppe LLC | 8 | 31 to 90 days | \$200,000 |
| Hardin | Downtown Square Sidewalk Enhancements | The purpose of the project is to improve the aesthetics of the square to continue the economic vitality of the downtown and to improve pedestrian and handicapped access to adjacent downtown public buildings | City of Kenton | 15 | 91 to 180 days | \$965,317 |
| Hardin | Water Distribution | Sanitary distribution lines that were installed in 1936 under a WPA project | Village of Mt. Victory | 10 | 91 to 180 days | \$659,000 |
| Hardin | Water Treatment Plant | New water supply well needed because existing well located violation EPA sanitary zone restrictions | Village of Mt. Victory | 10 | 91 to 180 days | \$250,000 |
| Hardin | Village Streets | Streets were patched after sewer installation and have been repaired annually since. Current elevations of streets have changed storm water drainage | Village of Mt. Victory | 10 | 91 to 180 days | \$320,000 |
| Hardin | Elevated Water Storage | Construction in 1936 as a WPA project. Past service life and needs replaced | Village of Mt. Victory | 25 | 91 to 180 days | \$1,300,000 |
| Hardin | Storm Water Drainage | Existing drainage lines etc. that were installed in the 1930s are collapsed and/or plugged with roots. The stands in most of town following rains and snow melt. Need to replace the and restore landscape and infrastructure | Village of Mt. Victory | 25 | 91 to 180 days | \$1,138,400 |
| Hardin | Operator Facility | Facility needed at the WW treatment system for on site storage of operator log and tools. EPA has mandated that a licensed Class 1 operator is needed to be in compliance with operator staffing requirements | Village of Mt. Victory | 5 | 0 | \$20,000 |
| Hardin | Sanitary Sewer System | Sewer laterals have sagged and sewage stands in lines. Repair/replacement is needed to restore gravity flow to lift station. | Village of Mt. Victory | 10 | 91 to 180 days | \$64,000 |
| Hardin | Waterline & Sanitary Sewer Extension | Sanitary water & sanitary sewer lines to accommodate residential growth & business development potential opportunities along US 30 (nearly constructed route) | Village of Forest | 150 | 91 to 180 days | \$1,800,000 |
| Hardin | Forest Phase 4 Sanitary Sewer Separation | DEPA ordered sanitary sewer separation of the southeast quadrant of the Village. This is the final phase of the project. | Village of Forest | 65 | 91 to 180 days | \$1,150,000 |
| Hardin | Bridgebuilders | Bridgebuilders is a program started three years ago in Hardin County by both-based, government, law enforcement, business, and legal entities to begin prevention efforts against drug and alcohol abuse in Hardin County. We have major drug trafficking coming down from Detroit and Toledo. Summer 2008 the Mental Health and Recovery Services Board of Adamsburg/Hardin Counties joined these efforts with funding backing to hire a full time coordinator. This coordinator uses the Partnerships for Success process in obtaining critical data for an accurate picture of the drug crisis in the county, including Mobilization, Assessment, and Evaluation workshops are currently underway in the county. To finish this project and sustain the program we will need funds from the stimulus package to implement the strategies proposed by the PPS process. | Hardin Co. Family and Children First Council | 5 | 0 to 30 days | \$100,000 |
| Hardin | State Route 37 Widening and Reconstruction | Road widening to provide truck access to potential industrial/logistic development. | Village of Forest | 25 | 91 to 180 days | \$207,100 |
| Hardin | PF5 and Bridgebuilders | Hardin County started Partnerships for Success in December 2008. A coordinator has been hired and three workgroups are underway: Mobilization, Assessment and Evaluation). This is the first year of the two-year process. We are working closely with the Mental Health and Recovery Services Board of Adamsburg/Hardin Counties in conjunction with our PPS attention toward Drug and Alcohol Prevention in Hardin County. The efforts in the area are led by Bridgebuilders, under the governing board of the Family and Children First Council. Bridgebuilders is a multi-faceted project focusing on the prevention of alcohol and other drug use. The approach integrates environmental and individual focused strategies. This coalition effort is much needed in our county and by our Family and Children First Council because of the huge crisis in our local government and small school systems. | Family and Children First Council | 5 | 0 to 30 days | \$100,000 |
| Hardin | Partnerships for Success | Hardin County's Family and Children First Council is in dire need of coalition and collaboration assistance. The council's efforts towards the prevention of family and substance abuse are being repeatedly. These efforts can be managed more effectively if we have a stable and reliable services for families. Hardin County is a tier one Partnerships for Success county. Since December of 2008 a full time coordinator and the Council Administrator have been working closely with established workgroups to mobilize, assess, and evaluate the county and the county logistics. The continual funding of this process is much needed in our county for the betterment of families and children. | Family and Children First Council | 5 | 0 to 30 days | \$100,000 |
| Hardin | little town made big again | I am wanting to buy a few of the 37 empty homes in town, where I have lived all my life, I want to buy these homes and remodel them along with help from others in the community, after I remodel them I am going to rent them to low income families for a set rate that can be used in any other area or sell them to them on land contract which ever they would like. I grew up here and this town use to be a nice little town but is now falling apart please help me help others. most of the homes were built in the 1920s and they just need someone to get in there and put the effort and a little bit of money in each. | myself | 8 to 15 | 31 to 90 days | \$185,000 |
| Hardin | MAINTENANCE BUILDING | Would like to build a service garage for my small business in our small community where I offer automobiles at affordable prices for those needing vehicles. I could employ more people if I had the building in which they could work. | CARS FOR YOU | 5 | 181 days or more | \$50,000 |
| Hardin | REPLACE OLD WATER TOWER | REPLACE A OLD WATER TOWER WITH A MORE EFFICIENT ON WHICH WOULD ENHANCE WATER PRESSURE TO THE VILLAGE. | VILLAGE OF ALGER | 10 | 181 days or more | \$1,500,000 |
| Hardin | INTSALL WATER METER IN THE VILLAGE WITH READER AND | INSTALL APPROXIMATELY 450 WATER METER IN THE VILLAGE. THIS WOULD REDUCE THE COST OF COLLECTING THE INFORMATION AND BILLING OF CUSTOMERS. IT WOULD ALSO KEEP THE SENIOR CITIZENS WATER BILLS AT A COST MORE AFFORDABLE FOR THEM. | VILLAGE OF ALGER | 4 | 181 days or more | \$175,000 |
| Hardin | Smart Meter AMI | Replacement of approximately 6,500 mechanical electric meters with electronic meters equipped with 2-way automated meter infrastructure (AMI) modules. The meters are through Mid-Ohio Energy Cooperative's territory in Marion, Hardin, Morrow, Wyandot, Union, Logan, Auglaize, Hancock, Allen, and Crawford counties. This upgrade would better allow the Cooperative members to take advantage of distributive generation, net metering, load control, price signaling, and load monitoring programs. This "smart grid" project would add 1 permanent full time employee, net 1 existing employee, and add at least 4 temporary employees. The speed of deployment will ultimately depend on the availability of equipment but is expected within 180 days. Mid-Ohio Energy Cooperative is a not-for-profit distribution utility headquartered in Kenton, Ohio. | Mid-Ohio Energy Cooperative, Inc. | 6 | 31 to 90 days | \$1,500,000 |
| Hardin | SCADA | Expand existing SCADA system to cover more major distribution points along the Mid-Ohio Energy system. This equipment would be installed in Marion, Hardin, Morrow, Wyandot, Auglaize, Allen, Hancock, Logan, Crawford, and Union counties. The SCADA equipment would aid in electric load flow control, outage restoration, accommodation of distributive generation and net metering projects, and load management. This project is expected to add 1 new job, retain 1 job, and employee up to 4 temporary jobs. Depending on the availability of equipment, this projects projected completion is 180 days. Mid-Ohio Energy Cooperative is a not-for-profit electric distribution utility serving over 8500 accounts in parts of 10 Ohio counties. | Mid-Ohio Energy Cooperative, Inc. | 6 | 0 to 30 days | \$400,000 |
| Hardin | OFFICER PROTECTION | PURCHASE OF TWO LESS LETHAL WEAPONS (TAGERS) FOR THE CONTROL OF VIOLENT OFFENDERS WITHOUT USE OF DEADLY FORCE AND PROTECTION OF POLICE OFFICERS AND THE PUBLIC. | FOREST POLICE DEPARTMENT | 2 | 0 to 30 days | \$2,500 |
| Hardin | REPLACE POLICE CRUISER AND HIRE CHIEF AND DEPUTY | THE VILLAGE WOULD LIKE TO REPLACE A VERY OLD POLICE CRUISER WITH A MORE ENERGY EFFICIENT VEHICLE. THEY WOULD ALSO LIKE TO HIRE A CHIEF OF POLICE AS WELL AS 3 DEPUTIES TO PATROL THE VILLAGE STREETS AND KEEP THEM SAFE FOR THE RESIDENTS. | VILLAGE OF ALGER | 3 | 181 days or more | \$80,000 |
| Hardin | ALGER SKATE PARK | THE VILLAGE WOULD LIKE TO OFFER THE TEENAGERS IN THE COMMUNITY A NICE PLACE TO SPEND THEIR TIME AND POSSIBLE DIVERT THEM FROM ACTS IN A NEGATIVE WAY. OFTEN WE THINK OF PLAYGROUND EQUIPMENT FOR YOUNG PEOPLE AND WE OFTEN FORGET ABOUT TEENS. THEY NEED A NICE ONE PLACE TO GET TOGETHER WITH FRIENDS. | VILLAGE OF ALGER | 1 | 181 days or more | \$50,000 |
| Hardin | SIDEWALKS AND CURBS | THE VILLAGE OF ALGER HAS SERIOUSLY DETERIORATING SIDEWALKS AND CURBS. CURBSING IS NON EXISTENT ON SOME OF OUR STREETS. SOME STREETS HAVE NO SIDEWALKS FOR OUR CHILDREN TO WALK SAFELY TO AND FROM SCHOOL, BUS STOPS. | VILLAGE OF ALGER | 5 | 181 days or more | \$75,000 |
| Hardin | OPERATION ALGER UPLIFT | PAYING WORKERS TO REHABILITATE HOMES WITHIN THE VILLAGE OF ALGER WOULD NOT ONLY PUT PEOPLE TO WORK BUT WILL IMPROVE THE ENTIRE VILLAGE OF ALGER. IT WOULD ELIMINATE MANY EXCESSIVE AND UNNECESSARY THE QUALITY OF LIVING CONDITIONS FOR MANY PEOPLE. WITH THE TIME PERIOD WE ARE LIVING IN MANY PEOPLE ARE LOSING THEIR HOME TO FORECLOSURES CAUSING MANY VACANT HOME TO BECOME SAFETY CONCERNS. | VILLAGE OF ALGER | 10 | 181 days or more | \$300,000 |
| Hardin | RESURFACING STREETS IN THE VILLAGE | THERE ARE MANY STREETS WITHIN THE VILLAGE LMITS WHICH ARE IN GREAT NEED OF REPAIR. ONE OF OUR STREETS IS AN OLD BRICK STREET. THE VILLAGE WOULD LIKE TO RECONSTRUCT THESE STREETS FOR THE SAFETY OF THEM. THE REPAIR OF THE STREETS WOULD HELP WITH THE FLOW OF RAIN WATERS TO THE DRAINAGE TILES AND CATCH BASINS. | VILLAGE OF ALGER | 5 | 181 days or more | \$100,000 |
| Hardin | Elevator Replacement | replace five four' elevator with structure modifications to keep the historical integrity intact, as well as ADA compliance measures | Hardin County Commissioners | 7 | 31 to 90 days | \$500,000 |
| Hardin | Sludge removal/mulcher | We have 3 lagoons that have not been cleaned out. We are currently under a local emergency and cannot afford to do this project on our own. While this project number appears to be high, it would also include a new mulcher. The order we have has not worked for years and it would be better for the community just to invest in a new mulcher. | Alger, BPA | 5 | 31 to 90 days | \$300,000 |
| Hardin | Water meters | Modernize our meter systems to install water meters and to also have a water meter scanner and to also create funds so that we may employ people within the community to go and scan these water meters. | Alger, BPA | 4 | 181 days or more | \$500,000 |
| Hardin | Water Lines | This is to finish an unfinished project that wasn't completed several years ago. That company went bankrupt. We have about 25% of residents still hooked up to the much older lines. | Alger, BPA | 6 | 181 days or more | \$200,000 |
| Hardin | Water Tower | Our tower is very old and we would like to get a new one to provide cleaner water for the residents | Alger, BPA | 10 | 181 days or more | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--------------------------------------|----------------|--------------------|---------------------------|
| Hardin | Energy Advisor | Develop a home energy audit program for members of Mid-Ohio Energy Cooperative residing within the service territory. Program would include hiring contractors or additional employees to perform the work. In addition, the program would also include the purchase of equipment and rebates to perform energy audits in members' homes. Recommendations would be made to reduce energy use and ultimately lower all forms of energy consumption. It is estimated that a large amount of Mid-Ohio Energy's membership would take advantage of such a program. Mid-Ohio Energy is headquartered in Kenton, Ohio and services over 8,500 members in parts of Marion, Hardin, Crawford, Logan, Morrow, Union, Adams, Auglaize, Hancock, and Wyandot counties. | Mid-Ohio Energy Cooperative, Inc. | 2 | 31 to 90 days | \$250,000 |
| Hardin | Road Repair and Improvement | 10 miles of far and chip #8 stone (2.22 miles of sealer with 10% stone) | Liberty Township, Hardin County, OH | 12 | 31 to 90 days | \$88,000 |
| Hardin | Rural Early Childhood Development Center | Ohio Northern University proposes a new Rural Early Childhood Center to increase the number of children served, especially those from low-income families, in Hardin and surrounding counties. The project involves renovation of an existing vacant building which fronts Main Street on the edge of Ada and will enable the university to reach 1000 miles of children served as well as provide childcare for age groups that are currently underserved in this area. The 2007 report on Child Care Supply and Demand compiled by the Ohio DCCR indicates the need for increased capacity in formal, full-time child care programs in Region 7 which includes Hardin County. The report also noted that 31 percent of those families in Region 7 reporting care in the previous year had incomes below the poverty level. A larger center would also provide OBU students in the Center for Teacher Education with opportunities to increase their pedagogical skills and prepare them to become outstanding educators. Funds would be used to purchase and renovate the downtown building in addition to clearing 20 construction jobs. This center would hire 18 additional staff members. | Ohio Northern University | 38 | 91 to 180 days | \$1,806,000 |
| Hardin | Geothermal HV/AC Upgrades | Ohio Northern University (ONU) seeks to enhance its utilization of sustainable energy in campus buildings and is requesting stimulus funds to convert two additional buildings, a student housing complex and a classroom facility, on campus to geothermal HVAC. These two upgrade projects will bring the total number of university buildings utilizing geothermal to three and can begin late spring or early summer. The projects will require the sinking of a total of 200 wells and retrofitting of the current systems in Founders Residence Hall and Pleasant Memorial. The university's cost share is \$1.2 million. Application of geothermal technology will have a dramatic impact on the efficiency and financial performance of these buildings (30%+). The projected payback on these projects is 8-10 years. | Ohio Northern University | 50 | 91 to 180 days | \$1,450,000 |
| Hardin | Marion Township Road 92 widening | Project consists of widening approximately 2 miles of roadway on Marion Township Road 92. This is the primary road that connects the two main villages in the township. It is also the most widely traveled and most accident-prone within the township along this road. Two school buses cannot pass each other safely on the narrow road. The township would be able to do a cost share on the project but the township cannot afford the entire project without federal aid. | Marion Township, Hardin County | 15 | 91 to 180 days | \$80,000 |
| Hardin | Biggs Engineering Building Expansion | The requested funding will be utilized to build an expansion onto the Biggs Engineering Building on the campus of Ohio Northern University (ONU). The new facility will improve the undergraduate engineering learning environment at ONU and provide expanded student/faculty research laboratory facilities. The building expansion will add approximately 14,000 square feet of additional space to support the growth and development of the J. S. Small College of Engineering. The new facilities will include lecture halls, sophomore and junior year design studios, project/hybrid course, research laboratory study, and offices for research laboratory study. The expansion to the Biggs Engineering Building will enhance the educational environment for the production of "industry-ready" graduates from ONU's engineering programs and also allow for an increase in the number of faculty that support the College of Engineering. | Ohio Northern University | 15 | 31 to 90 days | \$3,500,000 |
| Hardin | Southend Relief Sewer | This project will replace 1800 vintage tile in the southeast of Ada and replace with 48" storm sewer. The length of this project is 2500 feet and will drain a portion of the southeast of Ada. | Village of Ada | 28 | 91 to 180 days | \$540,000 |
| Hardin | Westend Relief Sewer | *Please note: the last 6 applications submitted by James Meyer of Ada, Ohio are past the deadline to submit. However, we have not yet received all 6 applications. We are on February 13 but not received by the Governor's office apparently. We hope you will consider these applications. We had previously submitted them before the deadline. | Village of Ada | 37 | 91 to 180 days | \$630,000 |
| Hardin | North South Alley Water Main Replacement | This is a storm sewer project replacing 1800 vintage tile with 36" and 48" diameter pipe. This is a 4100 foot project replacing storm water relief to the westward corner of Ada. | Village of McGuffey | 20 | 91 to 180 days | \$125,000 |
| Hardin | West Lincoln Avenue Reconstruction | Replacement of a 1936 Water main. Project is 1,200 feet in length. Located in an alley within the Village of McGuffey. This main had numerous leaks creating a great inconvenience for the surrounding residents. | Village of Ada | 70 | 91 to 180 days | \$1,700,000 |
| Hardin | Waste Water Plant Digester Lid | Total reconstruction of area including outfall, sidewalks, storm sewers, and waterlines. This project includes streetlights with new lighting, and brick inlay. The length of this project is 1,200 feet. With this street being one of the main entrances into the Ohio Northern University campus. | Village of Ada | 25 | 91 to 180 days | \$400,000 |
| Hardin | East Lincoln Avenue Reconstruction | Replace an existing 1936 floating digester lid. Lid replacement will allow us to capture methane gas to be used for heating structures at the Wastewater Treatment Plant. | Village of Ada | 50 | 31 to 90 days | \$1,500,000 |
| Hardin | Personal Security for Hardin County | Total reconstruction of the street, new curb, sidewalks, including new storm sewers, waterlines, and some modifications to the sanitary sewer. Approximate length of project is 3,500 feet. Environmental is complete along with design. Project is ready to bid. | Nuleaf Ohio Limited | 1 | 31 to 90 days | \$63,840 |
| Hardin | Wireless Broadband for Hardin County | Our security program fulfills the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rescue operations, animal tracking, safety of public, campus security are some of the groups that benefit from our device. With 4000 tracking devices, we can track and report suspicious activity. Our unique process for deployment utilizes the most effective wireless model available. Each device operates through the most coverage area of any existing provider which allows low access fees and universal participation even among the low incomes and the disadvantaged. The current administration should fulfill the promise to provide access to roads left behind. The plan process not by promise but by actual deployment evident by our existing network, the most advanced and cost effective WiMax technology available. | NexGenAccess | 17 | 0 to 30 days | \$1,700,000 |
| Hardin | Sanitary Sewer | Patterson is a small community in Kenton, Ohio and is under orders from Ohio DEPA to construct sanitary sewers to abate pollution in accordance with the Clean Water Act. Village consists of 54 homes with a total of 180 residents. | Village of Patterson | 10 | 91 to 180 days | \$700,000 |
| Hardin | Sanitary Sewer Separation Project | 30660 LF of 8" sewers 10000 LF of 6" Sewer 100 Precast manholes 8 LID Stations This project is being mandated by DEPA to eliminate combined sewers in the Village. The Village is working with USDA RD for funding. Plans have been submitted to DEPA and the PTI has been prepared. Currently the Village has an application pending with State Issue 2 Funding. | Village of Dunkirk | 50 | 31 to 90 days | \$2,000,000 |
| Hardin | Ridgeway Fire Station Project | Ridgeway Fire Department has been allowing working on upgrading the current fire station to meet current and future needs of the community. We desire to add on the current fire station two bays that are two deep. This would permit enough room for all emergency services in this area to be under one roof. This would cost effectively by eliminating the duplication of utilities and various equipment. We have been working hard towards this goal, we recently had a letter campaign that raised enough funds for the installation of showers. | Ridgeway Fire Department | 50 | 0 to 30 days | \$0 |
| Hardin | State Nature Preserves Building Demolition Project | Funds are requested to demolish legacy buildings that are in poor condition and not necessary for continued facility operations at three State Nature Preserves. Affected areas are Lawrence Woods (Hardin County), Iwin Prairie (Lucas County) and Gallagher Farm (Clark County). Sites will be reviewed for potential hazardous materials (potentially asbestos) prior to demolition. Design is currently underway but could be completed quickly if funds become available for construction. | Ohio Department of Natural Resources | | 91 to 180 days | \$75,000 |
| Hardin | New Nursing Home | In this long standing tradition, The nursing home we currently are in was built in 1953. The building has been kept up very well and is always above 90% occupancy. The problem is it only has 4 bedrooms for the 78 residents that live here. We are still using commodes in the rooms. It has taken over 1 million dollars to build new. We are asking for help to put 2 million towards our project. The rest of the money can be borrowed and paid back by the people who need our services. The citizens of Hardin County want to continue this long standing tradition. We keep Long Term Health Care affordable in Hardin County. We also create many jobs with great benefits and we are one of the top 15 employers in Hardin County. If we don't keep our building current we could not out of business very soon. Let's keep people with quality healthcare and jobs with benefits and a living wage. Thank you. | Hardin Hills Health Center | 130 | 181 days or more | \$2,000,000 |
| Hardin | Advancing Teaching and Learning Through Smart Boar | To advance the teaching/learning process our district desires to enhance classroom instruction with the addition of interactive smart boards. Through the use of these educational tools, students can take more active roles in their own learning. Teachers will have the opportunity to access information that will provide high leverage learning. This will provide an environment conducive to developing 21st century skills for our students and better prepare students for the future. | Ada Exempted Village Schools | 1 | 31 to 90 days | \$35,000 |
| Hardin | Multiply Handicapped/ Wildlife Project | This project would convert 50 acres of existing erodible land into a wetland preservation, including 3 one-acre ponds, 1700 trees and shrubs, thousands of warm season grasses and 21 acres of boardwalk for handicapped use. The project would employ one training officer to work with and teach multiple handicapped youth about the importance of environmental management. In addition they would be taught job skills to enable them to work at the facility. Money would be used to pay the young people as they are being trained. | Oakridge Farm | 5 | 181 days or more | \$95,000 |
| Hardin | Entrepreneurship Incubator | Once the project is completed, it could also be used for area school education purposes to train students of all ages about wetland preservation. The location of this project is very critical as it is at the very beginning of the Lake Erie watershed in Hardin county on the continental divide. Hardin County is an economically depressed area with a high rate of poverty. This project could only be done by private owner with the help of additional funds. The Village of Ada has a vibrant industrial park with representation of the automotive, energy, plastics, and sporting goods manufacturing industries. We are also the home of Ohio Northern University (ONU), with strong programs in Business, Engineering, Pharmacy, Arts and Sciences, and Law. A 50,000 square foot building is available in our industrial park that could be used for encouraging entrepreneurial endeavors. Common business facilities will be shared by participants and affordable rent will be offered with the assistance of our local government. We will continue as productive businesses providing meaningful jobs to the region and the community. Discussions have been conducted with Deans of Engineering and Business at ONU and Pleasant Harbor concerning the cooperative effort and all are interested in the project. Current economic challenges may slow or delay this effort. In addition to ONU, the region also includes facilities of higher learning, such as Rhodes, ONU, Ohio State University of Findlay, and Bluffton University, and all of these programs could benefit from entrepreneurship programs. The \$1,000,000 will give this project a sustainable beginning. | Village of Ada | 25 | 91 to 180 days | \$1,000,000 |
| Hardin | Ada Water Resources Plan | The Ada Water Resources Plan has been established to help protect our water resources through three dimensional mapping of aquifers. Ada had the first well head protection program in the region and continues to be the forefront of protection of our water and air resources. Our water resources are arguably our most important resources we have and, at the same time, we see that resources with the greatest danger of being lost for a long time. We established the Water Resources Plan under the control of the Ada Improvement Corporation to be a model of our water resources that would allow us to determine how industrial wastes, toxic wastes, and agricultural practices can be stopped to affect our water in the present and in the future. Digital models are now capable of providing a wide variety of data of the underground structure that determine how our water resources are distributed throughout the region and how they are affected by various factors. This project is already underway with funding from the Village of Ada and Ohio Northern University, as well as other entities in the region. This project will continue for many years but funding of \$150,000 will allow us to progress more quickly. | Village of Ada | 2 | 0 to 30 days | \$150,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Hardin | Soccer Complex | This is a youth activity and physical education project that consists of the construction of 11 soccer fields. The program involves children from ages 4-18 and will serve the entire county with population of 21,950/00. The project will cover 15 acres of ground and will include water line installation, septic installation, a concession area with restroom facilities and concession to electric. The project will take several months to complete and will retain jobs through providing employment for machine operators doing excavating, construction laborers for the concession facility and landscape staff for final excavating and field seeding. | Hardin County YMCA - Soccer Complex | 3 | 91 to 180 days | \$57,400 |
| Hardin | AUTOMATED BACKGROUND FINGERPRINT SYSTEM | We are requesting 10% of the total project with the remainder of funding raised through corporate and private donations. COMPUTERIZED FINGERPRINT SYSTEM CAPABLE OF RUNNING BACKGROUND CHECKS THROUGH THE STATE B.C.I. AND THE F.B.I. THESE ARE CURRENTLY DONE BY TRAVELING TO NEARBY CITIES. WE WOULD BE ABLE TO HANDLE CHECKS FOR SCHOOLS AND COMMUNITIES WITHIN A FEW MILES OF US. | FOREST POLICE DEPARTMENT | 2 | 0 to 30 days | 5,792.00 |
| Hardin | TRAFFIC SAFETY | THE PURCHASE OF NEW EQUIPMENT TO REPLACE OLDER EQUIPMENT ON OUR OLDER PATROL CAR WHICH IS A 2003 MODEL. THE EQUIPMENT CURRENTLY ON THE VEHICLE HAS BEEN REPAIRED SEVERAL TIMES AND IS NOT DEPENDABLE. THE EMERGENCY LIGHT BAR, SIREN, RADIO, CONSOLE, PRISONER PARTITION, EMERGENCY TRUNK LIGHTS, TRAFFIC ARROW DIRECTOR, MIRROR & TAIL LIGHT FLAGMERS & SWITCH BOX INSTALLED. | FOREST POLICE DEPARTMENT | 6 | 0 to 30 days | 6,892.00 |
| Hardin | LESS THAN LETHAL FORCE | THE PURCHASE OF NINE TASERS WILL ASSIST OFFICERS IN MAKING ARRESTS AND PROTECTING THEMSELVES AS WELL AS THE PUBLIC WHILE USING LESS THAN LETHAL FORCE. | FOREST POLICE DEPARTMENT | 2 | 0 to 30 days | 8,692.00 |
| Harrison | Dist 11, PID 85743, HAS Purchase 1 copier | Purchase 1 copier for the Harrison County Rural Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$5.00 |
| Harrison | Dist 11, PID 85744, HAS 3 converted vans | Purchase 3 converted vans for the Harrison County Rural Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$135,000 |
| Harrison | Dist 11, PID 84342, HAS SR 9 9.380 | Has 9- B-3/4 Str. O.L. (3") With Repairs - Has 799- BB- Low Vol. (1 3/4") W/ Chip Seal And Up To 5% Repair | Ohio Department of Transportation | 77.7 | 31 to 90 days | \$2,706,796 |
| Harrison | Dist 11, PID 84788, HAS SR 800 10.280 | Replacing Existing 84-In Crmp With New Concrete Pipe | Ohio Department of Transportation | 12 | 31 to 90 days | \$80,000 |
| Harrison | Dist 11, PID 24870, HAS US0022 17.380 | Remove 3 Bridges Over Railroad R/W That Was Ceded To The State, Build Embankment And Pavement. | Ohio Department of Transportation | 61.9 | 31 to 90 days | \$1,750,000 |
| Harrison | Dist 11, PID 84788, HAS SR 800 10.280 | Replace Existing 84-In Crmp With New Concrete Pipe | Ohio Department of Transportation | 12 | 31 to 90 days | \$80,000 |

| Harrison | Dist 11, PID 84342, HAS SR 9 9.380 | Has 9- B-3/4 Str. O.L. (3") With Repairs - Has 799- BB- Low Vol. (1 3/4") W/ Chip Seal And Up To 5% Repair | Ohio Department of Transportation | 77.7 | 31 to 90 days | \$2,706,796 |
| Harrison | Dist 11, PID 84788, HAS SR 800 10.280 | Replace Existing 84-In Crmp With New Concrete Pipe | Ohio Department of Transportation | 12 | 31 to 90 days | \$80,000 |
| Harrison | Secure Our County | Revised: Vehicle and equipment replacement programs have been suspended. Additionally personnel that have left the Sheriff's Office have not been replaced and we are still facing lack of more personnel. This adversely affects our officer's safety, as well as the safety of our residents. The Sheriff's Office intends to utilize contract services/partnerships to maximize our purchasing power for equipment needs. We are also looking at our current vehicle fleet, seeking more cost efficient models and equipment. We also seek to replace officer utilized equipment which have not been replaced to our budget cost. With regard to our personnel, we seek funding to maintain our current personnel and to look at retraining our officers which have not been refilled. We seek positions in both Road Patrol as well as Connectors. We expect the outcome of this funding to improve the status of the Sheriff's Office infrastructure by 100% and other morale by 150%. Additionally at least five or more jobs will be maintained or created. | Harrison County Sheriff's Office | 5 | 31 to 90 days | \$800,000 |
| Harrison | German Township Road 165 (Blue Ridge Road) Upgrade | Upgrade of a highway by paving with 2.5 inches of asphaltic concrete, which serves a major transportation route for employees accessing jobs in the industrial and commercial centers along the Ohio river. | German Township | 50 | 31 to 90 days | \$248,000 |
| Harrison | Harrison Ethanol LLC | Harrison Ethanol is an integrated bio-refinery designed to produce both food and fuel. The facility includes a 23 million GPY wet-mill bio-ethanol facility and livestock operations with up to 20,000 head of dairy cows and up to 10,000 head of beef cattle. Other products include 75MMW of renewable "green" electricity, human-grade corn germ, feed, grade-A milk, animal feeds, and calcitic soil remediation materials for lawns/fields. To enhance carbon credits, CO2 from ethanol production will be captured, and methane gases from both the ethanol plant waste and livestock operations will be captured and processed in a solid waste anaerobic digester. The synthetic methane biogas will power Kawasaki combined heat and power equipment to generate steam and electricity to power the facility. Also supported includes an estimated 430 construction jobs, 50 engineering and administrative jobs, 107 full-time permanent jobs from the ethanol and animal facilities, and 60 contract trucking jobs. All permits have been issued and site preparation has begun. Geo-technical and topographic surveys are complete and the site has been "approved for heavy construction" and we are "shovel ready". | Farmers' Ethanol LLC | 647 | 0 to 30 days | \$7,000,000 |
| Harrison | Tappan Lake Community Shelter | In the recent months, our area has been hit by the aftermath of hurricane IKE, and just last week heavy winds which both produced power outages for our area. Both cases, the community has been faced with no power to heat their homes, bath, cook, or sleep in place. We are requesting to expand our facility with back up generator so we are able to accommodate our community with peace of mind. Our current facility does not have adequate room for persons to bed down if need be, or does our facility have showers, or back up power supply. We are looking to expand our facility by 30 to 40 feet, with back up power supply, showers, and bedding. Our current financial stability does not allow us to take on a project such as this. Our Department operates on roughly \$34,000 per year from tax levies. Harrison County being as depressed as it is, there is no way we could afford such a project. Our area of coverage would pertain to approximately 1100 full time residence and 3000 to 4000 tourists during the spring, summer, and fall seasons. We appreciate that you have taken the time to review our request, and look forward to hearing from you. This request would allow Promiseland Preschool to remain open and continue to offer quality early childhood education for preschool students in Harrison County. It would also provide for 23 teachers and 1000+ students. We currently educate 25 students and are planning to expand as demand increases. | Tappan Lake Volunteer Fire Department, Inc. | 7 | 181 days or more | \$300,000 |
| Harrison | Funding for Promiseland Preschool | This request would allow Promiseland Preschool to remain open and continue to offer quality early childhood education for preschool students in Harrison County. It would also provide for 23 teachers and 1000+ students. We currently educate 25 students and are planning to expand as demand increases. | Promiseland Preschool | 3 | 31 to 90 days | \$35,000 |
| Harrison | Water Distribution system Improvements | The project consists of the construction of a 150,000 gallon water storage tank, one acre of site development, 2,700 linear feet of 8" waterline, 6 valves, 2 hydrants and appurtenances, that will allow for proposed housing growth in the village of New Athens. | Village of New Athens | 15 | 31 to 90 days | \$433,345 |
| Harrison | Repair R/W | Repair Runway 1301 | Harrison County Airport | 10 | 31 to 90 days | \$173,414 |
| Harrison | Tappan Lake Regional Sewer System | Construction of wastewater collection systems for the developed areas around Tappan Lake and the pumping/transmission equipment to transport the wastewater to a central aerated lagoon treatment plant, which will also be a part of this project. In addition, wetlands will be constructed on County-owned property adjacent to the treatment plant for final polishing of the treated wastewater; all of which are outside the Tappan Lake watershed. | Harrison County | 30 | 91 to 180 days | \$3,000,000 |
| Harrison | HI SPEED INTERNET TO RURAL AREAS THROUGH WIFI | To provide hi speed internet to rural communities that are currently outside of broadband reach, using a wi fi wireless connection to cover a majority of Harrison county, portions of Carroll county and Belmont county along with Jefferson county as well. We currently have approximately 200 subscribers in Harrison, Jefferson and Belmont county and continue to have customers requesting service. The money will be used for backbone equipment to provide broadband to individuals, small business owners as well as large businesses and work from home customers. Thank you kindly for your consideration. Louis T Freadt 6 | FREUND ENTERPRISES INC / ACCESS OHIO VALLEY | 7 | 31 to 90 days | \$250,000 |
| Harrison | Waste Water Treatment System | By findings of the Ohio EPA the current sewage treatment system at YMCA Camp Tippecanoe is falling and must be replaced. YMCA Camp Tippecanoe is one of the ten largest employers in Harrison County and without a properly functioning sewage treatment system the camp would be forced to close thus eliminating nearly 50 jobs. A preliminary design specifying installation of an Activex Waste Water Treatment Plant has been deemed as an appropriate solution by both the Ohio EPA and The Muskingum Watershed Conservancy District (MWCD). The plant will actually be installed on property owned by the MWCD but leased by the YMCA of Central Stark County therefore their approval is necessary. | YMCA of Central Stark County | 50 | 31 to 90 days | \$250,000 |
| Harrison | Craborchard Water System | 2018 two new water supply wells along with a treatment/disinfection facility. Include pumps and 6000 linear feet of water main and construct a 50,000 gallon water storage tank. This will supply a new underground coal mine which will employ more than 150 people. This project will also provide a supplemental water supply for the Village of Preppco, which is currently at its maximum wellhead capacity. This will also provide the infrastructure for the eventual three-county center district being planned jointly by Harrison, Belmont and Guernsey Counties. | Harrison County | 150 | 0 to 30 days | \$300,000 |
| Harrison | Harrison County/Cadiz Village Wastewater Treatment | Construction of an aerated lagoon wastewater treatment plant and two wastewater pumping stations with 11,000 linear feet of pressure sewer which will eliminate infiltration/inflow overflowing on existing wastewater treatment plant and bring system into compliance with Ohio EPA (issued findings and Orders). The project will include construction of an algae extraction facility to utilize algae which will be grown in the treatment lagoon for the production of bio-diesel fuel. Production plant is also a part of this project, as well as spray irrigation and constructed wetlands for ultimate disposal of treated wastewater, making this a zero-waste facility with built in revenue streams for cost-recovery. | Harrison County | 125 | 31 to 90 days | \$3,000,000 |
| Harrison | Freeport Area Regional Sewer System | Construction of wastewater collection systems for the communities of Preppco and Piedmont (Harrison County) and Holloway (Belmont County) as well as pumping and transmission piping to convey the wastewater to a central aerated lagoon wastewater treatment plant, which will also be a part of this project. Constructed wetlands for polishing of final treatment plant effluent will also be included. | Harrison County | 25 | 91 to 180 days | \$2,750,000 |
| Harrison | Yager Road Water System | Installation of 1000 linear feet of water main, two new water supply wells, water treatment and disinfection facilities, and a 50,000 gallon water storage tank. This will enable the opening of a new underground coal mining operation to provide jobs and tax revenue to the region. This mine will directly employ over 120 people, plus the ancillary economic benefits to the region. | Harrison County | 120 | 0 to 30 days | \$150,000 |
| Harrison | County Road 43 Improvement | This would resurface 6.6 miles of CR 43 in Northwestern Harrison Co. with 2 1/2 inches of asphaltic concrete. This is an important highway in Northwestern Harrison Co. which is not part of the Federal Aid Highway system. This road is in particular need of resurfacing to restore an acceptable level of service for agriculture and commercial, as well as residential traffic. | Harrison County | 10 | 0 to 30 days | \$805,000 |
| Harrison | Georgetown Water System Extension | Install 10,000 linear feet of water main from the existing terminus of the water system along State Route 516 which will provide potable water service and fire protection for 12 existing homes and a new 4-unit apartment building. This project will open for housing and development some 4 miles of property fronting on State Route 516. | Georgetown Water District | 5 | 0 to 30 days | \$262,000 |
| Harrison | County Road 44 Improvements | Resurface 12.4 miles of CR 44. This highway serves a large portion of Harrison Co. with extensive development potential. Its current deteriorated condition does not lend itself to serious development consideration. Line CR 44 is not included on the Federal Aid Highway system which has been a major source of our highway improvement funding. We are hopeful that infrastructure funds might be allocated through the Ohio Public Works Commission or some other agency to allow for inclusion of more local roadways in infrastructure improvement projects. | Harrison County | 10 | 0 to 30 days | \$1,500,000 |
| Harrison | Village of Hopedale Street Repaving | This project will involve milling of the pavement on a portion of Main Street which has deteriorated with wear and the repair/replacement of a waterline. This will return a main thoroughfare to its original level of service and eliminate safety hazards. | Hopedale Village | 0 | 0 to 30 days | \$162,500 |
| Harrison | Kennedy Ridge Waterline Extension | Installation of 7700 feet of trench waterline. Extension of potable water services to 7 existing homes and which will open a large area to development as local groundwater resources are of low productivity and poor quality. | Harrison County | 5 | 0 to 30 days | \$40,000 |
| Harrison | Village of Hopedale Wastewater System | Reversing of the wastewater treatment of the final float clarifiers and aerobic digester. Replacement of deteriorated pipe and fittings within the plant and replacement of worn or missing lift stations, pumps, gate rails and valves. This will increase treatment plant efficiency and promote economic development and residential growth. | Hopedale Village | 4 | 0 to 30 days | \$87,500 |
| Harrison | Village of Hopedale Waterline Replacement | Rebuild elevated water tank and install a force main along the ground-level water storage tank for public safety and security. Extend water and sewer mains for approximately 1500 linear feet along Miller Station Road, providing infrastructure to an area of the Village prime for development. This will provide an upgrade the Hopedale water system and encourage economic development. | Hopedale Village | 4 | 0 to 30 days | \$410,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Harrison | Sawko Road Waterline Extension (Monzula Winery) | Extend 3" potable waterline across US Route 22 (includes 200' road bore). This will provide potable water service to 2 existing households and allow for establishment of a proposed winery with 2 initial new jobs and the potential for expansion and additional economic development. | Harrison County | 2 | 0 to 30 days | \$4,500 |
| Harrison | Duncanwood Regional Sewer System | Construction of wastewater collection for the Villages of New Athens, Harlsville and Georgetown as well as pumping facilities to transport the wastewater to a central treatment plant. The treatment plant complex would include aeration, clarification, secondary and tertiary treatment for use in biological production. Provision of sanitary sewer for three, presently unsewered population centers. This will allow for economic development and the expansion of existing businesses, including a medical clinic. This will also abate pollution of area streams. | Harrison County | 25 | 91 to 180 days | \$2,400,000 |
| Harrison | Piedmont Water System Extension | Installation of 25,000 feet of water main, 20 fire hydrants and construction of a 100,000 gallon elevated water storage tank which will extend potable water service and fire protection to some 150 homes on the east side of Piedmont Lake. This is a major recreation area and water service will enable additional residential growth and economic development. This will also contribute toward linking the water systems of Belmont and Harrison Counties, with the goal of an eventual three-county water system which will also include Guernsey County. | Harrison County | 10 | 0 | \$800,000 |
| Harrison | New Business | Opening small business, LM Computer repair & Sales in Harlsville Ohio | L M Computer Repair | 3 | 31 to 90 days | \$150,000 |
| Harrison | Electronics Manufacturing Site | Trumpf Engineering Corp. is expanding its business through a potential joint venture with a European company to be headquartered in Cincinnati and produce electronics for the energy, health and aerospace industries. The requested funds are necessary to set up the design lab necessary to develop the electronic products. The requested funds will be used for capital purchases in support of the design lab. Targeted industries include renewable energy solar and wind, SmartGrid, Healthcare and aerospace. | Trumpf Engineering Corp. | 30 | 31 to 90 days | \$1,000,000 |
| Harrison | Village of Scio South Side Water Project | 16,000 linear feet of water line and appurtenances to replace badly outdated and under sized water main. Some existing water mains are only 2 inches in diameter. Many existing water mains are badly corroded. The existing system is inadequate for fire protection. This will resurface 6.3 miles of CR 25 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural, commercial and residential traffic. | Village of Scio - Diversified Engineering, Inc. | 20 | 0 to 30 days | \$1,545,198 |
| Harrison | CR 25 (From SR 250 to Sr 151) | This would resurface 2.9 miles of CR 21 (From CR 2 to Sr 799) with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. | Harrison County | 0 | 0 to 30 days | \$706,860 |
| Harrison | CR 21 (From CR 2 to Sr 799) | This would resurface 3.8 miles of CR 56 & CR 2 with asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. | Harrison County | 0 | 0 to 30 days | \$325,380 |
| Harrison | CR 56 & CR 2 (From SR 250 to E. Deersville Corp.) | This would resurface 1.85 miles of County Road 41 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. | Harrison County | 0 | 0 to 30 days | \$426,360 |
| Harrison | CR 41 (From CR 15 to SR 250) | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to those areas without grant monies. | Harrison County | 0 | 0 to 30 days | \$151,470 |
| Harrison | Wireless Broadband for Rural Application | Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently not be able to be offered will be internet access and phone service, with a goal of adding IPTV. This service will be available within a year. New WMAX technology will be able to push a strong enough signal to great rural areas. Once we are able to establish our first several sites we will have the ability to use local county money, along with the grant monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development, which will create commercial opportunities that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Harrison | CR 4 (From SR 22 to SR 646) | This would resurface 4.8 miles of Harrison County Road 4 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. | Harrison County | 0 | 0 to 30 days | \$718,080 |
| Harrison | CR 13 (From SR 22 to Jeff. Co. Line) | This would resurface 7.8 miles of Harrison County Road 13 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. | Harrison County | 0 | 0 to 30 days | \$875,160 |
| Harrison | CR 6 (Tuscarawas Co. Line to CR 2) | This would resurface 3.6 miles of Harrison County Road 6 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. County Road 6 is not part of the Federal Aid Highway System. | Harrison County | 0 | 0 to 30 days | \$969,000 |
| Harrison | CR 8 (From CR 2 to Bowerston Corp. Line) | This would resurface 7.03 miles of Harrison County Road 8 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. County Road 8 is not part of the Federal Aid Highway System. | Harrison County | 0 | 0 to 30 days | \$717,060 |
| Harrison | CR 10 (From Twp. Rd. 117 to Guernsey Co. Line) | This would resurface 4.65 miles of Harrison County Road 10 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. County Road 10 is not part of the Federal Aid Highway System. | Harrison County | 0 | 0 to 30 days | \$474,300 |
| Harrison | CR 51 (From SR 151 to SR 22) | This would resurface 3.75 miles of Harrison County Road 51 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. County Road 51 is not part of the Federal Aid Highway System. | Harrison County | 0 | 0 to 30 days | \$382,500 |
| Harrison | Village of Scio Water Treatment Plant Improvements | Water Treatment Plant Upgrades including an aeration unit for the reduction of hydrogen sulfides as suggested by CEQA, two high service pumps, a clarifier, a generator and associated piping and appurtenances. | Village of Scio - Diversified Engineering, Inc. | 22 | 31 to 90 days | \$635,030 |
| Harrison | CR 14 (From SR 151 to CR 13) | This would resurface 4.03 miles of Harrison County Road 14 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. CR 14 is not part of the Federal Aid Highway System. | Harrison County | 0 | 0 to 30 days | \$502,860 |
| Harrison | CR 12 (From Cadiz Corp. Line to Jeff. Co. Line) | This would resurface 5.2 miles of Harrison County Road 12 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. CR 12 is not part of the Federal Aid Highway System. | Harrison County | 0 | 0 to 30 days | \$591,600 |
| Harrison | CR 1 (From SR 22 to Twp. Rd. 340) | This would resurface 5.2 miles of Harrison County Road 1 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential traffic. CR 1 is not part of the Federal Aid Highway System. | Harrison County | 0 | 0 to 30 days | \$540,600 |
| Harrison | CR 15 (From SR 250 to CR 41) | This would resurface 5.05 miles of Harrison County Road 15 with 2 inches of asphaltic concrete. This road is in particular need of resurfacing to restore an acceptable level of service for agricultural and commercial, as well as residential. | Harrison County | 0 | 0 to 30 days | \$515,100 |
| Harrison | EPA-mandated Replacement of Yard Hydrants | This project would install the EPA-mandated replacement of approximately 200 yard hydrants throughout the major public parks and campgrounds of the Muskingum Watershed Conservancy District, a political subdivision of the State of Ohio. This project involves work at 12 major lake parks located at Charles Mill Lake, Pleasant Hill Lake, Alwood Lake, Tappan Lake and Seneca Lake. These hydrants, which supply water for the use thousands of campers each year, are outdated and are slated for replacement per new EPA regulations. | Muskingum Watershed Conservancy District | 10 | 0 to 30 days | \$165,000 |
| Harrison | Vail Mine Branch Line | Reconstruction of a rail line on 17 miles of abandoned railroad right of way in support of the new underground coal mine proposed by Rosebud Mining in Harrison County. The rail line would also traverse part of Tuscarawas County and connect to Ohio Central's existing mainline in Uhrichsville OH. Rail service is essential to enable to the proposed mine to be competitive in both local and distant markets. Rail transportation will also bring the coal to market in a more environmentally friendly means, with no damage to local road infrastructure. | Ohio Central Railroad | 50 | 181 days or more | \$30,000,000 |
| Harrison | Vail Mine Branch Line | Reconstruction of a rail line on 17 miles of abandoned railroad right of way in support of the new underground coal mine proposed by Rosebud Mining in Harrison County. The rail line would also traverse part of Tuscarawas County and connect to Ohio Central's existing mainline in Uhrichsville OH. Rail service is essential to enable to the proposed mine to be competitive in both local and distant markets. Rail transportation will also bring the coal to market in a more environmentally friendly means, with no damage to local road infrastructure. | Ohio Central Railroad | 50 | 181 days or more | \$30,000,000 |
| Harrison | Vail Mine Branch Line | Reconstruction of a rail line on 17 miles of abandoned railroad right of way in support of the new underground coal mine proposed by Rosebud Mining in Harrison County. The rail line would also traverse part of Tuscarawas County and connect to Ohio Central's existing mainline in Uhrichsville OH. Rail service is essential to enable to the proposed mine to be competitive in both local and distant markets. Rail transportation will also bring the coal to market in a more environmentally friendly means, with no damage to local road infrastructure. | Ohio Central Railroad | 50 | 181 days or more | \$30,000,000 |
| Harrison | MWCD Abandoned Water Well Capping Project | The Muskingum Watershed Conservancy District (MWCD), a political subdivision of the State of Ohio, manages over 30,000 acres of public lands surrounding a US Army Corps of Engineers flood control system consisting of 14 dams. Scattered about this acreage are anywhere from 30- 50 abandoned water wells. This project would entail the capping of these wells. The existing uncapped wells are a fire hazard to the public, but can also adversely impact water quality. Capping these wells will help preserve water quality and provide a safer environment for thousands of outdoor recreational users of our lands. | Muskingum Watershed Conservancy District | 5 | 31 to 90 days | \$62,500 |
| Harrison | Vail Mine Branch Line | Reconstruction of a rail line on 17 miles of abandoned railroad right of way in support of the new underground coal mine proposed by Rosebud Mining in Harrison County. The rail line would also traverse part of Tuscarawas County and connect to Ohio Central's existing mainline in Uhrichsville OH. Rail service is essential to enable to the proposed mine to be competitive in both local and distant markets. Rail transportation will also bring the coal to market in a more environmentally friendly means, with no damage to local road infrastructure. | Ohio Central Railroad | 50 | 181 days or more | \$30,000,000 |
| Harrison | Vail Mine Branch Line | The project consists of the re-establishment of rail service from Rosebud Mining Company's proposed Vail Mine near Freetown, Ohio to Uhrichsville, Ohio along the CB&Q rail right-of-way that runs along Stillman Creek. The rail line will connect the mine with markets in Ohio and adjoining states that utilize coal for electricity generation. Besides the 16 permanent mining jobs and 2 permanent railroad jobs, 50 construction jobs will last for 12-15 months during construction of the rail line, mine and coal preparation plant. Also, the project will provide the coal to market saving fuel, preventing the associated pollution and making transportation more safe and cost-effective. Depending on coal market conditions, the mine can run for 40-50 years producing good paying jobs with fuel benefits in a highly-depressed region of the state. | Rosebud Mining Company | 87 | 181 days or more | \$30,000,000 |
| Harrison | Vail Deep Mine Project | This project is for the development of a proposed underground mine and preparation plant near Freetown, Ohio. The Vail Mine and plant will create approximately 85 permanent, good-paying jobs that include a very lucrative benefit package. In addition, 2 permanent rail jobs will be created. These jobs will provide a great economic boost to a highly-depressed, low-income region of the State. Based on market conditions, these jobs will last 40-50 years. With the installation and investment of southern on many Ohio power plants, it only makes good business sense to bring Ohio coal once again. There is also associated with this project the re-establishment of rail service along 17 miles of track from the mine near Freetown, Ohio to Uhrichsville, Ohio. Additional coal industry support jobs will also be created by the project along with the percentage of existing businesses near the mine. | Rosebud Mining Company | 87 | 181 days or more | \$30,000,000 |
| Harrison | Vail Mine Branch Line | Reconstruction of a rail line on 17 miles of abandoned railroad right of way in support of the new Vail underground coal mine proposed by Rosebud Mining in Harrison County. The rail line would also traverse part of Tuscarawas County and connect to Ohio Central's existing mainline in Uhrichsville OH. Rail service is essential to enable to the proposed mine to be competitive in both local and distant markets. Rail transportation will also bring the coal to market in a more environmentally friendly means, with no damage to local road infrastructure. Combined total project for rail reconstruction and mine construction is \$60,000,000. | Ohio Central Railroad | 87 | 181 days or more | \$30,000,000 |
| Harrison | Street Paving Project | Repairing of streets and alleys that are in a rural tract for the safety of the village also help aide the store keepers. | Village of Jewett | 25 | 91 to 180 days | \$810,000 |
| Harrison | HAS Capitalized maintenance; PID 86102 | 2009 Capitalized Maintenance. This is a rural tract project whose funding comes through ODOT. | Ohio Department of Transportation | 2 | 0 to 30 days | \$50,178 |
| Harrison | Cadiz Wastewater System Improvement Project | The Village of Cadiz has received a mandate from Ohio EPA to complete improvements to the Cadiz Wastewater System. Improvements will focus on the high amount of nitrate and infiltration entering the collection system and upgrades at the wastewater treatment plant. The Village of Cadiz has a Median Household Income of \$20,518 and a Low-to-Moderate-Income level of 53%. The village needs Stimulus Package funds to make the project affordable for residents. Project Outcomes: 51 new Smart Toilet Lines Rehabilitation of the Cadiz Wastewater Treatment Plant The Village of Cadiz will gladly supply additional information to support this request for Stimulus Package funds. | Cadiz, Village of | 45 | 181 days or more | \$7,500,000 |
| Harrison | Piedmont Water System | This project will result in the creation or retention of more than 10 jobs, as well as over 30 construction jobs and will entail the installation of 25,000 feet of 8-inch waterline and construction of a 100,000 gallon elevated water storage tank. This will extend potable water service and the protection to some 150 households on the east side of Piedmont Lake, a major recreational area, and provide for additional recreational opportunities and development. This will also contribute to the regional plan to link the Belmont and Harrison County water systems. | Harrison County | 10 | 0 to 30 days | \$800,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Harrison | Repair old brick on town social hall by re-tuck po | This project would stabilize the outside structure of our town's social hall owned by the Harrisonville Volunteer Fire Company. The Fire Company holds their fundraisers in this building, and it is used as a social gathering spot in our community. This project would provide for a safe and usable structure for many years to come. All brick will be re-tuck pointed and any deteriorated brick will be replaced. We have had this project on hold due to lack of funds necessary, but feel that it is very important to address the bricks on the building for the safety of the public and for the appearance of the building. | Harrisville Volunteer Fire Company | 5 | 91 to 180 days | \$75,000 |
| Harrison | Vail Mine Branch Line | Reconstruction of rail line on a 17 mile of abandoned railroad right of way in support of the new underground coal mine proposed by Railroad Mining in Harrison County. The rail line would also traverse part of Tuscarawas County and connect to Ohio Central's existing mainline in Akronville, OH. Rail service is essential to enable the proposed mine to be competitive in both local and distant markets. Rail transportation will also bring the coal to market in a more environmentally friendly manner, with no damage to local road infrastructure. | Ohio Central Railroad | 87 | 181 days or more | \$30,000,000 |
| Harrison | Street Paving Project | Repairing of streets and alleys that are in dire need for the safety of the Village. | Village of Jewett | 25 | 91 to 180 days | \$810,000 |
| Harrison | Vail Mine Branch Line Project | This project will establish rail service between Freeport Village in Harrison County and Uhrichville in Tuscarawas County for the new Vail Mine. This mine will provide 85 high-paying jobs with lucrative benefits, as well as two additional railroad positions, depending upon market conditions. The new mine has a projected effective lifetime of 40 to 50 years. Product transport via the proposed rail line will provide benefits in the form of lower fuel consumption, reduced emissions, and the elimination of increased truck traffic on local and State highways, in addition to providing better public safety. There is also the indirect benefit of ancillary support jobs and services which will result from the improvement. | Harrison County | 87 | 181 days or more | \$30,000,000 |
| Harrison | YMCA Camp Tippecanoe Wastewater Treatment Plant | YMCA Camp Tippecanoe is located on land owned by the Madikungum Watershed Conservancy District, a political subdivision of the State of Ohio. The facility is located on Clandering Lake in Harrison County, a designated Republican Ohio County, with a high level of scenic beauty. This youth camp is being directed by DEPA to replace an outdated, almost non-functioning water treatment system with a new Adamsma WWTP system. The facility brings visitors to the area boosting the local economy. The future of the camp depends on the installation of a new WWTP system. A new system will allow the camp to remain open and serve thousands of area youth. | Madikungum Watershed Conservancy District | 10 | 91 to 180 days | \$249,000 |
| Harrison | Jewett Water Treatment Plant Improvements | Water Treatment Plant improvements | Jewett, village of | 10 | 91 to 180 days | \$200,000 |
| Harrison | Piedmont Water System Extension | This project will result in the creation or restoration of more than 10 jobs, as well as over 20 construction jobs and will entail the installation of 25,000 feet of 6-inch waterline and construction of a 100,000 gallon elevated water storage tank. This will extend potable water service and fire protection to some 150 households on the east side of Piedmont Lake, a major recreational area, and provide for additional recreational opportunities and development. This will also contribute to the regional plan to link the Belmont and Harrison County water systems. We want to start manufacturing modern furnaces that are at least 50 to 65 percent efficient and very low emissions. Also, we are going to manufacture ATV trailers. Our hopes are to be the biggest employer in Harrison County. After we get the equipment in place and the sales team on the road. We are hoping to hire the beginning of '10 employees. | Harrison County | 10 | 0 to 30 days | \$800,000 |
| Harrison | Manufacturing new products line | | Irish Creek Industrial Supplies and Services | 5 | 0 to 30 days | \$200,000 |
| Harrison | police help | Inventory for wages and new cruiser as our cruiser needs replaced and funding for our department is low. | jewett police | 1 | 0 to 30 days | \$185,000 |
| Harrison | Police Department Upgrade | Migrate a 2002 4 cylinder police cruiser to more economical 6 cylinder police cruiser, or to upgrade the present police cruiser with a more powerful engine, improve the computer system, camera, etc. with local law enforcement agencies. This would improve our response time and our LEOT program that is in current use. | Hopedale Police Department | 1 | 31 to 90 days | \$40,000 |
| Harrison | Building Repairs and Improvements | The Belmont Harrison Juvenile District serves 4 counties in Ohio by operating a juvenile detention center along with a day care center. The facilities are in need of building renovations for safety and security of the residents they serve. The detention center requires reconstruction of the plumbing fixed throughout the building. We also need to replace the 4 showers in the building. We would love to see any necessary innovations for energy conservation. | Belmont Harrison Juvenile District | 5 | 31 to 90 days | \$200,000 |
| Harrison | Murphy Transportation, Inc, Clean Fuels Ohio Partn | This programmatic partner wishes to begin continuous deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient as well as reduce emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Harrison | Harrison County employment sustainment | Our project is two fold. First it will bring back one position eliminated in 2008, keep one position to be eliminated by 10/2009 and create one new position. The second purpose is to purchase needed equipment to update infrastructure. The new equipment will be more cost efficient and more environmentally sound. | Harrison County Sheriff's Office | 3 | 0 to 30 days | \$350,000.00 |
| Harrison | Achieving Heating Efficiency at Puskarich Public L | which were installed in 1986, he let today's Energy Star qualified furnaces are much more energy efficient, and replacing the older gas furnaces with 90% rated efficient furnaces could reduce our library's energy use by as much as 25 per cent. The investment that would be made to replace our six existing units which are over twenty years old, along with new digital energy saving thermostats, could potentially pay off in energy savings within the first few years following the installation. This project would consist of installing (3) 72,000 BTU input 92% efficient gas furnaces and (3) 90,000 BTU input 92% efficient gas furnaces as well as energy smart digital thermostats. The library would also be professionally air sealed to make the maximum use of the heat that is generated. This project would essentially benefit the over 8,000 people that use the library annually. An energy assessment would be done prior to the project as well as afterwards to quantify and confirm the amount of efficiency savings. | Puskarich Public Library | 4 | 31 to 90 days | \$14,998.00 |

| Henry | The HP2g, 100MPG V-8 engine | Our company has conceived and built a prototype of a revolutionary, redesigned small block V-8 engine that can run on E-85 fuel or regular unleaded gasoline. We intended to design and build an engine that could attain at least 100MPG while still delivering enough horsepower and torque to power the SUV's, larger cars and trucks that Americans prefer to drive and need for work and for comfortably transporting their families in over 6,000 miles of road tests it has achieved: fuel economy in excess of 100MPG, 40MPG and 5000lb of torque upon demand, 0 to 60 in less than 4 seconds, top speeds in excess of 140MPH and carbon emissions of less than 200gms. And, no change in our refining infrastructure would be needed. We are now obtaining patents on the engine and trying to secure funding for R&D, and the purchase and construction of a facility, machining, and equipment to manufacture, market, sell and distribute our engine. The patents alone will cost us \$1.5 million. We expect to scale over 800 jobs, manufacture the engines, per contracts to major Tier One automotive OEMs and drastically reduce our nation's reliance on energy oil. We have a full business plan with franchise in place. | Horse Power Sales.net, Inc | 800 | 0 to 30 days | \$40,000,000 |
| Henry | Horse Power DE-CELL device | Our company has designed and built a prototype diesel add-on device to increase fuel economy and decrease harmful emissions in diesel engines of all types, most specifically those in semi tractors, ambulances, fire and rescue vehicles, mass transit buses and shipping vehicles of all sizes. In over the road testing we have been able to increase the fuel economy in tractor-trailer rigs from approximately 6-8MPG to approximately 13 MPG while substantially decreasing emissions. We have a market already established within the trucking industry. We are in the process of obtaining patents for the technology and contracting with a manufacturing company for the production of the device. The effect that this will have on our economy will be wide-spread. | Horse Power DE-CELL | 500 | 0 to 30 days | \$500,000 |

| Henry | Okolona Fiber to the Home | This project proposal is for the installation of fiber optic cable for the delivery of broadband services to an underserved rural area. This project may also include a wireless access via WiMax fixed broadband service. The project consists of the construction of approximately 60 miles of fiber plant and installation of associated electronic equipment necessary for the provision of said service. Preliminary engineered drawings and project plans have been completed, however the project has not to date received funding due to the lack of seed money. The company expects to receive the remainder of the needed funding through federal loan programs. A grant will provide the seed money needed to allow the company to secure the remaining funding and would also cause an increase in broadband adoption due to the resulting service being more affordable. The project would also provide long term benefits to the local economy by increasing residential growth and the likelihood of economic development and associated job creation. | Farmers Mutual Telephone Company | 15 | 0 to 30 days | \$1,000,000 |
| Henry | New Wastewater Collection and Treatment | The Village will install a new wastewater collection and treatment system that includes: 15,000 linear feet of 6 to 10-inch gravity sewer line and 15,000 linear feet of 3 to 6-inch force main, 1 pump station and appurtenances. Treatment will be accomplished through the construction of a 3.0 million gallon lagoon system that will discharge to the south branch of Turkey Foot Creek. CORRECTED COUNTY SUBMISSION: We are a Small Rural Independent Telephone Company in NW Ohio with 640 access lines. Currently we provide DSL at a speed of 768k down and 256k up across an old copper network to our customers. For McClure to increase our speeds and provide better service we applied for and were granted a \$8.2 million FTTH Broadband loan to build a Fiber Optic Network throughout our service to be able to offer much greater speeds. In November 2008 we started the process of building our network. When completed this will be the fastest you can build. We will be able to offer unlimited broadband speeds to all of our customers even in the rural areas where typically an average of seven houses per mile they will get speeds up to 12m down and 1m up or higher. In these hard economic times are we the only ones that really are. We are also leasing our reserved fiber to some of the big carriers not paying that CLEC bills. Lots of money. Lots of money. Lots of money. The way we are able to operate. If the McClure Telephone Company receives this grant money it would help financially secure our liquidity and allow us to provide top of the line broadband service at an affordable price. | Village of Malinta | 30 | 31 to 90 days | \$1,710,210 |
| Henry | Broadband FTTH Project for McClure Telephone Compa | The Henry County Board of Developmental Disabilities serves 400 people with mental retardation and developmental disabilities in Northwest Ohio. The Board coordinates healthcare, residential services, early intervention services, preschool, day services, and other services. The Board requests that funds be allocated that will allow for the transition to electronic documentation storage, and request that the process will increase the efficiency of the Board in delivering services and reduce long term employment for both individuals. Further, this process will allow the Board to free up desperately needed space to better serve individuals with disabilities. The Henry County Board of Developmental Disabilities provides support services for close to 300 people with disabilities in Northwest Ohio. The Board operates and collaborates preschool and is a provider of early intervention program. The Board is seeking funds to implement an electronic document imaging system that would allow for program components to be in one effective an efficient manner. This would necessitate improvement of the broadband internet capability at the our school location. The current connection is wireless and not reliable. | The McClure Telephone Company | 10 | 31 to 90 days | \$3,500,000 |

| Henry | Henry County Ag Society Bath House Facility | This project consists of the demolition of an existing, outdated bathroom and constructing a new handicap accessible bathroom with showers. The new building is approximately 30' x 40' in length and width and 9' tall. It will have both a women's facility and men's facility. | Henry County | 5 | 31 to 90 days | \$175,000 |
| Henry | Deshler Street Resurfacing | Resurfacing various streets to restore pavement surface that have reached their useful life. | Village of Deshler | 5 | 31 to 90 days | \$220,000 |
| Henry | Funding Employee's Salaries | Staff has not received a raise in hourly wages in over 2 years. Incentive bonuses have been eliminated in a cost cutting measure totaling over \$20,000.00. 1 staff member has been let go, another has taken a30% cut in wages to stay. I want the funds to go to my nice employees to help them keep up with inflation. I figure that they should have had a increase in pay of at least 10% since their last pay increases in June of 2008. In addition, a bonus of 1,000.00 to each of the nice employees to make up for the loss of 20,000.00 over last year. This stimulus money will be passed on to my employees, and I will remain none of it in order to maintain that ability to pay their obligations and keep their jobs. With this, I will not have to lay any of the staff off, and will maintain the full time employees and on part time. It is my understanding that this package is to maintain current jobs and create new ones. I thank our project for this category. I currently have a new ground water drinking water treatment plant for the Village of Deshler to replace an old plant that is in poor condition. May qualify for \$500,000 CDBG Grant once we have EPA approval. | George S. Cochran D.D.S., Inc. | 9.5 | 0 to 30 days | \$25,900 |
| Henry | Water Treatment Plant | Construction of a new ground water drinking water treatment plant for the Village of Deshler to replace an old plant that is in poor condition. May qualify for \$500,000 CDBG Grant once we have EPA approval. | Village of Deshler | 25 | 91 to 180 days | \$2,206,900 |
| Henry | Village of Florida Water System Repairs | The project involves repairs and replacement of core water infrastructure equipment serving the Village of Florida. The project components include pump station motors and motor starters (2), remote telemetry unit (1), magnetic flow meters (2), new individual service meters (125). | Village of Florida- Feller, Finch & Associates, Inc. | 1 | 91 to 180 days | \$75,000 |
| Henry | Natorium improvements at public school | The NBS natatorium was built with the public high school prior to the inception of title 9 (equalization of boys and girls spots). Improvements to the energy systems, building, and equipment would benefit both the energy consumption of the facility but also the development of the athletes. Swimming is a highly disciplined sport that has proven to produce highly successful academic athletes. Money invested in this project would be an investment in the future as well as the present. The natatorium is currently operating with original equipment from the 1970s. Pool equipment and natatorium space can be better utilized with reconstruction that would be possible with these additional funds to the program. We are currently in through our non-profit organization because we have seen educational funding cannot support athletics in schools today. Please contact me for the most detailed information. | Napoleon Aquatic Club | 3 | 0 to 30 days | \$175,000 |
| Henry | Henry County Landfill Leachate Pretreatment System | Construction of an aerated lagoon type leachate pretreatment system with discharge to a new public wastewater treatment plant owned by the Village of Malinta, Ohio. The project location is a 900,000 gal. equalization lagoon and 1,500,000 and 500,000 gal. pretreatment lagoons. The project also includes a blowoff H&G, containing 2 blowoff units, 400' of 8" aeration header piping, over 2000' of both aeration tubing and 4" aeration, and 3 separate pumping stations. The Village of Malinta is under findings from the Ohio EPA to treat wastewater treatment. This project is a collaborative effort between the Village and the Henry County Landfill. At the projected cost of the Malinta project each user would be assessed approx. \$40,000 by combining the 2 projects, the Village treatment plant will treat landfill leachate. Since hauling costs will be eliminated, this will give a huge savings to the landfill. By having the Village treat the leachate, the Village will receive a steady revenue source. This joint effort will provide a savings to both the taxpayers of Henry County and the residents of Malinta. Any award would help reduce the cost of this providing jobs for the contractors. | Henry County | 20 | 31 to 90 days | \$593,600 |
| Henry | Yard Waste Transfer Station Relocation | Construction of a yard waste transfer station. The existing location was eliminated due to expansion of the Wastewater Treatment Plant as mandated by Findings & Orders issued by the E.P.A. | City of Napoleon | 7 | 31 to 90 days | \$150,000 |
| Henry | Clairmont Avenue Improvements | Reconstruction of existing roadway, curbing, drive approaches, sanitary sewer, storm sewer, and waterline. Construction of new concrete walks. The existing infrastructure was constructed in 1967. | City of Napoleon | 5 | 0 to 30 days | \$450,000 |
| Henry | Dodd Street Improvements | Reconstruction of existing roadway, curbing, concrete walks, waterline, storm sewer, and sanitary sewer. This area sees repeated basement flooding. A portion of the underground utilities were replaced five years ago, but the remainder of the project was never completed due to lack of available funding. | City of Napoleon | 5 | 0 to 30 days | \$700,000 |
| Henry | Municipal Building Parking Lot Improvements | Reconstruction of existing asphalt parking lot at the municipal (administration and financing) building of the City of Napoleon. The existing parking lot pavement has failed. The drainage structures are also being replaced. The existing asphalt parking lot is being replaced with epoxy bit asphalt concrete pavement. | City of Napoleon | 5 | 0 to 30 days | \$270,000 |
| Henry | Miscellaneous Street Improvements | Milling and resurfacing of local streets. Several areas have failed asphalt pavement. The remainder of the areas have been patched due to two 20' separate projects in which sanitary sewers and storm sewers were replaced as required by Findings & Orders issued by the E.P.A. | City of Napoleon | 7 | 0 to 30 days | \$500,000 |
| Henry | Hamler Quarry Dredging and Improvements | Quarry will be dredged to original depth and banks will be re-established. | Village of Hamler | 10 | 91 to 180 days | \$50,000 |
| Henry | Elevated Tank Repairs | Repairs to structural deficiencies and repainting of tank to provide better water quality and longevity to the tank. This is the only tank in the system, and if left as a catastrophic failure is possible in the future. | Village of Hamler | 10 | 91 to 180 days | \$71,000 |
| Henry | Transmission Main Improvements | Project will provide a loop in the Village water transmission system. Project help resolve inadequate fire flows in the Village and provide for better water quality. | Village of Hamler | 35 | 91 to 180 days | \$179,300 |
| Henry | Fire Hydrant and Valve Replacement | Replacement of inoperable fire hydrants and 10 isolation valves. The replacement of these valves and hydrants will enhance reliability maintenance and fire protection in the Village. | Village of Hamler | 15 | 91 to 180 days | \$60,000 |
| Henry | Phase I Street Resurfacing | Resurfacing of several Village streets in the central business district. | Village of Hamler | 10 | 91 to 180 days | \$75,000 |
| Henry | Bio-Waste | Development of an academic program with laboratory training to turn agricultural bio-waste into alternative energy. This program would focus on creating alternative energy from the agricultural waste of the harvested corn and wheat stalks, as well as the soybean plant. In addition, this project would decrease the amount of bio-waste on campus and provide initiatives to reduce the bio-waste in our community. | Northwest State Community College | 100 | 181 days or more | \$750,000 |
| Henry | Alternative Energy Degree Program Support | These funds would be used to support the alternative energy technology (wind, solar, photovoltaic cells) program which is currently in its infancy at Northwest State Community College. This new academic program is designed to train persons to design and service these systems as well and more households turn to these sources of alternative energy. | Northwest State Community College | 100 | 0 to 30 days | \$520,000 |
| Henry | New Maumee River Bridge Project (PID #: 22984, Sta | A new Maumee River crossing that will provide a safe alternative route for traffic moving between the north and south sides of Napoleon, Ohio (the river divides the town in half). The bridge will link the industrial zones south of the river (e.g. Campbell's Soup Plant) to those on the north side and the new U.S. Route 24 (Troy to Port), which is already under construction. This bridge will provide Napoleon the economic development capability to foster decades of growth. The cost is estimated at approximately \$25 million, broken down as \$3 million soft costs (engineering), \$1 million right of way acquisition costs, and \$21 million construction costs. We request stimulus money to assist with the soft costs of the project. | Henry County Engineer's Office | 60 | 31 to 90 days | \$3,000,000 |
| Henry | Wind Turbine - Alternative Energy Initiative | The project calls for the investment in a wind-based power generator system on the campus of Northwest State Community College to better position our energy needs and also to become a model for other schools. The project also becomes part of the primary for students in our alternative energy program. | Northwest State Community College | 2 | 91 to 180 days | \$600,000 |
| Henry | Henry County Broadband Network | This provides broadband access to several rural areas (Liberty Center and Grand Rapids Area) of Henry County, which are not currently connected or unable to broadband internet access. | Henry County Commissioners Office | 10 | 91 to 180 days | \$50,000 |
| Henry | On-line Class Delivery | These dollars are needed to update current courses, equipment and instructional methods in the area of on the county institution so that Ohio employees can enhance their technical skills while staying employed. Both traditional and non-traditional methods would be used to support us in our current system. | Northwest State Community College | 5 | 0 to 30 days | \$650,000 |
| Henry | Henry County Government Broadband Network | To create a government broadband network that connects the county together with its municipalities. This project will enable the local governments to be more effective. | Henry County Commissioners Office | 10 | 91 to 180 days | \$210,000 |
| Henry | HCHS Museum - Grelton | The Henry County Historical Society's Museum is located in Grelton and is housed in a former Methodist Episcopal Church built in 1890. The museum accounts several aspects of Henry County's history. This includes a general store exhibit, courthouse memorabilia and other furniture, letters, personal artifacts and paper archives from past and present residents. The site offers educational opportunities through its volunteer individuals and groups. It provides high school and college students an option for community education hours while learning about their local heritage. The museum has also been a unique meeting place for groups. A collection among local township or community historical societies, teachers and history minded organizations have exhibited at the museum. The Henry County Historical Society has the building for storage of its collection and archives. The church renovation project will replace the museum's 25-year old roof, replace rotten siding and perform repairs to the foundation. Inside museum, plans are to upgrade the outdated electrical service, add insulation and a new HVAC system. Parting of the building inside and out is needed. Improvements to the building have not started. This portion of the renovation project is | Henry County Historical Society | 25 | 0 to 30 days | \$66,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Henry | Water and Waste Water Treatment Plant | The following is a Project Description for the Water and Waste Water Treatment Plant. At the current time we have an estimate of \$200,000.00 for upgrades that need to be done to our plant. These upgrades are mandated by the Ohio EPA. PathStone is a non-profit organization that helps low to moderate income families and also we our office is a next step for migrant farmers. With these improvements we are hoping to help more families in need of a deal. The current scope of work consists of the following: Engineering for Upgrades Upgrades to Waste Water Treatment Plant Upgrades to Water Treatment Plant The outcome of these upgrades will help not only low to moderate income families but all families in need during these very turbulent times. | PathStone | 20 | 181 days or more | \$200,000 |
| Henry | High Definition Video Teaching | Northwest State Community College is a leader in the use of video conferencing equipment to deliver state of the art training across the world. Additional equipment is needed and a video bridge system is required to increase high definition video. This equipment will allow us to connect all higher education institutions and adult career centers in the region with video conferencing capability. Expanded video conferencing capability will eliminate the duplication of course offerings in the region as all classroom instruction for a specific course can be taught by one instructor connected to numerous sites. | Northwest State Community College | 10 | 0 to 30 days | \$450,000 |
| Henry | Police Academy Training | Funds are needed to coordinate and train police and security personnel in Northwest Ohio. The upgrading of our facility with a synchronous classroom, fitness center, and shooting range is necessary to enhance the current program. The Police Academy Training Program produces professionally trained individuals for work in police and security positions in Northwest Ohio. | Northwest State Community College | 20 | 0 to 30 days | \$750,000 |
| Henry | Nursing Clinical Lab | Funding would be used to expand the clinical nursing laboratory experience of two very successful Northwest State Community College Programs Registered Nursing and Licensed Practical Nursing. Additional equipment in the lab would move it from a strictly "hands on" must be physically present" learning experience to a synchronous lab which would offer new opportunities to nursing students who are at distant locations from the campus. | Northwest State Community College | 60 | 181 days or more | \$750,000 |
| Henry | Park equipment | Purchase of Park Equipment, including park benches, picnic tables, playground equipment and a shelter house. The outcome is to provide a healthy place for gathering and recreation for residents of Ridgville Township. We have no park now for the children and the nearest school or park is 8 miles away. This will provide a place for the children to have and get exercise at the same time as well as a place for the adults to gather and enjoy the outdoors. | Ridgville Township Park Board | 2 | 31 to 90 days | \$100,000 |
| Henry | Road Improvements | Resurfacing and widening of current roads, located in primarily an agricultural area, many of which are narrow country roads no longer capable of safely handling types of traffic associated with modern day farming equipment, fire and rescue equipment, school buses, and citizens of a growing area commuting to and from work. | Washington Township | 20 | 0 to 30 days | \$500,000 |
| Henry | Hamler Fire Station Improvements | Construction of a new expanded fire station housing the Hamler Volunteer Fire Department and the Henry County South Joint Ambulance District. | Hamler Volunteer Fire Department | 25 | 0 to 30 days | \$2,650,000 |
| Henry | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, covering a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at broadband speeds, 100Mbps or more. wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently only be able to be offered will be internet access and phone service, with a goal of adding IPTV. The services to be packaged within a year. New WiMAX technology will be able to push a strong enough signal to provide all these services. Ohio we are able to establish our first several sites we will have the ability to use local county money, along with Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. Creation of a Central Waste Facility that will be able to handle the high number of agricultural and food processing wastes in NW Ohio into beneficial reuse products. This facility will be multifaceted and be able to produce a number of various products including biogas, biodiesel and reusable ethanol. The byproducts will be treated or reused in one of the other industrial processing steps with the goal of being completely self sufficient in terms of energy use and creation. Biogas created through anaerobic digestion of agricultural or food wastes will be cleaned to produce natural gas (CNG) that is compressed naturally gas (CNG) that is cleaned and used for the production of ethanol. The ethanol is then used to produce biodiesel. These waste facilities to be readily located to major biodegradable waste producers nearby to other major generators. Other, non-fermentable byproducts of ethanol require additional treatment. With this approach byproducts of biodiesel and ethanol will be further refined and reused to capture additional energy and beneficial reuse through anaerobic digestion. This facility would provide relief to NW Ohio Wastewater treatment plants and landfills. Has a collaborative effort of the Information Technology Centers (ITCs) of the Ohio Educational Computer Network, a PK-12 statewide identity management system (IM) has been started. The system currently is scaling and capable of deploying to 150,000 identities. Additional funding is requested to expand the project to be capable of securely handling the identities of all 1.8 million students and 300,000 staff members of Ohio schools. Work is also being envisioned to merge the work of this project with that of higher education to provide a seamless identity management system for PK-20 education in Ohio. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Henry | NW Ohio Central Waste and Biofuels Facility | Creation of a Central Waste Facility that will be able to handle the high number of agricultural and food processing wastes in NW Ohio into beneficial reuse products. This facility will be multifaceted and be able to produce a number of various products including biogas, biodiesel and reusable ethanol. The byproducts will be treated or reused in one of the other industrial processing steps with the goal of being completely self sufficient in terms of energy use and creation. Biogas created through anaerobic digestion of agricultural or food wastes will be cleaned to produce natural gas (CNG) that is compressed naturally gas (CNG) that is cleaned and used for the production of ethanol. The ethanol is then used to produce biodiesel. These waste facilities to be readily located to major biodegradable waste producers nearby to other major generators. Other, non-fermentable byproducts of ethanol require additional treatment. With this approach byproducts of biodiesel and ethanol will be further refined and reused to capture additional energy and beneficial reuse through anaerobic digestion. This facility would provide relief to NW Ohio Wastewater treatment plants and landfills. Has a collaborative effort of the Information Technology Centers (ITCs) of the Ohio Educational Computer Network, a PK-12 statewide identity management system (IM) has been started. The system currently is scaling and capable of deploying to 150,000 identities. Additional funding is requested to expand the project to be capable of securely handling the identities of all 1.8 million students and 300,000 staff members of Ohio schools. Work is also being envisioned to merge the work of this project with that of higher education to provide a seamless identity management system for PK-20 education in Ohio. | Industrial Fluid Management, Inc. | 10 | 181 days or more | \$2,000,000 |
| Henry | K-12 Identity Management Project | Has a collaborative effort of the Information Technology Centers (ITCs) of the Ohio Educational Computer Network, a PK-12 statewide identity management system (IM) has been started. The system currently is scaling and capable of deploying to 150,000 identities. Additional funding is requested to expand the project to be capable of securely handling the identities of all 1.8 million students and 300,000 staff members of Ohio schools. Work is also being envisioned to merge the work of this project with that of higher education to provide a seamless identity management system for PK-20 education in Ohio. | Technology Solutions Group, MCOECN | 4 | 31 to 90 days | \$12,000,000 |
| Henry | Email Archival & eDiscovery Project | With the new Federal rules of civil procedure and the Ohio public records act, Ohio K-12 school districts need to implement new processes and procedures for archival Email and eDiscovery discovery requests. This project would provide funding to build and host a statewide Email archival and eDiscovery portal for use by all Ohio K-12 school districts. This would be much more cost effective than each of the more than 1000 Ohio K-12 educational entities build their own disparate systems. As envisioned, this system would be built and hosted by the Technology Solutions Group of the MCOECN and supported through its network of Information Technology Centers (ITCs) throughout Ohio that are owned and operated by the Ohio K-12 school districts served by the ITC. | Technology Solutions Group - MCOECN | 4 | 0 to 30 days | \$2,000,000 |
| Henry | Deshler Street Resurfacing (Revisions to previous) | Resurfacing of road surface that have reached their useful life. | Village of Deshler | 5 | 31 to 90 days | \$220,000 |
| Henry | K-12 Document Management & Archival Project | Ohio K-12 educational entities are facing significant demands to convert existing paper based documents to an electronic format and store them in a document archival and retrieval system. This is needed for schools to fully comply with the new Federal rules of civil procedure and the Ohio public records act. In order to promote efficiency and cost-effectiveness, we propose to develop a hosted solution for Ohio schools that meet all legal requirements and assist schools in understanding their requirements and how to use an electronic document management system. We envision this system being hosted and managed by one or more of the Information Technology Centers (ITCs) that serve nearly all Ohio K-12 school districts. | Technology Solutions Group - MCOECN | 4 | 0 to 30 days | \$1,500,000 |
| Henry | OBIE eSIS/DASL Integration Project | Through the efforts of the Ohio Department of Education (ODE) and the Information Technology Centers (ITCs) of there is a project underway to build and deploy a statewide implementation of business intelligence tools integrated with the two primary student information systems used in Ohio K-12 schools. These business intelligence tools are designed to aid decision-making tools in the hands of school administrators. Funding is being sought to accelerate the project to allow school districts and state analysts access to student performance data based on a single desktop despite the back end student information system being in two disparate systems. | Technology Solutions Group - MCOECN | 6 | 31 to 90 days | \$2,425,000 |
| Henry | OECN State Software Web-Enablement Project | The OECN State Software provides general ledger, accounts payable, human resources, and state reporting applications that are used by more than 90% of all Ohio K-12 schools. This software was developed during the time of the mainframe, and is being web-enabled over time for Ohio schools. Funding is being sought to accelerate the project to allow school districts and state analysts access to student performance data based on a single desktop despite the back end student information system being in two disparate systems. | Technology Solutions Group - MCOECN | 12 | 0 to 30 days | \$3,000,000 |
| Henry | NEW TRUCK WASH/SHOP EXPANSION & PARKING | WASH TRUCK 2 BAY TRUCK WASH AT EXISTING TRAVEL CENTER. ADDING 2 MORE REPAIR BAYS AND EXPANDED PARKING LOT ON LAND ALREADY OWNED. SUCCESSFULLY OPERATING THE TRAVEL CENTER BY GREYVAL BROS CORP SINCE 1991. CREATING 15 NEW JOB OPPORTUNITIES AND HELPING RETAIN CURRENT JOBS. SERVING SEMI TRACTOR TRAILERS AND 4 WHEELERS THEIR ONE STOP FACILITY. PROVIDING FOOD, FUEL, LUBING, REPAIRS, TRUCK WASH AND PARKING 24 HOURS A DAY 7 DAYS A WEEK. | GREYVAL BROS CORP. | 15 | 31 to 90 days | \$1,800,000 |
| Henry | Township Road V widening | Two miles of road widening and upgrading. | Freedom Township | 50 | 0 to 30 days | \$500,000 |
| Henry | River road | Expected Outcome: Better Road Conditions, Drainage and Access for Residents, Small Businesses, Dairy Farm, and Farmers in the area. | Flatrock TWP | 12 | 181 days or more | \$2,000,500 |
| Henry | Road resurfacing project | Relocates one half of a mile of road near the Maumee river because it is sliding in. To much of this road was closed by the county due to lack of funds to fix. If this section gets closed it will make it extremely difficult to get fire and rescue to the people that live there. There is no way we can fix this with our funds. | Liberty Township Henry County | 5 | 91 to 180 days | \$70,000 |
| Henry | MAW - Defiance to Napoleon Railroad 286,000 track | Two miles of road resurfacing. Upgrade track structure and bridges over the 17.15 miles of rail line, allowing improved service and higher weight limits to major rail customers including Campbell Soup, Cleveland Warehouse and Advanced Drainage at Napoleon, Johna Marville and General Motors Central Foundry at Defiance, Ohio. The project will install 207,200 tons feet of heavier rail, 207,720 new cross ties, 39,300 of ballast spools, eleven switches, repair and upgrade eight railroad bridges, including a 724 foot structure over the Maumee River. This project will result in an 8.75% increase in shipping weights to 286,000 lbs per rail, the new industry standard. Without this these improvements 16 employees providing over 5,068 jobs will be non-competitive in their markets. With these improvements, Campbell, General Motors, Cleveland Warehouse, Advanced Drainage and others in the Defiance and Henry County area will continue enjoy the use of the Maumee Railroad, pay substantial local taxes and bring the economic base for the multi-county area. In addition, this project will gain the upgrade of the designed as a High Speed rail line for service between Chicago and Toledo/Defiance. | Maumee & Western Railroad Corporation | 5,068 | 31 to 90 days | \$11,074,300 |
| Henry | Foreclosure Prevention | As a social homecare being long-term and for counseling and education. To add additional staff to help. This funding could also assist the neighborhood stabilization plan to help communities in need. | Path Stone Corp. | 10 | 31 to 90 days | \$75,000 |
| Henry | S.S.T.P. (Sanitary Septage Treatment Plant) | This new patented SSTP (Sanitary Septage Treatment Plant) is designed to treat the waste generated by households outside the sewer infrastructure of a city. The septic hauling companies will pump these households on a regular basis, as dictated by the local Health Departments and deliver to the SSTP for treatment. Currently this type of waste (2-100 gal./year in OH) is disposed of directly on the ground with no treatment, or disposed of at a local sewer treatment plant. The local sewer plants are not designed to treat this type of high strength waste thereby reducing the designed population growth rate. Each SSTP is designed to treat 70,000gpd to service a 2-3 county area, each separated by a 20mi. radius. | Henry County Regional Water & Sewer District | 140 | 91 to 180 days | \$3,000,000 |
| Henry | Sexual and Physical Abuse Treatment | This request, if funded, would permit the agency to retain 2 licensed therapists who currently provide intensive home based services and out patient services to victims and perpetrators of domestic violence, child abuse, sexual assault, as well as to individuals with other mental disorders. In calendar year 2008, two thousand five hundred and eighty six (2,586) hours of direct services were provided by these two positions. | Center for Child and Family Advocacy, Inc. | 2 | 0 to 30 days | \$92,970 |
| Henry | Energy Efficiency | Purchasing new "hoty screw" air compressor, that uses less energy. Currently, the piston driven air compressors runs constantly for 15 hours per day straight. It uses about 1000 kw energy. Our consumption of a "hoty screw" air compressor would use half the energy. A "hoty" waste heat exchanger. The savings on water alone is half of what is currently being used now. Presently we process 2,000 lbs. per hour. The new format washer could process up to 3,000-4,000 lbs. per hour. The boiler we process the linen, this has less energy consumed throughout the day. Also, there is more energy savings compared to our "open-pocket" washers now. Plus, conveyors for transferring of linen throughout the plant. Makes the facility more efficient. If new energy efficient dryers, 1 of this would be steam and other 4 would be large gas industrial size dryers to save energy and maximize the work loads. The equipment listed above would greatly "save" our company on energy. | Buckeye Launderers and Cleaners LLC | 55 | 0 to 30 days | \$1,500,000 |
| Henry | The Edge Sports and Fitness Complex | To start up a sports and fitness complex using state of the art weight equipment, personal training, dance classes, etc. Building is about 20,000sqft. In talks to bring in an established gymnastics company from the area that is seeking more room for expansion. | EdgeVentures Group LLC. | 5 | 31 to 90 days | \$200,000 |
| Henry | Horse Power DE-CEL | This is being submitted to amend our original proposal for stimulus funds for our DE-CEL project. Our first proposal was intended to request \$300,000 with a total project cost of \$1,000,000. However, when the information on all of the submitted requests was posted on the web site and came out in the press, it was noted that we had requested \$500,000 with a total project cost of \$1,000,000. The web site was having trouble accepting the submissions that day. Perhaps the error was due to the web site problems or perhaps we just made a typing error. In any event we wish to make it clear that our request for \$300,000 and we wish to amend our original proposal. The DE-CEL is an add-on device that increases fuel economy by approximately 150% and significantly decreases emissions in diesel engines of all sizes. Prototypes have been built and tested. The business plan is in place. We are taking measure, installation and service plans are being completed. Please allow our proposal to be amended to reflect the figures above. Thank you. We would like to have my house weatherized from top to bottom, furnace, water heater, front and back doors and anything else that they may find I could use. | Horse Power Sales.net, Inc. | 500 | 0 to 30 days | \$5,000,000 |
| Henry | Home Weatherization | This is being submitted to amend our original proposal for stimulus funds for our DE-CEL project. Our first proposal was intended to request \$300,000 with a total project cost of \$1,000,000. However, when the information on all of the submitted requests was posted on the web site and came out in the press, it was noted that we had requested \$500,000 with a total project cost of \$1,000,000. The web site was having trouble accepting the submissions that day. Perhaps the error was due to the web site problems or perhaps we just made a typing error. In any event we wish to make it clear that our request for \$300,000 and we wish to amend our original proposal. The DE-CEL is an add-on device that increases fuel economy by approximately 150% and significantly decreases emissions in diesel engines of all sizes. Prototypes have been built and tested. The business plan is in place. We are taking measure, installation and service plans are being completed. Please allow our proposal to be amended to reflect the figures above. Thank you. We would like to have my house weatherized from top to bottom, furnace, water heater, front and back doors and anything else that they may find I could use. | Individual | 5 | 0 to 30 days | \$15,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Henry | Roof Replacement | Replace existing rubber roof with new EPDM elastic membrane roof. Approximately 6,452 sq ft with 259' of new cap and flashing, and 55' of gutter downspouts. The building was erected in 1953 and is the original roof. It has been "leaking" many times but has continued to leak after a heavy rainfall. | The Center for Child and Family Advocacy, Inc. | 6 | 0 to 30 days | \$31,356 |
| Henry | Window Replacement | Remove, replace and repair thirty-one (31) windows of various sizes to match existing masonry openings. This building was erected in 1953 and many are the original windows. | The Center for Child and Family Advocacy, Inc. | 4 | 31 to 90 days | \$42,585 |
| Henry | Stimulus Solar | To open a production facility to design and build efficient solar panels for housing and industry. Expected outcome is to create jobs in N.W. Ohio | Fausey Solar | 20 | 31 to 90 days | \$5,000,000 |
| Henry | Bagged Ice | Expand current family owned ice sculpture business into a full service ice company. We would like to expand the bagged ice business which we just started a year ago. This market has a lot of growth in part to our area being controlled by a corporation that has been monopolizing on this area. We offer our customers better prices and complete customer service that has built a good customer base. These customers would rather go to a smaller locally owned concern as a large corporation. | Ice Creations | 5 | 31 to 90 days | \$150,000 |
| Henry | Gilliland Farms LLC expansion | To maintain and expand a new trucking business. Purchase more equipment and hire more employees. | Gilliland Farms LLC | 6 | 181 days or more | \$100,000 |
| Henry | B.A. Miller and Sons Trucking Inc. | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more efficient and as well as emissions. | Clean Fuels Ohio | 5 | 0 to 30 days | \$50,000 |
| Henry | Maintaining & Updating | We are currently in a building built in 1971. We are looking at replacing the roof & new insulation. We are a trucking facility and the updating schedule does not allow us to shut down. We would like to replace the roof windows & overhead doors (7 doors). We are also looking to update the Best Emissions Reduction in our tractors (12 tractors). | B.A. Miller & Sons Trucking, Inc. | 14 | 91 to 180 days | \$250,000 |
| Henry | Henry County Ohio Stimulus Plan | Year 2000 census lists Henry County population at 29,310. This package would pay each taxpayer in Henry County \$10,000. The total amount would primarily not be required. Individuals with \$10,000 of net income and joint filers with \$20,000 of income would receive no payments. However, some costs to administer the program would be needed. People with mortgages would be able to pay large sums to reduce principal and provide banks with funds to lend to others. People with no debt would be able to buy cars and other items. To stimulate our local economy. Some people will choose to invest which would stimulate that sector. This program gets the money into the hands of the taxpayers and not into the businesses whose poor decisions have created most of their own problems. This package is far more affordable and makes much more sense than giving money to AG for better federal bonds or to the auto industry given the same payments have not created additional car sales. The current Gov's package seems to be rewarding poor performance and will end up being paid for by taxpayers anyway. This program will truly stimulate the economy. | Henry County | 29210 | 0 to 30 days | \$292,100,000 |
| Henry | Home Roof Replacement | Would like to install an environmental friendly steel roof which would last for an estimated 50 years and avoid constant replacement every 10 years placing more stresses on land fill. | Self | 8 | 91 to 180 days | \$51,000 |
| Henry | Road Repair & Construction | The Village of New Bavaria is in need of total reurfacing on all village streets and there is currently no funding available for such an undertaking. The Village park is in need for rebuilding and there is a large concrete area creating a safety hazard and village currently does not have adequate resources to clean up and remove concrete area. | Village of New Bavaria | 8 | 181 days or more | \$150,000 |
| Henry | Village Park Restoration | | Village of New Bavaria | 2 | 91 to 180 days | \$34,000 |
| Henry | continuing employees wages | We need help to continue our operation. We are a full service recycling center that purchases all types of metal and accepts cardboard, paper and plastic. The entire metal industry is in a dire straits and in order for our company to survive, we need help with our payroll for the next 6 months. We service several counties in our area: Henry, Fulton, Defiance, Wood, Lucas, Williams, Putnam, and Williams Counties. NRECA has received an average of 9,238 tons of material per year over the last three years. The State State's plan to purchase a total of approximately 100,000 tons average over the same three years. This demonstrates a large percentage, about 30% of the total materials diverted from our region are here out our employees hours to have money, but because the way the sub industry is, the metal market is very volatile and the price of the raw metal has been in decline for 24 months and this sector our company has ever over the metal industry. | R&R Recycling, Inc. | 11 | 0 to 30 days | \$120,000 |
| Highland | Save Our Children | Local government unable to support the foster care program at Highland County Children Services. Foster parents have not been fully paid since June 01. Agency is currently approx \$700,000 behind in payments, and only receiving \$160,000 in total support from the state. It costs approx \$800,000 to support the children in care. The agency is also working at almost staff size to budget constraints. Stimulus money would be used to pay the foster parents, hire needed staff, and continue programs to support and protect children in Highland County. | Highland County Children Services | 0 | 0 to 30 days | \$500,000 |
| Highland | Renewable Energy / bid government contracts | Build 50, 7'1 building up grades. Safety, legal and promotional funding for operating. \$5000 in other purchases of new equipment. To top cap installation. Create six or potentially more manufacturing jobs on Ohio with renewable energy products including solar cell installation and wind powered generators. Using the http://ohdotnet.gov.gov web bidding on government contracts for machining and welded products to secure and promote manufacturing jobs. Our web site http://www.tecfabco.com | Tectfab Co. | 6 | 181 days or more | \$80,800 |
| Highland | New Skate Park | Demolition of existing tennis courts and fence. Installation of new concrete pad and fencing. Installation of manufactured skate park equipment. Build a new shelter house with vending machines. Install spectator seating. Funds for upkeep and maintenance. | Greenfield Skate Park | 20 | 181 days or more | \$70,000 |
| Highland | Lynchburg Wastewater Treatment Plant Improvements, | The Village of Lynchburg is in the second phase of improvements to the Village-owned wastewater treatment plant. This project will increase the capacity from 0.25 mgd to 0.50 mgd. Increasing the capacity will allow the Village to service approximately 200 homes in neighboring Highland and Clinton Counties in the future, as well as open up the US 50 corridor to light industrial and commercial opportunities. Lynchburg is under Ohio EPA Director's Findings and Order concerning the amount of flow received at the current facility and the inability of the existing plant to meet requirements of the NPDES permit. Rates are currently about \$60/month and the added debt service that is required to complete this project will make Lynchburg one of the highest sewer rates in the state without funding. Following the project, the wastewater treatment plant will be capable of meeting low and consistent effluent criteria. | Burgess & Niple | 10 | 91 to 180 days | \$3,200,000 |
| Highland | New Curbs and sidewalks | Replace over 1000 feet of damaged curb on streets. | Greenfield Exempted Village Schools | 10 | 91 to 180 days | \$250,000 |
| Highland | Dist 9, PID 78175, HIG US 62 10.37 SR 321 0.00 | Replace approx. 400 feet of sidewalk. Overlay the existing roadway/waterstone asphalt in order to preserve and maintain the Highway. | Ohio Department of Transportation | 48.1 | 31 to 90 days | \$1,675,479 |
| Highland | Hobart Smith Drive | Hobart Smith Dr. will address the problem of traffic congestion on the North side (Business district) of Hillsboro. The proposed road will serve as direct access to the Highland County Sheriff, Southern State Community College, and several industries. The road will open up additional acreage for future economic development between US 62 & SR 73. Hobart Dr. begins at US 62 and dead ends at the city corporation limits. The existing length for Hobart Dr. is 2.088' and the new section will extend to SR 73. The new section length is 4.326' for a total length from SR 73 to US 62 being approx. 7.012'. The conceptual approach is to improve the existing Hobart Dr. from 21' lanes, with four foot berms to 30.17' lanes, with 4' berms with the center lane being a dedicated turn lane. Improve the intersections at US 62 & SR 73 with traffic lights and dedicated turn lanes. Improve the intersection on CR 14A Cayceover Rd. by correcting profiles and allowing adequate side distance and turn lanes. The expected results from the construction of this project will allow for more efficient access to and from the previous mentioned businesses and provide additional commercial development. | Highland County Engineer | 450 | 91 to 180 days | \$5,000,000 |
| Highland | Greenfield Police and Fire Assistance | Retain existing level of police officers, emergency dispatchers and firefighters. We have had to freeze two vacant police positions, layoff two police officers, two full time and one part-time dispatcher and 4 full-time fire fighters. | City of Greenfield | 9 | 0 to 30 days | \$750,000 |
| Highland | Dodson Township Building | The regular strength of our divisions are: 9 police officers, 2 full-time dispatchers, and 8 full-time firefighters. We currently do not have a Township Meeting Hall or a building to store our truck and equipment. By having a meeting hall and storage building we would be able to better serve our community. This would allow us to take better care of our equipment which would make it last longer. We would also be able to offer a building for our community to use. | Dodson Township | 10 | 31 to 90 days | \$75,000 |
| Highland | Crampton Road Project | Widen and resurface Crampton Road. This road is 1.51 mi. long. This road is one of our heaviest traveled roads and it is very narrow. There are 4/lane on this road and being narrow makes this road a hazard to travel. By widening and resurfacing this road it would make it much safer to travel. | Dodson Township | 25 | 31 to 90 days | \$175,000 |
| Highland | Gilbler Road Project | Widen and resurface Gilbler Rd. This is a very narrow township road that is .77 mi. long. There are approx 20 trees very close to this road. By widening, resurfacing and removing the trees would make this road safer to travel. | Dodson Township | 25 | 31 to 90 days | \$100,000 |
| Highland | Opera House restoration | Renovation of the Bell's Opera House in Hillsboro, Ohio. This landmark is on the National Registry and is a good condition for an un-renovated Opera House. This Project would be the cornerstone of current revitalization efforts in an area that's been devastated by the DNH, layoffs and economy in general. The expected outcome - a working, revitalized theatre space sorely needed by local high schools and community groups - would provide an estimated 30 jobs after completion. In addition, the plant is originally overhauled. The project to upgrade and expand this treatment facility will allow for expansion and growth of local manufacturers and new enterprises. It is doubtful that the Ohio EPA would approve any PFI submitted for substantial increase in wastewater usage since the current limits are already being exceeded. The proposed project which is the expansion and WWTP is located in the City of Hillsboro. | Opera House Enterprises, LLC | 30 | 31 to 90 days | \$5,000,000 |
| Highland | Hillsboro WWTP Expansion & By pass elimination, in | Hillsboro is a rural, Appalachia community located in southern Ohio with approximately 7200 residents. The median income is \$25,998, per capita income is \$15,430 with 51% of the community classified as low to moderate income. The unemployment rate released for December 2008, listed Highland County as having an unemployment rate of 5.1%. Manufactures supply approximately 1500 jobs and are contributing 28% of the current wastewater treated. With the anticipated growth 600 new jobs should be created. Our residents can not afford the increase needed to finance this project with our grants. | City of Hillsboro | 600 | 0 to 30 days | \$18,900,000 |
| Highland | Obstruction Removal | Remove Personal, trees and Powerline appraisals. | Highland County Airport | 10 | 31 to 90 days | \$85,000 |
| Highland | C.R. 11 & Various Paving | This project will consist of paving 12.3 miles of the Federal Aid Routes within Highland County. This project includes placing 1 3/4" bituminous course of 448 asphaltic concrete followed by 1 1/4" surface course of 448 surface course of asphaltic concrete. The roads that will be paved are C.R. 11 Shaversville Rd., C.R. 20 Taylorville Rd. (part), C.R. 27 North Shore Rd. (part), and C.R. 33 Anderson Rd. (part). Individuals will be trained to become C-Print Transcriptionists, using online software program and tape to loan mentoring. | The Highland County Engineer's Office | 35 | 31 to 90 days | \$1,700,000 |
| Highland | C-Print Transcription | C-Print is a real-time speech-to-text transcription system used as a support service with deaf students in classrooms. Training will enable trainees to obtain skillsets that are needed within the five county region and will enable students within the same region to have access to this support. | Hopewell Center | 6 | 0 to 30 days | \$12,000 |
| Highland | Criminal Justice Re-entry | The existing program is of significant need for termination due to reductions in State funding. The program serves individuals returning to the community from secure confinement who have both a severe and persistent mental illness and a severe substance abuse disorder. These individuals are known to frequently re-offend and without treatment have a very high potential for re-offenses. Less than 1% of those served qualify for Medicaid benefits within the first 90 days of admission to the program and less than 50% are able to qualify after 18-24 months. The treatment model is an evidence-based practice - both for treatment of substance abuse and mental illness. The existing program has been in operation for 6 years, has very positive outcomes (reduced recidivism, reduced substance use, improved compliance with prescribed medication, increased employment, etc.) and has been both State (ODJHM Forensic Leadership Award) and National (SAMHSA, Science & Service Award) recognized. In addition to maintaining 7 jobs and employing 5 additional individuals, the program would enhance public safety while assisting criminals on a path towards being productive community members. | Lynn Goff Clinic | 12 | 31 to 90 days | \$250,000 |
| Highland | Greenfield Sanitary Sewer Cross Connection Elimina | Eliminate identified sanitary sewer and storm sewer connections in 2005 study performed by Wootton Engineering. | City of Greenfield | 15 | 91 to 180 days | \$250,000 |
| Highland | replacement of laid off Deputies | Out of 23-26 due to the economy and the closing of DNH, we have had to lay off 7 Deputies in the last week and may have to lay more off. Exact figures are unknown at this time. | Highland County Sheriff's Office | 7 | 0 to 30 days | \$0 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Highland | City of Hillsboro New Fire Facility | The proposed project is for the construction of a new fire facility in the city of Hillsboro. The fire department is currently operating out of a modular unit that has been placed on the street next to the bays. The building was closed in February of 2005 because of safety concerns. The city has received a one-year extension from the State of Ohio allowing the modular. The new Hillsboro Fire Station is a new 15,000 sq. ft. building which includes a 6-bay drive thru vehicle bay. The project consists of the necessary site work, including rough and finish grade, landscaping, excavation, site drainage, asphalt pavement, and concrete. Excavation for and placement of concrete walls, footers, and slab on grade. The building requires, mear roofing, flashing, and siding and masonry veneer on the front elevation. All painting, mechanical and electrical systems are included. The Hillsboro Fire and Rescue first-aid response area is 250 sq. miles with a resident population of 29,300. In addition to fire, the department is also a full time rescue provider. This project is to install 2.750 linear feet of new water main which will top the existing service main on Woodland Drive to the city water system. The service on Woodland is currently a dead end and can not supply the needed water volume or pressure for fire suppression. The project will include two (2) new fire hydrants. | City of Hillsboro | 0-3 | 31 to 90 days | \$2,100,000 |
| Highland | Water distribution improvements - woodland drive | | City of Hillsboro | 5 short term | 31 to 90 days | \$300,000 |
| Highland | Greenfield I & II Elimination | Replace/repair 300 sanitary sewer manhole lids and chimeys; seal sanitary sewer lines in residential neighborhoods. The City is currently under bidings and orders to reduce sanitary sewer main inflow and infiltration. This will increase the amount of I & I elimination in a manner which the City will be able to afford. | City of Greenfield | 15 | 31 to 90 days | \$450,000 |
| Highland | Oak Street Sanitary Sewer Main Replacement | Replace 3,000 feet of 12" underground and aerial sanitary sewer with 24" main and reconstruction portion of South Jefferson Street and 2nd Street. This project will eliminate sanitary sewer backup and basement flooding in the residential area of Greenfield. | City of Greenfield | 15 | 181 days or more | \$2,750,000 |
| Highland | Communication System | This project proposal is to address the communication system at the Highland County Sheriff's Office. Communications for Deputies, three Villages and one City are handled through our Office. The current system is VHF (Very High Frequency) it's outdated and will soon be obsolete. With the current system there are dead spots in communications and lack interoperability. These are major safety issues. The communication system proposed to be installed is the MARCS (Multi-Agency Radio Communication System) it is State wide and State maintained. This system is used by all State agencies and several County agencies. This project will make interoperability possible. These funds we would be able to buy new radios for the Highland County Sheriff's Office (Villages of Lynchburg, Leesburg, Mowestown and the City of Greenfield). | Highland County Sheriff's Office | 0 | 31 to 90 days | \$400,000 |
| Highland | Highland County Sheriff's Office Officer Safety | These funds would allow all Deputies on road patrol and correction Officer to have access to a X-26 Taser at all times. These funds would allow us to purchase training cartridges and duty cartridges. This will enhance the safety of our Deputies. Violate situations can be better handled thus making the use of deadly force less likely. | Highland County Sheriff's Office | | 31 to 90 days | \$20,000 |
| Highland | Deputy Retention | Due to current budget cut on the County and the closing of OH, we have had to lay off 7 Deputy positions. These funds are needed to bring us back to full staff so we can provide the citizens the same level of service. We also expect an increased workload due to the budget cuts in the Department in the County. | Highland County Sheriff's Office | 7 | 0 to 30 days | \$350,000 |
| Highland | N. East St. Roadway and Drainage Improvements | The N. East St. Roadway & Drainage Improvements project is for the base repair, repaving and installation of storm sewers, manholes, catch basins, drainage, N. East St. is an urban collector and is used to divert traffic from US 62 N in the city of Hillsboro. This roadway is both residential and industrial/commercial. The industrial/commercial areas are in between the residential homes and are ready for development. It can be marketed for residential. Storm sewer control and roadway improvements would be needed. The project would involve 5,000 lineal feet of roadway base repairs and paving; curb and gutters, 22 catch basins, 10 manholes, 10 storm sewers. All work would be done in accordance with the Ohio Department of Transportation roadway construction specifications. | City of Hillsboro | 5 | 91 to 180 days | \$700,000 |
| Highland | Communication Upgrade | This project proposal is to address the communication system at the Highland County Sheriff's Office. Communications for Deputies, three Villages and one City are handled through our Office. The current system is VHF (Very High Frequency) it's outdated and will soon be obsolete. With the current system there are dead spots in communications and lack interoperability. These are major safety issues. The communication system proposed to be installed is the MARCS (Multi-Agency Radio Communication System) it is State wide and State maintained. This system is used by all State agencies and several County agencies. This project will make interoperability possible. This project would purchase radios for the Village of Lynchburg, Leesburg, Mowestown the City of Greenfield and the Highland County Sheriff's Office. | Highland County Sheriff's Office | 0 | 0 to 30 days | \$400,000 |
| Highland | Alternative Energy Project For School Buildings | Conversion and addition of energy systems to school buildings in the District using alternative fuels and solar energy. | Greenfield Exempted Village School District | 15 | 91 to 180 days | \$1,000,000 |
| Highland | AUTO DEALERSHIP | CURRENTLY, WE ARE SCHEDULED TO CLOSE ON SAT FEB. 28, 2009, BECAUSE DOWN TREND OF VEHICLE SALES. THE STIMULUS MONEY WOULD RETAIN CURRENT EMPLOYEES AND CREATE NEW JOB. IF DO NOT RECEIVE A FINANCING PACKAGE IT WOULD FORCE THE DEALERSHIP TO CLOSE. THIS WEEK, THE COUNTY IS ALREADY AT A 2 % UNEMPLOYMENT RATE. I NEED HELP TO KEEP CURRENT EMPLOYEES WORKING. THIS MONEY WOULD ENSURE THE HILLSBORO FORD COULD WITH STAND THE DOWN TURN. THIS BUSINESS IS THE LARGEST BLACK OWN BUSINESS IN THE COUNTY. PLEASE CALL TODAY. I NEED HELP !! SO MANY TIMES HAVE HELP PEOPLE IN TROUBLE. PLEASE CHECK MY BACKGROUND AND YOU WILL SEE THAT I AM WELL RESPECTED. PLEASE CALL TODAY | HILLSBORO FORD MERCURY SALES INC | 15 | 0 to 30 days | \$5,000,000 |
| Highland | Energy saving passive solar house with sustainable | This house is designed to be both heated and cooled with the sun's energy by the primary means of a large sunspace built upon a deep thermal pit. It utilizes a unique venting and ducting system to disperse heat cool air in the summer and hot air in the winter throughout the entire house. Water will be heated here also. Other energy-saving features include extra thick walls, super insulation, air-tight construction, abundant thermal masses, underground rooms, thermo-siphons, and rainwater collection for irrigation. Secondary heating system uses wood burning stoves. Final back-up heat will be provided by a high SEER heat pump or geothermal. Additional energy will be generated by a wind turbine. Appliances, fans etc. will be energy star rated and LED or fluorescent lighting will be used. Other products will be eco-friendly, sustainable, recycled and/or reusable. With almost no need for either a furnace or air conditioner, direct energy savings should be a minimum of 80% that of a standard normal house. With favorable winds, electricity will actually be fed back into the electric grid by the turbine. The use of recycled materials will ease the load on us. | Heritage Hill farms | 15 | 0 to 30 days | \$200,000 |
| Highland | Two Lakes Trail | The Two Lakes Trail project is a shared-use trail and rural road route to connect the City of Greenfield with Paint Creek and Rocky Fork State Parks along with connections to the Seven Caves region. The route would develop expanded paved trail and improve bike lanes on low volume roads to accommodate non-motorized users safely. The route would start on the Greenfield Recreation Trail and then pickup the Two Lakes Trail on the OHW property paralleling Paint Creek. It would extend to the Park gates guard station heading onto Rocky Fork State Park, where it would end. The route would encompass 19 miles and would enable non-motorized travel and tourism in Highland County. | Highland County Trails | 50 | 181 days or more | \$3,348,910 |
| Highland | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Highland | New Hillsboro Main Library Building Project | The capital earned from the initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. The project is the construction of a 16,150 square foot public library building (two floors) located in Hillsboro, Ohio. This facility will house the main Hillsboro library or "hub" of the Highland County District Library. It will provide library materials, information services, public computer and internet access, continuing education opportunities, and children's library programs to the city of Hillsboro and surrounding areas in Highland County. Hillsboro is being greatly affected by layoffs, in particular DHL, pulling out of Wilmington, 22 miles to the north. Expected outcomes of this project: provide a handicapped-accessible building with sufficient collection and work areas, parking, and meeting space for public programs, community use and continuing education classes. The building will incorporate some "green" technology for operational efficiency. The land has been purchased and cleared. The planning and building design is being completed. | Highland County District Library | 30 | 31 to 90 days | \$50,000 |
| Highland | Business renovation/expansion | Due to economy and recent weather, we need to replace some greenhouses that were damaged and or destroyed, new plastic and inflators for 2 large greenhouses and concrete floors poured for 3 greenhouses (1 large house and 2 smaller ones). We are a small family owned and operated business that has been fairly successful for the 7 years we have been in business, however, due to our economic crisis, business has went down, we are in dire need of some renovations in the least which will help assist some other contractor's business also | Berrysville Garden Center | 5 | 0 to 30 days | \$20,000 |
| Highland | Building a Home | After purchasing our property approximately 3 years ago, our dream is to build our new home. With the poor economy and not enough money to do so, we have not been able to begin this project. The project will employ several people in the general contracting business, and will be done up with local workers. Some workers include basements/concrete workers, general contractor, electrician, plumber, dry waller, approximately 18-20 jobs will be created during this project. Also, all the materials for this project will be purchased locally. The money requested is enough money to build the house we have picked out for the size of our family. We currently live in a small apartment. | Fraley House | 18 | 31 to 90 days | \$150,000 |
| Highland | To purchase new semi trucks | Fraley Trucking has been in business for over 5 years. Our trucks are getting high in mileage and maintenance is starting to become expensive. We need to replace the 2 trucks with new trucks to continue to be a profitable business. This would help us a great deal to stay in business. | Fraley Trucking LLC | 3 | 0 to 30 days | \$240,000 |
| Highland | Buying houses to rehab to rental homes | 3 to 4 houses in need of repair, to rehab to become efficient rental homes for the lower income. This would create jobs for 2-3 people to rehab the homes, and thereafter someone to manage the homes as well as a bookkeeper. Also, work for someone for the repair jobs as needed in the future. | Fraley Rentals | 4 | 0 to 30 days | \$250,000 |
| Highland | Small town and village renewable energy | Looking to design a renewable energy farm for small cities, this will allow them to take advantage of the net metering program. This project will generate income for small cities and villages that have revenue from the DNL. closure. The project would consist of use of vacant land to generate revenue and income, while helping the environment. | Butler Service Company | 10 | 31 to 90 days | \$100,000,000 |
| Highland | Well Field Expansion | Installation of Rainey Collector Well west of Bainbridge, new 20" raw water line from this well field to the water treatment plant and a generator to run both the water treatment plant and the well field. This will allow the Highland County Water Company to continue to serve the existing and future residents and businesses of Highland, Adams, Citron and Brown Counties. The existing facilities are at capacity and the economically depressed area of the state needs all the advantage that can be given through the ready and affordable access to utilities. | Highland County Water Company | 50 | 91 to 180 days | \$5,000,000 |
| Highland | Southeast Improvements / Fair Ridge Tank | Existing potable water distribution system in the southeast corner of Highland County has had several 15" water service lines. Existing lines do not adequately carry the needed water to the residents and businesses of these areas. 84,500 linear feet of 8" water line and 300,000 gallon secondary storage tank will allow the service to be upgraded to it's intended level and serve future growth businesses and residents in this impoverished part of the state. | Highland County Water Company | 10 | 91 to 180 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Highland | Food Production and Marketing Training for Disadv | Funding for this project would provide plant materials, supplies, equipment and trainers to develop and propagate a permanent site for a 2 acre farm. Students would receive paid training in basic agricultural techniques, marketing and customer service as well as GED, Career Compact, diverse education and training. The youth participants would be referred through the local One-Stop and the Ohio JOBS program. Youth participants would operate the fruit production and marketing facility that would provide strawberries, blueberries and raspberries for sale at the local farmers market under the supervision of Turning Point's professional staff. Project partners include the OSU Extension Master Gardeners, Ohio JOBS, the Highland Co One-Stop and the Chamber of Commerce. Upon completion of the 400-hour training program our job coaches would assist graduates in resume preparation, interviewing and job searching in related fields. | Turning Point Applied Learning Center, Inc | 5 | 0 to 30 days | 36,540 |
| Highland | Law Enforcement Services | The Greenfield Police Department will use these funds to purchase three MARCS radios. This will enable reliable interdepartmental communications. | Greenfield Police Department | 1 | 31 to 90 days | 10,676.00 |
| Hocking | Dist 10, PID 85752, HOC Expansion modified van | Purchase 1 replacement modified minivan for the City of Logan; Hocking, Athens, Perry CAC | Ohio Department of Transportation | 2 | 31 to 90 days | \$34,100 |
| Hocking | Dist 10, PID 85751, HOC Dispatch/scheduling softwa | Dispatch/scheduling software for the City of Logan; Hocking, Athens, Perry CAC | Ohio Department of Transportation | 1 | 31 to 90 days | \$20,900 |
| Hocking | Dist 10, PID 85754, HOC Security system | Purchase security system for the City of Logan; Hocking, Athens, Perry CAC | Ohio Department of Transportation | 1 | 31 to 90 days | \$3,000 |
| Hocking | Co. Rd. 76 Guard Rail--HOC-CR8* | Construction of 9880 feet of type 5 guard rail on Co. Rd. 76, Bear Run Road | Hocking County | 12 | 31 to 90 days | \$216,565 |
| Hocking | Old Straitsville Water Association Phase IV Water/I | The Phase IV Waterline Extension Project would consist of approximately 11 miles of 8", 6", 4" and 3" waterline, valves, hydrants and service connections to supply potable water to more than 150 homes in Falls and Good Hope Townships within Hocking County. More specifically, PWSA would purchase potable water from the City of Logan along Chatham Drive and continue service into Enterprise and Roadside which includes a school, a church and a business development. Currently the area utilizes private wells and cisterns for a drinking water source. | Old Straitsville Water Association- ME Companies | 10 | 91 to 180 days | \$1,045,000 |
| Hocking | CR 3 Guard Rail--HOC-CR3 | 8225 ft. of type 5 guard rail on Co. Rd. 3 in the Lake Logan State Park | Hocking County | 12 | 31 to 90 days | \$140,800 |
| Hocking | Logan Senior Housing | The infusion of additional HOME dollars into this project will make it a prevailing wage project which will create new jobs in all the building trades. It will also produce a manager position and a maintenance position. These have been no new senior housing built in Logan in over 25 years. These units will all be suitable by persons with mobility impairment, energy star compliant, and they will have one of the best locations in southeast Ohio. There will be 40 new units of senior housing in this development. Each unit will have 2 bedrooms, 2 baths, and a 5 car garage. They come with a stove and refrigerator, disposal and ceiling fan. They also have a pull chain emergency system in each unit. This would provide a facility to address the waiting list for services for the Hocking County Board of MRDD's Adult Workgroup. Currently this waiting list provides services to 61 individuals with 43 waiting for services. | Frontier Community Services | 75 | 31 to 90 days | \$3,280,702 |
| Hocking | Hocking MRDD Green School | Provide an accessible home renovations to homes owned by the Hocking County Board of MRDD. | Hocking County Board of MRDD | 65 | 31 to 90 days | \$750,000 |
| Hocking | Hocking MRDD Housing Program | Hocking County Board of MRDD | 8 | 91 to 180 days | \$75,000 | |
| Hocking | Front Street Bridge HOC-Front Street-0.10 | Bridge replacement: 44' wide, three span 36'x45'x36' to replace an existing, deteriorated bridge of similar size. No new flow barrier. | Hocking County Board of MRDD | 10 | 91 to 180 days | \$928,000 |
| Hocking | CR82 Resurfacing HOC-CR82 | Resurfacing of Hocking County Road 82, Hwy A Hills Road, a Federal Aid Secondary Highway, with asphalt concrete to a total of 4.07 miles, width 21' | Hocking County Board of MRDD | 12 | 31 to 90 days | \$317,328 |
| Hocking | Brush Fork / Long Hollow Subsidence Closures | Closure of approximately 10 mine subsidences, installation of a limestone leach bed and 1,000 linear feet of concrete barrier material for stream adjacent restoration. | Rural Action (Monday Creek Restoration Project) | 20 | 91 to 180 days | \$325,000 |
| Hocking | Snake Fork Subsidence Closures | Approximately 20 mine subsidence closures to restore clean water to Snow Fork and result in improved stream habitat and recreational opportunities. | Rural Action (Monday Creek Restoration Project) | 20 | 181 days or more | \$340,000 |
| Hocking | Water System Renovation | The project will replace 22,500 L.F. of 3.6, 4.8 & 8 inch water line. Currently the village experiences 50% loss of water due to falling water lines. Installation of a steel pipe leach bed to soft churning of water and plastic water service lines of Snake hollow and Murraysville. This will improve water quality resulting in habitat restoration and recreational opportunities. | Village of Murray City | 5 | 31 to 90 days | \$450,000 |
| Hocking | Snake Hollow Reclamation Project | NEWLY ANNEVEED AREA CONTAINING 176 ACRES AND THIRTY SEPERATE PROPERTY OWNERS THAT CURRENTLY HAVE CITY WATER. THIS PROJECT WILL SERVE THE AREA WITH SANITARY SEWER SERVICE. THERE IS CURRENTLY 110 EMPLOYEES AT THE GENERAL ELECTRIC PLANT AND A NEW INDUSTRY, S&G MANUFACTURING, THAT HAS PROMISED 100 NEW JOBS WITH THE SEWER EXTENSION. | Rural Action (Monday Creek Restoration Project) | 15 | 91 to 180 days | \$225,000 |
| Hocking | ST. RT. 93 N SEWER LINE EXTENSION | This project will replace 22,500 L.F. of 3.6, 4.8 & 8 inch water line. Currently the Village experiences 50% loss of water due to falling lines. | CITY OF LOGAN | 100 | 31 to 90 days | \$124,875 |
| Hocking | Water System Renovation-revision to a previously s | The Village has consistently had a monthly water loss ranging from 45% to 60%. The Village finances will not support this loss for very much longer. The Village has identified and fixed many leaks but the depreciation of the water system due to age continually allows new leaks to occur. On many occasions the leaks have been substantial enough to cause a drastic reduction of pressure throughout the system. The Water System renovations include approximately 1,100 feet of 8" PVC C900, 1,000 feet of 6" PVC C900, 6,800 feet of 4" PVC C900, 1,500 feet of 3" PVC SDR 21 and 500 feet of 4" HDPE DR 8 waterlines, valves, 210 service reconstructions and miscellaneous appurtenances. | Village of Murray City | 5 | 31 to 90 days | \$900,000 |
| Hocking | Murray City Water System Renovations | The Village has identified and fixed many leaks but the depreciation of the water system due to age continually allows new leaks to occur. On many occasions the leaks have been substantial enough to cause a drastic reduction of pressure throughout the system. The Water System renovations include approximately 1,100 feet of 8" PVC C900, 1,000 feet of 6" PVC C900, 6,800 feet of 4" PVC C900, 1,500 feet of 3" PVC SDR 21 and 500 feet of 4" HDPE DR 8 waterlines, valves, 210 service reconstructions and miscellaneous appurtenances. | Village of Murray City- ME Companies | 10 | 31 to 90 days | \$1,245,000 |

| Hocking | Implementation of the Raccoon Creek Watershed Rest | The Vintonville School district partnership with the Raccoon Creek (RC) Partnership and CDNR Div. of Mineral Reclamation has proposed to construct 7 abandoned mine reclamation projects as described in the State of Ohio endorsed Watershed Action Plan for RC headwaters (137 sq. mi.) implementation of these projects will serve the approx. 10,029 residents living in the rural Appalachian headwaters of the RC (Census 2005). High percentages of residents live below poverty levels in comparison to state levels (ie 13.5% of Hocking Co. residents live below poverty level according to Census data). Chemical and biological data will be monitored, acid (exp. 3000 hrs/day) load reductions and stream miles restored (exp. 10 miles) will be analyzed and reported in CDNR CDNR's annual report for acid mine drainage (restorationdata.com). One of the most compelling reasons for erosion, restoration is the positive effect it can have on local economies. Direct effects include increased tourism, recreation, and property values. Indirectly, leaders spend 3.2 million local economic (OSU Summer 2007). Nationally, homeowners are willing to pay 28% more to live near clean waters (EPA Friemont 1999). New building for day care facility with MRDD remains in the community. This will create 5 to 10 full time jobs within the first year in an area that needs jobs. metal building, driveway, septic system, parking lot, concrete work for floor. | Ohio University Voinovich School | 45 | 0 to 30 days | \$2,688,875 |
| Hocking | day habilitation | New building for day care facility with MRDD remains in the community. This will create 5 to 10 full time jobs within the first year in an area that needs jobs. metal building, driveway, septic system, parking lot, concrete work for floor. | outreach mrrdd services | 8 | 0 to 30 days | \$125,000 |
| Hocking | Salt Storage Facility | Construction of a road salt storage facility with the minimum capacity of storing 3000 ton of salt and 3000 ton of salt / grit mixture. Hocking County currently has only inside salt storage for approximately 400 ton and no inside storage for the salt / grit mixture. The recent salt shortage demands that road agencies have sufficient storage capacity for the annual need so that roads can be treated when needed during the winter season. | Hocking County | 12 | 31 to 90 days | \$250,000 |
| Hocking | Project Green | Replace 37 windows Refract/lock in 2 800 metal bay doors Conceal plumbing to appropriate drain from facility to catch area Install 200' of new gas line Replace 120 lights with Energy Efficient Lighting Purchase 4 energy efficient kitchen appliances Replace 22 hollow metal doors with reinforced wood doors to improve heating/cooling system convert boiler heat with furnace heat for bay area Automatic bathroom exhaust fans during non-occupied hours Install 1 handicapped entrance/emergency exit ramp, 2 handicapped restrooms, replace 2 doors with ADA approved push bar door, install restroom ADA approved fire alarm/alert system. | IFACE Inc Inspiring Family Achievement & Community | 12 | 0 to 30 days | \$125,000 |
| Hocking | Logan, Ohio Wastewater Treatment Plant Improvement | Construction of a new 1.8 MGD Oxidation Ditch Wastewater Treatment Plant and appurtenances. | URS Corporation | 12 | 31 to 90 days | \$5,100,000 |
| Hocking | HAPCAA LG Preschool Enrichment | This project will provide 6 weeks of preschool enrichment for 40 low income children ages three to five. Children will be transported to and from the center each day and while at the site be provided with a developmentally appropriate preschool enrichment program that focuses on literacy and math skills. Each child will also receive a breakfast and lunch while at the center as well as participate in other enrichment activities. | Hocking Athens Perry CAA | 4 | 0 to 30 days | \$36,000 |
| Hocking | HAPCAA LV Preschool Enrichment | Our research has shown that children provided with summer enrichment activities enter the public school system with a better retention of skills than those of their peers who had no summer enrichment. Many of these same children frequently come from homes that experience severe food shortages during the summer months. Food provided by this program will lessen the financial burden on parent faced with providing meals for the child in the summer that may have been previously provided by a preschool program. | Hocking Athens Perry CAA | 4 | 0 to 30 days | \$18,000 |
| Hocking | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant monies. Building a Wireless infrastructure to equip rural residents with the Service to be able to access the Internet at Broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV. TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all these services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial jobs that will create thousands of jobs statewide. Phase 1 will be completed in 4 months. Phase 2 will be completed in 6 months. Phase 3 will be completed in 9 months. Phase 4 will be completed in 12 months. Phase 5 will be completed in 15 months. Phase 6 will be completed in 18 months. Phase 7 will be completed in 21 months. Phase 8 will be completed in 24 months. Phase 9 will be completed in 27 months. Phase 10 will be completed in 30 months. Phase 11 will be completed in 33 months. Phase 12 will be completed in 36 months. Phase 13 will be completed in 39 months. Phase 14 will be completed in 42 months. Phase 15 will be completed in 45 months. Phase 16 will be completed in 48 months. Phase 17 will be completed in 51 months. Phase 18 will be completed in 54 months. Phase 19 will be completed in 57 months. Phase 20 will be completed in 60 months. Phase 21 will be completed in 63 months. Phase 22 will be completed in 66 months. Phase 23 will be completed in 69 months. Phase 24 will be completed in 72 months. Phase 25 will be completed in 75 months. Phase 26 will be completed in 78 months. Phase 27 will be completed in 81 months. Phase 28 will be completed in 84 months. Phase 29 will be completed in 87 months. Phase 30 will be completed in 90 months. Phase 31 will be completed in 93 months. Phase 32 will be completed in 96 months. Phase 33 will be completed in 99 months. Phase 34 will be completed in 102 months. Phase 35 will be completed in 105 months. Phase 36 will be completed in 108 months. Phase 37 will be completed in 111 months. Phase 38 will be completed in 114 months. Phase 39 will be completed in 117 months. Phase 40 will be completed in 120 months. Phase 41 will be completed in 123 months. Phase 42 will be completed in 126 months. Phase 43 will be completed in 129 months. Phase 44 will be completed in 132 months. Phase 45 will be completed in 135 months. Phase 46 will be completed in 138 months. Phase 47 will be completed in 141 months. Phase 48 will be completed in 144 months. Phase 49 will be completed in 147 months. Phase 50 will be completed in 150 months. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Hocking | Wholesaling healthcare, hospitality, institutional | Our research has shown that children provided with summer enrichment activities enter the public school system with a better retention of skills than those of their peers who had no summer enrichment. Many of these same children frequently come from homes that experience severe food shortages during the summer months. Food provided by this program will lessen the financial burden on parent faced with providing meals for the child in the summer that may have been previously provided by a preschool program. 4 staff that would other wise be unemployed during the summer would be hired for this program. This would include two teachers, a bus driver and a bus monitor. This project will provide 6 weeks of preschool enrichment for 20 low income children ages three to five. Children will be transported to and from the center each day and while at the site be provided with a developmentally appropriate preschool enrichment program that focuses on literacy and math skills. Each child will also receive a breakfast and lunch while at the center as well as participate in other enrichment activities. | Campbell-Maxwell & Company | 10 | 0 to 30 days | \$250,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Hocking | PAVEMENT MARKING | Thermo Plastic High Intensity Pavement Marking for 204.03 miles of our County Road System. This would include center and edge line markings. Hocking County is one of Ohio's #1 tourist areas with thousands of motorists each year traveling along our county road system, most with adverse views and terrain. Thermo Plastic marking is highly visible and long lasting and very beneficial in helping those traveling on our roadways to negotiate each and every turn and curve. This application on our local highways would greatly improve the safety of the traveling public, both local residents and tourist. | HOCKING COUNTY ENGINEER | 8 | 31 to 90 days | \$816,120 |
| Hocking | SALT BRINE | Salt Brine Production/Dispensing System. This is a preventative system used for preventing county roads prior to inclement weather. This would be beneficial for everyone traveling the roadways within Hocking County during inclement weather. Hocking County Engineer does not have a preventative system in place at this time. | HOCKING COUNTY ENGINEER | 2 | 31 to 90 days | \$54,500 |
| Hocking | Habitat for Humanity of Hocking County - 3rd home | Provide home for 3rd Habitat for Humanity family in Hocking County. Family selected will earn less than 60% median income, will contribute 300 hours sweat equity and will have decent credit. Typically, our families move from homes that are either unsafe, too few bedrooms for number in family, or cost more than their income can afford. | Habitat for Humanity of Hocking County | 0 | 91 to 180 days | \$45,000 |
| Hocking | Hocking Hills HOC-664 Realignment | This project addresses the need to realign SR 664 in the Old Man's Cave area of Hocking Hills State Park. This should reduce project will improve public safety, protect the sensitive environment of the cave area and create or retain jobs in Appalachia Ohio. The Friends of Hocking Hills State Park donated \$25,000, which the ODNR matched for a total of \$50,000. To conduct the now complete environmental and engineering studies for this much needed project. | ODNR, Div of Parks and Recreation | 154 | 31 to 90 days | \$5,200,000 |
| Hocking | Hocking Hills HOC-664 re-alignment | The non-profit group, Friends of the Hocking Hills State Park, raised \$125,000 in 2006 to instigate an engineering study for this much-needed project. Funds for this project need to be distributed to ODNR, District 10 who will be administering and implementing the project. | Friends of the Hocking Hills State Park | 154 | 31 to 90 days | \$5,200,000 |
| Hocking | HOC Capitalized Maintenance; PID 86090 | 2009 Capitalized Maintenance. This is a Rural Transit Project whose funding flows through ODOT. | Ohio Department of Transportation | 1 | 0 to 30 days | \$4,900 |
| Hocking | Advanced Renewable Biofuels | 2009 Capitalized Maintenance. This is a Rural Transit Project whose funding flows through ODOT. | Chieftain Biofuels LLC | 12 | 31 to 90 days | \$174,575 |
| Hocking | My son's education | To help provide my son's education. As a single mom, I work full time and still find it hard to pay for his school. | St John's school | 6 | 0 to 30 days | \$100,000 |
| Hocking | Hocking Hills State Park Regional Water System Con | Funds will be used in a partnership with the Le-Av Water District to construct additional potable water lines to serve the park and other non-commercial customers along the extended lines. This will allow ODNR to maintain and/or expand on-site water treatment facilities and reduce operating costs, as well as expanding water service in the area. Design of the new lines by the Water District is currently underway, and they will commence construction. This approach has been used at other State Park facilities, with considerable success. | Ohio Department of Natural Resources | 40 | 91 to 180 days | \$2,500,000 |
| Hocking | East Branch Raccoon Creek Acid Mine Drainage Project | Project will construct three (3) passive water treatment systems that will boost alkalinity in the East Branch of Raccoon Creek to improve water quality and help offset the impact of acid mine drainage from abandoned coal mines in the area. The project will be designed and constructed by ODNR, Division of Mineral Resources Management staff in a partnership with Ohio University and the Raccoon Creek Partnership. The Raccoon Creek Partnership is a non-profit group who has permission to mine in the same watershed. Design and construction of the three (3) systems is currently underway and should be completed quickly if construction funds were made available. | Ohio Department of Natural Resources | 15 | 91 to 180 days | \$500,000 |
| Hocking | Big Brothers Big Sisters of Central Ohio for Renov | Since 1942, Big Brothers Big Sisters of Central Ohio has served and supported Camp O'Ches, a year-round, residential therapeutic facility located in the Hocking Hills. Each year, Camp O'Ches serves more than 8,000 people, including more than 1,000 children from low-income families. We are conducting a \$2.1 million dollar renovation campaign to improve several facilities at the camp, including camp dorms, a new dining hall and new new shower houses. Construction will begin September 2009. We have raised \$1,575,000 to date, and are currently seeking additional funding. \$255,000, we are therefore requesting \$275,000 in Recovery Act funds. | Big Brothers Big Sisters of Central Ohio, Inc. | 205 | 91 to 180 days | \$275,000 |
| Hocking | East School Homeownership Redevelopment | Redevelop abandoned elementary school site into 8 individual residences to be sold to households at or below 120% of the AMR for Hocking County. Project requires a development subsidy and other soft second mortgages in order to be affordable to the targeted income range. Project removes a blighted structure and develops the site such as to revitalize the neighborhood. Project will generate approximately 25 construction related jobs. | Hocking Metropolitan Housing Authority | 25 | 181 days or more | \$406,500 |
| Hocking | Rural Broadband Infrastructure Development | Expand broadband infrastructure to extend High Speed data services and voice applications to unserved and underserved rural areas, in such a way that this infrastructure could potentially be shared with Emergency services. This is an updated version of a previous submission. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Hocking | Rural Broadband Infrastructure Development | Expand broadband infrastructure to extend High Speed data services and voice applications to unserved and underserved rural areas, in such a way that this infrastructure could potentially be shared with Emergency services. | PowerNet Global Communications | 100 | 31 to 90 days | \$1,350,000 |
| Hocking | Connecting Appalachia: Wireless Coverage of the R | Connecting Appalachia Wireless Coverage of the Rural Expanse will provide broadband coverage in the un-served areas across 34 counties. The network will feature primary towers linked via fiber to the Southern Ohio Health Network (SOHCN) backbone. The primary towers will deliver high speed point-to-point connections to nearby business locations and all secondary towers in the 17,000 square mile service area. 215 area secondary towers will blanket over 500 sq. mi. of rural expanse with fixed wireless broadband. An additional 115 tower towers will provide backhaul to reach areas where the signal has been eclipsed by terrain, providing nearly universal coverage. The large infrastructure build creates jobs immediately, stimulating the growth of Wireless Internet Service Providers. The resulting network provides faster connections than satellite service at much lower cost than building copper and fiber-optic cables to every home & business in sparsely populated areas. Broadband infrastructure is essential to economic development, education, health care & tourism in Appalachia Ohio. | Hocking County | 725 | 91 to 180 days | \$42,374,802 |
| Hocking | Connecting Appalachia: Southern Ohio Health Care N | The Southern Ohio Health Care Network (SOHCN) is a consortium of health care providers serving 2 million people across 34 rural counties. The FCC awarded \$10M to build fiber-optic ring connecting SOHCN members in 15 counties. We are requesting an additional \$21M for the other 19 counties from the FCC Rural Health Care Pilot Program. Stimulus funds would cover FCC-required match, network upgrades for financially distressed clinics/hospitals/clinics, and asset management. The SOHCN Fiber-Optic Backbone will improve health care in Appalachian Ohio and bring metropolitan-class broadband services to urban-metro sales to businesses and homes in SOHCN communities. Rural health care providers get reliable, high speed connectivity to the robust network and QoSnet at rates subsidized by up to 85%. Broadband reduces health care costs and improves treatment by allowing (a) real-time critical/care care consultations from urban medical centers to rural hospitals, (b) video and search, (c) at-home telemedicine for chronic conditions, (d) continued medical education via distance learning, and (e) regional collaboration, research & coordinated public health emergency response. This project will establish two (2) direct fiber connected satellite primary towers using existing MARCS sites with associated Network Access Point building structure and necessary power systems and network equipment. | Hocking County | 1,400 | 91 to 180 days | \$9,300,000 |
| Hocking | Hocking County Broadband Initiative - Fiber & Wire | These primary tower sites allow fiber-optic access to Internal Service Providers which is critical to high-speed, broadband of network neutral broadband traffic. The Hocking County network has potential to interconnect with the Southern Ohio Healthcare Network and it's future expansion. Further the project equips four (4) secondary tower sites (three MARCS & one new) and equips thirty-five (35) third level tower sites along the Hocking Hills. These towers are at proposed locations as recommended by the Hocking County Broadband Advisory Council and assisted by ConnectOhio. The Hocking County Wireless Assessment Plan implementation also includes the network access points (NAPs) to take the broadband network access to the residential locations. In keeping with the goals of Congressman Zack Space, this project also enables world class broadband infrastructure to the Hocking County Industrial Park. | Hocking County | 250 | 0 to 30 days | \$2,875,000 |
| Hocking | Big Brothers Big Sisters of Central Ohio Resident | Since 1942, Big Brothers Big Sisters of Central Ohio has served and supported Camp O'Ches, a year-round, American Camp Association accredited residential camping facility located in the Hocking Hills. Each year, Camp O'Ches serves as a safe haven to more than 1,000 youth who are considered at higher risk for violence, drug abuse, delinquency, teen pregnancy and school dropout. The camp focuses on children living in single-parent homes and children in need of positive feelings about themselves. In 2008, 96% of youth attending Camp O'Ches were classified as low income. Camp O'Ches provides children with opportunities to interact with their peers, learn new skills, build self-confidence and develop pro-social behaviors that will help reduce truancy and prevent school dropout, delinquency and criminal behavior. The budget for Camp O'Ches for 2009 is \$322,766. With anticipated outlays to local TANF funding, HHV funding, and foundations, corporations and individuals, we need to raise \$425,000 to maintain our current level of programming at camp, otherwise, fewer children will be able to attend camp. We are therefore requesting \$425,000 in Recovery Act funds. | Big Brothers Big Sisters of Central Ohio, Inc. | 18 | 31 to 90 days | \$425,000 |
| Hocking | HAP Meals-On-Wheels | The Regional Food Center operates a multi-county Meals-on-Wheels program that utilizes seven "hot shot" trucks to deliver hot meals to 250 homebound senior, as well as hot meals to Head Start programs in Hocking, Athens, Perry counties. During the course of a month our driver delivers to total some 1200 meals a month. With the high cost of gasoline this has created a tremendous hardship on our program financially. This request for funds is to convert our seven truck fleet of gasoline powered "hot shot" trucks to propane fuel. This is a cleaner fuel thus reducing the toxic fuel emissions, plus it is a fuel more economical for all the driving we do in the rural counties of southeastern Ohio. The savings will not only enable us to continue our service, but actually expand our service to more of the seniors living in the rolling areas of our counties. | Hocking-Athens-Perry Community Action | 7 | 0 to 30 days | \$125,000 |
| Hocking | Regional Food Center Facility | The Regional Food Center was constructed in 1996. It is a two story facility that provides several different social services to low income families, including a Foodbank serving 10 counties in SE Ohio, a Central Kitchen that prepares hot meals for senior meal programs, Head Start Programs, Summer Feeding Programs, Banks, and houses the Local Senior Center. This request is to make the facility handicap accessible by installing and elevator for access to the second floor. The building is designed for an elevator and has a constructed shaft for it. However, the elevator was never purchased or installed. Getting the request will make our facility totally handicap accessible to the disabled, making room and easily access other services available on the second floor. Right now it is a barrier for our clients because they are forced to climb the stairs. | Hocking-Athens-Perry Community Action | 10 | 31 to 90 days | \$85,000 |
| Hocking | Food Distribution Disaster Relief | The Regional Food Center operates both a Foodbank that provides food to food pantries in 10 counties in SE Ohio and a Central Kitchen that prepares meals for Senior Meal Programs, Head Start Centers, Summer Feeding Programs. This request is for the installation of a generator that will keep the facility operational during power outages and when other disasters hit our area. This facility with a generator could serve as a disaster relief center that could not only provide relief and meals for families in need, but also could coordinate with other local agencies to provide meals for utility workers throughout our region who are restoring power to many of the households who cannot prepare meals for themselves. | Hocking-Athens-Perry Community Action | 8 | 0 to 30 days | \$250,000 |
| Hocking | Call Center Sales Support | Sales call center training and staffing to support a cost reducing conference calling service for small Ohio businesses. Conference calling at reduced rates for Ohio small businesses reduces travel expenses and enables Ohio businesses to help each other. Equipment for community after school musical development program. Variety of musical instruments, PA, microphones, and other related equipment. Conducting activities at the local community center rather than a FFA Ohio staff. | Intelligent Voice Solutions, LLC | 5 | 0 to 30 days | \$195,000 |
| Hocking | After School Community Musical Development Project | Sales call center training and staffing to support a cost reducing conference calling service for small Ohio businesses. Conference calling at reduced rates for Ohio small businesses reduces travel expenses and enables Ohio businesses to help each other. Equipment for community after school musical development program. Variety of musical instruments, PA, microphones, and other related equipment. Conducting activities at the local community center rather than a FFA Ohio staff. | I-Face Ohio | 3 | 0 to 30 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|-----------------------------------|----------------|--------------------|---------------------------|
| Hocking | Hocking College Forest Carbon Offset Project | Calculating the future workforce on the positive impact forests can have on the atmosphere and the economy. Hocking College proposes to reforest approximately 2,300 acres of forestland to be carbon offset project-ready and to modify their curriculum to include the basics of carbon offset projects, forestry's role with regard to anticipated climate change regulation, and how to quantify carbon sequestered in a forest. The following tasks are outlined: 1. Evaluate Hocking College Staff & Faculty Curriculum (\$31,000); 2. Develop & Maintain Sustainable Forest Management Plan & Obtain Certification (\$67,000); 3. Conduct Baseline Carbon Assessment & Carbon Registry Membership/Verification (\$41,000). The Hocking College Managed Forest Offset Project will provide/recreate jobs for Ohio foresters, consultants, and Hocking College staff, educate the future workforce, enhance the carbon sequestration capabilities of the forest, offset emissions generated by various operations, and allow Hocking College to participate in carbon offset markets. | Hocking College Energy Institute | 10 | 31 to 90 days | \$139,000 |
| Hocking | GRANT MONEY TO FUND VARIOUS LAW ENFORCEMENT PROGRA | THE HOCKING COUNTY SHERIFF'S OFFICE IS CURRENTLY SEEKING GRANT MONEY TO FUND VARIOUS LAW ENFORCEMENT PROGRAMS AND ACTIVITIES THE SERVE THE PUBLIC OF HOCKING COUNTY. | HOCKING COUNTY SHERIFF'S OFFICE | 2 | 0 to 30 days | \$50,000.00 |
| Hocking | A very busy pizza shop already in operation | I am a General Manager of 2 very successful pizza shops in Logan and Lancaster Ohio. I have worked for this company called Pizza Crossing for over 25 years. My wife is the Bookkeeper for this business as well. We both have dreamed of owning Pizza Crossing and can think of no one that better to own it than us. The owner has been close to selling to several buyers but the buyers are unable to come up with the needed funds. My wife and I are worried that the shop could fall into the wrong hands and possibly fold in this economy. I have tried to buy it myself, through loans. Even though I have good credit and no outstanding debts I don't have enough assets to borrow the needed money to buy this business. It seems to own this business, I KNOW that I could maintain or even improve the employment and cashflow in my community. | Pizza Crossing (A pizza shop) | 65 | 0 to 30 days | \$1,000,000.00 |
| Holmes | Small business startup | Start new business, creating approx. 10 new jobs at startup. Land is privately owned with septic on site, additional improvements needed. Would like to find unemployed, but educated people to complete construction and other tasks, therefore helping with those unemployed. Certified and qualified workers are currently awaiting 200 positions. Plans of expanding to the low income families to assist with food, housing, and emergency utility services as well. Qualified person is identified for this position as well. | Whirlybird Electronics | 10 | 31 to 90 days | \$500,000 |
| Holmes | Radio Replacement | Replace mobile and portable to become narrow band compliant. Due to decreases in budget line items to be able to keep current staffing. | Millersburg Police Department | 0 | 31 to 90 days | \$21,000 |
| Holmes | Car Purchase | Continued replacement of Police Vehicles. Due to budget reductions cuts were necessary to be able to maintain current staff. Purchase of one scheduled replacement police vehicle. | Millersburg Police Department | 0 | 91 to 180 days | \$25,000 |
| Holmes | Millersburg Brownfield | The Village of Millersburg - Mad Anthony / Grant Street area adjoins a deteriorated industrial site. The industrial area is located within the FEMA designated floodplain. Abandoned structures, defunct parking areas, deteriorated roads are scattered throughout the site. In addition, the Village of Millersburg was required to abandon a municipal well when industrial containers were detected by the Ohio EPA. This well field is within the proposed Brownfield area. The Holmes County Trail Trail adjoins this former industrial site. Recommendation using Brownfield dollars to improve the environmental and physical aspects of the site. Beyond the rearing of the facility within the floodplain, it is recommended that the site be returned to a natural area including wetlands and native habitats. It is also recommended that trail sports, informational signage, observation platforms, parking, and a restaurant be included within the project. The estimated size of the proposed area is 150 acres. Of that, Mad Anthony area that adjoins this site has been identified as a target improvement area through the Neighborhood Stabilization Program. | Holmes County Planning Commission | 10 | 91 to 180 days | \$3,000,000 |
| Holmes | Dist 11, PID 85365, HOL County Trail, Phases 3 and | Construct combination bicycle/eggr/pedestrian path on abandoned railroad bed. 16' paved typical | Ohio Department of Transportation | 172.2 | 31 to 90 days | \$6,000,000 |
| Holmes | Mt. Hope Waste Water Treatment Plant Improvements | Updates to splitter box and sand filters | Holmes County Planning Commission | 0 | 31 to 90 days | \$30,000 |
| Holmes | Walnut Creek East Sewer Extension | Sewer lines extended east of Walnut Creek beyond Provider Court | Holmes County Planning Commission | 10 | 91 to 180 days | \$350,000 |
| Holmes | Walnut Creek Lift Station's Intercept | Gravity sewer lines installed to eliminate multiple lift stations | Holmes County Planning Commission | 10 | 91 to 180 days | \$1,500,000 |
| Holmes | Winesburg Waste Water Treatment Plant Improvements | Updates to splitter box and sand filters | Holmes County Planning Commission | 0 | 91 to 180 days | \$20,000 |
| Holmes | Winesburg Waste Water Treatment Plant Relocation | Moving the waste water treatment plant to accommodate a larger service area (Trail area and west of town) | Holmes County Planning Commission | 10 | 181 days or more | \$15,000,000 |
| Holmes | October Hills Waste Water Treatment Plant Upgrades | Clarifier, Sand Filter, and Building Replacement | Holmes County Planning Commission | 0 | 91 to 180 days | \$100,000 |
| Holmes | October Hills Line Extension and Lift Stations | Line extension and lift station to the north of Arrow Point Campground | Holmes County Planning Commission | 0 | 181 days or more | \$1,000,000 |
| Holmes | October Hills Waste Water Treatment Plant Expansion | Sewer lines extended to the remaining area of October Hills abatement | Holmes County Planning Commission | 1 | 181 days or more | \$750,000 |
| Holmes | October Hills Waste Water Treatment Plant Expansio | Expand the October Hills waste water treatment plant to handle the new service area | Holmes County Planning Commission | 3 | 181 days or more | \$5,000,000 |
| Holmes | Big Prairie / Lakeville Area Swer System & Industr | Sewer in an un-served area approximately 120 acres to permit the construction of an industrial park. Provide sewer to the residents of Lakeville and Big Prairie. | Holmes County Planning Commission | 500 | 181 days or more | \$20,000,000 |
| Holmes | Clark Area Sewer System | Sewer in an un-served area in Clark, Ohio. | Holmes County Planning Commission | 5 | 181 days or more | \$15,000,000 |
| Holmes | Clark Sidewalk Street Scaping | Provide 1500 linear feet of sidewalk along state route 83 within the community of Clark. Sidewalks to facilitate walking to Clark Elementary School. Provide an additional 1500 linear feet of sidewalks within neighborhoods on township roads 1021, 1024, 100 and county road 19. Provide street scaping improvements including trees, and signage and traffic calming features. | Holmes County Planning Commission | 0 | 91 to 180 days | \$500,000 |
| Holmes | Charm Area Sewer System | Sewer in an un-served area in Charm | Holmes County Planning Commission | 10 | 181 days or more | \$15,000,000 |
| Holmes | 6 Large Truss Bridge Replacement | 6 truss bridge replacements of under sized and deficient bridges | Holmes County Planning Commission | 10 | 181 days or more | \$9,000,000 |
| Holmes | County Wide Slip Repair Project | Multiple hillside slips on county roads | Holmes County Planning Commission | 5 | 181 days or more | \$1,000,000 |
| Holmes | Holmes County Guardrail Project | Guardrail installation on county roads with little or no guardrail | Holmes County Planning Commission | 5 | 181 days or more | \$4,000,000 |
| Holmes | Multiple Road Resurfacing & Restructuring | Multiple road resurfacing & restructuring on deficient county roads | Holmes County Planning Commission | 5 | 181 days or more | \$10,000,000 |
| Holmes | Township Road & Bridge Projects | Multiple road resurfacing & restructuring on deficient township roads | Holmes County Planning Commission | 5 | 181 days or more | \$14,000,000 |
| Holmes | Holmes County Road 349 Relocation Project | Relocating road across from fair grounds to eliminate flooding issues and bridge repairs | Holmes County Planning Commission | 5 | 181 days or more | \$500,000 |
| Holmes | Dist 11, PID 85365, HOL County Trail, Phases 3 and | Construct combination bicycle/eggr/pedestrian path on abandoned railroad bed. 16' paved typical | Ohio Department of Transportation | 172.2 | 31 to 90 days | \$6,000,000 |
| Holmes | Holmes County Road 201 Widening and Amish Buggy La | Restructuring and resurfacing of roadway for increased safety and high traffic flow | Holmes County Planning Commission | 5 | 181 days or more | \$4,000,000 |
| Holmes | East Holmes Water System Expansion | Expand the service area, drill new wells and repairs to existing water tower | Holmes County Planning Commission | 10 | 181 days or more | \$10,000,000 |
| Holmes | Charm Water System | Create a water system for the Charm area | Holmes County Planning Commission | 10 | 181 days or more | \$5,000,000 |
| Holmes | Big Prairie / Lakeville Water System | Create a water system for the Big Prairie / Lakeville area | Holmes County Planning Commission | 10 | 181 days or more | \$8,000,000 |
| Holmes | Village of Killbuck Wildlife Interpretive Center | Interpretive center and facility that will enhance the 24 acres of non-motorized trail in Holmes County. Interpretive center will house the Killbuck Land Trust and provide educational opportunities in the area of ecology and natural areas. Propose developing parking area and 2,000 feet of hiking loop through the Killbuck Marsh and connecting with the Holmes County Trail. Propose constructing observation platforms for wildlife viewing. | Holmes County Planning Commission | 10 | 181 days or more | \$400,000 |
| Holmes | Village of Holmesville - Truck and Snowplow | Olney 3600 or Ford F350, dump bed, 4 wheel drive, auto trans, snow prep package, gas engine, heavy duty snowplow installed. The current truck and snowplow is 20 years old. The major systems are deteriorated. The suspension, brakes, exhaust, and electrical are completely needing attention. We are forced to make "band-aid" repairs due to the fact that a major repair would cost more than the truck is worth. The current snowplow is not a heavy duty piece made for municipal work. The age of this equipment also makes finding replacement parts harder to come by. This is our only truck for street maintenance. | Holmes County Planning Commission | 0 | 0 to 30 days | \$50,000 |
| Holmes | Black Creek Park - Natural Area | Black Creek Park is a 140 acre facility owned by Holmes County that has become deteriorated. The 30 mile Holmes County Trail will be complete through the project area in 2020-2019. Propose developing a wildlife area with spot trails, observation platforms, camp sites, signage, bird and grey nesting platforms. A portion of Black Creek Park is leased to the Killbuck Long Rifles association. Recommend a partnership with this active organization to enhance the visitor experience to this facility. | Holmes County Planning Commission | 3 | 91 to 180 days | \$500,000 |
| Holmes | Killbuck Creek Debris Removal and Canoe Livery | The Killbuck Creek adjoins the Holmes County Rail Trail for approximately 10 miles. Recommend debris removal including trash and fallen trees. Recommend designing the Killbuck Creek through the Village of Killbuck and on five waters within 1000 feet of the corporate limits of Killbuck as a flood control measure. Recommend bank stabilization for areas prone to erosion. Recommend environmental improvements including installing native flow along the creek and acquiring buffer areas along environmentally sensitive areas. Recommend constructing a canoe livery and launch site at the Millersburg Rail Depot Canoe livery shall create access to the creek and provide a location to store and launch canoes | Holmes County Planning Commission | 10 | 181 days or more | \$1,000,000 |
| Holmes | Monroe Twp. Building | The Monroe Township would like to construct a township building. | Ohio Regional Development Corp. | 0 | 91 to 180 days | \$192,300 |
| Holmes | Holmes County Airport Authority Road Relocation | The Holmes County Regional Airport is in need of making a critical roadway change/calculation in order to extend the current airport runway. CR 202 is in close proximity to the existing runway and the proposed extension will close the gap separating the two, requiring the repositioning of the road. The airport serves as a critical economic development tool to rural Holmes County by providing an efficient means of travel to business persons, existing and prospective. | Ohio Regional Development Corp. | 0 | 31 to 90 days | \$500,000 |
| Holmes | Village of Berlin Off Street Parking Facility | The unincorporated village of Berlin is a top tourist destination in the state of Ohio. An off street parking facility is needed to accommodate vehicles within the village. It includes real estate acquisition, demolition, and installation of a 50 parking space facility. The project enables ODOT to proceed with that SR 30 development project through Berlin, which is on hold until the off street parking facility is completed. | Ohio Regional Development Corp. | 0 | 91 to 180 days | \$600,000 |
| Holmes | Village of Killbuck Road Elevation/Flood Control | The Village of Killbuck is requesting funds to elevate SR 60. By raising this section of roadway, residents of Killbuck and the surrounding area, school buses, and emergency response vehicles will not be forced to take long alternative routes or detours during routine flooding. The project also includes the installation of 470 LF of curbs, 400 LF of underdrains, and raising 4 catch basins to lift new grade. The project will commence at the intersection of SR and Glen Drive and runs to the southern business district. It will link historic downtown Millersburg to the southern business district. Sidewalks will be installed on both the east and west sides of the roadway. Phase 1 will begin in spring of 2009 and for a cost of \$895,700. | Ohio Regional Development Corp. | 0 | 91 to 180 days | \$300,000 |
| Holmes | Village of Millersburg Phase 2 & 3 Sidewalk Instal | Taylor Street has sidewalks that are deteriorated or have never been installed. New sidewalks to be installed along the northern portion of the existing highway at Holmesville Elementary School and traveling south the Barton Ave. Existing sidewalks Taylor Ave. are deteriorated and will be replaced with new. | Ohio Regional Development Corp. | 0 | 31 to 90 days | \$120,000 |
| Holmes | Holmes County CR 77 Resurfacing | Resurface, widen, and install bridge lanes for a 5 mile span on CR 77 in Holmes County. CR 77 is identified as a arterial highway in the County's Thoroughfare Plan. | Ohio Regional Development Corp. | 0 | 91 to 180 days | \$5,000,000 |
| Holmes | Village of Millersburg Downtown Storm Drainage | Downtown Millersburg does not have any storm drainage infrastructure. The project would install curbs and gutters in specific area in the downtown. This area is an official Main Street Community recognized by the State of Ohio Main Street Program. New roads need resurfaced in the Village of Holmesville that are deteriorated. The Village is requesting these roads be resurfaced to improve traffic flow and improve safety within the village. | Ohio Regional Development Corp. | 0 | 91 to 180 days | \$500,000 |
| Holmes | Village of Holmesville road resurfacing | Resurfacing of 9.5 miles in Killbuck Township, including culvert replacement and asphalt overlay. | Ohio Regional Development Corp. | 0 | 31 to 90 days | \$120,000 |
| Holmes | Killbuck Twp. Road Resurfacing | Monroe Twp. would like to resurface 6.7 miles of roadway in the township. This would include asphalt overlay for chip and seal. | Ohio Regional Development Corp. | 0 | 31 to 90 days | \$700,583 |
| Holmes | Monroe Twp. Road Paving | There are several roads in Ripley Township that are in serious need of chip and seal paving which amounts to 17 miles of roadway. | Ohio Regional Development Corp. | 0 | 31 to 90 days | \$427,361 |
| Holmes | Ripley Twp. Road Resurfacing | | Ohio Regional Development Corp. | 0 | 31 to 90 days | \$540,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Holmes | Sewer System I&I Repair | All Study of all sewer systems and repairs as needed | Holmes County Planning Commission | 0 | 0 to 30 days | \$400,000 |
| Holmes | Berlin Waste Water Treatment Plant Upgrades | Upgrade tertiary treatment add a circular clarifier and misc improvements. | Holmes County Planning Commission | 10 | 91 to 180 days | \$1,000,000 |
| Holmes | Berlin Liftstation's Intercept | Gravity sewer around the north side of Berlin and eliminating multiple liftstations | Holmes County Planning Commission | 10 | 91 to 180 days | \$3,000,000 |
| Holmes | Industrial Site Development | Development of 52.4 acre parcel for Reparatment distict for industrial park / job creation. Close proximity to rail transportation. Estimated cost includes additional land purchase, extension of utilities and road construction. | Village of Loudonville | 100 | 91 to 180 days | \$12,600 |
| Holmes | Holmes County Government Buildings & Grounds | (1) Resurface Holmes County parking deck within Village of Millersburg \$45,000, (2) Reinforce Ames Building to support floor, \$50,000, (3) Replace roof at Sheriff's Office \$100,000, (4) Renovate Court House clock tower \$30,000, (5) Holmes County maintenance garage - energy efficiency upgrades \$38,000, (6) Courthouse parking lot resurface \$12,000, (7) OIA Jail office high efficiency lighting Replacement \$12,000, (8) Courthouse steps renovate \$12,000, (9) OIA Jail Office Energy Efficient window replacements \$12,000, (10) OIA Jail Office security system upgrade \$15,000, (11) Banker's garage for OIA Jail - Clinch Building 4 Court House \$160,000, (12) 1000 sq ft outside Clinch Street building \$60,000, (13) Elevator for Clinch Street building \$200,000, (14) Replace roof Prosecutor's Office \$15,000 | Holmes County Planning Commission | 0 | 91 to 180 days | \$753,000 |
| Holmes | Health District Building | Construct an office building to house the Holmes County Health District including Environmental Health, WIC, our immunization program, Help Me Grow, Bureau for Children with Medical Handicaps, Hospice of Holmes County, and a Medical Clinic (the Health Department operates the only medical clinic in the county for individuals that may not have an ability to pay). Construction plans have been presented to the Village of Millersburg and have been approved. We have sewage, electrical, and gas at the site and permitted for use. The project location will be on property already acquired by the Health Department and is already zoned. The design is for a two story building 8,000 sq ft per floor, 12' floor to floor height, 10' 4" floor to ceiling height on the first floor. It is to have a 24' x 24' carpet, 20# pit snow load, 90 mph wind velocity, 24" x 12" reinforced concrete footer. All design specifications are available upon request. The existing health dist. building adjoins the hospital. The hospital can begin its own separate multi-million dollar expansion as soon as the health department relocates to the new site. | Holmes County Planning Commission | 0 | 0 to 30 days | \$3,200,000 |
| Holmes | Multiple County Road Paving Project | This project will allow for the paving of multiple county roads. The targeted areas are high traffic and high accident roads. This project will include paving, striping and signage on approximately 25 miles of roads. This project will retain or create approximately 50 jobs. These jobs will be in the form of the construction crews, paving companies, material suppliers, inspectors and engineers. The overall project goals will be to create or maintain jobs, improve safety, and enhance our county tourism, as well as full our county infrastructure investments. | Holmes County Engineer | 50 | 0 to 30 days | \$2,000,000 |
| Holmes | Engineering for Holmes CR 77 Widening & Buggy Lane | This project will include improvements to 8 miles of one of Holmes Counties busier roads, that will improve safety and accessibility to businesses, factories and tourism. Improvements include widening of the road, realignment, drainage and bicycle and buggy lanes. Surveying of this project has already been completed and construction will begin within next several weeks. The improvements will help maintain safety for our residents and the thousands of tourists who visit our county every year, and at the same time provide better access to one of our largest employers in Holmes County, Wayne-Cator Gearbox Door Company, not to mention all the small businesses that are along CR 77. | Holmes County | 100 | 31 to 90 days | \$500,000 |
| Holmes | Holmes County Centerline Pavement Marking Project | This project will provide centerline pavement markings for all 249 miles of Holmes County roads. At the present time our County roads have little to no centerline markings that are visible. This project will make our County roads safer for our residents and the thousands of tourists that visit our county every year. | Holmes County | 50 | 31 to 90 days | \$350,000 |
| Holmes | Radios and related support equipment | Funding request to upgrade all mobile, portable and base radios to be narrow band compliant in accordance with FCC changes taking place in 2012 that will render our current radio system inoperable. It is anticipated that the requested funding would cover the purchase price of the radios and related equipment and the cost of installation and change over. Training costs have not been included at this time. | Holmes County Sheriff's Office | 0 | 31 to 90 days | \$195,000 |
| Holmes | Hire of additional and replacement officers | Funding would provide for the hiring of 4 new road patrol/enforcement officers and 4 corrections officers to fill existing vacancies in staffing. Total project cost includes wages, equipment and training. It does not include overtime or any costs related to the hiring process. | Holmes County Sheriff's Office | 8 | 31 to 90 days | \$292,000 |
| Holmes | wind turbine project | Skyetics is a renewable energy company in Holmes County producing small wind turbines for the Amish population in Ohio and Indiana. Currently, Skyetics is amide developing several high quality mid-sized wind turbines and grid tie systems for residential and small business use. These products will meet the slightly requirements set forth by the Ohio Department of Development, Office of Energy Residential Wind Energy Initiative. At this time funding for research and development is required in order to refine the product to meet UL certification for wind systems prior to mass production. In addition, Skyetics seeks access to capital for equipment and inventory. As a company within close proximity to a niche market, company leadership realize the potential for future company growth including the need for additional employees. | Skyetics | 15 | 31 to 90 days | \$500,000 |
| Holmes | Village of Millersburg East Jones Street Reconstru | This project is needed to support the development of a new subdivision in the village of Millersburg. With the increased volume of traffic, the horizontal alignment of East Jones Street must be realigned to correct a dangerous hairpin curve and improve the safety of the residents and motorists traveling this road. This project is the second phase of a two-phase project to improve this road. The first phase was completed in 2005 and included roadway widening and vertical realignment to correct a dangerous road and relocation of one house. This phase will include widening over 600 feet of roadway with full depth reconstruction including underdrains and ditches. Plans for Phase 2 were completed in 2005, but have not been constructed due to funding constraints. | W.E. Quicksall & Associates, Inc. | 10 | 31 to 90 days | \$235,000 |
| Holmes | Computer Equipment | Replace and update the suggested laptop computers and docking stations in our patrol vehicles. Approximately 20 units, set-up and installation. | Holmes County Sheriff's Office | 0 | 31 to 90 days | \$129,000 |
| Holmes | Patrol Cruisers/Prisoner Transport Vehicle | Replace and equip 1 prisoner transport vehicle. At present, other than our patrol cars, we have no safe and secure way to transport multiple prisoners to and from court appearances, prisons or other movements as directed by our courts. Purchase and equip 3 marked patrol cars. This would enable us to update our aging patrol car fleet. We have been unable to maintain our 3 car per year rotation due to lack of funding and as a result, a majority of our fleet is at or in excess of 100,000 miles. As a result, maintenance costs are increasing and have become a serious funding issue. | Holmes County Sheriff's Office | 0 | 31 to 90 days | \$107,000 |
| Holmes | Highland High School, Intersection | Fix a dangerous intersection at the intersection at SR39 and TWP Rd 367 (Berlin, OH, Holmes County) this intersection is dangerous because of an existing line of site issue. With the high school local business and the local the department using this intersection it has resulted in numerous accidents. I fear for the safety of the public and the Students at Highland High School. It is possible that this intersection could be fixed with something as simple as a stop light. | n/a | 15 | 91 to 180 days | \$900,000 |
| Holmes | Phase 4 Trail Re-Surface Project | The Holmes County Trail is the first 29-mile multi-purpose recreational and transportation corridor in the nation designed to accommodate Amish Buggies, bikers, and other non-motorized transportation for the safe transportation and recreation of Holmes County residents and it's visitors. The project scope for this request is to re-surface approximately five miles of the transportation and recreation corridor from Millersburg to Fredricksburg, with a project completion date of July 2009. | Holmes County Park District/Trail Division | 75 | 31 to 90 days | \$250,000 |
| Holmes | Sidewalk Improvement Project, Phase 2 | Sidewalk construction | Village of Millersburg | 10 | 91 to 180 days | \$310,000 |
| Holmes | Downtown (Jackson Street) Storm Sewer Improvements | Storm sewer construction | Village of Millersburg | 10 | 91 to 180 days | \$320,000 |
| Holmes | Sidewalk Improvement Project, Phase 3 | Sidewalk construction | Village of Millersburg | 10 | 91 to 180 days | \$265,000 |
| Holmes | Electronic Recycle Center | Electronic Recycle center for all businesses and governments to recycle electronics and fire items that can be returned to the consumer market at a great savings to customers, while also benefiting agencies in disposal and asset recovery. To reuse two commercial buildings and hire additional people to the business. To help people keep their jobs and create many more in a low income area where jobs are needed. To teach a skilltrade to people that need work. | Whirlybird Electronics | 10 | 0 to 30 days | \$165,000 |
| Holmes | Building Revap and New Employee Hire | | Village Value Shoppe | 20 | 0 to 30 days | \$1,000,000 |
| Holmes | CourtView | Purchase of CourtView Computer Program for the Common Pleas Court, Clerk of Courts and Juvenile/Probate Court. This computer program will enable the Courts to do better reporting and tracking of court costs, restitution, sentencing, community control sanctions and probation information. | Holmes County Common Pleas Court | 26 | 31 to 90 days | \$250,000 |
| Holmes | Building New Houses & Apartment Complexes For Low | Building new homes and apartment complexes for low-income families. In Wayne and Holmes County Ohio. Make them energy efficient and green homes and apartments. To teach people a skilltrade and provide jobs in those counties for people that need them. The Holmes County Trail project is the first trail in the nation designed as an off chip and seal trail for Amish Buggy transportation with a 6000 sq ft asphalt trail for non-motorized transportation and recreation. With only two phases remaining of the 29-mile trail to complete and part of the Ohio to Erie Trail and the state wide trail plan, this request will fund parking, restroom facilities, wheelchair friendly trails and the possible coordination with the Ohio Historic Preservation Office to fund the relocation of approx. 2-3 historic bridge structures to the project site for bridge replacement of previously destroyed or destroyed bridge structures. | Buren Investment Group | 50 | 0 to 30 days | \$20,000,000 |
| Holmes | Phase 3 & 5 Trail Infrastructure | Mineral products used namely in the production of animal feeds and fertilizers. Presently, HBP is the only rendering facility in Ohio which accepts and processes fallen farm animals, yearly converting the remains of 12,500 cattle, calves, horses and swine into usable product - a total of over 6 million pounds. Recent FDA regulation changes regarding "cattle material prohibited in animal feed", specifically the brain and spinal cord of cattle over 30 months of age, will result in major changes to the rendering industry, in particular those accepting fallen animals. To take effect in April 2009 renderers will be forced to transform how materials are accepted, handled and processed resulting in numerous challenges including increased costs and facilities. As a critical component to the Northeast Ohio agricultural community, HBP desires to build a facility designed specifically for the processing of fallen animals as not to interfere with or threaten the other segments of the business, primarily the disposal of slaughter house facilities. | Holmes County Park District | 100 | 91 to 180 days | \$1,000,000 |
| Holmes | Holmes By Products Expansion | | Holmes By Products | 8 | 31 to 90 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Holmes | Village Equipment | Purchase new equipment for Village, Street Sweeper, Chipper, Bucket Truck, & Air Compressor. This will allow the Village to maintain our current level of employment, otherwise we will be eliminating staff. | Village of Millersburg | 15 | 0 to 30 days | \$200,000 |
| Holmes | indoor arena | I need a indoor arena to further my horse business. I need a place to work and I want to start therapeutic riding which would be very beneficial for alot of people. I have 8 horses now with 2 on the way, very good horses. I need at least a 8x120 building. I also have the land to put it on. I would create many jobs possibly as many as 100 jobs and would like to make a career out of it. I'll need a little help I'm not asking for the whole lot, just a little help I think I could go a long way and help the economy in many ways thank you for listening | great paint rank | 10 | 0 to 30 days | \$65,000 |
| Holmes | Medway Drug Enforcement Program | Medway provides law enforcement with the ability to investigate and arrest individuals involved in the manufacture and distribution of illegal drugs within Holmes and Wayne County. Due to funding limitations the ability of Medway to function in this capacity has been reduced. Medway is requesting an additional \$100,000 to support training and purchase equipment related to their overall mission of reducing drug related crimes in Holmes and Wayne County. | Holmes County Planning Commission | 3 | 0 to 30 days | \$100,000 |
| Holmes | Berlin Transport LLC, a Clean Fuels Ohio partner | One auxiliary power unit to reduce idle. | Clean Fuels Ohio | 5 | 0 to 30 days | \$4,600 |
| Holmes | wheelchair van replacement | To replace two wheelchair vans with three that are used daily to transport individuals with severe disabilities to and from home to attend day services and to participate in recreational activities in the community. Current vans have mileage that exceeds 100,000 miles. The current vehicles are also over 8 years old and are not as energy efficient as newer vehicles. | Holmes County Board of MR/DD | 1 | 91 to 180 days | \$100,000 |
| Holmes | Playground upgrade for Jared compliance | Playground is used by Help Me Grow and Early Intervention (both -). The County Educational Service Center (Pre-school age 3-5), County Board School Program (age 6-21) and the community parks and recreation activities (soccer) and does not meet Jared Law compliance. Project includes new equipment, moving existing equipment to increased lot zones, increase height of ball zones, use gravel fill and concrete like path. | Holmes County Board of MR/DD | 1 | 31 to 90 days | \$32,000 |
| Holmes | replace heating/cooling unit | To replace one of the two major heating/cooling units for main building of the Holmes County Training Center. The current unit is over 20 years old. New unit will be much more energy efficient than the current unit and reduce ongoing operation costs (efficiency). Project includes labor and materials, including electrical and mechanical work. Project also includes the replacement of the existing furnace and gas vent and the revitalization movement. Early signs of success include increased occupancy and investment in the downtown. | Holmes County Board of MR/DD | 1 | 91 to 180 days | \$30,000 |
| Holmes | Revitalize Historic Downtown Millersburg | In January of 2009, the Village of Millersburg completed a comprehensive plan plotting the future course of downtown. Perhaps one of the plans most significant findings was the identification of a target market. Located in the Heart of Amish Country, Millersburg has the unique opportunity to capture the interests of residents and visitors. Annually, the area comprises for the top tourist destination in the state with over 4 million visitors. Former efforts to market downtown to tourists have failed due to the lack of a unified front. With almost 90% of downtown vendor participation, HDM is now in the position to effectively market downtown. Stimulus funds are requested to design and implement a multi-media marketing campaign identifying Millersburg as "the other" must see destination of Holmes County. | Historic Downtown Millersburg | 10 | 31 to 90 days | \$50,000 |
| Holmes | Victim Advocate | Project would consist of one full time victim advocate and one part time sexual assault nurse examiner. These two positions would provide advocacy to all crime victims in Holmes County. In addition, they would provide much needed educational outreach and training in the areas of domestic violence and sexual assault. It would be the goal of the agency to provide eight trainings to local professionals, including law enforcement, probation officers, case workers, doctors, dentists and nurses. Also, the Advocate and NSE would provide training and education to middle school students in the areas of bullying and dating violence. His Grade separation project will SAVE LIVES and PROTECT PROPERTY. Currently stopped trains are blocking the main State Street. Called by all First responders Fire Law and EMS. Please help us to save lives - a 10 minute delay by a blocked crossing can mean THE DEATH. This project was passed by the GOVT Traffic Committee and initial agreement was selected as a result of a Public Hearing on the project. This project was put on hold due to lack of enough GOVT Funds. | Holmes County Victim Assistance | 2 | 0 to 30 days | \$50,000 |
| Huron | State Route 13 CSX Railroad Grade Separation Proj | Purchase 1 light transit vehicle with a narrow body for Huron County, Senior Enforcement Services | Emergency Management & Homeland Security | 120 | 31 to 90 days | \$4,590,000 |
| Huron | Dist 3, PID 85746, HUR Purchase 1 LTN | Purchase GPS software for vehicles for Huron County, Senior Enforcement Services | Ohio Department of Transportation | 1 | 31 to 90 days | \$42,000 |
| Huron | Dist 11, PID 85747, HUR GPS software | As part of their compliance with their NPDES PERM they have to eliminate their existing CSO Overflows. This project will eliminate the last of their overflows and put them into compliance. This project is an expansion and renovation of the Bellevue Public Library, including a Carnegie building on its original site. The project's location is a Main Street/20 provides stimulus for downtown revitalization in the city of Bellevue. The project is being planned with potential for LEED certification. | Ohio Department of Transportation | 1 | 31 to 90 days | \$5,500 |
| Huron | Lift Station #2 CSO Consolidation | His is the final lift sewer separation project. It will eliminate two active CSOs that are required per their NPDES Permit. This will service approximately 50 residential homes with separate sanitary sewers and separate storm sewers. This project will eliminate any combined sewerage being discharged into the West Branch of the Vermillion River. | Village of Greenwich | 15 | 91 to 180 days | \$175,000 |
| Huron | Bellevue Public Library Expansion & Renovation | This project will eliminate two CSOs and provide for a separate Storm Sewer System in this area of the Village. This project will service approximately 100 residents. This project will eliminate any CSOs discharge to the West Branch of the Vermillion River. This is a replacement of their NPDES Permit. | Bellevue Public Library | 40 | 91 to 180 days | \$9,101,000 |
| Huron | North Kribben Sanitary Sewer Separation Project | Paving with widening of roadway & shoulder of Old State Rd CR # 52. Old State Rd is a Federal-Aid Secondary Rd set an ADT of 3,100 veh daily. The project will be a safety improvement that will widen the roadway surface & shoulders, and preserve the wearing surface of the pavement. The project limits will extend from US 250 to Town Line 12, approx. 10 miles in length. | Village of Greenwich | 15 | 0 to 30 days | \$150,000 |
| Huron | New Street Sanitary sewer Separation Project | Replace approximately 450 Huron County Road Signs @ \$100.00 Ea. Signs would be new high intensity reflective and would include but not limited to: Stop, Stop Ahead, Speed Limit, End Crossing, Construction Zone Warning, School Zones, Highway Divisinal Signs - etc | Village of Greenwich | 15 | 31 to 90 days | \$250,000 |
| Huron | Paving w/ Roadway & Shoulder Widening of Old State R | Replace Road on HCBMRDD admin building (aka Christ School) Project Description: the administrative building roof is more than 25 years old and needs replacement. It is a black rubber roof system with small panels. Almost every seam has degraded and cannot be effectively patched any longer. Because the administrative building is also an active school, Jared's Law applies, which makes leaks even more of a priority. HCBMRDD proposes to install a new high-galvalume 500 membrane over existing rubber roof. Project Budget: \$116,962 (work \$98,267 + architect/fees \$9848 + 10% contingency \$9800) | Huron County Highway Department | 30 | 91 to 180 days | \$900,000 |
| Huron | Safety Upgrade of Huron County Road Signs. | Retrofit energy efficient lighting in both HCBMRDD buildings (admin/school & adult services facility) Project Description: the administrative building was built in 1972, the adult services facility building was built in 1981. All current lighting is original construction. HCBMRDD proposes to retrofit existing T12 light fixtures for new energy efficient T8 lamps and electronic ballasts-- as well as to replace incandescent exit signs with LED exit signs. Project Budget: \$51,051 (work \$42,000 + architect/fees \$3,861 + 10% contingency \$4,200) | Huron County Highway Department | 30 | 31 to 90 days | \$45,000 |
| Huron | Replace Roof on HCBMRDD admin building (aka Christ School) | Retrofit energy efficient lighting in both HCBMRDD buildings (admin/school & adult services facility) Project Description: the administrative building was built in 1972, the adult services facility building was built in 1981. All current lighting is original construction. HCBMRDD proposes to retrofit existing T12 light fixtures for new energy efficient T8 lamps and electronic ballasts-- as well as to replace incandescent exit signs with LED exit signs. Project Budget: \$51,051 (work \$42,000 + architect/fees \$3,861 + 10% contingency \$4,200) | Huron County Board of MRDD | 6 | 31 to 90 days | \$116,962 |
| Huron | Retrofit energy efficient lighting in both HCBMRDD | Retrofit energy efficient boilers in both HCBMRDD buildings (admin/school & adult services facility) Project Description: the administrative building was built in 1972, the adult services facility building was built in 1981. The boiler in each building was installed at the time of original construction. HCBMRDD proposes to install a new high-efficiency boiler in each building-- removing and replacing the boiler in the adult services facility, but keeping the old boiler as an emergency back-up in the admin/school building). Project Budget: \$116,620 (work \$98,000 + architect/fees \$9,820 + 10% contingency \$9,800) | Huron County Board of MRDD | 6 | 31 to 90 days | \$51,051 |
| Huron | Retrofit energy efficient boilers in both HCBMRDD | Supply all labor, material & equipment to install a centrally located 4,000 ton Salt Storage Facility. The new storage facility would enable Huron County to bulk purchase salt and have it delivered during the summer off season. Bulk buying salt will reduce costs and ensure the county would be able to supply the Townships, Village & Cities in Huron County with salt during the winter. | Huron County Board of MRDD | 4 | 31 to 90 days | \$116,620 |
| Huron | Installation of New Salt Shed | Replace asphalt parking lots and concrete sidewalks around both HCBMRDD buildings (admin/school & adult services facility) Project Description: the parking lots and sidewalks around both buildings are in poor condition and should be replaced. An aerial view of both buildings and each parking lot is included in this proposal. Project Budget: \$235,885 (work \$199,225 + architect/fees \$17,840 + 10% contingency \$19,820) | Huron County Highway Department | 30 | 31 to 90 days | \$225,000 |
| Huron | Replace asphalt parking lots and concrete sidewalk | Installation of approximately 2000 ft of 16" water main along with reconstruction of services to all adjacent business and residences. New line will serve an additional transmission line serving elevated water storage tank serving an industrial area and southern quadrant of Bellevue. New line will replace existing lines that were installed in the early 1900's. The increased supply will assure industries in the area have sufficient supply to expand operations. | City of Bellevue | 0 | 31 to 90 days | \$400,000 |
| Huron | Center Street Waterline - Phase III | Installation of 2700 ft of 10" sanitary sewer to service recently annexed footage on U. S. Route 20. This area is commercial use and footage. This is phase II of a two phase project. Plans are nearly complete for the project. | City of Bellevue | 14 | 91 to 180 days | \$231,000 |
| Huron | East U.S. Rt. 20 Sanitary Extension - Phase I | Installation of 5000 ft of 10" sanitary sewer to service recently annexed footage on U. S. Route 20. This area is commercial use and footage. This is phase II of a two phase project. Plans are nearly complete for the project. This recently 400 annexation is located at the intersection of 28 Route 20 and State Route 4. This area recently had two commercial operations close due to lack of sanitary services. Once services this area will be ripe for development. | City of Bellevue | 14 | 181 days or more | \$468,000 |
| Huron | East U.S. Rt. 20 Sanitary Extension - Phase II | This project would double the biosolids composting capacity at the Bellevue Water Pollution Control Facility. Currently the facility can compost approximately 25% of the biosolids produced per year. The expansion would allow slightly more than 50% composting. The remaining biosolids are liquid land applied. The liquid biosolids are Class B while the composting process consistently produces Class A material. The produced biosolids are blended with wood chips and composted in containers with computer controlled circulation to assure Class A parameters are maintained. The finished material is screened to produce compost material that is used by the residents of Bellevue for soil amendment. This process not only reduces the biosolids land fill or land applied, it also utilizes other organic solid waste. | Huron County Board of MRDD | 12 | 31 to 90 days | \$235,885 |
| Huron | Biosolids Composting Expansion | Design/Build contract to replace the Peru Olena Rd Bridge No. BR 164-03E26n Bronson Township. This bridge is approximately 0.66 mile west of Br. No 164-04.28 on Peru Olena Rd. Ten existing bridge is in very poor condition. The structure has a ODOT BR-11 inspection rating of 3P. The Bridge has a Load Limit of 13 Tons. The new bridge can be constructed with the existing RW limits. There are No Environmental issues related to the new replacement bridge. All survey and preliminary plan design has been completed by the office and is on file. | Huron County Board of MRDD | 6 | 31 to 90 days | \$116,962 |
| Huron | Replacement of the Peru Olena Rd Bridge No. BR 164 | Safety Project to Replace Huron County Highway Traffic Control Signs on County Highways through the county. | Huron County Highway Department | 25 | 91 to 180 days | \$400,000 |
| Huron | Huron County Wide Safety Sign Upgrade | Replacement of 14,000 ft of metal roof over existing Huron County Garage & Office facility. The replacement of the existing roof should have been done 5 years ago. The roof has been leaking water into maintenance garage & and Office Records Room. The new roof will provide and dry working area and save on our natural gas bills to heat our facility. During the winter months we park our snow removal equipment (single & dual axle trucks). The garage need to be dry and heated above freezing to keep the salt from freezing in the truck beds and hoppers. Currently we are using buckets , tarps & mops to protect our plan files & records. | Huron County Highway Department | 20 | 31 to 90 days | \$100,000 |
| Huron | Energy Saving Roof Replacement for Highway Garage | | Huron County Highway Department | 30 | 31 to 90 days | \$125,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---------------------------------|----------------|--------------------|---------------------------|
| Huron | Huron County Wide Safety Sign Upgrade | Safety Project to Replace Huron County Highway Traffic Control Signs on County Highways through the county. | Huron County Highway Department | 20 | 31 to 90 days | \$100,000 |
| Huron | Huron County Wide Safety Sign Upgrade | Safety Project to Replace Huron County Highway Traffic Control Signs on County Highways through the county. | Huron County Highway Department | 20 | 31 to 90 days | \$100,000 |
| Huron | Safety Paving Project for Greenwch Milan Town Lin | Roadway Safety Project to Complete Phase II for 2 miles of Greenwch Milan Town Line (GMTL) Rd. Project includes: minor widening (4'), new asphalt paving, and safety signage, striping, shoulder grading & minor drainage improvements. Project Location: 2 miles for Phase II is located between SR 18 & Zanolza Rd on east side of Norwalk, Oh. This project will tie to the current Federal High Risk Rural Road (HRRR) Safety project (1st in Ohio) that is currently scheduled for 2010. GMTL Rd is a main (5 mile) county road that has US 250 to SR 18 & connects directly to SR 101 and functions as a truck bypass of Norwalk. This roadway project will improve safety and provide a new corridor of economic development adjacent to Summit Railway Park & J&L Trusting | Huron County Highway Department | 30 | 31 to 90 days | \$210,000 |
| Huron | Huron County Wide Safety Sign Upgrade | Safety Project to Replace Huron County Highway Traffic Control Signs on County Highways through the county. | Huron County Highway Department | 20 | 31 to 90 days | \$100,000 |
| Huron | Replacement of the Peru Olena Road Bridge No. BR 1 | Design / Build Contract to Replace the Peru Olena Road Bridge No. BR 164-04-28 in Bronson Township. The Existing Bridge is in very poor condition. County Maintenance personnel are monthly inspecting structures Floor & Stringer beams. Structure is on a main east / west county highway that is used by local residents and farmers. Structure has an ODOT BR-86 General Appraisal Rating of 3P. Bridge has a Load Limit of 13 Tons. Replacement Bridge can be built within the existing R/W. There are NO Environmental issues. New Bridge abutments will be built behind the existing abutments. The proposed bridge will be a single span pre-cast concrete box beam. | Huron County Highway Department | 25 | 31 to 90 days | \$400,000 |
| Huron | Huron County Wide Safety Sign Upgrade | Safety Project to Replace Huron County Highway Traffic Control Signs on County Highways through the county. | Huron County Highway Department | 20 | 31 to 90 days | \$100,000 |
| Huron | Huron County Wide Safety Road Sign Upgrade | Safety Project to Replace Huron County Highway Traffic Control Signs on County Highways through the county. | Huron County Highway Department | 20 | 31 to 90 days | \$100,000 |
| Huron | Energy Saving Roof Replacement for Highway Garage | Replacement of 14,000 sf of metal roof over existing Huron County Garage & Office facility. The replacement of the existing roof should have been done 5 years ago. The roof has been leaking water into maintenance garage & and Office Records Room. The new roof will provide and dry working area and save on our natural gas bills to heat our facility. During the winter months we park our snow removal equipment (single & dual axle trucks). The garage need to be dry and heated above freezing to keep the salt from freezing in the truck beds and hoppers. Currently we are using buckets, tarps & mops to protect our plan files & records. | Huron County Highway Department | 30 | 31 to 90 days | \$125,000 |
| Huron | Replacement of the Peru Olena Road Bridge No. BR 1 | Design / Build Contract to Replace the Peru Olena Road Bridge No. BR 164-04-28 in Bronson Township. The Existing Bridge is in very poor condition. County Maintenance personnel are monthly inspecting structures Floor & Stringer beams. Structure is on a main east / west county highway that is used by local residents and farmers. Structure has an ODOT BR-86 General Appraisal Rating of 3P. Bridge has a Load Limit of 13 Tons. Replacement Bridge can be built within the existing R/W. There are NO Environmental issues. New Bridge abutments will be built behind the existing abutments. The proposed bridge will be a single span pre-cast concrete box beam. | Huron County Highway Department | 25 | 31 to 90 days | \$400,000 |
| Huron | Huron County Wide Safety Sign Upgrade | Safety Project to Replace Huron County Highway Traffic Control Signs on County Highways through the county. | Huron County Highway Department | 20 | 31 to 90 days | \$100,000 |
| Huron | Replacement of North Street Br. No NH 253-0-39 | Replacement of the North Street Bridge No. NH 253-00-39 in the Village of Plymouth, Ohio. The existing bridge is in very poor condition, has an ODOT BR-86 inspection rating of 3P. Bridge has a Load Limit of 20 Tons. ADT of 400 vehicles. Plans & Specifications are complete, project is ready to Bid and clear for Construction. There are no Environmental or Right-of-Way concerns or issues. | Huron County Highway Department | 25 | 0 to 30 days | \$210,000 |
| Huron | Huron County Wide Safety Road Sign Upgrade | Safety Project to Replace Huron County Highway Traffic Control Signs on County Highways through the county. | Huron County Highway Department | 20 | 31 to 90 days | \$100,000 |
| Huron | Ogan Road Bridge No. WA 199-0-34 | Replacement of the Ogan Road Bridge No. WA 199-0-34 in Wakeman Twp, just west of the Village of Wakeman, Ohio. Existing narrow bridge is in very poor condition. ODOT BR-86 General Appraisal of 3P w/ a Load Limit of 12 Tons. Bridge has ADT of 500 vehicles. All plans & specification are complete, project is ready to advertise & Bid. There are NO Environmental or Right-of-Way concerns. ODOT has received for Credit BR Credits. | Huron County Highway Department | 25 | 0 to 30 days | \$220,000 |
| Huron | Gibbs Road Br. No. NK 18-1-93 Replacement | Replacement of the Gibbs Road Bridge No. NK 18-1-93 located in Norwalk Township just east of the City of Norwalk, Ohio. Existing Bridge is in very poor condition, has ODOT BR-86 General Appraisal rating of 3P. Bridge has a Load Limit of 11 Tons. ADT of 500 vehicles. Plans and specifications are complete and ready for Bidding & Construction. There are NO Environmental & Right-of-Way concerns or issues. | Huron County Highway Department | 25 | 0 to 30 days | \$300,000 |
| Huron | Gibbs Road Br. No. NK 18-1-93 Replacement | Replacement of the Gibbs Road Bridge No. NK 18-1-93 located in Norwalk Township just east of the City of Norwalk, Ohio. Existing Bridge is in very poor condition, has ODOT BR-86 General Appraisal rating of 3P. Bridge has a Load Limit of 11 Tons. ADT of 500 vehicles. Plans and specifications are complete and ready for Bidding & Construction. There are NO Environmental & Right-of-Way concerns or issues. | Huron County Highway Department | 25 | 0 to 30 days | \$300,000 |
| Huron | POLICE DEPARTMENT | Replacement of 2-Huron County Maintenance (Snow Removal) Dump Trucks. Replace single axle 1988 Mack Dump Truck # 117. this truck is currently out of service because of condition, this truck has 113,000 miles. | NEW LONDON VILLAGE | 5 | 0 to 30 days | \$50,000 |
| Huron | County Maintenance Equipment (Dump Trucks) | Replace dual axle 1985 Mack Dump Truck # 211, this truck is currently being on a limited bases as back-up truck because of its current condition. This truck has 155,000 miles. Our request is for new Dump Trucks that include new salt spreader boxes & snow plows. | Huron County Highway Department | 10 | 31 to 90 days | \$220,000 |
| Huron | Huron County Wide Safety Road Sign Upgrade | Provide Labor, Material & Equipment to Replace Huron County Highway Traffic Control Signs. Signs include but not limited to Stop, Stop Ahead, Speed Limit, Road Curve & Directional Signs, etc. All sign will meet new highway safety reflective standards include high intensity reflective bead for sign posts. Sign will be utilized to replace old signs through the county. | Huron County Highway Department | 20 | 31 to 90 days | \$50,000 |
| Huron | Huron County Wide Safety Road Sign Upgrade | Provide Labor, Material & Equipment to Replace Huron County Highway Traffic Control Signs. Signs include but not limited to Stop, Stop Ahead, Speed Limit, Road Curve & Directional Signs, etc. All sign will meet new highway safety reflective standards include high intensity reflective bead for sign posts. Sign will be utilized to replace old signs through the county. | Huron County Highway Department | 20 | 31 to 90 days | \$50,000 |
| Huron | Huron County Wide Safety Road Sign Upgrade | Safety Project to Replace Huron County Highway Traffic Control Signs on County Highways through the county. | Huron County Highway Department | 20 | 31 to 90 days | \$100,000 |
| Huron | New London SSO elimination project | Install a new collection system village wide to eliminate sanitary sewer overflows. The old system was installed in the 1940's. This system is made of vitreous clay tile. The new system will consist of 44,500 linear feet of 10", 4925 linear feet of 12", 1800 linear feet of 15" and 250 feet of cured in place pipe. This project would also include doubling the size of our equalization basin to 1.5 million gallons. | Village of New London | 20 | 0 to 30 days | \$15,202,943 |
| Huron | New London storm sewer replacement | replace existing storm sewers in heavily flooded areas across the village and also dredging of the two creeks that run through the village. | Village of New London | 20 | 0 to 30 days | \$2,700,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-------------------------------|----------------|--------------------|---------------------------|
| Huron | Industrial Wind Turbines - Rec Center and WWTP | Construction of two (2) industrial wind turbines, one at each the Waste Water Treatment Plant (WWTP) and the Recreation Center will significantly reduce electric consumption so as to stabilize Sewer rates and Recreation membership fees. These are the first two installations and turbines in Huron County, putting us on the forefront of "green" technology for the area. Unfunded federally mandated elimination of CBO, will include replacement of an aging waterline and sewer force main. | City of Norwalk | 7 | 91 to 180 days | \$2,200,000 |
| Huron | Combined Sewer Overflow - Pleasant Street | LR station upgrades including pumps and wells from 2.3 MGD to 4.0 MGD. Underground storage to increase capacity at this site. | City of Norwalk | 12 | 31 to 90 days | \$4,155,000 |
| Huron | Bus Garage Replacement | This replacement bus garage will allow current mechanics to address problems with buses locally instead of sending them out. Additionally, it will allow space to address the need for alternative fuels, bio-diesel and the adaptations that need to take place. The current building structure is unable to maintain buses safely and will be demolished because of city code violations. The new building will be built on the same site. While the need to replace the replacement, the funds are extremely limited to support the replacement. | Willard City Schools | 2 | 181 days or more | \$900,000 |
| Huron | East Side Water Connection | Replace secondary water source for city to ensure water in the event of a drought or contamination of current water source. Project consists of: 5100 ft. of 12" water main 650 ft. of 14" water main HDPE w/lining 100 ft. of 14" water main, directionally drilled under SR20 1 Master meter/PRV Pressure reducing station | City of Norwalk | 5 | 31 to 90 days | \$490,000 |
| Huron | Flood Mitigation Culvert - Benedict Avenue | Construction of culvert to minimize flooding damage in critical business district in downtown Norwalk. Installation of a 10' x 20' culvert under US-20 to alleviate a "choke point" of Norwalk Creek. This would save 20 businesses that were flooded last 2 summers ago. Unfunded federally mandated elimination of CBO, will increase capacity for future residential and commercial development. | City of Norwalk | 20 | 91 to 180 days | \$1,970,000 |
| Huron | Combined Sewer Overflow - Washington Street | Work consists of: Replacement of an existing trunk sewer line with a 54" line. Installation of a 27" trunk sewer extension. Sections of 24" line will be rehabilitated and lined to extend their life. | City of Norwalk | 12 | 91 to 180 days | \$4,340,000 |
| Huron | Waterline Replacement | Replacement of Aging Waterlines in City's west side. Many of these lines are in industrial areas. 2nd and 3rd highest break areas in the City over the last decade. These water lines serve a several businesses and many residents. said lines requires shut-offs and boil alerts along this line. New W. Main St. line will replace 1800 feet of 12" line. The Cleveland St. project will replace 3000' of 6" line with 3000' of 8" line. | City of Norwalk | 6 | 31 to 90 days | \$1,040,000 |
| Huron | Water Service to Southwest Huron County | Project includes the installation of approximately 50 miles of new 4", 6", and 8" water main to serve existing homes lacking the water main route with safe and reliable drinking water. The project to located Reed Township in Seneca County and Greenfield, Greenwich, Norwalk, and Ripley Townships in Huron County. | Northern Ohio Rural Water | 25 | 91 to 180 days | \$4,600,000 |
| Huron | New Office Building | The project would include the construction of a new 7,500 square foot office building with 4,700 square foot basement. The old office building would be demolished as part of the project. Northern Ohio Rural Water has underwritten significant growth since its inception 20 years ago. The new building is slated to handle the increased number of employees and board members. In addition, the board room would be available for community gatherings. | Northern Ohio Rural Water | 40 | 91 to 180 days | \$2,300,000 |
| Huron | Norwalk Master Meter/SR 18 Water Main | The project includes the installation of approximately 1.5 miles of new 12 inch water main along SR 18 to serve as a connection between the Northern Ohio Rural Water System and the City of Norwalk. A master meter and pressure reducing station is required. This project will allow Northern Ohio Rural Water to supply the City of Norwalk's supply of their Southeast Zone. | Northern Ohio Rural Water | 15 | 31 to 90 days | \$800,000 |
| Huron | Service Meter Replacements | This project will include the retrofitting of all of their existing water meter with radio read retrofit devices. Northern Ohio Rural Water currently has approximately 9,500 service connections and nearly 10% of those have been retrofitted with radio read devices. The existing water meter technology can reduce reader error, increase reading efficiency, and provide improved metering accuracy. This project intends to install a GIS Database for Northern Ohio Rural Water. This would allow Northern Ohio Rural Water to convert its system information (As-built drawings, customer information, photographs, etc.) into an electronic format to be included in a database. This will allow Northern Ohio Rural Water to operate more efficiently in their daily tasks of providing water line locations, backlogging system information, and the overall managing of their system. | Northern Ohio Rural Water | 15 | 0 to 30 days | \$1,250,000 |
| Huron | GIS Program | This project includes the purchase and installation of emergency generators and accessories at 5 existing pump station sites in Northern Ohio Rural Water's system. The generators would provide a secondary power supply in the event of power failure. | Northern Ohio Rural Water | 5 | 0 to 30 days | \$500,000 |
| Huron | Emergency Generator Installation | This project contains the purchase and installation of emergency generators and accessories at 5 existing pump station sites in Northern Ohio Rural Water's system. The generators would provide a secondary power supply in the event of power failure. | Northern Ohio Rural Water | 10 | 31 to 90 days | \$500,000 |
| Huron | System Security Upgrades | This project contains the purchase and installation of various security upgrades at several of Northern Ohio Rural Water's facilities. The upgrades include lock replacements, motion sensors, additional lighting, etc. | Northern Ohio Rural Water | 10 | 91 to 180 days | \$300,000 |
| Huron | Green Initiative Pump Station Upgrades | The project consists of the purchase and installation of variable frequency drives and accessories for 3 existing pump stations in the Northern Ohio Rural Water system. Pump rehabilitation/modifications will also be included in the project. These upgrades will allow for the pump stations to operate more efficiently and reduce energy use. | Northern Ohio Rural Water | 15 | 31 to 90 days | \$300,000 |
| Huron | Horizontal Drilling Machine Equipment Replacement | This project includes the purchase of a replacement horizontal drilling machine. Northern Ohio Rural Water currently installs over 20 miles of water main line each year with its own fleet. The existing drilling machine has experienced heavy usage since its purchase. Due to the increased time and expenses of repairing the machine it is necessary to purchase a replacement to allow Northern Ohio Rural Water to continue to extend water service to new rural customers. | Northern Ohio Rural Water | 5 | 0 to 30 days | \$500,000 |
| Huron | New Village Hall & Police Department | Relief of new construction for a Village Hall and Police Department. The new building would accommodate the entire Administrative staff and its offices, as well as the Police Department personnel and their offices. Huron County has one of the highest unemployment rates in the State of Ohio - this project would create or retain jobs for the construction, electrical work, HVAC, telecommunications and equipment supply for the building. | Village of Monroeville | 20 | 31 to 90 days | \$500,000 |
| Huron | Water Tank Re-Painting | The painting of the 100,000 gallon Fitchville Elevated Storage Tank, 100,000 gallon Holiday Lakes Elevated Storage Tank located in Huron County and the 200,000 gallon US 8 Elevated Storage Tank located in Sandusky County. The new paint is necessary to protect against corrosion of the water tanks in an effort to maximize the useful life of the tanks. | Northern Ohio Rural Water | 8 | 31 to 90 days | \$250,000 |
| Huron | New London Water to Fitchville Pressure Zone | The project consists of the installation of approximately 4 miles of 8 inch water main and the construction of a new Pump Station to purchase water from New London Water. The Fitchville Pressure Zone is located at the southern end of Northern Ohio Rural Water's Main District. Purchasing water from the nearby Village of New London will eliminate 3 pumping stages, thereby reducing electrical costs and allowing additional capacity for the remainder of the Main District. | Northern Ohio Rural Water | 15 | 91 to 180 days | \$1,000,000 |
| Huron | Fire Station | The current station has served Norwalk well for a century. Although improvements have been made to the facility over the years and maintenance has been performed routinely, the physical condition of the station has nevertheless deteriorated. In addition, the current space requirements of the department exceed the space available at the facility. Modern equipment and tools cannot be properly and efficiently housed and maintained at the current facility. Living conditions are sub-par and the space available for ongoing training and education are inadequate. It is not practical to expand and renovate the facility at the current site. A new facility would promote "Green" Technologies, be efficient in many ways, providing an economical yet practical, state-of-the-art training/garage facility to benefit every resident by providing the best possible trained and respond firefighters. | City of Norwalk | 8 | 91 to 180 days | \$4,600,000 |
| Huron | Greenfield Elementary School | Greenfield Elementary School located at 2634 B.R. 162 W. is a non-transient, non-community system. The source of water source is groundwater well with an estimated average daily demand of 2,919 gpd. We currently sample for chlorine residuals, coliform, inorganics, Organics, Volatile Organics, Nitrate, and Copper and Lead. We have the opportunity this year to tap into the Rural Water system. This will help with water quality, consistent water pressure, and better consistency in meeting federal and state requirements. If we sign up by February 27, 2009 we will receive a \$250.00 off the tap-in fee. Also, on March 1, 2009 the cost of a tap-in will increase by \$50.00. If we act now we can save \$50.00 in savings. | Willard City Schools | 5 | 0 to 30 days | \$4,000 |
| Huron | Bleacher renovation project | We are seeking funding for replacing our bleacher at the High School. Our current stadium bleacher were installed in the 1960's and do not meet disability requirements and safety standards. We have spent a lot of permanent improvement funds just to meet insurance recommendations. This would provide a important asset to our community and school district. With the current financial constraints, we are not in a position to do this with local funds. Our school building needs are great. We have funds allocated to meet Jero's law as well. | Willard City Schools | 25 | 31 to 90 days | \$500,000 |
| Huron | High School gym floor replacement | The high school gym floor has water damage due to a broken water pipe in the late 1990's. In fixing this damage, we have one more opportunity to sand and refinish our existing floor due to numerous sandings over the years. This has been done for several years. We were hoping to be part of the Ohio Facility School Construction program but the board pulled the initiative from May's ballot due to the hardship in the Willard economy. Most of Willard's industrial base is cutting jobs. The Board felt this would be an insult to ask voters to approve an incalculable loss of approximately \$22,000,000 million at this time for our local share. The state was to provide \$22,000,000 from tobacco monies. | Willard City Schools | 5 | 91 to 180 days | \$300,000 |
| Huron | Obstruction Removal, Reconstruct TWJ, Drainage, Li | Obstruction Removal-Trees, Reconstruct TWJ B, Improve Drainage, Rehab Medium Intensity Runway Edge Lighting. | Huron County Airport | 30 | 31 to 90 days | \$1,870,000 |
| Huron | North Hyde Street Culvert Replacement | The project consists of the replacement of a substandard structure with a new culvert. There will be minimal pavement replacement. One bridge replacement with concrete pipe culvert and 200' ft of pavement replacement. | Village of Wakeman | 10 | 91 to 180 days | \$1,170,000 |
| Huron | Roof Replacement: HS Roof | The roof of the high school (1925) is in need of replacement. Several times in the last few months classrooms have been closed due to water penetration. Currently the gravity vents are being repaired to get some more time (60) to prevent water penetration. The asphalt on the older section of the school must be replaced this summer or fall. We are currently obtaining quotes to further this process along. Funds are extremely needed and only a partial fix may save time at this time. | Willard City Schools | 7 | 31 to 90 days | \$85,000 |
| Huron | Master Facility Plan: Build Three New Buildings | The Ohio School Facilities Commission determined the school buildings in the Willard School District need to be replaced. The local share must be obtained for this project. A new elementary, middle and high school to be completed in this economic environment with many layoffs and unemployed, it is very difficult to obtain community support for a new facility. This stimulus proposal would allow needed buildings to be built to replace the now aged facilities in the district. The master planning stages are complete and this building process would greatly aid the overall educational environment of the district along with stimulating the local economy. The number of jobs maintained do not cover those created in the building process. | Willard City Schools | 250 | 181 days or more | \$25,000,000 |
| Huron | Country Care | This is to aid in help the plight of various cities and country lots, as well as low income and elderly individuals clean up the yards, and maintain needed lots, even cut grass and haul back debris areas, etc. will help put some local individuals to work or back to work in various zip code areas as well as multi county. We will repair needed equipment repairs and update as needed to operate safely as well. | MAC PROPERTY PRESERVATIONS | 10 | 31 to 90 days | \$500,001 |
| Huron | Huron County Sheriff's Office Job Retention | Huron County has the highest unemployment rate in the State of Ohio. Our unemployment rate is 13.5%. As a result, our 2009 budget received significant cut. We are unable to replace 3 Dispatches that left in January 2009 and we will be losing 10+ additional members from our road patrol and corrections division. Without this funding, our road patrol division will average 13 Dispatches per shift to cover 600 square miles. These funds, if received will allow us to retain the 10 plus jobs replace the 3 Dispatches that could not afford to fill. This funding is critical for the safety and security of the Citizens of Huron County. It will allow us to retain jobs and provide a solid service to our community during these tough economic times. | Huron County Sheriff's Office | 13 | 0 to 30 days | \$936,705 |
| Huron | Restart bussiness | In addition, we are requesting funds for 9 new patrol vehicles. Each one of these vehicles has in excess of 150,000 miles on them. Officer safety becomes a real concern when utilizing older, high mileage patrol cars to respond to emergency situations. Buy foreclosed homes and remodel and sell or rent for low income families | MTB Construction | 10 | 91 to 180 days | \$500,000 |
| Huron | Emergency Medical Equipment and Station Repairs Pr | The funds would be used for purchasing a power generator for our ambulance station. Additional needs include purchasing emergency medical equipment needed for providing ambulance support to our service area. Some of these purchases include cardiac monitoring equipment, immobilization supplies, stretchers, and IV therapy supplies. Our station is taken into disrepair, collapsed sewer drain, broken lampshade in office area. We service 552+ miles in Huron and Erie counties, which is a vital important area that the state has not done. We have experienced a dramatic decrease in the number of patients requiring our service, not having medical insurance, and not paying. Citizens Ambulance Service is in a serious financial situation, as of yet, patient care has not been compromised. Moving forward, without additional funding, the ability to serve our residents will be impacted. | Citizens Ambulance Service | 20 | 0 to 30 days | \$75,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Huron | Courthouse Foyer | This would be an addition to the front entrance of the historic Huron County Courthouse. The "foyer" would enhance a two million dollar structure already existing and already owned by the County through bonds, and would also serve to enhance the courthouse security with a double-door entrance to the building. | Huron County | 6 | 91 to 180 days | \$475,000 |
| Huron | Historic County Jail | This project would be a complete renovation of the old Huron County Sheriff's residence and county jail. This structure has been designated as a historic building and is registered as such. A complete renovation will not only preserve a piece of history but will also be an opportunity to put the building back into a practical use to save county residents/taxpayers. | Huron County | 20 | 181 days or more | \$4,400,000 |
| Huron | New Soccer/Football Complex | This project will create a new soccer/football complex for use by the residents of the general Willard area. One main regulation field (suitable for high school and adult soccer) and four practice/shorter fields (for younger players of football and soccer) along with proper site drainage will be constructed on property already owned by the City of Willard. Project will also include the construction of parking and restroom facilities, stands and lighting for the primary field, stormwater management, and safety/security fencing around a storm drainage lagoon. Project will specifically serve the underserved Hispanic community of the City (county comprises 16% of the City population) as no soccer facilities exist within 15 miles of our community. | City of Willard | 3 | 31 to 90 days | \$100,000 |
| Huron | U.S. 224 Lift Station Replacement | This project will replace a deteriorating underground sewage lift station with a new above-ground station. The station will include an emergency back-up generator in case of power outages, and will also provide a chemical feed system to eliminate odors created in the subterranean force main which will run a residential area. The station is currently servicing most of the eastern portion of our highway commercial district. Currently, two of the three pumps have failed, and the underground portion is prone to electrical problems and does not meet current OSHA standards. Should the third pump fail, or some other problem which will render the station inoperable, over twenty businesses will be forced to close and 400 employees will lose their jobs. Additionally, a proposed hospital development (adding another 400 jobs in the area) would not be able to take place. | City of Willard | 491 | 91 to 180 days | \$300,000 |
| Huron | Bullhead Road Waterline Project | This project will produce 3,225 feet of new waterline, plus 4 new fire hydrants. The project will provide a secondary feed to an area that has only one line providing water, which serves almost 100 residential buildings and 2 vegetable farms. The project will also provide a "looping" of some of the lines in the area, which will improve water quality and meet the newer standards set by the Clean Water Act. Finally, the line will also provide fire protection to an area that currently has no waterlines or even ponds or streams to pump water from. | City of Willard | 800 | 91 to 180 days | \$130,000 |
| Huron | Woodbine Waterline Replacement Project | This project will replace about 1500 linear feet of deteriorated 4" waterline in a residential area serving about 29 homes, mostly low income households. Along with improving poor water quality and pressure, the lines will provide quantities that will insure adequate fire protection in this neighborhood. | City of Willard | 3 | 91 to 180 days | \$100,000 |
| Huron | New Recreation Center | This project will construct a 65,000 square foot recreation/community center in the City of Willard. The facility will include three gyms, exercise facilities, meeting spaces, and an aquatics area. Willard residents spend 5 months per year at temperatures below 50 degrees, and the nearest indoor recreation facilities are 20 miles away. This centers growth in our community, as many who can afford to choose to live in these other communities, leaving the City with a population in excess of 50% low and moderate income households. The facility is expected to serve a population of approximately 12,000 residents who live within the City and those local employees of our industrial plants and businesses. The City has been trying to get this project underway for the past 18 years, but there has not been a funding source available to provide for our residents. Without stimulus package funding and with the existing poor economy, this project will never see construction. | City of Willard | 79 | 181 days or more | \$11,950,000 |
| Huron | Sisson County Ditch / Restoration Project # 245 | 18,600 feet of old County Prison Ditch will be restored to maintain original dimensions. The channel will be re-seeded with native perennial structures will be installed to prevent re-occurring degradation. Clearing of trees will be restricted to the confines of the channel. One side only. Minimum 15' foot cool season sod berms or tree riparian will be established as filters on each side of the channel. All riparian areas with erodible soils not in crop production will be restored to higher quality wetlands. Outcome: Over 50 acres of wetland will be enhanced and/or preserved at least 6 acres of riparian created providing for high quality wildlife habitat. An estimated 100 tons or more of soil will be saved annually by the wetlands, filter strips, erosion control structures and reduced flooding of riparian. | Huron Soil & Water Conservation District | 6 | 31 to 90 days | \$350,000 |
| Huron | Coder - Wechter Upland Ditch #232 | 13,950 feet of manmade channel will be restored to original dimensions. The channel will be re-seeded with native perennial structures will be installed to prevent re-occurring degradation. Clearing of trees will be minimized to the confines of the channel and on one side only. Minimum 15' foot cool season sod berms or tree riparian will be established as filters on each side of the channel. All riparian areas with erodible soils not in crop production will be restored to higher quality wetlands. Outcome: Over 40 acres of wetland will be enhanced and/or preserved and at least 10 acres of riparian created, providing for high quality wildlife habitat. An estimated 100 tons or more of soil will be saved annually by the wetlands, filter strip, erosion control structures and reduced flooding of riparian. | Huron Soil & Water Conservation District | 6 | 31 to 90 days | \$115,000 |
| Huron | Creek | Fix and repair culvert that impedes flow of creek that prohibits use of some of our land for its intended purpose. Clearing and some clearing of the area to allow clean flow of the creek and prevent flooding of otherwise useable land. The completion of this project would allow us to pursue building of suitable ranges for fire use by our County Sheriff's Department for the training of their officers. | Fitchville Conservation League Inc. | 4 | 0 to 30 days | \$6,500 |
| Huron | Classrooms | Our organization conducts classes teaching hunter safety and the shooting sports as well as providing room for other groups to train. Our facilities are small and outdated as well as not totally handicap accessible. We need kitchen as well as restrooms updated and expanded and no classrooms to facilitate a proper learning environment. If we had a proper facility that this grant would provide, it would be available for several other entities to train in one of which would be our County Sheriff's Department. Our County is faced with many unemployed construction workers and this project would provide jobs to at least 15 of them along with the benefit of property and safely educating hundreds of young people. We have a plan to provide programs to hundreds more local individuals including bringing women and handicapped individuals into the outdoors. | Fitchville Conservation League Inc. | 15 | 0 to 30 days | \$65,000 |
| Huron | Deflection Separation (CDS) | A Continuous Deflection Separation is a more cost effective option to a lift station or on-site grinder to separate debris from sewage that flows from the Huron County jail into the City of Willard sewer system. This will eliminate the potential for an environmental problem. | Huron County | 4 | 31 to 90 days | \$40,000 |
| Huron | Ranges | Our Sheriff does not have a facility to train his Deputies, and lacks the funds and land to build one. We have the land needed but need to build a suitable range for our officers to properly train and practice. This facility would be available to them free of charge whenever they needed it. This facility would allow us to better teach and train our students in the classes we conduct. Completion of this project along with proposed classrooms included in another proposal would be a huge benefit to our financial strapped Sheriff's Department allowing them to be better prepared to protect and defend residents of our County. | Fitchville Conservation League Inc. | 5 | 0 to 30 days | \$17,000 |
| Huron | Students Afield / Grounds and Equipment | We are in need of new leadership and our collective desire is to provide a facility for and instruction to students from all seven of our County Schools, in not only the shooting sports, but conservation, wildlife, and outdoor safety. We are already conducting classes and sponsoring school programs such as Ohio Hunter Education and Archery in The Schools, the latter teaching us to over 3,000,000 students nationwide. We also want to institute programs for women and our handicapped citizens to learn to safely enjoy outdoor games. We also intend to make our facility available to our disabled Veterans, honoring them with special events for their outdoor enjoyment. We have the dedicated manpower to conduct all these programs which we anticipate would reach out to more than 500 of our residents but we lack the proper facility to do so and the funds to build it. | Fitchville Conservation League Inc. | 8 | 0 to 30 days | \$27,000 |
| Huron | U.S. 224 Improvements Project, Phase III | Will replace 1400 linear feet of highway roadway which is currently deteriorated with a similar length of three lane roadway (2 traffic lanes and one turn lane). Part of the improvements will include curb, gutter, and storm drainage to improve the life of the roadway. Will also modify two intersections to improve current hazardous conditions, including the installation of one segregated intersection at State Route 59 (three intersections primarily serve two local industries which currently employ over 2,000 between them). This is the third phase of a project that has been underway for the past 16 years. | City of Willard | 12 | 181 days or more | \$1,200,000 |
| Huron | Myrtle Avenue Improvements Project, Phase III | Will replace approximately 1900 linear feet of deteriorating roadway, replace curb and gutter, and add ADA compliant ramps or crosswalks. Project serves the Willard downtown area, a three block area of businesses and governmental/profit offices. | City of Willard | 14 | 31 to 90 days | \$119,000 |
| Huron | Myrtle Avenue Improvements Project, Phase IV and V | This project will replace 1200 linear feet of roadway surface that is in deteriorating condition. Project will also improve/replace existing storm drainage system and will add curb and gutters along the project length. Myrtle Avenue is a primary roadway in the City of Willard, and carries more traffic than any other residential or non-state route. The roadway serves as a collector road for a large portion of the residential area and two local school systems. Both private and public, and the portion is the heaviest used by the downtown area in the City of Willard. | City of Willard | 12 | 91 to 180 days | \$331,000 |
| Huron | Willard City-wide Street Improvement Program | This project will re-pave/replace the roadway of the five worst residential streets in the City of Willard. (Keebler Street, Kennedy Drive, Pearl Street, Perry Street, and West Avenue). Total length of the roadway is approximately 3800 linear feet. In areas where the roadway has not been replaced beyond paving, most of the repairs must be repeated in the majority of these streets as so poor they must be rebuilt. Improvements also include improved storm drainage (including curb and gutter) facilities. This project will not be done without stimulus funding for at least the next five years, as the City does not have any funds beyond the proposed match to repair these roads. | City of Willard | 16 | 91 to 180 days | \$3,000,000 |
| Huron | Roof Repair | Roof Repair to local Community Theatre. Because of damage there is a large hole in the ceiling and this limits our seating capacity, thus limiting its ability to offer entertainment and performing arts to the community. This theatre is located in the Historic District of Main St. in Norwalk, OH and serves as a place for Curran Call Productions, a children's theatre group to perform and rehearse as well as providing the community with other events. The theatre is a large in the Upland District and an important part of the revitalization efforts that are going on in Norwalk, OH. | Norwalk Theatre Corp. | 4 | 0 to 30 days | \$10,000 |
| Huron | Fire Doors | New Energy Efficient Fire Doors for local Community Theatre. Because the current doors have been in place since 1941 they are in disrepair with gaps at the bottoms that allow cold air in, making our heating bills very large. Also, the current "crash bars" that are on them make them very difficult to open and then re-close as they are out of alignment with the current doorframes. The doors must be changed so that no one can pry them open and break into the theatre and the theatre and the chairs must be taken off prior to every public event. This is located in the Historic District of Main St. in Norwalk, OH and serves as a place for Curran Call Productions, a children's theatre group to perform and rehearse as well as providing the community with other events. The theatre is a large in the Upland District and an important part of the revitalization efforts that are going on in Norwalk, OH. | Norwalk Theatre Corp. | 3 | 0 to 30 days | \$12,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Huron | Boiler/HVAC Repair | Boiler/HVAC Repair. Currently only one of the two boilers is operational, which means the one boiler is working twice as hard as it should be. We can't turn the heat up enough to keep our patrons comfortable as we can't afford the high heating bills. Also, the air conditioning is not operational, meaning we can't have summer events. These two issues alone have caused us to lose business. This theatre is located in the Historic District of Main St. in Norwalk, OH and serves as a place for Curtain Call Productions, a children's theatre group to perform and rehearse as well as providing the community with other events. The theatre is a staple to the Uppon District and an important part of the Revitalization efforts that are going on in Norwalk, OH. | Norwalk Theatre Corp | 3 | 0 to 30 days | \$6,500 |
| Huron | Ceiling Repair | Because of the roof leaking we have a large hole in our ceiling where the plaster has fallen through. This limits our seating capacity as we have rope off that section of approximately 100 seats. | Norwalk Theatre Corp. | 4 | 0 to 30 days | \$5,000 |
| Huron | Marquee Repair | The theatre marquee has an electrical short in it that won't allow the entire marquee to be lit. The neon needs to be repaired on 3 of the letters. This marquee is the oldest operational marquee in the state of Ohio. This theatre is located in the Historic District of Main St. in Norwalk, OH and serves as a place for Curtain Call Productions, a children's theatre group to perform and rehearse as well as providing the community with other events. The theatre is a staple to the Uppon District and an important part of the Revitalization efforts that are going on in Norwalk, OH. | Norwalk Theatre Corp | 3 | 0 to 30 days | \$10,000 |
| Huron | Solar Panels | Install solar panels on roof of theatre building. This would allow the theatre to be heated by the sun that shines every day in Norwalk, OH. This would eliminate high energy bills that allow for more money to go into programming at the theatre. This theatre is located in the Historic District of Main St. in Norwalk, OH and serves as a place for Curtain Call Productions, a children's theatre group to perform and rehearse as well as providing the community with other events. The theatre is a staple to the Uppon District and an important part of the Revitalization efforts that are going on in Norwalk, OH. | Norwalk Theatre Corp. | 6 | 0 to 30 days | \$100,000 |
| Huron | wind turbin , solar panel | Wind turbin and solar panels to generate enough electricity to power own home and possibly provide some power to electric company . | none | 0 | 31 to 90 days | \$15,000 |
| Huron | Police Funds | Money to maintain our existing police department. This will help New London be protected. We are 15 minutes away from any police protection. We are a small town 15 miles from any other town. We have lost several businesses in town, and those that are still in business have laid off workers. Our income tax is a lot lower, and our Unemployed Tax from the State has been cut by \$20,000.00. | Village of New London | 4 | 91 to 180 days | \$50,000 |
| Huron | Fiber Connectivity | This funding is being requested in order to provide fiber connectivity to South Central Local School District. Providing fiber connectivity to this district will not only benefit the schools, but will open up additional opportunities for businesses, governments and organizations in these areas to access the fiber network. | South Central Local Schools | 10 | 0 to 30 days | \$90,000 |
| Huron | South Main Street Culvert Replacement | North Fairfield Village, population 753, desires to replace exceptionally poor condition, century old, sandstone box culvert with 60 linear feet feet of all steel, elliptical, concrete reinforced pipe. Project also includes the installation of 250 linear feet of new guardrail. | North Fairfield Village | 2 | 0 to 30 days | \$87,450 |
| Huron | South Main Street Intersection Reallignment Projec | North Fairfield Village, population 753, desires to improve the alignment of the South Main Street at State Route 162. Project involves alignment of South Main Street to match the lane configurations of North Main Street via the excavation of existing approach roadway, installation of guard rail and gutter, new pavement, allowing for the re-establishment of northbound lane of South Main Street approaching State Route 162 and replacement of the North Street Bridge No. 44-23-00-30 in the Village of Phenix, Ohio. | North Fairfield Village | 2 | 31 to 90 days | \$187,593 |
| Huron | Replacement of North Street Br. No NH 253-0.39 | The existing bridge is in very poor condition, has an ODOT BR-66 inspection rating of 2P. Bridge has a Load Limit of 207,000 lbs. and is a Class II highway. | W.E. Quicksall & Associates, Inc. | 25 | 0 to 30 days | \$80,000 |
| Huron | water supply to park | Plans & Specifications are complete, project is ready to Bid and clear for Construction. There are no Environmental or Right-of-Way concerns or issues. This is a joint project with the Huron County Engineer's Office. This request is to cover the local share for the project. | village of north fairfield | 4 | 31 to 90 days | \$4,000 |
| Huron | HUR Capitalized maintenance; PID 86103 | Cap existing main water line and run 350 linear feet of new water line needed for water supply to existing park. | Ohio Department of Transportation | 1 | 0 to 30 days | \$20,760 |
| Huron | W. H. C. H. S. Rail | 2009 Capitalized Maintenance. This is a rural transit project whose funding comes through ODOT. Building and operating a high speed rail line that would connect Norwalk in Huron County with the Sandusky Mother Shrine just across the Huron-Genesee county line in Sherman Township, Huron County. The line would follow the approximately mile of State Route 47, with a stop in Monroeville and then in downtown Norwalk, a distance of approximately 14 miles. This rail service would allow pilgrims visiting the Shrine to park and shop in Norwalk before or after the trip to the Shrine. The line could also be used by commuters, tourists, sporting fans, and other annual visitors from their cars. | Meone Limited | 47 | 0 to 30 days | \$4,822,641 |
| Huron | Jamison - Smith Storm Drain #231 | Replace an inadequate rural storm outlet by replacing 4,200 feet of 12 inch rural storm drain. All surface water inlets will be protected with minimum 15 feet of soil. Outcome: Provide an adequate storm outlet for 15 homes and upland agricultural fields allowing for field, sump pump and curtain drains to function properly. | Huron Soil & Water Conservation District | 6 | 91 to 180 days | \$75,000 |
| Huron | Wastewater Treatment Plant and Sanitary Improvemen | The project includes improvements to the WWTP and to the collection system. The importance of this project is to minimize the impacts of Combined sewer Overflows and to improve treatment of the plant. The project will reduce CSO events by 75% and provide treatment for any further events. The project includes new headworks and equipment as well as repairs to existing WWTP components that have failed. The project is currently part of the Village's General Plan that has been mandated through the existing NPDES Permit. | Village of Monroeville | 120 | 91 to 180 days | \$3,500,000 |
| Huron | Todd County Storm Drain #237 | 1,000 feet of 18 inch, 1,000 feet of 15 inch and 3,000 feet of 12 inch rural agricultural storm drain. The channel will be redesigned and all erosion control structures will be installed to prevent re-occurring degradation. Minimum 15 foot cool season sod berms or tree riparian will be established as filters on each side of the channel and around all inlets to the storm drain. All existing areas with hydro soils will be stabilized with high quality wetlands. Outcome: Over 100 acres of wetland will be enhanced and/or preserved to provide high quality wildlife habitat. 600 acres of agricultural fields will have access to an adequate outlet, allowing producers to better perform and install best management practices which will save hundreds of tons of soil. | Huron Soil & Water Conservation District | 10 | 91 to 180 days | \$150,000 |
| Huron | NASA Plum Brook Airport | Project includes a new, thicker runway to accommodate larger aircraft. This expansion will open up many economic "doors" for North Central Ohio. The ability for NASA to strip specialized parts to this location potentially creates jobs and industry in the immediate and surrounding area. There are several entities will interest in this project. | City of Norwalk | 1000 | 181 days or more | \$60,000,000 |
| Huron | Neal Zick Road Waterline/Sewerline Extension Projc | Project will extend 3,407 feet of 8" waterline, 590 feet of 4" waterline, and 1,810 feet of sanitary sewer line into a area zoned Business/Commercial and/or industrial to encourage future growth. Additionally, the project will include the placement of 6 sanitary sewer manholes and 10 fire hydrants. With the construction of this line, the local hospital can afford to relocate from their current location of operations and build a new hospital in this area, thus remaining competitive in a regional market and keeping a hospital in our community. This will also make and available for other development, which has not occurred due to a lack of utilities being present. | City of Willard | 256 | 91 to 180 days | \$427,000 |
| Huron | Administration Building/Parking Lot | Completely replace the county administration building parking lot with new drainage infrastructure and resurfacing. Also to repair and/or replace deterioration building drainage and exterior seal wall damaged by the poor drainage from the parking lot. | Huron County | 8 | 91 to 180 days | \$205,000 |
| Huron | Central Ohio Wool Processing Facility | The funding received by this fiber mill will be used for equipment and working capital to expand wool processing capabilities of the mill to handle 200,000 pounds per year. Funds are needed to purchase equipment to expand processing capabilities of the mill. Objectives of the company are to increase profitability to wool farmers, create jobs and process currently discarded textile resources needed for established end users. The facility will offer the following services: production, wool scouring, blending, carding, spinning, knitting, weaving and finishing and is pursuing upholstery uses for wool. This Central OH mill has the ability to positively affect 583 alpaca farms located in OH as well as the sheep farming community. Two collaborative companies in OH that are and users with manufacturing companies are already waiting in line for products that can be produced at this mill. | Dream Messengers LLC | 20 | 91 to 180 days | \$250,000 |
| Huron | village water line replacement | replacement of existing deteriorated water lines throughout the village for residential use. | village of north fairfield | 26 | 31 to 90 days | \$1,100,000 |
| Huron | park water supply | cap main water supply line and install 350 linear feet of water line to existing park for drinking purpose. | village of north fairfield | 5 | 31 to 90 days | \$3,000 |
| Huron | Real Estate Bailout due to Haphazard Federal Progr | Requirements placed on banks and other lenders by the Federal Government that subsequently created the collapse of the housing market (see http://www.youtube.com/watch?v=6d425Z8MBN8) or any of a dozen other reports that show this to be true). Because of this, our property is worth \$50,000 less than it was when we put it on the market in 2007. Receipt of these funds will allow us to sell our house, which was our primary residence, for \$50,000 less than we had originally anticipated receiving and will allow us to avoid being in poverty - which is quite immense if we cannot sell this property for what it was originally worth. And that's not counting the loss in value of our 401(k) and other retirement funds that we had worked so hard to establish that are losing value every day because of the devastating "wealth destruction programs" of the current administration and the idiots in Congress. All we're asking for is \$40,026.87, we'd still have the other \$73.13 loss in value ourselves. The government created this mess, so it's obviously owed to us by them. | Meone Limited | 2 | 0 to 30 days | \$49,927 |
| Huron | Harry Reid Displacement Initiative | The money from this project would specifically allow a qualified candidate (specifically, myself) to move to Nevada to run against the Honorable Harry Reid and defeat him in the 2010 election because she is one of the most dangerous Congressmen that have ever served in the United States Senate and if his policies continue, our economy and our way of life in the United States will not survive. Only a small portion of the funding would be used for actual relocation and establishing a residency in Nevada, the balance would be used to mount whatever campaign it takes to wrench this seat in Congress away from his totalitarian control. | Meone Limited | 42 | 181 days or more | \$96,567,421 |
| Huron | Pelosi Displacement Initiative | Any money left over from the campaign would be returned to the businesses of Nevada that have suffered under the policies propagated by Sen. Reid in the past few years that have taken revenue away from these businesses and to buy him a one-way ticket back to his home. The money from this project would specifically allow a qualified candidate (specifically, myself) to move to the 8th Congressional District of California to run against the Honorable Nancy Pelosi and defeat her in the 2010 election because she is one of the most dangerous Congresspeople that have ever served in the House of Representatives and if her policies continue, our economy and our way of life in the United States will not survive. Only a small portion of the funding would be used for actual relocation and establishing a residency in California, the balance would be used to mount whatever campaign it takes to wrench this seat in Congress away from her totalitarian control. | Meone Limited | 48 | 181 days or more | \$51,817,445 |
| Huron | W. H. C. H. S. Rail Extension | Expanding the W.H.C.H.S. Rail line (see previous request) to reach the Village of Republic in Seneca County from the Sandusky Mother Shrine. The line would be approximately 2 miles and would allow pilgrims visiting the shrine to view all the sites in Republic and get something to eat at Fairharts. This would have a significant impact on the environment by eliminating harmful emissions from the cars of all those pilgrims. It would also lessen the wear on State Route 162 by eliminating vehicle traffic and eliminate the chance of anyone driving under the influence on their way back from Fairharts. | Meone Limited | 27 | 31 to 90 days | \$3,727,409 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Huron | Local EFSP Board for Huron County | The EFSP local board has funded 10 or so different non-profit agencies in Huron County for 28 years with emergency food and shelter. Our county is experiencing the highest unemployment in the state of Ohio. January 2009 figure was at 18.5%. We are continuing to have local businesses lay-off daily. Demand for emergency food, rent, mortgage assistance has increased as local donations (i.e. food at the food banks) has decreased. The goal at this point is to stabilize families in crisis as they look for employment in a county that has little or no jobs to offer. | United Fund, a community funder | 2426 | 181 days or more | \$20,000 |
| Huron | District Fiber Project | Connect the district to the statewide network with fiber connectivity, which is currently unavailable due to the extreme cost of build out work. This will enable the district to utilize the latest technologies (i.e. Distance Learning, On Demand Video, Web technologies in the classroom for the present and into the future. This will provide a great opportunity for the staff and students to see the benefits of fiber connectivity and provide a resource for those homes that may not have this type of access, due to location or income restraints. | New London Local Schools | 10 | 31 to 90 days | \$125,000 |
| Huron | Using a Renewable Flex Fuel to Reduce Petroleum Ba | The estimated health effects of diesel engines and dirty air have pushed the trucking industry to promote and test bio-diesel blends at higher levels. Our primary objective is to take bio-diesel blends into new partnerships which can be used with confidence and cost-effectiveness. Our diesel fuel will be safe and contain 85% B2, 85% B7, 85% B7, and B7 100 blend. Our program will be reducing the viscosity of the fuel so that it is comparable to conventional diesel fuel. Our renewable diesel starts with the same biomass materials as the current bio-diesel products, but from a more proprietary blending blend over. | J.I.B. Investments LLC | 8 | 31 to 90 days | \$60,000 |
| Huron | Energy Efficiency Project - County Courthouse | Ultimately the goal is to help reduce the the Preserving air forces that diesel engines create. This fuel will be extensively analyzed in the laboratory as well as in diesel trucks in the field. This fuel option will reduce engine emissions, improve engine efficiency, fuel processing, and CO and NOx reduction. To reduce the numerous negative health impacts which affect our workforce, production capabilities, employees and ultimately our quality of life is an objective. | Huron County Commissioners | 25 | 91 to 180 days | \$2,398,549 |
| Huron | plymouth wastewater treatment plant economic devel | The project is an enhancement of a municipal wastewater treatment plant upgrade that is designed to utilize the wastewaters of agricultural business enterprises located at the site that include but are not limited to an egg laying operation, an egg carton manufacturing business, an attached housing plant, an abattoir for cattle, hogs, and an algae growing facility. This is a public/private project working in cooperation with The Business Center for Business Development, CDFE, Cleveland State University, Ohio University, The Ohio State University Extension, Peggemeyer Design Group, Industrial Fluid Management, The Ohio EPA and the Village of Plymouth. The need for an anaerobic digester and electricity generating facility to utilize an engineered system of methane production produced from fermenting area waste streams at the site. We expect to create sustainable businesses, green energy, clean water and reduce waste that would otherwise go to a landfill. Additionally, the project will optimize local food production systems and provide low cost compost for sustainable farming practices. This would be a model for local investment opportunities anywhere. | Plymouth economic development corporation | 50 | 31 to 90 days | \$5,000,000 |
| Huron | Personal Security for Huron County | Our security program fulfills the objectives of the Stimulus Act for a provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rescue operations, animal tracking, safety of public, campus security are the groups that benefit from our device. With our high-tech mobile phone and tablet devices, we have mobile phones or motor detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can be set to monitor the location of finger notifications which would be used to monitor the location of individuals. Our device will be used to monitor the location of individuals with built-in microphones and speaker for communication. Assisted tracking solutions are small, portable, self-powered, and can be used to monitor property and equipment to set up a solar energy farm to generate electricity from the power of the sun. Land use, zoning, and equipment purchased and personnel will be trained to install and maintain equipment. Energy production will be sold to the grid with investments to continue to grow the grid. | Nuleaf Ohio Limited | 2 | 31 to 90 days | \$128,940 |
| Huron | Stahl Solar Farm | Construction of maintenance garage for use by Village forces for the protection and security of Village equipment. Approximately 100x60' | Stahl Solar Farms | 10 | 31 to 90 days | \$5,000,000 |
| Huron | Maintenance Garage | Replacement and improvement to an undrained storm sewer system at Mechanic Street and Chesnut | Village of Wakeman | 10 | 91 to 180 days | \$500,000 |
| Huron | Mechanic Street Storm Sewer Improvements | Replacement and improvement to an undrained storm sewer system at Mechanic Street and Chesnut | Village of Wakeman | 5 | 31 to 90 days | \$35,000 |
| Huron | Railroad Street Waterline Improvements | Construction of 952' of new waterline and fire hydrants along Railroad Street | Village of Wakeman | 10 | 91 to 180 days | \$125,000 |
| Huron | Water Tower Painting and Rehab | Painting of existing elevated water tower including internal repairs | Village of Wakeman | 5 | 31 to 90 days | \$55,000 |
| Huron | Wireless Broadband for Huron County | Our access system fulfills the objectives of the Stimulus Act & provides broadband to un-served and underserved areas while employing hundreds in high paying permanent jobs. This system facilitates the expansion of our existing wireless fiber network in Delaware to surrounding counties for people to use in the digital age. Ultimately, without such funds, expansion would be economically unviable due to the high cost of deployment. Despite all the funds awarded to the providers of cable and DSL, the underserved areas still exist today. Now it's the time to try something different. Rural America needs access today not the faded promise of the past. Our current approach for deployment utilizes the most cost effective wireless model available. Each dollar spent produces the most coverage per mile of any existing provider which allows low access fees and universal participation even among the low incomes and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment of the most advanced and cost effective WiMax technology available. | NexGenAccess | 17 | 0 to 30 days | \$1,700,000 |
| Huron | Vehicle Improvement or Replacement | Replace salt spreader, roller, police cruiser, utility truck, and tow wagon. Install new equipment on existing trucks in the Village of Plymouth, OH. Repair cemetery chapel, install or repair mechanical equipment in the Village of utility building, Village Hall, and police station and improve the look of the police station in the Village of Plymouth, OH. | W. E. Quicksall & Associates, Inc. | 2 | 31 to 90 days | \$80,300 |
| Huron | Village Building Improvements | Resource various streets, adjust catch basins and manholes, and build new sidewalks to school in the Village of Plymouth, OH. | W. E. Quicksall & Associates, Inc. | 10 | 91 to 180 days | \$169,000 |
| Huron | Street Pavement Improvements | New access road to the Industrial Park in the Village of Plymouth, OH. Project to provide secondary access for emergency vehicles and to help to develop the park. Some of the jobs created will come from development of the Industrial Park | W. E. Quicksall & Associates, Inc. | 100 | 91 to 180 days | \$1,209,600 |
| Huron | Industrial Park Road | 325 linear feet of new sanitary sewer line with manholes to provide separation of the existing combined storm and sanitary sewer on Willow Drive in the Village of Plymouth, OH. The existing piping will serve strictly as a storm sewer. | W. E. Quicksall & Associates, Inc. | 10 | 91 to 180 days | \$162,200 |
| Huron | Willow Drive Sewer Separation | Expansion of the existing Village Hall and Police Station to accommodate the necessary resources to provide police services to the Village of Plymouth. | Village of Wakeman | 20 | 91 to 180 days | \$500,000 |
| Huron | Police Department Expansion | Northern Region of Catholic Healthcare Partners. The core of MRW facility was built in 1930. The age of the core building and its landlocked location causes many inherent problems and inefficiencies, including inefficient patient flows, lack of patient privacy, outdated infrastructure, and overall space constraints. The most financially and operationally feasible solution that meets all the critical, current, and future needs for MRW is the construction of an approximately 101,000 square foot new hospital at a projected cost of \$45 million, which will replace the existing structure with twice twenty-five beds, adhering to Critical Access Hospital requirements, providing capability to support Medical-Surgical, Obstetrics, Swing Bed and Critical Care in an environmentally pleasing building. Construction is projected to require approximately 20 months from initial groundbreaking to opening of the new facility. This project will improve critical efficiency and technology, patient care, private rooms, and will aid in attracting physicians willing to practice in a | Mercy Health Partners | 80 | 31 to 90 days | \$43,000,000 |
| Huron | Mercy Hospital of Willard | 1,400 feet of rural storm drain will be installed to restore adequate storm protection for upland agricultural fields, 5 homes and a township road. Outcome: Provide an adequate storm outlet for agricultural fields, 2 homes and a township road, allowing field water pump and custom drains to function properly. | Huron Soil & Water Conservation District | 6 | 31 to 90 days | \$38,000 |
| Huron | Borzon - Gibson Rural Storm Drain #179 | A reinforced concrete drop box spillway will be installed to abate enhancement and severe bottom and bank erosion and protect U.S. Highway and private 2 acre pond. Outcome: Hundreds of tons of soil, 2 acre pond and U.S. Highway saved from existing stream bottom and banks. | Huron Soil & Water Conservation District | 3 | 31 to 90 days | \$10,000 |
| Huron | Wise Stream Stabilization Project | 1,000 feet of manmade channel will be restored to the original dimensions. The channel will be reseeded and erosion control structures will be installed to prevent re-occurring degradation. Clearing of trees will be minimized to the confines of the channel and on one side only. Minimum 15 foot cool season sod berm or tree riparian will be established as filters on each side of the channel. Outcome: 200 acres of upland agricultural and rural residential lands will have access to an adequate outlet, allowing producers to better perform and install best management practices which will save hundreds of tons of soil. | Huron Soil & Water Conservation District | 8 | 181 days or more | \$80,000 |
| Huron | Reilly - Skinn - Schaffer Rural Ditch #268 | 500 feet of open channel, manmade channel will be restored to it's original dimensions providing an outlet for 1,550 feet of 15 inch rural agricultural storm drain. The channel will be reseeded and erosion control structures will be installed to prevent re-occurring degradation. Minimum 15 foot cool season sod berm or tree riparian will be established as filters on each side of the channel and around all inlets to the storm drain. All existing areas with hydro soils not in crop production will be restored to higher quality wetlands. Outcome: Provide an adequate storm outlet for flooded fields, 5 homes and upland agricultural fields. 15 acres of high quality wetland will be preserved. | Huron Soil & Water Conservation District | 8 | 31 to 90 days | \$66,000 |
| Huron | C.K. Leedy Rural Storm Drain #267 | 5,800 feet of manmade channel will be restored to original dimensions. The channel will be reseeded and erosion control structures will be installed to prevent re-occurring degradation. Clearing of trees will be minimized to the confines of the channel and on one side only. Minimum 15 foot cool season sod berm or tree riparian will be established as filters on each side of the channel. All existing areas along the channel with hydro soils not in crop production will be enhanced and/or preserved and at least 10 acres of riparian created providing for high quality wildlife habitat. 200 acres of agricultural lands will have access to an adequate outlet, allowing producers to better perform and install best management practices. An estimated 100 tons or more of soil will be saved annually by the wetlands, filter strips, erosion control structures and best management practices. | Huron Soil & Water Conservation District | 8 | 91 to 180 days | \$102,000 |
| Huron | Wyandt - Donnelly Upland Ditch #266 | Restore an adequate rural upland agricultural storm outlet by replacing 5,025 feet of existing 24 inch with 30 inch storm drain, replacing 1,000 feet of 18 inch storm drain and restoring 1,600 acres of open channel to its original dimensions. All surface water inlets will be protected with a minimum 15 foot of sod. All existing areas with hydro soils not in crop production will be enhanced to higher quality wetlands. The channel will be reseeded and erosion control structures will be installed to prevent re-occurring degradation. Minimum 15 foot cool season sod berm or tree riparian will be established as filters on each side of the channel. Outcome: Over forty acres of wetland area will be preserved and/or enhanced to a higher quality wildlife habitat. Provide an adequate outlet for 21 homes and 600 acres of upland agricultural and wooded lands, allowing producers to better perform and install best management practices which will save hundreds of tons of soil. | Huron Soil & Water Conservation District | 10 | 31 to 90 days | \$435,000 |
| Huron | Schaffer County Rural Storm Drain #264 | Restore to an adequate rural storm sewer outlet by installing 1,000 feet of 12 inch storm sewer. All surface water inlets will be protected with a minimum of 15 feet of sod. Outcome: Provide an adequate storm outlet for 5 homes and County Roads allowing field, sump pump and custom drains to function properly. | Huron Soil & Water Conservation District | 6 | 91 to 180 days | \$42,500 |
| Huron | Youngman - Vera Rural Storm Drain #254 | Restore to an adequate rural storm sewer outlet by installing 1,000 feet of 12 inch storm sewer. All surface water inlets will be protected with a minimum 15 foot of sod. All existing wetlands areas along the route will be enhanced with more desirable vegetation. Outcome: Provide adequate outlet for flooded road and homes while enhancing the existing wildlife area. | Huron Soil & Water Conservation District | 6 | 91 to 180 days | \$40,000 |
| Huron | Niver Road / Holiday Lakes Rural Storm Drain #253 | Restore to an adequate rural storm sewer outlet by installing 2,500 feet of 12 inch storm sewer and install a grade stabilization structure at the culvert. All surface water inlets will be protected with a minimum 15 feet of sod. Outcome: Provide an adequate storm outlet for 15 homes and upland agricultural fields allowing field, sump pump and custom drains to function properly. | Huron Soil & Water Conservation District | 8 | 91 to 180 days | \$40,000 |
| Huron | Niver / Townline Road #12 Rural Storm Sewer #263 | This project will add stormwater pumps and 2650 linear feet of discharge piping to control an existing stormwater detention area. Also included will be the stability power generating. Restore an adequate rural storm outlet by replacing 2,500 feet of 24 inch and 4,500 feet of 12 inch rural storm sewer. A 1 acre wetland / retention pond will be constructed for storm water management and sediment retention. Two new culvert pipes will be installed under the Township Road. Outcome: 200 acres of upland agricultural runoff will be retained, allowing sediment to settle also creating wildlife habitat. 300 acres of agriculture and rural residential lands will have access to an adequate outlet allowing producers to better perform and install best management practices which will save hundreds of tons of soil. | City of Bellevue | 0 | 181 days or more | \$350,000 |
| Huron | Elm Street Flood Abatement | Restore an adequate rural storm outlet by replacing 2,500 feet of 24 inch and 4,500 feet of 12 inch rural storm sewer. A 1 acre wetland / retention pond will be constructed for storm water management and sediment retention. Two new culvert pipes will be installed under the Township Road. Outcome: 200 acres of upland agricultural runoff will be retained, allowing sediment to settle also creating wildlife habitat. 300 acres of agriculture and rural residential lands will have access to an adequate outlet allowing producers to better perform and install best management practices which will save hundreds of tons of soil. | Huron Soil & Water Conservation District | 10 | 91 to 180 days | \$250,000 |
| Huron | Rohrbach County Storm Drain #244 | | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Huron | Snyder Road Rural Storm Drain #248 | Restore an adequate rural storm outlet by replacing 1,440 feet of 15 inch and 1,800 feet of 12 inch rural storm sewer with underground agricultural fields being flooded and eroded by a recent housing development. An erosion control sod waterway and grass stabilization structure will be installed and all inlets will be backfilled with a minimum 15 feet of soil. Outcome: Provide an adequate rural storm outlet for 15 homes and upland agricultural fields. Thus allowing field, sump pump and curtain drains function properly while protecting the farmland from flooding and erosion saving hundreds of tons of soil. | Huron Soil & Water Conservation District | 8 | 31 to 90 days | \$90,000 |
| Huron | Using Insulated Concrete Forms (ICF) to provide en | This project focuses upon putting up a sample house constructed from interlocking lightweight expanded polystyrene (EPS) snap together forms. Not only are the basement walls and standard side walls built with the ICF, but also the floor systems and to Scope the stockpiles bring the facilities in the form of disease and the likelihood of fires to the United States on a yearly basis. As a businessman, I have always supported and been very much involved in mitigating the effects of hurricanes on our society. Scope the stockpiles need to be recognized for the serious health hazards they create, namely, encephalitis and the West Nile Virus from the breeding ground they provide for mosquitoes. Scope lines also when placed in the air quality and generate a black smoke containing partially combusted hydrocarbons. Also since areas are composed of 25% petroleum products by weight, this produces large quantities of pyrolytic oils which are hazardous to the environment. Our research team has come up with a viable method to reduce these quantities of oils. By encapsulating the shreds of these fires in ready-mix concrete, this problem has another innovative solution. Best forms that can produce fences, patio stones, pavers, decorative stoneware, parking blocks, landscaping cubes are vital to this process. This can be a very safe alternative which will also provide a commercial product that can aid Restoration of diversion officer. Due to economic crisis there has been an increase in property crime, burglaries etc. The need to divert from normal criminal process is increasing dramatically at the same time as government cuts have endangered the program. The diversion program in our small county is a model and other counties near at hand have no such program. Provide one or two assistants to individuals seeking assistance with or mitigate other to maintain a current living situation or to avoid foreclosures/eviction. Provide education/training on topics to include budgeting, landlord/tenant relations, home maintenance. Link with existing support services. For better, cheaper and more-efficient recyclable products such as sand, stone, cement and water. Through the recycler system, the environment is kept in a very neat fashion, plus it allows the reuse of scarce raw materials. When the concrete mixer driver discharges his slumped concrete into the receiving hopper, it is mixed with water and dumped onto the Vibrating Screens which has spray bars to wash the gravel before it falls in the stone pit. The sand then settles and travels up a screw trough and falls into the sand pit where it dries and is ready to be reused. There is a self-priming slurry pump that recycles clarified water from the settling ponds. The cement fines flow over the weirs and down to a slurry vessel where the fines are kept in suspension by intermittent agitators. This is a simplified version of the process. Detailed drawings are available that show the process in its entirety. This is a very important process to Ready-Mix concrete producer and protects the environment. | J.I.B. Investments LLC | 8 | 91 to 180 days | \$120,000 |
| Huron | Using Steel Forms and Ready-Mix Concrete to Recycl | The Huron Cement Products Co. currently is operating mixers that are 25 to 30 years old. If they could upgrade just one of their trucks to a more current model such as 2000 or 2004, it would help in reducing diesel emissions. Although Huron Cement keeps their trucks well-maintained, it would be extremely cost-effective to have a newer unit. New units for a company our size is almost impractical to consider, since they are \$175,000.00. Huron Cement has set its goal to get a newer truck into its rotation each year. However, the concerns of the present make this proactive action almost impossible to achieve. The advances in diesel technology in the past 20 years would make this a very good investment for the environment, plus a newer engine is better running and more fuel-efficient truck. Please consider the fact that a concrete mixer truck gets only 2-3 miles per gallon. 25-30 mixers with the average age at 12 years. An updated model would do much to help. | J.I.B. Facility is necessary to accommodate additional construction equipment and materials related to expansion of multi-county public water service. | Jackson County Water Company | 2 | 31 to 90 days | \$150,000 |
| Jackson | Jackson County Rain Garden Initiative | Establish Rain Gardens throughout Jackson County. OH with the assistance of the juvenile court's "Green Awareness Program" for youth educators. The rain gardens will improve water quality which is one of the pillars of the SWCD. We give the youth a series of accomplishments and teach them a trade that can be used as adults in the future. We give the youth a sense of accomplishment and we teach them a trade. I will assist us in demonstrating to the general public the importance of and the vital role the SWCD plays in preserving and protecting our precious environment while also educating the public on the need of water conservation and the tools available to do it with. We as a very underfunded district with limited resources. Outside funding is the only way we can possibly assist and educate the funding. | Jackson Soil & Water Conservation District | 4 | 0 to 30 days | \$10,000 |
| Jackson | fire district headquarters | Replace existing converted gas station with modern headquarters with fully compliant facility with public meeting room, secure offices, training room and other local housing needs and with the training room. The building will make available secure offices for the fire district and the local townships. separate technology area, cleaning area, ADA restrooms, and personal lounge along with a classroom area, none of which is available in the current facility. | madsen jefferson jt fire dist | 10 | 31 to 90 days | \$395,000 |
| Jackson | Jenkins Road Water Storage Tank Improvements Proje | The Jenkins Road Water Storage Tank Improvements Project involves the installation of a 24' roof vent, interior wet/dry sandblasting, interior coating, exterior wet/dry sandblasting, interior coating and backwashroom disposal. The existing water tank is a 11000' steel storage tank, 74 feet in diameter and 30 feet high. The Jenkins Road Water Storage Tank provides holding capacity to the entire south side of Wellston and fire protection to the General Mills industrial complex. The project is mandated by the Ohio EPA. | City of Wellston | 1000 | 31 to 90 days | \$296,766 |
| Jackson | Jackson County Green Awareness Program | Promotion of recycling at local festivals in 2 cities and 1 village as well as smaller community gatherings. | Jackson County Juvenile Court | 4 | 31 to 90 days | \$5,000 |
| Jackson | Jackson City Library HVAC Replacement Project | We would be working with the Jackson Soil and Water Conservation District. It would like to purchase reusable recycling containers to place at the festivals by each trash receptacle. We hope to reduce waste by 50% the first year, and expand the project in years to come. | Jackson City Library | 4 | 0 to 30 days | \$80,000 |
| Jackson | Sewer Collection Repairs and Water System Telemetr | Replacing 25 year old heating and cooling system in public library. Would like conversion, as well as energy-efficient system and would like to have the building insulated. It is currently operating with an antiquated boiler system and ineffective air conditioning. We have no insulation and inefficient heating and cooling bills. | Oak Hill Village | 0 | 31 to 90 days | \$184,639 |
| Jackson | Jackson County Tree Planting Project | The Ohio EPA recently mandated that the Village of Oak Hill identify and repair areas of that sewer collection system that allow excessive infiltration and inflow to enter the village's sewer collection system. The project involves repairing and relocating several areas of sewer in the Village of Oak Hill Sewer Collection System and adding telemetry at several locations in the Village of Oak Hill Water Distribution System. | Jackson Soil & Water Conservation District | 4 | 0 to 30 days | \$3,000 |
| Jackson | Jackson County Youth Education Project | Planting trees plays an important role in soil conservation. With the assistance of the juvenile courts "Green Awareness Program" for youth educators, this project serves several purposes. First, the trees protect and enhance the environment. Second, they give our area advanced sense of accomplishment and teaches them a trade that can be used as adults in the future. We give the youth a sense of accomplishment and we teach them a trade. I will assist us in demonstrating to the general public the importance of and the vital role the SWCD plays in preserving and protecting our precious environment while also educating the public on the need of water conservation and the tools available to do it with. We as a very underfunded district, and without this assistance, we cannot provide the help and education we are trying to provide. Educating the area youth is a vital role of the SWCD. If funding were available to us, we would be able to present to the public a host number of educational programs that are available today. We as a very underfunded district, with our budget allowing us to provide a host number of educational programs. By having the opportunity to be able to teach our kids the importance of and the vital role the SWCD plays in providing education programs. It is currently operating with an antiquated boiler system and ineffective air conditioning. We have no insulation and inefficient heating and cooling bills. | Jackson Soil & Water Conservation District | 2 | 0 to 30 days | \$2,500 |
| Jackson | Jackson County Rain Barrel Project | Teaching the public the importance of water conservation is one of the major duties of any SWCD. Rainwater harvesting is important because it decreases the high demand for domestic water in which residential irrigation can account for up to 40% of the consumption. By collecting the rain water and storing it in rain barrels that are located in the homes for watering lawns, shrubs, trees, and gardens and plants. In some areas as important as having water in hand for emergency situations. If we could reduce our water usage, we would be able to distribute rain barrel purchases, the SWCD believes that we can really educate the public on its importance and others will follow and expand on its example. | Jackson Soil & Water Conservation District | 2 | 0 to 30 days | \$6,500 |
| Jackson | Project Save Our Citizens | To open an inpatient substance abuse treatment center in Jackson County, an at-risk and high drug dependent community. This would employ at least 8-8 people, as well as providing a much needed system to aid our population. In reducing potential jail or prisons sentencing to aid in overcrowding, aid people in becoming well, with education and job training being taught in conjunction with 12 core principles. There is a location, which needs upgrades, as well as licensing and staffed. The income projection is estimated at 200,000 first quarter. | Substance Abuse Non Medical Treatment Center | 8 | 31 to 90 days | \$30,000 |
| Jackson | Crime and Public Safety | To replace Officers lost to budget cuts. The replacing of these officers would greatly enhance our ability to provide protection to the two foot processing plants located in Jackson County as well as additional Officers for the protection of the Jackson County Jail. | Jackson County Sheriff's Office | 3 | 91 to 180 days | \$551,130 |
| Jackson | CHIP AND SEAL FUNDING | WITH OUR SALES TAX BASE DYING UP SO TO SPEAK, OUR TAX REVENUE IS SO SHORT THAT IT WILL BE IMPOSSIBLE TO CHIP AND SEAL OUR TOWNSHIP ROADS AND STILL UPGRADE OUR TOWNSHIP NEEDS. WE ARE IN NEED OF A NEW TRACTION FOR MOVING BUT FEEL THE FUNDING FOR THE ROADS IS MUCH MORE IMPORTANT TO OUR CONSTITUENTS. THIS MONEY WOULD ALLOW US TO CHIP AND SEAL ALL OUR TOWNSHIP NEEDS. WE ARE BEING HELD BACK BY SOME UNDESIRABLE BUREAUCRATS DUE TO PRIORITY TRAFFIC AREAS BEING NEEDED TO BE PAID FIRST FOR SAFETY OF OUR SCHOOLS, BUSES AND TRAVEL FOR THE PUBLIC. OUR TAX MONEY JUST DOES NOT STRETCH FAR ENOUGH TO COVER SOME THAT ARE IN DIRE NEED HERE IN OUR TOWNSHIP. THIS GRANT WOULD ALLOW US TO PAID ALL OUR BESTER ROADS IN THE TOWNSHIP AND THEN WE WOULD BE ABLE TO KEEP UP WITH PATCHING AFTER THAT MUCH BETTER. THIS WOULD BE VERY BENEFICIAL TO OUR FARMERS, SCHOOLS, AND THE GENERAL PUBLIC FOR THEIR USE AND SAFETY. | SCIOTO TWP. TRUSTEES | 5 | 31 to 90 days | \$119,000 |
| Jackson | FAIR SWINE BARN BUILDING | WE ARE BUILDING A NEW SWINE BARN FOR OUR 4-H AND 4-H YOUTH AND THE COUNTY. WE ARE TRYING TO RAISE THE NEEDED FUNDS, BUT IN THIS ECONOMY IT IS IMPOSSIBLE TO PROJECT WHAT WE CAN DO. THE OLD BUILDING IS GONE AND THE FAIR IS IN JULY. WE NEED TO BEGIN BUILDING IN ORDER TO BE READY FOR THE 4-H FAIR DISPLAYS FOR THE ANIMALS. THIS WORK WILL BE DONE BY LOCAL JACKSON COUNTY FARMERS AND THEREFORE THE MONEY WILL BE KEPT IN THE COUNTY AND HELP OUR TAX BASE, FAMILY INCOME AND KEEP JOBS IN OUR COUNTY. THIS IS AN EDUCATIONAL PROJECT FOR OUR YOUNG PEOPLE IN JACKSON COUNTY AND IS NEEDED TO HELP EDUCATE OUR FUTURE FARMERS AND FUTURE BUSINESS PEOPLE. | JACKSON CO. FAIRBOARD | 10-20 | 31 to 90 days | \$75,000 |
| Jackson | Jackson City Library Replacement Roof | New roof for an approximately 10,000 square foot public library. | Jackson City Library | 6 | 91 to 180 days | \$100,000 |
| Jackson | station replacement | replace a 1960 converted gas station used as the station with modern building with handicap access, secure offices, technology equipment classroom, and site bathroom facilities and a public meeting area. By replacing the current facility, the building will be more energy efficient, be totally separated from the garage area, provide a quality classroom area, and offer an accessible public meeting area for use by township officials and other public groups. | madsen jefferson jt fire dist | 10 | 31 to 90 days | \$395,000 |
| Jackson | DV Shelter and Services | The plan is to hire one full time and one part time person to assist our DV victim assistance and shelter program. Right now two advocates work full time during the day and also cover our 24hr program over night and weekends. That means that if one works days and is scheduled to cover phones, she must have work and take a mobile phone with her to be on call over night until the workday starts again the next day. If we had a couple of extra phones to take phones, the advocates could have some time until a call came for an advocate. Each of the two of us work 40 to needs and cover phones on average of 200+ hours over night and weekends. It can be a strain on our lives not to be able to leave town to shop or go to a movie for fear of a call from law enforcement or the hospital. We would be able to train two new people who would then have added training to add to their resumes. We also would need two or three additional phones and pay us to allow those extra individuals and our present Advocates to all pay a phone with them to cover overnight calls. Total budget for this program would be \$37,500 which would help us greatly for the next year. | Community Assault Prevention Services | 2 | 0 to 30 days | \$37,500,000 |
| Jackson | Food Waste to Energy digester project | Our project is to take food waste now being land applied and create methane out of it. The project is to build a 5.5 million gallon digester grind up our food waste and create methane which we will use in three of our nine boilers. The project involves running a 6" pipe line about 1,000 feet to hot boiler house from the digester. The project saves our food waste being trucked to a landfill. The amount of methane produced is 120,000 cubic feet of gas a day. At a value of \$800,000 a year. This project saves trucking and landfill costs of \$450,000 a year. The project also eliminates our carbon foot print. Because the food is being land applied and trucks not taking it to a land fill we will reduce CO2 emissions by 43,000 tons a year. In addition the digester is built on site using all local labor and materials. This project will allow our plant which now employs 1,200 people to expand for the future. It will allow us to increase our daily flow capacity from 750,000 gallons a day now to 1,200,000 gallons a day for future. | Belislio Foods | 30 | 31 to 90 days | 6,200,000,000 |
| Jefferson | Fire Station Rehabilitation | The Tiltonville Volunteer Fire Department is attempting to rehabilitate its current fire station built in 1950 by removing existing asbestos, replacing floor and window insulations that are beyond repair, replace or repair damaged masonry joints in walls and siding, re-sealing a turn out gear area for firefighters to replace existing areas that is not to the engines and emergency medical unit which creates a safety hazard by the mixing apparatus and diesel exhaust fumes that are carcinogenic, installing a diesel exhaust system to prevent such harmful exhaust, incorporate a diatom system that would allow apparatus coming back from an incident to drain any excess away from foot travel areas, remove existing structure to bring station into code, paint exterior building, create handicapped accessible entrance to building for use during elections, create handicapped accessible apparatus hall by incorporating a two (2) stage chair lift, and incorporating existing restrooms to allow for handicapped access. In general, the station has served well for years and it needs desperate repairs to stay viable now and well into the future for fire-responses operators in the Village of Tiltonville, Ohio. | Tiltonville Volunteer Fire Department | 12 | 31 to 90 days | \$300,000 |
| Jefferson | Community Disaster Center | Stimulus funds would create a disaster center in Salem Township, Northern Jefferson County. Currently there are no buildings in the township that can be used as a Disaster Center. For this reason the Salem Township Board of Trustees and the Richmond Volunteer Fire and Rescue Company, Inc. have agreed to work together to equip an existing facility, within 100 yards of each other, into a disaster center. Lack of funding prevents the upgrade of these buildings into Disaster Centers for residents in the communities of Richmond, Annapolis, Fairfield, and East Langleyville, Ohio. The Community Disaster Center would be equipped with generators, cots, blankets and phones that provide emergency lighting, heating, cooling, and access to basic medical treatment, shower facilities and hot meals during a disaster. | Salem Township, Jefferson County | 0 | 181 days or more | \$211,827 |
| Jefferson | Crestview/Belevedere | Currently, the homes located in the Crestview/Belevedere area in Jefferson County are served by individual septic tanks and leach fields. After receiving several written complaints regarding serious sewage disposal problems, from September of 1988 through June 1994, representatives from the Ohio EPA inspected the subdivisions in this area and found evidence of failing sewage disposal systems and unsanitary conditions. Based on these investigations, the Jefferson County Board of Commissioners was ordered to abate the unsanitary conditions in this area. | Jefferson County | 30 | 0 to 30 days | \$10,100,000 |
| Jefferson | City of Steubenville Municipal Building | This building will serve as a replacement of a severely deteriorated building the City uses for its municipal operations. The building, erected in the early 1900's, is a 2 story structure which is not handicap accessible. The facade on the front of the building is in danger from the deterioration of the support structures. Repairing this structure is economically unfeasible. New construction may offer private investments. | City of Steubenville | 40 | 0 to 30 days | \$7,000,000 |
| Jefferson | Intersection of University Boulevard and SR 7 | In 2006, the Fort Steuben Bridge over the Ohio River is scheduled for closure. This closure will force approximately 4500 vehicles per day to use the Veterans Memorial Bridge. In addition, the Market Street Bridge is also in poor condition. This bridge is also in danger from the deterioration of the support structures. Repairing this structure is economically unfeasible. New construction may offer private investments. | City of Steubenville | 40 | 0 to 30 days | \$25,000,000 |
| Jefferson | Brilliant ("A") Booster Station | The booster pump station is designed to service 400 customers. Due to the expansion of the County water system, that pump now supplies 1,207 customers, an increase of 60%. A significant increase in system demand with no capital improvements has increased the main line between failures on the equipment. This undersized pump now operates 24 hours a day to meet customer demand. In order to ensure the reliability of the system is considered to be substandard. Repairs are performed on an emergency basis due to the number of customers served by the system. | Jefferson County Water and Sewer | 40 | 0 to 30 days | \$2,725,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Jefferson | SR 7 (Dean Martin Blvd) Rehabilitation/Resurfacing | State Route 7, a National Highway of Significance (NHS) is a north-south principle arterial through the City of Steubenville, carrying over 19,000 vehicles per day. The roadway was last repaved in 1988 and currently is in poor condition. Roadway lighting system is over 25 years old. This road is in major need of resurfacing. | City of Steubenville | 30 | 0 to 30 days | \$5,100,000 |
| Jefferson | Lovers Lane Widening and Reconstruction | The project involves widening the roadway to 2 + 2 travel lanes, including a 6-ft turn lane at the intersection of Mail Drive and Lovers Lane. This area serves as a major collector street in the City of Steubenville carrying approximately 12,000 vehicles per day. This street is a major corridor that provides access to many businesses. The roadway was constructed in 1929 and the current lane width is 9 feet. Major maintenance has been performed over the years but the road is in very poor condition. | City of Steubenville | 60 | 0 to 30 days | \$3,600,000 |
| Jefferson | Steubenville Marina Improvements | This project will develop the Marina according to the master plan prepared by the City in 2003. Plans call for the paving of several parking areas for visitors as well as vehicles with trailers, the construction of a community center overlooking the Ohio River and improvements to the boat launching area including tie off docks. Also, the installation of a new water line to provide fire protection and adequate water supply for drinking and restroom facilities and extension of the Marina access road approximately 1000 feet south of the current access to improve access to SR 7. | City of Steubenville | 20 | 0 to 30 days | \$2,800,000 |
| Jefferson | Patrol Enhancement | To reduce the amount fuel used in the day to day operations of Law Enforcement by purchasing new LED Lightbars, and new hybrid (green) patrol vehicles. The funding would provide a local vendor work. | Jefferson County Sheriff's Office | 5 | 31 to 90 days | \$150,000 |
| Jefferson | SR 43 (Washington Street) - Seventh Street to Bell | Jefferson County is a very poor county located on the Ohio River, where the county has suffered massive job losses from the Steel Industry. State Route 43 (Washington Street) is an east-west arterial through the City of Steubenville carrying over 15,000 vehicles per day. The roadway was built in 1973 with minor rehabilitation completed over 5 years ago and concrete pavement is in poor condition. The proposed project involves concrete pavement replacement, spot roadway base repair, spot curb repair, catch basin replacements where needed, guardrail replacement, street lighting replacement, traffic sign replacement and pavement markings. | City of Steubenville | 20 | 0 to 30 days | \$2,600,000 |
| Jefferson | Countywide Broadband Service for Jefferson County | The goal of this project is to expand broadband services to all parts of the county. The first phase will involve bringing the service to Jefferson County Industrial Park on Technology Hwy. Once completed, current concepts of the park will have access to high-speed internet service as well as improved telephone services. This will attract new business to locate in the industrial park and promote economic growth. The next areas of concern are the small municipalities in the county i.e. Aronson, Springport, Beeghly, etc. | Progress Alliance | 12 | 0 to 30 days | \$275,000 |
| Jefferson | Jefferson County Airpark/Expansion and creating a | This project consists of a runway extension, construction of a corporate hangar, completing a parallel taxiway and procuring an Automated Weather Observation System (AWOS). The park also has 280 acres of shovel-ready sites for development. This area could serve as a spring board for major economic development. | Jefferson County Airpark | 70 | 0 to 30 days | \$2,530,000 |
| Jefferson | Long Term Control Plan | The proposed project involves the installation of strategic sewers to re-route storm water flows to storm sewers and replacement of specific sewer segments to address infiltration issues and to actually eliminate six of the eight CSOs. The remaining two CSOs (at the City two sewage pump stations) are deemed to be "sewer mechanical or other failure in the collection system". The LTCP reports further status base "overflows will be monitored to eliminate inoperative bypasses". | City of Toronto | 15 | 0 to 30 days | \$1,000,000 |
| Jefferson | Washington St Rehabilitation | SR 43 (Washington St) is an east-west arterial through the City of Steubenville carrying over 15,000 vehicles per day. The roadway was built in 1973 using concrete pavement. Recent ODOT PCR numbers are 50, 52 and 40. The eastern part is four lane with integral curb, the center is four lane with raised medians with paved shoulders and the western part is four lane with separate curb and gutter. Retaining walls exist on the eastern end of the project and existing signs of deterioration requiring repairs as directed. The proposed project involves concrete pavement replacement with asphalt concrete, spot roadway base repair, curb replacement, catch basin repair, catch basin replacements, guardrail replacement, street lighting replacement, retaining wall repairs, well repairs, pavement markings. | City of Steubenville | 50 | 91 to 180 days | \$7,500,000 |
| Jefferson | Sunset Blvd Rehabilitation | The project will be delivered using design-build process which enables quick project construction start. All work is within existing road right-of-way and no roadway geometry changes are proposed. ODOT PID is 25497 and project length is 4300 feet on mainline and 3700 feet on the ramps. | City of Steubenville | 38 | 91 to 180 days | \$1,800,000 |
| Jefferson | Alexander St Rehabilitation | SR 43 (Sunset Blvd), is an east-west arterial through the western part of the City of Steubenville carrying over 15,000 vehicles per day. The existing asphalt roadway was last resurfaced in 1996 and is currently a candidate for rehabilitation with ODOT PCR numbers. The roadway cross section is four lanes with curb. The roadway is widened at three intersections for left turning traffic. The proposed project involves milling existing asphalt pavement, replacement with asphalt concrete pavement, installation of handicap ramps at intersections, spot curb repair, catch basin replacements and pavement markings. The project will be delivered using design-build process which enables quick project construction start. All work is within existing road right-of-way and no roadway geometry changes are proposed. ODOT PID is 25577 and project length is 13,500 feet on mainline. | BHM Metro Planning | 11 | 91 to 180 days | \$470,000 |
| Jefferson | Jefferson County Senior Center Project | Alexander Street is the only street serving the State Route 7 interchange connecting the north end of the city of Toronto to State Route 7. Alexander Street was originally constructed in 1949 in conjunction with the construction of State Route 7, a four lane divided limited access highway. Alexander Street consists of reinforced concrete which is in various degrees of deterioration. The project will rehabilitate the deteriorated concrete pavement for the entire 0.2 mile length of Alexander Street. Concrete rehabilitation techniques include full and partial depth pavement repairs and diamond grinding the concrete surface. Treated shoulders will be constructed and/or improved. Precast solid panels will be added at both ends of the existing bridge. Guardrail will be brought up to standards where necessary. Concrete barriers will be added under the State Route 7 bridge to protect motorists from the bridge piers located within the clear zone. Improvements will be made to the existing curbs and catch basins. | Jefferson County Senior Services | 50 | 31 to 90 days | \$400,000 |
| Jefferson | FSA Behavioral Healthcare Initiative | Jefferson County currently does not have a multi-purpose senior center in the county. The newly formed organization, Jefferson County Senior Services recently acquired an elementary school building no longer in use by the Steubenville City School system. This organization will serve as the host point for senior services using Title II of the Older Americans Resource Act as well as local funds for congregations & home delivered meals, transportation and health education. An estimated 100 congregate meals will be served daily as well as preparing and packaging 600 meals daily for home delivery. An estimated figure of 300 people will participate in a daily exercise program to be offered in the gymnasium. This project will create 20 jobs for the renovation of the school building and employment of 25 staff for the management and daily operation of the program offered through the senior center. Additionally, the quality of life for the age 65+ residents of Jefferson County will improve as they will have a senior center that will provide high quality nutritious meals as well as social and recreational activities in an accessible setting. | Family Service Association of Steubenville | 10 | 0 to 30 days | \$100,000 |
| Jefferson | County Road Resurfacing | Funding for counseling services for mental health and drug addiction problems for low income residents is being cut or eliminated. This results in those citizens being unable secure treatment for their mental illness and/or drug addiction. This creates a barrier for them and they are unable seek and secure suitable employment. This proposal is to help those that in need overcome these critical barriers (mental illness and addiction). Expected Outcomes: Provide counseling and case management services to eliminate the employment barriers of mental illness and drug and alcohol addiction for 100 low income or unemployed residents. To provide case management services to 100 residents to enable them to seek productive employment. | Jefferson County Engineer's Department | 20 | 31 to 90 days | \$3,750,000 |
| Jefferson | Friendship park wwppt | Resurfacing, base repair & guardrail for Jeff County Roads 20A, 21, 34, 46, 158, 10. Approximate 24 miles of road to be resurfaced. | Jefferson County | 10 | 31 to 90 days | \$50,000 |
| Jefferson | Picking up Ohio | Wastewater facility consisting of aeration lagoon storage lagoon trash trap, flow filters, chlorine contact tank and auxiliary equipment. Clean up all down trees and branches in area. Turn down trees into firewood and sell. Pick up all trash along roads. Replace and repair hanging along roads. Build and put up lost leaders. Haul stone in and put on muddy roads. Place trees that will be worth something in 40 yrs Plant equipment to enjoy falls the state owns. | None | 25 | 31 to 90 days | \$75,000 |
| Jefferson | Wintersville Family Aquatic & Senior Citizens Cent | Indoor/Outdoor pool. Therapy pool. Senior Citizen Complex. Bathhouse. Filtration and backwash system. Pumps and piping. HVAC systems. | Village of Wintersville | 50 | 91 to 180 days | \$9,822,000 |
| Jefferson | Fernwood Rd./Cross Creek Rd. Upgrade & Resurfacing | 1150 CY pvmf paving 1118 CY asphalt concrete; 252 CY asphalt base repair; 1006 LF Bitring; 2100 LF guardrail replacement; 900 LF concrete curb; 500 LF sidewalk with retaining wall; 500 LF culvert replacement; 500 LF new culvert; 6 EA, catch basins; TUR02 | Village of Wintersville | 20 | 31 to 90 days | \$595,000 |
| Jefferson | Knoll's Waterline Replacement & Resurfacing | 4175 LF 6" D.I. waterline; 10 EA. Fire Hydrants; 53 EA. Service connections; 6 EA. 6" valves; 40 CY asphalt concrete; seeding & mulch 4000 sq ft mowing; 200 CY base repair; 440 CY asphalt base; 315 CY asphalt top; 2657 LF Bitring; 5373 LF concrete curb; 26 EA. catch basins; 1750 LF 12" culvert | Village of Wintersville | 20 | 31 to 90 days | \$595,000 |
| Jefferson | Luray Drive Reconstruction & Upgrade | 86 Manholes replacement; 13 Lift stations - electrical panels rehab, pumps replaced, generators installed. Grit Removal system installed at WWTP. Underground wiring at WWTP replaced. Generator installed. New pumps and valves. Replace heating system in pumphouse. New electrical panel and wiring. New connections and drives in existing water transmission line. | Village of Wintersville | 20 | 181 days or more | \$2,900,000 |
| Jefferson | Wastewater System Rehab & Upgrade | Submittal pumps at WWTP replaced. Wiring at WWTP replaced. Pumps and motors at clarifiers and EO basins replaced 7700 LF curb, 22 EA. catch basins, 350 LF 12" culvert pipe, 175 CY asphalt base repair, 700 CY asphalt surface, 110 CY asphalt for driveway improvements. | Village of Wintersville | 20 | 181 days or more | \$525,000 |
| Jefferson | Potable Water Pump Station Rehab & Upgrade | 3015 LF 6" D.I. Waterline replacement, 184 EA. service connections, 11 EA. Fire Hydrants; 22 6" valve replacements; 1200 CY asphalt base, 3000 CY asphalt top; 16,800 LF curb; 46 EA. catch basins; 3500 LF 12" culvert pipe. | Village of Wintersville | 20 | 91 to 180 days | \$4,125,000 |
| Jefferson | WWTP Electrical & Pump Rehab | 2070 LF 6" D.I. Waterline replacement; 4140 LF curb; 12 EA. catch basins; 900 LF 12" culvert pipe; 100 CY asphalt base; 510 CY asphalt top. | Village of Wintersville | 20 | 91 to 180 days | \$425,000 |
| Jefferson | Eisenhower, Patton [eta]l Curb & Resurfacing | 2 replacement buses for the Steel Valley Regional Transit Authority. Computer hardware updates/replacement for the Steel Valley Regional Transit Authority. | Ohio Department of Transportation | 3 | 91 to 180 days | \$150,000 |
| Jefferson | Beechwood/Meadowbrook Waterline Repl. & Street Rec | Computer hardware updates/replacement for the Steel Valley Regional Transit Authority. | Ohio Department of Transportation | 1 | 31 to 90 days | \$25,000 |
| Jefferson | Lucust St. Waterline repl. & Street Reconstruction | Synchronization of modal center phase 2 for the Steel Valley Regional Transit Authority. | Ohio Department of Transportation | 0 | 31 to 90 days | \$15,000 |
| Jefferson | Dist 11, PID 85938, SVRTA security system | Passenger shelter replacement for the Steel Valley Regional Transit Authority. | Ohio Department of Transportation | 4 | 181 days or more | \$185,000 |
| Jefferson | Dist 11, PID 85938, SVRTA computer hardware | Administration building repairs for the Steel Valley Regional Transit Authority. | Ohio Department of Transportation | 1 | 31 to 90 days | \$60,000 |
| Jefferson | Dist 11, PID 85942, SVRTA Modal center phase 2 | Maintenance shop equipment for the Steel Valley Regional Transit Authority. | Ohio Department of Transportation | 3 | 31 to 90 days | \$135,000 |
| Jefferson | Dist 11, PID 85944, SVRTA shelter center replacement | Scheduling/patch software for the Steel Valley Regional Transit Authority. | Ohio Department of Transportation | 1 | 31 to 90 days | \$30,000 |
| Jefferson | Dist 11, PID 85937, SVRTA facility rehabilitation | The Village of Richmond is currently saved by falling on lot systems resulting in the direct discharge of gray water and untreated or partially treated sewage to the environment. Due to restrictive soils and small basins, the use of on-site disposal systems is ineffective. Over 25 years ago, septic and septic waste were sampled and local coliforms as high as 200,000 CFU were detected. Although more recent data is not available, conditions have only deteriorated over the last 25 years. The Village of Richmond wants to develop an affordable system that will improve the health and safety of the residents and that will estimate the adverse environmental impacts due to the failing on-site systems. The Village of Richmond is seeking a centralized collection system with a pump station and force main for treatment at the Village of Wintersville's wastewater treatment plant. Specific improvements will include 31,420 linear feet of sanitary sewer, 9750 linear feet of force main, 12700 linear feet of service connections, 6 duplex submersible pump stations, 8 grinder pump stations, and 108 manholes. The project will be ready for construction in 2010, but funding is also needed for design. | Ohio Department of Transportation | 1 | 91 to 180 days | \$60,000 |
| Jefferson | Dist 11, PID 85940, SVRTA maintenance shop equipme | Development of an electronic health record sponsored by Trinity Health System for Jefferson County, located in Eastern Ohio that meets national healthcare IT standards and encourages high health care providers. Jefferson County is experiencing high unemployment (8.8%) and is located in an economically depressed region in which 71% of it's residents are state and federally funded for health care. A fully integrated IT system would allow providers to access real-time patient health information across the health care system, improve patient care, improve infrastructure development, training, telemedicine, and use of IT for clinical/patient education. Computerized order entry and e-prescribing for physicians will be a result of the effort. The project would employ over 250 people in a variety of industries from construction, IT, and healthcare. | W.E. Quicksall and Associates, Inc. | 0 | 181 days or more | \$4,125,000 |
| Jefferson | Dist 11, PID 85943, SVRTA Scheduling/disp software | Integrated Electronic Health Record for Jefferson County. | Trinity Health System | 250 | 0 to 30 days | \$23,100,000 |
| Jefferson | Village of Richmond - Centralized Wastewater Colle | Replace existing chlorine gas disinfection with ultra-violet disinfection. 8 long fluorescent bulbs. Upgrades to existing power supply and a stand alone generator. | Village of Wintersville | 5 | 91 to 180 days | \$475,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Jefferson | Smithfield Building Project | We are looking to build a new fire department, to better serve my community and surrounding areas. We are a non profit organization, so if we would get the money for a new building then it would create jobs for the Ohio valley and surrounding areas to do the construction. | Smithfield Volunteer Fire Department | 0 | 31 to 90 days | \$300,000 |
| Jefferson | WWTP Effluent Disinfection | Install 8' ultraviolet lights. Upgrade existing electrical supply. Install stand alone generator. | Village of Wintersville | 5 | 91 to 180 days | \$475,000 |
| Jefferson | Manhole replacement/Relining | Replace 15 manholes in Village of Mt Pleasant severely corroded due to hydrogen sulfide. Clean and Line Main lift station that pumps all of Village of Mt Pleasant sewage to Dillonvale sewerage treatment plant. Clean and relining for manholes in the Village of Dillonvale and one lift station that have significant hydrogen sulfide corrosion. However they can be cleaned and lined to prevent further corrosion. Replace 150 linear feet of sewer line. Identified through leaking as having collapsed pipe in their backyard is a small village of 434 people in southern Jefferson County along the Ohio River. It provides water service to approximately 175 households and a small number of businesses. The Madson Household Income from the last census was only \$27,386. One of two main water transmission lines running through the center of town must be replaced. The cast iron pipe is over 50 years old, and is severely tuberculated on the inside. Ohio EPA has advised the Village to replace this line. Restricted flow through the existing line has also impeded the fire departments ability to fight fires over the past two years. Approximately 5,800 linear feet of pipe will be replaced along with 12 fire hydrants. | Dillonvale-Mt. Pleasant Wastewater Sewer District | 10 | 31 to 90 days | \$250,000 |
| Jefferson | Village of Rayland Waterline Replacement Project | Appropriation funds will be spent on construction. The total project budget of \$640,000 includes: • \$208,100 for construction and testing • \$53,400 contingency • \$33,000 design engineering • \$156,000 engineering services during construction. It should be noted that this project is more expensive because the line installation must be done underneath the roadway and sidewalks. A short preliminary engineering report is available describing the project costs. | Village of Rayland-WSO Community Action Commission | 0 | 91 to 180 days | \$640,000 |
| Jefferson | Wastewater Treatment Plant Replacements | The wastewater treatment plant was constructed in 1982. The wastewater treatment plant is comprised of concrete tanks with miscellaneous metals and mechanical treatment equipment in the tanks. The different metals and the treatment equipment have reached the end of their service life due to corrosion and general wear and tear. The operators spend increasing amounts of time repairing equipment, replacing broken items, etc. These expenditures deplete the operating revenue of the District. The treatment equipment and miscellaneous metals within the plant need to be replaced to allow the plant to maintain cost effective treatment and to comply with their NPDES permit. | Dillonvale-Mt. Pleasant Wastewater Sewer District | 12 | 0 to 30 days | \$600,000 |
| Jefferson | Sloop Water Line Project | This area of our village uses for customer water supply lines that about 30 years ago the residents themselves salvaged from a junk yard the pipe was the welded refrigeration condenser line from discarded air conditioning to repair a customer service we had to dig over 200 feet back to find a section of water line that was not totally rotted away. There are about 5000 feet of this kind of water line, we wish to comply with code. That this present 1" inch be replaced with 1/2 inch black plastic main line with hydrant connections. | Smithfield Village Public Water Department | 10 | 181 days or more | \$200 |
| Jefferson | The Valley YMCA of Jefferson County | Market research and an architectural plan have been completed on the project. The current economic conditions have limited the short term feasibility of the project though due to the lack of financing options and limited access to charitable contributions through local foundations because of the current state of the investment markets. A key to the success of the Centers development will be the joint commitments of the three partnering entities as they leverage their efficiencies and economies of scale that typically result from such collaborations in community center developments. The projected square footage of the facility is approximately 58,000 sq. ft. It will create much needed health and fitness facilities in a Appalachian region of Ohio. | East Liverpool Area YMCA | 185 | 31 to 90 days | \$9,814,000 |
| Jefferson | Storm Water Project | To replace the current storm water drainage system that was installed in the 1930's. Adena is an area that has been flooded numerous times in the past 30 years and the current drainage system is not adequate due to deterioration, size, increase in surface water. | Village of Adena | 10 | 31 to 90 days | \$1,500,000 |
| Jefferson | Green Power | The Jefferson County Justice Center would install a Utility scale solar electric power system which does not have a battery or related battery equipment. It has one tandem only. It feeds all electric power generated by the solar panels through a synchronous utility-grade inverter and offsets the power you would normally consume from the utility company. This is an extremely popular system because there are no batteries to replace and the system costs less than other solar systems. It essentially wakes up in the morning and shuts down in the evening. This system is great for our building because we already have a back up generator. This system is simple and cost effective. The average utility cost for the Justice Center is 200,000.00 to 300,000.00 per year. The funding would pay for itself within several years after installation. | Jefferson County Sheriff | 10 | 31 to 90 days | \$950,000 |
| Jefferson | Medical Operating System | We are a health information technology company based in Seubenville. HR 1 provides 17 billion dollars in incentives to physicians for utilization of electronic health records. We have developed a web-based electronic health record platform, which we believe will take a substantial market share (or a huge and rapidly growing market). Our short term goal is to gain and hold a significant market share of the electronic health record market. Our long term goal is to establish a technology center in Jefferson County (and the surrounding area), and to utilize our existing contacts to procure jobs from India and southeast Asia. We are all Ohio Valley residents with families. We hope that we can create jobs and opportunities for our neighbors, and give our children a shot and a job to come back to someday. | Heartcom, Inc | 200 | 31 to 90 days | \$10,000,000 |
| Jefferson | OME-RESA Rural Broadband to Education | To provide Broadband access to rural school districts in 4 counties in mid-eastern Ohio. | Ohio Mid-Eastern Regional Education Service Agency | 40 | 91 to 180 days | \$400,000 |
| Jefferson | Jefferson County Animal Shelter | Jefferson County has passed a levy to construct a new animal shelter. Additional funds would be used to provide energy efficient measures such as geothermal heating, solar panels, increased insulation and water saving fixtures. | Jefferson County | 40 | 91 to 180 days | \$250,000 |
| Jefferson | WWTP and Lift Station Replacements | Current wastewater treatment plant and one lift station were constructed in 1984. They are past their service life and need completely replaced. A new plant and lift station would be constructed on same site above the flood plain. Part of the current plant would be used for equalization of infiltration/flow which is a severe problem for the Village. | Village of Adena | 11 | 181 days or more | \$2,000,000 |
| Jefferson | Manhole Replacement/Relining and Sewer Main Replac | Replacement of 15 manholes in the Village of Mt. Pleasant that have severely corroded due to hydrogen sulfide attack. The new manholes will have a special liner to protect the concrete from the hydrogen sulfide. The main lift station that pumps all of the Village of Mt. Pleasant's sewage to Dillonvale will be cleaned and lined to protect it from corrosion. In the Village of Dillonvale, there are 10 manholes and one lift station that have experienced significant hydrogen sulfide corrosion. However, these can be cleaned and lined to protect them from further corrosion. Additionally, there are portions of these sections of sewer line that have collapsed and need to be replaced with new sewer line. The design, drawings and specifications for this project are complete. Project is ready for construction. | Dillonvale-Mt. Pleasant Wastewater Sewer District | 6 | 31 to 90 days | \$250,000 |
| Jefferson | Wastewater Treatment Plant Replacements | The wastewater treatment plant was constructed in the early 1980's. The plant is comprised of concrete tanks with miscellaneous metals and mechanical treatment equipment in the tanks. The different metals and the treatment equipment have reached the end of their service life due to corrosion and general wear and tear. The operators spend increasing amounts of time repairing equipment, replacing broken items, etc. These expenditures deplete the operating revenue of the District. The treatment equipment and miscellaneous metals within the plant need to be replaced to allow the plant to maintain cost effective treatment and to comply with their NPDES permit. | Dillonvale-Mt. Pleasant Wastewater Sewer District | 11 | 91 to 180 days | \$700,000 |
| Jefferson | Ohio Appalachian Community Economic Adjustment Ass | In collaboration with regional partners, the Voinovich School will provide a program of technical and business assistance to help communities and businesses in the Ohio Appalachian region implement industry-led economic growth strategies. The program will provide a data-driven process to help public and private sector stakeholders create, attract, retain and expand high growth industries to bolster local economies. The program will also assist communities in working with resources to support inter-organizational and multi-community strategies and programs. Finally, direct operational assistance will be provided to businesses and entrepreneurs to develop and export the economic "clumpy" of the region. This program of services is expected to create 72 new jobs and help communities retain over 67 jobs in the region. | Ohio University, Voinovich School of Leadership an | 139 | 31 to 90 days | \$270,000 |
| Jefferson | Water Mains Replacements | Installing 5800 linear feet of 8" PVC water line, twelve 6" valves, two 8" valves, twelve new fire hydrants and decommissioning 10 existing fire hydrants. This project would also include lining under the railroad line, 82 new service taps, stop stops and reconstructions, asphalt and sidewalk replacement. This line would replace existing 8" and 4" severely tuberculated cast iron line that impedes the flow of water inside the pipe. This has hampered the fire department in controlling several fires in recent years in certain sections of the Village. | Village of Rayland | 6 | 91 to 180 days | \$640,000 |
| Jefferson | Water System Improvements | The village's water distribution system was originally constructed in the 1930's. The system has one 200,000 gallon water storage tank to serve the villages of Tiltonsville and Rayland and area O & O1 of the Jefferson County Water District. The county operates a booster station that pumps approximately 1/2 of the village's daily water production into their system. The village should have about 450,000 gallons of storage to provide the Ohio EPA minimum of one day's storage of average daily demand. Due to numerous leaks within the system, the village completed two phases of replacement of the distribution system during the period 2005 to 2006. There was not sufficient funding available to complete a needed third phase of replacements. This project would include remaining equipment including approximately 3000' of 8" mainline, 500' of 6" mainline, 500' of 8" service, 6 fire hydrants, several valves and tees to the existing lines. The project would also include the construction of a 250,000 gallon boiler backed water storage tank adjacent to the existing 200,000 gallon welded steel tank. | Village of Tiltonsville | 18 | 31 to 90 days | \$1,191,000 |
| Jefferson | Water Meter Replacements | Replace existing meters with 500' of gas meters including purchase in order to reduce operations and maintenance costs. | Village of Dillonvale | 2 | 31 to 90 days | \$135,838 |
| Jefferson | Leonard Ave. Bldg. Rehab | Rehab old municipal building. Remove asbestos floor tile, Re-shingle roof. Install glass block windows. Install 3 garage doors for equipment storage. upgrade electrical and plumbing. | Village of Wintersville | 12 | 31 to 90 days | \$125,000 |
| Jefferson | Water System Improvements | The village's water distribution system was originally installed in the 1930's. The system has one 200,000 gallon water storage tank to serve the villages of Tiltonsville and Rayland and area O & O1 of the Jefferson County water system. The county operates a booster station that pumps approximately 1/2 of the village's daily water production into their system. The village should have about 450,000 gallons of storage to provide the Ohio EPA minimum of one day's storage of average daily demand. Also, due to numerous leaks within the system, the village completed two phases of replacement of the distribution system during the period 2005 to 2006. There was not sufficient funding available to complete a needed third phase of replacements. This project would replace remaining equipment including approximately 3,400 feet of 8" mainline, 400 feet of 6" mainline, 6 fire hydrants, and several valves and tees to the existing lines. The project would also include the construction of a 250,000 gallon boiler backed steel water storage tank adjacent to the existing 200,000 gallon welded steel tank. Replacing of the rising surface and installing a new lining system. New restrooms. This will employ many residents of the area that have been out of work for years. This money will also allow Steel Valley Raceway to supply health insurance for its employees in the future. This will generate more tax revenue for the county of Jefferson in Ohio. | Village of Tiltonsville | 18 | 31 to 90 days | \$1,191,000 |
| Jefferson | Race Track Improvements | Rehab old municipal building. Remove asbestos floor tile, Re-shingle roof. Install glass block windows. Install 3 garage doors for equipment storage. upgrade electrical and plumbing. | Friendship Park Steel Valley Raceway Inc. | 14 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Jefferson | Community Centers | Two community centers are in areas that have little resources and many needs in Tiltonsville/Ravenscroft, and Lansing/Barns/Bridgport. The funding is to assist in providing locations, services and to promote this model to other areas of Ohio with similar needs. The charitable purposes provided for all ages and inter-generational experiences through seven ministry areas: (1) Education & Information for a 211 call center, youth teaching seniors computers skills, seniors teaching youth golfing, support for small business startups, access a community database and family clinic; (2) Faith & Referring into opportunities to give, volunteer or create a business; (3) Health & Sports for a parish nurse program, walk yards, adult open gymnasiums and the clinic; (4) Mission Outreach reaches out to the community with the resources such as home repairs; (5) Senior, Youth & Special Populations provide a senior center with respite care; (6) Churches & Fellowships nurture and encourage of the community family and develop a cooperative helping relationship between agencies and churches; (7) Visiting & Resources meets the needs of the community. The Warren Township area of Jefferson County in recent years has been plagued by several flash floods along with normal creek flooding and Ohio River flooding incidents that have caused residents from the low lying areas of Warren Township to be evacuated to A) other family homes, B) state shift shelters that will need equipment or personnel to properly staff and house these residents or special needs residents that require handicapped access, medical attention, or that of residents requiring crisis intervention. The Tiltonsville Volunteer Fire Department which is under Fire EMS services contract with the Township and having mutual agreements in place with communities within the Township, and being centrally located is emerging through this program to alleviate these situations by looking for constructing an emergency shelter on Fire Department owned property. This shelter would be staffed by members of the Fire Department and be nationally recognized Fire Crisis members and members of the Medical Response Corps Program. The shelter would service all residents of the Township and surrounding communities with capabilities never before available. | Community Foundation of Lansing, Ohio and T - R - Y | 36 | 31 to 90 days | \$425,000 |
| Jefferson | Warren Township Area Emergency Shelter | The purchase and permanent ownership of a Community Board Office building. The office will serve as a client-rights and information/helpline point for community mental health and drug-addiction services. A resource center for information dissemination along with a training room for consumer and professional education is envisioned. | Tiltonsville Volunteer Fire Department | 12 | 0 to 30 days | \$250,000 |
| Jefferson | Community Board Office | The current five (5) job positions would be retained along with a possible other position being created. Additionally, the rehabilitation aspect of this project would provide immediate employment for the various trade unions. | Jefferson County Prevention and Recovery Board | 6 | 181 days or more | \$400,000 |
| Jefferson | REESE HOMES | We are in need of work done to our office building our whole roof needs fixed, we have so much work that needs done and we are so behind on bills that an audit we will not be able to complete. We need to keep up with electric bills and phone bills now, we cannot pay anything for repairs, any help would be greatly appreciated. | mobile home sales | 5 | 31 to 90 days | \$100,000 |
| Jefferson | City of Steubenville Municipal Building | This new municipal building, which will be constructed using green technology, will serve as a replacement of a severely deteriorated building the City uses for its municipal operations. The current building, erected in the early 1900's, is a 2-story structure which is not handicap accessible, with electrical, heating, and cooling systems that are severely obsolete and not environmentally friendly. The building is in danger of collapsing from the deterioration of its support structure. Replacing this structure is economically unfeasible; the construction may incur private investments. | City of Steubenville | 40 | 0 to 30 days | \$8,000,000 |
| Jefferson | Regenerative Medicine and Wellness Center | A clinic that would offer already established platelet rich plasma tissue grafting, adult stem cells, and other autologous conditioned serum grafts for injuries and degenerative conditions, osteoarthritis) with further research on already developed patients, to the local markets. The clinic would also offer advanced and traditional support along with new holistic systems to treat patients with long term chronic pain. The center would use minimally invasive procedures to implant the new tissue for injury restoration. State of the art imaging would be offered to diagnose and also guide the procedures. The imaging would include musculoskeletal ultrasound which is very cost effective. The center would also serve for the education and training of other physicians and healthcare providers. There would be ongoing grant submissions for the further development of marketable products and tools which would give business to Ohio engineers and biomedical manufacturing. | Bluetail Technologies Regenerative Medicine | 25 | 0 to 30 days | \$2,500,000 |
| Jefferson | Quaker Meeting House Mold Remediation | Quaker Meeting House, built in 1814, was the first yearly Quaker meetinghouse west of the Alleghenies. For nearly a century the meetinghouse played a central role in the Quaker faith in western Ohio. The meetinghouse is a major contributing structure in the Mount Pleasant National Historic Landmark District, which recognizes the village's early and active role in the abolitionist and anti-slavery movements. | Ohio Historical Society | 10 | 31 to 90 days | \$150,000 |
| Jefferson | Wind Energy | Effect and maintain wind energy resources to place energy back on the grid offset energy consumption of coal | Top Notch | 2 | 0 to 30 days | \$50,000 |
| Jefferson | Smithfield Township Headquarters | Replace existing towhee garage and meeting facility. The current facility structure is unsafe, and in need of emergency repair to bring it up to code. It is not handicap accessible. The cost of renovation would far exceed the cost of a new structure. Our township services 38 square miles of rural roads, within a budget of \$200,000.00 in less. We currently own land that is shored ready. All utilities and landings in prepared for building, we want to keep our schools in session, our public traveling such and every, but do not have the resources to maintain our equipment. Our current facility does not even have heat. This makes our entire work extremely difficult. We are the infrastructure that makes our county operate safely. | Smithfield Township Trustees, Jefferson County | 2 | 31 to 90 days | \$310,000 |
| Jefferson | New Fire Station | To replace our existing 3 bay fire station with a new and modern 5 bay station to house all of our apparatus indoors. This station will be handicapped accessible and meet all current codes. It will also serve as an emergency shelter during disasters, even if our town is not affected. | Mt. Pleasant Volunteer Fire Department | 45 | 91 to 180 days | \$500,000 |
| Jefferson | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects those areas to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no companies will make it to these areas without grant money. Building a wireless infrastructure to equip rural residents with the Service to be able to access the Internet at broadband speeds. Establishing a wireless service is much more cost effective than laying cable to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. | Infinite Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Jefferson | pay for my house and make updates | My house off and put new windows and siding on as I am 62 years old and work for a steel mill that I am afraid might not be there for long. These funds will be used to help alleviate current office expenses and debts. | self | 4 | 31 to 90 days | \$50,000 |
| Jefferson | To Keep My Small Business Operating | The economical condition of this area has adversely affected the running of operations for my small business. | Owner of Small Business | 3 | 0 to 30 days | \$50,000 |
| Jefferson | Storm Drain | I thank you in advance for your time and help in this matter. | Wells Township | 01 | 91 to 180 days | \$425,000 |
| Jefferson | Road Salt Storage Building | 300 feet of storm drain pipe | Wells Township | 01 | 91 to 180 days | \$300,000 |
| Jefferson | General Road Paving | A Road Salt Storage Building to meet Ohio EPA Standards | Wells Township | 01 | 91 to 180 days | \$300,000 |
| Jefferson | Ft Steuben Bridge Demolition Mitigation | Repair and resurface up to 37 miles of Township roads | BHJ Metro Planning | 14 | 181 days or more | \$600,000 |
| Jefferson | Seven Creeks Bridge | This project addresses federal law section 401 environmental mitigation for the demolition of the Ft Steuben Bridge over the Ohio River. The CDDOT demolition project is identified as CDDOT Project PD 73175. The demolition work of the bridge will restrict access to the Steubenville Marina and Ohio River boat launch which is situated near and below the bridge. As mitigation, the project provides a paved parking area under the existing Ft Steuben Bridge for boat launch vehicles and trailers, a handicap accessible ramp to be constructed atop the remains of pier #2 on Ohio shore and flag pole area improvements including a new flag pole, river observation benches, railing, lights and trash receptacles. | Island Creek Township | 8 | 31 to 90 days | \$40,000 |
| Jefferson | Salt storage | Place blue culvert, low water crossing bridge on a Top Rd. in an area that will allow residents access to local road ways. This improvement will allow safety issues such as fire departments/quick response time to a residence. The outcome will also help with ice jams & flooding which will save the current road structure \$300,000. The project needs to be done ASAP. Creating contractors a chance to bid and create jobs & purchasing supplies. This may seem to be a small project, but it is much needed for a Township that is dealing with major expenses and budget cuts. Please help. | Island Creek Township | 10 | 31 to 90 days | \$60,000 |
| Jefferson | Veterans Memorial Bridge Lighting | Construct salt storage building to prevent water run off of salt stored out doors. This will also enable the Township to purchase bulk salt that will save the tax dollars of residents of the Township as well as providing safety of the road ways having salt available as needed. Thank you CDDOT has designated this project with PDR #31819. The project involves design and construction of decorative lighting that will enhance the structural characteristics of the Veterans Memorial Bridge over the Ohio River. Vigena Design DOT has committed \$240,000 in transportation enhancement funds and local governments have committed \$80,000. | BHJ Metro Planning | 17 | 91 to 180 days | \$300,000 |
| Jefferson | JEF-43-3.45 - SR43 & John Scott Hwy | This project has been assigned an ODOT PDR of #2135. The project addresses traffic safety concerns having been identified on ODOT's high crash location listing. Improvements to the roadway surface by milling and resurfacing, long the pavement markings, installation of overhead signs, installation of route and guide signs in advance of the intersection, improvements to traffic signal visibility using backing plates and supplemental signage and traffic signal lighting. | City of Steubenville | 13 | 31 to 90 days | \$100,000 |
| Jefferson | rebuilding racetrack | Need to be ground for retrack/ needs to be ground down and new dirt added, excavation work, new lighting and vending area needs repairs. This work will help repair the damages to the business (do to the fact it is outdoors, nature has taken its course.) WE will be able to build it back to its potential and bring more business | Yellow Creek Raceway LLC | 12 | 31 to 90 days | \$75,000 |
| Jefferson | Gould Tunnel | Railroad tunnel lining in need of repair on state owned railroad. Would also rehabilitate track inside tunnel, and significantly improve drainage issues in tunnel. Improved train speed and safety through tunnel will allow more fluid operation of intra and interstate commerce. | Ohio Central Railroad | 10 | 31 to 90 days | \$2,000,000 |
| Jefferson | Driveway and Parking Lot Upgrades | The project would include repaving and cement work on program grounds. The program access and entrance road (approximately 1/2 mile in length) and parking lot (area to large enough for 75 vehicles) would be repaved when necessary. A new separate ramp would be added to the total area and necessary road and parking lines would be repainted. Some needed sidewalks would be added and others replaced or repaired. The improvements from this project would make our facilities more accessible for the students and adults we serve. The life of our entrance road and parking areas would be extended for many years. | Jefferson County Board of MR/DD | 3 | 31 to 90 days | \$160,600 |
| Jefferson | Shaffer Plaza Energy Efficiency Upgrade | The project would include the replacement of all windows and exterior doors of the three residential homes that comprise Shaffer Plaza. The roof of Shaffer Plaza # would also be replaced. Each home has approximately 4500 square feet of living space. The homes have on each side 11 individuals, were originally built in the early 80's and have the original doors and windows. Replacement of the windows and doors would make the homes much more energy efficient and less costly to operate. Estimates to replace the doors and windows is approximately \$30,000 per home. The roof replacement on Shaffer # is estimated to be \$15,000. The rest of the project cost is for project planning and design, bidding and advertising, and permits and contingency. | Jefferson County Board of MR/DD | 3 | 31 to 90 days | \$128,000 |
| Jefferson | Jefferson County Railroad Crossing Upgrade | This project is for Railroad Crossing upgrades on the Columbus and Ohio River Railroad. This project will allow for the rehabilitation of 2 crossing surfaces and 2 warning devices. This will increase the public safety of these crossings and the safe passage of trains. These crossings are located in Union Port and Broad Area areas. | Ohio Central Railroad | 50 | 31 to 90 days | \$530,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|---|----------------|--------------------|---------------------------|
| Jefferson | JEF-43-0.96/4.96 Safety & Signal Improvements | Project addresses a part of the recommendations of a HSP Safety Investigation resulting from an ODOT Hot Spot Listing on a 4 mile section of SR43 in the City of Staeburnville and Village of Winersville. Work includes replacement & upgrading of traffic control signs and signals, installation of advance street signing and lane control signage, and signalized intersections. Work also includes installation of video detection technology at 10 signalized intersections. This project could be combined with a scheduled resurfacing project on SR43 which has been identified as stimulus eligible (This project has an ODOT PDR #2577). | BHJ Metro Planning | 16 | 181 days or more | \$572,000 |
| Jefferson | Rosewood Manor Addition / Relocation | Existing facility in older building. Good occupancy rate and regulatory experience with the State of Ohio and Federal Government. We are looking to make a new dining/lobby room and relocate beds from 50 year old structure to a new wing on our existing building built in 1996. The move and expansion will make the facility more cost effective in operation, maintain and create some new positions. The care for residents will be improved through a more centralized operation. | Rosewood Manor | 76 | 181 days or more | \$980,000 |
| Jefferson | Upgrading water system | Installing flush hydrants at the end of a water line. Installing remote water meters on some hard to get read households; backup generators for 2 wells; security lights and lowering at end of well; and new water billing software to replace old system. Based on their findings, they recommended The Ohio EPA did a study to determine the hydraulic grade line for the Reeds Mill Interceptor. Based on their findings, they recommended increasing the size of pipe from 10" to 12" from Maricopa #30 to the wet well, or approximately 300 feet. | Village of Richmond | 4 | 31 to 90 days | \$25,000 |
| Jefferson | Reeds Mill Interceptor | This project would include the pipe size upgrade, along with manhole rehabilitation in that area in efforts to eliminate and prevent inflow and infiltration. | Jefferson County Water & Sewer District | 0 | 91 to 180 days | \$250,000 |
| Jefferson | Pottery Addition Sanitary Sewer Project | In December of 2008, Findings and Orders were issued for Pottery Addition. Jefferson County was ordered to tie Pottery Addition into an existing station near by, to be sent to the City of Staeburnville for treatment. | Jefferson County Water & Sewer District | 5 | 91 to 180 days | \$2,000,000 |
| Jefferson | Crestview/Belevdere | From September of 1988 through June of 1994, representatives of the Ohio EPA and the Jefferson County Board of Health inspected the subdivisions in the Crestview/Belevdere area and found evidence of failing sewage disposal systems and unsanitary conditions. Based on these investigations, the District issued Final Findings and Orders to the Jefferson County Board of Commissioners to construct wastewater facilities sufficient to abate the unsanitary conditions that exist in that area. | Jefferson County Water & Sewer District | 15 | 91 to 180 days | \$3,500,000 |
| Jefferson | Barbers Hollow Treatment Plant Improvement | The proposed sanitary sewers would serve roughly 300 acres in a portion of Jefferson County known as the Crestview/Belevdere Area. This area includes the residential subdivisions of Crestview Manor, Belevdere, Highland Estates, Highland Park Estates, Soccer Heights, and Valleyview. | Jefferson County Water & Sewer District | 0 | 91 to 180 days | \$950,000 |
| Jefferson | Brilliant Waterline and Booster Station | The introduction of sewage from the proposed Crestview/Belevdere sewage collection system will convey additional flows to the existing Barbers Hollow wastewater treatment facility operated by Jefferson County Water & Sewer District. Other unsewered areas in the vicinity of the treatment facility will also cause additional flows to be directed to the treatment facility in the future. | Jefferson County Water & Sewer District | 5 | 91 to 180 days | \$3,000,000 |
| Jefferson | New well construction | Additional flows from these areas will require construction of an additional clarifier unit at the existing plant. This additional clarifier will be required to meet permit effluent limits and other regulatory requirements. | Jefferson County Water & Sewer District | 5 | 91 to 180 days | \$3,000,000 |
| Jefferson | Water Main Replacements | The existing Brilliant booster station receives its supply from the Brilliant tank. The booster station supplies water to the Brilliant tank and operates at approximately 600 feet of total dynamic head while supplying approximately 200 gallons per minute. | Brilliant Water & Sewer District | 12 | 91 to 180 days | \$1,140,000 |
| Jefferson | Stanton Dire Kitchen Upgrade | Addition of the Brilliant water distribution system increased the demand on the Brilliant booster station by approximately 57%. The increased demand requires that the booster station operate outside of its intended design parameters, causing increased maintenance costs and reliability concerns. Additionally, the existing distribution system causes increased friction losses at the numerous existing parameters. | Brilliant Water & Sewer District | 6 | 91 to 180 days | \$608,000 |
| Jefferson | Gym | In order to provide adequate service to Jefferson County customers it is necessary to replace the existing booster station with two booster stations operating at lower TDH's, an interim storage tank, and the installation of approximately 2,000 feet of distribution pipe in order to greatly decrease friction losses and improve operating efficiencies. | Edison Local School District | 8 | 0 to 30 days | \$15,000 |
| Jefferson | Community Rebuild & Replenish | Construction of new 700 gpm vertical gravel-packed well to supplement the District's two vertical wells which are each rated at 450 gpm and pump on an average 20 hours per day. Also construction of a new transmission line to allow greater flow from the wells to the water tank. Currently, only one well pumps at a time, but because the flow of water through the distribution system to the tank, the project would reduce the number of hours of pumping per day and would provide greater reliability and redundancy to the finished water pumping capability. | Meadowbrook Church of God | 2 | 181 days or more | \$250,000 |
| Jefferson | Commercial Avenue Rehabilitation | Replace approximately 3,400 ft of 1940's era cast iron water mains with C900 PVC pipe and 6 fire hydrants. These water mains are in extremely poor condition and experience frequent leaks resulting in temporary lack of water service and lost orders. Replacement would save the District money, significantly reduce the number of lost orders and provide a more reliable water system. | Caritas Properties | 25 | 31 to 90 days | \$1,500,000 |
| Jefferson | Upper North Hill Sewer Separation Project | I am hopeful that with these funds we would be able to upgrade the kitchen in Stanton Ely, Middle School building with some new equipment to replace equipment that is well over 40 years old. This school is currently our only shelter for the most from the homeless in economic situation within the Ohio Valley. The free and reduced applicant (disenfranchised student's) before us the 56 to 62% of the entire school availability and we are working to use and constantly repair this old equipment, which was meant to be made for a student body of approximately 250-300 children not the current amount of 600-810 both treatment and lunch. We are hoping to replace the oven with a more economical, conversion oven and a stove to cook on rather than a hot kettle that only sometimes works. Pans and the service and of these old pieces of equipment continue to be a struggle as upgrades to commercial equipment happens. We are hoping to see your consideration of this request for this school building criteria that prepares well over 700 meals for our "next generation" of teachers, lawyers, steelworkers and moms and dads! | TEMS Joint Ambulance District | 6 | 0 to 30 days | \$50,000 |
| Jefferson | Lower North Hill Sewer Separation Project | Finish the gym (phase 1) of our building so we can have free programs in sports for our community. We need to finish HVAC, plumbing, walls, gym floor, locker rooms, kitchen, and equipment for gym (gymnastics, on floor, etc.). We have a shot at this point. We would also need to level the parking area and have it paved so the building could be used to its best potential. We would like to have at least one part-time or full-time employee to oversee the use of the building in scheduling. We have the desire to have volleyball for ladies, a men's basketball team, youth leagues, and indoor basketball for the community. It is our plan to have the gym to use at least 4 nights a week. | Village of Mingo Junction | 50 | 91 to 180 days | \$894,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | Caritas Properties mission is to Restore, Rebuild, Replenish the community for the betterment of it's people. | Technology Solutions Group - MCOECN | 12 | 91 to 180 days | \$10,300,000 |
| Jefferson | Lincoln Avenue Sewer Separation Project | The geographical location of Staeburnville is an amazing opportunity. It can be considered a viable "suburb" of Pittsburgh. If one wants to drive directly to Columbus from Pittsburgh, or vice versa, Staeburnville is the town to pass through. The Ohio River can provide opportunities for events, recreation and leisure. The Franciscan University is thriving, but people's experience of the town is not being capitalized. Throughout Staeburnville, there are homes, commercial buildings and land abandoned or in disrepair. This creates a void in the community of affordable, clean value and thriving living standards. The condition of the homes & properties and the status of business in Staeburnville calls for a restoration effort. | Village of Mingo Junction | 50 | 181 days or more | \$3,000,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | At Caritas Properties, we will focus our efforts primarily on affordable living and commercial environments. We will not just do the "bare minimum", but will create beautiful places to Live & Work. Our hope is to be a spear for the community as a whole, provide people a great home and bring Staeburnville to it's highest potential. Our hope is to be a spear for the community as a whole, provide people a great home and bring Staeburnville to it's highest potential. Our hope is to be a spear for the community as a whole, provide people a great home and bring Staeburnville to it's highest potential. | Village of Mingo Junction | 3,000 | 181 days or more | \$1,730,000 |
| Jefferson | Lincoln Avenue Sewer Separation Project | With funding 100% of staff will be equipped according to the FCC's APCO-25 Interoperability Standards ensuring effective, efficient and reliable inter-agency and inter-agency communications. Presently non-compliant it will allow us to meet or exceed all local, state and federal standards. The recently secured a grant to fund an Ohio Multi-Agency Radio Communication System (MARCOS) radio. This makes us only one of the Ohio agencies capable of communicating over multiple radio systems with a subscriber base consisting of state, local and federal government agencies. The 10 radios will enhance both our communication and those who require our resources. | Dillonvale Volunteer Fire Department Inc. | 13 | 91 to 180 days | \$275,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | Due to the huge risk of terrorist threats and hazardous material accidents and the accessibility to land, air, rail, and water travel we believe our need to highly assist you to provide this service within our district, county, state, and beyond we will be able to better serve our 15,000 residents and thousands of people who live, work and visit our region. | Village of Mingo Junction | 50 | 181 days or more | \$2,576,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | The intent of this project is to replace an existing watermain with a higher than normal break frequency. Approximately 3,500 feet of new watermain will be installed on this project. | Village of Mingo Junction | 50 | 181 days or more | \$2,230,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | This is a project to implement and fund HB4 in the 12th Ohio Legislature to deploy an interactive distance learning pilot producing live coursework for Ohio K-12 schools in order served and under privileged schools throughout Ohio. The Technology Solutions Group of the MCOECN is proud to be selected to design and support of technology in more than 1,500 Ohio K-12 public educational entities. The goal of HB4 are excellent and need to be explained through this pilot. However, it needs to be funded in a manner that does not detract from existing technology programs that benefit Ohio K-12 school districts. | Village of Mingo Junction | 50 | 181 days or more | \$3,920,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | This project involves the replacement of approximately 1,000 linear feet of main. | Village of Mingo Junction | 50 | 181 days or more | \$1,410,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | This project involves the elimination of a CSD with the installation of approximately 3,500 linear feet of sanitary sewer and 3,500 linear feet of storm sewer. | Village of Mingo Junction | 50 | 181 days or more | \$1,870,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | The construction of approximately 300 linear feet of new road to provide access to the facility from County Road 33 known as Farnwood Avenue. | Village of Mingo Junction | 50 | 91 to 180 days | \$1,735,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | The village of Titonsville has been aggressively rebuilding and upgrading storm sewer catch basins as time and money is available. This project would enable the village to replace fifty of the most critical storm sewer catch basins located within the village. This project would remove water from existing roadways reducing vehicular traffic safety issues and ensuring the long term integrity of the roadway surface. | Jarvis, Downing & Emch, Inc | 40 | 0 to 30 days | \$160,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | The Village of Titonsville's existing lift station was originally installed in the early 1950's. The station consists of three horizontal pumps that transfer all village sewage to a combined main sewage pipeline approximately five miles away to the village collection tanks. The village is in the process of converting over the existing pumps to submersible pumps that is more suited to the environment. The village has already changed one of the three pumps but did not have the necessary funds to continue on with this project. Also included in this project would be the replacement of a leaky structure roof and rehabilitation of the existing ventilation system. | Village of Titonsville | 6 | 31 to 90 days | \$250,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | To sustain and expand the Urban Underground. A youth center in downtown Staeburnville, Ohio that reaches out to teens especially those at risk. This provides a safe place for teens to do homework, receive tutoring, interact with adults and teens along with learning basic life skills which allows them to contribute the their community. We also provide food, clothing and various needs as they arise. In the past two years we have seen over 200 teens come through our doors. We partner with the local schools, county officials and government organizations to identify and reach out to those most in need. | Village of Titonsville | 9 | 31 to 90 days | \$127,000 |
| Jefferson | Upper Church Hill Sewer Separation Project | | Dirty Vagabond Ministries | 5 | 0 to 30 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Jefferson | Lower Church Hill Area Sewer Separation Project | This project consists of approximately 4,000 linear feet of 8" PVC sanitary sewer. | Village of Mingo Junction | 50 | 91 to 180 days | \$1,103,000 |
| Jefferson | Water Meter Replacements | The Village of Titonsville is currently in the process of replacing all the current water meters within the village to a radio transmitter system. This will enable the water meters in the village to be read from a village vehicle as the vehicle passes in front of the property. This type of system will enable the village to read all of the water meters within a two day time as compared to the current two week read cycle. The existing water meters are antiquated and in several cases not working. The village began changing meters as funds were available, but the project had to be stopped due to a lack of additional funding. Completion of this project would enable the village to read and bill for the water supplied to our customers on a monthly basis and generate a more real time revenue stream that would quickly pay for this project and other projects that are readily needed within the village water system. | Village of Titonsville | 8 | 91 to 180 days | \$137,500 |
| Jefferson | Lifeline Long Term Acute Care Hospital | This project consists of the construction of a new \$14 million dollar, 36 bed, long term acute care hospital in Winterville, OH. Additionally, there will be a complete imaging wing consisting of x-ray, ultrasound, MRI, PET scan, and CT scan. This portion of the project is being financed in full through private investment. The portion we are seeking funding for is the construction of approximately 200 linear feet of road to provide access to the facility from County Road 33 known as Fernwood Road. | Jarvis, Downing & Emch, Inc | 180 | 0 to 30 days | \$14,000,000 |
| Jefferson | OMERESA ITC/ Jefferson County ESC Facilities Proje | Aid a new given, energy efficient facility to increase OMERESA ITC's Jefferson County ESC's (JCESC) computer labs, training center, and office space by 10,000 sq. ft. and create jobs for local construction workers & craftsmen. The current facility, purchased in 1986, was funded 70% by the Appalachian Regional Commission (ARC) and 30% local funds. A 5,000 sq ft addition in 1990 was funded in the same manner. OMERESA provides computer services & tech support to 45 school districts (60,000 students) in 11 counties. JCESC owns an internet-based curriculum and management system and offers a Virtual Learning Academy with 88 courses and both support to 25,000 students in 53 Ohio counties & an additional 4,200 students in the other 48 states and 25 foreign countries. JCESC is also the operational center for a partially self-funded insurance consortium covering 12,000+ lives. The increased square footage will increase JCESC and OMERESA capabilities for providing professional development, technology training, and other services requested by partnering districts. The "green" facility will decrease operational costs and allow additional dollars for increased programs and services to districts. | Jefferson County Educational Service Center | 50 | 91 to 180 days | \$2,000,000 |
| Jefferson | Brush Creek Senior Center Drinking Water Project | To bring safe drinking water to the Brush Creek Senior Center to facilitate a healthy environment for its only designated emergency shelter within the township. Additionally, there must be potable drinking water to provide a food service site for meals for the elderly. The Senior Center is approximately three miles from the nearest public water line in Sardinia, Columbiana County. The cost of new water line needed to reach the Senior Center would be over one million dollars. This is too much money for the purpose of this project's goals. Therefore, the installation of a water filtration system/ water treatment system will serve the needs for the project at the Senior Center. This money will cover the cost of the building/room needed to house the system, the entire filtration system, a new well, building tank, water line, isolating sewer system, additional sinks, and installation costs. This is a very rural township with limited economic resources, with a small operating budget. There is no major industry financially supporting our township. | Brush Creek Township Trustees | 4 | 31 to 90 days | \$72,460 |
| Jefferson | Drug and Alcohol Residential Treatment Program | Jefferson Behavioral Health System served an average of 200 intensive drug and alcohol consumers each year through our residential treatment program. We serve an additional 300 consumers through our outpatient program. Unfortunately we had to suspend our residential program due to increased budget cuts this year. Jefferson County consumers have suffered a tremendous loss of a much needed treatment service available in our area. We are requesting funds in order to construct a new drug and alcohol treatment center to include residential treatment services available intensive outpatient treatment and traditional outpatient services. This project would allow Jefferson Behavioral Health System to serve the needs of our alcohol dependent consumers in a controlled location and increase the treatment location's capacity. The project would allow us to focus our focus on providing services and outreach to the youth and adolescent population. This project would allow us to retain 10 positions and create an additional five employees. | Jefferson Behavioral Health System | 5 | 181 days or more | \$4,000,000 |
| Jefferson | Electronic Medical Health Record | Jefferson Behavioral Health System is a non-profit, comprehensive mental health, drug and alcohol agency that provides a wide variety of services to approximately 2100 consumers in Jefferson County. We currently have a staff of 100 employees, which are located at various locations throughout the county as well as a satellite office in a neighboring northern county. Unfortunately all of our health records are still in paper format. With the loss of our staff and the various locations that services are provided this creates significant inefficiencies in the way we provide care. Coordination of care. Our staff spends a lot of unnecessary time copying files, rescheduling appointments, and transferring treatment documents between locations. And transporting records to and from storage locations throughout the county. All of these issues pose real threats to the security of the health care information. The implementation of an electronic health record at our agency would improve access for any service provider at any one of our locations to have ready access to the consumer's health record during a routine visit as well as at the time of a health care crisis. This project would create 10 new jobs. | Jefferson Behavioral Health System | 10 | 31 to 90 days | \$500,000 |
| Jefferson | Transportation | The agency's mission is to foster quality of life through the provision of a comprehensive array of community-based mental health and drug and alcohol services that are innovative and based on the needs of our consumers. The Public-Transit-Human Services Coordinated Transportation Plan for Jefferson County clearly reports that our consumers have a current and growing need for transportation services in our county that are affordable and accessible for seniors and persons with disabilities. Our agency's elderly and disabled consumers struggle continuously with finding suitable transportation options. Many of our consumers have an income level that falls into the lowest bracket, which makes incurring the cost to ride public transportation prohibitive. Although we provide training to our consumers when needed on how to utilize public transportation as part of their recovery, often times due to their mental health challenges they find it difficult for them to independently utilize the public transportation system. We are seeking to purchase new vans and hire two transportation specialists to transport our consumers to various behavioral health appointments. | Jefferson Behavioral Health System | 2 | 31 to 90 days | \$175,000 |
| Jefferson | Behavioral Health Services to the Uninsured and Un | Jefferson Behavioral Health System has been an integral part in the provision of behavioral healthcare services in Jefferson County for the past 88 years. The proposed project would allow us to offer behavioral health outpatient services to residents of Jefferson County who are uninsured or underinsured. In the past year we have provided services to over 1000 individuals with various mental health and drug and alcohol diagnoses who meet the above criteria. Over the last fiscal year we have lost one million dollars in funds from both of our state departments. Thus we have been forced to drastically cut the behavioral health services that we are able to provide to this population. Our local county economic situation has only added to this problem. Jefferson County is currently experiencing an unemployment rate of 10.5 %. Many of these individuals have not lost the ability to access these services needed to insure their recovery and stabilization but may have also lost their jobs due to our local economic climate. This project will allow for the necessary services in order to maintain their quality of life. The Village of Steamship is an unincorporated community in Jefferson County. The village and Ohio EPA desire the village to construct a sewer system. The village has not proceeded to construction of the sewer due to financial feasibility concerns. The village has a population of 221 with only 82 households according to the 2000 U.S. Census. Due to the small population and limited number of users there is no economies of scale. Due to this hardship the village requests Stimulus Package funds to permit construction of a sewer system for the village. | Jefferson Behavioral Health System | 10 | 0 to 30 days | \$1,500,000 |
| Jefferson | Bloomington Sewer Project | This project would help ensure the safety of the village's water supply, water wells and treatment plant. Security cameras and a security control system would be installed to protect the plant, water wells and permit fencing. A backup generator would be installed to protect the plant, water wells and permit fencing. This project will require the relocation of the existing high school, an addition to the high school to accommodate the 7th and 8th grades and finally the new construction of a pre-school to 8th grade elementary building. The project will be funded by local taxpayers via a voted bond issue. The total cost of the project excluding any additional funds not listed above is \$44,000,000.00. | Bloomington, Village of | 25 | 91 to 180 days | \$2,750,000 |
| Jefferson | Water Plant Security | This project would help ensure the safety of the village's water supply, water wells and treatment plant. Security cameras and a security control system would be installed to protect the plant, water wells and permit fencing. A backup generator would be installed to protect the plant, water wells and permit fencing. This project will require the relocation of the existing high school, an addition to the high school to accommodate the 7th and 8th grades and finally the new construction of a pre-school to 8th grade elementary building. The project will be funded by local taxpayers via a voted bond issue. The total cost of the project excluding any additional funds not listed above is \$44,000,000.00. | Village of Titonsville | 5 | 31 to 90 days | \$59,000 |
| Jefferson | Buckeye Local Building Project | This project will "stimulate" our local economy by providing hundreds of construction jobs and allowing the district to retain teachers and students through construction will center on building and landscaping a new concern of the District is "ShowCreek" and State Route 150. When we receive small rain storms, the entrance to the school becomes flooded. Local efforts to dredge the creek have fallen on deaf ears due to a lack in funding. Our second option to alleviate the flooding issue is to modify State Route 150. The new construction will cause an increase in traffic. Early predictions call for a 50% increase in traffic flow. There is a true need for upgrades to the highway. | Buckeye Local School District | 1000 | 31 to 90 days | \$5,000,000 |
| Jefferson | Re-Entry | Employment Housing Self Assessment Education Health | National Office for Social Responsibilities | 25 | 0 to 30 days | \$275,000 |
| Jefferson | A 21st century school that houses grades 7 -12 | The Edison Local School District desperately needs a new 7-12 school. Edison High School was built in 1938. A new school will integrate research and development to insure cutting edge instructional methods are used to increase student achievement. The Edison School District has not been able to pass a Bond Issue, which can be contributed to our high unemployment rate and current economy. A new building, which will house approximately 810 students, will be located in an area that has potential growth for the county. Currently, Walnut Distribution Center is located within 1 mile of our potential site. Real developers are trying to recruit other industries as well as an additional development. This new school could potentially serve as a central school for all of Jefferson County due to the decrease of enrollment occurring in neighboring districts. This energy efficient school will utilize technology to improve the quality of instruction, provide students with the supplements they need to enhance student achievement, and improve communication between the school and parent. At this time, our local district does not even have heat. Thank you for your consideration. | Edison Local School District | 85 | 91 to 180 days | \$35,000,000 |
| Jefferson | Bridges to Self-Sufficiency Training and Job Search | This program provides work activities and support services that enable assistance to needing adults to successfully participate in federally allowable work activities, meet the work participation requirements and move toward employment and self-sufficiency. This program is designed to end the dependence of needy adults on government benefits, promoting job preparation, work and self-sufficiency. The Provider will provide job search and job readiness training and instruction, skills assessments and related reevaluation, individualized and specialized training components, and job placement services. The goal is to give best track, individualized services to self-employment and job placement more quickly. The Stakeholder, Ohio Marketplace has successfully run two other similar grants in the past, with favorable results. We will take eligible referrals from the Jefferson County Department of Job & Family Services for collaboration. Our expected outcome is that 50% of referrals that complete intake will successfully complete the entire training job readiness, and job search program within 8 weeks of intake. | Manpower, Inc. | 6 | 31 to 90 days | \$200,000 |
| Jefferson | Victim Advocacy Project | We envision annually project a program to promote victim awareness and appropriate counseling services for women who are victims of sexual violence in Jefferson County Ohio. Currently, the Sexual Assault Help Center (SAHC) has one part-time victim advocate in Jefferson County. A full time victim advocate position was lost in 2009 due to federal funding cuts. There is a critical need to re-fill this position through the Federal Stimulus Act in order to increase to quality availability of care access to quality advocacy and supportive services for those victimized by the crimes of sexual violence in Jefferson County Ohio. The proposed request is to fund a new full-time victim advocate position and to increase the current full-time victim advocate position in Jefferson County Ohio to a full-time position. This request asks funding for the project area is meeting employment and services of two full-time Victim Advocate staff persons in Jefferson County Ohio in order to increase the number of victims of sexual violence served in Jefferson County Ohio to at least 175 primary and secondary victims served annually. | Sexual Assault Help Center | 2 | 0 to 30 days | \$45,000 |
| Jefferson | Equipment Upgrade | The Village of Mt. Pleasant Police Department would like to purchase additional equipment to help our department during everyday patrols and emergency situations. Our village is located on a hill in southern Jefferson County and all the areas below are subject to sewer flooding. When this happens our Village serves as an emergency operations center. To add to our efforts to serve our emergency and surrounding areas we would like to purchase the following items: 1) 4 wheel drive SUV police cruiser 2) 8 additional police portable radios 3) 2 in-Car Video systems These items would greatly improve our ability to respond at a higher level to any emergency situation within the Village of Mt. Pleasant, surrounding areas, or anywhere assistance is needed by County, State, or Federal Agencies. | Mt. Pleasant Police Department | 4 | 0 to 30 days | \$55,000 |
| Jefferson | community block project | During this tough economy there is an increase in need for Law Enforcement, the village of Mt. Pleasant is finding it difficult to find a balance between its budget and the need for Law Enforcement. This grant would help our department meet those needs. | Village of Mt. Pleasant | 15 | 91 to 180 days | \$250,000 |
| Jefferson | sidewalk replacement | Working site where old school was located. Installing approved landscaping and playground equipment. Ligning sewage and water and miscellaneous items. New city building and police station combination with parking for visitors and employees along with garage for equipment to include approved privacy fencing, landscaped playground equipment and area for future development. | Village of Mt. Pleasant | 10 | 31 to 90 days | \$100,000 |
| Jefferson | Mobile Data for Law Enforcement | Mobile data computers and a backbone radio data network for 90 police cars operated by 21 police departments in Jefferson County. This project would give the officers access to EAGLE information during traffic stops as well as allow them to complete reports using the Officers Mobile for State of Ohio incident reporting. This system would require a system in place that a year ago we had no proper reporting systems in many areas of the county due to the age and condition of the equipment. | Jefferson County 911 | 5 | 0 to 30 days | \$2,600,000 |
| Jefferson | Community Youth Center | Build a youth center for youth at Mt. Center would provide a place for youth to socialize and to get involved with games and activities in a safe and friendly environment. | Abundant Life First Assembly of God | 1 | 181 days or more | \$260,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Jefferson | Food pantry expansion | The food pantry feeds approximately 180 to 195 families each month. This is up from 145 families in June of 2008. The church that houses the food pantry is so small to facilitate the amount of food we need to give out. We have found a building in Toronto Ohio that would support the food pantry as well as the opportunity to begin to provide a place for all our kids through youth activities. Funds would be used to purchase building and needed equipment to support food ministry and youth equipment and games to game tables, video and equipment needs. We believe we can help to meet physical and social needs in our community. We have operated for 13 years with volunteers from through out our community. Our goal will be to continue to do so. | Abundant Life First Assembly of God | 1 | 181 days or more | \$125,000 |
| Jefferson | Brilliant VFD Building Project | Since 1923 Brilliant Fire Department (BFD) has experienced 30 floods. The floods force our station to completely evacuate equipment, vehicles, and all men power. Apparatus is forced to be kept outside unsecured in the most harsh weather. Medical supplies in the ambulance are also forced to be kept outside. BFD is "thrive ready" for this project and simply needs additional assistance. | Brilliant Volunteer Fire Department | 238 | 0 to 30 days | \$900,000 |
| Jefferson | Police Department Upgrade | Increasing the hours of police coverage for the village, by increasing the number part-time officers from auxiliary officers, also increasing the number of hours part officers are scheduled per month, upgrade the currently out dated computer system with is the Department with 2 new desktop computers, and 1 laptop computer, installation of new system in the office, including bar and phone lines, upgrade to police officer, or possible purchase of an additional good use cruiser for better coverage for the village. | BERGHOLZ POLICE DEPARTMENT | 7 | 31 to 90 days | \$40,000 |
| Jefferson | Go College Learning Center | Supporting Jefferson Community College's expansion into three previously unserved counties (there are no currently existing community colleges in these counties) for community college training and credential programs, this funding will provide four (4) Go College Learning Labs. These Learning Labs will increase the capacity of the region to prepare Eastern Ohio residents for college, address current workforce needs and develop pertinent literacy skills to meet future workforce demands in high growth and emerging industries: health, medical, specialized manufacturing, energy technologies, IT, etc. Learning labs with self and distance learning capabilities will be placed in Jefferson, Mahoning, Trumbull and Columbiana counties, support JCC's northern expansion efforts, and leverage established partnerships with other training providers in the region-colleges, universities, training centers and Workforce Investment Boards. Training programs will be targeted to individuals who want to prepare for and pursue community college training and credentials, and to employers who require training for both new and incumbent workers. New construction of 4 new energy efficient homes in Steubenville, and the rehabilitation of one home. These homes will sell to persons at 50% to 60% of Area Median Income with a mortgage of \$50,000 for the homeowner. The homes will cost approximately \$125,000 each. We have received \$225,000 in funding from the Federal Home Loan Bank's Affordable Housing Program in Cincinnati through Huntington Bank. We have purchased the lots from the City of Steubenville. | Jefferson Community College (Eastern Gateway Comm | 400 | 31 to 90 days | \$1,283,496 |
| Jefferson | 2009 Homeownership Steubenville | The Jefferson County CAC is the largest not-for-profit service organization in Jefferson County. We serve very low income population with over 20 programs, including programs for homeless, Head Start, Job Services, etc. The lease on our present building is escalating beyond our control and budget. The City of Steubenville may be willing to donate a former school building for the CAC's use. All we would need is monies to rehabilitate the building. | Urban Missions Ministries | 10 | 31 to 90 days | \$400,000 |
| Jefferson | Jefferson County CAC New Offices | Bob Gilbow Purchase and rehabilitate a building in Steubenville, Ohio, to house the offices of the Ohio Valley Black Caucus. The Director is currently out of her home and needs office space. | Jefferson County Community Action Council, Inc. | 20 | 91 to 180 days | \$225,000 |
| Jefferson | Black Caucus Offices | I have been asked to find funds for the organization. I am a grants writer in Steubenville. | Ohio Valley Black Caucus | 6 | 91 to 180 days | \$200,000 |
| Jefferson | Expansion of Urban Underground | Bob Gilbow We currently run a small youth center in a building in downtown Steubenville. We are quickly out growing our space. We rent a small space. We would like to purchase a building in downtown Steubenville and renovate it for the center. The center would be open to the people plus provide jobs for those who would help renovate the building. This grant would allow us to build a community center that would be able to meet the physical, emotional, mental and spiritual needs of youth in the Ohio Valley. | Dirty Vagabond Ministries | 8 | 31 to 90 days | \$300,000 |
| Jefferson | Police cruiser purchase | Utilize the money allotted from the Justice department to purchase a police cruiser through the Byrne grant. Village will provide a 68% match from equipment funds. The village was unable to purchase a cruiser due to lay offs at Severstal Steel that reduced our income and reduction in our equipment fund to \$36,000.00. | Mingo Junction Police Department | 0 | 31 to 90 days | 13944.00 |
| Knox | Levering Drive Intersection Improvements | To install a third left turn lane onto State Route 95 from Levering Drive. Levering Drive is the main east from the Fredericktown school property. During times when school is starting there is a large volume of car and bus traffic at this intersection causing long backups on the state route as cars attempt to enter and exit the school. | Village of Fredericktown | 25 | 31 to 90 days | \$100,000 |
| Knox | Critical Bridge Rehabilitation and Replacement | Critical Bridge either rehab or replaced that are deteriorating and current funding mechanisms and revenue prevent us from completing. Purchase 4 light transit vehicles with a narrow body for the Mid-Ohio Transit Authority | Knox County Engineer | 40 | 0 to 30 days | \$6,700,000 |
| Knox | Dist 5, PID 85770, KNO Purchase 4 LTNs | Purchase security system for the Mid-Ohio Transit Authority | Ohio Department of Transportation | 1 | 31 to 90 days | \$180,000 |
| Knox | Dist 5, PID 85769, KNO Security system | Facility upgrades for the Mid-Ohio Transit Authority | Ohio Department of Transportation | 1 | 31 to 90 days | \$7,100 |
| Knox | Dist 5, PID 85771, KNO Facility upgrades | FASB roads within Knox County either widened and milled and filed, or milled and filed , current funding and revenue prevent us from completing. | Ohio Department of Transportation | 1 | 31 to 90 days | \$43,857 |
| Knox | Minor Collectors (FASS) Improvement and/or Mill an | This funding is requested to replace a pump in an existing lift station near the end of its service life. | Knox County Engineer | 20 | 31 to 90 days | \$3,156,800 |
| Knox | Major Lift Station Pump Replacement | New backup generator for existing lift station. | ADR & Associates, Ltd | 1 | 0 to 30 days | \$22,200 |
| Knox | 38 KW Generator for Orchard Hill Lift Station | Provide decentralized sewer service to all residents and businesses in 8 hamlets in Knox County. Replaces failed on-lot septic systems and eliminates health hazards. Will allow existing businesses to continue to operate and will allow new business to consider the area. Will provide service to laborers serving center in Milwaukie, OH. Project is currently being reviewed by OPA. Contract will be awarded in September 2009. | ADR & Associates, Ltd | 1 | 0 to 30 days | \$33,300 |
| Knox | 38 KW Generator for Apple Valley I Lift Station | This is an upgrade to a 30+ year old sewage treatment plant. Due to effluent parameters exceeding limits, EPA has directed the plant operator to bring the plant into compliance this year. The initial phases of this project will be under construction within 6 months. This project is intended to rehabilitate existing sewer lines to reduce infiltration and inflow. The Little Jelloway Wastewater Treatment Plant experiences flow spikes in wet weather that create process problems at the plant. This project is closely related to another project to upgrade facilities at the treatment plant. | ADR & Associates, Ltd | 50 | 91 to 180 days | \$4,773,000 |
| Knox | Decentralized Sewer for Unincorporated Hamlets | This project involves adding telemetry to 4 existing lift stations for improved performance monitoring. | ADR & Associates, Ltd | 15 | 91 to 180 days | \$1,276,500 |
| Knox | Little Jelloway Wastewater Treatment Plant Upgrade | Upgrade telemetry at existing water well field to improve performance monitoring and optimization. | ADR & Associates, Ltd | 6 | 31 to 90 days | \$79,920 |
| Knox | Sewer Main Rehab for I & I | New 600,000 gallon water tank to replace existing 100,000 gallon water tank at the entrance to Apple Valley. This larger tank will eliminate supply concerns and provide a buffer if there are problems at the water well field or treatment plant. | ADR & Associates, Ltd | 1 | 0 to 30 days | \$26,640 |
| Knox | Lift Station Telemetry - 4 Lift Stations | New 180KW generator backup-power supply for existing water well field to ensure a reliable supply of water in the event of a power outage. | Knox County Water and Sewer-ADR & Associates, Ltd | 1 | 0 to 30 days | \$24,000 |
| Knox | Water Well Field Telemetry Upgrade | This project involves replacing 13,000 linear feet of existing 2" water line with 13,000 linear feet of 6" water line to improve water volumes and pressures. This will provide a significant improvement in the safety. | Knox County Water and Sewer-ADR & Associates, Ltd | 8 | 91 to 180 days | \$444,000 |
| Knox | Apple Valley New 500,000 Gallon Water Tank | This project involves replacing 8,874 linear feet of existing 4" water line with 8,874 linear feet of 6" water line to improve water volumes and pressures. The replacement will also reduce the amount of water lost from leaks. | Knox County Water and Sewer-ADR & Associates, Ltd | 1 | 91 to 180 days | \$55,500 |
| Knox | 180KW Generator for Water Well Field | This project involves replacing 23,232 linear feet of 6" water main with 23,232 linear feet of 6" water main. This project will eliminate a significant volume of water lost through leakage. | Knox County Water and Sewer-ADR & Associates, Ltd | 25 | 91 to 180 days | \$874,300 |
| Knox | Water Line Replacement - 2" to 6" | Project to erect a new 300,000 gallon water tank in the industrial development area on the west side of town. The purpose of this project is to satisfy Ohio EPA's requirement of at least 1 day above ground storage. Also, this sewer needs to be in this area to ensure an adequate quantity of water to allow for expansion of three existing facilities and hopefully the addition of other factories in the future. | Knox County Water and Sewer-ADR & Associates, Ltd | 20 | 91 to 180 days | \$596,820 |
| Knox | Water Line Replacement - 4" to 6" | Installing approximately 1 mile of 10" water main to connect 2 dead end lines in 2 different industrial parks. This will help with residual pressures if there is ever a need to fight a fire in this area as well as providing a greater quantity and better quality of water to the consumers on the west side of town as well as increasing our ability to reduce the number of customers to be without water in the case of a water line break. | Village of Fredericktown | 200 | 91 to 180 days | \$1,100,000 |
| Knox | 6" Water Main Replacement | Nearly a complete rebuild of our wastewater treatment plant. This project has been on going since Feb. 2007. Nearly completed. The cost of Phase I of Phase II is nearly \$11,000,000. This is an enormous amount of debt for a community of less than 2,000 people. If sewer rates continue to rise we expect to see customers moving away and others being unable to pay what is already the highest sewer bills in our county. Outsource approach slab leveling | Village of Fredericktown | 250 | 0 to 30 days | \$2,500,000 |
| Knox | 300,000 gallon elevated water tank. | Seal north parking lot to maintain pavement and reduce time for repavement | Ohio Department of Transportation | 31.6 | 31 to 90 days | \$1,100,000 |
| Knox | West side water line loop. | Repaving of existing parking lot on the south side of the building. We currently have a grant for a small amount of money to improve the existing paved area. The requested funds will repave a parking area to beyond existing | Knox County Board of Mental Retardation and Develo | 3 | 31 to 90 days | \$6,688 |
| Knox | Wastewater Treatment Plant Improvements, Phase II | New parking area for the north side of the building will add an additional 20 spaces. | Knox County Board of Mental Retardation and Develo | 4 | 31 to 90 days | \$37,038 |
| Knox | Dist 5, PID 85510, D05 BAS FY2010 | Repair and replace existing sidewalks and curbs around the building and parking area that are in need of repair. | Knox County Board of Mental Retardation and Develo | 3 | 31 to 90 days | \$97,585 |
| Knox | Seal North Parking lot | Curbed extension and replacement, bank removal, widening at various locations. Additional aggregate base, tack and asphaltic concrete, double strip and seal, all to improve FASB based current funding mechanism and revenue prevent us from completing. | Knox County Board of Mental Retardation and Develo | 4 | 31 to 90 days | \$27,500 |
| Knox | Repaving of Current Parking | Replace designated bridges at various locations' design build' concept | Knox County Engineer | 15 | 31 to 90 days | \$1,450,000 |
| Knox | New Parking | Rehab concrete on either their bridges by removing existing decking, replace deteriorated steel members, install new flooring, waterproof membrane and concrete wearing surface. | Knox County Engineer | 30 | 91 to 180 days | \$5,916,950 |
| Knox | Sidewalk and curb repair | 800 linear feet new sanitary sewer line, 22 new manholes, 2 new duplex pump station with a highway and a side path crossing. This new sewer line and pump station will replace an overloaded existing sewer line to the existing wastewater treatment facility and be in place for a proposed wastewater facility relocation in the future. The new interceptor will eliminate potential overflow by removal of two outfalls, under capacity pump stations and connect to an existing sanitary sewer overflow. The new pump station will allow the community to utilize the truck sewer until the proposed WRF facility is operational in 3 years. | Knox County Engineer | 15 | 91 to 180 days | \$1,000,000 |
| Knox | FASS Wally Road Improvement | 700 linear feet of new sanitary sewer provides sewer service to the Village's coprocession line to receive wastewater from a remote incorporated area and to provide new sanitary service to approximately 15 single family homes. | Village of Centerburg | 170 | 91 to 180 days | \$1,200,000 |
| Knox | County Bridge Replacement - Design Build | 25 linear feet of new sanitary sewer lines, 2400 linear feet of new storm sewer lines, 15 storm sewer inlets and 2 sanitary sewer manholes. | Village of Centerburg | 0 | 91 to 180 days | \$150,000 |
| Knox | Timber Bridge Rehabilitation | Rapidly deteriorating sanitary sewer lines and existing drainage field has created repeated surface water flooding incidents and cross connection of the sanitary and storm sewers in this particular area of the community. | Village of Centerburg | 0 | 91 to 180 days | \$565,500 |
| Knox | Trunk Interceptor Sanitary Sewer | 700 linear feet of new sanitary sewer lines, 23 manholes and a storm crossing to provide sanitary sewer service to 25 single family dwellings currently using on-site treatment systems. A large portion of this project involves the extension of an interceptor sewer that will additionally serve recently undeveloped areas in the future. | Village of Centerburg | 0 | 91 to 180 days | \$850,000 |
| Knox | Clayton/Rich Hill Sanitary Sewer Extension | Research, development and testing of supplemental lighting system for use in controlled environment growth chambers. The test fixtures will be designed using Cycloptics US patent pending Elumtech reflector design software. The test fixtures will produce square and rectangular beam patterns with uniform light intensity distribution across the illumination plane with minimal light energy being wasted by falling outside the defined target area. This will result in potentially 80% energy savings and improved research results. | Cycloptics Technologies, LLC | 15 | 31 to 90 days | \$125,000 |
| Knox | Dally Street/Church Street/Hartford Ave Sanitary/S | | | | | |
| Knox | Hess Addition Sanitary sewer | | | | | |
| Knox | Controlled Environment Growth Chamber Lighting | | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Knox | LED Light Bulb | LED lighting will eventually become the dominant lighting source, however, unless mandated by law, cost and cosmetics are the two primary barriers to broad acceptance and adoption. Consumers object to the glare and appearance created by the flat LED arrays on the market today. Cycloptics has already initiated a proprietary approach to create a believable and a patentable LED product with optimal directional control and energy efficiency of the 50% or more. The initial product development and commercialization goals for the Lumiblox™ LED bulbs that will differentiate it from existing CFL (compact fluorescent lamps) for use in four and six inch recessed can lights are: <ul style="list-style-type: none"> • Mercury free • Fully dimmable • Square, rectangular, and round beams • 25% more energy efficient | Cycloptics Technologies, LLC | 18 | 91 to 180 days | \$325,000 |
| Knox | Interceptor Sewer, I&I Work, Market St. Manhole Re | 1850 linear feet relining existing sanitary sewer lines, rehabilitate 22 manholes, replacement of lift station and modifications to a back-up pump enclosure. Planned for work to reduce identified I&I sources from previous studies. | Village of Danville | 50 | 91 to 180 days | \$285,000 |
| Knox | Safe Community Project | Police will hire 1 new police officer for a three year period to be assigned to providing safety to the community through patrol, safety programs, community interaction, interaction with the local school system and assorted other police related duties with the goal of providing a safer community. | Danville Police Department | 1 | 31 to 90 days | \$165,000 |
| Knox | business expansion effort | per web site development/modification to reactively source potential client base, make initial contacts and develop call for sales staff. Also, hire one telemarketer to call prospects and develop appointment list. If these activities generate +10 additional engagements/yr, one additional auditor/consultant would be needed/hired. | m&d consulting inc. | 3 | 0 to 30 days | \$50,000 |
| Knox | Valley General Expansion | my business is adding large customers, looking for lost dollars/profits, recovering them and billing a % fee of \$\$ recovered. Adding 1000 to 1200 sq ft to existing building, additional dairy and pet facilities, drive thru and drive up window. This would increase additional job possibilities of at least 50 people, allowing 24 hour a day business seven days a week, presently 7, drive a week 18 hours a day. It is our goal to offer more facilities to our customers, i.e. Ice Cream shops and additional sandwich, fresh cut lunch meat, salads, etc. with sit down facilities and larger parking area. | Valley General Store | 6 | 91 to 180 days | \$250,000 |
| Knox | Agricultural Education Facility | Construction of a new agricultural education facility for the East Knox Local School District. This will include a new, 3,000 SF masonry building to provide a 21st Century Educational facility for the agricultural education classes and Future Farmers of America (FFA) at East Knox High School. The current WWI facility will be leveled as it is outdated and inefficient. | East Knox Local School District | 20 | 31 to 90 days | \$472,500 |
| Knox | Wiring High School and Elementary School | Rewire the existing East Knox High School and East Knox Elementary buildings with Cat 6 plenum structured cabling. Replace outdated switch gear with Cisco Catalyst multivoltage switches. East Knox has a new middle school with current technology. We are unable to effectively communicate and share technology due to the antiquated wiring and switch gear in the older buildings. This will improve the 21st Century Learning Environment for our students in the older facilities. | East Knox Local School District | 5 | 0 to 30 days | \$41,610 |
| Knox | Housing | This is housing we build and offer on land contract to help people get into homes and gain equity so that they can get financing. We have 1000 new homes already built and offer on land contract to help people get into homes for the past 6 months and would like to build another 1000 or more people. | S&S Construction | 10 | 0 to 30 days | \$50,000 |
| Knox | State Route 95 West Upgrade Project in Knox County | This would provide the commercial industry and private sector safer and easier access to Interstate 75 from Knox County. Safety improvements to SR 95 West will improve both safety and economic vitality in Knox County. Many companies utilize this corridor for business. | Board of Knox County Commissioners | 1500 | 181 days or more | \$5,690,000 |
| Knox | Lakefront Grill Expansion | The funds would be utilized for the construction, including engineering, for an upgrade to SR 95 West. The project is in Knox County. These upgrades would include grade lowering, curve straightening and turn lane enhancement. The estimated project length would be 11,500 ft. encompassing 4.22 miles in Knox County. | Lakefront Grill (Yoe Enterprises, Inc.) | 25 | 31 to 90 days | \$350,000 |
| Knox | Sewer main rehab for I & I | This would represent approximately 1,500 sq ft building addition banquet room, additional kitchen and equipment, additional parking, and an additional 5 to ten people for a total of 30 to 35 employees. This project represents an opportunity to add a new area for banquet, public meetings, business meetings, etc.) | Knox Co Water & Wastewater | 6 | 31 to 90 days | \$81,000 |
| Knox | New wastewater pump for major lift station | updating our sewer main | Knox Co Water & Wastewater | 6 | 31 to 90 days | \$22,500 |
| Knox | Telemetry to 4 lift stations | have the 4 lift stations hooked up to our telemetry system | Knox Co Water & Wastewater | 6 | 0 to 30 days | \$27,000 |
| Knox | 38KW generator for orchard hills lift station | have permanent generator installed at orchard hills lift station | Knox Co Water & Wastewater | 6 | 91 to 180 days | \$33,750 |
| Knox | 38KW generator for apple valley lift station | To add a permanent generator to our apple valley lift station | Knox Co Water & Wastewater | 6 | 91 to 180 days | \$33,750 |
| Knox | Upgrade telemetry at water wellfield | to obtain an improved telemetry system at our wellfield | Knox Co Water & Wastewater | 6 | 0 to 30 days | \$36,000 |
| Knox | construct 500K tank to replace 100K | replace our existing 100K potable water tank with a 500K to better serve our customers | Knox Co Water & Wastewater | 6 | 31 to 90 days | \$450,000 |
| Knox | 180KW generator for water wellfield | install a permanent generator at our water wellfield | Knox Co Water & Wastewater | 6 | 91 to 180 days | \$56,250 |
| Knox | replace 2" existing water main (13,000lf) | replace existing 2" water main to help prevent breaks and leaks | Knox Co Water & Wastewater | 8 | 181 days or more | \$1,600,000 |
| Knox | replace 4" existing water main (8,874lf) | replace our existing 4" water main to help prevent breaks and leaks | Knox Co Water & Wastewater | 8 | 181 days or more | \$1,200,000 |
| Knox | replace 6" existing water main (23,232 lf) | replace our existing 6" water main to help prevent breaks and leaks | Knox Co Water & Wastewater | 8 | 181 days or more | \$2,857,536 |
| Knox | Fredericktown IT lab & Fitness Additions | 3500 sq. ft. shop facility to meet the needs of three programs: Industrial Tech, agriculture, and a pre-engineering program (Project Lead the Way). Community students are being housed in an off school site to accommodate these classes. At the same time a 1500 sq. ft. fitness room is being built to meet the needs of our physical education program. Our school received a three year Capital Construction Physical Fitness grant for nearly \$500,000 and have purchased fitness equipment to be used in the new facility. The room is being built to accommodate the equipment and provide a place for PE classes to properly use the equipment. The projects will be going out for bid in mid-March 2009 and construction to start in May, 2009. This will create several jobs for area construction workers. | Fredericktown Local School | 25 | 31 to 90 days | \$225,000 |
| Knox | energy efficiency upgrade | There is an immediate need for a high energy efficient boiler for a building that is 40 years old. Many of the air handling units need to be upgraded or replaced. Lighting fixtures will be replaced with high efficient fluorescent bulbs. HVAC controls in two different buildings will be converted to set points and control system to conserve energy. Heat and motion sensors will be added to detect occupied spaces to conserve energy. Consideration is being given to utilizing a wind turbine to produce energy to offset some of the electrical energy needs of the school building. Solar panels are being considered to handle the heating needs of a small greenhouse. | Fredericktown Local School | 15 | 31 to 90 days | \$225,000 |
| Knox | Ohio Rehab Center | I would like to see a modern and professional Rehabilitation/Dietary/Weight counseling center in Ohio. Not just a hospital setting, but one with full rehab services for obesity, depression and drug use sufferers. Outcome would be a source for more counselors to have longterm jobs where they build relationships with patients giving them a chance for permanent recovery. Also dietitians, therapists (physical and mental), doctors, and general laborers would benefit. Not to mention that patients could come in from all over the county to get assistance. The creation of this facility would also be a source for many construction laborers that are struggling now under the housing bust. New personally speaking I don't have the funds to help back this up, but it would be amazing to see this addition to the Ohio culture. There are huge issues with Drug use, Obesity, and Depression across our state, not to mention our neighbor states. | None | 100 | 181 days or more | \$15,000,000 |
| Knox | Engineering Study - Phase II - Critical Bridge Des | Engineering Study to determine Critical Bridges for Phase II of Stimulus | Knox County Engineer | 6 | 31 to 90 days | \$100,000 |
| Knox | Hartford Avenue Waterline | 1800 linear feet of waterline, associated valves, fire hydrants, and other items. This project will extend waterlines to provide much needed fire protection in the town square area and will resolve current pressure issues on the east end of the village. | Village of Centerville | 50 | 91 to 180 days | \$323,000 |
| Knox | Hartford Ave Waterline (corrected) | 1800 linear feet of waterline, associated valves, fire hydrants, and other items. This project will extend waterlines to provide much needed fire protection in the town square area and will resolve pressure issues on the east end of the village. | Village of Centerville | 50 | 91 to 180 days | \$265,000 |
| Knox | Preston Street Waterline | 1800 linear feet of waterline, associated valves, fire hydrants, and other items. This project will extend waterlines from the town center to the southern side of the village to provide fire protection in town and at an existing elementary school. | Village of Centerville | 50 | 91 to 180 days | \$323,000 |
| Knox | ODMRDD Development Center Workshop Renovation | Upgrade the workshop environment at one of the ODMRDD Developmental Centers. | Ohio Department of MRDD | 10 | 91 to 180 days | \$150,000 |
| Knox | Document Imaging and upgrade for equipment | Complete document imaging solution for agency to use less paper and to cut down on printing. 14 speed desktop duplicating solutions for two employees to input information. Decrease the need for additional storage space to house archived files. New server to accommodate storage needs and speed up access time. EMTEC processes a development activity, Reflex Plastics and OSU that will focus on two areas to employ the use of lightweight, low-cost mirrors for photovoltaics applications. Shape-formed acrylic material, coated with aluminum and then sanded with an epoxy, have outstanding durability combined with lightweight and very low cost. These provide optical surfaces that, unlike mirrors based on glass substrates, can easily be tailored for specific focal lengths. These will be used in: A) Concentrator photovoltaics (CPV), B) V-cells from Ohio State PV activities that will combine with mirrors and structures from the industrial partners to demonstrate low-cost CPV modules. Combination of these highly industrialized CPV units will be used to create solar installations. C) Augmented photovoltaics (APV). In this application, lightweight, responsive mirrors will be utilized to increase the incident solar energy on conventional flat panels by up to approximately 40%. Also, by proper placement of mirrors in the area of panels the task will assume the possibility of siphoning power output from the array despite the movement of the sun during the daylight hours. | Knox County Board of Mental Retardation and Develo | 4 | 31 to 90 days | \$30,000 |
| Knox | Low-Cost Plastic Mirrors and Assemblies for Centen | EMTEC | 28 | 0 to 30 days | \$1,000,000 | |
| Knox | WTP Aid in Construction | Construction of a new 200,000 gal water treatment plant. Treatment process is sequestration of iron and manganese along with sodium hypochlorite disinfection. Install 200 gal to 200 gpm submersible well pumps, a 30" x 30" operations building and associated site improvements. The purpose of this request is to aid in construction for the provision of a safe & adequate water supply for a low-income community. | Village of Danville | 125 | 0 to 30 days | \$448,585 |
| Knox | Centerburg Youth Wrestling | Purchase two new high school regulation wrestling mats and wall padding to increase opportunities for grades K-12 in the Centerburg School system in activities such as wrestling, karate, gymnastics and general fitness. This purchase will allow our program to increase participation practices and fund raising clinics to support future releases. Being located in a small, rural district without a large population, this purchase otherwise might never be possible. Our goal is to provide many, reduced cost programs that promote physical fitness to the children all year long, utilizing the existing support, supervision and instruction our club provides. | Centerburg Youth Wrestling | 10 | 0 to 30 days | \$27,226 |
| Knox | Heart of Ohio Trail | 14 miles of 10 foot wide asphalt bike trail and associated drainage, signage, bollards and striping | Knox County Park District | 27.4 | 181 days or more | \$5,600,000 |
| Knox | Mohican Valley Trail | 4.5 miles of five-foot wide asphalt and five-foot wide chip/seal for bike, amish buggy and equestrian trail and associated engineering, drainage, signage and striping. | Knox County Park District | 27.4 | 181 days or more | \$800,000 |
| Knox | Kokosing Drive Sanitary Sewer Project | The Village of Gambier is requesting funding to construct sanitary sewer service for the unsewered residential area on Kokosing Drive. This area consists of approximately twenty single family lots that are presently served by individual on-site sanitary sewer treatment systems using septic tanks and leach fields. The topography of the area is quite variable with over 130 feet of vertical elevation difference throughout the area. Due to the physical location of the houses, it is necessary to build two different sanitary sewer alignments instead of a single sewer line. In addition, an existing pump station would be removed from service and gravity sanitary sewer extended to the new pump station to serve the project. The project was outlined in the Village's member 1989 Study completed in 1997. The project would consist of approximately 1800 linear feet of 12-inch sanitary sewer, 2250 linear feet of 12-inch sanitary sewer, 50 manholes, 350 linear feet of 4-inch diameter force main, a complete new sanitary sewer lift station which will also permit the removal of another existing sanitary sewer lift station, and the connection of the existing heavy houses. | Village of Gambier | 20 | 181 days or more | \$550,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Knox | TRAINING PROGRAM | I hope to provide training to interested applicants in the business of boat repair. I currently have a boat repair business and have advertised nationally for my services to do on sign training. I am a retired corporate technical instructor who started this repair business 2 years ago. The training allows for just now inquiries from several states. Currently, I am using a truck for my local business that has become unreliable for any long distance travel and it is not economical on gas. I would use the money for a better used truck to transport all my equipment to the right training location and for a new computer. Currently my wife and I are sharing a computer which she takes to work during the day and she travels with it for her work. | THE BOAT DOCKTOR | 20 | 0 to 30 days | \$35,000 |
| Knox | Solar panels for schools | We are adding two additions to our school building and would like to use solar panels on a sloping metal roof to generate power to supply the two areas with electrical energy. One addition is about 2000 square feet and the other addition is about 1800 sq. ft. | Fredericktown Local School | 15 | 31 to 90 days | \$225,000 |
| Knox | Woodward Development Project | The project is slated to start spring 2009. The architect is finalizing the construction documents and we will go out for bid within the next 30 days. The Woodward Development Corporation is the developer of this landmark commercial/retail block on the west side of downtown Fredericktown, benefiting not only the city's arts & cultural agencies, but also local services, restaurants, lounges, retail businesses that the community patronizes throughout the day, before and after performances. The facility will also serve as a conference center, education incubator, and a 500-seat auditorium will permit booking of touring entertainers of national reputation making Mount Vernon a true destination for performing arts fans. The long term plan for the facility includes a symbiotic blend of enterprises that would save the downtown business district. The 1st floor occupancy will be primarily retail and food service. The basement area will be sales areas for independent artisans as part of cooperative ventures. The 2nd floor will be office suites, including for-profit and not-for-profit businesses. A total of 65,000 sq ft will be developed & restored. The resulting net job growth (excluding construction employment), will be 42 new full time equivalent jobs created as a result of the investment, a 25% increase in employment. This project is to cover 10 employees payroll, pay for materials, purchase delapidated homes, and provide low cost homes to family with limited income with minimal profit to investor. Construct 50' x 50' driveway canvas covered salt storage facility on concrete block foundation and one year supply of salt. Install a 12" diameter black canvas covered salt storage facility on concrete block foundation and one year supply of salt. This project includes road improvement of Owl Creek Church Rd. from Rte 586 to Prairie Rd., approximately 2.5 miles of road. Improvements include: ditching, raising road level, current pavement reconstruction and paving. This will increase road safety, reduce environmental impact on farmland (by reducing water runoff and harmful dust clouds), provide better access for housing developments, reduce road cost to maintain the road surface, and improve the road experience of the road user. This project is necessary to replace a bridge in extremely poor condition on Richard St. The bridge is a 40' span and is currently in critical condition. It is in critical need of replacement and has been re-laid to 5 tons because of the serious structural deficiencies. The bridge is critical to the area because it is the only alternate route available if the State Route 62 bridge is closed for repair or if it is closed due to accident or other emergency. The new structure would be a 2 lane bridge for highway loading. | Woodward Development Corporation | 60 | 31 to 90 days | \$9,000,000 |
| Knox | Real Estate Growth for Low Income Family | | Real Estate | 10 | 0 to 30 days | \$250,000 |
| Knox | County Highway Salt Storage Facility and salt | | Knox County Engineer | 15 | 31 to 90 days | \$390,000 |
| Knox | Croton Rd/ Wilson Rd. Storm Water Project | | Knox County Engineer | 8 | 31 to 90 days | \$56,000 |
| Knox | Owl Creek Church Rd. Reconstruction | | Monroe Township Trustees/ Rod Booth | 30 | 91 to 180 days | \$1,650,000 |
| Knox | Richard Street Bridge Replacement | | Village of Danville | 20 | 91 to 180 days | \$350,000 |
| Knox | Wireless Broadband for Rural Application | Our service will be provided to rural areas where there are currently no high speed options, current data projects are expected to be mostly southern and eastern Ohio, coming a bit into the north of the state. Due to high infrastructure costs, no competition, and a desire to be these areas without grant money. Building a wireless infrastructure to equip rural residents with the benefits to be able to access the high speed broadband speeds. Establishing a wireless service is much more cost effective than laying cables to each home, while maintaining the same service quality. Services that will currently be able to be offered will be internet access and phone service, with a goal of adding IPTV, TV services to the packages within a year. New WiMAX technology will be able to push a strong enough signal to provide all those services. Once we are able to establish our first several sites we will have the ability to use local county money, along with State and Federal monies to expand. The capital earned from this initiative will be re-invested into in-state broadband infrastructure development. This will create commercial expansion that will create countless jobs statewide. Build and maintain a Solar PV Electric Utility Grade Plant. | Infinte Wireless Solutions | 30 | 0 to 30 days | \$250,000 |
| Knox | 6MW Solar PV Electric Plan in Ohio | | American Solar Generation Specialists | 30 | 0 to 30 days | \$60,000,000 |
| Knox | Business Expantion | To expand operation from seasonal to year round. Provide indoor seating for 25 to 30 at present only have walkup and drive thru. Also install retail system (cash/yr) grill ranges, tables chairs, restrooms and more. Will double workforce as soon provide site for nearby high school students as well as 2 more full time employees. Taxes will increase income and sales created from on premise seating. This will help us to serve the residents of Howard. Apple Valley East Knox high and middle school students and staff. Many baseball and softball teams (out on an ice skaters and cyclist from the nearby bike path. The ice cream and sandwich business very good last season but standing in line was very difficult for some senior citizens and this project will allow my staff to serve the patrons more quickly and give people an option. | small business /ice cream shop drive-in | 8 | 0 to 30 days | \$110,000 |
| Knox | Business Expantion | To expand business for 25-30 inside seats. At present time we only have walk up and drive up windows. This means the kitchen will need to be nearly empty. At the present we use microwaves and steam tables. The plan is for a deep fryer, grill, hood and the standard system (cooks prep tables etc. Of course that means tables and chairs also. Our goal is to hire 4 full time and 4 part time employees. This will allow us to give some young people a job. We need to expand in order to accommodate our high volume of customers. Many senior citizens have a hard time standing in long lines. Our client base comes from Apple Valley, Howard, East Knox high and middle schools and their staffs. Xenyon College as well as many baseball and softball teams. There is a very busy bike path across the street as well. The inside seating will generate more sales and more employees will create more income tax and property taxes also. This will enable us to be open the year round rather than 5-7 months adding to the tax base. | small business /ice cream shop drive-in | 8 | 0 to 30 days | \$110,000 |

| Knox | Eastside Fire Substation | The Mount Vernon Fire Department is desperately in need of a sub station on the east side of town. When looking at our coverage area, adding a substation on the east side of town is the most logical choice to help combat our current response time problem. The potential for our highest loss of life and property are both on the east side of town. The Fire Department responded to over 4,200 calls for assistance and nearly 20% of that call volume was on the east side of town. This station will allow us to drastically increase the safety of our entire community as well as visitors. Without assistance from grants such as this, we would currently be unable to fund this project. | City of Mount Vernon | 6 | 181 days or more | \$1,750,000 |
| Knox | Kokosing Interceptor Sanitary Sewer Rehabilitation | Rehabilitation of the Major Sanitary Sewer is required to eliminate service inflow into this fifty (50) year old wastewater line. The inflow has resulted in overflows into a state scenic waterway and elimination is required by the O.E.P.A. and our permit to operate the Wastewater Plant. | City of Mount Vernon | 10 | 91 to 180 days | \$1,200,000 |
| Knox | Center Run Interceptor Rehabilitation Project | This Sanitary Interceptor is approximately fifty five (55) years old and is located below the ground water elevation. Preliminary study and proposed improvement plan is complete. This wastewater line is a source of severe inflow and infiltration constantly, which worsens during storm events. Disposal of commercial and domestic wastewater from private septic systems is strictly regulated by O.E.P.A. The City of Mount Vernon will upgrade its plant to qualify to accept this waste. Area business and residences, not on a central system, now have their waste hauled over forty miles to approved facilities. | City of Mount Vernon | 10 | 91 to 180 days | \$1,000,000 |
| Knox | Septage Receiving Station Installation | The Methane Boiler at the Wastewater Treatment Plant has failed and immediate replacement is needed for the fifty (50) year old furnace. The issue of methane produced at the Wastewater Plant, provides heat for buildings and is used to assist in the sludge processing. This is considered an environmentally positive use of the process by-product. | City of Mount Vernon | 25 | 181 days or more | \$300,000 |
| Knox | Methane Boiler Replacement | | City of Mount Vernon | 0 | 91 to 180 days | \$100,000 |
| Knox | Hospital Drive Connector Street | Construction of approximately 1,000 feet (0.19 miles) of new two lane connector street from Yaeger Road to Colchoon Avenue (State Route 36) in the City of Mount Vernon to improve the movement of passenger vehicle traffic and reduce congestion through the growing commercial area on the east side of the City. The new roadway would replace the existing private drive to Knox Community Hospital, therefore improving access to the hospital. The project would be ready for construction in 2009. | City of Mount Vernon | 0 | 91 to 180 days | \$895,400 |
| Knox | Gilchrist/New Gamber/Eastern Star Roadway Improve | The proposed reconstruction of approximately 6,640 feet (1.25 miles) of existing two-lane, functionally deficient roadways, to improve access along the east side of the City of Mount Vernon. The roadway will currently be primarily access for vehicular traffic traveling from areas south and east of the City of Mount Vernon to access the increased commercial development along Colchoon Avenue (State Route 36). Improvement of these roadways will develop a thoroughfare access from Gamber Road (State Route 229) to the existing roadway facilities in the City. Improve roadway facilities to reduce congestion on other adjacent roadway facilities, and improve safety for the traveling public. The project would be ready for construction in 2010. | City of Mount Vernon | 10 | 181 days or more | \$5,446,250 |
| Knox | Gamber at Edgewood Intersection Improvement | Improvements to the Gamber Road (State Route 229) at Edgewood Road intersection, including construction of turn lanes and tapers on Gamber Road, turn lanes and tapers on the Edgewood Road North approach. Work includes pavement widening, resurfacing, minor drainage, new signal pole structure, pavement marking, and signing inside the existing right-of-way. Project length is approximately 650 feet (0.19 miles). The improvement will provide safety and operational enhancements at a congested intersection in the City of Mount Vernon. The project would be ready for construction in 2009. | City of Mount Vernon | 10 | 31 to 90 days | \$346,500 |
| Knox | Coschocton Avenue Lane & Safety Improvements | The City of Mount Vernon and the Ohio Department of Transportation (O.D.O.T.) have joined forces to combine a Small Cities Widening Project and Safety Enhancement Project into one project. This project will accomplish the following major tasks: 1. Eliminate numerous safety problems in the City's highest accident area, which was previously identified by O.D.O.T. 2. Complete the final Phase II of the State Route-36 widening project inside the city. This project, being designed by O.D.O.T., is an ideal candidate for stimulus funds because it makes major safety improvements and roadway improvements in an area that is at or beyond design capacity limits. | City of Mount Vernon | 0 | 181 days or more | \$1,600,000 |
| Knox | Wastewater Treatment Plant Upgrade | In order to meet the requirements of the O.E.P.A.'s N.F.A. provision of our permit to discharge, the City is in the final design stage of a complete upgrade of the Wastewater Treatment Plant. This project will be bid in the fall of 2009 with an estimated cost of \$12,800,000. This wastewater treatment plant significantly exceeds the prediction for the Estimated Area (approximately 1,300 homes). This has been identified as our #2 priority in a recent water distribution analysis. This project needs minimal civil engineering and can be ready to go by mid summer 2009. | City of Mount Vernon | 30 | 91 to 180 days | \$6,500,000 |
| Knox | Newark Road Waterline | | City of Mount Vernon | 0 | 91 to 180 days | \$278,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Knox | Performing Arts Center - MTVarts | Redundant by SA Architects - online marts.com Building may require stripping interior to structure. Replace electrical, plumbing, roof, upgrade fire protection, install ventilation system, general heating, temp, elevator, etc to ensure full accessibility. Purchase and property, demolition for parking. | MTVarts Inc | 100 | 0 to 30 days | \$1,500,000 |
| Knox | Wooster/Coshocton Water Towers Rehabilitation Proj | Altmanco location in downtown business district. Smaller facility. Less upgrades required for conversion to theatre & PAC. S. A Architects conducting preliminary feasibility study. Part of a complex which includes conversion center (purchase only included). Either facility provides community affordable family entertainment or fully accessible venue available for conversions to organizations & public. PAC allows increased partnership with People 1st of Ohio - disabilities advocacy group, compliments current community development & neighborhood revitalization. Jobs provided via purchase, conversion & self sustaining programs. Funds needed for initial purchase & completion. New details @ www.mtvarts.com | City of Mount Vernon | 0 | 91 to 180 days | \$650,000 |
| Knox | Cougar Drive/High School Waterline Project | This new waterline will serve as a cross connection between the City 16-inch transmission water main and the High School/Junior High School Complex. Our distribution system analysis has identified this as our top waterline priority because of the lack of adequate protection for approximately 2,000 students and faculty. This project is fully designed and could be bid immediately. | City of Mount Vernon | 0 | 91 to 180 days | \$100,000 |
| Knox | Railroad Safety Project, Sycamore Rd., Mt. Vernon | Railroad warning devices added to CR27, Sycamore Rd., AA# DOT # 150625. This crossing is ranked #231, of approximately 6000, on the list of most hazardous crossings in Ohio. | Ohio Rail Development Commission | 6 | 31 to 90 days | \$200,000 |
| Knox | Celmore Plastics | Inject operating capital into recycling business suffering from collapse of recycling and export market & prevent close or bankruptcy of business. Celmore Plastics was a thriving business in Knox County until last fall, at one time providing 30+ jobs in Mount Vernon and surrounding area. The recent collapse of market prices for recyclables and closing of export markets resulted in a dramatic loss of revenue, forcing the layoff of all but 3 employees. Most recycling efforts have ceased and the building is basically operating as a warehouse at this time. An injection of operating capital would allow the business to shore up its infrastructure, recall laid off employees, and pay debt and obligations, ensuring the continuation of ongoing recycling efforts that are critical for the environment. | Celmore Plastics | 30 | 0 to 30 days | \$500,000 |
| Knox | Recycling Washline | Celmore Plastics, a recycling and plastics processing center located in Knox County, would like to expand and improve their existing wash line industrial washing machines that wash and dry plastic film so that it may be recycled. The washline is a proven system, however it is inefficient. The recent collapse of pricing in the recyclable materials market caused the operation to be unprofitable and the line was idled, resulting in the lay off of 30 full time employees. Modernization of the washline would increase capacity and efficiency and decrease operating costs, allowing the line to operate at a profit. 5.5 million pounds of plastic film would be diverted from landfills annually and 15 full time employees would be added to staff the line. The washed film would be sold to manufacturers for use in production of housing/building materials that include recycled material content. | Celmore Plastics | 15 | 0 to 30 days | \$1,000,000 |
| Knox | Baler Project | Celmore Plastics, a recycling and plastics processing center located in Knox County, would like to add baling equipment and truck scales to their existing recycling/plastics processing facility. This would allow the facility to be expanded to a full service recycling center where many recyclable materials including cardboard, paper, metals, and plastics could be collected and processed via grinding, washing, and baling. The baling equipment would be used to compact and bale materials for recycling. The facility currently has a storage area for approximately 14,000 tons of materials could be diverted from landfills each year. The upgrade would require addition of baling equipment and truck scales as well as partial reconfiguration of the facility. At least 3 full time positions would be added to manage the new processes and existing positions should be retained. | Celmore Plastics | 6 | 0 to 30 days | \$800,000 |
| Knox | Industrial Recycling Expansion Opportunity | This project builds on existing contracts for recycling of post-industrial plastics (over 250 individual compounds) and the ability to grow by expanding and improving our existing value added service options and adding post-consumer plastics recycling opportunities. The project is associated with granulating and growing the recycling industry. This request would be for funding for the upgrade and purchase of processing equipment associated with granulating and growing plastics in the manufacturing and construction. An estimated 200 new jobs would be created. The project would require 200 employees to process an additional 750,000 pounds of material monthly. Material sources have already been identified. Companies willing to purchase the re-processed plastics, all currently existing heating plants, have already located and accepted. The project would also require the purchase of this equipment upgrade. This funding request focuses on expansion needs specific to equipment purchase, and material purchasing funds. The financial analysis of this project indicates that the return on investment for the project will be sufficient to encompassing additional salary and general costs of doing business. | Waste Alternatives, Inc. | 20 | 0 to 30 days | \$1,400,000 |
| Knox | MOTA Capitalized Maintenance; PID 86099 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through ODOT. | Ohio Department of Transportation | 2 | 0 to 30 days | \$80,359 |
| Knox | Apple Valley Roads and Culverts Improvements | Resurfacing of 21 miles of 45 year old roads with 1 1/2 inches of blacktop in Howard Township, Apple Valley community. These roads are in extremely poor conditions, many are degrading and beyond repair. Replacement of 58 galvanized culverts, 45 year old and are currently rusted out and have become environmental and public safety hazards. Expected outcomes will be increased public safety, environmental protection and considerable decrease in the costs of maintaining a deteriorating infrastructure. | Howard Township | 13 | 31 to 90 days | \$2,962,000 |
| Knox | Knox County's Emergency Food and Shelter Board Pro | Annually, Knox County's Emergency Food and Shelter Board allocates approximately \$25,000 in funding toward rent, mortgage and utility assistance. These funds stabilize Knox County families for a 30-day period assuring that housing will be able to be maintained for one month. In 2008, 58 households were assisted with \$20,000 in rent/mortgage funds, while 30 households received about \$4,000 in utility assistance. Together, all non-duplicated households were stabilized for 30 days due to EFSP funds. While we have not received notification of our allocation for 2009, we know that requests for rent/mortgage/utility payments have doubled over the past six months. We are requesting \$20,000 to serve 50 area families/households in the remainder of calendar year 2009 while employment is sought, job skills are being obtained, and families are struggling to make ends meet. These funds would be allocated through the same process as the 2008 EFSP funds. Rent/mortgage/utility payments would be made directly to companies on behalf of clients and all records would be audited. This funding will ensure 50 families will maintain secure housing for at least 30 days. | United Way of Knox County Ohio Inc. | 0 | 31 to 90 days | \$20,000 |
| Knox | Helping to establish a non-profit organization | The money requested will be used to help establish the not for profit organization known as the Grass Roots Association for a Superb Society. Once established the organization has numerous programs in mind that will benefit the community. | Grass Roots Association for a Superb Society | 2 | 0 to 30 days | \$10,000 |
| Knox | Guiderail upgrade | This is for replacement of general posts that are rotting on county and township highway guiderails | Knox County Engineer | 5 | 31 to 90 days | \$62,500 |
| Knox | Service Garage Lighting/Heating Project | This is an upgrade to our 27 year old, 27,000 sq. ft. highway garage facility. The upgrade would include replacement of current outdated lighting and heating systems. This project would result in substantial savings in operating costs and lower our consumption of electricity and natural gas. | Knox County Engineer | 15 | 31 to 90 days | \$150,000 |
| Knox | Knox County Small Business Incubator | A building in Mount Vernon will be purchased and renovated to serve as a small business incubator to launch new small businesses in Knox county. Small businesses create the majority of jobs in this economy, so creating a place that will aid in the formation of small businesses will help the Knox County economy. The non-profit group Grass Roots Association for a Superb Society has a member who holds an MBA and is willing to work with people starting their own business to help them to get to a successful start. | Grass Roots Association for a Superb Society | 18 | 31 to 90 days | \$500,000 |
| Knox | Meadow Lane Waterline Replacement | Replacement of approximately 1800 linear feet of 8" water main along Meadow Lane that is extremely poor condition and causes complete repurification of the water distribution system due to frequent breaks. This project is a critical infrastructure improvement necessary for the health and welfare of this small community. | Village of Gambier | 20 | 91 to 180 days | \$125,000 |
| Knox | North Central Ohio Farmer's assistance | Rural Farm Delivery in Fredericktown Ohio has been a successful business since 1972. It is primarily a fertilizer sales, blending and bagging operation. It is a value added enterprise in that the farmers in this area can utilize the spreading and spraying equipment possessed by the business. It is in dire trouble due to the rising costs of fertilizer components and the line are nearly empty. Without access to the equipment and fertilizer from RFD, many of the farmers who cannot afford the necessary equipment will likely go under. In this type of business, RFD liquidity doesn't get paid until the crops are harvested. Funds from prior years were not enough to keep up with the increased cost of fertilizers and in the very near future the farmers will need to sustain their farms and business. Approximately 300 farmers rely on the spreading and spraying equipment and 180 rely on the bagging products. Assistance is needed rapidly or there is an extremely high likelihood the business will go under. | Rural Farm Delivery | 600 | 0 to 30 days | \$1,500,000 |
| Knox | People First of Ohio working as a team to change t | The building of a new building to support, jobs, self-determination, trainings community inclusion for persons with disabilities, the elderly, children, teens of many communities. This would reach out to other not counties located in Knox but reach out to Harlan and Colleton counties in Ohio. The building would be used to promote jobs and trainings for persons with disabilities in a full area. The building would have training rooms, for catering kitchen, meeting rooms, theatre, music room, art room. We would use the building for all community members. Ex: Scouts, 4-H meeting rooms to be used by business in town nurseries and business to train their employees. The staff here would be persons with disabilities such as receptionists, groundskeepers, maintenance, cooks, waitress, cashiers, so many jobs in an area that all people are fighting for jobs and the people with disabilities do not have the right that others have. We would also have community members but they would have a 6 week probation period working beside the people with disabilities and they would be the ones who would have the decision to hire them if they treated them with respect. | people first of ohio | 300 | 0 to 30 days | \$3,500,000 |
| Knox | Personal Security for Knox County | Our security program fulfills the objectives of the Stimulus Act for 2 provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect their valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rescue operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our device. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Geo-fencing functions can set location boundaries and trigger notifications when exceeded. Personal safety can also be attained with location information to multiple choice phone numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self-powered units that continuously | Nuleaf Ohio Limited | 2 | 31 to 90 days | \$130,200 |
| Knox | Culvert replacement | 20 culvert replacements | Howard Township | 4 | 31 to 90 days | \$75,000 |
| Knox | Road maintenance | 30 miles of road maintenance | Howard Township | 4 | 31 to 90 days | \$843,750 |
| Knox | Wireless Broadband for Knox County | Our access system fulfills the objectives of the Stimulus Act for 2 provides broadband to un-served and underserved areas while employing hundreds in high paying permanent jobs. These funds facilitate the expansion of our existing wireless fiber network in Delaware to surrounding counties for people stuck in the digital abyss. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the talk and promises of cable and fiber, the underserved areas still exist today. Now fiber the time to try something different. Rural America needs access today not the faded promises of the past. Our unique process for deployment utilizes the most effective wireless modes available. Each dollar spent produces the most coverage per mile of any existing technology which allows low access fees and universal participation even among the low income and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. The new access plan proven by promises but by actual deployment evident by our existing network, the most advanced and cost effective WiMax technology available. | NexGenAccess | 19 | 0 to 30 days | \$1,900,000 |
| Knox | Waste Water /Sewer Plant | The Village of Martinsburg is a very poor neighborhood that could use a sewer system however can not afford this. The Village currently is turning very tight at 12,000 in the checking account and can not afford to pay for this system it required by the state. The people with in the village are concerned provide and can not afford to pay for this out of their pocket either when the state requires them. Therefore it is necessary that a grant or some sort be available to provide the Village of Martinsburg with a sewer water system. It is just a matter of time before the Village will be required to have this system however having this stimulus money would greatly benefit the Village of Martinsburg and those employed to put in the waste water system. | Village Of Martinsburg | 15 | 181 days or more | \$150,000 |
| Knox | High Speed internet to every home in knox county o | Thank you Debra Kidwell This rural area not only in Knox county but all over the State of Ohio could use high speed internet to allow individuals to work from home or start their own business from home. The internet gives endless possibilities for individuals to search for opportunity connecting individuals across the world. I believe that every home should have the choice to have high speed or fiber internet. Currently where I live this choice is not given. An husband owns his own communication business as a Fiber Optic technician currently work a spare for him which makes no sense to me why is the opportunity of fiber to homes for every individual being put off other than for financial reasons. I call Time Warner and Embury monthly asking they raise their rates to not enough customers. We live in a rural area many people have the opportunity to start their own businesses. If they have the high speed internet, but many do not get the opportunity because they do not have the high speed. High Speed also allows people to search for jobs and connect to anyone across the world. That is extremely slow today and just is not feasible. The high-net (satellite) is not fast or secure line, I have heard, for the government. I have two, small time government jobs I do from home as Fiscal Officer | Kidwell Communications | 5,000 | 31 to 90 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Knox | Juvenile Probation Dept. Window Replacement Project | The Knox County Commissioners want to replace the original windows in this 1939 building to make it more energy efficient. They purchased this building from the local school district rather than have it demolished in the center of a downtown neighborhood. This building has been recognized to serve as the County's Juvenile Probation Department. The County recently restored the masonry and replaced the roof. The County recognizes the need to properly maintain their facilities and to be as energy efficient as possible with all of their buildings. By replacing these windows they'll save the tax payers ongoing operating money. The existing windows are the original metal sash and single pane, many of which no longer fully close. The intent is to totally replace the existing windows with aluminum thermally broken architectural windows with thermal insulating glass. The Commissioners recognize that the Stimulus money needs to be spread out far and wide, therefore they are willing to seek only 50% of the total project funding from the stimulus funds with the remaining cost paid for by county funds. This project will be ready to go out for bids within 30 - 45 days of a grant award. | MCK Associates Inc | 10 | 31 to 90 days | \$109,245 |
| Knox | Public Safety and Dormitory Facility | We are seeking funds to construct a fire station by implementing a project that can fulfill a number of stimulus goals. First, we hope to benefit infrastructure and local government by constructing a multi-use facility that will house township government and township fire protection. In addition, since a number of veterans' buildings are students of Kenyon College, we hope to build a dormitory space that can benefit the college in the short term and serve as living space for paid firefighters in the future. This will help benefit local higher education. It will also benefit public safety education in Knox county by integrating up-to-date training facilities that can be used by all county departments. Additionally, after consultation with the college, we believe that this facility can serve as a public safety center for the region by incorporating the security and safety division of the college into the structure as well as space for county law enforcement. Finally, this project should also meet the environmental goals of the stimulus by replacing an inefficient current structure with a new, energy efficient structure that can utilize "green" building. Jobs for Ohio Graduates (JOG) of North Central Ohio proposes to serve 60 Knox County at-risk youth, ages 14-21, who have an in jeopardy of exiting and/or have left the education system prior to attaining a high school diploma. The program will provide instruction of employability skills, self-development skills, internship opportunities and postsecondary education opportunities. Instruction will focus upon skills including career exploration, job attainment, job retention, basic math and reading, communication skills, leadership skills, independent living, teambuilding. Additionally, program will partner with Knox County JFS, East Knox, Darville, and Knox County High Schools. Two program educators will be responsible for success of participants, including job development and placement, high school graduation, postsecondary education enrollment. Expected outcomes include a graduation rate of 90% for in-school youth and 80% among drop-outs, a full-time employment rate of 90% and a positive outcome rate of 65%. JOG has been recognized as a best practice to keep youth in-school and become successful by ODFJES. | College Township Fire Department | 20 | 91 to 180 days | \$3,000,000 |
| Knox | Drop-out Prevention & Recovery | Jobs for Ohio Graduates (JOG) of North Central Ohio proposes to serve 60 Knox County at-risk youth, ages 14-21, who have an in jeopardy of exiting and/or have left the education system prior to attaining a high school diploma. The program will provide instruction of employability skills, self-development skills, internship opportunities and postsecondary education opportunities. | Knox | Radio Read | Upgrade 2800 touchpad meter to radio read meters plus software and equipment | Knox Co. Water and Wastewater | 3 | 91 to 180 days | \$412,500 |
| Knox | Sanitary Sewer | The project would consist of extending sewer to approx. 180 sites that are used for recreational/amenity purposes. These connections would be made to sanitary sewer pits that lead into the ground and this improvement to the infrastructure would stop any leaching of the grey water. | Apple Valley Property Owners Association | 8 | 181 days or more | \$281,959 |
| Knox | Buddies Program | Middle and high school students mentoring elementary students and adults mentoring children age six to 17. The goal of the programs are to improve self-esteem, grades, and relationship skills of mentees by encouraging them to land the commitment, positive behavior, confidence and support of the matched mentor. Education on avoiding alcohol, drugs, and tobacco will also be provided. | The Children's Connection | 12 | 31 to 90 days | \$195,223 |
| Knox | Black Jack Distribution Substation | Program outcomes include: fewer absences from school, increased GPA, less involvement with alcohol, tobacco and drugs, improved self-esteem and relationships with family and peers as measured by the Social Skills Improvement System (SSIS). Installation of a new power distribution substation in the Mount Vernon Industrial Park located in Mount Vernon, Ohio. This industrial park has room to grow and a new manufacturing plant is being constructed currently. | Licking Rural Electrification Cooperative | 8 | 31 to 90 days | \$2,000,000 |
| Knox | Rape Crisis | Case Crisis Program Helpline, hospital and court accompaniment Follow-up Individual and group advocacy Participation in SART | New Directions | 1 | 31 to 90 days | \$50,000.00 |
| Knox | Knox County Juvenile Drug Court | Serve 30 annual assessed survivors during a year. This application will allow for the Knox County Juvenile Court to continue to have activities for the Knox County Juvenile Drug Court. This program will otherwise be discontinued. The staff that is necessary to run this portion of the program and prepare for this program will lose employment if alternative funding is not obtained. | Knox County Juvenile Court | 2 | 0 to 30 days | 50,000 |
| Lake | SR 44 Infrastructure Corridor Project | This project is necessary to correct traffic safety issues which are now accentuated due to the construction of two major medical facilities employing over 1,200 people due to open in 2009. In addition, this Corridor project will permit greater access to over 200 acres of greenfield, zoned light industrial/R2 and approximately 40 acres of commercial/retail properties immediately adjacent to the Corridor. These commercial/retail properties will allow for the development of a commercial center for the Township. This project will open up properties and encourage economic development with a reasonable, conservative employment base of 1,000 new jobs. It is essential that this project be completed in the next 12-18 months to minimize the traffic impact and to allow for orderly, planned economic development of this Corridor. | Concord Township | 1000 | 181 days or more | \$6,500,000 |
| Lake | Sanitary Sewer Project Auburn-Crile Corridor | These sewer lines are very expensive due to a couple of reasons, one of the largest reasons is due to the soil conditions. This has hampered economic development along these routes. Upon installation these properties will be open for commercial development along a major state route (SR44), which represents the fastest growing area in Lake County. It is conservatively estimated that 100 jobs will be created upon the completion of this project | Concord Township | 100 | 91 to 180 days | \$1,522,000 |
| Lake | Safford Street Reconstruction | The complete rehabilitation of 1100 feet of roadway surface, water line replacement, installation of 2 fire hydrants, storm and sanitary sewer replacement plus all corresponding surface repairs including sidewalks. Greenhouse #2 to be identical to #1 dimensionally, geographically (near to each other), have identical light source, identical interior layout, identical crops & methods, etc. such that all aspects of operation are virtually identical. | Madison Village | 20 | 91 to 180 days | \$125,000 |
| Lake | Carbon sequestration via stimulated plant growth | Greenhouse #2 will be fitted with airlocks, personnel support respirators, safety equipment, etc. to make operation in abnormal atmosphere practical. Greenhouse #2 will be maintained at an excessive elevated CO2 level by utilizing exhaust from a combustion process (power plant, generator or other). Study will be conducted with multiple crops (edible, ornamental and others of value, simultaneously) to determine if an increased partial pressure (elevated CO2 concentration) can practically stimulate plant growth measurably with no deleterious effects. Goal of this work is to identify conditions and systems to enhance greenhouse production rates significantly with waste carbon dioxide for commercial application. | Disconnect, LLC | 7 | 31 to 90 days | \$490,000 |
| Lake | TriPoint Medical Center: South Road Improvements | South Road is an existing concrete private road off Auburn Road serving Ricena, Avery Dennison and Lake Hospital System's (LHS) Administration Building and the new TriPoint Medical Center. It was the desire of LHS to improve South Rd. to standards applicable to the Lake County Engineer and Concord Township, and thereby request it be dedicated for public use. This road will be the only entrance to the new 1.8 bed hospital for emergency vehicles. The design approach will incorporate a new concrete pavement to be placed over the existing pavement using a process called an un-bonded concrete overlay. A portion of the existing concrete pavement will be milled to prepare the surface for the overlay. A new cut-die-sac will be constructed at the location of the Avery Dennison driveway to provide an appropriate and safe turn-around area for public, emergency, maintenance vehicles and snow plows. All catch basins will be replaced. New street lighting will be installed by the Illuminating Company. | Lake Hospital System | 50 | 0 to 30 days | \$400,000 |
| Lake | Physician-Hospital Health Information Network | Lake Hospital System is building a new, all-digital community hospital in Concord Township, equipped with the latest information technology. The facility will be complete in the fall of 2009. To fully utilize the digital investment in the hospital, it is critical to create connectivity to area physicians. The connectivity with TriPoint Medical Center will allow physician access to patient records resulting in increased standardization of patient care, decrease medical records errors, increase quality of care, increase and standardize patient education. The cost of converting 1 independent community physician office to an electronic medical record is approximately \$25,000. The goal is to convert approximately 200 physicians to a total physician electronic medical record conversion cost of \$5,000,000. The costs for the hospital to create infrastructure to connect with the physicians is approximately \$1,600,000. This includes the costs of servers, connectivity, etc.). The total cost to convert all physicians to electronic medical records and to create links to the hospital is \$6,600,000. | Lake Hospital System | 20 | 31 to 90 days | \$3,300,000 |
| Lake | Auburn Road Widening Project | A new hospital on Auburn Road will be opened in the fall of 2009. The current road needs to be widened prior to the opening of the new hospital at a cost of \$1,200,000 dollars. The costs is being split 60% by Lake Hospital System, and 40% by University Hospital System of Cleveland, which is opening a Health Center on property adjacent to the hospital. The Health Center is also opening in the fall. The addition of these two health facilities will add to an already congested situation on the intersection of SR 40 and SR 44. A 75,000 square foot building adjacent to a new hospital (TriPoint Medical Center) which will open in fall of 2009, sits idle. A business plan to develop a medically based community fitness and wellness center has been completed, but the cost of capital has prevented the development to occur. The fitness and wellness center will provide the community with a hospital-based fitness center which will be open to increase the wellness of the community. The actual construction is estimated to create approximately 50 jobs, and the center itself will employ approximately 25 health-related jobs. | Lake Hospital System | 50 | 0 to 30 days | \$600,000 |
| Lake | Medically Based Wellness Center | A 75,000 square foot building adjacent to a new hospital (TriPoint Medical Center) which will open in fall of 2009, sits idle. A business plan to develop a medically based community fitness and wellness center has been completed, but the cost of capital has prevented the development to occur. The fitness and wellness center will provide the community with a hospital-based fitness center which will be open to increase the wellness of the community. The actual construction is estimated to create approximately 50 jobs, and the center itself will employ approximately 25 health-related jobs. | Lake Hospital System | 75 | 181 days or more | \$4,000,000 |
| Lake | Village-wide Drainage improvements and Pavement Re | The existing drainage condition of the village is extremely poor. Storm sewers are undersized and the existing curb less pavement is higher than the tree lawns and yards. The topography of the Village is relatively flat and the soil is not pervious for drainage. By installing a new storm sewer system (proposed as a separate project) and installing a new roadway elevation, suitable drainage will be provided. | Village of Timberlake, Ohio | 20 | 181 days or more | \$8,300,000 |
| Lake | Sanitary Sewer Rehabilitation along R&R Tracks, Pa | This project consists of Sanitary sewer lining and point repairs to an 18" trunk line, 3,750-foot long which handles the sewage flow from approximately one-third of the City of Wickliffe. | City of Wickliffe | 8 | 31 to 90 days | \$260,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|------------------------------|----------------|--------------------|---------------------------|
| Lake | Wickliffe Service Facility Construction / Renovati | This project consists of the construction of a new 17,270 square foot Vehicle Maintenance / Administration Building, a new 6,440 square foot Canopy Shop / Storage Building and the Rehabilitation of the existing 21,200 square foot structure for the sewer, parks, and roadway maintenance divisions of the Wickliffe Service Department. | City of Wickliffe | 15 | 181 days or more | \$2,500,000 |
| Lake | Federal Intersection Rt. 20-Dock Road Improvemnt | Improvements are needed at the Federal Rt. 20 and County Dock Road intersection. Increased traffic over the last few years has caused many accidents and fatalities at this intersection. The economic development has not taken place because of the poor conditions that exist for traffic flow through this area. | Madison Township-Lake County | 75 | 181 days or more | \$750,000 |
| Lake | Elm Street Sanitary Sewer Lining | This project consists of lining an 8" to 18" sanitary sewer, 1,700 feet in length along Elm Street in the City of Wickliffe. Through recent city wide smoke testing and flow monitoring of the sanitary sewer system, the Elm St. sewer is one of the many of the older sections of infrastructure. This project will help reduce the amount of stormwater which infiltrates to the sanitary sewer system. | City of Wickliffe | 8 | 31 to 90 days | \$385,000 |
| Lake | Rt. 20 Sanitary Sewer | New sanitary sewer installed (8400 linear feet) along major Rt. 20 business corridor through Madison Township. Project will create construction jobs and will create future jobs as development can now occur within the new sanitary sewer project area. Water is available along the proposed sanitary sewer project route. | Madison Township-Lake County | 100 | 91 to 180 days | \$3,537,000 |
| Lake | McMackin Road Water Line | Water line extension of 1500 linear feet, will provide water to area of homes lacking water quality and adequate supply. | Madison Township-Lake County | 15 | 91 to 180 days | \$250,000 |
| Lake | Meadows Road Storm Sewer | Install storm sewer outlets for needed drainage throughout a heavily populated area. This will allow for additional badly needed storm water storage. | Madison Township-Lake County | 15 | 91 to 180 days | \$209,400 |
| Lake | Shamrock Bridge and Street Extension | Construction of a bridge over the CSX Railroad and extension of a roadway approximately 2400 ft. Stimulus funds will be used to construct the bridge, private developer funds and TIF will be used to extend the roadway. The project will open up over 250 acres of land for economic development into a planned mixed use development. Within three years an additional 150 homes and 400,000-500,000 sq. ft. of commercial development can occur. A private investment by Shamrock Business Center Ltd. of over \$100,000,000 creating over 350 construction jobs and 1000 ongoing jobs in the community. The project has received all permits and approvals and is prepared to begin construction within 60 days of approval of funding. | City of Painesville | 130 | 31 to 90 days | \$6,400,000 |
| Lake | City of Painesville Parking garage renovation | The project includes the renovation and upgrade of a structure constructed in 1973 as part of the City's Urban Renewal investment. The garage, with 581 parking spaces, supports over 250,000 square feet of commercial and office space in downtown Painesville. The recent downtown master plan identified the parking garage as a critical component to the investment and implementation of the downtown master plan. Additional private investment and long term leasing of adjacent office facilities rely upon the continued presence and operation of the garage facility. The renovation of the facility includes the painting and sealing of concrete slabs, installation of waterproof deck coating, and the demolition of levels 7 & 8, and the reconstruction of a new level 7 & 8. The project is prepared to be under construction by August of 2009. | City of Painesville | 200 | 91 to 180 days | \$5,800,000 |
| Lake | Demolition of Lake East Hospital building | \$2.5 million for the demolition of a vacated downtown hospital building located on 8 acres of property which will provide a redevelopment site to four residential and commercial investment in conformance with a redevelopment plan. In October of 2008, Lake East Hospital, the City of Painesville's second largest employer will vacate their 100+ year old hospital for a new facility outside of the community. The result is a vacant building on an 8+ acre site in the city's downtown. Over the last several years the community has prepared for this dramatic change through an aggressive economic development program and detailed downtown planning. The solution to infuse the downtown with new vitality is the complete redevelopment of the hospital site based on the plan in the attached Exhibit 1. The plan identifies the appropriate redevelopment of the site as residential to integrate and support the commercial infill and redevelopment on adjacent property. The demolition will result in significant infrastructure investment and private developer investment. Work would commence in November of 2009. | City of Painesville | 50 | 181 days or more | \$2,500,000 |
| Lake | Demolition of Lake East Hospital building | \$2.5 million for the demolition of a vacated downtown hospital building located on 8 acres of property which will provide a redevelopment site to four residential and commercial investment in conformance with a redevelopment plan. In October of 2008, Lake East Hospital, the City of Painesville's second largest employer will vacate their 100+ year old hospital for a new facility outside of the community. The result is a vacant building on an 8+ acre site in the city's downtown. Over the last several years the community has prepared for this dramatic change through an aggressive economic development program and detailed downtown planning. The solution to infuse the downtown with new vitality is the complete redevelopment of the hospital site based on the plan in the attached Exhibit 1. The plan identifies the appropriate redevelopment of the site as residential to integrate and support the commercial infill and redevelopment on adjacent property. The demolition will result in significant infrastructure investment and private developer investment. Work would commence in November of 2009. | City of Painesville | 50 | 181 days or more | \$2,500,000 |
| Lake | Bathgate Ave., N. Watling Way Trunk Storm Sewer | Installation of new storm sewers to service an area where there is considerable flooding problems and poor storm water drainage. | Madison Township-Lake county | 15 | 91 to 180 days | \$356,000 |
| Lake | Ridge Road Sanitary Sewer Extension | This project consists of extending sanitary sewer service to residents along the South side of Ridge Rd (SR84) between Lincoln Rd. and E. 20th Street. Approximately 1,100 linear feet of new 8" sewer line is planned, as a result of this project, 8 residential properties and 1 public property will no longer use that individual septic systems. These septic systems are the last known active systems in the City of Wickliffe. | City of Wickliffe | 4 | 91 to 180 days | \$280,000 |
| Lake | Dunbar Road Area Storm Drain Phase II | Completion of storm sewer second phase. This area is heavily populated and has considerable flooding problems with no storm water drainage system in place. | Madison Township-Lake County | 15 | 91 to 180 days | \$570,000 |
| Lake | Red Bird Road Storm Sewer system | Installation of new and replacement storm sewers. This project will serve a very heavily populated area where storm water drainage is very poor or non-existent. Project will service an area of approximately 4800 linear feet. | Madison Township-Lake County | 15 | 91 to 180 days | \$577,500 |
| Lake | Shamrock Boulevard Bridge and Roadway Extension | \$4.4 million for the construction of a bridge over the main line of the CSX railroad which will permit the development of 350 acres of land into a mixed use commercial/residential planned development known as Shamrock Towers Center. The developer and TIF funds will be used to extend 2400 ft of roadway. The property owner/developer will invest over \$100 million in new construction and infrastructure as a result of the investment over the next 10 years. 150 additional homes and 400,000 - 500,000 sq ft of commercial space can be developed. The bridge construction is the second phase of the roadway construction of Shamrock Boulevard. Phase one was completed in the fall of 2008. This project is necessary for the long term economic development viability of the community. It is the only remaining development suitable for commercial and industrial development within the City. The project has received all approvals and permits and can proceed within 60 days of funding approval. | City of Painesville | 130 | 31 to 90 days | \$6,400,000 |
| Lake | Demolition of Lake East Hospital | \$2.5 million for the demolition of a vacated downtown hospital building located on 8 acres of property which will provide a redevelopment site to four residential and commercial investment in conformance with a redevelopment plan. In October of 2008, Lake East Hospital, the City of Painesville's second largest employer will vacate their 100+ year old hospital for a new facility outside of the community. The result is a vacant building on an 8+ acre site in the city's downtown. Over the last several years the community has prepared for this dramatic change through an aggressive economic development program and detailed downtown planning. The solution to infuse the downtown with new vitality is the complete redevelopment of the hospital site based on an adopted plan. The plan identifies the appropriate redevelopment of the site as residential to integrate and support the commercial infill and redevelopment on adjacent property. The demolition will result in significant infrastructure investment and private developer investment. Work would commence in November of 2009. | City of Painesville | 50 | 181 days or more | \$2,500,000 |
| Lake | Orkney Road Kirkwall St. Storm Sewer | Installation of storm sewers to service a very heavily populated area. There are considerable flooding issues and very poor natural storm water drainage. The project will service approx. 1740 linear feet. | Madison Township-Lake County | 15 | 91 to 180 days | \$700,000 |
| Lake | Worden Road improvements | This project consists of the improvements to Worden Road between Grand Blvd. and Lakeland Blvd. This section of road is approximately 2,800 feet long. Proposed improvements include: Water Main Replacement, Pavement widening to create bike lanes, and Pavement resurfacing. | City of Wickliffe | 12 | 91 to 180 days | \$1,665,000 |
| Lake | Meadow Wood Drive Culvert Replacement | Road culvert need to be updated and replaced. Roadway is prone to flooding area homes. Development south of this location has caused increased drainage that is compounding the problem. | Madison Township-Lake County | 10 | 91 to 180 days | \$350,000 |
| Lake | Grand Boulevard Improvements | This project consists of the improvements to Grand Boulevard between Worden Road and Lloyd Road. This section of road is approximately 1,800 feet long. Proposed improvements include: Water Main Replacement, Pavement widening to create bike lanes, and Pavement resurfacing. | City of Wickliffe | 12 | 91 to 180 days | \$1,732,000 |
| Lake | Green Road Trunk Storm Sewer | Installation of this approx. 4000 linear feet of storm sewers would service a very heavily populated area that currently has no storm sewer service. Flooding is a major concern for the residents throughout this project area. | Madison Township-Lake County | 15 | 91 to 180 days | \$707,000 |
| Lake | Lloyd Road Improvements | This project consists of the improvements to Lloyd Road (SR 635) between Lakeland Blvd. and Grand Blvd. This section of road is approximately 2,800 feet long. Proposed improvements include: Water Main Replacement, Pavement widening to create bike lanes, and Pavement resurfacing. | City of Wickliffe | 12 | 91 to 180 days | \$1,502,000 |
| Lake | Bathgate Rd.-Chapel to Shore Trunk Storm Sewer | Installation of this approx. 3600 linear feet of storm sewer would service many side streets that currently have no outlet for their storm water run off. This causes flooding in very heavily populated areas involving fire project areas. | Madison Township-Lake County | 15 | 91 to 180 days | \$577,500 |
| Lake | Rosena Ave., Storm Sewer | Installation of storm sewers on this 1740 linear foot road would remedy flooding problems experienced by the residents in this heavily populated area. | Madison Township-Lake County | 15 | 91 to 180 days | \$374,100 |
| Lake | Euclid Avenue (U.S. 20) Streetscape, Phase 2 | This project consists of the streetscape improvements to Euclid Avenue (US 20) between Behlweh Rd. and Worden Rd. This section of streetscape is approximately 1,500 feet of total curb length. | City of Wickliffe | 15 | 91 to 180 days | \$551,000 |
| Lake | Deermont Ave Storm Sewer | Installation of storm sewers on this 1480 linear foot road will help to eliminate ongoing flooding for this heavily populated area. | Madison Township-Lake County | 15 | 91 to 180 days | \$318,200 |
| Lake | Argyle Dr. Storm Sewer | Installation of storm sewers on this 2700 linear foot road will help to eliminate ongoing flooding issues for this heavily populated area. | Madison Township-Lake County | 15 | 91 to 180 days | \$591,250 |
| Lake | Ansonia Ave. Storm Sewer | Installation of storm sewers on this 1410 linear foot road will help to eliminate ongoing flooding issues in this heavily populated area. | Madison Township-Lake County | 15 | 91 to 180 days | \$303,150 |
| Lake | Intersection Improvement Federal Highway Rt. 20 & | This is a very congested intersection that over the last few years has seen traffic flow greatly increased over the initial design. The redesign will allow for future economic development in this area. | Madison Township-Lake County | 75 | 181 days or more | \$1,000,000 |
| Lake | Widening Federal Highway Rt. 20 | Widening of Federal Highway Rt. 20 from Townline Road to Countyline Road would improve approx. five miles of highway that was designed to handle less than thirty percent of the traffic on the roadway today. If this roadway was improved then economic development would take place along the entire stretch of highway. Currently it is a very dangerous stretch of roadway to drive with no center turn lanes and older narrow lanes. This project in conjunction with the sanitary sewer improvement for part of the project area would bring much needed economic development to the area. | Madison Township-Lake County | 200 | 181 days or more | \$17,000,000 |
| Lake | Wickliffe City Hall ADA Handicap Ramp Reconstruct | This project consists of the reconstruction of an ADA handicap ramp which provides the only wheelchair access to Wickliffe City Hall. The existing ramp, built in the 1980's, does not meet current standards. | City of Wickliffe | 1 | 31 to 90 days | \$30,000 |
| Lake | Federal Rt. 20 Business Corridor Improvements | Improvements of a turn lane and road widening would greatly improve this business corridor. Economic development through this area has not taken place because of the associated cost of the improvements. The area from Green Road to SR 528 is approx. 1.5 miles along Federal Highway Rt. 20. This project improvement would resolve traffic congestion and allow for increased economic development. | Madison Township-Lake County | 100 | 181 days or more | \$4,930,000 |
| Lake | Lake Road West Improvements | Improvements along this 4260 foot linear roadway of storm sewers, sanitary sewers and road surface replacement would enhance this heavily traveled collector street that is in need of repairs. This road also serves a commercial area in the northern section of Madison Township that is seeing growth but has been limited somewhat due to the Lake Road West road condition. | Madison Township-Lake County | 75 | 181 days or more | \$3,400,000 |
| Lake | Pedestrian Bridge Federal Highway Rt 20 | A pedestrian bridge is needed over the Acacia Creek that runs under Federal Highway Rt. 20. There is no berm along Rt. 20 for walkers, joggers or bicyclists to safely travel. | Madison Township-Lake County | 15 | 181 days or more | \$180,700 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|------------------------------------|----------------|--------------------|---------------------------|
| Lake | Complete Construction & Test ing of Septic System | <p>total cost than current regs require - system discharge equal to rainfall quality & is assure.</p> <p>System preserves land values & improves environmental quality by eliminating septic discharges or failures. System captures or destroys all: "pharmaceuticals & personal care products" (PPCP's), which typically escape treatment in septic and conventional wastewater treatment plants. This is a priority for USEPA.</p> <p>Funds will be used to:</p> <ul style="list-style-type: none"> - Construct an operating full-scale demonstration system. - Install such on a real application (likely a 100+ acre scouting camp, that's closed due to lack of funds to upgrade wastewater treatment system - hence property is unusable & of reduced value. - Detailed sampling and laboratory testing to prove field performance in a real world application. - Installation of additional instruments and equipment to enable long-term remote monitoring of the system. | Disconnect, LLC | 5 | 31 to 90 days | \$250,000 |
| Lake | Complete Construction & Test ing of Septic System | <p>Process uses variation on supercritical fluid extraction to extract (8 partially refine) high quality synthetic crude oils from Devonian-Mississippian marine black shales which are abundant in Ohio.</p> <p>Currently, industry exists to produce expanded shale for refractory cements, masonry & land uses. They produce shale at very low cost because it is located at shallow depths. This is a good source of raw material. Producers could use waste produced as part of their product (i.e. shale being extracted or products).</p> <p>Funds will be used to:</p> <ol style="list-style-type: none"> 1) Construct a bench-scale test system to perform automated extraction tests. 2) Perform test runs on shales with differing properties (moisture, coarseness, consistency, etc.) to determine optimal process for raw material in terms of both the process and handling. 3) Perform test runs at different conditions (pressure, temp, co-solvents, etc.) to define optimal operating conditions, residence time and handling methods. | Disconnect, LLC | 4 | 31 to 90 days | \$245,000 |
| Lake | Shale Oil extraction via a novel process | <p>Process uses variation on supercritical fluid extraction to extract (8 partially refine) high quality synthetic crude oils from Devonian-Mississippian marine black shales which are abundant in Ohio.</p> <p>Currently, industry exists to produce expanded shale for refractory cements, masonry & land uses. They produce shale at very low cost because it is located at shallow depths. This is a good source of raw material. Producers could use waste produced as part of their product (i.e. shale being extracted or products).</p> <p>Funds will be used to:</p> <ol style="list-style-type: none"> 1) Construct a bench-scale test system to perform automated extraction tests. 2) Perform test runs on shales with differing properties (moisture, coarseness, consistency, etc.) to determine optimal properties for raw material in terms of both the process and handling. 3) Perform test runs at different conditions (pressure, temp, co-solvents, etc.) to define optimal operating conditions, residence time and handling methods. | Disconnect, LLC | 4 | 31 to 90 days | \$245,000 |
| Lake | Production of synthetic Crude Oils from Sewage Slu | <p>synthetic crude oil.</p> <p>Sewage sludge disposal is an expensive ongoing environmental problem. Most common approach is removal of free water by filtration, "stabilization" with lime and transport to rural areas for land application. Unfortunately, stabilization is less than 100% in killing pathogens. Storm runoff results in pathogenic organisms, calcium salts & toxic substances & PPCP's (concentrated in wastewater plants sludge) present in run-off or being uptaken into the crop plant material.</p> <p>Dewatered sewage sludge contains 20-50% organics (VSS). Most of this is microorganisms which trap water several ways.</p> <p>Nature turns plant & animal remains into oil, gas, etc. with temperature, pressure & time. Process mimics nature by using a "cocktail" of supercritical fluids and catalysts to rapidly diffuse throughout the sludge, cleave high molecular weight cells into low molecular weight carbon chains & remove these as soluble crude fractions.</p> | Disconnect, LLC | 7 | 31 to 90 days | \$450,000 |
| Lake | Educational/Vocational Training Equipment | <p>This project would allow us to upgrade and expand our current offering of educational training units currently sold to vocational schools, high schools, community colleges, universities, senior centers, correctional facilities, and foreign governments. Our current focus is HVAC and Refrigeration training units and we would like to both upgrade our existing offering and develop solar, wind, geothermal, and medical training units and associated interactive curriculum. This project creates jobs at many levels including engineering, design, and assembly. In addition, utilization of our training units and curriculum contributes to increased efficiency of HVAC equipment, preserving the environment and reducing less generating capacity from the electrical utility industry.</p> | Airserco Manufacturing Company LLC | 25 | 0 to 30 days | \$10,000,000 |
| Lake | Kirtland Road Reconstruction | Replacement of the pavement, drive aprons and drainage system on a 7800 foot long roadway. Pavement width will be 28 feet and the storm sewers will vary in size from 12 inches in diameter to 48 inches in diameter. | City of Willoughby | 150 | 31 to 90 days | \$5,213,000 |
| Lake | Hodgson Road Reconstruction | Replacement of the pavement, drive aprons and drainage system on a 2760 foot long roadway. Pavement width will be 28 feet and the storm sewers will vary in size from 12 inches in diameter to 48 inches in diameter. | City of Willoughby | 100 | 31 to 90 days | \$1,937,500 |
| Lake | Adkins Road Reconstruction | Replacement of the pavement, drive aprons and drainage system on a 2720 foot long roadway. Pavement width will be 28 feet and the storm sewers will vary in size from 12 inches in diameter to 48 inches in diameter. | City of Willoughby | 100 | 31 to 90 days | \$1,974,000 |
| Lake | Stevens Boulevard Reconstruction | Replacement of the pavement, drive aprons and drainage system on a 4400 foot long roadway. Pavement width will be 28 feet and the storm sewers will vary in size from 12 inches in diameter to 48 inches in diameter. | City of Willoughby | 150 | 31 to 90 days | \$4,537,500 |
| Lake | WPCC Bar Screen and Building Replacement | Replacement of 25 year old bar screen equipment and metal building that is worn out as part of the preliminary treatment unit of the Water Pollution Control Center. | City of Willoughby | 50 | 31 to 90 days | \$750,000 |
| Lake | WPCC Final Clarifier Mechanisms | Replacement of 25 year old 3 final clarifier mechanisms that are worn out as part of the secondary treatment unit of the Water Pollution Control Center. | City of Willoughby | 30 | 31 to 90 days | \$320,000 |
| Lake | Vine/Orchard Sanitary Sewer Lining | Lining 2300 feet of 70+ year old clay pipe with plastic liners. The pipe ranges in size from 8 inches in diameter to 10 inches in diameter. Including reconstruction of 8 manholes and reinstatement of 65 service connections. | City of Willoughby | 50 | 31 to 90 days | \$980,000 |
| Lake | Moorland/St. Clair Sanitary Sewer Lining | Lining 2960 feet of 70+ year old clay pipe with plastic liners. The pipe ranges in size from 8 inches in diameter to 12 inches in diameter. Including reconstruction of 10 manholes and reinstatement of 60 service connections. | City of Willoughby | 50 | 31 to 90 days | \$1,260,000 |
| Lake | Grove/Second Sanitary Sewer Lining | Lining 800 feet of 70+ year old clay pipe with plastic liners. The pipe ranges in size from 8 inches in diameter to 10 inches in diameter. Including reconstruction of 3 manholes and reinstatement of 25 service connections. | City of Willoughby | 30 | 31 to 90 days | \$345,000 |
| Lake | Poplar Pump Station Forcemain Replacement | Replacement of 750 feet of 40 year old cast iron pipe with ductile iron pipe due to frequent breaks. The pipe size is 6 inches in diameter. | City of Willoughby | 30 | 31 to 90 days | \$170,000 |
| Lake | Auburn Road Culvert | Culvert Replacement: 70' | Lake County | 6.3 | 91 to 180 days | \$133,000 |
| Lake | Sanitary Trunk Sewer Lining | Lining of 3500 feet of 70+ year old clay sewer pipe with a plastic liner plus reconstruction of 12 manholes and reinstatement of 45 service connections. | City of Willoughby | 50 | 31 to 90 days | \$1,607,500 |
| Lake | Welch Road - Madison Ave to Park Rd | Mill and fill road maintenance of 0.19 miles | Lake County | 1.5 | 31 to 90 days | \$31,021 |
| Lake | E. 347th Street Improvements | <p>Reconstruction of 1900 linear feet of concrete roadway including curbs and aprons to replace a current roadway which has reached its service life.</p> <p>Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels</p> | City of Eastlake | 20 | 91 to 180 days | \$655,500 |
| Lake | Blair Road - Ford Rd to Paine Rd | Mill and fill road maintenance of 0.49 miles | Lake County | 3.1 | 31 to 90 days | \$65,456 |
| Lake | Lockwood Road - McMackin to Haines | Mill and fill road maintenance of 0.52 miles | Lake County | 3.5 | 31 to 90 days | \$73,323 |
| Lake | River Road - Blair Road to Webb Road | Mill and fill road maintenance of 0.33 miles | Lake County | 2.3 | 31 to 90 days | \$48,981 |
| Lake | Hardy Road Improvements | Major rehab of 3 miles of road | Lake County | 47.5 | 91 to 180 days | \$1,000,000 |
| Lake | Morley Road - Prouty Road to SR 84 | Mill and fill road maintenance of 1.06 miles | Lake County | 7.5 | 31 to 90 days | \$157,332 |
| Lake | Hardy Road - SR 534 to Lake Road | Mill and fill road maintenance of 0.9 miles | Lake County | 6.3 | 31 to 90 days | \$133,584 |
| Lake | Jackson Street - Mentor Line to Palmsville | Mill and fill road maintenance of 1.11 miles | Lake County | 10.2 | 31 to 90 days | \$214,180 |
| Lake | Glen Drive Improvements | Reconstruction of 3350 linear feet of concrete roadway including curbs and aprons along a significant east - west street through the City to replace the current roadway which has reached its service life | City of Eastlake | 20 | 91 to 180 days | \$1,155,750 |
| Lake | Miami Dr. & Southland Dr. Storm Sewer Project | Installation of 6,000 linear feet of 12 to 18 inch storm sewers with crossovers and asphalt replacement. | City of Mentor-on-the-Lake | 50 | 31 to 90 days | \$1,700,000 |
| Lake | Bacon Road | Mill & fill road maintenance of 0.34 miles. | Lake County Ohio | 1.9 | 31 to 90 days | \$39,185 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-------------------------------------|----------------|--------------------|---------------------------|
| Lake | Williams Road | Mill & fill road maintenance of 1.15 miles. | Lake County | 1.15 | 31 to 90 days | \$170,691 |
| Lake | Fern Dr. & Goldenrod Dr. Storm Sewer Project | Installation of 7,200 linear feet of 12 to 18 inch of storm sewers with crossovers and asphalt replacement. | City of Mentor-on-the-Lake | 50 | 31 to 90 days | \$2,040,000 |
| Lake | Ravenna Road | Mill & fill road maintenance of 0.45 miles. | Lake County | 3.6 | 31 to 90 days | \$76,737 |
| Lake | Lake Street Outfall Storm Sewer Project | Installation of 7,200 linear feet of 24 to 30 inch storm sewers with a 45 inch storm sewer outfall with crossovers and asphalt replacement. | City of Mentor-on-the-Lake | 60 | 31 to 90 days | \$3,560,000 |
| Lake | Bates Road | Mill and fill road maintenance of 0.98 miles. | Lake County | 6.1 | 31 to 90 days | \$130,912 |
| Lake | Carter Road | Mill and fill road maintenance of 1.35 miles. | Lake County | 8.6 | 31 to 90 days | \$180,338 |
| Lake | Hermitage Road | Mill and fill road maintenance of 0.41 miles | Lake County | 2.6 | 31 to 90 days | \$54,769 |
| Lake | Fairport Harbor WTP - Raw Water Intake Improvement | This project will replace the existing 20 inch Raw Water Intake Pipe constructed in 1936 with a New Intake Pipe and extend the New Intake Pipe further into Lake Erie to a more cost effective alternate. The extended pipe length will provide a sufficient and sustainable depth for the Intake pipe eliminating the problems associated with the existing Intake Pipe being impacted by sand built-up caused by the construction of the Fairport Harbor Dam. | Fairport Harbor WTP- CT Consultants | 50 | 0 to 30 days | \$3,300,000 |
| Lake | St. Clair Street and Village Street Resurfacing | This project will consist of the removal and replacement of existing asphalt pavement along St. Clair Street and approximately 1 mile of additional sidewalks scheduled for resurfacing within the Village. | CT Consultants | 30 | 0 to 30 days | \$637,000 |
| Lake | ADA Curb Ramp Improvements | This project will remove and replace existing sidewalk ramps at street intersections with ADA Curb Ramps at all Non-Compliant Intersections in the Village. | CT Consultants | 20 | 0 to 30 days | \$300,000 |
| Lake | Auburn Road - Concord hamdon to Prouty | Mill and fill road maintenance of 0.62 miles | Lake County | 5.1 | 31 to 90 days | \$108,129 |
| Lake | E. 348th Street Improvements | Reconstruction of 1980 linear feet of concrete roadway including curbs and aprons to replace a roadway which has reached its service life. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 20 | 91 to 180 days | \$683,100 |
| Lake | Dayton Road - River Road to SR 84 | Major rehab of 1.62 miles of road responsive housing for people with mental illness with at least 50% being homeless prior to coming to live at Neighborhood Commons. All persons will be at or below 50% of HUD area median income. \$650,715 has already been committed to Neighborhood Commons from the Lake County Commissioners via Neighborhood Stabilization Program funds. | Lake County | 101.2 | 91 to 180 days | \$2,130,000 |
| Lake | Neighborhood Commons | Neighborhood Commons incorporates the following "best practices": Architectural Design characteristics as stipulated in the research paper, Envisioning Living environments for People with Mental Illness, and Supportive Housing, which includes on site services at the facility. Technical assistance is being provided for this project from the Corporation for Supportive Housing and the Center for Urban Design Collaborative through Kent State University's College of Architecture and Environmental Design. Funds requested would be used to design and construct Neighborhood Commons as "green" as possible, which may include solar panels, geothermal, etc. | Extended Housing, Inc. | 5 | 181 days or more | \$250,000 |
| Lake | Senior Center Expansion | This project will provide a 1,200 square foot expansion to the existing Senior Center for Exercise Equipment and Health Related Support Services. | CT Consultants | 30 | 0 to 30 days | \$300,000 |
| Lake | Cashen Road | Mill and fill road maintenance of 0.35 miles | Lake County | 2.5 | 31 to 90 days | \$51,949 |
| Lake | Hermitage Road-Pinecrest to I90 | Mill and fill road maintenance of 1.12 miles | Lake County | 7.1 | 31 to 90 days | \$149,614 |
| Lake | Clearway Drive Improvements | Reconstruction of 1030 linear feet of concrete roadway including curbs and aprons to replace a roadway which has reached its service life. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 20 | 91 to 180 days | \$375,950 |
| Lake | Casement Road Realignment | Relocation of 0.5 miles of road | Lake County | 57 | 91 to 180 days | \$1,200,000 |
| Lake | County Line Rd Reconstruction | Major rehab of 2.9 miles of road | Lake County | 176.7 | 31 to 90 days | \$3,720,000 |
| Lake | West Overlook Drive Improvements | Reconstruction of 2260 linear feet of concrete roadway including curbs and aprons to replace a roadway which has reached its service life. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 20 | 91 to 180 days | \$814,200 |
| Lake | Erievue Drive Improvements | Reconstruction of 1225 linear feet of concrete roadway including curbs and aprons to replace a roadway which has reached its service life. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 20 | 91 to 180 days | \$447,125 |
| Lake | City Salt Dome | Construction of 1600 ton capacity salt dome for City Service Department. It will help stop the seepage of rock salt into the ground water system and storm sewers. | City of Mentor-on-the-Lake | 15 | 31 to 90 days | \$100,000 |
| Lake | Hillcrest Drive Improvements | Reconstruction of 2000 linear feet of concrete roadway including curbs and aprons to replace a roadway which has reached its service life. The road is a main thoroughfare out of the northern residential area of the City. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 20 | 91 to 180 days | \$1,336,900 |
| Lake | Bayshore Drive Improvements | Reconstruction of 2225 linear feet of concrete roadway including curbs and aprons to replace a roadway which has reached its service life. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 20 | 91 to 180 days | \$812,125 |
| Lake | Auburn Rd from LHS to Auburn Career Center | Reconstruction / Expansion | Lake County | 95 | 181 days or more | \$2,000,000 |
| Lake | East Overlook Drive Improvements | Reconstruction of 2060 linear feet of concrete roadway including curbs and aprons to replace a roadway which has reached its service life. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 20 | 91 to 180 days | \$731,000 |
| Lake | Melridge Culvert | 75' of culvert replacement | Lake County | 10 | 31 to 90 days | \$210,000 |
| Lake | St. Lawrence Boulevard Improvements | Reconstruction of 7791 linear feet of a multi-use path and appurtenances spanning the City's borders, on a north-south axis, providing connections between neighborhoods, schools and community facilities. The presence of the path reduces vehicular travel in the area and provides pedestrian and bicycle access to significant portions of the City. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 20 | 91 to 180 days | \$3,500,000 |
| Lake | Lake Road West Reconstruction | Major rehab of 1.1 miles of road | Lake County | 142.5 | 91 to 180 days | \$3,000,000 |
| Lake | River Road Safety Improvement | Safety improvements to 1.2 miles of road | Lake County | 77.2 | 31 to 90 days | \$1,625,000 |
| Lake | Green Road Storm Sewer Improvement | Storm sewer improvements to 1.1 miles of road | Lake County | 42.8 | 91 to 180 days | \$900,000 |
| Lake | Reconstruction of the Multi-Use Path bordering SR | Reconstruction of 10,000 +/- linear feet of a multi-use path and appurtenances spanning the City's borders, on a north-south axis, providing connections between neighborhoods, schools and community facilities. The presence of the path reduces vehicular travel in the area and provides pedestrian and bicycle access to significant portions of the City. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 20 | 31 to 90 days | \$250,000 |
| Lake | Auburn Road Reconstruction | Reconstruction of 1.57 miles of road | Lake County | 110.7 | 181 days or more | \$2,330,299 |
| Lake | Fairgrounds Reconstruction | Reconstruction of 2.23 miles of road | Lake County | 136.7 | 181 days or more | \$2,878,187 |
| Lake | Auburn Road SR44 to Prouty | Reconstruction of 0.69 miles of road | Lake County | 64.1 | 181 days or more | \$1,349,715 |
| Lake | Hermitage Road Girdled to Morley | Reconstruction of 2.42 miles of road | Lake County | 148.4 | 181 days or more | \$3,123,413 |
| Lake | Leroy Thompson Bridge Replacement | Bridge replacement | Lake County | 21 | 181 days or more | \$442,000 |
| Lake | Pinecrest Road - Morely to Hermitage | Reconstruction of 1.12 miles of road | Lake County | 68.7 | 181 days or more | \$1,445,547 |
| Lake | Prouty Road - Morley to Ravenna | Reconstruction of 1.7 miles of road | Lake County | 104.2 | 181 days or more | \$2,294,133 |
| Lake | Edison-Mondamin Area Storm Water Drainage Improvment | Installation of new storm sewers and a water quality /retention basin to reduce or preclude flooding in a older residential neighborhood. The current system is very antiquated and poorly functioning. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 20 | 31 to 90 days | \$250,000 |
| Lake | Vrooman Road Improvements | Reconstruction of 0.89 miles of road | Lake County | 133 | 181 days or more | \$2,800,000 |
| Lake | Leroy Center Roundabout | traffic circle to improve 5-way intersection | Lake County | 38 | 181 days or more | \$800,000 |
| Lake | Sperry / Booth Bridges | Bridge Replacement | Lake County | 71.3 | 181 days or more | \$1,500,000 |
| Lake | Quentin Rd. Area Sanitary Relief Sewers & EQ Basin | Installation of 14,500 linear feet of sanitary relief sewers ranging in diameter from 8" to 42" including 37 manholes and the installation of a 1.2 million gallon equalization basin including pumps and appurtenances. The project is necessary to preclude potential sanitary sewer overflows to Lake Erie and to halt the intermittent flooding of basements in the service area. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels. | City of Eastlake | 60 | 181 days or more | \$6,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Lake | N&S Riverview Drive Pump Station Rehabilitation | Rehabilitation of a package sanitary sewage pump station which has reached its useful life and is now requiring excess maintenance and upkeep to maintain its functionality. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels | City of Eastlake | 20 | 91 to 180 days | \$129,000 |
| Lake | West Island Drive Pump Station Rehabilitation | Rehabilitation of a package sanitary sewage pump station which has reached its useful life and is now requiring excess maintenance and upkeep to maintain its functionality. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels | City of Eastlake | 20 | 91 to 180 days | \$160,000 |
| Lake | Farragut Drive Pump Station Rehabilitation | Rehabilitation of a package sanitary sewage pump station which has reached its useful life and is now requiring excess maintenance and upkeep to maintain its functionality. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels | City of Eastlake | 20 | 91 to 180 days | \$165,000 |
| Lake | Lakeshore Chagrin Pump Station Rehabilitation | Rehabilitation of a package sanitary sewage pump station which has reached its useful life and is now requiring excess maintenance and upkeep to maintain its functionality. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels | City of Eastlake | 20 | 91 to 180 days | \$113,000 |
| Lake | Lakeshore East Pump Station Rehabilitation | Rehabilitation of a package sanitary sewage pump station which has reached its useful life and is now requiring excess maintenance and upkeep to maintain its functionality. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels | City of Eastlake | 20 | 91 to 180 days | \$111,000 |
| Lake | Replacement Emergency Generator for the Police Sta | Replace the currently antiquated and unreliable emergency generator at the Eastlake Police Station with a new unit capable of providing power to maintain all essential police activities during a power outage. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements have, and are projected to remain, well below required and needed levels | City of Eastlake | 15 | 31 to 90 days | \$15,000 |
| Lake | Engineer's Salt Dome | Two salt domes for storage within the Eastlake Senior Center for 1 year at a total of \$51,000.00 (salary and benefits). | Lake County | 14.3 | 31 to 90 days | \$300,000 |
| Lake | Retain the Senior Center Coordinator for 1 year | Note: The City has just come out of fiscal emergency and funds available for Senior Care Programs and Administration are nearly non-existent. Pay an Economic Development Coordinator for 1 year at a total of \$60,000.00 (salary and benefits). | City of Eastlake | 1 | 31 to 90 days | \$51,000 |
| Lake | Hire an Economic Development Coordinator | Note: The City has just come out of fiscal emergency and funds available for Senior Care Programs and Administration are nearly non-existent. Pay an Economic Development Coordinator for 1 year at a total of \$60,000.00 (salary and benefits). | City of Eastlake | 1 | 31 to 90 days | \$51,000 |
| Lake | Hire an Economic Development Coordinator | Note: The City has just come out of fiscal emergency and funds available for Senior Care Programs and Administration are nearly non-existent. Pay an Economic Development Coordinator for 1 year at a total of \$60,000.00 (salary and benefits). | City of Eastlake | 1 | 31 to 90 days | \$60,000 |
| Lake | Storm Sewer Improvements (phase 1) | In 2006, the Village of Timberlake commissioned a study of the Village's existing storm system and the development of a storm sewer master plan to enhance the well-being of the Village residents, eliminate flooding and reduce maintenance costs. The result of this study and master plan revealed the need of a village-wide storm sewer replacement with a project cost of \$4.3 million dollars. The Village has requested OPWPC funding assistance to no avail as our local match values cannot compete with other communities. Phase 1 project funds will be used to replace undersized existing storm sewers at the South-East tributary section of the Village of Timberlake. This phase of the Village-wide project will consist of approximately 380 feet of 36-inch to 12-inch storm sewer replacement. The sewer will be designed for a 10-year frequency storm. The entire Village Sanitary sewer system consists of approximately 17,000 linear feet of mainline and is over 50 years old. The system requires pipe lining and repair. | Village of Timberlake, Ohio | 20 | 91 to 180 days | \$530,000 |
| Lake | Sanitary Sewer Rehabilitation | In 2006, the Village of Timberlake commissioned a study of the Village's existing storm system and the development of a storm sewer master plan to enhance the well-being of the Village residents, eliminate flooding and reduce maintenance costs. The result of this study and master plan revealed the need of a village-wide storm sewer replacement with a project cost of \$4.5 million dollars. The Village has requested OPWPC funding assistance to no avail as our local match values cannot compete with other communities. Project funds will be used to replace undersized existing storm sewers through out the Village of Timberlake. This Village-wide project will consist of approximately 15,100 feet of 42-inch to 12-inch storm sewer replacement. The sewer will be designed for a 10-year frequency storm. | Village of Timberlake, Ohio | 15 | 31 to 90 days | \$1,500,000 |
| Lake | Villagewide Storm Sewer Improvements | In 2006, the Village of Timberlake commissioned a study of the Village's existing storm system and the development of a storm sewer master plan to enhance the well-being of the Village residents, eliminate flooding and reduce maintenance costs. The result of this study and master plan revealed the need of a village-wide storm sewer replacement with a project cost of \$4.5 million dollars. The Village has requested OPWPC funding assistance to no avail as our local match values cannot compete with other communities. Project funds will be used to replace undersized existing storm sewers through out the Village of Timberlake. This Village-wide project will consist of approximately 15,100 feet of 42-inch to 12-inch storm sewer replacement. The sewer will be designed for a 10-year frequency storm. | Village of Timberlake, Ohio | 25 | 181 days or more | \$4,500,000 |
| Lake | Williams Road Culvert | Salvage Replacement: 70' | Lake County | 4.3 | 91 to 180 days | \$90,000 |
| Lake | Faragut Drive Sanitary Pump Station Rehabilitation | Rehabilitation of a sanitary sewage pump station which has reached its useful life and is now requiring excess maintenance and upkeep to maintain its functionality. | City of Eastlake | 20 | 91 to 180 days | \$165,000 |
| Lake | Lakeshore East Sanitary Pump Station Rehabilitation | Rehabilitation of a sanitary sewage pump station which has reached its useful life and is now requiring excess maintenance and upkeep to maintain its functionality. Canada/Province of Ontario. The docks on Ohio's side will be placed at the end of State Rt. 44 located next to Mentor Highlands State Park in Lake County, Ohio. The docks on Canada's side will be placed in Port Burwell, located in the Municipality of Bayham, Ontario. | City of Eastlake | 20 | 91 to 180 days | \$111,000 |
| Lake | International Border Crossing | A private company will own and operate 5 ice class ships, capable of carrying 110 semi's, 400 cars, and 700 people, 24 hours a day, 7 days a week, 365 days a year. We plan on removing 3000 semi's a day from the interstate 90 and State Rt.44 intersection. 1500 north, 1500 south. Thus saving road wear and tear, fossil fuels, particulate matter in the atmosphere, all the way to Buffalo NY, everyday. This is a totally "GREEN" project. We are tied to Ontario to the tune of \$88 million a day in trade. We both have many companies that rely on each other, they are hurting also. We have met with all levels of government on the North side of Lake Erie, they look forward to meeting with, and working with their counter parts in the State. | Village of Grand River | 100,000 | 91 to 180 days | \$150,000,000 |
| Lake | McMinn Memorial Park Restroom Project | Construction of a 1,200 s.f. restroom for male and female and storage space for recreational equipment. The project will also require the installation of 300 linear feet of 8 inch sanitary line and 500 linear feet of 2 inch water line. Construction of a salt dome for the City's Service Dept. The dome will house approximately 1,000 tons of salt and will prevent seepage of rock salt into the ground and storm sewer systems. | City of Mentor-on-the-Lake | 20 | 31 to 90 days | \$337,100 |
| Lake | City Salt Dome | Construction of a salt dome for the City's Service Dept. The dome will house approximately 1,000 tons of salt and will prevent seepage of rock salt into the ground and storm sewer systems. | City of Mentor-on-the-Lake | 20 | 31 to 90 days | \$100,000 |
| Lake | McMinn Memorial Park Restroom Project | THIS SUBMISSION IS A CORRECTION FOR A PRIOR SUBMISSION TITLED MCMINN MEMORIAL PARK RESTROOM PROJECT. THE PRIOR SUBMISSION BELIEVE HAD THE WRONG ZIP CODE ON IT. THE CORRECT ZIP CODE FOR THIS PROJECT IS 44060. Construction of a 1,200 s.f. public restroom for male and female, handicap accessible at City McMinn Memorial Park. 300 linear feet of 8 inch sanitary line and 300 linear feet of 2 inch line will need to be run. | City of Mentor-on-the-Lake | 20 | 31 to 90 days | \$337,100 |
| Lake | Mentor-on-the-Lake Police Station | Construction of a new Police Station. Current station operates within 867 s.f. New station will be constructed next to City Hall on land owned by the City. Total square footage of the new building is approximately 15,000. | City of Mentor-on-the-Lake | 100 | 91 to 180 days | \$3,400,000 |
| Lake | West Island Drive Sanitary Pump Station Rehabilitation | Rehabilitation of a sanitary sewage pump station which has reached its useful life and is now requiring excess maintenance and upkeep to maintain its functionality. | City of Eastlake | 20 | 91 to 180 days | \$160,000 |
| Lake | Dist 12, PID 85851, LAK (14) 45 hybrid buses | 14x45 hybrid buses | Ohio Department of Transportation | 168 | 181 days or more | \$10,080,000 |
| Lake | Renovate and Equip | Renovate a historical building in Madison village, ohio. Dog grooming and dog daycare, which is a very high demand. In near future I would like to get a grooming academy going. People always want and need to get their dogs groomed and need babysitters for their pups. I have been in this field for 10 years. I have found that people spend money on their dogs looking good and being taken care of before themselves. | Dog grooming/Doggie daycare (grooming academy) | 10 | 0 to 30 days | \$500,000 |
| Lake | Madison Avenue Sidewalk Program | 1.5 miles of new sidewalk. | Painesville Township | 50 | 181 days or more | \$385,000 |
| Lake | Painesville Township Road Replacement | Replacement of 4 miles of existing residential roadway | Painesville Township | 50 | 181 days or more | \$3,700,000 |
| Lake | Bryn Mawr/Bellaire Storm Drainage | Installation of 1,250 linear feet of storm drainage pipe | Painesville Township | 40 | 91 to 180 days | \$165,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |

| Lake | Dist 12, PID 85927, LAK 18 paratransit vans | Purchase 18 paratransit vans for Lakeland | Ohio Department of Transportation | 21 | 31 to 90 days | \$1,260,349 |
| Lake | Dist 12, PID 85849, LAK (4) 35' hybrid buses | 4) 35' hybrid buses for Lakeland | Ohio Department of Transportation | 35 | 181 days or more | \$2,080,952 |
| Lake | Dist 12, PID 85850, LAK 17 paratransit vans | 17 paratransit vans for Lakeland | Ohio Department of Transportation | 20 | 181 days or more | \$1,226,040 |
| Lake | River Street Elevated Storage Tank | Replace the existing 110,000 gallon storage tank with a new steel tank of the same capacity. This project will improve the quality of water for 5000 residents. Project to include design and site improvements, removal of the 80 year old tank and construction of the new unit. Park include expansion for Lakeland | Madison Village | 10 | 91 to 180 days | \$450,000 |
| Lake | Dist 12, PID 85847, LAK Park-in-ride expansion | Replace 800 linear feet of 8" sanitary sewer and install new man holes and associated restoration. Existing 8" line will be abandoned. Evaluation and improvements to the existing sanitary sewer system, including approximately 8,000 linear feet of grading and 4,000 linear feet of repair/rehabilitation and 2,000 linear feet of replacement. | Ohio Department of Transportation | 11 | 31 to 90 days | \$533,300 |
| Lake | East Main Street Sanitary Sewer Replacement | Replace 800 linear feet of 8" sanitary sewer and install new man holes and associated restoration. Existing 8" line will be abandoned. Evaluation and improvements to the existing sanitary sewer system, including approximately 8,000 linear feet of grading and 4,000 linear feet of repair/rehabilitation and 2,000 linear feet of replacement. | Madison Village | 10 | 91 to 180 days | \$125,000 |
| Lake | Sanitary Sewer I/I | Windmills and solar panels for Lakeland | Madison Village | 10 | 91 to 180 days | \$420,000 |
| Lake | Dist 12, PID 85852, LAK Windmills and solar panels | Relocation of the existing intersection with North Lake Street (SR 528) approximately 100' to the north. Work shall include excavation, embankment, storm sewer installation and new pavement of 800 L.F. of the existing pavement. | Ohio Department of Transportation | 20 | 181 days or more | \$1,000,000 |
| Lake | Main Street Alley Relocation | This project positively impacts the deficient parking of the historic downtown shopping district. It provides a safe and illuminated area for visitors to the shopping area. Furthermore, it increases the safety on SR 288 by eliminating a cut-out. The entrance to the Madison Village District is also improved via this project. | Madison Village | 20 | 91 to 180 days | \$125,000 |
| Lake | Dayton Road Water Line Interconnect | Construction of 1,500 LF of 12" waterline and a meter pit to interconnect with an existing Lake County Department of Utilities water line. The project is to provide a secondary point of access to the Village of Madison water source. It will guarantee an alternate source of water provision for 3,200 residents and helps to avoid nitrogen intrusions of service due to mechanical failure. This is a health and safety concern for both Madison Village and the Lake County Department of Utilities. | Madison Village | 10 | 91 to 180 days | \$75,000 |
| Lake | Dist 12, PID 85848, LAK Intermodal transit hub | Intermodal transit hub design & construction | Ohio Department of Transportation | 160 | 181 days or more | \$8,000,000 |
| Lake | Dist 12, PID 85853, LAK Exchange center in Concord | Engineer/design for an exchange center in Concord Township for Lakeland | Ohio Department of Transportation | 22 | 181 days or more | \$1,100,000 |
| Lake | Village Hall and Safety Center ADA Upgrade | A complete ADA upgrade and modification of the existing historic Madison Village Hall to provide full handicap accessibility (including bathroom and public meeting facilities). Additional work will expand the Police Department and administrative areas of the present structure. Safety improvements will be made to protect employees in areas such as the Police Department waiting area, the Utility payment and the Mayor's Court receiving window. | Madison Village | 25 | 91 to 180 days | \$464,000 |
| Lake | Middle Ridge Road Safety Path | The complete installation of a 6' wide safety sidewalk from Middle Ridge Road to the Madison High School crossing. The sidewalk is a 35 MPH zone with high child and resident walking/running/biking traffic. The 5,000 foot project will help protect more than 2000 students that attend the high school. The availability of the path will provide health and safety improvement to pedestrians that are walking to the school complex on a daily basis. | Madison Village | 15 | 91 to 180 days | \$250,000 |
| Lake | Johnnycake Ridge Road Waterline Improvement | This project is a new 12" waterline on Johnnycake Ridge Rd between Kirkland Rd and Riverside Dr. This line will connect the Patton Rd District to the storage tank at SR 174 & SR 84 providing needed storage to the area. Currently the Patton Rd District has no storage. If the pump fail or a line is shut down, the entire district loses pressure. By adding storage we will increase reliability and create a consistent water supply to the area. The project will also allow business to expand capacity at the SR530 & SR10 interchange. | Lake County Department of Utilities | 40 | 91 to 180 days | \$2,000,000 |
| Lake | Madison Waste Water Treatment Plant Improvement | This project will expand and upgrade the Madison WWTP from 3.0 million gallons per day to 4.5 million gallons per day. It will allow for development in Eastern Lake County by providing sanitary sewer service and treatment to businesses and homes for the next 20+ years. | Lake County Department of Utilities | 200 | 91 to 180 days | \$15,200,000 |
| Lake | Lakeshore Blvd Waterline Replacement | This project is a 12" waterline crossing the Chagrin Road at Lakeshore Blvd. The replacement of this waterline will eliminate two dead ends, improve water quality and create a redundant water supply in case of an emergency. | Lake County Department of Utilities | 40 | 91 to 180 days | \$400,000 |
| Lake | Shore Acrc Drive Waterline Improvement | This project is a replacement of a 6" waterline constructed in the 1920's with an 8" waterline. The project will improve fire protection and water quality in the area. | Lake County Department of Utilities | 40 | 91 to 180 days | \$250,000 |
| Lake | Lake County Regional Public Safety Radio System | County system. The finished system will be completely interoperable with MARCS and Cuyahoga County. In addition we plan on incorporating Lake County Public Works departments into this system which will provide an example of complete interoperability among Police, Fire, Schools and Public Works. This system will support at least 4,000 subscriber radios and utilize 700 MHz and 800MHz frequencies with 16 channels in a simulcast configuration. When completed Lake County will operate a PPS Public Safety radio system that will not need replacement until 2025. This project has already received 3.9 million in PPSIC funding and a 2.8 million in a transportation grant through Lakeland (regional transit) who also uses the existing system and will use the future system. In total more than 38 Public Safety agencies, 10 school districts, 1 regional transit, 10 County departments and 15 city and town boards will use the completed system. This system will define interoperability and collaboration in wireless communication systems. Thank you for this opportunity. | Lake County Commissioners office | 150 | 91 to 180 days | \$12,200,000 |
| Lake | Fire Station Energy Conservation | We currently operate 3 fire stations, one is new (2008) the other two were built in 1966. The older buildings have little or no insulation or other energy considerations such as high efficiency glazing or furnaces. The stations were built with a small living area that has some insulation and an apartment built of approximately 2000 sq ft that has no insulation. We are using several existing residential gas furnace air furnaces to heat these spaces. This situation is very inefficient. We would expect to get a 25 to 35 % decrease in our energy cost as a result of this project. As with the rest of the county our area has been affected by the significantly devalued in construction. The building trades and HVAC contractors have been left off or not rehiring tradesmen because of the lack of work. We hope this small project would be a small boost to our local economy and provide a savings to our taxpayers. Thank you for your consideration. | Painesville Township Fire Department | 2 | 31 to 90 days | \$45,000 |
| Lake | Wickliffe Police Station Roof and HVAC Replacement | The deteriorated roof of the Wickliffe Police Station is leaking and must be replaced. The roof has approximately 17,000 square feet of area being at 800 feet of 70 year old clay sewer pipe with a plastic liner plus reconstruction of 12 manholes and replacement of 45 sewer service connections. | City of Wickliffe | 2 | 31 to 90 days | \$150,000 |
| Lake | Sanitary Trunk Sewer Lining(revised) | Lighting currently consumes nearly 25% of all electricity generated in the US, with even the most efficient fluorescent light bulbs operating at only 20% efficiency. LED lighting technology is already being commercialized that can increase the bulb efficiency to over 50%. A key enabling material for this technology is zinc oxide crystals, which can improve both the performance and cost of LED lighting systems. | City of Willoughby | 50 | 31 to 90 days | \$1,607,500 |
| Lake | Zinc Oxide Crystals for High Efficiency LED Light | This project will leverage existing resources at Sawyer Technical Materials in Lake County, Ohio to establish an Ohio presence in the development and manufacture of zinc oxide. For over 50 years, Sawyer has been a global leader in the production of crystal quartz using techniques and equipment ideally suited for adaptation to zinc oxide production. Due to reductions in global demand for quartz, much of Sawyer's infrastructure is currently idled and available for zinc oxide. Sawyer will work with Wright State University, a global leader in the understanding of zinc oxide materials. When successful, this project will generate 100 new jobs at Sawyer's Ohio facility within 3 years, expanding to 300 jobs within 5 years as demand for zinc oxide lighting systems increases. | Sawyer Technical Materials, LLC | 100 | 0 to 30 days | \$6,000,000 |
| Lake | Exceptional Electric Vehicle (EEV) | Pending US Patent Application Publication No. 20080050716 describes a unique, reliable, electric vehicle technology under development in OH. The EEV project will create working prototypes of the EV Energy Subsystem. The project will establish production of the Energy Subsystem components in OH, and establish marketing these components to EV conversion builders in all 50 states and internationally. The jobs created and trained via this project will be high technology engineering, manufacturing, and marketing positions in an OH new tech energy corporation. | Modtech Corp. | 80 | 0 to 30 days | \$2,500,000 |
| Lake | Heisley Road Widening | Heisley Road is a major north-south arterial roadway in the City of Mentor and services a highway interchange, a popular lakefront state park, a major regional medical center and is a number of Mentor's largest employers. The City has already invested over \$12 million to build a limited bypass and to widen several other portions of this roadway. These stimulus funds are being requested to complete phase 3 of this improvement which will widen Heisley Road from 2 to 4 lanes between US 20 (Mentor Ave.) and Jackson Street. There are presently several large development projects planned for areas serviced by Heisley Road in addition to planned interchange improvements with SR 2. Pool of services on Heisley Road will serve to limit the benefits of these improvements. | City of Mentor | 25 | 91 to 180 days | \$5,000,000 |
| Lake | Plaza Boulevard Extension | This project consists of extending a connector street approximately 1,500 feet north from US 20 (Mentor Avenue) to connect with Tyler Boulevard. This connection will provide a critical north-south access roadway from the heavily traveled Great Lake Mall area to Tyler Boulevard which, in turn, provides quick access to SR 2. Benefits include greatly reduced emergency response time as well as improving the level of service at several nearby intersections, i.e. SR 306/US 20 and SR 615/US 20. It is anticipated that this improved traffic flow and emergency response time will eliminate the need for a sixth fire station. | City of Mentor | 30 | 181 days or more | \$2,400,000 |
| Lake | Plains Road Widening | This project will allow for the widening and resurfacing of Plains Road from Hopkins Road to the Mentor-on-the-Lake corporation line. This work will include the construction of two 4' paved bike lanes in accordance with the City of Mentor's master plan. This project will also allow for the widening and resurfacing of the roadway which, in turn, will create safer travel for motorists. | City of Mentor | 10 | 31 to 90 days | \$670,000 |
| Lake | Resurfacing of Tyler Boulevard | The section of Tyler Boulevard between state routes 615 and 306 is a 4 lane section of road which constitutes Mentor's primary industrial corridor and provides access to two highway interchanges with SR 2. In 2008 this section of roadway was rated "poor" in terms of pavement condition by the Northeast Ohio Areawide Coordinating Agency (NOACA). | City of Mentor | 20 | 91 to 180 days | \$3,000,000 |
| Lake | Center Street Bridge Improvement | The Center Street (SR 615) bridge over the C&K and Norfolk Southern Railroad tracks is experiencing considerable decay to the abutment and parapet walls. It is estimated that \$350,000 will be needed to resurface and rebuild both of these areas. Presently there are numerous areas of spalled concrete with exposed reinforcing bar. Continued exposure may result in structural problems to both the sidewalk and parapet walls. | City of Mentor | 5 | 31 to 90 days | \$350,000 |
| Lake | General Road Repairs | The City of Mentor has been budgeting increasingly smaller amounts of money for general road repair for the past eight years, due to stagnant and declining revenues. The result is an overall decline in the pavement condition of the City's roadway infrastructure. An investment of \$1 million would allow the City to focus on the repair of existing streets, primarily residential concrete and asphalt streets. | City of Mentor | 15 | 31 to 90 days | \$1,000,000 |
| Lake | Marina Dock Wall Repairs | In 1998 the City of Mentor purchased 800 acres of lakeshore property in an effort to preserve greenspace on the shore of Lake Erie. A portion of this property is a marina with 450 +/- slips. Much of this marina infrastructure is 75+ years old and badly in need of replacement. The City has been selecting failed and failing bulkheads as funds have permitted, however, in this current economic climate it will not be feasible to address the need. Presently there is a dramatic need to replace 600' of bulkhead at a cost of \$300,000. | City of Mentor | 5 | 31 to 90 days | \$300,000 |
| Lake | Fire Station #3 Addition | Funds would be used to build an addition on to Fire Station #3 located at 7957 Mentor Avenue. Improvement would include 3 additional apparatus bays, new lockers/bathrooms and more storage space. Sufficient city-owned property is immediately adjacent to this station. | City of Mentor | 15 | 91 to 180 days | \$800,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Lake | Scattered Site Energy Efficiency Housing Retrofits | Internal energy audits are also cost-effective. Encourage the pay-as-you-go method in these housing units, we are heavily aware of the low savings on making units and buildings as energy efficient as possible. As grants and finance allow, we replace metal windows with new energy efficient windows, upgrade to vinyl siding, and install energy efficient doors. We are proud of our properties and the homes we provide for our tenants. Home Energy Audits would be utilized to assist in prioritizing the retrofits. This comprehensive analysis includes a Blower Door Test, Infrared Camera Scan, and a Visual Airflow Evaluation. As funding allows, we would like to assess each property and retrofit for as many energy efficiencies as possible. Expected Outcomes include the retrofit of four (4) unit apartment complex with geothermal, 3 new roofs, new windows for 3 properties, 30 new energy efficient appliances and air-conditioners, new insulation for 5 properties, 10 new energy efficient doors, and duct work on at least 5 properties. | Extended Housing, Inc. | 8 | 31 to 90 days | \$500,000 |
| Lake | Camp Stigwandish Grey Water Project | Installation of an Ohio EPA approved wastewater treatment system at Scout Camp Dining Hall. Point of discharge will be to a drip irrigation field consisting of three zones capable of treating 700 GPD. The system will consist of a 600 gallon grease trap followed by two 1500 gallon septic tanks, a 3,000 gallon drip zone biosol tank and a central hydraulic unit with a panel control. The 3,000 gallon drip zone biosol tank will be installed ahead of a central hydraulic unit, equipped with 2 pumps to dose the drip irrigation field. The tank is capable of storing treated wastewater generated by the dining hall through the week. The drip irrigation field consist of 3 zones. Each zone will consist of 1,000 linear feet of tubing. Each zone will be dosed will include include an adjacent area of undisturbed land for dissipation. Outcomes are the elimination of direct or indirect surface water discharge in the Grand River basin. All permits are in place with full design and plans ready for installation | Greater Western Reserve Council Boy Scouts of Amer | 2 | 31 to 90 days | \$90,000 |
| Lake | Chagrin River Park - Stream Bank Restoration | Project will provide slope stabilization for 250' of riverbank in the Chagrin River. Project will prevent soil erosion and specifically protect a 255' pedestrian bridge downstream. The project stimulates employment in engineering, trucking and construction industries. | Lake Metroparks | 13 | 91 to 180 days | \$250,000 |
| Lake | Environmental Learning Center - Bridge for ADA Acc | The project will construct a new 270' near foot pedestrian bridge and will allow for ADA access to approximately 2.1 miles of trail which Lake Metroparks is planning to develop as part of the Lake County Educational Service Center's Porter Center for Science and Mathematics program. The program serves all 3rd, 4th and 5th graders at the public schools throughout Lake and Geauga Counties. The Porter Center for Science and Mathematics uses Lake Metroparks 256 acre Environmental Learning Center as its home to foster learning through the natural environment. The project would stimulate employment in engineering, manufacturing, trucking and construction industries. | Lake Metroparks | 27 | 91 to 180 days | \$411,000 |
| Lake | Environmental Learning Center - Trails for Environ | The project will construct 3.7 miles of newly created aggregate trail which will help serve the needs of the Lake County Educational Service Center's Porter Center for Science and Mathematics. The program serves all 3rd, 4th and 5th graders at the public schools throughout Lake and Geauga Counties. The Porter Center for Science and Mathematics uses Lake Metroparks 256 acre Environmental Learning Center as its home to foster learning through the natural environment. The project will stimulate employment in engineering, trucking and construction industries. | Lake Metroparks | 15 | 91 to 180 days | \$673,000 |
| Lake | Lake Metroparks Farmpark Visitor Center Energy Eff | to re-purpose energy. The proposed project includes: a 60 ton capacity geo-exchange heating and cooling system utilizing two 30-ton lake water heat exchangers and heat pumps for a 25,000 square foot Visitor Center that services 160,000 visitors annually. Energy efficiency initiatives include: replacement of all incandescent lighting; upgrade of present fluorescent lighting with compact fluorescent ballasts; replacement of metal halide lighting to fluorescent and LED lighting; improved insulation envelope for the entire building that includes re-insulation of ceilings and 2" foam board over building exterior. Also included is the upgrade of existing renewable energy solar and wind applications: including re-installing a non-operational wind turbine and inverter with an extension of an existing monopole tower and the installation of new more efficient turbines designed for tower wind power applications. | Lake Metroparks | 44 | 91 to 180 days | \$382,000 |
| Lake | Gully Brook Park - Trails for Nature Education, He | The project will create 1.6 miles of newly constructed aggregate trail at Lake Metroparks 172 acre Gully Brook Park. Lake Metroparks will use the new trail to educate visitors first hand of the diverse plant and wildlife habitat of Gully Brook Park and to promote a healthy lifestyle for its visitors. The project will stimulate employment in engineering, trucking and construction industries. | Lake Metroparks | 15 | 91 to 180 days | \$248,000 |
| Lake | Girdled Road Reservation - Bridge for Access to Tr | Project includes an eighty-five foot (85') and one hundred foot (100') bridges to provide access to 3.2 miles of hiking trails in the 926-acre Girdled Road Reservation in the Lake Metroparks. Over 60,000 Lake County citizens visited this park in FY2008. Project would stimulate employment in engineering, manufacturing, trucking and construction industries. | Lake Metroparks | 27 | 91 to 180 days | \$242,000 |
| Lake | Girdled Road Reservation - Trails for Nature Educa | The project will create 3.2 miles of newly constructed aggregate trail at Lake Metroparks 926 acre Girdled Road Reservation. Lake Metroparks will use the new trail to educate visitors first hand of the diverse plant and wildlife habitat of Girdled Road Reservation and to promote a healthy lifestyle for its visitors. The project will stimulate employment in engineering, trucking and construction industries. | Lake Metroparks | 15 | 91 to 180 days | \$495,000 |
| Lake | Penitentiary Glen Reservation - Nature Center Park | The project will improve Lake Metroparks Penitentiary Glen Reservation parking lot by retrofitting the existing storm water system with approximately 600 linear feet of bio-retention swales and paving approximately 60,000 square feet of parking lot with asphalt paving. The project will educate visitors to the Penitentiary Glen Nature Center about new green alternatives to deal with storm water. The bio-retention cells will be designed to manage the runoff created by the parking lot through absorbing the runoff and also improving the water quality. This ultimately benefits not only the immediate watershed but improves runoff control and quality of water entering the Chagrin River Watershed and finally into Lake Erie. | Lake Metroparks | 27 | 91 to 180 days | \$244,000 |
| Lake | Cradle 2 Crayons, LLC | Educational Equipment toys Cribs Commercial Fire Doors Staff Start up Salaries Kitchen Equipment This area is located next door to a elementary school with half day kinder. It located on mentor ave which has about 40k cars that drive by daily. This area is in dire need of children. I am about 60% complete and I have used my own life savings. I applied for a loan and grants but did not qualify or the funds were not there. Please help me help parents and provide good paying jobs to the community. Thank you. I have been in childcare since 1997 in my home. I have a website www.cradle2crayons.com. 216-261-7962. | Early Childhood Daycare | 18 | 0 to 30 days | \$25,000 |
| Lake | New Solid Catalyst for Biodiesel Production | Biodiesel fuel production currently relies on various catalysts for efficient conversion of oils to biofuel. Most of these catalysts are in liquid form, and require costly downstream processing to remove them from the produced fuels. Sawyer has developed novel materials that can be used in solid form as biodiesel catalysts. Advantages include more into downstream processing cost, more efficient conversion of oils to usable fuel and the ability to convert more varied oils into fuel without major process changes. Sawyer has already conducted preliminary testing of its materials in biodiesel reactions that show substantially improved efficiency over currently available solid biodiesel catalysts. Once developed, production of these materials would utilize existing, idle plant capacity at Sawyer's Eastlake, Ohio facility. Development work would create 20-25 jobs within three years, leading to commercial production capacity of up to 200 tons per year of material which would create an additional 50-75 jobs in the 3-5 year timeframe. Commercialization of a patent pending portable system for solving public safety risks: dead zones in public and private buildings and tunnels. This unique product free allows commercial, building owners and public safety departments, to satisfy the NFPA's 2009 Annex O requirements for building communication much more economically than existing solutions. Typical savings PER PREMISE of \$50,000 are projected. This innovative product system supports the COMMON CAPABILITY OF COORDINATIONS for achieving all four (4) OH Dept. Natural Resources Core Objectives: Prevent, Protect, Respond, and Recover. The project is therefore directly aligned with the National Investment Strategy for Homeland Security. We are currently working with Fire Department, County Public Operations, premises owner/agencies, and OH MARCS bringing the existing system to market in OH. THE PUBLIC'S SAFETY, FIRST RESPONDER'S SAFETY, AND HOMELAND SECURITY ARE IMPROVED AT MUCH LOWER COST. Ohio will achieve distinction as the leader in affordable technology to solve this universal problem. See www.motobchp.com/bchp | Sawyer Technical Materials, LLC | 25 | 0 to 30 days | \$3,000,000 |
| Lake | Portable In-Building Communications System | Communication of a patent pending portable system for solving public safety risks: dead zones in public and private buildings and tunnels. This unique product free allows commercial, building owners and public safety departments, to satisfy the NFPA's 2009 Annex O requirements for building communication much more economically than existing solutions. Ohio will achieve distinction as the leader in affordable technology to solve this universal problem. See www.motobchp.com/bchp | Modtech Corp. | 75 | 0 to 30 days | \$2,700,000 |
| Lake | Primary Headwater Stream Habitat Evaluation Index | Credible HHEI methodology now exists. The next step is to perform the for all Ohio river systems & combine it with soil survey data to produce the stream land use planning tool. Ohio would be divided by 7 watershed/ecoregions to distribute workload. Two regions for Lake Erie & 5 for Ohio River. The CONR DEDIC would hire, train and manage the teams. Watersheds within each region would be prioritized for HHEI completion based on anticipated urban development, mining activity, GIS availability, TMDL & watershed action plan status. Each watershed/ecoregion would be staffed with 1 HHEI coordinator, 18 to 21 HHEI Technicians - each would be trainable in HHEI but skilled in at least one of GIS, desktop publishing, PH & biological lab techniques. Technicians would be grouped into teams of 3 with 1 summer intern. Field teams consisting 200 (primary) year working 5 8hr/week or 7000 HHEI assessments/year minimum. Non-field time to be spent processing data & samples. Statewide average of 4.5 headwater streams per square mile equals 200,000 of headwater streams. At these staffing levels, all headwater streams in Ohio could be assessed in <=25 years. Request for 3 years of funding. | Ohio Dept of Natural Resources | 160 | 31 to 90 days | \$17,000,000 |
| Lake | Downtown Kirtland Sewer Project | This project will transport and treat sewage from Kirtland's downtown area. The downtown area is currently underserved and development is severely hindered by Ohio EPA's requirements for on-site sewage treatment systems. Several businesses will be serviced by the sewer and this will reduce pollution in the Chagrin River, a state scenic river. This project is part of the City's comprehensive plan to bring development to the downtown area. The comprehensive plan envisions 200 new homes, offices for 480 employees, retail and commercial space for 120 employees. | City of Kirtland | 2,058 | 31 to 90 days | \$5,000,000 |
| Lake | State Route Signal Upgrade | This is the City of Kirtland's portion of a 3 City signalization, upgrade and coordination project. The project will reduce traffic congestion (saving fuel consumption) and provide LED light bulbs (saving energy consumption). Access ramps for ADA compliance will be added to the intersections (transit-friendly) power supplies will be added to provide continued use and emergency vehicle access and emergency response. | City of Kirtland | 10 | 31 to 90 days | \$135,000 |
| Lake | Temple View Pump Station | This project will transport sewage from Kirtland's Temple View area to the planned downtown sanitary trunk sewer. The Temple View area is currently underserved and more than 60% of the homes in this area have no sewer service. The median household income in ZIP 44130 and the residents need assistance to enable the project to go forward. New home construction has been prohibited by the Health Department until sanitary sewers are active. In addition to reduced pollution to the Chagrin River, a state scenic river, this project will allow job creation for the construction and maintenance of three (3) homes. | City of Kirtland | 170 | 31 to 90 days | \$450,000 |
| Lake | State Route 306 and US Route 6 intersection Improv | This intersection is proposed as Kirtland's southern commercial and light industrial area by the City's comprehensive plan. This initial improvement project will widen the roadway and upgrade the traffic signal in preparation for future commercial and light industrial development. This intersection has 21,800 vehicles a day. During evening rush hour, 3k vehicles back up the roadway with no treatment whatsoever. The widening and upgraded traffic signal will solve these current traffic flow issues as well as preparing for future development. | City of Kirtland | 10 | 31 to 90 days | \$200,000 |
| Lake | State Route 306 at Lakeland Community College Impr | Traffic in Lakeland Community College area is increasing and is causing safety concerns and is one students seek remedial and alternative education options at this public institution of higher learning. The existing traffic pattern causes significant problems with vehicles going to school and through traffic. Additional lanes are needed. The project will construct additional turn lanes and upgrade the traffic signals to enable smooth flow of traffic. | City of Kirtland | 10 | 91 to 180 days | \$200,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Lake | Renovation of Austin Hall of Science | A complete renovation of the Austin Hall of Science (originally constructed in 1967) is proposed in order to provide for the state-of-the-art laboratories, five classrooms, 10 offices, one large lecture hall and three common areas. The exterior of the building will be transformed to reflect Georgian facades that is more in line with Lake County's 153-year-old image and architectural design. The estimated cost of the project is \$8 million and would employ up to 200 workers. A significant portion of this project will be funded by private donors; therefore, we request \$4 million to begin the project on May 20, 2020. This project will add 40 College in its strategic plan to expand academic programs in math and science in accordance with Governor Strickland's STEM program. Classes for at least 11 majors will be held in the renovated building. It is anticipated this facility will attract new students each year as we attempt to grow the total enrollment from 1,200 to 1,500 over the next few years. Finally, we anticipate new and improved collaborations with Lake Hospital Systems, Lakeland College, Lakeland Corporation and the C | Lake Erie College | 200 | 31 to 90 days | \$4,000,000 |
| Lake | Crime Victim Assistance | Victim advocacy services for victims of child sexual abuse, internet crimes, sex trafficking victims, domestic violence and other crimes against juveniles and women. All crime victims in Lake County are eligible. Services will be provided at Common Pleas Courts, Domestic Relations Court, Juvenile Court, Municipal Courts, Emergency Rooms and police departments in Lake County. More than 2000 victims are assisted by this project each year. Funds will be applied toward the salaries of 4 victim advocates. | Lake County Prosecutor's Victim Assistance Program | 4 | 0 to 30 days | \$60,000 |
| Lake | Kirtland Recreation Park Slope Stabilization | The City of Kirtland's North Recreation Park has experienced two (2) slope failures that have endangered the City's North Recreation Park ball fields. The exposed soil in the slippage has eroded and is impacting the water quality of the Chagrin River, a state scenic river. | City of Kirtland | 8 | 91 to 180 days | \$320,000 |
| Lake | Madison Eco lofts | Renovation of existing building into apartments and/or condominiums. All green construction practices | Madison Enterprises | 50 | 181 days or more | \$3,000,000 |
| Lake | Kirtland Recreation Park Slope Stabilization | State Route 306 is an arterial highway with two (2) locations where the slope is failing. Kirtland Charter Road is a primary intercommunity thoroughfare with an additional location where the slope is failing. 19,200 vehicles a day pass by these areas. Ninety percent (90%) of all Emergency Medical Transport (EMT) trips to a hospital pass by two (2) of these areas. A failure of any one of these slopes would require a 2.5 mile detour for all vehicles, including EMT vehicles. | City of Kirtland | 8 | 91 to 180 days | \$270,000 |
| Lake | Kirtland Package Plant Improvements | The City of Kirtland's package plant needs to be upgraded to be in compliance with EPA standards. The upgrades include modifications to protect the equipment from sliding down the hill. | City of Kirtland | 6 | 181 days or more | \$120,000 |
| Lake | Kirtland Highway Slope Stabilization Project | State Route 306 is an arterial highway with two (2) locations where the slope is failing. Kirtland Charter Road is a primary intercommunity thoroughfare with an additional location where the slope is failing. 19,200 vehicles a day pass by these areas. Ninety percent (90%) of all Emergency Medical Transport (EMT) trips to a hospital pass by two (2) of these areas. A failure of any one of these slopes would require a 2 to 5 mile detour for all vehicles, including EMT vehicles. | City of Kirtland | 8 | 91 to 180 days | \$270,000 |
| Lake | Lake County Wastewater Collection System GIS | of Utilities wastewater collection system. The GIS would consist of a digital map of the collection system with attribute data such as pipe size, material, age, capacities, manholes, and repair history related to the map by geographic location. This map would verify the County Auditor's existing GIS and would allow the Utilities Department to relate the collection system data to other Countywide features and data such as parcel data, municipal boundaries, and fire and school districts. Benefits of the GIS include more efficient operation and maintenance of the collection system resulting in lower utility costs for our existing customers. Easy access to accurate records of the existing collection system makes system expansion and thus commercial and residential development more efficient and less expensive. Reduction in development costs and utility costs lead to allow existing businesses to remain in business and grow and makes it cost effective for new development to occur. | Lake County Department of Utilities | 20 | 0 | \$400,000 |
| Lake | Williams Ditch Improvements | Drainage Improvement | City of Toledo | 8 | 31 to 90 days | \$700,000 |
| Lake | Replacement Emergency Generator for the Police Sta | Replace the currently antiquated and unreliable emergency generator at the Eastlake Police Station with a new unit capable of providing power to maintain all essential police activities during a power outage. Note: The City has just come out of fiscal emergency and funds available for infrastructure repairs and improvements are limited. Funds are projected to remain, well below required and needed levels. | City of Eastlake | 15 | 31 to 90 days | \$55,000 |
| Lake | Urgencies and Emergencies Collaboration | REVISD APPLICATION: Price Adjustment to \$55,000.00 * Provide short term - emergency assistance to families to meet basic needs of persons with mental retardation and developmental disabilities. Assistance includes but is not limited to Food, Shelter, Health Care, Clothing, and Diapers. * Provide for or supplement a basic burial for those people that do not have resources at the time of death. * Link families to appropriate resources for long-term support and planning. Community Assistance Program - CAP Outcomes * Provide financial assistance to meet urgent needs, supporting persons with mental retardation and developmental disabilities. * Aid such persons directly, when appropriate. Process 1. Individual Grant applications are available to all Lake County children and adults impacted by Mental Retardation and Developmental Disabilities. 2. The CAP Committee reviews applications quarterly. 3. A sliding fee scale, based on 200% of Federal Poverty guidelines, is used to determine assistance. 4. Funding for individuals or families can only be funded up to 3 times annually, not to exceed \$1500.00. 5. Payments are made directly to the vendor with appropriate documentation and can not be made to the individual | Deepwood Foundation | N/A | 0 to 30 days | \$50,000 |
| Lake | Lamplight Lane Retention Basin | Flooding mitigation improvements - Project includes property acquisition, construction of an earthen levee with an outlet control structure and the replacement of the drainage culverts under Lamplight Lane. Project intended to address and alleviate serious flooding of both public and private property with water quality enhancement benefits by promoting wetlands in the area. Sleepy Hollow Subdivision - The drainage system has failed in this neighborhood and the storm sewer has collapsed and/or joints have separated causing sinkholes and corruption of the drainage system. The storm sewer replacement will require deep excavation, this project will replace approximately 3,000 feet of 36" storm sewer. | City of Willoughby Hills, Ohio | 10 | 91 to 180 days | \$500,000 |
| Lake | Sleepy Hollow Storm Water Improvements | Recreational Trails Improvements - This project is the construction of a 10-foot wide shared-use path for pedestrian and bicycles that will extend an existing path in Cuyahoga County that enters the City of Willoughby Hills southerly easterly route. The path will extend north about 5.5 miles into the City of Willoughby where it will terminate at U.S. 20. | City of Willoughby Hills, Ohio | 12 | 91 to 180 days | \$500,000 |
| Lake | Recreational Trails Improvements | SOM Center Road Widening & Traffic Signalization Improvements - A new traffic signal is warranted at an intersection along SOM Center Road, a State highway, where the entrance to the Cleveland Clinic and the (2) major car dealerships have been constructed to improve public safety. The project includes the synchronization and integration of six (6) existing traffic signals in Willoughby Hills and in the City of Willoughby. In addition, SOM Center Road will be widened to improve capacity and will dedicate a northbound lane for access to Interstate 90. | City of Willoughby Hills, Ohio | 12 | 91 to 180 days | \$960,000 |
| Lake | SOM Center Road Widening and Traffic signalization | Original facility constructed in 1932. A small classroom wing and kitchen addition was constructed in 1942. A classroom wing addition was constructed in 1952. A media center addition was constructed in 1994. The current heating system (boiler and piping) has failed and needs to be replaced. This failure led to the school being closed for one day this year. A new steam system is scheduled to be publicly bid in mid-March 2020. An electrical upgrade is part of this project as the current electrical system is not sufficient to handle the steam system. THIS SCHOOL CANNOT HOUSE STUDENTS NEXT YEAR WITHOUT THIS REPLACEMENT. | City of Willoughby Hills, Ohio | 12 | 31 to 90 days | \$500,000 |
| Lake | Hadden Elementary Heating System Replacement | Original facility constructed in 1932. A small classroom wing and kitchen addition was constructed in 1942. A classroom wing addition was constructed in 1952. A media center addition was constructed in 1994. The existing roof assembly for the entire complex is comprised of various roofing systems including of slate and modified bituminous. The systems range in date of installation from 1932-1994. The majority of the existing system exceeds 15 years of age and is actively leaking. This project will provide for complete replacement of the existing roof systems due to condition and extent of dated system installations. Provide an OSDM compliant membranes system at all low slope areas. Replace the original slate shingle system with a new asphalt shingle system. | Riverside Local School District | 5 | 0 to 30 days | \$700,000 |
| Lake | Hadden Elementary School Roofing Repairs | Original facility constructed in 1932. A small classroom wing and kitchen addition was constructed in 1942. A classroom wing addition was constructed in 1952. A media center addition was constructed in 1994. The existing structure is constructed with masonry bearing wall assemblies with brick exterior. There are several areas of deterioration, especially at the 1932 addition. This project will provide masonry cleaning, back pointing, masonry repairs and sealing. Replace deteriorated wood trim and paint existing cornice panels and wood trim. | Riverside Local School District | 5 | 31 to 90 days | \$300,000 |
| Lake | Hadden Elementary School Masonry Repairs | Original facility constructed in 1932. Additional space added in 1959 and 1994. The existing roof system for the entire complex is comprised of a modified bituminous system, a metal canopy system, and a solar system that was installed in various stages from 1979-2007. The majority of the existing assemblies exceed 15 years of age. This project will provide for complete replacement of the existing dated roof assemblies. | Riverside Local School District | 5 | 0 to 30 days | \$400,000 |
| Lake | Leroy Elementary School Heating System Replacement | Original facility constructed in 1920. Additional space added in 1939 and 1994. The existing roof system for the entire complex is comprised of a modified bituminous system, a metal canopy system, and a solar system that was installed in various stages from 1979-2007. The majority of the existing assemblies exceed 15 years of age. This project will provide for complete replacement of the existing dated roof assemblies. | Riverside Local School District | 5 | 0 to 30 days | \$500,000 |
| Lake | Leroy Elementary School Roofing Repairs | Original facility constructed in 1920. Additional space added in 1939 and 1994. The existing roof system for the entire complex is comprised of a modified bituminous system, a metal canopy system, and a solar system that was installed in various stages from 1979-2007. The majority of the existing assemblies exceed 15 years of age. This project will provide for complete replacement of the existing dated roof assemblies. | Riverside Local School District | 5 | 0 to 30 days | \$250,000 |
| Lake | Leroy Elementary School Electrical System Replacem | The original facility was constructed in 1925. The first classroom wing was constructed in 1949. The second classroom wing was constructed in 1965. The existing system for the entire complex is a gas-fired steam boiler system. The boilers were updated in 1998. Typical classrooms are equipped with unit ventilators. Radiators remain in service in a few areas. This project would provide for complete replacement of the entire heating/ventilation and cooling system. | Riverside Local School District | 5 | 31 to 90 days | \$175,000 |
| Lake | Hale Road Elementary Heating System Replacement | The original facility was constructed in 1925. The first classroom wing was constructed in 1949. The second classroom wing was constructed in 1965. The existing roof system for the entire complex is a modified bituminous roof system installed in section in 1977 and 1993 and now exceeds 15 years of age. This project would provide for complete replacement of the existing roof systems due to condition and extent of dated system installations and would provide OSDM compliant membrane system at all areas. | Riverside Local School District | 5 | 31 to 90 days | \$1,000,000 |
| Lake | Hale Road Elementary School Roofing Repairs | The original facility was constructed in 1925. The first classroom wing was constructed in 1949. The second classroom wing was constructed in 1965. The window assemblies throughout the complex were updated with thermally efficient window assemblies with double pane glazing. Existing conditions were installed in approximately 1993 and now exceed 15 years of age. A portion of the structure is equipped with dated glass block assemblies. This project would provide for the complete replacement of all window and glass block assemblies. | Riverside Local School District | 5 | 31 to 90 days | \$200,000 |
| Lake | Hale Road Elementary School Plumbing/Fixture Repla | The original facility was constructed in 1925. The first classroom wing was constructed in 1949. The second classroom wing was constructed in 1965. The school facility contains 6 group water closets, 4 boys and 2 single occupancy toilet rooms. Fixtures are a combination of urinals and other equipment. Water closets/toilets are floor mounted. A portion of urinals are equipped with a continual flush system. System leaks for both supply and drainage systems have been an ongoing issue of concern. | Riverside Local School District | 5 | 31 to 90 days | \$600,000 |
| Lake | Hale Road Elementary Plumbing/Fixture Replacement | The original facility was constructed in 1925. The first classroom wing was constructed in 1949. The second classroom wing was constructed in 1965. The existing structure is constructed with masonry bearing wall assemblies with brick exterior. Exterior masonry restoration was completed in 1999 but there are several areas of new deterioration. A portion of the 1949 building contains several prominent cracks in the walls and adjoining floor structure. The noted areas of deterioration include through multiple floor levels and a cornice assembly that extends and displaced from building movement. The severity of deterioration has been progressing over several years despite attempts to repair. The cracks in the floor structure were covered with tile patches as the progression of cracking through these areas. The masonry has shown a high degree of evidence of corrosion. This project will provide masonry cleaning and sealing, replace deteriorated linings, complete masonry repairs, and will also provide for structure analysis and test investigations at areas of deterioration, the 1949 building and complete all necessary construction repairs. WIRE TREE BASKET MANUFACTURERS/WHOLESALE NURSERY HARDWOODS SUPPLIER SEEKING WORKING CAPITAL TO CONTINUE BUSINESS. | Riverside Local School District | 5 | 31 to 90 days | \$400,000 |
| Lake | WORKING CAPITAL | WIRE TREE BASKET MANUFACTURERS/WHOLESALE NURSERY HARDWOODS SUPPLIER SEEKING WORKING CAPITAL TO CONTINUE BUSINESS. | Mackenzie Nursery Supply, Inc. | 25 | 0 to 30 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|-------------------------------------|----------------|--------------------|---------------------------|
| Lake | New Jobs | This money would be used to create three new jobs within our company. If we are able to get this funding, we will be able to hire new talent to be able to make our software company, DesktopCCS, better and more advanced so that users would want to buy and upgrade. By hiring new talent to create more features, we are in essence stimulating the economy. We do not have the funds available at this time to be able to hire new people. We have only asked for \$25,000 because that is all we need to be able to hire new people to create new features for our software. Once we have the talent, the features, our customers would then upgrade or make an initial purchase in our software thus we would be able to fund the rest on our own. If you would like more information, please contact me at support@desktopccs.com or 808-782-2600. Thank you, Ivan Harris | DesktopCCS | 3 | 0 to 30 days | \$25,000 |
| Lake | home energy improvement | New windows, doors, insulation and furnace and other appliances to make my home more energy efficient. Believe if our company receives this stimulus money we can create 25 permanent full time well paying jobs. It would give us capital to improve our business and hire the employees we need. Our business has been in need of a cash infuse. If we get this money we will ultimately become a major news outlet in the new online age where the news is now read. We truly believe we can create the jobs and help stimulate the economy. Please contact us if you have further questions. We not only want to help ourselves, but others by creating jobs and spreading the economy. Check out our website to get and idea of what we are about. Another thing the money would do is help us upgrade our website at www.desktopccs.com | unselected home improvemnt business | 5 | 0 to 30 days | \$15,000 |
| Lake | The Lake County Sentinel Creates Jobs | My wife is disabled and has MS. My request is to have the bathroom area of our house, and the kitchen area of our house "handicapped accessible" and handicapped usable, by remodeling the current layout and transforming it into a more disabled-user-friendly area. This would improve the quality of life for her and increase her ability to use those vital areas of our home with greater ease. P.V. Energies Inc. seeks a vending company that due to economic conditions discontinued services in 2002. Should this application be approved, the funds would be used to purchase equipment, inventory and office supplies. This would generate three positions to start with more to follow as the company grows. The HUD program needs to be re-evaluated. We are currently about to be evicted from our home because of the way it is currently set up. Because my husband chooses to support the son from a previous marriage instead of being a dad that father family ends up suffering because HUD does not take into consideration the money that is removed from our income (\$128 weekly for NYS Child Support Order) but if it were the other way if we were to receive child support for my children if they were fathered by someone else HUD would care that as income in and rent would be increased. Because of this we are required to pay full amount of rent because my husband received a raise, barely got out over the limit and we were removed from HUD. After child support deduction and taxes we are lucky if we bring in \$100. How do you expect us to pay rent, utilities, bills and support our family with that. I would like to apply for part of the stimulus money to help my family to pay off the remainder of my husbands child support, to get us out of the hole we are now in, and pay off our debt so we can begin to work on a prosperous future for our children. | The Lake County Sentinel | 25 | 0 to 30 days | \$750,000 |
| Lake | Disability / retro-fitting current home | We are requesting funds due to need spending is considerably down and our business relies on the success of the repair and remodel retail establishments, mostly national retail stores. With retail doing so poorly we will be out of business. We are requesting the money so we do not have to send people to the unemployment office. We will be able also to survive for an extended period as we project the economy with the new stimulus plan to recover within a year to eighteen months. We surely hope you can help. | personal use | 2 | 0 to 30 days | \$25,000 |
| Lake | business expansion | Purchase of building currently empty, purchase of machines and business licensing, cage code application, initial payroll until cash flow begins. Estimated duration from start up to initial contract start 8 months. Will have an initial head count of only 50 employees with an additional 100 of 60 over the following 10 months. Current military solicitations in excess of \$800,000,000. Major new project manager has in depth understanding of solicitations and prime contractor responsibilities. | r.v. enterprises inc | 3 | 31 to 90 days | \$25,000 |
| Lake | Family Improvement | Motorports in OH: Enables 19 year old team driver that is laid off from full time job to continue with education in welding technology and motorports training for a period of 3 yrs. Welding education, casual labor and team marketing and advertising dollars to remain in Lake County. Additional education is located outside Lake County, some out of state. This project will require a marketing and advertising budget. The sponsorship money to assist with teams projected 36 races fees, memberships and travel expenses. Lake County businesses will be employed to print materials. Casual labor will include additional job member at times, technical support from local businesses and other team members. This project will enable the driver to secure employable skills needed for the motorports industry. Approx. 35% of request will be spent in 2008. | n/a | 0 | 0 to 30 days | \$100,000 |
| Lake | Keep business open | We are a middle class family living in a modest 3 bedroom house. I have been the sole wage earner for the 12 years we have been married. My wife and I decided back then that she would stay home and raise the kids. We now have 4 kids ranging in age from 1 to 13 and the noble idea of raising our kids in a home environment instead of a daycare, pre-school or daycare environment has served us well over the years but financially my career got on the line anyway. Last summer my wife came to me and said she was interested in starting a career as a Medical Assistant. She researched some area schools that offered classes in this field and signed up for classes starting in September. She is currently the top student in her class with a grade percentage of 97.8%. She will be finished with school this August and will join the work force in October. Her decision to do this will have a profound affect on our family as my two youngest children will have to spend time with babysitters. But this move is necessary just so we can stay afloat financially. The money I am requesting will help to pay off the two Stafford Loans we took out for her school that will come due later this year. Equipment and testing for Production of proprietary exhaust system that improves performance and fuel mileage on School Buses and Military vehicles. Would use up to 90% Ohio manufactured parts and suppliers. | Prism Contracting, Inc. | 5 | 0 to 30 days | \$100,000 |

| Lake | Ohio-Canada Ferry Service Impact Study | The City of Mentor along with the Villages of Grand River and Fairport Harbor have been discussing the feasibility of establishing a ferry service that would run from Canada to the Mentor area. This ferry service would greatly shorten the distance travelled for trucks transporting goods primarily automobile parts from Canada to the United States. This shorter distance would save fuel, reduce air pollution and shorten the road trip for these trucks. The port facility and ancillary development would provide a tremendous number of jobs to both Lake County and the surrounding area. The \$400,000 that is being requested will fund an impact study that will be essential in attracting the public and private funding that will be needed to make this project a reality. | City of Mentor | 2,000 | 91 to 180 days | \$400,000 |
| Lake | Phase 2 NPDES Stormwater Permit Management Portal | This application is directed towards new technology advancement. This will further develop a web portal for agencies participating in the Ohio NPDES MSA permit process within the Lake County Stormwater Management Department. Our goal is to ensure that our member communities meet the Federal National Pollution Discharge Elimination System requirements. This web portal will connect our member agencies to develop, maintain and coordinate mandated inventories, inspections, flow discharge investigations, construction inspections, best management practices, education, etc. in accordance with Ohio NPDES requirements. This will play for GIS software, software maintenance and customized programming. | Lake County GIS Department | 2 | 0 to 30 days | \$50,000 |

| Lake | Fairport Harbor WTP - Raw Water Intake Improvement | This project will replace the existing 20 inch Raw Water Intake Pipe constructed in 1936 with a New Intake Pipe and extend the New Intake Pipe further into Lake Erie to a more cost effective alternative. The extended pipe length will provide a sufficient and sustainable depth for the intake pipe eliminating the problems associated with the existing Intake Pipe being impacted by sand built-up caused by the construction of the pavement that. | Village of Fairport Harbor | 50 | 0 to 30 days | \$3,300,000 |
| Lake | St. Clair Street and High Street Resurfacing | This project will consist of the removal and replacement of existing asphalt/concrete pavement along St. Clair Street and approximately 1 mile of High Street. | Village of Fairport Harbor | 30 | 0 to 30 days | \$637,000 |
| Lake | ADA Curb Ramp Improvements | This project will remove and replace existing sidewalk ramps at street intersections with ADA Curb Ramps at all Non-Compliant Intersections in the Village. | Village of Fairport Harbor | 20 | 0 to 30 days | \$300,000 |
| Lake | Senior Center Expansion | This project will provide a 1,200 square foot expansion to the existing Senior Center for Exercise Equipment and Health Related Support Services. | Village of Fairport Harbor | 30 | 0 to 30 days | \$300,000 |
| Lake | roofing | 17 squares of roofing plus the labor | self | 2 | 31 to 90 days | \$3,500 |
| Lake | Business Based Mentoring | Small business owners who are in the manufacturing sector desire high performing employees who are ready to meet the challenges of tomorrow. These employees must be innovative leaders who have a wide variety of skills and the desire to provide valuable input for these businesses. Our business based mentoring program matches business leaders in the community with high school students to provide one on one real life education about the manufacturing sector. Students receive high school credit and work with their mentor to complete a business proposal from concept to marketing. The money will be used to create and maintain 60 business based matches. BBBS of NEO provides the oversight of the match and also helps train the community volunteer. High school leaders are responsible for identifying students for the program. | Big Brothers Big Sisters of Northeast Ohio | 50 | 0 to 30 days | \$50,000 |
| Lake | Demolition of Lake East Hospital | Through recognition of the child's potential and improvement of their lives we build a responsible, caring future generation. The demolition of a vacated downtown hospital building located on 6 acres of property which will provide a redemptive site to spur residential and commercial investment in conformance with an approved redevelopment plan. In October of 2009 Lake County, Ohio, the City of Painesville secured largest employer will replace their 100+ year old hospital for a new facility outside of the village. Over the last several years the community has prepared for this dramatic change through an aggressive economic development strategy and detailed downtown planning. The solution to this issue lies in the development with new vitality in the complete redevelopment of the site and the adjacent area which identifies the appropriate redevelopment of the site as residential to integrate and support the complete redevelopment and redevelopment on adjacent property. This demolition will result in over 28.5 million infrastructure investment and private development investment. Work would commence in November of 2009. | City Manager | 80 | 181 days or more | \$2,500,000 |
| Lake | NACL Solar Panel Manufacturing | North American Coating Laboratories is a 35 year old Ohio based business with 40 employees. We are certified to ISO 9001:2000 With Design standards. Currently we service customers in the automotive, military, display, consumer electronic, and medical fields, as well as maintaining a customer base in the cathodic markets. Over the past 5 years we have seen an increase in the amount of requests we have received for photovoltaic reflective coatings which are widely used in the solar energy industry. We have the ability to offer these coatings and have designed a few for use in small scale "green energy" applications. The issue we are facing is the capital expense of procuring a vacuum coating chamber capable of depositing photovoltaic coatings in a capacity that would be suitable for wide scale commercialization. Through the procurement of an in-line vacuum coating chamber capable of depositing photovoltaic coatings, North American Coating Laboratories would look to expand its existing customer base, as well as foster partnerships with local, national, and international solar panel manufacturers in order to provide a photovoltaic/solar panel coating service. | North American Coating Laboratories | 15 | 31 to 90 days | \$850,000 |
| Lake | Increasing Energy Conservation and Campus Security | Renovations to improve energy conservation and security including installation of a geothermal heating and cooling system, installation of sub-metering throughout campus, roof restoration, replacing outdoor lighting and signage, refurbishing parking lot and associated roadways, drainage improvement, flooring, and campus-wide surveillance equipment, automatic door locks and alarms. | Lakeland Community College | 60 | 91 to 180 days | \$3,550,000 |
| Lake | Greater Painesville City DBSA | The Greater Painesville DBSA, a faith-based mental health recovery and support agency in Lake Co., will hire and train up to 3 Certified Peer Support Recovery Specialists. These individuals would provide up to 80 hours per week of professional mental health recovery support and services for mental health consumers and families in Lake, Geauga and Ashland Counties, or about 2400 annually. A certified peer specialist can help to reduce the cost of mental health treatment by 15% over 3 years. The amount requested would provide training salaries and administrative cost for 18 months of services. This would improve the quality of lives for those living with persistent and acute mental health stability and create transitional employment opportunities for those achieving success in mental health recovery and treatment. | CROSS Outreach Ministries | 3 | 91 to 180 days | \$50,000 |
| Lake | Greater Painesville City Ohio Benefit Bank | The Greater Painesville City Ohio Benefit Bank is hosted by TERK/CROSS Outreach Ministries and HT Partnership for the Underserved. It currently has 3 banks in Lake Co. \$10,000 would help create a mobile 18x17 ft. unit able to travel around the in-county area providing Ohio Benefit Bank services for 5 clients at a time with 4-6 expanded internet access to areas with computers but without internet access. This would help gain up to \$1 million a year of federally funded assistance for eligible low and moderate income citizens. The balance of the funds would cover salaries and administrative cost for up to 3 FT employees for 18 months. | CROSS Outreach Ministries | 3 | 31 to 90 days | \$75,000 |
| Lake | Computer and Financial Literacy Program | The Computer and Financial Literacy Program would increase the existing training from 7:20 computers and software and higher 1 full-time instructor for 18 months and cover administrative cost for the program. Utilizing the Microsoft Unlimited Potential evidence based computer training program and the FDIC's Smart money financial literacy programs, students ranging in age from 16 to 94 learn 21st century technology skills and money management. Service would increase to 100 residents served a quarter. | TERKK/CROSS Outreach Ministries | 3 | 31 to 90 days | \$40,000 |
| Lake | Federal Gear Wind Energy Expansion | The project will allow Federal Gear to increase its capabilities and produce gears for the current wind energy markets and position Federal Gear to continue to grow and expand as the Wind Turbine Market grows in Ohio. The funds will be used to purchase and install new equipment and upgrade current equipment to facilitate the manufacturing of gears for wind turbines. The purchase would include new gear grinding capabilities and new CNC Grinding capabilities. Funds would also be used to upgrade current quality systems to insure compliance with Wind Turbine quality standards. New operators and engineers would be hired to support the new capabilities. | Tymoca Partners LLC, dba Federal Gear | 10 | 0 to 30 days | \$1,500,000 |
| Lake | Lean Marketing | Job creation for growing direct marketing company focused on demand generation and lean marketing for multiple industries. Expected outcome is to retain current 15 positions and add 10 additional positions as well as grow revenue for the company. | Lapis Business Solutions, Inc. | 25 | 0 to 30 days | \$250,000 |
| Lake | Lake County Crime Lab Digital Evidence Section Add | The Lake County Crime Laboratory is a full service, ASCLD/LAB accredited forensic laboratory founded in 1973. Funds would be used to create an addition to the lab to accommodate a new Digital Evidence (DE) Section of 2500 sq. ft., including directly connected lab analysis space, evidence storage vaults & office space. Two scientists would be hired & trained to perform the forensic evaluation of DE, including computers, cell phones, etc. The DE section would be accredited & the scientists would be certified to perform the analysis. The lab would provide essential services to the local Law Enforcement Community regarding child sexual exploitation, identity fraud, white collar crime, organized crime/gang, internet intrusion, drug trafficking, violent crimes, & terrorism. Currently, local law enforcement agencies must refer cases to the DE of CAJCT to analyze DE, which is the bottleneck in the process, often delaying prosecution. The project would encompass construction workers, two new scientists & an evidence technician. It would provide jobs for manufacturers of scientific instruments, building materials, & those who provide the DE training & certify the scientist. | Lake County Crime Laboratory | 50 | 91 to 180 days | \$900,000 |
| Lake | City Hall Renovations | Renovation of the 24,000 square foot city hall building built in 1960. The interior will be completely re-designed and re-built. The lighting systems, the heating and ventilation systems will be replaced with energy efficient components and equipment. The entrance will be renovated to improve access to the building for all citizens including handicapped. | City of Willoughby | 35 | 31 to 90 days | \$140,000 |
| Lake | Lake County Youth Employment Program | Catholic Charities Community Services of Lake County will provide Youth Employment Services to youth ages 18 - 24. The program will provide job readiness training and job placement services to youth. The goals of the service will be: 1. 80% of the applicants will attain job readiness skills (complete a job application, resume and 1 job interview). 2. 80% of the participants will obtain successful employment. The program will increase employability skills of youth who are experiencing barriers to employment. These barriers may include school dropout, substance abuse, mental health, self-abuse, children, etc. The program will teach job skills, provide job readiness training and job placement. Program staff will also work with the youth in providing job coaching to increase job retention. Youth will be actively recruited through high schools, the criminal justice system, colleges and universities. Following the assessment of strengths and barriers, an employability plan will be developed with each youth. Casework services will ensure that youth are placed in the proper work environment to help them attain a successful and sustaining employment experience. | Catholic Charities Community Services of Lake Coun | 22 | 181 days or more | \$212,426 |
| Lake | Heisley Road Widening | Heisley Road is a major north-south arterial roadway for the City of Mentor which connects a popular ballroom state park and a highway interchange (SR 2), it also homes to a number of Mentor's largest and most important employers and includes the Sherin Corporation's world headquarters. The City of Mentor has already spent considerable dollar dollars in widening and installing an overpass so as to improve traffic flow in this vital roadway. There are several proposed major developments that could benefit from this roadway that would create a significant number of jobs. Having completed the first 2 phases of the road improvement the City of Mentor is seeking funding for the third and final phase which will widen Heisley Road from 2 lanes to 4 lanes from Mentor Avenue (US 20) to Jackson Street. This final phase will remove the least traffic "bottleneck" throughout this area and allow for a smooth flow of traffic from Mentor Avenue to SR 2 and beyond to Headlands State Park. RV Enterprises Inc is an active but currently idle business in the state of Ohio. We would like to pursue a new venture in the independent film market in northeast Ohio. This venture will have immediate staffing needs of 50+ and will require significant start up costs in equipment, rental, editing and production of the finished product for distribution. We await further instructions on how to pursue this endeavor using the stimulus funds to be distributed in the State of Ohio. | City of Mentor | 400 | 91 to 180 days | \$5,000,000 |
| Lake | Independent film | RV Enterprises Inc is an active but currently idle business in the state of Ohio. We would like to pursue a new venture in the independent film market in northeast Ohio. This venture will have immediate staffing needs of 50+ and will require significant start up costs in equipment, rental, editing and production of the finished product for distribution. We await further instructions on how to pursue this endeavor using the stimulus funds to be distributed in the State of Ohio. | rv enterprises inc | 50 | 31 to 90 days | \$100,000 |
| Lake | Public Safety Communications Software Project | The City of Mentor is the largest City of Lake County with over 52,000 people. The City of Mentor has been hit hard by the economic crisis. The current public safety software was purchased in 1998 and has proven to be cumbersome and unreliable. It has not allowed for sharing of information between the police and fire departments. Accurate and complete information is required for emergency response as well as calls for service. This is necessary to insure the safety of emergency responders as well as the public. The upgrade is desperately needed in order to provide comprehensive real-time updates to emergency responders and eliminate duplication of records of the 911/988 records. This upgrade will provide for more reliable integrated dispatching and records management. It will also allow the City to take advantage of improvements in software and hardware implemented over the last decade and to bring the system into the 21st century. In addition to 988 square feet of existing building to include computer lab, state of the art meeting space with video conferencing capabilities and updated bathrooms. This addition and alterations to the facility will provide computer class space, venue for "Lights on After School" program (joint venture of City School system and library) as well as dedicated space for our library's early learning program, including school vans. Life long learning opportunities are a benefit. Plans are drawn, bid documents have been prepared. | City of Mentor Police Department | 5 | 0 to 30 days | \$600,000 |
| Lake | Addition and alterations to Wickliffe Public Libra | Plans are drawn, bid documents have been prepared. | Wickliffe Public Library | 25 | 31 to 90 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|-------------------------------------|----------------|--------------------|---------------------------|
| Lake | Regional Healthcare Workforce Development Project | Healthcare is one of the fastest growing employment sectors both nationally and locally and this trend is expected to continue. There is a parallel need to create an educated workforce to fill these positions. Currently, the need for healthcare workers continues to outpace supply. The purpose of this project is to 1) increase the number of skilled healthcare workers in Northeast Ohio; and 2) improve the quality of education to include skills of the current emerging medical professions. To accomplish this, Lakeland will fund 15 new faculty positions and 72 jobs in design, support and construction for Nursing, EMT/Paramedic, Biotechnology and Occupational Therapy education. This expansion will add 7 classrooms, 5 labs, 6 faculty offices and equipment. This project will result in an additional 71 skilled nurses, skilled health and medical administration professionals within the first five years of the project and 71 new students every year after. 15 new faculty positions and 72 jobs in design, support and construction. | Lakeland Community College | 144 | 181 days or more | \$5,000,000 |
| Lake | Center for Energy Education and Training | Lakeland Community College will renovate 6,500 sq. ft. of existing space and add 10,000 sq. ft. of new space for classrooms and labs and purchase equipment for education and training. Lakeland currently offers degrees in Applied Electricity, Civil Engineering Technology, Construction Management, Electronic Engineering Technology, Nuclear Engineering Technology, and Mechanical Engineering Technology. Lakeland will be revisiting, and developing new, curriculum to offer programs in renewable energy technology, power plant technology and energy management. Lakeland will also develop apprenticeships, stackable certificates and non-credit certificates in electrical maintenance, mechanical maintenance, instrumentation maintenance, RFPW (Radiation Protection/Health Physics) technician, and automation education. Certificates will include LEED, HVAC, Energy Management, Solar Thermal Installer, PV (Photovoltaic) Installer, Green Building Engineer, and GreenHome Installer. An estimated 112 jobs will be created or retained by this project. | Lakeland Community College | 112 | 181 days or more | \$2,000,000 |
| Lake | Traffic Signalization | New stop detectors, controllers, signal heads, mast arms and poles and emergency vehicle pre-emption system at 16 intersections in the City. ADA ramps and pedestrian crosswalk signals are also included. Project will result in increased fuel efficiency of vehicles, improve local air quality, and improved public safety within City limits. | City of Willowick | 20 | 91 to 180 days | \$1,432,000 |
| Lake | Technology Building Renovation and Expansion | Increase the number of technology classrooms and program support offices by enclosing 6,500 sq. ft. of open space on the first floor of an existing building and renovating 11,500 sq. ft. of adjacent second floor space. This project will add 8 classrooms, program support space and faculty offices. It will also include Lakeland to upgrade its network server capacity and capability. This renovation and expansion will result in an additional 1,000 students taking technology classes each semester and an estimated 150 additional graduates in four years. As a result, 120 students with technology skills will be created or retain jobs, 27 paramedic faculty positions will be created and 60 jobs will be created in design, planning, support and construction. | Lakeland Community College | 207 | 181 days or more | \$4,800,000 |
| Lake | Public Safety Communications Infrastructure | The City of Mentor is the largest city in Lake County with over 52,000 people. The City of Mentor has been hit hard by the economic crisis. The current public broadband that is available to the City is inconsistent and unreliable. Having Lake Erie to our north and limited towers inland, public broadband services has been extremely unreliable. Due to the connectivity problems, police and the fire department do not receive real time data when responding to emergencies. Approval of this funding will allow us to develop our own broadband WiFi network for use by the public safety services of the City. This would provide a reliable, unencumbered pathway for the distribution of electronic data. At this time the City does not have the funding to update and fix the services. | Mentor Police Department | 10 | 0 to 30 days | \$1,100,000 |
| Lake | Powdercoating Line | purchase a high efficiency compressed powder coating line meeting improved production, high quality standards and improving the coating environmental conditions for the medical industry. This project will hire 20-30 employees, 15-20 will be from state sponsored handicapped individuals from Deepwood and the Metzerbaum (Shelton) industries organizations. | U.S.Powder Coating of Ohio, Inc. | 28 | 0 to 30 days | \$250,000 |
| Lake | Wheel Chair Lift Master | This funding will allow level of employees to be hired and add 20 new employees for a total of 30 employees. Some of these employees will be hired from state sponsored handicapped individuals from the Deepwood and the Metzerbaum (Shelton) industries organizations. The goal is to complete the design, development and manufacturing of a new product to assist the wheel chair bound veterans and others to lift them out of the wheel chair with very little effort and to be carried when traveling, a prototype has been built and is currently in use with a family friend. A 100 lb woman could lift a 250 lb man out of the chair with very little effort. This product is designed for production in a short time table. | NuFab, Inc. | 30 | 31 to 90 days | \$550,000 |
| Lake | SR283 Slide Repair | Remove and replace highway embankment and replace existing culvert. | City of Eastlake | 20 | 181 days or more | \$800,000 |
| Lake | Eastlake Signal Upgrade | Traffic Signal Improvements along SR81, SR840 and SR283. Engineering Plans completed. Ready for construction. | City of Eastlake | 20 | 0 to 30 days | \$600,000 |
| Lake | Eastlake/Chagrin River | The City of Eastlake enjoys river access to Lake Erie. Unfortunately, due to the lack of shoreline protection there is a very limited, safe public access to the water. The Lake County Coastal Development Plan calls for offshore barrier islands for the nearly 1,000 recreational boats in the area. The State of Ohio has provided \$200,000 for this project in the 2008 Capital Bill. The Lake County Port Authority is seeking \$3,000,000 to complete the project. | Lake County Port Authority | 200 | 181 days or more | \$9,000,000 |
| Lake | Madison Township Park | It is estimated that the lake front improvements will leverage an additional \$60,000,000 in private investment and the creation of an estimated 200 jobs. | Lake County Port Authority | 60 | 181 days or more | \$780,000 |
| Lake | Perry Township Park | Madison Township Park, a 12 acre park with 660 feet of lake frontage, is an area where coastal erosion and boating access has been identified for mitigation. Offshore barriers will eliminate much of the erosion and allow for beach nourishment and safe harbor access. The State of Ohio has provided \$200,000 in 2008 Capital Bill. The Lake County Port Authority is requesting an additional \$4,000,000 to complete the construction of the site. | Lake County Port Authority | 0 | 181 days or more | \$4,500,000 |
| Lake | Mentor/Mentor on the Lake Offshore Barrier Protect | The Lake County Coastal Development Plan identified the Perry Township Park, consisting of 50 acres and over 2000 feet of lake frontage as an area of concern. This shoreline is predominantly a steep bluff exposed to erosion, making waterfront access difficult. The Coastal Plan calls for offshore protection and slope stabilization as the best means of addressing the erosion and access issues. The State of Ohio has provided \$200,000 through the 2008 Capital Bill. The Lake County Port Authority is seeking an additional \$4,000,000 to complete the construction of the site. | Lake County Port Authority | 32 | 181 days or more | \$3,750,000 |
| Lake | Engineer's Salt Dome | The Lake County Coastal Development Plan has identified Mentor/Mentor on the Lake Harbor as a priority development site within the County. This project would repair the harbor's make channel and provide offshore protection to mitigate both shoreline erosion and provide safe access for the 800 recreational craft using harbor facilities. The \$2.75 million will supplement the \$400,000 already provided by the State of Ohio in the 2008 Capital Budget. The \$4.15 million investment will leverage an estimated \$11 million in new investment in and around the harbor facilities. | Lake County | 14.3 | 31 to 90 days | \$300,000 |
| Lake | Hilltop Growing Center | Two call center for storage. Renovate building, purchase vehicles to transport handicapped. Create a work training program for unemployed handicapped individuals. Employee work training specialists to train these individuals and meet their special needs. | Hilltop Adult Group Home Inc. | 25 | 0 to 30 days | \$1,100,000 |
| Lake | Route 20 widening | As a regional project, we would like to include Route 20 in Palmsville Twp, Madison Twp, and Perry Twp. This project would widen and add turn lanes where needed from the Route 20 and Route 5 Split to County Line Road in Madison Township. This project would benefit the people on the Eastern part of Lake County. It would allow for commercial and industrial development in this area including adding jobs. This project has received many estimates and engineering work but has always been held back to due funding. | Perry Township | 250 | 181 days or more | \$4,000,000 |
| Lake | Roads and culvert replacement due to floods | The Township had damage to many roads and culverts due to the flood of 2006. Cement stabilization and new asphalt will be required to repair the roads. | Perry Township | 130 | 181 days or more | \$1,200,000 |
| Lake | Route 20/Shepard Road sewer lines | The project would include installing sewer lines in the industrial/commercial districts in the Township. These sewer lines would help to preserve the area with the possibility of creating five hundred jobs. This would also serve approximately 200 existing residential property. | Perry Township | 570 | 91 to 180 days | \$2,800,000 |
| Lake | Intersection Improvements - Ohio Street/Perry Park | The project would move the Ohio Street and U.S. Route 20 intersection to be directly across from Perry Park Road at US Route 20. This will include adding a traffic light at this location. This is a heavy traffic area on US Route 20 and we need to improve traffic flow. | Perry Township | 30 | 181 days or more | \$1,000,000 |
| Lake | Marina Dock Wall Repairs | In 1998 the City of Mentor purchased 800 acres of property on the Lake Erie shoreline in an effort to maintain beautiful green space. A portion of this property is a Marina with 450 +/- slips. The City has been successfully operating this marina since the time of purchase. Much of the marina's infrastructure, however, is 70+ years old and badly in need of replacement. The City has been slowly replacing deteriorating bulkheads and piers funding has been permitting. Presently, there is a dramatic need to replace 800' of bulkhead at a cost of approximately \$300,000. | City of Mentor | 0 | 31 to 90 days | \$300,000 |
| Lake | Baldwin Road Repair and Resurfacing | 15000 linear feet of roadway repair and resurfacing. These funds will be used by the City of Mentor to resurface a number of asphalt residential streets and to perform localized concrete repairs throughout the City. Stagnant and declining income tax revenues combined with large price increases for asphalt and concrete have combined over the past few years to greatly reduce the City's budget of general road repairs. This has a negative impact on the City as a whole both from a residential and commercial standpoint. | Village of Kirtland Hills | 60 | 31 to 90 days | \$1,200,000 |
| Lake | General Road Repairs | These funds will be used by the City of Mentor to resurface a number of asphalt residential streets and to perform localized concrete repairs throughout the City. Stagnant and declining income tax revenues combined with large price increases for asphalt and concrete have combined over the past few years to greatly reduce the City's budget of general road repairs. This has a negative impact on the City as a whole both from a residential and commercial standpoint. | City of Mentor | 0 | 31 to 90 days | \$1,000,000 |
| Lake | Center Street Bridge Improvement | The Center Street (SR 615) bridge over the C&D railroad tracks is experiencing considerable decay to the abutment and parapet walls. Not only is this decay affecting the bridge's structural integrity, it is also causing considerable deterioration to the surrounding area. These funds will be used to remove and replace the sections of failed concrete and reinforcing bar and to replace the remaining concrete surface. | City of Mentor | 0 | 31 to 90 days | \$350,000 |
| Lake | Tyler Boulevard Resurfacing | This section of 4 lane roadway, which is on the federal aid system, was rated in the "poor" category during a 2006 pavement condition rating performed by our local Metropolitan Planning Organization (MPO), the Northeast Ohio Areawide Coordinating Agency (NOACA). | City of Mentor | 10 | 31 to 90 days | \$3,000,000 |
| Lake | Bacon Rd Water Plant Upgrade & Expansion | Approximately 3 mile section of roadway is home to a large number of Mentor's industrial and commercial entities and is also a major connector between State Routes 306 and 615. Funds are being requested to perform an asphalt overlay over the existing concrete surface. The asphalt surface will be easier for the City to maintain and resurface in the future. | Lake County Department of Utilities | 50 | 91 to 180 days | \$1,000,000 |
| Lake | Plains Road Widening | The Bacon Road Water Treatment Plant treats six million gallons a day and is located on the shores of Lake Erie. The plant has exceeded plant capacity on occasion. Both the Ohio EPA and the Lake County Utilities Department desire a plant upgrade to nine million a day. This upgrade will improve service to the entire east end of the County. In addition, the proposed improvements will allow Lake County to prepare for future increase in demand and growth in population and industry. | City of Mentor | 10 | 31 to 90 days | \$670,000 |
| Lake | PROBATE COURT SECURITY IMPROVEMENT | This project will allow for the widening and resurfacing of Plains Road (approximately 1/2 mile) from Hopkins Road to the Mentor-on-the-Lake Corporation line. This widening will support the installation of 2 1/2 paved bike lanes in accordance with the City of Mentor's master bike plan. This project will also be for the widening of the roadway which serves as a connector between these two main thoroughfares. The proposed bike paths will allow for a safer connection between several large subdivisions and existing bike paths and sidewalks. Presently, there are no sidewalks on either side of the road. As recommended by the Office of Court Security of the Supreme Court of Ohio, Lake County Probate Court must take appropriate steps to ensure the safety of our employees through the installation of protective barriers in three departments of the West Avenue Building. The first step is to have approximately 300 linear feet of ballistic-resistant bullet proof glass installed in the main entrance lobby, the highest percentage of weapons in the county are confiscated at this entrance), the marriage department lobby, and accounts department lobby. A minimum of 10 linear feet of glass-through speakers for the cover of our courtrooms. Renovation of existing walls and door areas will be necessary to ensure a secure area for the sheriff deputy providing security. Probate Court has received budget price quotes, although, a bidding process will be necessary to secure project contractors. The outcome of this project will achieve an appropriate balance between access to the court facilities and public safety as mandated by the Ohio Supreme Court, prevention of potential tragedies, as well as the creation and retention of work and employment for local contractors. | LAKE COUNTY PROBATE COURT | 50 | 31 to 90 days | \$65,000 |
| Lake | Plaza Boulevard Extension | This project will extend a connector street approximately 1,500 feet north of Mentor Avenue (US 20) to connect with Tyler Boulevard, which is a major 4 lane roadway. This connection will 1) provide a vital link between these two major roadways that will greatly ease traffic congestion throughout the entire region 2) will increase opportunities for economic development and job retention and 3) will improve emergency vehicle response time to the point that the City can put off constructing a costly fifth freeway. The City of Mentor has already spent a number of years and millions of dollars securing the right from both C&D and Norfolk Southern to install a 3-grade crossing as part of this project. The City also constructed a portion of this roadway in anticipation of ultimately completing this project. These funds will be used to purchase property and complete this roadway extension. | City of Mentor | 200 | 181 days or more | \$2,600,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Lake | Heisley Road Widening | Heisley Road is a major north-south road arterial roadway that connects US 20 (Mentor Avenue) on the south to Headlands State Park to the north and in between there is an interchange with ER 2. Heisley Road is also home to a number of Mentor's largest employers, including the Blue Corporation's World Headquarters. The City has already spent considerable dollar dollars improving other sections of Heisley Road through widening and installing a railroad overpass. The economic development impact of Heisley Road is great enough that the Ohio Department of Development continues funding to the security completed phase 2 of this project. Currently, there are several possible major developments that may occur along Heisley Road once traffic completion are finished. Presently, funds are being requested to widen this approximately 3/4 mile stretch of Heisley Road from 2 lanes to 4 lanes between US 20 (Mentor Avenue) and Jackson Street. This section of roadway currently carries approximately 20,000 vehicles per day. The smooth flow of traffic through the major commercial and industrial jobs creation and retention. New equipment in place to offer the developers of fuel cells a quick and affordable method for manufacturing Opening three services in the funeral industry. The first for funeral directors is a "bank funeral director". Existing funeral homes when additional directors are needed in a pinch or to assist while vacations are needed. The second is to run funeral services out of my home, offering budget conscious consumers in difficult times while increasing business in local homes throughout Greater Cleveland. The third is to consult with smaller funeral homes on new techniques for funeral service, marketing and requirements of the FTC, Ohio Board of Funeral Directors and Embalmers. Being a technology firm to northeast Ohio with a worldwide market. Technology supports the retail banking industry, with potential to move to east part of state in the future. | City of Mentor | 400 | 91 to 180 days | \$5,000,000 |
| Lake | Hydrogen Fuel Cell Manufacturing | New equipment in place to offer the developers of fuel cells a quick and affordable method for manufacturing Opening three services in the funeral industry. The first for funeral directors is a "bank funeral director". Existing funeral homes when additional directors are needed in a pinch or to assist while vacations are needed. | Lake | Lake West Access Project | The Family Planning Association of Northeast Ohio, Inc. (FPA) provides reproductive healthcare services to low-income, indigent individuals, has done so for 30 years. The FPA's Lake County site has always been situated in Painesville. Both proximity & poverty (italy contribute to the concentration of Lake County cases from the Painesville area, but minimal public transportation also has an impact. We propose establishing additional full service clinic site in western Lake County. The new site would draw clients from western Lake County, but also from surrounding areas in northwest Geauga County. The FPA is the only provider of subsidized reproductive healthcare in Lake, Ashland, and Geauga Counties. The FPA receives Title X family planning funds and would utilize some of these funds to support administrative costs as well as ongoing operations of the clinic once it's up and running. Establishing this site would enable us to generate 3 FTEs of new staff to provide the clinic. We anticipate providing 1500 clinical visits at this new site during the first year of operations. This project will construct a 12 acre storm water detention basin to limit peak flows into the Two Town Ditch and provide a secondary for residential property downstream. | Family Planning Association of Northeast Ohio, Inc | 3 | 31 to 90 days | \$255,000 |

| Lake | Infrared Heater | Re-development of a commercial infrared heater which will not require any external electrical power. Heating of residential gas or Propane gas. Inefficient power failures or complete backlogs will not affect the heating ability of the heater. Panels are independent of any outside power sources, so that heat continues to heat the area. The heater is designed to be independent of any outside power source and 50% of gas over ocean boiler heating systems. Re-hiring of employees in addition to using 1500 employees from the state sponsored handicapped individuals from (Deerwood and the Metabornum Ethanol Industries) organizations. The Garfield Pool is a 60+ year old structure. Most of the equipment is original including the heat source. Upgrades to the mechanicals to use today's technologically improved equipment and to use passive solar and solar panels to heat the pool and showers. Upgrades in plumbing and drains to maximize the energy efficiency of this facility. Add a indoor Therapy Pool to the existing Senior Center. The pool would serve as a part of the wellness opportunities for the local senior population. The construction of the pool will use the best available green building materials and techniques. Currently have 10 Solar Concentrators under construction that produce heat as well as power. The plan will be to run the heat tubes under the flooring or to the pool as a supplemental heat source. | Panelloc, Inc. | 25 | 31 to 90 days | \$450,000 |

The Power (PHEV) 100% conversion to new energy technology is the energy into manufacture use the up-to-date power source (electric charging) and interesting device that changes these vehicles. In anticipation of this growing market, we have been cultivating relationships with potential customers and vendors since summer of 2008 and are currently in process designing and prototyping these power cords. The current estimate to develop this product for the consumer vehicle market is approximately \$680,000 over a 2-year period beginning April, 2009 through December, 2010. It includes: Component Tooling - \$150k Production Tooling - \$25k Engineering - \$25k R&D - \$10k Total - \$680k(see below detail) Grant disbursement spending timeline: Ph-1 - Low Volume EV Production 6/1-08 - \$50k 7/1-09 - \$40k 10/1-09 - \$70k 1/1-10 - \$130k Ph-1 Total - \$290k | North Shore Safety, Ltd. | 50 | 0 to 30 days | \$680,000 |
| Lake | Painesville I & I Project | The City of Painesville has conducted analysis of the sanitary sewer system and has identified 70 location of inflow and infiltration (I & I) of storm water into the sanitary collection system. This I & I has increased flow in the Water Pollution Control Plant and increased the cost of the city recently has received a WPCF loan for major equipment replacement and upgrades at the plant. We have committed to eliminate the I & I in the system as part of that commitment. Fire Station #3 is in need of remodeling to adapt to ADA and gender differences since the time the original building was built. The Fire Station is currently slated to make use of solar in an active and positive manner. This remodeling would include green building materials and techniques to create a demonstration model for the city residents. Replace all windows in the 35+ year old Civic Center building Replace lighting in all city facilities with new energy efficient lighting. This will include all buildings, offices, community centers, ice arena, parking lot, security lighting, athletic fields. Purchase replacement vehicles for use by city personnel that are environmentally friendly. The vehicles are used by the engineers, inspectors and administration on a daily basis. This project would support the replacement of antiquated HVAC systems for City Hall, Police Department, Court and Ice Arena. The current systems are 30+ in the Civic Center and almost 50 years old at the Ice Arena. | City of Painesville | 20 | 181 days or more | \$700,000 |

| Lake | Camp Stigwandish Grey Water Project | Installation of an Ohio EPA approved wastewater treatment system at Scout Camp Dining Hall. Point of discharge will be to a drip irrigation field consisting of three zones capable of treating 700 GPD. The system will consist of a 500 gallon grease trap followed by two 1500 gallon septic tanks, a 3,000 gallon drip zone above tank and a central hydraulic unit with a panel control. The 3,000 gallon drip zone above tank will be installed ahead of a central hydraulic unit, equipped with 2 pumps to dose the drip irrigation field. The tank is capable of storing treated wastewater generated by the dining hall through the week. The drip irrigation field will consist of 3 zones. Each zone will consist of 1,000 head feet of tubing, each zone will be dosed with individual zone of undisturbed land for disposition. Outcomes are the elimination of direct surface water discharge in the Grand River basin. All permits are in place with full design and plans ready for installation | Greater Western Reserve Council Boy Scouts of Amer | 2 | 31 to 90 days | \$90,000 |
| Lake | Fairport Harbor WTP - Raw Water Intake Improvement | This project will replace the existing 20 inch Raw Water Intake Pipe constructed in 1936 with a New Intake Pipe and extend the New Intake Pipe further into Lake Erie on a more cost effective alternative. The extended pipe length will provide a sufficient and sustainable depth for the Intake Pipe eliminating the problems associated with the existing Intake Pipe being impacted by sand build-up caused by the construction of the Sycamore trail. Innoventus Inc. is currently developing an advanced conductive material to be used in the alternative energy sector, specifically fuel cells and rebus systems. One major problem affecting the industry is that the current materials used only last about 10,000 hours before needing replaced. This is very expensive and is hindering the advancement of the industry. Innoventus Inc. new material has a life expectancy of 50,000 to 100,000 hours. This material also reduces manufacturing costs dramatically. This cost reduction allows for additional job creation. Innoventus Inc. is the only licensed supplier of this material and will use it in the conductive plates we manufacture for our current customer base. It will also enable us to capture customers that have been working with other suppliers in the past. Final cell shipments will exceed 5 million units per year by 2013 according to Fuel Cell Today's latest Industry Review. Fuel Cells: Emerging Markets. The Review reports that 2008 saw shipments of 18,000 units mainly in the portable and stationary sectors. Funds would be used to purchase tools and equipment for the department and also for individual officers, for responding to, preventing and training for acts of school violence. This may be an active shooter, bomb threat or other incident of that nature. Officers would be equip with entry tools such as halogens, sledge hammers, ect. to open barricaded doors. Officers would also be equip with military style bullet proof vests, medical kits, thermal or night vision equipment. Funds would be used to purchase four Automated External Defibrillators (AEDs). One would be placed in each of the department's patrol vehicles. The fourth would be kept at the police station for use at that location. | Village of Fairport Harbor | 50 | 0 to 30 days | \$3,300,000 |

One would be placed in each of the department's patrol vehicles. The fourth would be kept at the police station for use at that location. A Raw Material Resource Utilization System will allow energy producers, industrial products, and steel producers to better utilize raw materials and maximize supply chain efficiency. The system will focus on the chemical requirements of the production process and match those requirements with the available suppliers and materials to best match raw material supply. This will turn make the supply chain and production cycle more efficient, ultimately improving transportation and production efficiency. All of the systems development, management, and ongoing procurement can be performed in Ohio. A small team must be constructed with potential for significant job growth once the system is fully developed. The proposed business model has the ability to drive efficiency for Ohio's energy producers, the manufacturers of industrial products, as well as integrated steel production. Electric Coke requires a production level of coal (quantity), if the proper coal is purchased and transported, it produces better coke (less energy to produce) which in turn is used to produce steel. Better Coke improves efficiency and energy utilization to produce steel. Significant Dev | Castalia Logistics | 5 | 0 to 30 days | \$1,329,253 |

| Lake | Vessel Ballast & Grey Water Control & Discharge Mi | Establish a facility to manufacture, assemble & install a proprietary system to dispose of bilge water and grey water sumps contained on vessels operating in the Great Lakes. Installation of this system will result in zero discharge over the side of the vessel for any of the covered commodities. This technology will provide a new level of best available control equipment to the market place which will allow Ohio to formulate modifications to its Section 401 Certification under the Clean Water Act. Development of this technology within Ohio will provide jobs and result in far-revenue increases covering a technology which would otherwise be developed outside of Ohio. If successful, the jobs growth can be substantial as the market, which is believed to extend well beyond the Great Lakes, is developed. | PM Lake Services Company | 15 | 0 to 30 days | \$2,000,000 |
| Lake | Kirtland Road Sanitary Replacement Sewer | A 1500' line of replacement sewer 12 inches in diameter including 15 manholes. The purpose of the project is to relieve a section of overloaded sewer. | City of Willoughby | 10 | 31 to 90 days | \$535,700 |
| Lake | City of Painesville Water Plant In take | One of the lines (a 24 inch diameter steel pipe) was constructed approximately 1913 and has an intake crib structure. The other line (a 36 inch diameter concrete pipe) was constructed approximately 1952 and does not have an intake crib structure. The age and condition, inlet closeness to the shore, shallow inlet depth, and lack of an intake crib on one of the lines, all contribute to O&M and water quality difficulties for the City of Painesville. | City of Painesville | 100 | 181 days or more | \$10,000,000 |
| Lake | Recreation Park Slope Stabilization | Kirtland's north recreation park has experienced two (2) slope failures that have endangered the ball fields. The exposed soil in the slope has eroded and is impairing water quality in the Chagrin River, a state scenic river. | City of Kirtland | 8 | 91 to 180 days | \$320,000 |
| Lake | E. 330th St. Waterline Replacement | Replace 3000' LF of 48" 8 inch CI waterline along E. 330th St. including appurtenances such as hydrants, service connections, main line valves, push close, gate valves, curb, sidewalk and treatment restoration. Project will improve fire flow capacity as well as routine water service (flow and pressure) to approximately 1200 homes in the City. | City of Willowick | 20 | 91 to 180 days | \$2,500,000 |
| Lake | Lake Shore Blvd. Interceptor Improvements | Clean and televis 5700' LF of 30 inch brick sanitary sewer and 5700' LF of 15 inch VCP sewer along Lake Shore Blvd. Implement point repairs for observed structural damage in pipe or manholes. Grout joints or slip-line pipe sections to reduce infiltration. Reducing I/I will result in lower sewer payments to the City of Euclid and free up capacity needed for future wastewater development into residential and commercial space in accordance with the City's Economic Development Plan. | City of Willowick | 100 | 91 to 180 days | \$2,000,000 |
| Lake | New Construction (Building Addition) | This project entails constructing a 9500 sq foot building addition. A separate location will be closed to house the entire contract under one roof. The new addition will be constructed using energy efficient lighting, energy efficient windows, the most cost efficient insulation for metal wall & ceiling along with a blown in insulation foam for the masonry block. These factors of the project will enable us to save on our future Gas & Electrical bills where the previous location was terribly inefficient. The current facility we are in pays half of what the soon to be closed facility does in the way of electrical & gas and this current facility is almost double the size. | Spee-D-Metals, Inc. | 4 | 0 to 30 days | \$153,000 |
| Lake | N. LSB/Glen Arden Sanitary Sewer Replacement | Project involves replacement of approximately 1000' LF of sanitary sewer and replacement of approximately 1000' LF of storm sewer along the north side of Lake Shore Blvd. Project includes current trenchment manholes sewer shafts, dual to age and poor condition is allowed to be replaced into Lake Erie. Project also includes approximately 1400' LF of deeper storm sewer along Arden Dr. to eliminate debris from the storm sewer at 41 private properties. | City of Willowick | 20 | 0 to 30 days | \$1,400,000 |
| Lake | Lake Erie Walking Trails | The project will construct over 15 miles of public walking/biking trails - along the Grand River and Lake Erie waterways. | Painesville Township (Lake County) | 384 | 91 to 180 days | \$5,000,000 |
| Lake | Lakeview Bluffs: Potable Water System Improvement | The public trails will be of asphalt construction - and able for the loop connection to existing Lake Metroparks walking paths. | Painesville Township (Lake County) | 364 | 91 to 180 days | \$3,500,000 |
| Lake | Climatic variation and soil nutrient loss from for | This project will extend a new waterline and increase the size of the existing waterline from the Lake County Water Plant through Painesville Township, as well as the Village of Painesville. The waterline will enable the development of the Lakeview Bluffs project (with currently over \$50 M already approved) and add development along the waterline path. | The Holden Arboretum | 2 | 0 to 30 days | \$425,600 |
| Lake | Surveillance Equipment Upgrades | We propose a three year research project on how climate variability affects the loss of soil nutrients from forests. Loss of nutrients from forests can have effects on water quality in receiving streams and ultimately on the health of Lake Erie and the Great Lakes. We will establish a series of 8 micro-meteorological stations within 2 forested watersheds at the Holden Arboretum in Northeast Ohio. Basic climate data will be monitored using remote data logging instruments, and water and soil samples will be collected from high quality watersheds and adjoining forests every week for 3 years. Basic water quality parameters (DO, BOD, N, P) will be measured and cutting edge DNA-based techniques will be used to link climate related quality to stream microbial patterns and soil microorganisms that regulate nutrient loss. Data collected will be published in scientific journals, and made available to the scientific and local community through our website and publication. Project will employ Postdoctoral researchers and further their scientific training and education through relationship with Case Western Reserve University. | Lake County Sheriff's Office | 0 | 0 to 30 days | \$75,000 |
| Lake | Create 2 Jobs | Funding is requested to upgrade and enhance our current covert operation equipment with the addition of GPS trackers, Video imaging recording equipment, transceiver equipment. This equipment would expand our capability to do drug enforcement operations. | Corvette Motorsports of Cleveland, Inc. | 2 | 31 to 90 days | \$50,000 |
| Lake | River Wood Way Sedimentation Pond | Create 2 new service bays in existing business, add service equipment needed, create 2 new jobs in the automotive technician field utilizing 1 year of experienced technician and 1 new entry level technician. New technician will be recent trade school graduate entering the workforce of automotive. Qualified new vehicle (already identified and manufactured). 20% of the money will be used to purchase new and used equipment to create new service bays and provide additional service bays to existing customers. 70% of the funds will be used to pay for 2 new employee salaries and associated costs incurred with new job creation. | City of Kirtland | 8 | 91 to 180 days | \$210,000 |
| Lake | Expand the current Sexual Predator Registration Mo | ever flood they receives drainage from two (2) existing basins. Sand and silt that does not settle out in Kirtland's storm flows to the East Branch of the Chagrin River, a state scenic river. The proposed project would construct a sedimentation basin that would trap the sand and silt, periodic removal by City forces. | Lake County Sheriff's Office | 1 | 31 to 90 days | \$150,000 |
| Lake | Expand the multi-jurisdictional fugitive warrant a | The current program has worked well. However, the number of sexual predators needing tracked, and the expanding demand on public education and operating sexual predator's arrest programs has exceeded our ability to adequately fund such programs. The additional of one full time officer to assist in this endeavor is needed. | Lake County Sheriff's Office | 4 | 0 to 30 days | \$150,000 |
| Lake | Replace over a four year period the aging Sheriff | The current program has worked well. As it has developed, many local law enforcement agencies in Lake County have joined the effort and reaped the benefits. However, current funding reductions has reduced the ability for law enforcement to spare the labor resources to continue the effectiveness of this program. By enlisting experienced labor resources this program will save dangerous criminal offenders and drug dealers of the street and increase the safety and security of all communities in Lake County. | Lake County Sheriff's Office | 5 | 31 to 90 days | \$1,200,000 |
| Lake | Create a Mental Health team to monitor locally men | Short term this can be managed. Long term the significant financial impact of maintenance and replacement over the long term will be far greater on an entry team if it means every meeting is necessary to present or present to security in order to maintain the safety and security of the community at large. Further, to assist in collaborative effort between local mental health courts, mental health centers, and correctional systems to facilitate the return of mentally ill offenders into the community after their release by connecting them with treatment centers. Facilitating access to needed psychiatric medication funding, and insuring their success in not returning to the Correctional system. Discussion: Currently there are 30% more mentally ill people in our jails and prisons than there are in our mental hospitals. Cost funding and reduced program has significantly reduced the space available to effectively house and treat the mentally ill. This means mentally ill offenders end up in correctional facilities who are ill equipped to treat such illness. By developing a local mental health teams we could help insure their successful return to the community. | Lake County Sheriff's Office | 3 | 31 to 90 days | \$300,000 |
| Lake | Provide Regional dispatch capabilities to all poi | All local law enforcement and the agencies are faced with the shrinking funding to maintain dispatch centers and stay in pace with an ever changing technology of software and hardware. By using stimulus funding such a Regional Dispatch center would work well in conjunction with the stimulus funding already being sought by telecommunications for the radio system, and reduce the cost of labor and equipment for local law enforcement. This effort would include records management systems for area law enforcement. This is a five (5) year anticipated project. | Lake County Sheriff's Office | 15 | 181 days or more | \$29,000,000 |
| Lake | Develop a Tri-County regional special weapons tact | While we recognize the need for Special Response Weapons and Tactics teams in today's volatile law enforcement environment, the duplication of services (inappropriate, equipment, training) versus the time the teams are active is disproportionate. Sound labor and fiscal management demands a pooling of resources and funding. By working with Suburban and Geauga County Sheriff's Office we would be able to reduce the manpower and labor costs to each Office, and reduce the investment in equipment and maintenance. This can be beneficial to law enforcement in the Tri-County area by reducing the need for them to maintain similar teams, while reducing Federal funding for too many law enforcement system of over-stretched teams. Additional funding is needed for training, equipment, and a transportation vehicle to enhance the team's capabilities to a level 1 team, short of being a full time SWAT Team. | Lake County Sheriff's Office | 2 | 0 to 30 days | \$600,000 |
| Lake | Design and develop a regional multi-county firearm | All law enforcement agencies are faced with the shrinking space availability to support firearms ranges. Many are being forced to travel significant distances, at increased cost to operational budgets, to access such facilities. Such accessible facilities are limited or unable to meet the needed functionality. Through stimulus funding we would construct a state of the art facility that can be used by all Lake County Law Enforcement, under the supervision of the Sheriff's Office, and fund its operational labor costs through the COP's grant. This has the ability to service a Tri-County area. | Lake County Sheriff's Office | 6 | 91 to 180 days | \$10,000,000 |
| Lake | Create a multi-regional drug interdiction program | This will apply to the east end of Lake County, and the western part of Ashland County, making use as well of HETA and other Federal law enforcement agencies. It is well established through Lake and Ashland counties service as a preferred route to move drugs and money throughout the Midwest region of the United States. By using stimulus funding the creation of such a program could significantly impact the drug trade, increase the safety and security of the community, and offer significant monies to offset operational costs from money and vehicles confiscated. | Lake County Sheriff's Office | 7 | 31 to 90 days | \$1,000,000 |
| Lake | Regional Computer Forensic Lab | In conjunction with the Lake County Prosecutor's Office and all area law enforcement agencies expand the current Crime Lab to better address the area of Forensic Computer Science to allow local law enforcement to better solve computer related crimes, keeping in on child sexual exploitation crimes. This is a significant need for additional technicians in this field. Expenses (are any) would be incurred at any time when this area of criminality is expanding exponentially. Further, current technology and equipment available, as well as current work space cannot adequately support the needed law enforcement response. Such increased ability will be an aid not only to Lake County law enforcement, but to the greater Tri-County Region as well. | Lake County Sheriff's Office | 5 | 91 to 180 days | \$3,000,000 |
| Lake | ? Mobile Data Terminal upgrade to broadband connec | Replace outdated equipment with modern mobile data terminals and air cards to enable a more effective and reliable interface with local law enforcement in the Regional area. Not only will the effort increase Northeast Ohio's ability to achieve better interoperability especially in times of crisis response, it will reduce the cost of operations through electronic ticketing and AFIS capabilities. | Lake County Sheriff's Office | 12 | 31 to 90 days | \$700,000 |
| Lake | Industrial Excess Landfill TCE Plume IEL (20 years | fourth side Plume of well established and very messy site with waste from all Aker Rubber Companies. Remediation to capture TCE trace levels before entering Lake Erie Watershed. | Absorbent Materials Company of Wooster Ohio | 40 | 0 to 30 days | \$5,500,000 |
| Lake | Sell short with buys less then \$4 a shares. | Boost economy for the long term when the I make more money. | home | 1 | 0 to 30 days | \$7,000 |
| Lake | Grand River Fire Department Manning | The Village is seeking stimulus funds to maintain staffing at the fire station. Currently the Village is losing tax revenue due to the economy and the fire businesses in town, other than being a fire area or a off worker. This has resulted in a substantial drop in revenue for the Village. The fire Dept is currently staffed with 3 part time volunteer firefighters/paramedics 24 hours daily. The Village pays for 15 positions Monday thru Friday and 2 positions on the weekends. Painesville PD provides the other 12 hours per day Monday thru Friday in the only shared staffing agreement in Lake County, OH. With the shrinking revenues Grand River has immediately reduced ALL employees to minimum wage and has eliminated 10 positions. Painesville PD provides an additional 24 hours of coverage per week. Without these funds Grand River may not be able to provide the best emergency medical services to the community. | Grand River Fire Department | 30 | 0 to 30 days | \$45,000 |
| Lake | Affordable Residential ElderCare | Expansion of current residential elder care facility to accommodate more residents at a lower, more affordable cost to the elderly and replication of facility and concept to meet the urgent needs of this growing population. | There's No Place Like Home | 24 | 91 to 180 days | \$600,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Lake | 2009 Technology Improvements Initiative | Comprise existing 5 route trucks with new fuel efficient equipment. Replace existing 5 route trucks with new fuel efficient equipment. Purchase inventory for distribution of new product lines. This would enable this company to be competitive with current product lines and grow by adding new product lines, new routes and most importantly jobs. Repair and improve existing warehouse and office facility. This would include painting, repair concrete parking lot grade and resurface back lot to improve drainage. | DiCarlo's of Northeast Ohio | 5 | 31 to 90 days | \$250,000 |
| Lake | garage | paralegal | tax-payer | 8 | 31 to 90 days | \$15,000 |
| Lake | Grand River Police Project | Maintain Police jobs, with closure of local businesses and current economy. Assistance is needed to assure the current level of manpower and to maintain the current level of Officers. | Grand River Police Department | 21 | 0 to 30 days | \$80,000 |
| Lake | communications/navigation improvements | This project would allow for upgrades to communications and navigation equipment required for pilot training, certification and job improvement training. New satellite and ground based systems have recently been implemented, and this project would allow for both initial and advanced technological training in the use of that equipment. This type of training will help to maintain a strong transportation infrastructure by providing for a source of skilled pilots ready to work in the aviation industry. It is estimated that the above mentioned improvements would attract 8 students per year, with each student spending approximately 4,000.00 each. The revenue from each student will allow for the continued employment of a flight instructor, as well as associated service personnel. | Mannion Aviation LLC | 6 | 0 to 30 days | \$3,500 |
| Lake | BUSINESS GROWTH & EMPLOYEE GROWTH | OUR LOCATION HAS BEEN A FOOD ESTABLISHMENT SINCE 1942. WE'RE IN AN ECONOMICALLY DECLINING AREA, ALTHOUGH THERE IS LOCAL FUNDING AVAILABLE THERE IS NONE TO ALLOW US TO BUY OUR LOCATION BUILDING WHICH IS NEEDED TO EXPAND OUR OPERATION AS WE ARE THE ONLY FOOD SERVICE BUSINESS IN THIS PART OF THE CITY. EXPANDING OUR PRODUCT & SERVICES WILL CREATE NO LESS THEN 15 FULL TIME JOBS AND POSSIBLY 10 - 15 PART TIME STUDENT OR ADULT JOBS ALONG WITH ADDITIONAL TAXES REVENUES LOCALLY AND STATE. WE HAVE EXHAUSTED MOST LOCAL LENDING OPTIONS AND THIS EXPANDING IS A MUST TO COMPETE WITH BIG CORPORATE FOOD INDUSTRY. WE ARE NOT LOOKING FOR FREE MONEY AND WOULD BE WILLING TO CONSIDER ANY MONEY AS A LOAN AND ANY POSSIBLE CREDIT ON MONEY WE GET FOR THE CREATION OF NEW JOBS IN AN ALREADY DEPRESSED AREA. THANK YOU IN ADVANCE FOR ALLOWING US TO MAKE SUCH A REQUEST AS, SMALL BUSINESS OWNERS ARE TAKING THE BRUNT OF THESE BAD TIMES AND WONT WITH STAND THESE TIMES MUCH LONGER WITHOUT REALISTIC HELP IN UNREALISTIC TIMES. I AM A LUMBERMAN | ALL FOR U INC | 15 | 31 to 90 days | \$479,000 |
| Lake | LegalMe LLC | To start my business LegalMe, LLC. Paralegal for Hire. Provide affordable legal research and legal document preparation. Also provide background research for the general public. I will be business owners, property owners, and prospective home buyers. As long as there are lawyers there will be paralegals. I will be competitive and reasonable. I plan to expand with other paralegals with specialized backgrounds. Personally, I will be a Real Estate Law and Employment Law. I will include other topics of law such as business law, family law, cyber law, etc. I am seeking business to help my community and to support my family. | LegalMe LLC | 10 | 0 to 30 days | \$15,000 |
| Lake | Helping the Disabled and Elderly | Being a single mother to a child with a severe disability, I have witnessed the hardships that can occur on a daily basis. Whether it be a simple gallon of milk in the middle of a wonderful Ohio winter where the snow won't allow a wheelchair to get to the store, or flooding a stick of butter after a long days work and not wanting to put my daughter through the physical struggle she has to get through to get to the store. The fact is that there is not a readily accessible means for the elderly and disabled to get the simple things they may need at the moment or even pre planned. For the couple in their 70s who need to take a walk and devote 30 minutes of their time to get their eggs that can't pass a sidewalk, I would like to start a grocery business where the majority of business would come from online ordering or phone-ins. Having the option of being delivered for a small fee or pick and pack up where a bag boy/girl will bring the goods out. For the spof of the moment who can't leave their car without their wheelchair or get out would also be an item or drive through. I have seen with the frustration and seen the pain, with your help I can make a difference. | Single Mother to Child w/ Spina Bifida | 30 | 91 to 180 days | \$150,000 |
| Lake | Technology Infusion | Helping students housed at the Environmental Learning Center (ELC). We have access to high tech equipment to teach 21st Century Learning Skills including: Observatory, Weathering, greenhouse, digital lab, Smartboards, iPods, GPS units, wireless laptops, digital cameras, alternative energy models, fast training tools, high tech lab coats, etc. All housed in 12,000 sq. ft. of high-tech educational classrooms. We have access to 250 acres of diverse open space rich in the natural history of the Big Creek Corridor. | Porter Program for Science & Mathematics | 5 | 31 to 90 days | \$500,000 |
| Lake | re-investment | This is to reside my house and re-invest in it also. This would include new energy efficient windows and the addition of solar energy panels, this keeps people working and adding value to the neighborhood, the project also adds a renewable energy source. | independent | 5 | 31 to 90 days | \$35,000 |
| Lake | need help with a new car for my mom is disabled | my mom is disabled and not allowed to drive long distances in 16 and would like help buying a car to drive to work and not working on how I am just there. | I need help for as car for my mom is disabled | 2 | 0 to 30 days | \$5,000 |
| Lake | Mentor Lagons & Preserve Office Rehab | to rehab the office by repairing the existing wall structures with a more efficient wall. Replace windows with glass block. Add efficient heat and air conditioning to the space. | City of Mentor | 10 | 31 to 90 days | \$35,000 |
| Lake | Civic Center Pool Upgrades & Replacements | Build locker area and restroom facilities. Including a shower for the staff. | City of Mentor | 50 | 91 to 180 days | \$125,000 |
| Lake | Stimulate the economy | through the use of new Technology add solar panels to heat heat water to supply the showers and restrooms. Add daylight to the buildings also for the conservation of electricity to these buildings. Update the showers to a metered system and update the shower area to reflect the city's safer with private stalls. Update all area and toilets to touchless. Add hard dryers to replace paper towels. Replace all shingled roofs will new material to better accommodate the use of solar panels. | Crystal Records Inc | 10 | 0 to 30 days | \$50,000 |
| Lake | Frank Lloyd Wright's Last House | Recording musicians and as the outcome of the project will be creating jobs for advertisers, leasing an office, accounting and financial services, money for hours of workmen's comm, office supplies, engineering, professional secretary positions, musical equipment, transport and repair services. | Crystal Records Inc | 10 | 0 to 30 days | \$50,000 |
| Lake | Brighter Days | Riverrock, a 601(c)(3) organization, is committed to the construction of Frank Lloyd Wright's last residential commission, the second home designed by Wright for Ohio resident Louis Perloff. Designed just before the architect's death in 1959, this commission is the only authentic Frank Lloyd Wright commission outside that his original building site still available. When completed, both houses will form the nucleus of the National Center for Sustainable Design, a multi-use facility devoted to education and sustainable building practices. | Riverrock House | 100 | 0 to 30 days | \$500,000 |
| Lake | Rebuild our Lives | In light of the current downturn, cultural tourism in America is booming. In Western Pennsylvania, Frank Lloyd Wright's Fallingwater has an annual regional impact of \$30 million in tourism alone. Factoring in payroll, supplies and other contracts, the overall impact on the region's economy is even greater. In the year 2008, Fallingwater surpassed previous records for visitor attendance. We believe a similar outcome is possible for Northeast Ohio. Our mission in Riverrock, then, is to provide the leadership necessary to take advantage of this unprecedented opportunity for our state. Have student loans from 10yrs ago that I can not afford to pay. I am a single mother was not able to finish college. I would like to go to college so I can support my kids. I just want to be able to get these old loan payed off so I can get a loan to go to college get a job and get off social security I just need 4 hrs help. | me myself and I | 0 | 0 to 30 days | \$7,000 |
| Lake | Project Sonic in C-Town | My family has lost our home due to foreclosure. We would like to rebuild our credit to purchase a more reasonable home. Pay off debt. The goal of this organization is to build the first Sonic Restaurant in the Greater Cleveland Area (and no, Starbucks doesn't count). Since there currently are no Sonic Restaurants in this area, business will do exceptionally well as long as it's located in an easily accessible area. The idea is to locate this Sonic on State Route 91, just off of Interstate's 90 and 271 (near the Willoughby-Willoughby Hills border). Other possible alternate locations include State Route 306 at Interstate 90, as well as U.S. Route 20 at State Route 91. I would expect this new restaurant to create an estimated 50 jobs for the area. | Help Get My Family back on our feet after losing o | 0 | 0 to 30 days | \$30,000 |
| Lake | Home investment revitaliation | This would be a start up organization to revitalize the home market. Vacant and foreclosed homes would be purchased removing that burden from the banks that own them. The homes will be rehabbed up to green standards immediately hiring general contractors and skilled tradesman from the housing industry that is severely depressed. Homes would be rented to out of town individuals at little to no rent, but requirements showing active job search would be required. Once employed rent would be paid at 10% below standard rent for comparable homes in market. 10% of rent would be placed into savings account that would go towards down payment of home purchased by renter if they are still under lease and as long as they attend quarterly meetings. These meetings would cover a variety of topics such as financial counseling, debt management, career planning. The main objective is to: 1) provide jobs to construction industry, 2) provide a home to those in need, 3) get them back on their feet by be contributing members of society, and 4) get them into owning their own home. | The Coalition to Bring a Sonic to Greater Clevelan | 60 | 0 to 30 days | \$800,000 |
| Lake | Bill Construction | I am a former Realtor. I had to give up my license in December of 2007 due to the market conditions and not being able to afford the costs, since then I have been unable to find any employment. I have some college background, but does not seem to be enough to actually get a job at the moment time. I would like to go to school to become an LPN, being in the medical field is something that I have always wanted to do and also has the benefit of steady employment. I am 27 years old, my husband is employed, however we have 3 children and a few months ago my husbands wages were garnished for a car repossession that we could no longer afford. My husband receives 272.00 a week. With me unable to find employment and being on that income with a family of 5 it is impossible. Please, help we are backed on everything and I need employment. I don't believe in hand outs, however I am asking and trying to forget about my pride. I am in a loss situation that keeps getting worse everyday. | Urbp Properties | 30 | 31 to 90 days | \$1,200,000 |
| Lake | College | This would be to pay for my daughter's college tuition this fall. We have two other children that we will have to put through college (one next year) and will have my husband being unemployed, with their own bills. | Spangler Family | 2 | 31 to 90 days | \$110,000 |
| Lake | Funding for the Ohio Economy | This project breaks into 3 things. First of all, I would like to improve the current residence on this application. Things that could be more energy efficient like windows and insulation as well as siding and roofing to improve the value of the home and the City of Palmsville. Secondly, I would like money from this project to free up current debt situations, therefore allowing more money to be spent in the stock market as well as pumping more money that may earn right back into the Ohio economy. Finally, with remaining funds, I would like to invest into a new vehicle, one specifically built in the Lordstown GM plant or any other Ohio automotive factory, therefore helping to increase demand from that one plant and help to preserve jobs. | Self Preservation Organization | 1004 | 31 to 90 days | \$25,000 |
| Lake | forlosures's to energy efficient rentals for credi | I know this will more than likely get passed over, but we, the people, feel the need to get our needs across, since 13 dollars a week isn't actually that much, and many people need to help individuals throughout the state of Ohio. Please take the time to consider us at, not just the businesses and true organizations, it would be greatly appreciated, thank you very much, Michael A. Williams. Purchasing foreclosed homes to help relieve mortgage crisis. Weatherize (insulate, windows, Appliances), to become energy efficient single family dwelling, help conserve energy, vent to conserve heating energy efficiency, also adding help to consumers with problems, avoid foreclosure being able to get mortgage. Long term goals to collect more houses using financial institutions to further help struggling banks. And the long term goal would be to create jobs for unemployed ohios. | mesr construction | 10 | 31 to 90 days | \$50,000 |
| Lake | Euclid Creek Tributary Watershed (ECTW) Sanitary S | Helping in office work, maintenance, to eventually form a INC for the company specializing in energy efficient dwellings ECTW Assessment Area, "C" Sanitary Sewer Improvements is designed to eliminate falling on-site sewage treatment systems and improve water quality in the Euclid Creek. The project will include the construction of approximately 25,000 feet of new sanitary sewer and pumping station improvements to serve about 250 existing homes. | Willoughby Hills, Ohio | 12 | 181 days or more | \$3,500,000 |
| Lake | Moving Service Expansion | We are a Senior Move Management Company. We are assisting Senior Citizens and their families in moving into less living space and assisting in cleaning their current residences. We recommend donating usable items as an option to sending to a landfill. We would like to expand to a truck and van that will suit our purposes in transferring residential contents, we would also like to expand our office staffing to accommodate the day-to-day calls that have been increasing every month. We are currently working on a sitting charge scale to lend a hand to families that have the need, but maybe not the financial resources, to hire staff during a stressful time. We would like to expand our service area by hiring a full-time and a part-time employee to assist in moves and a full-time employee for the office, so I can be out with our clients during the move. | Northcoast Senior Moving, LLC | 5 | 31 to 90 days | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--------------------------------------|----------------|--------------------|---------------------------|
| Lake | Product Purchase | This money is to purchase a product line that can be incorporated into our existing facility and save and create jobs instead of an impending plant closure. A) Supporting an entrepreneur, who repair run-down cars in VIN. B) Providing high school and college students with hands on training in the nuances of film production. Collaborating with local colleges to award class credit. C) Giving talented people the chance to stay in Ohio and complete their projects, thus stimulating Ohio's economy. D) Offer those who want to film their projects free access to sets, cameras, actors, software, sound equipment etc. This will bring individuals from other states as well as foster an air of support for the arts in Ohio. By working with high schools and colleges we can help offer this programs at a time when some schools are considering reducing or eliminating these courses completely. E) Arts and Entertainment are the second largest export business in America, yet Ohio for all its size and talent of population has failed to bring entertainment dollars to the state. With this package we expect that to change drastically within the next two years. This is already in place and just lacks funding. | Star Precision Products | 6 | 0 to 30 days | \$6,000,000 |
| Lake | *updated* Education of Ohio and promotion of film | This money is to purchase a product line that can be incorporated into our existing facility and save and create jobs instead of an impending plant closure. A) Supporting an entrepreneur, who repair run-down cars in VIN. B) Providing high school and college students with hands on training in the nuances of film production. Collaborating with local colleges to award class credit. C) Giving talented people the chance to stay in Ohio and complete their projects, thus stimulating Ohio's economy. D) Offer those who want to film their projects free access to sets, cameras, actors, software, sound equipment etc. This will bring individuals from other states as well as foster an air of support for the arts in Ohio. By working with high schools and colleges we can help offer this programs at a time when some schools are considering reducing or eliminating these courses completely. E) Arts and Entertainment are the second largest export business in America, yet Ohio for all its size and talent of population has failed to bring entertainment dollars to the state. With this package we expect that to change drastically within the next two years. This is already in place and just lacks funding. | Killer B Movie Productions LLC | 372 | 0 to 30 days | \$14,000,000 |

| Lake | Scalable Intelligent Power Supplies | Pending U.S. Patent Application Publication Nos. 20070184339, 20070188130, and 20070188137 describe a Scalable, Intelligent, Power Supply (SIPS) technology developed in OH. These inventions focus on energy storage and advanced, intelligent energy management technologies. The proposed SIPS project will expand an existing local technology business creating more manufacturing, science, and engineering jobs with the objective of advancing products and technology. Many higher tier OEM companies will utilize SIPS products and technologies in rapidly growing markets including wireless communications, electric vehicles, homeland security, law enforcement, health care, and defense. In addition to immediate job creation, an important project goal is the continuing creation and retention of highly innovative intellectual property, technology, and products that will fuel industry and job growth for many years to come. Flagging industries including smart electric grid and alternative green energy will gain great leverage in global markets having SIPS energy storage and management businesses in the region. Simply put, SIPS is a foundation for continuing economic development. The normal operation of any traffic controlled intersection is designed for the maximum and efficient throughput of vehicular traffic. Unfortunately, a common occurrence of any intersection is traffic backup, which can require many signaling cycles to clear. Without the need to change the operation of the traffic signals, emergency, police and emergency response vehicles can also be stuck in traffic, thus dramatically increasing their response times to crime scenes and fire or medical emergencies. Furthermore, even without heavy traffic, an emergency response vehicle entering a traffic signal controlled intersection at a high rate of speed places a risk of pedestrian injury or fatalities at extreme risk. | Modtech Corp. | 100 | 0 to 30 days | \$3,500,000 |
| Lake | "MIRT" (MOBILE INFRARED TRANSMITTERS) | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Lake County Sheriff's Office | 0 | 31 to 90 days | \$35,000 |
| Lake | Alexander Moving Company, a Clean Fuels Ohio Partn | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by repowering two tractors. | Lake | Save Our Station (SOS) | This project is to restore and reuse a 1983 railway station to help teach school children learn the history of transportation that helped build the United States. We will mainly focus on Lake County in Ohio. How the rail came to town and what effect it had on the town. We will also teach what stations played during the time frame in which the stations were in use. We will also teach what was going on in the world in that time frame and why the rail was important to the nation, and what effect the rails had on the community. | Western Reserve Railroad Association | 5 | 31 to 90 days | \$600,000 |
| Lake | Emergency landslide protection of Administrative O | Due to unstable soil conditions and erosion problems, the College Administration Building / Dining Hall / Gymnasium is in jeopardy of collapsing. This is a major crisis for the financially strapped college. We are in need of emergency funding to avoid a catastrophe. Additional capacity required to provide cost highways drainage trough systems have been approved for use in forty-eight of the U.S. states. In addition to retaining leveled off embankments, the manpower increase will be 10 to nine from twelve to additional 1500 new employees. Plant space is available and ready for equipment work load and additional equipment. As previously stated, drainage design system has already been approved for forty-eight of the U.S. states. | Rabbinical College of Telshe | 15 | 0 to 30 days | \$1,500,000 |
| Lake | Coating of Highway Drainage Systems | Establish manufacturing of drainage troughs for highways, parking lots and buildings. This will bring this work to the state of Ohio, presently they are manufactured out side of Ohio. A sheet metal plant which has lost its base work, and saved off fifty percent (50%) of its employees will be converted to a manufacturing plant for drainage trough systems. Estimated 5000 employees will be hired after installation of operation is complete. Set well drilled for water, and sewer installed for machine shop. Clear and level 3 acres of land, gravel it, fence it with security lighting and gate a storage facility for vehicles, tools, etc. just waiting for overhead coverage, the rest would be outside. I am hoping to diversify my business for added income because manufacturing is slow. We currently have no work, and since 8/1/2001 we have been struggling to keep our name and business, we thought doing something else can't hurt, and we could help out other local business that help with this project earn money too. | US Powder Coating of Ohio, Inc. | 25 | 31 to 90 days | \$300,000 |

| Lake | diversifying income | To complete the development and manufacturing of the Electronic Model 8888H Precision Resistance Ratio AC Bridge. This is a continuation of research work funded by the SBIR program / number 3025-13-TT. The Phase #1 (research) has been completed and Phase #2 is awaiting funding from the SBIR program. The stimulus funds will allow the hiring of 10 people in the state of Ohio, in the form of part time or full time work. This would be phase #3 of the project. The Model 8888H is a state-of-the-art electronic measurement instrument for calibrating SPT's. An SPT is a temperature measuring device used widely in science and industry. The Model 8888H will be used in primary and secondary calibration laboratories as well as in industry. NIST, a federal government agency will be the US's customer. The product lifetime is about 10 years. Thus, this stimulus funding would create 10 jobs (or more), for 10 years in the state of Ohio. | Diversified Development | 8 | 0 to 30 days | \$60,000 |
| Lake | Precision Resistance-Ratio AC Bridge | Enhancing many years of R&D in fuel injection systems, the focus of the project is to develop new adaptive control technologies for combustion performance. Existing combustion systems typically use various fuel spacing schemes to effect required changes in fuel air-mixture and combustion performance. In order to improve turbine operability and develop flexible combustion systems using hydrogen or coal-derived syngas, Parker will partner with the University of Cincinnati to develop a high-bandwidth fuel injection system for real-time, on-line control of fuel flow and air/fuel mixture stoichiometry. This new technology will result in significant changes to combustor performance, allowing enhanced operability, increased fuel flexibility, and increased life of engine components. The project will have four objectives: (1) Develop component and system technologies to control combustion dynamics; (2) Develop a high bandwidth piezoelectric fuel modulating valve for precise control of fuel flow; (3) Continue the development of novel fuel injectors and primer; and (4) Work with the University of Cincinnati in testing of developed designs. The project will result in the full development and qualification of the high speed valve to modulate fuel flow and control combustion dynamics. This will enhance many years of R&D in fuel injection systems, the focus of the project is to develop new adaptive control technologies for combustion performance. Existing combustion systems typically use various fuel spacing schemes to effect required changes in fuel air-mixture and combustion performance. | Lake | Vertical Turning Center Purchase | The acquisition of this large Computer Numerically Controlled (CNC) machine will enable that Kroll to service the rapidly expanding highway products & bridges expansion industry. Kroll-Kraft is a manufacturer of steel roller dies which are used to form rolled steel and pipe other open profile shapes (guardrails, building framing, etc.) The large vertical turning center will enable us to manufacture very large roller dies more cost effectively. This acquisition will trigger the need for an additional 10 employees and will strengthen our ability to compete with foreign manufacturers of large diameter roller dies. | RKI Inc., dba Kroll-Raft | 10 | 91 to 180 days | \$600,000 |
| Lake | Lakeland Collision | Lakeland Collision plans to develop an apprentice program to provide hands-on experience to the graduates of the auto body program from the local technical schools. In order to be able to provide quality services to customers and to protect consumers from faulty repair, technicians need to be committed to the trade. The only way to become an expert in repair is through experience, and an apprentice program allows a recent graduate benefit from the expertise of a master technician. In addition to using funds to subsidize the training of apprentices, a portion of the budget will include upgrading to a "master frame" paint system. We will be one of the first shops in the Cleveland area to utilize this environmentally friendly system, which will allow recent graduates to apply the knowledge they learned in school, as well as employ a green approach to collision repair. | Lakeland Collision Inc. | 6 | 91 to 180 days | \$200,000 |
| Lake | Lakeland Collision | Lakeland Collision plans to repair its facilities by and do repairs on the property to be able to retain 1 current employee and hire 4 additional employees. Our collision repair shop needs to be expanded by 3000 sq ft to accommodate space for 4 additional employees, and one area of the building requires repair to be able to retain 1 employee. Included in the required repairs is also the resurfacing of the parking lot to provide parking for customers and employees, money to update the office waiting area for customers, which will help to increase the longevity of our operations by providing a better experience to create repeat business. We will hire contractors who have experienced a decrease in business in the current economic environment to help stimulate the local economy. Our plans also include funds to execute our marketing plan to ensure long term growth and sustainability, and to be able to employ local technicians who have been laid off due to the slowed local economy. A portion of the funds will go to support an apprentice program to provide experience to graduates of the local auto body technical schools. | Lakeland Collision Inc. | 25 | 31 to 90 days | \$450,000 |

|----------------|--|--|---|----------------|--------------------|---------------------------|
| Lawrence | Point Broadband | The Point Broadband project consists of installing a broadband connection through out The Point Industrial Park, located in South Point, Ohio. The Point is a 504 acre industrial park with over 8 miles of rail and 3400 linear feet of waterfront with a liquid load out facility located on the Ohio River. This facility is part of Foreign Trade Zone #770 designation and is the only multi-modal facility in southern Ohio south of Cincinnati. Since its development in 2001 it has created over 200 jobs for our community. This site has all utilities through out the site except for broadband. In recruiting new business to Ohio has hindered our ability since most companies don't want to pay any additional fees to bring services to their property. This project will create 10 construction jobs and an additional 145 permanent jobs with the availability of broadband service throughout the site. This project could start within 60 days of award. | Lawrence Economic Development Corporation | 155 | 31 to 90 days | \$60,000 |
| Lawrence | Depot Square / Ro Na Downtown Entertainment Center | The City of Ironton is continuing what has now been a 21 year strategic planning and investment effort to revitalize its downtown. This plan strategically calls for the development of a commercial business, residential, and a festival activity community within its downtown. The strategic plan calls for the restoration of buildings to fill these roles around a principal town center known as Depot Square. Critical to the continued development of festival activity within the downtown is the construction of both outdoor and indoor entertainment centers for use not only for local events, but festivals like the "Rally on the River", Memorial Day, Oktoberfest, etc. that can draw up to 40,000 participants per event. The Ro Na Restoration project will take an approximately 20,000 SF old abandoned historic theater and return it through historic restoration to a multi-purpose entertainment center for downtown activities. Benefit of this and other related Depot Square activities will be provided to the Downtown and area small business merchants that accommodate sales and services for these events. | Ironton Lawrence CAO | 85 | 31 to 90 days | \$2,940,000 |
| Lawrence | Ironton Downtown Facade Restoration Program | The City of Ironton is continuing what has now been a 21 year strategic planning and investment effort to revitalize its downtown. The City is now in the middle of its 5th phase of the revitalization effort. Each of these efforts have a significant facade improvement program in which the City matches property owners in upgrading and restoring their facades to historic standards. Under this current phase, the City has set aside approximately \$200,000 in CDBG and other funding as match to private sector investments estimated to be approximately an additional \$500,000. However, interest and matching investment have been made up to \$2 million additional if community funds can be identified for the facade improvement programs. It is anticipated that 12 building facades will be restored as part of this Phase 5 effort. Historic design and coordination is already underway so that the restoration can be completed this construction season. | Ironton Lawrence CAO | 40 | 31 to 90 days | \$1,500,000 |
| Lawrence | Lawrence County Rural Water Expansions | There still remains a large portion of rural Lawrence County that remains without public water. Many of these areas have poor water quality from well with high sulfur and salt contents given the former mining activity in the areas, or ill-maintained water systems. This project would consist of water line expansion by the rural coop HCSLA Water system into four additional areas of the County. This would consist of about 30 miles of additional water lines along with associated improvements. The project would result in the water service to an additional existing rural customers. | Ironton Lawrence CAO | 49 | 91 to 180 days | \$1,603,196 |
| Lawrence | Downtown Ironton Public Transit Center | Development of an Inter-modal transportation center in downtown Ironton to allow for better and more comprehensive service of the newly formed Public Transit System. | KYOVA Interstate Planning Commission | 14 | 31 to 90 days | \$1,316,382 |
| Lawrence | Lawrence County The Point Industrial Park | Proposed access road improvements by the Village of South Point that would allow for better access and handling between Ohio River barges, rail and highway freight | KYOVA Interstate Planning Commission | 1530 | 31 to 90 days | \$3,600,000 |
| Lawrence | South Point Industrial Inter-Modal Transfer Facili | Proposed access road improvements by the Village of South Point that would allow for better access and handling between Ohio River barges, rail and highway freight | KYOVA Interstate Planning Commission | 1530 | 31 to 90 days | \$3,600,000 |
| Lawrence | Lawrence Ironton Depot Square | Renovation & revitalization of downtown Ironton railroad depot square area with streetscape, parking lots, sidewalks and a new walkway for the transit support & use | KYOVA Interstate Planning Commission | 20 | 31 to 90 days | \$700,000 |
| Lawrence | Lawrence Ironton Signals, Downtown | Upgrade downtown signal system, intersection improvements and Safety in the City of Ironton at all major intersections | KYOVA Interstate Planning Commission | 10 | 31 to 90 days | \$1,500,000 |
| Lawrence | Ironton Delaware Street Improvements | Reconstruction of approximately 2,000 LF of Delaware Street to widen the Street, construction of sidewalks and add appropriate lighting, storm drainage improvements and bicycle access to the new school | KYOVA Interstate Planning Commission | 20 | 31 to 90 days | \$460,000 |
| Lawrence | Replacement Modified Mini-Vans (5) | 5 Replacement modified Mini-Vans for Demand Response and Paratransit services | KYOVA Interstate Planning Commission | 5 | 0 to 30 days | \$175,000 |
| Lawrence | Charlie Creek Improvements | It is proposed to realign the intersection of CR144 & CR 1 and also build an access road south of US 52 to access development | KYOVA Interstate Planning Commission | 350 | 31 to 90 days | \$1,300,000 |
| Lawrence | Downtown Ironton Public Transit Center | Development of an Inter-modal Transportation Center in downtown Ironton to allow for better access to area public transportation as well as access to jobs in neighboring Huntington, WV and Ashland KY. The project involves primarily of a leased/land improvement of approx. 3,800 sq ft space in a historic downtown building, also supporting the implementation of the City's Downtown Revitalization Plan, and also supports the ongoing \$1.5 million City Depot Square restoration project. The project will house the transit center main offices, outreach facilities, information center, and transit customer center. Planning, design, and historic coordination are ongoing and property under public ownership allowing the construction to begin within 90 days. | Ironton Lawrence CAO | 31 | 31 to 90 days | \$1,316,382 |
| Lawrence | S. Point Industrial Inter-Modal Transfer Facility | Proposed to the construction of approximately 5,000 LF of access road and 6,000 LF of rail spur, along with associated rail switching, crossing signalization, and other associated improvements to complete components of a truck / rail / river barge intermodal transfer facility. The facility will be part of a larger project that would include a rail siding, liquid, and container port and a new intermodal transfer facility, along with the Ohio River and the Interstate system via U.S. 52 and I-64. The project is within a Foreign Trade Zone of the 500 plus acre The Point near industrial park. Member markets that are possible include being a Port of Entry into the U.S. The project will serve The Point Industrial Park, the Tri-State Metro Area, as well as South Central Ohio. | Ironton Lawrence CAO | 1530 | 31 to 90 days | \$3,600,000 |
| Lawrence | Ironton Downtown Depot Square | Downtown Stimulus funding that would allow the placement underground of electric and other utility lines as part of the City of Ironton's ongoing Downtown Revitalization Project known as Depot Square. The project would involve placing underground approximately 2,000 LF of utilities of various types and line sizes, along with the associated foundations and commercial reconstructions. The project would support a current barge Depot Square Revitalization Project in the heart of downtown which serves as the City's town square and the heart of the City's commercial and retail activities. Planning and Design is nearing completion. \$1.5 million in DOT, CDBG, local, and other funds already committed to this project. Current budgets lack funds to put most utilities underground, therefore deferring from the project. | Ironton Lawrence CAO | 20 | 31 to 90 days | \$700,000 |
| Lawrence | Dist 9, PID 85635, LAW Southpoint Dock Project. | Lawrence County - Southpoint Dock Project Lawrence County - Southpoint Dock Project. Lawrence County - Southpoint Dock Project. The primary activities of this project are 1) Access road improvements by the Village of South Point that would allow for better access and handling between Ohio River barges, rail, and highway freight. 2) additional spur construction, rail scales, and rail handling platforms and facilities, and 3) river sails and docking facilities renovations along with the construction of a crane platform. The project is located within the Point Industrial Park which has multiple industrial tenants reliant upon all three modes of transportation. | Ohio Department of Transportation | 103.3 | 31 to 90 days | \$3,600,000 |

| Lawrence | Parking Lot Repave Adult Program | Repave Tri-State Industries, Inc., Adult Workshop and SSA unit. The pavement is badly deteriorated due to age and wear. | Lawrence County Board of MRDD | 4 | 31 to 90 days | \$65,000 |
| Lawrence | Site lighting at school age program | Almost no lighting currently exists on property. High vandalism area. | Lawrence County Board of MRDD | 2 | 0 to 30 days | \$30,000 |
| Lawrence | JB-Nets Rural Gallia County Broadband Connectivity | Current infrastructure capacity was in high demand and high speed wireless service would be extended to 85-90% of Gallia County by installing 17 addition towers to link Gallia County's population centers, and to surrounding counties where extended signal can be received including Winton, Lawrence, and Jackson Counties. Also to provide High Speed Service to the Dan Evans Industrial Park located within one mile of JB-Nets HQ. JB-Nets now has 7 towers in Gallia County with approx 300 residential customers and 46 businesses, including Gallia County Rural Water, Spring Tree Vn, Fire Dept, Doctors, Churches, Construction Companies for the new Gallia City School Academy, Pharmacy Chain, Security Systems Mgmt, Co, Trucking Companies, Community Center, Catering Mfg Facility, Village of Rio Grande, Coover College, Farms, and State of Ohio Gallia Visitor Center. JB-Nets has a rolling 1-2 month waiting list for installs. Our expectation is to see Gallia County start to prosper from the many services brought to them through high speed connectivity to the world. JB-Nets sees this as key and critical to Gallia County's improved quality of life. JB-Nets needs capital to move forward! | JB-Nets, LLC (Broadband Wireless ISP) | 3 | 0 to 30 days | \$1,012,230 |
| Lawrence | Dist 9, PID 85869, LAW 4 modified minivans | 5 modified minivans for the Lawrence County Port Authority | Ohio Department of Transportation | 3 | 31 to 90 days | \$175,000 |
| Lawrence | Dist 9, PID 85870, LAW Ironton transit center | Downtown Ironton transit center for the Lawrence County Port Authority | Ohio Department of Transportation | 26 | 91 to 180 days | \$1,316,382 |
| Lawrence | Ironton Storm Pump Station and Water, Sewer and FI | Installation of backup generators at critical public works facilities Water and Wastewater Treatment Plant) and replacement of electric controls and motor control centers at 8 flood / drainage pump stations that were installed in 1940 and have outdated and equipment that cannot be replaced. | City of Ironton | 16 | 31 to 90 days | \$8,000,000 |
| Lawrence | Automated Water Meter Replacement Project | The project will replace 4,800 outdated water meters throughout the City. The meters will be replaced with Automated Meter Reading Technology to improve water conservation through proper metering and notification of potential water leaks throughout the distribution system. | City of Ironton | 15 | 0 to 30 days | \$1,400,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Lawrence | Delaware Street Improvements | The project will stabilize Delaware Street in then North Ironon area through the resurfacing of 1,800 feet of arterial street to the new Ironon Elementary School. The project will include the necessary drainage, curb, gutter and sidewalks to allow school-aged children access to the new elementary school. | City of Ironton | 15 | 31 to 90 days | \$460,000 |
| Lawrence | Downtown Signalization | The project will upgrade 20 Downtown area traffic signals and intersections to meet current standards. The project will provide for signal electronics and traffic monitoring equipment to improve congestion management and air quality for the area. | City of Ironton | 15 | 31 to 90 days | \$1,500,000 |
| Lawrence | Storms Creek Bridge Replacement and Elevation | The project will involve the replacement and elevation of a substandard bridge that serves the North Ironon and Hanging Rock area. The project also serves the new Ironon Elementary school. The project replaces and existing 200 foot long bridge and provides for annual flooding of the Ohio River which crosses the bridge and makes the area inaccessible to traffic. | City of Ironton | 28 | 181 days or more | \$5,000,000 |
| Lawrence | Second Street Though Truss Bridge Replacement | The project will replace the existing 400 foot through truss bridge that crosses NS Street at 2nd Street. The new structure will be a steel truss structure deck bridge that meets current design standards. | City of Ironton | 33 | 91 to 180 days | \$7,000,000 |
| Lawrence | Riverfront Park | The project is a redevelopment project of the Ironon Riverfront Park for recreation and boat facilities along the Ohio River. The project will develop approximately 11 acres of the riverfront with an amphitheater, 36 vehicle boat ramp, transient dockage, large vessel mooring, youth recreation, parking, and wireless fast. | City of Ironton | 36 | 181 days or more | \$14,000,000 |
| Lawrence | Overlook Subdivision Sewer Extension | The project will extend sanitary sewer service into an unsewered community adjacent to the existing Union Rome Sewer System. The project will provide sanitary sewer service for approximately 50 homes and install approximately 17,500 feet of sanitary sewer, manholes and associated pump stations. | Lawrence County Board of Commissioners | 19 | 91 to 180 days | \$3,500,000 |
| Lawrence | North Huntington Heights Sewer Extension | The project will extend sanitary sewer service into an unsewered area in the Village of Chesapeake. The project will serve approximately 120 homes, install 20,000 feet of sanitary sewer, manholes and associated pump stations. | Lawrence County Board of Commissioners | 25 | 91 to 180 days | \$5,000,000 |
| Lawrence | Chesapeake Candy Lane Sewer Extension | The project will extend sanitary sewer service into an unsewered area in the Village of Chesapeake. The project will serve approximately 50 homes, install 14,000 feet of sanitary sewer, manholes and associated pump stations. | Lawrence County Board of Commissioners | 19 | 91 to 180 days | \$3,500,000 |
| Lawrence | Bradrick Circle Sanitary Sewer Extension | The project will extend sanitary sewer service into an unsewered community in Lawrence County. The project will provide sanitary sewer service to approximately 75 homes and install 20,000 feet of sanitary sewer, manholes and associated pump stations. | Lawrence County Board of Commissioners | 23 | 91 to 180 days | \$4,000,000 |
| Lawrence | Forrest Dale - Deering Sanitary Sewer System | The project will extend sanitary sewer service into an unsewered community of Lawrence County. The project will include a new wastewater treatment facility, approximately 50,000 feet of sanitary sewer, manholes and associated pump stations. | Lawrence County Board of Commissioners | 35 | 181 days or more | \$15,000,000 |
| Lawrence | South Ironon Water Storage Tank | The project will construct a 300,000 gallon elevated water storage tank for the South Ironon area that includes two industrial parks and the industrial area of Ironon. The Project will provide adequate water pressure and volume for these industrial areas and will allow future economic development of the vacant industrial parks. | City of Ironton | 22 | 31 to 90 days | \$1,500,000 |
| Lawrence | Deep Cut Road Water Storage Tank and Waterline Ext | The project will include the construction of a 300,000 gallon water storage tank and 8,400 feet of waterline to serve the North Ironon area that experience low water pressure and volume. The project will serve the new Ironon Elementary school. | City of Ironton | 24 | 91 to 180 days | \$3,000,000 |
| Lawrence | City-wide Waterline Replacement (Targeted Areas) | The project will replace deteriorated waterline in targetification throughout the City of Ironon. Targeted areas are based on the number of line breaks and priority of the area to be served in relation to water quality and job creation opportunities. The estimated length of line to be replaced is 40,000 feet of waterline. | City of Ironton | 19 | 31 to 90 days | \$5,000,000 |
| Lawrence | Deep Cut Road Sanitary Sewer Extension | The project will provide sanitary sewer service to an unsewered area of Ironon and connect to the existing sewer system. The project will include the installation of 5,400 feet of sanitary sewer line. | City of Ironton | 24 | 91 to 180 days | \$4,000,000 |
| Lawrence | Union Rome Wastewater Biosolids Facility | The project is the replacement of the existing Biosolids facility that was deleted from the existing wastewater treatment plant expansion project can be added through a change order process on the existing contract at the new facility. The project will involve the modification of the existing building and installation of two biosolids presses and conveyor system. This project has already received permit approval from the state due to a lack of funding. | Lawrence County Board of Commissioners | 20 | 0 to 30 days | \$3,500,000 |
| Lawrence | Union Rome Wastewater Collection Rehabilitation | The project will involve the rehabilitation of 120,000 feet of sanitary sewer and 400 manholes throughout the collection system. The project will reduce the amount of ground and storm water infiltrating the collection and improve water quality for the community. | Lawrence County Board of Commissioners | 35 | 31 to 90 days | \$11,500,000 |
| Lawrence | Union Rome Wastewater Treatment Plant Improvements | The project is currently under construction and is funded through a loan from the Water Pollution Control Loan Fund. The funds will be used to complete the project and construct an affordable grant to purchase and increase in user fees. The project is an expansion of the current Wastewater Treatment Plant to 28 Million Gallons Per Day and improve water quality to meet current regulatory standards. | Lawrence County Board of Commissioners | 63 | 0 to 30 days | \$25,200,000 |
| Lawrence | Solid Road Rehabilitation | The project will consist of the complete rehabilitation of 4,200 feet of local street, including sidewalks and street lighting. | Village of South Point | 35 | 91 to 180 days | \$4,000,000 |
| Lawrence | Village-wide Street resurfacing | The project will resurface with asphalt 20 miles of Village streets that have not been resurfaced in the last 7 years. | Village of South Point | 25 | 31 to 90 days | \$2,000,000 |
| Lawrence | Third Street Waterline Replacement | The project consists of the replacement of 5,800 linear feet of 8-inch C-900 waterline, 22 valves, 15 system connections, 85 services connections, 1,25 feet of service waterline and pavement restoration. This is a waterline replacement project to replace trashed waterline along Third and Fourth Avenues in order to protect the health and welfare of the systems water customers. | Village of South Point | 15 | 31 to 90 days | \$1,470,000 |
| Lawrence | Fire and Rescue Station | The project will construct a new fire and rescue station with mezzain and training rooms and adequate facilities for fire operations and training. | Village of South Point | 20 | 91 to 180 days | \$2,000,000 |
| Lawrence | Village-wide Street Lighting | The project will replace the existing street lighting that has outlived its useful life. | Village of South Point | 25 | 91 to 180 days | \$3,000,000 |
| Lawrence | Water System SCADA System | The project will provide SCADA controls to the existing water distribution system to assist with monitor pump station tanks and critical components of the system. | Village of South Point | 10 | 31 to 90 days | \$750,000 |
| Lawrence | Building a New Fire House | This project will help out the Windsor Fire Dept in Southern Ohio. It currently operate out of a 40 year old building that is falling apart. We have calls that are coming in due to the earth parking in on them. This new firehouse will also allow us to house a truck that we currently have. | Windsor Vol. Fire Dept | 10-20 | 31 to 90 days | \$500,000 |
| Lawrence | Downtown Streetscape Revitalization | The project will rehabilitate approximately 4,000 feet of local street through asphalt resurfacing, sidewalk replacement, lighting replacement, and street signage. | Village of Chesapeake | 25 | 91 to 180 days | \$3,500,000 |
| Lawrence | Rockwood Avenue Street Rehabilitation | The project will rehabilitate approximately 3,000 feet of local street through asphalt resurfacing, sidewalk replacement, lighting replacement, storm sewer and street signage. | Village of Chesapeake | 30 | 91 to 180 days | \$5,000,000 |
| Lawrence | Roadway Landslide Repair | The project will repair landslides that have closed North Huntington Heights street and partially closed Symmes Creek Road. The project will install earth plugs to restore approximately 1,500 feet of roadway to travel condition. The Village has attempted to get funding but cannot meet the match requirement for the projects. | Village of Chesapeake | 15 | 31 to 90 days | \$1,500,000 |
| Lawrence | Township Road Project | The project will consist of approximately 28.2 miles of roads in the township. This project would improve the infrastructure in the township by providing safer roads for township residents and emergency vehicles. | Elizabeth Township Trustees | 3 | 31 to 90 days | \$1,575,000 |
| Lawrence | Chesapeake Virtual High School | Education in rural south eastern Ohio presents many challenges in preparing students for post secondary education and the 21st Century work force. A significant challenge at this high school is providing students with a virtual high school. The school is currently operating in a rural area. Other it is difficult to identify qualified and appropriately licensed educators. A solution to this challenge is the creation of a virtual high school which would serve students from Chesapeake but could serve students in a much larger geographic region. The requested funds would be used to develop the curriculum and the necessary technology infrastructure. Upon completion of the curriculum program would be self supporting. | Chesapeake Exempted Village School District | 30 | 181 days or more | \$500,000 |
| Lawrence | Lawrence County Consortium High School Age Multipl | Lawrence County Multiple Handicapped classes (high school age) are currently held in the Centry center at 1701 S. 7th St. This building lacks handicapped accessible access to the Centry center in the adjacent Ironon High School. Handicapped access to this educational facility along with updates to the handicapped program area is a necessity. | Ironton City Schools | 40 | 0 to 30 days | \$1,500,000 |
| Lawrence | Bridging the Literacy Gap (BLG) | Research benchmarks: A scientifically research-based project, BLG is designed to improve student reading achievement by improving school library services. School libraries play a key role in improving literacy when collaboration among instructional and school library media staff is strengthened, instructional materials and resources are aligned, and student access to library media centers are enhanced by extension of school hours of operation. Outcomes: • Increase books to 15 volumes (12,000 new titles) per student and periodicals subscriptions by 18. • Provide 48 new internet-capable computers in the library and throughout school • Develop a library web page to provide 24/7 access • Acquire advanced technology by increasing resources by 80% to enhance students' skills in retrieving and making use of information for critical thinking skills and for teachers to enhance curriculum • District-wide professional development will result in collaboration between teachers and library media staff resulting in integrated curriculum development | Chesapeake Elementary School | 5 | 181 days or more | \$250,000 |
| Lawrence | Energy Efficient Upgrades to Facilities | Installation of energy efficient heating and cooling system, exterior doors and windows in existing childcare facilities to maintain a comfortable environment. Replacement of heating and cooling units at 3 facilities to avoid the need of emergency heating and cooling for climate control. Replacement of exterior doors and windows at 50 windows that due to age call for replacement. Efficiency upgrades to avoid the need for fuel consumption in operating the facilities at a comfortable climate while Head Start and Early Head Start services are being provided to approximately 180 infants, toddlers and preschoolers at these facilities. | Ironton Lawrence County CAO Head Start Program | 8 | 0 to 30 days | \$108,000 |
| Lawrence | School Television Studio | Funds granted to our school district would enable our students to upgrade and purchase new technological equipment necessary to run a live television studio. The equipment we currently have is either broken or dated beyond use and limits our abilities to offer students the opportunities that many other schools are afforded. We are also confined by space in our current building and the requested funds would allow us the ability to renovate or add the space we need to house the new equipment. This new equipment would enable our school district to create educational and informational programming that would reach our community through local cable access. More importantly, our students would gain valuable opportunities learning to produce and programing so that they gain self-esteem skills that had previously been denied them. We believe we are offering new courses and opportunities in technology for our students will help them be more prepared to compete for jobs in our current global economy or to begin a competitive post-secondary program. | Chesapeake Union Exempted School District | 0 | 181 days or more | \$200,000 |
| Lawrence | Educational Media | Chesapeake Middle School is one of three schools in an economically disadvantaged school district. The middle school currently has a fifty five percent free and reduced lunch rate. Due to the economic status of the students in the district they do not receive the cultural advantages of other students in adjacent districts. Our students would benefit greatly in the use of Educational Media to promote academic excellence in our schools. This would aid in providing our students with 21st Century skills needed to reside them to a global economy and world. To achieve this goal we would like to make available for classroom use, thirty (30) LCD flat panel televisions and thirty wall mount brackets, this would allow teachers to introduce and reinforce concepts and skills needed in the classroom through the use of Educational Media tools. Replacement of 6 1-on 29 passenger mini-buses used to transport Head Start children to childcare for services. Average mileage on existing bus being used is 157,166 miles. Fuel economy has dropped dramatically and maintenance to ensure safety has continually grown on current buses being utilized due to excessive mileage. | Chesapeake Union Exempted Village School District | 0 | 181 days or more | \$25,000 |
| Lawrence | Vehicles for Child Transportation Replacement | Replacement of 6 1-on 29 passenger mini-buses used to transport Head Start children to childcare for services. Average mileage on existing bus being used is 157,166 miles. Fuel economy has dropped dramatically and maintenance to ensure safety has continually grown on current buses being utilized due to excessive mileage. | Ironton Lawrence County CAO Head Start | 7 | 31 to 90 days | \$252,000 |
| Lawrence | 21st Century Classroom Renovations | New skills and literacies. From our media-saturated culture to the Internet, to new social issues, students and teachers can experience exciting new ways to learn and teach using the multiple languages and multiple forms of media and technologies available today. Instructional design include changes in how we update our existing facilities. To grab students attention, teachers must use all the new presentation and interaction technology. The classroom environment is evolving. It won't disappear it's better change. Being a low wealth school district in Southern Ohio where over 50 percent of the students receive free or reduced lunches it is difficult to find funds to furnish our classrooms with appropriate materials to give them the opportunities found in other parts of the state. By providing high quality curriculum, diverse resources, and learning opportunities for unmet student growth our children will be able to compete locally and globally. 600 Computers 1000 Mini Computers 60 Smart Boards 25 Smart Tables | Chesapeake Union Exempted Village Schools | 5 | 181 days or more | \$1,984,000 |
| Lawrence | 21 Century Science Classrooms | Chesapeake Middle School is a small rural school located in the Southeastern part of Ohio. As evidenced by the fact that 50% of our students receive free and reduced lunch, our school is economically disadvantaged. The faculty at Chesapeake Middle School is incorporating 21 Century Learning Skills into their classrooms. To successfully implement these skills into our Science classrooms we would need to convert regular classrooms with desks into science laboratories. This would include sound science systems with electronic lighting, computers and color printer. Printer. Basic lab tools (Beakers, Thermometers, scales, etc.) Weather & Climate will include weather watching, laptop computers and color forecasting tools, rain gauges and a water cycle models. Energy. Ecology would include Amusement Park experience Building kits, Energy Education Kits, Solar House kits, Proton Solar Robot cars kits, Power House kits, Renewable Energy Class packs, Windmill demonstrations, and Solar kits. Technology is a driving force in our society's future, therefore our classrooms must be equipped with modern technological devices that will excel student learning bringing our classrooms into the 21 Century. | Chesapeake Union Exempted Village School District | 0 | 181 days or more | \$50,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Lawrence | Improvement of outside facilities | The purpose of our project is to correct safety issues that exist with our current facilities surrounding our athletic complex. Our student and spectator seating and our athletic track are in extreme need of repair and need upgraded to meet the health and safety needs of the handicapped, our students and all others who attend events. Handicapped accessibility is limited or non-existent in the majority of our facility. Also, handicapped accessible restrooms and facilities are missing. Our track, used by the public for health and community activities, needs replaced due to safety concerns. The track has deteriorated. The damage is similar to that of a street developing pot holes. Fences have severely damaged the rubberized coating and the substrate. Our plan involves a multi-purpose building to include accessible restrooms, replacement of existing bleachers to provide handicapped accessibility and to meet safety standards of Jerod's Law, and replacement of track to allow safe public use. We are a district in the Appalachian region with over 50% of our students on free and reduced lunch and our local bus base is very low. Local funding is not possible. | Chesapeake High School | 50 | 181 days or more | \$2,500,000 |
| Lawrence | Science Lab | Currently, our school does not have the facilities for all of our science classes to perform labs regularly in a safe environment. Our project would remodel our old wood shop into a modern high school science lab that meets safety guidelines for electricity, chemical storage, and ventilation. In order to make the current room meet these standards, the following updates will be made: install 6 lab stations with chemical resistant surfaces, add water fountains, run electrical wiring, install HVAC, add ventilation duct work, an air handling unit, and a fume hood. Prior to construction, demolition of a temporary wall, concrete flooring, and a garage door will be required to meet the needs for square footage and lighting. In order to make the room a working classroom, we will need board space, computer hookups, a vented cabinet for chemical storage, furniture, and cabinetry to store glassware and equipment. Our school serves Appalachian students of which over 80 percent qualify for free or reduced lunch. These children desperately need access to science laboratory facilities in order to be properly prepared for and competitive in both college and the workforce. | Chesapeake High School | 15 | 181 days or more | \$500,000 |
| Lawrence | Music Enrichment | Chesapeake Middle School is one of three schools in an economically disadvantaged school district. The middle school currently has a 17th day parent free and musical lunch week. Less than fifteen percent of the student at Chesapeake Middle School are involved in the band program. With the implementation of 21 Century learning skills into our classrooms, the implementation in the arts is vital to making our students globally competitive. Many of the families that attend our school come from a poverty ridden environment and are unable to provide musical instruments for their children. Chesapeake Middle School would like provide instruments to families who wish to participate in the bands. This would allow all students to explore opportunities to develop skills in the arts and would allow students the opportunity to explore scholarships for college entrance. | Chesapeake Union Exempted Village School District | 0 | 181 days or more | \$75,000 |
| Lawrence | Student Live Television Channel | Chesapeake Middle School is a rural school district in the southeastern part of the State. Although we are economically disadvantaged we are only one of a handful of middle schools throughout the state that have a live broadcast television every day. The broadcast has been featured at the Ohio E-Tech and National Teachers conference several times. The broadcast is produced by 58-6th grade students voluntarily every day. Much of the equipment is over twelve years old and is out of date. A New Tech Tri-Caster Studio, Live Control, Live Text and Sports Package are needed as well as a Camera and Teleprompters. This will allow students to better meet the needs of our school information network, as well as provide information to the community regarding our school district. This will allow our school district to continue to be competitive throughout the state developing the 21st century skills needed for students to be competitive globally. | Chesapeake Union Exempted Village School District | 0 | 181 days or more | \$30,000 |
| Lawrence | Water System Improvements | The proposed project includes replacing one of the existing with a new 250 gallon per minute well, repairing the Water Treatment Plant aeration and replace 150 non-functional fire hydrants and gate valves in the existing distribution system. One of the Villages wells was contaminated by a spill of Organic Chemicals (OCOC) by the old Fort Brothers Water Treatment Plant. The OCOC spill was contained by the existing well field. This drinking water well is continually pumped to the Ohio River as required by the Ohio EPA so that the remaining well field does not become contaminated above allowable levels. The Village has just been informed their OPWC Small Government application was not selected for funding this year. The OPWC Small Government funding selection is a statewide process and very competitive. They are currently being down ranked by the Ohio Department of Development for Competitive Water and Sewer program funding. | Village of Coal Grove | 15 | 31 to 90 days | \$350,000 |
| Lawrence | Water System Improvements | The project will involve the installation of 34,500 feet of waterline to provide drinking water for unsewered areas of the Village. The project will also include the replacement of 1,800 water meters with new automated meter technology and maintenance equipment. Provide hands-on opportunities for students to learn about anatomy, forensic science investigation, medical laboratory technology and environmental issues like water quality, sustainable energy and wolf/hunter. The funds would be used to purchase the supplies necessary to conduct laboratory experiments in Anatomy & Physiology, Environmental Science, Biology and Botany. The equipment is currently at a public high school in Lawrence County. The money would be used to purchase dissection specimens, DNA analysis equipment and PCR equipment as well as water and soil quality test kit. | Lawrence Water Corporation | 20 | 31 to 90 days | \$1,500,000 |
| Lawrence | Project, Problem, Activity Based Science Education | We would be requesting funding to surface our driveway/parking area which is currently gravel. With either concrete or asphalt. We also need to install some culvert to improve drainage on our driveway/parking area. We have been looking for funding for this project for several years. Funding is the only way we could afford to do this. | Chesapeake High School | 6 | 0 to 30 days | \$2,500 |
| Lawrence | Aid VFD Improvements | We would be requesting funding to improve our Village Water system lines. Our water lines were originally put in in the late 1930's and are beginning to deteriorate. Approximately 1.5th of our system has been replaced within the past 10 years, but the remainder is in need of replacement. 2005 estimates pegged the cost of the project at 15 million. However, recent increases in construction costs may have increased this estimate to nearly 2 million. Our small Village has a very limited budget. | Aid Township Volunteer Fire Department, Inc. | 5 | 31 to 90 days | \$150,000 |
| Lawrence | Water Line Replacement | P.E.A.K.E. is a project to serve 200 students and 80 families in an extended day/year program operating a flexible 15-hours a week. P.E.A.K.E. is a collaboration of 12 community partners committed to implement a Community Learning Center at Chesapeake Union Exempted Village School District's Elementary Middle school. The programming will target: 1. literacy/math/science, 2. anti-racism/cultural, 3. tutoring, 4. technology, 5. expanded literacy hours, 6. parent/PTA support, 7. wrap-around services. P.E.A.K.E. goals are: Improve student achievement in OH test areas; Increase developmental assets in each student's account; Strengthen family-school-community partnerships. Research questions will guide a Narrative Group Technique (NGT) process to assess the Partnership's goals. The progress at the center will be monitored (determined) by the P.E.A.K.E. director, coordinator, and focus groups. A summative site visit (CAPI) guided by a reference panel of 21st Century Community Learning Center Advisory Team will be used to evaluate the areas of program components, student demographics, and parent/community participation. Feedback for change and adjustments will be determined by NGT focus groups. Increases are expected 10% in | Village of Proctorville | 3 | 181 days or more | \$2,000,000 |
| Lawrence | P.E.A.K.E | Proposed is the construction of an approximate 300 S.F. addition to kitchen facilities at the County's Multi-purpose Senior Citizens Center operated by the town of Lawrence CAD. In addition, the project will include the purchase of a piece of commercial kitchen equipment, the largest being a blast chiller and heater system. This building expansion is needed to house the existing and additional senior citizens which will allow the program to meet the increasing demands upon its senior meals programs. As a result, the CAD anticipates being able to prepare an additional 6,500 meals to meet the needs of the growing number of senior population. These meals are design to assist seniors to stay within their homes, thus reducing the cost of housing or other personal assistance care. | Chesapeake Elementary School | 5 | 181 days or more | \$200,000 |
| Lawrence | Lawrence County Senior Meal Expansion | Proposed is the construction of an approximate 2,000 LF extension onto the current and proposed expanded Hamilton Industrial Park rail spur, along with the associated crossing, signalization, and other improvements. This extension will allow a rail spur that is now being designed and being prepared for but to be extended across County Road 2310 to 40 plus area parcel of land owned by the County OTC. This expansion will give the ability to provide rail connection opportunities through an existing switching system onto the Norfolk Southern Heartland Corridor. In addition to the CK 40 acres, an additional 300 to 400 acres of industrial land could gain easy access, as well as access to the Ohio River. In addition to immediate construction jobs, this project would likely create an additional permanent jobs. The rail expansion should be available. | Ironton Lawrence CAO | 2 | 31 to 90 days | \$97,453 |
| Lawrence | Hamilton Industrial Rail Spur Extension | Fairland Local School District is located in Proctorville, OH in Lawrence County which is part of the OH, WV, and KY Tri-state metropolitan area. This region was recently deemed an "unassisted" area as the "unassisted" in the region. The region has a population of about 284,000. The report found that 31 percent of the respondents don't exercise, 22 percent have heart disease, and 13 percent have diabetes. Our vision for this community is to be healthy. Realizing this vision will begin with the establishment of the Fairland Community Fitness Center. We will coordinate a community outreach program focusing on the long fitness and nutrition. We will maintain and oversee the activities of the center. Health and wellness of our students and community will be the mission of the Center. The goal will be to have equipment and offerings for people of all ages and all levels of fitness. Beyond the initial construction jobs, employment opportunities for instructors, trainers, and other support personnel will exist and be sustained. But the true economic return will be in the improved health of our community members. | Ironton Lawrence CAO | 55 | 31 to 90 days | \$350,000 |
| Lawrence | Fairland Community Fitness Center | Project will consist of resurfacing and new pavement on existing gravel roads throughout the township roadway system. We will pave 17 miles of roadway. The project will improve safety and access to all citizens of Lawrence Township and surrounding Lawrence County. The project will also improve safety and access for medical and fire emergency vehicles. | Fairland Local School District | 10 | 31 to 90 days | \$3,000,000 |
| Lawrence | Lawrence Township Road Resurfacing | Students who come to our school ready and prepared to learn are visually placed on academic hold until other students can "catch up" with them and then they move forward. Our district would like to implement an accelerated program that would enable the prepared learner to move along at their optimal level of learning from K-12 grades. | Lawrence Township | 20 | 31 to 90 days | \$1,200,000 |
| Lawrence | Accelerated Programs/Flex-Credit/Senior to Sophomo | The K-7 years would be utilized to attain and apply standards based information. Their instruction would be guided by trained teachers of gifted students who understands the potential of the student prepared and willing to learn. | Dawson-Bryant Local School District | 9 | 181 days or more | \$600,000 |
| Lawrence | Southern Ohio STEM Consortium | Students in grades 8-12 will be taught to work independently while attaining more knowledge, especially in areas that would appeal to them as possible career fields, whether it be mathematics or science. "Facilitators of learning", their teachers, will promote independence through project based learning. | Chesapeake Exempted village School District | 38 | 91 to 180 days | \$533,399 |
| Lawrence | Special Education Renaissance Program | The high school students would also be exposed to flex-credit options and Seniors to Sophomore programs. The money could be used to assist in paying for college costs such as book and tuition costs. | Dawson-Bryant Local School District | 10 | 181 days or more | \$600,000 |
| Lawrence | Renovation of Educational Central Office Complex | The southern Ohio STEM Consortium recently submitted a proposal to the Ohio Board of Regents for \$728,115.00 to implement a comprehensive STEM program designed to serve all students in grades 5-8 in the participating districts in the five county area of Adams, Lawrence, Pike, Ross, and Scioto. The proposal was designed to train and equip teachers to develop and implement authentic, problem-based learning experiences for students to apply STEM concepts and connect those concepts with careers. Career exploration activities are to be provided for students of all abilities and achievement levels. The project has support from institutions of higher education as well as the business community. The project was funded for \$194,716.00 and we are requesting the balance of \$533,399.00 so that the project can be implemented as designed. | Dawson-Bryant Local School District | 30 | 181 days or more | \$450,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Lawrence | Conquering the Digital Divide | Network. Being a low wealth district, with over fifty percent of the student population receiving free or reduced lunch, it is almost impossible to narrow the digital divide between the students who can afford technology and those who cannot. By providing all students with laptops we can peer come this inequality by implementing the goals stated in a 2007 John Hopkins report on the "Talbot County Public Schools: One-to-One laptop initiative" Goal 1: Increase Student Achievement Goal 2: Provide Effective Use of Technology for Instruction Goal 3: Increase Student Engagement and Goal 4: Educational Access for At-Risk Students. When children have access to this type of tool they get engaged in their own education. They learn, share, create, and collaborate. They become connected to each other, to the world and to a brighter future. 1000 Dell 9' Minis 1000 productivity software. | Chesapeake Union Exempted Village Schools | 0 | 181 days or more | \$450,000 |
| Lawrence | Community Recreation Center Village of Coal Grove | Community Recreation Center for Village of Coal Grove With the increased need for recreation and community centers in small communities throughout Ohio, we are proposing the desire to renovate the former middle school/high school gymnasium to be used by non-profit organizations in our community. This would be an extensive project to bring it up to code but it would greatly benefit the community. This facility could be used for youth basketball teams, chess/dancing, volleyball, and various other intramural community activities. The building would need a new roof, HVAC system, handicap restrooms, windows/doors, and lighting in addition to other internal building needs. As stated below, this would be an expensive project but I believe it could bring value to our community and district. | Dawson-Bryant Local School District | 100 | 181 days or more | \$1,200,000 |
| Lawrence | Resurface County Road 26 | Resurface 3.2 miles of Lawrence County Road 26 with an overlay of two 1 inch lifts of bituminous concrete intermediate and wearing courses with 2 inch aggregate shoulders and curbsides striping. This county road provides the main access to all of the Rich Hill Science Center facilities including elementary, junior high, and high school buildings and was last resurfaced in 1988. | Lawrence County – County Engineer | 20 | 181 days or more | \$320,000 |
| Lawrence | Resurface Lawrence County Road 29 | Resurface 5.5 miles of Lawrence County Road 29 with an overlay of 1 inch 1 inch lifts of bituminous concrete intermediate and wearing courses. This county road provides the primary access to the U S Forest Service's Lake Vesuvius Recreation Area in the Wayne National Forest as well as numerous private residences and was last paved in 1996/1997. | Lawrence County – County Engineer | 20 | 181 days or more | \$550,000 |
| Lawrence | Broadband build | Build and update existing wireless broadband throughout 7 Ohio counties. Supply broadband to local government and business in these counties so allows them to build new and existing business with new with broadband each. Supply broadband to homeland security projects. Connect local and regional water plants and chemical facilities along the Ohio valley river area. Provide telemetry that will allow these plants to be updated on security issues that would affect water quality. This money will allow us to retain the existing people and jobs in the area and provide a means to re-locate. This area is in bad need of this project to allow business to grow and make this area competitive with the rest of the nation. This area has the backbone to allow residential growth to be constructed via broadband in areas they can afford. This will help create jobs in the area and allow level of broadband already available throughout the state in more populated areas. This adding of just a few jobs will lead to a projected 100 other businesses to grow and add countless number of jobs to our area. Fulfilling a need that other wise will go unaddressed. It will help many other businesses to grow and add countless number of jobs to our area. Fulfilling a need that other wise will go unaddressed. It will help | ConnectLink, Inc. | 20 | 0 to 30 days | \$2,000,000 |
| Lawrence | Lawrence County ESC School Collaboration Project | The Lawrence County Educational Service Center has developed a cooperative plan to retrofit an existing elementary facility in South Point, Ohio that will initially create 60 jobs and deep approximately another 60 employees from losing their jobs. The plan calls for the renovation of the HVAC system, windows, phone system, technology, furnishings and the accommodation of handicapped accessibility. When complete, this facility will create a centralized educational facility in our county for all schools regardless of size. It will provide classrooms for educating students with disabilities, provide a location for our County Alternative School, and provide a central location for systemic on-going researched based professional development consistent with State and National standards. | Lawrence County Educational Service Center | 120 | 31 to 90 days | \$1,500,000 |
| Lawrence | Winfield Drive Bridge Replacement | This countywide cooperative project will save local districts money each year because we can operate the programs at a lower cost than they can operate individually. It will lower transportation costs, help up needed classroom space at the LEA, create more countywide general employment, and contribute our services to attract business and higher education to provide additional support. Bridge 3 plans have been submitted for this bridge replacement programmed by Federal LBR funding project no LAWY-TR186-0-05 PID No BR49. The Stimulus funds request will cover the 20% local share and will insure timely replacement of the deficient bridge which provides the only public access to Clearview subdivision. As the family unit continues to change in rural agricultural/midwest Ohio school district, there is a greater need for social workers in our schools. Socially, our area continues to struggle with strong, stable family units, therefore, more students need someone to talk with about their problems and how to resolve them. They also need that individual who can recommend other area agencies to assist these students and their families with their situations. | Lawrence County – County Engineer | 10 | 181 days or more | \$160,000 |
| Lawrence | PK-12 Grade Social Worker | Social workers would be able to obtain information that could possibly assist this student into not being just a survivor, but a student who could envision themselves as a leader in their community. With so much emphasis on testing and assessment, the students personal well being is sometimes being overlooked. Our district could greatly benefit from a social worker to have a positive impact on our socially struggling student population. This approved proposal would assist these specific needs immediately. | Dawson-Bryant Local School District | 2 | 181 days or more | \$85,000 |
| Lawrence | Guardrail Installations | Install \$5,000 linear feet of guardrail along Lawrence County Roads 6, 12, 15, 16, and 144 where no guardrail presently exists. Lawrence County has needs for almost 600,000 linear feet of guardrail documented by a safety study done in 2003. This project would meet 10% of the total documented need on the most heavily travelled county roads with traffic volumes greater than 2000 vehicles per day. | Lawrence County – County Engineer | 10 | 181 days or more | \$1,500,000 |
| Lawrence | Above Ground Fuel Storage | Install 8000 gals capacity diesel and 4000 gals capacity gasoline above ground fuel storage tanks and all necessary controls and accessories as part of the relocation of the Lawrence County Engineer's garage facilities to the former ODOT Garage on Lotus St. in Ironton. When ODOT relocated to their new garage, they also relocated their existing above ground fuel storage tanks. This project will restore fuel storage capability at the Lorain Street Garage and will enable the Lawrence County Engineer to use the facility provided to the County by ODOT. | Lawrence County – County Engineer | 10 | 181 days or more | \$200,000 |
| Lawrence | Resurface Lawrence County Road 29 | Resurface 5.5 miles of Lawrence County Road 29 with an overlay of two 1 inch lifts of bituminous concrete intermediate and wearing courses with aggregate shoulders and line striping. This county road provides the primary access to the U S Forest Service's Lake Vesuvius Recreation Area and adjacent Wayne National Forest lands plus a number of private residences and was last paved in 1996/1997. (This project data is being resubmitted 12-25-09. It was first submitted 2-24-09 and although marked as "submitted" no email confirmation was received.) | Lawrence County – County Engineer | 20 | 181 days or more | \$550,000 |
| Lawrence | Proctorville and Sybene Water Drainage | Project will divert overflow water from flooding and remaining in or around existing playground locations. Recent construction has increased the overflow water and current system lacks capability to handle this water. This water remains standing and is causing a health concern for children (infants, toddlers, and preschoolers) being in and around this area from potential disease exposure. Project will install storage systems to divert water from areas to appropriate drainage ditches and reducing health concerns. | Ironton-Lawrence CAO Head Start | 8 | 0 to 30 days | \$112,000 |
| Lawrence | Payment for out of county housing of inmates | Our county must place inmates in the Soloto County Jail. We currently owe the Soloto County Sheriff approximately \$250,000.00 for housing inmates. We will expect \$200,000.00 for inmate housing during 2009. Our county can not pay for the housing costs as they are incurred and continue to grow larger delinquent Soloto County. Soloto County has our work hours for their personnel down to 30.00 hrs with some hours for funds owed to them from our county. If Soloto County would stop accepting inmates this action will require releasing inmates and create a public safety epidemic. Furthermore, if the County of Lawrence budget needs continue to remain delinquent \$200,000.00 (a substantial bid) a real possibility exists that the Lawrence County Jail will close placing a minimum of 15 people out of work and creating a further public safety epidemic. | Lawrence County Sheriff's Office | 20 | 0 to 30 days | \$500,000 |
| Lawrence | Sybene and Proctorville surface repairs | Repair and resurfacing of driveway and parking area due to deterioration resulting from excess overflow water from development of surrounding area. Project will involve replacing drainage tile and installation of additional structure to handle excess water. Resurfacing will take place to reduce potential hazards to children and parents at the centers for services. | Ironton-Lawrence County CAO- Head Start | 6 | 31 to 90 days | \$76,000 |
| Lawrence | Homeless Assistance and Prevention | Assist persons who have become homeless or will soon become homeless due to evictions through temporary rental assistance and utility deposits. These persons will also be referred to employment training/assistance/displacement services, medical care, mental health and drug abuse counseling through our collaboration with other agencies. Through case management we will work the individuals/families to obtain the necessary training, counseling, etc. that they will need to be able to maintain independent housing. With our requested level of funding we can assist 45 individuals or families out of homelessness and into stable housing. Purchase equipment to expand business into commercial real estate lawncare business. | Ironton-Lawrence County Community Action Organizat | 2 | 0 to 30 days | \$325,000 |
| Lawrence | Lawncare Expansion | Would create 3 jobs and is "shovel ready" | Bowling Excavation Inc. | 3 | 0 to 30 days | \$14,000 |
| Lawrence | Courthouse Security | Courthouse Security jobs are at risk, without additional funding, positions could be added with grant funds. | Lawrence County Court of Common Pleas | 4 | 0 to 30 days | \$100,000 |
| Lawrence | Keystone Flooring | I want to have a veteran owned business to where I can create jobs and get state government and federal government contracts, County schools, South Point Local School District is a rural district in the southern most part of the state. More than 50% of our students are economically disadvantaged and 100% live in Appalachia. We currently operate a daily live TV broadcast area of our two elementary schools. This broadcast has been in continuous operation for over 9 years. Fifth grade students handle all aspects of the broadcast including sound, lighting, camera work, teleprompters, and content. Traditionally, we have received five Prizes for our entire community with the cooperation of our local cable provider, Armstrong. Our equipment is old and disappated and sometimes fails. We need help to replace equipment and expand. This program provides students with academic enrichment as well as confidence and self esteem. This minimal investment would be invaluable to the economically disadvantaged and minority youth in our district. We would like our students to enjoy the same opportunities afforded other rich districts elsewhere in the state. This program teaches our students 21 century skills and could lead to unique career path opportunities. Help us help our kids compete in this new global economy. | Disabled veteran business | 8 | 0 to 30 days | \$300,000 |
| Lawrence | South Point Broadcast | This project will involve construction of a 5 bay fire station to house fire and rescue vehicles for the Lawrence Township Vol. Fire Department. This project will replace the existing fire station that has outlived its useful life. | South Point Local School District | 0 | 0 to 30 days | \$98,000 |
| Lawrence | Lawrence Township Fire Station-Kitts Hill | This project will involve the existing fire station to house fire and rescue vehicles for the Lawrence Township Vol. Fire Department. | Lawrence Township Trustees | 20 | 91 to 180 days | \$1,500,000 |
| Lawrence | Lawrence Township Fire Station-Andis | This project will involve the existing fire station to house fire and rescue vehicles for the Lawrence Township Vol. Fire Department. | Lawrence Township Trustees | 20 | 91 to 180 days | \$1,500,000 |
| Lawrence | Child Abuse Investigator | Confirm an assignment of a full-time officer to the Local Children's Services unit to investigate child neglect, physical and sexual abuse. Current funding shared via Children's Services and Sheriff. Sheriff received 15% budget out in personnel and know if Child Services can continue funding this position due to budget reductions. | Lawrence County Sheriff | 1 | 0 to 30 days | \$51,500 |
| Lawrence | School Resource Officer | Our entire county now has one SRO for seven public districts. The costs of the SRO is shared among the Sheriff, Schools, and Juvenile Court. A few schools have initially indicated a need to reduce or eliminate their funding. Grant funds will continue the SRO assignment and provide schools necessary time to give the presentation to continue the appointment after the fiscal COPES period. | Lawrence County Sheriff | 1 | 31 to 90 days | \$52,606 |
| Lawrence | RiverWalk Inland Harbor Development | The project involves the construction of a 400 slip inland harbor marina off of the Ohio River within a planned community known as RiverWalk. The project will not only support an remedating private related private sector investment of \$5,341,208 creating a minimum of 50 FTE jobs, the long term projects is a private sector investment of \$139 million and the creation of in excess of 500 jobs. The Project will also provide year round docking facilities for the Coast Guard as well as other regional and local Emergency Management boat fleets. These facilities will allow a much greater response time onto the Ohio River in the Greenup Locks and Dam Pool. This section of the Ohio River, known as the Port of Ironton, has the largest volume of commercial barge traffic of any inland port in the nation. Much of this cargo is vital for national security interests. | Ironton Lawrence CAO | 500 | 31 to 90 days | \$7,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Lawrence | The Pioneer Project - Dual Credit Opportunities | South Point High School will partner with Ohio University to implement dual credit courses in a variety of venues. South Point High School will serve as the pilot school for the program and will work through implementation problems. Other districts in the county will be added during the second phase of the implementation of Ohio University. By creating this partnership, we are giving our students the college experience and an established relationship with Ohio University producing the seamless transition from high school to post-secondary. The main objective of this partnership is to see that all of the students in Lawrence County, especially our income students, have the opportunity for post-secondary experience and are prepared for that experience. As the pilot, South Point High School will offer dual credit courses for students in a variety of settings. This will provide the students various opportunities to gain experience and acquire college credit while still in high school. The project will cover the tuition for the South Point students as well as books and any lab fees. | South Point Local Schools | 50 | 0 to 30 days | \$150,000 |
| Lawrence | South Ironton Industrial Park Infrastructure Compl | Construction of approximately 1,200 LF of water, along with associated storm drainage, lighting, and other associated improvements to complete the basic infrastructure for the 30-acre South Ironton Industrial Park. | Ironton Lawrence CAO | 300 | 31 to 90 days | \$689,878 |
| Lawrence | Tile Project | Replacement of 14 bridges with culverts. The expected outcome is that the culverts will help reduce bank erosion and reduce construction costs. This will lower maintenance costs thus making this project a more affordable and sustainable one. | Elizabeth Township | 3 | 31 to 90 days | \$25,000 |
| Lawrence | Student Resource Integration | Resources, while very limited, in place in an attempt to build community awareness and interest in bringing our students to the 21st Century educational experience. Currently, more technologically advanced resources and equipment would be of great use, however the budget is not there for it. | South Point Local School District | 1 | 0 to 30 days | \$130,000 |
| Lawrence | Southern Ohio Public Schools Health Care Insurance | Our district also needs someone to organize and integrate the resources and students. At the same time including parents, community members, local businesses and such in a partnership of promoting education locally. The children would feel the support and backing of these adults, which in turn, would give them intrinsic and self-worth. | Lawrence County Educational Service Center | 60 | 0 to 30 days | \$500,000 |
| Lawrence | Connecting Opportunities for Economic Success in | South Point Local School District is a rural district in the southern most part of the state. With just under 60% of our students are economically disadvantaged and 100% live in Appalachia. This program would infuse self-esteem in our children and give them confidence to take on challenges and be successful in their lives after graduation, set in motion by providing them with the resources and family life. | Lawrence County Educational Service Center | 500 | 91 to 180 days | \$500,000 |
| Lawrence | Ironton Rail Project | Given our global reality, a small rural community needs to collaborate regionally to strategically align their efforts with other communities creating numerous safety nets of support via economic and educational attainment spanning both to employment. Our P-20 implementation project will align a small planning grant used to gather multiple stakeholders in a Ohio implementation region 7 in Ohio, implementation will result in a more coordinated effort in the creation of a training plan covering multiple sectors of service, education, and economic development agencies. Principles of the plan will be care for rural communities; determining pathways to decent rural jobs; providing education in local knowledge; providing training for rural communities in practical ways; developing curricula to sustain rural life and employment; using technology in locally appropriate ways; and Lawrence County Educational Service Center and chamber of commerce will assist in the coordination effort necessary to create the regional P-20 bond which will coordinate and align 10 P-20 county councils spanning region 7. | U S Rail Corporation | 1,500 | 31 to 90 days | \$500,000 |
| Lawrence | Project Village of Athalia | This request will allow for the planning and engineering services for a project that will connect the new Jackson Township to the River in Ironton, Ohio. This project will utilize former DTA right-of-way for 1.5 miles or rail from the current end of the line at Oak Hill, Ohio. The connection to the river will allow coal producers and other mineral and ore producers as well as manufacturers to transport their products to the port for shipping to domestic and international customers. The project has the potential to produce long term employment in mining and transportation jobs and will retain existing jobs at coal producers and other manufacturers in southeast Ohio. The project will be completed in conjunction with the Lawrence County, Ohio, Coal Authority. | Village of Athalia | 22 | 0 to 30 days | \$150,000 |
| Lawrence | Bellville Rail Project | 1500 feet of sidewalk. This project will consist of approximately four miles of re-installation of track on the former DTA right-of-way at the Bellville Mining Site. The addition of rail to this site has the potential to produce 250 new jobs in the local and coal mining operations in the area. The project will also be vital to the creation of these jobs. The cost of the project will also include the rebuilding of three bridges. This project will be completed in conjunction with the Lawrence County Port Authority. | U S Rail Corporation | 250 | 31 to 90 days | \$4,000,000 |
| Lawrence | Lawrence Ironton Depot Square PID 84852 | Renovation & revitalization of downtown Ironton railroad depot square area with streetscape, parking lots, sidewalks & a covered walkway for city transit support & use | KYOVA Interstate Planning Commission | 20 | 31 to 90 days | \$700,000 |
| Lawrence | Ironton Delaware Street Improvements PID 85840 | The Ironton City School System has consolidated schools on the site of the school system's former junior high school. As a result, the increase of bus and student traffic traffic walking and bicycling has increased significantly, and will be a top concern for students that are much younger age. Delaware Street is currently the only access to this site. The street does not meet urban standards and it only a narrow two lane area street with no sidewalks, lighting, crosswalks, etc. Therefore, there is a major safety concern for students bicycling and walking to school utilizing in unimproved street. | KYOVA Interstate Planning Commission | 20 | 31 to 90 days | \$460,000 |
| Lawrence | Lawrence County Airport Investigation - Former UST | Completion of subgrade/soil investigation associated with a release from former underground storage tanks at the Lawrence County Airport. Project will include soil and groundwater assessment, hydraulic testing, environmental covenant, computer modeling, report preparation and well abandonment. A "No Further Action" status is anticipated at the conclusion of the project. The county currently does not have the funding to perform this work. | Lawrence County Board of Commissioners | 5 | 0 to 30 days | \$42,000 |
| Lawrence | Access to community pharmacy | Purchase existing independently owned drug stores in several counties in Ohio, current owners plan to retire or want to sell the business that they have built over the years for a many different reasons. It is our intention to purchase the store and keep them operating in their existing locations and continue to keep current employees working at each location. This will also allow accessible healthcare for the citizens of the respective towns and small cities where the opportunities are present. | REM Corporation | 22 | 91 to 180 days | \$4,500,000 |
| Lawrence | Career Exploration and Career Pathway with HS/Coll | The alternative for these owners would be selling their stores to national chains who in turn will close the store in its current location let most of the employees go and move the script fits into existing stores that could be miles away from the customer base. This would cause many people to travel to a distant town or a larger city to receive their medication and/or home health care products. | South Point Local Schools | 50 | 91 to 180 days | \$350,000 |
| Lawrence | Learning Extensions | It is our mission to keep the independent pharmacy alive and well in the more rural parts of Ohio. Thank you for your consideration. | South Point Local Schools | 20 | 0 to 30 days | \$100,000 |
| Lawrence | Bucks for Books | According to Ruby Payne, "It is responsibility of educators & others who work with the poor to teach the differences & skills that will allow an individual to make their rise. As for students for many of the poor, the choice never exists." Because of our high economically disadvantaged student population, we have quite a few students not aware of their choices. In order to provide our students with the knowledge to create long term goals, we will begin a career exploration process at the middle school level in grades 7, 8 & 9. During the middle school years, all students will explore the 14 career clusters established by the State's Career Clusters Initiative & National Career Technical Education Foundation. After the exploration process, students will be able to select one of the career pathways at South Point High School. Our new career programs are well-structured curricula that students may follow to move from their high school experience to post-secondary education, technical school, & to successful careers. By partnering with SSSU, our students receive a collegiate experience & established relationship with the university producing a seamless transition. | Chesapeake Middle School | 0 | 91 to 180 days | \$100,000 |
| Lawrence | Heart Healthy U | The learning extensions program will benefit K-12 grade students. These will be various offerings after school, from after school intervention opportunities to tutoring sessions, homework help, or computer lab time. Many of our students do not have the opportunity to work with technology. We now have an advanced technology center in which we could restrict students on skills they need and allow the technology time. Students can also receive help for projects they are doing or a homework assignment they may be struggling with. The money will be used to pay for the teacher's supplemental pay and to pay for the transportation cost as well as the supplemental pay for bus drivers would receive. Because of our low income population, most of our students can't pay for any extra opportunities we can offer. This will allow our students an extension of their learning day and provide the transportation they need. | Chesapeake Middle School | 0 | 91 to 180 days | \$250,000 |
| Lawrence | Kingsbury School Energy Efficiency Update | Project to assist in developing a district wide Accelerated Reading program directed at meeting the core curriculum requirements for reading and language arts set by the State of Ohio. The expected outcome will be to establish and supply a reading program which provide AR books to approximately 1200 students in the Chesapeake School District. | Ironton Lawrence CAO | 5 | 31 to 90 days | \$800,000 |
| Lawrence | Close to Home | Night Management Program led by qualified staff, emphasizing healthy eating and exercise education for Middle School Children with 2 or more risk factors for cardiovascular disease. The program will provide educational classes for the children and their parents and 2-3 exercise sessions per week for the children. The expected outcome is the reduction of the children's weight, cholesterol levels, blood pressure levels and waist circumference from the baseline measurements. | CTH Management | 11 | 91 to 180 days | \$200,000 |
| Lawrence | 21st Century Learning | The project will be an expansion of an existing project to serve the mental health needs of Lawrence County. The project expansion will help reduce direct patient costs. The stimulus money will support our equity position to this project. We already have an existing building located in an improvement zone area. Therefore, the project will help lower to moderate individuals become employed in this community. If stimulus monies were to become available, they would certainly enhance this type of project. | South Point Local Schools | 0 | 0 to 30 days | \$211,200 |
| Lawrence | Cafe on the Point - A Culinary Experience | According to Gary S. Barger (2006), "Besides the income related demands imposed on teachers in the name of higher tougher meaner standards & the energy required to jump through pedagogical hoops, I believe that scarcity is a major obstacle to use. Computing has helped to make a dramatic impact on classroom practice not because there are too many computers, but because there was way too few to do anything interesting." This proposal will help make a dramatic impact on classroom practices by increasing the number of mobile laptop carts in our middle school & high school. The building technology has enabled the school to have a wireless campus, unfortunately, we have a limited number of laptops. Therefore, the scarcity becomes a barrier to learning. Many of our teachers would like to incorporate more advanced technology into their teaching strategies, some have even asked to use the online textbook versions instead of purchasing textbooks (these are made available to the students at home with a login & password). By adding four additional mobile laptop carts in each building we can overcome the barrier of scarcity & provide our students with a 21st century opportunity. | South Point Local Schools | 75 | 31 to 90 days | \$265,000 |
| Lawrence | Ironton/Russell Bridge on Ohio River | This project will renovate the old South Point High Academy into a culinary classroom & restaurant for the Culinary Academy. When renovated the classroom will become a training center, a functioning restaurant with hospitality services & a bake shoppe. The innovation will encompass dining in the open cafeteria to cater banquet room complete with carpet, tables, chairs, & linens. The entrance to the kitchen will need to be altered to create more of a professional appearance instead of a school cafeteria appearance. The old home economics room will need small updates to transition it into the bake shoppe while the existing school kitchen will need minor changes in order to update the equipment. With the hospitality services the students will plan, operate & maintain the restaurant for staff & our community in addition to serving as a catering facility for outside guests. Students will also be running the bake shoppe in conjunction with the restaurant. The bake shoppe will be an entrepreneur outside where the students will own part of the company & purchase shares, items will be sold twice weekly. Near the end of the school year, the company will be "liquidated" & profits divided. | voter | 500 | 181 days or more | \$3,000,000 |
| Lawrence | Law. Afford. Housing Alternative Energy | Major bridge spanning the Ohio River from Ironton, OH to Russellville, VA built in the 1930s so needs to be replaced long over due. The existing bridge is a prime candidate for failure and causing major loss of life it is currently being monitored for stress failure by the state of Ohio stated to be replaced per on the backwater back of funds. | Ironton Lawrence CAO | 10 | 31 to 90 days | \$500,000 |
| Lawrence | | The Ironton Lawrence CAO is a part manager of 7 affordable housing projects consisting of approximately 225 rent controlled affordable housing units. These units are of varying ages and types, some with older and inefficient heating equipment, appliances, etc. One of the biggest challenges of operating and maintaining these housing units and keep them affordable is the excessive power expenses are energy cost of the facilities and the individual units. | | | | |
| Lawrence | | Proposed is addition of solar panels / wind turbines to the units that will allow electrical and hot water generation for use in both the common portions of the units as well as an offset of the individual residents electrical usage. | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Lawrence | Law. Afford. Housing: Energy Reduction | The Ironton Lawrence CAO is a permit manager of 7 affordable housing projects consisting of approximately 225 rent controlled affordable housing units. These units are of varying ages and types, some with older and inefficient heating equipment, appliances, etc. Proposed is the full assessment and replacement of inefficient heating/cooling units, appliances, and general weatherization of these units. The housing management staff would coordinate with the local weatherization program to determine the most cost-effective improvements giving the greatest return on investment. | Ironton Lawrence CAO | 10 | 31 to 90 days | \$500,000 |
| Lawrence | Trainig Facility | Funds would be used to purchase land and construct a firearms range and training grounds for police related training. | Madison Village Police Department | | 0 to 30 days | \$100,000 |
| Lawrence | North Ironton CSO/Sanitary Sewer Separation Constr | North Ironton CSO/Sanitary Sewer Separation Construction Project will separate sewers in the north Ironton and eliminate 2 Combined Sewer Overflows as required by the USEPA Consent Decree within City of Ironton. | City of Ironton | 15 | 31 to 90 days | \$4,500,000 |
| Lawrence | North Ironton CSO/Sanitary Sewer Separation Design | North Ironton CSO/Sanitary Sewer Separation Design Project will design the first phase of the required sewer separation. This is a USEPA Consent Decree project. | City of Ironton | 10 | 0 to 30 days | \$500,000 |
| Lawrence | Lawrence County Juvenile Group Home | Assist in purchasing a group home facility for delinquent youth and abused & neglected children. | Lawrence County Commissioners | 29 | 0 to 30 days | \$300,000 |
| Lawrence | South Point Wellness Center | South Point Local School District has an available facility with a gymnasium to establish a wellness center for the staff and community. Equipment and personnel will be needed to launch the program and provide more health services for our citizens who live in an area that has recently been declared the most unhealthy in the nation. Fitness programs, nutrition programs, and health screenings will be offered and focus on reducing obesity, diabetes, and heart disease. These activities should in turn reduce the cost of healthcare to the district and the employee. | South Point Local School District | 35 | 91 to 180 days | \$200,000 |
| Lawrence | Water System Improvements | The project will involve the installation of 34,500 feet of waterline to provide drinking water for unimproved areas of Lawrence County. The project will also include the replacement of 1,000 water meters with new automated meter technology and maintenance equipment. | Lawrence Water Corporation | 20 | 31 to 90 days | \$1,500,000 |
| Lawrence | Lawrence County Sewer Extension Design | The project will design sanitary sewer extensions into four unsewered communities. The project will serve approximately 230 homes that have failing septic systems and are adjacent to the existing service area of Union Home Sewer District. | Lawrence County Board of Commissioners | 12 | 0 to 30 days | \$1,600,000 |
| Lawrence | Outdoor Research Lab | South Point High School/Middle School is situated on 85 acres of land surrounded by many different varieties of trees and wildlife with tremendous biodiversity. Opportunities exist to provide students with a greater understanding of the scientific process and develop critical thinking and research skills concerning environmental protection, effects of erosion, water quality, and chemical effects on plant life and wildlife. This would direct students toward science and research fields and provide them with a greater understanding of how research works in real life. | South Point Local School District | 15 | 31 to 90 days | \$95,000 |
| Lawrence | Erosion Control | Soils outside the building loop of the new high school are not stable and erosion continues to be a problem. Grading, curbing, and vegetation are needed to protect the property and prevent further subsidence of the roadway during heavy rainfalls. Without completing this work the storm water will continue to erode this portion of the site and work completed to date will be lost. | South Point Local School District | 40 | 31 to 90 days | \$300,000 |
| Lawrence | Lawrence County Historical Jail | The historical Lawrence County jail, located in the Burlington area of the South Point Local School District, is one of only three County jails in Ohio. Burlington was established as the county seat in 1817 and was an important location on the US | South Point Local School District | 35 | 91 to 180 days | \$250,000 |
| Lawrence | Head Start Expansion | Head Start expansion for 40 additional low income preschool children ages 3-5 yrs. who are on a waiting list in Lawrence County. | Ironton-Lawrence County CAO Head Start | 12 | 31 to 90 days | \$240,000 |
| Lawrence | Ironton-Lawrence County CAO Head Start | Early Head Start expansion to serve an additional 105 low income infants who are on a waiting list in rural Appalachia. | Ironton-Lawrence County CAO Head Start | 36 | 31 to 90 days | \$1,050,000 |
| Lawrence | Parenting Program | A pilot parenting program in conjunction with CACHE and the juvenile court system for prevention and intervention of student problems, both academic and behavioral, that are associated with lack of parenting skills. Classes may include such topics as: parenting 101, basic nutrition and health care classes, adult literacy and financial management, and career awareness. | Symmes Valley Local School District | 3 | 91 to 180 days | \$50,000 |
| Lawrence | School/Community Wellness Center | Wellness/Fitness Center to serve the needs of rural community and school district in Lawrence County that has a 60% poverty rate and no fitness or wellness facility within 20 miles of the school. These factors contribute to many health problems in the community and our school age children, including diabetes, obesity, overweight, breathing conditions and heart problems, associated with the "urbanization" region of America and communities that have high poverty rates, an Appalachian population, and lack of availability of rural health care. An indoor walking trail, fitness equipment, and health education space would be included in the approximately \$1,000 sq. ft. facility. | Symmes Valley Local School District | 60 | 31 to 90 days | \$1,300,000 |
| Lawrence | Rural Recreation Center | Creation of a Rural Recreation facility for basketball and tennis courts/outdoor/walk lights). Would be co-sponsored by the Courts to reduce crime rates. | Lawrence County Court of Common Pleas | 3 | 0 to 30 days | \$50,000 |
| Lawrence | TO START A PERSONAL BUSINESS | To begin a florist business or an apparel store. The money would be used to purchase a building and all the materials needed to get the business up and running. | PERSONAL | 10 | 31 to 90 days | \$500,000 |
| Lawrence | Crimes Against Elderly Prevention | To allow for the placement of an investigator without the Prosecutor's staffing that will target suspects preying on the elderly. In addition to enforcement an educational component will educate the senior citizens in our county to protect themselves against physical and mental abuse, as well as fraudulent schemes targeting the elderly that are occurring often and are increasing. | Lawrence County Prosecutor | 1 | 0 to 30 days | \$35,000 |
| Lawrence | Middle School Wireless Technology | Equip rural Appalachian middle school with wireless internet technology and laptop computers for each student in every classroom. | Symmes Valley Local School District | 10 | 31 to 90 days | \$600,000 |
| Lawrence | Elementary Smartboards | This project would equip the 43 elementary/middle school classrooms with smartboard technology and include professional development for classroom teachers to fully utilize the new technology. | Symmes Valley Local School District | 6 | 31 to 90 days | \$135,000 |
| Lawrence | Smartboards | This project would equip each of the high school's 21 classrooms with smartboards, including the computer, projector and hookup necessary. This would also include professional development for classroom teachers to learn to utilize the technology fully. | Symmes Valley Local School District | 4 | 31 to 90 days | \$65,000 |
| Lawrence | Wireless Technology | Equip rural Appalachian high school in a district with a 60% poverty rating with wireless internet technology and laptop computers for each classroom and make them available to every student. The technology is so isolated that cell service is not available. | Symmes Valley Local School District | 10 | 31 to 90 days | \$500,000 |
| Lawrence | athletic/wellness facility | The existing facility located in the Fairland Local School District which is now utilized for athletic recreation and wellness related activities is in need of replacement. Local funds are not available due to the poor economy and school district financial concerns. Local hospital and university personnel will contribute to the school curriculum and community program planning along with existing school personnel. All activities in this facility are for good oriented and evaluated to determine if expected outcomes have been met. A variety of available services include: health insurance utilization, aggressive wellness education, athletic activities and possible job creation will be the intended outcomes of this program. The use of various technologies will be involved in every aspect of the implementation and evaluation of this plan, along with the unique aspect of networking with local hospitals and universities. The combination of facility, technology and business partnerships will ensure a broad base of participation. Plans for the facility and program are prepared and construction can begin with relatively short notice. | Fairland Local School District | 12 | 0 to 30 days | \$3,500,000 |
| Lawrence | Fairland Schools Classroom Technology Update | All in use are over 8 years old. All the networking equipment is 7 years old. None of our classrooms are equipped with interactive whiteboards, while the new schools built under the current CDEP guidelines are so equipped. Similarly the CDEP funds classroom sound amplification systems for new construction as well. We need to utilize and maintain current technology to best prepare our students for the 21st Century. Much of our Video Production course equipment was purchased with grants over 8 years ago. This equipment needs updated to support the latest digital video and audio technologies. | Fairland Local School District | 100 | 0 to 30 days | \$1,100,000 |
| Lawrence | Bus Security Cameras | Purchase and install interactive whiteboards and projectors in each classroom. \$400,000 Replace 200 aging computer hardware and software \$200,000 Replace and update 5 servers \$50,000 Replace and update network infrastructure to support wireless technology \$200,000 Update video production equipment \$100,000 Install classroom sound amplification systems in each classroom. \$100,000 | Symmes Valley Local School District | 3 | 31 to 90 days | \$40,000 |
| Lawrence | Communication System | Most bullying, harassment, and violence on school buses in our district are centered on females and young children. Nearly 90% of our district's students are bused to school since we are located in a rural, poverty-stricken Appalachian area of the state. Most students ride a bus for nearly one hour each day. 20 security cameras installed on our fleet of buses would help stop the violence and bullying directed at female students, as well as all other students on the buses. | Symmes Valley LSD | 10 | 31 to 90 days | \$55,000 |
| Lawrence | Elementary Lunch Room/Kitchen | Upgrading and expanding the existing communication (telephone) system in the district. Recently, the phone system was "kicked" for over 48 hours resulting in a lack of communication ability with the community (parents), and emergency and medical resources. Unfortunately, this is not just a one-time event. This lack of communication has happened on several occasions. Being located in a rural area makes cell phone service non-existent for both school buildings in the district. The district students and personnel are isolated and vulnerable when the communication system fails. | Symmes Valley Local School District | 20 | 31 to 90 days | \$120,000 |
| Lawrence | BES | Upgrades of all major kitchen equipment for an elementary kitchen serving 600 students for breakfast, lunch, and snack time. Also, the cafeteria needs new tables and seating for 200 students served during each of 3 lunch periods. The kitchen/canteen was built nearly 20 years ago and no major upgrades or remodeling has been undertaken since since. Aging kitchen equipment and seating needs replaced. 100% diversion of waste stream/recycling. REE - producing usable products to include: energy with zero emissions, carbon enhanced aluminum products, carbon reinforced plastic lumber along with the sale of other marketable recycled materials. | Bio-Energy Solutions, LLC. | 75 | 0 to 30 days | \$7,000,000 |
| Lawrence | Job Retention-Victim Advocates | The Lawrence County Prosecutor has received funding to employ 3 victim advocates. The advocates provide support to crime victims and offer professional guidance through the complex judicial process a crime victim faces. | Lawrence County Prosecutor | 3 | 0 to 30 days | \$58,500.00 |
| Licking | Alternative Water Supply Development | In prior years match funding was provided by the County Commission. Now the match funding obligation is the Prosecutor's. However, match funds are not provided in the form of an increased appropriation. In fact budgets have been reduced. | City of Newark, OH | 20 | 91 to 180 days | \$12,500,000 |
| Licking | West Side Transmission Line | The lack of match funds severely threatens the employment of our victim advocates. The potential layoffs of victim advocates will be an unacceptable dilemma for prosecutors who rely on their professional assistance and would be a traumatic loss to crime victims. Match funds are used from the reduced Prosecutor's budget creates an even greater shortage within the Prosecutor's budget. | City of Newark, OH | 25 | 91 to 180 days | \$3,500,000 |
| Licking | AMR System | Development of an alternative water supply for the City utilizing riverbank filtration. Installation of a 104 collector wells and piping to supply raw water to the treatment plant. This system will reduce chemical costs and improve plant treatment efficiencies. This would be a high priority for the City. | City of Newark, OH | 2 | 0 to 30 days | \$2,000,000 |
| Licking | Standby Power Generator | Installation of a 16" transmission waterline from Sharon Valley Road in the vicinity of OSH-1 to the Tamarack Industrial Park including a water tower in the industrial park. This project is part of the Master Plan for the Newark water system and is planned to provide improved pressure and more consistent flow to industries in the area. | City of Newark, OH | 15 | 0 to 30 days | \$1,000,000 |
| Licking | East Side Transmission Line | Installation of an automated meter reading system using fixed base technology. This project has been on-going for the past several years and additional funding would accelerate the completion of the project. Division of Water and Wastewater personnel are installing reading device in individual homes. | City of Newark | 25 | 31 to 90 days | \$2,300,000 |
| Licking | Debt forgiveness for new Water Reclamation Facility | Installation of a Standby Power Generator for the Water Treatment Plant | Village of Hebron | 500 | 0 to 30 days | \$10,000,000 |
| Licking | Southwest Pressure Zone Project | The Village incurred \$14 million in debt to build this new WRF due to expected demand and environmental regulations. Due to changes in the economy, growth has declined and wastewater revenue has decreased, thus making the Village's long-term financial situation less than ideal. The economic stimulus would allow the Village to reduce utility rates essentially underwriting local employers and providing retention incentives as well as helping up utility income to be used for infrastructure programs throughout the Village. | City of Newark | 20 | 31 to 90 days | \$2,000,000 |
| Licking | Effluent Sewer - WRF to South Fork of Licking River | Development in the southwest section of the City has created problems in providing consistent pressure to service the high elevations. Demands in the area have caused pressure drops to nearly below recommended levels. Mowing has shown increased pumping and storage will help correct the problem. | Village of Hebron | 500 | 91 to 180 days | \$1,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Licking | Storage Facility Mixing System | The installation of the mixing equipment in each of the finished water storage tanks to address USEPA mandated Stage 2 DBPR. The equipment will immediately improve water quality by continuously circulating the finished water throughout each tank. Short-circuiting and stagnation will be reduced by achieving a complete mix with "zero" energy cost. Chemical and energy demands at the treatment plant will be reduced as well. Installation of a high rate treatment system to comply with federally mandated regulations that are currently unfunded. System will help to reduce turbidity sewer overflow into the Licking River. | City of Newark | 5 | 31 to 90 days | \$250,000 |
| Licking | High Rate Treatment System | The installation of a high rate treatment system to comply with federally mandated regulations that are currently unfunded. System will help to reduce turbidity sewer overflow into the Licking River. | City of Newark | 150 | 0 to 30 days | \$21,000,000 |
| Licking | Re-Investing Kirkersville | The area is in need of a used clothing and food venue for several residents and some funds for assistance relief. The Kirkersville Lions club would like to establish such a facility to help with the needs of this area and the surrounding areas. The need for the money is limited to establishing a building and two partime to full time workers to run the pantry and clothes closet and make referrals to are agencies for moneies and other help. As the project grows, so will the help from area lions and more employees will be added later as needed. | Kirkersville Area Lions Club | 2 | 31 to 90 days | \$50,000 |
| Licking | Public School Outreach | Funds would be used to expand a very innovative creative education program currently piloted in Granville public schools. This program gives teachers unique tools to infuse any curriculum (i.e., math, science, etc.) with breathrough creative-thinking principles that move students beyond mere memorization to learn creative problem-solving skills. Collaborating with the teachers, we built subject-area specific lesson plans and their model teach them in the classroom. We also provide all support materials so teachers are empowered to implement the lessons on their own. The separation will focus on under-served systems in Central Ohio (for example, Newark City Schools). Our current program includes GSVA, 15 Granville public school teachers, Henry Pitman of the COE, Oregon University, and Project Zero at Harvard's Graduate School of Education. In expanding the program, we'll work with 40 teachers per year for 4 years (360 total) and reach all of our students (total of 63,000 over 4 years). We'll hire 8 staff and contractually employ approximately 8 subject-area consultants for 4 years to implement the expansion of this program. We'll fill with 3.25 with associated work. Include work on temps where appropriate and joint repairs as necessary | Granville Studio of Visual Arts (GSVA) | 14 | 31 to 90 days | \$7,500,000 |
| Licking | Dist 5, PID 85375, LIC SR 37/16 14.65/14.24 | Resurfacing of Divided System | Ohio Department of Transportation | 64 | 31 to 90 days | \$2,228,270 |
| Licking | Dist 5, PID 25685, LIC IR 70 08.73 | Resurfacing of Divided System | Ohio Department of Transportation | 119.9 | 31 to 90 days | \$4,176,016 |
| Licking | Dist 5, PID 25685, LIC IR 70 08.73 | Resurfacing of Divided System | Ohio Department of Transportation | 119.9 | 31 to 90 days | \$4,176,016 |
| Licking | Comprehensive Repaving Program | Repaving 5 miles of local street segments | City of Pataskala | 50 | 31 to 90 days | \$1,007,100 |
| Licking | Downtown Sidewalk Accessibility Rehab | Install 40 handicapped ramps | City of Pataskala | 25 | 0 to 30 days | \$500,000 |
| Licking | WWTP Processing Plant | Replace WWTP processing equipment pumps, building equipment Install turn lanes | City of Pataskala | 75 | 31 to 90 days | \$1,545,000 |
| Licking | Summit & Broad Intersection Improvements | Install new signs Construction & Design Engineering | City of Pataskala | 50 | 31 to 90 days | \$1,000,000 |
| Licking | SR 310 Turn Lane | Construct 1.4 mile one lane road Construction Engineering ROW acquisition New utilities | City of Pataskala | 125 | 181 days or more | \$3,500,000 |
| Licking | Dist 5, PID 85375, LIC SR 37/16 14.65/14.24 | M/I and fill with 3.25 with associated work. Include work on temps where appropriate and joint repairs as necessary | Ohio Department of Transportation | 64 | 31 to 90 days | \$2,228,270 |
| Licking | Sanitary Sewer - the Oaks | Install 6575 LF Sanitary Sewer 175 LF Sanitary House Connections 28 manholes 7400 sq. yd sand and mulch cleaning & grubbing 30 sq. yd pavement replacement construction engineering all risers and fittings Reinforcing with rebar work. M/I 2' and fill 1-3/4" Inter and 1-1/2" surface. Include work on ramps where appropriate/joint repair as necessary. Include millfill of shoulders | City of Pataskala | 30 | 31 to 90 days | \$661,000 |
| Licking | Dist 5, PID 76384, LIC SR 16 19.79 | Install new dewatering press. | Ohio Department of Transportation | 141.6 | 31 to 90 days | \$4,933,862 |
| Licking | WWTP Press & Building | Construct new enclosure to house press | City of Pataskala | 15 | 0 to 30 days | \$309,000 |
| Licking | Dist 5, PID 81251, LIC/MUS US 40 26.66/01.21 | Rehab bridges & superstructure, on US 40 in Lic & Muskingum Counties | Ohio Department of Transportation | 25.7 | 31 to 90 days | \$896,404 |
| Licking | Downtown Storm Sewers | 360 LF Storm Pipe 25 Catch Basins 3 manholes 5 Man Structures Seedling and Mulching 300 SQ YD 360 CY Temporary Pave 240 CY Replace Pave Utility Relocation Construction Engineering | City of Pataskala | 15 | 31 to 90 days | \$349,000 |
| Licking | Comprehensive Rural Drainage | Replace 13 culverts Construction engineering | City of Pataskala | 30 | 0 to 30 days | \$710,350 |
| Licking | Regional Drainage/Watershed | Assess flow and clean ditch Replace 3 culverts Construct structure to direct flow to original routing | City of Pataskala | 25 | 31 to 90 days | \$500,000 |
| Licking | Seminary Road Water Tower | Install 500,000 gallon water tower and 1300 linear feet of distribution line to service the City's industrial corridor. Low water pressure has been a persistent element that has blocked companies from locating in the corridor and also causes a critical fire safety concern. Plans are complete, and easements and EPA permits have been acquired. The project is shovel ready. | City of Heath | 1000 | 31 to 90 days | \$1,400,000 |
| Licking | Conner Ave Drainage | Replaced culverts Channel improvements Direct flow to access barriers to natural route Acquire Easements | City of Pataskala | 25 | 31 to 90 days | \$500,000 |
| Licking | State Route 79 Water Line | Install 3700 linear feet of 12" water line along the east side of SR 79. The existing water line, which lies underneath the center land of SR 79, due to its age, poor physical condition, location and size, provides very weak pressure, breaks consistently and does not offer dependable fire protection to residential or commercial customers. Several businesses have relocated and it is feared more will relocate or leave the area if the problem is not corrected. Plans are complete and no additional right of way or easements are necessary. The project can begin as soon as a permit to install is obtained from the Ohio EPA. | City of Heath | 400 | 31 to 90 days | \$400,000 |
| Licking | Wastewater Head Works Renovation | Completely renovate the waste receiving end of the plant to ensure compliance with EPA requirements and replace worn-out equipment. | City of Heath | 50 | 181 days or more | \$4,200,000 |
| Licking | Thornwood Drive Improvements, Phase I | The purpose of the Thornwood Drive Improvement Project is to upgrade the existing road so it is capable of supporting industrial traffic generated by development occurring in an adjacent 500 acre industrial development site. This road will become the primary access to at least 50% of the site. In addition, this segment of Thornwood Drive is part of a multi-jurisdictional project designed to create an industrial corridor servicing Heath, Newark and Licking County. Phase I is the culvert replacement portion of the project. | City of Heath | 1000 | 91 to 180 days | \$650,000 |
| Licking | Wireless Network Infrastructure | To connect the City's safety forces, local schools and businesses and develop a model interfacing the City, County, State and Federal government to first responder public safety applications through a 4-9 GHz licensed band and a Wi-Fi 802.11 network. To be recognized as a leading technological community in Licking County and Ohio. | City of Heath | 50 | 91 to 180 days | \$330,000 |
| Licking | Relocation of Hopewell Bridge Water and Sewer Relo | The water and wastewater lines on the bridge cause a safety issue. A large quantity of water is wasted due to leakage blow-off to keep from freezing lines. Relocation would maintain adequate fire protection and sewer collection to the east side of the city. This project is ready to bid, repairs to or demolition of 10-15 buildings that are in such danger that the owners cannot afford to repair them. Some have been abandoned and unoccupied for some time and need to be demolished. | City of Heath | 20 | 31 to 90 days | \$250,000 |
| Licking | Housing Redevelopment | | Village of Buckeye Lake, Ohio | 2 | 91 to 180 days | \$150,000 |
| Licking | Rebuilding of Water Plant Clarifiers | Recondition and retrofit existing clarifying structures to meet current standards by adding a new drive system to run the rapid mixes. | City of Heath | 50 | 91 to 180 days | \$400,000 |
| Licking | Buckeye Lake Village water system | Installation of approximately 22,000 linear feet of water distribution lines, booster station, water tower and telemetry. | Village of Buckeye Lake, Ohio | 20 | 31 to 90 days | \$3,000,000 |
| Licking | Davis-Shai House Renovations | The Davis-Shai House is a City owned and operated historical structure used as a cultural center and banquet facility and will also act as the gateway to a proposed 300 acre commercial development site via an extension of Central Parkway. The renovation will triple its capacity and more than double the number of employees. A large portion of the funding for this project has already been obtained. The purpose of this request is to acquire the residual funding necessary to complete the financing of the project. | City of Heath | 20 | 31 to 90 days | \$579,707 |
| Licking | Dist 5, PID 25685, LIC IR 70 08.73 | Resurfacing of Divided System | Ohio Department of Transportation | 119.9 | 31 to 90 days | \$4,176,016 |
| Licking | Thornwood Drive Improvements, Phase II | The purpose of the Thornwood Drive Improvement Project is to upgrade the existing road so it is capable of supporting industrial traffic generated by development occurring in an adjacent 500 acre industrial development site. This road will become the primary access to at least 50% of the site. In addition, this segment of Thornwood Drive is part of a multi-jurisdictional project designed to create an industrial corridor servicing Heath, Newark and Licking County. Phase II is the road construction portion of the project. | City of Heath | 1000 | 181 days or more | \$6,000,000 |
| Licking | Hopewell Drive Bridge Renovation | The current 180 foot long box beam bridge is in poor condition and has been placed on ODOT's rehabilitation list. It will be necessary to replace all components of the bridge except piers and abutments. Design is currently underway and will be complete by late 2009. | City of Heath | 20 | 181 days or more | \$550,000 |
| Licking | Central Parkway Extension | This project will consist of extending Central Parkway 1.800 feet through 500 acres of undeveloped commercial property and terminating at the intersection of Irving WMS Drive. Construction of this road will remove the only obstacle to development, which is lack of a second access point. A potential developer recently withdrew plans for construction due to the lack of a second access point. | City of Heath | 1000 | 181 days or more | \$5,000,000 |
| Licking | Water Park - Rec Center Bikepath | This project would consist of constructing 4,000 linear feet of a multi-use path that would allow bike and pedestrian access from the Port Authority. The city's primary industrial park is over half of the residential subdivisions and also interconnected two other city parks and two public schools. | City of Heath | 50 | 181 days or more | \$175,000 |
| Licking | City of Newark Log Pond Diversion Channel | Restoration of approximately 3,000 feet of Log Pond Diversion Channel. | City of Newark, Ohio | 10 | 31 to 90 days | \$1,500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Licking | Ohio Student Community Service Fellowship | Having local community needs through engaging low-income and/or first generation college-aged students in a Student Community Service Fellowship Project funded through the Corporation for National and Community Service. The OCC (SCSF) Program is a part-time AmeriCorps program that provides low-income and/or first generation college-aged students with a \$1000 education award for the completion of 300 hours of service to a local community agency. In 2008, the OCC (SCSF) projects has engaged over 150 college students on 8 Ohio College campuses who have provided over 45,000 hours of service to agencies and organizations serving local communities. This project addresses important needs for Ohio's non-profit community as well as the students in our higher education system in these unprecedented economic times. Governor Strickland has called for "extraordinary partnerships and a spirit of economic cooperation" in order to address Ohio's rapidly deteriorating economic circumstances. To address gaps in public support, Ohio's non-profit co | Ohio Campus Compact | 50 | 31 to 90 days | \$210,000 |
| Licking | Paving - 565 Industrial Parkway, Heath | Preparation work, paving, and striping of 32,400 square feet of parking lot. | Licking County Board of MR/DD | 8 | 31 to 90 days | \$82,940 |
| Licking | ESW roofing project | Removal of current roofing and installation of EPDM flat roofing membrane. Project will provide energy efficiency to facility. | Licking County Board of MR/DD | 15 | 91 to 180 days | \$301,290 |
| Licking | ESW Internal Lighting program | Upgrade of internal lighting system to an integrated lighting system to improve work environment and realize potential energy savings of up to 20%. | Licking County Board of MR/DD | 6 | 31 to 90 days | \$161,409 |
| Licking | ESW Sidewalk replacement | Replacement of existing sidewalk and widening to accommodate wheelchair accessibility. | Licking County Board of MRDD | 4 | 91 to 180 days | \$19,195 |
| Licking | Hanover Water Treatment System | New water system The plan for this project is to add solar laminate roof panels to Granville High School and Granville Middle School. The solar panels would generate 19.8 kilowatts per building for a total of 4.8 kilowatts. This project would complement the school district's energy savings program that has been in place since July 2008. Since July 2008 the Granville School District has reduced the kWh by over 950,000 kWh saving the district over \$65,000. The PV arrays would not only help save the district money, but the arrays would be used as an educational platform for the teachers and students. | ADR and Associates | 120 | 181 days or more | \$4,900,000 |
| Licking | Solar Photovoltaic Energy Reduction | | Granville Exempted Village School District | 12 | 31 to 90 days | \$425,000 |
| Licking | Adult Services Workshop Window Replacement | Replacement of windows for increased lighting and energy efficiency. | Licking County Board of MRDD | 6 | 91 to 180 days | \$24,888 |
| Licking | 151 Moull St Window Replacement | Replacement of windows at home owned by housing corporation. Home was originally purchased with OGDMPD Digital Housing Refers. Replacement of windows will increase energy efficiency in the home. | Licking County Board of MRDD | 8 | 31 to 90 days | \$8,800 |
| Licking | Moull and Gay St street roof replacement | Replacement of original roofing at 2 homes owned by local non-profit housing cooperatives. Homes were originally purchased with OGDMPD Capital housing funds. Upgrading of roofing will increase energy efficiency of building. | Licking County Board of MRDD | 12 | 31 to 90 days | \$26,240 |
| Licking | Rooftop Unit Replacement | The Granville Elementary School is currently being serviced by two low-efficiency, sub-standard, air handler units. The two air handlers have been major users of energy and they are costing the district increased maintenance costs. The proposed plan is to replace the air handlers with two 13 SEER minimum efficiency rooftop units. The units would also have Top 1 economizers. The units would require 1200 lbs of tons in 12.5 tons. The units would also be back into the existing Data Building Automation system. Additionally, there are two new unit added on the east side of the middle school that would take the place of an existing system on the west side of the building that is oversized and unable to meet the needs of both areas. | Granville Exempted Village School District | 15 | 31 to 90 days | \$550,000 |
| Licking | Water Transmission Line | Secure ROW Project Design and Engineering Installation of approximately 2.5 miles of water transmission line to complete loop between water treatment plant and SR 16 | City of Pataskala | 30 | 181 days or more | \$750,000 |
| Licking | ESW External lighting upgrade | Replace and upgrade external lighting at facility. Increased energy efficiency by utilization of new lighting equipment and fixtures. | Licking County Board of MRDD | 6 | 0 to 30 days | \$4,430 |
| Licking | 600 Industrial Parkway restroom floor replacement | Replacement of flooring in 8 bathrooms in the adult services workshop. | Licking County Board of MRDD | 4 | 91 to 180 days | \$17,600 |
| Licking | ESW front window replacement | Replacement of 11 large windows to increase energy efficiency. | Licking County Board of MRDD | 12 | 91 to 180 days | \$23,320 |
| Licking | Agency electronic storage of records | Design, install, implement software and hardware for the electronic storage of documentation of the agency. This can include information of individuals served and other information documentation that is required to be maintained. Provides for a more efficient and effective manner in which information can be stored and retrieved, positively impacting energy and environmental issues. | Licking County Board of MRDD | 8 | 181 days or more | \$40,000 |
| Licking | Jacksontown Sewer Project | Project Summary: The unincorporated area of Jacksontown, Ohio, Licking Township, has been identified by the Ohio Environmental Protection Agency to have unsanitary stream conditions due to failing septic systems. All options have been addressed and the only viable solution to solve the problem is to tie into the Buckeye Lake Sewer System. The proposed project is to install approximately 26,750 feet gravity sewer, 2,400 feet of force main sewer, 87 manholes and a pump station and other necessary equipment to operate the system. A secure capital funding system from the federal government for energy efficiency projects and improvements to Department owned facilities. LEED Certified all buildings. Estimated Cost: 10% increase in cost for all new projects. Replace existing single-paneled windows with more efficient windows. Estimated cost: \$10,000 for Building B, \$50,000 for Building E, \$15,000 for main building. Occupancy sensors for rooms to reduce lighting and exhaust fans when empty. Estimated Cost: \$200/device. Occupancy sensors for lighting systems when open or office spaces are empty. Estimated Cost: \$300/device. Vertical lighting poles fitted with solar photovoltaic panels and LED lights. Estimated Cost: \$3,000/light. Pump discharge lines requiring no irrigation. Estimated Cost: \$300/line. Increase pond volume for facility water usage and evaporation. Estimated Cost: \$500/pond. Install solar photovoltaic panels along with the approved capital roofing project. Estimated Cost: Upgrade installation, \$100,000 Estimated Cost: Solar panels, \$200,000. Geothermal heating/cooling systems. Estimated Cost: AFB Buildings, \$500,000. Water tanks. Estimated Cost: \$300,000. Total Estimated Cost: \$1,800,000. | Licking County Water and Wastewater | 25 | 91 to 180 days | \$2,700,000 |
| Licking | State Fire Marshal Energy Efficiency Capital Proje | LED lighting LED lighting poles fitted with solar photovoltaic panels and LED lights. Estimated Cost: \$3,000/light. Pump discharge lines requiring no irrigation. Estimated Cost: \$300/line. Increase pond volume for facility water usage and evaporation. Estimated Cost: \$500/pond. Install solar photovoltaic panels along with the approved capital roofing project. Estimated Cost: Upgrade installation, \$100,000 Estimated Cost: Solar panels, \$200,000. Geothermal heating/cooling systems. Estimated Cost: AFB Buildings, \$500,000. Water tanks. Estimated Cost: \$300,000. Total Estimated Cost: \$1,800,000. | Department of Commerce | 250 | 0 to 30 days | \$2,000,000 |
| Licking | CSO 1006 Connection | Connection of CSO 1006 to the Licking River Interceptor in order to divert flow to the high rate treatment system and eliminate a combined sewer overflow. This project is part of our long term control in order to meet Federally unfunded mandates. | City of Newark | 50 | 181 days or more | \$750,000 |
| Licking | CSO 1013 Underflow Work | Work on underflow at CSO 1013 to divert more flow to the High Rate Treatment Facility. This project is part of our long-term control plan to reduce overflow and to comply with our discharge permit requirements. This also will assist us in meeting federally unfunded mandates to reduce CSO discharges | City of Newark | 25 | 181 days or more | \$750,000 |
| Licking | Raccoon Interceptor | Installation of an interceptor sewer designed to bypass the combined sewer in the downtown area of town in order to reduce combined sewer overflow during rain events. This project is part of compliance schedule issued by Ohio EPA as part of our discharge permit. Completion of this project will assist the City in complying with federally unfunded mandates to reduce CSO discharges. | City of Newark | 50 | 181 days or more | \$2,750,000 |
| Licking | Sharon Valley Road Sewer | Replacement of a failing sewer line to serve residents along Sharon Valley Road. | City of Newark | 50 | 91 to 180 days | \$200,000 |
| Licking | Community Center for the Residents Water's Edge | This is a community center for the young people and their families to go learn about God and how to be a better community. The facility has room for community dinners and some recreational games, such as football, table tennis, or pool. We also hold children's bible studies, teen bible studies, and adult bible studies. There is also alcoholic beverages and other community meetings to support community projects. We have enough land to build a small gymnasium to provide a large recreation place to go on the coast months. This is why I was requesting a stimulus to give people somewhere to go for fun and enjoy time together as a family and as individuals. Vehicles for Licking County Transit Board | Water's Edge Community Center | 10 | 31 to 90 days | \$50,000 |
| Licking | Dist 5, PID 85854, LIC Vehicles | Compressed natural gas conversion (CNG) for the Licking County Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$60,000 |
| Licking | Dist 5, PID 85858, LIC CNG conversion | Light transit vehicles with a narrow body for Newark/Heath City Transit | Ohio Department of Transportation | 0 | 91 to 180 days | \$10,000 |
| Licking | Dist 5, PID 85859, LIC LTNs | Modified minivans for Newark/Heath City Transit | Ohio Department of Transportation | 1 | 31 to 90 days | \$52,000 |
| Licking | Dist 5, PID 85860, LIC Modified minivans | Security upgrade for the Licking County Transit Board | Ohio Department of Transportation | 1 | 31 to 90 days | \$33,000 |
| Licking | Dist 5, PID 85855, LIC Security upgrade | Scheduling software upgrade for the Licking County Transit Board | Ohio Department of Transportation | 0 | 31 to 90 days | \$10,000 |
| Licking | Dist 5, PID 85856, LIC Scheduling software upgrade | 15 fareboxes for Newark/Heath City Transit | Ohio Department of Transportation | 1 | 31 to 90 days | \$50,000 |
| Licking | Dist 5, PID 85861, LIC 15 fareboxes | 10 bike racks for Newark/Heath City Transit | Ohio Department of Transportation | 0 | 31 to 90 days | \$15,000 |
| Licking | Dist 5, PID 85862, LIC 10 bike racks | Parking lot expansion for the Licking County Transit Board | Ohio Department of Transportation | 0 | 31 to 90 days | \$15,000 |
| Licking | Dist 5, PID 85857, LIC Parking lot expansion | Remove uneven stone pavers and pave the Robbins Hunter Museum parking area with concrete. Currently, the four car parking area is covered with stone pavers which are set on an uneven gravel foundation. After any rainfall, mud and puddles remain. The area is so uneven that elderly visitors can easily stumble and fall when exiting their vehicles. Snow cannot be easily removed due to the uneven conditions. Total space is about 1500 square feet. | Robbins Hunter Museum | 6 | 31 to 90 days | \$6 |
| Licking | Street Maintenance | Resurface and repair various streets, replacing deteriorated curbing, sidewalk and curb ramps, pavement striping and utility adjustments. 400 linear feet of replacement air piping including valves, fittings, and supports. Current ductile iron underground piping requires the need for double the operating air pressure to produce sufficient air quantity for the treatment process. This project will eliminate ongoing repairs and return the facility to its design air flow. | City of Newark | 50 | 31 to 90 days | \$1,000,000 |
| Licking | WWTF Air Piping Replacement | Acquisition of rights-of-way for construction project planned in 2009. Acquisition costs are the responsibility of City of Newark, and are currently financed with a SIB loan. Payback of loan will be through State gas tax, license plate permissive tax, and tax increment financing. A grant of stimulus funds would reduce the payback through state gas tax and license plate permissive tax funds in future, leaving those funds for other future projects. | Village of Granville | 50 | 31 to 90 days | \$220,000 |
| Licking | Waterworks Rd - Deo Dr Realignment | Realign and reconstruct Waterworks Road and Deo Drive at SR 10; Mennon Road to eliminate traffic congestion problems. Currently project is following ODOT PDP process - Stage 3 plans. Right-of-way is being acquired now. Current funding of project is \$1,000,000 from LCATS, local MPO and increases \$200,000 from local funds for railroad legal relocation and financing with SIB loan (\$1,800,000). SIB loan payback will be by future state gas tax, license plate permissive tax, and tax increment financing. A stimulus grant would free up the state gas tax and license plate permissive tax funds to be used for other future projects in the city. | City of Newark | 20 | 0 to 30 days | \$1,200,000 |
| Licking | Waterworks Rd - Deo Dr Realignment - Construction | Replacement of the current sodium hypochlorite and sodium bisulfate disinfection process equipment with ultraviolet disinfection process equipment. The current process effluent has a negative environmental impact on the local stream. No physical construction or new real estate will be required for this equipment replacement project. | City of Newark | 75 | 91 to 180 days | \$1,800,000 |
| Licking | WWTF Disinfection Upgrade | 2010 near head of new sanitary sewer lines including 12 manholes, and laterals, to connect approximately 25 businesses, offices, and residences currently on individual on-site treatment systems to the Village collection system. | Village of Granville | 50 | 31 to 90 days | \$500,000 |
| Licking | River Road Sanitary Sewer Extension | This project will reconstruct DVL/DVSD and the City of Pataskala with public drinking water service. As a benefit of the extension it will provide the service territory and new development opportunities on the highly traveled SR10 between 170 and SR161. This project also provides out-of-respective systems with a reliable back up source of water in the event of an emergency with other system. This project would create short term and long term jobs for the region. | Village of Granville | 50 | 31 to 90 days | \$352,000 |
| Licking | Pataskala Water Line Interconnect | Pump and control panel replacement with adjustment to the discharge piping in the present lift station to accommodate increased flow in the present configuration that will prevent any potential overflows into the local stream. | Southwest Licking Community Water and Sewer Distri | 80 | 31 to 90 days | \$500,000 |
| Licking | South Main Street Lift Station Replacement | Reconstruct existing 2 lane roadway by widening, installing turn lanes, traffic signal, sidewalks, curb ramps, curbing and storm sewer. This roadway has experienced high traffic in recent years due to development in northwest Newark and expansion of Ohio State University Newark campus. Project is following ODOT PDP process - Stage 2 plans. Current funding is \$1,800,000 from LCATS - local MPO, remainder will need to come from City's share of license plate permissive and state gas funds. A grant of stimulus funds will be used for the local funds to be used on other local projects in the future. A separate proposal will be made to consider burying the overhead utilities along with this project (est. \$1,000,000), work by NEP, service provider. This is not included in the above figures. | Village of Granville | 50 | 31 to 90 days | \$170,000 |
| Licking | Country Club Drive Improvements - Construction | | City of Newark | 75 | 181 days or more | \$1,300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Licking | Flying J Water Line Extension | The Kinksville Flying J is in the need of a public water supply. Cost considerations have stalled this project which would bring public water service to the 703R/158 interchange. This interchange also has not seen any future development due to the need of a reliable public water supply. This project would require installation of approximately 4000' of 12" watermain. The project would require 20 short term jobs and allow for future development of the interchange to provide for a number of growth and job opportunities. | Southwest Licking Community Water and Sewer Distri | 20 | 31 to 90 days | \$450,000 |
| Licking | Country Club Drive Improvements - Utility relocati | Work in addition to reconstructing existing 2 lane roadway by widening, installing turn lanes, traffic signals, sidewalks, curb curbs, curbing and storm sewer. If proposed approved, the overhead utilities could also be buried, improving this gateway into the City. This roadway has experienced high traffic in recent years due to development in northwest Newark and expansion of Ohio State University Newark campus. Project following ODOT PDP process - Stage 2 plans. This proposal is to consider burying the overhead utilities along with the project cost \$1,000,000, work by AEP, service provider. | City of Newark | 30 | 181 days or more | \$1,000,000 |
| Licking | NEW SR161/SR310 WATERLINE "GATEWAY TO LICKING COUN | ODOT has invested significantly in creating the new 161 highway system through Licking County. BWL/CWSL, Licking County and local Township officials along with many developers have been studying the new opportunities this highway system will offer residents of Licking County. This project would bring water and sewer (separate application) to this new interchange. We have been working with local developers to make this interchange the Gateway to Licking County. This project would create 50-100 short term jobs and hundreds of long term jobs due to the quantity of large scale commercial, office and residential opportunities. The project requires approximately 5000' of 12" waterline and the construction of a new 500,000 gallon water storage tank. Many preliminary design issues have been accomplished and should funding be available this project would be ready to proceed for construction in 6 months or less. | Southwest Licking Community Water and Sewer Distri | 1000 | 181 days or more | \$2,500,000 |
| Licking | State Route 13 over SR 16 - Two-way traffic conver | Hidden SR13 bridge over SR16 to 5 lanes wide to accommodate 2 way traffic on SR13 through downtown Newark. This project is adjacent to and ODOT Safety project currently scheduled for construction in 2009-2010 which will reconstruct the SR16 exit and entrance ramps at SR13. After the ODOT ramp project is completed in 2010, the current one-way bridge is the only obstruction to change to 2 way traffic flow. The bridge widening project has been planned in conjunction with the change of the ramp project. In order to avoid reconstruction of new structures. This project would allow better, increased traffic flow through the northern portion of Downtown Newark, contributing to success of planned commercial redevelopment of the downtown area, helping the local economy. | City of Newark | 150 | 181 days or more | \$3,000,000 |
| Licking | Cherry Valley Bridge Replacement - Engineering | Professional engineering design to replace existing 100+ year old stone arch bridge on Cherry Valley Road in west Newark. Work would follow ODOT PDP for bridge design. This bridge is considered functionally obsolete and has a low sufficiency rating. This roadway carries a high traffic count and connects West Main Street Hospital, medical offices and industrial park in State Route 16. This replacement of this bridge can be coordinated with the design of Thornwood Drive corridor improvements, currently in Stage 1 ODOT design. | City of Newark | 40 | 31 to 90 days | \$1,500,000 |
| Licking | Waste Water Treatment Plant | The project will upgrade the existing WWTP to bring it into compliance with DEPA standards. | Village of Kirksville | 5 | 91 to 180 days | \$100,000 |
| Licking | Downtown Gateway Streetscape | Improve streetscape in Downtown Newark on 4th and 3rd Streets from Locust Street to Main Street by repairing sidewalks, adding street trees, lighting, improved crosswalks, etc. Project will add a redevelopment of Downtown area, to coincide with planned commercial redevelopment. Project also would coincide with ODOT Safety project to reconstruct SR16 ramps at SR13, and planned project to change the traffic patterns from one-way to two-way by widening the SR13 bridge over SR16. These projects are described in separate proposals. | City of Newark | 50 | 181 days or more | \$1,000,000 |
| Licking | Closed City Landfill - Watson Road | Engineering and construction costs to bring closed landfill into DEPA - NPDES compliance due to stormwater and landfill leachate runoff. Has been closed since mid 1970's, and no revenue stream to fund improvements to the site. Site will remain closed after remediation. Site could be green space or possibly other recreational use. Work proposed would capture and treat leachate on-site if possible, or transport to local public sanitary sewer to send to Newark Wastewater plant for treatment. Plan to install 100,000 gallon storage tank. | City of Newark | 50 | 0 to 30 days | \$1,350,000 |
| Licking | Trash to Treasure: Art Programming | As we become a more throw away society, the recycled materials movement has become extremely popular in transitioning to a more responsible community. The Trash to Treasure Art Programming at The Works was designed to do just that. The program consists of an exhibit entitled "Odds Gonna Green" in the Main Gallery, June 5-August 8, featuring art from across the United States. The art works are created using recycled materials and focus on the importance of conserving natural resources and protecting the planet. The program is a perfect platform in which to engage the public in an awareness campaign as well as convey powerful artistic expression. | The Works: Ohio Center for History, Art, and Tech | 15 | 0 to 30 days | \$10,000 |
| Licking | Upgrade Heating and Cooling Systems | An additional and significant component of the Trash to Treasure Art Programming is the summer camp experience for youth ages seven to thirteen. Participants will be involved with creating 2 and 3 dimensional art using discarded materials such as fabric, metal, paper and wood to name a few. The art from the "Odds Gonna Green" exhibit will provide artistic instruction and curriculum guidance. Additionally, the campers | Robbins Hunter Museum | 10 | 0 to 30 days | \$65,000 |
| Licking | Museum Elevator | Replace four aging inefficient gas furnaces with new high efficiency gas furnaces, with air conditioning, and climate and humidity control. Museum conditions require constant temperature and humidity controls which are now not present in this museum. Additionally, there is a need to install insulator storm windows on 35 windows as a further means of energy conservation. The Robbins Hunter museum is housed in the Avery Donor House, which was built in 1842, and is on the National Register of Historic Places. | Robbins Hunter Museum | 4 | 31 to 90 days | \$45,000 |
| Licking | Robbins Hunter Museum Front Sidewalk | Install an elevator between the first and second floors of the Robbins Hunter Museum. This elevator would allow ability people easy access to exhibition rooms on the second floor. It would also allow safe movement of furniture, supplies, and art exhibits to exhibit rooms and storage rooms on the second floor. Currently, the only access to the second floor of the 1842 house on the National Register of Historic Places is on a narrow, winding staircase which most elderly cannot navigate. Handicapped individuals have no way of accessing the second floor. | Robbins Hunter Museum | 5 | 0 to 30 days | \$9,500 |
| Licking | Madison Township Fire Station/ Disaster Shelter/ Co | Replace cracked and uneven sidewalk stones on the front sidewalk of the Robbins Hunter Museum which is on the National Register of Historic Places. About 150 feet of original limestone sidewalk would need replacing with new limestone. Currently residents of Granville and others who still the museum can stumble on the uneven sidewalk. Sidewalk does not flow to the uneven sidewalk and often freezes in the winter creating slippery and unsafe conditions. Correct historic preservation dictates that real limestone be used instead of ordinary concrete. | ADR & Associates | 125 | 0 to 30 days | \$1,500,000 |
| Licking | Garfield - McKinley Ave Storm Sewer - Phases 1 & 2 | Madison Township is in dire need to replace the existing fire station, due to the current facility not meeting code requirements. Along with the station, the township wishes to add a disaster relief center for areas of Hazard District. | City of Newark | 50 | 31 to 90 days | \$1,425,000 |
| Licking | Leonard - Thomas Sanitary Sewer, Phases 1 & 2 | Install storm sewer in a neighborhood that experiences flooding problems due to lack of sewer. Project consists of approximately 14,500 L.F. of various sizes of storm sewer with manholes, catch basins, vaults, etc. This project was originally planned and can be broken into phases. Phase 1 plans will be ready for bidding in May 2009, and Phase 2 plans can be completed by January 2010. Any matching funds for this project would come from City's Stormwater Utility. | City of Newark | 40 | 31 to 90 days | \$700,000 |
| Licking | Horns Hill Rd - Kelley Lane Sanitary Sewer | Install sanitary sewer in a neighborhood lacking public sewer. Project consists of approximately 5500 L.F. of gravity sanitary sewer with manholes, service laterals, etc. This neighborhood is residential and is relatively small lots, some with failing private septic systems. This neighborhood is residential and is relatively small lots with failing private septic systems. The neighborhood is generally low/moderate income, not residents could not afford public sewer. | City of Newark | 50 | 31 to 90 days | \$900,000 |
| Licking | Fire Station Replacement - North Newark | Install sanitary sewer in a neighborhood lacking public sewer. Project consists of approximately 5500 L.F. of gravity sanitary sewer with manholes, service laterals, etc. This neighborhood is residential and is relatively small lots, some with failing private septic systems. The neighborhood is located less than one mile north of the City's Water Treatment Plant, and the street, creeks running through these neighborhoods run to the North Fork of Licking River, the City's major water source. Project could be broken into phases if further funding amounts are available over time. Project matching funds could come from assessment fee to property owners. | City of Newark | 150 | 181 days or more | \$4,000,000 |
| Licking | Fire Station Replacement - Central Station | Replace existing, substandard, obsolete fire station located on Hubbard Street in north Newark. This portion of Newark has experienced much growth over the past few years, and a new station has been planned for the area to provide better service. | City of Newark | 150 | 181 days or more | \$5,000,000 |
| Licking | Downtown Railroad Underpass Repairs | Repair and enhance to the existing railroad underpass on South 2nd Street in Downtown Newark. Project would consist of repairs to concrete wingwalls and abutments, aesthetic improvements to coincide with redevelopment in the area. | City of Newark | 30 | 91 to 180 days | \$250,000 |
| Licking | Artist Cafe @ The Works | Artist Cafe @ The Works This program is designed to offer an artist co-operative enabling senior (50+) artists to continue to produce and sell their work in a retail studio environment while simultaneously mentoring budding artists. Target population would include at-risk, underserved youth from the surrounding community. The cafe would be in operation Tuesday through Friday, 12:00 to 5:30pm offering instruction in the community and provide a safe drop format. The program is envisioned to support both the artist's endeavors as well as provide a safe and nurturing environment in which engage the public in the creative process. The Cafe would certainly increase art awareness within the community and provide a vital resource to those most in need. This program would allow for the sustained employment of four artists. The Works is seeking funding for rental of retail space, supplies and stipends. | The Works: Ohio Center for History, Art and Techn | 4 | 0 to 30 days | \$10,000 |
| Licking | Youth Jobs | There is a large student population in the Newark area that are being educated in the arts. Specifically, design and photography. I would like to hire these students in the photography studio and give them some much needed hands on training and real work experience. It is very difficult for these young people to find jobs. I currently offer unpaid internships to some of these students. Thus far I have only been able to hire one of the students after their internship. I need additional funding in order to provide jobs to more students. Thank you | Argyle Photography | 3 | 0 to 30 days | \$45,000 |
| Licking | NEW SR161/SR310 SEWERLINE "GATEWAY TO LICKING COUN | ODOT has invested significantly in creating the new 161 highway system through Licking County. BWL/CWSL, Licking County and local Township officials along with many developers have been studying the new opportunities this highway system will offer residents of Licking County. This project would bring water and sewer (separate application) to this new interchange. We have been working with local developers to make this interchange the Gateway to Licking County. This project would create 50-100 short term jobs and hundreds of long term jobs due to the quantity of large scale commercial, office and residential opportunities. The project requires approximately 5000' of 12" waterline and the construction of a new 500,000 gallon water storage tank. Many preliminary design issues have been accomplished and should funding be available this project would be ready to proceed for construction in 6 months or less. | Southwest Licking Community Water and Sewer Distri | 1000 | 91 to 180 days | \$2,500,000 |
| Licking | Columbus Park Expressway Sewer Extension | Extension of sanitary sewer to service a number of businesses that have failing on-site treatment systems. This project is located near the 20SR10 interchange and would provide new business opportunities. The project has preliminary design completed and would require approximately 1000' of boroniam sewer and 4 individual pump station vaults. This project could be ready to build in less than 60 days. | Southwest Licking Community Water and Sewer Distri | 20 | 31 to 90 days | \$50,000 |
| Licking | POLICE OFFICERS | To retain two officers and hire one additional officer. Currently we have one vacant position that may not be filled and expecting to have another vacant position with the same status. | VILLAGE OF JOHNSTOWN | 3 | 0 to 30 days | \$137,834 |
| Licking | Columbia Road Sewer Extension and Pump Station Eli | The project would be a great benefit to the new 240 Ready Site (Eva Corporate Park) which has been funded by ODOT. This project enhances further building opportunities in the 240 Ready region. This project would eliminate an existing pump station and provide for increased sewer capacity. The project consists of approximately 4000' of 10" gravity sewer. The project is 100% designed, permitted and ready to proceed. | Southwest Licking Community Water and Sewer Distri | 30 | 0 to 30 days | \$300,000 |
| Licking | Anette/16 Pump Station Rehabilitation and SSO Elim | The Anette/16 pump station is located at the corner of Taylor Rd and Route 16. This pump station serves TS Tech, AT&T and several large manufacturing and residential users. It's useful life is nearing and continues to have mechanical and hydraulic problems. This project would provide greater service for many large scale customers, create new business and residential opportunities in the community and provide environmental concerns from this station. The project would consist of 2 new pump stations, 1000' of 24" gravity sewer and 6000' in total of new force main. Preliminary engineering is under way and this project will be ready to proceed within 6 months. | Southwest Licking Community Water and Sewer Distri | 80 | 91 to 180 days | \$1,500,000 |
| Licking | PARKSIDE DRIVE IMPROVEMENTS | 300 LINEAR FEET OF WATER LINE REPLACEMENT | VILLAGE OF JOHNSTOWN | 25 | 31 to 90 days | \$213,000 |
| Licking | RIDGEVIEW DRIVE IMPROVEMENTS | 350 LINEAR FEET OF WATER LINE REPLACEMENT | VILLAGE OF JOHNSTOWN | 25 | 31 to 90 days | \$294,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|--|--|----------------|--------------------|---------------------------|
| Licking | Microenterprise Development Program | The Economic and Community Development Institute (ECDI) is a non-profit community development organization based in Central Ohio. ECDI's mission is to invest in people to create measurable and enduring social and economic change. These funds will support ECDI's existing Microenterprise Development Program, a comprehensive program that includes financial literacy and microenterprise development training, individual Development Accounts (IDAs), business, technical assistance, and access to retail markets. As the only U.S. Small Business Administration micro lender and U.S. Treasury designated Community Development Financial Institution (CDFI) in Central Ohio, ECDI addresses the needs of small business owners in the startup and expansion of microenterprises. ECDI's Microenterprise Loan Fund fills a gap in the credit industry by providing training, technical assistance and loans ranging from \$500 to \$35,000 to underserved entrepreneurs. ECDI is able to serve populations, including low-income individuals, those with little or no credit, or those precluded from paying interest because of religion or race. | Economic and Community Development Institute | 20 | 0 to 30 days | \$150,000 |
| Licking | INDUSTRIAL PARK ROADWAY EXPANSION | 80 LINEAR FEET OF NEW ROAD CONSTRUCTION. ONE EXISTING PLANT WILL EXPAND AND HIRE 31 ADDITIONAL EMPLOYEES. A NEW PLANT WILL RELOCATE TO JOHNSTOWN. BUILD A NEW BUILDING AND HIRE 31 EMPLOYEES. NOT INCLUDING CONSTRUCTION JOB EMPLOYEES A TOTAL OF 46 NEW JOBS WILL BE CREATED. | VILLAGE OF JOHNSTOWN | 75 | 91 to 180 days | \$250,000 |
| Licking | ENERGY EFFICIENT GOV'T BUILDING | REPLACE ENERGY EFFICIENT HEATING /AIR UNITS TO REPLACE OLD UNITS THAT USE MORE NATURAL RESOURCES THAN NECESSARY. WITH THE INCREASE IN PLANT POPULATION AND THE POSSIBILITY OF STATE MANDATED ENERGY IMPROVEMENT, GRANVILLE SCHOOL IS IN NEED OF ADDITIONAL CLASSROOM SPACE. THIS PROJECT WOULD ADD 11,200 SQFT CLASSROOMS, A 2,500 SQFT MULTIPURPOSE ROOM, 2,500 SQFT OF STORAGE AND 1,000 SQFT OF ADDITIONAL SPACE. THE CLASSROOM ADDITION IS ESTIMATED TO BE 13,000 SQFT. ALSO INCLUDED IN THE PROJECT IS THE EXPANSION OF BOTH THE PLAYGROUND AND THE PARKING LOT. IF THE GRANVILLE SCHOOLS WERE AWARDED THIS PROJECT, THE DISTRICT WOULD CONTRIBUTE \$500,000 TOWARD THE \$1,500,000 PROJECT. | VILLAGE OF JOHNSTOWN | 10 | 181 days or more | \$45,000 |
| Licking | Additional Classroom | REPLACE ENERGY EFFICIENT HEATING /AIR UNITS TO REPLACE OLD UNITS THAT USE MORE NATURAL RESOURCES THAN NECESSARY. WITH THE INCREASE IN PLANT POPULATION AND THE POSSIBILITY OF STATE MANDATED ENERGY IMPROVEMENT, GRANVILLE SCHOOL IS IN NEED OF ADDITIONAL CLASSROOM SPACE. THIS PROJECT WOULD ADD 11,200 SQFT CLASSROOMS, A 2,500 SQFT MULTIPURPOSE ROOM, 2,500 SQFT OF STORAGE AND 1,000 SQFT OF ADDITIONAL SPACE. THE CLASSROOM ADDITION IS ESTIMATED TO BE 13,000 SQFT. ALSO INCLUDED IN THE PROJECT IS THE EXPANSION OF BOTH THE PLAYGROUND AND THE PARKING LOT. IF THE GRANVILLE SCHOOLS WERE AWARDED THIS PROJECT, THE DISTRICT WOULD CONTRIBUTE \$500,000 TOWARD THE \$1,500,000 PROJECT. | Granville Exempted Village School District | 55 | 31 to 90 days | \$1,000,000 |
| Licking | Universal Cardiac Device Reader | A patient with a cardiac complaint is often held for several hours in the ED, transported to a cardiac care facility, or admitted to await a specialist to retrieve cardiac data. This burden results in delayed patient care as well as increased wait times for other patients in the facility. The InterCard Reader allows primary care or ED physicians immediate access to cardiac data to expedite patient care, shorten ED stays and reduce hospitalization rates and costs, while increasing the quality of care. | InterCard Corporation | 250 | 181 days or more | \$2,000,000 |
| Licking | Leaking Underground Storage Tank Remediation | The InterCard Reader builds on data by Dr. Neumannsheim demonstrating safety and effectiveness of ED utilization of pacemaker and defibrillator data. The Reader has been under development for several years and a provisional patent application has been filed. | Ohio Department of Commerce | 1,120 | 91 to 180 days | \$10,000,000 |
| Licking | Dist 5, PID 86015, LIC 4 light transit vehicles | Contact with on-site coordinators / program managers for the purpose of remediating contaminated or suspected contaminated sites. | Ohio Department of Transportation | 4 | 91 to 180 days | \$240,000 |
| Licking | Dist 5, PID 86017, LIC Computer hardware & software | The project would target the most aggressive sites for cleanup. Over 200 sites have been identified for consideration. | Ohio Department of Transportation | 1 | 91 to 180 days | \$10,000 |
| Licking | Dist 5, PID 86018, LIC Property security system | Purchase 4 light transit vehicles for Newark/Heath City Transit | Ohio Department of Transportation | 3 | 91 to 180 days | \$150,000 |
| Licking | Dist 5, PID 86019, LIC Building remodeling & paving | Computer hardware & software for elderly and disabled ID system for Newark/Heath City Transit | Ohio Department of Transportation | 4 | 91 to 180 days | \$200,000 |
| Licking | Dist 5, PID 86020, LIC Technology & furnishings | Security system for Newark/Heath City Transit property | Ohio Department of Transportation | 2 | 91 to 180 days | \$100,000 |
| Licking | Student Apartments | Property acquisition, building remodeling & paving for Newark/Heath City Transit | Argyle Photography | 10 | 0 to 30 days | \$250,000 |
| Licking | Weathervane Playhouse | Technology and furnishings for new facility for Newark/Heath City Transit | Weathervane Playhouse | 100 | 0 to 30 days | \$250,000 |
| Licking | Runway extension and obstruction removal | Open a building that has vacant space on the second floor and the entire 3rd floor. I would like funding to complete the housing with this space. This project will serve two purposes: 1. Create contract jobs for the local tradesman, who are short on work. 2. Provide low income housing for students who are there in large numbers at the Newark area. 3. Provide low income housing for students who are there in large numbers at the Newark area. 3. Provide low income housing for students who are there in large numbers at the Newark area. | Licking County Regional Airport Authority | 40 | 91 to 180 days | \$2,517,000 |
| Licking | Broad Street Water Tower Reconditioning | Ohio's oldest professional summer stock theatre, the award-winning Weathervane Playhouse has been threatened with closure and Technical Education Center's Theatre Arts Academy. We are attempting to fund a renovation to house this program while also creating new curriculum. The combined educational programs provide services for 300 local area youth ages 4 and up in the form of workshops in acting, singing, dance, mime, puppetry and production. This is a unique collaboration between an accredited high school program and a not-for-profit professional theatre. Faculty has included Broadway actors and teachers from leading arts universities. Please visit us at www.weathervanetheatre.org. | CITY OF REYNOLDSBURG | 15 | 31 to 90 days | \$1,018,000 |
| Licking | SUMMIT ROAD RECONSTRUCTION | Reconstruct and relocate runway, demolish building that obstructs runway approach. | CITY OF REYNOLDSBURG | 250 | 181 days or more | \$6,100,000 |
| Licking | MAIN ST. & TAYLOR RD. INTERSECTION UPGRADE | Structural repairs to an existing water tower, including completely renovating and replacing the interior and exterior paint. | CITY OF REYNOLDSBURG | 100 | 91 to 180 days | \$2,545,000 |
| Licking | New Albany Business Park Expansion | Full depth reconstruction of Summit Road, including adding curb and gutter to improve storm water drainage, sidewalks, street lights and relocating a portion of the road to eliminate two dangerous curves. This project will also allow for children to safely attend a new high school and elementary school that are to be constructed on Summit Rd. in 2015. | Village of New Albany | 800 | 91 to 180 days | \$6,000,000 |
| Licking | Wood Waste Reclamation Project | This project includes additional turn and travel lanes on all four legs of the intersection, and improvements to traffic signals. | Mulch Manufacturing, Inc. | 25 | 0 to 30 days | \$2,000,000 |
| Licking | windpower | Water Line Extensions 1870 linear feet \$2.6m, Water Tower Pump upgrades \$218k, Sanitary Sewer Extensions 11700 linear feet \$1.7m, Improvement of Existing Sewer Removal of Sanitary Sewer Backflows \$2.1m, New Road Construction 4000 linear feet \$1.6m, Improvement of Existing Road \$700k, Labour Total 11,000 linear feet \$718k. The proposed project could be ready for bid within 90-120 days. The infrastructure is expected to attract an initial private investment of approximately \$45 million. The development could include a 225,000 square foot office facility and a 425,000 square foot distribution facility. The initial project is expected to retain / create approximately 800 jobs. The infrastructure project will open up approximately 225 acres for additional commercial development to support Licking County and the Licking Heights School District. | windpower | 50 | 91 to 180 days | \$100,000 |
| Licking | Summit Road Water Line Loop | Collect and process wood waste presently entering the waste stream and will go into landfills or be dumped in unauthorized locations. This wood waste will be processed into usable products such as mulch and compost and sold to our current customer base throughout the N.E. United States and shipped and now have the time to do this work necessary to help local and maintain a wood farm on that I can call on. Contact Brian at 614-949-1000. | CITY OF REYNOLDSBURG | 450 | 181 days or more | \$1,760,000 |
| Licking | Taylor Road Sanitary Sewer Extension | This project will loop a 12 inch water main to allow for future development of an industrial area on US 40 and create better water pressure and reliability for the entire east side of Reynoldsburg. | CITY OF REYNOLDSBURG | 450 | 181 days or more | \$1,440,000 |
| Licking | Mueller Drive Water Line extension | This project would extend a sanitary sewer line east from Taylor Road and north of US 40. This would make over 500 acres of vacant ground available for future development. | CITY OF REYNOLDSBURG | 50 | 91 to 180 days | \$115,000 |
| Licking | Park at Waggoner Multi-purpose trail | Construct a multi-purpose trail from Waggoner Rd. to Taylor Rd. to provide alternate means of transportation between two thoroughfares and provide safe routes to school for two schools. | CITY OF REYNOLDSBURG | 20 | 181 days or more | \$425,000 |
| Licking | River Road Waterline | This project includes 2000 linear feet of waterline including fire hydrants and valves. The line is to be constructed to provide water service to a recently annexed area of town. | Village of Granville | 25 | 31 to 90 days | \$477,455 |
| Licking | New Lime Sludge Line to Sanitary Trunk Sewer | This project is for 800 linear feet of sanitary sewer line to transport lime sludge from the Water Treatment Plant to a sanitary sewer trunk sewer in order to eliminate on site disposal of the lime sludge. | Village of Granville | 25 | 31 to 90 days | \$175,000 |
| Licking | New Waterline, Main Street to Service Building | This project is for 800 linear feet of new waterline including fire hydrants and valves to serve the existing Village Service Building and to provide water service to a recently annexed area of town. | Village of Granville | 25 | 31 to 90 days | \$161,215 |
| Licking | extension of discharge point for wastewater reclaim | Relocate the outlet of the discharge from the wastewater treatment facility from a very small stream to a larger river to reduce the potential environmental impact on the small stream. | village of hebron, ohio | 35 | 91 to 180 days | \$500,000 |
| Licking | Water Main & Hydrant Replacement - East & West Col | This project is for 4150 linear feet of new waterline, fire hydrants, valves, and service connections. Replaces a 75 year old waterline, adds fire protection, and additional service connections to the Village water supply. | Village of Granville | 50 | 91 to 180 days | \$777,030 |
| Licking | Replace failing sewer lift station | Replace 35 year old lift station that fails on a regular basis and may be failing. | village of hebron, ohio | 25 | 91 to 180 days | \$150,000 |
| Licking | Irving Wick Drive West Paving | This project includes resurfacing 1,500 linear feet of roadway beginning at the intersection of Thompson Drive. | City of Heath | 50 | 91 to 180 days | \$350,000 |
| Licking | East & West College St. Waterline Replacement | This project is for 2400 linear feet of new waterline, including fire hydrants and valves, from Plum Street to Pearl Street replacing an existing 4" waterline. The new waterline will increase pressure and flow and provide much needed fire protection. | Village of Granville | 25 | 31 to 90 days | \$379,500 |
| Licking | College Street Sanitary Sewer Replacement | This project is for 1400 linear feet of new sanitary sewer line from Mulberry Street to Pearl Street. The new sewer will replace a more than 50 year old sewer line that has significant I&P problems. | Village of Hebron | 25 | 91 to 180 days | \$385,000 |
| Licking | Royalty Enterprises, Newark, Ohio, Clean Fuels Ohi | Existing station, additional storage vessels needed for expansion due to increasing demand. | Clean Fuels Ohio | 35 | 0 to 30 days | \$30,000 |
| Licking | Water Tower Painting | Clean, restore, and paint 400,000 gal and 750,000 gal elevated water towers. | Village of Hebron | 50 | 0 to 30 days | \$620,000 |
| Licking | WTP Debt Forgiveness | Need and deterioration on the two elevated water tanks posed a health concern for the community. | Village of Hebron | 500 | 0 to 30 days | \$5,000,000 |
| Licking | St Rt 310 - I-70 interchange upgrade and widening | The Village incurred \$5 million in debt to build this new WTP due to expected demand and environmental regulations. Due to changes in the economy, growth has declined and water revenue has decreased, thus straining the Village's resources towards repayment of this debt. The economic stimulus would allow the Village to reduce utility rates essentially offsetting local expenses and providing retention incentive as well as freeing up utility income to be used for infrastructure programs throughout the Village. | Etna Township, Licking Co. | 200 | 91 to 180 days | \$11,000,000 |
| Licking | Water Towers Security Fencing | Reconstruction/widening of the interchange at I-70 RT 310 north to US-40 | Village of Hebron | 25 | 0 to 30 days | \$95,000 |
| Licking | Lime Sludge Lagoon Cleaning | 200 linear feet of 8" security fencing with gates at two elevated water storage tanks. To provide protection for the citizens of the community by limiting free access to the Village's water supply and the potential hazard of a climbing accident. | Village of Hebron | 25 | 0 to 30 days | \$150,000 |
| Licking | Automated License Plate Recognition | Clean out the Village's lime sludge lagoon to eliminate the potential for overflow and spilling into the North Fork of the Licking River creating an excess environmental condition. | Newark Division of Police | 0 | 0 to 30 days | \$35,000 |
| Licking | Spring Valley Dr. & Burnt Ridge Water Main Replace | Purchase of an Automated License Plate Recognition package that would help solve and reduce crime by alerting patrol officers to "wanted" licenses by automatically checking license plates. | Village of Granville | 50 | 91 to 180 days | \$777,030 |
| Licking | Library Renovation | 4150 linear feet of new waterline, fire hydrants, valves, and service connections. Replaces a 75 year old waterline, adds fire protection and additional service connections to the Village water supply. | Pataskala Public Library | 6 | 91 to 180 days | \$300,000 |
| Licking | Pataskala Library Renovation | We need new, expanded shelving to house more library materials, we could accommodate 1,316 linear feet of additional shelving that would create 27% more shelf space. We have secured some local revenue for this project but outlays in state funding will erode that support by almost 50% in 2008. | Pataskala Public Library | 6 | 91 to 180 days | \$60,000 |
| Licking | Pataskala Library Renovation | We need to remodel our entrance to improve access for the disabled. We have secured some local revenue for this project but outlays in state funding will erode that support by almost 50% in 2008. | Pataskala Public Library | 6 | 91 to 180 days | \$100,000 |
| Licking | Davis-Shai House Expansion | We can increase our available shelfspace by 27% by adding 1,316 linear feet of shelving. This would allow us to provide a wider variety of useful materials. | City of Heath | 50 | 31 to 90 days | \$579,707 |
| Licking | Burg Street Pathway | The Davis-Shai House project expands the facility by 5,400 square feet (increasing the seating capacity from 54 to 150 guests on the first floor and 100 guests on a lower floor), increases office space by 378 square feet, adds ADA restrooms, installs an ADA elevator, and upgrades the existing HVAC/Mechanical Systems. This project will increase the size of the parking lot to 21,000 square feet (restrooms and additional parking) and increase the facility's south side, and establishes a greenway connection to a 10-acre greenspace. The project will stimulate the local economy by attracting tourists, supporting local businesses and hotels, and creating numerous temporary service jobs along with additional staff. It will serve as a catalyst to commercial development of 300+ acres of adjoining land with the potential of creating over 1,000 new jobs that will stimulate both the City of Heath and Licking County economies. | Village of Granville | 14 | 31 to 90 days | \$500,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|---|----------------|--------------------|---------------------------|
| Licking | Raccoon Creek Pedestrian Bridge Crossing Project | This proposed project would connect the existing paved T.J. Evans trail, a 14-mile recreational pathway that runs through Granville, to the Raccoon Valley Park, which is a 40-acre recreational facility owned by Granville Township and operated by the Granville Recreation Commission. The facility contains baseball and softball diamonds, soccer fields, a handicapped-accessible playground, and related facilities. The proposed pedestrian pathway/bridge would be approximately 1,500 feet in length and would include a 300-foot-long bridge over Raccoon Creek. The new path would provide joggers with a safe, non-vehicular route to the park and would significantly increase the number of non-motorized trips to the park. In a recent community survey, the Raccoon Creek Pedestrian Bridge received significant support and was ranked as one of the top community projects. | Village of Granville | 29 | 91 to 180 days | \$1,058,000 |
| Licking | County Road 165/204/206 Resurfacing | 1 Mile of road resurfacing | Licking County Engineer | 28 | 91 to 180 days | \$1,000,000 |
| Licking | Upgrade to meter reading system | Replace manual read water meters | Village of Utica | 2 | 91 to 180 days | \$175,000 |
| Licking | Improvements to Wastewater Collection System | Replace 500+ feet of old sewer line | Village of Utica | 25 | 181 days or more | \$3,500,000 |
| Licking | Purchase of leased building | Down payment assistance to secure a business loan for the purchase of building where child care center is currently located. 7 current positions replaced in past 6 months. 3 additional in near future. | Love and Learning Child Care center | 10 | 0 to 30 days | \$80,000 |
| Licking | Robbins Hunter Museum Restoration | This remarkable museum, housed in the historic Avery Deener House (ca. 1942), is one of the finest examples of Greek Revival architecture in Ohio and rates highly in the series list. On the National Register of Historic Places, it is in dire need of restoration and upgrading. In this proposal, a need to upgrade the 4 antiquated and dangerous furnaces, and add air conditioning and humidity controls. Storm windows are needed on all 15 windows. Front sidewalks need repair with limestone tiles. The roof parking area is uneven and needs a complete concrete re-paving. There is need for an elevator to take elderly and handicapped to the second floor. Four storage rooms need to be repainted and refitted into two second floor exhibit rooms. Rest rooms, now located in a small separate building, are needed on the first floor of the main building. A new kitchen adequate to handle banquet/wedding receptions is required. The roof is in need of total repair. Two office spaces need repainting, painting, and floor refinishing. | Robbins Hunter Museum | 45 | 31 to 90 days | \$350,000 |
| Licking | Safe Community Project | Police will hire 2 new officers for a three year period & will be assigned to community safety through patrol & safety programs, including the local school district and other related police duties, with a goal of providing a safer community. | Village of Utica | 2 | 0 to 30 days | \$228,000 |
| Licking | Police Officer | To create a new position to handle investigations, training and community relations. To be funded for a three year period. | Village of Utica | 1 | 0 to 30 days | \$130,000 |
| Licking | Stadium Upgrade | This project would upgrade Lakewood High Schools football stadium. The bleacher sections on both sides of the field would be replaced. We would put an artificial surface on the football field, and add 2 more lanes to our track last surface and then reconfigure the entire track. High jump long jump approach and pole vault approach. This prevents the school from paying for lawn services for the field. It would also increase the usage of our field from 20 to 50 events per year to well over 100 events per year, all while providing a place for physical education to take place without destroying the field. The improvements to the track would also allow for home track invitational, and physical education classes to be held. We are asking for half of the project funding, and will work to raise the other half of the funding. | Lakewood Athletic Boosters | 30 | 0 to 30 days | \$500,000 |
| Licking | Table of Humanity, The Discussion Game | Table of Humanity is a board and DVD game developed by Cliff N. Biggers Founder of Race Relations Research, Inc. Race Relations Research will license public, private schools, selected businesses and government agencies to utilize the learning game as a tool in the education of race and cultural relations. Trainers will be hired to train the trainer in this unique approach in Overlay and Race Relations training courses in the state will be solicited for participation. This game has currently been reviewed by 5,000 students and educators and produced results. The open and honest dialog in the area of culture and race have proven to be effective using this game. | Race Relations Research, Inc. | 25 | 31 to 90 days | \$200,000 |
| Licking | Etna Parkway Extension Phase II | Construct 2 lanes 1800 LF install 14,000 Sanitary Sewer Lines Engineering Widened 2 intersections Install 1800LF multi use paths Install 1400LF wiring and street lights Install 700 street trees | Licking County Regional Planning Commission | 350 | 91 to 180 days | \$6,240,000 |
| Licking | Mink Street Reconstruction | Reconstruction of 2.8 miles of roadway Widened intersection at SR 16 Install new traffic light Drainage Improvements Construction Engineering Design Reconstruction of 2.8 miles of 2 lane road Widened intersection with Broad Street (SR 16) Drainage improvements Construction engineering and design | City of Pataskala | 225 | 31 to 90 days | \$4,200,000 |
| Licking | Taylor Road Reconstruction | Install 8 SCADA monitoring devices on 18 stations Install 8 flow meters on 18 stations | City of Pataskala | 100 | 91 to 180 days | \$2,000,000 |
| Licking | Waste Water Collection Improvements | Construct and equip a 9,000 SF building to house the City's Law Enforcement Division and replace inadequate and uninhabitable structure Architectural and engineering fees To be constructed on land City owns | City of Pataskala | 10 | 31 to 90 days | \$30,000 |
| Licking | Construct New Law Enforcement Building | SEAN & CITY WELLS RECOMMENDED MAINTENANCE Replace equipment and materials that has been not functioning Replace 20 fire hydrants and valves in old village area | City of Pataskala | 150 | 91 to 180 days | \$2,600,000 |
| Licking | Water Supply Improvements | Installation of geothermal HVAC system (condenser units, underground piping, interior controls and remove old HVAC system) Energy audit of building Transmission upgrades | City of Pataskala | 10 | 31 to 90 days | \$210,000 |
| Licking | Renewable Energy Upgrades/Municipal Building | Feasibility of a secured, locally managed, high speed wireless network for use by emergency services within the jurisdictional authority of the community as well as show scenario via satellite for many people of Ohio to sell and produce goods and services. This program will help the starting entrepreneurs with labor cost because, it will be a helping community environment. Additional costs will include computers, Staff and manufacturing equipment. Eventually these business will have this program and begin their own business ventures somewhere else. If the people of Ohio were given the chance, Ohio could benefit from these success. Jobs will be created and more money will go into the economy. I am proposing a two year plan for each member to allow them enough time to build up their business. Once they start selling their product or services, then they will start paying this program back with a percentage of the income made. Eventually, this program will not depend on the government for help but right now we need the funding to get the program started. If we can get 50 small business in this building, after two years, I believe we could make several hundred more jobs. | Newark Division of Police | 5 | 181 days or more | \$600,000 |
| Licking | Newark Safety Goes Wireless | This project will allow middle to lower class workers have the chance to start their own business with little start up cost. The 1.6 million will provide a large enough start funding for many people of Ohio to sell and produce goods and services. This program will help the starting entrepreneurs with labor cost because, it will be a helping community environment. Additional costs will include computers, Staff and manufacturing equipment. Eventually these business will have this program and begin their own business ventures somewhere else. If the people of Ohio were given the chance, Ohio could benefit from these success. Jobs will be created and more money will go into the economy. I am proposing a two year plan for each member to allow them enough time to build up their business. Once they start selling their product or services, then they will start paying this program back with a percentage of the income made. Eventually, this program will not depend on the government for help but right now we need the funding to get the program started. If we can get 50 small business in this building, after two years, I believe we could make several hundred more jobs. | Small business | 300 | 91 to 180 days | \$1,600,000 |
| Licking | Small Business Assistance Program | Ohio local Licking county energy conservation via wind power through electric generation research. | AEP | 16 | 181 days or more | \$122,000 |
| Licking | wind generator | Rebuild and remodel the North Fork Junior High School to provide academic space to lead students into the 21st century. This project will also include the conservation of energy by adding and providing green energy alternatives to the building. Student and staff safety is also a goal by providing security, and technology to maintain safe school environment. | North Fork Local Schools | 200 | 91 to 180 days | \$2,400,000 |
| Licking | Junior High reconstruction | The construction of an auditorium will provide our students with academic benefits well past the 21st century. By providing a safe and modern instructional areas we will enhance academic performance especially in the core and arts areas. This building will also be used as disaster recovery shelter areas for Northern Licking County. Another goal is to provide green energy in the construction phases to lower the costs district wide. | North Fork Local Schools | 500 | 91 to 180 days | \$2,800,000 |
| Licking | Construction of Auditorium | The construction of a gymnasium will provide our students with academic benefits well past the 21st century. By providing a safe and modern instructional areas we will enhance academic performance especially in the core and arts areas. This building will also be used as disaster recovery shelter areas for Northern Licking County. Another goal is to provide green energy in the construction phases to lower the costs district wide. | North Fork Local Schools | 500 | 91 to 180 days | \$2,400,000 |
| Licking | Construction of gymnasium | Our church for the last approximately 15 has had a Community & Kids Cafe that we run out of our fellowship hall. The thing is our hall is not that big at all. And neither is the kitchen. We have grown tremendously to need more space to help the needy. We also need donations from people (such as clothes, cook ware, appliances & etc) that we give to those in need. We would like to have a hall built separate from the church to have a bigger area to feed people in need. Also we would want to set up a free clothes and anything we can get to give away to those in need. In this point we average about 75 a week to feed. But again we have an extremely small capacity. 300 x 300 and kitchen. Please help us help those in need. | The Old Church | 0 | 31 to 90 days | \$500,000 |
| Licking | Community & Kids' Cafe Hall | Rebuilding and construction of sidewalks around the North Fork Local schools will provide the city of Utica and the students of North Fork safe and secure pathways to and from the school. We are looking at providing approximately ten miles of sidewalk repair and construction through out the city to the school. | North Fork Local Schools | 400 | 91 to 180 days | \$250,000 |
| Licking | Rebuild/construction of sidewalks | The Village of Kirtleville has several deteriorating streets that make travel through the Village difficult and are also becoming safety hazards. The Village has applied for funding through OPWIC on two separate occasions but because the Village does not have the resources to be competitive they seem to fall short of getting funded. The Village has also lost to general Operating Levy due to voter turn down which makes getting funds for local match even more of a problem. The project will address many of the problems in the Village and will allow the Village to not need funds for at least 10 years to do street repairs. | Stantec Consulting Services, Inc. | 10 | 31 to 90 days | \$400,000 |
| Licking | Street Resurfacing | Construct and equip a 250 kw wind turbine for the supplying of power to our school buildings. This will provide green energy to one or more of the buildings on our school campus. | North Fork Local Schools | 100 | 91 to 180 days | \$1,000,000 |
| Licking | Wind turbine generator | Current facility has some 60 buildings and 40 acres of roof. Many are costly to heat, light, cool and maintain. This project would include consolidation of manufacturing buildings, warehouse buildings, and unused buildings to improve the profitability and efficiency of the site. These improvements would increase the longer term profitability of this 75 year old manufacturing site. | Owens Corning | 50 | 31 to 90 days | \$1,250,000 |
| Licking | Building consolidation and Roof Improvements | Project includes improvement to the melting and pipe manufacturing process that will improve energy efficiency and product quality. These changes will ensure that this operation remains competitive in the United States. Additional benefits include manufacturing efficiencies, energy, waste to landfill and quality improvements. | Owens Corning | 160 | 31 to 90 days | \$21,000,000 |
| Licking | Pipe Factory Upgrade | Several electrical and natural gas projects have been defined that will deliver energy savings in 2008. These include compressed air and lighting projects also. These projects do not currently meet the four current criteria based on current operating costs. Funding for these projects can be delivered this year. | Owens Corning | 719 | 31 to 90 days | \$500,000 |
| Licking | Electrical and Gas Energy Improvement Project | This project will convert an obsolete manufacturing line into a line that will run a product used for insulating attics. The product this line will run is critical to weathering homes and will play a role in meeting the requirements of the recent statute. The major benefit of the project is it will keep the plant competitive in cost. Currently, the Newark, Ohio Plant is the highest cost Owens Corning Plant in the Country due to the amount of capacity that has been removed over the years. The volume added with this project will put the plant in a position where it can compete on costs with other insulation plants and assure the employment of its employees for years to come. This project will also address the current shortfall in capacity of insulation made for going into attics. | Owens Corning | 719 | 0 to 30 days | \$7,600,000 |
| Licking | Unbonded Loose Fill | To increase employment thru unemployed Licking Countians and retain those employees on a permanent basis for a small family owned landscape company year around. Small businesses are the back bone of this country and should be looked at seriously. With the help of the government, we can make a small dent into the economy and provide a well rounded job with benefits. Without this stimulus, we will stay at the projected level of 34 employees without benefits. We have been in business for over 15 years and honestly we are looking for help to grow in this economy. What ever help you can provide would greatly be appreciated. | Colorscapes By Design Inc | 8 | 31 to 90 days | \$70,000 |
| Licking | Increase Employment Thru Small Business | Thank You Greg Frazier President Colorscapes By Design Inc. | | | | |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---------------------------------------|----------------|--------------------|---------------------------|
| Licking | Hebron Village street repair | Several local streets are in need of removal and replacement from the base to the wear coat. These streets are used daily by local traffic and school buses. Current budgets do not allow for extensive work on this project. | Village of Hebron, Ohio | 45 | 91 to 180 days | \$100,000 |
| Licking | Culvert replacement | The culvert at the intersection of Refugee and Canyon roads is deteriorating and should be replaced. The current culvert material is an old style metal pipe. The replacement is designed to be a concrete box culvert that will prevent a potential collapse of the roadway. | Village of Hebron, Ohio | 25 | 91 to 180 days | \$100,000 |
| Licking | Guard rail for Refugee Road | Refugee road is a heavily traveled narrow road that has a six foot deep culvert on one side within three feet of the roadway. This is a continuing hazard to pedestrians and traffic. A permanent guard rail will enhance public safety and reduce the chances of a tragic accident. | Village of Hebron, Ohio | 25 | 31 to 90 days | \$200,000 |
| Licking | Install covered drainage on Refugee Road | Refugee Road is a heavily traveled narrow road within the village. It is bordered on one side with a deep drainage ditch that is within three feet of the roadway and no quantity of water. Installing a permanent covered culvert the entire length of the roadway will divert storm water from the roadway and eliminate the need for an expensive guard rail and reduce the maintenance on the ditch. | Village of Hebron, Ohio | 48 | 91 to 180 days | \$250,000 |
| Licking | Bike Racks for Public Transit Vehicles | Bike racks to be purchased and installed on public transit vehicles will allow riders the mobility of expanding beyond the limits of the transit system service area. This is also a great way to utilize the bike trails of Licking County and Ohio. There will be jobs produced directly with the manufacturing of the racks. Additionally, usage will allow riders additional mobility in getting to employment, shopping and preventative health care appointments. | City of Newark | 10 | 91 to 180 days | \$20,000 |
| Licking | Alley Cat Recycling Program | Allow continuation and expansion of multi-county alley cat recycling program. SBC Recycling is the only full service recycler in Licking County as well as in the CFPB Solid Waste District. Stimulus funds would allow expansion of burlers, purchase of forklift and skid loader, and addition of two full time employees. Almost 4,000 tons of recyclable materials such as cardboard, paper, aluminum, PET bottles, and HDPE bottles would be diverted from landfills annually. Continuation of the alley cat program also provides jobs for drivers employed by the participating couriers and sorters for inmate work-related programs. | SBC Recycling | 5 | 0 to 30 days | \$170,000 |
| Licking | Natural Gas Pipeline Crews | The \$15 million will be used to restructure current debt. This will free up working capital to be used to purchase equipment which will enable us to add an additional 25 to a pipeline crew. | R & R Pipeline, Inc. | 20 | 0 to 30 days | \$1,500,000 |
| Licking | Fareboxes for Public Transit Vehicles | Fareboxes to be purchased and installed in Public Transit Vehicles. This measure will increase transit security by helping to prevent theft of fares and hardship on transit system from lost revenue. | City of Newark | 10 | 91 to 180 days | \$20,000 |
| Licking | SBC Recycling - Grinding Facility Project | SBC Recycling, a family owned and operated business located in rural Licking County, would like to expand their recycling capabilities to include grinding operation. This would increase the company's recycling capacity by 1 million pounds annually, diverting these materials from landfills. Materials would be reclaimed from industrial manufacturers, ground, and then resapplied for use in the manufacturing process. Key customers would include auto industry suppliers, along with an outlet for their manufacturing waste and recycling their with lower cost materials for manufacture. Requirements include purchase of a grinder, upgrade of electrical system, and building reconfiguration. To manage the new processes, four new positions would be created and two existing positions retained (full time positions with benefits including health insurance) to manage a rehabilitation program to divert heavy metals of distribution and collection systems for the Village of Hebron Water and Wastewater Reclamation utilities. The program will include assessment of underground infrastructure, valves, pumps, lift stations, inflow and infiltration needs, the required corrective actions. The assessment plan will result in a construction plan to be implemented over a 12 month period and completion of funding is exhausted. | SBC Recycling | 6 | 0 to 30 days | \$460,000 |
| Licking | Rehabilitate utility distribution and collection s | Rehabilitate utility distribution and collection systems for the Village of Hebron Water and Wastewater Reclamation utilities. The program will include assessment of underground infrastructure, valves, pumps, lift stations, inflow and infiltration needs, the required corrective actions. The assessment plan will result in a construction plan to be implemented over a 12 month period and completion of funding is exhausted. | Village of Hebron, Ohio | 60 | 91 to 180 days | \$2,000,000 |
| Licking | Technology for Transit Elderly & Disabled Program | New computer hardware, camera, software and supplies to upgrade current Elderly & Disabled Database and Identification Program. Hardware would help reduce identity theft when utilizing 1/2 fare program for transit services. | City of Newark | 10 | 91 to 180 days | \$10,000 |
| Licking | Plastic Hanger Recycling Program | SBC Recycling, a key family owned & operated full service recycling company located in Licking County, would like to improve their plastic hanger recycling program. The company is already involved in hanger recycling on a small scale, however, millions of pounds of plastic hangers are sent to landfills each year due to lack of facilities capable of processing high volume of material. With the addition of equipment and a conveyor system with magnets, a grinder, and an air system, the hangers could be ground and processed for re-use by the manufacturer. To manage the new processes, four new positions would be created and two existing positions retained (full time positions with benefits including health insurance) to manage a rehabilitation program to divert heavy metals of distribution and collection systems for the Village of Hebron Water and Wastewater Reclamation utilities. The program will include assessment of underground infrastructure, valves, pumps, lift stations, inflow and infiltration needs, the required corrective actions. The assessment plan will result in a construction plan to be implemented over a 12 month period and completion of funding is exhausted. | SBC Recycling | 10 | 0 to 30 days | \$675,000 |
| Licking | Transit Reservation Software & Hardware | Advanced technology software will help the City of Newark and its service provider provide better transit services to more customers by maintaining ridership and vehicle data for reporting to FTA and other agencies. Accurate data is required to obtain funding. Software licensing and terminals would be required in purchase. | City of Newark | 10 | 181 days or more | \$100,000 |
| Licking | Extend water and water reclamation services | There are currently areas west of the village of Hebron that are not served by water and wastewater utilities. By extending these services the residents and businesses will enjoy an improvement in the quality of life and protection for health that is not currently available. It is expected that the extension would involve over three miles of water distribution and wastewater collection lines. | Village of Hebron, Ohio | 100 | 91 to 180 days | \$500,000 |
| Licking | Transit Office and Storage Facility | Public Transit - City would purchase existing property and space facility for transit operations. City currently leasing space with parking for vehicles. City owned property could be better maintained with security options. Property would require paving, security upgrades, etc. New space would also be substantially larger for future expansion. | City of Newark | 25 | 181 days or more | \$350,000 |
| Licking | Hanover/Licking Valley Youth Recreation Area | The Village of Hanover, a rural community in Licking County Ohio is in desperate need of establishing a community wide recreation area in the eastern part of the county. This area will be home to baseball, football, soccer fields. As well as concession stands and picnic grounds. | ADR and Associates | 45 | 31 to 90 days | \$500,000 |
| Licking | Perform EPA studies on Brownfield type property | A large parcel of ground in the center of the village has been vacated by a car dealership for over three years. Due to the location of the facility it is not viable for another dealership and is over 60 years old. It is suspected that the property experienced oil and chemical spills over the years. Prior to EPA guidelines. In order to market property successfully general phase studies also be conducted. The property is a blight on the community and the current owner is not willing to take the necessary steps to effectively rehabilitate the property. | Village of Hebron, Ohio | 15 | 91 to 180 days | \$85,000 |
| Licking | Transit Vehicles | Public Transit Vehicles (25) as expansion for a system that utilizes bus and car company (several) as its service provider. Newly purchased vehicles would be city owned and ADA accessible. Additionally, replacement vehicles would be part of the purchase to continue the program. This would result in production jobs in the automotive industry. It would also increase mobility for riders to access employment, healthcare and its existing activities. | City of Newark | 50 | 181 days or more | \$500,000 |
| Licking | Village vehicle garage | Currently the village police cars and the administration vehicles are simply stored in the municipal complex parking lot. This exposes the vehicles to severe weather conditions year round and also allows the casual observer to determine the extent of the police force's services by simply looking in the parking lot. Providing an enclosed garage for these vehicles will lengthen their service life, protect them from vandalism, and prevent individuals from assessing the extent of police presence in the village. The building would be of simple construction and the property is owned by the village. | Village of Hebron, Ohio | 15 | 91 to 180 days | \$65,000 |
| Licking | Etna Parkway Extension Phase II | Construct 2 lanes 1800 LF Install 14000 LF Sanitary Sewer Lines Engineering Hydro 2 intersections Install 1800 LF multi use paths Install 1800 LF wiring and street lights Install 700 street trees | City of Pataskala | 350 | 91 to 180 days | \$6,240,000 |
| Licking | Newark to Zanesville Rail Line Rehabilitation | Rehabilitate 24 mile rail line including tie replacement and limited rail replacement. Line connects significant Muskingum County industries to Ohio Central's main classification yard in Newark, OH (Licking County) and to connecting railroads beyond in Columbus, OH. Improved safety and operating speed will improve service and reliability for the railroad and its customers. | Ohio Central Railroad | 15 | 31 to 90 days | \$1,500,000 |
| Licking | community "Safe Station" concept | The village of Hebron EMS service provides protection for a wide area of the community including the surrounding township and mutual aid to other political entities. The existing station is in need of significant repairs and improved living conditions. A concept has been created that would provide a change from the traditional "Fire Station" to a community "Safe Station". The facility would serve as a station but would be designed to provide shelter to residents of the local middle income park and others in times of severe weather. The area is prone to frequent and lengthy power outages and providing for evacuation of services and invalids is a paramount concern. The facility would also be available as a senior center, extension of the county YMCA, community gathering place and many other uses. | Village of Hebron, Ohio | 65 | 181 days or more | \$3,200,000 |
| Licking | infant center | Located in a rural area of Ohio our center has been operating for 5 years as Infant/ toddler/ preschool and 15 years as school age children. We have not raised our rates in those years and have the need to expand care for infants allowing more space for other groups. We would like to add to an existing building but with the economy and inflation it is impossible to do so. It would be adding to a metal building structure. This would require building permits, building materials, additional electric, heating, air and water for the new addition. The existing building for educational space constructed 3 years ago cost approximately \$30,000. Based on this and the additional costs our estimate is about \$50,000. It would create additional space for children allowing more room for staff to be hired. The company currently has 14 staff. | Happy Hearts Child Care Center, LLC | 8 | 0 to 30 days | \$25,000 |
| Licking | Grass Roots Employee Expansion | Provide employment and training opportunities for dislocated workers to learn the telecom technology trade. Enabling them to seek technology solutions to SMBs in tier 2 and tier 3 Cities within the Midwest. While helping bring the SMBs up to date with newer technology they will also allow them how to reduce technology expenditures while increasing SMBs bottom line profits, thus resulting in additional funds for the SMBs to add to their employment. | Emerging Technical Communications LLC | 4 | 0 to 30 days | \$225,000 |
| Licking | Rural high speed internet access & competitive telep | OhioNet.com, Inc. is the first competitive local telephone company in Newark Ohio established in 1996. It is owned by 2 local individuals. We are collocated and have access to all copper telephone circuits in the Whitman LADA. Our collocation facilities consist of copper & fiber and interconnection with Whitman facilities. Due to down turn in the economy we have not been able to proceed with our project. To complete the project we need to purchase and install a class 5 telephone switch utilizing VOP technology as well as POTS, purchase and install DSLAM's which provide high speed internet access to service locations. This is a "shovel ready" project. We would also need to purchase training, test payroll through turn up, installation fees, marketing, and monies for accounts receivable. It should be noted that the training would be for permanent jobs created. We would also provide for customer service, field installation and sales. | Ohionet.net, Inc. | 8 | 0 to 30 days | \$500,000 |
| Licking | low income home renovation | Have delapidated home for lower income rental. Requires structural renovations as well as home needs gutted and rehabilitated. | Chaffants Delivery Service | 2 | 0 to 30 days | \$25,000 |
| Licking | Outreach & Education | To provide various medium art classes and supplies for residents of local nursing and retirement villages, and art related programs for local youth in collaboration with the local library system. | Licking County Arts | 10 | 0 to 30 days | \$25,000 |
| Licking | New Employees - Educational Program & Promotional | The Licking County Historical Society (LCHS) would like to have the opportunity to hire two to three part time employees, for a span of three years. LCHS would like to create these new employment opportunities to benefit and expand both LCHS and the Licking County community. The educational programs would be: Educational Program Director, Promotional Director, and Collections and Research Curator. With the exception of one part time Curator/Secretary, LCHS is a volunteer run organization that maintains three historic houses, an office and library, and a wonderful collection of historical Licking County artifacts. These new positions would allow the Society to increase its public education (especially in the local school systems), better promote its programs and events, and fulfill its mission to citizens of the county to preserve of local history. | Licking County Historical Society | 3 | 0 to 30 days | \$69,000 |
| Licking | Artifact & Collections Storage Building | The Licking County Historical Society (LCHS) is in desperate need of a facility to store its ever growing collection of historical artifacts. After 60+ years of individuals donating historical artifacts, LCHS's collections have grown beyond our means of storing them. We have artifacts stored in just about every available space at our four locations, and we rent a storage facility. The owner of a vacant lot behind two of our historic houses has offered the ground to us to build a small building. It has been a goal of the LCHS trustees to build such a building for many years, but the costs of maintaining our current historical buildings has prohibited us from doing so. The above proposed budget would allow us to build an attractive historic looking carriage house that will complement the surrounding houses, and allow us to have the storage space needed. Building the building will help create local construction, local supplies, and help preserve our county's history for years to come. | Licking County Historical Society | 5 | 91 to 180 days | \$70,000 |
| Licking | ADA Additions and Renovations to Licking County Hi | The Licking County Historical Society (LCHS) houses its office and library on the second floor of the historic Buckingham Meeting House, in Veterans Park, downtown Newark, Ohio. LCHS has the society's office and its extensive collections of paper, photographic and other media housed there. We also use this space for meetings and as working area where the trustees carry out much of the business operations of the Society. We open our doors to anyone wanting to do research in our library. Having our main office and archival space on a second floor accessed only by stairs, makes it prohibitive to handicapped individuals, and very difficult for the elderly, and individuals with physical ailments. It also difficult to transport materials up and down the steps. | Licking County Historical Society | 10 | 91 to 180 days | \$320,000 |
| Licking | Historic Carriage House external stairway | The Webb House Museum has an original Carriage House on the property. The carriage house left was home to Mrs. Webb's groundskeeper and gardener. The Webb House Museum hopes to restore the carriage house so it can be included in the tour. The second floor can only be accessed by a very narrow and steep stairway, which cannot be safely used by the general public. We hope to have an external stairway built by a local metalworking firm so the public can tour the loft of this carriage house. The Webb House Museum has limited funds to put towards this restoration and cannot afford this external stairway. | Webb House Museum | 2 | 31 to 90 days | \$6,200 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Licking | New Fire Station | New Fire Station / Community Center The Hartford Volunteer Fire Department was founded in 1948 by the citizens of Hartford Township, Licking County for the purpose of fire, rescue and emergency services. The department operates out of one station located in Creston, Ohio. We are a fully volunteer department with 40 dedicated members. The department's volunteers provide fire protection, rescue, and emergency medical services to the residents of Hartford Village, Hartford Township, and Burlington Township, with a population of approximately 2,700. The department currently averages 200 emergency responses a year. We also provide around the clock coverage for the Hartford Fair in August of each year and special events in the community. We are currently mowed out on space due to the size of today's fire equipment. Our members are exposed to exhaust emissions which also creates a hazard and deteriorates the life of our equipment. Our members have to place to answer a service call. If these funds were given to HVFD we could build a new fire station and a community center that is greatly needed for our community. | Hartford Volunteer Fire Department | 35 | 91 to 180 days | \$1,500,000 |
| Licking | Community Empowerment | This project is to train unemployed men and women who do not have the resources to get jobs training on their own. A very crucial need for us is for folks to get back into the workforce rather than go back to crime simply because they have no skills and employers do not want to give them a chance due to their backgrounds. We would like to train them in the areas of construction and facility maintenance. We will work with our local career vocational school to offer this training as well as hands on training with a general contractor and a local apartment owner of HUD properties. This center has properties all over the state of Ohio and is affiliated with the National Baptist Convention who has properties across the United States. | East Mound Community Development Corp. | 500 | 181 days or more | \$15,000 |
| Licking | Heat Treat Furnace Recupercators | By installing recuperators on our heat treat furnaces, we can vastly reduce our natural gas and electrical usage. This upgrade will save 20 billion BTU of Natural gas a year, as well as potential savings for our electric company equivalent to 1100 Tons of CO2 annually. | Kaiser Aluminum | 5 | 31 to 90 days | \$140,000 |
| Licking | Regenerative Burner Furnace | Installation of a new aluminum melting furnace to replace an older, energy inefficient system. New system will have low NOx regenerative burner technology and an EMF pump system. These upgrades are vastly more environmentally friendly as they: 1) reduce methane, thereby lowering natural gas usage, and 2) reduce thermal pollution with lower exhaust gas temperatures. Total Natural Gas savings are estimated at 20 Billion BTU per Month! | Kaiser Aluminum | 5 | 91 to 180 days | \$3,000,000 |
| Licking | Homemaking Skills for the 21st Century | Retain today's woman in the skills lost in this modern time in order to be able to survive this economic downturn. Train in gardening and preserving their own foods, sewing and mending, knitting. All the tasks our grandmothers did on a day to day basis. Also, train in managing a household on a very limited budget. | 21st Century Woman | 4 | 31 to 90 days | \$250,000 |
| Licking | Expansion of business/new job creation | The opening of several new coffee houses/shops in the central Ohio area offering a full line of in house roasted gourmet coffee and full food service menu. It is expected that 30 to 50 jobs will be created with the execution of this project. | McCloud 9 Heavenly Scents dba Park Place Coffee Ro | 40 | 91 to 180 days | \$1,000,000 |
| Licking | Johnstown Lanes Community Center Renovation | Renovation of an existing center (built in the early 1980's) to provide a place for the youth, parents and seniors of our community to gather and enjoy safe, fun activities. The project would include complete renovation of the interior and exterior of the building. Improvements to the grounds are also included in these plans. This center accommodates area churches, daycares and schools and is severely in need of facility upgrades. This project will stimulate local economy, retain existing jobs and create new jobs through construction and expanded services made available to the general public. We are also involved with our local technical school and provide intern opportunities to culinary students. Internship would increase with this renovation. Thank you for your consideration of this project. | Taytom Enterprises Inc. | 50 | 0 to 30 days | \$375,000 |
| Licking | Plant Lighting | Replace high bay sodium vapor fixtures with energy efficient T-5 fluorescent to produce an energy savings of 3100 megawatts per hour annually equating to 2500 tons of CO2 annually. | Kaiser Aluminum | 1 | 31 to 90 days | \$760,000 |
| Licking | Energy Conservation for Apartments | The project would include making available to non-corporate owned apartment building for the purpose of insulating, weatherstripping of windows. Most corporations that own buildings can afford these upgrades. Individual owners can not. Insulating apartment buildings would help reduce income renters save on utilities. This would also encourage money into the economy. This program would also save on fossil fuel consumption. | Apartment Owner | 25 | 0 to 30 days | \$100,000 |
| Licking | Street, Storm Sewer and Bridge Improvement Hunts L | The production and installation of a companion bridge and the relocation of 980 L.F. of roadway, including roadway work will be earthwork, storm sewer, asphalt paving, concrete work, signage, striping, guardrail and relocation of existing utilities. The requested amount for the public portion of a 175 acre condemnation project that will also create many more construction jobs. These jobs will include paving, concrete, masonry, electrical, plumbing, roofing, painting, concrete tile, landscaping, roofing, HVAC and a few more. | Winding Road Ventures LLC | 50 | 31 to 90 days | \$700,000 |
| Licking | Licking County Railroad Crossing Upgrades | This project is for Railroad Crossings on the Columbus and Ohio River Rail Road. This project will allow for the rehabilitation of 17 road crossing surfaces and 8 warning devices. This will increase the public safety of these crossings and the safe passage of trains. These crossings are located in Newark, Heath, Granville, Cosville and Pataskala. | Ohio Central Railroad | 50 | 31 to 90 days | \$2,764,000 |
| Licking | Multi-Handicapped School for Pre through School ag | Licking Co Multi-handicapped Pre & School Age School If we had 100 of our classroom needs met at one facility we would need 14 MD classes, 16 preschool classes and about 8 ED (emotional handicapped) classes. At 100 is 1st classroom that would make a need of facility of about 30000 sq ft. To include specialized services personnel. We could probably still use some classrooms out in the local districts leaving a need of about 30,000 sq ft. If costs were \$200 per sq ft, the facility project would cost about \$6,000,000. This facility would provide a space for many years of saving to the local schools where we have to rent space. In some cases not adequate for these students of special needs. It is a real priority for central Ohio to take create advantages for transportation saving the districts as well. Immediately, it would provide jobs for central Ohio in design and construction. Long term the facility would need maintenance and outside staff that we do not have presently, probably three additional, and 2 additional learner aides. Many of the local schools will need to use space that we rent from them to add kindergarten classes at their sites. | Licking County Ed Service Ctr | 105 | 91 to 180 days | \$4,100,000 |
| Licking | Alexandria Streetscape Phase 2 | The Streetscape Project Phase 2 is designed to improve the appeal of St Rt 37 / Main Street in the Village. The project includes: 4 street lights, 1 pull box, 200 ft trench, 2000 conduit, 528 conduit under pavement, 752R conductor, 2 junction boxes, 2 C.V. tapoff refracting, 10 5 V, mulch and reseeding, 1 trash receptacle, 1 planter, AEP coordinated electrical work. | Village of Alexandria | 20 | 0 to 30 days | \$67,000 |
| Licking | South Fork Licking River Channel Improvements | This project will widen approximately three miles of the South Fork Licking River adjacent to the Village of Buckeye Lake, in order to increase carrying capacity and handle lake spillway discharge during flooding events. Project will include clearing and bank stabilization under bridges on routes 70 bridge and State Route 75, replacement of field tiles and culverts disturbed by excavation, and clearing of debris from the Sellers Point spillway outlet channel from Buckeye Lake. A portion of the excavated material will also be provided to ODOT to facilitate a road widening project along SR 75. Design and construction documents are currently 80% complete, environmental permitting has been secured, and all 4 construction easements have been executed with adjacent landowners. This is one of two major projects planned along the South Fork Licking River to help reduce recurring flooding problems in the area. Timeliness to begin utilization of funds includes approximately 100 days to competitively bid and award the construction contract. | Ohio Department of Natural Resources | 60 | 91 to 180 days | \$4,000,000 |
| Licking | Historic Renovations | Projects opened in 1909 & is one of the 1st glass enclosed malls. Accords is part of the Newark Delaware Historic District on the National Register of Historic Places, contributing structure. Our goal is to renovate, preserve & maintain the original historic quality & contribute to lesser energy consumption. The project is a phases. Replace 232 cracked glass panes which enclose the common area, repair/replace glazing & rubber on the supporting iron structure. This is one reinforced glass many of which have been covered over with black tar, treated with RCA all roof glue. Currently there is no insulation. We heat and cool 67k sq ft. We would install 3 air locks, open the light well, currently covered with gutter. Repair/replace facade consistent with the original quality of American House Near originally constructed in 1988. Modernize 7 apartments in the original American House Hotel. The combination of all the described efforts would provide an environment which would be much greater. It would lessen energy consumption by cutting loss energy from heating & cooling. It would also lessen gasoline use by providing apartments were people can walk to restaurants, shops & grocery. | Newark Downtown Center Inc. | 16 | 0 to 30 days | \$271,800 |
| Licking | Survival | To purchase approx. 50 rolls of inventory and call back to work three employees, repair & maintenance warehouses and equipment, pay taxes in arrears. Need cash to sustain a thirty-eight year old flooring business whereas the recession is about to close and site owner is nearing sixty years old and does not have enough time in her life to start over again. National City bank refused to consolidate her commercial loans, vendors lowered credit lines, cash flow is nearly dried-up. This company provides a lot of tax money to the county, state, schools, the dept., senior citizens, and bowling. Real estate taxes are \$1500.00 a month. Please help us. | J.C. Carpet And Storage, LLC | 4 | 181 days or more | \$300,000 |
| Licking | Recycling - Grinder | SBC Recycling, the only full service recycler in Licking County, would like to increase their capacity by adding grinding capabilities. Funds would allow purchase of a grinder, upgrade of electrical system, reconfiguration of an existing building, creation of four full time positions and retention of two full time positions. Grinding capabilities would allow SBC Recycling to process 2 million additional pounds of recyclable materials per year, keeping these materials out of landfills. Materials would be reclaimed from multiple manufacturing sources (including auto industry), ground, and re-supplied to them as a low cost material to be incorporated into their manufacturing processes. | SBC Recycling | 6 | 0 to 30 days | \$460,000 |
| Licking | Wastewater Head Works Renovation Federal Stimulus | Construction modifications and improvements to WWTW to assure NPDES compliance. Specific improvements include: construction new screen building to avoid screening bypass during wet weather high flows; install new influent sampler to obtain accurate monitoring without recycle; replace failed valving in influent pump station; install new energy efficient aeration blower and DO control to reduce energy use and improve performance; install new waste activated sludge pump to improve treatment operability and process control; install standby power generator to enable operation of all plant systems during power outage. | City of Heath | 60 | 0 to 30 days | \$4,200,000 |
| Licking | Low Income Housing mad available to the needy | Currently I offer housing thru Metro Housing Authority. Because of the demand for low income or government assisted housing in our area I see a big need for this. I currently have some properties I would like to build a low income house as well as purchase other properties to build additional properties. I have a very good rating and rapport with my current renters and I want to maintain this high standard rating by building high quality and well maintained additional properties. I keep all of my properties in very good condition and am not considered a "bad" landlord in any way. | Self | 20 | 91 to 180 days | \$600,000 |
| Licking | Teaching Youth About Apilary (Bees) | I want to offer youth and adults the opportunity to learn about bees. Today, we are losing bees by the thousands. We are worried that bees will continue to disappear and the public does not understand how critical this situation is. By making education about bees available, adults and children will learn about the importance of bees to our environment. Not only will the public see the value of the bee, we want to learn about bee care, extending honey, packaging the honey and marketing the honey. This will be a full educational project. Have been approached by a local Fortune 500 company to transform their EPS waste into a recyclable EPS pellet. | Farm Use and Teaching | 2 | 31 to 90 days | \$40,000 |
| Licking | Extruding and recycling EPS waste into reusable EP | Their EPS plant is currently landfilling their waste. Depending on the success, this project could justify a similar facility in each geographical location that the other EPS plant. I believe that there are 5 other locations around the USA. This project could easily develop into a 3 shift operation as all of the areas and eliminate the landfill waste. | Buckeye Dist. Systems Co. | 4 | 31 to 90 days | \$500,000 |
| Licking | Fiberglass fabrication improved capabilities | Currently I buy fabricated fiberglass products from two different sources: 1) import from Asia Pacific and 2) purchase from Don Medina, Iowa. These products are fabricated and repair the products to existing customers. I want to grow the business and fabricate the products locally. Fiberglass is produced locally at the Newark Owens Corning Fiberglass plant. They do not have fabrication capabilities and I want to take advantage of this. Instead of importing product or buy the product from another area, I want to produce and fabricate the product locally. I am presently doing some fabrication work now. I now use part time employees. By expanding my business, this will allow me to give my employees steady work. | AllTanner LTD | 6 | 31 to 90 days | \$250,000 |
| Licking | WWT Collection Improvements (SCADA) | Install 8 SCADA units, one on each lift station | City of Pataskala | 2 | 0 to 30 days | \$30,000 |
| Licking | Hanover Storm water Phase 3 Project | Install 8 new flow meters, one on each lift station | ADR and Associates | 30 | 0 to 30 days | \$100,000 |
| Licking | Hanover Streambank Stabilization Project | Stream Phase 3 Project | ADR and Associates | 30 | 0 to 30 days | \$500,000 |
| Licking | Hanover Regional Water System Report Project | Feasibility Study for Village Water System | ADR and Associates | 30 | 0 to 30 days | \$50,000 |
| Licking | Hanover WWT Methane Gas Recovery Project | Wastewater Treatment Plant Methane Gas Recovery and energy conversion Study | ADR and Associates | 30 | 0 to 30 days | \$50,000 |
| Licking | Hanover Pedestrian Bridge Project | Pedestrian Bridge to connect school campuses | ADR and Associates | 30 | 31 to 90 days | \$500,000 |
| Licking | Fellows and Knapp Hall HVAC Upgrades | Upgrading of the HVAC systems in two 1980's era academic buildings, Knapp Hall and Fellows Hall. These original equipment systems, both over 20 years old, are at or near the end of their useful lives. Both will result in improved functionality and energy efficiency. Approximate cost - \$2 million (\$1 million per project) | Denison University | 40 | 31 to 90 days | \$2,000,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Licking | Phase III of Centralized Campus Chilled Water Plan | Meeting the aggregation or cooling requirements existing or to be constructed through the operation of water towers than in the past. Phase III of the project completed in 2003, provided for an expansion of the loop to more buildings and the first phase of a centralized chiller facility which met the requirements of two new buildings as well as providing more cooling capacity for buildings already in the loop. Older less efficient units were eliminated. | Denison University | 45 | 31 to 90 days | \$1,500,000 |
| Licking | Ebaugh Laboratories - Chemistry Building | Renovation and expansion of a 1960's vintage chemistry facility. Basic building systems are at the end of their normal useful life and the design of teaching and research spaces is inadequate by today's building code requirements for new facilities nor do they support a contemporary Chemistry program. Approximately 27,500 SF of existing space will be renovated and 9,000 SF of new space added. Denison has a long history of excellence in the natural sciences. In 1995 The Old Science Building was converted to Denison's Physics, Chemistry, Mathematics and the Computer Science programs. In 2003 the Samson Tabbot Hall of Biological Sciences opened. The Ebaugh project for Chemistry will continue a comprehensive renovation of the natural sciences at Denison. Lincoln Construction of Columbus, Ohio has been engaged as construction manager for the project. Heavy Engineering, LLC has been engaged to work with the design and construction teams to assure the building meets the U.S. Green Building Council's Silver Certification status under the Leadership in Energy and Environmental Design (LEED) Green Building rating system. | Denison University | 165 | 31 to 90 days | \$15,000,000 |
| Licking | Par Learning Center | Our intention is to start an educational preschool serving low income families at or below the market rate. Besides providing jobs for an administrative and 3 teaching staff members, we intend to provide full day, full year childcare that prepares the children for kindergarten and offers financial development. Low income and at risk children are many times unprepared for kindergarten because the families do not value education. We expect to offer reading classes, computer classes and other education to the parents to help them retain or gain a new job as well as appropriate good education for their children. | Par Learning Center | 4 | 31 to 90 days | \$125,000 |
| Licking | Monroe Township - Johnstown Fire Station | Construction of a fully-staffed fireEMS station to replace a fire station that is more than 50 years old and was built for and by volunteers. This will provide a safer home for 13 full-time firefighters and 20 volunteers serving 1 city and 4 townships. Also will allow the department to purchase apparatus that does not fit in the current building. | Monroe Township | 43 | 91 to 180 days | \$2,600,000 |
| Licking | Ohio Young Farmers | For the past 15 years, the Ohio Young Farmers program has been funded at \$40,000.00 per year. This year that allocation was eliminated from the governor's proposed budget. The \$40,000 will be used to sponsor various adult education programs in the field of agriculture. Over thirty local chapters from around the state, dealing with over 1500 members and the OYF office will be affected by the loss of funding provided to it this program. Funds will be used to provide educational programs for the members of this statewide organization. | Ohio Young Farmers | 30 | 31 to 90 days | \$40,000 |
| Licking | Monroe Township - Johnstown Fire Station | Construction of a fully-staffed fireEMS station to replace a fire station that is more than 50 years old and was built for and by volunteers. This will provide a safer home for 13 full-time firefighters and 20 volunteers serving 1 city and 4 townships. Also will allow the department to purchase apparatus that does not fit in the current building. | Monroe Township | 43 | 91 to 180 days | \$2,600,000 |
| Licking | Buckeye Telecom | Provide employment and training opportunities for dislocated workers to learn the telecom technology trade. Enabling them to seek technology positions to SMBs in our 2 and 4 counties will be a challenge. While helping bring the SMBs up to date with newer technology, we will also show them how to reduce technology expenditures while increasing SMBs bottom line profits, thus resulting in additional funds for the workers' bid to their employment. | Buckeye Telecom Inc. | 3 | 0 to 30 days | \$250,000 |
| Licking | East Main Street Streetscape | Replace curbs and sidewalks, curb ramps, lighting, add street trees, crosswalks, bike lanes in area with moderate pedestrian traffic. Includes school, churches, social agencies. | City of Newark | 50 | 91 to 180 days | \$500,000 |
| Licking | 5th Quarter | The \$600,000 would be utilized for the OAAE's 5th Quarter project. Funds in the past have generated over \$8,000,000 in additional economy. Funds are distributed to the local school districts through a grant process. The 5th Quarter has been organized for the past 10 years but wasn't included in this year's proposed budget. 5th Quarter provides hands on opportunities for over 2000 local high school students in the state agricultural education programs. Through this program, agricultural education teachers receive continuing education in the agricultural field. The students then are able to produce and sell products to the local community, thus contributing to the state economy. | Ohio Association of Agricultural Educators | 50 | 31 to 90 days | \$600,000 |
| Licking | Risk Factors for Child Abuse/Filicide in Adoptive | Producing a detailed report and analysis of child abuse and filicide in adoptive families. By examining incidents of death or severe injury at the hand of an adoptive parent, we will identify which of the risk factors in adoptive families are significant. The published report will provide much needed data to health care providers. The data can be utilized by adoption health care providers to identify at-risk families who may be in need of additional assistance or intervention. Probation can be established to monitor or engage future causes of filicide and child abuse of adopted children. The data can also be used to provide pre-adoption training to potential parents. Identifying factors which place an adopted child and family at risk of abuse or filicide will have broad reaching consequences, not only in preventing future abuse and deaths, but in improving the usual adjustment process for all families with newly adopted children. | Parents for Ethical Adoption Reform | 1 | 0 to 30 days | \$20,000 |
| Licking | Community Crisis Presentation | Our schools have recently been victims and we had to move all of our students to one area. We have a poor farm community and can't get any funding help. We don't have any businesses and need help. Our students are losing teachers of foreign language (left with one), computers, P.E., music, theater, band/art, physical education, life skills, industrial tech, one math and one science, that the state said we must handover all. Our district is in the largest county and has the largest distance to travel. For our students to succeed we need help. The state budget for 2010 give them the tools to do so. If we can't help educate our students what does that say? It's not important to get an education? You can get by with just a little knowledge you don't know as much as we thought to participate. Even say that college isn't important. We need help for any college prep classes to be by the ground work for college. | Northridge Local School District | 15 | 31 to 90 days | \$3,000,000 |
| Licking | New Facility for Metal Siding and Roofing Manufact | Integrity Construction is a supply and erect business for the steel building industry. We believe that with some help we can build and facilitate a new metal roofing and siding manufacturing facility that will supply to the steel building industry direct creating jobs instantly and maintaining jobs indefinitely. This is something that the industry needs to start competing with other forms of construction and to help with rising steel cost by streamlining the process from manufacturer to user lessening the end cost. We would look very hard into the possibility of using employees that may not be eligible other work or have limitations. 2 new wells and drinking water treatment plant for existing village drinking water system. 200,000 gallon per day production capacity need field. | Integrity Construction Services Ltd. | 100 | 0 to 30 days | \$3,000,000 |
| Licking | Alexandria Water Plant | This is a low and moderate income community of 500 people. Currently our water and sewer bills combined average about 1000/year which is about 2.6% of Median Household Income of \$40,000. The new water treatment plant and wetland will enable us to reduce the cost of our water purchases, and pass on the reduced costs to our residents. | Village of Alexandria | 50 | 91 to 180 days | \$1,599,000 |
| Licking | Prescott Estates Water Plant Upgrade | To install an iron removal system to produce a more appealing and usable water supply. Present iron is 1.3 mg/l and Manganese is 0.16 mg/l. Water quality limits are iron - 0.3 mg/l and Manganese - 0.05 mg/l. Should reduce or eliminate the need for weekly hydrant flushing (approximately 25,000 per flush with its average daily consumption). Should also eliminate the need for Hevion Elementary School to treat water prior to use thus reducing their operating cost. Will reduce service calls due to meter and pipe blockage and eliminate the incidents of staining. | Licking County Water and Wastewater | 10 | 31 to 90 days | \$92,210 |
| Licking | Harbor Hills Water Tank Full Maintenance Agreement | Install 10,000 gallons of water storage with a booster pump system. Install an Automatic Emergency Back-up Generator. To completely renovate the inside and outside of the elevated water tank. Would also enter into a long term maintenance agreement to keep the tank in great working order for years to come. The customers served by this water tank already pay a substantially higher rate for water than surrounding areas due to the high cost of purchasing water from another municipality. Would bring back tank back to compliance with CDEPA and OSHA requirements. This would visually eliminate the potential risk of structure failure and the interruption of water service to the residents served. | Licking County Water and Wastewater | 5 | 31 to 90 days | \$109,700 |
| Licking | Personal Security for Licking County | Our security program fulfills the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rental operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our devices. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Gene-fencing functions can set location boundaries and trigger notifications when someone enters. For personal safety a panic button can issue an alarm with location information to multiple chosen phone numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self-powered units that continuously monitor location of assets. | Nuleaf Ohio Limited | 3 | 31 to 90 days | \$350,280 |
| Licking | Sellers Drive/Slocum Road Sewer Rehabilitation | Install approximately 1561 feet of 21 inch CIPP liner. Install approximately 1822 feet of 24 inch CIPP liner. Rehabilitate approximately 100 percent feet of Mainline. | Licking County Water and Wastewater | 20 | 31 to 90 days | \$550,000 |
| Licking | Video editing | In this new world that we live in with vast technology and things being survived, I was hoping to start a video recording and editing company that would be able to employ 20 to 30 employees by Jan. 2010. Giving creative people an opportunity to express their talents in an area that does not offer this type of work. Our access system fulfills the objectives of the Stimulus Act for it provides broadband to unserved and underserved areas while employing hundreds in high paying permanent jobs. This type of service is the expansion of an existing service to underserved areas by providing a turnkey solution for people stuck in the digital abyss. Unfortunately, without such funds, expansion would be economically unfeasible due to the high cost of deployment. Despite all the funds awarded to the providers of cable and DSL, the underserved areas still exist today. Now it's the time to try something different. Rural America needs access today not the false promises of the past. Our unique procedure for deployment offers the most cost effective wireless model available. Each dollar spent produces the most coverage per mile of any existing provider which allows low access fees and universal participation even among the low incomes and the disadvantaged. The current administration should fulfill the promise to provide access to those left out. We have the plan proven not by promises but by actual deployment evident by our existing network, the most advanced and most effective Wireless technology available. | Nuwerk Entertainment | 20 | 31 to 90 days | \$30,000 |
| Licking | Wireless Broadband for Licking County | Our security program fulfills the objectives of the Stimulus Act for it provides security and real time online tracking of individuals and property while employing hundreds of people in high paying jobs. With crime rates and civil unrest on the increase a solution is needed that puts more control in the hands of individuals. Businesses and government are looking for ways to cut costs and protect valuable assets while homeland security requires immediate action to report suspicious activity. Criminal control, child care, senior citizens, travel, rental operations, animal tracking, safety of police, campus security are just some of the groups that benefit from our devices. With our GPS trackers, location data can be sent to mobile phones or motion detectors can trigger alarm notifications to help prevent vehicle theft. Gene-fencing functions can set location boundaries and trigger notifications when someone enters. For personal safety a panic button can issue an alarm with location information to multiple chosen phone numbers with built-in microphone and speaker for communication. Asset tracking solutions are small, portable, self-powered units that continuously monitor location of assets. | NexGenAccess | 19 | 0 to 30 days | \$1,900,000 |
| Licking | Low Income Housing | Currently we have rental properties in the Newark, Ohio area. They are nice ranch houses that can be used by handicapped, aged or non-handicapped. We want to expand this capability to offer additional houses/units. The plan we have is to buy distressed ranch properties in Licking County, use local realtors to buy and research available properties, use local contractors to renovate and improve, use local supply houses for purchasing building materials, market houses/units through LHA, Licking Metropolitan Housing Authority and make available to government assisted or open market families in need of a very nice and clean property. | Cuz LTD | 10 | 31 to 90 days | \$250,000 |
| Licking | US 62/SR 13 Intersection Upgrade | Cuz LTD track record - Cuz LTD prides themselves on maintaining and offering very nice, clean ranch properties for rent. We maintain our homes in a manner that we would want to live in ourselves. We have had zero (0) complaints from renters in our years of business. Our proposal would include a new, basic road and jobs through many layers of professional and non-professional labor. With all of the various weeks of employment this project should create over 10 jobs for a period of 6 months and help families out with nice, clean living accommodations. Aggregate present intersection of US 62/State Route 13 and County Road 200 with turn lanes and relocation of County Road 200 to lessen congestion and improve safety. | Village of Utica | 5 | 91 to 180 days | \$425,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|--|--|----------------|--------------------|---------------------------|
| Licking | Work to end Homelessness | Increase in structure housing and access to a program area. We have met with a small business on an on job training in a need to create to them. The small business receives a weekly subsidized training payment with a cap of 160.00 per week which is 1/2 of \$8.00 per hour for a 40 hour week. To assist with the costs of training and living the trainee. Benefits of this program are many. The client will be able to afford to pay their own rent and other needs which will take them off public funding on the streets and help them to be self-sufficient for life. The business owner receives a worker he can afford which helps him build his business in this difficult economy. The city and county benefit because the former public funds recipient now pays taxes. The county benefits because the client has money to put back into stimulating the economy. This funding figure allows for 30 people to be subsidized at 160.00 per week for 12 months. It allows for \$12,000 for a centralized office with place | Excel Community Services Inc. | 90 | 0 to 30 days | \$760,800 |
| Licking | Waste to Energy Project | SIBC Recycling, a key family owned full service recycling company in Licking County, is proposing the creation of a waste to energy facility. A reactor would be installed which would convert food waste to methane. This methane would be burnt in an electricity producing generator. Sufficient energy could be produced to supply SIBC Recycling's energy needs and possibly re-supply surplus energy back to the local energy co-op. Local supermarket chains have been contacted and at least two who are currently landfilling their food waste are willing to participate. Over 10,000 tons of waste could be diverted from landfills each year. Funds would be applied toward purchase and installation of reactor, feed system, controls, engine, gasnet, meters, concrete pad and burner, and structure. The project would create at least two new full time positions and allow retention of one. | SBC Recycling | 3 | 0 to 30 days | \$800,000 |
| Licking | operation Freedom Recycling | Operate a new clean metal recycling facility in Newark Ohio, create jobs, save landfill space, benefit the economy, start paving the way for our children and the future. Recycle Ohio! | Freedom Recycling, LLC | 25 | 0 to 30 days | \$500,000 |
| Licking | Garfield & McKinley Stormwater Project | The project consist of approximately 3119 feet of 60" sewer main with 29 manholes and an additional 6944 feet of 12" 60" pipe with 72 catch basins. | City of Newark | 22 | 31 to 90 days | \$1,414,309 |
| Licking | Sanitary Sewer I/I Removal "Green Program" | The District would specifically request this project under the "Green Program". The District has developed a TASK FORCE for I/I removal system wide. The initial phases of inspections and repairs have been completed systemwide. The District is in need a camera equipment for further inspection of its sewer system. The District is also ready to proceed with point repairs, line repairs and complete removal and replacement of specific problem areas within the system. This project would be ready to proceed in approximately 30 days. | Southwest Licking Community Water and Sewer Distri | 15 | 0 to 30 days | \$500,000 |
| Licking | Refugee Road Trunk Sewer | Extend a trunk sewer to eliminate 3 pumping stations and points of overflows. This project is 100% designed and only needs a PTI to move forward with construction. This project will provide for a number of temporary jobs and will also open up new land near 1700 to development. | Southwest Licking Community Water and Sewer Distri | 100 | 0 to 30 days | \$4,800,000 |
| Licking | Domestic Violence Collaborative Team | A director & administrative staff will review local domestic violence policies & offer recommendations; provide training & technical assistance to law enforcement, probation & parole officers, a prosecutor or best practices; coordinate comprehensive services for victims, refer them to service providers, & accompany them to the providers; organize a county DV task force of law enforcement, prosecutors, victim service representatives, housing, mental health, medical, DV shelter, & court personnel; provide a central location for victims to receive information, referrals, victim advocacy, child legal advocacy for protection orders, law enforcement, housing, medical, & mental health services; serve as a liaison between the ADT alarm company & law enforcement; to bring the security systems to DV & stalking victims, pursuant to ADT's "Protect Your Home" Women's Active Response (WARR) program, which will provide safety for the victim's home; to provide safety for the victim's home; to reach for victims, through ads, flyers, business cards, etc., placed in governmental, non-profit, & for-profit agencies, businesses, & shops throughout the community where victims likely would be found. | Licking County Prosecutor's Office | 2 | 0 to 30 days | \$330,230 |
| Licking | medical transportation | start up of a medical transportation company to provide transportation for handicapped and lower income/poverty families. Referrals to doctors and hospital appointments on a daily or as needed basis. This would fill a need that public transportation systems do not fill. After hours, weekends, emergencies county to county doctors appointments. same day appointments etc.) We would be creating approximately 10 to 15 employees to cover the southeast ohio area. | private | 15 | 0 to 30 days | \$350,000 |
| Licking | Water extensions and Storage Tank | Water Line extensions and 500,000 gal. elevated Water Tank | Village of Buckeye Lake | 18 | 31 to 90 days | \$1,714,800 |
| Licking | Roofing Project at Stevenson Elementary | Stevenson Elementary has one section of roof which has not been replaced. Completion of this project would complete the re-roofing of all buildings in the district. | Heath City School District | 15 | 91 to 180 days | \$300,000 |
| Licking | Additional Classroom Construction at Garfield Elem | In order to provide sufficient classroom space and allow the district to restructure its building alignments, additional classrooms, multi-purpose room and bathrooms are required to be added to the existing Garfield Elementary school. Square footage would be approximately 60,000 sq. ft. at approximately \$150.00 a sq. ft. | Heath City School District | 25 | 91 to 180 days | \$3,900,000 |
| Licking | Air Conditioning Elementary School Buildings | Garfield and Stevenson elementary do not have air conditioning. By installing air conditioning the buildings would be accessible on a year round basis for use by the district and community. | Heath City School District | 10 | 91 to 180 days | \$2,000,000 |
| Licking | Montessori Community School Technology Project | Montessori Community School is a Private for profit State Chartered Kindergarten and Day Care facility with capacity for 180 Students. Our Computer Information System is in dire need of not existing 16 Windows based laptops, 6 private servers, 16 video cams, Network wiring and programming. To install wireless network system for latest computer training, education and technology for 155 students ages 2yr- elementary. | Montessori Community School | 35 | 31 to 90 days | \$36,000 |
| Licking | Infirmiry Mound Park Multipurpose Building | The Licking Park District, as part of its Five Year Plan adopted at the end of 2007, would like to construct a new multipurpose pavilion at Infirmiry Mound Park, south of Granville, Ohio. The pavilion is needed to attract clients that can not be accommodated by our smaller shelter houses. This would include corporate meetings, special group events, livestock shows and more. The facility is designed to host several hundred people, but also can be converted to stalls for livestock shows. | Licking Park District | 25 | 31 to 90 days | \$275,000 |
| Licking | T.J. Evans Bike Trail Streambank Stabilization Pro | This facility would allow the Park District to generate more revenue (initially approximately \$20,000 - \$25,000 per year) to place back into other facilities and programs, thus enhancing the tax dollars we currently receive. The initial construction of the project would create 20-25 construction jobs, but the long term benefits could include increased business for local caterers, park attendants, park attendants, livestock show and other special event coordinators and even local lodging and restaurant proprietors who might be hosting overnight guests. | Licking Park District | 10 | 0 to 30 days | \$100,000 |
| Licking | Workplace Safety Cert. | The T.J. Evans Bike Trail is under threat of falling into Raccoon Creek near Granville, Ohio due to severe erosion of the adjoining stream bank by the creek. Two slips approximately 18 mile apart need to be stabilized and fixed in order for the trail to be continued to be utilized by over 250,000 visitors per year. Currently the trail has been diverted partially off of its original course in order to provide safe passage for visitors. The slips total approximately 110-120 feet combined with a drop of approximately 30-35 feet to the water line. | Safety First | 150 | 31 to 90 days | \$2,750,000 |
| Licking | Athletic Field Park Improvement | We want to come in with armor stone and riprap to shore up the embankment and prevent any future erosion from taking place. With the slips fixed the trail will be restored to its original path and condition. The stabilization of the slips is also important as a local community organization along with Granville Township and the Village of Granville hope to complete a pedestrian bridge across the creek to link the path and a popular park frequented by thousands of residents each year. | Village of Hartford | 5 | 31 to 90 days | \$150,000 |
| Licking | Village Community Center | The Village is currently purchasing the old Hartford Elementary school land (5 acres) and buildings. The old brick school house needs razed. The sub-basement needs fixed. The Village would like to erect a new building to be used as a Community Center for the village and surrounding area. The approximate size of the building would be 50'x100'. A new gravity line from the building to the village's sewer line needs installed approximately 100'. | Village of Hartford | 20 | 31 to 90 days | \$200,000 |
| Licking | Athletic Center Rehab | Village is currently purchasing the former Hartford Elementary school land (5 acres) and buildings. The gymnasium is in fairly good shape, however upgrades are necessary to make it available for the public. The building needs new, energy efficient, furnaces and air conditioning. The gym floor needs new surfacing. The restrooms need upgraded to ADA codes. Shower facilities may need installed. | Village of Hartford | 10 | 31 to 90 days | \$200,000 |
| Licking | APH-Lift | We need funding to expand our business. We want to hire a welder, and install overhead cranes. Our goal is to build and sell 2 new design lift systems. One would be used for a job site for personal water craft and the other is a lift for large boats weighing up to 20,000lbs. We will manufacture all the parts used, here in the USA, like we do at the present time. We would also like to purchase a used Mitsui Machine, to do tasks that we can't do out source now. We have the potential to hire many more people, as we gain market share. We Thank You for considering this brief, but sincere message. We CAN be TRUSTED to perform, and use the funds in a proper, and responsible manner. With Best Regards, Tom Jones American Power Hoist Parisville, Ohio 43082 | American Power Hoist | 3 | 31 to 90 days | \$168,500 |
| Licking | Biodiesel: from the field to the tank | A result, students would see that there is no waste in the production of biodiesel. After the beans are crushed, the waste would be fed to the animals. The biodiesel waste (glycerol) will be given to our waste water treatment facility to assist in the breakdown of bacteria. Thus, no waste. We would also like to expand our Ag program by having our own farm to work on. Students would be able to work the farm and keep their FFA animals there. This is just a brief discussion all of the benefits students will gain from this plan. If approved, a full time farm manager will need to be employed and at least 4 part time farm hands. These are direct beneficiaries. Indirect employment can not be determined, but some jobs may be created. | Utica Jr. High School | 5 | 31 to 90 days | \$2,000,000 |
| Licking | Retreat Center for soldiers and families | We need to purchase the following to implement the plan: Property \$1,000,000 Farm equipment \$500,000 bean crusher \$50,000 diesel trucks \$75,000 trailers \$50,000 recreation energy modals classroom \$125,000 Center offering full time support 24 hours, seven days a week to our military veterans and families. Services provided: mental and physical counseling, recreational support, training for new job skills with cooperation from the private sector and governmental agencies. Center would have full time staff of professional physicians, nurses, dietitians, physical or active duty soldiers with special skills could be employed. The center would be secluded, with full time security. Center needs to be located in a rural area, with the following amenities: swimming pool, sports complex, chapel, kitchen, dining room, separate living facilities for single soldiers and families, included special area for homeless veterans. They will be given the same opportunities for rehabilitation and job training. | The Ohio Veterans Association | 650 | 31 to 90 days | \$2,000,000 |
| Licking | Licking County Courthouse Renovation | This program would require the cooperation of our military services. Complete energy efficiency upgrades to historic courthouse structure. Improvements include installation of new HVAC systems, insulation, windows & doors, roofing. Cost includes upgrades that are sensitive to the historic value of the structure. Also included are entrance security upgrades. | Licking County | 120 | 91 to 180 days | \$5,700,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|--|----------------|--------------------|---------------------------|
| Licking | Licking County Don Hill Administration Building En | Energy Upgrade and overhaul of Licking County's Administration Building heating and cooling systems. Work includes updating aging equipment, improving building control levels, reducing overall energy and operating costs. Estimated energy savings expected as reducing the energy cost from \$2.06 per square foot to \$1.13 per square foot. Costs and analysis based on state term contract schedule pricing number 7502000000 | Licking County | 70 | 0 to 30 days | \$1,097,498 |
| Licking | The center for the dental underserve | I have a successful dental practice in Newark Ohio. My practice mainly serve people with insurance and people who can afford dental care. My office is large enough that it can support and treat more patients. In my program I would like to start treating the underserved people (people who make too much for medical care and too little for insurance) and recently unemployed of Licking county in my existing office. The benefits of this program would be: 1. It would keep my office busy which will add more employees which will help Newark and Licking county with more taxes. 2. It will give the underserved people and families who were recently unemployed good dental health therefore improving their general health. 3. Currently Licking County does not have such a program. 4. I think doing such a program in my office is more cost effective than starting one from scratch. 5. cost would be 400,000 to 500,000 per year. Project funds provides direct educational services to socially disadvantaged students. We provide reading assistance and an introduction to post secondary opportunities. Students also have access to technology via a computer lab. Students are encouraged to further their education. A healthy positive attitude is encouraged. | Central Ohio Dental Spa | 14 | 0 to 30 days | \$400,000 |
| Licking | Project Read | Project Read provides direct educational services to socially disadvantaged students. We provide reading assistance and an introduction to post secondary opportunities. Students also have access to technology via a computer lab. Students are encouraged to further their education. A healthy positive attitude is encouraged. | Central Ohio Minority Business Association | 5 | 0 to 30 days | \$30,000 |
| Licking | 9-1-1 /central dispatch | Jointly evolve and modernize county 9-1-1 center. Due to present location additional space and expanding is not possible for the growing needs of Licking County citizens and public safety forces. An expanded center would allow the possibility of a more dispatch center which would facilitate seamless communication and rapid availability of intelligence between all entities. Expansion would allow additional staff to process emergency calls/requests for the county citizens and safety forces. | Licking County Emergency Management/Homeland Secur | 130 | 181 days or more | \$3,000,000 |
| Licking | Heath City Schools, Cummins Bridgeway, Clean Fuels | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by installing 13 diesel oxidation catalysts. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 3 | 0 to 30 days | \$14,000 |
| Licking | Newark City Schools, Cummins Bridgeway, Clean Fuel | This programmatic partner wishes to begin/continue deployment of US EPA Smartway Technologies by installing 21 diesel oxidation catalysts. This deployment will make the fleet more fuel efficient as well as reduce emissions. | Clean Fuels Ohio | 3 | 0 to 30 days | \$22,000 |
| Licking | CHILDREN'S CLOTHING RESALE BUSINESS | A retail resale business selling quality used infant and children's clothing and accessories. Affordable clothing will benefit low income parents and single parents. We will hire 2 full time and 2 part time employees with a beginning wage of \$8.00 per hour. This will allow us to operate 7 days a week and locate the business in a high traffic shopping center, or mall, in the Newark / Heath, Ohio area. Once established the goal is to open additional stores in surrounding areas such as Lancaster and Zanesville. | MAMA'S ATTIC | 7 | 0 to 30 days | \$275,280 |
| Licking | Security Enhancement | Project funds will provide for updated security cameras, locks, and allow the district to employ two security employees to provide coverage of areas that the facilities are utilized. | Northridge School District | 2 | 91 to 180 days | \$350,000 |
| Licking | Linville Lighthouse Teen Center | This is a Teen Center that serves teens mostly from Habron but we could also serve teens from Newark and Heath. We would like to provide a safe place for teens to come between the hours of 3pm and 8pm week days. This funds would be used to provide the facility, a coordinator, 1 part time youth coordinator and 2 teen workers. We would also use the funds to provide activities for the teens and provide transportation and employment skills for our teens. We hope to provide a safe environment for at risk teens in this area and provide them with educational and employment opportunities including choosing a career and gaining summer employment or full time work when they get out of school. We hope to provide guest speakers and field trips to local businesses so well. We hope you agree that investment in youth is the best investment we could make. | Linville Lighthouse Teen Center | 4 | 0 to 30 days | \$30,000 |
| Licking | Downtown Rehabilitation | Rehabilitation of a historic landmark in Holston OH. Addition of a downtown loft apartment and transformation of existing printing business. | Pal Printing | 1 | 31 to 90 days | \$100,000 |
| Licking | Energy Audit Technician | Educate and train a technician for energy audits for both residential and commercial applications. This person would be trained and work, completing energy audits for residential and commercial members of the cooperative. | Licking Rural Electrification Cooperative | 1 | 0 to 30 days | \$375,000 |
| Licking | Load Management Program | Installation of water heater and air conditioning load control switches. This will reduce peak demand for electricity resulting in less generation of electricity. This increases efficiency and lowers the demand. | Licking Rural Electrification Cooperative | 2 | 0 to 30 days | \$958,000 |
| Licking | My Daycare Center | Bought an old house in Jackson in order to turn it into a daycare center. The property needs a sprinkler system, fencing, electrical, plumbing, second story fire escape, wheel chair accessible doors, ramps and bathrooms. New furnace, water heaters, floors, insulation and walls, roof, porches, sinks, toilets, parking, lighting and paint. | Daycare Center | 7 | 0 to 30 days | \$150,000 |
| Licking | Emergency and transitional shelter for homeless me | First year operating budget for emergency and shelter for 32 homeless men. 32 beds x 365 days = 11,680 nights of shelter more during weather emergencies | The Society of Saint Vincent de Paul Housing Faci | 10 | 31 to 90 days | \$157,808 |
| Licking | Save Us | Insulation, siding, windows, roof, heat pump, Furnace, AC, gutters, soffit, fix concrete out front, security system, Emergency exit lighting, fix side porch, fix first floor, pay off existing debt. The outcome of this will be a more green 1912 building. More energy efficient. Gives our customer a safe place to come and pick up or mail, get their groceries, or pick up a pizza for delivery. We are the local pizza office. Saving an energy bill will make it easier for us to meet minimum wage requirements to protect the jobs we already have. Paying off existing debt will allow us to implement new ideas, purchase the property next door, put in a drive through that will add jobs and benefit the town greatly and assure we will be here for years to come. Purchasing the property next door and demolishing the building will be getting rid of an eye sore the whole town wants gone. I've owned the last five years of my life and every penny I have into this place please save our post office grocery store pizza place, new class room with good HVAC, lights, tables and chairs and computers, 5 new instructors in a new 10,000.00 building, with all new educational technology equipment. | Herbst Companies Limited DBA :The Brownsville Coun | 4 | 0 to 30 days | \$225,000.00 |
| Licking | recertification program | We would purchase "green" technology training equipment that would be utilized to train students to enter the workforce in "green jobs". We would also utilize this equipment in order to train adults that are out of work to reenter the workforce in the "green industry". By training people in these fields they would have skills needed to gain employment and be successful. We could take this equipment to different venues (i.e. county fairs, different schools, etc.) in order to reach many different people with the portability of this unit. | John Ellis Training Agency | 100 | 91 to 180 days | \$1,500,000.00 |
| Licking | Green Technology Job Training | This project will create indirect jobs through the supplying of the materials as well as the training of people for future employment. | Utica High School FFA | 20 | 0 to 30 days | \$625,000.00 |
| Licking | Family Connections Center | Materials needed Trainers \$432,000 Trailer \$150,000 Set up and Training \$ 13,000 Misc. Equipment \$30,000 | The Woodlands Serving Central Ohio, Inc | 3 | 0 to 30 days | \$45,000.00 |
| Licking | Green Technology Job Training | Due to the loss of funding through Ohio Department of Job and Family Services, Family connections Center a supervised visitation and drop off center is looking at closing our doors on July 1, 2009. this would result in the job loss of 2 people and the safety and security of victims of domestic violence that utilize the center for safe exchange and drop off of children to their non-custodial parent. Without the Family Connections Center program, Licking and surrounding counties that utilize the program will be without this service. | Utica High School FFA | 20 | 0 to 30 days | \$625,000.00 |
| Licking | Ohio Central RR Ultra Low Emissions Locomotive Swi | We would purchase "green" technology training equipment that would be utilized to train students to enter the workforce in "green jobs". We would also utilize this equipment in order to train adults that are out of work to reenter the workforce in the "green industry". By training people in these fields they would have skills needed to gain employment and be successful. We could take this equipment to different venues (i.e. county fairs, different schools, etc.) in order to reach many different people with the portability of this unit. | Ohio Central Railroad | 3 | 31 to 90 days | 809,934 |
| Licking | Sexual Assault Response Team | This project will create indirect jobs through the supplying of the materials as well as the training of people for future employment. | Licking Memorial Health Systems | 9 | 31 to 90 days | 20,000.00 |
| Licking | Parking Lot | Materials needed Trainers \$432,000 Trailer \$150,000 Set up and Training \$ 13,000 Misc. Equipment \$30,000 | Parnethesis Family Advocates | 4 | 31 to 90 days | 45,000 |
| Logan | Fire Station | The innovative project for EPA Clean Diesel funding for the Ohio Central Railroad is to retrofit one existing switch engine locomotive, built with 1970s technology, with modern environmentally-friendly technology. The remanufactured locomotive will be an Ultra Low Emissions Locomotive equipped with two Generac diesel technology. This technology incorporates state-of-the-art air reduction technologies reducing unnecessary idling and reducing locomotive exhaust emissions. The new ultra-low emitting Gen-Set engines are certified to EPA Tier II rail and Tier III off-road performance standards by the engine manufacturer and are designed to reduce fuel consumption, outside of nitrogen, hydrocarbons, carbon monoxide and particulate matter. The engine rebuild will occur in Coshocton, and the locomotive will be used in Newark, Licking County, Ohio upon project completion. It will take approximately 18 months to complete the project. These jobs are expected to be retained in Ohio that would otherwise have been lost/shifted, due to recent economic changes. Total project cost is estimated at \$1,079,915; OHCR is seeking \$800,934. The remaining \$269,979 will be funded by the OHCR cash reserve. | Village of Lakeview/Lakeview Fire Dept. | 5 | 91 to 180 days | \$675,000 |
| Logan | Dist 7, PID 85755, LOG Garage equipment | Every two minutes a sexual assault occurs. One in five women will be raped in their lifetime. We are fortunate in Licking County to help these victims in their time of need through our SMART program. SMART, Sexual Assault Response Team, was developed to aide victims of crime, head and give them a right to prosecute that assault. Without our SMART team 124 children and 36 men and women would have not been cared for in the past 10 years. It is imperative that we have the best care. It is imperative that our staff receive education based on current research and evidence based practice. In this time of financial constraints it is often we have to deny education needs before department needs. The funding received will go towards educating the staff on best practices. There are 9 sexual assault nurses who would benefit from this funding. The funding would also allow us to give the program to the most nurses would be able to serve as sexual assault nurses. Through education and compassion we can truly affect positive outcomes when caring for victims of crime. | Ohio Department of Transportation | 1 | 31 to 90 days | \$15,068 |
| Logan | Dist 7, PID 85756, LOG Purchase 1 copier | Purchase copier for Logan County, Tri-County, CAC | Ohio Department of Transportation | 1 | 31 to 90 days | \$6,738 |
| Logan | Dist 7, PID 85757, LOG Computers and sched software | Purchase 5 computers and scheduling/dispatching software | Ohio Department of Transportation | 1 | 31 to 90 days | \$41,864 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|--|----------------|--------------------|---------------------------|
| Logan | Dist 7, PID 85902, LOG Facility purchase | Facility purchase for the Tri-County Community Action Commission | Ohio Department of Transportation | 6 | 31 to 90 days | \$300,000 |
| Logan | Dist 7, PID 85758, LOG 2 MMVs and 2 radios | Purchase 2 modified minivans and 2 radios | Ohio Department of Transportation | 1 | 31 to 90 days | \$67,618 |
| Logan | Dist 7, PID 85759, LOG 2 converted vans & 2 radios | Purchase 2 converted vans and 2 radios for Logan County, Tri-County CAC | Ohio Department of Transportation | 1 | 31 to 90 days | \$91,118 |
| Logan | Lakeview Water Plant | Construction of a water treatment facility to replace plant built in the 1920's. This would be an approximate 30000 gallon per day plant with new and management removal and potential softening. This plant would let us better meet current and future drinking water regulations. The plant would serve about 1100 to 1500 consumers. | Village of Lakeview | 3 | 91 to 180 days | \$850,000 |
| Logan | N. Main St. Reconstruction | The project will consist of replacement of water lines, storm water lines, curbs and sidewalks to be upgraded to current handicap standards, street lighting, and pavement. | Village of Lakeview | 10 | 181 days or more | \$725,000 |
| Logan | St. John Drive Storm Sewer | Installation of storm sewers on this 1110 linear foot long road would help to eliminate the ongoing flooding in this heavily populated area. | Madison Township-Lake County | 15 | 91 to 180 days | \$239,650 |
| Logan | New Fire Station | This project would include the construction of a new fire station that would house equipment for the Lakeview Fire Department. Due to current equipment size, apparatus is spread throughout 5 separate buildings slowing response times. The project would help provide faster response to the residents of Stokes and Brown townships and the Village of Lakeview in Logan County. With this project these communities will be given a job in the event of a rapid re-assessment that meets today's standards. | Lakeview Fire Department | 50 | 31 to 90 days | \$1,000,000 |
| Logan | Emergency Medical Services Building | A new EMS building is needed to house three ambulances used in the Indian Lake area. We supply 911 services to three townships and mutual aid to 14 of another. We are talking about saving another township and have out grown our building built in the 1960's. | Indian Lake Emergency Medical Services | 20 | 31 to 90 days | \$500,000 |
| Logan | Over-site review for Flooding by Army Corps | As previously requested for federal budget consideration the funds to establish a review of flooding in the area and suggestions on how to reduce the annual flooding problems. Village of Russells Point. | Village of Russells Point | 25 | 181 days or more | \$100,000 |
| Logan | Increase police staff | Officers and equipment to increase the staff of our police department. | Village of Russells Point | 10 | 0 to 30 days | \$500,000 |
| Logan | remodie Village Offices | Remodie our village offices to provide updated heating and air conditioning and public facilities for events, kitchen and bathroom facilities with open area meeting room. | Village of Russells Point | 30 | 31 to 90 days | \$500,000 |
| Logan | Street repaving | Milling streets, paving streets, and burning streets throughout the Village. | Village of Russells Point | 50 | 91 to 180 days | \$10,000,000 |
| Logan | EMEGA Turbine Technology - Smart Tower Turbine Dev | combination of 11 first generation EMEGA hybrid vertical turbines, 21 "smart tower" design to enhance wind velocities and efficiency, and 31 supported by a patent pending solar enhancement. The turbine design is for urban use utilizing lower velocity winds, being environmentally friendly to wildlife, and runs with silent operations. This is unlike the conventional horizontal wind turbine. The tower will produce between 50 and 100 kw/hr. Although the tower can be utilized for direct electrical generation into the grid, it is proposed to generate sufficient electricity to produce hydrogen to fuel a "green" hydrogen gas for hydrogen highway. The turbine can operate in solar deficient areas. | Ironton Lawrence CAO | 20 FTE | 31 to 90 days | \$1,000,000 |
| Logan | Park addition | EMEGA Turbines is a spin off company of EMEGA Bio-Polymers, a internationally franchised company that sells patented "green" bio-polymer products made from soybean. This bio-polymer is currently being utilized to replace the traditional metal blades within the company's larger smaller | Village of Russells Point | 20 | 91 to 180 days | \$100,000 |
| Logan | Health Information Technology | Additional playground and park equipment for newly constructed park, providing more facilities for children and adults. The infrastructure primarily to have an electronic medical record system in place for use by 75 - 80 children. The system will include, electronic work, couriers and case managers in our 3 county equivalent behavioral healthcare setting. This would provide a secure, accurate, social medical record and being able to link to an individual's electronic health record. | Consolidated Care, Inc. | 2 | 91 to 180 days | \$150,000 |
| Logan | Dist 7, PID 82785, LOG SR 274 4.78 | Replace Structure Over The Great Miami River. | Ohio Department of Transportation | 29.9 | 31 to 90 days | \$1,042,355 |
| Logan | Dist 7, PID 19988, LOG SR 235 2.22 | Bridge Replacement | Ohio Department of Transportation | 58.6 | 31 to 90 days | \$1,682,271 |
| Logan | Dist 7, PID 19988, LOG SR 235 2.22 | Bridge Replacement | Ohio Department of Transportation | 58.6 | 31 to 90 days | \$1,682,271 |
| Logan | Water filtration and purification | Mandated by the EPA THM and HAAS | Village of Russells Point | 50 | 91 to 180 days | \$1,500,000 |
| Logan | Storm Sewers Curbs and Gutters | Update and upgrade existing system to filter out the above | Village of Russells Point | 75 | 181 days or more | \$20,000,000 |
| Logan | Wireless Broadband Internet Service | Curbs gutters and storm sewers to help alleviate flooding and take care of run off water from the Village. This Wireless Broadband Internet Service offering would target potential customers who are in un-served and under served rural areas who do not have access to Broadband Internet services. The funds would be used to purchase and install Wireless Broadband Radio equipment in the Bellefontaine, Ohio (Logan County) area on either an existing or a new tower depending on the best coverage area available. The funds would also be used to provide customer premise radio equipment in order to provide the radio link between the customer and the base station radios. The service would be provided in the 700 MHz National wireless radio band. NCTelco already owns the 700 MHz license for Logan and surrounding counties. Unlike other radio services, the 700 frequency is not strictly "line of sight". Thus, NCTelco Inc. will be able to provide service to customers who were previously not able to obtain Broadband service. Approximately 50 to 75 new customers could initially be provided service with the \$85,000 stimulus fund. A total buildout, serving in excess of 300 customers would be possible utilizing the estimated \$225,000 in total project cost estimates. Rehabilitation, repaving, widening, and linear grading of approximately 85 miles of various County Highways. This project will improve safety and efficiency of our transportation system. | NCTelco Inc. | 2 | 91 to 180 days | \$85,000 |
| Logan | Logan County Highway Rehabilitation, Resurfacing a | Rehabilitation, repaving, widening, and linear grading of various Township Road of the 17 townships within Logan County. This will improve safety and economic development within the county. | Logan County Engineer's Office | 45 | 91 to 180 days | \$19,905,111 |
| Logan | Various Township Highway Rehabilitation and Resurf | Rehabilitation and Resurfacing of roads within the 11 villages within Logan County. This will improve the potential for local development within the villages and aid their businesses. | Logan County Engineer's Office | 45 | 91 to 180 days | \$18,005,778 |
| Logan | Various Village Street Rehabilitation and Resurfac | Replacement of our primary drinking water well that was drilled in 1988. We have attempted to refurbish the well without positive results. The issues we with only one well and it was drilled in 1968. The increase to our citizens would be a negative effect on the current economic status. The project includes the engineering work needed and the drilling of a new well. Once that is complete, the new well will receive a new pump and be connected into our water treatment plant for use. Once this is completed, we are confident that we will be able to supply good, safe drinking water to our citizens. | Logan County Engineer's Office | 45 | 91 to 180 days | \$12,411,412 |
| Logan | New water well | Replacement of our primary drinking water well that was drilled in 1988. We have attempted to refurbish the well without positive results. The issues we with only one well and it was drilled in 1968. The increase to our citizens would be a negative effect on the current economic status. The project includes the engineering work needed and the drilling of a new well. Once that is complete, the new well will receive a new pump and be connected into our water treatment plant for use. Once this is completed, we are confident that we will be able to supply good, safe drinking water to our citizens. | West Mansfield Public Water Service | 2 | 31 to 90 days | \$100,000 |
| Logan | Green Energy Reduction Project | We plan to upgrade our building systems and implement an energy conscious strategic plan to our students as part of our curriculum. Our Energy project will consist of the following: 189 - 10kw Renewable Wind Turbine, 191 - 20kw Renewable Solar PV Array, New High Efficient Lighting throughout the entire school, Occupancy Sensors Throughout, New High Efficient Boiler Heating System, New Lighting Computer Stations in each classroom, and an Integrated Central Automation System. We expect to reduce our energy bills by nearly 30%, and provide a "Green Team" energy educational curriculum to students in grades K-12. Our staff and administration team is excited about all the positive results that this program could yield! | West Liberty - Salem Local School District | 26 | 91 to 180 days | \$950,450 |
| Logan | Remodel/Expansion | Legend remodel storefront entrance, with four new roof standing generator/5KW 200PHZ 40' horizontal basement, an underlayment that needs updated for food safety & energy savings, single pane glass to be replaced by double-pane low-e glass roll-ups 5000sq' of floor near roof to replace asphalt shingles - w/ or w/o roofcoat cases will replace open cases which make heating more costly (especially emergency heat) to control. The generator would supply power in times of outages and continue service to this small town. These outages have cost loss of goods requiring refrigeration and loss of insurance when a claim was made! Small town grocery 15-20 miles from larger markets supported well when gas prices were high or weather related, used as convenience store otherwise, will use local contractors for work to be done possibly and employees as business increases - all of the projects should offset sales April! which will allow for local conventional bank loans for other upgrades | Fields Grocery | 15 | 31 to 90 days | \$200,000 |
| Logan | Town Hall Restoration | Stabilization and renovation of the existing Town Hall building that houses the Liberty Township government offices and some of the government offices of the Village of West Liberty. The second story of this building houses a historic space house that will be lost forever unless we can stabilize and renovate the building. All residents in Liberty Township, the village of West Liberty and the surrounding school districts would benefit from having this building preserved and used for cultural events as well as the government uses it now provides. | West Liberty Historical Society | 20 | 0 to 30 days | \$1,000,000 |
| Logan | Drainage and waterway project | Increasing the volume of water the town drainage system can handle allowing the town to drain more efficiently during periods of moderate to heavy rains. | The Village of West Mansfield | 8 | 31 to 90 days | \$300,000 |
| Logan | In-town drainage | Determine why South Main Street floods after moderate to heavy rains and correct the problem. Must also determine if the same problem that floods South Main Street causes the flooding on South Dear Street. If not, that problem must also be located and corrected. | The Village of West Mansfield | 8 | 31 to 90 days | \$200,000 |
| Logan | Street repairs | Concrete damage to side streets that are in need of repair. | The Village of West Mansfield | 10 | 31 to 90 days | \$250,000 |
| Logan | Sidewalks | New sidewalks for the entire village, approximately 7 miles. Old sidewalks are in disrepair, unsafe and unsightly. | The Village of West Mansfield | 10 | 31 to 90 days | \$750,000 |
| Logan | Natural Gas to Village | Provide natural gas to the village. This would allow others to convert propane furnaces to less-expensive natural gas, helping the many low-income families in the community. It also would make it possible to eliminate the need for fuel oil and propane tanks, which are unattractive, costly and can leak, and may cause injury if a child climbs on them. | The Village of West Mansfield | 10 | 91 to 180 days | \$1,000,000 |
| Logan | Renewable Energy Project Phase II | This project involves the addition of 20 kW wind turbine, a 20 kW solar PV array and solar thermal domestic hot water heating system. This program will be used for educational purposes as well as energy production. | Ohio Hi-Point Career Center | 15 | 31 to 90 days | \$333,000 |
| Logan | Energy Reduction Program | Project includes bathroom renovations including water conservation projects and ADA compliance program, central automation expansion and problem-solving program for individual customer buildings. | Ohio Hi-Point Career Center | 17 | 31 to 90 days | \$780,000 |
| Logan | Geothermal | This project is to buy (1) directional boring machine, send about (4) people to school to put in geothermal heating systems and install loop systems in homes without using a bid and bid. | Taylor Tool | 5 | 91 to 180 days | \$200,000 |
| Logan | Teacher for JDC | Our Sheriff's Office runs a juvenile detention center for two counties (Logan and Hardey). We are required to provide year-round education for the youth. Our office has suffered severe funding cuts and we are in dire need to continue the education program at the JDC. This funding will enable our office to continue to have a teacher. | Logan County Sheriff's Office | 1 | 91 to 180 days | \$50,000 |
| Logan | Mental Health and Educational Programs | This funding would provide groups consisting of mental health topics (self-esteem, anger management, depression, conflict resolution, etc) to the youth at the detention center and adults at the jail. It would also provide GED classes and parent education classes for the adults at the jail. A domestic violence group for both victims and offenders would be available. This funding will assist individuals with the stress of the jail and use to stay out of trouble. | Logan County Sheriff's Office | 3 | 31 to 90 days | \$33,000 |
| Logan | CIT Training for staff | Our office is working with our local mental health organization to CIT (Crisis Intervention Training) training for our staff. This training is for law enforcement and makes officers to be the spots while those individuals are at the training. This funding will provide for the training costs for the staff and the overtime it creates. | Logan County Sheriff's Office | 8 | 91 to 180 days | \$25,000 |
| Logan | Court Security | CIT is an important skill for our deputies and correction officers to have. The goal is to decrease the number of individuals with severe mental health issues who get incarcerated. It also helps provide correction staff with skills to deal with those who are incarcerated. Our office is responsible for providing court security for a building of three levels. With our recent budget cuts, this was an area affected. This funding would retain two positions and create a new one. There are also times when a judge travels to the jail and security needs to be provided there. This would increase safety for the judges and court house personnel. There are also times when the hearing is in a courtroom and we would be able to provide better public safety. | Logan County Sheriff's Office | 3 | 0 to 30 days | \$132,000 |
| Logan | Maintain positions and provide OT coverage | Our office has suffered severe funding cuts (a million) and lost approximately 42 jobs. We currently operate a juvenile detention division, jail, and juvenile detention center at minimal staffing. We have had to cut back the number of inmates we can hold and can create a safety concern. With this staffing issue, overtime is a weekly concern. This funding will assist in providing public and staff safety. This funding will also assist in preventing further staff reduction. | Logan County Sheriff's Office | 25 | 0 to 30 days | \$200,000 |
| Logan | Transport Deputy | Due to decrease in our staff, over 40 people, when the jail needs transportation of a detainee it causes issues. This would create a position to allow one person to transport detainees to medical and mental health appointments, to court, prison, and suicidal individuals to mental health facilities. This will allow correction staff to not need overtime for this transportation issue. It benefits the court and public safety. | Logan County Sheriff's Office | 1 | 0 to 30 days | \$13,500 |
| Logan | Safety Town | Our agency in conjunction with Highway Patrol conducts a safety town for youth who are entering kindergarten. This class lasts 5 weeks and has approximately 200 youth who attend. They are taught traffic safety, bus safety, child protection safety issues and many other things. This funding allows us to continue running this program with the local Exchange Club. | Logan County Sheriff's Office | 1 | 31 to 90 days | \$14,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Logan | Middleburg Sanitary Sewer System | This small unincorporated village in southeastern Logan County, located near the Transportation Research Center and not far from an existing waste treatment facility, has had difficulty justifying the expense of the plant to the residents of the area. This project has been encouraged by the Logan County Health Department to seek the drawbacks of onsite sewage treatment. There is also high potential that completion of the sewer system would spur residential and business development in that area. | Logan County | 15 | 31 to 90 days | \$1,000,000 |
| Logan | Logan Acres Independent/Assisted Living | A recent marketing study shows the need for independent/assisted living facilities in Logan County. This project would provide the necessary services for the aging population in Logan County as well as create jobs for those construction and serving the facilities. | Logan County | 45 | 91 to 180 days | \$3,000,000 |
| Logan | Indian Lake Water Pollution Control 2009 Phase II | This project consists of a pumping station and force main between the Village of Lakeview and the existing wastewater treatment plant in the Village of Russell Point. Completion of this project will help ensure the restoration of existing business and industries in the area, while allowing the community the ability to increase their commercial and industrial development. At the same time, it will better enable the protection of the environment in general and the area in particular. | Logan County | 15 | 31 to 90 days | \$100,000 |
| Logan | Miami River Improvement Project | This project would provide flood and erosion control which would impact over 34,000 parcels of land and 176,500 acres in Logan County. This project is a rehabilitation of the recently abandoned National Guard Army, located on Main Street in downtown Bellefontaine. The development of a civic center in Logan County will allow for increased activity by numerous businesses in the community by allowing Logan County to host various activities. This facility would have a positive impact on many existing businesses in the area as well as spur development of new businesses. This facility would provide local businesses the opportunity to provide services to those using the facility for regional meetings, exhibitions, trade shows, etc. | Logan County | 12 | 31 to 90 days | \$1,047,790 |
| Logan | Civic Center Development | This project would provide flood and erosion control which would impact over 34,000 parcels of land and 176,500 acres in Logan County. This project is a rehabilitation of the recently abandoned National Guard Army, located on Main Street in downtown Bellefontaine. The development of a civic center in Logan County will allow for increased activity by numerous businesses in the community by allowing Logan County to host various activities. This facility would have a positive impact on many existing businesses in the area as well as spur development of new businesses. This facility would provide local businesses the opportunity to provide services to those using the facility for regional meetings, exhibitions, trade shows, etc. | Logan County | 20 | 31 to 90 days | \$1,320,080 |
| Logan | Logan/Champaign Behavioral Health Juvenile Justice | Our goal with the program is to keep in place the positions in the Juvenile Courts in both Logan and Champaign Counties that can screen and assist youth on and provide linkage to appropriate local mental health and/or A&D services. We also want to sustain the evidence based treatment approach of providing Intensive In Home Services to those families identified who are most at risk of the youth ending up placed outside the home. We have data now to support the fact that the BHJJ Project so far has screened almost 800 youth from the two counties in 2 1/2 years and at least 350 of those youth have been identified needing mental health or substance abuse treatment. In addition we can cite a number of families who have been able to remain together and OTC of foster care placements that have been avoided through the use of BHJJ intervention. | Mental Health Drug & Alcohol Services Board | 3 | 0 to 30 days | \$50,000 |
| Logan | Nuisance violation enforcement | A deputy will work in conjunction with our local health department to enforce nuisance violations, such as litter, junk vehicles, sewage, and yard issues. Our local health department has had lay off staff and as well as our office. These issues are not being addressed in a proper manner and serious crimes are being dealt with due to staffing issues. The community would like to see them being addressed and being helped with the problem. The deputy would work with the prosecutor's office to follow through with charges. | Logan County Sheriff's Office | 2 | 31 to 90 days | \$28,000 |
| Logan | Crime prevention officer | This deputy would work additional overtime hours to assist the community with crime prevention activities. He would also work with the prosecutor's office to provide suggestions on making properties safer. Our office has a large number of thefts and the will assist with the crime prevention number. | Logan County Sheriff's Office | 1 | 31 to 90 days | \$28,000 |
| Logan | Clean up our County | An officer will be given overtime to assist in supervising trustees from out of jail to clean up roads in our county. This will be done one time a week for 8 hours for 21 weeks. This will help with our county which is total and has problems with litter on the roads. The goal is to pick up a 10 mile area each time. Trustees will also be providing a service to the community while being incarcerated. | Logan County Sheriff's Office | 1 | 31 to 90 days | \$12,000 |
| Logan | Enforcement for Pleasant and Miami Townships | Two officers will work 32 hours a week in Miami and Pleasant Townships with the assistance of the Dayton Police Department to provide more enforcement. These townships have a high volume of drug activity and theft related activity. This will help with the elimination of drug dealers and also provide a collaboration with a local village department. The residents of these townships will benefit from the additional enforcement and crimes will be solved. The goal would be to decrease the drug activity and thefts. | Logan County Sheriff's Office | 2 | 31 to 90 days | \$144,000 |
| Logan | Video Equipment | These funds would provide all road officers and detectives with digital recorders and purchase surveillance equipment. The surveillance equipment will allow officers to perform other duties instead of sitting on a situation. This will allow our short staffed officers to be able to handle more situations. It will help with retaining a position. The recorders will assist in public officer safety in situations that may be questioned by the public or offender. It also provides evidence for criminal prosecution. | Logan County Sheriff's Office | 2 | 31 to 90 days | \$10,000 |
| Logan | Training | Funding will be utilized to purchase training materials for law enforcement and correction officers. It will also be used for the gun qualification and the training officer. We will offer the training to other village police departments. By being able to use money for training, it will allow us to retain a position and training as a mandated need to do this. | Logan County Sheriff's Office | 1 | 31 to 90 days | \$30,000 |
| Logan | Vehicles and Related Equipment | Our office is using vehicles with are 2-3 years old with approximately 80,000 miles on them. Our county spans 432 square miles and officers often have to drive from one part of the county to the opposite. Due to budget cuts we do not have any money to purchase new vehicles and the ones we have have not been used for several years. All vehicles will be equipped with a camera which will be used for evidence for criminal charges. By obtaining this money, it will allow the retention of 7 jobs. | Logan County Sheriff's Office | 7 | 91 to 180 days | \$350,000 |
| Logan | Security Upgrades | The security camera and audio system in both the jail and juvenile detention center are in need of upgrade and additional cameras. Neither facility can be without a system. This system helps with security of officers and inmates, which we currently have no incident per week with an inmate. The security system will also assist in officer safety as we have had several officers severely injured by an inmate. This funding is needed and would be able to save approximately 3 jobs. | Logan County Sheriff's Office | 3 | 91 to 180 days | \$117,500 |
| Logan | Logan/Champaign County Suicide Prevention Coalitio | The Suicide Prevention Coalition of Logan/Champaign Counties is dedicated to promoting awareness and reducing stigma surrounding treatment for mental illness. The coalition hosts gatekeeper training throughout the community as well as participate at various local health and wellness fairs. We distribute literature on programs available as well as host an awareness and in-memory ceremony in each county each year to remember those we have lost in the past year to suicide. We are aware of the risk factors in each county, and that Champaign County has historically been a high ranking county #13 out of the 81 counties at last report. We are dedicated to reaching those we consider at risk and always transitioning ways to reach additional people. Any funding received would be used to maintain or increase gatekeeper trainings, provide support for those who have lost someone to suicide, re-stock brochure supplies, and cover the costs for future ceremonies. | Consolidated Care Inc | 3 | 0 to 30 days | \$2,000 |
| Logan | PID# 86060 - Rehabilitation Project I - Bus Wash B | PID# 86060 - Rehabilitation Project I - Bus Wash Building | Ohio Department of Transportation | 1 | 31 to 90 days | \$867,740 |
| Logan | PID#86061 Rehabilitation Project II HVAC, Plumbin | PID#86061 Rehabilitation Project II HVAC, Plumbing, Green Systems | Ohio Dept. of Transportation | 15 | 31 to 90 days | \$1,575,292 |
| Logan | establishing a local farm market | Hope to establish a local farm market to benefit the community. Would like to produce a locally grown product to sell to the area, grown on an organic farm with local labor. By developing a unique business to produce a high quality farm raised product. I think that a farm market in my area would bring in many customers that would also patronize other local business. | Rice Farms | 3 | 181 days or more | \$48,000 |
| Logan | L.O.S.S. Team of Logan/Champaign Counties | The L.O.S.S. (Local Outreach to Survivors of Suicide) team of Logan and Champaign Counties consists of volunteers and professionals who are trained to respond to the scene of a suicide to offer support and resources to those who have lost a loved one to suicide. The LOSS team works closely with the Coroner as well as law enforcement in both counties and are invited to the scene or place of death (if in a hospital) by the Coroner's office. We have been responding locally since June of 2008 and have assisted approximately 25 suicides thus far. Money would be used towards the resource packet that we provide to survivors and purchasing additional Survivors of Suicide Handbooks. | Consolidated Care Inc | 15 | 0 to 30 days | \$1,000 |
| Logan | Personnel | Our office has lost 40 positions due to budget cuts. Our road, jail and juvenile detention center is at minimum staffing and we have had to reduce the number of inmates we can hold due to staffing issues. The road has seen an increase in the number of calls but we are working with fewer officers. This funding would allow the return of 2 dispatchers, 2 correction officers, and 1 road deputy for three years. | Logan County Sheriff's Office | 5 | 31 to 90 days | \$402,000 |
| Logan | Communication Systems | The need for this additional jobs is due to officer safety and public safety as well as enforcement of crimes which are on a rise. Our radios and communication system will not be usable in 2013 and we must switch to digital. Our office provides the dispatch system for our office, the local villages, and 14 and 60. This funding requested would also pay for the village upgrade as well as the state job. This amount includes bases, mobiles, portables, installation and links to the main tower. By providing funding for the communication system, which will have to be done, we will be able to retain 7 positions. | Logan County Sheriff's Office | 7 | 91 to 180 days | \$275,000 |
| Logan | Equipment | Due to budget cuts at our office of over 1 million, we have had to cut buying new uniforms, guns, gear, and more. Currently our staff of deputies and correctional staff have two uniforms. There is wear and tear on them as we also recycle uniforms as people leave. We need 2 uniforms per person (51 people), 21 new guns, and 44 leather belts and more. Our current gear is old and not practical and we can get upgrade on them. By using funds for this it will allow the retention of 3 positions. | Logan County Sheriff's Office | 3 | 31 to 90 days | \$85,000 |
| Logan | Indian Lake Home Revitalization | The Indian Lake area has suffered from a large number of foreclosures and has led to a significant number of houses that gone into disrepair. We believe this has a "broken window effect" and is detrimental to the area. We have funds to purchase and renovate 5-10 homes as well as provide funds to increase curb appeal for homes that have the greatest potential to be a "tipping point" to regenerate a once thriving in-state vacation destination. Once completed the homes will be used as vacation rentals, adding to the local economy through tourism dollars. Jobs will be created with the required renovations and added tourism. | Indian Lake Vacations | 25 | 0 to 30 days | \$250,000 |
| Logan | Lorain Corridor (Sandusky to Cleveland) | Connect Downtown Cleveland to Sandusky via Light Rail. A Train Stop is already located in Lorain. | None | 500 | 181 days or more | \$20,000,000 |
| Logan | McArthur & Richland Township Road 100 Widening Pro | Replace bus culvert, guardrail, various small culverts, and widen and resurface 1 and 1/4 mile of road from 12 foot to 18 foot. | McArthur Township, Logan County | 90 | 31 to 90 days | \$532,000 |
| Logan | Traffic Sign Upgrade | Replace 192 traffic signs to comply with F.H.W.A. retroreflectivity regulations. | McArthur Township | 10 | 31 to 90 days | \$21,920 |
| Logan | Road Resurfacing Project | Resurface of 31,987 square yards of township roads with two inch base coat. | McArthur Township | 27 | 31 to 90 days | \$335,864 |
| Logan | Water Treatment Plant Upgrade | The Village of Quincy is currently exceeding secondary standards for drinking water contaminants. Water hardness is around 300 milligrams per liter, and is 4 milligrams per liter and manganese is 0.091 milligrams per liter. In addition, trace concentrations of arsenic have also been detected (0.004 milligrams per liter) and though they are currently below the MCLs, there is a concern for future violations. Jones and Henry have finished a general plan for the Village and are proposing green sand pressure filtration to upgrade their current treatment processes. This project is an upgrade to their current treatment and design will be relatively straight forward with a short construction time frame. | Village of Quincy | 8 | 91 to 180 days | \$800,000 |
| Logan | Retirement of debt | The Village of West Mansfield currently has \$2,238,157 of debt that was incurred to upgrade the water and sewage facilities. This debt adds \$48000 to each household's water and sewage bill. Nearly 30 percent of the residents are behind on water and sewage payments. Each month a few more than 1000 are in arrears and are so far behind on the bill. If this debt were to be retired, it would provide \$40 each month that families could spend on other things, and help ensure that all of the families of our village have access to safe, clean water. | The Village of West Mansfield | 0 | 0 to 30 days | \$3,000,000 |
| Logan | Township Road 129 | Regrading and widening Township Road 129. It will improve safety and traffic flow on a road that has seen a recent increase in residential development. | Perry Township Logan County | 1 | 31 to 90 days | \$170,000 |
| Logan | Water Main Replacement(south end of village) | Project to replace old and under sized drinking water distribution mains on south end of village, replace 4 1/2" old cast and A/C pipe with 8" PVC. | Village of Lakeview | 2 | 91 to 180 days | \$140,000 |
| Logan | LOG-US68-7.32, PID #84661 | Extend surface & restore 0.2 mile of roadway & striping. This is a section of the bullet road to town & money asked for represents the City's portion of this ODOT project. This beginning (north) where a previous ODOT project terminated & extends to where a new ODOT project will begin. | City Of Bellefontaine, Ohio | 25 | 31 to 90 days | \$500,000 |
| Logan | Court Avenue Pavement Rehabilitation Project PID # | This project consists of reconstructing portions of historic Court Avenue in Bellefontaine, Ohio which is our nation's first & oldest concrete street. The pavement is still in use but has portions of it in need of repair. | City Of Bellefontaine, Ohio | 8 | 31 to 90 days | \$42,930 |
| Logan | LOG-68-5.92 | This project consists of widening 1/42 mi. of U.S.88 south from Pine Avenue in Bellefontaine, Ohio. This roadway is @ lane capacity & shows up on ODOT's statewide congestion map. Also included is the costs for right of way & engineering that the City is responsible for as well as the utility easements that the City is using in advance of this project letting in late 2009. | City Of Bellefontaine, Ohio | 50 | 181 days or more | \$4,555,704 |
| Logan | Spring Avenue Reconstruction Project | This project consists of reconstructing a 640' portion of E. Spring Avenue in Bellefontaine, Ohio that is very uneven due to unstable construction in past years. The existing pavement will be removed, base stabilized & individual utility lines within the affected area replaced prior to rebuilding the street. | City of Bellefontaine, Ohio | 10 | 91 to 180 days | \$100,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|---|---|---|----------------|--------------------|---------------------------|
| Logan | Transportation for Logan County Transit Maintenance | Renovation of existing facility for rural transit program. Renovation of Facility will include maintenance bay for fleet maintenance, wash bay, parking garage, office and training facilities. Green heating in the form of geothermal will be installed throughout the 18,000 square foot building. Green lighting throughout. 3 solar powered gated entrances, and the wash bay utilizing 75% water recovery system to reduce water usage. This \$2.4 million dollar project will engage contractors, stimulating our local economy with jobs and purchases of supplies and materials. By installing all green measures, long term benefits are increased. Additionally, long term benefits for the agency include: space cost reductions, allowing for increased levels of transportation services, thereby reducing fuel costs and foreign oil dependence; increased driver satisfaction and skilled labor to perform vehicle maintenance; improvement to the pay scale for current employees, also stimulating the local economy; reduction in maintenance costs for the entire agency fleet, resulting in opportunity to expand services to meet our community needs. This project will provide benefits for the next 20 years. | Tri-County Community Action Commission Champaign, | 50 | 31 to 90 days | \$2,400,000 |
| Logan | Behavioral Health and Juvenile Justice | The Behavioral Health Juvenile Justice project provides assessment, counseling and case management to youth involved in the court system or mental health or co-occurring disorders in an effort to reduce recidivism and out of home placement. These funds will enable us to maintain our staffing level and provide assessment, care coordination and supervision services to 125 youth per year. Ohio Reclaim Funds have been reduced because we are not sending juveniles into the state prison system and are instead working with our community partners to provide the necessary services and supervision in the community. Logan County has received very little over the past two years to make the project an essential part of the Juvenile Court system and without the additional funds jobs will be lost and services will not be provided to these youth and their families. | Logan County Family Court | 5 | 0 to 30 days | \$225,000 |
| Logan | LOG Capitalized Maintenance; PID 86086 | 2009 Capitalized Maintenance. This is a rural transit project whose funding flows through ODOT. | Ohio Department of Transportation | 1 | 0 to 30 days | \$13,000 |
| Logan | Bellefontaine Regional Airport Corporate Taxiway D | This project consists of installing water, sanitary & storm sewer lines & the required aircraft taxiway, entrance drive & parking area to provide for corporate hangar development @ the Bellefontaine Regional Airport. Since opening this new airport in 2002 we have added more T hangars & had one private hangar built & the development of this area for corporate hangars has been identified on our approved Airport Master Plan. To date there has not been utilities available to use in this area & once installed it will be an attraction to company's to locate their aircraft facility here. | City of Bellefontaine, Ohio | 10 | 91 to 180 days | \$350,000 |
| Logan | Landfill Groundwater Monitoring Program | To reinitiate the groundwater monitoring around 3 landfills, one of which has already shown shallow aquifer contamination. The program was terminated due to loss of tax levy funding at the end of 2008. | Logan County Health District | 1 | 181 days or more | \$40,000 |
| Logan | City of Bellefontaine, Ohio Curb, Sidewalk & Pavem | This project consists of repairing the existing concrete curb & sidewalk (where needed) & grinding if necessary & repaving the streets when needed. These are all streets that are in need of reconstruction that we have applied for funding previously but were unsuccessful in getting funded or ran out of money before we could finish these portions of the streets. The streets include the most easterly portion of Spring Ave., East Patterson Ave., South First Street, Cooper Avenue, East Columbus Ave., T.S. 179, N. Park St., Madewest Street (which is U.S. 66 & S.R. 47 on portions), North Springhill St., N. Paris St., Clagy Street & W. Williams Ave., | City of Bellefontaine, Ohio | 205 | 91 to 180 days | \$2,900,000 |
| Logan | Street Resurfacing | Our City Council has not budgeted any paving money for this year as we are losing 2 plants located in town with a total loss of 500 jobs & they are worried about the loss of income tax dollars on the overall City budget. The only source of paving dollars comes from the income tax derived general Fund & our investment revenues which is very small given the current economic situation. | City of Bellefontaine, Ohio | 12 | 91 to 180 days | \$700,000 |
| Logan | Mattress Recycling Facility Pilot Project | An average mattress takes up 23 cubic feet of landfill space and because of the inner spring construction it is difficult to cover and dampen when compacting equipment. We seek to use some funds to provide training for green jobs and reduce an innovative approach as well as reduce costs from being landfilled. This project will employ people from the community that are experiencing long term unemployment as well as provide employment barriers. It will bring together many agencies and branches of local government. Supplemental and/or additional funding will be captured from private sources, foundations, grants and the revenues generated from the resale of mattresses and output of recyclable materials. | Logan County Solid Waste Management District | 20 | 0 to 30 days | \$65,000 |
| Logan | West Liberty Fire Department New Construction | Replacement of a 100+ year old facility that has not contained the modern-day vehicles for many decades. We will include the EMS function to the West Liberty Fire Station and maintain all vehicles current and for the future. We will utilize EnergyStar approved walls, roofing, windows and doors in our facility designs. We also have specified a fire alarm system that is based on a geothermal system. We will also take advantage of natural sunlight and heat to provide much of our energy needs. | West Liberty Fire Department | 25 | 31 to 90 days | \$1,284,000 |
| Logan | City of Bellefontaine Police Department Constructi | Replacement of current police department facility to make it a stand-alone with significant new parking. Also will update all communications equipment which disagees the entire area. The communications equipment is no longer being supported by the Motorola Corporation due to its age. Should require necessary non-functional systems must be searched for working elements to be used in the repair. Of course the length of function for these parts is much less and a higher degree of reliability is imposed on this vital communications gear. The request to replace the police facility is supported by the Mayor, Senate District and Bellefontaine City Council Members. The facility, while not elaborate, will be able to function for the community for 40-50 years without appreciable upgrades. Significant energy saving equipment including geothermal HVAC system, upgraded exterior light for the interior of the building, and EnergyStar wall, window and door structures are designed into the facility. This project would provide new modern swimming facility for our community. It would replace a facility which is over 40 years old and has numerous infrastructure and safety issues. This project would result in the retention of 2 full time and approximately 20 part time seasonal positions and would have a minimum useful life of at least 50 years. | City of Bellefontaine Police Department | 70 | 31 to 90 days | \$7,621,000 |
| Logan | Swimming Pool | This project would replace all of our aging inventory of manual read water meters, approximately 5,200, and upgrade to a Automated Meter Reading Technology. This would greatly enhance our ability to meter and monitor water supplied to our customers and to provide greater customer service. In addition, we would have a greater ability to identify problems in real time as opposed to during or post reading. | City of Bellefontaine | 25 | 91 to 180 days | \$3,500,000 |
| Logan | Automated Water Meter System | This project would allow us to improve our 17 Lift Stations by installing modern control panels with reporting capabilities. This would allow for improved monitoring of the systems and which would result in better pollution control and greater efficiency. | City of Bellefontaine | 10 | 31 to 90 days | \$2,390,275 |
| Logan | Lift Station Improvements | New Water Treatment Plant with building, lab, office, pumping filtration, ion exchange, softening, controls, piping, cleanwell, and appurtenances including backflow filters and retention tank. | City of Bellefontaine | 10 | 91 to 180 days | \$220,000 |
| Logan | Water Treatment Plant | This project is designed to remove known hotspots in our sanitary sewer collection system. There are approximately 10 areas where the system reduces down causing obstructions to the flow. The expected outcome would be improved flow through the system resulting in less backups and thus less health to citizens and the environment. | Village of Lakeview | 40 | 91 to 180 days | \$2,350,000 |
| Logan | Improve Sanitary Sewer Collection System | This project would allow us to line approximately 12,000 linear feet of sewer line and 50 manholes. The expected outcome would be less infiltration to the collection system and thus less flow to the WWTPT and cleaner, more natural ground water. | City of Bellefontaine | 12 | 91 to 180 days | \$330,000 |
| Logan | Sanitary Sewer/Manhole lining | Upgrade of existing Wastewater Treatment Plant. This project is expected to increase our daily flow capacity from 3.5 million gallons to 4.5 million gallons. It will provide new aeration channels, a new clarifier, UV disinfection system, new motors and pumps, and many other features associated with WWT. The expected outcome is a more efficient plant (less energy use) that is able to operate (elimination of chlorine disinfection) that is able to process larger volumes of effluent. | City of Bellefontaine | 25 | 91 to 180 days | \$2,800,000 |
| Logan | Waste Water Treatment Plant Upgrade | Upgrade filter media, install new media, disinfected & return filter to service. Remove old filter backwash valves (2), install new filter backwash valves w/stop valves (2) - remove old filter control valves (4) & replace with new control valves(4). | Village of West Liberty | 5 | 31 to 90 days | \$25,000 |
| Logan | West Liberty Water Tower Painting Project | Use containment & abrasive blast clean the exterior of the Village 250,000 gallon elevated water storage tank. Application of a three-coat polyurethane paint system. Adjust all loose sway rods, repainting of chains to the tank ballast/valve opening, repair cracked overhead pipe, install a new cover on the tank roof & replace blast clean the tank ballast & apply a three-story paint system. | Villager of West Liberty | 10 | 91 to 180 days | \$250,000 |
| Logan | District Processing Center for Recycled Materials | The District is expanding its recycling capabilities by adding more recycling centers throughout the county. The recycled material from residences and small businesses must be transported to a central processing facility and sorted, bailed, and moved to markets. The District just purchased a 4 acre site that was an old tractor yard with a building pad for use as a recycling facility. Upgrades need to be made to the building and are planned. | Logan County Solid Waste Management District | 6 | 31 to 90 days | \$560,000 |
| Logan | office continuation | The sorting line and employees' job material and program for market would provide six good paying "green jobs" with a secure future. The District plan was to have these jobs added as revenues allowed, perhaps in three to four years. The demand for these jobs will occur immediately after the site expansion. We would like to evaluate the building and add the sorting and processing capacity to our ability to recycle materials, immediately and are prepared to do so immediately. | Logan County Prosecutor's Office | 3 | 181 days or more | \$225,000 |
| Logan | Expanded recycling network in rural county | To maintain 8 staff members necessary for the operation of the Prosecutor's Office to be able to continue the criminal justice responsibilities of the County. | Logan County Solid Waste Management District | 12 | 0 to 30 days | \$500,000 |
| Logan | Slough Pump Station | Build an additional ten rural recycling centers in Logan County to serve rural residents. Cost to construct and equip each recycling center is \$50,000 with an expected life of 25 years. Jobs created: 2. Jobs retained in concrete construction, steel work building large, portable recycling containers, electric power to each site, a truck purchase to service the ten sites delivering recycled materials to a central county sorting and processing center. The County has 2 full time recycling centers currently and plans to build another seven this spring and summer. The District want to expand to 25 centers and this funding would allow us to expand immediately to add this valuable service to our citizens. | The Logan County Water Pollution Control District | 7 | 31 to 90 days | \$1,500,000 |
| Logan | WWTP Upgrade 2009 Phase 1 | Upgrade existing WWTP to meet BSO issues and upgrade 25 year old desludge equipment. | The Logan County Water Pollution Control District | 20 | 0 to 30 days | \$8,200,000 |
| Logan | Before/After School Latch-Key Educational Program | The funding will allow Indian Lake Schools to offer a quality latch-key before/after school program. This program will allow parents the opportunity to have their children in a safe place while they are at school. The program will be available to all of the schools in the district. Other schools, including Indian Lake, have a similar program. The program will be available to all of the schools in the district. Other schools, including Indian Lake, have a similar program. The program will be available to all of the schools in the district. Other schools, including Indian Lake, have a similar program. | Indian Lake Schools | 20 | 91 to 180 days | \$250,000 |
| Logan | Foster Care Telepsychiatry Program | Many children in foster care require specialized mental health intervention due to their experiences of trauma, loss, and abandonment. Psychiatric care is an essential component of this, but it is difficult for Child and Adolescent Psychiatrists, who would like to provide these services to children in the foster care program—many of whom live with families in remote or rural locations—through telepsychiatry. Adult believes telepsychiatry will tremendously enhance our ability to serve the psychiatric needs of our children in a timely and reasonable manner. Anticipated outcomes include: an increase in the number of children receiving the care they need, more efficient work and higher productivity for Adult mental health professionals, and increase effectiveness of our work as children will be able to deal with the trauma they have experienced. | Adriel School, Inc. | 25 | 31 to 90 days | \$25,000 |
| Logan | Before/After School Latch-Key Program | The funding requested will allow the Indian Lake Local School District to offer a quality latch-key program for district residents. The program will allow parents to secure employment out of the area before not available due to childcare issues and travel time constraints. | Indian Lake Schools | 20 | 91 to 180 days | \$250,000 |
| Logan | Before/After School Latch-Key Program | The funding requested will allow the Indian Lake Local School District to offer a quality latch-key program for district residents. The program will allow parents to secure employment out of the area before not available due to childcare issues and travel time constraints. | Indian Lake Schools | 20 | 91 to 180 days | \$250,000 |
| Logan | Before/After School Latch-Key Program | The funding requested will allow the Indian Lake Local School District to offer a quality latch-key program for district residents. The program will allow parents to secure employment out of the area before not available due to childcare issues and travel time constraints. | Indian Lake Schools | 20 | 91 to 180 days | \$250,000 |
| Logan | Before/After School Latch-Key Program | The funding requested will allow the Indian Lake Local School District to offer a quality latch-key program for district residents. The program will allow parents to secure employment out of the area before not available due to childcare issues and travel time constraints. | Indian Lake Schools | 20 | 91 to 180 days | \$250,000 |
| Logan | School Resource Officers | The funding requested will allow the Indian Lake Local School District to employ two (2) school resource officers; one (1) officer will serve the middle school and the other will serve the high school. This officer will provide a positive relationship with students, staff and community members and will assist with school-related issues. | Indian Lake Schools | 2 | 31 to 90 days | \$125,000 |
| Logan | Before/After School Latch-Key Program | The funding requested will allow the Indian Lake Local School District to offer a quality latch-key program for district residents. The program will allow parents to secure employment out of the area before not available due to childcare issues and travel time constraints. | Indian Lake Schools | 20 | 91 to 180 days | \$250,000 |
| Logan | Retro-Fitting Geo-thermal HVAC | The funding requested will allow the Indian Lake Local School District to retro-fit two (2) existing school buildings with geo-thermal HVAC. The retro-fitting will reduce heating and cooling costs annually approximately \$45,000 per school building. The funds requested would allow the district to install an ADA compliant handicapped elevator in the high school. Currently, the second floor of the high school is not handicapped accessible. | Indian Lake Schools | 20 | 91 to 180 days | \$1,000,000 |
| Logan | High School Handicapped Elevator-ADA Approved | The funds requested would allow the district to install an ADA compliant handicapped elevator in the high school. Currently, the second floor of the high school is not handicapped accessible. | Indian Lake Local Schools | 5 | 91 to 180 days | \$300,000 |

| Project County | Project Name | Description | Organization | Number of Jobs | Timeframe to start | Estimated Stimulus Amount |
|----------------|--|---|---|----------------|--------------------|---------------------------|
| Logan | Water System Telemetry and Metering Replacement | Replacement of the Village water system telemetry and new water meters throughout. | Village of Belle Center | 10 | 91 to 180 days | \$75,000 |
| Logan | Logan County Highway garage cold storage facility | 120'x60' cold storage facility to house Logan County Engineer's Office equipment and materials. Structure would be a steel sided pole building | Logan County Engineer's Office | 30 | 91 to 180 days | \$220,000 |
| Logan | Wastewater Dept Truck | New 1 Ton 4 Wheel Drive Diesel Dump Truck with lift pump crane & snow plow blade. | Village of West Liberty | 4 | 31 to 90 days | \$60,000 |
| Logan | Fire Hydrant Replacement | Replace 10 old leaking Fire Hydrants with new hydrants with watch valves | Village of West Liberty | 5 | 31 to 90 days | \$35,000 |
| Logan | Backup Power for Water Plant & Booster Station | Install 50 KW Generat with automatic switch to provide backup power for the Village WTP. Install wiring & provide 25 KW portable Generat for backup power for water system booster station. | Village of West Liberty | 5 | 31 to 90 days | \$50,000 |
| Logan | West Liberty Sewer Rehab & Plant Update | Clean & videotape approx. 1,300 feet of sewer main, videotape 17 laterals, line main laterals (as needed) from the main to the front of the customer property. Smear test 25,000 feet of sewer main. Install SCADA system at WWTPT. | Village of West Liberty | 15 | 31 to 90 days | \$100,000 |
| Logan | Storm Sewer Improvements | This is a project for the 72 acres area of storm sewer and catch basin improvements for the Village of West Liberty. The storm drains and catch basin are in need of repair or replaced. We need larger lines into the 72 acre area. The water get away fast enough and the drains are not big enough. Thank You | Village of West Liberty | 20 | 91 to 180 days | \$1,100,000 |
| Logan | City of Bellefontaine, Ohio Watermain Extensions | This project consists of extending new, larger watermain as identified in our 2002 city wide Water System Master Plan. Since this plan was completed the City has spent over \$500,000 of its own funds performing some of the most urgent watermain upgrades to ensure proper drinking water & fire protection exists for our inhabitants under every condition. The improvements made have advanced the desired results & we wish to make the rest of the improvements identified by that study. Due to the loss of 2 manufacturing facilities this year that took 2 of our largest water users our water fund balance does not currently allow us to make further improvements without further raising rates & in a down economy that probably would not be a very popular choice. | City of Bellefontaine, Ohio | 12 | 91 to 180 days | \$764,056 |
| Logan | Columbus St. Reconstruction Project | Reconstruction of Columbus Street from US Route 88 west - 1935 feet to a one lane railroad overpass bridge. The also need to replace storm sewers, base paving and placing an asphalt concrete surface. The street is in disrepair. All old trolley line an along this street and the railroad ties, brick, etc. are working up through the existing asphalt concrete surface. Thank You | Village of West Liberty | 20 | 31 to 90 days | \$243,018 |
| Logan | Middleburg sanitary collection system | To construct a low pressure sanitary collection system in the Village of Middleburg Ohio. This is an unsewered community with many low to low moderate elderly residents. All residences have private wells. | The Logan County Water Pollution Control District | 5 | 31 to 90 days | \$1,235,000 |
| Logan | County Fire Radio System | The morales will be offered to purchase new radios for 22 Fire & EMS departments in three counties. These departments are responsible for areas in 5 counties. Due to new FCC regulations current equipment will be obsolete. New FCC rules mandate a change the current equipment is not capable of doing. The morales will also replace the main Fire Base Radio at the Sheriff's Office Dispatch Center. A total of 120 mobile units vehicles, 302 handheld units and base unit will be purchased. | Logan County Sheriff's Office | 17 | 31 to 90 days | \$600,000 |
| Logan | Abandoned landfill monitoring for water quality | Four years ago the Logan County Solid Waste District began testing the lands surrounding an abandoned, private, unlined, dump, closed since 1985 for migrating landfill gas. Landfill gas monitoring was continued. Three years ago the District tried to mitigate the methane migration problem with installation of underground pipes in ditches meant to draw gas to the surface rather than migrate. A year ago we modified the system by installing a new vent gas from the underground system. This worked. Last year the Logan County Health Department, installed eight nested, monitoring wells surrounding this property to test surface water and aquifer water for potential dangerous chemical compounds. Testing of water has occurred for just over a year and the results continue to come out non-conforming. This report means no underlying aquifer has occurred. Our funding to continue this monitoring is exhausted. This is an important study that may impact the environment and the health of residents for years to come and continuing this study of this important study is urgently needed. | Logan County Solid Waste Management District | 1 | 31 to 90 days | \$60,000 |
| Logan | Township Hall | Township Hall - The trustees have provided the basic needs to maintain the township hall that dates back to 1986. The hall needs to be historic property, the hall needs extensive exterior work including roofing, windows, foundation stabilization. | Liberty Township/Logan County | 25 | 181 days or more | \$50,000 |
| Logan | Signs | Signs - Signs are deteriorating and, for safety reasons, need attention soon. | Liberty Township/Logan County | 3 | 31 to 90 days | \$2,000 |
| Logan | Guard Rails | Guard rails - Guard rails in the township need upgraded but this has not been a priority due to other, more pressing needs for the available funds. | Liberty Township/Logan County | 3 | 31 to 90 days | \$7,000 |
| Logan | Road Resurfacing | Road resurfacing - The township is responsible for maintaining 21.26 miles of roadway. The township needs to pave 5 miles of roadway at \$50,000 per mile. | Liberty Township/Logan County | 8 | 31 to 90 days | \$250,000 |
| Logan | Township Truck Storage | Township truck storage - The township garage is heated but is not insulated. This proposal is to lower the ceiling to reduce the heated areas and to insulate to save energy costs. | Liberty Township/Logan County | 3 | 0 to 30 days | \$6,000 |
| Logan | Developing energy efficient material recovery faci | The Logan County Solid Waste Management District just purchased a lumber yard with good working building with commercial showroom space. The building has been idle for two years. The District just immediately began renovating those parts of the facility that need it: the roof, the lighting system, and the heating and air conditioning. Further than get the standard ties, new roof, 2 new HVAC units, reworking the existing lighting system the District is seeking for stimulus funds to install geothermal heating, solar panels for electric generation (roof top or ground, we have a hole), replacing lighting with efficient lighting, consider a green roof, install necessary cooling systems after geothermal installation. This facility will focus a material recovery facility for district wide residential and commercial waste as well as a public education area in the showroom space. Estimates on jobs created or related relate to geothermal and solar installers. The facility will create 6 new, good paying, green jobs for recycling. Thank you. Project would purchase and install three (3) weather alert and warning sirens in areas without warning coverage. | Logan County Solid Waste Management District | 6 | 0 to 30 days | \$250,000 |
| Logan | Warning Sirens | The sirens would greatly enhance public safety in these areas | Lakeview Fire Dept | 4 | 91 to 180 days | \$90,000 |
| Logan | woodchucker | Installation of a solid fuel furnace designed to lower winter kilowatt usage. Approximate yearly savings \$,200kw. | Rump Family | 3 | 31 to 90 days | \$7,000 |
| Logan | Dislocated Worker Development Program | Provide employment and continued training for employees impacted by layoffs. Employment activities would include technical support to local industrial companies as well as support and administrative activities. | System7, Inc. | 5 | 0 to 30 days | \$700,000 |
| Logan | Development of High Efficiency Energy Utilization | This could create a positive impact on local manufacturers by helping to create more efficient processes and machinery. Services to be provided include control systems updates and networking between the plant floor operations and the front office environment. Advanced energy management systems, PLC based control system, lighting sensors, solar panels, solarized valves, pumps, heat exchangers and other components to integrate solar, natural gas and electric power for heating, intelligent lighting and other load management systems. | System7, Inc. | 5 | 0 to 30 days | \$500,000 |
| Logan | Chattanooga Loch | Development of 30 or more jobs with a special focus on the training and employment of special needs adults within Logan County. This new establishment is being developed in cooperation with RTC Employment Services and BVR. Chattanooga Loch is a growing catering/bakery enterprise which utilizes such individuals on a non-routine basis. The company desires to locate itself in a permanent location to increase productivity and hours of employment for this employee base. To be successful, financial assistance is needed with adaptive devices (such as Point of Sale systems) and accessible equipment (such as walk-in coolers vs. stand up refrigeration systems and delivery carts). In addition, the offset of training costs is needed. The results: employment of difficult to employ individuals, reduce impact to Ohio's \$58 billion line, and potentially reduce impact to Ohio's Medicaid costs. | Chattanooga Loch | 30 | 31 to 90 days | \$250,000 |

| Logan | Midwest Express Corp., a Clean Fuels Ohio partner | 1) Replace 20 diesel powered trucks with 32 new CNG trucks. 2) CNG fueling stations. | Clean Fuels Ohio | 5 | 0 to 30 days | \$5,450,000 |
| Logan | air conditioning for our three school buildings | Install air conditioning to help the learning environment for our 1,800 students. Our classrooms reach 90 degrees several times during the school year. Our school district's taxpayers have paid for our 19 year old High School, 15 year old Middle School and a year old Elementary School buildings. These were built long before the CDC was implemented. Every building should have a central air conditioning system located in Logan County. | Benjamin Logan Local Schools | 30 | 91 to 180 days | \$5,000,000 |
| Logan | custom wood working(cabinets, furniture,etc) | Wood Chop project. This is what jobs food on our tables and prep our bills. It's out of my life. We are letting down our small community and our customers when we cannot provide this service. We need operating funds and would like to buy the building we are currently in. | Wood Chop (small family owned business) | 5 | 0 to 30 days | \$450,000 |
| Logan | Replace 1990 Dumptruck and Plow | Replace 1990 dumptruck and plow | Village of Belle Center | 5 | 31 to 90 days | \$75,000 |
| Logan | Demolition of old building in Village & build main | Demolition of antiquated building in the Village and construction of a Village Maintenance Building | Village of Belle Center | 25 | 31 to 90 days | \$250,000 |
| Logan | Remove old and add additional sidewalks in Village | Remove old sidewalks and add sidewalks in remainder of Village outside of Business District. | Village of Belle Center | 50 | 181 days or more | \$1,000,000 |
| Logan | Replacement of curbs and sidewalks in business doi | Remove curbs and sidewalks in business district and replace and pave streets | Village of Belle Center | 30 | 91 to 180 days | \$250,000 |
| Logan | Remove and paint exterior of water tower | Remove old faded paint, sandblast and repaint Village 100,000 gallon water tank | Village of Belle Center | 7 | 31 to 90 days | \$150,000 |
| Logan | Wind Energy At Manufacturing Site | BQ Energy proposes to construct a 60MW wind energy generating facility at a manufacturing site in Logan County, OH. The project will consist of approximately 30 - 40 wind turbines and will provide energy price stability to the site host, and help to anchor a major area employer. The project will be housed entirely on the manufacturing site, requiring no site infrastructure. BQ Energy has already conducted wind permitting agreements and believes this project can be operational by December 2010. | BQ Energy LLC | 200 | 181 days or more | \$45,000,000 |
| Logan | CORNERSTONE PIZZA GAS | MY FAMILY OPENED AN EXCESSIVE GAS STATION IN WEST MANSEED OHIO 2 YEARS AGO. STARTED WITH AN EMPTY BUILDING AND LITTLE MONEY WITH LONG HOURS AND HARD WORK WE HAVE MADE ENDS MEET I AM NOT SURE WITH OUT HELP CAN GO ON IN A GOOD BUSINESS I NEED HELP FOR I AM STRESSED OUT ON NOT BEING ABLE TO DO IT BY MY SELF. BUT I CAN'T AFFORD EMPLOYEES WITH OUT A CASH FLOW. THERE ARE PEOPLE IN THE TOWN THAT NEED WORK. AND NEED HELP TO DO SO. I WOULD ALSO LIKE SOME INFORMATION ON PUTTING AND LAUNDRY MAT IN THE TOWN AND OR FINES TO PURCHASE. PROPERTY TO FINISH AND GET PEOPLE BACK IN HOMES. I SPEND AROUND 100 HOURS A WEEK IN THIS SMALL TOWN IN THE CHILDREN NEED THINGS TO DO AND THE ELDER AS WELL. THE TOWN DOES HAVE A BANK AND A GROCERY STORE. THE TOWN HAS ALLOT OF GOOD IT JUST NEEDS SOME HELP AND IF I COULD JUST HELP IN ANY WAY TO GET PEOPLE INTO THAT TOWN I WILL BE ABLE TO MAKE A BETTER PLACE FOR MY FAMILY AND THE COMMUNITY. ITS NOT ABOUT ME ITS ABOUT THE PEOPLE IN THIS TOWN AND THAT PASSES THRU THIS TOWN. | CORNERSTONE PIZZA @ GAS | 10 | 0 to 30 days | \$50,000 |

|----------------|--|--|-------------------------------|----------------|--------------------|---------------------------|
| Logan | Overtime for deputies | This funding will provide overtime for deputies for enforcement of high crime areas. Due to a lay-off our office has to continue to enforce areas with fewer officers. This money will allow budget money to be utilized in other areas and to prevent others from being laid off. | Logan County Sheriff's Office | 1 | 0 to 30 days | 20000.00 |
| Lorain | N. Case Rd. Sanitary Sewer Installation, Phase 1 N | Installation of 3,800 linear feet of new sanitary sewer on North Case Road to provide for elimination of septic systems. | City of North Ridgeville | 10 | 31 to 90 days | \$1,140,000 |
| Lorain | N. Case Rd. Sanitary Sewer Installation, Phase 2 t | Installation of 4,000 linear feet of new sanitary sewer on North Case Road to provide for elimination of septic systems from Barnes Rd. to Shoppet Circle) | City of North Ridgeville | 10 | 31 to 90 days | \$1,500,000 |
| Lorain | CASCADE SIPHON REVERSAL | REVERSAL OF AN EXISTING SIPHON THAT BACKS UP ANNUALLY CAUSING OVERFLOWS IN THE SEWER SYSTEM. PROJECT INCLUDES NEW SANITARY SEWERS AND ELIMINATION OF OVERFLOWS. | CITY OF ELYRIA | 10 | 31 to 90 days | \$2,010,000 |
| Lorain | Avon Belden Rd. Sanitary Sewer Ext. & Elimination | Installation of approximately 5,000 linear feet of new sanitary sewer on Avon Belden Road to provide for elimination of septic systems from old Schneider Pump Station to Becker Pump Station. Project also includes the elimination of the Becker Pump Station. | City of North Ridgeville | 40 | 31 to 90 days | \$1,860,000 |
| Lorain | Mussey Avenue Conveyance | Install a 700 linear feet of new sanitary sewer line, including elimination of several sewer overflows that currently go directly to the Black River. ELIMINATION OF SEVERAL OVERFLOWS WITHIN THE CITY INCLUDING INSTALLATION OF NEW RETENTION CELLS, 20,000 FEET OF NEW SANITARY SEWERS & NEW UNDERGROUND STORAGE. SEWER SEPARATION AND NEW HOUSE CONNECTIONS WOULD BE INCLUDED. | City of Elyria | 20 | 31 to 90 days | \$3,000,000 |
| Lorain | OVERFLOW ELIMINATION PROJECT | UPGRADE AND REFINISHMENT OF SANITARY LIFT STATION SERVING A RESIDENTIAL NEIGHBORHOOD. PROJECT WOULD INCLUDE ELIMINATION OF OVERFLOW BY ADDING STORAGE, NEW SEWER CONVEYANCE SYSTEM AND/OR INCREASING THE CAPACITY OF THE PUMP STATION ITSELF. | CITY OF ELYRIA | 75 | 31 to 90 days | \$2,000,000 |
| Lorain | PINEWOOD STREET LIFT STATION IMPROVEMENTS | INSTALLATION OF NEW SANITARY LIFT STATION AND REROUTING OF SANITARY SEWERS INCLUDING ELIMINATION OF THREE EXISTING SEWER OVERFLOWS. CITY IS INITIATING PLANS FOR DESIGN. | CITY OF ELYRIA | 20 | 31 to 90 days | \$300,000 |
| Lorain | TURNER STREET LIFT STATION | INSTALLATION OF NEW SEWER, INCREASED CAPACITY TO EXISTING LIFT STATION AND/OR NEW UNDERGROUND STORAGE SYSTEM. ELIMINATION OF A SEWER OVERFLOW WOULD BE INCLUDED. CITY HAS INITIATED PLANS TO DESIGN THIS PROJECT. | CITY OF ELYRIA | 30 | 91 to 180 days | \$3,250,000 |
| Lorain | OVERBROOK STREET LIFT STATION IMPROVEMENTS | IMPROVE AND REFINISH THE EXISTING SANITARY SEWER LIFT STATION ON OVERBROOK STREET. PROJECT WOULD INCLUDE INSTALLATION OF NEW SEWER, INCREASED CAPACITY TO EXISTING LIFT STATION AND/OR NEW UNDERGROUND STORAGE SYSTEM. ELIMINATION OF A SEWER OVERFLOW WOULD BE INCLUDED. CITY HAS INITIATED PLANS TO DESIGN THIS PROJECT. | CITY OF ELYRIA | 25 | 31 to 90 days | \$450,000 |
| Lorain | HYDRAULIC BOTTLENECK REMOVAL | ELIMINATION OF A BOTTLENECK IN THE SANITARY SEWER SYSTEM THAT CAUSES ANNUAL RESIDENTIAL BACK UPS AND SEVERAL SYSTEM OVERFLOWS DIRECTLY TO THE BLACK RIVER. THE CITY IS CURRENTLY PLANNING THE DESIGN OF THIS PROJECT. | CITY OF ELYRIA | 40 | 31 to 90 days | \$2,250,000 |
| Lorain | Rehabilitation and Repair of Ford Road Bridge | This bridge is closed at present for Structural safety since December 5th 2008. The project includes repair and reconstruction of Steel Struss Bridge with slope stabilization of Approaching roads. The project also includes reconstruction of approaching roadways. The Bridge serves as major access to a shopping mall and large shopping area. The Bridge also serves as access to County Metro Park. Closing of Bridge is creating a inconvenience to the Public in the City and surrounding communities. Opening of this bridge is very important to economic growth of the area. | City of Elyria | 50 | 91 to 180 days | \$1,000,000 |
| Lorain | Olive Avenue Water Main Replacement | Replacement of approximately 6,000 linear feet of existing deteriorated water main which experiences frequent breaks with a new eight-inch water main to provide adequate water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$486,000 |
| Lorain | WEST RIVER ROAD LIFT STATION & SEWER | REFURBISHMENT OF AN EXISTING LIFT STATION WHOSE FLOW HAS REDUCED SIGNIFICANTLY. NEW LIFT STATION INCLUDING VENTILATION, CONTROLS, PUMPS, PIPING, STRUCTURAL WORK, CONCRETE WORK IN THE WET WELL, AND ANY AESTHETIC WORK REQUIRED ON THE BUILDING. PROJECT ALSO INCLUDES 2,000 FEET OF NEW 18" FORCE MAIN AND 1,000 FEET OF NEW 18" STORM SEWER INCLUDING STRUCTURAL SUPPORTS OVER A LOW LYING RIVERBED. THIS PROJECT IS APPROXIMATELY 180% FINANCED AND WILL BE SENT TO OHIO EPA FOR APPROVAL SOON. | CITY OF ELYRIA | 75 | 31 to 90 days | \$2,100,000 |
| Lorain | SCHADEN ROAD SANITARY SEWER & LIFT STATION | 10,000 FEET OF NEW SANITARY SEWER, 20,000 FEET OF NEW FORCE MAIN AND A NEW SANITARY LIFT STATION OUTSIDE OF THE CITY'S CORPORATION LIMITS. THIS PROJECT WOULD ELIMINATE SEVERAL HOME SEWERS THAT ARE OUTSIDE OF THE RURAL COMMUNITY. DESIGN IS ALMOST COMPLETED AND THE DRAWINGS WILL BE SENT TO OHIO EPA FOR APPROVAL SOON. | CITY OF ELYRIA | 40 | 31 to 90 days | \$1,200,000 |
| Lorain | CLARK STREET STORM SEWER | REPAIR OF AN EXISTING STORM SEWER. BUSINESSSES IN THAT AREA COMPLAIN ABOUT STANDING WATER, WATER IN THEIR BUILDINGS AND SAFETY DURING MAINTENANCE OF EXISTING DITCHES. | CITY OF ELYRIA | 20 | 91 to 180 days | \$200,000 |
| Lorain | GROUT SEALING OF SEWER JOINTS IN ST. JUDE'S AREA | GROUT SEALING OR LINING OF APPROXIMATELY 60,000 FEET OF SEWERS IN AN OLD RESIDENTIAL NEIGHBORHOOD. THIS PROJECT HAS BEEN PLANNED FOR ABOUT 10 YEARS BUT FUNDING HAS NEVER BEEN AVAILABLE. | CITY OF ELYRIA | 20 | 31 to 90 days | \$800,000 |
| Lorain | GROUT SEALING OF SEWER JOINTS IN GEORGETOWN AREA | GROUT SEALING OR LINING OF APPROXIMATELY 5,000 FEET OF SEWERS IN AN OLD RESIDENTIAL NEIGHBORHOOD. THIS IS AN AREA OF THE CITY WITH A LOT OF PONDING WATER IN YARDS DUE TO LIMITED SEWER CAPACITIES. THIS PROJECT WOULD BE DESIGNED TO MINIMIZE BACK UPS AND FLOODING | CITY OF ELYRIA | 20 | 91 to 180 days | \$800,000 |
| Lorain | Repair, Reconstruction and Resurfacing of West Riv | West River Road is a major access road to Midway Mall and several shopping areas. The project is about 2.5 mile long and varies from 4 lanes to 2 lanes. The existing surface is concrete concrete and asphalt. The roadway is in very deplorable condition. The project involves replacing back sections of concrete pavement, adding a 4' shoulder to existing asphalt portion, repairs to sidewalks and curbs, lane to lane and resurfacing of existing asphalt section of the roadway. The project is very necessary for development and economic growth of this area. | City of Elyria | 50 | 91 to 180 days | \$1,709,118 |
| Lorain | South Barton Road Water Main Replacement | Replacement of approximately 2,200 linear feet of existing deteriorated six-inch water main which experiences frequent breaks with a new eight-inch water main to provide adequate water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$25,000 |
| Lorain | DELAWARE AVE REPAVING AND STORM SEWERS | REPAVING OF APPROXIMATELY 2,800 FEET OF DELAWARE AVENUE AND INSTALLATION OF 1,000 FEET OF NEW STORM SEWER, INCLUDING CATCH BASINS AND MANHOLES. | CITY OF ELYRIA | 30 | 91 to 180 days | \$300,000 |
| Lorain | PURDUE AVE REPAVING AND STORM SEWERS | REPAVING OF APPROXIMATELY 2,800 FEET OF PURDUE AVENUE AND INSTALLATION OF 1,000 FEET OF NEW STORM SEWER, INCLUDING CATCH BASINS AND MANHOLES. | CITY OF ELYRIA | 30 | 91 to 180 days | \$300,000 |
| Lorain | Boulder Drive Water Main Replacement | THIS ROAD IS PARALLEL TO DELAWARE AVENUE. Replacement of approximately 2,300 linear feet of existing deteriorated water main which experiences frequent breaks with a new eight-inch water main to provide adequate water pressure to residents. | City of North Ridgeville | 10 | 31 to 90 days | \$49,200 |
| Lorain | Enforce Success | The City of Sheffield Lake has the highest domestic violence rate in Lorain County and the 3rd highest foreclosure rate. We also, have the highest Caucasian loan rejection rate in Lorain County. To combat the growing issues of unemployment, that has reduced jobs and destabilized family security, plus still provide protection with reduced tax income. Sheffield has been forced to go to one man patrol cars with two cars per shift. Officer security and efficiency has been scaled. To improve City security we need to have better officer support. By providing each of the cars with a computer and a dash camera we will make each officer more effective and secure. The cost of providing 2 cars with cameras, mounts and computer is \$11,000. The City will match the balance and is requesting a Grant of \$8,000. | City of Sheffield Lake | 3 | 31 to 90 days | \$8,000 |

We also, have the highest Caucasian loan rejection rate in Lorain County. To combat the growing issues of unemployment, that has reduced jobs and destabilized family security, plus still provide protection with reduced tax income. Sheffield has been forced to go to one man patrol cars with two cars per shift. Officer security and efficiency has been scaled. To improve City security we need to have better officer support. By providing each of the cars with a computer and a dash camera we will make each officer more effective and secure. The cost of providing 2 cars with cameras, mounts and computer is \$11,000. The City will match the balance and is requesting a Grant of \$8,000. | City of Sheffield Lake | 3 | 31 to 90 days | \$8,000 |
| Lorain | Enforce Success | The City of Sheffield Lake has the highest domestic violence rate in Lorain County and the 3rd highest foreclosure rate. We also, have the highest Caucasian loan rejection rate in Lorain County. To combat the growing issues of unemployment, that has reduced jobs and destabilized family security, plus still provide protection with reduced tax income.
